Course content: The course is designed to provide students with the elementary mathematical tools that are needed to study Economics. Students will be introduced to basic mathematical concepts and manipulations. Examples of applying these techniques to a variety of economical and management problems are given throughout the course. Content - Part A: Arithmetic operations, powers and roots; basic algebra; introduction to linear programming; logarithms and exponential growth; sets, functions and graphs; differentiation of functions of one variable; marginal cost and marginal revenue; optimisation of functions of one variable; difference equations; equilibrium and stability in dynamical models. Content - Part B: Introduction to integration; consumer and producer surplus; matrix algebra; systems of linear equations; functions of several variables; partial differentiation; optimisation and the Lagrange multiplier method.

Teaching: This course is delivered through a combination of classes, workshops and lectures totalling a minimum of 40 hours across the Michaelmas Term and 32 hours of classes and lectures in the Lent Term with 2 hours of revision material in the Summer term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: The course will be mostly taught from the lecturers' notes. The following books can provide additional material: I Jacques, *Mathematics for Economics and Business*; M Rosser, *Basic Mathematics for Economists*; M Anthony & N L Biggs, *Mathematics for Economics and Finance: Methods and Modelling*, CUP, 1996.

Assessment: Exam (100%, duration: 3 hours) in the summer exam

period.

MA203 Half Unit

Real Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Anthony

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Introduction to Abstract Mathematics (MA103).

Course content: This is a course in real analysis for those who have already met the basic concepts of sequences and continuity on the real line. Here we generalize these concepts to Euclidean spaces and to more general metric and normed spaces. These more general spaces are introduced at the start and are emphasized throughout the course.

Topics covered are:

- Metric and normed spaces, open and closed sets.
- Sequences in metric spaces, compactness, completeness.
- Pointwise and uniform convergence of sequences of functions.
- Continuity of real valued functions and of functions between metric spaces, uniform continuity and Lipschitz condition.
- Differentiation of real valued functions, the mean value theorem, differentiation of functions between Euclidean spaces, and partial derivatives.
- Series, including power series and series in normed spaces.
- Riemann integral and the fundamental theorem of calculus.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: A comprehensive pack of lecture notes will be provided. The following book may prove useful for some aspects of the course:

- Robert G Bartle & Donald R Sherbert, *Introduction to Real Analysis*

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA207 Half Unit

Further Quantitative Methods (Mathematics)

This information is for the 2020/21 session.

Teacher responsible: Dr James Ward

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have previously taken **MA107 Quantitative Methods (Mathematics)**. It is not available to students who have taken **MA100 Mathematical Methods**, or equivalent, nor higher level methods courses.

Course content: This is a second course in quantitative methods, following on directly from Quantitative Methods (Mathematics) (MA107). This course will contain further algebra and calculus. As with the course MA107, the emphasis will be on applications in economics and finance. Topics covered: Matrix methods in portfolio analysis. Linear independence. Rank of a matrix. Eigenvalues and eigenvectors. Diagonalisation. Linear systems of

recurrence equations. Markov process. Second-order recurrence equations. Macroeconomic models. Vector geometry. Gradient and directional derivative. Tangent hyperplanes and the optimal bundle. Resource allocation and Pareto efficiency. Orthogonal matrices and quadratic forms. Critical points of quadratic functions. Taylor's approximation. Optimisation of functions of two or more variables.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 30 hours in the Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: M Anthony & N Biggs, *Mathematics for Economics and Finance* (Cambridge, 1996); A Ostaszewski, *Mathematics in Economics* (Blackwell, 1993).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA208 Half Unit

Optimisation Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Julia Boettcher

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103) are pre-requisites. Real Analysis (MA203) is desirable, and students who have not done MA203 should contact the teacher responsible.

Course content: Based on the relevant mathematical theory, the course describes various techniques of optimisation and shows how they can be applied. More precisely, the topics covered are: Introduction and review of mathematical background. Introduction to combinatorial optimisation; shortest paths in directed graphs; algorithms and their running time. Classical results on continuous optimisation: Weierstrass's Theorem concerning continuous functions on compact sets; optimisation of differentiable functions on open sets; Lagrange's Theorem on equality constrained optimisation; Karush, Kuhn, and Tucker's Theorem on inequality constrained optimisation. Linear programming and duality theory.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Good sources of literature are R K Sundaram, *A First Course in Optimisation Theory*; N L Biggs, *Discrete Mathematics* (2nd edition). Additional notes will be made available throughout the course.

Assessment: Exam (90%, duration: 2 hours) in the summer exam period.

Continuous assessment (10%).

MA209 Half Unit

Differential Equations

This information is for the 2020/21 session.

Teacher responsible: Dr Arne Lokka

Availability: This course is available on the BSc in Actuarial

Science, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103) (or MA102) are pre-requisites. Real Analysis (MA203) and/or Further Mathematical Methods (MA212) are highly desirable, and students who have done neither MA203 nor MA212 should contact the lecturer.

Course content: The course concentrates on the theory and qualitative analysis of (ordinary) differential equations, although some solution techniques will be considered as well. Special attention will be paid to geometric concepts and the role of differential equations in the theory of dynamical systems. Specific topics covered are: First examples; illustrations of use of the computer package Maple. Existence and uniqueness of solutions. Autonomous 1 and 2 dimensional systems. Linear equations and systems: phase portraits; classification of systems in the plane; higher dimensional systems and higher order equations. Nonlinear systems in the plane: local and global behaviour; linearisation and stability at equilibrium points; Lyapunov functions; limit cycles. Control theory; linear systems; controllability.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Full notes will be handed out throughout the course. A good additional text book is D K Arrowsmith & C M Place, *Dynamical Systems - Differential Equations, Maps and Chaotic Behaviour*. Other books closely related to R Grimshaw, *Nonlinear Ordinary Differential Equations* and W A Brock & A G Malliaris, *Differential Equations, Stability and Chaos in Dynamic Economics*.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA210 Half Unit

Discrete Mathematics

This information is for the 2020/21 session.

Teacher responsible: Dr Peter Allen

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA103 Introduction to Abstract Mathematics, or an equivalent course giving a background in rigorous mathematics.

Course content: This is a course covering a number of concepts and techniques of discrete mathematics. Topics covered: Counting: selections; inclusion-exclusion; generating functions; recurrence relations. Graph Theory: basic concepts; walks, paths, tours and cycles; trees and forests; colourings. Coding theory: basic concepts; linear codes.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and online video lectures.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: PJ Cameron, *Combinatorics* (CUP 1994) An alternative book is: NL Biggs, *Discrete Mathematics* (OUP 2004) Extensive notes covering the course content in full will be distributed, so you may well not need either book.

Assessment: Exam (90%, duration: 2 hours) in the summer exam period.
Problem sets (10%) in the LT.

MA211 Half Unit

Algebra and Number Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Graham Brightwell

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Introduction to Abstract Mathematics (MA103) and Mathematical Methods (MA100).

Course content: The aim of this course is to continue (from MA103) the study of abstract algebraic structures. There are two main strands in the course. First, we develop further the theory of groups, using permutation groups as a key example. We investigate the important concepts of normal subgroups and quotient groups. Secondly, we introduce rings, and study factorisation in rings, where we also look at some connections with number theory. Groups: Review of basic group theory; permutations and permutation groups; homomorphisms; conjugation, normal subgroups and quotient groups; the first isomorphism theorem for groups. Rings: basic properties of rings and examples (including polynomial rings, matrix rings, and number rings); subrings, ideals and ring homomorphisms; divisibility in integral domains; greatest common divisors; Euclidean rings and unique factorisation; applications to number theory; principal ideal domains.

Teaching: This course is delivered through a combination of classes and lectures, totalling a minimum of 30 hours across Michaelmas Term. This year, this teaching will be delivered through a combination of lectures released as online videos and face-to-face or virtual classes.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: *A Book of Abstract Algebra*, Charles C Pinter, (Dover, 2nd edition, 2010);

Introduction to Algebra, Peter J Cameron (OUP 1988);

Rings, Fields and Groups: Introduction to Abstract Algebra, Reg Allenby (Butterworth-Heinemann, 2nd edition 1991).

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the MT.

intermediate-level knowledge of calculus and linear algebra, linear independence, eigenvalues, diagonalisation, and proficiency in techniques of differentiation and integration.

Course content: This course develops ideas first presented in MA100. It is divided into two halves: calculus and linear algebra. The calculus half explores how integrals may be calculated or transformed by a variety of manipulations, and how they may be applied to the solution of differential equations. This aim is achieved by studying the following topics: Limit calculations. Riemann integral. Multiple integration. Improper integrals. Manipulation of integrals. Laplace transforms. Riemann-Stieltjes integral, to a level of detail dependent on time constraints. The linear algebra half covers the following topics: Vector spaces and dimension. Linear transformations, kernel and image. Real inner products. Orthogonal matrices, and the transformations they represent. Complex matrices, diagonalisation, special types of matrix and their properties. Jordan normal form, with applications to the solutions of differential and difference equations. Singular values, and the singular values decomposition. Direct sums, orthogonal projections, least square approximations, Fourier series. Right and left inverses and generalized inverses.

Teaching: This course is delivered through a combination of lectures, help sessions and classes totalling a minimum of 80 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Useful background texts:

(i) for the calculus half:

Ken Binmore and Joan Davies, *Calculus, Concepts and Methods* (Cambridge University Press 2002);

Robert C. Wrede and Murray R. Spiegel, *Advanced Calculus* (McGraw-Hill Education; 3rd edition 2010).

(ii) for the linear algebra half:

Martin Anthony and Michele Harvey, *Linear Algebra: Concepts and Methods* (Cambridge University Press 2012).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MA222 Half Unit Not available in 2020/21

Further Mathematical Methods (Linear Algebra)

This information is for the 2020/21 session.

Teacher responsible: Dr James Ward

Availability: This course is compulsory on the BSc in Data Science. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should ideally have taken the course Mathematical Methods (MA100) or equivalent, entailing intermediate-level knowledge of linear algebra, linear independence, eigenvalues and diagonalisation.

Course content: This course develops ideas first presented in MA100. It consists of the linear algebra part of MA212, covering the following topics: Vector spaces and dimension. Linear transformations, kernel and image. Real inner products. Orthogonal matrices, and the transformations they represent. Complex matrices, diagonalisation, special types of matrix and their properties. Jordan normal form, with applications to the solutions of differential and difference equations. Singular values, and the singular values decomposition. Direct sums, orthogonal projections, least square approximations, Fourier series. Right and left inverses and generalized inverses.

Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the LT. 1 hour of lectures in the ST.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Written answers to set problems will be expected on a weekly basis.

MA212

Further Mathematical Methods

This information is for the 2020/21 session.

Teacher responsible: Prof Jozef Skokan and Dr James Ward

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available on the BSc in Economics, BSc in Management and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should ideally have taken the course **Mathematical Methods** (MA100) or equivalent, entailing

Indicative reading: The following is a useful background text:

- Martin Anthony and Michele Harvey, *Linear Algebra: Concepts and Methods* (Cambridge University Press 2012).

Assessment: Exam (100%, duration: 1 hour and 30 minutes) in the summer exam period.

MA231

Operational Research Methods

This information is for the 2020/21 session.

Teacher responsible: Dr Giacomo Zambelli

Dr Matoula Kotsialou

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Mathematics, Statistics and Probability Theory to the level of the courses MA107 Quantitative Methods (Mathematics) and ST107 Quantitative Methods (Statistics) is required. In particular, students should have covered elementary distribution theory and the Poisson Process, and have an elementary knowledge of linear algebra. Students must be prepared to use computer packages when required.

Course content: An introduction to all the main theoretical techniques of Operational Research.

Linear optimisation: from the most basic introduction to sufficient conditions for optimality; duality; sensitivity of the solution; discovery of the solution to small problems by graphical methods, and proof of optimality by testing the sufficient conditions. The transportation problem. Modelling real world problems using linear optimisation.

Various other operational research techniques including: Shortest Paths, Critical Path Analysis, Markov Chains, Stable Matchings, Queueing Theory, Simulation, Inventory Management, Dynamic Programming, Decision Theory, Game Theory.

The course includes an assessed software component. The software used will be "Microsoft Excel" and the add-on packages "LP solve" to solve linear optimisation problems and "@ risk" to perform Monte Carlo simulation.

Full lecture notes are provided.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Students will be expected to produce 10 problem sets in the MT and 1 project and 5 problem sets in the LT. The formative coursework comprises weekly problem sets. A mock project will be given, similar in format to the summative project, to be carried out by the same groups that will work on the final project. This is meant as a trial run of the group project, with a similar level of work but with no summative mark.

Indicative reading: Comprehensive lecture notes will be provided. The course content largely follows the following textbook:

- F S160 Hillier, G J160 Lieberman, *Introduction to Operations Research*, McGraw-Hill Series in Industrial Engineering and Management Science. Any edition from 7th onward.

Further reading includes:

- W L Winston, *Operations Research*, Duxbury Press (2004).
- W L Winston, S C Albright: *Practical Management Science*, Cengage Learning. 4th edition or later.
- H P Williams, *Model Building in Mathematical Programming*, Wiley (2013).

Assessment: Exam (80%, duration: 2 hours and 45 minutes) in the summer exam period.

Case analysis (20%) in the LT.

The group project will consist of a case study developed by

the lecturer and presenting a (simplified version of a) real world problem that is amenable to optimisation and simulation techniques that are taught in the course. The students will need to choose the appropriate techniques, develop a mathematical model, implement it using the software taught in the course, and write a report describing the approach and reporting critically the results obtained from the solution of the model.

The group project will be in randomly allocated groups of at most 3, and students will need to submit a teamwork evaluation form to assess whether the workload was fair and balanced.

MA300

Game Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Bernhard Von Stengel and Mrs Nicola Wittur

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business.

This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: The course emphasises a formal treatment of mathematical Game Theory through definitions, theorems and proofs. Familiarity with a rigorous treatment of mathematics is expected. Basic knowledge of matrices as covered in Mathematical Methods (MA100) or Quantitative Methods (MA107) as well as some knowledge of probability is required.

Course content: Concepts and methods of game theory with applications to economics. MA300.1: same as for Game Theory I (MA301). MA300.2: Coalitional game theory - central solution concepts with application: the core, Shapley value, stable sets, weighted majority games, market games, stable matching.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Michaelmas and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture slides will be provided, as well as references to selected papers. Further reading: R Gibbons, *A Primer in Game Theory*, 1992; A Mas-Colell, M Whinston, J Green: *Microeconomic Theory*; M Osborne, A Rubinstein: *A Course in Game Theory*; M Maschler, E Solan, S Zamir: *Game Theory*.

Assessment: Exam (90%, duration: 3 hours) in the summer exam period.

Coursework (10%).

Weekly exercises will be set and marked, and count as coursework.

MA301 Half Unit

Game Theory I

This information is for the 2020/21 session.

Teacher responsible: Prof Bernhard Von Stengel COL 4.12

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business and BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: The course emphasises a formal treatment of

mathematical Game Theory through definitions, theorems and proofs. Familiarity with a rigorous treatment of mathematics is expected. Basic knowledge of matrices as covered in Mathematical Methods (MA100) or Quantitative Methods (MA107) as well as some knowledge of probability is required.

Course content: Concepts and methods of mathematical game theory with some applications to economics. Nim and combinatorial games. Congestion games. Game trees with perfect information. Backward induction. Extensive and strategic (normal) form of a game. Expected utility. Nash equilibrium. Commitment. Zero sum games, mixed strategies, maxmin strategies. Nash equilibria in mixed strategies. Finding mixed-strategy equilibria for two-person games. Extensive games with information sets, behaviour strategies, perfect recall. If time permits: The Nash bargaining solution, multistage bargaining, private-value auctions.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided. Further reading: K Binmore, *Playing for Real: Game Theory*, CUP, 2007; E Mendelson, *Introducing Game Theory and Its Applications*, CRC 2004.

Assessment: Exam (90%, duration: 2 hours) in the summer exam period.

Coursework (10%).

Weekly exercises will be set and marked, and count as coursework.

MA303 Half Unit Not available in 2020/21

Chaos in Dynamical Systems

This information is for the 2020/21 session.

Teacher responsible: Prof Graham Brightwell

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: **Mathematical Methods** (MA100) and **Introduction to Abstract Mathematics** (MA103) are pre-requisites. It is highly desirable to have also taken the course **Real Analysis** (MA203).

Course content: Given a function $f: X \rightarrow X$, what is the (iterative) behaviour of $f^n(x) = f(f(\dots(f(x))))$ (f applied n times). What do 'orbits' of f look like - an orbit has the form $x, f(x), f(f(x)), \dots$. Particular emphasis is given to long-term evolution and stability analysis of such systems $f: X \rightarrow X$. We explore connections with so-called fractal sets, which are roughly sets that look the same at any degree of magnification, and may have a dimension which is not an integer. We also discuss chaotic maps f , where $f^n(x)$ cannot be determined if there is any small uncertainty about x . Topics covered: Iteration of discrete maps. Orbit analysis. Contraction mapping theorem. Quadratic maps. Bifurcations. Definition of chaos. Sarkovskii's theorem. Fractal sets.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Full lecture notes will be provided. The following may prove useful, R Devaney, *A First Course in Chaotic Dynamical Systems*; R Devaney, *An Introduction to Chaotic Dynamical Systems*; E Scheinerman, *Invitation to Dynamical Systems*. A fun and interesting read might be Gleick, J., *Chaos: Making a New Science*.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA314 Half Unit

Algorithms and Programming

This information is for the 2020/21 session.

Teacher responsible: Dr Tugkan Batu

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: **Introduction to Abstract Mathematics** (MA103), or an equivalent course giving a background in rigorous mathematics. Basic knowledge of Python programming is highly desirable.

Course content: Introduction to theory of algorithms guided by basic Python programming. Algorithmic thinking: Do you know how to multiply integers? Basic toolkit for the design and analysis of algorithms, and an in-depth study of sorting algorithms: Running time, Recurrence relations, Big-O notation, Correctness, Finite induction, Loop invariants. Optimal comparison sorts, and sorting in linear time. Tour of the most important data structures, fundamental algorithms, and algorithm design techniques: Lists, Stacks, Queues, Hashing. Breadth-first search, Depth-first search, Prim's algorithm, Dijkstra's algorithm, Maximum Flow. Incremental and recursive algorithms, Divide-and-Conquer, Greedy algorithms, Master Theorem. A selection of special topics.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online classes and lectures delivered as online prerecorded videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: T H Cormen, C E Leiserson & R L Rivest, *Introduction to Algorithms*, MIT Press 1990 (or 2nd edn, 2001 or 3rd edn, 2009)

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the MT.

MA315 Half Unit

Algebra and its Applications

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Anthony

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: MA103 *Introduction to Abstract Mathematics* and MA211 *Algebra and Number Theory*.

Course content: The aim of the course is to continue the study of abstract algebraic structures and show how these structures can be used to solve concrete problems. There are three strands: Group actions; Rings, polynomials and fields; Applications, including coding and cryptography. Group actions; revision of permutation groups; orbits and stabilizers, the orbit-stabilizer theorem; applications to counting problems. Rings, polynomials and fields: revision of rings; quotient rings; polynomial rings and the Euclidean algorithm for polynomials; irreducible polynomials and factorisation of polynomials. fields; fields as quotients of polynomial rings; construction and properties of finite fields: Applications: Designs and orthogonal latin squares; Error-correcting codes, including linear codes, cyclic codes and perfect

codes; cryptography.

Teaching: Teaching will consist of 22 hours of lectures and 10 hours of classes, in the LT. Some of this might be delivered through a combination of virtual classes and lectures delivered as online videos

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided. No additional reading is required, but the following books are recommended for further reading.

Introduction to Algebra, Peter J Cameron (OUP 2007);

Codes, N.L. Biggs (Springer, 2008).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA316 Half Unit Not available in 2020/21 Graph Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Graham Brightwell

Availability: This course is available on the BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA103 or equivalent course giving a background in rigorous mathematics.

Course content: This course examines the basic concepts and techniques of graph theory. The topics to be covered are: fundamental concepts, connectivity and matchings, colourings, extremal problems. Optional topics include flows, Ramsey theory, the probabilistic method, spectral graph theory, or matroids.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures in the ST.

Revision Lecture is better received by students in ST

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: D. B. West, *Introduction to Graph Theory*, Prentice Hall 2001. R. Diestel, *Graph Theory*, Springer 2010. N. L. Biggs, *Discrete Mathematics*, OUP 2004. J.A. Bondy and U.S.R. Murty, *Graph Theory with Applications*, North-Holland, 1976. B. Bollobas, *Modern Graph Theory*, Springer 1998.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA317 Half Unit Complex Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Amol Sasane
Olivier Gossner

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Solid grounding in mathematics, especially analysis, in particular MA203 Real Analysis.

Course content: The course will cover the fundamental concepts and methods in complex analysis. The basic objects of study in the course will be complex differentiable functions in domains, and the far-reaching consequences of the notion complex differentiability will be dealt with in the course. The specific topics that will be covered are: the geometry of complex numbers, complex differentiation, Cauchy-Riemann equations, Cauchy's

integral theorem and its consequences, Taylor and Laurent series, and harmonic functions. The core results will be illustrated with computational examples and applications.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: (1) S.D. Fisher. *Complex Variables*. Corrected reprint of the second (1990) edition, Dover Publications, Inc., Mineola, NY, 1999.

(2) J.E. Marsden and M.J. Hoffman. *Basic Complex Analysis*. Second edition, W. H. Freeman and Company, New York, 1987.

(3) D.O. Tall. *Functions of a Complex Variable*. Routledge and Kegan Paul, London, 1985

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA318 Half Unit History of Mathematics in Finance and Economics

This information is for the 2020/21 session.

Teacher responsible: Prof Jan van den Heuvel
Additional teachers: Prof June Barrow-Green and Prof Norman Biggs

Availability: This course is available on the BSc in Actuarial Science, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100).

General Course students may substitute an equivalent course.

Course content: This course surveys the development of mathematics from the beginning of history with an emphasis on its applications to finance and economics. Major themes are the development of arithmetic and geometry, the use of algebraic symbolism, the creation of the calculus, geometry, probability, and game theory. In order to give this course a distinctive flavour, we will illustrate these themes with examples taken from the social sciences, broadly interpreted. For example, the algorithms of arithmetic will be illustrated by their applications in finance, rather than astronomy.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Students are expected to submit written work on a weekly basis. One of these assignments will be a short essay of 900-1100 words.

Indicative reading: The course is based on source material which will be distributed to students as hard copy. J. Stedall's 'History of Mathematics: A Very Short Introduction' (Oxford 2011) is recommended for background reading.

Assessment: Exam (50%, duration: 2 hours, reading time: 5 minutes) in the summer exam period.

Essay (50%, 2000 words) in the ST Week 1.

MA319 Half Unit

Partial Differential Equations

This information is for the 2020/21 session.

Teacher responsible: Simon, Robert

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212) and Real Analysis (MA203).

Course content: The aim of the course is the study of partial differential equations. The focus will be on first order quasilinear equations, and second order linear equations. The method of characteristics for solving first order quasilinear equations will be discussed. The three main types of linear second order partial differential equations will be considered: parabolic (diffusion equation), elliptic (Laplace equation), and hyperbolic (wave equation). Techniques for solving these for various initial and boundary value problems on bounded and unbounded domains, using eigenfunction expansions (separation of variables, and elementary Fourier series), and integral transform methods (Fourier and Laplace transforms) will be treated. Elementary distributional calculus and the notion of weak solutions will also be considered. Applications and examples, such as the solution technique for Black-Scholes option pricing, will be discussed throughout the course.

Teaching: This course is delivered through a combination of classes and lectures totalling 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and delivered as online videos.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Written answers to set problems will be expected on a weekly basis.

Indicative reading: 1 S.J. Farlow. *Partial Differential Equations for Scientists and Engineers*. Dover, 1993. 2 J.D. Logan. *Applied Partial Differential Equations*. Second Edition. Springer, 2004. 3 W. Strauss. *Partial Differential Equations. An Introduction*. Second Edition. John Wiley, 2008. Lecture notes will be provided.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA320 Half Unit

Mathematics of Networks

This information is for the 2020/21 session.

Teacher responsible: Prof Andrew Lewis-Pye

Availability: This course is available on the BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103).

Course content: Globalisation and the growth of the internet have meant not only an increasing need to understand the way in which social and communication networks form and operate, but also an unprecedented amount of data available to aid in this analysis. The last decade has seen a coming together of multiple scientific disciplines in an effort to understand how these highly connected systems function. The aim of this course will be to give an introduction to the study of networks, requiring as little background knowledge as possible. The course will begin with an analysis of some of the fundamental properties normally observed in real world networks, such as the small world property, high degrees of clustering and power law degree distributions. After reviewing required notions from game theory, we shall then

apply these techniques to an analysis of the spread of behavioural change on networks, together with cascading effects and epidemic models. The final part of the course will be concerned with specific applications to the world wide web and page ranking.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: (1) D. Easley, J. Kleinberg. *Networks, crowds and markets*, Cambridge University Press, 2010.

(2) M. Newman. *Networks: An Introduction*, Oxford University Press, 2010.

(3) The Rise of the Network Society, *The Information Age: Economy, Society and Culture*, 2010 edition, Manuel Castells.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA321 Half Unit

Measure Theoretic Probability

This information is for the 2020/21 session.

Teacher responsible: Dr Albina Danilova

Availability: This course is available on the BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Real Analysis (MA203).

Course content: This is a first course in measure-theoretic probability. It covers the following topics. Abstract probability spaces: sample spaces, sigma-algebras, probability measures, examples. Borel sigma-algebra, Lebesgue measure. Random variables: distribution functions, discrete and absolutely continuous distributions, examples. Expectation and the Lebesgue integral: convergence theorems and properties. Different modes of convergence of random variables. Conditional expectation: definition, properties, examples. Changes of probability measure, Bayes' theorem.

Teaching: This course is delivered through a combination of classes and seminars totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual seminars and classes delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Comprehensive lecture notes will be provided. The following books may prove useful:

D Williams, *Probability with Martingales*.

J. Jacod & P. Protter, *Probability Essentials*; A. Klenke *Probability Theory. A Comprehensive Course*

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA322 Half Unit

Mathematics of Finance and Valuation

This information is for the 2020/21 session.

Teacher responsible: Dr Albina Danilova COL.4.09

Availability: This course is available on the BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where

regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Measure Theoretic Probability (MA321).

Course content: This course provides mathematical tools of stochastic calculus and develops the Black-Scholes theory of financial markets. It covers the following topics. Continuous-time stochastic processes, filtrations, stopping times, martingales, examples. Brownian motion and its properties. Construction of the Ito integral: simple integrands, Ito's isometry. Ito processes, Ito's formula, stochastic differential equations, Girsanov's theorem. Black-Scholes model: self-financing portfolios, risk neutral measure, risk neutral valuation of European contingent claims, Black-Scholes formula, Black-Scholes PDE, the Greeks. PDE techniques for derivative pricing. Implied volatility, basic ideas of calibration.

Teaching: This course is delivered through a combination of classes and seminars totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual seminars and classes delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided.

The following books may be useful.

T. Bjork, Arbitrage Theory in Continuous Time, Oxford Finance, 2004; A. Etheridge, A Course in Financial Calculus, CUP, 2002; M. Baxter & A. Rennie, Financial Calculus, CUP, 1996; P. Wilmott, S. Howison & J. Dewynne, The Mathematics of Financial Derivatives, CUP, 1995; J. Hull, Options, Futures and Other Derivatives, 6th edition, Prentice-Hall, 2005. D. Lamberton & B. Lapeyre, Introduction to stochastic calculus applied to finance, 2nd edition, Chapman & Hall, 2008. S. E. Shreve, Stochastic Calculus for Finance. Volume I: The Binomial Asset Pricing Model. Springer, New York, 2004. S. E. Shreve, Stochastic Calculus for Finance. Volume II: Continuous-Time Models. Springer, New York, 2004.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA323 Half Unit

Computational Methods in Financial Mathematics

This information is for the 2020/21 session.

Teacher responsible: Prof Johannes Ruf

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Introduction to Pricing, Hedging and Optimization (ST213).

Course content: Random number generation; the fundamentals of Monte Carlo (MC) simulation; variance reduction techniques for MC simulation and related issues; numerical solutions to stochastic differential equations by means of MC simulation and their implementation; finite-difference schemes for the solution of partial differential equations arising in finance.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Students will be expected to produce 5 problem sets and 5 other pieces of coursework in the LT.

Indicative reading: P. Glasserman, Monte Carlo Methods in Financial Engineering, Springer; R.U. Seydel, Tools for Computational Finance, Springer; S.M. Ross, Simulation, Academic Press (5th edition).

Assessment: Project (100%) in the ST.

The project will be a computational project.

MA334 Half Unit

Dissertation in Mathematics

This information is for the 2020/21 session.

Teacher responsible: Prof Bernhard Von Stengel and Mrs Nicola Wittur

Availability: This course is available on the BSc in Mathematics with Economics. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Real Analysis (MA203).

Some dissertation topics might require additional pre-requisites which will be specified in the description of the topic provided by the member of staff supervising the dissertation.

Course content: The dissertation in mathematics is an individual project that serves as an introduction to mathematical research. The student will investigate and study an area of mathematical research or apply advanced mathematical techniques to model and solve problems arising in other areas related to the student's degree programme (e.g., in finance or economics). The student will write a report on their findings and present and discuss their findings in an oral examination. The project may include some programming. The dissertation topic will normally be proposed by the Department.

Teaching: This course is delivered through seminars and computer workshops that total a minimum of 10 hours across Michaelmas and Lent Term, which give general and practical information, plus personal supervision time, which is scheduled independently with student supervisors. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos. The seminars in MT will cover important aspects of writing a dissertation in mathematics, including: what plagiarism is and how to avoid it, the use of libraries for research, electronic research, general aspects of writing mathematics, managing a research project and the writing up process. The computer workshops in MT will provide guidance on preparing a manuscript using mathematical text processing software (in particular, LaTeX). The seminars in LT will cover how to give a presentation about the findings in the dissertation and how to prepare for the oral examination. Each student will be assigned a supervisor who will monitor their progress and provide appropriate guidance thorough the MT and LT. Normally students will have three individual supervision meetings each term.

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the LT.

Indicative reading: This will depend on the topic of the dissertation. Students will be guided by their supervisor.

Assessment: Dissertation (75%) and presentation (25%) in the LT Week 11.

Assessment is based on the dissertation and an oral examination. Three hard copies and one electronic copy of the dissertation must be submitted by the end of Lent Term (exact date to be specified later). The report may include some computer code relating to the project. The dissertation excluding the bibliography must not exceed 20 pages of A4 paper, where the dissertation is required to have 1.5 line spacing at a minimum (at most 33 lines of text/mathematical formulae per page), 11-point font and 1-inch margins all around. If the dissertation contains any computer code this should be placed in the appendix of the dissertation and does not count towards the page limit.

The oral examination consists of a presentation to an audience of two members of staff on the main findings contained in the dissertation followed by a brief discussion where the student will be asked questions on the topic of their dissertation. This will be graded and worth 25% of the course grade. Students will be given support in the seminars on how to prepare, how to present and what is expected.

MG104 Half Unit

Operations Management

This information is for the 2020/21 session.

Teacher responsible: Dr Nayat Horozoglu

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Accounting and Finance, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Operations management is a key function in every organisation. It is concerned with the processes that transform inputs into goods and services. This course introduces students to key concepts and quantitative techniques used in operations management, and provides them with an understanding of their practical applications. The course covers a range of topics related to manufacturing and service operations such as process design and analysis, project management, inventory management, supply chains, and quality control.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term, in line with departmental policy.

Formative coursework: Students are expected to prepare answers to set questions on a weekly basis, and they will receive teacher and peer feedback during the classes. Students will also be offered extensive support for their summative assignments in a preparatory session, and they will have the opportunity to ask questions during assessment clinics.

Indicative reading: Jacobs, F. Robert, and Chase, Richard B. (2018) Operations and Supply Chain Management (International Student Edition).

Assessment: Take-home assessment (20%) and take-home assessment (20%) in the MT.

Take-home assessment (60%) in the LT.

The take-home assessments will be individual assessments.

MG105 Half Unit

Organisational Behaviour and Leadership

This information is for the 2020/21 session.

Teacher responsible: Professor Connson Locke and Dr Dorrotya Sallai

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Accounting and Finance, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces students to social science theories, research and application related to understanding human behaviour in the workplace. That is, this course is about the people side of business and management. Each week focuses on a different topic investigating individual, group, and organisational issues.

Organisational behaviour topics include: personality and performance, managerial decision-making, motivating others, fairness in organisations, and the multicultural workplace. Leadership topics include: power and influence, the adaptive leader, leadership development, and team leadership.

Teaching: 15 hours of lectures and 9 hours of classes in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will work in groups to answer an essay question through an in-class presentation and will receive structured feedback based on the criteria for marking essays (e.g.

structure, evidence). Students will also be offered an essay writing workshop specific to this course.

Indicative reading: Colquitt, J.A., LePine, J.A., & Wesson, M.J.

(2009) Organizational Behavior: Improving Performance and Commitment in the Workplace (International edition).

Yukl, G. (2009). Leadership in Organizations. (7th ed.). Englewood Cliffs, NJ: Prentice Hall.

Assessment: Essay (40%, 1500 words) and class participation (10%) in the LT.

Take-home assessment (50%) in the ST.

The take home assessment will be a 2000 word essay which students will have one week to complete. Class participation will be based on oral representations of weekly reading summaries.

MG205

Econometrics: Theory and Applications

This information is for the 2020/21 session.

Teacher responsible: Dr Jordi Blanes i Vidal

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Quantitative Methods (Mathematics) (MA107) or equivalent and Quantitative Methods (Statistics) (ST107) or equivalent

Course content: Simple and Multiple Regression; Hypothesis Testing; Mechanics and Limitations of OLS; Causality; Natural, Field and Laboratory Experiments. Panel Data and Fixed Effect Models. Instrumental Variables Regression.

The main aim of this course is to provide a thorough understanding of the quantitative techniques which guide evidence-based managerial decision-making. It seeks to develop a framework in which students can examine whether the predictions of managerial, social or economic theory are supported by empirical evidence. Particular emphasis is made on (a) illustrating the many ways in which evidence is abused in the academic or managerial debate, and (b) trying to establish causality in the relationship between variables. The approach is both formal, as the course makes extensive use of econometric theorems and techniques, and solidly grounded in intuition, as it provides numerous examples of tests of real-life relations. Many of these examples will be illustrated using the STATA software package, and the students will be expected to learn the basics of data manipulation and regression running. A solid base of introductory statistics and probability (equivalent to that provided by ST107) and introductory algebra and calculus (equivalent to that provided by MA107) will be expected.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 problem sets in the MT and 1 problem sets in the LT. There will be one formative assessment each term.

Indicative reading: The textbook for the course is:

• James H. Stock and Mark W. Watson, Introduction to Econometrics, Second Edition, Pearson, 2007.

Two other very useful (complementary) books are:

• Christopher Dougherty, Introduction to Econometrics, Third Edition, Oxford University Press, 2007;

• Jeffrey M. Wooldridge, Introductory Econometrics - A Modern Approach, Third Edition, South-Western, 2006.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MG205GC Half Unit

Econometrics: Theory and Applications (Spring Semester)

This information is for the 2020/21 session.

Teacher responsible: Dr Jordi Blanes i Vidal

Availability: This course is available with permission to General Course 'Spring Semester' students.

Pre-requisites: Quantitative Methods (Mathematics) (MA107) or equivalent and Quantitative Methods (Statistics) (ST107) or equivalent

Course content: Simple and Multiple Regression; Hypothesis Testing; Mechanics and Limitations of OLS; Causality; Natural, Field and Laboratory Experiments. Panel Data and Fixed Effect Models. Instrumental Variables Regression. The main aim of this course is to provide a thorough understanding of the quantitative techniques which guide evidence-based managerial decision-making. It seeks to develop a framework in which students can examine whether the predictions of managerial, social or economic theory are supported by empirical evidence. Particular emphasis is made on (a) illustrating the many ways in which evidence is abused in the academic or managerial debate, and (b) trying to establish causality in the relationship between variables. - Jeffrey M. Wooldridge, Introductory Econometrics - A Modern Approach, Third Edition, South-Western, 2006.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

ideas and empirical knowledge. There will be an emphasis on analysing firms as reservoirs of resources and capabilities and topics to be covered will include distinctive capabilities of firms, organisational design, decision making in firms, organisational routines, managerial leadership and the role of ethics. Particular attention will be given to firms in technology-based industries and the management of innovation and contrasts will be made with public sector management.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to produce one piece of written work and to do the weekly class exercises

Indicative reading: A reading list will be available to students taking the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

Teachers' comment

MG207

Managerial Economics

This information is for the 2020/21 session.

Teacher responsible: Dr Catherine Thomas NAB 5.27

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Business Mathematics and Statistics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Economics A (EC100) or Economics B (EC102) or equivalent is a pre-requisite. This course cannot be combined with Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202).

Course content: The objective of the course is to provide students with insights from economic theory which are relevant to applications in managerial decision making. The emphasis is on applying microeconomics ideas to solve problems. Topics covered include consumer theory, production, applications to the labour market, market structure, monopoly, oligopoly, product differentiation, pricing, game theory, decision analysis, bargaining, auctions, and asymmetric information.

Teaching: 20 hours of lectures and 8 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to prepare answers to set problems on a weekly basis. Some of this work will be assessed. Assiduous preparation for the weekly tutorials is essential to achieve a good exam performance.

Indicative reading: No textbook covers the whole course but Hal R Varian, Intermediate Microeconomics with Calculus (International Student Edition) is the best text book to use for the course. In addition students are advised to refer to T C Bergstrom & H R Varian, Workouts in Intermediate Microeconomics (1990), which contains practice problems.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MG206 Half Unit

Firms, Management and Competitive Advantage

This information is for the 2020/21 session.

Teacher responsible: Mr Nilesh Dattani NAB5.02

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed EC100 OR EC102 OR equivalent.

Course content: This is not a course on corporate strategy. It focuses on the evolution of thinking about firms and the activity of management and examines firm advantages through conceptual

MG207GC Half Unit

Managerial Economics (Spring Semester)

This information is for the 2020/21 session.

Teacher responsible: Dr Catherine Thomas NAB 5.27

MG209 Half Unit

E-business

This information is for the 2020/21 session.

Teacher responsible: Dr Antonio Cordella NAB 3.30

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course presents an analysis of the management, economics and information systems theories and practices in online business. This is a management information systems course and not a technical course. It is mainly directed at undergraduate students. It focuses on the study of the impact of digital technologies on business strategies and market configurations. Internet-based systems offer new means to operate businesses and to compete in the global marketplace and it is important for future executives and entrepreneurs to understand the economic and managerial implications of these transformations. Students will gain a good understanding of why and how successful companies are taking advantage of e-business, as well as an understanding of the main challenges and risks associated with different e-business models and strategies in a fast changing technological and business environment.

The course is structured into four main sections:

1. Strategic, technological, and economic foundations of e-business
2. E-business and its configurations: B2C and B2B
3. E-business: strategic and organisational challenges
4. Implementation of e-business strategies'

Teaching: 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

A 2 hour revision session will be offered in the summer terms.

Students will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will complete a formative assessment which consists of a 500 word abstract of the final essay. Each student will receive feedback on the approach, the structure

of the presentation, and the argumentation they have proposed to frame the essay.

Aim of the formative work is to offer students the opportunity to self-evaluate their understanding of the subject, to test their preparation, to help them better understand what are the criteria of assessment, and to help them to better identify what is need to achieve the desiderated outcomes.

Assessment: Essay (100%, 2500 words).

MG210 Half Unit Not available in 2020/21

Corporate Social Responsibility and International Labour Standards

This information is for the 2020/21 session.

Teacher responsible: Prof Sarah Ashwin NAB 4.19

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Any social science background

Course content: Corporate Social Responsibility (CSR) is becoming an expected element of corporate strategy. This course critically evaluates CSR, focusing on firms' attempts to prevent labour standards violations in their supply chains. We begin by analysing the rise of CSR, setting it in the context of global value chains, international labour standards, and emerging private forms of regulation. We then analyse topics such as: the impact of CSR on corporate financial performance; whether CSR is an

effective means of raising labour standards; theories of CSR; how to embed CSR within the firm and comparative CSR. The course includes plenty of examples of how large firms are dealing with the ethical challenges posed by global supply chains. The course is interdisciplinary, and students are encouraged to bring insights from their "home" discipline so that seminars become a mutual learning experience. The course will include one lecture from a CSR professional.

Teaching: 10 hours of lectures and 15 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Locke, R. (2013) *The Promise and Limits of Private Power: Promoting Labor Standards in a Global Economy*, Cambridge: Cambridge University Press. Vogel, D. (2005) *The Market For Virtue: The Potential and Limits of Corporate Social Responsibility*, Washington D.C.: Brookings Institution Press. Crane, A. et al. (2008) *The Oxford Handbook of Corporate Social Responsibility*, Oxford: OUP. Elliot, K.A. and Freeman, R. (2003) *Can Labor Standards Improve Under Globalization?*, Washington D.C.: Peterson Institute for International Economics.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (40%, 2000 words) in the ST.

MG212 Half Unit Marketing

This information is for the 2020/21 session.

Teacher responsible: Dr Xiaolin Li

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will cover customer behaviour; segmentation, targeting and positioning; product management and diffusion; pricing, placement and promotion; and marketing relationships.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: A formative assignment will be set consisting of one mock exam question. The purpose of the mock exam is to provide - as realistically as possible - a practise session for the final exam.

Indicative reading: Indicative readings:

Kotler, P. and Armstrong, G. (2010) *Principles of Marketing*, Pearson, New Jersey. Kotler and Keller (2009) *Marketing Management*, Pearson PrenticeHall. Lambin, J-J, Chumpitaz, R. and Schuiling, S. (2007) *Market Driven Management: Strategic and Operational Marketing*, Palgrave Macmillan.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Project (40%).

The summative coursework will be a group project. Students will have the opportunity to form their own project groups within their allocated class, but the course teaching team will retain the right to make changes to group membership where necessary.

MG213 Half Unit Information Systems

This information is for the 2020/21 session.

Teacher responsible: Dr Edgar Whitley NAB.3.32

Availability: This course is available on the BSc in Management,

International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will cover the role of data, information and knowledge within management; the evolution of digital management practices; digital business strategy; information systems development and organisational change; big-data; information systems outsourcing; and IT infrastructure including cloud computing, Artificial Intelligence, automation and digital infrastructures.

Teaching: 20 hours of lectures and 9 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will present draft essay plans for peer review in the LT.

Indicative reading: Indicative readings:

Beynon-davies, P. (2013). *Business Information Systems*, Palgrave, London.

Galliers, R. and Leidner, D. (2009) *Strategic Information Management*. Routledge, London.

Laudon, K and Laudon, J (2013) *Management Information Systems*, Pearson, London.

Assessment: Essay (50%) in the period between LT and ST.

Group project (40%) and reflective learning report (10%) in the LT.

The reflective learning report will be individual reflections on group working.

Students will have the opportunity to form their own project groups within their allocated class, but the course teaching team will retain the right to make changes to group membership where necessary.

Teachers' comment

MG214 Half Unit Human Resource Management

This information is for the 2020/21 session.

Teacher responsible: Jeffrey Thomas

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Organisational Behaviour and Leadership (MG105) or equivalent.

Course content: This course is designed to provide insights into Human Resource Management, especially in a way that appeals to students of management who are quite international in their orientation. After setting the global scene of labour markets, Human Resources and organisational change in the twenty-first century, it then proceeds to look at the management of people in different national contexts. The focus then shifts down to the employment relationship – why firms hire workers and how they strategically manage them. Once workers are hired as employees, we begin to explore how the latter might be motivated and rewarded, and how the design of policies varies across organisations of different types. To help us with this, we usefully draw on key ideas and models from the field of organisational studies that are also a prelude to thinking through the implications for HRM in environments where innovation and technology are prone to rapid change. This then allows us to gain an overview of the potential contribution that HRM can make to the dynamic capabilities of firms generally.

Topic outline

1. Motivation and incentives (theories from Economics and Psychology)
2. The macro-context (enterprise governance, employer networks, skill and training, and employment relations)
3. Stakeholders in firms and employee management (Corporate Social Responsibility and HR)

4. Cross-cultural management of employees: the complexities and opportunities
5. Firm strategy and international HR alignment
6. Identification of talent gap and solutions (expatriation and repatriation)
7. Global Talent Management (selection, training and development, performance appraisal and management, compensation)
- 8.. Managing HR in cross-border alliances, in particular international Mergers and Acquisitions and Joint Ventures
9. Negotiations in relation to human resource management

Teaching: 15 hours of lectures and 13 hours and 30 minutes of classes in the MT. 1 hour and 30 minutes of lectures and 1 hour and 30 minutes of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: The formative assessment will help students to prepare for the summative assessment.

Indicative reading: Caligiuri, P. M. (2006). Chapter 9 Performance management in a cross-national context. In Bennett, W., Jr., Lance, C., & Woehr, D. (Eds.). *Performance measurement: Current perspectives and future challenges*. Mahwah, NJ: Erlbaum.

Cappelli, P. (2015). Why We Hate HR and What HR Can Do About It. *Harvard Business Review*, July – August.

Randall S Schuler, Ibraiz Tarique, Susan E Jackson (2004), *Managing Human Resources in Cross-Border Alliances*, in (ed.) 3 (*Advances in Mergers & Acquisitions*, Volume 3), Emerald Group Publishing Limited, pp.103-129.

Briscoe, D., Schuler, Randall S, & Tarique, Ibraiz. (2016). Chapter 6 International Employment Law, Labor Standards, and Ethics. In (Eds.) *International human resource management: Policies and practices for multinational enterprises* (5th ed.). New York, NY: Routledge.

Brown, M. P., Sturnam, M. C., & Simmering, M. J. (2003). Compensation Policy and Organizational Performance: The Efficiency, Operational, and Financial Implications of Pay Levels and Pay Structure. *The Academy of Management Journal*, 46, 752-762.

Lewicki, R.J., Barry, B. and Saunders, D.M.2010. *Negotiation*. New York: McGraw-Hill. Chapter 1 –The Nature of Negotiation, pp. 1-31.

The course also draws on additional articles from a variety of international journals in the field e.g. *The International Journal of Human Resource Management*, *British Journal of Industrial Relations*, *Harvard Business Review*. Students will also analyse multiple cases from Insead and Harvard Business Publishing.

Assessment: Project (20%), presentation (20%) and class participation (10%) in the MT.

Essay (50%) in the LT.

The project (20%) and presentation (20%) will be group work. Students will have the opportunity to form their own project groups within their allocated class, but the course teaching team will retain the right to make changes to group membership where necessary. Peer review will be conducted and will provide context for the marker of the group projects, while allowing students to develop the skills of peer review.

The essay (50%) will be a "multi-media" essay. It requires a written text essay, complimented by another form of media: either a video, or an audio interview, or a graphic - illustrating the effects of HR theory and research on the practice of each students' target job after graduation.

The class participation grade (10%) will be assessed upon the quality of the student's contribution to class discussions.

Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will introduce second- and third-year Management students to the new science of evolutionary psychology and explore the biological and evolutionary foundations of human behaviour. In the first few weeks, various critiques of and competing perspectives on evolutionary psychology, with regard especially to the relative importance of biological/evolutionary vs. social/cultural determinants of human behaviour and its sex differences will be discussed and debated. In later weeks, an evolutionary perspective will be applied to various topics in management such as organizational behaviour, occupational choice, productivity, and status hierarchy. The study of business and management is currently dominated by economic perspectives, supplemented by sociological and social psychological perspectives, in American business schools. The course will provide a necessary corrective to the dominance of economics perspectives in the study of business and management by providing biological and evolutionary perspectives and thereby throwing a new light on the old problems (and finding potential solutions for them) in organizations and organizational behaviour. The course will provide evolutionary and biological perspectives on management and organizational behaviour. It will introduce the students to the following topics: Principles of evolution; Principles of evolutionary psychology; Sex differences in preferences, values, cognition, emotions, and behaviour; Physical attractiveness; General intelligence; Evolutionary constraints on human behaviour and their relevance to organizational behaviour.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Each student will give a class presentation on the week's readings and their presentation will be evaluated by the course instructor and the feedback will be given to the student within one week. During the first few years of the course, mock examinations will be given to the students in order to familiarize them with the anticipated exam contents and format.

Indicative reading: Buller, David J. 2005. *Adapting Minds: Evolutionary Psychology and the Persistent Quest for Human Nature*. Cambridge: MIT Press. [The most comprehensive book-length critique of modern evolutionary psychology to date].

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG301 Strategy

This information is for the 2020/21 session.

Teacher responsible: Dr Daniel Gottlieb

Availability: This course is compulsory on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have completed Economics A (EC100) or Economics B (EC102) or equivalent, Quantitative Methods (Mathematics) (MA107) or equivalent and Quantitative Methods (Statistics) (ST107) or equivalent, and Economics for Management (MG207) or Microeconomic Principles I (EC201) or equivalent.

Course content: The first half of the course studies how firms

MG228 Half Unit Not available in 2020/21 Managing the Stone-Age Brain

This information is for the 2020/21 session.

Teacher responsible: Dr Satoshi Kanazawa NAB 5.33

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full

compete with each other. More specifically, we will study strategic situations (competition and rivalry, competitive advantage (sources and sustainability), entry and entry deterrence, product differentiation, the role of information in markets, etc.) and formulate decision models of these situations. While the modelling and predictions are based on game theory, we will contrast our findings to real life games according to the growing empirical evidence.

The second half of the course studies how firms organize and the challenges they face in doing so. More specifically, we study the way managers interact with the different constituencies inside the firm- workers, board members, and other managers- and how those interactions shape the actual design of organizations. It presents, again with a heavy emphasis on the evidence, how the need to motivate organizational members and to coordinate their actions shape the provision of incentives, the allocation of authority, the ownership structure, acquisition and diffusion of knowledge, and patterns of communication.

Beyond the emphasis on the content of the course, the course also aims to be a course where students learn to think critically and analytically. Students will learn to identify trade-offs in how firms behave and the way they organize themselves, and critically evaluate the sources of those trade-offs by appealing to simple models of individual behaviors. Students will learn to read the primary literature, discuss papers in class, interpret the evidence etc. Students will learn to ask questions such as: What is the evidence? What evidence would convince me of the opposite hypothesis?

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

There will be a reading week in Week 6 in line with departmental policy.

Formative coursework: Formative work such as problem sets and mock exam questions will be set.

Indicative reading: The basic readings for the course will be the lecture notes written by Dr. Alonso. These lecture notes can be complemented with the following additional readings:

- Thinking Strategically: Competitive Edge in Business, Politics and Everyday Life, WW Norton, 1993, by Avinash Dixit and Barry Nalebuff
- The Art of Strategy, WW Norton, 2008, by Avinash Dixit and Barry Nalebuff.
- Games of Strategy (WW Norton, 3rd edition, 2009) by Avinash Dixit, Susan Skeath and David Reiley.
- Economics of Strategy (5th Edition) David Besanko, David Dranove, Mark Shanley, Scott Schaefer. (2009)
- An Introduction to Game Theory (Oxford, 2003) by Martin J. Osborne
- Strategic Management, Garth Saloner, Andrea Shepard and Joel Podolny, Wiley, 2000
- The Modern Firm: Organizational Design for Performance and Growth, John Roberts 2007.
- Build, Borrow, or Buy: Solving the Growth Dilemma (Harvard Business Press 2012) Laurence Capron and Will Mitchell

Assessment: Exam (60%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Continuous assessment (30%).

Group project (10%) in the LT.

For the project students will be required to work in groups.

4 in-lecture multiple choice quizzes (weeks 5 and 11 of the MT and weeks 15 and 21 of the LT)

For the continuous assessment students are required to attempt at least 3 out of 4 in-lecture assessments. Students who attempt all four (4 out of 4) will achieve a mark based on their three highest scores. Students who attempt three in-lecture assessments (3 out of 4) will receive a mark based on the scores in these assessments. Students who attempt less than three in-lecture assessments will receive a mark of 0 for each missed assessment and will receive an overall mark based on their scores in the best three assessments, including any zeroes. Students who fail to attempt any in-lecture assessments (0 out of 4), will be awarded a

Zero Incomplete for the whole course and cannot be awarded the degree until they submit the work at resit.

Group project (10%) in the LT.
For the project students will be required to work in groups.

MG302 Half Unit

Topics in Management Research

This information is for the 2020/21 session.

Teacher responsible: Prof Diane Reyniers NAB 5.22

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Third year only.

Course content: This course addresses various interesting topics which will be used to encourage creative and logical thinking, structuring of clear arguments and critical assessment of evidence. The focus is on interpretation of findings rather than statistical or econometric techniques.

The intellectual backbone of the course is applied and empirical economics (including behavioural economics) and finance but, wherever appropriate contributions from the psychology, sociology and management literature will be discussed. We will mainly deal with issues which are amenable to rigorous empirical investigation. The course is designed around a set of empirical research papers. Examples of questions considered are whether pain killers are more effective when they are expensive, whether creative people cheat more, whether people overvalue their own ideas. The main objective of the course is to enable students to comprehend and critically assess the management literature, to evaluate statements in terms of evidence and to detect false reasoning or logic.

Topics vary each year (based on student feedback) but examples are racial discrimination, negotiation and gender, graduate earnings, leadership, optimism and entrepreneurship.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 2 hours of classes in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two take-home mock exam papers.

Indicative reading: A reading list will be available on Moodle.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG303 Half Unit

International Business Strategy and Emerging Markets

This information is for the 2020/21 session.

Teacher responsible: Prof Saul Estrin NAB 4.32 and Dr Christine Cote NAB 4.05

Availability: This course is available on the BSc in Accounting and Finance, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students. This course cannot be taken with MG307.

Pre-requisites: All students, including BSc Management students, must be in their 3rd year and should have taken Economics A (EC100) or Economics B (EC102), or equivalent.

Course content: This course analyses the emergence of firms

which operate on a global scale and their current and likely future interactions with emerging markets. It will combine the development of conceptual frameworks primarily through the lectures with the analysis of key cases in the classes.

Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The "new institutional economics" has recently developed as a field to understand the impact of variation in institutions on economies' performance.

This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concepts such as the resource based view. We will provide an analysis of economic performance and growth in emerging markets building on the new institutional economics and working with a large variety of datasets and sources. The course will then turn to key topics. These will include the interaction between international trade and investment in the internationalisation choices of MNEs; the emergence of global supply chains; the determinants of FDI; the effects of FDI on the host economy; entry mode choices; measures of institutional and cultural distance; and the growing importance of multinationals from emerging markets.

Students will work with case material as well as the required reading, and the group project will comprise a case write up, which will be presented prior to submission in class for comment and discussion.

Teaching: 30 hours of seminars in the LT.

The seminars will be combined seminars and lectures. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will undertake a formative essay (1000 words) for which feedback will be provided in preparation for the final summative coursework.

Indicative reading: R. Caves, *Multinational Enterprise and Economic Analysis*, 2nd Edition, Cambridge University Press 1996; P. Ghemawat, *Redefining Global Strategy*, Harvard Business School Press, 2007; J. Williamson, "The New Institutional Economics", *Journal of Economic Literature*, 2000; Estrin et. al., "Entry Mode in Emerging Markets", *Strategic Management Journal*, 2009; T. Khanna and K Palepu, "The Future of Business Groups in Emerging Markets", *Academy of Management Journal* 2004.

Assessment: Coursework (50%) in the ST.

Project (40%) and class participation (10%) in the LT.

LT coursework will be a group project which will consist of a group presentation in the last week of the LT.

MG305 Half Unit

Innovation and Technology Management

This information is for the 2020/21 session.

Teacher responsible: Dr Jonathan Liebenau NAB 5.20

Availability: This course is available on the BSc in Accounting and Finance, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The focus of this course is on how innovative technologies are managed and their consequences. It includes

technological innovation in areas such as telecoms, hi tech industries, pharmaceuticals, biotechnology, space technology, financial technologies. Aspects covered are how new industries are created, how existing industries can be transformed by new technologies, linkages between technological development and the creation of wealth, and implementation success and failure of technological systems. Topics include: technology and entrepreneurship, technology strategy, R&D management, patents and intellectual property, disruptive, radical and incremental innovation, technology policy. Economic, systems, managerial and sociological approaches will be compared using a variety of case studies.

Teaching: 15 hours of lectures and 15 hours of classes in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Classes are based around reading and discussing selected journal articles and case studies from the course study pack on Moodle. Formative feedback is provided on class participation.

In addition, students will present an essay plan in preparation for the final case-based essay, on which formative feedback will be provided.

Indicative reading: J Howells, *The Management of Innovation and Technology*, Sage, 2005; J Fagerberg, D.C. Mowery, and R.R. Nelson (Eds.), *The Oxford handbook of innovation* (Series Oxford Handbooks in Business and Management), Oxford University Press, 2006; D MacKenzie, *Knowing Machines: Essays on Technical Change*, MIT Press, 1998; M Bauer (Ed), *Resistance to New Technology: Nuclear Power Information Technology and Biotechnology*, CUP 1995; M Biagioli (Ed), *The Science Studies Reader*, Routledge, 1999; H Collins & T Pinch, *The Golem at Large: What you should know about technology*, Cambridge University Press, 1998; D Mowery & N Rosenberg, *Paths of Innovation: technological change in 20th century America*, Cambridge University Press, 1998; J McLaughlin, P Rosen, D Skinner & A Webster, *Valuing Technology: organisations, culture and change*, Routledge, London and New York, 1999;

Assessment: Essay (70%, 5000 words) in January. Presentation (20%) and in-class assessment (10%) in the MT. The presentation will be Powerpoint with audio or similar.

MG307 Half Unit Not available in 2020/21 International Context of Management

This information is for the 2020/21 session.

Teacher responsible: Mr Nilesh Dattani NAB5.02

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students. This course cannot be taken with MG303.

Course content: The course aims to apply social science theory to the analysis of the conduct and management of transnational activities; to critically appraise concepts such as globalisation, regionalisation, national competitiveness, transnationality of firms, etc. in the context of international management structures and processes; to delineate the international political, economic, social and legal structures and environments within which the activity of management takes place. The topics to be covered will include: the nature of the contemporary global political economy; the globalisation of business, finance and trade in goods and services; Global competition; the transnational corporation in the global economy; the tension between globalisation and regionalisation; the international trading order; the international monetary regime; the impact of culture on global business; the changing position of the state in the global economy; the new diplomacy of states and firms.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to produce one piece of written work and do the weekly class exercises.

Indicative reading: P Dicken, *Global Shift: Mapping the Changing Contours of the World Economy* (7th edn), Sage Publications (2015); R W Griffen & M W Pustay, *International Business: A Managerial Perspective* (8th edn), Pearson Prentice-Hall (2015); O Shenker, Y Luo & T Chi, *International Business*, (3rd edn) Routledge (2015).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG308 Half Unit Simulation Modelling and Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Alicia Mejia-Salazar

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Elementary statistical concepts and experience of standard computer software is assumed.

Course content: The main characteristic of this course is that it is a hands-on course and of an extremely practical nature. Research shows that 90% of the largest organisations both in Europe and the USA use the techniques taught here to monitor their operations and especially in risk management. The aim of the course is to introduce students to the concepts, techniques and applied aspects of the development and analysis of simulation models. The course will cover two main approaches for modelling problems bound by uncertainty (stochastic behaviour): Monte-Carlo Simulation (static problems) and Discrete Event Simulation (dynamic problems). Topics covered will include: types of uncertainty; types of simulation modelling; sampling methods; the simulation process; structuring problems for simulation; running simulation models; analysing simulation outputs; risk analysis using simulated models; testing and validating simulation models; applications of simulation. Excel modelling is an integral part of Monte Carlo simulation and at the end of the course students will have a sound foundation on how to set up different Excel models. Additional tutorial examples will be provided both throughout the course, and posted on Moodle to help develop this very important skill.

Teaching: 10 hours of lectures and 15 hours of classes in the LT. An Excel help class may be held during reading week in Week 6. Extended office hours to students who need it.

Formative coursework: Three individual or small-group assignments will be required during the course.

Indicative reading: JR Evans & DL Olson (2002) *Introduction to Simulation and Risk Analysis*. Prentice-Hall: Upper Saddle River, NJ; AM Law (2006) *Simulation Modelling and Analysis*. McGraw-Hill: Boston, 4th ed.; M Pidd (2004) *Computer Simulation in Management Science*. Wiley: Chichester, 5th ed.; S Robinson (2004) *Simulation - The Practice of Model Development and Use*, Wiley: Chichester; D Vose (2008) *Risk Analysis - A Quantitative Guide*, Wiley: Chichester, 3rd ed.

Assessment: Project (100%) in the ST.

The project will consist of a written document comprising of the following:

An individual management report (maximum 15 pages – excluding appendix) describing the modelling and results from a simulation study of a realistic decision problem. The problem will be defined by week 5 or 6 of the LT, the project should be completed by the beginning of the ST.

MG310 Half Unit Not available in 2020/21**Strategic Decision Making****This information is for the 2020/21 session.****Teacher responsible:** Dr Shashwat Pande**Availability:** This course is available on the BSc in Management, BSc in Psychological and Behavioural Science, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.**Pre-requisites:** Elementary statistical and mathematical concepts, as well as a true curiosity towards the fascinating field of decision making and a strong interest in rebooting your analytical "decision-ware".

As this course embraces the two key stages of the decision making process, i.e. the initial divergent and creative stage and the subsequent convergent and analytical one, please, note that it is important to feel comfortable with interdisciplinary research, as well as with the use and discussion of both qualitative and quantitative strategies for successful decisions. Group work will also be a key component of the course.

Course content: This course is about making successful strategic decisions and building decision resilience during challenging times, in both the professional domain and the personal one. In this era of unprecedented uncertainty, learning how to make decisions against the backdrop of external factors that we cannot control or predict represents a fundamental skill for any sector of society and business. Knowledge of what it takes to develop a good decision making process is thus an invaluable part of everyone's toolbox, particularly for rising stars who will be in positions of leadership in the future. This course introduces students to the key concept of decision quality and to cutting edge strategies and tools to integrate data and judgments and develop winning strategies. This course's lectures will entail a deep dive into the progressive stages of a strategic decision making process, with interactive experiments and puzzles to develop bias awareness and decision analysis expertise. Seminars will consist of interactive sessions, enabling you to master an actionable decision framework and become confident decision analysts. The learning outcomes of this course are twofold. First, to discover the key decision traps when framing, structuring and modelling decisions and why they are dangerous. Second, to understand and master cutting edge, replicable and versatile solutions for framing, structuring, modelling and communicating better decisions.**Teaching:** 20 hours of lectures and 13 hours and 30 minutes of classes in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two formative assignments:

1. Group project plan presentation (i.e. the selected decision context, due in week 7)
 2. Group project pitch of the key decision analysis' impacts observed as a result of the strategic decision making process developed as a group across classes 2, 3, 4, and 6. Students will present and discuss the key impacts of their decision making process (e.g. discovery of new objectives that were not in their original mental models, recommendation of a different solution to the decision as a result of the used elicitation protocols, etc.) and receive real time feedback, from both their peers and the lecturer. Feedback will be provided following specific criteria (i.e. the same criteria that will be used to evaluate the individual technical account of the group project's impacts that is summative assignment n.2) and by completing a set of both descriptive and evaluative tasks (e.g. indicating the strongest part of the presentation, as well as parts that need revision, etc.).
- The above two formative assignments have been designed to prepare the students for the following two summative works: (i) the group project presentation of the chosen decision making problem/opportunity and (ii) the individual technical account of one key impact observed in the group project.
- The topic of the group project (i.e. a decision making problem or

opportunity to be modelled and analysed by means of Multicriteria Analysis) can be a personal decision (e.g. which job offer to accept when confronted with multiple ones, which master to apply for, etc.) or a real world case (e.g. how to reduce plastic consumption in the LSE new coffee place). Students will have to collect data, develop and apply a quantitative model, interpret the results and refer to the key scientific literature for the main steps in the development of the model. Students are allowed to work in groups of maximum 4/5 people. This summative assignment will help students develop their strategic problem solving skills by demonstrating their ability to apply both qualitative and quantitative tools to frame, structure and model a decision, interpret its results, and develop sound recommendations. In the individual technical account of the group project's impacts (max 1500 words), students will have to report on the developed process by focusing on the observed key impacts of the used tools. This second summative assignment will help students develop their critical thinking skills.

Indicative reading: Belton, V. and Stewart, T. (2002) Multiple Criteria Decision Analysis. London, Kluwer. Keeney, R.L. (1992) Value-Focused Thinking: A Path to Creative Decision-making. Cambridge: Harvard Univ. Press. HD30.23 K21 (Course Collection). G.S. Parnell et al. (2013) Handbook of Decision Analysis. Hoboken, Wiley. Spetzler C., Winter H., Meyer J. 2016. Decision quality: value creation from better business decisions. Wiley.**Assessment:** Group project (50%) in the LT Week 11.

Technical report (50%) in the ST Week 1.

The individual technical report (1500 words maximum) will provide an explanation and insightful discussion of one key impact observed in the developed group decision making process.

MG311 Half Unit**Foundations of Behavioural Decision Science****This information is for the 2020/21 session.****Teacher responsible:** Dr Claire Heard**Availability:** This course is available on the BSc in Management, BSc in Psychological and Behavioural Science, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.**Pre-requisites:** It is an advantage to have taken an introductory social science course in one of these fields: economics, management, psychology or sociology.

It is important to be comfortable with multi-disciplinary research and group work.

Course content: This course introduces students to the foundations of Behavioural Decision Science: the science that explains and predicts how humans make decisions (the decision 'process') and how well (the decision 'outcome'). The course will explore the different stages of the decision making process identifying factors important in understanding our decision making. Students will be introduced to the concepts of framing, explore the way in which we make judgements, understand the rich and diverse influences of risk, uncertainty and affect (emotions), and investigate strategies for decision making. Throughout the course, students will be introduced to many cognitive biases and aspects of context which influence how/what judgements and decisions we make. In the final portion of the course, student will get the opportunity to see examples of how information/choice designers are seeking to help or influence decision makers or teach skills to help the public or professionals to make better decisions themselves. Many of these concepts and techniques can, and have been applied across personal, professional and policy situations – and the course will provide opportunities to learn about and discuss such applications. Importantly, across both parts of the course, discussion of core concepts and examples will be woven together with new advances and applications in the field, particularly those within the course

leader's field of expertise.

The course is entirely seminar-based, and will combine within the sessions - traditional lecture-style teaching of concepts with hands-on demonstrations of the concepts in action, and in depth class discussions of the week's material. Examples used within the sessions will be drawn from across a range of different domains which could include managerial, policy, health, emergency response, law, consumer, and even personal domains.

By the end of this course, students will have an understanding of the key concepts in Behavioural Decision Science, be able to evaluate the strengths and weaknesses of human decision making, and be able to recognise and adapt different techniques to improve decision making. The summative will provide an opportunity to show the skills and knowledge you have learnt throughout the course and consists of two parts which are described below.

Teaching: 25 hours of classes in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: 1. Analysing a real decision maker – Group Presentation (Week 10): Over several weeks (both in and outside class), you will work as a group to analyse a real decision maker that you will select. For this coursework, the term decision maker can denote an individual decision maker but also applies to a group if it acts as a single unit (e.g. a business, a country's government). In Week 10, you will be required to present a summary of this analysis in a timed group presentation. In this presentation, you will need to report on: 1) who is the decision maker and what was/is the key decision(s) being investigated? 2) What decision making factors/biases are at play and what evidence do you have to support this; and 3) discuss your suggested solution(s) for improving decision making. After the presentation you will receive feedback as a group. This feedback will help you prepare for the summative assessment.

2. Review of anonymous essays (Week 11): Students will play the role of the "examiner" and using anonymous examples of summative assessments (submitted by students from a previous year) implement the different evaluation criteria which are used in this course. This exercise will help you improve your summative assessment.

Indicative reading: Bazerman, M. (2017) *Judgment in Managerial Decision Making*. New York: Wiley. 8th edition; Hastie, R., and Dawes, R.M. (2001). *Rational Choice in an Uncertain World*. Sage Publications, Thousand Oaks; Kahneman, D. (2011) *Thinking Fast and Slow*. London: Allen Lane; Russo, J. E. & Schoemaker, P. J. H. (2002) *Winning decisions: How to make the right decision the first time*, Piatkus Publ. Limited.

Assessment: Coursework (100%, 3000 words) in the ST.

Summative (due beginning of ST): The summative assessment will be a 'Report and Essay'. It comprises two parts.

Part 1: An "Analysing a Decision Maker" Report: In the first part (no more than 1000 words), you will be asked to write a report detailing the analysis of a decision maker that you completed during the term. You will need to report on: 1) who is the decision maker and what was/is the key decision(s) being investigated? 2) What decision making factors/biases are at play and what evidence do you have to support this; and 3) discuss your suggested solution(s) for improving decision making.

Part 2: In-depth Scholarly Essay: In the second part of the report (no more than 2000 words), you will choose a topic from within MG311, which you as a developing scholar has found interesting or important and write your in-depth essay on it. This essay should be done in a scholarly and rigorous manner making reference to behavioural literature, theories and concepts.

The first part of the report will count for 50% of your mark while 50% will come from the second part. You will be required to provide full essay-style referencing.

Although the first part of the summative assignment will involve you reporting on the "analysing a decision maker" task conducted with your group, all students will write both parts of the summative essays on their own and will receive an individual mark.

MG312 Half Unit Not available in 2020/21

Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts

This information is for the 2020/21 session.

Teacher responsible: Prof Jacqueline Coyle-Shapiro

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Organisational Behaviour and Leadership (MG105) or equivalent

Course content: Extreme OB seeks to understand atypical forms organisational phenomena. Alternative forms of organisations and unique individual circumstances have become more commonplace in recent years; however, OB theories—designed to apply to "typical" workplace behaviour and contexts—have not kept pace. The emphasis in this course will be on critically evaluating existing OB theories as they relate to extreme forms of workplace behaviour (e.g., workaholicism, pro- and antisocial behaviour) and contexts (e.g., poverty, disasters, military, and hospital). Weekly topics include isolated and high pressure work environments, passion work, virtual and flexible teams.

Teaching: 20 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 pieces of coursework (1 essay outline based on a case study and 1 presentation) in the MT.

Indicative reading: The course relies heavily on journal articles (for example, *Academy of Management Journal*, *Journal of Applied Psychology*, *Journal of Organizational Behaviour*, and *Harvard Business Review*). An extensive reading list is provided at the start of the course. Indicative readings include: Eikhof, D. R., & Haunschild, A. (2006). Lifestyle meets market: Bohemian entrepreneurs in creative industries. *Creativity and Innovation Management*, 15, 234-241. Green, F. (2004). Why has work effort become more intense? *Industrial Relations*, 43, 709-741. Griffin, M. A., Neal, A., & Parker, S. K. (2007). A new model of work role performance: Positive behavior in uncertain and interdependent contexts. *Academy of Management Journal*, 50, 327-347. Hewlett, S. A., & Luce, C. B. (2006). Extreme jobs: the dangerous allure of the 70-hour workweek. *Harvard Business Review*, 84, 49-59. Johns, G. (2006). The essential impact of context on organizational behavior. *Academy of Management Review*, 31, 386-408. O'Boyle, Jr., E. H., Forsyth, D. R., Banks, G. C., & McDaniel, M. A. (2012). A meta-analysis of the Dark Triad and work behavior: A social exchange perspective. *Journal of Applied Psychology*, 97, 557-579. Perrewé, P. L., Hochwarter, W. A., Ferris, G. R., McAllister, C. P., & Harris, J. N. (2014). Developing a passion for work passion: Future directions on an emerging construct. *Journal of Organizational Behavior*, 35, 145-150.

Assessment: Case study (100%) in the LT.

Assessment is based on a 3,000 word Case Study in which students will be asked to identify and describe an example of an "extreme" organisational phenomenon and to use existing theory(ies) to explain it, noting what the theory(ies) can and cannot account for. Students will then be asked to propose a modification to the theory(ies) to make it "fit" the phenomenon better. The Case Study, which will be due at the beginning of LT, will account for 100% of the final grade in this course. The Case Study will be supported by formative feedback from instructors and peers throughout the course, as well as a presentation.

MG315 Half Unit Not available in 2020/21**Marketing Action Learning Project****This information is for the 2020/21 session.****Teacher responsible:** Dr Haider Ali**Availability:** This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.**Pre-requisites:** Core Disciplines II: Marketing, Human Resource Management and Information Management (MG201) or Marketing (MG212).**Course content:** This course will build on theoretical concepts taught in the pre-requisites, by applying these theories and concepts to a real-life situation. Working in teams, students will develop a marketing plan for a new product/service launch; from ideation through to marketing research and setting marketing launch budgets, and considering Return on Investment. With support from the course leader, students will get the opportunity to use knowledge gleaned from many management courses to craft a compelling marketing plan. This course will test not only your academic knowledge but also your practical problem-solving skills, resourcefulness, and creativity.**Teaching:** 2 hours of lectures in the MT. 21 hours of seminars and 3 hours of classes in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.**Formative coursework:** As part of their teams, students will be expected to produce 3 pieces of formative coursework in the LT.

- i) One page memo drafting the scope of the project area.
- ii) Mid Term Report One – proposing the market segment to be targeted (based on relative attractiveness).
- iii) Mid Term Report Two – Research Plan

Work undertaken for the above can be used within the final report that is submitted for summative assessment.

Indicative reading: Malcolm McDonald, Marketing Plans: How to Prepare them, How to use them, 7th Edition, Wiley Business Model Generation, Osterwalder & Pigneur, Wiley**Assessment:** Project (90%, 5000 words) and in-class assessment (10%) in the LT.

The project will be completed in a group. A Group Evaluation Form will be required, where students' comments on their peers can affect the final grade allocated. Please note that project group membership will be allocated by the course leader.

In the last class of the Lent Term students will be required to write, under exam conditions, a reflective piece on the work undertaken by their team and their contribution to it. The precise focus of students' answers will be determined by the question that they have to address.

MG316 Half Unit**Brand Strategy****This information is for the 2020/21 session.****Teacher responsible:** Dr Hye-Young Kim**Availability:** This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not available for postgraduates.

Course content: The most valuable assets that firms have are the products/services that they offer and the brands that are associated with them. Managing Products & Brands is a rigorous examination of the theory and corporate practices relevant to product and brand management. Its core objectives are to provide an understanding of the important issues in planning and evaluating product/brand strategies, to provide the appropriate

theories, models, and analytical tools that enable managers to make well-informed product/brand management decisions, and to provide a platform for students to apply these principles. The critical approach adopted will blend theory and practice so as to promote effective managerial decision making on a short as well as long term basis.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.**Formative coursework:** Students will meet in their groups with the course leader several times during the term to receive feedback on their work. Detailed guidelines on the group project will be provided in the course syllabus and sample projects will be available.**Indicative reading:**

- David A. Aaker (1996) Building strong brands. New York: The Free Press.
- Byron Sharp (2010) How brands grow - what marketers don't know. Melbourne: Oxford University Press.
- Youngme Moon (2010) Different, Escaping the Competitive herd. New York: Crown Business, Random House.
- Kevin Lane Keller, Brian Sternthal and Alice Tybout (2002) Three questions you need to ask about your brand, Harvard Business Review, volume 80, issue 9, page 80-86.
- Lodish, Leonard M, and Carl F Mela (2007), "If Brands Are Built Over Years, Why Are They Managed Over Quarters?", July/August, Harvard Business Review, 85, 7/8 (July-August), 104-112).
- Rangaswamy, Arvind, Raymond R Burke, and Terence Oliva (1993) "Brand Equity and the Extendibility of Brand Names", International Journal of Research in Marketing, Special Issue on Brand Equity, Vol. 10, p. 61-75.

Assessment: Coursework (60%), project (30%) and class participation (10%) in the LT.

Coursework will be an Individual Take-home assignment and the Project will be completed in groups.

PB100**Foundations of Behavioural Science****This information is for the 2020/21 session.****Teacher responsible:** Dr Jet Sanders CON.3.08**Availability:** This course is compulsory on the BSc in Psychological and Behavioural Science. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Students on BSc in Psychological and Behavioural Science will automatically be enrolled onto PB100.

PB100 will offer students an understanding of general processes in behavioural science and their relations to practical policy.

The course is therefore suitable for students enrolled in other programmes who wish to enrich their understanding by drawing on detailed understanding of the psychological processes that underpin thought and behaviour.

There are a very limited number of places available for students from outside the Department of Psychological and Behavioural Science. **Places are therefore allocated on an application basis.**

This means that selections of PB100 on LSE for You remain provisional until you have received email confirmation from the Department of Psychological and Behavioural Science. To apply for a place, you should send a 200 word statement to pbs.bsc@lse.ac.uk. The statement should outline your expectations of the course, how it could feed into your wider studies and how it could be helpful for your future research or career plans. In light of this statement, requests may be accepted, declined or students may be invited to book an office hour to be sure that PB100 is aligned with their expectations. Applications are considered on a rolling basis, so you are advised to apply early.

Course content: The aim of this course is to provide an understanding of, and ability to critically appraise the fundamental ideas which drive the multidisciplinary field of Behavioural Science in relation to policymaking.

The course gradually moves from the foundational principles of Behavioural Science, to the practical applications based on

those principles through three interlinked blocks. The first block introduces dual-processing models of human behaviour to highlight the role of the environment in shaping decisions. This part considers the Dual System approach, heuristics and biases, and the influence of time, risk, and social preferences. The next block delves into the science of happiness by introducing the main accounts of subjective wellbeing, how it is conceptualised and measured and its implications for policy and other contexts. Finally, the course introduces the MINDSPACE framework by teaching how various techniques from Behavioural Economics (incentives, commitments, defaults), Social Psychology (ego, messenger and social norms), and Cognitive Psychology (priming, affect) can be used to shape behaviour. We close by addressing the role of behavioural spillover effects and a discussion on the ethics of nudging.

Throughout the course, evidence from observational studies, laboratory experiments and field experiments will be discussed, with a special emphasis on policy-level interventions.

By the end of the course you should:

- have a broad understanding of the fundamental principles of Behavioural Science, and its relations with foundational principles in Psychology and Economic Theory and policy;
- be able to critically appraise the evidence base, tools and impact of Behavioural Science and its relation to policy interventions;
- be able to explain the approaches that have been developed to change behaviour, based on the MINDSPACE framework;
- be able to apply the core theories of Behavioural Science in policy and practice-based contexts.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 40 hours across Michaelmas Term and Lent Term. There is a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term. In response to the current situation, some or all of this teaching will be delivered through a combination of live online classes and pre-recorded short online videos. You will receive the same amount of teaching whether you are on campus or online.

Formative coursework: During the course students will complete three sets of formative assessment

- Short essay (1000 words) in Michaelmas Term
- Short essay (1000 words) in Lent Term
- 1 presentation in Michaelmas Term

Indicative reading:

- Dolan, P. (2015). *Happiness by Design: Finding Pleasure and Purpose in Everyday Life*. London: Penguin.
- Dolan, P. (2019) *Happy Every After: Escaping the myth of a perfect life* London: Penguin.
- Halpern, D. (2015). *Inside the Nudge Unit: How small changes can make a big difference*. London: W H Allen.
- Kahneman, D. (2011). *Thinking, fast and slow*. Macmillan.
- Sunstein, C. R., & Thaler, R. (2009). *Nudge: Improving Decisions About Health, Wealth and Happiness*. London: Penguin.

Students will be expected to read essential readings plus additional reading from the primary literature per class. These readings will be provided in the course outline.

Assessment: Essay (75%, 3500 words) and presentation (25%) in the LT.

PB101

Foundations of Psychological Science

This information is for the 2020/21 session.

Teacher responsible: Dr Michael Muthukrishna CON.4.11

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Students following the BSc in Psychological and Behavioural Science will be automatically enrolled onto PB101.

PB101 will offer students an understanding of how psychology relates to and informs other disciplines concerned with humans

and human behaviour. The course is therefore suitable to students enrolled in other programmes who wish to enrich their understanding by drawing on the psychological sciences.

There are a very limited number of places available for students from outside the Department of Psychological and Behavioural Science. **Places are therefore allocated on an application basis.**

This means that selections of PB101 on LSE for You remain provisional until you have received email confirmation from the Department of Psychological and Behavioural Science. To apply for a place, you should send a 200 word statement to pbs.bsc@lse.ac.uk. The statement should outline your expectations of the course, how it could feed into your wider studies and how it could be helpful for your future research or career plans. In light of the statement, requests may be accepted, declined or students may be invited to book an office hour to be sure that PB101 is aligned with their expectations. Applications are considered on a rolling basis, so you are advised to apply early.

Course content: This course provides an introduction to human cognition and behaviour, addressing foundational topics in psychological science. These foundational topics include key concepts such as evolution, genetics, neuroscience, human evolutionary biology and anthropology, and specific topics, such as perception, memory, heuristics and biases, decision-making, child development, psychopathology, personality and individual differences, emotion, attraction and sexuality, cross-cultural differences, social relations, stereotypes and prejudice, norms and attitudes, social learning, social influence and persuasion, and group processes.

The course will offer an integrated perspective on these topics, investigating the evolution and variation in human psychology over time, across cultures, and over the lifespan. The course will introduce the history of the study of humans and human psychology, offering students the historical context to trends in research. By the end of the course, students will have a broad knowledge of key topics in psychology and related disciplines. Students will be prepared for more in-depth investigations of more advanced topics in later courses.

Students will also understand how psychology relates to and informs other disciplines concerned with humans and human behaviour. The course is therefore suitable to students enrolled in other programmes who wish to enrich their understanding by drawing on the psychological sciences.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 40 hours across Michaelmas Term and Lent Term. There is a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term. In response to the current situation, some or all of this teaching will be delivered through a combination of live online classes and pre-recorded short online videos. You will receive the same amount of teaching whether you are on campus or online.

Formative coursework: In order to assess student performance and practice for the summative assessments, students will:

- Complete a number of 'pop-quizzes' over the course of the year to help both the course leader and students assess their progress
- Write a practice blog-post

Indicative reading:

- Chudek, M., Muthukrishna, M., & Henrich, J. (2015). Cultural Evolution. In D. M. Buss (Ed.), *The Handbook of Evolutionary Psychology* (2nd ed., Vol. 2). Hoboken, NJ: John Wiley and Sons.
- Gray, P. O., & Bjorklund, D. F. (2018). *Psychology* (8th ed.): Worth Publishers.
- Heine, S. J. (2015). *Cultural Psychology*: W. W. Norton.

- Laland, K. N., & Brown, G. (2011). *Sense and nonsense: Evolutionary perspectives on human behaviour*: Oxford University Press.
- Muthukrishna, M., & Henrich, J. (2016). *Innovation in the collective*

brain. *Philosophical Transactions of the Royal Society of London B: Biological Sciences*, 371(1690). doi:10.1098/rstb.2015.0192
 • Muthukrishna, M., & Henrich, J. (2019). A problem in theory. *Nature Human Behaviour*.

Students will be expected to read essential readings plus additional reading from the primary literature per class. These readings will be provided in the course outline.

Assessment: Exam (16%, duration: 1 hour and 30 minutes) in the summer exam period.

Blog post (20%) in the MT.

Blog post (20%) and wikipedia article (20%) in the LT.

In-class assessment (24%) in the ST.

Blog Posts - Students will write two 1000 word blog posts that summarise a key finding in psychology. This will result in more engagement, communication and summarizing of research as well as encouraging them to seek out new findings in the psychological and behavioural science, finding ways to connect these to the real world.

Wikipedia Article - Students will create or edit a Wikipedia or Simple Wikipedia entry on a topic in psychology that is either incorrect, badly described, or missing. This will teach students critical thinking skills, not to take information at face value, and how to communicate research to a smart audience looking for both an overview and details.

In-Class Assessment - The in class assessment will take place in Summer Term and will consist of sixty multiple choice questions.

Exam - This will take place in the summer exam period and consist of short answer questions of around 500 words each.

PB102 Not available in 2020/21

Social Psychology

This information is for the 2020/21 session.

Teacher responsible: Prof Bradley Franks QUE.3.05

Availability: This course is available on the BA in Social Anthropology, BSc in Actuarial Science, BSc in Criminology, BSc in Psychological and Behavioural Science, BSc in Social Anthropology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course can be taken as an outside option by students on any year of undergraduate degrees, and as an option by students on the General Course. You should check with your department any restrictions they may place on outside options.

Course content: This course aims to provide a thorough introduction to the fundamental topics of social psychology -- a branch of psychological science that seeks to understand and explain human behaviours in actual or assumed presence of others. In this course, we will review and critically evaluate socio-psychological explanations and theories of individual, interpersonal and group processes. Here, we will study a wide range of phenomena, ranging from the way individuals perceive and think about the social world, to the way they conceptualize themselves and participate in social groups, to the way that the broader social context influences our thoughts and behaviour. Other topics will include interpersonal attraction, attitudes and attitude change, pro-social behaviour, and human aggression.

A short video on the course is here: <https://youtu.be/cO6bINGn2jQ>
 The course offers an essential complement to any degree programme in the social sciences, and it is particularly relevant to any profession that involves dealing with other people. Over the duration of this course, you will develop the knowledge and analytical skills necessary to apply the insights gained from Social Psychology to real-world social issues and to identify effective ways for achieving behavioural and societal change.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to produce two assignments as coursework, one in MT and one in LT. The first

assignment comprises of four separate short answers responding to a choice of eight questions, comprising up to 2,000 words in total (i.e. about 300 to 500 words each).

The second assignment is an essay that students write under exam conditions as a 1-hour mock exam. Students will be given three topics, from which they can choose one to prepare and answer the corresponding mock exam question. All formative assignments will be assessed by the class teachers, who will provide detailed feedback to the students.

Indicative reading: Hogg, M. A. and Vaughan, G. M. (2013). *Social Psychology*, 7th edition. Harlow, Prentice Hall.

Library catalogue number is HM251 H71 and the book is also available electronically through the library website.

Additional references and a synopsis of lectures and class topics will be made available online in early September, and will also be distributed in the first lecture of the series.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

The exam will consist of four short answer out of eight questions, and two essay answers out of six questions.

PB130

Statistics and Research Methods for Psychological and Behavioural Science

This information is for the 2020/21 session.

Teacher responsible: Dr Thomas Curran CON 3.16

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: This course equips students with the bedrock knowledge and skills for conducting research in psychology and behavioural science. It integrates core concepts from the process of planning and conducting research with those involved in understanding and analysing data. Its lectures and classes introduce enough research methods and statistics to provide a foundation for Years 2 and 3. Students will be provided with a dataset that they can use to put what they learn into practice, as well as having the opportunity to collect and analyse data of their own.

This course aims to:

- To situate contemporary research in psychology and behavioural science in the historical context of psychological enquiry;
- To convey an understanding of the processes required in planning, carrying out, summarising, and evaluating research in psychological and behavioural science;
- To introduce principles for designing, conducting, and writing up qualitative and quantitative research projects;
- To introduce statistical methods needed to familiarise oneself with a dataset, summarise its key features, and identify key relationships among variables;
- To provide practical experience of collecting and analysing psychological and/or behavioural data.
- To prepare students for later courses in statistics and research methods for psychological and behavioural science

Teaching: This course is delivered through a combination of lectures, workshops, lab sessions and classes totalling a minimum of 84.5 hours across Michaelmas Term and Lent Term. There is a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term. In response to the current situation, some or all of this teaching will be delivered through a combination of live online classes, Q+A sessions, online lab sessions and pre-recorded short online videos. You will receive the same amount of teaching whether you are on campus or online.

Formative coursework: Students will complete a number of pieces of formative work to cement learning and prepare for summative assessments.

- 4 statistics worksheets
- 1 practice piece focusing on designing research

- 1 practice piece focusing on writing up qualitative research
- 1 practice piece focusing on writing up quantitative research
- Mock Exam

Indicative reading:

- American Psychological Association. (1994). Publication manual. Sixth Edition. Washington: APA.
- Braun, V., & Clarke, V. (2013). Successful qualitative research: A practical guide for beginners. London: Sage.
- British Psychological Society (2014). Code of Human Research Ethics. BPS.

- Urdan, T. C. (2011). Statistics in plain English. London: Routledge.
- Wickham, H. (2016). ggplot2: elegant graphics for data analysis. London: Springer.

Many readings will be made available via the PB130 GitHub.

Assessment: Exam (30%, duration: 2 hours) in the summer exam period.

Project (30%, 2500 words) and other (30%) in the LT.

Poster (10%) in the MT.

- **Poster** - this is a group assignment and you will produce an A1 poster
- **Project** - this is a mixed methods project
- **Other** - this requires you to write methods and results for two **secondary data analysis** tasks
- **Exam** - the exam will consist of 55 multiple choice or very short answer questions.

PB200 Half Unit

Biological Psychology

This information is for the 2020/21 session.

Teacher responsible: Dr Miriam Tresh CON.3.14

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students should have taken Foundations of Psychological Science (PB101) or Foundations of Behavioural Science (PB100).

Course content: This course offers an introductory and integrated perspective on the biological bases of behaviour. After a discussion of the philosophical and historical background of biological psychology, the course will consider neurophysiology and how the structure of the brain connects to research methods. The course will then frame biological psychology by reference to

theories of concepts such as behavioural genetics, evolutionary psychology and the impact of hormones on behaviour. Following this, the course moves on to consider the biological underpinnings of cognition and behaviour. It appraises the applied application of biological psychology and is concerned with identifying how the biology of psychology can inform our understanding and interpretation of real-world issues.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 20 hours across Michaelmas Term. There is a reading week in Week 6 of Michaelmas Term.

In response to the current situation, some or all of this teaching will be delivered through a combination of live online classes and pre-recorded short online videos. You will receive the same amount of teaching whether you are on campus or online.

Formative coursework: During the course, students will complete two sets of formative assessment:

- Weekly multiple choice questions (MCQs)
- Podcast episode plan (800 words)

Indicative reading:

- Breedlove, S.M., & Watson, N.V. (2010). *Biological psychology: An introduction to behavioural, cognitive, and clinical neuroscience*. Sinauer Associates.
 - Cacioppo, J.T., Visser, P.S., & Pickett, C.L. (2012). *Social neuroscience: People thinking about thinking people*. A Bradford Book.
 - Gazzaniga, M.S., Ivry, R.B., & Mangun, G.R. (2014). *Cognitive neuroscience: The biology of the mind*. W.W. Norton.
 - Glimcher, P. W., Camerer, C., Poldrack, R. A., & Fehr, E. (2013). *Neuroeconomics: Decision making and the brain*. Academic Press.
 - Kolb, B., & Wishaw, I.Q. (2014). *An introduction to brain and behaviour*. Worth Publishers.
 - Nettle D. (2009). *Evolution and genetics for psychology*. Oxford University Press.
 - Pinel, J.P.J. (2013). *Biopsychology*. Allyn and Bacon
 - Plomin, R., et al. (2013). *Behavioral genetics*. Worth Publishers.
- Students will be expected to read essential readings plus additional reading from the primary literature per class. These readings will be provided in the course outline.

Assessment: Essay (60%, 3000 words) and podcast (30%) in the MT.

Essay (10%) in the ST.

Essay (60%) in MT – you will produce a 3000 word extended essay

Podcast (30%) in MT – working in pairs you will develop a 6 to 8 minute long podcast.

Essay (10%) in ST - Students following the BSc in Psychological and Behavioural Science will be expected to submit one 3000 word '**Integration Essay**' in their second year. The integration essay will count towards 10% of the final mark in of PB200, PB201, PB202, PB204 and PB205. The integration essay will discuss a topic investigated in one course and use its approach to integrate and debate approaches from two other courses taken in Year 2. For example, if you choose to base your integration essay in Biological Psychology (this course) you will use a topic from this course as the basis for debating the treatment of that topic by theories from two of Cognitive Psychology (PB201), Developmental Psychology (PB202), Social Psychology: Individuals, Groups and Culture (PB204) and Individual Differences and Why They Matter (PB205).

PB201 Half Unit

Cognitive Psychology

This information is for the 2020/21 session.

Teacher responsible: Dr Jens Madsen CON.3.19

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students should have taken Foundations of Psychological Science (PB101) or Foundations of Behavioural Science (PB100).

Course content: This course will offer an account of core theories, debates and phenomena in Cognitive Psychology. It will cover essential aspects of cognitive psychology, ranging from phenomena concerned with 'low level' cognition such as attention and perception, through to 'high level' cognition such as reasoning and decision making and consciousness, and will interweave areas that span such levels such as knowledge representation, concepts and language processing. It will also relate these areas to core aspects of behavioural science, such as levels of processing, the influence of context, and the roles of heuristics and biases in information processing. The course will also seek to assess the application of these theories and concepts to relevant real world examples and policy issues via the class discussions. Students will become familiar with methods that can be used to explore a myriad of cognitive functions, will be faced with concrete modelling tasks and see the application of cognitive psychology for interventions such as policy changes, changes in economic boundary conditions, social pressure, political campaigns etc.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 20 hours across Lent Term. There is a reading week in Week 6 of Lent Term.

In response to the current situation, some or all of this teaching will be delivered through a combination of live online classes and pre-recorded short online videos. You will receive the same amount of teaching whether you are on campus or online.

Formative coursework: During the course, students will complete two sets of formative assessment:

- As a group, develop a summary and lead a discussion in one class.
- Case study summary (1000 words)

Indicative reading:

- Eysenck, M. & Keane, M. (2015). *Cognitive Psychology: A Student's Handbook*. 7th edition. Hove: Psychology Press.
 - Gazzaniga, M. S., Ivry, R. B., Mangun, G. R. (2014). *Cognitive Neuroscience: The Biology of the Mind*. 4th edition. W.W. Norton
 - Gilbert, N. (2008) *Agent-Based Models*. SAGE
 - Gluck, M. A., Mercado, E. & Myers, C. E. (2016). *Learning and Memory*. 3rd edition. Worth: New York.
 - Goldstein, E. B. (2013). *Sensation and Perception*. Wadsworth, 9th edition.
 - Johnson, N. (2007) *Simply Complex: A clear guide to complexity theory*. One World
 - Marr, D. (1982) *Vision*. San Francisco: Freeman
 - Oaksford, M. & Chater, N. (2007) *Bayesian Rationality: The probabilistic approach to human reasoning*. Oxford, UK: OUP
- Students will be expected to read essential readings plus additional reading from the primary literature for each class. These readings will be provided in the course outline.

Assessment: Essay (70%) and group presentation (20%) in the LT. Essay (10%) in the ST.

Essay (70%) in LT – you will produce a 3000 word essay

Group Presentation (20%) in LT – you will work in groups to deliver a presentation.

Essay (10%) in ST - Students following the BSc in Psychological and Behavioural Science will be expected to submit one 3000 word 'Integration Essay' in their second year. The integration essay will count towards 10% of the final mark in PB200, PB201, PB202, PB204 and PB205. The integration essay will discuss a topic investigated in one course and use its approach to integrate and debate approaches from two other courses taken in Year 2. For example, if you choose to base your integration essay in Cognitive Psychology (this course) you will use a topic from this course as the basis for debating the treatment of that topic by theories from two of Biological Psychology (PB200), Developmental Psychology (PB202), Social Psychology: Individuals, Groups and Culture (PB204) and Individual Differences and Why They Matter (PB205).

PB202 Half Unit

Developmental Psychology

This information is for the 2020/21 session.

Teacher responsible: Dr Miriam Tresh CON.3.14

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students should have taken Foundations of Psychological Science (PB101) or Foundations of Behavioural Science (PB100).

Course content: This course will cover core approaches and phenomena in developmental psychology. It will frame developmental psychology by reference to core explanatory approaches to development and outlining major classic theoretical approaches. It also covers a range of central empirical areas of development, illustrating the ways in which the major theories explain, or fail to explain, the phenomena in those areas. The course is also concerned with locating psychological development in a wider cultural and societal context including the relations between typical and atypical development and considers developmental psychology as a paradigm for understanding and interpreting real-world issues.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 20 hours across Lent Term. There is a reading week in Week 6 of Lent.

In response to the current situation, some or all of this teaching will be delivered through a combination of live online classes and pre-recorded short online videos. You will receive the same amount of teaching whether you are on campus or online.

Formative coursework: During the course, students will complete two sets of formative assessment:

- Three weekly learning logs (approx. 200-300 words)
- Case Study (500 words)

Indicative reading:

- Banaji, M. & S.A. Gelman (Eds.), (2013) *Navigating the social world: What infants, children, and other species can teach us*. New York: Oxford University Press.
- Coleman, J. and Hagell, A. (Eds.) (2008) *Adolescence, Risk and Resilience: Against the Odds*.
- Greenfield, P. (2009) Linking Social Change and Developmental Change: Shifting Pathways of Human Development. *Developmental Psychology*, 45, 401–418.
- Lamb, M. E., & Freund, A. M. (Eds.) (2010) *Handbook of life span development*, Volume 2: Social and emotional development (Editor in Chief: Richard M. Lerner). Hoboken, NJ: Wiley.
- Leman, P. Bremner, A. Parke, R. Gauvain, M (2012) *Developmental Psychology*. McGraw Hill, London.
- Lerner, R.M. (Gen. Ed.) (2015) *Handbook of child psychology and developmental science*. (7th ed.). Hoboken, NJ: Wiley.
- McLean, K.C and Syed, M (Eds.), (2015) *The Oxford handbook of identity development*. New York: Oxford Press.
- Music, G. (2011). *Nurturing natures: Attachment and children's emotional, sociocultural and brain development*. Hove: Psychology Press.
- Narvaez, D., Panksepp, J., Schore, A. N., & Gleason, T. R. (Eds.), (2013), *Human nature, early experience and human development: From research to practice and policy*. New York: Oxford University Press.
- Slater, A. and. Bremner, J. G (Eds) (2011) *An Introduction to Developmental Psychology*. 2nd Edition, Chichester: Wiley-Breakwell.

Students will be expected to read essential readings plus additional reading from the primary literature for each class. These readings will be provided in the course outline.

Assessment: Essay (10%) in the ST.

Case study (70%) and exercise (20%) in the LT.

Case Study (70%) in LT – you will produce a 3000 word case study and research proposal.

Exercise (20%) in LT – The exercise will take the form of a 1000 word Op-Ed and will be on a topic of your choice, using behavioural science to write about a developmental issue.

Essay (10%) in ST - Students following the BSc in Psychological and Behavioural Science will be expected to submit one 3000 word **'Integration Essay'** in their second year. The integration essay will count towards 10% of the final mark in PB200, PB201, PB202, PB204 and PB205. The integration essay will discuss a topic investigated in one course and use its approach to integrate and debate approaches from two other courses taken in Year 2. For example, if you choose to base your integration essay in Developmental Psychology (this course) you will use a topic from this course as the basis for debating the treatment of that topic by theories from two of Biological Psychology (PB200), Cognitive Psychology (PB201), Social Psychology: Individuals, Groups and Culture (PB204) and Individual Differences and Why They Matter (PB205).

PB204 Half Unit

Social Psychology: Individuals, Groups and Culture

This information is for the 2020/21 session.

Teacher responsible: Prof Bradley Franks CON.3.07

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students should have taken Foundations of Psychological Science (PB101) or Foundations of Behavioural Science (PB100).

Course content: This course builds core knowledge of Social Psychology, studying the way our thinking and behaviour is influenced by the actual, imagined or implied presence of other people. It aims to understand how thinking and behaviour depends on the connections between individuals, the groups of which they are members and the cultural settings of both. The lectures and classes will discuss a range of social psychology topics, such as social cognition, self and identity, prejudice, group membership, crowds and collective behaviour, and social exclusion. Each topic will highlight the relations between real world problems, social psychological theory and empirical data, and draw connections to behavioural science. This course will foster a critical evaluation of social psychological science and its relation to other areas of psychological and behavioural science.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 20 hours across Michaelmas Term. There is a reading week in Week 6 of Michaelmas Term.

In response to the current situation, some or all of this teaching will be delivered through a combination of live online classes and pre-recorded short online videos. You will receive the same amount of teaching whether you are on campus or online.

Formative coursework: During the course, students will complete two kinds of formative assessment:

- Group presentations on the topic of the week and its application to social issues
- Practice writing Executive Summaries

Indicative reading:

- Buunk, A.P., & Van Vugt, M. (2013). *Applying Social Psychology: From problems to solutions* (2nd ed.). London: Sage.
- Gilovich, T., Keltner, D., Chen, S., & Nisbett, R.E. (2016) *Social Psychology* (4th ed.) New York: Norton
- Hewstone, M., Stroebe, W., Jonas, K. (2015). *An Introduction to Social Psychology* (6th ed.). BPS Blackwell.
- Hogg, M.A., & Vaughan, G.M. (2014). *Social Psychology* (7th ed.). Boston: Pearson.

Students will be expected to read essential readings plus additional reading from the primary literature for each class. These readings will be provided in the course outline.

Assessment: Essay (10%) in the ST.

Group presentation (20%) and proposal (70%) in the MT.

Group Presentations (20%) in MT – You will work in small groups

to make a presentation which interprets a topic from this course in the light of one key concept or debate from Foundations of Behavioural Science (PB100) or Foundations of Psychological Science (PB101).

Proposal (70%) in MT – Using theories and phenomena from the course you will propose a policy or project for an organisation (e.g. charity, for profit, non-profit) to address a social issue. The write-up (3000 words) will comprise a short Executive Summary followed by a justification based on the content of the course.

Integration Essay - Students following the BSc in Psychological and Behavioural Science will be expected to submit one 3000 word **'Integration Essay'** in their second year. The integration essay will count towards 10% of the final mark in PB200, PB201, PB202, PB204 and PB205. The integration essay will discuss a topic investigated in one course and use its approach to integrate and debate approaches from two other courses taken in Year 2. For example, if you choose to base your integration essay in Social Psychology: Individuals, Groups and Culture (this course) you will use a topic from this course as the basis for debating the treatment of that topic by theories from two of Biological Psychology (PB200), Cognitive Psychology (PB201), Developmental Psychology (PB202) and Individual Differences and Why They Matter (PB205).

PB205 Half Unit

Individual Differences and Why They Matter

This information is for the 2020/21 session.

Teacher responsible: Dr Jet Sanders CON.3.08

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students should have taken (Foundations of Psychological Science (PB101) or Foundations of Behavioural Science (PB100).

Course content: This course offers insight into the nature of differences in the psychological processes of individuals and the implications of such variation for behaviour and behaviour change. While most policies are designed with the 'average citizen' in mind, we know there is large variety between people's thoughts, choices and behaviour. More recently, these differences are leveraged to personalise behavioural intervention, advertising and political communication to target specific 'segments' of the population with the aim to enhance results. This course digs deeper into the psychological and behavioural assumptions which underlie how individuals behave collectively and individually in the wider societal context. Sample topics include how individual traits affect performance, how ideological preferences and voting patterns can be traced to individual and group variation, personality, emotion, preference, values, motivation and cognitive style, and the ethical implications of applying these insights in behaviour change contexts. We will consider sources of individual variation from the micro-level (e.g. behavioural genetics) to the macro-level (e.g. political decision outcomes, health and climate change communications or resource distribution). Ultimately, the goal is to understand why and how people differ in their enduring patterns of thinking, feeling and behaving across contexts, and what this means for contemporary societies.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 20 hours across Lent Term. There is a reading week in Week 6 of Lent Term.

In response to the current situation, some or all of this teaching will be delivered through a combination of live online classes and pre-recorded short online videos. You will receive the same amount of teaching whether you are on campus or online.

Formative coursework: During the course, students will complete three kinds of formative assessment:

- 1 visual design on an A5 postcard
- Weekly peer- and self- reviewed annotated bibliography
- 1 outline (approx. 500 words) for a 2-page POSTnote (e.g. <https://>

post.parliament.uk/research-briefings/post-pn-0564/) with 2 samples of annotated bibliography in support (500 words)

Indicative reading:

- Ashton, M. C. (2013) *Individual differences and personality*. London: Academic Press.

Students will be expected to read essential readings plus additional reading from the primary literature per class. These readings will be provided in the course outline.

Assessment: Essay (10%) in the ST.

Report (70%) and visual media (20%) in the LT.

Visual Media (20%) in LT – You will produce a visual design on an A5 postcard.

Report (70%) in LT – You will write a two-page POSTnote (approximately 1500 words) with a thematically annotated bibliography in support (for example). For an example of a POSTnote visit <https://post.parliament.uk/research-briefings/post-pn-0564/>.

Integration Essay – Students following the BSc in Psychological and Behavioural Science will be expected to submit one 3000 word 'Integration Essay' in their second year. The integration essay will count towards 10% of the final mark in PB200, PB201, PB202, PB204 and PB205. The integration essay will discuss a topic investigated in one course and use its approach to integrate and debate approaches from two other courses taken in Year 2. For example, if you choose to base your integration essay in Individual Differences and Why They Matter (this course) you will use a topic from this course as the basis for debating the treatment of that topic by theories from two of Biological Psychology (PB200), Cognitive Psychology (PB201), Developmental Psychology (PB202)

and Social Psychology: Individuals, Groups and Culture (PB204).

PB230

Intermediate Statistics and Research Methods for Psychological and Behavioural Science

This information is for the 2020/21 session.

Teacher responsible: Dr Thomas Curran CON.3.16

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Statistics and Research Methods for Psychological and Behavioural Science (PB130).

Course content: This course aims to provide students with integrated core knowledge and skills in contemporary research and analysis methods in psychological and behavioural science. Specific core methodological tools for preregistering and collecting data will be presented in lectures, selected to reflect parallel theoretical issues raised in PB200 Biological Psychology, PB201 Cognitive Psychology, PB202 Developmental Psychology, PB204 Social Psychology: Individuals, Groups and Culture, and PB205 Individual Differences and Why They Matter.

This course presents conceptual and practical knowledge on the range of tools available to the psychological/behavioural scientist. In particular, this course will examine current controversies and new developments in research methods in psychology and behavioural science. The overall goal of the course is to learn to think critically about how psychological and behavioural science is conducted, how conclusions are drawn, and how data are appropriately analysed considering intermediate issues such as measurement error and clustering. We will cover both methodological and statistical issues that affect the validity of research in psychology, with an emphasis on psychological and behavioural sciences. We will also discuss the recent controversy in psychology about the replicability of scientific results and preregistration of both quantitative and qualitative research. The course also instructs students in the use of quantitative data collection methods, including surveys, experiments, assessment tools, and computerised tasks. It also covers principles and issues involved in the analysis of quantitative data, including the importance of transparency in data analysis and reporting. Where statistics are concerned, this course presents students with knowledge of, and practical exposure to, statistical modelling. It covers linear and non-linear models, factor analysis, structural equation modelling, multilevel modelling, and intermediate issues in data cleaning and imputation. These topics build directly on from the introduction to the linear model students received in PB130. Throughout the course, an understanding of key concepts such as statistical power and effect sizes will be emphasised in line with current controversies regarding replicability and questionable research practice. Practical sessions will equip students with knowledge of how to conduct the taught statistical techniques using the R programming language.

Teaching: This course is delivered through a combination of lectures, workshops, lab sessions and classes totalling a minimum of 62 hours across Michaelmas Term and Lent Term. There is a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

In response to the current situation, some or all of this teaching will be delivered through a combination of live online classes, Q+A sessions, online lab sessions and pre-recorded short online videos. You will receive the same amount of teaching whether you are on campus or online.

Formative coursework: Students will complete a number of pieces of formative work to cement learning and prepare for the summative assessments:

- Practice Data Analysis Plan (MT)
- 3 statistics worksheets

Indicative reading:

- American Psychological Association (2020). *Publication manual of the American Psychological Association*. (7th ed.)
- Camerer, C. F., Dreber, A., Holzmeister, F., Ho, T. H., Huber, J., Johannesson, M., ... & Altmeld, A. (2018). Evaluating the replicability of social science experiments in Nature and Science between 2010 and 2015. *Nature Human Behaviour*, 2(9), 637-644.
- Chambers, C. (2017). *The 7 deadly sins of psychology: A manifesto for reforming the culture of scientific practice*. Princeton, NJ: Princeton University Press.
- Keith, T. (2015). *Multiple regression and beyond*. New York: Routledge.
- L. Haven, T., & Van Grootel, D. L. (2019). *Preregistering qualitative research*. *Accountability in Research*, 26(3), 229-244.
- Munafo, M. R., Nosek, B. A., Bishop, D. V., Button, K. S., Chambers, C. D., Du Sert, N. P., ... & Ioannidis, J. P. (2017). A manifesto for reproducible science. *Nature human behaviour*, 1(1), 1-9.
- Nosek, B. A., & Lakens, D. (2014). Registered reports: A method to increase the credibility of published results. *Social Psychology*, 45(3), 137-141.
- Open Science Collaboration. (2015). Estimating the reproducibility of psychological science. *Science*, 349(6251).
- Tabachnick, B., & Fidell, L. (2013). *Using multivariate statistics*. Boston: Pearson Education.

Assessment: Report (50%) in the MT.

Other (50%) in the LT.

Report (50%) in MT – You will develop a pre-registered report assignment of around 3500 words

Other (50%) in LT – You will undertake a secondary data analysis. The write up will be 3500.

PH103

The Big Questions: An Introduction to Philosophy

This information is for the 2020/21 session.

Teacher responsible: Dr Marius Backmann

This course is also taught by Dr Jonathan Birch, Dr Bryan W. Roberts, Dr Liam Kofi Bright, Dr Marius Backmann, and Professor Jason MacKenzie Alexander.

Availability: This course is compulsory on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available on the BA in Social Anthropology, BSc in International Relations, BSc in International Social and Public Policy, BSc in Politics, BSc in Politics and International Relations, BSc in Psychological and Behavioural Science, BSc in Social Anthropology and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None

Course content: At some point in our lives, we are all gripped by deep and fundamental questions. Questions about life, the universe and everything. Philosophers aim to make progress on these questions with clear and precise arguments. In this course, some of the big questions we may address include:

- (1) Do I know anything?
- (2) Who am I?
- (3) What is consciousness?
- (4) What is truth?
- (5) What are space and time?
- (6) Do I have free will?
- (7) What's the right thing to do?
- (8) What's the best form of government?
- (9) How can I live a meaningful life?

No one has definitive answers to these questions. But understanding the possible answers, and the arguments for and against them, is what philosophy is all about.

By grappling with these questions, you will learn the essential skills of a philosopher. First, you will develop your ability to read philosophical texts, focusing on how to extract and present a philosophical thesis and argument in a clear, logical way. Second, you will develop your thinking skills and analytical abilities by participating in philosophical discussions with your peers. Finally, you will develop your ability to construct philosophical arguments of your own by writing philosophy essays.

The questions of this course are some of the hardest that have ever been asked. We can't promise that you'll feel any closer to knowing the answers at the end of the course than you did at the beginning. But this course will help you understand the big questions, and to think about them in a reflective, philosophical way.

Teaching: 10 hours of lectures, 5 hours of seminars and 10 hours of classes in the MT. 10 hours of lectures, 5 hours of seminars and 10 hours of classes in the LT.

Parallel to this course, students will take a 5-week writing seminar in Michaelmas Term. This seminar, called "Philosophy and Argumentative Writing" ("PAW"), will provide you with practical advice and exercises to improve your writing style. Students in the BSc in Philosophy and Economics, the BSc in Philosophy, Logic and Scientific Method, and the BSc in Philosophy, Politics and Economics are required to attend (5 hours of workshops in MT) and do all assignments. Other students are invited to do so. This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to write one formative essay in MT and two formative essays in LT.

Indicative reading: The readings will be articles and excerpts from books and will be made available via Moodle.

Assessment: Essay (40%, 1500 words) and essay (40%, 1500 words) in the ST.

In-class assessment (10%) in the MT and LT.

Exercise (10%) in the LT.

You will be assessed in class throughout the year using short-answer questions.

You will revise one of your three formative essays according to the feedback from your class teacher and, if available, your peers. This revised formative essay will be accompanied by a 750 word **reflective commentary** explaining how feedback and participation in learning activities enabled you to improve your essay. The mark for this summative assignment will depend only on the quality of the reflective commentary.

PH105 Half Unit

Historical and Global Perspectives on Philosophy

This information is for the 2020/21 session.

Teacher responsible: Dr Marius Backmann LAK.301

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The traditionally received Western-centric canon as a narrative history of philosophy does not respect the true complexity of the global history of philosophical inquiry. We explore some of the global diversity by focussing on specific topics that are relevant to research and teaching within the philosophical tradition of the Department of Philosophy at LSE and provide a historical and multicultural perspective on them. We will draw from the multitude of philosophical traditions and schools around the globe, aiming to incorporate ones that have heretofore been largely neglected. Topics discussed in this course may include the

following:

- Introduction – We introduce the students to the history and philosophy of the “history of philosophy”. In particular, we ask how it was that the received narrative of philosophy as a direct succession from the pre-Socratics to Russell and Frege, or to Heidegger, became established? How, when, and why did the narrow focus on European, and later North American philosophy, come about? And how should we seek to construct an intellectually richer, but necessarily messier and more complicated, inclusive history of philosophy? We aim to provide a rich historical perspective on either individual philosophical issues or on specific traditions and how they intersect.

This will be followed by sections featuring historical perspectives on various topics, such as the following:

- Political Philosophy: In contemporary political philosophy, the liberal tradition with its emphasis on the preservation and protection of individual rights and freedoms has been highly influential. We can contrast this perspective, by, for instance, consulting classical Greek texts such as Plato’s “Republic”, and its argument against democracy, and classical Chinese works such as Confucius’s or Mengzi’s, which when compared with Western virtue ethics offers a contrasting vision of what sort of virtues a good person should display.
- Epistemology: A concern in Western philosophy has been the quest for certainty and the attempt to refute the sceptic. Exploring, for instance, Descartes’ foundationalism of the “Meditations” or Hume’s sceptical solution from “An Enquiry Concerning Human Understanding”, it will prove illuminating to also examine Teresa of Avila’s 16th century text “The Interior Castle” or al-Ghazali’s 12th century text “The Rescuer From Error”.
- Philosophy of Mind: Neo-Aristotelian metaphysics has come to increased prominence in a number of contemporary debates such as in the philosophy of mind, and so it will be helpful to begin with Aristotle’s “De Anima”. Descartes’ views on mind-body dualism can, e.g., be contrasted with Anne Conway’s 16th century defence of monism in “The Principles of the Most Ancient and Modern Philosophy”. Contemporary arguments for mental epiphenomenalism could, e.g., be contrasted with the 18th century Ghanaian philosopher Anton Wilhelm Amo’s view of reverse epiphenomenalism from “The Apathy of the Human Mind”.
- Early Analytic Philosophy. The Department is a singular school in the sense that it developed out of a fairly specific philosophical tradition. It will prove useful for students to engage with some of the works of our department’s founding figures. Popper’s “The Logic of Scientific Discovery” and Lakatos’s “The Methodology of Scientific Research Programmes” will provide the students with valuable insight into the development of their own department. Alongside their work, it is useful to highlight the work of early analytic philosophers whose contributions to the development of analytical philosophy are often neglected, such as, for instance, Susan Stebbing’s.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. No meetings will take place in reading week (Week 6).

Formative coursework: Students will be expected to produce 1 essay and 1 exercise in the LT.

Each student will write 1 formative essay of 1500 words, and will answer one short answer question to get acquainted with this form of assessment. Each student will receive feedback before turning in their summative work.

Indicative reading:

- Aristotle: *Nicomachean Ethics*, ed. by Roger Crisp (ed./trans.). Cambridge, 2000: Cambridge University Press.
- Anne Conway: *The Principles of the Most Ancient and Modern Philosophy*, ed. by Allison P. Coudert and Taylor Course. Cambridge Texts in the History of Philosophy. Cambridge, 1996: Cambridge University Press.
- René Descartes: *Meditations on First Philosophy: With Selections from the Objections and Replies*, trans. Michael Moriarty. Oxford 2008: Oxford University Press.
- David Hume: *A Treatise of Human Nature*, ed. by David F. Norton and Mary J. Norton. Oxford Philosophical Texts. Oxford, 2000:

Oxford University Press.

- Mengzi: *With Selections from Traditional Commentaries*, ed. by Bryan W. Van Norden. Hackett Publishing Company, Inc. 2008.
- Christia Mercer, “Descartes’ debt to Teresa of Avila, or why we should work on women in the history of philosophy.” *Philosophical Studies* 174 (10): 2539-2555, 2017
- Uma Narayan & Sandra Harding (eds.): *Decentering the Center: Philosophy for a Multicultural, Postcolonial, and Feminist World*. Bloomington, IN 2000: Indiana University Press.
- Plato: *The Republic*, ed. by G.R.F. Ferrari, trans. by Tom Griffith. Cambridge 2000: Cambridge University Press.
- Karl R. Popper: *The logic of scientific discovery*. Routledge classics. London 2005: Routledge.
- Eric Schliesser, (ed.): *Ten Neglected Classics of Philosophy*. Oxford 2016: Oxford University Press.

Assessment: Essay (70%, 1500 words), in-class assessment (20%) and class participation (10%) in the LT.

There is no exam for this course. Each student will write an essay of 1500 words, which constitutes 70% of the mark. Additionally, each student will answer 5 short answer questions, 4 of which will be part of the summative assessment, contributing 20% of the mark. The remaining 10% will be assessed through class participation.

PH111 Half Unit Introduction to Logic

This information is for the 2020/21 session.

Teacher responsible: Dr Laurenz Hudetz

Availability: This course is compulsory on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Arguments and inferences play a fundamental role in almost all areas of human life and society. For example, a scientist will test a theory by reasoning that if that theory is true then some other claim, one that can be checked experimentally, must be true as well. Or a politician will defend a policy by putting forward an argument in favour of it and criticising counterarguments. More mundanely, we reason, argue and draw inferences all the time and our actions are guided by the conclusions we draw. We are so used to this that we are often not even aware of it.

Logic is the study of arguments and inferences – it therefore has an enormously broad scope. Its main task is to give an explicit characterisation of those arguments and inferences that are valid (and hence differentiate them from those that are invalid). Logic tells you exactly when some conclusion follows from some premises and when it does not. It turns out that most arguments we encounter in everyday life are far from the ideal of logical validity. However, good philosophers and scientists should be able to devise arguments satisfying that ideal. This skill can also be of great advantage in fields such as law or public policy. We train this skill based on classical theories of logical consequence. Among other things, the course provides rigorous answers to the following questions.

1 What exactly are arguments and inferences and which quality criteria should they satisfy?

2 Under what conditions is an argument or inference logically valid?

3 How can one demonstrate that an argument or inference is valid?

4 How can one demonstrate that an argument or inference is not valid?

The course begins with a simple system called sentential or propositional logic, which despite its simplicity captures a significant range of important arguments. The course then focuses

on (first-order) predicate logic, which is much more powerful and provides the logical basis for analysing a great variety of arguments and theories.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. This course is delivered through a combination of lectures and classes totalling a minimum of 25 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online lectures, in-person classes and, if required, virtual classes. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Formative coursework will take the form of problem sets. These will be set on the basis of the material covered in lectures. Students are required to complete problem sets before the associated class and to be ready to present and discuss their answers in class.

Indicative reading: There will be comprehensive lecture slides and materials covering the entire course content. Indicative background readings include:

- Button, T. and Magnus, P.D. (2017): for all x : *Cambridge*, URL = <<http://www.homepages.ucl.ac.uk/~uctytbu/OERs.html>>
- Copi I.M., Cohen, C. and McMahon K. (2014): *Introduction to Logic*. Pearson.
- Halbach, V. (2010): *The Logic Manual*. Oxford University Press.
- Salmon, M.H. (2013): *Introduction to Logic and Critical Thinking*. Wadsworth.

Assessment: Take-home assessment (90%) in January. Continuous assessment (10%) in the MT.

PH112 Half Unit

Intermediate Logic

This information is for the 2020/21 session.

Teacher responsible: Dr Laurenz Hudetz

Availability: This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed, or be in the process of completing PH111 Introduction to Logic.

Course content: This course aims to familiarise students with intermediate topics in logic (building on PH111 Introduction to Logic). It focuses on concepts and theories that are useful for a deeper understanding and critical analysis of claims and arguments in contemporary philosophical research and in the social and natural sciences.

Model theory

Scientists often use mathematical structures to model real-world systems and to predict or explain their behaviour. Model theory is the study of mathematical structures from a logical point of view. Students will be introduced to core concepts of model theory. We address questions such as the following: What exactly is a structure or model? What is a theory? What does it mean that a structure satisfies a formula or theory? When are two models structurally the same (isomorphic)? Rigorous answers to these questions yield a proper semantics for classical predicate logic, shed light on the notion of truth and help to better understand the formal structure of scientific theories and models.

The theory of definitions

The modern theory of definitions offers a precise definition of 'definition' as well as rigorous criteria for checking whether a definition is formally correct. The skill of defining in a correct way can hardly be overestimated in areas such as philosophy, science, law and public policy. It prevents misunderstandings and can drastically improve the clarity of concepts, claims and arguments. It is particularly important for philosophers because many philosophical questions require definitions as answers (e.g., 'What is knowledge?', 'What is truth?', 'What is justice?', 'Under which conditions is an act morally wrong?').

Extensions of classical logic

Classical logic only deals with truth-functional sentential connectives (e.g., 'not', 'and', 'or'). However, there are also non-truth-functional connectives which play a central role in philosophical and scientific reasoning. Prime examples are counterfactual conditionals ('if A were the case, then B would be the case'), causal notions ('A causes B') and modal notions (such as 'it is possible that A' and 'it is necessary that A'). But what exactly is the meaning of these notions? In other words: how could a semantics for such non-truth-functional connectives look like? This course introduces students to the basic ideas of possible world semantics.

Inductive logic and probability

In the case of a deductively valid inference, it is utterly impossible that the conclusion is false when the premises are true. However, many inferences we draw in practice do not satisfy this ideal of validity. Often, it is only improbable that the conclusion is false given that the premises are true. In such cases, the premises support the conclusion to some degree, but their truth would not guarantee the truth of the conclusion. For example, it does not follow logically from the premise that someone smokes 40 cigarettes a day (together with background medical theories and data) that they will die early from smoking-related illness -- but it is much more probable that they will than if they did not smoke. Inductive logic is the systematic study of inferences of that type. Students will be introduced to the fundamentals of inductive logic and probabilistic reasoning.

Teaching: 15 hours of lectures and 10 hours of classes in the LT. This course is delivered through a combination of lectures and classes totalling a minimum of 25 hours across Lent Term.

This year, some or all of this teaching will be delivered through a combination of online lectures, in-person classes and, if required, virtual classes. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Formative coursework will take the form of problem sets. These will be set on the basis of the material covered in lectures. Students are required to complete problem sets before the associated class and to be ready to present and discuss their answers in class.

Indicative reading: There will be comprehensive lecture materials covering the entire course content. Indicative background readings include:

- Gupta, A. (2015): "Definitions", *Stanford Encyclopedia of Philosophy*, URL = <<https://plato.stanford.edu/entries/definitions/>>.
- Fitelson, B. (2006): "Inductive Logic", Sarkar, Sahotra and Jessica Pfeifer (eds.), *The Philosophy of Science: An Encyclopedia*, Routledge.
- Hodges, B. (2013): "Model Theory", *Stanford Encyclopedia of Philosophy*, URL = <<https://plato.stanford.edu/entries/model-theory/>>.
- Hodges, W. and Scanlon, T. (2018): "First-order Model Theory", *Stanford Encyclopedia of Philosophy*, URL = <<https://plato.stanford.edu/entries/modeltheory-fo/>>.
- Salmon, M.H. (2013): *Introduction to Logic and Critical Thinking*. Wadsworth.
- Sider, T. (2010): *Logic for Philosophy*. OUP.
- Skyrms, B. (2010): *Choice and Chance: An Introduction to Inductive Logic*. Fourth edition. Wadsworth

Assessment: Take-home assessment (90%) in the ST. Continuous assessment (10%) in the LT.

PH201

Philosophy of Science

This information is for the 2020/21 session.

Teacher responsible: Prof Roman Frigg

Availability: This course is compulsory on the BSc in Philosophy, Logic and Scientific Method. This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in

Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None.

Course content: Science is chock full of miraculous predictions, shocking revolutions, and unexpected results that few science fiction writers could have ever dreamed of. What makes science so special? This course is a tour of the philosophical underpinnings of modern science. No background in any science is needed for this course; everything you need to know will be covered.

Indicative topics include: Theory and Observation: Hume's problem of induction and Goodman's new riddle of induction, Popper's falsificationism, underdetermination of theory by evidence, the positive instance account of confirmation, Bayesianism. Laws of Nature: the regularity view of laws, laws as universals, the best systems account, instrumentalism. Explanation: the DN model of explanation, statistical explanation, causal explanation, unification. Intertheory relations: reductionism and pluralism. Realism versus Antirealism: Scientific realism and antirealism, the no miracles argument, inference to the best explanation, the pessimistic meta-induction, reductive empiricism, constructive empiricism, the natural ontological attitude, entity realism, structural realism, Kuhn and scientific revolutions. Sociological approaches to science: Social constructivism, feminism. Causation: Hume's, Mill's, Mackie's accounts of causation, counterfactual theories, probabilistic causality and manipulability accounts, transference accounts. Philosophy of a special science: Space and Time in Newton's physics.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

This year, some or all of this teaching will take place online.

Formative coursework: Students will be expected to write four essays (two in MT and two in LT), submit a few short answers before each class, and participate in class discussion.

Indicative reading: P Godfrey-Smith: *Theory and Reality: An Introduction to the Philosophy of Science*. C Hitchcock (editor): *Contemporary Debates in Philosophy of Science*.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

PH203

Philosophy of the Social Sciences

This information is for the 2020/21 session.

Teacher responsible: Prof. J. McKenzie Alexander

Availability: This course is available on the BSc in International Relations, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: No formal pre-requisites, but PH103 *The Big Questions: An Introduction to Philosophy* or equivalent is recommended.

Course content: This course examines philosophical problems of social science concerning what societies are like and how scientists theorize about them. The first part of the course will focus on questions of scientific method about the nature of understanding and the kind of knowledge the social sciences should, or can, aim for; as well as on questions of ontology pertaining to the nature of the social world. The overarching goal is to provide an intellectual geography of the philosophy of the social sciences, to which students will refer in the second part of the course when specific philosophical issues will be closely analysed and discussed. Contents to be covered in the second term will be structured around three main themes: action, rationality and intelligibility; institutions, culture, and the relationship between mind and society; and the moral aims of the social sciences, as well as their role in just social change.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

This year, some or all of this teaching will take place online.

Formative coursework: Students will be expected to write four formative essays, two in Michaelmas term and two in Lent term. The two summative essays then correspond to the two formative essays which received the highest marks. Class presentations or weekly activities may also be required, depending on the pedagogical approach of the class teacher.

Indicative reading: A detailed reading list will be provided at the beginning of the course. Indicative readings include: Nancy Cartwright and Elinora Montuschi (eds.), *Philosophy of the Social Sciences: a new introduction*; Harold Kincard, John Dupré, and Alison Wylie (eds.), *Value-Free Science: Ideals and Illusions*; Jon Elster, *Explaining Social Behaviour*; John H. Miller and Scott Page, *Complex Adaptive Systems*; Dawn Langan Teele, *Field Experiments and Their Critics: Essays on the Uses and Abuses of Experimentation in the Social Sciences*; Alex Rosenberg, *Philosophy of Social Science (Fifth edition)*; Harold Kincaid, *Philosophical Foundations of the Social Sciences*; Daniel Steel and Francesco Guala (eds.), *The Philosophy of Social Science Reader*; Michael Martin and Lee McIntyre (eds.), *Readings in the Philosophy of Social Science*.

Assessment: Essay (25%, 2000 words) and essay (25%, 2000 words) in the MT and LT.

Take-home assessment (50%) in the ST.

Summative assessment for PH203 will consist of two essays and a take-home exam. Of the four essays assigned over the course (two in Michaelmas term, two in Lent term), the two essays which received the highest marks will be selected to count towards 50% of the final grade (i.e., 25% for each essay). In Summer term, a take-home exam, to be completed over the course of a week, will also be set.

PH214

Philosophy, Morals and Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Jonathan Parry

The course is taught by Dr. Jonathan Parry, Dr. Campbell Brown, Dr. Lewis Ross, and Prof. Michael Otsuka.

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None.

Course content: The course will cover key topics in **moral and political philosophy**.

In weeks 1-5 of Michaelmas Terms, Jonathan Parry will discuss a range of topics in normative ethics, which is a branch of ethics that aims to identify the factors that determine the moral status of actions. Questions covered will include some of the following: (i) What sacrifices are we required to make for the sake of others? (ii) Does it make a moral difference that a person is less well off than she could have been? ('the non-identity problem') (iii) Is it permissible to cause harm to others in order to prevent greater harm? If so, are some ways of bringing about harm harder to justify than others? (iv) What are the moral limits on harming others in self-defence? (v) To what extent is the morality of self-defence different from the morality of defending other people? In weeks 7-11 of Michaelmas Terms, Lewis Ross will bridge the moral and political components of the course, considering a number of classic questions at the intersection between moral theory and political philosophy (which may include questions such as: when and why is it legitimate for a state to inflict harm upon its subjects? when can we disobey the state? can the moral status of our actions and the punishment we deserve be determined by factors outwith our control? is evolutionary theory a threat to our

views about morality? can the cultural circumstances in which we grow up absolve us of blame for bad beliefs?).

In weeks 1-5 of Lent Term, Michael Otsuka will discuss the following topics in political philosophy: What is the nature and justification of rights? Is redistributive taxation of earnings from labour on a par with forced labour? Is private property in land justified? Should laws lapse every twenty years, in order to prevent the dead from ruling the living? Are people entitled to compensation for injustices committed against their ancestors? In weeks 7-11 of Lent Term, Campbell Brown will discuss topics in metaethics. This branch of philosophy explores the fundamental nature of morality. When we contemplate 'first-order' moral questions – e.g., 'Is torture always morally wrong?' – we are often led to 'second-order', or metaethical, questions. Do first-order questions have objectively correct answers? If one person believes torture is always wrong, while another person denies this, must one of these people be mistaken? Can such disagreements be resolved by rational argument and scientific investigation? Or are these merely 'matters of opinion', where one person's belief is no more or less 'true' than any other's? Can the members of one culture legitimately criticise the moral norms of another culture? If morality is not objective, does it follow that public policy should not be based on morality?

Some topics in other areas of moral and political philosophy may also be covered.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 3 essays in the MT and LT.

Indicative reading: Thomson, J.J. 'Self-Defense', *Philosophy and Public Affairs* 20 (1991). Otsuka, M. 'Killing the Innocent in Self-Defense', *Philosophy and Public Affairs* 23 (1994). Quinn, W. 'Actions, Intentions and Consequences: The Doctrine of Doing and Allowing', *The Philosophical Review* 98 (1989). Øverland, G. 'Moral Obstacles: An Alternative to the Doctrine of Double Effect', *Ethics* 124 (2014). Parry, J. 'Defensive Harm, Consent, and Intervention', *Philosophy and Public Affairs* 43 (2017). Geoff Sayre-McCord, 'Metaethics', *The Stanford Encyclopedia of Philosophy* <<http://plato.stanford.edu/archives/sum2014/entries/metaethics/>>. Matthew Chrisman, What is this thing called Metaethics? Michael Smith, The Moral Problem; J.L. Mackie, *Ethics: Inventing Right and Wrong*. Nozick, R. *Anarchy, State and Utopia*. Locke, J. *Second Treatise of Government*. Cohen, G. A., 'Nozick on Appropriation', *New Left Review*, no. 150 (1985). Jefferson, T., Letter to James Madison (1789). Boxill, B., 'Black Reparations', *Stanford Encyclopedia of Philosophy* (2015)

Assessment: Essay (30%, 2000 words) and take-home assessment (60%) in the ST.

Class participation (10%).

The exam component of the course will be a take-home assessment. Students will have one week to complete the assessment, but the expectation is that the assessment will require the equivalent amount of work as a two-hour sat exam.

PH217

Set Theory and Further Logic

This information is for the 2020/21 session.

Teacher responsible: Professor Miklos Redei, LAK 4.03

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: Logic (PH101) or Formal Methods of Philosophical Argumentation (PH104), with a grade of at least 65.

Course content: The aim of the course is to familiarize students of philosophy with the essentials of naive set theory and formal logic. From set theory, the course covers (i) what is needed for use in

formal reasoning, and (ii) what is of philosophical interest (Russell Paradox, elementary theory of cardinals and ordinals, transfinite induction, Axiom of Choice, Continuum Hypothesis). From logic, it covers the basic metatheory of sentential and first-order predicate logic (up to the completeness theorems), continues with Gödel's famous incompleteness theorems concerning the limitations of mathematical provability and ends with exploring extensions of classical logic.

Teaching: 20 hours of lectures and 15 hours of classes in the MT. 20 hours of lectures and 15 hours of classes in the LT.

Lectures will be delivered online.

Formative coursework: In each term, students are required to submit solutions to two problem-sets, and write one essay on a topic selected from a list or proposed by the student and approved by the instructor.

Indicative reading: Textbooks: Cameron, Peter: *Sets, Logic and Categories* (Springer, 1999); Sider, Theodore: *Logic for Philosophy* (Oxford University Press, 2010). Specific sections of these texts that are relevant to weekly topics will be indicated in the detailed course description and in the Moodle page of the course.

Additional reading: Halmos, Paul: *Naive Set Theory* (Springer reprint 2011); Crossley, John: *What is Mathematical Logic?* (Dover reprint 1991); Goble, Lou ed.: *The Blackwell Guide to Philosophical Logic* (Blackwell, 2001); Boolos, G., Burgess, J., & Jeffrey, R.: *Computability and Logic* (Cambridge University Press, 2007). Additional material on special topics will be made available on Moodle.

Assessment: Take-home assessment (100%) in the ST. Exam will be a 48 hour take home exam to be submitted electronically.

PH222

Philosophy and Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Campbell Brown LAK 2.04

The course will be taught by Campbell Brown, Jonathan Parry, Johanna Thoma, and Michael Otsuka.

Availability: This course is compulsory on the BSc in Politics and Philosophy. This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as the following.

- What is a correct public measure of well-being?
- Should people be left to bear the consequences of their free choices?
- May the government force you to buy health insurance?
- Is torture ever justified?
- Do prosperous countries have a right to close their borders to immigrants from poor countries?
- Should hate speech be protected by freedom of speech?
- Should the development of new drugs be left to private companies rewarded by patent protection?
- What is the optimal population size and what policies may the state pursue in order to achieve it?
- Should higher education be financed by student loans or general taxation?
- Should we be free to act as we choose so long as we do not harm others?
- How should we distribute the burdens of military service?
- Should children be given the vote?

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

This course has a reading week in Week 6 of both MT and LT. Some lectures and/or classes may be delivered in an online format.

Formative coursework: Students will be expected to produce 2 essays in the MT and 1 essay in the LT.

Indicative reading: A detailed list of readings will be available on moodle. The following is an indicative sample of readings that may be discussed in the course.

- Greg Bogner and Iwao Hirose (2014). *The Ethics of Health Care Rationing*. Routledge.
- A. Voorhoeve (2018) 'May a Government Mandate More Comprehensive Insurance than People Want for Themselves?' *Oxford Studies in Political Philosophy*.
- Michael Rustin (2016), 'The neoliberal university and its alternatives', *Soundings*
- Ronald Dworkin et al (1997) 'Assisted Suicide: The Philosophers' Brief'
- Carol Kates (2004). 'Reproductive Liberty and Overpopulation' *Environmental Ethics*.
- Jonathan Wolff (2011), *Ethics and Public Policy: A Philosophical Inquiry*
- Joseph Carens (1987), 'Aliens and Citizens: The Case for Open Borders', *The Review of Politics*
- Jeff McMahan (2008), 'Torture in Theory and Practice', *Public Affairs Quarterly*
- Michael J. Robillard and Bradley J. Strawser (2016), 'The Moral Exploitation of Soldiers', *Public Affairs Quarterly*
- Annabelle Lever (2014), 'When the Philosopher Enters the Room', *Philosophy and Public Issues*

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (30%, 2000 words) in the ST.

Class participation (10%).

PH223 Half Unit

Mind and Metaphysics

This information is for the 2020/21 session.

Teacher responsible: Prof Christian List

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed The Big Questions: An Introduction to Philosophy (PH103).

Course content: Short description:

Some central topics in metaphysics and the philosophy of mind and action. Topics may vary by year.

More detailed description:

This course will cover selected key questions from metaphysics and the philosophy of mind and action. Illustrative questions include:

Metaphysics: Is "physicalism" – the thesis that everything is ultimately grounded in physical processes – philosophically defensible? Are there any features of the world that go beyond physical ones? What are the arguments for and against a reductionistic worldview? Is the world deterministic? Could there be true randomness? What is the nature of causation and causal laws? What is the role of time?

Mind and action: What does it mean to have a mind? What is an intentional agent? How can we make sense of the emergence of human and animal minds against the background of a physical world? Can mental states cause physical effects? What is consciousness, and how does it relate to physical properties? Do we have free will, and how should we think about this issue? Could agency be instantiated in entities other than biological organisms, such as robots or corporations?

The emphasis will be on developing a sharp understanding of

key concepts, arguments, and the logical relationships between different ideas, rather than providing an encyclopaedic historical or exegetical coverage. We aim to give students a conceptual toolbox for a rigorous analysis of some central philosophical questions in the areas of metaphysics and the philosophy of mind.

Teaching: 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to participate actively in their classes and to write one formative essay. This may not be a draft of the summative assignment. They subsequently write a second essay, which is summative, to be submitted at the beginning of the next term.

Indicative reading:

- David Chalmers, *The Conscious Mind*;
- Jaegwon Kim, *Physicalism, or Something Near Enough*;
- L. A. Paul and Ned Hall: *Causation: A User's Guide*.

Assessment: Exam (50%, duration: 1 hour) in the summer exam period.

Essay (50%, 1500 words) in the ST Week 1.

PH224 Half Unit

Epistemology

This information is for the 2020/21 session.

Teacher responsible: Dr Anna Mahtani

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have, or be in the process of completing PH111 Introduction to Logic.

Course content: Each of us represent the world as being a certain way. Perhaps we have knowledge about the world, or at any rate beliefs, or probabilities in certain possibilities. But how do we arrive at these representations? Do these representations reflect reality? And which conditions should they satisfy in order to be rational? Are perception, memory, testimony and intuitions reliable sources of information? The way that we represent the world affects the choices that we make, but how exactly do or should we arrive at decisions? These are some of the questions that we cover in this course on epistemology.

The first half of the course is an exploration of classic epistemology. We begin with the argument for skepticism about the external world, and in seeking to solve this problem we consider a range of positions and arguments in epistemology, including: the JTB account; the causal theory of knowing; reliabilism; internalism and externalism; contextualism and semantic externalism.

The second half of the course focuses on modern formal epistemology. We first address the question which rationality requirements systems of beliefs should satisfy and study the logic of rational belief. Moving from a qualitative to a quantitative concept of belief, we explore Bayesian epistemology – a powerful account of rational degrees of belief or credence. Moreover, we address the Lottery Paradox and investigate ways to connect the quantitative and the qualitative concept of belief.

Throughout, the aim will be to give a sharp understanding of key concepts, arguments, and the logical relationships between different ideas. We aim to give students a conceptual toolbox for rigorous analysis that can be applied to a range of areas.

Teaching: 10 hours of lectures, 10 hours of classes and 2 hours of workshops in the MT.

Lectures are taught alongside PH501 postgraduate students.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading:

- Bertrand Russell, *The Problems of Philosophy*;
- Barry Stroud, *The Significance of Philosophical Scepticism*;
- Laurence Bonjour, *Epistemology: Classic Problems and*

Contemporary Responses, 2nd Edition;

• Brian Skyrms, *Choice and Chance*

Assessment: Essay (80%, 2000 words) in the period between MT and LT.

Exercise (10%) and class participation (10%) in the MT.

PH225 Half Unit

Business and Organisational Ethics

This information is for the 2020/21 session.

Teacher responsible: Mr Thomas Ferretti

Availability: This course is available on the BSc in Management, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Politics and Philosophy, International Exchange (1 Term) and International Exchange (Full Year). This course is not available as an outside option. This course is available to General Course students.

Course content: This course is about philosophical and ethical issues related to the conduct of business. Some tough-minded people believe that business is like a game where winning means making as much money as possible. They believe that "business ethics" does not exist, that it is a contradiction in terms, and that whoever thinks otherwise – whoever thinks that business is also about treating others respectfully – is either naive, or deluded, or both. What these tough-minded people do not realise is that they are, in fact, making an ethical claim. They claim that, while we generally have ethical obligations towards others in society, when it comes to the game of business everyone is permitted to pay attention only to their personal gain. This statement may be correct, or it may be false. But it is definitely an ethical statement, simply because it makes claims about how people may permissibly behave. So, inadvertently, they are doing business ethics. In this introductory course to business ethics, we look at different types of ethical theories, and we apply them to problems that tend to arise in business contexts. The primary aim of the course is not to present you with ethical solutions or dogmatic responses, but to practice ethical reasoning, analytical skills, and critical thinking, so that towards the end of the course, you will no longer be satisfied with simple answers to difficult problems. You will also practice argumentative and writing skills that will help you express your thoughts clearly and concisely.

Topics discussed in the context of this course include:

- What are the moral responsibilities of managers?
- Is Milton Friedman correct that the main purpose of business is to increase profits?
- Do managers have instead moral responsibilities that are specific to their role as market actors, such as avoiding deception, fraud, or environmental degradation?
- What, if anything, is wrong with exploitation? If sweatshop workers voluntarily choose to work under exploitative conditions because they want a job, are such working conditions acceptable then?
- Should firms have an obligation to protect the privacy of their workers or customers?
- Why and how should firms tackle gender discrimination in the workplace?
- To what extent are the large pay packages that CEOs receive justified? What makes wages fair or unfair?

Required readings amount to about two papers per week.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. This course has a reading week in Week 6 of LT.

This year, some or all of this teaching will take place online.

Formative coursework: One essay of 1500 words.

Indicative reading: Carr, Albert Z. (1968): "Is Business Bluffing Ethical?", in *Harvard Business Review*, 46 (1): 143-153. Friedman, Milton (1970): "The Social Responsibility of Business is to Increase its Profits", *New York Times Magazine*, Sept. 13. Heath, Joseph (2014): "A Market Failure Approach to Business Ethics", in *Morality, Competition, and the Firm: The Market Failures*

Approach to Business Ethics, pp. 25-41. Oxford: Oxford University Press. Moriarty, Jeffrey (2009): "How Much Compensation Can CEOs Permissibly Accept?", in *Business Ethics Quarterly*, 19 (2): 235-250. Zwolinski, Matt (2007): "Sweatshops, Choice, and Exploitation", *Business Ethics Quarterly* 17 (4): 689-727.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 2000 words) in the ST.

PH227 Half Unit

Genes, Brains and Society

This information is for the 2020/21 session.

Teacher responsible: Dr Ella Whiteley and Dr Michael Diamond-Hunter

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines, from a philosophical perspective, the ways in which recent developments in genetics and neuroscience challenge our conceptions of what we are – and what we could become.

Topics covered include:

Human nature: Does the concept of 'human nature' have any biological basis? Can we distinguish between those traits which are part of 'human nature' and those which are not? Should we attempt to improve human nature by means of technologies such as gene editing?

Gender and the brain: Are 'sex' and 'gender' the same thing? Are gender categories natural or social? Are there robust psychological differences between men and women? If so, are these 'hardwired' into the brain or the product of socialization? Are our brains either 'male' or 'female', or are they 'intersex'?

Race and the genome: Do races exist? Is there any objective biological basis for racial categorization, or are races socially constructed? Does the concept of 'race' have a legitimate role in medicine?

Animals and people: What is the evidence for animal sentience? What are the ethical issues surrounding the use of animals in biomedical research? If we could reduce animal suffering through gene editing, should we? Do some non-human animals have 'personhood'?

Right and wrong: Has neuroscience shown that morality is more a matter of emotion than reason? Can we use neuroscience to help us choose between ethical theories? Should neuroscience inform the decision-making of our legal system? Can it be used to help us improve our own moral behaviour?

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Lectures: Weeks 1-5 and 7-11

Classes: Weeks 1-5 and 7-11

Formative coursework: A critical analysis exercise (1,000 words)

Indicative reading: Suggested introductory readings:

- Glover, J. (2008) *Choosing Children*.
- Jordan-Young, R., (2010). *Brain Storm*.
- James, M. (2011) "Race", in the *Stanford Encyclopedia of Philosophy* [online]
- Greene, J. D. (2013) *Moral Tribes*.

Assessment: Essay (50%, 1500 words) in the MT.

Essay (50%, 1500 words) in the LT.

There is no exam for this half-unit. There will be two summative essays, each worth 50% of the final mark.

PH230 Half Unit

Einstein for Everyone: From time travel to the edge of the universe

This information is for the 2020/21 session.

Teacher responsible: Dr Bryan Roberts LAK 1.01

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: Does the universe have an edge? Is time travel possible? What is a black hole, and in what sense are space, time and gravity a matter of "geometry"? The modern theory of spacetime introduced by Einstein provides a precise framework in which to ask these questions. This course makes their analysis accessible to everyone.

Students will have the opportunity to engage with Einstein's theories of relativity, to use them to analyse philosophical problems, and to examine their philosophical and practical implications. Students will learn to apply these conceptual tools to the analysis of space, time and gravity, as well as to formulate and argue for their own perspectives on the philosophical implications of relativity theory.

One is often faced with unsubstantiated declarations about the implications of Einstein's theories, by both scientists and non-scientists. This course will equip non-scientists with the conceptual tools needed to critically analyse these claims for themselves. It will also provide students with the tools needed to discuss the philosophy of space and time from a modern perspective. Einstein for Everyone requires absolutely no background in physics or maths.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students are also expected to prepare answers to a few short questions each week for discussion in class.

Indicative reading: - Norton, John D. (2015) *Einstein for Everyone*.
- Hugget, Nick. (2010) *Everywhere and Everywhen: 160 Adventures in Physics and Philosophy*.

- Einstein, Albert (1920) *Relativity: The special and general theory*.

- Euclid (1908) *The Thirteen Books of Euclid's Elements*, Vol I.

- Poincaré, Henri (1905) *Science and Hypothesis*.

Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles.

Assessment: Essay (50%, 1500 words) in the MT.

Essay (50%, 1500 words) in January.

PH232 Half Unit

Physics and the City: From Quantum Jumps to Stock Market Crashes

This information is for the 2020/21 session.

Teacher responsible: Dr Bryan Roberts LAK 1.01

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: One of the most surprising discoveries of the 20th century is that many things can be described by tiny atoms moving randomly about. Thinking about the physical world in this way led to the invention of modern particle physics. Thinking about the financial world in this way led to modern financial modeling. This course is about some of the philosophical issues underlying the relationship between physics and finance.

Students in this course will explore some of the most important conceptual and philosophical questions underlying physics and finance, like: How are assumptions about randomness compatible with observed forms of determinism? What does it mean to be an atom? How does the quantum world differ from the everyday world? What explains why physical models have unexpected applications in finance? To what extent do such applications help to underpin how the prices of financial instruments are set? The course will proceed at a conceptual level that is suitable for students of all backgrounds.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. This year, some or all of this teaching will take place online.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students are also required to prepare to discuss a few short questions in each weekly class meeting.

Indicative reading: Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles. Some indicative readings include:

- MacKenzie, Donald. *An Engine Not a Camera*, excerpts.

- Malkin, Burton G. *A random walk down Wallstreet*, excerpts.

- Norton, John D. *Einstein for Everyone*, Chapters 34-37 on

Brownian motion and the origins of quantum theory.

- Weatherall, James O. *The Physics of Wallstreet* (optional further reading)

Assessment: Essay (50%, 1500 words) in the LT Week 11.

Essay (50%, 1500 words) in the ST.

PH301 Not available in 2020/21

Rationality and Choice

This information is for the 2020/21 session.

Teacher responsible: Prof Richard Bradley LAK2.03

Availability: This course is available on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

Available only for 4th year students in the BSc. PPE.

Pre-requisites: Students must have completed Formal Methods of Philosophical Argumentation (PH104).

Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202)

Course content: This course introduces the three main components of rational choice theory: individual decision theory (including probability theory), game theory and social choice theory. Students will become familiar with the kinds of problems and solution techniques (the logical/mathematical machinery) that characterise these areas of rational choice. The primary aim of the course, however, is to philosophically examine the theories in question. To this end we examine the basic assumptions underlying the dominant decision and social choice models, and how these assumptions relate to the role(s) these models are supposed to play in various areas of philosophy (e.g. philosophy of science and ethics) and in the social sciences.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 2 essays and 2 problem sets in the MT and LT.

Indicative reading: Richard Jeffrey, *The Logic of Decision*, Michael Resnik, *Choices: an introduction to decision theory*, Martin Peterson *An Introduction to Decision Theory*, Amartya Sen *Collective Choice and Social Welfare*, Duncan Luce and Howard Raiffa *Games and Decisions*, Wulf Gaertner *A Primer in Social Choice Theory*, Ken Binmore, *Game Theory: A Very Short*

Introduction

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

The exam will consist of three sections. Section A will contain short questions of a technical nature. Sections B and C will contain longer essay questions

PH311

Philosophy of Economics

This information is for the 2020/21 session.

Teacher responsible:

Dr Johanna Thoma
Dr Campbell Brown
Prof Richard Bradley
Dr Kate Vredenburg

Availability: This course is compulsory on the BSc in Philosophy and Economics. This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed a university-level introductory course in economics, such as EC100 or EC102. Although it is a third-year course, second-year students can take it with permission.

Course content: This course provides a philosophical discussion of (1) the methods and (2) the normative commitments of contemporary economics.

(1) Here the course will focus on economic methodology and the foundations of utility theory, with an eye to important current debates in economics. We will discuss questions such as: What is utility, and how do economists measure it? Does evidence of widespread 'irrationality' from behavioural economics undermine standard microeconomic theory? Can idealised models teach us anything about real-world phenomena? If yes, how? How should we measure important economic variables, such as inflation? How do we best find out what interventions work in development? Does macroeconomics need microfoundations? Is the economics profession to blame for its failure to predict the financial crisis? (2) The second area of focus is on welfare economics, and the ethical assumptions and implications of economics. We will cover questions such as: Is getting what you want always good for you? Can you be harmed by something if you never know about it? Does it make sense to say that eating pizza gives me more happiness than going to the movies gives you? Is it possible to combine the preferences of individuals into an overall 'social' preference? Does it matter if the well-being of some people is less than that of others? When and why are markets desirable? Is paternalism always bad, and does welfare economics really avoid it? How should we resolve collective action problems? What is a fair way to distribute the tax burden?

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. This course is delivered through a combination of seminars and lectures totalling a minimum of 50 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered virtually. This course includes a reading week in Week 6 of both Michaelmas Term and Lent Term.

Formative coursework: Students will be expected to produce 2 essays in the MT and 1 presentation in the LT. Students will be expected to produce two formative essays of 1,500 words each in MT. Note that at least one of these must be submitted since a reworked version is an essential part of the summative work for the course. There will also be a formative group debate in LT.

Indicative reading: D. Hausman, *The Philosophy of Economics: An Anthology*; J. L. Bermudez, *Decision Theory and Rationality*; J.

Cohen and W. Easterly, *What Works in Development: Thinking Big and Thinking Small*; D. Hausman and M. McPherson, *Economic Analysis, Moral Philosophy, and Public Policy*; M. D. Adler, *Measuring Social Welfare: An Introduction*; D. Satz, *Why Some Things Should Not Be for Sale*.

Assessment: Exam (30%, duration: 2 hours) in the summer exam period.

Essay (30%, 2500 words) in the LT.

Essay (30%, 2000 words) in the ST.

Class participation (10%).

Summative Essay 1 (2,000 words, +500 words reflective commentary, 30%, due in LT) is a rewritten version of one of the formative essays on the MT material.

Summative Essay 2 (2,000 words, 30%, due in ST) covers the LT material.

The 2-hour ST exam (30%) consists of short-answer questions covering material from both MT and LT. This year, if necessary, the exam may be converted to a take-home exam.

Class participation counts for 10% of the course grade.

PH333 Half Unit

Philosophy of Gender and Race

This information is for the 2020/21 session.

Teacher responsible: Dr. Michael Diamond-Hunter and Dr. Ella Whiteley

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This half-unit examines, from a philosophical perspective, the nature of gender and race and the role these categories play in shaping the social world and structuring human lives.

Topics covered will include:

Gender and Biology: How does "gender" relate to "sex"? Is our concept of biological "sex" objective, and free from gender stereotypes and norms? Is our sex fixed or changeable?

Gender and Society: Does society oppress certain genders, and if so, how? How does sexism intersect with other oppressions, like racism and transphobia?

Race and Society: How does the social meaning of "race" vary around the world? Should we try to reconcile "ordinary" conceptions of "race" with technical conceptions of "race"? How should we understand the directionality and limits of racial classification?

The Future of Gender and Race: Will race and gender still exist in the future? Should we try to work for a race-free and gender-free world, or should these ways of classifying people be preserved? We will focus on approaches to these questions from "analytic" philosophy, including feminist and race-critical approaches and approaches from the philosophy of science. The aim is to confront the big questions of gender and race by analysing and constructing careful and precise philosophical arguments.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 exercise in the LT.

Indicative reading: Suggested introductory reading:

- Fausto-Sterling, 2000 [2020 New Edition]. *Sexing the Body: Gender Politics and the Construction of Sexuality*.
- Crenshaw, K., 1989. *Demarginalizing the Intersection of Race and Sex: A Black Feminist Critique of Antidiscrimination Doctrine, Feminist Theory and Antiracist Politics*.
- Bettcher, Talia, 2020. *Feminist Perspectives on Trans Issues*, The Stanford Encyclopedia of Philosophy.
- Appiah, Kwame Anthony, 2005. *The Ethics of Identity*.
- Lee, Sandra Soo-Jin, Koenig, Barbara K., and Richardson, Sarah

- S., (eds.) 2011. *Revisiting Race in a Genomic Age*
- Glasgow, J., Haslanger, S., Jeffers, C. and Spencer, Q., 2019. *What is Race?*
 - Zack, Naomi, 1993. *Race and Mixed-Race. Morality of Race.*

Assessment: Essay (45%, 1500 words) in the LT.

Essay (45%, 1500 words) in the ST.

Class participation (10%).

There is no exam for this half-unit. There will be two summative essays, each worth 45% of the final mark. 10% of the final mark will be awarded for class participation.

PH340

PPE Research Seminar

This information is for the 2020/21 session.

Teacher responsible: Dr Johanna Thoma

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

Course content: In this course, PPE students are placed in reading groups to discuss recent books by scholars working at the intersection of Philosophy, Politics and Economics. Philosophy faculty guide their selection of books and subsequent reading and research on the book. Each group organizes a research seminar on their book or a related topic open to the wider LSE PPE community.

Teaching: 2 hours of lectures, 1 hour and 30 minutes of seminars and 15 hours of classes in the MT. 3 hours of seminars, 15 hours of classes and 2 hours of workshops in the LT. 1 hour and 30 minutes of seminars and 2 hours of workshops in the ST. No meetings take place in reading week (Week 6).

*Note: Students will only be expected to attend 7.5 hours of classes either in MT or in LT, depending on which reading group they are assigned to. Students are also only expected to attend one Workshop, in the term following their classes.

This year, some or all of this teaching may be delivered virtually.

Formative coursework: Students will be expected to produce 1 piece of coursework in the term in which they attend classes. Each student will be asked to write a 250 word abstract of the book review they would like to write. Students will be placed in small groups (about three per reading group) to write their book reviews on the basis of these abstracts.

Indicative reading: Examples of recent books appropriate for PPE reading groups:

- Anna Alexandrova, *Philosophy for the Science of Well-Being* (2017)
- Elizabeth Anderson, *Private Government: How Employers Rule Our Lives (and Why We Don't Talk about It)* (2017)
- Kwame Anthony Appiah, *The Lies That Bind: Rethinking Identity* (2018)
- Anthony Atkinson, *Measuring Poverty Around the World* (2019)
- David Colander and Craig Freedman, *Where Economics Went Wrong: Chicago's Abandonment of Classical Liberalism* (2018)
- Cecile Fabre, *Economic Statecraft: Human Rights, Sanctions, and Conditionality* (2018)
- Robert Goodin and Kai Spiekermann, *An Epistemic Theory of Democracy* (2018)
- David Graeber, *Bullshit Jobs* (2018)
- Kate Manne, *Down Girl: The Logic of Misogyny* (2017)
- Cailin O'Connor, *The Origins of Unfairness* (2019)
- Eric Posner and Glen Weyl, *Radical Markets: Uprooting Capitalism and Democracy for a Just Society* (2018)
- Robert Sugden, *The Community of Advantage* (2018)
- Paul Tucker, *Unelected Power: The Quest for Legitimacy in Central Banking and the Regulatory State* (2018)
- Philippe Van Parijs and Yannick Vanderborght, *Basic Income: A Radical Proposal for a Free Society and a Sane Economy* (2017)

The students will also get the chance to make their own proposals of books to read, which we will vet.

Assessment: Class participation (30%), group exercise (20%), group essay (40%) and other (10%).

The overall grade the students will receive will be one of four: fail, pass, merit and distinction.

Participation (of which attendance is a crucial part) counts for 30% of the grade. 20% is for doing one's fair share in helping to organize one of the research seminars, assessed by a short written reflection on one's contribution. Students will be asked to produce a 3,000 word book review in small groups, which counts for 40% of the grade. A first draft will be peer reviewed and discussed at a feedback workshop. The student contribution to peer review will count for the final 10% of the grade (note that the book review is not peer assessed, that is, other students' feedback will not directly affect a group's grade for the book review).

PH341

Philosophy, Politics and Economics: Applications

This information is for the 2020/21 session.

Teacher responsible: Prof Alexander Voorhoeve LAK 401

This course will be jointly taught by Prof. Alex Voorhoeve and Dr. Liam Kofi Bright.

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

Available only to fourth-year PPE students.

Pre-requisites: The course will be available only to 4th-year PPE students.

Course content: This course will draw on concepts, theories and findings from Philosophy, Politics and Economics to tackle questions faced by decision-makers in public and private institutions. Each week will focus on a case study. Students will be expected to have had some prior exposure to the issues in previous courses—this course will stand out by being more interdisciplinary, in-depth and practical. Questions covered may include:

1 **Risky public decisions:** Decision theorists speak of risky situations when the decision-maker can assign probabilities to all relevant outcomes of their choices. How should we assess policies such as cancer screening that expose everyone to both a large chance of a small or moderate cost (such as inconvenience or false positive tests) while also saving them from a small chance of a very large harm (such as early death)?

2 **Severely uncertain public decisions:** Decision theorists speak of severely uncertain situations when the decision-maker cannot assign probabilities to all relevant outcomes of their choices. How should we assess policies, such as measures to combat a novel, highly infectious disease, or climate change, in such severely uncertain situations?

3 **Privacy and consent in online environments:** Are current regulations involving the transfer of personal data online adequate? If not, how should they be revised?

4 **The Resource Curse:** In unstable or grossly undemocratic states, the presence of natural resources often leads to oppression and/or civil war. Should democracies therefore ban the purchase of natural resources from such states?

5 **International reparations:** What, if anything, do the formal imperial powers owe their former colonies?

6 **A market for refugee quotas:** Should countries who do not wish to host refugees be able to pay other countries to take them in, in a "free market" for hosting refugees?

7 **Discrimination and the market:** Some have argued that free markets are good because they will, over time, eliminate discrimination, both because, in markets, people will mix with people of all backgrounds and because they will be judged on the quality of their goods or services alone. How powerful is this case?

8 **Concentration of wealth and economic power:** In many societies, economic power is becoming increasingly concentrated, in two ways: many sectors are dominated by a handful of large firms; and wealth is becoming increasingly unequal. In which

ways, if any, is this problematic? What are the implications of this concentration for democracy? Should dominant firms be forcibly broken up? Should inheritance be highly taxed?

9 Behavioural science and policy: Do the irrationalities documented by behavioural science legitimate paternalistic nudges, taxation, and subsidies? Does sensitivity of people's answers to how questions are framed make surveys about people's opinions on matters of policy untrustworthy?

10 Science and society: Can natural and social scientific expertise be deferred to in a democracy, or is such deference inimical to democratic rule? Which social institutions can ensure that scientists have the right incentives to produce reliable work, rather than fraudulent or unreliable findings? How should we decide which research gets funded?

Teaching: 10 hours of seminars, 10 hours of seminars and 10 hours of classes in the MT. 10 hours of seminars, 10 hours of seminars and 10 hours of classes in the LT. 2 hours of workshops in the ST. There are two weekly seminars with all members of the cohort. The first will set out key ideas and is close to an "interactive lecture format". It will present theories and findings from the three disciplines relevant to the policy issue being studied in that week. The second seminar will feature full-group discussion based on student questions posted on the Forum beforehand; it will also feature some Q&A with invited experts and student team presentations. There will also be two small-group classes in which further questions relating to the material are discussed. This year, some or all of this teaching will take place online.

Formative coursework: Students will be expected to produce 3 essays and 1 exercise in the MT and LT. Students will write two 1,500-word formative essays and one mock exam question.

Students will be able to choose between joining a team presentation or becoming student editors. In the former case, they will have a feedback meeting on a draft presentation; in the latter case they will give formative feedback on two papers which will be discussed in an editors' meeting.

An extensive list of required and further readings will be available on Moodle.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Essay (40%, 2000 words) in the ST.

Exercise (10%) in the LT.

Class participation (10%).

For the exercise, students will choose between a summative team presentation and becoming a student editor.

PH399

Dissertation in Philosophy

This information is for the 2020/21 session.

Teacher responsible: Dr Marie Milofsky

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

Course content: The dissertation may be on any topic for which a suitable supervisor in the Philosophy department can be found.

Selection of topic

Candidates should have the subject of their dissertation approved by their supervising member of department.

Arrangements for supervision

The dissertation is an opportunity to do extended independent research and writing and to present this work to one's peers. It should reflect the candidate's own views but must develop out of some established part of the philosophical literature. Students should carefully discuss their topic and approach with their supervisor who will also advise on reading and give feedback on written work. Students must have regular meetings with their supervisor, submit written work regularly, and keep a formal record of their work and progress. Students must also present an early version of their argument to fellow students and will be given feedback on the quality of their presentation as well as on the content of their arguments.

Teaching: 2 hours of seminars in the MT. 20 hours of seminars in the LT.

This year, some or all of this teaching will take place online.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT and 2 essays, 1 presentation and 1 other piece of coursework in the LT.

The formative coursework sets out several steps towards the dissertation: a literature review (due in MT); a first 2,000 words (due in week 1 of LT), a subsequent 3,000 words (which may be in part a revision of the first 2,000 words), due in week 5 of LT; a presentation of the student's arguments in LT; and a full draft of the dissertation, due in week 11 of LT. All written coursework must be submitted by email to both the student's supervisor and the teacher responsible. Students who fail to submit this coursework on time may be barred from submitting the dissertation. Participation in the weekly seminar and the quality of the presentation will determine 10% of the final mark for the course.

Assessment: Dissertation (90%, 7000 words) in the ST.

Class participation (10%).

Dissertations must be submitted in May 2021, exact date to be confirmed. They should be 5,000-7,000 words, and should be typewritten.

S0100

Key Concepts: Introduction to Social Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Chetan Bhatt STC.S107

Availability: This course is compulsory on the BSc in Language, Culture and Society and BSc in Sociology. This course is available on the BSc in International Relations, BSc in International Social and Public Policy, BSc in Politics, BSc in Politics and International Relations, BSc in Psychological and Behavioural Science and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course aims to introduce students to sociological theory by examining the work and ideas of normally eight key thinkers in social thought. For each thinker, the course will provide an overview of their contribution to the discipline of sociology, examine in detail one or more of their important texts, and also consider how their analysis could be applied to

contemporary social issues.

Teaching: This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 40 hours across MT and LT, with revision sessions in ST.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Four 2,000 word formative essays or their equivalent (two in MT; two in LT), for feedback from class teachers.

Indicative reading: A detailed reading list will be available at the first lecture, but for general preparatory reading, students might wish to consult the following: D Lee & H Newby, *The Problem of Sociology*; Z Bauman, *Thinking Sociologically*; S Bruce, *Sociology: A Very Short Introduction*.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

Attendance at all classes and submission of all set coursework is required.

SO100GC Half Unit

Key Concepts: Introduction to Social Theory (Spring Semester)

This information is for the 2020/21 session.

Teacher responsible: Prof Chetan Bhatt STC.S107

Availability: This course is available with permission to General Course 'Spring Semester' students.

Course content: The course aims to introduce students to sociological theory by examining the work and ideas of normally four key thinkers in contemporary social thought. For each thinker, the course will provide an overview of their contribution to the discipline of sociology, examine in detail one or more of their important texts, and also consider how their analysis could be applied to contemporary social issues.

Teaching: This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 20 hours in LT, with revision sessions in ST.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Two 2,000 word formative essays or their equivalent in LT, for feedback from class teachers.

Indicative reading: A detailed reading list will be available at the first lecture, but for general preparatory reading, students might wish to consult the following: D Lee & H Newby, *The Problem of Sociology*; Z Bauman, *Thinking Sociologically*; S Bruce, *Sociology: A Very Short Introduction*.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

Attendance at all classes and submission of all set coursework is required.

SO102

Data in Society: Researching Social Life

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Savage STC.S210 and Dr Anastasia Kakou COL.5.13

Availability: This course is compulsory on the BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Course content: This course explores how numbers are deployed in social settings, and how they are used in sociology to construct and challenge our understanding of the social world. The first part of the course introduces students to the importance of quantification in modern societies, familiarizes them with the main instruments for the collection of quantitative data, and provides them with an overview of the

methods used to treat such data in contemporary sociology. We cover both descriptive and explanatory methods, and we reflect on the vision of the social world implicitly associated with each of the methods we encounter. In the second part students start learning basic descriptive skills of quantitative data analysis, notably how to download large data sets, how to manipulate variables and carry out descriptive statistical analyses with statistical software Stata, and how to present statistical information in tabular and graphical form. The quantitative analysis is done in the context of a sociological observation or hypothesis, and emphasis is given on the interpretation of the results and their comparison to the findings of key readings.

Teaching: This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 40 hours across MT and LT, with revision sessions in ST. Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: One 2000 word essay (MT).

One report including a review of key readings, data processing and descriptive statistical analysis using Stata, interpretation of results, and conclusion (LT).

Indicative reading: Gould, Stephen Jay. 1981. *The Mismeasure of Man*. New York: Norton. Desrosières, Alain. 2002. *The Politics of Large Numbers: A History of Statistical Reasoning*. Cambridge: Harvard University Press. Savage, Mike, and Roger Burrows. 2007. "The Coming Crisis of Empirical Sociology", *Sociology* 41: 885-898. Wasserman, Stanley, et Katherine Faust. 1994. *Social Network Analysis: Methods and Applications*. Cambridge: Cambridge University Press. Salganik, Matthew J., Peter S. Dodds, and Duncan J. Watts. 2006. "Experimental Study of Inequality and Unpredictability in an Artificial Cultural Market", *Science* 311: 854-856. Gelman, Andrew, and Jennifer Hill. 2006. *Data Analysis Using Regression and Multilevel/Hierarchical Models*. Cambridge: Cambridge University Press. Catherine Marsh and Jane Elliot (2008): *Exploring Data* (2nd ed.)

Assessment: Essay (50%, 3000 words) in the ST.

Take-home assessment (50%) in January.

Take home assessment to be completed during the January exam period.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

SO110

Power, Inequality, and Difference: Contemporary Themes in Sociology

This information is for the 2020/21 session.

Teacher responsible: Professor Fran Tonkiss STC.S205

Availability: This course is compulsory on the BSc in Language, Culture and Society and BSc in Sociology. This course is available on the BA in Geography, BA in Social Anthropology, BSc in Politics, BSc in Politics and International Relations and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides an introduction to key areas of theory and analysis in contemporary sociology. Students will gain an understanding of critical research and debates within the discipline, and of how sociology engages with topical real-world issues. The course centres on the ways in which power relations, social and economic inequalities, forms of identity and difference are shaped in contemporary societies – focusing on both formal political and socio-economic structures and everyday experiences and identities. These issues include: class, capitals and social mobility; race, ethnicity and multi-culturalism; gender and sexual

identities; politics, social movements and the nation-state.

Teaching: This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 40 hours across MT and LT, with revision sessions in ST.
Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Two formative essays in MT, one formative essay in LT.

Indicative reading: M. Savage (2015) *Social Class in the 21st Century*; B. Skeggs (1997) *Formations of Class and Gender*; L. Back and J. Solomos (Eds) (2000) *Theories of Race and Racism: A Reader*; A. Gutmann (Ed) (1994) *Multiculturalism: Examining the Politics of Recognition*; S. Jackson & S. Scott (Eds) (2002) *Gender: A Sociological Reader*; K. Woodward (Ed) (2004) *Questioning Identity: Gender, Class and Ethnicity*; G. Bhattacharyya (2002) *Sexuality and Society*; D. Bell and J. Binnie (2000) *The Sexual Citizen: Queer Politics and Beyond*; B. Anderson (1983) *Imagined Communities*; E. Gellner (1983) *Nations and Nationalism*; M. Flinders (2012) *Defending Politics: Why Democracy Matters in the Twenty-First Century*.

Assessment: Exam (70%, duration: 3 hours) in the summer exam period.

Essay (30%, 3000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Tuesday of Summer Term.

Attendance at all classes is required and submission of all set coursework is compulsory.

Key Concepts: Advanced Social Theory

This information is for the 2020/21 session.

Teacher responsible: Dr Monika Krause STC S207 and Dr Sarah Salem STC S218

Availability: This course is compulsory on the BSc in Language, Culture and Society, BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course engages key sociological issues through the critical reading of theoretical and analytical texts. Students will engage with advanced concepts in sociological thought, and will explore the connections between theoretical arguments and the practice of social enquiry and analysis. Students will read a combination of social theory texts in a range of traditions as well as contemporary research studies.

Teaching: This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 40 hours across MT and LT, with a revision session in ST.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: One coursework submission each term is a course requirement.

Indicative reading: There is no set textbook for this course - each week's teaching is based on the critical reading of key texts.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 3500 words) in the LT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the fourth Thursday of Lent Term. Attendance at all classes and submission of all set coursework is required.

Political Sociology

This information is for the 2020/21 session.

Teacher responsible: Dr Robert Archer STC.S114a

Availability: This course is available on the BSc in Language, Culture and Society, BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Political Sociology concerns the way in which political and social factors interact to produce the societies in which we live. This course aims to discuss some central empirical and theoretical questions in the field. The course begins by examining classic comparative debates about the relationship between the development of states and nations on the one hand, and the rise of capitalism and democracy on the other. We will then examine the impact that social cleavages have on parties, elections and other political institutions in a number of different countries. We will examine the strength and political impact of both labour movements and other important social movements. And we will examine why similar countries can develop very different social and economic policies. In addition we will examine some of the founding writings of Marx and Weber and critically assess the use of political concepts. Throughout the course we will consider some of the main theoretical approaches that are used in the study of political sociology.

Teaching: This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 40 hours across MT and LT.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: A class presentation and a termly paper in both MT and LT.

Indicative reading: R Dalton, *Citizen Politics*, 5th edn; G Esping-Andersen, *The Three Worlds of Welfare Capitalism*; E. Gellner, *Nations and Nationalism*; A Giddens, *Capitalism and Modern Social Theory*; R Inglehart, *Culture Shift in Advanced Industrial Society*; J Manza & C Brooks, *Social Cleavages and Political Change*; F. Piven and R. Cloward, *Poor People's Movements*; D. Rueschmeyer et al, *Capitalist Development and Democracy*; T Skocpol, *States and Social Revolutions*; S Tarrow, *Power in Movement*.

Assessment: Exam (70%, duration: 3 hours) in the summer exam period.

Essay (30%, 2500 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Thursday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

movements; the political sociology of developing societies and impact of imperialism; and some contemporary challenges and resurgent traditions. Throughout the course we will consider some of the main theoretical approaches that are used in the study of political sociology.

SO208

Gender and Society

This information is for the 2020/21 session.

Teacher responsible: Dr Suki Ali STC.S307 and Dr Billy Holzberg STC.S103

Availability: This course is available on the BSc in Language, Culture and Society, BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will explore the meaning of gender in contemporary society. It considers gendered relations of power and the articulation of gender with other kinds of social difference such as race, class and sexuality. A variety of theoretical perspectives will be applied to a number of substantive issues of contemporary concern.

Indicative topics are: gender and sexuality; the body; families; employment; violence; nation and citizenship; multiculturalism; reproductive technologies; globalisation; sex work; representation; body modification.

Teaching: This course is delivered through a combination of lectures/seminars, online materials and classes totalling a minimum of 40 hours across MT and LT, with 2 hours in the ST.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to prepare one essay per term and at least one class paper per term which will be written up and handed to the class teacher.

Indicative reading: S Ahmed, *Living a Feminist Life*, Durham and London: Duke University Press, 2017. A more detailed reading list will be provided at the beginning of the course.

Assessment: Take-home assessment (100%) in the ST. Attendance at all classes and submission of all set coursework is required

control including policing and prisons.

Teaching: 6 hours of lectures, 6 hours of classes and 8 hours of workshops in the MT. 6 hours of lectures, 6 hours of classes and 8 hours of workshops in the LT. 2 hours of workshops in the ST.

Formative coursework: Students are required to complete two formative essays – one in MT and one in LT

Indicative reading: There is no set text for this course, and a full reading list is provided at the first class. The following is useful introductory reading that includes topics covered on the course:

- Carrabine E et al (2016) *Criminology: A Sociological Perspective*;
- Downes, D & Rock, P (2011, 4th Edition) *Understanding Deviance*;
- Liebling, A et al, (2017, 5th Edition) *The Oxford Handbook of Criminology*;
- Tierney, J (2018, 4th Edition) *Criminology: Theory and Context*;
- Walklate, S (2016) *Criminology: The Basics*.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Research report (15%) and group presentation (10%) in the LT.

Research report (15%) in the ST.

Group presentation (10%) in the MT.

Attendance at all classes and submission of all set coursework is required.

SO221

Researching London: Advanced Social Research Methods

This information is for the 2020/21 session.

Teacher responsible: Dr Sam Friedman STC S216 and Dr Ioanna Gouseti STC S105a

Availability: This course is compulsory on the BSc in Sociology. This course is available on the BSc in Language, Culture and Society. This course is not available as an outside option nor to General Course students.

Course content: This course will provide students with a first understanding of social research design and analysis of social research data. It involves a dynamic introduction to a range of research methods, both qualitative and quantitative, through practical exercises in the context of London's social life.

By the end of the course students will:

- Understand the key role of research design for conducting original empirical social research. In particular, taking into account relevant extant literature, they will develop a research question of their own interest and identify appropriate research method(s) to address it.
- Have engaged with practical research strategies and methods including the design of interview guides and survey questionnaires, conducting qualitative interviews, ethnographic observation, and a survey in the context of London.
- Have a sense of the urban sociology of London and a first-hand experience of its potential for exploring contemporary social issues.
- Be able to analyse different types of data, using a range of methods, such as thematic analysis in the case of qualitative data and regression analysis in the case of quantitative data.
- Be able to assess the quality of employed methodologies on the basis of formal criteria, such as reliability, validity and generalizability.
- Understand the ethical issues involved in social research.
- Have developed a research proposal which will strengthen their dissertation design, and might inform their dissertation topic.

Teaching: 25 hours of workshops in the MT. 25 hours of workshops in the LT.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: There is one piece of formative assessment which will be marked and on which you will get feedback in the Michaelmas Term (MT).

Indicative reading: A. Agresti & B. Finlay (2008) *Statistical Methods for the Social Sciences*. 4th edition. Pearson. Bryman, A. (2014). *Social research methods*, 4th edition. Oxford University

SO210 Not available in 2020/21

Crime, Deviance and Control

This information is for the 2020/21 session.

Teacher responsible: Dr Ioanna Gouseti

Availability: This course is available on the BSc in Language, Culture and Society, BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course encourages students to think about and debate some of the major issues in Criminology and the Sociology of Deviance. We explore the social construction of crime and deviance; the different sources of information about them; key factors that shape patterns, perspectives and experiences of crime and deviance, including social class, gender, ethnicity and the media; and different Criminological theories that have been used to explain crime and deviance. We also explore elements of social

Assessment: Essay (20%, 1500 words) and project (30%) in the LT. Research proposal (50%) in the ST.

An electronic copy of the assessed essays, to be uploaded to Moodle, no later than 4.00pm on the submission day.

The first assessment, a qualitative interview transcript and 1,500-2000 word essay (20%), is due by the first Wednesday of Lent Term.

The second assessment, a survey design project (30%), will be carried out in Lent Term.

The third assessment, a 2,000 word research proposal (50%), is due by the second Thursday of Summer Term.

Attendance at all workshops and submission of all set coursework is required.

SO224

The Sociology of Race and Empire

This information is for the 2020/21 session.

Teacher responsible: Dr Sarah Salem STC S218

Availability: This course is available on the BSc in Language, Culture and Society, BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides an introduction to theoretical, historical and contemporary debates around race, racism and empire. It firstly explores the main theoretical perspectives which have been used to analyse the production of race, racism and colonialism in a historical and contemporary framework, and the role of historical events in creating difference, including the "discovery" of the Americas, the transatlantic slave trade, the expansion of European empires, and the Renaissance and Enlightenment among others. It then examines in more detail the areas both theoretical and lived within our contemporary social and political climate where analyses of 'race', racism, belonging and identity are urgently needed; as well as the ways in which various categories such as class, gender, sexuality, among others, intersect with race. The course adopts a global lens, focusing on theory and cases from across the world. Topics include: race and empire in historical perspective; race and empire in social theory; colonialism, settler colonialism and post-colonialism; biopolitics and difference; capitalism and race; intersectionality; whiteness, diaspora and hybridity; race, genetics, disease and contamination; race and popular culture; global migration and multiculturalism; the Far Right and the white working class; and the role of race and racism in technology and the future.

Teaching: This course is delivered through a combination of lectures/seminars, online materials and classes totalling a minimum of 40 hours across MT and LT.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: One reading reflection (MT) and one formative essay (LT).

Indicative reading:

- L Back & J Solomos (Eds), *Theories of Race and Racism* (2nd

Edition, Routledge 2009);

- DF Da Silva, *Toward a Global Idea of Race* (U Minnesota Press 2007);
- Y Gunaratnam, *Researching 'Race' and Ethnicity: Methods, knowledge and power* (Sage 2003);
- J Puar, *Terrorist Assemblages: Homonationalism in Queer Times* (Duke UP 2017);
- C Mohanty, *Feminism without Borders: Decolonizing Theory, Practicing Solidarity* (Duke UP 2003);
- H Mirza (Ed), *Black British Feminism* (Routledge 1997);
- P Gilroy, *There Ain't No Black in the Union Jack* (Hutchinson 1987);
- E Baptist, *The half has never been told: Slavery and the making of American capitalism* (Hachette 2016);
- P Hill Collins, *Black Feminist Thought* (Routledge 1991);
- F Fanon, *Black skin, White Masks* (Grove press 2008);
- P.H. Collins & J. Solomos (eds) *Sage Handbook of Race and Ethnic Studies* (Sage 2010);

Assessment: Essay (30%) in the LT.

Essay (50%, 3000 words) in the ST.

Class participation (20%) in the MT and LT.

An electronic copy of the assessed essays, to be uploaded to Moodle, no later than 4.00pm on the submission day.

The first assessed essay, a book/film review, is due on the first Thursday of Lent Term and the second assessed essay is due by the third Thursday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

SO224GC Half Unit

The Sociology of Race and Empire (Spring Semester)

This information is for the 2020/21 session.

Teacher responsible: Dr Sara Salem Room STC S218

Availability: This course is available with permission to General Course 'Spring Semester' students.

Course content: The course provides an introduction to theoretical and contemporary debates around race, racism and empire. It explores the main theoretical perspectives which have been used to analyse the production of race, racism and colonialism in a contemporary framework, touching on the role of historical events in creating difference, including the "discovery" of the Americas, the transatlantic slave trade, the expansion of European empires, and the Renaissance and Enlightenment among others, before examining in detail the lived areas within our contemporary social and political climate where analyses of 'race', racism, belonging and identity are urgently needed; as well as the ways in which various categories such as class, gender, sexuality, among others, intersect with race. The course adopts a global lens, focusing on theory and cases from across the world. Topics include: race and empire in social theory; colonialism, settler colonialism and post-colonialism; capitalism and race; intersectionality; food; tourism; technology; migration; and the role of resistance and future liberation in anti-racist movements.

Teaching: This course is delivered through a combination of lectures/seminars, online materials and classes totalling a minimum of 20 hours in LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: One formative essay in LT.

Indicative reading:

- L Back & J Solomos (Eds), *Theories of Race and Racism* (2nd Edition, Routledge 2009);
- K Murji & J Solomos (Eds), *Theories of Race and Ethnicity: Contemporary Debates and Perspectives* (CUP 2014);
- MJ Schueller, *Locating race: Global sites of post-colonial citizenship* (SUNY Press 2009);

 - A Roy, *The Doctor and the Saint: Caste, Race, and Annihilation of Caste, the Debate between BR Ambedkar and MK Gandhi* (Haymarket 2017).

Assessment: Essay (100%, 3000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the third Thursday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

S0232 Half Unit Not available in 2020/21

Sociology of Health and Illness

This information is for the 2020/21 session.

Teacher responsible: Dr Carrie Frieze STC S213

Availability: This course is available on the BSc in Sociology.

This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: No specific pre-requisites, but this course is only open to second and third year students in Sociology and other programmes. It is not available as a first year option.

Course content: Sociology of Health and Illness explores the ways in which experiences of health and illness are socially patterned. We will also ask how the management of health and illness organizes social life. To explore experiences of health and illness, we will look at how specific 'medical disorders' (e.g., ageing, cancer, mental health, disabilities, reproductive and sexual health, obesity etc.) are 'embodied' in socially patterned ways. Empirical studies of specific disorders will be read, in conjunction with analysis of other kinds of texts (e.g., popular writing, film, performance art, museum exhibits, etc.). To address how the management of health and illness organizes social life and vice versa, key theories in the sociology of health and illness will be explored. This will include Parsons's sick role; Weberian and feminist understandings of professional dominance; medicalization, demedicalization and biomedicalization; stigma and stigmatization; health inequalities and the social determinants of health; and Foucaultian notions of surveillance, biopolitics and governmentality.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Teaching will comprise of a one hour lecture and one hour class each week.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

The assessed examination is supported by ONE take home, mock examination that is formative.

Indicative reading: S Nettleton *The Sociology of Health and Illness* (2006), P Starr, *The Social Transformation of American Medicine* (1982), A Nelson *Body and Soul: The Black Panther Party and the*

Fight Against Medical Discrimination (2011), M Foucault *The Birth of the Clinic: An Archaeology of Medical Perception* ([1973] 1994), I Hacking *The Social Construction of What?* (1999), A Frank, (1997) *The Wounded Storyteller: Body, Illness and Ethics* (1997), E Martin *Bipolar Expeditions: Mania and Depression in American Culture* (2007), J Latimer *The Gene, The Clinic and the Family* (2013), S Kaufman (2015) *Ordinary Medicine*,

Eugene Raikhel and William Garriott (2013) *Addiction Trajectories*

Assessment: In-class assessment (20%) in the MT.

Take-home assessment (80%) in the LT.

Weight 80%

Type –seen take-home exam where 3 questions need to be answered from 6 questions

Number of words: No more than 1,300 words per answer, and 3,600 words in total

Timing of submission: LT Week 0

AND

Weight 20%

Type-Participation. Students are to make TWO comments on the Moodle discussion board and respond to TWO other student's comments from Weeks 1-11. The best mark of the two comments, and the best mark of the two responses will be averaged to give the participation mark.

Number of words. No more than 300 words per comment

Timing of submission: No later than 10:00 am on Friday of Weeks 3, 5, 8, 11

Assessed take home exam due in LT Week 0 (the week before the start of LT). A copy to be uploaded to Moodle by the specified time. Attendance at all classes and submission of all set coursework is required.

S0234 Half Unit

Digital Technology, Speed and Culture

This information is for the 2020/21 session.

Teacher responsible: Prof Judy Wajcman STC S203

Availability: This course is available on the BSc in Sociology.

This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: No specific pre-requisites, but this course is only open to second and third year students in Sociology and other programmes. It is not available as a first year option.

Course content: This course aims to give students a detailed understanding of sociologically informed approaches to the social studies of science and technology. It will consider how macro theories of post-industrial society (from Bell to Castells) have conceptualised the role of technology in social change. It will then look at the development of STS as a field that highlights the constitutive role of objects and artefacts in social relations. In other words, it will reflect upon sociology's traditional neglect of the social life of things or materiality. These broad themes will then be elaborated substantively. First, by considering the role of technology in reconfiguring time, speed, space and mobility. Second, by considering power relations and social inequalities embedded in digital technologies, such as the Internet and mobile phones. Third, by treating technology as a culture that shapes gender identities, such as those that find expression in the virtuality of cyberspace. The course will draw on examples from a variety of domains including information and communication technologies, robotics, cyborgs, sex, and weapons.

Teaching: This course is delivered through a combination of lectures/seminars, online materials and classes totalling a minimum of 20 hours in MT.

Reading Weeks: Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

ONE formative essay of 1,200 words will be due at the end of Week 6 of Michaelmas Term.

Indicative reading: MacKenzie, D. and Wajcman J. (1999) *The Social Shaping of Technology* (MIT Press). Suchman, L. (2007) *Human-Machine Configurations* (CUP). Turkle, S. (2011) *Alone Together* (Basic Books). Wajcman, J. (2015) *Pressed for Time* (Chicago University Press). Wajcman, J. (2014) *TechnoFeminism* (Polity Press).

Assessment: Essay (100%, 3000 words) in the MT.

The course is assessed by ONE summative essay of 3,000 words that is worth 100% of the total mark.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the submission day. Assessed essay due Thursday of Week 11 of MT.

Attendance at all classes and submission of all set coursework is required.

SO235 Half Unit Not available in 2020/21

The Sociology of Homicide

This information is for the 2020/21 session.

Teacher responsible: Dr Janet Foster

Availability: This course is available on the BSc in Criminology, BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Preferable, but not compulsory, that students should have taken SO210 Crime Deviance and Control – this is currently a full unit course. Criminology students from Social Policy Department would be eligible in either year 2 or 3 but preferable again for them to take this course after they have taken SP270.

Course content: This half-unit course examines patterns of homicide in different contemporary societies with different social and political contexts (for example, Russia, Jamaica, USA, Colombia, South Africa, and Britain) and the explanations for their contrasting homicide incidence. We explore the differences between fictional representations of murder and its actualities both in terms of type/prevalence, as well as investigative practices. The importance of class, gender and race in patterns of homicide victimisation are explored, as well as the experiences of victims' families and the significance of murder in contemporary society.

Teaching: 30 hours of workshops in the LT.

Course Outline

1. Introduction: What is homicide? Definitions and the issues associated with them. Different types of homicide and global variations. The issues and problems associated with researching homicide.

2. Sherlock Holmes and CSI: The impact of crime fiction and the media in perceptions of homicide

3. Patterns of homicide: Using case studies from different countries and different social and political contexts (e.g. Russia, Jamaica, USA, Colombia, South Africa, and Britain) we explore different patterns of homicide and explanations for these patterns.

4. Gender and homicide: Exploring the public/private dimensions of homicide and differential risk

5. Race and homicide: Homicide disproportionately affects Black and minority ethnic victims yet this receives relatively little sociological attention. We explore these patterns of homicide and the reasons for it.

6. Reading week

7. Investigating homicide: How do homicide investigations work? What are the issues associated with self-solver and 'who-dunnit' investigations? What issues affect the likelihood of perpetrators being caught?

8. Homicide perpetrators: Why do homicides occur and what do we know about perpetrators?

9. Living a life sentence: the experiences of murder victims' families.

10. Presentations

11. Synthesis: The sociological significance of homicide

Formative coursework: Students will be expected to produce 1

piece of coursework in the LT.

Students are expected to read, and prepare in advance, for each of the workshops. Students must complete either a 1,500 word essay, or a poster, to be submitted in week 8, on one of the topics covered in weeks 2-5 of the course.

Indicative reading: Allsop, C. (2018) *Cold Case Reviews: DNA, Detective Work and Unsolved Major Crimes* Oxford: Oxford University Press. Brookman, F et al (2017) *The Handbook of Homicide* Chichester: Wiley. Brookman, F (2005) *Understanding Homicide* London: Sage. Innes, M (2003) *Investigating Homicide* Oxford: Oxford University Press. Leovy, J (2015) *Ghettoside: investigating a homicide epidemic* London: Random House. Pridemore, W (2005) 'Social structure and homicide in post-Soviet Russia' *Social Science Research* Vol. 34 (4) pp732-756. Morris, P and Graycar, A (2011) 'Homicide through a different lens' *British Journal of Criminology* Vol. 51 (5) pp823-838. *Policing and Society* (2013) Vol. 23, No. 3 Special Issue on homicide. UNODC (2013) *Global Study on Homicide: Trends/Context/Data* United Nations Office on Drugs and Crime. Wilson, D (2009) *A History of British Serial Killing* London: Sphere

Assessment: Essay (80%, 3000 words) in the ST. Presentation (20%) in the LT.

The essay length is between 2,500-3000 words.

SO236 Half Unit

Urban Society

This information is for the 2020/21 session.

Teacher responsible: Dr David Madden STC.S209

Availability: This course is available on the BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course is available to students in Year 2 and Year 3.

Course content: This course is an introduction to urban sociology and urban studies. The course is organised around a set of key concepts for developing a critical understanding of urban space today. These key concepts may include terms such as density, inequality, planning, neighbourhood life, public space, migration, infrastructure, displacement, globalisation, urban renewal, gentrification, informality, exclusion, marginality, difference, or social movements. The course will draw on a variety of texts that illuminate and interrogate city life from a variety of sociological perspectives, so in addition to academic studies, students will analyse planning reports, historical documents, first-person literary essays, visual materials, and other representations of the urban experience.

Teaching: This course is delivered through a combination of lectures, seminars and online materials totalling a minimum of 20 hours in LT.

Reading Weeks: Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Formative coursework will be due by the start of week 7. It will consist of writing a short 500 word essay asking students to take an original photograph and use it as the basis for a reflection on one of the key concepts explored in class. This reflection will serve to prepare students for their summative essay.

Indicative reading:

- Thucydides. 2009 [circa 431 BCE]. Pericles's funeral oration and the plague of Athens. Pp 96-100 in *The Peloponnesian War*, Martin Hammond, trans. Oxford University Press.
- Wirth, Louis. 1938. "Urbanism as a Way of Life." *American Journal of Sociology* 44 (1): 1-24.
- Gans, Herbert J. 1962. "The Community." Pp 104-119 in *The Urban Villagers: Group and class in the life of Italian-Americans*. Free Press.
- Atkinson, Rowland. 2003. "Domestication by Cappuccino or a Revenge on Urban Space? Control and empowerment in the management of public spaces." *Urban studies* 40.9 (2003): 1829-

- 1843.
- Anderson, Elijah. 2004 "The Cosmopolitan Canopy." *The Annals of the American Academy of Political and Social Science* 595 (1): 14-31.
 - Back, Les, and Shamser Sinha. 2016. "Multicultural Conviviality in the Midst of Racism's Ruins." *Journal of Intercultural Studies* 37.5 (2016): 517-532.
 - Caldeira, Teresa P. R. 1996. "Fortified Enclaves: The new urban segregation." *Public Culture* 8 (2): 303-328.
 - Simone, AbdouMaliq. 2004. "People as Infrastructure: Intersecting fragments in Johannesburg." *Public Culture* 16 (3): 407-429.
 - Garbin, David, and Gareth Millington. 2012. "Territorial Stigma and the Politics of Resistance in a Parisian Banlieue: La Courneuve and beyond." *Urban Studies* 49 (10): 2067-2083.
 - Mattern, Shannon. 2018. "Community Plumbing: How the hardware store orders things, neighborhoods, and material worlds." *Places Journal*, July.
 - Nicholls, Walter J. 2008. "The Urban Question Revisited: The importance of cities for social movements." *International Journal of Urban and Regional Research* 32 (4): 841-859
 - Appadurai, Arjun. 2001. "Deep Democracy: Urban governmentality and the horizon of politics." *Environment and Urbanization* 13 (2): 23-43.

These texts are examples of the articles and books from sociology and urban studies that the course will examine. The course will also analyse texts from various other urban-oriented fields and genres.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (20%, 1500 words) and class participation (10%) in the LT. There will be three summative assessments: a final exam, a short essay, and participation in seminars.

Final exam at the end of the term: 70%

Short illustrated essay (1500 words) on one of the concepts explored in class, due in week 11: 20%

Seminar participation: 10%

S0302

The Sociological Dissertation

This information is for the 2020/21 session.

Teacher responsible: Prof Fran Tonkiss STC S205
Dr Claire Moon STC S109

Availability: This course is compulsory on the BSc in Sociology. This course is available on the BSc in Language, Culture and Society. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students undertaking this course need to have completed the first two years of the BSc in Sociology.

Course content: The dissertation takes the form of an independent and extended research project of 10,000 words on a sociological topic of the students' choosing, developed in consultation with their Academic Mentor. The dissertation process includes reviewing relevant literature on the topic of study, formulating a viable and sociologically-relevant research problem, collecting and analysing primary and/or secondary data (such as a case study, data set, fieldwork observations, survey results or interviews), and writing up an independent analysis based on this research. Students' work on the dissertation is supervised in small-group and individual tutorials with their Academic Mentor over MT and LT. The Dissertation process is supported by a series of compulsory group workshops in the MT and LT which focus on research project design. The workshops cover topics such as identifying a sociological problem for investigation, constructing a bibliography, research ethics, research access, data collection, data analysis, writing up and trouble-shooting.

Teaching: 7 hours and 30 minutes of seminars in the MT. 7 hours and 30 minutes of seminars in the LT.

Seminars will be structured as follows: 5 x 1.5 hour seminars in the MT. 5 x 1.5-hour seminars in the LT.

In addition, 5 x 1.5-hour small-group tutorials with Academic

Mentors in MT. 2 x individual supervisions with Academic Mentors plus drop-in sessions in LT.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: One piece of formative coursework in the MT.

Assessment: Dissertation (90%, 10000 words) in the ST.

Research proposal (10%) in the MT.

Assessment Particulars:

Research proposal (10%, 2,000 words): An electronic copy of the research proposal to be uploaded to Moodle no later than 4.00pm on the last Thursday of Michaelmas Term.

Dissertation (90%, 10,000 words): Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC.S116, no later than 4.00pm on the second Thursday of Summer Term. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day. Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Attendance at all classes and submission of all set coursework is required.

S0308

Personal Life, Intimacy and the Family

This information is for the 2020/21 session.

Teacher responsible: Dr Ursula Henz STC S100B

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is not available as an outside option nor to General Course students.

Course content: The course provides an overview over the area of family sociology, drawing predominantly on literature about Britain and other Western societies. The course focuses on recent and ongoing transformations of family structure, family relationships and family life. Throughout the course various theoretical approaches will be considered. Issues related to gender, ethnicity and migration will be cross-cutting themes of the course. Indicative topics are: family structures and family relationships, childhood, adolescence, partnership formation, marriage, childlessness, motherhood, fatherhood, parenting, divorce, post-divorce families, family and work, family and education.

Teaching: This course is delivered through a combination of workshops, seminars and online materials totalling a minimum of 40 hours across MT and LT, with 2 hours of classes in the ST.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students are required to complete two class presentations and two formative essays.

Indicative reading:

- Treas, Judith, Scott, Jacqueline & Richards, Martin (eds.) (2014) *The Wiley Blackwell Companion to The Sociology of Families*, Chichester, West Sussex: Wiley Blackwell - covers many aspects of the course.

Other recommended readings include:

- Beck, Ulrich & Beck-Gernsheim, Elisabeth (1995): *The Normal Chaos of Love*. London: Polity Press.
- Chambers, Deborah (2012): *A Sociology of Family Life*. Cambridge: Polity Press.
- Hochschild, Arlie (1990): *The Second Shift. Working Parents and the Revolution at Home*. London: Piatkus.
- Lareau, Annette (2011): *Unequal Childhoods. Class, Race and Family Life*. University of California Press: Berkeley, Los Angeles, London.
- Smart, Carol & Neale, Bren (1999): *Family Fragments?* Cambridge: Polity Press.
- Smart, Carol, Neale, Bren & Wade, Amanda (2001): *The Changing Experience of Childhood: Families and Divorce*. Cambridge: Polity Press.

Assessment: Take-home assessment (50%) and research report (50%) in the ST.

An electronic copy of the research report, to be uploaded to

Moodle, no later than 4.00pm on the second Wednesday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

S0309 Half Unit Atrocity and Justice

This information is for the 2020/21 session.

Teacher responsible: Dr Claire Moon STC S109

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Sociology students will be given priority.

This course cannot be taken in conjunction with IR312 Genocide. This course is capped.

Pre-requisites: No specific pre-requisites, but this is open only to 2nd and 3rd year students in Sociology and other programmes. It is not available as a 1st year option.

Course content: The course will cover a number of issues relevant to the study of atrocity and justice for atrocity. It looks at the social construction of atrocities, the Genocide Convention, structural approaches to understanding genocide (modernity, democracy and colonial rule), the perpetrators, victims and witnesses of atrocity, the problem of denial of state crimes, historical injustices in Australia, Canada and the US, forensic investigations of atrocity, retributive and restorative approaches to justice for atrocity, truth commissions and war crimes tribunals.

Teaching: This course is delivered through a combination of lectures, seminars and online materials totalling a minimum of 20 hours in the LT, with 2 hours in the ST.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: 1 x formative essay of 1500 words.

Indicative reading: Arendt, Hannah (1994) *Eichmann in Jerusalem: A Report on the Banality of Evil* (New York: Penguin Books). Bauman, Zygmunt (1989) *Modernity and the Holocaust* (Cambridge: Polity). Browning, Christopher (1992) *Ordinary Men: Reserve Police Battalion 101* (New York: HarperCollins). Cohen, Stan (2001) *States of Denial* (Cambridge: Polity Press). Hacking, Ian (1999) *The Social Construction of What?* (Cambridge: Harvard University Press). Jones, Adam (2011) *Genocide: A Comprehensive Introduction*, 2nd edition (London: Routledge). Wilson, Richard (2001) *The Politics of Truth and Reconciliation in South Africa: Legitimizing the Post-Apartheid State* (Cambridge: Cambridge University Press).

Assessment: Take-home assessment (100%) in the ST. Attendance at all classes and submission of all set coursework is required.

S0310 Half Unit The Sociology of Elites

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Savage STC S210

Dr Luna Glucksberg CBG 4.04

Availability: This course is available on the BSc in Language, Culture and Society, BSc in Social Policy and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: No specific pre-requisites, but this course is only open to 2nd and 3rd year students in Sociology and other programmes. It is not available as a 1st year option.

Course content: In the early 21st century, there is a new fascination

with the super-rich, the 1%, the 'elites'. This course therefore aims to expose students to the challenges and excitements of studying this small but very significant social class, using cutting edge research on recent trends as well as important older studies.

Teaching: This course is delivered through a combination of lectures, seminars and online materials totalling a minimum of 20 hours in the LT, and 1 hour in the ST.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Formative assessment will be through a 2000 word essay to be handed in on the Monday of Week 7, directly after Reading Week. Students will also be asked to give presentations in seminars, and informal feedback will be given on these.

Indicative reading:

- Piketty, T., (2014), *Capital in the 21st Century*, Boston, Harvard UP.
- Khan, S., (2010), *Privilege*, Princeton, Princeton UP.
- Dorling, D., (2014), *Inequality and the 1%*, London, Verso.
- Savage, M., and Williams, K., (eds) (2008), *Remembering Elites*, Oxford, Blackwells.
- Scott, J., (1982), *The Upper Class*, Macmillan.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 2000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

S0311 Half Unit Law and Violence

This information is for the 2020/21 session.

Teacher responsible: Dr Ayca Cubukcu STC.S113

Availability: This course is available on the BSc in Sociology. This course is not available as an outside option nor to General Course students.

This course is available to students in Year 3 only.

Course content: *Law and Violence* is an intensive introduction to key theoretical texts that can inform a nuanced understanding of the controversial yet crucial nexus between law and violence. What is the relationship between law and violence? Are they mutually exclusive forms of human action? Is it a paradox that law employs violence in claiming to prevent or circumscribe the latter? Is it a contradiction that violence is often the means to establish or change the law? We will consider these questions within historical contexts of the nation-state and the global legal order. The case of refugees—often caught “outside” the law—will also be considered.

Teaching: This course is delivered through a combination of seminars and online materials totalling a minimum of 20 hours in LT. This course requires the practice of close reading. We will not read in large quantities. However, students are expected to engage with the assigned texts deeply, paying special attention to the presuppositions of the authors and the structures of their argumentation, identifying the weaknesses and the strengths of their theoretical constructions. By the end of the course, students are expected to make the texts speak with and against each other. Students in this course will have a reading week in week 6.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the LT.

Essay abstract (max 800 words) to be submitted in class in week 7. Students will get detailed feedback on their abstracts.

Indicative reading: Giorgio Agamben, *Homo Sacer: Sovereign Power and Bare Life*. Stanford Uni. Press. 1995. Antony Anghie, *Imperialism, Sovereignty and the Making of International Law*. Cambridge University Press. 2005. Talal Asad, “Thinking About Just War and Terrorism,” in *Cambridge Journal of Foreign Affairs*. Talal Asad, *On Suicide Bombing*, Columbia University Press. 2007. Hannah Arendt,

Eichmann in Jerusalem. Penguin Press. 1963. Walter Benjamin, "Critique of Violence" in *Reflections*, Schocken Books. 2002 [1929]. Jacques Derrida, "Force of Law: The 'Mystical Foundations of Authority'" in *Deconstruction and the Possibility of Justice*. Drucilla Cornell, Michel Rosenfeld, David Gray Carlson, eds. Routledge. 1992. Michel Foucault, *Society Must Be Defended*. Picador. 2003 [1976]. Georges Sorel, *Reflections on Violence*. Dover. 2004 [1908]. Carl Schmitt, *Political Theology*. The MIT Press. 1985 [1922].

Recommended:

Carl Schmitt, *The Nomos of the Earth*. Telos Press. 2003 [1950].

Assessment: Essay (90%, 4000 words) in the ST.

Class participation (10%) in the LT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Tuesday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

S0312 Half Unit

Work, Inequality and Society

This information is for the 2020/21 session.

Teacher responsible: Dr Patrick McGovern STC.S110

Availability: This course is available on the BSc in Language, Culture and Society, BSc in Social Policy and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: No specific pre-requisites, but this course is only open to 2nd and 3rd year students in Sociology and other programmes. It is not available as a 1st year option.

Course content: Sociological perspectives on cross-national differences in employment and social inequality.

Theoretical perspectives on inequality; gender in the labour market; occupational segregation; the 'glass ceiling'; immigrant employment; race, ethnicity and discrimination; social class at work; class reproduction in elite firms; the rise of wage inequality; and income inequality in the mass media.

Teaching: This course is delivered through a combination of lectures/seminars, online materials and classes totalling a minimum of 20 hours in LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: 1,500 word essay due in Week 8 of LT.

Indicative reading: W. Bottero, W. (2018) *A Sense of Inequality*; Friedman, S. and Laurison, D. (2020) *The Class Ceiling*; Tilly, C. & C. Tilly (1998) *Work Under Capitalism*; Grusky, D. (2014) (4th ed) *Social Stratification*; McGovern, P. et al. (2007) *Market, Class, and Employment*; Padavic, I. & Reskin, B. (2002) *Women and Men at Work*; Payne, G. (ed.) (2013) *Social Divisions*; L. Platt, L. (2011) *Understanding Inequalities*; D. Tomaskovic-Devy, D. and D. Avent-Holt (2018) *Relational Inequalities*.

Further reading will be detailed in the course syllabus.

Assessment: Essay (80%, 3000 words) in the ST.

Presentation (10%) and class participation (10%) in the LT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the submission day. Assessed essay due Monday of Week 1 in ST.

Attendance at all classes and submission of all set coursework is required.

S0313 Half Unit

Material Culture and Everyday Life

This information is for the 2020/21 session.

Teacher responsible: Don Slater S310

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an

outside option to students on other programmes where regulations permit and to General Course students.

This course is available as an option course to second and third year students on the BSc in Sociology, and as an outside option for students in other departments.

Pre-requisites: No specific pre-requisites, but this course is only available to second and third year students in Sociology and other programmes. It is not available as a first year option.

Course content: The course focuses on how 'things' enter into and mediate everyday social relations and practices. Students will consider all aspects of the social life of things, from design and production through use, consumption and everyday practices. This will allow them to address a range of long-standing theoretical and political concerns within sociology such as the role of objects and materiality in social life; social organizations of objects and exchange, such as consumer culture; design, technology and innovation; and the socio-political status of 'everyday life' itself. At the same time, there will be a strong methodological emphasis: not just how do we study objects in everyday life, but how might such studies impact on social research more generally.

The course will rely heavily on case studies. After mapping out central traditions in material culture studies, the course will focus on 2-3 strategically chosen objects to explore analytical and methodological issues (eg, mobile phones, water, bicycles, food, supermarkets, etc). Cross-cultural differences will be raised throughout but at least one of the cases will be predominantly focused on major global difference.

Teaching: This course is delivered through a combination of lectures, seminars and online materials totalling a minimum of 20 hours in the MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

1,500 word essay, due after reading week, in which students are asked to analyse an object from the standpoint of one of the theoretical perspectives introduced in the course. They will additionally submit a short research outline (probably 1-2 A4 sides) on which they can base their work towards the summative assessment.

Indicative reading: Drazin, A. & Küchler, S. (eds.) (2015) *The social life of materials: Studies in materials and society*. Bloomsbury Academic, London. Gunn, W., Otto, T. & Smith, R. C. (2013) *Design anthropology: Theory and practice*. Bloomsbury Academic, London. Latour, B. (2005) *Reassembling the Social: An Introduction to Actor-Network-Theory*. Oxford: Oxford University Press. Lury, C. (2011) *Consumer culture*, 2nd ed. Polity, Cambridge. Miller, D. (2008) *The comfort of things*. Polity, Cambridge. Molotch, H. (2003) *Where Stuff Comes From: How Toasters, Toilets, Cars, Computers and Many Other Things Come to Be as They Are*. New York and London: Routledge. Shove, E., M. Hand, J. Ingram and M. Watson (eds.) (2007) *The Design of Everyday Life*. Oxford: Berg.

Assessment: Research report (100%) in the LT.

A 3,000 word research report on an object of the student's choosing in which they are asked to address a clear list of considerations such as design, material properties, social practices and uses, methodological questions and so on.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Thursday of Lent Term. Attendance at all classes and submission of all set coursework is required.

SP100

Understanding International Social and Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Isabel Shutes OLD.2.58

Availability: This course is compulsory on the BSc in International

Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available on the BSc in Politics and BSc in Politics and International Relations. This course is not available as an outside option nor to General Course students. Places on this course are limited to 60 and priority is given to Social Policy students in the first instance, for whom this is a core course.

If places remain available once Social Policy students have been accommodated, they will be offered on a first come first served basis to students from outside the department.

This course is not available to third year students.

Course content: The course introduces students to the study and practice of international social and public policy. It considers how societies organise to address social needs, with reference to academic and policy debates across the so-called global North and South. In the first half of the course (Michaelmas Term), we consider key concepts and approaches relating to systems to address social needs. We examine the institutions and actors involved in those systems in different contexts, including the roles and relationships of the market, state, civil society and families. In the second half (Lent Term), we examine the interactions between inequalities and systems for addressing social needs, including the agency of people in those processes.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students are expected to participate actively in course activities and to complete two formative assignments.

Indicative reading: Artaraz, K. and Hill, M. (2016) *Global Social Policy: Themes, Issues and Actors*. Basingstoke: Palgrave Macmillan. Daly, M. (2011) *Welfare*. Cambridge: Polity. Garland, D. (2016) *The Welfare State: A Very Short Introduction*. Oxford: Oxford University Press. Kabeer, N., Cook, S. (2000) 'Revisioning social policy in the South: challenges and concepts', *IDS Bulletin*, 31: 4, 1-18. Lewis, D. (2017) 'Should we pay more attention to South-North learning?', *Human Service Organisations: Management, Leadership and Governance*, 41: 4, 327-331.

Assessment: Coursework (20%).

Take-home assessment (80%) in the ST.

SP101

Foundations of Social Policy Research

This information is for the 2020/21 session.

Teacher responsible: Dr Kitty Stewart OLD.2.36

Availability: This course is compulsory on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is not available as an outside option nor to General Course students.

Course content: This course is concerned with two questions that are essential to the study of social and public policy. First, *how do we know* what policies are needed, how they are experienced and whether they are effective? And second, *how is this knowledge used*: how (if at all) does it feed into the policy process and improve policies and outcomes?

SP101 aims to equip students to become informed consumers of research, able to read and evaluate research outputs that use a range of different approaches and methods to address questions in social and public policy. Students will be encouraged to think critically about the way that knowledge is constructed, about the nature of expertise, and about the influence of values and positionality on knowledge production. They will learn to assess the validity of claims made on the basis of research studies that use a range of different methods. The course will also explore the way evidence is used in policy making and in public discourse. The course provides the foundations for students to become active researchers themselves in later stages of the BSc ISPP degrees, preparing them for the second year research methods

course and for their third year dissertation.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.

The course is taught in weekly blocks, consisting of a 1 hour lecture and a 1.5 hour class. To prepare for classes, students will be allocated two key readings each week. Usually these will be examples of social policy research, including book extracts, journal articles and research reports. Students must come to class having done the required reading. Students will give at least one class presentation during the course of the year, working in groups. As well as presentations, class activities will include small group work, class discussion, debates and quizzes.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

The essay in MT will be a short article critique (500 words), with a longer essay (1,000 words) due in LT. Students will receive feedback on both to help them build towards their final essay. Students will also make and receive feedback on a group presentation in MT, which will provide the basis for their assessed blogpost. Assessed quizzes as well as other class activities will provide further opportunities for students to check their learning.

Indicative reading: Becker, S., Bryman, A. and Ferguson (2012) *Understanding Research for Social Policy and Social Work: Themes, Methods and Approaches*. 2nd Edition. London: Policy Press. Bryman, A. (2012) *Social Research Methods*, 4th edition. Oxford University Press. Della Porta, D. and Keating, M. (2008) *Approaches and Methodologies in the Social Sciences*. Cambridge: CUP. Gilbert, N. (2008) *Researching Social Life* 3rd ed. London: Sage. Hill Collins, P. and Bilge, S. (2016) *Intersectionality (Key Concepts)*. London: Polity Press. Howard, C. (2017) *Thinking Like a Political Scientist*. Chicago, IL: University of Chicago Press. Parkhurst, J. (2017) *The Politics of Evidence: From evidence based policy to the good governance of evidence*. Abingdon, Oxon: Routledge.

Assessment: Essay (60%, 2000 words) in the ST.

Blog post (20%) and quiz (20%) in the LT.

Three forms of assessment will make up the overall grade for the course. Students will write up their group presentation on the relationship between research and policy in the form of a blogpost, due at the start of Lent Term (20%). There will be two in-class quizzes on key terms and concepts at the beginning and end of Lent Term; the better of the two quiz scores will count towards the grade (20%). Students will submit a 2,000 essay at the start of Summer Term evaluating published research on a particular social policy question (60%).

SP110

Sociology and Social Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Thomas Biegert OLD.2.54

Thomas Biegert OLD 2.54

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy with Politics, BSc in Politics and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course is not available to third year students.

Course content: This course introduces students to sociological ideas and thinking and how they link to key social policy issues.

The course is organised around six major social policy concerns: gender inequalities; educational opportunity and inequality; class mobility and stratification; social networks and social segregation; neighbourhood deprivation and housing; ethnic and racial inequalities.

These are related to key classical and contemporary theoretical perspectives and concepts that have been used to describe and explain them, such as occupational segregation, discrimination,

cultural and social capital, institutions, socialisation, identity and belonging, and intergenerational transmission of status, values and resources.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: One essay in MT

One group presentation in MT and one in LT

Indicative reading: The course will draw on three core texts, as well as academic journal articles:

David Grusky, D. and Szelenyi, S. (eds.) 2011 *The Inequality Reader: Contemporary and Foundational Readings in Race, Class, and Gender*. 2nd Edition. Westview Press Oxford University Press.

Payne, G. (ed.) 2013 *Social Divisions*. Third Edition. Palgrave Macmillan. Platt, L. 2019 *Understanding Inequalities: Stratification and Difference*. 2nd Edition. Polity Press. For those unfamiliar or without a background in Sociology, the following text provides useful background: Fulcher, J. and Scott, J. (2011) *Sociology*, 4th Edition.

Assessment: Exam (60%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Essay (40%, 1500 words) in the LT.

SP111

Social Economics and Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Stephen Jenkins OLD.2.29

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy with Politics, BSc in Politics, BSc in Politics and International Relations and BSc in Psychological and Behavioural Science.

This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Places on this course are limited and priority is given to Social Policy students in the first instance. If places remain available once Social Policy students have been accommodated, they will be offered on a first come first served basis to students from outside the Department.

This course is not available to third year students.

Pre-requisites: No prior knowledge of economics is required.

Course content: This course provides an introduction to the economics of social policy and the economics of the income distribution. The course begins by introducing basic economic concepts and principles and discussing their application to different social policy areas, including childcare, education, health care, social care, housing and the environment. Key concepts include supply, demand and elasticities, externalities and market failure, private insurance and social insurance.

The course goes on to analyse the distribution of household income and the drivers of poverty and inequality, including unemployment, low wages and wage inequality. It covers concepts of human capital and productivity and looks at a range of policy responses, including minimum wage legislation, trade union policy, government economic management, taxation and the social security system.

Throughout, the course emphasises the importance of understanding political goals in assessing the effectiveness or justice of economic and social policies, and seeks to encourage students to draw on both theory and empirical evidence in addressing its core questions.

The course is taught without mathematics and is designed to be suitable both for students with no prior knowledge of economics and for those who have taken A level economics.

Teaching: 10 hours of lectures and 15 hours of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be expected to complete exercises as required for classes, a mock exam and will write up to

three formative essays during the course of the year.

Indicative reading: J Le Grand, C Propper & R Robinson, *The Economics of Social Problems*, Fourth Edition, Palgrave, 2008. R Lipsey and A Crystal, *Economics*, 13th edition, OUP, 2015 (or earlier edition). N Barr, *Economics of the Welfare State*, Fifth Edition, OUP 2012. H Glennerster, *Understanding the Cost of Welfare*. The Policy Press, 2017. J Hills, *Good Times, Bad Times: The Welfare Myth of Them and Us*, Revised edition, The Policy Press, 2017. A B Atkinson, *Inequality: What Can Be Done?* Harvard University Press, 2015.

Assessment: Take-home assessment (100%) in the ST.

SP112

Politics of Social Policy Making

This information is for the 2020/21 session.

Teacher responsible: Dr Timothy Hildebrandt OLD.2.56

Dr Hakan Seckinelgin OLD.2.27

Availability: This course is available on the BSc in Criminology, BSc in International Social and Public Policy and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course is not available to third year students.

Course content: The course introduces students to the way in which social and public policies are developed. It aims to provide tools to understand how policies are produced through political disagreement and negotiations and how policies reflect different needs and problems voiced by groups in societies. It focuses on the ways in which policy processes and decision making can be analysed. The course focuses on different models that are used in the analyses of policy processes in different international contexts. Furthermore, it links different analytical approaches to policy processes with political considerations of how political problems are framed and how policy goals are established. The course looks at these issues from the perspective of different actors and the ways in which different actors interact with each other within policy processes. The course brings together critical analytical frameworks for policy processes with empirical problems (cases). The course enables students to understand that policy processes are both about understanding society and shaping it. Furthermore, it introduces students to the various policy actors, including international actors and how these actors work together within socio-political and economic constraints. It also highlights the importance of identifying and understanding the different value positions and the associated negotiations that underwrite policy processes.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures, 15 hours of seminars and 4 hours of workshops in the LT.

The course is taught in 150 min blocks with some breaks in a combined short lecture, presentations and student group work. We will invite participants from our alumni network to bring their policy-making experiences into the course. We will have student poster presentations in LT.

Formative coursework: Students will be expected to produce 4 exercises and 2 presentations in the MT and LT. Students will be expected to produce 4 x 500 word commentaries on specific questions and 2 presentations in the MT and LT. Students will be working in groups which will present short in-class exercises. Through group work and the feedback they will get throughout the 2nd half of MT and the 1st half of LT we will provide support for their poster preparations and presentations.

Indicative reading: Fischer, Frank (2010) *reframing Public Policy: Discursive Politics and Deliberative Practices*. London: OUP. Hoppe, Robert (2011) *The Governance of Problems: Puzzling, Powering and Participation*. Bristol: Policy Press. Kingdon, J. (1995) *Agendas, alternatives and public policies*, NY: Longman. Ostrom, Elinor (2015) *Governing the Commons: the Evolution of Institutions for*

Collective Action. London: CUP. Pawson, Ray (2013) *The Science of Evaluation*. London: Sage. Stone, Deborah (2012) *Policy Paradox: The Art of Political Decision Making*. NY: Norton.

Assessment: Coursework (30%, 500 words) in the MT and LT. Presentation (25%, 500 words) in the LT. Report (45%) in the ST.

We will assess students at three stages:

- 4 short 500 word policy commentaries on specific questions which will be completed across the year. Students will get feedback on each and, the best of these will be taken as their 30% coursework mark;
- Students will be put into groups of 4 in MT to choose a policy area of interest and use it to link analytical discussions from the class to their own analysis of a particular policy implemented in that field. Each group is expected to produce (with the support of their teachers) a poster to discuss their analysis and to present to the class during the LT. This exercise (both the production and presentation) will contribute 25 % overall mark.
- Each student will write a 750 word report on their presentation and on the feedback they receive on their contribution to the poster. This is due in ST and will be the final 45% of their overall mark for the course.

SP170 Not available in 2020/21

Crime and Society: Representations and Realities

This information is for the 2020/21 session.

Teacher responsible: Dr Leonidas Cheliotis OLD.2.51

Availability: This course is compulsory on the BSc in Criminology. This course is available on the BSc in International Social and Public Policy and BSc in International Social and Public Policy with Politics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This is a first year course that offers a general introduction to some of the main subjects and ideas that are to be found in criminology, and that BSc Criminology students will encounter during throughout their degree. These subjects are taught in a critical manner, inviting students to challenge received wisdoms, general assumptions, and political claims. The second goal of the course is to enthuse the students; to offer them a glimpse of an exciting and stimulating programme ahead, not least by using a variety of media for presentations and as the basis for discussion, and in a series of practical tasks linked to particular subjects.

Indicative lecture content

1. What is Criminology?
2. What is crime?
3. Crime in the media
4. Crime and politics
5. What is happening to crime?
6. Who commits crime?
7. How we deal with crime I: formal social control
8. How we deal with crime II: informal social control
9. How do we prevent crime?
10. Victims and crime
11. Crime and the powerful
12. What is criminal justice?
13. Policing and its history
14. Policing: Is it effective?
15. Theories of punishment
16. A brief history of punishment
17. Thinking about prisons
18. Understanding crime: what's the point of theory?
19. Criminology and social policy – ideas in practice
20. Crime, punishment and the future

Teaching: 10 hours of lectures and 15 hours of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT. 1 hour of

lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: Harding, J., Davies, P. and Mair, G. (2017) *An Introduction to Criminal Justice*, London: Sage
Newburn, T. (2009) *Criminology: Key Readings*, Cullompton: Willan
Newburn, T. (2017) *Criminology*, London: Routledge
Newburn, T. (2018) *Criminology: A very short introduction*, Oxford: Oxford University Press

Open University (2016) *Criminology Beyond Crime*, Free course
Roberts, J.V. (2015) *Criminal Justice: A very short introduction*, Oxford: Oxford University Press

Assessment: Essay (40%, 1500 words) in the ST.

Project (40%, 1000 words) and presentation (20%) in the LT.

Summative assessment has three elements: a 1500 word essay (40%); a project studying social control out on London's streets (40%); and a presentation (20%)

SP171 Not available in 2020/21

Identities, Crime and Criminal Justice

This information is for the 2020/21 session.

Teacher responsible: Prof Coretta Phillips OLD.2.28

Availability: This course is compulsory on the BSc in Criminology. This course is available on the BSc in International Social and Public Policy with Politics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The main aim of this first year core course is to introduce students, early in the programme, to key aspects of human identities and how they are related to the experience of crime as a victim, the commission of crime as an offender, processing by the criminal justice system, and the experiences of criminal justice professionals. Teaching will reflect the development of criminological knowledge with most theorising concentrating initially on social class, and then subsequently gender and race. More recently, criminologists have come to study religion and disabilities, with queer criminology and intersectional criminology newly emerging critical perspectives in the discipline.

Indicative lecture content:

1. How do social scientists understand human identities?
2. Lombroso and W.E.B. Du Bois and the study of crime
3. Feminism, gender and criminology
4. The contemporary race and crime debate
5. Youthful transgressions
6. Reading Week (essay writing and project skills session)
7. Masculinities and crime
8. Gendered violence offline and online
9. Hate crimes
10. Immigration and crime
11. Indigeneity, crime and criminal justice
12. Intersectional Nexus I: 'Gangs' and corporate crimes
13. Intersectional Nexus II: Islamist and Far Right terrorism
14. Queer criminology
15. Intersectional nexus III: Intimate Partner Violence in LGBTQAI+ and heterosexual relationships
16. Youth Justice
17. Reading week (project workshop)
18. Experiencing Punishment I: Women in prison
19. Experiencing Policing and Punishment II: Minority groups
20. Minorities in the criminal justice professions
21. Revision
22. Project workshop

Teaching: 10 hours of lectures and 15 hours of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT.

In MT Reading Week 6 there will be a two-hour essay-writing session and discussion about the LT project.

Formative coursework: One 1500 word essay is due in MT.

Indicative reading: Buist, C.L. & Lenning, E., (2016), *Queer Criminology*. London: Routledge. Chakraborti, N. and Garland, J.

(2015) *Hate Crime: Impacts, Causes and Responses* (2nd edition), London: Sage. Collier, R. (1998) *Masculinities, Crime and Criminology: Men, Heterosexuality and the Criminal (ised) Other*. London: Sage. Du Bois, W. E. B. (1899) *The Philadelphia Negro: A Social Study*. Philadelphia, PA: University of Pennsylvania Press. Gabbidon, S. L., Greene, H. T. and Young, V. (2001) *African American Classics in Criminology and Criminal Justice*. Thousand Oaks, CA: Sage. Gartner, R. and McCarthy, B. (2014) (eds.) *The Oxford Handbook of Gender, Sex, and Crime*. Oxford: Oxford University Press. Lombroso C (1884/2006) *Criminal Man. Translated and with a New Introduction by Mary Gibson and Nicole Hahn Rafter*, Durham, NC: Duke University Press. Phillips, C. and Webster, C. (2013) (ed.) *New Directions in Race, Ethnicity and Crime*. London: Routledge. Potter, H. (2015) *Intersectionality and Criminology: Disrupting and Revolutionizing Studies of Crime*. London: Routledge. Tonry, M. and Bucerius, S. (2014) (eds.) *The Oxford Handbook of Ethnicity, Crime, and Immigration*. Oxford: Oxford University Press.

Assessment: Essay (50%, 1500 words) in the ST. Project (50%, 2000 words) in the LT.

SP172 Half Unit Not available in 2020/21

Policing and Security

This information is for the 2020/21 session.

Teacher responsible: Prof Tim Newburn OLD.2.40a

Availability: This course is available on the BSc in Criminology, BSc in International Social and Public Policy and BSc in International Social and Public Policy with Politics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will introduce students to the flourishing sub-discipline of 'police studies', enabling students to understand the development and functioning of police organisations as well as providing them with an understanding of some of the key issues and debates affecting contemporary policing. Putative outline:

1. Understanding policing and security
2. The role of the police
3. Police cultures
4. Police accountability
5. Police legitimacy
6. Police conduct and misconduct
7. Police, race and ethnicity
8. Police, gender and inequality
9. Police and the media
10. Public policing and private security

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 1 exercise in the LT.

Indicative reading: Jones, T., Newburn, T. and Reiner, R. (2017) 'Policing and the Police' in Liebling, A., Maruna, S. and McAra, L. (eds.) *The Oxford Handbook of Criminology* 6th Ed., Oxford University Press. Newburn, T. (2008) (ed) *Handbook of Policing*, 2nd ed, Cullompton: Willan. Newburn, T. (2005) (ed) *Policing: Key Readings*, Cullompton: Willan. Reiner, R. (1981) *Keystone to Kojak: The Hollywood cop*, in P. Davies and B. Neve (eds) *Politics, Society and Cinema in America*, Manchester: Manchester University Press. Reiner, R. (2010) *The Politics of the Police*, 4th ed, Oxford: OUP

Assessment: Project (80%, 2500 words) and presentation (20%) in the LT.

SP173 Half Unit Not available in 2020/21

Politics and Crime

This information is for the 2020/21 session.

Teacher responsible: Prof Tim Newburn OLD.2.40A

Availability: This course is available on the BSc in Criminology, BSc in International Social and Public Policy, BSc in International Social and Public Policy with Politics and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces students to the politicised nature of crime and criminal justice. The course content will cover the following subjects:

- The rise of crime as a subject of party politics
- The idea of populist punitiveness
- Willie Horton and the American Presidency
- Politics and punishment in comparative perspective
- Politics and the war on drugs
- Neoliberalism and the rise of privatised criminal justice
- The politics of policing
- The particular politics of juvenile crime
- Crime, politics and the media
- Politics, human rights and the death penalty

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students will be expected to produce 1 exercise and 1 presentation in the MT.

Using media reports, students will put together:

A draft poster (as preparation for the later summative assessment) illustrating how politics affects crime (and vice-versa).

A short presentation, which they will give in class, explaining their findings.

Indicative reading: Beckett, K. and Sasson, T. (2004) *The Politics of Injustice: Crime and Punishment in America*, 2nd ed, Thousand Oaks, CA: Sage. Garland, D. (2001) *The Culture of Control*, Oxford: OUP. Morgan, R. and Smith, D. (2017) *Delivering more with less: Austerity and the politics of law and order*, in Liebling, A. et al, (eds) *Oxford Handbook of Criminology*, Oxford: OUP. Scheingold, G. (1984) *The Politics of Law and Order: Street crime and public policy*, New York: Longman. Tonry, M. (2013) *Evidence, ideology and politics in the making of American criminal justice policy*, in Tonry, M. (ed) *Crime and Justice in America 1975-2025*, Chicago: University of Chicago Press

Assessment: Project (60%, 1500 words) in the LT.

Presentation (20%) and presentation (20%) in the MT.

There will be three forms of summative assessment:

Student projects - researching and assessing one well-known historical example of the interaction of politics and crime - will form 60% of the overall mark.

In addition, students will be required to produce a poster summarising their case study (20%) and also do a short presentation in which they present the findings summarised on the case study poster (20%).

SP200

Comparative and International Social Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Timo Fleckenstein OLD.2.60

Availability: This course is compulsory on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is not available as an outside option nor to General Course students.

Pre-requisites: This course is only available to students who have completed Understanding International Social and Public Policy (SP100).

Course content: The course introduces the comparative method in social policy research as well as the main analytical approaches to understanding social policy developments. It provides an

overview of social policies in different areas of the world and enables students to identify global pressures on national policy environments.

The course also examines the impact of key international and supranational institutions on social policy-making. It investigates the welfare and work nexus from a comparative perspective.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students are expected to submit three pieces of formative written work throughout the academic year and are expected to read for and prepare contributions to class discussion each week.

Indicative reading: K Armingeon & G Bonoli (Eds), *The Politics of Post-Industrial Welfare States* (2006). F Castles, *The Future of the Welfare State* (2004). J Clasen, *Reforming European Welfare States* (2004). B Deacon, *Global Social Policy and Governance* (2007). I Gough & G Wood (Eds), *Insecurity and Welfare Regimes in Asia, Africa and Latin America* (2004). L Hantrais, *Social Policy in the European Union* (2007). J Lewis, *Work-Family Balance, Gender and Policy* (2009). P Taylor-Gooby (Ed), *New Risks, New Welfare* (2005).

Assessment: Coursework (100%) in the ST.

SP201

Research Methods for Social Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Amanda Sheely OLD.2.52

Availability: This course is compulsory on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is not available as an outside option nor to General Course students.

Course content: The course aims to give students a comprehensive introduction to methods of social research in social policy.

By the end of the course students should:

1. Be familiar with the stages of the research process and different approaches to social policy research.
2. Appraise different methods and their appropriateness to particular questions.
3. Be able to conduct and clearly present the results of basic analyses of quantitative and qualitative data.
4. Be able to critically assess research studies and their use of methods.
5. Understand the ethical issues involved in conducting research.

Teaching: The course combines two elements:

SA201.2 Research Methods for Social Policy: Dr A. Sheely
MT Lectures: 10 x 1hr SA201.2. Classes: 10 x 1.5 hr SA201.2.

SA201.1 Data Analysis for Social Policy: Dr A. Sheely
Lectures: 9 x 1hr SA201.1. 1x 2hr SA201.1 Classes: 10 x 1.5 hr SA201.1.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT and 1 presentation and 1 essay in the LT.

The three formative assessments for the course are condensed components of the final summative coursework.

The first formative includes completing an ethics form for the qualitative component of the study, as well as drafting an interview guide that students will use in their interviews. In the second formative, students will create and present a poster that outlines the design of their research study, including an overview of the literature, their research question, qualitative and quantitative sampling and data collection strategies, and ethical considerations. This assessment includes both turning in the poster, as well as a verbal presentation where students will answer questions about their studies. The last formative is a short essay where students write an interpretation of their quantitative regression results.

Indicative reading: Marilyn Lichtman (2014) *Qualitative Research for the Social Sciences*. Sage Publications. Robert de Vries. (2018) *Critical Statistics: Seeing Beyond the Headlines*. Macmillan International.

Alan Acocock (2016) *A Gentle Introduction to Stata*, 5th edition. Stata Press.

Assessment: Essay (100%, 5000 words) in the ST.

Students will design and carry out a small mixed-methods research study related to a given topic. In the essay, students will describe and justify their choice of research methods for both the qualitative and quantitative components of the project (research question, sampling, data collection, data analysis, and ethical considerations). The assignment also includes the presentation and discussion of results from the research study. The second assignment is due in Summer Term.

SP230

Education Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Anne West OLD.2.30

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics, BSc in International Social and Public Policy with Politics, BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: This course provides an introduction to the main issues in educational policy. It draws on interdisciplinary research literature and has a comparative and international focus. The course aims to show how major concepts used in social policy can be applied to the study of education, for example, equality of opportunity, equity and the distribution of resources.

Issues to be addressed include: policy goals of education; historical development of education and the role of the state in provision and funding; the impact of social characteristics on educational outcomes (class, gender, ethnicity and 'race'); education of children with special educational needs and disabilities; financing education; private schooling; privatisation and the changing role of the state; early years education; school-based education; post-compulsory education including higher education; education systems in comparative perspective and education regimes, decentralisation and devolution. Not all of these issues are covered as separate weekly topics.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: One formative essay in MT, one formative essay in LT, one mock examination essay LT.

Indicative reading: Some introductory texts are recommended: Arthur, J., Peterson, A. (eds) (2011) *The Routledge Companion to Education*. London: Routledge. Lauder, H., Brown, P., Dillabough, J., Halsey, A.H. (eds) (2006) *Education, Globalization and Social Change*. Oxford: Oxford University Press. Specialist reading lists for each topic will be provided.

Assessment: Take-home assessment (100%) in the ST.

SP231 Not available in 2020/21

Poverty, Inequality, and Social Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Amanda Sheely OLD.2.52

Availability: This course is available on the BSc in Criminology, BSc in Environment and Development, BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics, BSc in International Social and Public Policy with

Politics, BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: The course will examine the definition, measurement and causes of poverty and social disadvantage in general and analyse selected aspects drawn from the following: social and demographic change, gender and ethnic inequality, unemployment, worklessness, social security and poverty, area deprivation, educational inequality, and social exclusion. This course draws primarily on examples from the United Kingdom, the United States, and Western Europe.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: As preparation for the first summative essay, which is a book review, students will be asked to write a 500 word description of the book, as well as the main assertions that book makes about poverty and disadvantage. For the second summative essay, students will prepare and present a one-page outline of their policy critique.

Indicative reading: A detailed list will be provided at the start of the session. H Dean & L Platt (2016) *Social Advantage and Disadvantage* Oxford University Press. J Hills (2014). *Good Times, Bad Times: The Welfare Myth of Them and Us* Policy Press. AB Atkinson (2015) *Inequality: What Can Be Done?* Harvard University Press. S.P. Jenkins (2011) *Changing Fortunes: Income Mobility and Poverty Dynamics in Britain* Oxford University Press. T. Shildrick, R. MacDonald, C. Webster, & K Garthwaite (2010). *The Low-Pay, No-Pay Cycle: Understanding Recurrent Poverty* Joseph Rowntree Foundation.

Assessment: Essay (60%, 2000 words) in the ST.

Essay (40%, 1500 words) in the LT.

Summative assessment for this course comprises two essays. The first essay, which takes the format of a book critique is worth 40% of the mark and is due at the end of Lent Term. The second essay is a policy evaluation. This essay is worth 60% of the mark and is due in Summer Term.

SP232

Health and Social Care Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Tania Burchardt 32L 3.30

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics, BSc in International Social and Public Policy with Politics, BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: The course equips students with the concepts, tools and knowledge to understand the challenges of health and social care policy in the 21st century, in the differing contexts of the UK and other rich countries, and in low- and middle-income countries. In the wake of the coronavirus pandemic, this feels more important than ever.

In the first term, we consider the fundamental aims of health and social care policy, including health and well-being, health inequalities, health promotion, and health as a human right. We then examine policy approaches and healthcare regimes across different country contexts, including the strengths and weaknesses of different models of healthcare financing, public and private. In the second term, we move on to think about how to bring about change - both change in people's behaviour through regulation, 'nudge' and incentives, and change in health and social care systems, including an examination of the role played by global

pharmaceutical and healthcare companies, and the potential for reform. We investigate the role that evaluations of health and social care play in shaping policy change. Finally, we turn to specific groups and needs, including the challenges and potential of ageing, long-term care, mental health policy, child protection and health.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

One essay of 1000 words (excluding references), following a class task or presentation. This is compulsory.

One essay of 1000 words, and three essay plans, using the same format as the summative assessment. This is encouraged, but optional.

Indicative reading: There is no course textbook. A list of selected texts and readings will be included in the reading lists for each week which will be made available at the start of the Michaelmas Term. Oliver, A. (2020) Country responses to the COVID19 pandemic: HEPL blog series <https://www.cambridge.org/core/journals/health-economics-policy-and-law/hepl-blog-series-covid19-pandemic>. World Health Organization (2013) World health report 2013: Research for universal health coverage. World Health Organization. Marmot, M. (2020) Health Equity in England: the Marmot review 10 years on. Institute of Health Equity. Baggott, R. (2015) Understanding Health Policy. 2nd edition. Policy Press.

Assessment: Take-home assessment (100%) in the ST.

Students will be asked to write 3 essays of 1000 words each (excluding references) from a selection of questions addressing a range of topics covered in the course. This will be a take-home, open-book, assessment.

SP270 Not available in 2020/21

Understanding Crime and Punishment

This information is for the 2020/21 session.

Teacher responsible: Dr. Leonidas Cheliotis (OLD 2.51)

Availability: This course is compulsory on the BSc in Criminology.

This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This second-year core full-unit course is intended to introduce students to key criminological theories regarding issues of crime and punishment. It will build on, and complement, the new BSc programme's first-year core courses, singling out and further dissecting specific substantive themes (e.g., the criminalisation process) by exploring in detail major relevant theoretical perspectives and debates, as well as pertinent empirical research, both qualitative and quantitative. In so doing, the course will critically examine the merits and limitations of competing criminological approaches to issues of crime and punishment, thus also preparing students, both in terms of substantive insights and ways of thinking, for core and optional courses they will take in their third year (e.g., Criminological Controversies, Punishment and Penal Policy).

Indicative course content

Michaelmas Term

- 1) The 'Classical' and 'Positivist' Schools of Criminology
- 2) Psychoanalytic Approaches to Crime
- 3) Strain and Crime: From Durkheim to Merton and Beyond
- 4) The Chicago School of Sociology and its Approach to Crime
- 5) Subcultural and Cultural Criminologies
- 6) Reading Week
- 7) Labelling Theory
- 8) Neutralisation Theory
- 9) Routine Activities Theory

10) Control Theory

11) Revision Week

Lent Term

1) Marxist Criminologies

2) Neo-Marxist Criminologies

3) Left and Right Realism

4) Feminism(s) and Criminology

5) The Foucault Effect on Criminology

6) Reading Week

7) Risk Society and the New Penology

8) Late Modernity, Crime and Punishment: The Culture of Control Thesis

9) Psychosocial Penology: From George Herbert Mead to Erich Fromm

10) Biosocial Approaches

11) Revision Week

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 9 hours of classes in the LT. 2 hours of classes in the ST.

Michaelmas Term: one-hour lectures in Weeks 1-10 (except for Week 6), plus a revision lecture in Week 11; one-hour classes in Weeks 2-11 (except for Week 6).

Lent Term: one-hour lectures in Weeks 1-10 (except for Week 6), plus a revision lecture in Week 11; one-hour classes in Weeks 2-11 (except for Week 6).

Summer Term: one two-hour revision class

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

One 1,500-word essay in each term (as mentioned earlier)

Indicative reading: General Text

• Newburn, T. (2013) *Criminology*. 3rd edition. London: Routledge.

The following companion reader is also available:

• Newburn, T. (2009) *Key Readings in Criminology*. Cullumpton: Willan.

Those listed below are general textbooks and edited collections which are strongly recommended for background reading:

• McLaughlin, E. and Muncie, J. (eds.) (2013) *Criminological Perspectives: A Reader*. Third Edition. London: Sage.

• Hale, C., Hayward, K., Wahidin, A. and Wincup, E. (eds.) (2013) *Criminology*. Oxford: Oxford University Press. Third Edition.

• Carrabine, E., Iganski, P., Lee, M., Plummer, K. and South, N. (2008) *Criminology: A Sociological Introduction*. London: Routledge. Second Edition.

• Davies, Croall and Tyrer (2010) *Criminal Justice*. Fourth Edition. Harlow: Pearson Education Limited.

• Muncie, J. and McLaughlin, E. (eds.) (2001) *The Problem of Crime*. Second Edition. London: Sage.

• Liebling, A., Maruna, S. and McAra, L. (eds.) (2017) *The Oxford Handbook of Criminology*. Sixth Edition. Oxford: Oxford University Press.

Assessment: Presentation (30%) in the LT.

Essay (70%, 3000 words) in the ST.

The proposed method of assessment is a combination of long essay (3,000 words) on one of the substantive topics covered in the course (but not the one chosen for their formative assessment) due at the beginning of ST, and a class presentation whose aim will be to critically appreciate a specific theoretical argument due end of LT. The long essay will count towards 70% of the final mark, and the presentation will count towards 30%

in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: The course examines the contribution that psychology has made to our understanding of crime and criminal justice. It explores what psychological theory and research have to tell us about the causes of crime and the ways in which we respond to such behaviour.

Particular attention is paid to the development of individual criminality and criminal careers; drug and alcohol related crime; varieties of criminal behaviour including violence, sexual crime and stalking; mental disorder and crime; victims and victimisation; public attitudes towards punishment; public confidence in the criminal justice system; prejudice and discrimination; organisational dynamics and institutional change; offender profiling and criminal investigation; eye witness testimony and legal decision making; rehabilitation and imprisonment.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

There will be a reading week in the MT and LT. In addition one revision class will take place in the ST.

Formative coursework: One essay per term (MT and LT) will be required.

Indicative reading: J.R. Adler and J.M.Gray, *Forensic Psychology: Concepts, Debates and Practice*, 2010. PB Ainsworth, *Psychology and Crime: Myths and Reality*, 2000. J.Brown and E.Campbell, *The Cambridge Handbook of Forensic Psychology*, 2010. C.R. Hollin, *Psychology and Crime: An Introduction to Criminological Psychology*, 2013. J McGuire, *Understanding Psychology and Crime*, 2004. F. Pakes and J. Winstone, *Psychology and Crime: Understanding and Tackling Offending Behaviour*, 2007.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

SP331 Half Unit Not available in 2020/21

Sexuality, Everyday Lives and Social Policy in Developing Countries

This information is for the 2020/21 session.

Teacher responsible: Dr Timothy Hildebrandt OLD 2.56 and Dr Muzaferrettin Seckinelgin OLD 2.27

Availability: This course is available on the BSc in Criminology, BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics, BSc in International Social and Public Policy with Politics, BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course is only available to third year undergraduate students.

Course content: This course aims to analyse and understand the way social policies deploy sexuality categories in regulating everyday life in developing countries, both in its public and private manifestations Sexuality is a central part of human experience. Institutions created to deal with human life/wellbeing have considered sexuality as one of the reference points from which to regulate social relations. Perceptions on sexuality are formed in the intersection of socio-political, historical processes and everyday practises in particular societies. Particular perceptions of sexuality in turn influence the way people negotiate access to resources to address their well-being.

In some central areas of social policy sexuality is used as one of the sorting mechanisms (in addition to gender, race among various other categories) to establish entitlements for resources (social, political and economic). In this regard social policy is both informed by perceptions on sexuality and in turn social policy

SP271 Not available in 2020/21

Psychology of Crime and Criminal Justice

This information is for the 2020/21 session.

Teacher responsible: Dr Michael Shiner OLD.2.34

Availability: This course is available on the BSc in Criminology, BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics, BSc in International Social and Public Policy with Politics, BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc

acts as a mechanism of social reproduction of these perspectives impacting people's lives. And while globally high profile cases and rights abuses related to sexuality are important, a narrow global policy focus on these overlooks how more embedded and diverse social policy practices related to sexuality are impacting people's lives in many developing countries.

This course aims to explore sexuality and its importance for social policy for developing countries. It aims to consider social policy and particular interventions in their historical contexts, as a way of unpacking the construction of sexuality in the intersection of colonialism, gender, race, class and international policy frameworks in developing countries.

The course also aims to interrogate the relationship between particular social policy prescriptions developed in most industrialized welfare societies and the way some of these are transferred to developing countries. The major concern of the analysis is to bring out the perceptions of sexuality that underwrite these policies and how these interact with existing perceptions of sexualities and their performances (identities, desires and bodily practices) in multiple developing country contexts. These policy areas include, among others, discussions of rights, entitlements, citizenship, same-sex marriage, sexually transmitted disease, HIV/AIDS, family policies, migration/border controls, criminality and employment-related policies.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. The lectures for this course 10 X 60 min lecture will be joint lectures with MSc students who are taking SP417 as an option course. There will be a designated UG seminar for UG students 10 x 90 mins seminars in LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will be required to apply their understanding of both theoretical frameworks and issues related to sexualities and social policies in a 1,500 words formative essay. They will choose one particular social policy area, and show how viewing it through 3 different theoretical lenses helps us understand the issue differently.

- Tamale, S. (2011) *African Sexualities: A Reader*. Pambazuka Press.

Additional readings for each week are available on Moodle.

Assessment: Policy memo (100%).

Social and Public Policy and Economics, BSc in International Social and Public Policy with Politics, BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course is only available to third year undergraduate students.

Course content: The course analyses the purpose, design and impact of social security policies, meaning policies that protect and support household income at times when income from the labour market does not suffice. The need for social security arises both from demographic factors that affect nearly everyone during their life course - childhood, parenthood, old age - and from risk factors that end up affecting only some - unemployment, sickness and disability.

The course takes a comparative approach, examining differences in the design of social security policies across welfare regimes and drawing on examples from different countries. Students will develop an understanding of the challenges and trade-offs that arise in designing social security policies to meet multiple goals, will further their knowledge about the ways systems function in practice, and will develop the tools for assessing the structure and effectiveness of social security in any given country. The course will also consider how successfully social security systems are adapting to meeting the challenges of the twenty-first century, including an aging population, migration, and the changing nature of employment brought about by rapid technological change.

Most of the examples in the lectures and readings relate to higher- and middle-income countries, but many of the issues covered are also relevant in countries where social security systems are less developed. Students will be encouraged to further their understanding of social security in their country of origin, or another country of their choice, and to draw on this knowledge in classes.

Teaching: 15 hours of lectures and 15 hours of classes in the MT. There will be no formal teaching in Reading Week (Week 6), but there will be an optional film on a relevant topic, followed by an informal discussion.

Formative coursework: Students will write one essay (1500 words) during MT, and will receive feedback in preparation for the summative assessment.

Indicative reading:

- R Walker (2005) *Social Security and Welfare: Concepts and Comparisons*. Open University Press.
- J Hills (2015) *Good Times, Bad Times: The Welfare Myth of Them and Us*. The Policy Press.
- J Millar and R Sainsbury (2018) (eds) *Understanding Social Security*, Third Edition. The Policy Press.
- P Spicker (2011) *How Social Security Works: An introduction to benefits in Britain*. The Policy Press
- J Kvist et al (2012) *Changing Social Equality: The Nordic Welfare Model in the 21st Century*. The Policy Press.
- N Barr and P Diamond (2009) *Pension Reform: A Short Guide*. Oxford University Press.
- M Frolich et al (2015) *Social Insurance, Informality and Labor Markets: How to Protect Workers While Creating Good Jobs*. Oxford University Press.

An extended reading list will be provided, with specific readings for each week's topic.

Assessment: Essay (100%, 2500 words) in the LT.

The essay will require students to demonstrate their ability to apply the knowledge and understanding they have gained on the course to evaluate the design and impact of policies in different countries. Questions will be released towards the end of the Michaelmas Term.

SP332 Half Unit Not available in 2020/21

Social Security Policies

This information is for the 2020/21 session.

Teacher responsible: Dr Kitty Stewart OLD 2.36

Availability: This course is available on the BSc in Criminology, BSc in International Social and Public Policy, BSc in International

SP335 Half Unit

Migration: Current Research, Critical Approaches

This information is for the 2020/21 session.

Teacher responsible: Prof Lucinda Platt (OLD.2.25)

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics, BSc in International Social and Public Policy with Politics, BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course is only available to third year undergraduate students.

Course content: This interdisciplinary course addresses contemporary global migration issues with reference to both developing and developed country contexts and to different patterns and forms of migration. The course examines the relationship between migration and social and public policies, including the implications for how migrants and migration are conceptualised, for inequalities in the movement of people, for welfare systems, and for the impacts of migration in countries of origin and destination. It draws on current approaches to researching migration, and considers the implications of those approaches.

Teaching: 15 hours of lectures and 15 hours of classes in the MT. Each week, all students are expected to read one key text (or sometimes two short texts) in preparation for the class and to participate actively in discussions. This will be complemented by class activities picking up on other issues covered in the lecture and class questions.

A longer list of complementary readings (and other materials, including podcasts, lectures, reports, maps and interactive materials), that students are encouraged to engage with, will also be supplied. They will also be expected to use these in the formative and summative essays.

A Moodle discussion forum specifically for the undergraduate students on the course, will be used to share thoughts and relevant material.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading:

- Goldin, I., Cameron, G.160 & Balarajan, M. (2012) *Exceptional People: How Migration Shaped Our World and Will Define Our Future*, Princeton University Press. CHAPTER 1
- Shachar, A. (2009) *The Birthright Lottery: Citizenship and Global Inequality*, Cambridge MA: Harvard University Press. INTRODUCTION.

- Dahinden (2016) "A plea for the 'de-migranticization' of research on migration and integration", *Ethnic and Racial Studies*, 39:13, 2207-2225.
- Shutes, I. and Walker, S. (2018) "Gender and Free Movement: EU Migrant Women's Access to Residence and Social Rights in the UK", *Journal of Ethnic and Migration Studies*, 44:1, 137-153
- Czaika, M. and De Haas, H. (2013) "The effectiveness of migration policies", *Population and Development Review*, 39: 3, 487-508.

The reading list includes required and supplementary readings that demonstrate current debates and approaches. Readings will be complemented by podcasts, videos and interactive materials relating to the readings. A film showing will also provide an early point of reference and discussion.

Assessment: Essay (100%, 1500 words) in the LT.

The course is assessed by one summative assignment (100% summative coursework). This is a written essay (2,000 words) that should address one question from a set provided.

The summative assignment is due at the beginning of the term following the term in which the course is taught.

SP374 Half Unit

Riots, Disorder and Urban Violence

This information is for the 2020/21 session.

Teacher responsible: Tim Newburn (OLD 2.40a)

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics, BSc in International Social and Public Policy with Politics, BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course is only available to third year undergraduate students

Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction to the subject in: Newburn, T. (2017) *Criminology*, London: Routledge, 3rd Edition. An easier, quicker overview can be found in: Newburn, T. (2019) *Criminology: A very short introduction*, Oxford: OUP

Course content: This course focuses on urban or collective violence, or what more colloquially tend to be referred to as 'riots'. From Hong Kong and Santiago to the Gilets Jaunes in Paris and the uprisings in America after the death of George Floyd, this is a subject of great contemporary relevance. The course will consider the various approaches that have been taken to this subject - via history, psychology and sociology - and, focusing on particular examples, the course will examine some of the core issues in the field including: the causes and consequences of riots; psychological versus sociological explanations; the role of race/ethnicity; the impact of traditional and new social media on the nature and organisation of rioting; the role and changing nature of the policing of urban disorder; and how riots might be understood both historically and comparatively.

Teaching: 15 hours of lectures and 15 hours of classes in the LT. Course to be taught in LT next year.

Formative coursework: Students will be required to write and submit one piece of formative coursework for assessment and feedback. The first will be an essay outline - in effect the outline of their summative essay, including a full introductory paragraph.

Indicative reading:

- Katz, J. (2016) *Culture within and culture about crime: The case of the 'Rodney King riots'*, *Crime, Media, Culture*
- Moran, M. and Waddington, D. (2015) *Recent riots in the UK and France: Causes and commonalities*, *Contention*, 2, 2, 57-73
- Newburn, T. (2015) *The 2011 English riots in recent historical perspective*, *British Journal of Criminology*, 55, 1, 375-392
- Newburn, T. (2020) *The causes and consequences of urban riot and unrest*, *Annual Review of Criminology*, forthcoming

- Reicher, S. D. (1984) The St Pauls' riot: An explanation of the limits of crowd action in terms of a social identity model, *European Journal of Social Psychology*, 14, 1-21
- Waddington, D. (1998) Waddington Versus Waddington: Public Order Theory on Trial, *Theoretical Criminology*, 2: 373-394

Additional reading:

- Castells, M. (2015) The Egyptian Revolution, in Goodwin, J. and Jasper, J.M. (eds) *The Social Movements Reader*, Oxford: Blackwell
- King, M. and Waddington, D. (2006) Flashpoints revisited: a critical application to the policing of anti-globalization protest, *Policing and Society*, 15, 3, 255-282
- Marx, G. (1972) Issueless riots, in Short, J. and Wolfgang, M. (eds) *Collective Violence*, Chicago: Aldine
- Newburn, T., Cooper, K., Deacon, R. and Diski, R. (2015) 'Shopping for Free'? Looting, consumerism and the 2011 riots, *British Journal of Criminology*, 55 (5): 987-1004
- Proctor, R., Crump, J., Karstedt, S., Voss, A. and Cantijoch, M. (2013) Reading the riots: what were the police doing on Twitter?, *Policing and Society*, 23, 4, 413-36
- Stott, C. and Drury, C. (2017) Contemporary understanding of riots: Classical crowd psychology, ideology and the social identity approach, *Public Understanding of Science*, 21, 1, 2-14

Assessment: Coursework (100%, 3000 words).

The coursework (100%) will comprise a single summative essay. The focus will be on one selected urban riot or set of protests (this might change year to year). In effect, each student will be asked to undertake a small, desk-based piece of research on a selected aspect of the disorder. Thus, for example, taking the Los Angeles 'Rodney King' riots of 1992 as an example, students would be offered a choice of one of up to six or seven elements to focus upon: the history of race in Los Angeles; poverty & social exclusion in the city; housing and social control; police-minority relations; relations between different minority groups; media reporting of the riots; the legacy of the Los Angeles riots and so forth. Many of these tie in nicely with broader themes in social and public policy that the students will have focused on in other courses.

SP399

Dissertation

This information is for the 2020/21 session.

Teacher responsible: Prof Anne West

Availability: This course is compulsory on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics, BSc in International Social and Public Policy with Politics, BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is not available as an outside option nor to General Course students.

Course content: A dissertation of 8,000 words on a topic to be approved by the candidate's Academic Mentor. The dissertation is designed to allow a detailed and thorough exploration of an area of interest to the student. It should be on a topic area within the field of the degree programme; it may involve original fieldwork, or the analysis and appraisal of existing literature.

Teaching: 20 hours of workshops in the MT. 20 hours of workshops in the LT.

Students will be allocated an Academic Mentor who will supervise their dissertation. In addition to individual supervision meetings, there will be seven compulsory workshop sessions in Michaelmas Term to help students plan and structure their work on the dissertation, as well as three optional advice/troubleshooting sessions in Michaelmas Term and seven in Lent Term. In addition, three compulsory presentation sessions will be held in Lent Term: all students will be expected to make a brief presentation on their topic and will receive feedback from staff and peers.

Formative coursework: Students are required to agree their dissertation title with their Academic Mentor and submit it to the Department no later than Friday of Week 10 of MT.

Indicative reading: Students will be expected to draw extensively from the reading they have undertaken throughout their programme of study. Suggested reading on conducting research projects in Social Policy:

H Dean, 'Doing projects in social policy', in P Alcock, et al (Eds) *The Student's Companion to Social Policy*, Fourth Edition, Blackwell, 2012. A Bryman, 'The nature and process of social research', in *Social Research Methods*. Oxford: Oxford University Press, pp.3-18, 2012. C Bhatt, 'Doing a dissertation', in C Seale (ed.) *Researching Society and Culture*, Third Edition. Thousand Oaks, CA: Sage, pp.153-78, 2012. G Thomas, *How To Do Your Research Project*, Third Edition, London: Sage. 2017.

Assessment: Essay (100%, 8000 words) in the ST. Submission is due in ST - full deadline details will be confirmed to all candidates. Precise details on format and presentation will be issued by the Department.

ST101 Half Unit

Programming for Data Science

This information is for the 2020/21 session.

Teacher responsible: Miss Lok Ting Yuen

Availability: This course is available on the BSc in Actuarial Science and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The primary focus of the course is to cover principles of computer programming with a focus on data science applications.

The topic covered will include variables, basic data types, data structures and sequences, control flow structures, modularisation, functions, variable and function scoping, errors and exception handling, and data input-output operations using file systems and operating system standard input-output; use of multi-dimensional arrays and their implementation in numpy, data processing using pandas dataframes; principles of object-oriented programming including objects, classes, methods, encapsulation, inheritance, and polymorphism; principles of functional programming languages such as use of immutable data, declarative programming model, flow control using functional calls and recursions, basic parallel programming concepts; practical aspects of algorithmic concepts such as recursions, search and tree structures.

The course will primarily use Python programming language, but will also discuss and provide references to how the fundamental programming concepts are implemented in other programming languages, in particular, R.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. This course will be delivered through a combination of classes and lectures totalling a minimum of 35 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 10 exercises in the LT.

The problem sets will consist of computer programming exercises, mostly in Python programming language, but also some exercises will be offered to practice implementation in R.

Indicative reading: Essential Reading:

- J. V. Guttag, *Introduction to Computation and Programming using Python*, Second Edition, The MIT Press, 2017
- W. McKinney, *Python for Data Analysis*, 2nd Edition, O'Reilly, 2017
- A. B. Downey, *Think Python: How to Think like a Computer Scientist*, 2nd Edition, O'Reilly Media, 2015
- M. Dawson, *Python Programming for the Absolute Beginner*, 3rd Edition, Course Technology, 2010

Additional Reading:

- J. Zelle, *Python Programming: An Introduction to Computer*

Science, 3rd edition, Franklin, Beedle & Associates, 2016

• M. Lutz, Learning Python, 5th Edition, O'Reilly Media, 2013

Assessment: Coursework (40%) and project (60%) in the LT.

Students are required to hand in solutions to 4 sets of exercises using Python (or R), each accounting for 10% of the final assessment.

The project will require from students to solve a practical programming task, which will allow them to apply the concepts learned in the course and demonstrate their knowledge.

ST102

Elementary Statistical Theory

This information is for the 2020/21 session.

Teacher responsible: Dr James Abdey COL.5.10

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Finance, BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST107 Quantitative Methods (Statistics) or ST108 Statistical Methods for the Social Sciences.

Pre-requisites: A-level Mathematics.

No previous knowledge of statistics is assumed.

Course content: The course provides a precise and accurate treatment of introductory probability theory, statistical ideas, methods and techniques. Topics covered are data visualisation and descriptive statistics, probability theory, random variables, common distributions of random variables, multivariate random variables, sampling distributions of statistics, point estimation, interval estimation, hypothesis testing, analysis of variance (ANOVA), linear regression, nonparametric tests, goodness-of-fit and independence tests.

Teaching: This course will be delivered through a combination of classes, lectures and workshops totalling a minimum of 90 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures/workshops delivered as short online videos. This course does not include reading weeks.

Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week for feedback.

Indicative reading: All course materials are made available via Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is:

Larsen R.J. and M.L. Marx (2013) *Introduction to Mathematical Statistics and Its Applications* (fifth edition), Pearson (earlier editions are also fine).

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Exam (25%, duration: 1 hour, reading time: 10 minutes) in the January exam period.

ST102GC Half Unit

Elementary Statistical Theory (Spring Semester)

This information is for the 2020/21 session.

Teacher responsible: Dr James Abdey COL.5.10

Availability: This course is available to General Course 'Spring

Semester' students conditional on having studied Michaelmas term content remotely. Note ST102 is part-examined in January.

Pre-requisites: A-level Mathematics.

No previous knowledge of statistics is assumed.

Course content: The course provides a precise and accurate treatment of introductory probability theory, statistical ideas, methods and techniques. Topics covered are data visualisation and descriptive statistics, probability theory, random variables, common distributions of random variables, multivariate random variables, sampling distributions of statistics, point estimation, interval estimation, hypothesis testing, analysis of variance (ANOVA), linear regression, nonparametric tests, goodness-of-fit and independence tests.

Teaching: This course will be delivered through a combination of classes, lectures and workshops totalling a minimum of 90 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures/workshops delivered as short online videos. This course does not include reading weeks.

Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week for feedback.

Indicative reading: All course materials are made available via Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is:

Larsen R.J. and M.L. Marx (2013) *Introduction to Mathematical Statistics and Its Applications* (fifth edition), Pearson (earlier editions are also fine).

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Online assessment (25%) in January.

ST107 Half Unit

Quantitative Methods (Statistics)

This information is for the 2020/21 session.

Teacher responsible: Dr James Abdey COL.5.10

Availability: This course is compulsory on the BSc in Economic History with Economics, BSc in Economics and Economic History, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in International Social and Public Policy and Economics, BSc in Management and BSc in Social Policy and Economics. This course is available on the BSc in Accounting and Finance, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST102 Elementary Statistical Theory or ST108 Statistical Methods for the Social Sciences.

Pre-requisites: A-level Mathematics.

Course content: The elementary statistical tools necessary for further study in management and economics with an emphasis on the applicability of the methods to management and economic problems. Topics covered are data visualisation and descriptive statistics, probability theory, discrete probability distributions, continuous probability distributions, sampling distributions of statistics, point estimation, interval estimation, hypothesis testing, contingency tables and the chi-squared test, correlation and linear regression.

Teaching: This course will be delivered through a combination of classes, lectures and workshops totalling a minimum of 45 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures/workshops delivered as short online videos. This course does not include a reading week in Week 6 of Lent Term.

Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week

for feedback.

Indicative reading: All course materials are made available via Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is: Newbold, P., W.L. Carlson and B.M. Thorne (2019) *Statistics for Business and Economics*. (9th edition), Pearson (earlier editions are also fine).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST108

Statistical Methods for the Social Sciences

This information is for the 2020/21 session.

Teacher responsible: Dr Anastasia Kakou

Availability: This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

The course is designed for students without a strong background in Mathematics, e.g. without A level Mathematics, and is suitable for students who wish to learn basic statistical methods for analysing social science data. This course cannot be taken with ST102 Elementary Statistical Theory or ST107 Quantitative Methods (Statistics).

Pre-requisites: A grade B in GCSE Mathematics or equivalent. No background in statistics is required.

Course content: A basic foundation in elementary statistical methods, theory and statistical reasoning. Basic use of computers to analyse data. Probability, random variable theory and distributions. Normal distribution, sampling concepts and sampling distributions. Estimation, significance tests and confidence intervals, one and two-sample methods. Test for proportions, simple contingency tables. Linear regression, correlation. Basic decision theory.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 60 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 in each term.

Students will have a two hour Excel computer workshop in Michaelmas and Lent terms. Summer term session will primarily be devoted to revision.

Formative coursework: Exercises will be set most weeks. The questions will count as continuous assessment.

Indicative reading: Notes will be provided and form the basic reading material. Pointers will be given to further reading.

Assessment: Exam (80%, duration: 3 hours) in the summer exam period.

Continuous assessment (20%) in the MT and LT.

At least a pass mark is required for both assessment components (i.e., the summer term exam and the continuous assessment).

ST201 Half Unit

Statistical Models and Data Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Yunxiao Chen COL 5.16

Availability: This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Also available to students who have studied statistics and mathematics to the level of MA107/ST107 Quantitative Methods or ST108 Statistical Methods for the Social Sciences or equivalent.

Pre-requisites: MA107/ST107 Quantitative Methods or ST108 Statistical Methods for the Social Sciences or equivalent.

Course content: A second course in statistics with an emphasis on data analysis with applications in the social sciences. Students will gain hands on experience using R-- a programming language and software environment for data analysis and visualisation. The course contains five topics, including (1) principles of statistical analysis, including data preparation, statistical models, regression and classification, inference, prediction, and bias-variance tradeoff, (2) multiple linear regression, including its assumptions, inference, data transformations, diagnostics, model selection, (3) regression tree method, (4) logistic regression, including odds ratios, likelihood, classification, and ROC curve, and (5) Bayes rule for classification and linear discriminant analysis.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 36 hours across Lent Term and 4 hours of lectures in the Summer Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term. Students will be given their assessed project to start on in week 6 which is due in at the end of LT.

Formative coursework: Moodle quizzes and a quantitative research project.

Indicative reading: James, G., Witten, D., Hastie, T., & Tibshirani, R. (2013). *An introduction to statistical learning*. New York, NY: Springer. Fox, J. (2015). *Applied regression analysis and generalized linear models*. Thousand Oaks, CA: Sage Publications.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the LT.

ST202

Probability, Distribution Theory and Inference

This information is for the 2020/21 session.

Teacher responsible: Dr Miltiadis Mavrakakis-Vassilakis

Availability: This course is compulsory on the BSc in Actuarial Science and BSc in Financial Mathematics and Statistics. This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102) and Mathematical Methods (MA100). Students who have not taken these courses should contact Dr Mavrakakis.

Course content: The course covers the probability, distribution theory and statistical inference needed for third year courses in statistics and econometrics.

Michaelmas term: Events and their probabilities. Random variables. Discrete and continuous distributions. Moments, moment generating functions and cumulant generating functions. Functions of random variables. Monte Carlo Simulation using R. Joint distributions and joint moments. Marginal and conditional densities. Independence, covariance and correlation. Sums of random variables and compounding. Multinomial and bivariate normal distributions. Law of large numbers and central limit theorem.

Lent term: Sampling distributions. Criteria of estimation: consistency, unbiasedness, efficiency, minimum variance. Sufficiency. Maximum likelihood estimation. Confidence intervals. Tests of simple hypotheses. Likelihood ratio tests. Wald tests, score tests. Introduction to linear regressions and least squares estimator.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 60 hours across

Michaelmas Term and Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes reading weeks in Week 6 of Michaelmas Term and Lent Term.

Formative coursework: Students will be expected to produce 4 pieces of coursework in the MT and LT.

These are exam-style class tests.

Indicative reading: M C Mavrakakis & J Penzer, Probability and Statistical Inference: From Basic Principles to Advanced Models (primary reading). G C Casella & R L Berger, Statistical Inference (very useful as a reference)

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

ST205 Half Unit

Sample Surveys and Experiments

This information is for the 2020/21 session.

Teacher responsible: Professor Irini Moustaki

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Mathematics, Statistics and Business, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Mathematics and statistics to the level of MA107/ST107 Quantitative Methods or SP201 Research Methods for Social Policy.

Course content: Sampling methods for social surveys. Survey design and estimation. Nonresponse and measurement error. Design of experiments and observational studies.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas.

Formative coursework: Weekly exercises and group presentations. Students are expected to work on a set of exercises weekly and submit them for marking and feedback. Feedback is provided on the weekly exercises by the beginning of the next class.

Indicative reading: V. Barnett, Sample Survey Principles and Methods (2009). F.J. Fowler Jr, Survey Research Methods (2008). S. Lohr, Sampling: Design and Analysis (2010). R.L. Scheaffer et al, Elementary Survey Sampling (2005)

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the MT.

ST206 Half Unit

Probability and Distribution Theory

This information is for the 2020/21 session.

Teacher responsible: Dr Miltiadis Mavrakakis-Vassilakis

Availability: This course is available on the BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics and Business. This course is not available as an outside option. This course is available to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102) and Mathematical Methods (MA100).

Course content: The course covers the probability and distribution theory needed for third year courses in statistics and econometrics.:

Events and their probabilities. Random variables. Discrete and continuous distributions. Moments, moment generating functions and cumulant generating functions. Functions of Random

Variables. Monte Carlo Simulation in R. Joint distributions and joint moments. Marginal and conditional densities. Independence, covariance and correlation. Sums of random variables and compounding. Multinomial and bivariate normal distributions. Law of large numbers and central limit theorem.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 2 pieces of coursework in the MT.

These are exam-style class tests.

Indicative reading: M C Mavrakakis & J Penzer, Probability and Statistical Inference: From Basic Principles to Advanced Models (primary reading). G C Casella & R L Berger, Statistical Inference (very useful as a reference)

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST211 Half Unit

Applied Regression

This information is for the 2020/21 session.

Teacher responsible: Dr Nicholas Cron (Columbia House 5.13)

Availability: This course is compulsory on the BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Specifically the course is available to Accounting and Finance students who have taken ST102.

Pre-requisites: ST102

Course content: Statistical data analysis in R covering the following topics: Simple and multiple linear regression, Model diagnostics, Detection of outliers, Multicollinearity, Introduction to GLMs

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Regular Moodle quizzes. Regular take home exercises.

Indicative reading: 1. Gelman and Hill, Data analysis Using Regression and Multilevel/Hierarchical models (CUP, 2007) First part.

2. Neter, J., Kutner, M., Nachtsheim, C. and Wasserman, W. Applied Linear Statistical Models, McGraw-Hill, Fourth Edition. (2004).

3. Abraham, B. Ledolter, J. Introduction to Regression Modelling, Thomson Brooks Cole. (2006).

4. S. Weisberg Applied Linear Regression, Wiley, 3rd edition. (2005) (intermediate).

5. Fox (2016) Applied Regression Analysis and Generalized Linear Models.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%) in the ST.

There will be a single project due at the beginning of the ST.

ST213 Half Unit

Introduction to Pricing, Hedging and Optimization

This information is for the 2020/21 session.

Teacher responsible: Prof Konstantinos Kardaras COL 6.07

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA203 Real Analysis. Must be taken with ST202 Probability, Distribution Theory and Inference.

Course content: This course introduces the concepts of valuation, hedging and portfolio selection in a discrete-time environment. Towards the end, it introduces continuous-time markets in a heuristic fashion. It covers the following topics:

- The binomial model; pricing and replication.
- Trinomial model and incompleteness, arbitrage-free price intervals.
- General discrete-time models and the fundamental theorems.
- Portfolio optimization and hedging.
- Martingale theory in discrete time.
- Multi-period models and backwards induction methods.
- Passage to continuous time Black & Scholes model.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 9 problem sets in the LT.

Certain problem sets will be returned with feedback.

Indicative reading: Lecture notes will be provided.

Assessment: Exam (80%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.
Coursework (20%).

ST226 Half Unit

Actuarial Investigations: Financial

This information is for the 2020/21 session.

Teacher responsible: Dr Gelly Mitrodima

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.
The course is capped, and the maximum number of students will be 130.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Course content: • Introduction to actuarial modelling.

- The application of compound interest techniques to financial transactions.
- Generalised cash-models to describe financial transactions such as zero-coupon bonds, fixed interest securities, cash on deposit, equities, interest only loans, repayment loans, annuities certain and others.
- Introduction to R programming for Actuarial Science.
- Introduction to life insurance.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 34 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas.

Formative coursework: Students will be expected to work in groups and give written answers to a number of problem sets.

Indicative reading: J. J. McCutcheon & W. J. Scott, An Introduction to the Mathematics of Finance, Heinemann; Institute and Faculty of Actuaries, Formulae and Tables for Actuarial Examinations; Core reading notes obtainable from the Institute and Faculty of Actuaries; D. Dickson, M. Hardy & H. Waters, "Actuarial Mathematics for Life Contingent Risks", International Series on Actuarial Science, pp. I-Vi. Cambridge University Press. 2009

Assessment: Exam (90%, duration: 3 hours) in the January exam period.

Coursework (10%) in the LT.

The coursework will be due after the January examination period.

ST227 Half Unit

Survival Models

This information is for the 2020/21 session.

Teacher responsible: Dr George Tzougas

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Course content: An introduction to stochastic processes with emphasis on life history analysis and actuarial applications. Principles of modelling; model selection, calibration, and testing; Stochastic processes and their classification into different types by time space, state space, and distributional properties; construction of stochastic processes from finite-dimensional distributions, processes with independent increments, Poisson processes and renewal processes and their applications in general insurance and risk theory, Markov processes, Markov chains and their applications in life insurance and general insurance, extensions to more general intensity-driven processes, counting processes, semi-Markov processes, stationary distributions. Determining transition probabilities and other conditional probabilities and expected values; Integral expressions, Kolmogorov differential equations, numerical solutions, simulation techniques. Survival models - the random life length approach and the Markov chain approach; survival function, conditional survival function, mortality intensity, some commonly used mortality laws. Statistical inference for life history data; Maximum likelihood estimation for parametric models, non-parametric methods (Kaplan-Meier and Nelson-Aalen), regression models for intensities including the semi-parametric Cox model and partial likelihood estimation; Various forms of censoring; The technique of occurrence-exposure rates and analytic graduation; Impact of the censoring scheme on the distribution of the estimators; Confidence regions and hypothesis testing.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 35 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas/Lent Term.

Students on this course will have a reading week in week 6 where they will be given review exercises to work on based on the first 5 weeks of the course. Also, students will be given a 10% coursework in R to work on within 24 hours in week 11 based on the material covered in the computer workshops which will run in weeks 5,7,8,9 and 10.

Formative coursework: Compulsory written answers to two sets of problems.

Indicative reading: S Ross, Stochastic Processes; R Norberg, Risk and Stochastics in Life Insurance; The Institute of Actuaries, CS2: Risk Modelling and Survival Analysis. For full details of the syllabus

of CT4, see https://www.actuaries.org.uk/curriculum_entity/curriculum_entity/8.

Assessment: Exam (90%, duration: 3 hours) in the summer exam period.

Coursework (10%) in the LT Week 11.

ST300 Half Unit

Regression and Generalised Linear Models

This information is for the 2020/21 session.

Teacher responsible: Dr Philip Chan

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Financial Mathematics and Statistics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed: EITHER Probability, Distribution Theory and Inference (ST202) OR Probability and Distribution Theory (ST206) AND Mathematical Methods (MA100) or equivalent. It is assumed students have taken at least a first course in linear algebra.

Course content: A solid coverage of the most important parts of the theory and application of regression models, and generalised linear models. Multiple regression and regression diagnostics. Generalised linear models; the exponential family, the linear predictor, link functions, analysis of deviance, parameter estimation, deviance residuals. Model choice, fitting and validation. The use of the statistics package RStudio will be an integral part of the course. The computer workshops revise the theory and show how it can be applied to real datasets from finance and insurance including CAPM, and actuarial models of claims on insurance policies.

Students will sit a summer term **closed-book** exam.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Michaelmas.

Indicative reading: Dobson, A.J. (2008). An Introduction to Generalized Linear Models. Frees, E.W. (2010). Regression Modeling with Actuarial and Financial Applications. Wickham, H, and Grolemund, G. (2017). R for Data Science. O'Reilly. Available online at <http://r4ds.had.co.nz>

Assessment: Exam (85%, duration: 2 hours) in the summer exam period.

Project (15%) in the LT.

ST301 Half Unit

Actuarial Mathematics (Life)

This information is for the 2020/21 session.

Teacher responsible: Angelos Dassios

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics and Business. This course is not available as an outside option. This course is available to General Course students.

Pre-requisites: Students must have completed: EITHER Probability, Distribution Theory and Inference (ST202) OR Probability and Distribution Theory (ST206) AND Survival Models (ST227).

Course content: Single life mortality models, assurance and annuity contracts and their actuarial notation, computation of their

present values and variances; relations among the present values of the various contracts.

The equivalence principle: computation of net premiums for the main assurance policies.

Prospective and retrospective reserves, Thiele's differential equation as the main tool for the computation of reserves.

Expenses: gross premium and gross reserves. Selection effect and how it affects mortality tables.

Multi-life assurance contracts: joint life and last survival life, computation of premiums and reserves for the main two-lives contracts.

Multi-states mortality models: basic notions of continuous-time Markov chains, Kolmogorov backward and forward equations, application to multiple decrements and disability models, computation of transition intensities.

Thiele differential equation for multi-states models, computation and analysis of reserves for main multi-state policies.

With-profit policies, unit-linked assurance policies, pensions.

Interplay between assurance and finance: embedded options, market consistent actuarial valuation.

Teaching: This course will be delivered through a combination of seminars and lectures totalling a minimum of 30 hours across in the Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

Formative coursework: Compulsory written answers to one set of problems.

Indicative reading: R Norberg, Basic Life Insurance Mathematics; The Institute of Actuaries, Core reading Subject CT5. Dickson, Hardy, Waters, 'Actuarial Mathematics for Life Contingent Risks'. Wutrich, Buhlmann, Furrer, 'Market Consistent Actuarial Valuation'

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

ST302 Half Unit

Stochastic Processes

This information is for the 2020/21 session.

Teacher responsible: Jose Manuel Pedraza Ramirez

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics, BSc in Financial Mathematics and Statistics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed either Probability, Distribution Theory and Inference (ST202) or Probability and Distribution Theory (ST206).

Course content: A second course in stochastic processes and applications to insurance. Markov chains (discrete and continuous time), processes with jumps; Brownian motion and diffusions; Martingales; stochastic calculus; applications in insurance and finance. Content: Stochastic processes in discrete and continuous time; Markov chains: Markov property, Chapman-Kolmogorov equation, classification of states, stationary distribution, examples of infinite state space; filtrations and conditional expectation; discrete time martingales: martingale property, basic examples, exponential martingales, stopping theorem, applications to random walks; Poisson processes: counting processes, definition as counting process with independent and stationary increments, compensated Poisson process as martingale, distribution of number of events in a given time interval as well as inter-event times, compound Poisson process, application to ruin problem for the classical risk process via Gerber's martingale approach; Markov processes: Kolmogorov equations, solution of those in simple cases, stochastic semigroups, birth and death chains, health/sickness models, stationary distribution; Brownian motion: definition and basic properties, martingales related to Brownian motion, reflection principle, Ito-integral, Ito's formula with simple

applications, linear stochastic differential equations for geometric Brownian motion and the Ornstein-Uhlenbeck process, first approach to change of measure techniques, application to Black-Scholes model. The items in the course content that also appear in the content of ST227 are covered here at greater depth. However, ST227 is not a pre-requisite for this course.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 29 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Compulsory written answers to two sets of problems.

Indicative reading: R Durrett, Essentials of Stochastic Processes; T Mikosch, Elementary Stochastic Calculus with Finance in View; Institute of Actuaries core reading notes.

Assessment: Exam (100%, duration: 3 hours) in the January exam period.

ST303 Half Unit Stochastic Simulation

This information is for the 2020/21 session.

Teacher responsible: Angelos Dassios

Availability: This course is available on the BSc in Actuarial Science and BSc in Mathematics, Statistics and Business. This course is not available as an outside option nor to General Course students.

Course capped at 60.

Pre-requisites: Students must have completed: EITHER Probability, Distribution Theory and Inference (ST202) OR Probability and Distribution Theory (ST206) AND Stochastic Processes (ST302).

While the course ST306 is not a formal pre-requisite some examples from this course will be used. Students that have not taken ST306 might have to do a bit of extra reading to familiarise themselves with them.

Course content: An introduction to using R for stochastic simulation as well as methods of simulating random variables, complicated quantities involving several random variables and paths of stochastic processes. Applications will focus on examples from insurance and finance.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours in the Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

Formative coursework: Weekly exercises usually involving computing.

Indicative reading:

- Introducing Monte Carlo methods with R (main reference), by G. Robert and G. Casella.

Useful reading:

- Stochastic Simulation, Algorithms and Analysis by S. Asmussen.
- Monte Carlo Methods in Financial Engineering by P. Glasserman.

Assessment: Project (35%) in the LT.

Project (65%) in the ST.

ST304 Half Unit Time Series and Forecasting

This information is for the 2020/21 session.

Teacher responsible: Dr Yining Chen COL 5.08

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics

and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: 2nd year statistics and probability

Course content: The course introduces the student to the statistical analysis of time series data and simple models, and showcase what time series analysis can be useful for. Topics include: autocorrelation; stationarity, trend removal and seasonal adjustment, basic time series models; AR, MA, ARMA; invertibility; estimation; forecasting; introduction to financial time series and the GARCH models; unit root processes; basic spectral analysis. Some R demonstrations will also be included.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Peter J. Brockwell and Richard A. Davis, Introduction to Time Series and Forecasting. Christopher Chatfield, The Analysis of Time Series. Robert H. Shumway, David S. Stoffer, Time Series Analysis and Its Applications: With R Examples. Ruey S. Tsay, An Introduction to Analysis of Financial Data with R

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST306 Half Unit Actuarial Mathematics (General)

This information is for the 2020/21 session.

Teacher responsible: Dr George Tzougas

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302).

Course content: An introduction to actuarial work in non-life insurance. Decision theory concepts: game theory, optimum strategies, decision functions, risk functions, the minimax criterion and the Bayes criterion. Loss distributions with and without limits and risk-sharing arrangements; suitable, moments and moment generating functions, the gamma, exponential, Pareto, generalised Pareto, normal, lognormal, Weibull, Burr and other distributions suitable for modelling individual and aggregate losses; statistical inference. Risk models involving frequency and severity distributions; the basic short-term contracts, moments, moment generating functions and other properties of compound distributions. Reinsurance treaties; proportional, excess of loss, stop-loss, deriving the distribution, moments, moment generating functions and other properties of the losses to the insurer and reinsurer under all the models above. Ruin theory for continuous and discrete models. Fundamental concepts of Bayesian statistics; Bayes theorem, prior distributions, posterior distributions, conjugate prior distributions, loss functions, Bayesian estimators. Credibility theory; Bayesian models. Experience rating models and applications. Claims reserving: run-off triangles. Monte-Carlo simulation and applications in insurance.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

Formative coursework: Compulsory written answers to one set of problems. There will also be a mock exam during week 6.

Indicative reading: Notes are given out in the lectures. The

Institute of Actuaries, Core reading Subject CT6.

For full details of the syllabus of CT6, see:

http://stats.lse.ac.uk/angelos/guides/2004_CT6.pdf.

Assessment: Exam (100%, duration: 3 hours) in the January exam period.

ST307 Half Unit

Aspects of Market Research

This information is for the 2020/21 session.

Teacher responsible: Dr James Abdey COL.5.10

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics, Statistics and Business, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Not to be taken with ST327. This is a capped course.

Pre-requisites: Probability and statistics to the level of ST107.

Course content: The main ideas and applications of market research techniques. Topics covered are introduction to market research, defining the market research problem, research design, internal secondary data and the use of databases, qualitative research: focus group discussions, projective techniques, survey and quantitative observation techniques, measurement and scaling: fundamentals, comparative and non-comparative scaling, questionnaire design, sampling: design and procedures, final and initial sample size determination, cross-tabulation and hypothesis testing, analysis of variance and covariance, correlation and regression, and discriminant analysis.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course does not include a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students are given weekly exercises to work on for discussion in class.

Indicative reading: Malhotra, N.K. (2019) *Marketing Research: An Applied Orientation* (7th edition), Pearson (earlier editions are also fine).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST308 Half Unit

Bayesian Inference

This information is for the 2020/21 session.

Teacher responsible: Dr Konstantinos Kalogeropoulos COL.610

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102). ST202 is also recommended.

Course content: Statistical decision theory: risk, decision rules, loss and utility functions, Bayesian expected loss, Frequentist risk.

Bayesian Inference: Bayes theorem, prior, posterior and predictive distributions, conjugate models (Normal-Normal, Poisson-Gamma, Beta-Binomial), Bayesian point estimation, credible intervals and hypothesis testing, Bayes factors and model selection. Comparison with Frequentist approaches.

Implementation: Asymptotic approximations (Laplace approximation, Variational Bayes, Monte Carlo methods), Markov

Chain Monte Carlo (MCMC) simulation (Gibbs sampler, Metropolis-Hastings algorithm). Computer tools (R).

Applications: Linear models in Regression and Classification (Bayesian Linear Regression, Generalized Linear Models, Logistic Regression), Hierarchical/ Multilevel Models, Cluster Analysis and Mixture Modeling.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 29 hours across the Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course does not include a reading week and will be concluded by the end of week 10 of Lent Term.

Formative coursework: Optional problem sets and computer exercises.

Indicative reading: J.K. Kruschke, *Doing Bayesian Data Analysis*. A tutorial with R, JAGS and Stan. 2nd edition. J.O. Berger, *Statistical Decision Theory and Bayesian Analysis*. D. Gamerman, H. F. Lopes, *Markov Chain Monte Carlo: Stochastic Simulation for Bayesian Inference*. A. Gelman, *Bayesian data analysis*.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Project (20%) in the ST.

ST309 Half Unit

Elementary Data Analytics

This information is for the 2020/21 session.

Teacher responsible: Prof Qiwei Yao Col.7.16

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course is available as an outside option to the students who are interested in data analytics and who have statistical background at least equivalent to ST107 or ST108. No prior knowledge in programming is required. However students who have no previous experience in R are strongly encouraged to take on an online pre-session R course from the Digital Skill Lab (<https://moodle.lse.ac.uk/course/view.php?id=7022>).

This course is capped at 60 for the 2019/20 session.

Pre-requisites: Students must have completed a statistical course at least equivalent to Quantitative Methods (Statistics) (ST107) or Statistical Methods for the Social Sciences (ST108).

Students who have no previous experience in R are strongly encouraged to take on an online pre-session R course from the Digital Skill Lab (<https://moodle.lse.ac.uk/course/view.php?id=7022>).

Course content: The primary focus of this course is to help students view various problems from business, economy/finance, and social domains from a data perspective and understand the principles of extracting useful information and knowledge from data. Students will also gain the hands-on experience using R – a programming language and software environment for data analysis and visualisation. Learning basic data analytic methods and techniques is combined with real-life examples.

The core contents of the course include data cleansing, data transformation, data visualisation, R-programming, classification, regression, clustering, over-fitting avoidance and model evaluation. The course also covers a subset of the following topics: illustration of R-access of databases and big data platforms, illustration of parallel computing in R, similarity matching, market-basket analysis, link prediction, text mining, network analysis, causal modelling.

This is not a course on algorithms and IT technologies required for handling massive data, which deserve separate courses. The focus is on the fundamental principles and concepts of data analytics or data science. It becomes ever-increasingly important in this

information age to gain adequate understanding of data science even if one never intends to apply it oneself.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours in Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

Students are encouraged to install R in their own laptops, and to use their own laptops in the workshops.

Formative coursework: Students will be expected to produce 6 exercises in the MT.

Students are expected to complete six sets of exercises involving substantial data analysis using R.

Indicative reading: Wickham, H. and Golemund, G. (2017). *R for Data Science*. O'Reilly. Available online at <http://r4ds.had.co.nz>. James, G., Witten, D., Hastie, T. and Tibshirani, R. (2013). *An Introduction to Statistical Learning with Applications in R*. Springer. Available online at <http://www.bcf.usc.edu/~garth/ISL>. Provost, F. and Fawcett, T. (2013). *Data Science for Business*. O'Reilly. Zuur, A., Ieno, E. and Meesters, E. (2009). *A Beginner's Guide to R*. Springer. Available online from LSE Library. Assessment: Coursework (30%) in the MT.

Project (70%) in the LT.

The project will be a group project with maximum 3 members per group. The detailed instruction will be handed out in Week 5 of Michaelmas term, and students need to submit a written report by Week 5 of Lent term.

Students are required to hand in the solutions for 3 sets of exercises which account for the total 30% of the final grade.

ST310 Half Unit Machine Learning

This information is for the 2020/21 session.

Teacher responsible: Dr Joshua Loftus

Availability: This course is available on the BSc in Actuarial Science and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102).

Familiarity with statistics to the level of ST102 and familiarity with basic computer programming in R or Python.

Course content: The primary focus of this course is on the core machine learning techniques in the context of high-dimensional or large datasets (i.e. big data). The first part of the course covers elementary and important statistical methods including nearest neighbours, linear regression, logistic regression, regularisation, cross-validation, and variable selection. The second part of the course deals with more advanced machine learning methods including regression and classification trees, random forests, bagging, boosting, deep neural networks, k-means clustering and hierarchical clustering. The course will also introduce causal inference motivated by analogy between double machine learning and two-stage least squares. All the topics will be delivered using illustrative real data examples. Students will also gain hands-on experience using R or Python (programming languages and software environments for data analysis, computing and visualisation).

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours in Lent Term.

This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Students are required to install R/Python in their own laptops.

Student not having a laptop of their own, will be offered to use personal computers available in seminar rooms.

Week 6 will be used as a reading week.

Formative coursework: Students will be expected to produce 5 problem sets in the LT.

Indicative reading: James, G., Witten, D., Hastie, T. and Tibshirani, R. *An Introduction to Statistical Learning with Applications in R*. Springer, 2017. Hastie, T., Tibshirani, R. and Friedman, J. *The Elements of Statistical Learning: Data Mining, Inference and Prediction*. 2nd Edition, Springer, 2009. Efron, B. and Hastie, T. *Computer Age Statistical Inference*. Cambridge University Press, 2016. Wickham, H. and Golemund, G. (2017). *R for Data Science*. O'Reilly.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Project (30%) in the LT Week 11.

Students are required to submit a group project by applying machine learning methods covered in this course on some real data examples using R/Python (which accounts for 30% of the final assessment).

In addition to some real data examples, the focus of this course is to introduce some theoretical and methodological concepts in machine learning. These components will be tested by a written exam (which accounts for 70% of the final assessment).

ST312 Half Unit Not available in 2020/21 Applied Statistics Project

This information is for the 2020/21 session.

Teacher responsible: Dr Anastasia Kakou

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics and Business. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102). This course is suitable for third-year students.

Course content: Students will produce a project involving a critical investigation and collation of statistical data on a topic of their own interest.

Teaching: 9 hours of seminars and 2 hours of workshops in the MT. 2 hours of workshops in the ST.

Students on this course will have a research week in week 6 where they can look up data sources for their assessed project.

Formative coursework: Oral presentation at the end of MT.

Indicative reading: ukdataservice.ac.uk, www.google.com/publicdata, data.worldbank.org

Assessment: Project (90%) and presentation (10%) in the ST.

ST326 Half Unit Financial Statistics

This information is for the 2020/21 session.

Teacher responsible: Prof Wai-Fung Lam COL.6.09

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics. This course is available on the BSc in Actuarial Science and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Either ST202, or ST206 and ST211.

Course content: The course covers key statistical methods and data analytic techniques most relevant to finance. Hands-on experience in analysing financial data in the "R" environment is an

essential part of the course. The course includes a selection of the following topics: obtaining financial data, low- and high-frequency financial time series, ARCH-type models for low-frequency volatilities and their simple alternatives, Markowitz portfolio theory and the Capital Asset Pricing Model, concepts and practices in machine learning as applied in financial forecasting, Value at Risk. Will cover classification techniques using random forests and simple trading strategies if time permits.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 25 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 9 problem sets in the MT.

Indicative reading: Lecture notes will be provided
Lai, T.L. And Xing H. (2008) Statistical Models and Methods for Financial Markets. Springer. Tsay, R. S. (2005) Analysis of Financial Time Series. Wiley. Ruppert, D. (2004) Statistics and Finance – an introduction. Springer. Fan, Yao (2003) Nonlinear Time Series. Hastie, Tibshirani, Friedman (2009) The Elements of Statistical Learning. Haerdle, Simar (2007) Applied Multivariate Statistical Analysis.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the MT.

The course will be assessed by an examination (80%) and a coursework (20%) involving case studies which will be submitted in MT.

ST327

Market Research: An Integrated Approach

This information is for the 2020/21 session.

Teacher responsible: Dr James Abdey COL.5.10 and Mr Karsten Shaw

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Not to be taken with ST307.

Pre-requisites: Students must have completed one of the following: Elementary Statistical Theory (ST102), Quantitative Methods (Statistics) (ST107), Statistics for Management Sciences (ST203), Econometrics: Theory and Applications (MG205), Analytical Methods for Management (MG202), or equivalent.

Course content: The main ideas and applications of market research techniques. ST327.1 Topics covered are introduction to market research, defining the market research problem, research design, internal secondary data and the use of databases, qualitative research: focus group discussions, projective techniques, survey and quantitative observation techniques, measurement and scaling: fundamentals, comparative and non-comparative scaling, questionnaire design, sampling: design and procedures, final and initial sample size determination, cross-tabulation and hypothesis testing, analysis of variance and covariance, correlation and regression, discriminant analysis, factor analysis, cluster analysis and conjoint analysis. ST327.2 Case Studies: Students use the information and techniques gained from ST327.1 to carry out a co-operative Market Research Case Study. Individual write up of the Case Study forms part of the assessment.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 36 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course does not include a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students are given weekly exercises to work on for discussion in class.

Indicative reading: Malhotra, N.K. (2019) *Marketing Research: An Applied Orientation* (7th edition), Pearson (earlier editions are also fine).

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Coursework (25%) in the ST.

Presentation (15%) in the LT.

The assessed Case Study work is split into two parts; a group presentation and an individual piece of coursework.

ST330

Stochastic and Actuarial Methods in Finance

This information is for the 2020/21 session.

Teacher responsible: Dr Erik Baurdoux COL 6.04

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics and Business. This course is not available as an outside option. This course is available to General Course students.

Pre-requisites: Students must have completed:

EITHER Probability, Distribution Theory and Inference (ST202) OR Probability and Distribution Theory (ST206)

AND Stochastic Processes (ST302).

Course content: Theories of financial market behaviour.

Applications of stochastic processes and actuarial models in finance. Utility theory. Stochastic dominance and portfolio selection. Measures of investment risk. Mean-variance portfolio theory. Single and multifactor models. The Capital Asset Pricing Model. The efficient market hypothesis.

Introduction to financial markets. Model-free relationships.

Stochastic models for security prices and interest rates and

estimating their parameters. Option pricing: general framework

in discrete and continuous time, the Black-Scholes analysis and numerical procedures (binomial models and Cox-Ross-Rubinstein models). The term structure of interest rates: the Vasicek, the Cox-Ingersoll-Ross and other models. Introduction to credit risk.

Teaching: This course will be delivered through a combination of seminars and lectures totalling a minimum of 60 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas/Lent Term.

Students will work on and submit formative coursework towards the end of MT and a second set of formative coursework towards the end of LT. Feedback and solutions will be provided

Formative coursework: Two sets of hand-in exercises will also be given during the year.

Indicative reading: N H Bingham & R Kiesel, Risk Neutral Valuation; A Cerny, Mathematical Techniques in Finance: Tools for Incomplete Markets; J Hull, Options, Futures & Other Derivatives; R Jarrow & S Turnbull, Derivative Securities; D Luenberger, Investment Science; Institute of Actuaries core reading notes, Subject CT8.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

Important information in response to COVID-19

Diploma Programme Regulations

Key to Diploma Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 20/21) means not available in the 2020/21 academic year
(MT) means Michaelmas Term
(LT) means Lent Term
(ST) means Summer Term

ST107 Quantitative Methods (Statistics) (0.5) #
 Any other course with the approval of the Programme Director, by special permission only.
 # means there may be prerequisites for this course. Please view the course guide for more information.
 This programme is externally accredited by the ACCA. Further information is available on the Department of Accounting website lse.ac.uk/collections/accounting/.

Diploma in Accounting and Finance

Programme Code: TDAF

Department: Accounting

For students starting this programme of study in 2020/21

Students must take four courses as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Year 1

Paper 1 FM212 Principles of Finance (1.0) #

Or

By special permission of the Course Leaders, students may substitute FM212 with one of the following:

FM300 Corporate Finance, Investments and Financial Markets (1.0) # **or**

FM320 Quantitative Finance (1.0) #

Paper 2 Courses to the value of 1.0 unit(s) from the following:

AC200 Accounting Theory and Practice (1.0) #

AC330 Financial Accounting, Analysis and Valuation. (1.0) # (withdrawn 2020/21)

Or

AC490 Management Accounting, Decisions and Control (0.5) **and** AC491 Financial Accounting, Reporting and Disclosure (0.5)

Papers 3 & 4 Courses to the value of 2.0 unit(s) from the following (if not already taken under Paper 2):

AC200 Accounting Theory and Practice (1.0) #

AC310 Management Accounting, Financial Management and Organisational Control (1.0) # (withdrawn 2020/21)

AC311 Results Accountability and Management Control for Strategy Implementation (0.5) #

AC312 Performance Measurement, Strategy, and Uncertainty (0.5) #

AC330 Financial Accounting, Analysis and Valuation. (1.0) # (withdrawn 2020/21)

AC331 Contemporary Issues in Financial Accounting (0.5) #

AC332 Financial Statement Analysis and Valuation (0.5) #

AC341 Corporate Governance, Risk Management and Financial Audit (0.5)

AC342 Accounting, Corporate Responsibility and Sustainability (0.5) (not available 2020/21)

AC470 Accounting in the Global Economy (0.5) #

EC201 Microeconomic Principles I (1.0) #

EC202 Microeconomic Principles II (1.0) #

EC210 Macroeconomic Principles (1.0) #

EC220 Introduction to Econometrics (1.0) #

EC313 Industrial Economics (1.0) #

EH240 Business and Economic Performance since 1945: Britain in International Context (1.0)

MA107 Quantitative Methods (Mathematics) (0.5) #

MG4G4 Topics in Management Research (0.5)

Taught Master's Programme Regulations

Key to Taught Master's Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 20/21) means not available in the 2020/21 academic year
(MT) means Michaelmas Term
(LT) means Lent Term
(ST) means Summer Term

MSc in Accounting and Finance

Programme Code: TMAF

Department: Accounting

For students starting this programme of study in 2020/21 Academic-year programme. Students must take courses to the value of four units as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Prerequisite Course	Students who wish to take AC416 in Papers 2, 3 or 4 are required to take the following course which runs over a 9-day period before the start of MT: AC480 Quantitative Methods in Accounting and Finance (0.0)
Paper 1	Courses to the value of 1.0 unit(s) from the following: FM430 Corporate Finance and Asset Markets (1.0) # Or FM429 Asset Markets A (0.5) # and FM431L Corporate Finance A (0.5) # or FM431M Corporate Finance A (0.5) # Or another approved paper by special permission only.
Paper 2	Courses to the value of 1.0 unit(s) from the following: AC411 Accounting, Strategy and Control (0.5) and AC415 Management Accounting for Decision Making (0.5) or AC415 Management Accounting for Decision Making (0.5) and AC416 Topics in Financial Reporting (0.5) # 1 or AC416 Topics in Financial Reporting (0.5) # and AC417 Corporate Financial Disclosure and Investor Relations (0.5) 2 or AC411 Accounting, Strategy and Control (0.5) and AC416 Topics in Financial Reporting (0.5) #
Papers 3 & 4	Courses to the value of 2.0 unit(s) from the following: AC411 Accounting, Strategy and Control (0.5) AC412 Accountability, Organisations and Risk Management (0.5) AC415 Management Accounting for Decision Making (0.5) AC416 Topics in Financial Reporting (0.5) # 3 AC417 Corporate Financial Disclosure and Investor Relations (0.5) AC444 Valuation and Security Analysis (0.5) # AC470 Accounting in the Global Economy (0.5) # FM402 Financial Risk Analysis (0.5) # FM404 Forecasting Financial time Series (0.5) # (not available 2020/21) FM413 Fixed Income Markets (0.5) # FM421 Applied Corporate Finance (0.5) # FM441 Derivatives (0.5) #

FM442	Quantitative Methods for Finance and Risk Analysis (0.5) #
FM445	Portfolio Management (0.5)
FM447	Global Financial Systems (0.5) #
FM472	International Finance (0.5) #
FM476	Entrepreneurial Finance (0.5) #
GY462	Real Estate Finance (0.5)
LL4BK	Corporate Crime (0.5)
LL4BL	Financial Crime (0.5)
MG4D5	Leadership in Organisations: Theory and Practice (0.5)

Any other course by special permission only.

Students can also take a dissertation in **either** accounting **or** finance (students cannot take two dissertations):

AC499	Dissertation (1.0) 4
FM499	Dissertation (1.0) 5 (withdrawn 2020/21)

Students taking FM404 or FM442 can apply for a place on the following non-assessed computer course:

FM457	Applied Computational Finance (0.0) (not available 2020/21)
-------	---

Prerequisite Requirements and Mutually Exclusive Options

1: Before taking AC416 you must take AC480
 2: Before taking AC416 you must take AC480
 3: Before taking AC416 you must take AC480
 4: AC499 can not be taken with FM499
 5: FM499 can not be taken with AC499
 # means there may be prerequisites for this course. Please view the course guide for more information. Students may elect to have their degree specialisation indicated on their degree certificate. Students who take both AC470 and FM472 as Paper 3 may choose to have **MSc Accounting and Finance: International Accounting and Finance** on their certificate. Students who take two half units of AC411 or AC415 or AC416 or AC417 as Paper 3 may choose to have **MSc Accounting and Finance: Accounting and Financial Management** on their certificate. Students taking finance courses to the equivalent of two full units as Papers 3 and 4 may choose to have **MSc Accounting and Finance: Finance** on their certificate.

The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

Notes

MSc in Accounting, Organisations and Institutions

Programme Code: TMACORIN

Department: Accounting

For students starting this programme of study in 2020/21 Academic-year programme. Students take courses to the value of four units. There is also a pre-session course held in the week before MT: AC425 MSc Accounting, Organisations and Institutions: Pre-session course.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting

specific prerequisite requirements.

Paper	Course number, title (unit value)
Pre-sessional Course	AC425 MSc Accounting, Organisations and Institutions: Pre-sessional course (0.0)
Prerequisite Course	Students who wish to take AC416 in Paper 2 or Papers 3 & 4 are required to take the following course which runs over a 9-day period before the start of MT:
	AC480 Quantitative Methods in Accounting and Finance (0.0)
Paper 1	AC424 Accounting, Organisations and Institutions (1.0) #
Paper 2	AC490 Management Accounting, Decisions and Control (0.5) and AC49 Financial Accounting, Reporting and Disclosure (0.5)
	Or
	Students with a substantive and verifiable background in accounting must do as Paper 2 either:
	AC411 Accounting, Strategy and Control (0.5) and AC415 Management Accounting for Decision Making (0.5) or
	AC415 Management Accounting for Decision Making (0.5) and AC416 Topics in Financial Reporting (0.5) # 1 or
	AC416 Topics in Financial Reporting (0.5) # and AC417 Corporate Financial Disclosure and Investor Relations (0.5) 2 or
	AC411 Accounting, Strategy and Control (0.5) and AC416 Topics in Financial Reporting (0.5) #
	Or
	Students with prior background in management accounting only must do as Paper 2:
	AC415 Management Accounting for Decision Making (0.5) and AC49 Financial Accounting, Reporting and Disclosure (0.5)
Papers 3 & 4	Courses to the value of 2.0 unit(s) from the following:
	AC411 Accounting, Strategy and Control (0.5)
	AC415 Management Accounting for Decision Making (0.5)
	AC416 Topics in Financial Reporting (0.5) # 3
	AC417 Corporate Financial Disclosure and Investor Relations (0.5)
	AC444 Valuation and Security Analysis (0.5) #
	AC470 Accounting in the Global Economy (0.5) #
	DV413 Environmental Problems and Development Interventions (0.5) #
	DV415 Global Environmental Governance (0.5)
	EH463 The Long-Run Analysis of Firms and Industries (0.5)
	EH464 The Historical Context of Business (0.5) (withdrawn 2020/21)
	EH483 The Development and Integration of the World Economy in the 19th and 20th Centuries (1.0)
	FM474L Managerial Finance (0.5)
	FM474M Managerial Finance (0.5)
	LL4BF International Financial Regulation (0.5) (not available 2020/21)
	LL4BX Corporate Governance - Advanced Topics (0.5) (withdrawn 2020/21)
	MG476 Corporate Social Responsibility and International Labour Standards (0.5) #
	SO469 Risk and Governance: A Sociological Approach (0.5) (withdrawn 2020/21)
	Any course with the approval of the Programme Director.

Prerequisite Requirements and Mutually Exclusive Options

1: Before taking AC416 you must take AC480
 2: Before taking AC416 you must take AC480
 3: Before taking AC416 you must take AC480
 # means there may be prerequisites for this course. Please view the course guide for more information.

A: AN456 can only be taken under Paper 3 if it was not taken under Paper 1.

B: AN457 can only be taken under Paper 3 if it was not taken under Paper 1.

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Anthropology and Development Management

Programme Code: TMANDVMG

Department: Anthropology

For students starting this programme of study in 2020/21 Full-year programme. Students must take two compulsory courses, a dissertation and optional courses to the value of one unit. Written papers will be taken in the summer term and the dissertation must be submitted in September. Attendance at seminars and at non-assessed tutorials is compulsory.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Year 1	
Paper 1	AN436 The Anthropology of Development (0.5) and either AN456 Anthropology of Economy (1): Production and Exchange (0.5) or AN457 Anthropology of Economy (2): Transformation and Globalisation (0.5)
Paper 2	DV431 Development Management (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following: AN402 The Anthropology of Religion (1.0) AN404 Anthropology: Theory and Ethnography (1.0) AN405 The Anthropology of Kinship, Sex and Gender (1.0) AN419 The Anthropology of Christianity (0.5) AN420 The Anthropology of Southeast Asia (0.5) (not available 2020/21) AN424 The Anthropology of Melanesia (0.5) (not available 2020/21) AN444 Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) # (not available 2020/21) AN447 China in Comparative Perspective (1.0) AN451 Anthropology of Politics (0.5) AN456 Anthropology of Economy (1): Production and Exchange (0.5) A AN457 Anthropology of Economy (2): Transformation and Globalisation (0.5) B AN458 Children and Youth in Contemporary Ethnography (0.5) (not available 2020/21) AN461 Anthropological Approaches to Questions of Being (0.5) (not available 2020/21) AN463 Borders and Boundaries: Ethnographic Approaches (0.5) AN467 The Anthropology of South Asia (0.5) # (not available 2020/21) AN469 The Anthropology of Amazonia (0.5) (not available 2020/21)

Paper 4

	available 2020/21)
AN473	Anthropological Approaches to Value (0.5) (not available 2020/21)
AN474	Subjectivity and Anthropology (0.5) # (withdrawn 2020/21)
AN475	The Anthropology of Revolution (0.5) (not available 2020/21)
AN476	Anthropology and the Anthropocene (0.5) (not available 2020/21)
AN477	Topics in the Anthropology of sub-Saharan Africa (0.5) #
AN478	Anthropology and Global History (0.5) (not available 2020/21)
AN479	Anthropology of Law (0.5)
AN480	Public Anthropology (0.5) (not available 2020/21)
AN481	Health and Welfare: Anthropological Perspectives (0.5) (not available 2020/21)
DV407	Poverty (0.5)
DV413	Environmental Problems and Development Interventions (0.5) #
DV415	Global Environmental Governance (0.5)
DV418	African Development (0.5)
DV420	Complex Emergencies (0.5)
DV428	Managing Humanitarianism (0.5)
DV464	Democracy and Development (0.5) (not available 2020/21)
DV480	Revolution and Development (0.5) #
DV490	Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (0.5)
DV491	Economic Development Policy II: Microeconomic Analysis (0.5) #
DV492	Economic Development Policy III: Government Policy Analysis (0.5) #
GY467	Global Migration and Development (0.5) (withdrawn 2020/21)
	Any other courses offered by Anthropology or International Development, as approved.
Paper 4	AN499 Dissertation (1.0)
Footnotes	A: AN456 can only be taken under Paper 3 if it was not taken under Paper 1. B: AN457 can only be taken under Paper 3 if it was not taken under Paper 1. # means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Applicable Mathematics

Programme Code: TMAPMA

Department: Mathematics

For students starting this programme of study in 2020/21

Full year programme. Students must take courses to the value of four full units.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	Courses to the value of 0.5 unit(s) from the following: MA407 Algorithms and Computation (0.5) # MA421 Advanced Algorithms (0.5) #
Papers 2, 3 & 4	Courses to the value of 1.5 unit(s) from the following: MA402 Game Theory I (0.5) # A MA408 Discrete Mathematics and Graph Theory (0.5) # (not available 2020/21) MA409 Continuous Time Optimisation (0.5) # MA410 Information, Communication and

	Cryptography (0.5) #
MA411	Probability and Measure (0.5) #
MA412	Functional Analysis and its Applications (0.5) # (not available 2020/21)
MA413	Games of Incomplete Information (0.5) # (not available 2020/21)
MA414	Stochastic Analysis (0.5) # (not available 2020/21)
MA418	Preferences, Optimal Portfolio Choice, and Equilibrium (0.5) # (not available 2020/21)
MA420	Quantifying Risk and Modelling Alternative Markets (0.5) #
MA421	Advanced Algorithms (0.5) #
MA427	Mathematical Optimisation (0.5) #
MA428	Combinatorial Optimisation (0.5) #
MA429	Algorithmic Techniques for Data Mining (0.5) #
MA430	Efficient Algorithms For Hard Optimisation Problems (0.5) # (withdrawn 2020/21)
MA431	Advanced Topics in Operations Research and Applicable Mathematics (0.5) # (not available 2020/21)
MA433	Mathematics of Networks (0.5) # B
MA434	Algorithmic Game Theory (0.5) #
Papers 5 & 6	Courses to the value of 1.0 unit(s) from the following: EC484 Econometric Analysis (1.0) # EC487 Advanced Microeconomics (1.0) # FM402 Financial Risk Analysis (0.5) # FM429 Asset Markets A (0.5) # FM430 Corporate Finance and Asset Markets (1.0) # FM441 Derivatives (0.5) # FM442 Quantitative Methods for Finance and Risk Analysis (0.5) # C GV4A3 Social Choice Theory and Democracy (0.5) # (withdrawn 2020/21) MG409 Auctions and Game Theory (0.5) # ST409 Stochastic Processes (0.5) # ST418 Non-Linear Dynamics and the Analysis of Real Time Series (0.5) # (not available 2020/21) ST422 Time Series (0.5) # Any other paper with the approval of the Programme Director and the teacher responsible for the course, excluding MA415, MA416, MA417 and MA424.
	Papers 2, 3 & 4 options list
Paper 7	MA498 Dissertation in Mathematics (1.0)
	Papers 2, 3 & 4 options list
	MA402 Game Theory I (0.5) #
	MA408 Discrete Mathematics and Graph Theory (0.5) # (not available 2020/21)
	MA409 Continuous Time Optimisation (0.5) #
	MA410 Information, Communication and Cryptography (0.5) #
	MA411 Probability and Measure (0.5) #
	MA412 Functional Analysis and its Applications (0.5) # (not available 2020/21)
	MA413 Games of Incomplete Information (0.5) # (not available 2020/21)
	MA414 Stochastic Analysis (0.5) # (not available 2020/21)
	MA418 Preferences, Optimal Portfolio Choice, and Equilibrium (0.5) # (not available 2020/21)
	MA419 Search Games (0.5) (withdrawn 2019/20)
	MA420 Quantifying Risk and Modelling Alternative Markets (0.5) #

MA421	Advanced Algorithms (0.5) #
MA427	Mathematical Optimisation (0.5) #
MA428	Combinatorial Optimisation (0.5) #
MA429	Algorithmic Techniques for Data Mining (0.5) #
MA430	Efficient Algorithms For Hard Optimisation Problems (0.5) # (withdrawn 2020/21)
MA431	Advanced Topics in Operations Research and Applicable Mathematics (0.5) # (not available 2020/21)
MA433	Mathematics of Networks (0.5) #
MA434	Algorithmic Game Theory (0.5) #

Footnotes

A: This option will not be available to those who have already studied MA300 and MA301, or who have studied this subject as part of an undergraduate degree.

B: This option will not be available to those who have already studied MA320.

C: Students taking this course can apply for a place on FM457 Applied Computational Finance, a non-assessed computer course.

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Applied Social Data Science

Programme Code: TMASDS

Department: Methodology

For students starting this programme of study in 2020/21

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	MY470 Computer Programming (0.5) Exceptionally, students who can demonstrate sufficient prior training in or professional experience with computer programming commensurate with that covered in MY470 can substitute a 0.5-unit course from Paper 3 for MY470. This would be subject to the approval of the MSc Programme Director. And courses to the value of 0.5 units from the following:
Paper 2	MY472 Data for Data Scientists (0.5)
	ST445 Managing and Visualising Data (0.5)
	MY400 Fundamentals of Social Science Research Design (0.5)
Paper 3	And courses to the value of 0.5 units from the following:
	MY452 Applied Regression Analysis (0.5) #
	MY474 Applied Machine Learning for Social Science (0.5) #
	ST443 Machine Learning and Data Mining (0.5) #
	Courses to the value of 0.5 units from the following:
	MY405 Research Design for Policy and Programme Evaluation (0.5)
	MY456 Survey Methodology (0.5) #
Paper 4	MY457 Causal Inference for Observational and Experimental Studies (0.5) #
	MY459 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #
	MY461 Social Network Analysis (0.5)
	ST446 Distributed Computing for Big Data (0.5) #
	ST449 Artificial Intelligence and Deep Learning (0.5)

ST451 Bayesian Machine Learning (0.5) #

Or

Courses to the value of 0.5 unit(s) from the following:

Methodology Options List

Paper 4 Choice of any other 0.5 unit LSE course (including MY) with approval of the Academic Mentor.

Paper 5 MY498 Capstone Project (1.0)

Methodology Options List

MY405	Research Design for Policy and Programme Evaluation (0.5)
MY421	Qualitative Research Methods (0.5)
MY426	Doing Ethnography (0.5) # (not available 2020/21)
MY427	Qualitative Research with Digital and Visual Data (0.5) # (not available 2020/21)
MY428	Qualitative Text and Discourse Analysis (0.5) #
MY451	Introduction to Quantitative Analysis (0.5)
MY452	Applied Regression Analysis (0.5) #
MY455	Multivariate Analysis and Measurement (0.5) #
MY456	Survey Methodology (0.5) #
MY457	Causal Inference for Observational and Experimental Studies (0.5) #
MY459	Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #
MY461	Social Network Analysis (0.5)
MY472	Data for Data Scientists (0.5)
# means there may be prerequisites for this course. Please view the course guide for more information.	

MSc in Behavioural Science

Programme Code: TMBS

Department: Psychological and Behavioural Science

For students starting this programme of study in 2020/21

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	PB405 Foundations in Behavioural Science (1.0)
Paper 2	PB413 Experimental Design and Methods for Behavioural Science (0.5) and PB4A7 Quantitative Applications for Behavioural Science (0.5)
Paper 3	Courses to the value of 0.5 unit(s) from the following: (The below courses cannot be selected if the course with the equivalent title has already been selected from paper 5) PB421 Happiness (0.5) 1 PB434 Behavioural Science in an Age of New Technology (0.5) 2 PB452 Behavioural Science for Health in the Time of a Pandemic (0.5) # 3 PB453 Corporate Behaviour and Decision Making (0.5) 4 (not available 2020/21)
Paper 4	Students select a further 0.5 units from paper 3 (if the equivalent title has not been selected for their dissertation under paper 5), or from the list below: MY457 Causal Inference for Observational and Experimental Studies (0.5) # PB416 Cognition and Culture (0.5) (not available 2020/21) PB417 Consumer Psychology (0.5)

PB418	Corporate Communications (0.5)
PB419	Creativity and Innovation (0.5) # (not available 2020/21)
PB422	Health Communication (0.5)
PB424	Organisational Life (0.5) (not available 2020/21)
PB425	Organisations, Groups and Identity (0.5) #
PB426	Knowledge Processes in Organisations (0.5) (not available 2020/21)
PB427	Organisational and Social Decision Making (0.5) (not available 2020/21)
PB428	Political Psychology: Inequality & Intergroup Relations (0.5)
PB429	Science Communication and Controversies (0.5) (not available 2020/21)
PB430	Social Influence (0.5) # (not available 2020/21)
PB431	Social Psychology of Economic Life: Advanced Topics (0.5)
PB432	Social Representations: Social Knowledge and Contemporary Issues (0.5)
PB433	Theory and Practice of Organisational Development (0.5)
PB458	Dialogue: Conflict & Negotiation (0.5)

A course from another department (subject to the approval of the Candidate's Programme Director)

Paper 3 options list

Paper 5

Courses assessed by a 10,000 word dissertation: (Courses cannot be selected from this list if the course with the equivalent title has already been selected from paper 3)

PB4D2	Happiness - Dissertation (1.0) 5
PB4D3	Behavioural Science in an Age of New Technology - Dissertation (1.0) 6
PB4D4	Behavioural Science for Health in the Time of a Pandemic - Dissertation (1.0) 7
PB4D5	Corporate Behaviour and Decision Making - Dissertation (1.0) 8 (not available 2020/21)

Students can select a topic outside of the semi-compulsory list at the discretion of the director under extraordinary circumstances.

Paper 3 options list

PB421	Happiness (0.5)
PB434	Behavioural Science in an Age of New Technology (0.5)
PB452	Behavioural Science for Health in the Time of a Pandemic (0.5) #
PB453	Corporate Behaviour and Decision Making (0.5) (not available 2020/21)

Prerequisite Requirements and Mutually Exclusive Options

- 1: PB421 can not be taken with PB4D2
 - 2: PB434 can not be taken with PB4D3
 - 3: PB452 can not be taken with PB4D4
 - 4: PB453 can not be taken with PB4D5
 - 5: PB4D2 can not be taken with PB421
 - 6: PB4D3 can not be taken with PB434
 - 7: PB4D4 can not be taken with PB452
 - 8: PB4D5 can not be taken with PB453
- # means there may be prerequisites for this course. Please view the course guide for more information.

MSc in China in Comparative Perspective

Programme Code: TMCHCP

Department: Anthropology

For students starting this programme of study in 2020/21

Full-year programme. Students must take one compulsory course, select optional courses to the value of two units, and write a dissertation, as shown below. Attendance at seminars and at non-assessed tutorials is compulsory.

Students intending to use this degree to convert to a discipline in which they hope to qualify to do a research degree, should choose their options in consultation with the Programme Director to ensure eligibility for the research programme in question.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Paper 1	AN447	China in Comparative Perspective (1.0)
Papers 2 & 3	Courses to the value of 2.0 unit(s) from the following:	
	AN402	The Anthropology of Religion (1.0)
	AN404	Anthropology: Theory and Ethnography (1.0)
	AN405	The Anthropology of Kinship, Sex and Gender (1.0)
	AN436	The Anthropology of Development (0.5)
	AN451	Anthropology of Politics (0.5)
	AN456	Anthropology of Economy (1): Production and Exchange (0.5)
	AN457	Anthropology of Economy (2): Transformation and Globalisation (0.5)
	AN473	Anthropological Approaches to Value (0.5) (not available 2020/21)
	AN478	Anthropology and Global History (0.5) (not available 2020/21)
	AN479	Anthropology of Law (0.5)
	AN480	Public Anthropology (0.5) (not available 2020/21)
	AN481	Health and Welfare: Anthropological Perspectives (0.5) (not available 2020/21)
	Other Anthropology courses (to the value of 1.0 unit) may be taken, subject to the approval of the Programme Director.	
	DV411	Population and Development: an Analytical Approach (0.5) (not available 2020/21)
	DV413	Environmental Problems and Development Interventions (0.5) #
	DV415	Global Environmental Governance (0.5)
	DV432	China in Developmental Perspective (0.5) #
	DV444	Global Health Challenges: Epidemics, Disease, and Public Health Response (0.5) #
	DV463	Civil society, security and development (0.5) (not available 2020/21)
	EH446	Economic Development of East and Southeast Asia (1.0) #
	EH482	The Origins of the World Economy: Europe and Asia, 1000-1800 (1.0)
	EU443	European Models of Capitalism (0.5)
	GV427	Democracy in East and South Asia (0.5) (withdrawn 2020/21)
	GV432	Government and Politics in China (0.5) (not available 2020/21)
	GV467	Introduction to Comparative Politics (0.5)
	GV4H1	Chinese Political Thought (0.5)
	GY438	Cities and Social Change in East Asia (0.5) #
	GY480	Remaking China: Geographical aspects of Development and Disparity (0.5) (not

	available 2020/21)
HY461	East Asia in the Age of Imperialism, 1839-1945 (1.0) # A
HY472	China and the External World, 1711-1839 (1.0)
SP418	Global Social Policy and International Organizations (0.5) (not available 2020/21)
	Courses to the value of one full-unit from MSc International Relations (Papers 2 & 3), subject to availability and the approval of the relevant course convenor. The following courses would be particularly appropriate:
IR411	Foreign Policy Analysis III (1.0) #
IR445	China and the World (1.0) (not available 2020/21)
IR462	International Political Theory (0.5) (not available 2020/21)
IR464	The Politics of International Law (0.5) (not available 2020/21)
Paper 4	AN498 Dissertation- MSc China in Comparative Perspective (1.0)
Footnotes	A: Places on HY461 are subject to space. # means there may be prerequisites for this course. Please view the course guide for more information.

MSc in City Design and Social Science

Programme Code: TMCIDSS

Department: Sociology

For students starting this programme of study in 2020/21
Full-year programme which can also be taken part-time over three years. Students must take the City Design: Research Studio course, two compulsory half-unit courses, an independent project, and one unit of optional courses.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	SO448 City Design: Research Studio (1.0)
Papers 2 & 3	Courses to the value of 1.0 unit(s) from the following: SO451 Cities by Design (0.5) SO465 City-Making: the Politics of Urban Form (0.5) SO477 Urban Social Theory (0.5)
Paper 4	Courses to the value of 1.0 unit(s) from the following: GY409 Globalization and Regional Development (0.5) GY431 Cities, People and Poverty in the South (0.5) # GY438 Cities and Social Change in East Asia (0.5) # GY439 Cities, Politics and Citizenship (0.5) GY441 The Politics of Housing (0.5) GY448 Urban Planning: Society, Market and Sustainability (0.5) GY455 Economic Appraisal and Valuation (0.5) GY479 Urban Transformations (0.5) SO451 Cities by Design (0.5) SO465 City-Making: the Politics of Urban Form (0.5) SO473 Crime, Control and the City (0.5) (not available 2020/21) SO475 Material Culture and Design (0.5) SO477 Urban Social Theory (0.5) SO480 Urban Inequalities (0.5) SO492 Qualitative Social Research Methods

	(0.5)
SP435	Housing, Neighbourhoods and Communities (0.5) # (not available 2020/21)
SP437	International Housing and Human Settlements; Conflicts and Communities (0.5) (not available 2020/21)
	Any other course in the Department of Sociology, or other departments (special permission only), by agreement with the course tutor.
Paper 5	SO449 Independent Project (1.0) # means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Comparative Politics

Programme Code: TMCP

Department: Government

For students starting this programme of study in 2020/21
Full-year programme. Students must take papers to the value of four full units as shown. All students are required to write a 10,000-word dissertation. Note that some of the courses must be taken together. Part-time students may take up to four courses in their first year. Students can either opt for No Specialism or choose one of the following streams: Democracy and Democratization, Nationalism and Ethnic Politics, Comparative Political Economy, Popular Politics, or Politics of the Developing World.
The core elements for all specialisms on this programme are: GV467 and GV499.

Students on a particular specialism will have automatic right of entry to the courses listed under the specialism. Other students will have access subject to availability.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Democracy and Democratization

Paper	Course number, title (unit value)
Paper 1	GV467 Introduction to Comparative Politics (0.5)
Paper 2	GV499 Dissertation (1.0)
Paper 3	GV4E1 Comparative Democratization in a Global Age (0.5)
Paper 4	Courses to the value of 0.5 unit(s) from the following: GV427 Democracy in East and South Asia (0.5) (withdrawn 2020/21) GV442 Globalisation and Democracy (0.5) (withdrawn 2020/21) GV444 Democracy and Development in Latin America (0.5) GV4C9 Globalization and Democratization in Southeast Asia (0.5) GV4E2 Capitalism and Democracy (0.5) GV4H2 Contemporary India: The World's Largest Democracy in the Early 21st Century (0.5) (not available 2020/21) GV4J4 Citizen Representation and Democracy in the European Union (0.5) (not available 2020/21)
Paper 5	Courses to the value of 1.5 unit(s) from the following: Approved paper options list Paper 4 options list (Democracy and Democratization) Nationalism and Ethnic Politics
Paper	Course number, title (unit value)
Paper 1	GV467 Introduction to Comparative Politics (0.5)
Paper 2	GV499 Dissertation (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following:

	EU457	Culture and Security in Global Politics (0.5)		GV432	Government and Politics in China (0.5) (not available 2020/21)
	GV439	Government and Politics in Central and Eastern Europe (0.5)		GV443	The State and Political Institutions in Latin America (0.5) (withdrawn 2020/21)
	GV465	War, Peace and the Politics of National Self-Determination (0.5) (not available 2020/21)		GV444	Democracy and Development in Latin America (0.5)
	GV4B9	The Second Europe (0.5)		GV4F2	Popular Politics in the Middle East (0.5)
	GV4J8	Middle East Politics in Transnational Perspective (0.5)		GV4F9	The Challenges of Governance and Conflict in sub-Saharan Africa (0.5)
	GV4J9	Populism (0.5) #		GV4H2	Contemporary India: The World's Largest Democracy in the Early 21st Century (0.5) (not available 2020/21)
Paper 4	Courses to the value of 1.5 unit(s) from the following:		Paper 4	Courses to the value of 1.5 unit(s) from the following:	
	Approved paper options list			Approved paper options list	
	Paper 3 options list (Nationalism and Ethnic Politics)			Paper 3 options list (Politics of the Developing World)	
	Comparative Political Economy			No specialism

SO4B4	The New Reproductive Sociology (0.5) (not available 2020/21)
SO4B6	Nature and Technology: More than Human Sociology (0.5) (not available 2020/21)

Or any other MSc level course offered in the School, subject to the consent of the candidate's teachers.

Paper 4 SO493 mSc in Culture and Society Dissertation (1.0)

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Data Science

Programme Code: TMDS

Department: Statistics

For students starting this programme of study in 2020/21

Full-year programme. Students must take four compulsory courses, options to the value of one unit and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	MY470 Computer Programming (0.5)
	Or
	Students who can demonstrate equivalent prior knowledge of MY470, via transcripts of prior qualifications, may instead take a further 0.5 unit course from Paper 5:
	Paper 5 options list
Paper 2	ST445 Managing and Visualising Data (0.5)
Paper 3	ST447 Data Analysis and Statistical Methods (0.5) #
Paper 4	ST443 Machine Learning and Data Mining (0.5) #
Paper 5	Courses to the value of 1.0 unit(s), including at least 0.5 unit(s) of ST courses from the following:
	MA407 Algorithms and Computation (0.5) #
	MA424 Modelling in Operations Research (0.5) #
	MY459 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #
	MY461 1 Social Network Analysis (0.5)
	ST449 Artificial Intelligence and Deep Learning (0.5)
	ST451 Bayesian Machine Learning (0.5) #

	ST405	Multivariate Methods (0.5) #
	ST411	Generalised Linear Modelling and Survival Analysis (0.5) #
	ST422	Time Series (0.5) #
	ST429	Statistical Methods for Risk Management (0.5) #
	ST436	Financial Statistics (0.5) #
	ST444	Computational Data Science (0.5) #
	ST446	Distributed Computing for Big Data (0.5) #
Paper 6	ST498	Capstone Project (1.0)
	Paper 5 options list	
	MA407	Algorithms and Computation (0.5) #
	MA424	Modelling in Operations Research (0.5) #
	MY459	Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #
	MY461	Social Network Analysis (0.5)
	ST405	Multivariate Methods (0.5) #
	ST411	Generalised Linear Modelling and Survival Analysis (0.5) #
	ST422	Time Series (0.5) #
	ST429	Statistical Methods for Risk Management (0.5) #
	ST436	Financial Statistics (0.5) #
	ST444	Computational Data Science (0.5) #
	ST449	Artificial Intelligence and Deep Learning (0.5)
	ST451	Bayesian Machine Learning (0.5) #
	# means there may be prerequisites for this course. Please view the course guide for more information.	

MSc in Development Management

Programme Code: TMDVMN

Department: International Development

For students starting this programme of study in 2020/21

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown.

Students who choose to concentrate their electives and dissertation in a certain topic area may elect to have a specialism in "African Development", "Population Studies" or "Applied Development Economics" attached to their degree certificate and transcript. To obtain the specialism indication, students must meet the criteria below.

African Development: students must take DV418 and DV435, and their dissertation topic must be approved as being appropriate for this specialism.

Population Studies: students must take DV444 and DV456, and their dissertation topic must be approved as being appropriate for this specialism.

Applied Development Economics: enrolment capacity is limited and may be based on performance on a pre-quiz which will enable students to take at least two of DV490, DV491, DV492, and their dissertation topic must be approved as being appropriate for this specialism.

If no such election is made, the degree certificate will state "Development Management" without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	DV431 Development Management (1.0)
Papers 2 & 3	Courses to the value of 2.0 unit(s) from the following:
	AC470 Accounting in the Global Economy (0.5) #
	DV407 Poverty (0.5)
	DV411 Population and Development: an Analytical Approach (0.5) (not available

	2020/21)
DV413	Environmental Problems and Development Interventions (0.5) #
DV415	Global Environmental Governance (0.5)
DV418	African Development (0.5)
DV420	Complex Emergencies (0.5)
DV421	Critical Perspectives on Global Health and Development (0.5)
DV423	Global Political Economy of Development (0.5) #
DV424	International Institutions and Late Development (0.5)
DV428	Managing Humanitarianism (0.5)
DV432	China in Developmental Perspective (0.5) #
DV433	The Informal Economy and Development (0.5)
DV434	Human Security (0.5) (not available 2020/21)
DV435	African Political Economy (0.5)
DV444	Global Health Challenges: Epidemics, Disease, and Public Health Response (0.5) #
DV454	Gender, labour markets and social change in the Global South: theory, evidence, public action (0.5)

MSc in Development Studies

Programme Code: TMDV

Department: International Development

For students starting this programme of study in 2020/21

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown.

Students who choose to concentrate their electives and dissertation in a certain topic area may elect to have a specialism in "African Development", "Population Studies" or "Applied Development Economics" attached to their degree certificate and transcript. To obtain the specialism indication, students must meet the criteria below.

African Development: students must take DV418 and DV435, and

their dissertation topic must be approved as being appropriate for this specialism.

Population Studies: students must take DV444 and DV456, and their dissertation topic must be approved as being appropriate for this specialism.

Applied Development Economics: enrolment capacity is limited and may be based on performance on a pre-quiz which will enable students to take at least two of DV490, DV491, DV492, and their dissertation topic must be approved as being appropriate for this specialism.

If no such election is made, the degree certificate will state "Development Studies" without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	DV400 Development: History, Theory and Policy (1.0) #
Paper 2	DV410 Research Design and Dissertation in International Development (1.0)
	MY410 Fundamentals of Research Design for International Development (0.0)
	DV445 Cutting Edge Issues in Development Thinking & Practice (0.0)
Papers 3 & 4	Courses to the value of 2 unit(s) from the following:
	A
	AN451 Anthropology of Politics (0.5)
	AN456 Anthropology of Economy (1): Production and Exchange (0.5)
	AN457 Anthropology of Economy (2): Transformation and Globalisation (0.5)
	DV407 Poverty (0.5)
	DV411 Population and Development: an Analytical Approach (0.5) (not available 2020/21)

MSc in Econometrics and Mathematical Economics

Programme Code: TMEM

Department: Economics

For students starting this programme of study in 2020/21

Academic-year programme. Students must take courses to the value of four full units as shown. Students are also required to attend the introductory course EC451 Introductory Course for MSc EME.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Introductory course	EC451 Introductory Course for MSc EME (0.0)
Paper 1	EC484 Econometric Analysis (1.0) #
Paper 2	EC487 Advanced Microeconomics (1.0) #
Paper 3	EC417 Advanced Macroeconomics (1.0) #
Paper 4	MSc EME Option List - courses to the value of 1.0 unit from the following:
	EC421 International Economics (1.0) # (not available 2020/21)
	EC423 Labour Economics (1.0) #
	EC424 monetary Economics and Aggregate Fluctuations (1.0) #
	EC426 Public Economics (1.0) #
	EC427 The Economics of Industry (1.0) #
	EC428 Development and Growth (1.0) #
	EC453 Political Economy (1.0) #
	EC465 Economic Growth, Development, and Capitalism in Historical Perspective (1.0) #
	EC475 Quantitative Economics (1.0) #
	EC476 Contracts and Organisations (1.0) #
	EC485 Further Topics in Econometrics (1.0) #
	FM421 Applied Corporate Finance (0.5) #
	FM429 Asset Markets A (0.5) #
	FM430 Corporate Finance and Asset Markets (1.0) #
	FM431L Corporate Finance A (0.5) #
	FM431M Corporate Finance A (0.5) #

LL4CB	Modern Legal History: Private Law and the Economy 1750-1950 (0.5) (not available 2020/21)

Paper 2 options list

Papers 4 & 5

Dissertation which is assessed as:

EH496	Research Dissertation A: Contextualisation, Theory and Research Design (1.0)
EH497	Research Dissertation B: Implementation, Analysis and Contribution (1.0)

Paper 2 options list

EH422	Topics in Quantitative Economic History (1.0) # (withdrawn 2020/21)
EH430	Monetary and Financial History (1.0) #
EH446	Economic Development of East and Southeast Asia (1.0) #
EH454	Human Health in History (1.0)
EH476	The Economic History of War (1.0) # (not available 2020/21)
EH482	The Origins of the World Economy: Europe and Asia, 1000-1800 (1.0)
EH483	The Development and Integration of the World Economy in the 19th and 20th Centuries (1.0)

Prerequisite Requirements and Mutually

MSc in Economic History (Research)

Programme Code: TMEHRE

Department: Economic History

For students starting this programme of study in 2020/21

Full-year, five unit programme. Students must take two compulsory half-unit courses, optional courses to the value of two units and a dissertation (which counts as two units) as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	EH401 Historical Analysis of Economic Change (0.5)
	And one of the following:
	EH402 Quantitative Analysis in Economic History I (0.5) 1
	EH426 Quantitative Topics in Economic History I: Cross-section and panel data (0.5) # 2 (withdrawn 2020/21)
	EH426L Quantitative Analysis in Economic History II (0.5) # (not available 2020/21)
	EH426M Quantitative Analysis in Economic History II (0.5) #
	EH427 Topics in Quantitative Analysis in Economic History (0.5) # 3
Paper 2	Courses to the value of 1.0 unit(s) from the following:
	EH422 Topics in Quantitative Economic History (1.0) # 4 (withdrawn 2020/21)
	EH430 Monetary and Financial History (1.0) #
	EH446 Economic Development of East and Southeast Asia (1.0) #
	EH454 Human Health in History (1.0)
	EH476 The Economic History of War (1.0) # (not available 2020/21)
	EH482 The Origins of the World Economy:

Exclusive Options

- 1: EH402 can not be taken with EH426
 - 2: EH426 can not be taken with EH422, EH402
 - 3: EH427 can not be taken with EH422
 - 4: EH422 can not be taken with EH426, EH427
 - 5: EH426 can not be taken with EH402
- # means there may be prerequisites for this course.
Please view the course guide for more information.

MSc in Economics**Programme Code:** TMEC**Department:** Economics

For students starting this programme of study in 2020/21 Academic-year programme. Students must take three compulsory courses, one unit of optional courses and an extended essay linked to the optional course as shown. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Introductory course	EC400 Introductory Course in Mathematics and Statistics (0.0) #
Paper 1	EC413 macroeconomics (1.0) #
Paper 2	EC411 microeconomics (1.0) # or EC487 Advanced Microeconomics (1.0) # *
Paper 3	EC402 Econometrics (1.0) #
Paper 4	Courses to the value of 1.0 unit(s) from the following: EC421 International Economics (1.0) # (not available 2020/21) EC423 Labour Economics (1.0) # EC424 monetary Economics and Aggregate Fluctuations (1.0) # EC426 Public Economics (1.0) # EC427 The Economics of Industry (1.0) # EC428 Development and Growth (1.0) # EC453 Political Economy (1.0) # EC465 Economic Growth, Development, and Capitalism in Historical Perspective (1.0) # EC476 Contracts and Organisations (1.0) # Or FM429 Asset Markets A (0.5) # and either: A FM4T1 Forecasting Financial Time Series - Dissertation (0.5) (not available 2020/21) or FM4T5 Portfolio Management - Dissertation (0.5) or FM4U1 Fixed Income Markets - Dissertation (0.5) Or FM431M Corporate Finance A (0.5) # and FM4T2 Applied Corporate Finance - Dissertation (0.5)

Any other course in Economics approved by the candidate's teachers. Such approval will only be given in exceptional circumstances.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

A: For the purposes of degree classification the Finance half unit courses are combined and averaged to produce a final mark.

means there may be prerequisites for this course.

MSc in Economics (2 Year Programme)**Programme Code:** TMECT**Department:** Economics

For students starting this programme of study in 2020/21

Students without a strong background in economics are required to take the MSc programme over two years. The first year of the programme is governed by the 'Regulations for Diplomas'; students who successfully complete the examinations at the end of the first year will be awarded a Diploma in Economics. In order to progress to the second year, which is governed by the 'Regulations for Taught Master's Degrees', students must attain or exceed the progression threshold for each of the four courses they have taken. The progression threshold is 60% for courses EC201, EC210, EC220, and MA100, while the progression threshold is 55% in courses EC202, EC221, MA212 and other advanced MAXXX options. The Sub-Board of Examiners may, at its discretion, consider for progression candidates who fall marginally short of this requirement. However, students gaining the Diploma in a re-sit attempt are not eligible for progression onto the MSc, nor are students entitled to re-sit first year examinations already passed in order to achieve the progression standard.

In Year 2, students must take three compulsory courses, one unit of optional courses and an extended essay linked to the optional course as shown. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)

Paper 1	EC201 microeconomic Principles I (1.0) # or EC202 microeconomic Principles II (1.0) #
Paper 2	EC210 Macroeconomic Principles (1.0) #
Paper 3	MA100 Mathematical Methods (1.0) # or MA212 Further Mathematical Methods (1.0) #
Paper 4	EC220 Introduction to Econometrics (1.0) # or EC221 Principles of Econometrics (1.0) #

candidates may be allowed to substitute one other course for one of the papers listed above with the permission of the Programme Director.

Year 2

Introductory course	EC400	Introductory Course in Mathematics and Statistics (0.0) #
Paper 5	EC413	macroeconomics (1.0) #
Paper 6	EC411	microeconomics (1.0) # or

Paper 7	EC487	Advanced Microeconomics (1.0) # *
Paper 8	EC402	Econometrics (1.0) #
	Courses to the value of 1.0 unit(s) from the following:	
	EC421	International Economics (1.0) # (not available 2020/21)
	EC423	Labour Economics (1.0) #
	EC424	monetary Economics and Aggregate Fluctuations (1.0) #
	EC426	Public Economics (1.0) #
	EC427	The Economics of Industry (1.0) #
	EC428	Development and Growth (1.0) #
	EC453	Political Economy (1.0) #
	EC465	Economic Growth, Development, and Capitalism in Historical Perspective (1.0) #
	EC476	Contracts and Organisations (1.0) #
	FM431M	Corporate Finance A (0.5) # and FM4T2
	Applied Corporate Finance - Dissertation (0.5)	
	Any other course in Economics approved by the candidate's teachers.	
	Or	
	FM429	Asset Markets A (0.5) #
	and one of the following: A	
	FM4T1	Forecasting Financial Time Series - Dissertation (0.5) (not available 2020/21)
	FM4T5	Portfolio Management - Dissertation (0.5)
	FM4U1	Fixed Income Markets - Dissertation (0.5)
	Prerequisite Requirements and Mutually Exclusive Options	
	* means available with permission	
Footnotes	A: For the purposes of degree classification the Finance half unit courses are combined and averaged to produce a final mark.	
	# means there may be prerequisites for this course. Please view the course guide for more information.	

MSc in Economics (2 Year Programme)

Programme Code: TMECT

Department: Economics

For students starting this programme of study in 2019/20
Students without a strong background in economics are required to take the MSc programme over two years. The first year of the programme is governed by the 'Regulations for Diplomas'; students who successfully complete the examinations at the end of the first year will be awarded a Diploma in Economics. In order to progress to the second year, which is governed by the 'Regulations for Taught Master's Degrees', students must attain or exceed the progression threshold for each of the four courses they have taken. The progression threshold is 60% for courses EC201, EC210, EC220, and MA100, while the progression threshold is 55% in courses EC202, EC221, MA212 and other advanced MAXXX options. The Sub-Board of Examiners may, at its discretion, consider for progression candidates who fall marginally short of this requirement. However, students gaining the Diploma in a re-sit attempt are not eligible for progression onto the MSc, nor are students entitled to re-sit first year examinations already passed in order to achieve the progression standard.

In Year 2, students must take three compulsory courses, one unit of optional courses and an extended essay linked to the optional course as shown. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper **Course number, title (unit value)**

Year 1		
Paper 1	EC201	microeconomic Principles I (1.0) # or
	EC202	microeconomic Principles II (1.0) #
Paper 2	EC210	Macroeconomic Principles (1.0) #
Paper 3	MA100	Mathematical Methods (1.0) # or
	MA212	Further Mathematical Methods (1.0) #
Paper 4	EC220	Introduction to Econometrics (1.0) # or
	EC221	Principles of Econometrics (1.0) #
candidates may be allowed to substitute one other course for one of the papers listed above with the permission of the Programme Director.		
Year 2		
Introductory course	EC400	Introductory Course in Mathematics and Statistics (0.0) #
Paper 5	EC413	macroeconomics (1.0) #
Paper 6	EC411	microeconomics (1.0) # or
	EC487	Advanced Microeconomics (1.0) # *
Paper 7	EC402	Econometrics (1.0) #
Paper 8	Courses to the value of 1.0 unit(s) from the following:	
	EC421	International Economics (1.0) # (not available 2020/21)
	EC423	Labour Economics (1.0) #
	EC424	monetary Economics and Aggregate Fluctuations (1.0) #
	EC426	Public Economics (1.0) #
	EC427	The Economics of Industry (1.0) #
	EC428	Development and Growth (1.0) #
	EC453	Political Economy (1.0) #
	EC465	Economic Growth, Development, and Capitalism in Historical Perspective (1.0) #
	EC476	Contracts and Organisations (1.0) #
	FM431M	Corporate Finance A (0.5) # and FM4T2
		Applied Corporate Finance - Dissertation (0.5)
	Any other course in Economics approved by the candidate's teachers.	
	Or	
	FM429	Asset Markets A (0.5) #
	and one of the following: A	
	FM4T1	Forecasting Financial Time Series - Dissertation (0.5) (not available 2020/21)
	FM4T5	Portfolio Management - Dissertation (0.5)
	FM4U1	Fixed Income Markets - Dissertation (0.5)
	Prerequisite Requirements and Mutually Exclusive Options	
	* means available with permission	
Footnotes	A: For the purposes of degree classification the Finance half unit courses are combined and averaged to produce a final mark.	
	# means there may be prerequisites for this course. Please view the course guide for more information.	

MSc in Economics and Management

Programme Code: TMECMN

Department: Management

For students starting this programme of study in 2020/21
A ten-month programme. Students take three core courses, two half-unit options and a dissertation. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper **Course number, title (unit value)**
Introductory course EC400 Introductory Course in

		Mathematics and Statistics (0.0) #
Paper 1	MG411	Firms and Markets (1.0)
Paper 2	EC486	Econometric Methods (1.0)
Paper 3	FM431M	Corporate Finance A (0.5) #
Papers 4 & 5	Courses to the value of 1.0 unit(s) from the following:	
	AC490	Management Accounting, Decisions and Control (0.5) *
	FM421	Applied Corporate Finance (0.5) #
	FM445	Portfolio Management (0.5)

	MG4G4	Topics in Management Research (0.5)
	Or any other MSc-level elective course which is offered in the School, subject to approval of the Course Leader and the Programme Director.	
Paper 6	MG417	Extended Essay (0.5)
	Prerequisite Requirements and Mutually Exclusive Options	

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Economics and Philosophy

Programme Code: TMECPH

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2020/21 Full-year programme. Students take courses to the value of four units and a dissertation. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Introductory course	EC400 Introductory Course in Mathematics and Statistics (0.0) #

Papers 1 & 2	Courses to the value of 2.0 unit(s) from the following: EC402 Econometrics (1.0) # EC411 microeconomics (1.0) # EC413 macroeconomics (1.0) #

MSc in Finance and Economics

Programme Code: TMFIEC

Department: Finance

For students starting this programme of study in 2020/21 Academic-year (10 month) programme. Students must take three compulsory full-unit core courses and two optional half-unit courses. All students must submit a 6,000 word dissertation in one of the optional courses and take a two-hour examination in the other. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number	title (unit value)
Introductory Course	EC400	Introductory Course in Mathematics and Statistics (0.0) #
Paper 1	EC411	microeconomics (1.0) # or
	EC4B5	Macroeconomics for MSc F&E (0.5) # and EC4B6 Microeconomics for MSc F&E (0.5) # *A
With the approval of the Programme Director, students who have already completed the equivalent of EC411 in their prior studies may be permitted to take the following course instead:		

Paper 2	EC413	macroeconomics (1.0) #
	FM436	Financial Economics (1.0) #
Paper 3	FM437	Financial Econometrics (1.0) #
Paper 4	Courses to the value of 0.5 unit(s) from the following, to be assessed by examination:	
	FM404	Forecasting Financial time Series (0.5) # (not available 2020/21)
Paper 4	FM405	Fixed Income Securities and Credit Markets (0.5) # B
	FM406	Topics in Portfolio Management (0.5) #
Paper 4	FM408	Financial Engineering (0.5) #
	FM409E	Risk Management in Financial Markets (0.5) #
Paper 4	FM412	Quantitative Security Analysis (0.5) #
	FM421	Applied Corporate Finance (0.5) #
Paper 4	FM476	Entrepreneurial Finance (0.5) #
	FM477	International Finance for MSc Finance and Economics, MSc Finance and MSc Finance & Private Equity (0.5) #
Paper 4	And courses to the value of 0.5 unit(s) from the following, to be assessed by dissertation (please note that a course cannot be selected from this list of the course with the equivalent title has already been selected from List 1):	
	FM478	International Finance for MSc Finance and Economics, MSc Finance and MSc Finance & Private Equity - Dissertation (0.5) #
Paper 4	FM4T1	Forecasting Financial Time Series - Dissertation (0.5) (not available 2020/21)
	FM4T2	Applied Corporate Finance - Dissertation (0.5)
Paper 4	FM4T5	Portfolio Management - Dissertation (0.5)
	FM4T6	Topics in Portfolio Management - Dissertation (0.5)
Paper 4	FM4T8	Financial Engineering - Dissertation (0.5)
	FM4T9	International Finance - Dissertation (0.5) (not available 2020/21)
Paper 4	FM4U1	Fixed Income Markets - Dissertation (0.5)
	FM4U2	Quantitative Methods for Finance and Risk Analysis (Dissertation) (0.5)
Paper 4	FM4U4	Quantitative Security Analysis - Dissertation (0.5)
	FM4U5	Fixed Income Securities and Credit Markets - Dissertation (0.5)
Paper 4	FM4U9E	Risk Management in Financial Markets - Dissertation (0.5)
	Additional course The following course is not for credit and can be taken in addition to courses to the value of 1.0 unit selected from Paper 4:	
Paper 4	FM457	Applied Computational Finance (0.0) (not available 2020/21)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

A: Students may, with the approval of the Programme Director, Associate Programme Director and relevant Course Leaders, take half-units in Macroeconomics and Microeconomics, instead of the full unit EC411, Microeconomics. Students must meet the relevant pre-requisites for the Macroeconomics half unit.

B: Students must have completed either Asset Markets (FM423) and Corporate Finance (FM422), or Financial Economics (FM436)

means there may be prerequisites for this course. Please view the course guide for more information. The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/

Footnotes

Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

MSc in Finance and Economics (Work Placement Pathway)

Programme Code: TMFIECW

Department: Finance

For students starting this programme of study in 2020/21 Academic-year (10 month) programme. Students must take three compulsory full-unit core courses and two optional half-unit courses. All students must submit a 6,000 word dissertation in one of the optional courses and take a two-hour examination in the other. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Students who choose to transfer to the Work Placement Pathway must undertake a work placement and assessment in addition to the courses listed above. Transferring to the Work Placement Pathway extends the duration of the programme to 12 months. Students have the option to transfer to the Work Placement Pathway upon receipt of an offer to undertake an internship placement, which must be approved by the Department. Students on this pathway are required to undertake a full-time internship or work placement during the summer and to submit an essay of 2000 words following the placement (see FM411 for details). The essay will be assessed on a pass/fail basis and students must pass the essay to graduate from the programme.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Programme

Paper	Course number, title (unit value)
Introductory Course	EC400 Introductory Course in Mathematics and Statistics (0.0) #
Paper 1	EC411 microeconomics (1.0) # or EC4B5 Macroeconomics for MSc F&E (0.5) # and EC4B6 Microeconomics for MSc F&E (0.5) # *A
	With the approval of the Programme Director, students who have already completed the equivalent of EC411 in their prior studies may be permitted to take the following course instead:
Paper 2	EC413 microeconomics (1.0) #
Paper 3	FM436 Financial Economics (1.0) #
Paper 4	FM437 Financial Econometrics (1.0) #
	Courses to the value of 0.5 unit(s) from the following, to be assessed by examination:

	FM406	Topics in Portfolio Management (0.5) #
	FM407	Mergers, Buyouts and Corporate Restructurings (0.5) #
	FM408	Financial Engineering (0.5) #
	FM409E	Risk Management in Financial Markets (0.5) #
	FM414	Corporate Investment and Financial Policy (0.5) #
	FM477	International Finance for MSc Finance and Economics, MSc Finance and MSc Finance & Private Equity (0.5) #
	Other options:	
	FM412	Quantitative Security Analysis (0.5) #
	FM476	Entrepreneurial Finance (0.5) #
	List 2 - Courses assessed by Dissertation	
	Courses cannot be selected from this list if the course with the equivalent title has already been selected from List 1.	
	Dedicated list of options:	
	FM478	International Finance for MSc Finance and Economics, MSc Finance and MSc Finance & Private Equity - Dissertation (0.5) #
	FM4T4	Corporate Investment and Financial Policy - Dissertation (0.5)
	FM4T6	Topics in Portfolio Management - Dissertation (0.5)
	FM4T8	Financial Engineering - Dissertation (0.5)
	FM4U5	Fixed Income Securities and Credit

	Markets - Dissertation (0.5)
FM4U7	Mergers, Buyouts and Corporate Restructurings - Dissertation (0.5)
FM4U9E	Risk Management in Financial Markets - Dissertation (0.5)

In exceptional cases it may be possible to take an unlisted optional course with the approval of the Programme Director.

Other options:

FM4T9	International Finance - Dissertation (0.5) (not available 2020/21)
FM4U4	Quantitative Security Analysis - Dissertation (0.5)

Additional course	The following course is not for credit and can be taken in addition to courses to the value of 2.0 units selected from Papers 3 & 4:
FM457	Applied Computational Finance (0.0) (not available 2020/21)

Work Placement Pathway

Paper **Course number, title (unit value)**

Paper 5	FM411	Finance Work Placement and Assessment (0.0) # A
---------	-------	---

Footnotes	A: This element is not for credit, but is a requirement for students on the Work Placement Pathway and must be taken in addition to courses to the value of two full units selected from Papers 3 & 4. Successful completion of FM411 is a requirement for students to be eligible for the award of the degree.
	# means there may be prerequisites for this course. Please view the course guide for more information. The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

MSc in Financial Mathematics

Programme Code: TMFIMA

Department: Mathematics

For students starting this programme of study in 2020/21 Academic year programme (10 months). Students must take five compulsory half-unit courses and optional courses to the value of one-and-a-half units as shown.

There is also a two-week compulsory introductory course MA400 September Introductory Course relating to MA415 and MA417. Students must also take the non-assessed non-credit course MA432 Programming in C++.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Introductory course	MA400 September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (0.0)
Programming course	MA432 Programming in C++ (0.0) (withdrawn 2020/21)
Paper 1	MA415 The Mathematics of the Black and Scholes Theory (0.5) #
Paper 2	MA416 The Foundations of Interest Rate and

Paper 3	ST409	Credit Risk Theory (0.5) #
Paper 4	FM413	Stochastic Processes (0.5) #
Paper 5	MA417	Fixed Income Markets (0.5) #
		Computational Methods in Finance (0.5) #
Paper 6	One of the following:	
	MA402	Game Theory I (0.5) #
	MA411	Probability and Measure (0.5) #
	MA414	Stochastic Analysis (0.5) # (not available 2020/21)
	MA418	Preferences, Optimal Portfolio Choice, and Equilibrium (0.5) # (not available 2020/21)
	MA420	Quantifying Risk and Modelling Alternative Markets (0.5) #
	ST440	Recent Developments in Finance and Insurance (0.5) # (not available 2020/21)
Papers 7 & 8	Courses to the value of 1.0 unit(s) from the following:	
	FM402	Financial Risk Analysis (0.5) #
	FM404	Forecasting Financial time Series (0.5) # (not available 2020/21)
	FM429	Asset Markets A (0.5) #
	FM430	Corporate Finance and Asset Markets (1.0) #
	FM441	Derivatives (0.5) #
	FM442	Quantitative Methods for Finance and Risk Analysis (0.5) #
	FM445	Portfolio Management (0.5)
	FM472	International Finance (0.5) #
	ST422	Time Series (0.5) #
	ST426	Applied Stochastic Processes (0.5) (not available 2020/21)
	ST429	Statistical Methods for Risk Management (0.5) #
	ST448	Insurance Risk (0.5) # (not available 2020/21)
	Further half unit(s) from the MA4** level courses or any other appropriate MSc course, subject to the approval of the Programme Director and Teacher Responsible for the course.	

Paper 6 options list

Additional course	Students can also take the following non-assessed course taken in addition to the required five compulsory half-unit courses and optional courses to the value of one-and-a-half units detailed above:	
	MA422	Research Topics in Financial Mathematics (0.0) (not available 2020/21)
	Paper 6 options list	
	MA402	Game Theory I (0.5) #
	MA411	Probability and Measure (0.5) #
	MA414	Stochastic Analysis (0.5) # (not available 2020/21)
	MA418	Preferences, Optimal Portfolio Choice, and Equilibrium (0.5) # (not available 2020/21)
	MA420	Quantifying Risk and Modelling Alternative Markets (0.5) #
	ST440	Recent Developments in Finance and Insurance (0.5) # (not available 2020/21)
	# means there may be prerequisites for this course. Please view the course guide for more information. MSc in Gender, Development and Globalisation

Programme Code: TMGEDVGL

Department: Gender Studies

For students starting this programme of study in 2020/21

Full-year programme. Students must take the following courses to the value of four full units.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Paper 1	GI424	Gender Theories: An Interdisciplinary Approach (0.5)
Paper 2	GI407	Globalisation, Gender and Development (1.0)
Paper 3	Courses to the value of 1.5 unit(s) from the following: A	
	DV454	Gender, labour markets and social change in the Global South: theory, evidence, public action (0.5)
	DV457	Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (0.5)
	DV458	Key issues in Global Health and Development (0.5)
	DV462	Forced Migration and Refugees (0.5)
	GI402	Gender, Knowledge and Research Practice (0.5)
	GI410	Screening the Present: contemporary cinema and cultural critique (0.5) # (not available 2020/21)
	GI411	Gender, Post/coloniality and Development: Critical Perspectives and New Directions (0.5) #
	GI413	Gender, 'Race' and Militarisation (0.5)
	GI414	Theorising Gender and Social Policy (0.5)
	GI415	Gender and European Welfare States (0.5)
	GI417	Feminist Population Politics (0.5) (not available 2020/21)
	GI418	Feminist Economics and Policy: An Introduction (0.5) # (not available 2020/21)
	GI421	Sexuality, Gender and Culture (0.5) # 1
	GI422	Transnational Sexual Politics (1.0) 2
	GI423	Globalisation and Sexuality (0.5) # 3 (not available 2020/21)
	GI425	Introduction to Gender, Peace and Security (0.5)
	GI426	Gender and Human Rights (0.5) #
	GI428	Bodies, Culture and Politics (0.5)
	GV4D7	Dilemmas of Equality (0.5)
	GV4H3	Feminist Political Theory (0.5)
	GY421	Gender and Development: Geographical Perspectives (0.5) # (withdrawn 2020/21)
	GY431	Cities, People and Poverty in the South (0.5) #
	PB422	Health Communication (0.5)
	Or a course not listed approved by the Programme Director and subject to space and course teacher's consent.	
Paper 4	GI499	Dissertation - Independent Research

Project (1.0)

Prerequisite Requirements and Mutually Exclusive Options

- 1: GI421 can not be taken with GI422, GI423
 2: GI422 can not be taken with GI421, GI423
 3: GI423 can not be taken with GI421, GI422

Footnotes

A: Students can take courses to a maximum of one full unit from outside the Department of Gender Studies.

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Gender, Media and Culture**Programme Code:** TMGEMECU**Department:** Gender Studies

For students starting this programme of study in 2020/21

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown below.

Please note that places are limited on some optional courses.**Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.**

Paper	Course number, title (unit value)
Paper 1	MC408 Theories and Concepts in Media and Communications (0.5) and one other half-unit course offered by the Department of Gender Studies, Department of Media and Communications, Department of Methodology or by other departments with the permission of the programme director. Or MC418 Communication: Cultures and Approaches (0.5) and one other half-unit course offered by the Department of Gender Studies, Department of Media and Communications, Department of Methodology or by other departments with the permission of the programme director. Or MC438 Mediated Feminisms (0.5) and one other half-unit course offered by the Department of Gender Studies, Department of Media and Communications, Department of Methodology or by other departments with the permission of the programme director.
Paper 2	Courses to the value of 0.5 unit(s) from the following: GI402 Gender, Knowledge and Research Practice (0.5) MC4M1 methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (0.5) MC4M7 Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis) (0.5) A MY427 Qualitative Research with Digital and Visual Data (0.5) # (not available 2020/21) MY428 Qualitative Text and Discourse Analysis (0.5) #
Paper 3	GI424 Gender Theories: An Interdisciplinary Approach (0.5)
Paper 4	GI403 Gender and Media Representation (0.5)
Paper 5	One other half-unit course offered by the Department of Gender Studies.
Paper 6	GI499 Dissertation - Independent Research Project (1.0)
Footnotes	A: MY452 is an advanced Applied Regression

Analysis course offered by the Department of Methodology and must be taken by students who select MC4M7. Students wishing to select this option need to already have a grounding in quantitative methods and must seek approval from the Programme Director. Approval is also subject to timetabling constraints.

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Gender, Peace and Security**Programme Code:** TMGPS**Department:** Gender Studies

For students starting this programme of study in 2020/21

(Formerly MSc in Women, Peace and Security)

Full-year programme. Students must take four compulsory courses, options to the value of one unit and a dissertation as shown.

Please note that places are limited on some optional courses.**Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.**

Paper	Course number, title (unit value)
Year 1	
Paper 1	GI424 Gender Theories: An Interdisciplinary Approach (0.5)
Paper 2	GI425 Introduction to Gender, Peace and Security (0.5) Plus courses to the value of between 0.5 unit(s) (minimum) and 1.0 unit(s) (maximum) from the following: GI413 Gender, 'Race' and Militarisation (0.5) GI426 Gender and Human Rights (0.5) # GI427 Advanced Issues in Gender, Peace and Security (0.5) #
Paper 3	Courses to the value of 1.5 unit(s) from the following: A DV428 Managing Humanitarianism (0.5) DV434 Human Security (0.5) (not available 2020/21) DV457 Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (0.5) DV462 Forced Migration and Refugees (0.5) EU485 Post-Conflict Justice and Reconciliation in Europe and Beyond (0.5) EU4A2 Globalisation, Conflict and Post-Conflict Reconstruction (0.5) GI402 Gender, Knowledge and Research Practice (0.5) GI409 Gender, Globalisation and Development: An Introduction (0.5) GI411 Gender, Post/coloniality and Development: Critical Perspectives and New Directions (0.5) # GI415 Gender and European Welfare States (0.5) GI420 Globalisation, Gender and Development: Theorising Policy and Practice (0.5) GI422 Transnational Sexual Politics (1.0) GI423 Globalisation and Sexuality (0.5) # (not available 2020/21) GV465 War, Peace and the Politics of National Self-Determination (0.5) GV4B8 Civil Wars: Concepts and Cases (0.5) GV4F9 The Challenges of Governance and Conflict in sub-Saharan Africa (0.5) GV4H9 Armed Groups: Violence, Governance, and Mobilization (0.5) (withdrawn)

MSc in Global Economic History (Erasmus Mundus)

Programme Code: TMGLHY3

Department: Economic History

For students starting this programme of study in 2020/21

Full-year programme. Students must take compulsory courses to the value of 2.5 units, a dissertation and optional courses.

Students taking year one of the programme at LSE will need to complete EH479 (6,000 word dissertation) and take one unit of options; students taking year two at LSE will complete EH480 (10,000 word dissertation) and 0.5 units of options.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Paper 1	EH481	Economic Change in Global History: Approaches and Analysis (0.5)
Papers 2 & 3	Courses to the value of 2.0 unit(s) from the following:	
	EH482	The Origins of the World Economy: Europe and Asia, 1000-1800 (1.0)
	EH483	The Development and Integration of the World Economy in the 19th and 20th Centuries (1.0)
	HY423	Empire, Colonialism and Globalisation (1.0) #
Paper 4	Either EH479 and courses to the value of 1.0 unit from the Options List (if not already taken under Paper 2):	
	EH479	Dissertation in Global Economic History (0.5)
	Options List	
	Or	
	EH480 and courses to the value of 0.5 units from the Options List (if not already taken under Paper 2):	
	EH480	Research Dissertation in Global Economic History (1.0)
	Options list	
	EH402	Quantitative Analysis in Economic History I (0.5) 1
	EH404	India and the World Economy (0.5)
	EH408	International Migration, 1500-2000: from slavery to asylum (0.5) (withdrawn 2020/21)
	EH409	Chinese Economy in Transition: 1850-1950 (0.5) (not available 2020/21)
	EH413	African Economic Development in Historical Perspective (0.5)
	EH421	Economic History of Colonialism (0.5)
	EH422	Topics in Quantitative Economic History (1.0) # 2 (withdrawn 2020/21)
	EH423	Japan and Korea as Developing Economies (0.5) (not available 2020/21)
	EH426	Quantitative Topics in Economic History I: Cross-section and panel data (0.5) # 3 (withdrawn 2020/21)
	EH426L	Quantitative Analysis in Economic History II (0.5) # (not available 2020/21)
	EH426M	Quantitative Analysis in Economic History II (0.5) #
	EH427	Topics in Quantitative Analysis in Economic History (0.5) # 4
	EH428	History of Economics: Making Political Economy into a Social Science (0.5) (not available 2020/21)
	EH429	History of Economics: Ideas, Policy and Performativity (0.5)
	EH446	Economic Development of East and Southeast Asia (1.0) #

EH452	Latin American Development and Economic History (0.5)
EH454	Human Health in History (1.0)
EH457	Living Standards since the Industrial Revolution: The British experience c.1750-2000 (0.5)
EH463	The Long-Run Analysis of Firms and Industries (0.5)
EH464	The Historical Context of Business (0.5) (withdrawn 2020/21)
EH476	The Economic History of War (1.0) # (not available 2020/21)
EH482	The Origins of the World Economy: Europe and Asia, 1000-1800 (1.0)
EH483	The Development and Integration of the World Economy in the 19th and 20th Centuries (1.0)
EH486	Shipping and Sea Power in Asian Waters, c 1600-1860 (0.5) (not available 2020/21)

Prerequisite Requirements and Mutually Exclusive Options

- 1: EH402 can not be taken with EH426
 2: EH422 can not be taken with EH426, EH427
 3: EH426 can not be taken with EH422, EH402
 4: EH427 can not be taken with EH422
 # means there may be prerequisites for this course.
 Please view the course guide for more information.

MSc in Global Health Policy

Programme Code: TMGLHP

Department: Health Policy

For students starting this programme of study in 2020/21

(formerly MSc in Global Health)

Full year programme. Students take four compulsory half unit courses, one semi-compulsory half unit, options to the value of 1.0 unit, and a dissertation.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	HP401 Introduction to Health Policy and Politics (0.5)
Paper 2	HP404 Global Health Policy: Institutions, Actors and Politics (0.5)
Paper 3	HP400 Financing Health Care (0.5)
Paper 4	HP412 Global Health Security (0.5)
Paper 5	One of the following methods based courses: HP407 Evidence Review and Synthesis for Decision Making (0.5) HP422 Health Care Economic Evaluation (0.5) HP428 Randomised evaluations of health programmes: from design to implementation (0.5)
Paper 6	MY421 Qualitative Research Methods (0.5) Courses to the value of 1.0 unit(s) from the following: DV421 Critical Perspectives on Global Health and Development (0.5) DV444 Global Health Challenges: Epidemics, Disease, and Public Health Response (0.5) # DV456 Population, Health and Development: Evidence and Projections (0.5) # DV457 Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (0.5) DV461 Critical Population Health Issues in High

	and Middle-Income Countries (0.5) # (not available 2020/21)
HP402	measuring Health System Performance (0.5) (not available 2020/21)
HP403	Health Systems and Policies in Developing Countries (0.5) (not available 2020/21)
HP405	Social Determinants of Health (0.5) (not available 2020/21)
HP406	Principles of Modern Epidemiology (0.5) (not available 2020/21)
HP407	Evidence Review and Synthesis for Decision Making (0.5)
HP422	Health Care Economic Evaluation (0.5)
HP424	Pharmaceutical Economics and Policy (0.5)
HP425	Statistical Methods in Health Care Economic Evaluation (0.5) #
HP428	Randomised evaluations of health programmes: from design to implementation (0.5)
HP429	Behavioural Incentive Design in Health and Health Care (0.5)
HP432	mental health policy (0.5) # (not available 2020/21)
HP433	Health care regulation (0.5) (not available 2020/21)
MY405	Research Design for Policy and Programme Evaluation (0.5)
SP418	Global Social Policy and International Organizations (0.5) (not available 2020/21)

Or another LSE course subject to the approval of the course tutor.

Paper 7

HP431 Dissertation in Health Policy (0.5)
 # means there may be prerequisites for this course.
 Please view the course guide for more information.

MSc in Global Politics

Programme Code: TMGLP02

Department: Government

For students starting this programme of study in 2020/21

The MSc includes a core course, GV4K4 The Politics of Globalization (Paper 1) which all students must take. It draws on specialist knowledge from across the LSE's Politics staff to offer a comprehensive introduction to the changing structure of the global order, and the contemporary challenges of global politics. The rest of the MSc allows considerable choice of options whilst seeking to blend a global focus with more detailed thematic or regional knowledge. All students must write a 10,000 word dissertation.

PLEASE NOTE: Due to staff sabbaticals and research leave, the School cannot guarantee that all the courses listed below will be available.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	GV4K4 The Politics of Globalization (0.5)
Paper 2	GV499 Dissertation (1.0) A
Papers 3 & 4	Courses to the value of 2.5 units from the following. Access to the optional courses is not necessarily guaranteed and may require the permission of the course coordinator; please consult the individual course guides for further information on availability: DV413 Environmental Problems and Development Interventions (0.5) # DV415 Global Environmental Governance (0.5)

DV418	African Development (0.5)
DV420	Complex Emergencies (0.5)
DV421	Critical Perspectives on Global Health and Development (0.5)
DV424	International Institutions and Late Development (0.5)
DV428	Managing Humanitarianism (0.5)
DV434	Human Security (0.5) (not available 2020/21)
DV460	Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference (0.5) #
EH446	Economic Development of East and Southeast Asia (1.0) #
EH483	The Development and Integration of the World Economy in the 19th and 20th Centuries (1.0)
EU443	European Models of Capitalism (0.5)
EU457	Culture and Security in Global Politics (0.5)
EU481	The Future: Political Responses to a Challenge (0.5)

IR471	The Situations of the International Criminal Court (0.5) (not available 2020/21)
IR479	Russia in World Politics (0.5) # (not available 2020/21)
IR480	Globalisation and the State in Developing Countries (0.5)
IR481	Europe, the US and Arab-Israeli Relations (0.5) # (not available 2020/21)
LL4C2	World Poverty and Human Rights (0.5) #
MG476	Corporate Social Responsibility and International Labour Standards (0.5) #

Or a course not listed approved by the MSC Convenor.

Prerequisite Requirements and Mutually Exclusive Options

1: GI422 can not be taken with GI423

2: GI423 can not be taken with GI422

Footnotes

A: Students must pass this course in order to pass the degree.

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Health and International Development

Programme Code: TMHEINDE

Department: International Development

For students starting this programme of study in 2020/21

Full-year programme. Students must take courses to the value of three full units, non-credit-bearing courses DV445 and MY410 and a dissertation as shown.

Students who choose to concentrate their electives and dissertation in a certain topic area may elect to have a specialism in "African Development," "Population Studies," or "Applied Development Economics" attached to their degree certificate and transcript. To obtain the specialism indication, students must meet the criteria below.

African Development:

Students must take DV418 and DV435, and their dissertation topic must be approved as being appropriate for this specialism.

Population Studies: students must take DV444 and DV456, and their dissertation topic must be approved as being appropriate for this specialism.

Applied Development Economics: enrolment capacity is limited and may be based on performance on a pre-quiz which will enable students to take at least two of DV490, DV491, DV492, and their dissertation topic must be approved as being appropriate for this specialism.

If no such election is made, the degree certificate will state "Health and International Development" without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in International Development and Humanitarian Emergencies

Programme Code: TMINDEHE

Department: International Development

For students starting this programme of study in 2020/21

Full-year programme. Students take courses to the value of three full units and a dissertation as shown.

Students who choose to concentrate their electives and dissertation in a certain topic area may elect to have a specialism in "African Development," "Population Studies," or "Applied Development Economics" attached to their degree certificate and transcript. To obtain the specialism indication, students must meet the criteria below.

African Development: students must take DV418 and DV435, and their dissertation topic must be approved as being appropriate for this specialism.

Population Studies: students must take DV444 and DV456, and their dissertation topic must be approved as being appropriate for this specialism.

Applied Development Economics: enrolment capacity is limited and may be based on performance on a pre-quiz which will enable

students to take at least two of DV490, DV491, DV492, and their dissertation topic must be approved as being appropriate for this specialism.

If no such election is made, the degree certificate will state "International Development and Humanitarian Emergencies" without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	DV442 Key Issues in Development Studies (0.5)

LL4L7	Advanced Mediation and Negotiation (0.5) # (not available 2020/21)
	Other course from Law, Anthropology or a related discipline may be taken subject to the approval of the course teachers.
Paper 4	LL4E9 Dissertation: MSc Law, Anthropology and Society (1.0) (withdrawn 2020/21)
	# means there may be prerequisites for this course. Please view the course guide for more information. Candidates with a first degree in law must take at least one of Papers 2 & 3 in anthropology; candidates with a first degree in social science must take at least one of Papers 2 & 3 in law. Students in this programme will be closely advised by their supervisor in choosing the courses for Papers 2 & 3 so as to form a well-designed programme in view of their previous studies and their dissertation topic.
	Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm . Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm .

LLM (full-time)

Programme Code: TMLL2

Department: Law

For students starting this programme of study in 2020/21

The general regulations for MA and MSc Degrees and the Code of Practice for Taught Master's Programmes on the online Calendar apply to the LLM programme except in the event of inconsistency when these regulations for the LLM take priority.

In order to obtain the degree, students must complete courses (see Courses list below) to the value of four full units, which will normally comprise eight half unit courses. One of these eight half units will be the compulsory half unit Legal Research Skills course, which will be assessed by a 10,000 word dissertation. This stand-alone dissertation will provide the element of extended writing for all LLM students. Students will be required to sign a statement on plagiarism when submitting this dissertation.

Students can complete the LLM course requirements in either one full-year programme, or as a part-time student in two years, or by extended part-time study within a maximum of six years. Courses should be chosen from the list below. Subject to availability and with the permission of the Programme Director of the LLM, one complementary course from other Master's courses at the School may be selected to replace one from the list below to the total equivalent of one half unit. Exceptionally, and subject to the same conditions courses to the total value of one full unit may be selected to replace two courses from the list below.

Part-time students must satisfy the same requirements as those applicable to full-time students. Part-time students must take courses to the value of two units in their first year and courses to the value of two units in their second year.

Extended part-time students must satisfy the same requirements

as those applicable to full-time students. Students must take courses to the value of one unit in the first year and successfully complete this. Students who successfully complete four units within a period of six years will satisfy the requirements for the degree.

Students registered before 2013/14

The LLM programme regulations for students entering in or after 2013/14 differ from those in force in previous years. This reflects a move to half unit courses in 2013/14. Students registered before 2013/14 are covered by the regulations which were in operation at the time of their initial registration on the programme. For earlier editions of the regulations please refer to the page for previous academic sessions lse.ac.uk/resources/calendar/PreviousAcademicSessions.htm. This page contains links to reference copies of programme regulations for years 2009/10, 2010/11, 2011/12, 2012/13 and 2013/14. If continuing students have any queries on these matters they should consult their Academic Mentor.

Examination

Students will be examined in courses to the total value of four full units.

An oral examination may be held if the examiners so determine. For courses assessed by written examination (which will be the norm on the LLM apart from the Legal Research Skills course), the examination will normally be held in January, May or June. Questions may be set on recent legislation and current proposals for law reform within the scope of the syllabus. No materials may be brought into the examination room except in accordance with the regulations for the particular course.

Degree certificate

Students who successfully complete the LLM programme may elect to have one of the following titles attached to their degree certificate if, in the opinion of the Programme Director of the LLM, the title reflects the course of study followed by the student. This would mean you will need to be registered for either:

1. LLM courses to the value of at least 2 units (4 half unit courses) within the nominated specialism; or
2. LLM courses to the value of at least 1.5 units (3 half unit courses) within the nominated specialism plus an LL4F9 dissertation topic within the area of the specialism (as agreed by your dissertation supervisor).

The possible titles are listed below with the courses attached to those areas listed with them. If no such election is made, the LLM degree certificate will state 'LLM' without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	Compulsory course for all LLM students

 LL4Z1 Business Taxation (0.5) #
 LL4Z2 Principles of Taxation and Tax Disputes (0.5) # (not available 2020/21)
 LL4Z3 Taxation of Consumption and Income (0.5) (withdrawn 2020/21)

means there may be prerequisites for this course. Please view the course guide for more information. This programme, its constituent courses and lectures qualify as Continuing Professional Development (CPD) and are accredited by the Law Society and Bar Council. Further information is

available from the Department of Law.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

LLM (extended part-time)

Programme Code: TMLL2EPT

Department: Law

For students starting this programme of study in 2020/21

The general regulations for MA and MSc Degrees and the Code of Practice for Taught Master's Programmes on the online Calendar apply to the LLM programme except in the event of inconsistency when these regulations for the LLM take priority.

In order to obtain the degree, students must complete courses (see Courses list below) to the value of four full units, which will normally comprise eight half unit courses. One of these eight half units will be the compulsory half unit Legal Research Skills course, which will be assessed by a 10,000 word dissertation. This stand-alone dissertation will provide the element of extended writing for all LLM students. Students will be required to sign a statement on plagiarism when submitting this dissertation.

Students can complete the LLM course requirements in either one full-year programme, or as a part-time student in two years, or by extended part-time study within a maximum of six years. Courses should be chosen from the list below. Subject to availability and with the permission of the Programme Director of the LLM, one complementary course from other Master's courses at the School may be selected to replace one from the list below to the total equivalent of one half unit. Exceptionally, and subject to the same conditions courses to the total value of one full unit may be selected to replace two courses from the list below.

Part-time students must satisfy the same requirements as those applicable to full-time students. Part-time students must take courses to the value of two units in their first year and courses to the value of two units in their second year.

Extended part-time students must satisfy the same requirements as those applicable to full-time students. Students must take courses to the value of one unit in the first year and successfully complete this. Students who successfully complete four units within a period of six years will satisfy the requirements for the degree.

Students registered before 2013/14

The LLM programme regulations for students entering in or after 2013/14 differ from those in force in previous years. This reflects a move to half unit courses in 2013/14. Students registered before 2013/14 are covered by the regulations which were in operation at the time of their initial registration on the programme. For earlier editions of the regulations please refer to the page for previous academic sessions lse.ac.uk/resources/calendar/PreviousAcademicSessions.htm. This page contains links to reference copies of programme regulations for years 2009/10, 2010/11, 2011/12, 2012/13 and 2013/14. If continuing students have any queries on these matters they should consult their Academic Mentor.

Examination

Students will be examined in courses to the total value of four full units.

An oral examination may be held if the examiners so determine. For courses assessed by written examination (which will be the norm on the LLM apart from the Legal Research Skills course), the examination will normally be held in January, May or June.

Questions may be set on recent legislation and current proposals for law reform within the scope of the syllabus. No materials may be brought into the examination room except in accordance with the regulations for the particular course.

Degree certificate

Students who successfully complete the LLM programme may elect to have one of the following titles attached to their degree certificate if, in the opinion of the Programme Director of the LLM, the title reflects the course of study followed by the student. This would mean you will need to be registered for either:

1. LLM courses to the value of at least 2 units (4 half unit courses) within the nominated specialism; or
2. LLM courses to the value of at least 1.5 units (3 half unit courses) within the nominated specialism plus an LL4F9 dissertation topic within the area of the specialism (as agreed by your dissertation supervisor).

The possible titles are listed below with the courses attached to those areas listed with them. If no such election is made, the LLM degree certificate will state 'LLM' without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	Compulsory course for all LLM students
	LL4F9 Legal Research and Writing Skills (0.5)

Paper 4	

Global MSc in Management

Programme Code: TMGLMG2

Department: Management

For students starting this programme of study in 2020/21

A two-year programme. Students take courses to the value of eight

units but those units are not necessarily spread over the two years. The second year includes a dissertation. Students complete the course MG488 GMiM Capstone Course - Management in Action (H) over both years, Part A (unassessed) in Year 1 and Part B (assessed) in Year 2.

All students are required to attend MG4A1 Introduction to Studying for GMiM.

Students may choose to concentrate their electives in a certain topic area and may elect to have one of the elective titles attached to their degree certificate and transcript if the title reflects the course of study followed by the student. The possible titles are listed as headings within the Elective Courses below with the courses attached to those areas listed beneath them. If no such election is made, the degree certificate will state 'Management' without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Year 1	
Introductory course	MG4A1 Introduction to Studying for GMiM (0.0)
Paper 1	MG458 Foundations of Management I: Organisations and Management Theory (0.5) and MG459 Foundations of Management 2 (0.5)
Paper 2	MG431 managerial Economics (0.5)
	And either:
	MY451 Introduction to Quantitative Analysis (0.5) or
	MY451452 Applied Regression Analysis (0.5) #
	Or
	Upon satisfactorily demonstrating that they have a degree in economics and have passed, as part of that degree, a course in managerial economics, microeconomics or industrial organisation, students may be exempted from MG431 and will be free to take an elective course, subject to the approval of the Programme Director. Students must select either MY451 or MY452 and a further 0.5 unit from the Elective Courses listed below:
	MY451451 Introduction to Quantitative Analysis (0.5) or
	MY451452 Applied Regression Analysis (0.5) # and 0.5 units from the Elective Courses listed below:
	Elective Courses (click here to expand)
Paper 3	MG434 Organisational Behaviour (0.5) and MG4E2 marketing Management (0.5)
	Or
	Upon satisfactorily demonstrating that they have a degree in marketing, or in management of business administration with a significant concentration in marketing, students may be exempted from MG4E2 and will be free to take an elective course, subject to the approval of the Programme Director. Students must select MG434 and a further 0.5 units from the Elective Courses listed below:
	Courses to the value of 1.0 unit(s) from the following:
	MG434 Organisational Behaviour (0.5) and 0.5 units from the Elective Courses listed below:
	Elective Courses (click here to expand)
Paper 4	Courses to the value of 0.5 or 1.0 full unit from the Elective Courses listed below:
	Elective Courses (click here to expand)
Compulsory course	As part of Paper 4, students also take the compulsory unassessed part of MG488:
	MG488A GMiM Capstone Course - Management

	in Action (0.0)		Humanitarian Intervention and Digital Innovation (0.5)
Year 2			
Paper 5	Courses to the value of 1.0 unit(s) from the following: MG468 Foundations of Management III: Business Ethics, Corporate Governance and Leadership (0.5) # and MG488B GMiM Capstone Course - Management in Action (0.5) #	MG466 Supply Chain Management (0.5) # MG467 Strategy and Change in Public Sector Management (0.5) # (not available 2020/21)	
Paper 6	Courses to the value of 1.0 full units from the Elective Courses listed below. At least 0.5 units must be an approved methodology course. Elective Courses (click here to expand)	MG472 Global Strategy, Management and Information Systems (0.5) # MG473 Negotiation Analysis (0.5) MG477 Strategic Reward: Key Models and Practices (0.5) MG478 The Management of Human Resources in Global Companies (0.5) MG479 Information Systems for the Public Sector: Digital Government and Service Innovation (0.5)	
Paper 7	Courses to the value of 1.0 or 1.5 full units from the Elective Courses listed below depending on the courses taken under Paper 4. Elective Courses (click here to expand)	MG481 Innovating Organisational Information Technology (0.5) # MG482 Innovation and Technology Management (0.5) MG483 eHealth: Policy, Strategy and Systems (0.5) # MG484 Global Sourcing and Management of Business and IT Services (0.5) # (withdrawn 2020/21)	
Paper 8	MG470 Management Dissertation (1.0) # Elective Courses (click here to expand) Elective courses open to ALL GMiM students The following elective courses are available to all GMiM students subject to pre-requisites and course availability: AC411 Accounting, Strategy and Control (0.5) AC412 Accountability, Organisations and Risk Management (0.5) AC415 Management Accounting for Decision Making (0.5) AC416 Topics in Financial Reporting (0.5) # AC417 Corporate Financial Disclosure and Investor Relations (0.5) AC444 Valuation and Security Analysis (0.5) # AC470 Accounting in the Global Economy (0.5) # AC490 Management Accounting, Decisions and Control (0.5) AC491 Financial Accounting, Reporting and Disclosure (0.5) DV423 Global Political Economy of Development (0.5) # DV424 International Institutions and Late Development (0.5) FM472 International Finance (0.5) # FM473L Financial Markets (0.5) # ~1 FM473M Financial Markets (0.5) # ~2 M474L Managerial Finance (0.5) ~3 FM474M Managerial Finance (0.5) ~4 FM476 Entrepreneurial Finance (0.5) # GI407 Globalisation, Gender and Development (1.0) ~5 GI409 Gender, Globalisation and Development: An Introduction (0.5) GI420 Globalisation, Gender and Development: Theorising Policy and Practice (0.5) MA423 Fundamentals of Operations Research (0.5) # MA424 modelling in Operations Research (0.5) # MA427 Mathematical Optimisation (0.5) # MC408 Theories and Concepts in Media and Communications (0.5) MG401 Operations Management for Management Consultancy (0.5) # MG404 Consumer Insights: Behavioural Fundamentals (0.5) MG409 Auctions and Game Theory (0.5) # MG418 Open Innovation (0.5) MG421 International Business Strategy and Emerging Markets (0.5) # MG422 Thinking Strategically (0.5) # MG452 Behavioural Economics for Management (0.5) # (not available 2020/21) MG456 Strategic Decision Making (0.5) # MG460 Emergencies Management:	MG485 Management and Economics of E-Business (0.5) # (not available 2020/21) MG486 Social Computing, Data Analytics, and Information Services (0.5) MG487 Innovation and Information Systems: Concepts and Perspectives (0.5) MG492 Data Governance: Privacy, Openness and Transparency (0.5) MG4A3 Incentives and Governance in Organisations (0.5) # MG4A4 Empirical Research Strategy for Managerial Economics (0.5) (withdrawn 2020/21) MG4A8 Strategy for the Information Economy (0.5) # MG4B1 Corporate Strategy (0.5) # MG4B6 Design and Management of Organisations (0.5) MG4B7 Organisational Change (0.5) (not available 2020/21) MG4B9 The World Trading System (0.5) # MG4C3 Information Technology and Service Innovation (0.5) MG4D2 International Employment Relations (0.5) # MG4D3 The Dark Side of the Organisation (0.5) # MG4D5 Leadership in Organisations: Theory and Practice (0.5) MG4F2 marketing Analytics II: Analytics for Managing Innovations, Products and Brands (0.5) MG4F3 Digital Marketing (0.5) # (not available 2020/21) MG4G4 Topics in Management Research (0.5) MG4J3 Principles of Pricing (0.5) (not available 2020/21) MG4J6 Brand Strategy (0.5) MY451452 Applied Regression Analysis (0.5) # MY451455 Multivariate Analysis and Measurement (0.5) # PB418 Corporate Communications (0.5) PB419 Creativity and Innovation (0.5) # (not available 2020/21) PB426 Knowledge Processes in Organisations (0.5) (not available 2020/21) PP4E4 Analytic frameworks for policy evaluation

SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF MSc MANAGEMENT

The following rules set out what marks are required in order to be eligible to proceed into the second year. Students with the following mark profiles progress as follows:

Pass marks in all first year courses allows progression to year two.

A half unit Fail mark or a half unit Bad Fail mark with at least Pass marks in all other courses will allow progression to year two.

One full unit (or two half units) of Fail marks (which could include no more than one half unit Bad Fail mark) with at least Pass marks in all other courses, including one half unit of Merit marks will allow progression to year two.

Two Bad Fail marks (full or half units) will not allow progression to year two.

Three or more (full or half units) Fails or Bad Fail marks will not allow progression to year two. Students must resubmit all failed components of assessments in courses in which they receive a Bad Fail mark in order to be eligible for the award of a degree. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

Global MSc in Management

Programme Code: TMGLMG2

Department: Management

For students starting this programme of study in 2019/20

A two-year programme. Students take courses to the value of eight units but those units are not necessarily spread over the two years. The second year includes a dissertation. Students complete the course MG488 GMiM Capstone Course - Management in Action (H) over both years, Part A (unassessed) in Year 1 and Part B

(assessed) in Year 2.

All students are required to attend MG4A1 Introduction to Studying for GMiM.

Students may choose to concentrate their electives in a certain topic area and may elect to have one of the elective titles attached to their degree certificate and transcript if the title reflects the course of study followed by the student. The possible titles are listed as headings within the Elective Courses below with the courses attached to those areas listed beneath them. If no such election is made, the degree certificate will state 'Management' without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Year 1

Introductory course	MG4A1	Introduction to Studying for GMiM (0.0)
Paper 1	MG458	Foundations of Management I: Organisations and Management Theory (0.5) and MG459 Foundations of Management 2 (0.5)
Paper 2	MG449	Research Methods for Studies in Global Management (0.5) # (not available 2020/21) and MG431 managerial Economics (0.5)

Or

Courses to the value of between 0.5 unit(s) (minimum) and 1.0 unit(s) (maximum) from the following:

Upon satisfactorily demonstrating that they have a degree in economics and have passed, as part of that degree, a course in managerial economics, microeconomics or industrial organisation, students may be exempted from MG431 and will be free to take an elective course, subject to the approval of the Programme Director. Students must select MG449 and a further 0.5 unit from the Elective Courses listed below:

MG449 Research Methods for Studies in Global Management (0.5) # (not available 2020/21) and 0.5 units from the Elective Courses listed below:

Elective Courses (click here to expand)

Paper 3	MG434	Organisational Behaviour (0.5) and MG4E2 marketing Management (0.5)
---------	-------	--

Or

Upon satisfactorily demonstrating that they have a degree in marketing, or in management of business administration with a significant concentration in marketing, students may be exempted from MG4E2 and will be free to take an elective course, subject to the approval of the Programme Director. Students must select MG434 and a further 0.5 units from the Elective Courses listed below: Courses to the value of 1.0 unit(s) from the following:

MG434 Organisational Behaviour (0.5) and 0.5 units from the Elective Courses listed below:

Elective Courses (click here to expand)

Paper 4	Courses to the value of 0.5 or 1.0 full unit from the Elective Courses listed below:	
---------	--	--

Elective Courses (click here to expand)

Compulsory course	As part of Paper 4, students also take the compulsory unassessed part of MG488:	
	MG488A	GMiM Capstone Course - Management in Action (0.0)

Year 2

Paper 5	Courses to the value of 1.0 unit(s) from the	
---------	--	--

following:

MSc in Operations Research & Analytics

Programme Code: TMORA

Department: Mathematics

For students starting this programme of study in 2020/21 Full-year programme. As below, students must take three compulsory courses (Papers 1-3, 1.5 units in all), options to the value of 1.5 units (Papers 4-6), and a project or dissertation (Paper 7, 1 unit).

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements and course size capping.

Paper	Course number, title (unit value)	
Paper 1	MA423	Fundamentals of Operations Research (0.5) #
Paper 2	MA424	modelling in Operations Research (0.5) #
Paper 3	ST447	Data Analysis and Statistical Methods (0.5) #
Papers 4 & 5	Courses to the value of 1.0 unit(s) from the following:	
	MA402	Game Theory I (0.5) #
	MA407	Algorithms and Computation (0.5) #
	MA421	Advanced Algorithms (0.5) #
	MA427	Mathematical Optimisation (0.5) #
	MA428	Combinatorial Optimisation (0.5) #

	MA429	Algorithmic Techniques for Data Mining (0.5) #
	MA430	Efficient Algorithms For Hard Optimisation Problems (0.5) # (withdrawn 2020/21)
	MA434	Algorithmic Game Theory (0.5) #
	Students may take at most one of MA407 and MA421 under Papers 4 & 5, but may take the other under Paper 6.	
Paper 6	Courses to the value of 0.5 unit(s) from the following: Another course from those listed under Papers 4 & 5.	
	MA431	Advanced Topics in Operations Research and Applicable Mathematics (0.5) # (not available 2020/21)
	MA433	mathematics of Networks (0.5) #
	MG409	Auctions and Game Theory (0.5) #
	MG422	Thinking Strategically (0.5) #
	MG455	Decisions, Biases and Nudges (0.5) #
	ST422	Time Series (0.5) #
	ST449	Artificial Intelligence and Deep Learning (0.5)

Papers 4 & 5 options list

Or

Courses to the value of 0.5 unit(s) from the following:

Any other MSc-level course, with approval of the Programme Director and the teacher responsible for the course.

Paper 7

MA425	Project in Operations Research & Analytics (1.0) or
MA426	Dissertation in Operations Research & Analytics (1.0)

Papers 4 & 5 options list

MA402	Game Theory I (0.5) #
MA407	Algorithms and Computation (0.5) #
MA421	Advanced Algorithms (0.5) #
MA427	Mathematical Optimisation (0.5) #
MA428	Combinatorial Optimisation (0.5) #
MA429	Algorithmic Techniques for Data Mining (0.5) #
MA430	Efficient Algorithms For Hard Optimisation Problems (0.5) # (withdrawn 2020/21)
MA434	Algorithmic Game Theory (0.5) #
# means there may be prerequisites for this course. Please view the course guide for more information. Students may choose at most one of: MA402, MA434, MG409, MG422.	

Upon supplying satisfactory evidence to the course convenor of relevant previous courses taken, a student may be exempted from a course specified in Paper 1, 2, or 3, at the discretion of the Programme Director. A student shall replace such a course with another module, subject to approval of the Programme Director. Exemption from more than one course is rare.

Please note that not all optional courses are available every year.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Organisational and Social Psychology

Programme Code: TMOSOPS

Department: Psychological and Behavioural Science

For students starting this programme of study in 2020/21

Full-year programme. Students must take two compulsory courses, one unassessed course (PB400), optional courses to the value of one unit and a dissertation as shown.

The Department of Psychological and Behavioural Science has recoded their course codes from PS- to PB- for 2018/19. The majority of courses listed below with a PB- code are not new courses but some may have changed code.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	PB402 Organisational Social Psychology (1.0)
Paper 2	Students may opt to take PB414 instead of PB411 where they can demonstrate prior experience of quantitative techniques up to and including the topics covered in MY465:
	PB411 methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0) or
	PB414 Advanced Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	GI403 Gender and Media Representation (0.5)
	PB415 Behavioural Science (0.5) (not available 2020/21)
	PB416 Cognition and Culture (0.5) (not available 2020/21)
	PB417 Consumer Psychology (0.5)
	PB418 Corporate Communications (0.5)
	PB419 Creativity and Innovation (0.5) # (not available 2020/21)
	PB420 Current Communication Research (0.5) # (not available 2020/21)
	PB421 Happiness (0.5)
	PB422 Health Communication (0.5)
	PB424 Organisational Life (0.5) (not available 2020/21)
	PB425 Organisations, Groups and Identity (0.5) #
	PB426 Knowledge Processes in Organisations (0.5) (not available 2020/21)
	PB427 Organisational and Social Decision Making (0.5) (not available 2020/21)
	PB428 Political Psychology: Inequality & Intergroup Relations (0.5)
	PB429 Science Communication and Controversies (0.5) (not available 2020/21)
	PB430 Social Influence (0.5) # (not available 2020/21)
	PB431 Social Psychology of Economic Life: Advanced Topics (0.5)
	PB432 Social Representations: Social Knowledge and Contemporary Issues (0.5)
	PB433 Theory and Practice of Organisational Development (0.5)
	PB434 Behavioural Science in an Age of New Technology (0.5)
	PB452 Behavioural Science for Health in the Time of a Pandemic (0.5) #
	PB457 Organisational Culture (0.5)
	PB458 Dialogue: Conflict & Negotiation (0.5)
	Courses to the value of 0.5 unit(s) from another programme can be taken (subject to the approval

of the candidate's Programme Director).

Paper 4

Footnotes

PB410 Dissertation (1.0) A

A: Failures in this course cannot be condoned. A bad fail is defined as a mark less than 29%.

means there may be prerequisites for this course.

Please view the course guide for more information.

MSc in Philosophy and Public Policy

Programme Code: TMPHPP

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2020/21

Full-year programme. Students must take two compulsory courses, one unit of optional courses, one compulsory seminar (non-assessed) and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	PH415 Philosophy and Public Policy (1.0)
Paper 2	PH416 Philosophy, Morals and Politics (1.0)
	Or
	PH458 Evidence and Policy and another half-unit from the courses listed under Paper 3:
	PH458 Evidence and Policy (0.5)
Paper 3	Paper 3 options list
	Courses to the value of 1.0 unit(s) from the following:
	PH400 Philosophy of Science (1.0) #
	PH405 Philosophy of the Social Sciences (1.0)
	PH413 Philosophy of Economics (1.0) #
	PH416 Philosophy, Morals and Politics (1.0)
	PH425 Business and Organisational Ethics (0.5)
	PH427 Genes, Brains and Society (0.5) #
	PH430 Einstein for Everyone: From time travel to the edge of the universe (0.5) #
	PH431 Physics and the City: From Quantum Jumps to Stock Market Crashes (0.5) #
	PH432 Effective Philanthropy: Ethics and Evidence (0.5) # (withdrawn 2020/21)
	PH433 Philosophy of Gender and Race (0.5)
	PH456 Rationality and Choice (1.0)
	PH458 Evidence and Policy (0.5)
	Alternatively, students can choose courses to the value of 1.0 unit from the wide array of policy courses at LSE on a space-available basis.
Paper 4	PH499 Dissertation (1.0)
	Students must also take the following non-assessed seminar:
	PH421 Dissertation Seminar - Philosophy and Public Policy (0.0)
	Paper 3 options list
	PH400 Philosophy of Science (1.0) #
	PH405 Philosophy of the Social Sciences (1.0)
	PH413 Philosophy of Economics (1.0) #
	PH416 Philosophy, Morals and Politics (1.0)
	PH425 Business and Organisational Ethics (0.5)
	PH427 Genes, Brains and Society (0.5) #
	PH430 Einstein for Everyone: From time travel to the edge of the universe (0.5) #
	PH431 Physics and the City: From Quantum Jumps to Stock Market Crashes (0.5) #
	PH432 Effective Philanthropy: Ethics and Evidence (0.5) # (withdrawn 2020/21)
	PH433 Philosophy of Gender and Race (0.5)
	PH456 Rationality and Choice (1.0)
	PH458 Evidence and Policy (0.5)
	# means there may be prerequisites for this course.

Please view the course guide for more information.

MSc in Philosophy of Science

Programme Code: TMPHYS

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2020/21

Full-year programme. Students must take courses to the value of 3.0 units and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	Courses to the value of 1.0 unit(s) from the following: PH400 Philosophy of Science (1.0) # Or PH458 Evidence and Policy and another half-unit from the courses listed under Papers 2 & 3: PH458 Evidence and Policy (0.5)
Papers 2 & 3	Papers 2 & 3 options list Courses to the value of 2.0 unit(s) from the following: PH400 Philosophy of Science (1.0) # PH405 Philosophy of the Social Sciences (1.0) 3 PH413 Philosophy of Economics (1.0) # 4 PH419 Set Theory and Further Logic (1.0) # PH425 Business and Organisational Ethics (0.5) PH427 Genes, Brains and Society (0.5) # PH430 Einstein for Everyone: From time travel to the edge of the universe (0.5) # PH431 Physics and the City: From Quantum Jumps to Stock Market Crashes (0.5) # PH432 Effective Philanthropy: Ethics and Evidence (0.5) # (withdrawn 2020/21) PH433 Philosophy of Gender and Race (0.5) PH456 Rationality and Choice (1.0) PH458 Evidence and Policy (0.5) Students may take up to 1.0 unit of non-PH courses not listed above, subject to approval. PH499 Dissertation (1.0) Students must also take the following non-assessed seminar: PH445 Dissertation Seminar - Philosophy of Science (0.0)
Paper 4	Papers 2 & 3 options list PH400 Philosophy of Science (1.0) # PH405 Philosophy of the Social Sciences (1.0) 1 PH413 Philosophy of Economics (1.0) # 2 PH419 Set Theory and Further Logic (1.0) # PH425 Business and Organisational Ethics (0.5) PH427 Genes, Brains and Society (0.5) # PH430 Einstein for Everyone: From time travel to the edge of the universe (0.5) # PH431 Physics and the City: From Quantum Jumps to Stock Market Crashes (0.5) # PH432 Effective Philanthropy: Ethics and Evidence (0.5) # (withdrawn 2020/21) PH433 Philosophy of Gender and Race (0.5) PH456 Rationality and Choice (1.0) PH458 Evidence and Policy (0.5) Prerequisite Requirements and Mutually Exclusive Options 1: PH405 can not be taken with PH413 2: PH413 can not be taken with PH405 3: PH405 can not be taken with PH413 4: PH413 can not be taken with PH405 # means there may be prerequisites for this course.

Please view the course guide for more information.

MSc in Philosophy of the Social Sciences

Programme Code: TMPHSS

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2020/21

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Papers 1, 2 & 3	Courses to the value of 3.0 units from the following. Students must take at least one of PH405 and PH413: EH428 History of Economics: Making Political Economy into a Social Science (0.5) (not available 2020/21) EH429 History of Economics: Ideas, Policy and Performativity (0.5) PH400 Philosophy of Science (1.0) # PH405 Philosophy of the Social Sciences (1.0) PH413 Philosophy of Economics (1.0) # PH416 Philosophy, Morals and Politics (1.0) PH419 Set Theory and Further Logic (1.0) # PH425 Business and Organisational Ethics (0.5) PH427 Genes, Brains and Society (0.5) # PH430 Einstein for Everyone: From time travel to the edge of the universe (0.5) # PH431 Physics and the City: From Quantum Jumps to Stock Market Crashes (0.5) # PH432 Effective Philanthropy: Ethics and Evidence (0.5) # (withdrawn 2020/21) PH433 Philosophy of Gender and Race (0.5) PH456 Rationality and Choice (1.0) PH458 Evidence and Policy (0.5) Subject to approval, students may take up to one unit of non-PH courses not listed above. This would be instead of either EH428 and/or EH429 and not in addition to these courses.
Paper 4	PH499 Dissertation (1.0) Students must also take the following non-assessed seminar: PH422 Dissertation Seminar - Philosophy of Social Science (0.0) # means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Political Economy of Europe

Programme Code: TMPOECEU

Department: European Institute

For students starting this programme of study in 2020/21

Full-year programme. Students must take two out of three semi-compulsory courses, optional courses to the value of two units (at least one unit of courses listed under Paper 2) and a dissertation as shown. Additionally, all students must take EU410 Interdisciplinary Research Methods and Design in preparation for the dissertation. Students must also take EU450 Engaging with Europe: Professional Skills as part of their professional development.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Professional development course	EU450 Engaging with Europe: Professional Skills (0.0)
Paper 1	Courses to the value of 1.0 unit(s) from the

	following:
	EU455 Concepts in Political Economy (0.5)
	EU491 Political Economy in Theory and History (0.5)
	EU492 Political Economy of Integration and Fragmentation in Europe (0.5)
	Students without some background in European politics and policy-making or economics are strongly encouraged to take one or both of the following to support their studies:
	EU409 Basic Economic Concepts for European Political Economy (0.0)
	EU4V9 Concepts in Political Science and Public Policy (0.0)
Paper 2	Courses to the value of 1.0 unit from the following: Political Economy in Action:
	EU425 Interest Representation and Economic Policy- Making in Europe (0.5) (not available 2020/21)
	EU443 European Models of Capitalism (0.5)
	EU446 The Political Economy of European Monetary Integration (0.5) #
	EU449 Emerging Markets, Political Transition and Economic Development in Central and Eastern Europe (0.5) # (not available 2020/21)
	EU453 The Political Economy of European Welfare States (0.5) #
	EU455 Concepts in Political Economy (0.5)
	EU467 The Political Economy of the Neoliberal State (0.5)
	EU468 The Political Economy of Migration and Spatial Inequality in Europe (0.5) #
	EU469 The Political Economy of Finance in Europe (0.5) #
	EU477 Labour Markets and the Political Economy of Employment in Europe (0.5) # (not available 2020/21)
	EU482 Europe in World Trade (0.5)
	EU491 Political Economy in Theory and History (0.5)
	EU492 Political Economy of Integration and Fragmentation in Europe (0.5)
	EU4A4 The Politics of Inequality and Redistribution (0.5)
Paper 3	Courses to the value of 1.0 unit from the following: Institutions, Politics and Policies of the EU:
	EU421 Policy-Making in the European Union (0.5) #
	EU430 Europeanization: The Comparative Politics of Domestic Change (0.5)
	EU439 Political and Fiscal Integration and Disintegration in EU Member States (0.5) (not available 2020/21)
	EU464 International Migration: EU Policies and Politics (0.5) #
	EU478 The Culture of European Politics (0.5)
	EU484 Europe's Role in Global Migration Governance (0.5)
	EU487 European Integration from a Global Governance Perspective (0.5) #
	EU488 European Policy-Making and International Cooperation (0.5) #
	EU489 Analytical Politics and Policymaking in Europe (0.5)
	EU4A1 The Politics and Policies of 'Brexit': The UK's changing relationship with the European Union (0.5)
	EU4A5 Public Opinion in Europe (0.5)
	GV4J4 Citizen Representation and Democracy in the European Union (0.5) (not available 2020/21)

SP441 Politics of Social Policy: Welfare and Work in Comparative Perspective (0.5)

European Identity and Ideas:

EU432 The Philosophy of Europe (0.5) #

EU437 Europe Beyond Modernity (0.5)

EU447 Democracy, Ideology and the European State (0.5)

EU481 The Future: Political Responses to a Challenge (0.5)

GV4A5 International Migration and Immigration Management (0.5)

Regional courses:

EU440 The Balkans in Europe: Transition, Democratisation, Integration (0.5) (not available 2020/21)

EU476 Politics of Memory: Germany, France, UK and Turkey (0.5) # (not available 2020/21)

Paper 2 options list

EU410 Interdisciplinary Research Methods and Design (0.0)

EU499 Dissertation (1.0)

Paper 2 options list

EU425 Interest Representation and Economic Policy- Making in Europe (0.5) (not available 2020/21)

EU443 European Models of Capitalism (0.5)

EU446 The Political Economy of European Monetary Integration (0.5) #

EU449 Emerging Markets, Political Transition and Economic Development in Central and Eastern Europe (0.5) # (not available 2020/21)

EU453 The Political Economy of European Welfare States (0.5) #

EU455 Concepts in Political Economy (0.5)

EU467 The Political Economy of the Neoliberal State (0.5)

EU468 The Political Economy of Migration and Spatial Inequality in Europe (0.5) #

EU469 The Political Economy of Finance in Europe (0.5) #

EU477 Labour Markets and the Political Economy of Employment in Europe (0.5) # (not available 2020/21)

EU482 Europe in World Trade (0.5)

EU491 Political Economy in Theory and History (0.5)

EU492 Political Economy of Integration and Fragmentation in Europe (0.5)

EU4A4 The Politics of Inequality and Redistribution (0.5)

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Political Economy of Late Development

Programme Code: TMPOECLD

Department: Economic History

For students starting this programme of study in 2020/21

Full year programme. Students must take courses to the value of four full units, including a half-unit or full-unit dissertation.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Paper 1 EH401 Historical Analysis of Economic Change (0.5)

	MC428 Media Culture and Neoliberalism in the Global South (0.5)
	MC432 Strategic Communication in Practice: Professional Perspectives (0.5)
	MC433 Technology and Justice (0.5) #
	MC436 Mediating the Past (0.5)
	MC437 Media, Data and Social Order (0.5) #
	MC438 Mediated Feminisms (0.5)

Paper 4	Any other MSc-level course which is offered in the School, subject to the consent of the candidate's programme convenor.
	MC499 Dissertation: Media and Communications (1.0) B
Footnotes	A: MY452 is an advanced Applied Regression Analysis course offered by the Department of Methodology and must be taken by students who select MC4M7. Students wishing to select this option need to already have a grounding in quantitative methods and must seek approval from the Programme Director. Approval is also subject to timetabling constraints.
	B: 10,000-12,000 words. Passing this course is a requirement for passing the programme.
	# means there may be prerequisites for this course. Please view the course guide for more information.
	Students can take no more than one full unit of courses from outside the Department of Media and Communications (non-MC-prefixed courses).
	Note for prospective students:
	For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm . Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm .

MSc in Psychology of Economic Life

Programme Code: TMPSECL

Department: Psychological and Behavioural Science

For students starting this programme of study in 2020/21

Full-year programme. Students are required to take two compulsory courses, optional courses to the value of one unit and a dissertation as shown. Students are also required to take the non-assessed course PB400 Psychological and Behavioural Science.

The Department of Psychological and Behavioural Science has recoded their course codes from PS- to PB- for 2018/19. The majority of courses listed below with a PB- code are not new courses but some may have changed code.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	PB403 Psychology of Economic Life (1.0)
Paper 2	Students may opt to take PB414 instead of PB411 where they can demonstrate prior experience on quantitative techniques up to and including the topics covered in MY465
	PB411 methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0) or
	PB414 Advanced Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	PB415 Behavioural Science (0.5) (not available 2020/21)
	PB416 Cognition and Culture (0.5) (not available 2020/21)
	PB417 Consumer Psychology (0.5)
	PB418 Corporate Communications (0.5)

PB419	Creativity and Innovation (0.5) # (not available 2020/21)
PB420	Current Communication Research (0.5) # (not available 2020/21)
PB421	Happiness (0.5)
PB422	Health Communication (0.5)
PB424	Organisational Life (0.5) (not available 2020/21)
PB425	Organisations, Groups and Identity (0.5) #
PB426	Knowledge Processes in Organisations (0.5) (not available 2020/21)
PB427	Organisational and Social Decision Making (0.5) (not available 2020/21)

Footnotes**Master of Public Administration****Programme Code:** TMMPA**Department:** School of Public Policy

For students starting this programme of study in 2020/21

The programme is taught over two academic years (21 months). To be awarded the degree, students must complete courses to the value of 8.0 units in total over two years with 4.0 units in each year of study. Some courses have a unit value of 1.0 and some have a unit value of 0.5 indicated as (H).

No interim award is available: students completing courses with a total value of less than 8.0 units receive no award, regardless of performance in the courses that have been successfully completed.

Students who successfully complete courses to the value of 8.0 units may elect to have one of the titles below referenced on their degree certificate if the student has passed the courses attached to that specialism. The available specialisms are listed below with the courses attached to each specialism listed with them. If no such election is made, or if a student does not pass all of the courses listed under a specialism, the MPA degree certificate will state 'MPA' without further specification. Students may take courses from other specialisms as option courses.

Students can apply to spend their second year at one of the LSE MPA Partner Institutions. If offered a place and upon successful completion of year one, the student will transfer onto the Dual MPA Programme. Students who transfer to the Dual MPA will not be eligible to elect a specialism to be added to their degree certificate.

SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF THE MPA AND DUAL MPA DEGREE

- Students who attain at least a Pass grade in each of the first year courses will be eligible to proceed into the second year of the MPA or Dual MPA programme.
- A student on the MPA programme who has attained a Fail grade in courses to the value of 1.0 unit and at least a Pass grade in the remaining courses to the value of 3.0 units will be eligible to proceed into the second year.
- A student holding an offer on the Dual MPA for their second year, who has attained a Fail grade in courses to the value of 1.0 unit, may only progress if a mark of at least 60% has been achieved in courses of an equivalent value or an aggregate mark of at least 165 has been achieved in the non-failed courses.
- A student who receives a Bad Fail in any course or who otherwise fails to meet the above criteria for progression will not be able to progress to the second year of the MPA or Dual MPA programme and will be entitled to repeat the failed courses as follows:

A student shall normally be entitled to repeat any failed courses only (on one occasion) and at the next normal opportunity, in accordance with paragraph 30 of the General Academic Regulations. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.

- A student who has completed year one and is unable to complete year two of the MPA or Dual MPA programme will not receive an interim award.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

Master of Public Administration

Programme Code: TMMPA

Department: School of Public Policy

For students starting this programme of study in 2019/20

The programme is taught over two academic years (21 months). To be awarded the degree, students must complete courses to the value of 8.0 units in total over two years with 4.0 units in each year of study. Some courses have a unit value of 1.0 and some have a unit value of 0.5 indicated as (H).

No interim award is available: students completing courses with a total value of less than 8.0 units receive no award, regardless of performance in the courses that have been successfully completed.

Students who successfully complete courses to the value of 8.0 units may elect to have one of the titles below referenced on their degree certificate if the student has successfully completed courses of that specialism to the value of 1.0 unit. The available specialisms are listed below with the courses attached to each specialism listed with them. If no such election is made, or if a student does not successfully complete all of the courses listed under a specialism, the MPA degree certificate will state 'MPA' without further specification. Students may take courses from other specialisms as option courses.

Students can apply to spend their second year at one of the LSE MPA Partner Institutions. If offered a place and upon successful completion of year one, the student will transfer onto the Dual MPA Programme. Students who transfer to the Dual MPA will not be eligible to elect a specialism to be added to their degree certificate.

Paper Course number, title (unit value)

Before Year 1

Introductory course	All students must attend the following MPA introductory course:
PP408	Introduction to Quantitative Methods for the MPA Programme (0.0)

Year 1

Paper 1	PP440	Micro and Macro Economics (for Public Policy) (1.0)
---------	-------	---

Or

Upon satisfactorily demonstrating prior knowledge of Micro and Macro Economics, students may be exempted from PP440 and will be free to take an additional unit of option course subject to the approval of the Programme Director.

PP4V8	Policy Paper (0.5) 2 I

In addition, students may choose courses from elsewhere in LSE with approval of the Programme Director and subject to acceptance by the course convenor. Availability of a place on a course outside the School of Public Policy is not guaranteed and is subject to space, regulations, and timetable constraints.

Master of Public Policy

Programme Code: TMMPP

Department: School of Public Policy

For students starting this programme of study in 2020/21

The programme is taught over 9 months.

To be awarded the degree, students must complete courses to the value of 4.0 units. Some courses have a unit value of 1.0 and some have a unit value of 0.5.

No interim award is available: students completing courses with a total value of less than 4.0 units receive no award, regardless of performance in the courses that have been successfully completed.

Students must take core courses to the value of 3.0 units, and a range of other courses from within the School of Public Policy to a total combined value of 4.0 units as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Core Courses

All students must complete the following six core courses:

Paper 1	PP401	Political Science for Public Policy (0.5) #
Paper 2	PP402	Quantitative Methods for Public Policy (0.5)
Paper 3	PP403	Public Management (0.5) #
Paper 4	PP404	Economics for Public Policy (0.5)

Or

Upon satisfactorily demonstrating prior knowledge of Economics, students may be exempted from PP404 and will be free to take an additional half unit option course subject to the approval of the Programme Director.

Paper 5	PP405	Public Policy Applications (0.5) #
Paper 6	PP406	Philosophy for Public Policy (0.5)

Option Courses

Papers 7 & 8 Courses to the value of 1.0 unit(s) from the following:

FM473L	Financial Markets (0.5) #
FM473M	Financial Markets (0.5) #
FM474L	Managerial Finance (0.5)
FM474M	Managerial Finance (0.5)
GV4F8	Institutions and Global Trade (0.5) (not available 2020/21)
GV4K1	Transparency and Accountability in Government (0.5)
MG455	Decisions, Biases and Nudges (0.5) #
PP410	Public Economics for Public Policy (0.5) #
PP411L	Developments in International Conflict Resolution and Transformation (0.5)
PP411M	Developments in Contemporary Policy-Making (0.5) (not available 2020/21)
PP412	Global Social Protection Design and Delivery (0.5)
PP418	Globalisation and Economic Policy (0.5) #
PP419	Advanced Empirical Methods for Policy Analysis (0.5) #
PP448	International Political Economy and Development (0.5)
PP449	Comparative Political Economy and Development (0.5)
PP450	Public Organisations: Theory and Practice (0.5) #
PP454	Development Economics (1.0) #
PP4E5	Innovations in the governance of public services delivery (0.5)
PP4G3	Designing and Managing Change in the Public Sector (0.5)
PP4J4	Designing and Implementing Evidence-Informed Policies and Programmes (0.5)
PP4J5	Fiscal Governance and Budgeting (0.5)
PP4V8	Policy Paper (0.5)
PP4X6	Welfare Analysis and Measurement (1.0)

In addition, students may choose up to 1.0 unit (per year of study) of courses from elsewhere in LSE with approval of the Programme Director and subject to acceptance by the course convenor. Availability of a place on a course outside the School of Public Policy is not guaranteed and is subject to space, regulations, and timetable constraints.

means there may be prerequisites for this course. Please view the course guide for more information. The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/

Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

MSc in Public Policy and Administration

Programme Code: TMPPA

Department: Government

For students starting this programme of study in 2020/21 Full-year programme. Students must take courses to the value of 2.5 units and a skills course and dissertation as shown. Part-time students may take courses up to the value of two full course units in their first year. Candidates may, subject to the approval of their supervisor, substitute for up to two of the written papers listed under Paper 3 below, any paper which is offered in the MSc, LLM or MA which involves at least 20 weeks of an integrated teaching programme and which counts as one quarter (or one full unit) of the complete MSc programme in which it is offered. By choosing particular combinations of core courses, students can choose to have the title of a specialised stream added to the title of their degree:

MSc Public Policy and Administration (Comparative); or
MSc Public Policy and Administration (Public Management).

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	GV4E9 Approaches and Issues in Public Policy and Administration (1.0)
Paper 2	Courses to the value of 0.5 unit(s) from the following: GV477 Comparative Public Policy Change (0.5) # GV483 Public Management Theory and Doctrine (0.5) GV4F4 Policy Advice in Theory and Practice (0.5)
Paper 3	Courses to the value of 1.0 unit(s) from the following: Public Management:A AC412 Accountability, Organisations and Risk Management (0.5) DV413 Environmental Problems and Development Interventions (0.5) # DV415 Global Environmental Governance (0.5) GV483 Public Management Theory and Doctrine (0.5) GV4A2 Citizens' Political Behaviour in Europe: Elections Public Opinion and Identities (0.5) # (not available 2020/21) GV4C8 Game Theory for Political Science (0.5) GV4K1 Transparency and Accountability in Government (0.5) LL4AT Regulation: Strategies and Enforcement (0.5) LL4AU Regulation: Legal and Political Aspects (0.5) # (not available 2020/21) MG402 Public Management: A Design-Oriented Approach (0.5) PH415 Philosophy and Public Policy (1.0) PP4J5 Fiscal Governance and Budgeting (0.5) Comparative Public Policy and Administration:B

EU421	Policy-Making in the European Union (0.5) #
EU443	European Models of Capitalism (0.5)
EU481	The Future: Political Responses to a Challenge (0.5)
EU4A4	The Politics of Inequality and Redistribution (0.5)
GV403	Network Regulation (0.5) (withdrawn 2020/21)
GV441	States and Markets (0.5)
GV477	Comparative Public Policy Change (0.5) #
GV4A5	International Migration and Immigration Management (0.5)
GV4C5	Politics of Economic Policy (0.5) (withdrawn 2020/21)
GV4C8	Game Theory for Political Science (0.5)
GV4K1	Transparency and Accountability in Government (0.5)
SP434	Behavioural Public Policy (0.5)
SP441	Politics of Social Policy: Welfare and Work in Comparative Perspective (0.5)

Another course with the permission of the programme convenor.

Paper 4 Courses to the value of 0.5 unit(s) from the following:

MY451451 Introduction to Quantitative Analysis (0.5) **or**

MY451452 Applied Regression Analysis (0.5) #

Paper 5

GV499 Dissertation (1.0)

Footnotes

A: Public Management stream

To qualify for this stream, the following courses must be taken:

GV4E9 Approaches and Issues in Public Policy and Administration

GV483 Public Management Theory and Doctrine (H)

One half-unit from the Public Management courses under Paper 3.

B: Comparative Public Policy and Administration stream

To qualify for this stream, the following courses must be taken:GV4E9 Approaches and Issues in Public Policy and Administration

GV477 Comparative Public Policy Change (H) **or** GV4F4 The Politics of Policy Advice (H)

One half-unit from the Comparative Public Policy and Administration courses under Paper 3.

means there may be prerequisites for this course.

Please view the course guide for more information.

MSc in Quantitative Economic History

Programme Code: TMQEH

Department: Economic History

For students starting this programme of study in 2020/21

Students are required to attend EC400 Introductory Course in Mathematics and Statistics.

Students complete and are examined in courses to the value of four full units.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Introductory Course	EC400 Introductory Course in Mathematics and Statistics (0.0) #
Paper 1	EH401 Historical Analysis of Economic Change (0.5)
Paper 2	EH426M Quantitative Analysis in Economic History

Paper 3	II (0.5) # and EH427 Topics in Quantitative Analysis in Economic History (0.5) #
Paper 4	EC411 microeconomics (1.0) # or
Paper 5	EC413 macroeconomics (1.0) #
	EC402 Econometrics (1.0) #
	EH472 Essay in Quantitative Economic History (0.5)
	# means there may be prerequisites for this course. Please view the course guide for more information. Students intending to apply for the MRes Quantitative Economic History would usually need to obtain a Merit overall and at least 65% in the dissertation.
	Note for prospective students:
	For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm . Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm .

MSc in Quantitative Methods for Risk Management

Programme Code: TMQMRM

Department: Statistics

For students starting this programme of study in 2020/21

Students take four compulsory half unit courses and two units of optional courses.

Students are required to take a two-week compulsory introductory course MA400 September Introductory Course (Financial Mathematics) in September.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Introductory Course	MA400 September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (0.0)
Paper 1	ST409 Stochastic Processes (0.5) #
Paper 2	ST429 Statistical Methods for Risk Management (0.5) #
Paper 3	ST433 Computational Methods in Finance and Insurance (0.5) #
	Students can also take the following non-assessed non-compulsory course:
	MA432 Programming in C++ (0.0) (withdrawn 2020/21)
Papers 4 & 5	Courses to the value of 1.5 unit(s) from the following:
	MA411 Probability and Measure (0.5) #
	MA415 The Mathematics of the Black and Scholes Theory (0.5) #
	MA416 The Foundations of Interest Rate and Credit Risk Theory (0.5) #
	MA420 Quantifying Risk and Modelling Alternative Markets (0.5) #
	ST422 Time Series (0.5) #
	ST426 Applied Stochastic Processes (0.5) (not available 2020/21)
	ST436 Financial Statistics (0.5) #
	ST439 Stochastics for Derivatives Modelling (0.5) # (not available 2020/21)
	ST440 Recent Developments in Finance and Insurance (0.5) # (not available 2020/21)

	ST443 machine Learning and Data Mining (0.5) #
	ST446 Distributed Computing for Big Data (0.5) #
	ST448 Insurance Risk (0.5) # (not available 2020/21)
	ST449 Artificial Intelligence and Deep Learning (0.5)
	ST451 Bayesian Machine Learning (0.5) #
Paper 6	Courses to the value of 1.0 unit(s) from the following:
	FM404 Forecasting Financial time Series (0.5) # (not available 2020/21)
	FM441 Derivatives (0.5) #
	FM442 Quantitative Methods for Finance and Risk Analysis (0.5) #
	MA409 Continuous Time Optimisation (0.5) #
	ST452 Probability and Mathematical Statistics I (0.5)
	ST453 Probability and Mathematical Statistics II (0.5) #

Further half-units(s) from the **Paper 5 options list**, or from other appropriate MSc courses subject to the approval of the Programme Director and the teacher responsible for the course.

Papers 4 & 5 options list

Additional course 1 Students taking FM442 can apply for a place on the following non-assessed computer course:

FM457 Applied Computational Finance (0.0) (not available 2020/21)

Additional course 2 Students can also take the following non-assessed course taken in addition to the required five compulsory half unit courses and three half units of optional courses detailed above:

MA422 Research Topics in Financial Mathematics (0.0) (not available 2020/21)

Papers 4 & 5 options list

MA411	Probability and Measure (0.5) #
MA415	The Mathematics of the Black and Scholes Theory (0.5) #
MA416	The Foundations of Interest Rate and Credit Risk Theory (0.5) #
MA420	Quantifying Risk and Modelling Alternative Markets (0.5) #
ST422	Time Series (0.5) #
ST426	Applied Stochastic Processes (0.5) (not available 2020/21)
ST436	Financial Statistics (0.5) #
ST439	Stochastics for Derivatives Modelling (0.5) # (not available 2020/21)
ST440	Recent Developments in Finance and Insurance (0.5) # (not available 2020/21)
ST443	machine Learning and Data Mining (0.5) #
ST446	Distributed Computing for Big Data (0.5) #
ST448	Insurance Risk (0.5) # (not available 2020/21)
ST449	Artificial Intelligence and Deep Learning (0.5)
ST451	Bayesian Machine Learning (0.5) #
	# means there may be prerequisites for this course. Please view the course guide for more information. The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's

programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Real Estate Economics and Finance

Programme Code: TMREEF

Department: Geography & Environment

For students starting this programme of study in 2020/21 Full-year programme. Students must take three compulsory courses, in addition to either FM429 or FM473L / FM473M, one optional half-unit course and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Year 1	
Paper 1	GY458 Real Property Market Practice (0.5)
Paper 2	GY457 Applied Urban and Real Estate Economics (1.0) #
Paper 3	GY462 Real Estate Finance (0.5)
Papers 4 & 5	Courses to the value of 1.0 unit(s) from the following: Either one of the following half-unit courses: FM429 Asset Markets A (0.5) # FM473L Financial Markets (0.5) # FM473M Financial Markets (0.5) # GY472 Real Estate Investment (0.5) # (not available 2020/21) And a relevant half-unit course where offered, subject to the approval of the Programme Director via LSEforYou.

Or

	FM430 Corporate Finance and Asset Markets (1.0) #
Paper 6	GY485 Dissertation - MSc Real Estate Economics and Finance (1.0)

means there may be prerequisites for this course. Please view the course guide for more information. This programme is externally accredited by the IPF and RICS. Further information is available on the Geography and Environment Department lse.ac.uk/geographyAndEnvironment/Home.aspx website.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Regional And Urban Planning Studies

Programme Code: TMRUP

Department: Geography & Environment

For students starting this programme of study in 2020/21 Full-year programme. Students must take courses to the value of three full units and a dissertation. Additionally all students are required to take the non-assessed compulsory course GY450 Planning Practice and Research.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	GY447 The Economics of Regional and Urban Planning (0.5) #
Paper 2	GY448 Urban Planning: Society, Market and Sustainability (0.5)
Paper 3	GY454 Urban Policy and Planning (0.5) #
Paper 4	Courses to the value of 1.5 unit(s) from the following: GI409 Gender, Globalisation and Development: An Introduction (0.5) GI420 Globalisation, Gender and Development: Theorising Policy and Practice (0.5) GY400 The Economics of Urbanisation (0.5) # (not available 2020/21) GY403 Contemporary Debates in Human Geography (0.5) GY410 Economics of Local and Regional Development (0.5) (not available 2020/21) GY413 Regional Development and Policy (0.5) # GY415 Local Capacity and Economic Development Policy (0.5) GY421 Gender and Development: Geographical Perspectives (0.5) # (withdrawn 2020/21) GY431 Cities, People and Poverty in the South (0.5) # GY432 Urban Ethnography (0.5) (not available 2020/21) GY438 Cities and Social Change in East Asia (0.5) # GY439 Cities, Politics and Citizenship (0.5) GY441 The Politics of Housing (0.5) GY446 Planning for Sustainable Cities (0.5) GY449 Urban Futures (0.5) GY455 Economic Appraisal and Valuation (0.5) GY460 Techniques of Spatial Economic Analysis (0.5) # GY465 Concepts in Environmental Regulation (0.5) GY467 Global Migration and Development (0.5) (withdrawn 2020/21) GY470 Urban Africa (0.5) (not available 2020/21) GY479 Urban Transformations (0.5) GY480 Remaking China: Geographical aspects of Development and Disparity (0.5) (not available 2020/21) SO465 City-Making: the Politics of Urban Form (0.5) SO473 Crime, Control and the City (0.5) (not available 2020/21) SO480 Urban Inequalities (0.5) SP437 International Housing and Human Settlements; Conflicts and Communities (0.5) (not available 2020/21) A half-unit course from another programme at the discretion of the Programme Director by special permission only. GY450 Planning Practice and Research (0.0)
Paper 5	

Paper 6	GY484	Dissertation - MSc Regional and Urban Planning Studies (1.0)
	#	means there may be prerequisites for this course. Please view the course guide for more information. This programme is externally accredited by the RICS. Further information is available on the Geography and Environment Department lse.ac.uk/collections/geographyAndEnvironment/ website (see Quick Links to Regional and Urban Planning Studies).
	Note for prospective students:	For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Regulation

Programme Code: TMREG

Department: Government

For students starting this programme of study in 2020/21

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	GV488 Law and Politics of Regulation (1.0)
Papers 2 & 3	Courses to the value of two full units from the following: A
	Environmental Regulation
DV413	Environmental Problems and Development Interventions (0.5) #
DV415	Global Environmental Governance (0.5)
GY420	Environmental Regulation: Implementing Policy (1.0)
GY465	Concepts in Environmental Regulation (0.5)
GY475	Issues in Environmental Governance (0.5)
IR467	Global Environmental Politics (0.5) *
LL4BV	Transnational Environmental Law (0.5)
	Financial and Commercial Regulation
AC470	Accounting in the Global Economy (0.5) #
AC490	Management Accounting, Decisions and Control (0.5)
FM473L	Financial Markets (0.5) #
FM473M	Financial Markets (0.5) #
FM474L	Managerial Finance (0.5)
FM474M	Managerial Finance (0.5)
LL4AH	Corporate Governance (0.5) #
LL4BF	International Financial Regulation (0.5) (not available 2020/21)
LL4BK	Corporate Crime (0.5)
LL4BL	Financial Crime (0.5)
LL4CD	European Company Law (0.5) # (not available 2020/21)
LL4CP	Tax Avoidance (0.5)
LL4K9	European Capital Markets Law (0.5)
SO425	Regulation, Risk and Economic Life (1.0)
	Social Regulation
AN451	Anthropology of Politics (0.5)

AN456	Anthropology of Economy (1): Production and Exchange (0.5)
AN457	Anthropology of Economy (2): Transformation and Globalisation (0.5)
GY421	Gender and Development: Geographical Perspectives (0.5) # (withdrawn 2020/21)
LL4E8	Law in Society: A Joint Course in Law and Anthropology (1.0) * (withdrawn 2020/21)
SP472	Illegal Drugs and Their Control: Theory, Policy and Practice (0.5) # (not available 2020/21)

Utilities Regulation

GV403	Network Regulation (0.5) (withdrawn 2020/21)
LL4AF	Principles of Global Competition Law (0.5)
LL4AG	Competition Law, Technology and Intellectual Property (0.5) #
LL4CS	Law and Economics of Network Industries (0.5)
LL4S1	Cyberlaw (0.5) #
LL4S4	Digital Rights, Privacy and Security (0.5) #
LL4Z5	EU State Aid Law (0.5) (not available 2020/21)

Government and Law

LL4CS	Law and Economics of Network Industries (0.5)
SO469	Risk and Governance: A Sociological Approach (0.5) (withdrawn 2020/21)
SP434	Behavioural Public Policy (0.5)
	A course from another programme by special permission only.
GV499	Dissertation (1.0)

Paper 4

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

Footnotes

A: Students who take courses to the value of two full units from one of the categories shown in **bold** above, or courses to the value of one full unit and a dissertation which in the opinion of the School falls within the same category, may choose to have the title of their subject category included on the degree certificate. No more than one category may appear on the degree certificate.
means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Risk and Finance

Programme Code: TMRIFI

Department: Finance

For students starting this programme of study in 2020/21

Full-year programme. Student must take courses to the value of four full units (of which one paper includes a dissertation) as

shown below.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	FM403 management and Regulation of Risk (1.0) A
Paper 2	Courses to the value of 0.5 unit(s) from the following: FM429 Asset Markets A (0.5) # FM431L Corporate Finance A (0.5) # FM431M Corporate Finance A (0.5) # Or any other half-unit quantitative Finance course with the permission of the programme director.
Papers 3 & 4	Courses to the value of 2.5 unit(s) from the following: AC412 Accountability, Organisations and Risk Management (0.5) AC444 Valuation and Security Analysis (0.5) # AC470 Accounting in the Global Economy (0.5) # FM402 Financial Risk Analysis (0.5) # FM412 Quantitative Security Analysis (0.5) # FM413 Fixed Income Markets (0.5) # FM421 Applied Corporate Finance (0.5) # FM429 Asset Markets A (0.5) # FM430 Corporate Finance and Asset Markets (1.0) # FM431L Corporate Finance A (0.5) # 1 FM431M Corporate Finance A (0.5) # 2 FM441 Derivatives (0.5) # FM442 Quantitative Methods for Finance and Risk Analysis (0.5) # B FM445 Portfolio Management (0.5) FM476 Entrepreneurial Finance (0.5) # GY420 Environmental Regulation: Implementing Policy (1.0) GY455 Economic Appraisal and Valuation (0.5) GY462 Real Estate Finance (0.5) GY465 Concepts in Environmental Regulation (0.5) GY475 Issues in Environmental Governance (0.5) LL4BF International Financial Regulation (0.5) (not available 2020/21) LL4BK Corporate Crime (0.5) LL4BL Financial Crime (0.5) LL4BX Corporate Governance - Advanced Topics (0.5) (withdrawn 2020/21) MG455 Decisions, Biases and Nudges (0.5) # MG4A8 Strategy for the Information Economy (0.5) # MG4B9 The World Trading System (0.5) # PH425 Business and Organisational Ethics (0.5) SO425 Regulation, Risk and Economic Life (1.0) SO469 Risk and Governance: A Sociological Approach (0.5) (withdrawn 2020/21) ST409 Stochastic Processes (0.5) # Any other paper with the approval of the Programme Director.

Prerequisite Requirements and Mutually Exclusive Options

1: FM431L can not be taken with FM431M

2: FM431M can not be taken with FM431L

A: Includes dissertation.

B: Students taking this course can apply for a place on FM457 lse.ac.uk/resources/calendar/courseGuides/FM/2017_FM457.htm Applied Computational Finance, a non-assessed computer course.

means there may be prerequisites for this course.

Please view the course guide for more information.

MSc in Social and Cultural Psychology

Programme Code: TMSCPS

Department: Psychological and Behavioural Science

For students starting this programme of study in 2020/21

Full-year programme. Students are required to take two compulsory courses, one unassessed course (PB400), optional courses to the value of one unit and a dissertation as shown.

The Department of Psychological and Behavioural Science has recorded their course codes from PS- to PB- for 2018/19. The majority of courses listed below with a PB- code are not new courses but some may have changed code.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	PB401 Contemporary Social and Cultural Psychology (1.0)
Paper 2	Students may opt to take PB414 instead of PB411 where they can demonstrate prior experience on quantitative techniques up to and including the topics covered in MY465 PB411 methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0) or PB414 Advanced Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following: PB415 Behavioural Science (0.5) (not available 2020/21) PB416 Cognition and Culture (0.5) (not available 2020/21) PB417 Consumer Psychology (0.5) PB418 Corporate Communications (0.5) PB419 Creativity and Innovation (0.5) # (not available 2020/21) PB420 Current Communication Research (0.5) # (not available 2020/21) PB421 Happiness (0.5) PB422 Health Communication (0.5) PB424 Organisational Life (0.5) (not available 2020/21) PB425 Organisations, Groups and Identity (0.5) # PB426 Knowledge Processes in Organisations (0.5) (not available 2020/21) PB427 Organisational and Social Decision Making (0.5) (not available 2020/21) PB428 Political Psychology: Inequality & Intergroup Relations (0.5) PB429 Science Communication and Controversies (0.5) (not available 2020/21) PB430 Social Influence (0.5) # (not available 2020/21) PB431 Social Psychology of Economic Life: Advanced Topics (0.5) PB432 Social Representations: Social Knowledge and Contemporary Issues (0.5) PB433 Theory and Practice of Organisational Development (0.5) PB434 Behavioural Science in an Age of New Technology (0.5) PB452 Behavioural Science for Health in the

MSc in Social and Public Communication

Programme Code: TMSOPUCO

Department: Psychological and Behavioural Science

For students starting this programme of study in 2020/21

Full year programme. Students are required to take two compulsory courses, one unassessed course (PB400), optional courses to the value of one unit and a dissertation as shown. The Department of Psychological and Behavioural Science has recoded their course codes from PS- to PB- for 2018/19. The majority of courses listed below with a PB- code are not new courses but some may have changed code.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	PB404 The Social Psychology of Communication (1.0)
Paper 2	Students may opt to take PB414 instead of PB411 where they can demonstrate prior experience on quantitative techniques up to and including the topics covered in MY465 PB411 methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0) or PB414 Advanced Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following: PB415 Behavioural Science (0.5) (not available 2020/21) PB416 Cognition and Culture (0.5) (not available 2020/21) PB417 Consumer Psychology (0.5) PB418 Corporate Communications (0.5) PB419 Creativity and Innovation (0.5) # (not available 2020/21) PB420 Current Communication Research (0.5) # (not available 2020/21) PB421 Happiness (0.5) PB422 Health Communication (0.5) PB424 Organisational Life (0.5) (not available 2020/21) PB425 Organisations, Groups and Identity (0.5) # PB426 Knowledge Processes in Organisations (0.5) (not available 2020/21) PB427 Organisational and Social Decision Making (0.5) (not available 2020/21) PB428 Political Psychology: Inequality & Intergroup Relations (0.5) PB429 Science Communication and Controversies (0.5) (not available 2020/21) PB430 Social Influence (0.5) # (not available 2020/21) PB431 Social Psychology of Economic Life:

	Advanced Topics (0.5)
PB432	Social Representations: Social Knowledge and Contemporary Issues (0.5)
PB433	Theory and Practice of Organisational Development (0.5)
PB434	Behavioural Science in an Age of New Technology (0.5)
PB452	Behavioural Science for Health in the Time of a Pandemic (0.5) #
PB457	Organisational Culture (0.5)
PB458	Dialogue: Conflict & Negotiation (0.5)
	Courses to the value of 0.5 unit(s) from another programme (subject to the approval of the candidate's Programme Director).
PB410	Dissertation (1.0) A

Paper 4

Footnotes

A: Failures in this course cannot be condoned. A bad fail is defined as a mark less than 29%.
means there may be prerequisites for this course. Please view the course guide for more information. Students who complete PB404 (**formerly PS429**) and PB418 (**formerly PS438**) can be granted exemption from up to two CIPR Diploma units. Further information is available from the Department of Psychological and Behavioural Science website lse.ac.uk/socialPsychology/Home.aspx.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Social Anthropology

Programme Code: TMAN

Department: Anthropology

For students starting this programme of study in 2020/21

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown. Attendance at seminars and at non-assessed tutorials is compulsory.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	AN404 Anthropology: Theory and Ethnography (1.0)
Paper 2	Courses to the value of 1.0 unit(s) from the following: AN402 The Anthropology of Religion (1.0) AN405 The Anthropology of Kinship, Sex and Gender (1.0) AN451 Anthropology of Politics (0.5) AN456 Anthropology of Economy (1): Production and Exchange (0.5) AN457 Anthropology of Economy (2): Transformation and Globalisation (0.5) AN479 Anthropology of Law (0.5)
Paper 3	Courses to the value of 1.0 unit(s) from a paper under paper 2 above not already taken or from the following: AN419 The Anthropology of Christianity (0.5) AN420 The Anthropology of Southeast Asia

	(0.5) (not available 2020/21)
AN424	The Anthropology of Melanesia (0.5) (not available 2020/21)
AN436	The Anthropology of Development (0.5)
AN444	Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) # (not available 2020/21)
AN447	China in Comparative Perspective (1.0)
AN458	Children and Youth in Contemporary Ethnography (0.5) (not available 2020/21)
AN461	Anthropological Approaches to Questions of Being (0.5) (not available 2020/21)
AN463	Borders and Boundaries: Ethnographic Approaches (0.5)
AN467	The Anthropology of South Asia (0.5) # (not available 2020/21)
AN469	The Anthropology of Amazonia (0.5) (not available 2020/21)
AN473	Anthropological Approaches to Value (0.5) (not available 2020/21)
AN474	Subjectivity and Anthropology (0.5) # (withdrawn 2020/21)
AN475	The Anthropology of Revolution (0.5) (not available 2020/21)
AN476	Anthropology and the Anthropocene (0.5) (not available 2020/21)
AN477	Topics in the Anthropology of sub-Saharan Africa (0.5) #
AN478	Anthropology and Global History (0.5) (not available 2020/21)
AN480	Public Anthropology (0.5) (not available 2020/21)
AN481	Health and Welfare: Anthropological Perspectives (0.5) (not available 2020/21)

Paper 2 options list

Paper 4

AN499 Dissertation (1.0)

Paper 2 options list

AN402	The Anthropology of Religion (1.0)
AN405	The Anthropology of Kinship, Sex and Gender (1.0)
AN451	Anthropology of Politics (0.5)
AN456	Anthropology of Economy (1): Production and Exchange (0.5)
AN457	Anthropology of Economy (2): Transformation and Globalisation (0.5)
AN479	Anthropology of Law (0.5)

means there may be prerequisites for this course.

Please view the course guide for more information.

MSc in Social Anthropology (Religion in the Contemporary World)

Programme Code: TMSARCW**Department:** Anthropology

For students starting this programme of study in 2020/21
Full-year programme. Students must take courses to the value of four full units. Attendance at seminars and at non-assessed tutorials is compulsory.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	AN402 The Anthropology of Religion (1.0)
Paper 2	Courses to the value of 1.0 unit(s) from the following: AN419 The Anthropology of Christianity (0.5)

AN420	The Anthropology of Southeast Asia (0.5) (not available 2020/21)
AN424	The Anthropology of Melanesia (0.5) (not available 2020/21)
AN444	Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) # (not available 2020/21)
AN461	Anthropological Approaches to Questions of Being (0.5) (not available 2020/21)
AN467	The Anthropology of South Asia (0.5) # (not available 2020/21)
EU437	Europe Beyond Modernity (0.5)
EU475	Religious Diversity and Conflict in Europe (0.5) (not available 2020/21)
GV4C9	Globalization and Democratization in Southeast Asia (0.5)
IR461	Islam in World Politics (1.0) (not available 2020/21)
IR465	The International Politics of Culture and Religion (1.0) # (not available 2020/21)

Paper 3

Courses to the value of 1.0 unit(s) from the following:

AN404	Anthropology: Theory and Ethnography (1.0)
AN405	The Anthropology of Kinship, Sex and Gender (1.0)
AN451	Anthropology of Politics (0.5)
AN456	Anthropology of Economy (1): Production and Exchange (0.5)
AN457	Anthropology of Economy (2): Transformation and Globalisation (0.5)
AN473	Anthropological Approaches to Value (0.5) (not available 2020/21)
AN478	Anthropology and Global History (0.5) (not available 2020/21)
AN479	Anthropology of Law (0.5)
AN480	Public Anthropology (0.5) (not available 2020/21)
AN481	Health and Welfare: Anthropological Perspectives (0.5) (not available 2020/21)
EU478	The Culture of European Politics (0.5)
HY435	Political Islam: From Ibn Taymiyya to ISIS (1.0)
PB416	Cognition and Culture (0.5) (not available 2020/21)

An additional unit from Paper 2 not previously taken or a course from another MSc subject to the approval of programme director.

Paper 2 options list

Paper 4

AN497 Dissertation: Religion in the Contemporary World (1.0) #

Paper 2 options list

AN419	The Anthropology of Christianity (0.5)
AN420	The Anthropology of Southeast Asia (0.5) (not available 2020/21)
AN424	The Anthropology of Melanesia (0.5) (not available 2020/21)
AN444	Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) # (not available 2020/21)
AN461	Anthropological Approaches to Questions of Being (0.5) (not available 2020/21)
AN467	The Anthropology of South Asia (0.5) # (not available 2020/21)
EU437	Europe Beyond Modernity (0.5)
EU475	Religious Diversity and Conflict in Europe (0.5) (not available 2020/21)
GV4C9	Globalization and Democratization in Southeast Asia (0.5)

IR461	Islam in World Politics (1.0) (not available 2020/21)
IR465	The International Politics of Culture and Religion (1.0) # (not available 2020/21)
# means there may be prerequisites for this course. Please view the course guide for more information.	

MSc in Social Innovation and Entrepreneurship

Programme Code: TMMGSIE

Department: Management

For students starting this programme of study in 2020/21 Full-year programme. Students must take four compulsory courses, options to the value of 1.0 unit and a dissertation as shown below.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	MG4F8 Managerial Economics and Quantitative Measurement for Social Entrepreneurs (0.5) and MG4F9 Organisational Behaviour and Marketing for Social Entrepreneurs (0.5)
Paper 2	MG4G1 Understanding Social Problems for Innovation and Entrepreneurship (0.5) and MG4G2 Social Innovation Design (0.5)
Paper 3	Courses to the value of 1.0 unit(s) from the following: DV413 Environmental Problems and Development Interventions (0.5) # FM476 Entrepreneurial Finance (0.5) # MG404 Consumer Insights: Behavioural Fundamentals (0.5) MG418 Open Innovation (0.5) MG421 International Business Strategy and Emerging Markets (0.5) # MG460 Emergencies Management: Humanitarian Intervention and Digital Innovation (0.5) MG473 Negotiation Analysis (0.5) MG476 Corporate Social Responsibility and International Labour Standards (0.5) # MG482 Innovation and Technology Management (0.5) MG4B3 International Marketing: A Strategic Approach (0.5) MG4C3 Information Technology and Service Innovation (0.5) MG4D4 Cross Cultural Management (0.5) # MG4D5 Leadership in Organisations: Theory and Practice (0.5) PP4E5 Innovations in the governance of public services delivery (0.5) PP4G3 Designing and Managing Change in the Public Sector (0.5) Or any graduate course not listed above, subject to permission from the Programme Director and the relevant Course Leader.
Paper 4	MG4J5 Dissertation: Social Innovation and Entrepreneurship (1.0) Or MG4G5 Dissertation: Social Innovation and Entrepreneurship (0.5) Plus courses to the value of 0.5 unit(s) from the Paper 3 options list: Paper 3 options list DV413 Environmental Problems and

	Development Interventions (0.5) #
FM476	Entrepreneurial Finance (0.5) #
MG404	Consumer Insights: Behavioural Fundamentals (0.5)
MG418	Open Innovation (0.5)
MG421	International Business Strategy and Emerging Markets (0.5) #
MG460	Emergencies Management: Humanitarian Intervention and Digital Innovation (0.5)
MG473	Negotiation Analysis (0.5)
MG476	Corporate Social Responsibility and International Labour Standards (0.5) #
MG482	Innovation and Technology Management (0.5)
MG4B3	International Marketing: A Strategic Approach (0.5)
MG4C3	Information Technology and Service Innovation (0.5)
MG4D4	Cross Cultural Management (0.5) #
PP4E5	Innovations in the governance of public services delivery (0.5)
PP4G3	Designing and Managing Change in the Public Sector (0.5)

Or any graduate course not listed above, subject to permission from the Programme Director and the relevant Course Leader.

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Social Research Methods

Programme Code: TMSORM

Department: Methodology

For students starting this programme of study in 2020/21 Full-year programme.

Part 1: Social Research Methods. Students must take courses to the value of two full units and a dissertation as shown.

Part 2: Optional courses. For all students other than those on the 'Gender', 'Population' or 'Social Policy' streams of the MSc Social Research Methods, courses to the value of one full unit can be taken from the courses listed under the heading 'Part 2 - Optional Courses' below. Please click the 'Optional courses' link to expand the list. Students on the 'Gender', 'Population' or 'Social Policy' streams of the MSc must select courses from the options listed under their respective headings at the foot of the 'Part 2 - Optional Courses' section below. Please click the 'Optional courses' link to expand the list.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	Part 1 - Social Research Methods Research design MY451400 Fundamentals of Social Science Research Design (0.5)
Paper 2	Quantitative research methods MY451452 Applied Regression Analysis (0.5) # A Exceptionally, students who can demonstrate sufficient prior training in quantitative research methods commensurate with those covered in MY452 can substitute a more advanced MY45* course from the following list for MY452. This would be subject to the approval of the MSc Programme Director. Please note that in such cases, the substitute course will be treated as a 'course critical to assessment' in place of MY452 (see Exam Sub-Board local rules lse.ac.uk/resources/calendar/LocalRules/)

	MScSocialResearchMethods.htm for more information):	
	MY451455 Multivariate Analysis and Measurement (0.5) # *	MY451427 Qualitative Research with Digital and Visual Data (0.5) # (not available 2020/21)
	MY451457 Causal Inference for Observational and Experimental Studies (0.5) # *	MY451428 Qualitative Text and Discourse Analysis (0.5) #
	MY451459 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) # *	MY451455 Multivariate Analysis and Measurement (0.5) #
Paper 3	Qualitative research methods	MY451456 Survey Methodology (0.5) #
	MY451421 Qualitative Research Methods (0.5) B	MY451457 Causal Inference for Observational and Experimental Studies (0.5) #
	Exceptionally students who can demonstrate sufficient prior training in qualitative research methods commensurate with those covered in MY421 can substitute a more advanced MY42* course from the following list for MY421. This would be subject to the approval of the MSc Programme Director. Please note that in cases where a student substitutes a course in for MY421, the substitute course will be treated as a 'course critical to assessment' in place of MY421 (see Exam Sub-Board local rules lse.ac.uk/resources/calendar/LocalRules/MScSocialResearchMethods.htm for more information):	MY451459 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #
	MY451425 Case Studies and Comparative Methods for Qualitative Research (0.5) *	MY451461 Social Network Analysis (0.5)
	MY451426 Doing Ethnography (0.5) # * (not available 2020/21)	MY451470 Computer Programming (0.5)
	MY451427 Qualitative Research with Digital and Visual Data (0.5) # * (not available 2020/21)	MY451472 Data for Data Scientists (0.5)
	MY451428 Qualitative Text and Discourse Analysis (0.5) # *	MY451474 Applied Machine Learning for Social Science (0.5) #
Paper 4	Optional social research methods course	PB425 Organisations, Groups and Identity (0.5) #
	For this paper students can choose any one of the MY4** courses which are listed under the Optional courses list below, or a half-unit course in statistics (ST4**, subject to the approval of the student's Academic Mentor). In addition, students can choose MY451 under Paper 4; if they do that, they must register for MY451M which is taught in Michaelmas Term, and must register under Paper 2 for MY452L which is taught in Lent Term.	SO407 Politics and Society (1.0)
	Optional courses (click here to expand)	ST416 Multilevel Modelling (0.5) #
Paper 5	MY499 Dissertation (1.0) C	ST425 Statistical Inference: Principles, Methods and Computation (1.0) #
	Part 2 - Optional Courses	ST442 Longitudinal Data Analysis (0.5) # (not available 2020/21)
Paper 6	Optional courses D	Or any other Graduate level courses from across the LSE (subject the approval of your Academic Mentor and the MSc Social Research Methods Programme Director).
	For all students other than those on the 'Gender,' 'Population' or 'Social Policy' streams of the MSc in Social Research Methods, courses to the value of one full unit can be taken from the courses listed in the 'Optional Courses' section below. Please click the 'Optional courses' link to expand the list. Students on the 'Gender,' 'Population' or 'Social Policy' streams of the MSc must select courses from the options listed under their respective headings at the foot of the 'Optional Courses' section below. Please click the 'Optional courses' link to expand the list.	Or
	Optional courses (click here to expand)	Gender stream
	Optional courses (click here to expand)	One half-unit from the following:
	Non-stream	GI402 Gender, Knowledge and Research Practice (0.5) or
	DV434 Human Security (0.5) (not available 2020/21)	GI424 Gender Theories: An Interdisciplinary Approach (0.5) or
	MY451405 Research Design for Policy and Programme Evaluation (0.5)	And one optional half unit graduate level course (typically from the Department of Gender Studies) as agreed with your Academic Mentor.
	MY451425 Case Studies and Comparative Methods for Qualitative Research (0.5)	Or
	MY451426 Doing Ethnography (0.5) # (not available 2020/21)	Population stream
		One compulsory half-unit:
		SP431 Population Analysis: Methods and Models (0.5) #
		And courses to the value of 0.5 units from the following:
		DV411 Population and Development: an Analytical Approach (0.5) (not available 2020/21)
		DV444 Global Health Challenges: Epidemics, Disease, and Public Health Response (0.5) #
		DV456 Population, Health and Development: Evidence and Projections (0.5) #
		DV457 Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (0.5)
		DV461 Critical Population Health Issues in High and Middle-Income Countries (0.5) # (not available 2020/21)
		GI415 Gender and European Welfare States (0.5)
		GI417 Feminist Population Politics (0.5) (not available 2020/21)
		Or
		Social policy stream
		One compulsory half-unit:
		SP400 International Social and Public Policy (0.5) #
		One half-unit from the following:
		SP411 Social Policy and Development (0.5) #

- SP413 Understanding Social (Dis)advantage (0.5)
- SP419 Social Movements, Activism, and Social Policy (0.5)
- SP434 Behavioural Public Policy (0.5)
- Or any other half-unit Graduate level course offered by the LSE's Department of Social Policy (subject to availability and to the approval of your Academic Mentor, the MSc Social Research Methods Programme Director and the convener of the course).

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

Footnotes

A: Students may register for either MY452M which is taught in Michaelmas Term, or MY452L which is taught in Lent Term. However, if they take MY451 under Paper 4, then they must register for MY451M under Paper 4 and for MY452L under Paper 2.

B: Students may register for either MY421M which is taught in Michaelmas Term, or MY421L which is taught in Lent Term.

C: The Dissertation is due in August.

D: Students may only register for one MY47* course as part of the MSc Social Research Methods degree.

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Sociology

Programme Code: TMSO

Department: Sociology

For students starting this programme of study in 2020/21

Full-year programme. Students must take courses to the value of three units and write a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	SO491 Quantitative Social Research Methods (0.5) or
	SO492 Qualitative Social Research Methods (0.5)
Papers 2 & 3	Courses to the value of 2.5 unit(s) from the following:
	SO407 Politics and Society (1.0)
	SO426 Classical Social Thought (0.5) (not available 2020/21)
	SO427 Modern Social Thought (0.5) (not available 2020/21)
	SO430 Economic Sociology (0.5)
	SO451 Cities by Design (0.5)
	SO454 Families and Inequalities (0.5) (not available 2020/21)
	SO457 Political Reconciliation (0.5)
	SO458 Gender and Societies (0.5) (not available 2020/21)
	SO468 International Migration and Migrant Integration (0.5)
	SO470 The Sociology of Markets (0.5)
	SO471 Technology, Power and Culture (0.5)
	SO473 Crime, Control and the City (0.5) (not available 2020/21)
	SO475 Material Culture and Design (0.5)
	SO477 Urban Social Theory (0.5)
	SO481 Class, Politics and Culture (0.5)
	SO483 Social Change Organizations (0.5) (withdrawn 2020/21)

- SO489 Family and Migration (0.5)
- SO490 Contemporary Social Thought (0.5)
- SO491 Quantitative Social Research Methods (0.5)
- SO492 Qualitative Social Research Methods (0.5)
- SO4B4 The New Reproductive Sociology (0.5) (not available 2020/21)
- SO4B6 Nature and Technology: More than Human Sociology (0.5) (not available 2020/21)
- Paper 4 SO499 MSc in Sociology Dissertation (1.0)

MSc in Statistics

Programme Code: TMST

Department: Statistics

For students starting this programme of study in 2020/21

Academic-year programme. Students must take courses to the value of four full units.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	ST425 Statistical Inference: Principles, Methods and Computation (1.0) #
Papers 2 & 3	Courses to the value of 2.0 unit(s) from the following:
	ST405 Multivariate Methods (0.5) #
	ST416 Multilevel Modelling (0.5) #
	ST418 Non-Linear Dynamics and the Analysis of Real Time Series (0.5) # (not available 2020/21)
	ST422 Time Series (0.5) #
	ST442 Longitudinal Data Analysis (0.5) # (not available 2020/21)
	ST443 machine Learning and Data Mining (0.5) #
	ST444 Computational Data Science (0.5) #
	ST445 Managing and Visualising Data (0.5)
	ST446 Distributed Computing for Big Data (0.5) #
	ST449 Artificial Intelligence and Deep Learning (0.5)
	ST451 Bayesian Machine Learning (0.5) #
	MY451459 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #
	MY451461 Social Network Analysis (0.5)
Paper 4	Courses to the value of 1.0 unit from the following:
	ST405 Multivariate Methods (0.5) #
	ST409 Stochastic Processes (0.5) #
	ST411 Generalised Linear Modelling and Survival Analysis (0.5) #
	ST416 Multilevel Modelling (0.5) #
	ST418 Non-Linear Dynamics and the Analysis of Real Time Series (0.5) # (not available 2020/21)
	ST422 Time Series (0.5) #
	ST426 Applied Stochastic Processes (0.5) (not available 2020/21)
	ST442 Longitudinal Data Analysis (0.5) # (not available 2020/21)
	ST443 machine Learning and Data Mining (0.5) #
	ST444 Computational Data Science (0.5) #
	ST445 Managing and Visualising Data (0.5)

ST449	Artificial Intelligence and Deep Learning (0.5)
ST451	Bayesian Machine Learning (0.5) #
MA407	Algorithms and Computation (0.5) #
MA427	Mathematical Optimisation (0.5) #
MY451456	Survey Methodology (0.5) #
MY451457	Causal Inference for Observational and Experimental Studies (0.5) #
MY451459	Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #
MY451461	Social Network Analysis (0.5)
SP431	Population Analysis: Methods and Models (0.5) #

Other courses may be taken with permission, except for: ST429, ST433, ST436, ST439, ST440, MA415, MA416, MA420 and any courses indexed FM.

means there may be prerequisites for this course. Please view the course guide for more information. The total value of all non-ST courses should not exceed one unit.

This programme is externally accredited by the RSS. Further information is available on the Department of Statistics website. lse.ac.uk/collections/statistics

The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

MSc in Statistics (Financial Statistics)

Programme Code: TMSTFS

Department: Statistics

For students starting this programme of study in 2020/21 Academic-year programme. Students take three compulsory courses (two units) and options to the value of two units.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	ST425 Statistical Inference: Principles, Methods and Computation (1.0) #
Paper 2	ST422 Time Series (0.5) # and ST436 Financial Statistics (0.5) #
Paper 3	Courses to the value of 1.0 unit(s) from the following: ST405 Multivariate Methods (0.5) # ST411 Generalised Linear Modelling and Survival Analysis (0.5) # ST416 Multilevel Modelling (0.5) # ST418 Non-Linear Dynamics and the Analysis of Real Time Series (0.5) # (not available 2020/21) ST429 Statistical Methods for Risk Management (0.5) # ST433 Computational Methods in Finance and Insurance (0.5) # ST439 Stochastics for Derivatives Modelling (0.5) # (not available 2020/21)

Paper 4

ST440	Recent Developments in Finance and Insurance (0.5) # (not available 2020/21)
ST442	Longitudinal Data Analysis (0.5) # (not available 2020/21)
ST443	machine Learning and Data Mining (0.5) #
ST444	Computational Data Science (0.5) #
ST445	Managing and Visualising Data (0.5)
ST446	Distributed Computing for Big Data (0.5) #
ST448	Insurance Risk (0.5) # (not available 2020/21)
ST449	Artificial Intelligence and Deep Learning (0.5)
ST451	Bayesian Machine Learning (0.5) #
MY451459	Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #
MY451461	Social Network Analysis (0.5)
Courses to the value of 1.0 unit from the following:	
ST405	Multivariate Methods (0.5) #
ST409	Stochastic Processes (0.5) #
ST411	Generalised Linear Modelling and Survival Analysis (0.5) #
ST416	Multilevel Modelling (0.5) #
ST418	Non-Linear Dynamics and the Analysis of Real Time Series (0.5) # (not available 2020/21)
ST426	Applied Stochastic Processes (0.5) (not available 2020/21)
ST429	Statistical Methods for Risk Management (0.5) #
ST433	Computational Methods in Finance and Insurance (0.5) #
ST439	Stochastics for Derivatives Modelling (0.5) # (not available 2020/21)
ST440	Recent Developments in Finance and Insurance (0.5) # (not available 2020/21)

MSc in Strategic Communications

Programme Code: TMSTRCOM

Department: Media & Communications

For students starting this programme of study in 2020/21 Full-year programme. Students must take three compulsory courses, courses to the value of 1.5 units and a dissertation as shown below.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	MC408 Theories and Concepts in Media and Communications (0.5)
	And one of the following 0.5 unit courses:
	MC4M1 methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (0.5) or
	MC4M7 Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis) (0.5) A
Paper 2	MC431 Critical Approaches to Strategic Communications (0.5)
Paper 3	Courses to the value of 1.5 unit(s) from the following:
	MC402 The Audience in Media and Communications (0.5)
	MC425 Interpersonal Mediated Communication (0.5)
	MC429 Humanitarian Communication:

	vulnerability, discourse and power (0.5) (not available 2020/21)
MC432	Strategic Communication in Practice: Professional Perspectives (0.5)
MC434	Digital Platforms and Media Infrastructures (0.5) # (not available 2020/21)
MC436	Mediating the Past (0.5)
MC437	Media, Data and Social Order (0.5) #
MG479	Information Systems for the Public Sector: Digital Government and Service Innovation (0.5)
MG4B3	International Marketing: A Strategic Approach (0.5)
MG4F2	marketing Analytics II: Analytics for Managing Innovations, Products and Brands (0.5)
MG4F3	Digital Marketing (0.5) # (not available 2020/21)
PB418	Corporate Communications (0.5)
PB427	Organisational and Social Decision Making (0.5) (not available 2020/21)

Any other course which is offered in the School at master's level, subject to the consent of the candidate's programme director.

Paper 4	MC499 Dissertation: Media and Communications (1.0)
---------	--

Footnotes

A: MY452 is an advanced Applied Regression Analysis course offered by the Department of Methodology and must be taken by students who select MC4M7. Students wishing to select this option need to already have a grounding in quantitative methods and must seek approval from the Programme Director. Approval is also subject to timetabling constraints.

means there may be prerequisites for this course. Please view the course guide for more information.

Note: Students can take no more than one full unit of courses from outside the Department of Media and Communications (non MC-prefixed courses).

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Theory and History of International Relations

Programme Code: TMTHYIR2

Department: International History

For students starting this programme of study in 2020/21 Full-year programme. Students must take courses to the value of four units, including a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	Courses to the value of 1.0 unit(s) from the following:
	HY400 Crisis Decision-Making in War and Peace 1914-2003 (1.0) #
	HY422 Presidents, Public Opinion, and Foreign

	Policy, from Roosevelt to Reagan, 1933-89 (1.0)				Caribbean, 1860s-1980s (1.0)
	HY429 Anglo-American Relations from World War to Cold War, 1939-91 (1.0)			HY478	Genesis of the Modern World: Europe, China and India, 1550 - 1840 (1.0) (not available 2020/21)
	HY435 Political Islam: From Ibn Taymiyya to ISIS (1.0)			HY479	Environmental History in a Global Context (1.0) (withdrawn 2020/21)
	HY436 Race, Violence and Colonial Rule in Africa (1.0)			HY482	National Socialism. Old theories and new research approaches (1.0) (withdrawn 2020/21)
Paper 2	Courses to the value of 1.0 unit(s) from the following:			HY483	Land and Conflict in Latin America since 1750 (1.0) (not available 2020/21)
	IR411 Foreign Policy Analysis III (1.0) #			HY485	Germanness in the 20th century: Identity, Politics, and Violence in Germany from the First World War to Re-Unification (1.0)
	IR412 International Institutions (1.0)			HY486	Practicing Abolition in the Atlantic World, c. 1807-1870 (1.0)
	IR415 Strategic Aspects of International Relations (1.0) # (not available 2020/21)			Paper 2 options list	
	IR416 The EU in the World (1.0) #			Paper 1 options list	
	IR418 International Politics: Asia & the Pacific (1.0)			HY498	Dissertation: LSE-PKU Double Degree MSc in International Affairs; MSc Theory and History of International Relations (1.0)
	IR419 International Relations of the Middle East (1.0) #	Paper 4		Paper 2 options list	
	IR422 Conflict and Peacebuilding (1.0) #			IR411	Foreign Policy Analysis III (1.0) #

Executive Taught Master's Programme Regulations

Key to Taught Master's Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 20/21) means not available in the 2020/21 academic year
(MT) means Michaelmas Term
(LT) means Lent Term
(ST) means Summer Term

Executive MSc in Behavioural Science

Programme Code: TMBSEX

Department: Psychological and Behavioural Science

For students starting this programme of study in 2020/21 16 month, part-time modular programme consisting of three full units of taught courses and one full unit dissertation. Students take four compulsory half unit courses to the value of two units, and two optional half unit courses to the value of one unit. Alternative exit points are available to students who are not able to complete the degree. An LSE Diploma is available on the completion of six taught courses and an LSE Certificate on the completion of four taught courses - please see the footnote at the bottom of this regulation for more information.

Paper **Course number, title (unit value)**

Year 1

January

Paper 1 PB450E Behavioural Science and Policy (0.5)
 Paper 2 MG406E Behavioural Decision Science (0.5)

April

Paper 3 PB471E Research Methods for Behavioural Science (0.5)

Paper 4 One of the following courses:
 PB454E Policy Appraisal and Ethics (0.5) **or**
 PB457E Organisational Culture (0.5) #

July

Paper 5 PB413E Frontiers in Behavioural Science Methods (0.5)

Paper 6 One of the following courses:
 PB434E Behavioural Science in an Age of New Technology (0.5)
 PB452E Behavioural Science for Health (0.5) A (not available 2020/21)
 PB453E Corporate Behaviour and Decision Making (0.5)

Year 2

Paper 7 PB451E Dissertation in Behavioural Science (1.0)

Footnotes A: PB452E is not available for 2020/21 on this programme.

means there may be prerequisites for this course. Please view the course guide for more information.

Exit options

Diploma

Students who cannot complete the Executive MSc Behavioural Science due to unforeseen circumstances may be eligible for a Diploma. This Diploma is classified according to the Scheme for the Award of a Diploma <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeDiploma.pdf>, as a 3 unit programme subject to the following provisions.

Students eligible for the award of a Diploma will have registered on the Executive MSc Behavioural Science programme and then cease their studies after completing courses to the value of 3.0 full units (three teaching sessions). Results from each of the three units (or equivalent where half unit courses have been taken) count towards the Diploma classification. Students must achieve a mark of 50 or higher in each

of the three courses (or equivalent where half unit courses have been taken) to achieve an overall Pass in the Diploma.

Certificate

Students who cannot complete the Executive MSc Behavioural Science due to unforeseen circumstances, and who are not eligible for a Diploma, may be eligible for a Certificate.

Students wishing to earn a Certificate will have registered on the Executive MSc Behavioural Science programme and then cease their studies after completing courses to the value of 2.0 full units (two teaching sessions).

The certificate is classified on a Pass/Fail basis only. A Pass mark of 50 needs to be achieved in each of the two units (or equivalent where half unit courses have been taken) for students to be eligible for the award of the Certificate. Higher marks in one course cannot compensate a Fail mark in another course.

Resits for the award of the degree

A student shall normally be entitled to re-sit any failed courses on one occasion only.

The results for the taught courses and dissertation will be ratified by the Sub-Board of Examiners and Graduate School Board of Examiners in February/ March the year following dissertation submission. Once grades have been ratified by the Sub-Board of Examiners and it is determined that an award cannot be made due to a fail in a taught course, the faculty member responsible for the failed course will set the new assessment and deadline for re-submission to take place as soon as possible. Results for resits and subsequent classification will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set and does not have permission to defer <https://info.lse.ac.uk/current-students/services/assessment-and-results/exceptional-circumstances/deferral> the attempt, they will be deemed to have failed the course. Provided that students submit by the deadline and pass, they will graduate with their cohort subject to the normal classification rules.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm](https://info.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm). Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm](https://info.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm).

Executive MSc in Behavioural Science

Programme Code: TMBSEX

Department: Psychological and Behavioural Science

For students starting this programme of study in 2019/20 16 month, part-time modular programme consisting of three full units of taught courses and one full unit dissertation. Students take four compulsory half unit courses to the value of two units, and two optional half unit courses to the value of one unit. Alternative exit points are available to students who are not able to complete the degree. An LSE Diploma is available on the completion of six taught courses and an LSE Certificate on the completion of four taught courses - please see the footnote at the bottom of this regulation for more information.

The Department of Psychological and Behavioural Science has recoded their course codes from PS- to PB- for 2018/19. The courses listed below with a PB- code are not new courses but some may have changed code.

Paper Course number, title (unit value)

Year 1

September

Paper 1	PB450E	Behavioural Science and Policy (0.5)
Paper 2	MG406E	Behavioural Decision Science (0.5)

January

Paper 3	PB471E	Research Methods for Behavioural Science (0.5)
---------	--------	--

Paper 4	One of the following courses: PB454E Policy Appraisal and Ethics (0.5) or PB457E Organisational Culture (0.5) #	
---------	--	--

March/April

Paper 5	PB413E	Frontiers in Behavioural Science Methods (0.5)
---------	--------	--

Paper 6	One of the following courses: PB434E Behavioural Science in an Age of New Technology (0.5) PB452E Behavioural Science for Health (0.5) A (not available 2020/21) PB453E Corporate Behaviour and Decision Making (0.5)

Executive MSc in Cities

Programme Code: TMCIEX

Department: Sociology

For students starting this programme of study in 2020/21 18 month programme. Students must take four compulsory half-unit courses, one optional full-unit course and an Urban Consultancy Project.

Paper Course number, title (unit value)

Year 1

Paper 1	SO4A1E	Cities in an Urban Age: Challenges and Opportunities (0.5)
---------	--------	--

	SO4A2E	Cities and Society: Design and Social Cohesion (0.5)
--	--------	--

Paper 2	SO4A3E	Cities and the Economy: Urban Economic Development and Finance (0.5)
---------	--------	--

	SO4A4E	Cities and the Environment: Urban Environmental Transitions (0.5)
--	--------	---

Paper 3

Either

	SO4A5E	Urban Infrastructure and Strategic Planning (1.0)
--	--------	---

Or

	SO4A6E	Urban Development and Master Planning (1.0)
--	--------	---

Year 2

Paper 4	SO4A7E	Urban Consultancy Project (1.0) A
---------	--------	-----------------------------------

Footnotes
A: To progress to the Urban Consultancy Project, students will need to have passed any two of the four half unit compulsory courses.

Executive MSc in Cities

Programme Code: TMCIEIX

Department: Sociology

For students starting this programme of study in 2019/2018 month programme. Students must take four compulsory half-unit courses, one optional full-unit course and an Urban Consultancy Project.

Consultancy Project:		
Paper	Course number, title (unit value)	
Year 1		
Paper 1	SO4A1E	Cities in an Urban Age: Challenges and Opportunities (0.5)
	SO4A2E	Cities and Society: Design and Social Cohesion (0.5)
Paper 2	SO4A3E	Cities and the Economy: Urban Economic Development and Finance (0.5)
	SO4A4E	Cities and the Environment: Urban Environmental Transitions (0.5)
Paper 3	Either	
	SO4A5E	Urban Infrastructure and Strategic Planning (1.0)
	Or	
	SO4A6E	Urban Development and Master Planning (1.0)

Year 2

Paper 4 SO4A7E Urban Consultancy Project (1.0) A

Footnotes A : To progress to the Urban Consultancy Project, students will need to have passed any two of the four half unit compulsory courses.

Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE

Programme Code: TMHECPNEX

Department: Health Policy

For students starting this programme of study in 2020/21

This is a two-year part-time modular programme in collaboration with the National Institute for Health and Care Excellence (NICE).

Students must take all eight half unit courses from the following:

Modules are staged in a progressive manner, that is, from introductory courses to general and then more specific and technical modules, while ongoing support will be provided throughout the development of the dissertation.

throughout the development of the dissertation.		
Paper	Course number, title (unit value)	
Year 1		
Paper 1	HP4F1E	Introduction to Evaluation in Healthcare (0.5)
Paper 2	HP4G4E	Systematic Review and Meta-analysis (0.5)
Paper 3	HP4G3E	Economic Evaluation in Health Care (0.5)
Paper 4	HP4F4E	Dissertation in Evaluation of Healthcare Interventions and Outcomes (0.5)
Year 2		
Paper 5	HP4F2E	Quasi-Experimental Evaluation of Healthcare Programs and Policies (0.5)
Paper 6	HP4F3E	Randomised Evaluation of Health Programmes and Policies (0.5)
Paper 7	HP4G1E	Statistical Methods in Health Care Economic Evaluation (0.5)
Paper 8	HP4G2E	Principles of Health Technology Assessment (0.5)

Notes:

In order to progress to year two of the programme students must pass at least one of the half units HP4F1E and HP4G4E. Where a student fails both of these courses they cannot progress until they have resubmitted and passed the work. Students are permitted one attempt to resubmit any failed work at the next appropriate opportunity which is normally during the equivalent assessment period during the next academic year. Where a student is required to

resubmit any assessment, their overall LSE degree will be capped at a Pass.

The MSc is a 24-month executive modular part-time degree programme. It features four intensive two-week on-campus teaching sessions, delivering eight 0.5 unit compulsory core courses. Assessment for each taught course will take place after the relevant teaching session, and consist of a combination of essays, take-home assessments, research projects and protocols. All marks count towards degree classification. It may be a requirement to achieve Pass marks in some courses in order to be eligible for the award of the degree. Please consult with the Department until further details have been published.

Alternative exit options will be provided for students who cannot complete the Executive MSc in Evaluation of Health Care Interventions and Outcomes due to unforeseen circumstances.

An LSE Diploma is available following successful completion of 3.0 full units across six taught courses.

Results from each 0.5 unit modules count toward the Diploma classification. Students must satisfy the conditions set out in the Scheme for the Award of a Diploma <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeDiploma.pdf> in order to be eligible for the award of a Diploma.

Students eligible for an LSE Certificate will have been registered on the programme and then cease studies following the completion of 2.0 full units across four taught courses over three teaching sessions. Students must achieve a mark of 50 or higher in each of these four courses in order to be eligible for the award of an LSE Certificate. LSE Certificate is classified on a Pass / Fail basis only

MSc in Finance (part-time)

Programme Code: TMFI

Department: Finance

For students starting this programme of study in 2020/21 Academic year programme lasting 21 months part-time (evenings). Students must take two full unit compulsory courses in the first year and four of the half-unit options available in the second year. They must submit a dissertation in one of the optional half-unit courses and take an examination in the other three half-unit courses.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Year 1

Paper 1 FM422E Corporate Finance (1.0) #

Paper 2 FM423E Asset Markets (1.0) #

Year 2

Papers 3 & 4 Courses to the value of 2.0 units from List 1 and List 2 below. Students must select at least three courses from the dedicated list of options: A

List 1 - Courses assessed by Exam or Coursework

Dedicated list of options:

- FM405E Fixed Income Securities and Credit Markets (0.5) #
- FM406E Topics in Portfolio Management (0.5) #
- FM407E Mergers, Buyouts and Corporate Restructurings (0.5) #
- FM408 Financial Engineering (0.5) #
- FM408E Financial Engineering (0.5) # (not available 2020/21)
- FM409E Risk Management in Financial Markets (0.5) #
- FM414E Private Equity, Venture Capital and Entrepreneurial Finance (0.5) #
- FM477 International Finance for MSc Finance and Economics, MSc Finance and MSc Finance & Private Equity (0.5) #

Other option:

- FM412 Quantitative Security Analysis (0.5) #

List 2 - Courses assessed by Dissertation

Courses cannot be selected from this list if the course with the equivalent title has already been selected from List 1.

Dedicated list of options:

- FM478 International Finance for MSc Finance and Economics, MSc Finance and MSc Finance & Private Equity - Dissertation (0.5) #
- FM4T4E Private Equity, Venture Capital and Entrepreneurship - Dissertation (0.5)
- FM4T6E Topics in Portfolio Management - Dissertation (0.5)
- FM4T8 Financial Engineering - Dissertation (0.5)
- FM4T8E Financial Engineering - Dissertation (0.5) (not available 2020/21)
- FM4U5E Fixed Income Securities and Credit Markets - Dissertation (0.5)
- FM4U7E Mergers, Buyouts and Corporate Restructurings - Dissertation (0.5)
- FM4U9E Risk Management in Financial Markets - Dissertation (0.5)

Other options:

- FM4T9 International Finance - Dissertation (0.5) (not available 2020/21)
- FM4U4 Quantitative Security Analysis - Dissertation (0.5)

Footnotes

A: You will be required to write a 6,000 word dissertation (replacing the exam) in one of your half unit courses. You are expected to attend the course teaching on the half-unit that you chose to write your dissertation on.

means there may be prerequisites for this course. Please view the course guide for more information.

FM412 and FM4T9 are taught during the daytime only. To take these courses students must be able to attend teaching during the day.

Supplementary criteria for progression from the first to the second year of the MSc Finance (part-time)

To be eligible to proceed into the second year, candidates must attain at least a Pass grade in the two compulsory courses: FM422E and FM423E.

If a candidate fails (but does not 'Bad Fail') one compulsory course, the Board may exceptionally allow progression to the second year. Exceptional progression will be at the sole discretion of the Board. If a candidate fails both of these compulsory courses they will not be allowed to progress to year two. If a candidate has a 'Bad Fail' in one or both courses they will not be allowed to progress to year two.

A student shall normally be entitled to re-sit any failed courses only (on one occasion) and at the next normal opportunity. The School may consider an application for repeat tuition in any failed courses from a student. Results obtained at re-sit shall bear their normal value.

MSc in Finance (part-time)

Programme Code: TMFI

Department: Finance

For students starting this programme of study in 2019/20 Academic year programme lasting 21 months part-time (evenings). Students must take two full unit compulsory courses in the first year and four of the half-unit options available in the second year. They must submit a dissertation in one of the optional half-unit courses and take an examination in the other three half-unit courses.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences

Programme Code: TMHECSEX2

Department: Health Policy

For students starting this programme of study in 2020/21 24 month modular programme. Students take five compulsory half unit courses and options to the value of 1.5 units.

Paper Course number, title (unit value)

Year 1

Paper 1 HP4C1E Economic Analysis for Health Policy (0.5)

Paper 2 HP4C2E Quality and Outcomes in Cardiovascular Sciences (0.5)

Paper 3 HP4C3E Economic Evaluation in Health Care (0.5)

Paper 4 HP4C4E Systematic Review and Meta-analysis (0.5)

Year 2

Paper 5 HP4C5E Using Health Economics to Analyse and Inform Policy and Practice (0.5)

Paper 6 Courses to the value of 1.5 unit(s) from the following:

HP4A1E Financing Health Care (0.5)

HP4A2E Health Administration and Management (0.5) (not available 2020/21)

HP4B3E Measuring Health System Performance (0.5)

HP4B5E Statistical Methods in Health Care Economic Evaluation (0.5)

HP4B7E Advanced Health Economics (0.5)

HP4D1E Introduction to Management in Health Care (0.5)

HP4D2E Principles of Health Technology Assessment (0.5)

HP4D5E Research Design for Evaluating Health Programs and Policies (0.5)

HP4D6E Behavioural Insights for Health Incentive Design (0.5)

Classification:

For students starting **in or after** the 2018/19 academic year:

Students will take a total of four units of courses. All four units will count towards the calculation of the overall award according to the conditions set out in the Classification Scheme listed above.

Eight marks count towards classification. The lowest mark of the optional courses will automatically be excluded from the degree classification, unless it is a Bad Fail mark at the point of classification in which case Paragraph 3.1.1 of the Classification Scheme shall be applied. The mark excluded from the classification

can be a fail (but not a Bad Fail. Any Bad Fail mark will need to be retaken before an award can be made).

Progression:

Students wishing to defer sitting one or more examinations must seek permission according to the Regulations for Taught Masters Degrees. <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForTaughtMasters-InOrAfter2009-10.pdf> Students must normally pass a minimum of three out of the four compulsory half units in Year One to be able to proceed to Year Two. The Sub-Board Chair/Programme Director has the discretion to consider progression where a student only passes two out of the four compulsory half unit courses. Students are permitted to re-sit failed exams in line with the School's Regulations for Taught Masters Degrees <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForTaughtMasters-InOrAfter2009-10.pdf>.

Diploma:

This Diploma is classified according to the Scheme for the Award of a Diploma <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeDiploma.pdf>. Students may be eligible for the award of a Diploma if, as a result of exceptional and unforeseen circumstances, they must leave the MSc programme after completing the four compulsory half units in Year One and two half units in Year Two. All courses count towards the degree classification. A Pass mark of 50 must be achieved in all courses for students to achieve an overall Pass in the Diploma. Students wishing to defer sitting one or more examinations must seek permission according to the Regulations for Diplomas <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForDiplomas.pdf>. Students are permitted to re-sit failed exams in line with the School's Regulations for Diplomas <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForDiplomas.pdf>.

Certificate:

Students may be eligible for the award of a Certificate if, as a result of exceptional and unforeseen circumstances, they must leave the MSc programme after completing the four compulsory half units in Year One. The Certificate is classified on a Pass/Fail basis only. A Pass mark of 50 needs to be achieved in all courses for students to be eligible for the award of the Certificate. Higher marks in one course cannot compensate a Fail mark in another course. Students wishing to defer sitting one or more examinations must seek permission according to the Regulations for Certificates <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForCertificates.pdf>. Students are permitted to re-sit failed exams in line with the School's Regulations for Certificates <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForCertificates.pdf>.

Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences

Programme Code: TMHECSEX2

Department: Health Policy

For students starting this programme of study in 2019/20 24 month modular programme. Students take five compulsory half unit courses and options to the value of 1.5 units.

Paper	Course number, title (unit value)
Year 1	
Paper 1	HP4C1E Economic Analysis for Health Policy (0.5)
Paper 2	HP4C2E Quality and Outcomes in Cardiovascular Sciences (0.5)
Paper 3	HP4C3E Economic Evaluation in Health Care (0.5)
Paper 4	HP4C4E Systematic Review and Meta-analysis (0.5)
Year 2	
Paper 5	HP4C5E Using Health Economics to Analyse and Inform Policy and Practice (0.5)
Paper 6	Courses to the value of 1.5 unit(s) from the following:
	HP4A1E Financing Health Care (0.5)
	HP4B3E Measuring Health System Performance (0.5)
	HP4B7E Advanced Health Economics (0.5)
	HP4D1E Introduction to Management in Health Care (0.5)

Executive MSc in Health Economics, Policy and Management

Programme Code: TMHEPMEX

Department: Health Policy

For students starting this programme of study in 2020/21

Students take four compulsory half unit courses, options to the value of two units, and a dissertation.

Paper	Course number, title (unit value)	
Year 1		
Paper 1	HP4A1E	Financing Health Care (0.5)
Paper 2	HP4A4E	Health Economics (0.5)
Paper 3	HP4D1E	Introduction to Management in Health Care (0.5)
Paper 4	HP4A3E	Resource Allocation and Cost-effectiveness Analysis (0.5)
Year 2		
Paper 5	HP4B9E	Dissertation in Health Economics, Policy and Management (0.5)
Paper 6	Courses to the value of 2.0 unit(s) from the following:	
	HP4A2E	Health Administration and Management (0.5) (not available 2020/21)
	HP4B1E	Pharmaceutical Economics and Policy (0.5)
	HP4B2E	Health Care Quality Management (0.5)
	HP4B3E	Measuring Health System Performance (0.5)
	HP4B4E	Principles of Evidence-Based Medicine and Clinical Trials (0.5)

HP4B5E Statistical Methods in Health Care Economic Evaluation (0.5)

HP4B7E Advanced Health Economics (0.5)

HP4D2E Principles of Health Technology Assessment (0.5)

HP4D6E Behavioural Insights for Health Incentive Design (0.5)

Classification

Eight marks count towards classification: the four compulsory courses in Year One, the dissertation, and the best three marks from the optional courses in Year Two. The lowest mark of the optional courses (listed at Paper 6 in the programme Regulations) will automatically be excluded from the marks that will count towards the degree classification. Any failed or Bad Failed courses that count towards classification will be treated in accordance with paragraph 3.1 of the Classification Scheme above. A degree cannot be awarded where a candidate receives a Bad Fail mark in any course.

Progression

Students wishing to defer sitting one or more examinations must seek permission according to the Regulations for Taught Masters Degrees. <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForTaughtMasters-InOrAfter2009-10.pdf> Students must normally pass a minimum of three out of the four compulsory half units in Year One to be able to proceed to Year Two. MSc in International Strategy and Diplomacy

Programme Code: TMISDIP

Department: International Relations

For students starting this programme of study in 2020/21 Full-year programme. Students take 2.5 units of compulsory courses and a 1.5 unit dissertation.

Paper	Course number, title (unit value)
Paper 1	IR442E Diplomacy and Challenges (1.0)
Paper 2	IR443E Strategy in a Changing World (1.0)
Paper 3	IR444E Strategy in Action (0.5)
Paper 4	IR496E Dissertation: MSc International Strategy and Diplomacy (1.5 units) (1.5)

Executive LLM

Programme Code: TMLL2EX

Department: Law

For students starting this programme of study in 2020/21

1. The general regulations for MA and MSc Degrees and the Code of Practice for Taught Masters Programmes in the online Calendar apply to the Executive LLM programme except in the event of inconsistency when these regulations for the Executive LLM take priority.

2. In order to obtain the Degree, students must complete eight Executive LLM courses (see list below). Students must complete the requirements as a part-time student over a period of four years, or with the approval of the Programme Director within a period of six years. The minimum period within which the Degree can be completed is three years.

3. Alternative exit points are available to students who are not able to complete the Degree. An LSE Diploma in Legal Studies is available on completion of six courses and a Certificate of Legal Studies on the completion of four courses. There is no minimum period for completion of the alternative exit points of Certificate of Legal Studies or Diploma in Legal Studies. Please see the footnote at the bottom of this regulation for more information.

4. Courses should be chosen from the list below and are subject to availability as not every course will be offered each year. Subject to the availability of teaching staff, it is intended that every course be offered at least once within the four year degree period. No other courses at LSE or elsewhere may be taken as part of the Executive LLM programme.

Intensive Teaching

5. The Executive LLM courses will be taught in short intensive week-long sessions, which will typically be taught in the first half of April, September and December. Each course will provide between 24 and 26 hours of contact teaching time. Teaching will normally run from Monday to Friday. However, in the exceptional event where a course cannot be taught on the set weekday/s (e.g. due to last minute teacher illness), teaching may be extended to the Saturday and Sunday morning of that week. Accordingly, students are expected to book trains or flights for the day before teaching commences and should, where possible, book return trains or flights on the Sunday afternoon or evening following the completion of the course.

6. Where there is student demand we may elect also to offer some courses in two intensive weekends. The two weekends will not be

more than four weekends apart. Where courses are offered in the intensive weekend format the same course will also be offered in week-long intensive format at least once every four years.

Payment of Fees

7. All Executive LLM offer holders will be required to pay a Registration Fee within 14 days of receiving their offer of admission. The registration fee is non-refundable. Only on receipt of the registration fee, may students register onto the programme. Registered students are then required to pay a per course tuition fee in advance of their chosen course date, to secure their place. Students will only be permitted to attend a module if payment is received in time. Fee payment deadlines can be found at: lse.ac.uk/intranet/LSEServices/financeDivision/feesAndStudentFinance/Paying%20fees/Executive%20programmes.aspx#llm

8. The registration fee is non-refundable. If you withdraw from the course before starting a session or are unable to attend a session for which you have registered, all module fees will be credited to a module in a later session. You must inform the Programme Manager if you are unable to attend a module you are registered for. In exceptional circumstances, at the Director's discretion, the funds paid for that session will be refunded. Changes in fee levels may occur over the course of the programme. The student will remain liable for any difference between the fees chargeable at the later session and the fee credit from the module which the student withdrew from. Module fees are non-refundable, and will not be credited to another session, if you have attended classes but withdraw before the assessment.

9. It is our intent to offer each advertised module at least once during the four year degree period. This may not always be possible due, for example, to teacher illness or resignation. It is possible that a module may need to be cancelled at short notice, such as where the teacher is unavailable or participant numbers are very low. If this happens, students will be given the option of taking another module during the same session or, alternatively, the fees paid towards that module will be held in credit for your next chosen module/session or refunded if preferred. Students will be informed of the withdrawal of a module no later than two weeks prior to the commencement of the module.

Assessment

10. All Executive LLM courses are assessed by either take-home examination or 8,000 word extended essay.

11. To comply with the Department's writing requirement at master's level, all students are required to write one extended essay of 8,000 words as the assessment for one of their courses to obtain the Degree, the Diploma or the Certificate. Students are not permitted to take more than three courses assessed by extended essay to obtain the Degree or the Diploma or more than one course assessed by extended essay to obtain a Certificate.

12. Extended essays must not exceed the set word limit and must be submitted by a set deadline. Students must provide evidence of original work or a capacity for critical analysis. Students will be required, at the time of submission of their work, to sign a statement on plagiarism. An oral examination may be held if the examiners so determine.

13. The take-home examinations will be set two months after the completion of the intensive teaching. The date of the examination will be provided at the date courses are available for selection. They will be uploaded and submitted electronically.

14. All students are required to write an extended essay of 8,000 words as the assessment for one of their courses to obtain the Degree, the Diploma or the Certificate. Students are not permitted to take more than three courses assessed by extended essay to obtain the Degree or the Diploma or more than one course assessed by extended essay to obtain a Certificate. The extended essay topic will be set by the course teacher. The student may propose essay topics and ideas to the teacher.

15. All students will be required to be online during the examination period in case there is any need to contact them.

16. Students will be able to re-sit a course examination once. A re-sit examination will be set as soon as possible after the student is notified of the failure. At the Programme Director's sole discretion in lieu of a re-sit or deferred examination the student may be

required to submit an 8,000 word essay. This can only occur when the student has not already completed the maximum of three 8,000 word essays.

17. Any student who fails an exam twice in the same course will not be able to proceed to complete the Executive LLM programme. Students will not be able to proceed to take further courses if at the first sit and the re-sit examination are both bad fails or if the failure is not a bad fail but the student has failed another course following the re-sit. If such a student has already successfully completed 4 courses or 6 courses prior to such a failure, the student will be awarded a Certificate of Legal Studies or Diploma of Legal Studies.

Registration

18. The maximum period of registration on the programme is six years. Therefore completion of all the degree requirements (or Diploma, Certificate) must be within a six year period.

Course Completion Rate

19. Students will be expected to take one to two courses per year. Any student who fails to take a course for a two year period will be asked to provide reasons for the failure to complete courses. Any student who following such a request either fails to provide a response to the Programme Director or fails to complete a course in the year following the giving of these reasons, may be deregistered from the programme.

Degree Certificate

20. Students who successfully complete the Executive LLM examination requirements may elect to have one of the following titles attached to their degree certificate if, in the opinion of the Programme Director of the LLM, the title reflects the course of study followed by the student. This would mean taking a minimum of 4 courses within a specialist area. The possible titles are listed below with the courses attached to those areas listed with them. If no such election is made, the LLM degree certificate will state 'LLM' without further specification.

Paper Course number, title (unit value)

Papers 1, 2, 3 & 4	Corporate and Commercial Law
LL400E	European Capital Markets Law (0.5)

Exit Options

Diploma

This diploma is classified according to the Scheme

for the Award of a Diploma, as a 3 unit programme subject to the following provisions. Students wishing to earn a diploma will have registered as Executive LLM students and then cease their studies after completing six courses (3 full units). All courses count towards the diploma classification. A Pass mark of 50 must be achieved in all courses for students to achieve an overall Pass in the diploma. Assessments for each of the courses will take place at the beginning of the next teaching session. Students wishing to defer attempting one or more assessments must seek permission according to the General Academic Regulations no later than eight weeks prior to the assessment date except in the case of exceptional circumstances, as set out in the General Academic Regulations. Students are permitted to repeat failed assessments in line with the School's General Academic Regulations and Regulations for Diplomas.

Certificate

Students wishing to earn a certificate will have registered as Executive LLM students and then cease their studies after completing four courses (2 full units). The certificate is classified on a Pass/Fail basis only. A Pass mark of 50 needs to be achieved in all courses for students to be eligible for the award of the certificate. Higher marks in one course cannot compensate a Fail mark in another course. Students wishing to defer attempting one or more assessments must seek permission according to the General Academic Regulations no later than eight weeks prior to the assessment date except in the case of exceptional circumstances, as set out in the General Academic Regulations. Students are permitted to repeat failed assessments in line with the School's General Academic Regulations and Regulations for Certificates.

Executive Global MSc in Management

Programme Code: TMGLMG

Department: Management

For students starting this programme of study in 2020/21 A 17 month programme. Students take eight compulsory half unit courses (four units in total) and one non-assessed courses in Foundations of Management 2: Financial Control and Governance (modular) (MG457E).

Paper **Course number, title (unit value)**

Year 1

Paper 1	MG440E	Managerial Economics (modular) (0.5)
Paper 2	MG441E	Foundations of Management (modular) (0.5)
Paper 3	MG443E	Organisational Behaviour and Leadership (modular) (0.5)
Paper 4	FM475E	Financial Management (modular) (0.5)
Paper 5	MG445E	Marketing Strategy (modular) (0.5)
Additional course	MG457E	Foundations of Management 2: Financial Control and Governance (modular) (0.0)

Year 2

Paper 6	MG446E	Strategy, Organisation and Innovation (modular) (0.5)
Paper 7	MG447E	Foreign Direct Investment and Emerging Markets (modular) (0.5)
Paper 8	MG498E	Dissertation/Capstone Project (modular) (0.5)

Executive Global Masters in Management - Progression Rules

Candidates who attain at least a Pass grade in MG440E, MG441E and MG443E will be eligible to proceed into the second year. FM475E and MG445E

are not required for progression.

A student who does not meet this criterion must resit all failed/deferred papers in accordance with the resit process detailed below. If, following the resit attempt, a student:

- has attained at least a Pass grade in each of the first year papers, he/she will be eligible to proceed into the second year.
- has attained at least a Pass grade in at least one of the first year papers, he/she will be eligible to proceed into the second year:
 - at the discretion of the Chair of the Sub-Board of Examiners; and
 - subject to ratification by the Graduate School Board of Examiners (GSBE).

• Has failed all of the first year papers, he/she will not be eligible to proceed into the second year, as he/she will no longer be able to successfully complete the programme according to the School's Scheme for the Award of a Taught Master's Degree (four units). The marks of any student who fails up to two papers over the course of the programme will be subject to the penalty rules stipulated at paragraph 3.2 of the School's Scheme for the Award of a Taught Master's Degree (four units).

Executive Global Masters in Management - Resit Process

A student shall normally be entitled to re-sit any failed courses only (on one occasion).

For first year courses required for progression, where the individual assessment takes the form of an assignment or take home exam, once grades have been ratified, the faculty member responsible for the failed first year course will set the new paper and deadline for re-submission to take place as soon as possible and before the beginning of the second year. Results for resits and any subsequent progression will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course.

The results of first year courses FM475E and MG445E will be formally ratified by the Sub-Board of Examiners and Graduate School Board of Examiners in November. If it is determined that as a result of a fail in one or both of these courses an award cannot be made the faculty member responsible for the failed course will set the new paper and deadline for re-submission to take place as soon as possible. A candidate resitting these courses cannot graduate until the July Sub-Board and Graduate School Board of Examiners has met to ratify their results.

For second year courses, once grades have been ratified by the Sub-Board of Examiners and it is determined that an award cannot be made, the faculty member responsible for the failed second year course will set the new paper and deadline for re-submission to take place as soon as possible. Results for resits and subsequent classification will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course. Resits for second year courses will result in delayed Graduation.

Executive Global MSc in Management

Programme Code: TMGLMG

Department: Management

For students starting this programme of study in 2019/20

A 17 month programme. Students take eight compulsory half unit courses (four units in total) and one non-assessed courses in Foundations of Management 2: Financial Control and Governance (modular) (MG457E).

Paper	Course number, title (unit value)

Paper 3	MG443E Organisational Behaviour and Leadership (modular) (0.5)
Paper 4	FM475E Financial Management (modular) (0.5)
Paper 5	MG445E Marketing Strategy (modular) (0.5)
Additional course	MG457E Foundations of Management 2: Financial Control and Governance (modular) (0.0)

Year 2

Paper 6	MG446E Strategy, Organisation and Innovation (modular) (0.5)
Paper 7	MG447E Foreign Direct Investment and Emerging Markets (modular) (0.5)
Paper 8	MG498E Dissertation/Capstone Project (modular) (0.5)

Executive Global Masters in Management - Progression Rules

Candidates who attain at least a Pass grade in MG440E, MG441E and MG443E will be eligible to proceed into the second year. FM475E and MG445E are not required for progression.

A student who does not meet this criterion must resit all failed/deferred papers in accordance with the resit process detailed below. If, following the resit attempt, a student:

- has attained at least a Pass grade in each of the first year papers, he/she will be eligible to proceed into the second year.
- has attained at least a Pass grade in at least one of the first year papers, he/she will be eligible to proceed into the second year:
 - at the discretion of the Chair of the Sub-Board of Examiners; and
 - subject to ratification by the Graduate School Board of Examiners (GSBE).
- Has failed all of the first year papers, he/she will not be eligible to proceed into the second year, as he/she will no longer be able to successfully complete the programme according to the School's Scheme for the Award of a Taught Master's Degree (four units). The marks of any student who fails up to two papers over the course of the programme will be subject to the penalty rules stipulated at paragraph 3.2 of the School's Scheme for the Award of a Taught Master's Degree (four units).

Executive Global Masters in Management - Resit Process

A student shall normally be entitled to re-sit any failed courses only (on one occasion).

For first year courses required for progression, where the individual assessment takes the form of an assignment or take home exam, once grades have been ratified, the faculty member responsible for the failed first year course will set the new paper and deadline for re-submission to take place as soon as possible and before the beginning of the second year. Results for resits and any subsequent progression will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate

School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course.

The results of first year courses FM475E and MG445E will be formally ratified by the Sub-Board of Examiners and Graduate School Board of Examiners in November. If it is determined that as a result of a fail in one or both of these courses an award cannot be made the faculty member responsible for the failed course will set the new paper and deadline for re-submission to take place as soon as possible. A candidate resitting these courses cannot graduate until the July Sub-Board and Graduate School Board of Examiners has met to ratify their results.

For second year courses, once grades have been ratified by the Sub-Board of Examiners and it is determined that an award cannot be made, the faculty member responsible for the failed second year course will set the new paper and deadline for re-submission to take place as soon as possible. Results for resits and subsequent classification will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course. Resits for second year courses will result in delayed Graduation.

Executive Master of Public Administration

Programme Code: TMMPAEX

Department: School of Public Policy

For students starting this programme of study in 2020/21

The EMPA is a 19 month programme. Students must take courses to the value of eight half units as set out below.

Paper	Course number, title (unit value)
Year 1	
Paper 1	PP4G8E Public Policy in Practice Workshop I (EMPA) (0.5) #
Paper 2	PP478E Political Science and Public Policy (0.5) #
Paper 3	PP455E Empirical Methods for Public Policy (0.5) #
Paper 4	PP4G9E Public Policy in Practice Workshop II (EMPA) (0.5) #
Year 2	
Paper 5	PP440E Economic Policy Analysis (0.5) #
Papers 6 & 7	Courses to the value of 1.0 unit(s) from the following:
	PP410E Public Economics for Public Policy (0.5) #
	PP421E Global Market Economics (0.5) #
	PP454E Development Economics (0.5) #
	PP488E Regulatory Analysis (0.5) #
	PP4J5E Fiscal Governance and Budgeting (0.5) #
	PP4V8E Policy Paper (0.5) #
Paper 8	PP409E Public Policy in Practice Workshop III (EMPA) (0.5) #

means there may be prerequisites for this course. Please view the course guide for more information. Students who achieve passing grades (50 and above) in at least 6 half units are eligible for the award of Diploma. Students can opt for this award either once they have completed six courses (i.e. all courses in Year One plus two further half units) or once they have completed the programme if they are not eligible for the award of the degree. The Diploma is classified according to the Scheme for the Award of a Diploma. Students who have achieved passing grades (50 and above) in at least 4 half units are eligible for the award of Certificate. The student is classified on a Pass/Fail basis only. Higher marks in one course cannot compensate a Fail mark in another course. The award of a Certificate or Diploma is subject to the application of the General Academic Regulations

and the Certificate/Diploma regulations and classification schemes. The Certificate and Diploma are final exit awards with no option to subsequently be awarded the degree of Executive Master of Public Administration or Executive Master of Public Policy. Candidates who attain at least a Pass grade in each of the Year 1 courses PP4G8E, PP478E and PP455E will be eligible to progress to Year 2. The Year 1 course PP4G9E will not count towards progression but the grade will count towards the final degree classification.

Students wishing to defer the submission of one or more assessment components must seek permission according to the Regulations for Taught Master's Degrees prior to the assessment due date, except in the case of unforeseen and exceptional circumstances. Students deferring one or more assessment components in Year 1 may exceptionally progress to Year 2 and submit any deferred assessment at the next normal opportunity, if they complete and pass two of the three half units PP4G8E, PP478E and PP455E in Year 1.

Students failing one but not more than one of PP4G8E, PP478E and PP455E in Year 1 will normally be able to progress to Year 2, although this fail will count toward their degree classification according to the Scheme for the Award of a Taught Master's Degree. Students failing more than one of PP4G8E, PP478E and PP455E in Year 1 have to re-sit relevant assessment components and pass the required number of half units before they can progress to Year 2. Students are permitted to re-sit failed exams in line with the School's Regulations for Taught Master's Degrees.

The Sub-Board may recommend to the Graduate School Board of Examiners (GSBE) that a student can progress to year two of the programme even if they have not met the normal application of the progression rules. This can only be done on an exceptional basis where:

- (a) the Sub-Board has determined that a student has demonstrated that their progression has been affected by circumstances beyond their control through the exceptional circumstances procedure and;
- (b) the GSBE approves the Sub-Board's recommendation.

Executive Master of Public Administration

Programme Code: TMMPAEX

Department: School of Public Policy

For students starting this programme of study in 2019/20

The EMPA is a 19 month programme. Students must take courses to the value of eight half units as set out below.

MPA Dual Degree (LSE and Hertie)

This programme is 21 months.

Programme Code: TMDMPA4

Department: School of Public Policy

For students starting this programme of study in 2020/21

1.

Route 1

Year 1 at LSE

Before Year 1 All students attend the following MPA introductory course:

PP408 Introduction to Quantitative Methods for the MPA Programme (0.0)

During Year 1 All students must complete the three Compulsory Courses in Papers 1, 2 & 3 below:

Paper 1 PP440 Micro and Macro Economics (for Public Policy) (1.0)

Paper 2 PP455 Quantitative Approaches and Policy Analysis (1.0)

Paper 3 PP478 Political Science for Public Policy (1.0)

Paper 4 Courses to the value of 1.0 unit from the MPA Course List below:

MPA Dual Degree Course List

Note: The course(s) chosen by the student must have a total credit value of 1.0 unit (therefore, either one course with a credit value of 1.0, or two courses which both have a credit value of 0.5).

Year 2 at the Hertie School of Governance

On successful completion of the first year of that programme at LSE, students who have accepted an offer of a dual degree place will transfer to the MPA Dual Degree. See the MPA criteria for progression from Year 1 to Year 2. <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeMPA-InOrAfter2011-12.pdf> Students will follow the MPP programme at Hertie.

2.

Route 2

Year 1 at the Hertie School of Governance

Students will follow the MPP programme at Hertie.

Year 2 at LSE

Students must take courses to the value of four units as set out below:

Paper 1 PP4B3 MPA Capstone Project (1.0)

Papers 2, 3 Plus one of the following:

& 4 PP4V8 Policy Paper (0.5)

And 2.5 units of optional courses from the following:

MPA Dual Degree Course List

Or

PP4B4 MPA Dissertation (1.0)

And 2.0 units of optional courses from the following:

MPA Dual Degree Course List

Or

Courses to the value of 3.0 unit(s) from the following:

MPA Dual Degree Course List

LSE-Bocconi Double Degree in European and International Public Policy & Politics

Year 1 at Bocconi University

The first year is spent at Bocconi University. Students will join the MSc in Politics and Policy Analysis, on their own track. Students are also required to study languages and undertake an internship.

Year 2 at LSE

Students will enrol on the MSc in European and International Public Policy.

MSc in European and International Public Policy (LSE and Bocconi)

Programme Code: TMEIPP2

Department: European Institute

For students starting this programme of study in 2019/20 Students must take two compulsory courses, optional courses to the value of 1.5 units and a dissertation as shown below. Additionally, all students must take EU450 Engaging with Europe: Professional Skills.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Professional development course

EU450	Engaging with Europe: Professional Skills (0.0)
-------	---

Paper 1 Foundation

EU490	Evidence and Analysis in Policy-Making (0.5)
-------	--

Paper 2

Students without some background in European politics and policy-making or economics are strongly encouraged to take one or both of the following to support their studies:

EU409	Basic Economic Concepts for European Political Economy (0.0)
EU4V9	Concepts in Political Science and Public Policy (0.0)

Courses to the value of 1.0 unit(s) from the following:

EU487	European Integration from a Global Governance Perspective (0.5) #
EU488	European Policy-Making and International Cooperation (0.5) #
EU489	Analytical Politics and Policymaking in Europe (0.5)

Paper 3

Optional courses

Courses to the value of 1.5 units from the following: If students wish their optional courses to result in a degree specialism, their chosen optional courses must come to a total value of at least one full unit from that specialism. Courses from the heading 'Methods' cannot result in a specialism.

Public Policy & Policy-Making in Europe

EU421	Policy-Making in the European Union (0.5) #
-------	---

EU425	Interest Representation and Economic Policy- Making in Europe (0.5) (not available 2020/21)
EU464	International Migration: EU Policies and Politics (0.5) #
EU468	The Political Economy of Migration and Spatial Inequality in Europe (0.5) #
EU489	Analytical Politics and Policymaking in Europe (0.5)
EU4A1	The Politics and Policies of 'Brexit': The UK's changing relationship with the European Union (0.5)
GV477	Comparative Public Policy Change (0.5) #
GV4A5	International Migration and Immigration Management (0.5)
LL4CS	Law and Economics of Network Industries (0.5)

Democracy and Governance in Europe

EU420	European Law and Government (0.5) (withdrawn 2019/20)
EU421	Policy-Making in the European Union (0.5) #
EU430	Europeanization: The Comparative Politics of Domestic Change (0.5)
EU473	Informal Governance (0.5) # (withdrawn 2019/20)
EU475	Religious Diversity and Conflict in Europe (0.5) (not available 2020/21)
EU488	European Policy-Making and International Cooperation (0.5) #
EU4A5	Public Opinion in Europe (0.5)
GV450	European Politics: Comparative Analysis (0.5) (not available 2020/21)
GV454	Parties, Elections and Governments (0.5) #
GV4A2	Citizens' Political Behaviour in Europe: Elections Public Opinion and Identities (0.5) # (not available 2020/21)
GV4E8	Conflict and Institutional Design in Divided Societies (0.5)
GV4J4	Citizen Representation and Democracy in the European Union (0.5) (not available 2020/21)
HY411	European Integration in the Twentieth Century (1.0) #
LL4BG	Rethinking EU Law (0.5)
LL4BH	Law and Government of the European Union (0.5) # (not available 2020/21)

European and International Political Economy

EU439	Political and Fiscal Integration and Disintegration in EU Member States (0.5) (not available 2020/21)
EU446	The Political Economy of European Monetary Integration (0.5) #
EU453	The Political Economy of European Welfare States (0.5) #
EU468	The Political Economy of Migration and Spatial Inequality in Europe (0.5) #
EU477	Labour Markets and the Political Economy of Employment in Europe (0.5) # (not available 2020/21)
EU482	Europe in World Trade (0.5)
EU4A4	The Politics of Inequality and Redistribution (0.5)
GI415	Gender and European Welfare States (0.5)
GV4C5	Politics of Economic Policy (0.5) (withdrawn 2020/21)
LL4CS	Law and Economics of Network Industries (0.5)

Europe in the International System

EU431	European Integration from a Global Perspective (0.5) # (withdrawn 2019/20)
EU449	Emerging Markets, Political Transition

	and Economic Development in Central and Eastern Europe (0.5) # (not available 2020/21)
EU457	Culture and Security in Global Politics (0.5)
EU463	European Human Rights Law (0.5) # (withdrawn 2019/20)
EU478	The Culture of European Politics (0.5)
EU484	Europe's Role in Global Migration Governance (0.5)
EU485	Post-Conflict Justice and Reconciliation in Europe and Beyond (0.5)
EU487	European Integration from a Global Governance Perspective (0.5) #
IR416	The EU in the World (1.0) #
IR434	European Defence and Security (0.5) (not available 2020/21)
LL468	European Human Rights Law (0.5)

Regional and Domestic Politics

EU440	The Balkans in Europe: Transition, Democratisation, Integration (0.5) (not available 2020/21)
EU449	Emerging Markets, Political Transition and Economic Development in Central and Eastern Europe (0.5) # (not available 2020/21)
EU476	Politics of Memory: Germany, France, UK and Turkey (0.5) # (not available 2020/21)
EU4A2	Globalisation, Conflict and Post-Conflict Reconstruction (0.5)
GV439	Government and Politics in Central and Eastern Europe (0.5)
GV4B9	The Second Europe (0.5)
LL4Z5	EU State Aid Law (0.5) (not available 2020/21)

Methods

MY421	Qualitative Research Methods (0.5)
MY451	Introduction to Quantitative Analysis (0.5)
MY452	Applied Regression Analysis (0.5) #
EU499	Dissertation (1.0)

Paper 4

LSE-Fudan Double Master's in Financial Statistics and Chinese Economy**Year 1 at LSE**

The first year is spent at LSE. Students will take three compulsory statistics courses, and will also choose courses to the value of two units, from a range of options both within statistics and related areas, with a maximum of one unit's worth of options from outside the Statistics department.

Year 2 at Fudan

Upon successful completion of the first year, students will move to study the second year at the School of Economics at Fudan University. If students don't have an economics background, they will take additional economics courses.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Please refer to the progression rules below

MSc in Statistics (Financial Statistics) (LSE and Fudan)

Programme Code: TMFSEC

Department: Statistics

For students starting this programme of study in 2020/21

Paper 1	ST425	Statistical Inference: Principles, Methods and Computation (1.0) #
Paper 2	ST422	Time Series (0.5) # and ST436 Financial Statistics (0.5) #
Paper 3		Courses to the value of 1.0 unit(s) from the following:

Paper 4	ST405	Multivariate Methods (0.5) #
	ST411	Generalised Linear Modelling and Survival Analysis (0.5) #
	ST416	Multilevel Modelling (0.5) #
	ST418	Non-Linear Dynamics and the Analysis of Real Time Series (0.5) # (not available 2020/21)
	ST429	Statistical Methods for Risk Management (0.5) #
	ST433	Computational Methods in Finance and Insurance (0.5) #
	ST439	Stochastics for Derivatives Modelling (0.5) # (not available 2020/21)
	ST440	Recent Developments in Finance and Insurance (0.5) # (not available 2020/21)
	ST442	Longitudinal Data Analysis (0.5) # (not available 2020/21)
	ST443	Machine Learning and Data Mining (0.5) #
	ST444	Computational Data Science (0.5) #
	ST445	Managing and Visualising Data (0.5)
	ST446	Distributed Computing for Big Data (0.5) #
	ST448	Insurance Risk (0.5) # (not available 2020/21)
	ST449	Artificial Intelligence and Deep Learning (0.5)
	ST451	Bayesian Machine Learning (0.5) #
	MY459	Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #
	MY461	Social Network Analysis (0.5)
	Courses to the value of 1.0 unit from the following:	
	ST405	Multivariate Methods (0.5) #
	ST409	Stochastic Processes (0.5) #
	ST411	Generalised Linear Modelling and Survival Analysis (0.5) #
	ST416	Multilevel Modelling (0.5) #
	ST418	Non-Linear Dynamics and the Analysis of Real Time Series (0.5) # (not available 2020/21)
	ST426	Applied Stochastic Processes (0.5) (not available 2020/21)
	ST429	Statistical Methods for Risk Management (0.5) #
	ST433	Computational Methods in Finance and Insurance (0.5) #
	ST439	Stochastics for Derivatives Modelling (0.5) # (not available 2020/21)
	ST440	Recent Developments in Finance and Insurance (0.5) # (not available 2020/21)
	ST442	Longitudinal Data Analysis (0.5) # (not available 2020/21)
	ST443	Machine Learning and Data Mining (0.5) #
	ST444	Computational Data Science (0.5) #
	ST445	Managing and Visualising Data (0.5)
	ST446	Distributed Computing for Big Data (0.5) #
	ST448	Insurance Risk (0.5) # (not available 2020/21)
	ST449	Artificial Intelligence and Deep Learning (0.5)
	ST451	Bayesian Machine Learning (0.5) #
	FM402	Financial Risk Analysis (0.5) #
	FM404	Forecasting Financial time Series (0.5) # (not available 2020/21)
	FM413	Fixed Income Markets (0.5) #
	FM429	Asset Markets A (0.5) #
	FM441	Derivatives (0.5) #
	FM442	Quantitative Methods for Finance and Risk Analysis (0.5) #
	MA407	Algorithms and Computation (0.5) #
	MA415	The Mathematics of the Black and Scholes Theory (0.5) #
	MA416	The Foundations of Interest Rate and Credit Risk Theory (0.5) #

MA420	Quantifying Risk and Modelling Alternative Markets (0.5) #
MA427	Mathematical Optimisation (0.5) #
MY456	Survey Methodology (0.5) #
MY457	Causal Inference for Observational and Experimental Studies (0.5) #
MY459	Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #
MY461	Social Network Analysis (0.5)

Or other non-ST course(s), with permission.
The total value of all non-ST courses should not exceed one unit.

The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

Progress rules to proceed to year in Fudan:

Students must pass at least three out of four units.

Students that have a one unit fail will need compensation in order to progress (e.g. a mark of 60 in at least one of the three passed units or an aggregate of 165 in those three passed units).

Any student with a fail that is unable to achieve the compensation rules as above must resit the failed course and pass in order to progress.

Any student who receives a Bad Fail mark cannot progress until that Bad Fail has been successfully resat and they then meet the progression rules outlined above. A Bad Fail mark cannot be compensated by other marks.

Students have one opportunity only to resit a failed LSE course.

The full programme must be successfully completed in order to be awarded the double degree. This means students who complete the year at LSE but go on to fail to progress after exhausting all of their attempts or are unable to complete the year at Fudan cannot be awarded an interim degree. I.e. they must successfully complete both LSE and Fudan programmes to achieve an overall award.

LSE-Fudan Double Master's in Financial Statistics and Chinese Economy

Year 1 at LSE

The first year is spent at LSE. Students will take three compulsory statistics courses, and will also choose courses to the value of two units, from a range of options both within statistics and related areas, with a maximum of one unit's worth of options from outside the Statistics department.

Year 2 at Fudan

Upon successful completion of the first year, students will move to study the second year at the School of Economics at Fudan University. If students don't have an economics background, they will take additional economics courses.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

LSE-Sciences Po Double Degree in European Studies

Year 1 at Sciences Po

Students study for the Masters en Affaires Européennes at Sciences Po.

Year 2 at LSE

Students will enrol on **either** the MSc in Political Economy of Europe, **or** MSc in Culture and Conflict in a Global Europe **or** MSc in European and International Public Policy as follows.

MSc in Political Economy of Europe (LSE and Sciences Po)

Programme Code: TMPOECEU2

Department: European Institute

For students starting this programme of study in 2020/21 Full-year programme. Students must take two out of three semi-compulsory courses, optional courses to the value of two units (at least one unit of courses listed under Paper 2) and a dissertation as shown. Additionally, all students must take EU410 Interdisciplinary Research Methods and Design in preparation for the dissertation. Students must also take EU450 Engaging with Europe: Professional Skills as part of their professional development.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Professional development course

EU450 Engaging with Europe: Professional Skills (0.0)

Paper 1 Courses to the value of 1.0 unit(s) from the following:

EU455 Concepts in Political Economy (0.5)

EU491 Political Economy in Theory and History (0.5)

EU492 Political Economy of Integration and Fragmentation in Europe (0.5)

Students without some background in European politics and policy-making or economics are strongly encouraged to take one or both of the following as an additional course to support their studies:

EU409 Basic Economic Concepts for European Political Economy (0.0)

EU4V9 Concepts in Political Science and Public Policy (0.0)

Paper 2 Courses to the value of 1.0 unit from the following:

Political Economy in Action:

EU425 Interest Representation and Economic Policy- Making in Europe (0.5) (not available 2020/21)

EU443 European Models of Capitalism (0.5)

EU446 The Political Economy of European Monetary Integration (0.5) #

EU449 Emerging Markets, Political Transition and Economic Development in Central and Eastern Europe (0.5) # (not available 2020/21)

EU453 The Political Economy of European Welfare States (0.5) #

EU455 Concepts in Political Economy (0.5)

EU467 The Political Economy of the Neoliberal State (0.5)

EU468 The Political Economy of Migration and Spatial Inequality in Europe (0.5) #

EU469 The Political Economy of Finance in Europe (0.5) #

EU477 Labour Markets and the Political Economy of Employment in Europe (0.5) # (not available 2020/21)

EU482 Europe in World Trade (0.5)

EU491 Political Economy in Theory and History

(0.5)

EU492 Political Economy of Integration and Fragmentation in Europe (0.5)

EU4A4 The Politics of Inequality and Redistribution (0.5)

Paper 3 Courses to the value of 1.0 unit from the following:

Institutions, Politics and Policies of the EU:

EU421 Policy-Making in the European Union (0.5) #

EU430 Europeanization: The Comparative Politics of Domestic Change (0.5)

EU439 Political and Fiscal Integration and Disintegration in EU Member States (0.5) (not available 2020/21)

EU464 International Migration: EU Policies and Politics (0.5) #

EU478 The Culture of European Politics (0.5)

EU484 Europe's Role in Global Migration Governance (0.5)

EU487 European Integration from a Global Governance Perspective (0.5) #

EU488 European Policy-Making and International Cooperation (0.5) #

EU489 Analytical Politics and Policymaking in Europe (0.5)

EU4A1 The Politics and Policies of 'Brexit': The UK's changing relationship with the European Union (0.5)

EU4A5 Public Opinion in Europe (0.5)

GV4J4 Citizen Representation and Democracy in the European Union (0.5) (not available 2020/21)

SP441 Politics of Social Policy: Welfare and Work in Comparative Perspective (0.5)

European Identity and Ideas:

EU432 The Philosophy of Europe (0.5) #

EU437 Europe Beyond Modernity (0.5)

EU447 Democracy, Ideology and the European State (0.5)

EU481 The Future: Political Responses to a Challenge (0.5)

GV4A5 International Migration and Immigration Management (0.5)

Regional courses:

EU440 The Balkans in Europe: Transition, Democratisation, Integration (0.5) (not available 2020/21)

EU476 Politics of Memory: Germany, France, UK and Turkey (0.5) # (not available 2020/21)

Paper 2 options list

Paper 4 EU410 Interdisciplinary Research Methods and Design (0.0)

EU499 Dissertation (1.0)

Paper 2 options list

EU425 Interest Representation and Economic Policy- Making in Europe (0.5) (not available 2020/21)

EU443 European Models of Capitalism (0.5)

EU446 The Political Economy of European Monetary Integration (0.5) #

EU449 Emerging Markets, Political Transition and Economic Development in Central and Eastern Europe (0.5) # (not available 2020/21)

EU453 The Political Economy of European Welfare States (0.5) #

EU455 Concepts in Political Economy (0.5)

EU467 The Political Economy of the Neoliberal State (0.5)

EU468 The Political Economy of Migration and Spatial Inequality in Europe (0.5) #

EU469	The Political Economy of Finance in Europe (0.5) #
EU477	Labour Markets and the Political Economy of Employment in Europe (0.5) # (not available 2020/21)
EU482	Europe in World Trade (0.5)
EU491	Political Economy in Theory and History (0.5)
EU492	Political Economy of Integration and Fragmentation in Europe (0.5)
EU4A4	The Politics of Inequality and Redistribution (0.5)

MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po)

Programme Code: TMCCGLEU2

Department: European Institute

For students starting this programme of study in 2020/21

(formerly MSc in Global Europe: Culture and Conflict (LSE & Sciences Po))

Full-year programme. Students must take two compulsory courses, optional courses to the value of two units and a dissertation as shown below. Additionally, all students must take EU410 Interdisciplinary Research Methods and Design in preparation for the dissertation. Students must also take EU450 Engaging with Europe: Professional Skills as part of their professional development.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Professional development course

EU450	Engaging with Europe: Professional Skills (0.0)
-------	---

Paper 1	Courses to the value of 1.0 unit(s) from the following:
	EU447 Democracy, Ideology and the European State (0.5)
	EU457 Culture and Security in Global Politics (0.5)
	EU478 The Culture of European Politics (0.5)
	Students without some background in European politics and policy-making or economics are strongly encouraged to take one or both of the following to support their studies:

EU409	Basic Economic Concepts for European Political Economy (0.0)
EU4V9	Concepts in Political Science and Public Policy (0.0)

Paper 2	Courses to the value of 1.0 unit(s) from the following:
	EU430 Europeanization: The Comparative Politics of Domestic Change (0.5)
	EU432 The Philosophy of Europe (0.5) #
	EU437 Europe Beyond Modernity (0.5)
	EU439 Political and Fiscal Integration and Disintegration in EU Member States (0.5) (not available 2020/21)
	EU440 The Balkans in Europe: Transition, Democratisation, Integration (0.5) (not available 2020/21)
	EU447 Democracy, Ideology and the European State (0.5)
	EU457 Culture and Security in Global Politics (0.5)
	EU458 Public Policy and Cultural Narratives in a Global Europe (0.5)

EU482	Europe in World Trade (0.5)
EU489	Analytical Politics and Policymaking in Europe (0.5)

Progression

1 Students who attain at least a Pass grade in each of their four LSE courses will be eligible to proceed into the second year of the programme.

1.2 A student who has attained a (good) Fail grade in courses to the value of 0.5 units and at least a Pass grade in the remaining courses will be eligible to proceed into the second year.

1.3 A student who has attained a (good) Fail grade in courses to the value of 1.0 unit and at least a Pass grade in the remaining courses may only progress if a mark of at least 60% has been achieved in courses of an equivalent value or an aggregate mark of at least 165 has been achieved in the non-failed courses.

1.4 A student who receives a Bad Fail in any course or who otherwise fails to meet the above criteria for progression will not be able to progress to the second year of the programme and will be entitled to repeat the failed courses at LSE as follows: A student shall normally be entitled to repeat any failed courses only (on one occasion) and at the next normal opportunity, in accordance with the General Academic Regulations. Results obtained following a repeated attempt at an LSE assessment shall bear their normal value but the resit attempt will be capped at the grade of Pass.

1.5 A student who has completed year one and is unable to complete year two of the programme in Fudan will not receive an interim award.

LSE-Fudan Double Degree in the Global Political Economy of China and Europe

Year 1 at LSE

The first year is spent at LSE, studying the MSc in the Global Political Economy of China and Europe.

Year 2 at Fudan

Students will join the MSc in Public Policy at Fudan University.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

MSc in The Global Political Economy of China and Europe (LSE and Fudan)

Programme Code: TMEUCHGPE

Programme Code: TMGLMECO

Department: Media & Communications

For students starting this programme of study in 2019/20

Year 1 at LSE

Students take a total of three LSE units and a dissertation as shown.

Paper 1	MC408	Theories and Concepts in Media and Communications (0.5)
	And one of the following 0.5 unit courses: MC4M1 Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (0.5) or MC4M7 Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis) (0.5) A	
Paper 2	MC411	Media and Globalization (0.5)
Paper 3	Courses to the value of 1.5 unit(s) from the following: GI422 Transnational Sexual Politics (1.0) MC405 Policy and Practice in ICTs and Development (0.5) (withdrawn 2020/21) MC407 International Media and The Global South (0.5) (not available 2020/21) MC416 Representation in the Age of Globalisation (0.5) MC420 Identity, Transnationalism and the Media (0.5) MC423 Global Media Industries (0.5) (not available 2020/21) MC426 Film Theory and World Cinema (0.5) MC428 Media Culture and Neoliberalism in the Global South (0.5) MC429 Humanitarian Communication: vulnerability, discourse and power (0.5) (not available 2020/21) MC433 Technology and Justice (0.5) # MC435 Disruptive Digital Worlds: Competing Economic and Political Economy Explanations (0.5) MC436 Mediating the Past (0.5) MC437 Media, Data and Social Order (0.5) # MC438 Mediated Feminisms (0.5) Any other MSc-level course which is offered in the School, subject to the consent of the candidate's programme director. NOTE: Students can take no	

more than one full unit of courses from outside the department of Media and Communications (non MC-prefixed courses).

Paper 4 MC499 Dissertation: Media and Communications (1.0) B

Year 2 at USC

Students take a total of 24 USC units.

Paper 5 COMM 598 Global Communication Research Practicum (4 USC units)
20 USC units (normally total of 5 courses; all Communication courses 4 units each):
500 Managing Communication (4, Sp/Sm)
501 Communication Management Pro-Seminar (4, Fa/Sp)
502 Strategic Corporate Communication (4, Sp)
504x Seminar in Interpersonal Communication (4, Fa, even years)
505 Communication in Work Settings (4, Fa)
506 Images and Image Management (4, Sp)
507 Information Management (4, Fa)
508x Power, Politics and Conflict in Communication (4, 2 years, Sp)
509x Seminar in Classical Rhetorical Theory (4, Fa)
510 Communication, Values, Attitudes, and Behavior (4, Fa/Sp)
511x Seminar in Contemporary Rhetorical Theory (4, Sp)
512x Seminar in Rhetorical Criticism (4, Fa)
513x Seminar in Neoclassical Rhetorical Theory (4, 2 years, Sm)
514x Seminar: Social Movements as Rhetorical Form (4, 2 years, Sp)
515x Seminar in Postmodern Rhetorical Theory (4, 2 years, Fa)
516x Seminar: Feminist Theory and Communication (4, 2 years, Sp)
517x Seminar in Rhetorical Theory and Culture (4, Sp)
518x American Public Address (4, Sp, odd years)
519x Seminar: Cultural Studies in Communication (4, 2 years, Fa)
520 Social Roles of Communication Media (4, Fa/Sp)
521x Seminar in Argumentation (4, 2 years, Sp)
522x Seminar in Kenneth Burke's Dramatistic Theory (4)
524x Seminar in Small Group Process (4, Sp, even years)
528 Web Designs for Organizations (4, Fa/Sp)
530 Social Dynamics of Communication Technologies (4, Sp/Sm)
531 Communication and the International Economy (4, Fa)
532 Development of American Media Industry (4, Fa)
533 Emerging Communication Technologies (4, Fa/Sp)
534 The Culture of New Technologies (4, Fa/Sp)
535 Virtual Groups and Organizations (4, Fa/Sp)
540 Uses of Communication Research (4, Fa/Sp)
541 Integrated Communication Strategies (4, Sp)
542 Business Strategies of Communication and Entertainment Firms (4, Sp)
543 Managing Communication in the Entertainment Industry (4, Fa)
544 The Arts and New Media (4, Fa)
545 Communication and Global Competition (4, Sp)
546 Seminar in Diffusion Theory and Research (4, 2 years, Sp)
547 Distribution of Recordings: Media, Retail and Online Channels (4, Sp)
548 Issues in Children's Media (4, Sp)
553 Political Economy of Global Telecommunications and Information (4, Sp)
557 Communication Policy in the Global Marketplace

(4, Fa)
558 The International Entertainment Marketplace (4, Fa)
559 Globalization, Communication and Society (4, Fa)
560 Communications Policy (4, Fa/Sm)
562x Cognitive Approaches to Communication (4, 2 years, Fa)
565 Communication Law and Broadcasting (4, Fa/Sp)
566 Communication Law and New Technologies (4, Sp)
567 Internet Policy, Practice and Regulation (4, Fa/Sp)
570 Economics of the Communication Industries (4, Fa)
571 Communications Technologies (4, Fa/Sp)
572 Telephone, Data, and Video Telecommunication Systems (4, Sp)
573 Evaluating Communication Needs (4, Sp)
574 Tele-Media: A Strategic and Critical Analysis (4, FaSp)
575 Advocacy and Social Change in Entertainment and the Media (4, Fa)
576 Communication Strategies for Conflict Management (4, Sm)
580 Media and Politics (4, Fa/Sp)
581 Media in Social Services: Design and Evaluation of Campaigns (4, Fa)
582 International Communication: National Development (4, Sm)
583 Global Entertainment Education Programs (4, Sp)
584 Seminar: Interpreting Popular Culture (4, Fa)
585x Organizational Communication (4, 2 years, Sp)
587 Audience Analysis (4, Fa)
605 Advanced Macro Theories of Communication I (4, 2 years, Sp)
610 Studies in Rhetorical Theory (4, max 8, Fa/Sp/Sm)
618 Mass Media Effects (4, Fa)
620 Studies in Communication Theory (2-4, max 8, Fa/Sp)
625 Theory Construction in Communication (4, Sm)
629 Global Culture (4, Fa)
630 Communication Technology and Social Change (4, Sp)
631x Minds and Media (4, Sp)
635 Economics of Information (4, Sp)
636 Interpretive and Cultural Approaches in Organizational Communication (4, 2 years, Fa)
637 Current Readings in Organizational Communication (4, 2 years, Sp)
638 Global, International and Intercultural Communication in Organizations (4, 2 years, Fa)
640 Communication and Organizational Change (4, Fa)
645 Communication Networks (4, 2 years, Sp)
646 Negotiating Boundaries in Environmental Research (2)
647x Seminar on the Network Society (4, Fa)
599 Special Topics (various special one-time course offerings)

(Fa) means Fall semester

(Sp) means Spring semester

(Sm) means Summer semester

In addition to coursework offered at the Annenberg School of Communication, students may take up to a maximum of 4 units of graduate-level coursework from other schools or departments at the University of Southern California towards their remaining 20 unit requirement, subject to the consent of the candidate's USC adviser.

Footnotes

A: MY452 is an advanced Applied Regression Analysis course offered by the Department of Methodology and must be taken by students who select MC4M7.

Students wishing to select this option need to already have a grounding in quantitative methods and must seek approval from the Programme Director. Approval is also subject to timetabling constraints.

B: The dissertation must be between 10,000 and 12,000 words). Passing MC499 is a requirement for passing the programme.

MSc in Global Media and Communications (LSE and UCT)

Programme Code: TMGLMEC03

Department: Media & Communications

For students starting this programme of study in 2019/20

Year 1 at LSE

Students take a total of three LSE units and a dissertation as shown.

Paper 1	MC408	Theories and Concepts in Media and Communications (0.5)
	And one of the following 0.5 unit courses:	
	MC4M1	Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (0.5) or
	MC4M7	Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis) (0.5) A
Paper 2	MC411	Media and Globalization (0.5)
Paper 3	Courses to the value of 1.5 unit(s) from the following:	
	GI422	Transnational Sexual Politics (1.0)
	MC405	Policy and Practice in ICTs and Development (0.5) (withdrawn 2020/21)
	MC407	International Media and The Global South (0.5) (not available 2020/21)
	MC416	Representation in the Age of Globalisation (0.5)
	MC420	Identity, Transnationalism and the Media (0.5)
	MC423	Global Media Industries (0.5) (not available 2020/21)
	MC426	Film Theory and World Cinema (0.5)
	MC428	Media Culture and Neoliberalism in the Global South (0.5)
	MC429	Humanitarian Communication: vulnerability, discourse and power (0.5) (not available 2020/21)
	MC433	Technology and Justice (0.5) #
	MC435	Disruptive Digital Worlds: Competing Economic and Political Economy Explanations (0.5)
	MC436	Mediating the Past (0.5)
	MC437	Media, Data and Social Order (0.5) #
	MC438	Mediated Feminisms (0.5)
	Any other MSc-level course which is offered in the School, subject to the consent of the candidate's programme director. NOTE: Students can take no more than one full unit of courses from outside the department of Media and Communications (non MC-prefixed courses).	
Paper 4	MC499	Dissertation: Media and Communications (1.0) B

Year 2 at UCT

Paper 5 Students are required to complete a minor dissertation research project or creative production, two compulsory taught courses and two elective taught courses of which no more than one can be at HEQF Level 8 (4000 level).

Compulsory courses

AM4011F/S	Media Internship (HEQF Credits 24, HEQF Level 8)
FAM5013F	Advanced Media Methodology (HEQF

FAM5006W	Credits 24, HEQF Level 9) Master's Media Research Project or FAM5012W Master's Media Creative Production (HEQF Credits 96, HEQF Level 9)
----------	---

Elective courses

Students select one F elective and one S elective course from the list below. Not all electives may be offered every year and only one elective may be on HEQF Level 8 (4000 level). One of the two elective courses may be taken in another cognate UCT department such as the Centre for African Studies, Historical Studies, Political Studies, or Anthropology:	
AM4007F	Narrative Literary Journalism
FAM4010F	Media Markets and Media Strategy
FAM4013F	Political Communication
FAM4017F	Advanced Television Analysis
FAM4032F	Understanding Public Argumentation
FAM4033F	Screenwriting
FAM5039F	Approaches to African Cinema
FAM4004S	Avant-Garde Film
FAM4014S	Political Journalism
FAM4015S	Environmental Documentary
FAM4016S	Wildlife Documentary
FAM4031S	South African Public Rhetoric
FAM4034S	Forms and Theories of Adaptation
FAM5011S	Media and the Public Domain
FAM5016S	Creative Non-Fiction
FAM5036S	Rhetoric of SA Social Memory
FAM5038S	Mobile Media and Communications
FAM5040S	Conceptualising SA Cinema

Students wishing to select this option need to already have a grounding in quantitative methods and must seek approval from the Programme Director. Approval is also subject to timetabling constraints.

B: The dissertation must be between 10,000 and 12,000 words). Passing MC499 is a requirement for passing the programme.

LSE-LSHTM MSc in Health Policy, Planning and Financing

Programme Code: TIHPPF

Department: Health Policy

For students starting this programme of study in 2020/21 Full-year programme taught jointly with the London School of Hygiene and Tropical Medicine (LSHTM). Students must take courses to the value of five units as shown below, and undertake a 10,000 word dissertation (value of one unit). It is mandatory that students take equal number of half-unit value courses (4:4 split) between the two institutions. It is required that exactly two first-term courses are taken at the London School of Hygiene and Tropical Medicine. The dissertation will be completed during the summer.

Course guides for all LSE courses can be accessed via the hyperlinks below. For information about LSHTM courses, the LSHTM module specifications can be viewed here <https://www.lshtm.ac.uk/study/courses/short-courses/modules-london#modules>.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper 1	HP400	Financing Health Care (0.5)
Paper 2	(LSHTM) 1107 Health Services (0.5) or (LSHTM) 1117 Health Policy Process and Power (0.5) A	
Paper 3	Obligation for all students to take one additional	

course to the value of 0.5 units at LSE from the following:

- HP401 Introduction to Health Policy and Politics (0.5) A
- HP403 Health Systems and Policies in Developing Countries (0.5) (not available 2020/21)
- HP420 Health Economics (0.5)
- HP424 Pharmaceutical Economics and Policy (0.5)
- Paper 4 Obligation for all students to take **one** additional course to the value of 0.5 units at LSHTM from the following:
- (LSHTM) 1107 Health Services (0.5)
- (LSHTM) 1117 Health Policy, Process and Power (0.5) A
- (LSHTM) 1123 Issues in Public Health (0.5)
- (LSHTM) 2001 Basic Epidemiology (0.5)

Papers 5 & 6 Two LSE courses from the following:

- HP402 Measuring Health System Performance (0.5) (not available 2020/21)
- HP404 Global Health Policy: Institutions, Actors and Politics (0.5)
- HP405 Social Determinants of Health (0.5) (not available 2020/21)
- HP407 Evidence Review and Synthesis for Decision Making (0.5)
- HP412 Global Health Security (0.5)
- HP421 Economic Analysis for Health Policy in Low- and Middle-Income Countries (0.5) (not available 2020/21)
- HP422 Health Care Economic Evaluation (0.5) B
- HP423 Advanced Health Economics (0.5) #
- HP425 Statistical Methods in Health Care Economic Evaluation (0.5) #
- HP428 Randomised evaluations of health programmes: from design to implementation (0.5)
- HP429 Behavioural Incentive Design in Health and Health Care (0.5)

Another LSE course (not listed above) with permission.

Or any additional LSE course listed under Paper 3:

Paper 3 options list

Papers 7 & 8 Two LSHTM courses from the following:

- (LSHTM) 1127 Evaluation of Public Health Interventions (0.5)
- (LSHTM) 1400 Health Care Evaluation (0.5)
- (LSHTM) 1402 Conflict and Health (0.5)
- (LSHTM) 1403 Organisational Management (0.5)
- (LSHTM) 1501 Economic Evaluation (0.5) B
- (LSHTM) 1503 Globalisation and Health (0.5)
- (LSHTM) 1504 Economic Analysis for Health Policy (0.5)
- (LSHTM) 1606 Health Decision Science (0.5)
- (LSHTM) 1701 Reviewing the Literature (0.5)
- (LSHTM) 1803 Sociological Approaches to Health (0.5)
- (LSHTM) 1808 Health Systems (0.5)
- (LSHTM) 2342 Design and Evaluation of Mental Health Programmes (0.5)
- (LSHTM) 2401 Family Planning Programmes (0.5)
- (LSHTM) 2402 Statistical Methods in Epidemiology (0.5)
- (LSHTM) 2407 Epidemiology of Non-Communicable Diseases (0.5)
- (LSHTM) 2417 Design & Analysis of Epidemiological Studies (0.5)
- (LSHTM) 2437 Epidemiology and Control of Communicable Diseases (0.5)
- (LSHTM) 2459 Current Issues in Safe Motherhood and Perinatal Health (0.5)
- (LSHTM) 2472 Social Epidemiology (0.5)
- (LSHTM) 3135 Spatial Epidemiology in Public Health (0.5)
- (LSHTM) 3189 Ethics, Public Health and Human Rights (0.5)

(LSHTM) 3195 Epidemiology and Control of Malaria (0.5)

(LSHTM) 3198 Applying Public Health Principles in Developing Countries (0.5)

Another LSHTM course (not listed above) with permission.

Paper 9 HP409 Dissertation for MSc Health Policy, Planning and Financing (1.0)

Paper 3 options list

- HP401 Introduction to Health Policy and Politics (0.5)
- HP403 Health Systems and Policies in Developing Countries (0.5) (not available 2020/21)
- HP420 Health Economics (0.5)
- HP424 Pharmaceutical Economics and Policy (0.5)

Footnotes

A: HP401 Introduction to Health Policy and Politics may not be combined with LSHTM 1117 Health Policy, Process and Power.

B: HP422 Health Care Economic Evaluation may not be combined with LSHTM 1501 Economic Evaluation.

means there may be prerequisites for this course.

Please view the course guide for more information.

For any pre-requisites on LSHTM courses, check LSHTM course specifications.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

LSE-UChicago Double Executive Masters in Health Policy

Two-year modular programme resulting in two awards taught across alternating locations, the London School of Economics and Political Science and the University of Chicago. Students must take courses at LSE and the University of Chicago's Harris School of Public Policy as shown below.

Programme Code: TMHECPEX

Department: Health Policy

For students starting this programme of study in 2020/21

LSE: Executive MSc in Health Economics and Policy

Students must take six compulsory courses and a dissertation as shown.

Year 1 at LSE

- December
- Paper 1 HP4E1E Global Health Policy (0.5)
- Paper 2 HP4E2E Paying for Healthcare (0.5)
- Paper 3 HP4E3E Evidence Review and Synthesis (0.5)

Year 2 at LSE

- December
- Paper 4 HP4E4E Cost-effectiveness in Health Care (0.5)
- Paper 5 HP4E5E Economics of the Pharmaceutical Sector (0.5)
- Paper 6 HP4E6E Measuring the Performance of Health Services and Systems (0.5)

Summer

- Paper 7 HP4E7E Dissertation in Health Economics and Policy (1.0)

University of Chicago: Executive MA in Public and Health Policy

Students must take six compulsory courses and a capstone project as shown.

Year 1 at University of Chicago May

Paper 8	Microeconomics for Health Policy I
Paper 9	Statistics for Health Policy
Paper 10	Leadership, Negotiation & Advocacy in Health Policy: Strategies and Tactics

Summer

Paper 11	Capstone Project
	Year 2 at University of Chicago May
Paper 12	Analytical Politics: The Policy-Making Process
Paper 13	Microeconomics for Health Policy II
Paper 14	Health Policy Research Methods

Progression:

Students wishing to defer sitting one or more examinations must seek permission according to the Regulations for Taught Masters Degrees <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForTaughtMasters-InOrAfter2009-10.pdf>. Students must normally pass a minimum of two out of the three LSE half units (papers 1-3) in Year One to be able to proceed to Year Two. The Sub-Board Chair/Programme Director has the discretion to consider progression where a student falls short of this requirement. Students are permitted to re-sit failed exams in line with the School's Regulations for Taught Masters Degrees <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForTaughtMasters-InOrAfter2009-10.pdf>.

Award:

The full programme must be successfully completed in order to be awarded the double degree. This means students who do not progress to Year Two after exhausting all of their attempts at LSE courses or are unable to successfully complete assessments to the satisfaction of either LSE or the University of Chicago cannot be awarded the degree. I.e. Students must successfully complete both LSE and Chicago courses/assessments to achieve an overall award. There is no interim award for partial completion of the programme.

LSE-UChicago Double Executive Masters in Health Policy

HY478	Genesis of the Modern World: Europe, China and India, 1550 - 1840 (1.0) (not available 2020/21)
HY479	Environmental History in a Global Context (1.0) (withdrawn 2020/21)
HY482	National Socialism. Old theories and new research approaches (1.0) (withdrawn 2020/21)
HY483	Land and Conflict in Latin America since 1750 (1.0) (not available 2020/21)
HY485	Germanness in the 20th century: Identity, Politics, and Violence in Germany from the First World War to Re-Unification (1.0)
HY486	Practicing Abolition in the Atlantic World, c. 1807-1870 (1.0)

Economic History:

EH404	India and the World Economy (0.5)
EH408	International Migration, 1500-2000: from slavery to asylum (0.5) (withdrawn 2020/21)
EH413	African Economic Development in Historical Perspective (0.5)
EH428	History of Economics: Making Political Economy into a Social Science (0.5) (not available 2020/21)
EH429	History of Economics: Ideas, Policy and Performativity (0.5)
EH452	Latin American Development and Economic History (0.5)
EH486	Shipping and Sea Power in Asian Waters, c

	1600-1860 (0.5) (not available 2020/21)
	Regarding Economic History (EH) courses only: it may be possible to take further options among EH courses with the agreement of the course teacher responsible and the Academic Coordinator of the Double Degree. One of the above may be replaced by a further course from other LSE departments (subject to agreement with tutor and teacher responsible for the course).
Paper 5	Compulsory Language Requirement Students can fulfil the language requirement of the dual Master's degree in three different ways: 1) By taking two years of language training while at Columbia and the London School of Economics. 2) By taking, and passing, two translation exams. (Both translation exams must be taken at Columbia. See sample translation exams on the CU History Department website). 3) By taking, and passing, one translation exam and studying a language for one year, either at Columbia or at the LSE Language Centre.

LSE-Fudan Double Masters in International Social and Public Policy

Year 1 at LSE

The first year is spent at LSE. Students must take two compulsory courses, options to the value of 2.0 units and a dissertation as shown.

Year 2 at Fudan

Upon successful completion of the first year, students will move to study the second year at Fudan University, Shanghai, China.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Please refer to the progression rules below

MSc in International Social and Public Policy (LSE and Fudan)

SP476	Punishment and Penal Policy (0.5) #
	Relevant outside options subject to agreement by the Programme Director.
Paper 4	SP499 Dissertation - International Social & Public Policy (1.0)

Progression:

Candidates will be awarded the "MSc in International Social and Public Policy" at the end of Year 1 (subject to the relevant classification scheme <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeTaughtMasters.pdf>). Candidates must pass Year 2 at Fudan—in accordance with the rules of that university for fail/pass and retaking where appropriate—in order to be awarded the Fudan degree. Once awarded both of these individual degrees, candidates will be considered as having been awarded the Double Degree.

Students on the Double Degree progress to Year 2 at Fudan unless any of the exceptional circumstances below occur:

- (i.) A student has either deferred or not made a serious attempt in assessment for any course.
 - (ii.) A student has failed courses to the value of more than one unit.
 - (iii.) A student has indicated that they do not intend to make a serious attempt to submit a dissertation at the end of the first year at LSE and/or has not submitted formative work to their dissertation Supervisor.
- The Department will hold an assessment ratification meeting to consider the facts in relation to any of the above circumstances. The meeting will consider any medical and/ or exceptional circumstances presented by a student, before deciding whether to recommend that they should progress to the second year or not. Any recommendation to progress in any of the above circumstances will require approval by the GSBE. The Programme Director will inform the student as soon as possible if they are allowed to progress to the second year.

University of Pennsylvania Law School LLM Visiting Students

A one term (Michaelmas) exchange programme for visiting Penn Law students. The Penn-LSE exchange programme is attached to the LLM programme. Students from Penn Law will spend one term at LSE and choose 4 half-unit courses from the list below. There is no guarantee that students will be able to enrol on any specific course. Penn-LSE exchange students are not here in the main examination period therefore are assessed during Michaelmas term.

Students take half unit courses to the value of two units.

Student will not be required to complete summative assessments

or examinations outside of their term of study. Students will be assessed during their term of study at the LSE.

Students are not permitted to take one unit courses.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Global MSc in Management (CEMS MiM)

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Programme Code: TMGLMGCEMS

Department: Management

For students starting this programme of study in 2020/21 A two-year programme. Students are also awarded the CEMS Master's in International Management (MIM) degree, subject to successful completion of the CEMS MIM requirements. Students take courses to the value of eight units which are spread unevenly over the two years. The programme includes: two units at a partner CEMS Institution (MG410 Term Abroad); CEMS compulsory MG463 CEMS Global Leadership (H); a dissertation; and the course MG488 GMiM Capstone Course - Management in Action (H) taught over both years, Part A (unassessed) in Year 1 and Part B (assessed) in Year 2.

All students are required to attend MG4A1 Introduction to Studying for GMiM.

Year 1**Introductory course**

Paper 1	MG4A1	Introduction to Studying for GMiM (0.0)
	MG458	Foundations of Management I: Organisations and Management Theory (0.5) and MG459 Foundations of Management 2 (0.5)
Paper 2	MG431	Managerial Economics (0.5)
	And either:	
	MY451	Introduction to Quantitative Analysis (0.5)
	or	
	MY452	Applied Regression Analysis (0.5) #
	Or	

Upon satisfactorily demonstrating that they have a degree in economics and have passed, as part of that degree, a course in managerial economics, microeconomics or industrial organisation, students may be exempted from MG431 and will be free to take an elective course, subject to the approval of the Programme Director. Students must select either MY451 or MY452 and a further 0.5 unit from the Elective Courses listed below:

MY451 Introduction to Quantitative Analysis (0.5)

or

MY452 Applied Regression Analysis (0.5) #
and 0.5 units from the Elective Courses listed below:

Elective Courses

Paper 3 MG434 Organisational Behaviour (0.5) **and** MG4E2 Marketing Management (0.5)

Or

Upon satisfactorily demonstrating that they have a degree in marketing, or in management or business administration with a significant concentration in marketing, may be exempted from MG4E2 and will be free to take an elective course, subject to the approval of the Programme Director. Students must select MG434 and a further 0.5 unit from the Elective Courses listed below:

MG434 Organisational Behaviour (0.5)

and 0.5 units from the Elective Courses listed below:

Elective Courses

Paper 4 Electives to the value of 0.5 full units

Elective Courses

Compulsory course

As part of Paper 4, students also take the compulsory unassessed part of MG488:

MG488A GMiM Capstone Course - Management in Action (0.0)

Year 2

Paper 5 MG468 Foundations of Management III: Business Ethics, Corporate Governance and Leadership (0.5) # **and** MG488B GMiM Capstone Course - Management in Action (0.5) #

Paper 6 Courses to the value of two units to be taken at one of the partner CEMS Institutions (<https://www.cems.org/academic-members/our-members/list/>):

MG410 Term Abroad (2.0)

Paper 7 MG463 CEMS Global Leadership (0.5) #

and 0.5 units from the Elective Courses listed below:

Elective Courses

Paper 8 MG469 Extended Essay for Management (0.5) #

Elective Courses

The following elective courses are available to all GMiM students regardless of whether a specialism is taken or not, subject to pre-requisites and course availability:

PP4E5	Innovations in the governance of public services delivery (0.5)
PP4G3	Designing and Managing Change in the Public Sector (0.5)
ST429	Statistical Methods for Risk Management (0.5) #

Or another MSc-level elective course which is offered in the School, subject to approval of the course leader and the Programme Director.

Prerequisite Requirements and Mutually Exclusive Options

1: Before taking AC416 you must take AC480

2: GI407 can not be taken with GI409, GI420

means there may be prerequisites for this course.

Please view the course guide for more information.

SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF MSC MANAGEMENT

The following rules set out what marks are required in order to be eligible to proceed into the second year. Students with the following mark profiles progress as follows:

Pass marks in all first year courses allows progression to year two.

A half unit Fail mark or a half unit Bad Fail mark with at least Pass marks in all other courses will allow progression to year two.

One full unit (or two half units) of Fail marks (which could include no more than one half unit Bad Fail mark) with at least Pass marks in all other courses, including one half unit of Merit marks will allow progression to year two.

Two Bad Fail marks (full or half units) will not allow progression to year two.

Three or more (full or half units) Fails or Bad Fail marks will not allow progression to year two.

Students must resubmit all failed components of assessments in courses in which they receive a Bad Fail mark in order to be eligible for the award of a degree. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

Two Bad Fail marks (full or half units) will not allow progression to year two.

Three or more (full or half units) Fails or Bad Fail marks will not allow progression to year two.

Students must resubmit all failed components of assessments in courses in which they receive a Bad Fail mark in order to be eligible for the award of a degree. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.

Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

Global MSc in Management (MBA Exchange)

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Programme Code: TMGLMG MBA

Department: Management

For students starting this programme of study in 2020/21

A two-year programme. Students take courses to the value of eight units but those units are not necessarily spread evenly over the two years.

The second year includes an extended essay. Students complete the course MG488 GMiM Capstone Course - Management in Action (H) over both years, Part A (unassessed) in Year 1 and Part B (assessed) in Year 2. Students also complete two units at a partner institution (MG410 Term Abroad).

All students are required to attend MG4A1 Introduction to Studying for GMiM.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting

specific prerequisite requirements.

Year 1

Introductory course

- | | | |
|---------|--------------------|---|
| Paper 1 | MG4A1 | Introduction to Studying for GMiM (0.0) |
| | MG458 | Foundations of Management I: Organisations and Management Theory (0.5) and MG459 Foundations of Management 2 (0.5) |
| Paper 2 | MG431 | Managerial Economics (0.5) |
| | And either: | |
| | MY451 | Introduction to Quantitative Analysis (0.5) |
| | or | |
| | MY452 | Applied Regression Analysis (0.5) # |
| | Or | |
| | | Upon satisfactorily demonstrating that they have a degree in economics and have passed, as part of that degree, a course in managerial economics, microeconomics or industrial organisation, students may be exempted from MG431 and will be free to take an elective course, subject to the approval of the Programme Director. LSE-Sciences Po Double Degree in the Political Economy of Development

Students take the first year at Sciences Po and the second year at LSE. At LSE students will follow the programme regulations for the MSc in Development Management.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

MSc in Development Management (LSE and Sciences Po)

Programme Code: TMDMSP

Department: International Development

For students starting this programme of study in 2020/21

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown.

Students who choose to concentrate their electives and

dissertation in a certain topic area may elect to have a specialism in "African Development", "Population Studies" or "Applied Development Economics" attached to their degree certificate and transcript. To obtain the specialism indication, students must meet the criteria below.

African Development: students must take DV418 and DV435, and their dissertation topic must be approved as being appropriate for this specialism.

Population Studies: students must take DV444 and DV456, and their dissertation topic must be approved as being appropriate for this specialism.

Applied Development Economics: enrolment capacity is limited and may be based on performance on a pre-quiz which will enable students to take at least two of DV490, DV491, DV492, and their dissertation topic must be approved as being appropriate for this specialism.

If no such election is made, the degree certificate will state "Development Management" without further specification.

Paper 1 DV431 Development Management (1.0)

Papers 2 & 3 Courses to the value of 2.0 unit(s) from the following:

Footnotes

A: GY450 is non-assessed but compulsory.

B: DV407 is a capped course with priority for International Development students so admission is not guaranteed.

C: DV421 is a capped course with priority for International Development students so admission is not guaranteed.

Taught Master's Course Guides

AC411 Half Unit

Accounting, Strategy and Control

This information is for the 2020/21 session.

Teacher responsible: Prof Wim Van der Stede OLD 2.18, supported by various professors who teach blocks of materials on the course.

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Accounting and Finance and MSc in Accounting, Organisations and Institutions. This course is available with permission as an outside option to students on other programmes where regulations permit. Other students may be admitted only with the agreement, in writing, of the MSc Programme Director, if they have sufficient relevant background knowledge.

Course content: This course provides an advanced overview of current theoretical and practical developments in the area of organisational control, which is an essential function of management to ensure that the organisation's objectives and strategies are carried out effectively. Good management control increases the probability of organisational success.

Specifically, the course discusses what it means to have an organisation be in control, what alternatives managers have for ensuring good control, and how managers should choose from among various control system alternatives. Then the course turns to focusing on each of the elements of financial control systems, which provide the dominant form of control in the vast majority of decentralised organisations. These elements include financial target setting, performance measurement and evaluation and the assignment of various forms of organisational rewards, such as bonuses and promotions. The latter part of the course extends these key notions of management control from the intra-organisational level to the inter-organisational level, highlighting some of the difficulties involved in organisational control of new, fluid, inter-organisational settings and configurations, such as joint-ventures and various types of alliances, often involving global alliance partners.

The course will cover the following topics:

- Strategy and the design of management control systems, including strategic and operational plans and budgets
- Management control alternatives, including results controls, and organisational architecture
- Decision rights and results accountability in decentralised organisations
- Incentive compensation systems, including short-term and long-term incentive plans
- Performance measurement and evaluation, including objective and subjective performance evaluations
- Management control in inter-organisational relationships, including joint-ventures

As a final note, the discipline of management accounting is often partitioned into (1) management control systems and (2) cost and management accounting systems, where the latter is the key focus of another course, AC415. AC411 can, but is not required, to be taken with AC415. Students can take either AC411 or AC415, or both.

Teaching: Teaching is delivered in two weekly 90-minute sessions over 11 weeks across Michaelmas Term. Each session contains a variety of conceptual material, discussion, and application through pertinent examples or cases. This year, some or all of this teaching may be delivered using virtual classes as an alternative to face-to-face teaching.

Specifically, AC411 consists of 10 principal topics delivered in two sessions of 1.5 hours each week. The first session each week typically provides an introduction, conceptual analysis, and discussion of the key facets of the topic. The second session offers a further discussion and expansion of the issues through case study analysis and real-world applications. The case study discussions permit the exploration of management control issues

in a broad range of settings. The case method of instruction requires good advance preparation by the students, and thus students are expected to have done the recommended readings and to have read and thought about the case before the session. Blocks of sessions are taught by various professors who are experts in the relevant topic areas and the subject of management controls generally.

Formative coursework: Students are expected to prepare for each session in advance, having done the assigned readings and having prepared the assigned cases.

Indicative reading: A detailed reading list is laid out for each session on the syllabus.

Assessment: Exam (60%, duration: 2 hours) in the January exam period.

Essay (20%) in the MT.

Project (20%) in January.

Students are required to complete two essays during MT (totalling 20% of the mark for the course), a group project, due in late January (20%), and a final exam in LT week 0 in early January 2021 (60%),

AC412 Half Unit

Accountability, Organisations and Risk Management

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Power KSW.3.12 and Dr Tommaso Palermo KSW.3.07

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Accounting and Finance, MSc in Economy, Risk and Society, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Risk and Finance.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Other students may be admitted only with the agreement, in writing, of the MSc (Accounting) Programme Director.

Pre-requisites: Students must have completed FM422E and FM423E.

Course content: This is an advanced course focusing on the organisational and institutional settings within which risk is managed.

First, the course explores the intersections of risk and corporate governance, by focusing on the risks that arise at the top management and board of directors level, including risks of misconduct, gatekeeper failure, performance-insensitive executive pay and non-diverse board composition. Second, the course deals with key issues in organisational responses to risk and uncertainty, including the impact of disasters and accidents, and the growing

formalisation and standardisation of risk management practice and the increasing emphasis on resilience.

The overall purpose of the course is to provide students with a critical appreciation of the management of risk as an organisational and social process. The course is necessarily cross-disciplinary, drawing on scholarship within accounting, organisational sociology and regulation studies. The course content is updated yearly to reflect topics of contemporary relevance. Recent examples are risk culture in the financial sector, safety culture in aviation, cybersecurity risks and responses to pandemic crisis.

This course is recommended for students who wish to develop the critical-thinking skills to make strategic decisions about risks, uncertainty and corporate governance, especially those targeting roles in consulting, business management or regulatory agencies. It is equally applicable to develop the skills needed for further academic studies in different areas of the social sciences such as accounting, management, sociology, public administration.

- Interest rate modelling and derivatives
- Credit risk
- Credit derivatives and risk management

Teaching: 30 hours of seminars in the LT.

This course has a reading week in Week 6 of LT.

Formative coursework: Two pieces of written work will be assessed during the term. The grades for this work will not count towards the overall course assessment.

Indicative reading: No single book covers the entire course. Key readings include: Bebchuk & Fried, *Pay Without Performance* (Harvard, 2004); Coffee, *Gatekeepers: The Professions and Corporate Governance* (Oxford, 2006); Hutter & Power (eds) *Organizational Encounters with Risk*, (Cambridge, 2005); Power, *Organized Uncertainty: Designing a World of Risk Management* (Oxford, 2007); Vaughan, *The Challenger Launch Decision*, (Chicago, 1997); Short & Clarke (eds) *Organizations, Uncertainties and Risks* (Westview, 1992); Weick & Sutcliffe, *Managing the Unexpected: Assuring High Performance in an Age of Complexity* (Jossey-Bass, 2007). Power, *Riskwork: Essays on the Organizational Life of Risk Management*, (Oxford, 2016).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

AC415 Half Unit Management Accounting for Decision Making

This information is for the 2020/21 session.

Teacher responsible: Dr Henry Eyring OLD 3.10

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in Accounting and Finance and MSc in Accounting, Organisations and Institutions. This course is available with permission as an outside option to students on other programmes where regulations permit. This course cannot be taken concurrently with **AC490**

Management Accounting, Decisions and Control.

Other students may be admitted only with the agreement, in writing, of the MSc (Accounting) Programme Director if they have sufficient relevant background knowledge.

The course is capped to two sections of around 50 students; ie, 100 total. Enrolment on this course is constrained by section size and the number of sessions available. Students are admitted on the course on a first-come-first-served basis. If the course is over-subscribed, students on the waiting list will continue to be admitted on a first-come-first-served basis as places become available, but MSc students on the Accounting programmes will only then be given priority although cannot be guaranteed a place if no places become available. Therefore, to avoid frustration and possibly being unable to take the course, students wishing to reduce the risk of non-admittance on the course should prioritise their courses and register early for their preferred, "must have" courses. Late registration or changes to earlier course choices

may be unsuccessful.

Pre-requisites: Students must have completed Corporate Finance (FM422E) and FM423E.

Course content: This course is focused on management accounting, which is a key function in organisations that involves developing and using financial and non-financial information to support decision making, not only in a technical sense, but bearing in mind that the way in which management accounting systems are designed and implemented often determines whether employees will be motivated to act in ways that are congruent with the objectives of the organisation.

The discipline of management accounting is often partitioned into (1) cost and management accounting systems and (2) management control systems, where the latter is the key focus of another course, AC411. AC415 can, but is not required to, be taken with AC411. Students can take AC411 or AC415, or both.

Returning to AC415, while financial accounting requires that product cost information be accumulated in particular ways for external reporting, the focus in AC415 is on cost and other accounting and non-accounting information systems that aid managerial decision making. This includes the study of management accounting systems in widespread use today as well as an analysis of the problems associated with these systems in today's business environment (such as their tendency to provide distorted product cost information), as well as approaches to mitigate these problems (eg, activity-based costing; use of non-financial information).

With the above brief overview in mind, this course analyses key concepts which form the discipline of management accounting:

- Product costing and pricing
- Activity-based costing/management (ABC/ABM)
- Profitability and variance analysis
- Transfer pricing including tax considerations for international transactions
- Performance measurement and incentive compensation systems
- Portfolio optimization and the Black-Litterman model
- Dynamic Investment Strategies
- Selecting and Monitoring Portfolio Managers: Mutual funds and hedge funds
- Transactions Costs and Liquidity Risk

Teaching: 30 hours of seminars in the LT.

That is, AC415 is delivered in two sessions of 1.5 hours each week. Each session is conducted in groups of circa 55 students and is almost exclusively taught by way of the case method of instruction. Case studies permit the exploration of management accounting issues in a broad range of settings. The case method of instruction, however, requires good advance preparation by the students, and every person should be ready to contribute to the case discussion when called upon. Students should expect to be "cold called" and not count on being able to hide behind classmates who volunteer to participate.

There is a reading week in week 6 of LT.

Formative coursework: Students are expected to come to each session prepared having done the assigned readings and having prepared the assigned cases.

Indicative reading: A detailed reading list is laid out for each session on the syllabus.

Bhimani, A., C.T. Horngren, S.M. Datar, and M.V. Rajan ("BHDR"), 2019, *Management and Cost Accounting*, (Pearson, 7th Edition); Merchant, K.A., and W.A. Van der Stede, 2017, *Management Control Systems: Performance Measurement, Evaluation, and Incentives* (Pearson, 4th Edition).

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Case assignment (25%) in the LT.

AC416 Half Unit

Topics in Financial Reporting

This information is for the 2020/21 session.

Teacher responsible: Dr Maria Manuel Correia OLD 3.30

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in Accounting and Finance and MSc in Accounting, Organisations and Institutions. This course is available with permission as an outside option to students on other programmes where regulations permit. Other students may be admitted if they have knowledge of financial accounting acquired at undergraduate level, and only with the agreement, in writing, of the MSc (Accounting and Finance) Course Tutor.

The course is capped to four sections of around 50 students; ie, 200 total. Enrolment on this course is constrained by section size and the number of sessions available. Students are admitted on the course on a first-come-first-served basis. If the course is over-subscribed, students on the waiting list will continue to be admitted on a first-come-first-served basis as places become available, but MSc students on the Accounting programmes will only then be given priority although cannot be guaranteed a place if no places become available. Therefore, to avoid frustration and possibly being unable to take the course, students wishing to reduce the risk of non-admittance on the course should prioritise their courses and register early for their preferred, "must have" courses. Late registration or changes to earlier course choices may be unsuccessful.

Pre-requisites: Prior knowledge of financial accounting is assumed. AC480 (Qualitative Methods in Accounting and Finance) is a pre-requisite for students with no/little prior knowledge of financial accounting.

Course content: Corporate financial statements are a key source of information about the economic activities of a firm. This course is intended to enhance the student's ability to relate economic events to financial statements and disclosures. It also seeks to aid in developing a coordinated set of concepts and principles to serve as a framework for analysing a wide variety of financial reporting issues. The goal is to enable students to understand the mapping between underlying economic events and the information in financial statements, and how this mapping affects inferences about the economic activities and position of the firm. The course also explores the regulatory environment and political climate, and how these link with the introduction of new standards and their underlying theories. Students are encouraged to relate economic events to diverse practices in financial statements, and to think critically of ongoing controversies and debates.

The emphasis of this course is on understanding and critical thinking, rather than bookkeeping. The course draws heavily on academic literature on the suggested topics.

The course objectives are achieved through teaching a variety of financial reporting issues and topics including the following: standard setting with respect to the conceptual frameworks; accounting for business combinations; accounting for value creation with special emphasis on cash flows statements and revenue recognition; capital markets efficiency; corporate disclosure; and corporate governance. Most topics are covered from an International Financial Reporting Standards and/or United States Generally Accepted Accounting Principles perspective. Detailed choice of subjects will be determined by those lecturing on the course and may vary to some extent from year to year. Knowledge of basic accounting is assumed.

- Financial Analysis of Firms and Corporate Transactions
- Mergers, Acquisitions and Leveraged Buyouts
- Distress, Bankruptcy and Corporate Restructuring

Teaching: 30 hours of seminars in the MT.

Teaching is delivered in two one and a half hour sessions each week. Sessions contain a variety of technical content, practical exercises, and case analyses. This year, some or all of this teaching may be delivered using virtual classes as an alternative to face-to-face teaching.

Formative coursework: Students will be expected to produce 2 problem sets in the MT.

Indicative reading: Detailed reading lists are handed out at the start of the course. Relevant books covering specific parts of the course are:

- Financial Reporting and Analysis, by Revsine, Collins, Johnson, and Mittelstaedt, and Soffer (McGraw Hill, 7th ed.);
- Financial Accounting: An Introduction to Concepts, Methods and Uses, by Stickney, Weil, Schipper and Francis (Thomson Learning, South-Western, 14th ed.).

Assessment: Exam (60%, duration: 2 hours) in the January exam period.

Continuous assessment (10%) and group project (30%) in the MT. Continuous assessment consists of a set of quizzes to be submitted online. The group project will require students to search the press for issues of relevance to the topic they have been assigned and produce a five-page report which they will present. These presentations may be virtual.

AC417 Half Unit

Corporate Financial Disclosure and Investor Relations

This information is for the 2020/21 session.

Teacher responsible: Dr Ken Lee OLD 3.29 and Dr Pascal Frantz OLD 3.07

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in Accounting and Finance and MSc in Accounting, Organisations and Institutions. This course is available with permission as an outside option to students on other programmes where regulations permit. Other students may be admitted if they have knowledge of financial accounting and finance acquired at undergraduate level, and only with the agreement, in writing, of the MSc (Accounting and Finance) Course Tutor.

The course is capped to two sections of around 55 students; ie, 110 total. Enrolment on this course is constrained by section size and the number of sessions available. Students are admitted on the course on a first-come-first-served basis. If the course is over-subscribed, students on the waiting list will continue to be admitted on a first-come-first-served basis as places become available, but MSc students on the Accounting programmes will only then be given priority although cannot be guaranteed a place if no places become available. Therefore, to avoid frustration and possibly being unable to take the course, students wishing to reduce the risk of non-admittance on the course should prioritise their courses and register early for their preferred, "must have" courses. Late registration or changes to earlier course choices may be unsuccessful.

Pre-requisites: Students must have completed FM422E and FM423E.

Students will be expected to show some familiarity with calculus (including stochastic calculus) and statistics.

Course content: Investors view firms through the lens of financial accounting and reporting. This course aims to examine this lens by covering topics on the interaction of financial accounting and reporting with capital markets with a focus on corporate disclosure and communication strategies. The course views corporate financial reporting as an information system and reviews the theories and empirical regularities on the demand for and supply of accounting information in capital markets while also assessing the stock market impact of communication strategies.

Some of the topics covered in the course include: Determinants of accounting choices; Capital markets and the earnings game; Voluntary disclosure theory and practices; The signalling role of accounting information; Capital market consequences of accounting and disclosure choices; Financial reporting and corporate governance; Communication challenges during a corporate crisis; Communication with capital markets during

equity offerings. The course is based on a number of theories, empirical applications, and case studies, so that students gain an understanding of a firm's corporate information environment and communication strategies.

Detailed choice of subjects to be covered will be determined by those lecturing on the course and may vary to some extent from year to year. Knowledge of basic accounting and finance is assumed.

Teaching: 33 hours of seminars in the LT.

Teaching is delivered in three hour sessions each week. Each session is conducted in groups of about 50 students, often involving case study analyses, application exercises and group presentations and discussions. This mode of teaching requires good advance preparation by the students; hence, every student should be ready to contribute to the discussion when called upon. Active participation is expected and encouraged.

Formative coursework: Formative assessment will be in the form of class exercises and case-studies on topics covered during the course. Students will be expected to hand in two assignments in the LT.

Indicative reading: The course relies mostly on journal articles and chapters from relevant books supplied in study packs. In the first part of the course the relevant books are:

- Gibbons, R (1992) 'A Primer in Game Theory';
 - Scott, W (2011) Financial Accounting Theory (Prentice Hall)
- In the second part of the course the key text is:
- Laskin, A (2018) 'The Handbook of Financial Communication and investor relations' (Wiley)

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Group exercise (40%) in the LT.

The group exercise will consist of class participation and group work.

AC424

Accounting, Organisations and Institutions

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Power KSW 3.12

Availability: This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is not available as an outside option.

This course is not available to other students except in special circumstances and with the written permission of the Course Director.

Pre-requisites: There are no specific accounting pre-requisites. This course does not require a background in accounting and both the programme and this course are open to specialists and non-specialists alike. Pre-session training in the form of various intensive sessions prior to the start of term will be offered for those who need a brief 'technical' preparation for the Programme.

Course content: The objective of the course is to provide students with an advanced, social science- based critical understanding of the changing role and position of accounting practices in organisations, both public and private, and in societies more generally. Students will be exposed to advanced thinking and case materials about how accounting practices are more than a collection of routine self-evident techniques but are shaped by their institutional contexts, have behavioural consequences and can represent different values. We will focus on how the fundamental assumptions of internal and external accounting practices are institutional in nature and are shaped by social and political aspirations. The role of accountants and other agents involved in the production and consumption of accounting numbers will also be addressed.

The course will equip students to understand the inter-relations between technical, organisational and institutional issues. While some technical accounting knowledge may be helpful, it is not essential and each lecture will provide the necessary technical foundations.

Indicative topics, " include:

Foundations: Reporting, Calculation and Transparency; Quantification and Measurement; Accounting and the Notion of "Entity"; Audit and Assurance: The Audit Society; Organisational Boundaries, Structure and Control; Accountability, Incentives and Performance; Accounting for Sustainability; Organisational Failure. Risk Management, Accountability and Corporate Governance;-Disasters, Accidents and Errors; Organisations and the Management of Uncertainty; The Risk Management Process; Mapping and Communicating Risk in Organisations; Organisations, Security and Resilience; Corporate Governance: Board Functioning, Gatekeepers, Executive Compensation, Regulation.

- Hedging in equity and fixed income markets
- Market Risk, Value at Risk and Expected Shortfall
- Endogenous Risk and Limits to Arbitrage
- Credit risk and structured products

Teaching: Teaching will be delivered in the form of two weekly 90-minute sessions over 11 weeks across both Michaelmas and Lent Terms. Each session contains a variety of technical content, practical exercises, and case analyses. This year, some or all of this teaching may be delivered using virtual classes as an alternative to face-to-face teaching.

This course has a reading and feedback week in Week 6 of both MT and LT so there is 30 hours of teaching per term.

Formative coursework: Students will be required to produce two pieces of written work per term. This may take the form of either an essay, or the analysis of a case, and may also include in-class presentation and team-based work. This work will be assessed, but the grades will not count towards the overall course assessment.

Indicative reading: Chapman, Cooper & Miller (eds.), Accounting, Organizations and Institutions (Oxford, 2009); Hopwood & Miller (eds.), Accounting as Social and Institutional Practice (Cambridge, 1994); Power, The Audit Society (Oxford, 1999); Power, Organized Uncertainty: Designing a World of Risk Management (Oxford, 2007); Hutter & Power (eds.), Organizational Encounters with Risk (Cambridge, 2005);Coffee, Gatekeepers: The Professions and Corporate Governance (Oxford, 2006); Bebchuk & Fried, Pay Without Performance (Harvard, 2004); Power, Riskwork: Essays on the Organizational Life of Risk Management (Oxford, 2016)

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 6000 words) in the ST.

AC425

MSc Accounting, Organisations and Institutions: Pre-session course

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Power KSW 3.12

and Dr Kenneth Lee, OLD 3.29

Availability: This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is not available as an outside option.

This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is not available as an outside option.

The course is only available to MSc Accounting, Organisations and Institutions students. The purpose of this pre-session is to acquaint students, both with and without any prior, or little, background in accounting, to the critical approach to be adopted on the core course AC424. Students with some prior background in accounting will find the session to be useful as a "refresher" about accounting fundamentals. Any student with a proven accounting background who intends to take AC416 Topics in Financial Reporting is also required to take AC480 Quantitative Methods in Accounting and Finance.

Pre-requisites: Students must have completed FM422E and FM423E.

Course content: Introduction to Accounting, Organizations and Institutions

- Evaluating and executing Private Equity Deals
- Business Plans, Venture Capital, and Entrepreneurial Finance
- Private Equity as an asset class and the private equity landscape

Teaching: The sessions are held in September before the start of MT.

Formative coursework: Study materials for the pre-sessional will be made available by means of selected handouts

Indicative reading: Ulf Axelsson, Tim Jenkinson, Per Strömberg, and Michael S. Weisbach. *Leverage and Pricing in Buyouts: An Empirical Analysis*. August 28, 2007; Steven N. Kaplan and Per Strömberg. *Leveraged Buyouts and Private Equity*, Social Science Research Network, June 2008; Cendrowski, Harry. *Private Equity: Governance and Operations Assessment*. Hoboken: John Wiley & Sons. 2008; Lerner, Joshua. *Venture Capital and Private Equity: A Casebook*. New York: John Wiley & Sons. 2000; Acharya V V; Franks J R & Servaes H (2007) "Private Equity: Boom and Bust?" *Journal of Applied Corporate Finance*, 19(4) , Fall 2007, 44-53.

Assessment:

There is no assessment.

AC444 Half Unit

Valuation and Security Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Xi Li, OLD 2.16 (Business analysis component)

Dr Kenneth Lee, OLD 3.29 (Valuation component)

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other students may be admitted to the course if they have a strong knowledge of financial accounting and finance acquired at undergraduate or equivalent level, and only with the agreement, in writing, of the teacher responsible for this course.

Enrolment on this course is constrained by section size and the number of sessions available. Students are admitted on the course on a first-come-first-served basis. If the course is over-subscribed, students on the waiting list will continue to be admitted on a first-come-first-served basis as places become available, but MSc students on the Accounting programmes will only then be given priority although cannot be guaranteed a place if no places become available. Therefore, to avoid frustration and possibly being unable to take the course, students wishing to reduce the risk of non-admittance on the course should prioritise their courses and register early for their preferred, "must have" courses. Late registrations or late changes to this course choice may be unsuccessful.

Pre-requisites: Students will be assumed to have a solid understanding of corporate finance as well as financial accounting principles, techniques and methods. Completion of AC416 in Michaelmas term is strongly recommended for this course. Attendance at the "Modelling skills" workshop typically held on a Saturday in Michaelmas term is also strongly recommended. Further details will be provided nearer the time.

Course content: The aim of this course is to introduce students to security analysis and valuation from both academic and practical perspectives. The course materials include many real-world cases, where students are placed in the role of investors to conduct financial statement analysis and make investment decisions. At the end of the course, students are furthermore provided with an opportunity to apply their skills by analysing and valuing, in small groups, from the point of view of a "sell-side analyst", a firm's equity of their choice. The course should appeal to students interested in equity research, investment banking, and fund management. The course is presented in two parts. The first part, financial

analysis, focuses on past and present performance evaluation, which is used by financial analysts to generate expectations about future performance (prospective analysis). The second part, security valuation, focuses on the determination of intrinsic security prices, which, in efficient markets, reflect prospective performance. This second part provides students with a valuation 'toolkit' which they can draw on when valuing equities in a variety of contexts such as banking, asset management, research, accountancy or consulting.

• Financing

• Valuation

Teaching: 30 hours of seminars in the LT.

Student group project presentations in week 11 of Lent Term.

Teaching is delivered in two 90-minute sessions per week. Each session is conducted in groups of about 55 students, often involving both lecturing and case study analyses and discussions. In the case study sessions, students break into small groups to work and collaborate as a team. This mode of teaching requires good advance preparation by the students; hence, every student should be ready to contribute to the discussion when called upon. Active participation is expected and encouraged.

Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: There is no required textbook for this course.

However, we recommend the following book for reading and additional exercises: K Palepu, P. Healy and E. Peek, *Business Analysis & Valuation*, 4th IFRS edition, CENGAGE Learning, 2016. For the valuation section the recommended text is *Company Valuation under IFRS*, N. Antill, K. Lee and D. Taylor, 3rd Edition, 2019, Harriman House publishing.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (40%) in the LT.

Class participation (10%).

AC470 Half Unit

Accounting in the Global Economy

This information is for the 2020/21 session.

Teacher responsible: Dr Andrea Mennicken KSW 3.09

Availability: This course is available on the CEMS Exchange, Diploma in Accounting and Finance, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Development Management, MSc in Economy, Risk and Society, MSc in Management and Strategy, MSc in Regulation and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped to one section of 55 students. Students on the waiting list will be admitted on a first-come first-served basis.

Pre-requisites: There are no specific pre-requisites and the course does not require a background in accounting.

Course content: This course examines the fast changing practices and institutions of accounting in the global economy, with a particular emphasis on the roles of accounting in global financial governance. International accounting and auditing standards have been advocated as a way of enhancing global financial stability, so as to stimulate the flow of cross-national investment, expand the scope for market-oriented development, and integrate local enterprises into global financial markets. This course critically examines dynamics of accounting regulation, including international standard-setting and consequences for financial statement users, business entities and wider local and global

stakeholders.

Topics include:

Political, institutional and economic influences in changing national and international financial reporting frameworks. The political economy of accounting standard-setting. The work of the International Accounting Standards Board (IASB), the European Union, national accounting bodies, and their political and economic environments.

The effects of national financial reporting requirements and International Financial Reporting Standards (IFRS) on business entities and economic development, particularly developing and emerging economies (including the BRIC countries: Brazil, Russia, India, China). The enforcement of financial reporting requirements through auditors, securities regulators, the World Bank and others. Specific technical challenges (for example, impairment tests, derivatives and other financial instruments, fair value accounting and intangible assets).

The course explores issues from different theoretical perspectives through comparative empirical analysis.

- Investments and Securities Valuation
- Portfolio choice and performance evaluation
- Derivatives

Teaching: Teaching is delivered in two weekly 90-minute sessions over 10 weeks across Lent Term. Each session draws on a variety of academic readings, practical exercises, and case analyses. This year, some or all of this teaching may be delivered using virtual classes as an alternative to face-to-face teaching.

This course has a reading week in Week 6 of LT.

An essay workshop and one-to-one essay feedback sessions will be held in week 11 of LT.

It is further intended to run a small number of additional sessions with invited speakers who are centrally involved at a senior level in the setting, enforcement and convergence of international accounting regulations. Further details will be provided at the start of the session.

Formative coursework: Students are expected to come to each session prepared having done the assigned readings and having prepared the assigned class discussion questions. In addition, students are required to write an assessed essay of 3,500-4,000 words, to be submitted after the Easter break. The word limit excludes the bibliography. This written work forms 50% of the overall assessment. A workshop will be held in preparation for the essay assignment. Individual feedback will be given on essay outlines. Further readings, exercises and case studies are set for class discussion each week.

Indicative reading: Detailed reading lists will be given out at the start of the session, and are largely based on academic journal articles. Other readings include policy briefings, regulatory documents, green and white papers, World Bank reports (ROSC). Relevant books: Aerts & Walton, *Global Financial Accounting and Reporting* (Cengage, 2017); Camfferman & Zeff, *Aiming for Global Accounting Standards, 2001-2011* (Oxford University Press, 2018); Botzem, *The Politics of Accounting Regulation* (Edward Elgar, 2012); Ramanna, *Political Standards: Corporate Interest, Ideology and Leadership in the Shaping of Accounting Rules for the Market Economy* (University of Chicago Press, 2015); Djelic & Quack, *Transnational Communities: Shaping Global Economic Governance* (Cambridge University Press, 2010); Nobes & Parker, *Comparative International Accounting* (Pearson, 2020); Nobes *International Classification of Financial Reporting* (Routledge 2018); Walter, *Governing Finance: East Asia's Adoption of International Standards* (Cornell University Press, 2008).

Assessment: Exam (50%, duration: 1 hour and 30 minutes) in the summer exam period.

Essay (50%) in the ST.

Essay: (50%, 3,500-4,000 words) is submitted in ST (after the Easter break). The 4,000 words exclude the bibliography.

AC480

Quantitative Methods in Accounting and Finance

This information is for the 2020/21 session.

Teacher responsible: Dr Stefano Cascino OLD 3.32, Dr Aneesh Raghunandan OLD 2.15 and Dr Maria Manuel Correia OLD 3.30

Availability: This course is available to students on the MSc in Accounting and Finance and students on the MSc in Accounting, Organisations and Institutions with prior knowledge of accounting and finance wishing to take AC416 Topics in Financial Reporting. This course is not available as an outside option.

Course content: The objective of the course is to provide students with the necessary background required for core accounting and finance courses. The course is organised in two sections:

Section 1 - "Accounting: Disclosure Principles and Practice" provides an overview of fundamental accounting concepts, practices and the main financial statements. This section emphasises users' perspective rather than preparers' perspective on financial reporting (eg, for valuation purposes).

Section 2 - "Finance: Quantitative Methods" provides the basic quantitative tools needed for technical MSc courses. This section consists of an introduction to Basic Calculus, Probability and Statistics.

Teaching: Teaching takes place over a 9-day period before the start of MT.

Formative coursework: Feedback on class participation.

Indicative reading: A detailed reading list will be provided at the beginning of the course.

Assessment: This course is not assessed. However, students will be given a number of application exercises to complete on their own or in groups.

AC490 Half Unit

Management Accounting, Decisions and Control

This information is for the 2020/21 session.

Teacher responsible: Prof Alnoor Bhimani OLD 3.08

Availability: This course is available on the CEMS Exchange, Diploma in Accounting and Finance, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Accounting, Organisations and Institutions, MSc in Economics and Management, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

This introductory course may also be taken by MSc students who have not previously studied accounting subjects. Students in the MSc Accounting and Finance programme are not permitted to enrol in this course or in AC491. This course cannot be taken concurrently with **AC415 Management Accounting for Decision Making**.

The course is capped at 115 students.

Course content: Enterprises must today tackle markets that are affected by global economic and business forces and advances in internet-based technologies. They face intense competition from ever-changing corporate strategies of their competitors and new business models. At the same time, the interface between business decisions and management accounting has become more complex but significantly impacts corporate performance. This course provides students with an introduction to how accounting information and cost management techniques shape managerial decision making and performance measurement. It discusses inter-relationships between management accounting and technology, corporate strategy, e-business and marketing. The course includes both qualitative and quantitative material and is

not purely calculations based.

The course will cover:

- established managerial accounting concepts such as cost-volume-profit relationships, overhead cost allocations, activity based costing, the balanced scorecard, target cost management and quality costing;
- how flexible organisational technologies such as just-in-time systems, enterprise resource planning, computer integrated system and 3-D manufacturing influence accounting information;
- operational, marketing and corporate strategy issues including cost management, e-business and internet-based business models;
- organisational arrangements such as functional and multidivisional firms and virtual enterprises;
- comparative international management accounting systems;
- accounting controls associated with responsibility centres, financial performance measurement, variance analysis, and incentives;
- strategic accounting tools and practices.

The course will provide participants with:

- an understanding of strategic, market and technological links to management accounting and control practices;
- the ability to apply modern management accounting techniques within competitive business environments;
- a knowledge of interrelationships between behavioural, organisational and cultural issues and management accounting systems.

Teaching: 20 hours of lectures and 9 hours of seminars in the LT. There will be a reading week in week 6 of LT. A 2-hour revision lecture will be held in ST or extra office hours will be held.

Formative coursework: Students are expected to produce several pieces of written work, including accounting exercises, analyses of case studies, and essays. At least two pieces of written work will be collected for feedback during the course. Students are also required to participate actively in a variety of discussions and debates as part of the class activities.

Indicative reading: A detailed reading list will be given out at the start of the course. The following two books will be extensively used: Bhimani A, Horngren C, Datar S and Rajan M Management and Cost Accounting (Pearson, 2019) and Bhimani A, Financial Management for Technology Start-ups, Kogan Page, 2017.

Assessment: Exam (100%, duration: 2 hours and 15 minutes, reading time: 15 minutes) in the summer exam period. The first 15 minutes will be reading time.

AC491 Half Unit

Financial Accounting, Reporting and Disclosure

This information is for the 2020/21 session.

Teacher responsible: Prof Ane Miren Tamayo OLD 2.20

Availability: This course is available on the CEMS Exchange, Diploma in Accounting and Finance, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Accounting, Organisations and Institutions, MSc in Management and Strategy and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course may also be taken by MSc students who have not previously studied accounting subjects to a significant extent. Students on the MSc Accounting and Finance programme are not permitted to enrol in this course or in AC490.

This course cannot be taken in conjunction with **AC416 Topics in Financial Reporting**.

The course is capped at 115 students.

Course content: This course provides students with an introduction to financial accounting, and highlights aspects of reporting that are important to users of financial information. The course covers the preparation of key financial statements and accounting issues related to intangible assets, equity, debt, intercorporate investments and consolidation. Students are introduced to the basics of financial statement analysis and research on the use of accounting information in financial markets.

Teaching: 20 hours of lectures and 8 hours of seminars in the MT. This year, some or all of this teaching may be delivered using virtual classes as an alternative to face-to-face teaching. There will be a reading week in week 6 of MT.

Formative coursework: Students are expected to complete a series of accounting exercises.

Indicative reading: A detailed reading list will be made available at the start of the course. Illustrative texts:

Harrison, Horngren, Thomas, Tietz and Swardy, Financial Accounting (IFRS), 11th ed., Pearson Higher Education/Prentice Hall; Weetman P, Financial Accounting: an Introduction, 8th ed., Pearson Higher Education.

Assessment: Exam (80%, duration: 2 hours) in the January exam period.

Problem sets (20%) in the MT.

The 20% is based on students completing one problem set rather than multiple problem sets.

AC493 Half Unit

Financial and Management Accounting for Managerial Decision Making

This information is for the 2020/21 session.

Teacher responsible: Dr Henry Eyring, OLD 3.10 and Dr Kenneth Lee (Financial Accounting component), OLD 3.29

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This course covers introductions to both financial accounting and management accounting. The first part of this course provides students with an introduction to financial accounting, and highlights aspects of financial reporting that are important to users of financial information. It covers the preparation of key financial statements and the frameworks of accounting regulation. The second part to the course provides students with an introduction to management information and cost management, managerial decision making and performance measurement.

Specifically, then, the first half of AC493 is focused on financial accounting, which aims to familiarise students with the principles and some of the techniques of financial accounting and financial reporting as well as some aspects of current regulatory debates on the subject. After the first half of the course, students should be able to:

- Distinguish between cash accounting and accrual accounting, and explain traditional accounting concepts and conventions.
- Draw up simple balance sheets, and income statements as well as to develop an understanding of cash flow statements and group accounts, and understand how they are affected by different accounting treatments.
- Use these financial statements to perform financial analysis.
- Discuss the issue of "creative accounting", asset valuation and other contemporary issues in accounting.
- Discuss market influences of accounting information and theories of accounting choice.

The second half of AC493 focuses on management accounting, which is a key function in organisations that involves developing and using financial and non-financial information to support decision making, not only in a technical sense, but bearing in mind that the way in which management accounting systems are designed and implemented often determines whether employees

will be motivated to act in ways that are congruent with the objectives of the organisation. The discipline of management accounting is often partitioned into (1) cost and management accounting systems and (2) management control systems, and both components are covered in the second part of the course. While financial accounting (covered in the first part of the course) requires that product cost information be accumulated in particular ways for external reporting, the focus in the second half of the course is on cost and other accounting and non-accounting information systems that aid managerial decision making. This includes the study of management accounting systems in widespread use today as well as an analysis of the problems associated with these systems in today's business environment (such as their tendency to provide distorted product cost information), as well as approaches to mitigate these problems (e.g., activity-based costing; use of non-financial information). Through the second half of the course, students should be able to:

1. Analyse key concepts which form the discipline of management accounting;

- Product costing and pricing;
- Activity based costing/management (ABC/ABM);
- Profitability and variance analysis;
- Performance measurement and evaluation;
- ROI, EVA, and other performance metrics.

2. Possess the skills necessary to use management accounting information to make business decisions.
3. Illustrate how management accounting information can be used to formulate and implement strategy in a variety of organisational settings.
4. Understand how the design and use of management accounting systems affect human behaviour in organisations.

Teaching: 33 hours of lectures in the LT.

This course consists of 11 principal weeks with topics delivered in sessions of 1½ hours twice a week. Each session is conducted in groups of about 65 students. Most sessions make use of class exercises, case study analyses and real-world applications to bring the materials to life and to apply conceptual knowledge to problems faced in practice. The case study analyses and discussions permit the exploration of accounting issues in broader management perspectives (e.g., large and small firms, manufacturing and service firms, multinational firms, startups). The case method of instruction, however, requires good advance preparation by students, and every student should be ready to contribute to the case discussion when called upon. Students should expect to be 'cold called' and not count on being able to hide behind classmates who volunteer to participate.

Formative coursework: Students are expected to be prepared for the cases and/or other tasks for each session as indicated on the syllabus. Two of these will be collected and graded as shown below under Assessment.

Indicative reading: Reference Textbook:

Lee, K. and Taylor, D. 2018, Financial Statement Analysis under IFRS (FE Publishing, 6th Edition). Bhimani, A., C.T. Horngren, S.M. Datar, and M.V. Rajan. 2015, Management and Cost Accounting (Pearson, 6th edition). Supplementary Textbook Resources: Weetman, P. 2010, Financial Accounting: An Introduction (Financial Times/Prentice Hall, 5th edition). Bhimani, A. 2013, Strategic Finance (Strategy Press). Merchant, K.A., and W.A. Van der Stede. 2017, Management Control Systems: Performance Measurement, Evaluation, and Incentives (Financial Times/Prentice Hall, 4th edition).

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (10%) in the LT Week 4.

Coursework (10%) in the LT Week 8.

AC499

Dissertation

This information is for the 2020/21 session.

Teacher responsible: Prof Ane Miren Tamayo OLD 2.20

Availability: This course is available on the MSc in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. Students will normally elect to take this as an option in paper 3 or 4. Permission to select the long essay option must be obtained from the Programme Director by the end of the third week of MT. Students wishing to select this option must first identify and secure agreement from a member of faculty who is willing to provide supervision for the dissertation. Approval for this option will not be granted if such an agreement is not obtained from an academic staff member.

Course content: The dissertation usually consists of an empirical investigation of a selected problem. Occasionally, the dissertation may consist of a survey and critical evaluation of the relevant literature.

The dissertation must identify relevant issues, sustain reasoned argument, and draw supportable conclusions. It must be arranged in an organised manner and include a full bibliography.

Teaching: There is no teaching associated with the dissertation, but students who select this option are encouraged to attend the dissertation workshop sessions organised by the Teaching and Learning Centre.

Arrangements for supervision

Students writing a dissertation will be supervised by a member of faculty who will not necessarily be their academic supervisor. Students are responsible for identifying an appropriate member of staff to supervise their dissertation essay, and for ensuring the member of staff agrees to provide supervision. As a general rule, supervisors of dissertations will not comment on the work after a discussion of the first draft.

Assessment: Dissertation (100%, 10000 words) in the ST.

Two typewritten copies of the dissertation must be submitted to the MSc Programme Manager, due by 31 May. The dissertation should be double-spaced, on A4 paper, with a maximum word limit of 10,000 words, not including Appendices. Mark penalties will apply if the word limit is exceeded.

AN402

The Anthropology of Religion

This information is for the 2020/21 session.

Teacher responsible: Dr Michael Scott OLD 6.16

Dr Yazan Doughan

Availability: This course is compulsory on the MSc in Social Anthropology (Religion in the Contemporary World). This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Law, Anthropology and Society and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course covers current approaches to and reconsiderations of classic topics in the anthropology of religion, such as: myth, ritual, belief and doubt, supernatural experience, ethical self-cultivation, asceticism, sacrifice, authority and charisma. In the Michaelmas term, students will be introduced to debates concerning the ways in which 'religion' is said to influence or shape personal experience and collective public life in both western and non-western contexts. Students will explore some of the key concepts that inform contemporary understandings of religion as a force in the world, the history of these concepts, how they enter into various political and ethical projects, and the extent to which they predefine 'religion' as an object of anthropological study. Specific areas of focus may include: the relationship between 'religion' and 'secularism'; conceptions of 'religious freedom';

conversion; inter-religious conflict; the ethnography of religious minorities; the anthropology of religious movements; and the comparative anthropology of 'religions'. In the Lent term, students will be asked to rethink the category of 'religion' entirely and its role in anthropological analysis. Topics facilitating this project may include: shamanism, cargo cults, initiation, witchcraft and sorcery, cosmology, and human-nonhuman relations, primarily with reference to ongoing transformations of the indigenous traditions of Melanesia, Africa, Amazonia, Australia, and the circumpolar north. Recurring themes will be: transformations in the definition of 'religion' in relation to 'science'; the nature of rationality; and the extent to which anthropology itself can be either – or both – a religious and a scientific quest to experience the wonder of unknown otherness.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 in MT and LT.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: Talal Asad 2009, *Genealogies of Religion: Discipline and Reasons of Power in Christianity and Islam*; Tomoko Masuzawa 2005, *The Invention of World Religions: Or, How European Universalism Was Preserved in the Language of Pluralism*; Hussein A. Agrama 2012, *Questioning Secularism: Islam, Sovereignty, and the Rule of Law in Modern Egypt*; Mayanthi Fernando 2014, *The Republic Unsettled: Muslim French and the Contradictions of Secularism*; Webb Keane 2007, *Christian Moderns: Freedom and Fetish in the Mission Encounter*; W. F. Sullivan, E. S. Hurd, et al. (eds.) 2015, *Politics of Religious Freedom*; Courtney Bender 2010, *The New Metaphysicals: Spirituality and the American Religious Imagination*; Leigh Eric Schmidt 2000, *Hearing Things: Religion, Illusion, and the American Enlightenment*; S. J. Tambiah 1992, *Buddhism Betrayed?: Religion, Politics, and Violence in Sri Lanka*; A. Abramson and M. Holbraad (eds.) 2014, *Framing Cosmologies: The Anthropology of Worlds*; G. Bateson and M. C. Bateson 1987, *Angels Fear: Towards an Epistemology of the Sacred*; B. Kapferer (ed.) 2002, *Beyond Rationalism: Rethinking Magic, Witchcraft and Sorcery*; L. Lévy-Bruhl 1926, *How Natives Think*; P. Ingman, T. Utrianinen, et al. (eds.) 2016, *The Relational Dynamics of Enchantment and Sacralization: Changing the Terms of the Religion Versus Secularity Debate*; D. C. Posthumus 2018, *All My Relatives: Exploring Lakota Ontology, Belief, and Ritual*; H. Whitehouse and J. Laidlaw (eds.) 2007, *Religion, Anthropology, and Cognitive Science*; R. Willerslev 2007, *Soul Hunters: Hunting, Animism, and Personhood among the Siberian Yukaghirs*; D. E. Young and J-G. Goulet (eds.) 1994, *Being Changed: The Anthropology of Extraordinary Experience*. Detailed reading lists provided at the start of each term.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

AN404

Anthropology: Theory and Ethnography

This information is for the 2020/21 session.

Teacher responsible: Prof Mathijs Pelkmans OLD 5.08 and Prof Laura Bear OLD 6.07

Availability: This course is compulsory on the MSc in Social Anthropology. This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Law, Anthropology and Society and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to examine the

relationship between theory and ethnography in social and cultural anthropology in the context of colonial and post-colonial history. During the Michaelmas term the course focuses on the development of anthropology before circa 1980 in the British, French and American schools. It will explore anthropological epistemology or the discipline's forms and methods of knowledge production. Rather than outlining theoretical schools and their demise, it will explore the creation of key concepts that are the foundations for current debates. The course moves through time with a genealogical method or by tracing the 'birth' of concepts that shape the present and future of our discipline. It will also bring from the margins forgotten ancestors and their heterodox ideas, which are not usually part of the canon. The emergence of key concepts will be linked to intellectual projects, fieldwork encounters and historical events. The unique quality of anthropology is that it is a qualitative social science committed to a 'radical empiricism' (Jackson) or 'realism' (Herzfeld) (unlike economics or sociology for example). In other words its concepts are driven primarily from dissonant encounters with the social and cultural world 'at home' and in 'the field.' Some of the key concepts we will explore will be: participant observation and evidence; culture and race; postcoloniality; relativism and surrealism; totemism and animism; magic, art and science, ritual; inequality; personhood, agency and ethics; kinship and gender.

The second term covers topics which may include structuralism; practice theory; interpretive anthropology; postmodernism, affect and actor network theory. The precise emphasis and distribution of topics may vary from year to year.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. 2 hours of workshops in the ST.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. The course has a reading week in Week 6 of MT and LT.

Formative coursework: Formative coursework consists of participation in weekly seminars, and the opportunity to discuss one formative essay in each of the MT and LT with the course convener or the student's academic mentor, as per normal departmental arrangements.

Indicative reading:

- A. Callinicos, 2007, *Social Theory*; a historical introduction;
- A Kuper, 2005, *The Reinvention of Primitive Society: transformations of a myth*;
- H L Moore and T Sanders (eds.), 2006, *Anthropology in Theory: Issues in Epistemology*;
- D McLellan, 1977, *Karl Marx: Selected Writings*;
- A. Giddens, 1971, *Capitalism and Modern Social Theory*;
- A. W Runciman, 1978, *Weber: Selections in Translation*;
- S Lukes, 1973, *Emile Durkheim: His Life and Work*;
- B Malinowski, 1922, *Argonauts of the Western Pacific*;
- EE Evans-Pritchard, 1971, *Nuer Religion*;
- E Leach, 1954, *Political Systems of Highland Burma*;
- M Gluckman, 1958, *Analysis of a Social Situation in Modern Zululand*;
- M Bloch, 1983, *Marxism and Anthropology*;
- C Lévi-Strauss, 1966, *The Savage Mind*;
- M Sahlins, 2000, *Culture in Practice*;
- P Bourdieu, 1972, *Outline of a Theory of Practice*;
- C Geertz, 1973, *The Interpretation of Cultures*;

- H. Moore, 2011, *Still Life: hopes, desires, and satisfactions*;
- Y. Navaro-Yashin. 2012. *The Make-Believe Space: Affective Geography in a Postwar Polity*.

Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

AN405

The Anthropology of Kinship, Sex and Gender

This information is for the 2020/21 session.

Teacher responsible: Dr Nicholas Long and Dr Catherine Allerton

Availability: This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Gender, MSc in Law, Anthropology and Society, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides an examination of the cultural frameworks and social aspects of kinship systems, gender roles, personhood and human sexuality, analysed through ethnographic examples from a diverse range of settings. It aims to equip students with the analytical tools to engage in theoretical debates concerning core concepts such as 'kinship', 'marriage', 'gender', 'sex', 'the person', and the relationship between 'nature' and 'culture', as well as exploring how the experiences of kinship, sex and gender vary according to the regimes of politics, law and materiality in which they are embedded. The course charts the history of anthropological debates on kinship, relatedness, sex and gender, and familiarises students with a range of contemporary approaches to these themes, placing ethnographic materials into a critical dialogue with recent developments in feminist theory, queer theory, the anthropology of colonialism, cognitive science, and psychoanalysis.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 in MT and LT.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: Carsten, J. *After Kinship* (2003); Chodorow, N. *The Power of Feelings: Personal Meaning in Psychoanalysis, Gender and Culture* (1999); Donnan, H. and Magowan, F. *The Anthropology of Sex* (2010); Levi-Strauss, C. *The Elementary Structures of Kinship* (1969); Moore, H. L. *A Passion for Difference: Essays in Anthropology and Gender* (1994); Schneider, D. *A Critique of the Study of Kinship* (1984); Stone, L. *Kinship and Gender: An Introduction* (2006).

Assessment: Essay (50%, 4000 words) in the LT. Essay (50%, 4000 words) in the ST.

AN419 Half Unit

The Anthropology of Christianity

This information is for the 2020/21 session.

Teacher responsible: Dr Fenella Cannell OLD 5.07

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The ethnography of local Christianities in the light of differing cultural and social situations including colonial conditions. The relationship between Christianity and the discipline of anthropology. The course examines a number of anthropological and historical studies of local forms of Christianity, from a range including local forms of Catholicism, Mormonism, contemporary and historical Protestantisms including American Protestant forms and 'heretical' and other unorthodox Christianities. The course asks why anthropologists shied away from analysing Christianity long after studies of other world religions, such as Islam, Hinduism and Buddhism, had become widely established. It looks at the

relationship between Christianity and the history of anthropological thought, and locates the place of Christianity in the writings of Mauss, Durkheim, Foucault and others, in order to defamiliarise the religion which Europeans and Americans especially often take for granted. Issues examined may include the nature and experience of belief, conversion and the appropriation of Christian doctrines by local populations, the problems of writing about religion, Christianity and the state, the nature of religious confession, Christian texts, and Scriptural reading practices, Christian objects and materialities, Christianity and women's religious and social experience (from Medieval women mystics to women priests), inquisitions and heretical beliefs, priests and alternative forms of mediation with divine power, miraculous saints, incorrupt bodies and 'non-eaters' and changing ideas about death, Heaven and Hell. Where possible, the course will include a student fieldwork weekend and forms of reflection and reporting on that experience. Please check with the course teacher in any given year whether this is planned as part of the year's programme.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. There will be a reading week in Week 6 of the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the seminars. Students will be expected to produce 1 essay in the LT.

Indicative reading:

- M Bloch, *From Blessing to Violence: History and Ideology in the Circumcision Ritual of the Merina of Madagascar*;
- F Cannell, *Catholicism, Spirit Mediums and the Ideal of Beauty in a Bicolano Community, Philippines* (PhD thesis, University of London);
- W Christian, *Person and God in a Spanish Valley* (reprint 1988);
- J Comaroff, *Body of Power, Spirit of Resistance*;
- J de Pina Cabral, *Sons of Adam, Daughters of Eve: the Peasant World View in the Alto Minho*;
- R Iletto, *Pasyon and Revolution: Popular Movements in the Philippines, 1840-1910*;
- J Nash, *We Eat the Mines and the Mines Eat us: Dependency and Exploitation in Bolivian Tin Mines*;
- M Taussig, *The Devil and Commodity Fetishism in South America*.

Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

AN420 Half Unit Not available in 2020/21

The Anthropology of Southeast Asia

This information is for the 2020/21 session.

Teacher responsible: Dr Nicholas Long OLD 6.14

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course will introduce students to selected theoretical and ethnographic issues in the history and contemporary life of Southeast Asia (including Burma/Myanmar, Cambodia, Indonesia, Laos, Malaysia, Singapore, Thailand, The Philippines, and Vietnam).

The alleged distinctiveness of Southeast Asian gender relations, political leadership, and experiences of self and emotion have led to ethnographic studies of the region making major contributions to the anthropology of the state, sovereignty, globalisation, gender, identity, violence, and mental health. By providing a strong grounding in regional ethnographic materials, this course will equip students to critically evaluate such contributions and to consider possible further contributions that studies of Southeast Asia might make to anthropological debates. The course will also examine

how anthropologists have responded to the interpretive challenges presented by selected aspects of Southeast Asia's social and political life, such as the legacies of mass violence (e.g. the Cambodian genocide, the Vietnam War, or Indonesia's massacre of suspected communists), its ethnic and religious pluralism, and the impact of international tourism.

The course also contains a strong visual anthropology element: each week's lecture will be paired with a film screening, and students will be encouraged to examine whether and how this visual material contributes to, or indeed reframes, the theoretical debates at hand.

Upon successful completion of the course, students will be able to:

1. Describe the key features of Southeast Asian social and cultural systems, and identify their similarities and differences with social and cultural systems in other world regions.
2. Describe key events and patterns in Southeast Asia's history, and evaluate the extent to which these influence contemporary social phenomena in the region.
3. Describe and evaluate the most influential paradigms that have been developed in anthropological studies of Southeast Asia over the past 60 years.
4. Apply anthropological concepts and theories to ethnographic materials from Southeast Asia, and evaluate the results.
5. Apply anthropological research findings and theories to social and policy issues in Southeast Asia.
6. Locate and use research findings from Southeast Asia in order to participate in, or advance the terms of, wider disciplinary debates.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 1 hour of lectures in the ST.

Film screenings will also take place throughout the term. There will be a reading week in Week 6 of the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Useful histories of Southeast Asia / Southeast Asian anthropology. M.C. Ricklefs, B. Lockhart, A. Lau, P. Reyes, and M.A. Thwin, *A New History of Southeast Asia* (2010); V.T. King and W.D. Wilder, *The Modern Anthropology of South-East Asia: An Introduction* (2003). Ethnographies. Barker, J., E. Harms, and J. Lindquist, eds. 2014. *Figures of Southeast Asian Modernity*. Honolulu: University of Hawai'i Press. Hinton, A. L. 2005. *Why Did They Kill? Cambodia in the Shadow of Genocide*. Berkeley: University of California Press. Keeler, W. 1987. *Javanese Shadow Plays, Javanese Selves*. Princeton: Princeton University Press. Langford, J. M. 2013. *Consoling Ghosts: Stories of Medicine and Mourning from Southeast Asians in Exile*. Minneapolis: University of Minnesota Press. Long, N. J. 2013. *Being Malay in Indonesia: Histories, Hopes and Citizenship in the Riau Archipelago*. Copenhagen: NIAS Press. Peletz, M. G. 2009. *Gender Pluralism: Southeast Asia since Early Modern Times*. London & New York: Routledge. Schwenkel, C. 2009. *The American War in Contemporary Vietnam: Transnational Remembrance and Representation*. Bloomington: Indiana University Press. Scott, J. C. 2009. *The Art of Not Being Governed: An Anarchist History of Upland Southeast Asia*. New Haven & London: Yale University Press. Sloane, P. 1999. *Islam, Modernity and Entrepreneurship among the Malays*. Basingstoke: Macmillan. Detailed reading lists are provided at the beginning of the course.

Assessment: Coursework (100%, 5000 words) in the LT. Students will be asked to write a research essay on a topic covered in the course, and a synoptic essay speaking to themes that connect multiple weeks of the course. Each of these should be up to 2500 words in length, and each of these essays will comprise 50% of the final mark.

AN424 Half Unit Not available in 2020/21

The Anthropology of Melanesia

This information is for the 2020/21 session.

Teacher responsible: Dr Michael W Scott, OLD 6.16

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides an introduction to selected themes in the anthropology of the region in the Southwest Pacific Ocean known as Melanesia. It gives students a grounding in the contemporary anthropology of the region, primarily through a close reading of three book-length ethnographies.

The three ethnographies, which are all new since 2013, are Christopher Wright's *The Echo of Things*, an account of what photography means to people in the western Solomon Islands; Alice Street's *Biomedicine in an Unstable Place*, an analysis of how persons and diseases are made visible or invisible in a hospital on the north coast of Papua New Guinea; and Alex Golub's *Leviathans at the Gold Mine*, a study of the relationship between indigenous landowners and a large international gold mining operation in their valley in the highlands of New Guinea.

These ethnographies not only provide students with focused accounts of three very different contexts in Melanesia, they also address histories, dynamics, and concerns familiar to people living throughout the region. Furthermore, because the three authors draw on different intellectual antecedents and disciplinary traditions, their work provides an entree into the most influential theoretical debates animating Pacific anthropology today.

Topics to be traced throughout the course include personhood and bodies, kinship and sociality, religion and cosmology, technology and infrastructure, development, globalization, and the state. Engagement with these three books will be enhanced and supplemented by other readings (including works by Pacific Islanders), ethnographic films, and a visit to the British Museum.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Christopher Wright, *The Echo of Things: The Lives of Photographs in the Solomon Islands* (2013); Alice Street, *Biomedicine in an Unstable Place: Infrastructure and Personhood in a Papua New Guinean Hospital* (2014); Alex Golub, *Leviathans at the Gold Mine: Creating Indigenous and Corporate Actors in Papua New Guinea* (2014). Detailed reading lists are provided at the beginning of the course.

Assessment: Essay (100%, 4000 words) in the ST.

The assessed essay must be between 3,500 – 4,000 words in length.

AN436 Half Unit

The Anthropology of Development

This information is for the 2020/21 session.

Teacher responsible: Prof Katherine Gardner

Availability: This course is compulsory on the MSc in Anthropology and Development and MSc in Anthropology and Development Management. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International

Development and Humanitarian Emergencies, MSc in Social Anthropology and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course explores how anthropologists have evaluated, criticised and contributed to development. Focussing on both 'Big D' development (schemes of improvement or projects) and 'little d' development (change which occurs as the result of economic growth or modernisation) the course shows how anthropological insights have been used to change practices from within as well as critique development from the outside. From anthropological work which seeks pragmatic engagement to that which deconstructs development as an oppressive and power laden discourse, the course aims to give students a broad background to the field. Topics covered include the role of the state, participation and farmer first approaches; gender and development; development as discourse and 'aidnography'; neo liberalism and global capital; corporate social responsibility; markets and micro credit; and the relationship between 'tradition' and modernity. Throughout, the course will draw upon a broad range of ethnographic examples.

- To provide students with an understanding of basic features of pharmaceutical markets and how pharmaceutical markets work and how competition manifests itself in different parts of pharmaceutical markets.
- To illustrate to students how the pharmaceutical market is linked to the health care market, why it is often the focus of much regulation, and to help students understand the multidimensional goals of pharmaceutical policies.
- To introduce students to the economic and policy problems encountered in managing pharmaceutical markets and how to evaluate the impact of alternative policy approaches. The course will also give students some experience in critically evaluating the impact of policy on market outcomes.
- To facilitate consideration of various country-specific political, cultural and economic factors that may drive governments' approaches to pharmaceutical regulation. In this context, this course will help students consider the extent to which policies may be transferable.
- To enable students to analyse pharmaceutical markets from the perspectives of several main actors: governments, third party payers, the pharmaceutical industry, doctors, patients, pharmacists and wholesalers. Literature from Health Economics, Industrial Organisation and Health Policy will be incorporated into lectures, discussions and seminars.
- To introduce students to the economics of pricing and reimbursing pharmaceutical products, to explore different models of pricing and reimbursing medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing, among others.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of MT.

Formative coursework: Students are expected to prepare discussion material for presentation in the seminars based on the core ethnographies of the course. Formative work will include a mock exam question.

Indicative reading: Gardner and Lewis 2015, *Anthropology and Development: Twenty First Century Challenges*; Ferguson, J. 1990 *The Anti-Politics Machine: Development, Depoliticisation and Bureaucratic Power in Lesotho*; Cambridge University Press; Li, T. 2014 *Land's End: Capitalist Relations on an Indigenous Frontier*; Karim, L., 2011 *Micro-Finance and its Discontents: Women and Debt in Bangladesh*; Elyachar, J. 2005; *Markets of Dispossession: NGOs, the Market and the State in Cairo*; Scherz, C. 2014. *Having People, Having Heart: Charity, Sustainable Development, and Problems of Dependence in Central Uganda*; Scott, J. 1998, *Seeing Like a State: How Certain Schemes to Improve the Human*

Condition have Failed.

Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

AN442

Supervised Reading Course and Fieldwork Preparation

This information is for the 2020/21 session.

Teacher responsible: Members of staff of the Anthropology Department (students' supervisors).

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: The programme of supervised reading aims to give students a detailed knowledge of the regional ethnographic literature relevant to their proposed research project, as well as providing them with a firm grounding in the theoretical literature relevant to their research objectives. The programme also aims to aid students in the practical organization of their field research (eg organizing language training, obtaining research permits and academic affiliations) through their supervisors' personal guidance. The programme of supervised reading will be specific to each student. It will be agreed with his/her supervisors at the beginning of the academic year and it will be closely reviewed during the course of the academic year.

Teaching: Students should expect to meet with at least one of their supervisors at 2-3 weekly intervals during term time, and to submit essays relevant to the preparation of their Research Proposal (AN443).

Formative coursework: Students will be required to write essays for their supervisors throughout the academic year.

Indicative reading: Donabedian, A. (1966). "Evaluating the quality of medical care." *The Millbank Memorial Fund Quarterly* 44(3): 166-203. Hackman, J. Richard, and Ruth Wageman (1995), "Total Quality Management: Empirical, Conceptual, and Practical Issues," *Administrative Science Quarterly* 40 (2): 309-342. Garvin, David A. "Competing on the Eight Dimensions of Quality." *Harvard Business Review* 65, no. 6 (November-December 1987). *Going Lean in Health Care*. IHI Innovation Series white paper. Cambridge, MA: Institute for Healthcare Improvement; 2005. Langley, Moen, Nolan et al., 2009, *The Improvement Guide*, 2nd Edition (Wiley). Morton, A. and J. Cornwell (2009). "What's the difference between a hospital and a bottling factory?" *British Medical Journal* 339: 428-430. *Crossing the Quality Chasm* - Institute of Medicine, 2001. S Spear and H Kent Bowen; *Harvard Business Review*, Sept- Oct 1999; 97-106; *Decoding the DNA of the Toyota Production system To Err is Human* - Institute of Medicine, 2000. *Understanding variation* - D Wheeler, 1993. *The Machine that changed the world* - Womack JP, Jones DT and Roos D, 2007. M.E. Porter and T. H. Lee; *Harvard Business Review*, Oct 2013; *The Strategy That Will Fix Health Care*

Assessment: Fieldwork notes (100%) in the MT.

Students' progress will be monitored by their supervisors through verbal discussion of the submitted written work. The work they undertake for this course is expected to feed directly into the preparation of the Research Proposal (AN443) and will be formally examined through it.

AN443

Research Proposal

This information is for the 2020/21 session.

Teacher responsible: Members of staff of the Anthropology Department

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: All students must prepare a formal Research Proposal of 8,000-10,000 words (excluding references) for submission to the Department on or before the deadline in June. The proposal is written under the guidance of their supervisors (as set out in AN442), and will normally draw on material studied as part of AN471 Qualitative and Quantitative Methods for Anthropologists and AN472 Evidence and Arguments in Anthropology and Other Social Sciences. It will be expected to demonstrate knowledge of the regional ethnography, and theoretical and methodological literatures, relevant to the proposed research.

Teaching: This course will be delivered online over a period of five weeks in Lent Term as a combination lectures and seminars, totalling a minimum of 20 hours. Students will have access to lecture material delivered as short online videos. Seminars will take place online and students will work in small groups to present topics and lead discussion.

Formative coursework: The formative assessment will be a 750 word draft of the first section of the essay

Indicative reading: Papanicolas I and Smith PC (Eds), *Health System Performance Comparison: An agenda for policy, information and research*. Maidenhead: Open University Press, 2013. PC Smith, E Mossialos, I Papanicolas S. Leatherman (Eds), *Performance measurement for health system improvement: experiences, challenges and prospects*. Cambridge University Press, 2010; Institute of Medicine, *Crossing the Quality Chasm: A New Health System for the 21st Century*. Washington, DC, National Academies Press, 2001; OECD, *Measuring up: improving health system performance in OECD countries*. Paris: OECD, 2002. World Health Organization (WHO), (2000) *The world health report 2000: Health systems: Improving performance*, Geneva: WHO Publications. Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Research proposal (100%).

AN444 Half Unit Not available in 2020/21

Investigating the Philippines - New Approaches and Ethnographic Contexts

This information is for the 2020/21 session.

Teacher responsible: Dr Fenella Cannell OLD6.07

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Graduates taking this course will normally have taken or be taking a foundational course in anthropology. However, topics may be of interest to those in several disciplines. Exemptions may therefore be sought from the lecturer, e.g. for students external to the department, who wish to explore what anthropology can bring to bear on their own fields.

Course content: This course offers the chance to look at the ethnography of one country in more detail than is usual for regional courses. It considers topics taken from the ethnography of the lowland and highland Philippines, with a focus on exciting new high quality writing, drawing on the recent renaissance in Philippine Studies. The course will balance works by expert non-Filipino ethnographers with the new writing of 'native ethnographies' by Filipino scholars resident both in the Philippines themselves and in the US.

The course will be framed within the colonial, religious and social history of the archipelago, and will consider both new interpretations of Philippine history, and topics on contemporary social issues, as well as using classic works on the Philippines. Teaching each week will normally be organised around the reading

of one outstanding ethnography, allowing students to look closely at particular cases. Topics in any year are likely to be drawn from the following list (although obviously only ten topics can be offered in one year) ; Migration, 'mail-order' brides, and the Philippine diaspora ; New religious movements: Philippine colonialism and the processes of conversion: Healing, spirit possession, midwifery and local medicine: The contemporary Catholic Church; Violence in the Philippines; Ecology, landscape and environmental politics: Kinship and its transformations; Gender, Philippine queer theory and Philippine transvestitism: Ritual, drama and local performance traditions: Philippine architecture and material culture.: Philippine cinema: Colonial politics, tribal politics and issues of self-representation: Magic, sorcery and "anitismo"; Tourism, symbolic economies and the impact of international capitalism.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. There will be a reading week in Week 6 of the LT.

Formative coursework: Students may be required to prepare discussion material for seminars. Students will be expected to produce one essay in the LT.

Indicative reading: Detailed reading lists are provided at the beginning of the course, these are an indicative selection: Michell Rosaldo, *Knowledge and Passion*; Vicente Rafael, *Contracting Colonialism*; Fenella Cannell, *Power and Intimacy in the Christian Philippines*; Sally-Ann Ness, *Where Asia Smiles*; Heather L Claussen, *Unconventual Sisterhood*; M F Manalansan, *Global Divas: Filipino Gay Men in the Diaspora*; Vicente Rafael, *White Love and Other Events in Filipino History*; Nicole Constable, *Maid to order in Hong Kong*; Albert Alejo, *Generating Energies in Mount Apo*.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

Students will be given clear guidance on how to prepare for the exam and should note that the format requires two topics to be covered from a choice of seven, allowing plenty of scope in topic choice. A revision session will be arranged in ST if requested by students. Students are also welcome to bring any individual questions to the course teacher in office hours.

AN447

China in Comparative Perspective

This information is for the 2020/21 session.

Teacher responsible: Dr Johannes Steinmuller OLD 5.06A, Dr William Matthews OLD 6.16 and Prof Stephan Feuchtwang

Availability: This course is compulsory on the MSc in China in Comparative Perspective. This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in International and Asian History and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places are limited and priority is given to MSc China in Comparative Perspective students.

Course content: The main object of the course is to help students develop ways of putting the politics, economy and social life of China into a framework in which they can compare and juxtapose it with other major examples. Main topics include China's imperial bureaucracy, Chinese religion, the great divergence debate, as well as current issues such as urban life, the family, the rule of law, and contentious politics. Students will bring whatever theoretical approaches they have already learned and are continuing to learn in the disciplines they bring to the course. They will be expected to demonstrate and explain how they are using them as well as to listen to other approaches and disciplinary perspectives.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT. 1 hour and 30 minutes of lectures and 1 hour of seminars in the ST. This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum

expected. This course has reading week in Week 6 of both MT and LT.

Formative coursework: Formative coursework consists of participation in weekly seminars, and the opportunity to discuss one formative essay in each of the MT and LT with the course convener or the student's academic mentor.

Indicative reading:

- Fei Xiaotong 1992 [1948]. *From the Soil, the Foundations of Chinese Society: A Translation of Fei Xiaotong's Xiangtu Zhongguo*, with an Introduction and Epilogue, transl. Gary Hamilton and Wang Zheng, Berkeley: University of California Press.
- Harrison, Henrietta 2001. *China (Inventing the Nation)*. London: Arnold.
- Stockman, Norman 2001. *Understanding Chinese Society*. Cambridge: Polity.
- Spence, Jonathan D. 1991. *The search for modern China*. New York: Norton.
- Weber, Max 1951. *The Religion of China: Confucianism and Taoism*, transl. Hans H. Gerth, New York: The Free Press.
- Yan Yunxiang 2003. *Private Life under Socialism. Love, Intimacy, and Family Change in a Chinese Village 1949-1999*. Stanford, CA: Stanford University Press.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

AN451 Half Unit Anthropology of Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Mukulika Banerjee OLD 5.09

Availability: This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in Development Studies, MSc in Law, Anthropology and Society, MSc in Regulation, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on the notion of power and its cross-cultural application. Using Marxist, Weberian, and Foucauldian approaches it explores how power travels through different socio-cultural contexts, paying attention to issues such as domination and resistance, patron-client relations, the mafia, revolution and violence. A recurring theme throughout the course concerns the state. How should the state be studied anthropologically? Processes of state formation and disintegration, nationalism in its various guises, and state-society relations will be reviewed in order to understand how European, post-colonial, and post-socialist societies are governed.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Anderson, B, 1991 [1983], *Imagined communities: reflections on the origin and spread of nationalism*; Asad, Talal, 1973, *Anthropology and the Colonial Encounter*; Barth, F, 1965, *Political leadership among Swat Pathans*; Blok, Anton, 1988, *The Mafia of a Sicilian Village 1860-1960: a study of violent peasant entrepreneurs*; Evans-Pritchard, EE and Fortes, M, 1940, *African Political Systems*; Evans-Pritchard, EE, *The Nuer*; Gledhill, John, 1994, *Power and its disguises*; Hansen, T B and Stepputat F (eds), 2001, *States of Imagination: Ethnographic Explorations of the Postcolonial State*; Leach, Edmund, 1954, *The Political Systems of Highland Burma*; Mbembe, A, 2001, *On the Postcolony*; Navaro-

Yashin, Yael, 2002, *Faces of the state: secularism and public life in Turkey*; Vincent, J, 2002, *The Anthropology of Politics*; Wolf, E, 1999, *Envisioning Power: Ideologies of Dominance and Crisis*.

Assessment: Essay (100%, 4000 words) in the LT.

AN456 Half Unit

Anthropology of Economy (1): Production and Exchange

This information is for the 2020/21 session.

Teacher responsible: Dr Alpa Shah OLD 6.17A

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Development Studies, MSc in Inequalities and Social Science, MSc in Law, Anthropology and Society, MSc in Regulation, MSc in Social Anthropology, MSc in Social Anthropology (Religion in the Contemporary World) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: What is the economy? We will explore how the history of capitalism has been inextricably tied to producing an idea of the economy as a distinctive domain of life and how anthropologists have persistently challenged this understanding, showing how economic life is inextricably tied to religion, politics and kinship, for instance. We will show the radical possibilities of social relations that anthropologists have offered by studying communities that appear to be 'the original affluent society', seemingly not affected by capitalist societies, or incorporated on their own terms. At the same time, we will examine the impact of capitalism and the inequalities it has brought on diverse people around the world, looking at the role of colonialism and empire, industrialisation and neoliberalisation, which includes regimes of production, accumulation and dispossession. Central to our examination will be understanding processes and experiences of exploitation, oppression and domination. We will unveil the invisible work of the many that is never valued but gets hidden in precarity, by migration regimes and within households. We will highlight the ways in which gender, race, ethnicity, caste and class need to be central to any analysis of the economy. At all times, we will look for people's creative responses to the situations they find themselves in, whether it is through acquiescence, reincorporation, religious conversion, weapons of the weak or outright rejection and revolt.

Arrangements for supervision

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures in the ST.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading:

A few ethnographies to whet your appetite: Bronislaw Malinowski (1964) *Argonauts of the Western Pacific*; Marshall Sahlins (1974) *Stone Age Economics*; Marcel Mauss (1990 [1925]). *The Gift: the form and reason for exchange in archaic societies*; Sidney Mintz (1985) *Sweetness and Power: The Place of Sugar in Modern History*; June Nash (1979) *We Eat the Mines and the Mines Eat Us: dependency and exploitation in Bolivia's tin mines*; Michael Taussig (1980) *The Devil and Commodity Fetishism in South America*; Jonathan Parry (2020) *Classes of Labour in a Central Indian Steel Town*; Maria Mies (1982) *The Lace Makers of Narsapur: Indian*

Housewives produce for the World Market; Carol Stack (1974) *All Our Kin*; Claude Meillassoux (1981) *Maidens, Meat and Money: capitalism and the domestic community*; Jan Breman (1974) *Patronage and Exploitation: changing agrarian relations in South Gujarat India*; Alpa Shah, Jens Lerche, Richard Axelby, Brendan Donegan, Dale Benbabaali, Jayaseelan Raj and Vikramaditya Thakur (2018) *Ground Down by Growth: Tribe, Caste, Class and Inequality in 21st Century India*; Tania Murray Li (2014) *Land's End: Capitalist Relations on the Indigenous Frontier*.

A few general overview texts: James G. Carrier and Don Kalb (eds) (2015) *Anthropologies of Class: Power, Practice, and Inequality*; Richard Wilk and Lisa Cliggett (1996) *Economies and Cultures: Foundations of Economic Anthropology*; James Carrier (ed) (2005) *A Handbook of Economic Anthropology*

Other general introductory texts: Stephen Gudeman (2001) *The Anthropology of Economy*; Chris Hann and Keith Hart (2011) *Economic Anthropology*; Susana Narotzky (1997) *New Directions in Economic Anthropology*; Jonathan Parry and Maurice Bloch (Eds) (1989) *Money and the Morality of Exchange*; Stuart Plattner (ed) (1989) *Economic Anthropology*; James Carrier (2019) *A Research Agenda for Economic Anthropology*

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

AN457 Half Unit

Anthropology of Economy (2): Transformation and Globalisation

This information is for the 2020/21 session.

Teacher responsible: Prof Laura Bear OLD 6.07

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Development Studies, MSc in Inequalities and Social Science, MSc in Law, Anthropology and Society, MSc in Regulation, MSc in Social Anthropology, MSc in Social Anthropology (Religion in the Contemporary World) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course explores the limits and potentials of contemporary global capitalism. We all know that we live in a global economy, but how has this come into being? What are its political, social and cultural consequences? Why is the global economy so volatile? How does it produce inequality for many and abundance for some? Is globalisation dead in an era of 'de-coupling' and populism? What might the futures of global capitalism be? Through the term we will answer these questions in relation to classic themes of production, social reproduction, circulation and consumption. However our theoretical approaches will be expanded to explore the emerging anthropology of: logistical power, the commodification of intimacy, algorithmic interactions, global branding, media spectacles, the security state, financialisation and speculation. Importantly the course will demonstrate that globalisation does not have a single logic nor is it a towering force. Instead, our focus on ethnography takes us inside the local processes through which the durable capture of accumulation and power are created. Significantly too we will be examining globalisation from the perspective of global elites, the middle classes and the precarious poor. By taking an anthropological approach to globalisation we will move away from an economic or 'economistic' theory of capitalism. Instead we will see the significance of desire, kinship, affect, political dreams, ethics and culture to the intimate economy of capitalism. At the end of the course we will have a better understanding of recent

global changes, but also a set of theoretical tools that can help us to rethink approaches to capitalism in general.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

AN458 Half Unit Not available in 2020/21

Children and Youth in Contemporary Ethnography

This information is for the 2020/21 session.

Teacher responsible: Dr Catherine Allerton OLD 6.13

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Law, Anthropology and Society and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course explores the paradoxes and contexts of social science work on children and youth through an intensive focus on contemporary ethnographies exploring children's social worlds. This ethnographic work is multi-disciplinary (emerging from anthropology, geography, sociology, media studies), and builds both on earlier ethnographies of childhood from the mid-twentieth-century onwards, and on growing theoretical interest in cross-cultural understandings of 'the child' and their competencies. In the first half of the course, we investigate 5 central paradoxes that emerge through a consideration of children and childhood. These are: 1) Universal/ Constructed; 2) Being/ Becoming; 3) Structure/ Agency; 4) Protection/ Participation; and 5) Representation/ Reality. These paradoxes allow us to consider important questions such as: What does it mean to see childhood as a 'construction'? How has ethnographic work questioned universal frameworks for child development? How should we understand children's agency? How successfully can 'child rights' be achieved in different cultural contexts? Why should children's

perspectives be taken more seriously in the social sciences? In the second half of the course, we turn to 5 key contexts for ethnographic analyses of children's lives. These are: the street, school, work, play and war. How have the lives of 'street children' been approached and understood? What do critical ethnographies of schooling tell us about its role in reproducing inequalities? What, if anything, is the difference between beneficial child work and harmful 'child labour'? How can we recognise and theorise children's play? And how have ethnographic accounts documented both trauma and resilience in the context of 'child soldiering'?

- Describe the epidemiological trends in cardiovascular disease
- Summarise the primary components of quality in health care
- Explain the main limitations of the literature evaluating quality improvement interventions
- Define the principal threats to validity in studies evaluating quality
- Design an evaluation strategy for a quality improvement policy or intervention in a group setting
- Critically evaluate empirical evaluations of quality and outcomes in health care research in oral and written form

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. This course has a reading week in Week 6 of LT. 4 hours of film screenings in LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: R.A. LeVine and R.S. New (eds) 2008. Anthropology and child development: a cross-cultural reader; N. Scheper-Hughes and C. Sargent (eds) 1998. AN461 Half Unit Not available in 2020/21

Anthropological Approaches to Questions of Being

This information is for the 2020/21 session.

Teacher responsible: Dr Michael Scott OLD 6.16

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: In Western thought, the study of the nature of being itself (Greek *ontos*), including theories about how things come into being and how they are related to one another, is known as ontology. Building on, but broadening the scope of this Western tradition, the growing anthropological literature on questions of being seeks to convey ethnographically and conceptualize theoretically the many different ontologies, or lived realities, that shape social practices in diverse historical, geographic, and cultural contexts. This literature also urges us to reconsider reflexively what anthropology is, does, and might become.

Twenty-first century anthropology has seen an 'ontological turn' or 'turns', or more broadly, the emergence of anthropologies of ontology. Increasingly, a variety of anthropological discourses

invoking the concept of ontology have come into dialogue, yet ontology-oriented approaches remain diverse. Over the past decade, these discourses have been sites of divisive debate, strong contestation, pointed polemic, and at times personal critique. While this has generated a lot of interest, arguably these debates have created more heat than light. In the wake of these debates, and keeping them in view, this course aims to illuminate current work around ontology by reading three recent and influential books, each of which takes a distinctive anthropological approach to questions of being.

Morten Axel Pedersen's ethnography, *Not Quite Shamans* (2011), explores spirits, shamans – or the relative lack of shamans – and postsocialism among the Darhad people of northern Mongolia. Pedersen focuses on the ontological uncertainties that can attend sweeping social transformations; in so doing, he challenges us to rethink the assumptions about being that inform mainstream anthropological analyses.

Marisol de la Cadena's ethnography, *Earth Beings* (2015), offers a person-centred, conversation-driven account of people, place, and indigenous cosmopolitics in the Andes. De la Cadena engages with the Quechua people's political struggles in ways that prompts us to question modernity's dominant nature/human dualism. Giving us access to a context where mountains are wilful actors, she invites us to reconceptualize politics as ontological disagreement.

Stuart McLean's book, *Fictionalizing Anthropology* (2017), develops a comparative approach to anthropology by juxtaposing diverse folkloric, historical, literary, and ethnographic accounts – primarily from the North Atlantic. McLean seeks to persuade us that storytelling is a mode of 'ontological poesis'; it does not simply reflect – or even reflect on – aspects of the world as given; it participates in the very making of worlds. In the same way, he suggests, the stories anthropologists tell and the comparisons they make may be ontologically generative, part of the becoming of new possibilities for human and other-than-human being.

These three works – focused on very different contexts, using very different modes of research, and written in very different styles – introduce students to the central questions, dynamics, and debates that constitute anthropological approaches to questions of being.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

There will be a reading week in Week 6 of the LT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Morten Axel Pedersen, *Not Quite Shamans: Spirit Worlds and Political Lives in Northern Mongolia* (2011); Marisol de la Cadena, *Earth Beings: Ecologies of Practice across Andean Worlds* (2015); Stuart McLean, *Fictionalizing Anthropology: Encounters and Fabulations at the Edges of the Human* (2017).

Assessment: Coursework (100%, 4000 words) in the LT.

AN463 Half Unit

Borders and Boundaries: Ethnographic Approaches

This information is for the 2020/21 session.

Teacher responsible: Prof Mathijs Pelkmans OLD 5.08

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: How do territorial borders influence human behaviour and thinking, and how, in turn, do people create, manage and manipulate such borders? These questions have become pressing with the intensification and politicisation of global interconnectedness. While a few decades ago the tearing down of the Berlin Wall seemed to herald a border-less world, today the loudest politicians promise to create "huge, great, great, beautiful walls." This course studies the numerous tensions accompanying global interconnectedness. Why is it so difficult to make borders

impermeable? How do smuggling networks operate? What does the world look like from the perspective of undocumented migrants? What are the effects of new border fortification technologies? What is it like to live in a gated community? Are people boundary-drawing creatures? Why do borders play a central role in images of utopia? Why is it silly yet productive to ask: where is the border between Europe and Asia? These and other questions will be discussed by situating ourselves ethnographically in the borderlands, potentially making us realise that "the frontier is all around us."

Learning outcomes:

- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual randomized controlled trials and collections of randomized controlled trials
- Critically evaluate the internal validity of randomized controlled trials
- Assess heterogeneity in a collection of randomized controlled trials
- Critically appraise a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected.

This course has a reading week in Week 6 of MT.

Formative coursework: Students are expected to prepare discussion material for presentation in the seminars. Students will be expected to produce 1 essay in the MT.

- Course convener will provide written feedback on project outlines

Indicative reading:

- Andersson, R. (2014). *Illegality, Inc.: Clandestine migration and the business of bordering Europe*;
- Brubaker, R. (2004). *Ethnicity without groups*;
- Berdahl, D. (1999). *Where the world ended: Re-unification and identity in the German borderland*;

- De León, Jason (2015) *The land of open graves: Living and dying on the migrant trail*;
- Low, S. (2004). *Behind the gates: Life, security, and the pursuit of happiness in fortress America*;
- Pelkmans, M. (2006). *Defending the border: identity, religion, and modernity in the Republic of Georgia*;
- Wilson, T. and H. Donnan (eds) (2012) *A Companion to Border Studies*;
- Reeves, M. (2014). *Border work: spatial lives of the state in rural Central Asia*;
- Van Schendel, W. and I. Abraham, eds. (2005) *Illicit flows and criminal things: States, borders, and the other side of globalization*.

Assessment: Take-home assessment (100%) in the MT.

The take home exam will be held the week following the end of the MT.

AN467 Half Unit Not available in 2020/21 The Anthropology of South Asia

This information is for the 2020/21 session.

Teacher responsible: Dr Mukulika Banerjee OLD 5.09

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: You need to be enrolled in a degree that requires analytical and qualitative research skills. You may be asked to submit written work to determine your ability for this course.

Course content: This course will aim to address issues of citizenship, inequality and social justice, religious faith and practices, migration and labour and consumption patterns in rural and urban South Asia. The course will cover both classic and current literature and weekly sessions will be organised thematically. We will start by looking at the history of South Asia's democracies and consider the challenges posed to them. South Asia is an ideal setting to examine many paradoxes that exist elsewhere - alongside some of the highest rates of economic growth there is growing inequality, there is a growing middle class but high rates of precarious poverty, the countries remain largely rural yet they will hold the largest urban population in the world in less than ten years and so on. In order to understand these paradoxes, it is essential that issues of macro economic policy, social inequality, infrastructural development, political mobilisation and popular culture, mobilisation along religious lines in each country and the rise of the 'threatened majorities' that behave like minority populations - be examined in greater detail. Using a rich body of anthropological research on South Asia, this course will examine several of these issues and more in this course. The literature on India is the largest available but every attempt will be made to cover the anthropological literature on Pakistan, Nepal, Sri Lanka and Bangladesh alongside.

All these issues and more will be addressed in this course through the rich corpus of anthropological literature on the subject alongside examples from India's vibrant media and popular culture.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Attendance at film screenings are essential for this course.

Sessions will be scheduled at the start of term for a weekday evening (3 hours). The course has a reading week in Week 6 of the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Please do at least TWO of the following background reading before the start of the course and certainly by the end of the second week of the course.

Sunil Khilnani *The Idea of India*. Ramachandra Guha *India After Gandhi*. Sen *The Argumentative Indian*. Corbridge, S. and Harris, J. 2000, *Reinventing India: Liberalization, Hindu Politics and Popular Democracy*. London: Polity Press. Rana Dasgupta *Capital Fiction*:

Vikram Seth *A Suitable Boy*. Rohinton Mistry *A Fine Balance*

Assessment: Take-home assessment (100%) in the LT.

AN469 Half Unit Not available in 2020/21 The Anthropology of Amazonia

This information is for the 2020/21 session.

Teacher responsible: Dr Harry Walker OLD 5.06B

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will introduce students to selected themes in the anthropology of Amazonia. It will provide a grounding in the ethnographic literature of the region while seeking to engage with current theoretical debates, highlighting their potential importance to the discipline of anthropology. Topics to be covered include history, indigenous social movements; sexuality and gender; trade and inter-ethnic relations; politics and power; illness, well-being and death. Students will be encouraged to reflect on the broader relationship between ethnography and theory, to challenge common stereotypes of Amazonia and its inhabitants, and to explore ways in which the region has inscribed itself on the imagination of anthropologists and laypersons alike.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Clastres, Pierre. 1987. *Society Against the State: Essays in Political Anthropology*. Overing, Joanna. & Alan Passes (eds). 2000. *The Anthropology of Love and Anger: The Aesthetics of Conviviality in Native Amazonia*. Walker, Harry. 2012. *Under a Watchful Eye: Self, Power and Intimacy in Amazonia*. Descola, Philippe. 1994. In the *Society of Nature: A Native Ecology in Amazonia*. Gow, Peter. 2002. *An Amazonian Myth and its History*. Fisher, William H. 2000. *Rainforest Exchanges: Industry and Community on an Amazonian Frontier*. Seeger, Anthony. 2004. *Why Suyá Sing: A Musical Anthropology of an Amazonian People*. Gregor, Thomas. 1985. *Anxious Pleasures: The Sexual Lives of an Amazonian People*. Lévi-Strauss, Claude. 1984. *Tristes Tropiques*. Conklin, Beth. 2001. *Consuming Grief: Compassionate Cannibalism in an Amazonian Society*.

Assessment: Take-home assessment (100%) in the MT. The take home exam will be held the week following the end of the MT.

AN471

Qualitative and Quantitative Methods for Anthropologists

This information is for the 2020/21 session.

Teacher responsible: Prof Deborah James OLD 6.06 and Prof Mathijs Pelkmans OLD 5.08

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: The twofold aim of this course is to provide students with insights into the process by which anthropological knowledge is produced, and to train them in the collection and analysis of qualitative and quantitative data. In doing so it offers students a methodological framework for conceptualising and designing their own PhD research projects. The course discusses the nature of ethnographic data and evidence, its implications for research, and ways of incorporating empirical data in ethnographic texts.

Teaching: 40 hours of seminars in the MT.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

Indicative reading: A. Robben and A. Sluka (eds.) 2007. *Ethnographic Fieldwork: An anthropological reader*; P. Atkinson. 2015. *For Ethnography*; R. H. Bernard. *Research Methods in Cultural Anthropology: Qualitative and Quantitative Approaches*. Fifth Edition. A. Cerwonka and L. Malkki. 2007. *Improvising Theory: Process and Temporality in Ethnographic Fieldwork*. K. Narayan. 2012. *Alive in the Writing: Crafting Ethnography in the Company of Chekhov*.

Assessment: Essay (30%, 3000 words), coursework (15%, 1000 words), coursework (15%, 1000 words), presentation (15%) and class participation (25%) in the MT.

AN472

Evidence and Arguments in Anthropology and Other Social Sciences

This information is for the 2020/21 session.

Teacher responsible: Dr Nicholas Long

Availability: This course is compulsory on the MRes/PhD in

Anthropology. This course is not available as an outside option.

Course content: This seminar course considers research practices across a range of social and natural sciences in order to explore methodological issues that are specifically relevant to ethnography. In particular, it focuses on the relationship between evidence and the kinds of inferences and conclusions which are drawn by researchers in different social science fields. For one part of the course, case-studies taken from different disciplines will be considered in relation to the research practices of ethnographers. The disciplines covered may include: cognitive science & developmental psychology; psychoanalysis; moral and political philosophy; photographic theory; archival research; quantitative sociology; economics; demography; ecology; development studies; linguistic anthropology; STS; and literary criticism. For another part of the course, students will present their own draft research proposals to other both in written and oral form, focusing on (1) the questions they hope to explore in their dissertations; (2) the kinds of evidence they will need in order to adequately explore these questions; (3) the methods they will adopt in order to collect this evidence.

Teaching: 40 hours of seminars in the LT.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 case study in the LT.

This will allow students to practice and receive feedback on the direct application of different disciplinary perspectives to a body of data, in preparation for their summative assessment and for their future research.

Indicative reading: Angrist, J. D. and Pischke, J-S. (2014) *Mastering 'Metrics: The Path from Cause to Effect*. Princeton University Press. Gertler, Paul J., Sebastian Martinez, Patrick Premand, Laura B. Rawlings, and Christel M. J. Vermeersch. (2016) *Impact Evaluation in Practice*, second edition. Washington, DC: Inter-American Development Bank and World Bank. doi:10.1596/978-1-4648-0779-4. License: Creative Commons Attribution CC BY 3.0 IGO. Cartwright, N. & Hardie, J. (2012). *Evidence-Based Policy: A practical guide to doing it better*. Oxford, UK: Oxford University Press. HM Treasury. 2011. *The Magenta Book. Guidance for evaluation*.

Assessment: Essay (50%, 2500 words), presentation (25%) and class participation (25%) in the LT.

AN473 Half Unit Not available in 2020/21

Anthropological Approaches to Value

This information is for the 2020/21 session.

Teacher responsible: Prof David Graeber OLD 6.10

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available as an outside option to students on other programmes where regulations permit.

Course content: In this course we will first take stock of the current anthropological theories of value in contemporary anthropology. After a critical appraisal of such theories, we will explore what an anthropological theory of value might actually look like. After a brief exploration of Kluckhohn's "values project", the formalist-substantivist arguments, and debates about the nature of the social role of money, up to the recent neoliberal resurgence in anthropological theory, we'll be looking at the contrasting legacies of Karl Marx and Marcel Mauss. Looking at these as two very different approaches to many of the same problems will provide enormous opportunities for creative synthesis. The course will include some fairly extended case studies (of Tiv fetishism, wampum, and anthropological studies of consumption), to investigate how useful all this theory can actually be in throwing

new light on familiar problems.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students registered for Anthropology degrees may submit formative tutorial essays on the course content and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.

Indicative reading: Graeber, D. (2001) *Toward an Anthropological Theory of Value: The False Coin of Our Own Dreams*. Graeber, D. (2011) *Debt: The First Five Thousand Years*. Godbout, J. & Caillé, A. (1998) *The World of the Gift*. De Angelis, M. (2007) *The Beginning of History: Value Struggles and Global Capitalism*. Appadurai, A. (2013) *The Future as Cultural Fact: Essays in the Global Condition*. Turner, T. (1984) "Value, production and exploitation in simple non-capitalist societies". Munn, N. (1986) *The fame of Gawa: A symbolic study of value transformation in a Massim (Papua New Guinea) society*

Assessment: Take-home assessment (100%) in the MT.

The take home exam will be held the week following the end of the MT.

AN475 Half Unit Not available in 2020/21 The Anthropology of Revolution

This information is for the 2020/21 session.

Teacher responsible: Dr Alpa Shah OLD 6.17A

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit.

Optional for MSc students in Anthropology. Also available to students on other degree programmes as an outside option.

Course content: This course will focus on the study of revolution from an anthropological perspective. It will concentrate on three different types of revolutionary struggle, in three different continents, through three different types of ethnographies: the Zapatista indigenous movement in Mexico, the Zimbabwean anti-colonial struggle, and the Maoist movement in South Asia. In each case, students will be encouraged to critically consider the varying degrees of involvement of the anthropologist in the movements concerned, the theoretical premises of the anthropologists and how these affect the politics and ethics of writing. In this process, students will deepen their understandings of the theoretical debates around production and reproduction, social transformation, religion and secularism, activism and anthropology, and violence and ethics in radical social change. The course will demonstrate that although anthropologists were once criticised for 'missing the revolution' on their doorstep, in fact their long term engagement with communities who come to be affected by revolutionary struggles has much to offer to the theoretical and practical work of radical social transformation.

Teaching: 6 hours of lectures, 6 hours of seminars and 8 hours of workshops in the LT.

This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: This course will be based on the close reading of the following three ethnographic monographs: Earle, Duncan, & Simonelli, Jeanne. (2005). *Uprising of Hope: Sharing the Zapatista Journey to Alternative Development*. Walnut Creek: Altamira Press. Lan, David. (1985). *Guns and Rain: guerrillas and spirit mediums in Zimbabwe*. Berkeley: University of California Press. Shah, Alpa (2018) *Nightmarch: Among India's Revolutionary Guerrillas*. London: Hurst Publishers

Assessment: Take-home assessment (100%) in the LT.

The take home exam will be held the week following the end of the LT.

AN476 Half Unit Not available in 2020/21 Anthropology and the Anthropocene

This information is for the 2020/21 session.

Teacher responsible: Dr Gisa Weszkalnys

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: In August 2016, scientists participating in the Anthropocene Working Group put forward an official recommendation to rename our present time interval 'the Anthropocene'. It postulates that humans now exert recognisable influences on the earth's bio- and geophysical systems sufficient to warrant the naming of a distinct geological epoch encompassing the earth's present, recent past, and indefinite future. The Anthropocene thus echoes contemporary anxieties about climate change, the deterioration of global ecologies, and other environmental crises on unprecedented scales, as well as humans' capacity to devise adequate solutions to the problems they face. The scholarly and popular debate on the Anthropocene has exploded in recent years, with anthropologists contributing both theoretical and important ethnographic insight into how people apprehend and deal with the repercussions of anthropogenic environmental change. It now seems that the continued successful existence of humanity on this planet will require us to live differently both with each other and with the earth: 'We will go onwards in a different mode of humanity or not at all' (Val Plumwood 2007).

In this course, we will approach the Anthropocene as a contested category, with evident political and ethical implications. We will begin by examining the dramatic changes in the relationship between humans and their natural environments brought about by industrialisation, specifically, the increased exploitation of natural resources as well as the production and use of fossil fuels on a large scale. We will attend to the practices and cosmologies of people who in their everyday lives – for example, by digging, polluting, and wasting – participate in the work of anthropogenic alterations, drawing on case studies from across the world.

We will consider alternative labels, such as the Capitalocene, Plantationocene, Plasticene, Eurocene, Misanthropocene, and Neologocene, each of which tells a different origin story for what Donna Haraway has called 'the trouble'. However, we then move to ask whether the Anthropocene might be less a marker of an epochal transformation than a signal of a profound anti-political shift in discussions about the future of the planet. We will inspect the scientific and non-scientific controversies the Anthropocene has provoked, and the particular forms of power, authority, reason, imagination, and subjectivity it has generated.

Students will be expected to engage with a variety of resources, including online publications, blogs, documentary and feature films, and other media, and an emergent interdisciplinary literature, spanning the social and natural sciences, which we will read in relation to a more long-standing engagement with the environment within the anthropological discipline. This will lead us to interrogate established binaries of human/nonhuman, subject/object, and nature/culture, and, significantly, to ask about the critical valence of anthropologists' enquiry into the 'anthropos' for an age so profoundly shaped by humans. What methods and modes of analysis are required to comprehend the diverse human/non-human interactions and seemingly incommensurable scales that the Anthropocene invokes? What types of collaboration, knowledge, and mutual care does an anthropocenic outlook make possible? How can we anchor the manifold theoretical proposals that have been put forward not just in ethnographic examples but

also in own 'experiments for living'?

Teaching: 7 hours of lectures, 7 hours of seminars, 6 hours of seminars and 4 hours of workshops in the LT.

The course is comprised of three cycles of three weeks plus an additional, concluding week. Each cycle consists of two weeks taught in the traditional lecture/seminar format, and a third week with a two-hour seminar bringing together the entire course cohort. While the one-hour seminars will focus on core readings set by the lecturer, the two-hour seminar will, in addition, offer space for viewing other resources (films, online material), discussing students independently researched material, student presentations, etc.

Formative coursework: Students will be expected to produce 1 essay, 1 presentation and 6 other pieces of coursework in the LT.

Indicative reading: J. Cruikshank (2005) *Do Glaciers Listen? Local Knowledge, Colonial Encounters, and Social Imagination*. P. Descola and G. Pálsson (1994) *Nature and Society: Anthropological Perspectives*. D. Haraway (2016) *Staying with the Trouble: Making Kin in the Chthulucene*. E. Kohn (2013) *How Forests Think: Toward an Anthropology beyond the Human*. D. McDermott Hughes (2017) *Energy without Conscience: Oil, Climate Change, and Complicity*. N.C. Kawa (2016) *Amazonia in the Anthropocene: People, Soils, Plants, Forests*. R. Scranton (2015) *Learning to Die in the Anthropocene: Reflections on the End of a Civilization*. Strauss et al. (2013) *Cultures of Energy: Anthropological Perspectives on Powering the Planet*. A. Tsing (2015) *The Mushroom at the End of the World: On the Possibility of Life in Capitalist Ruins*.

Assessment: Take-home assessment (100%).

The take home exam will be held the week following the end of the LT.

AN477 Half Unit

Topics in the Anthropology of sub-Saharan Africa

This information is for the 2020/21 session.

Teacher responsible: Prof Karin Barber and Dr Leo Hopkinson

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: It is preferred that students will normally have done preliminary courses in Anthropology or have a Social Science background, but there is some flexibility. Students should consult the course lecturer.

Course content: This course gives students a critical understanding of ethnographic and theoretical writing on sub-Saharan Africa. Grounded in some classic debates around tradition and modernity (kinship-based polities vs states; studies on occult knowledge vs rationally-oriented political economy approaches; relationality and communality vs developmentally-oriented progress; 'objective' class vs forms of identification such as tribe or race), it explores questions about how the sub-continent's societies orient themselves, and respond to new precarities, in a postcolonial and neoliberal age. How are changing urban realities experienced and expressed in popular culture? How are the politics of land and belonging being reshaped? Do youth have a future of work in post-industrial Africa - and what new gender identities are they developing? Are there specifically African forms of knowledge? What is postcolonial about the 'postcolony'? Is Europe 'evolving towards Africa', as has been maintained?

- Describe the rationale for adopting a systematic approach to literature review
- Explain the principal threats to validity both in individual studies and collections of studies
- Critically evaluate the quality of randomised and non-randomised

studies

- Assess heterogeneity in a collection of studies
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Students will be asked to write one formative review during termtime, to be discussed with and evaluated by the course lecturer. The formative review will allow for students' individuality and expression and allow them to bring their own interest in current debates into interplay with course materials.

- Students will receive feedback from the course instructor on their systematic review and meta-analysis protocol.
- The word-limit for the protocol (to be developed individually) is 1,000 words.
- This protocol is based on a non-assessed presentation delivered by a group of students at the last day of class and feedback received on this presentation by the course instructor and members of other groups. This protocol closely parallels PRISMA protocols that need to be developed and registered prior to starting a systematic review and meta-analysis focused on health care subjects.

Assessment: Take-home assessment (100%) in the LT.

The take home exam will be held the week following the end of the LT.

- Systematic review and meta-analysis report resembling an original article submission to a peer-reviewed journal.

AN478 Half Unit Not available in 2020/21

Anthropology and Global History

This information is for the 2020/21 session.

Teacher responsible: Prof David Graeber OLD 6.10

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where

regulations permit.

Course content: This course is about what anthropology can tell us about history and also, what a knowledge of history and historical context and process can tell us about particular ethnographic case studies. The first half of the course largely covers broad questions of global history, beginning with the surprising history of the birth of evolutionism in the Enlightenment - the latter being, it argues, is in large part an appropriation of, and evolutionism largely a response to an explicit indigenous critique of European civilisation - and covering such classic issues as divine kingship, money and cycles of economic history, and the concept of "civilization" itself, to demonstrate what anthropological understandings can bring to bear on the broad sweep of human history. Over the course of this discussion various debates on the nature of history itself will be considered, ranging from infra structuralist Marxism and Autonomist class-struggle oriented Marxian approaches, world-systems analysis, culturalist approaches, and theories of narrative agency.

The second half applies these tools to the existing literature on the Nuer, Balinese and Malagasy (both Caribbean pirates and their interactions with Malagasy in the 18th century, and present-day Malagasy villagers) approaching a series of classic anthropological case studies from a broader historic point of view. Historiographical debates over the role of narrative and interpretation take life here as we examine how political action largely consists of action designed to be narrativised by others; mainstream, economic theories of historical action are found inadequate to explain the long-term gender dynamics that lie behind the creation of these apparently free-standing events. All this poses a set of conceptual challenges: what is an event? What is historical agency? What is the relation of cosmological conceptions, or narrative structures, to historical process? Must historical accounts always take a mythic form? Having begun by arguing Enlightenment forms of knowledge are really an appropriation of and reaction to non-Western ideas, it ends by examining a current non-Western political struggle - the Kurdish freedom movement - engaged in an explicit attempt to decolonize, recapture, and reformulate these terms; a project in which the rewriting of history on a world scale is seen as fundamental to transformative action.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Graeber, David. 2011. *Debt the First Five Thousand Years*. Melville House. Graeber, David, and Marshall Sahlins. 2016. *On Kings*. University of Chicago Press. Assessment: Coursework (100%, 4000 words) in the LT.

AN479 Half Unit Anthropology of Law

This information is for the 2020/21 session.

Teacher responsible: Dr Andrea Pia OLD 6.09

Availability: This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available as an outside option to students on other programmes where regulations permit.

This course will be of particular benefit to anthropology students who are interested in political and legal developments as well as political economy perspectives in anthropology. It will also be interesting to law students with an interest in socio-legal, critical, criminological and anthropological approaches to the study of law. Students from other departments are encouraged to take this course if they wish to learn more about the anthropology of law. The course complements the Anthropology of Politics (which already runs as a stand-alone half term unit) but it stands as an independent half unit.

Course content: The aim of this course is to introduce students to major developments and debates in legal anthropology both across time and space. The course is divided into three parts. The first part introduces students to the origins and early developments of the discipline. Students will learn about legal anthropology's encounter with colonialism, its post-colonial critics and the legacy these debates have left on the sub-discipline today. The second part moves on to core debates in contemporary legal anthropology, including on human rights, citizenship and violence and law. In the third part of the course, you will learn about the limits of the law and law's relationship to other social, economic and political domains. Topics will include the policing of the migrant crisis, the criminalisation of poverty and indigenous peoples' struggles over cultural recognition.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

The course will be taught through a combination of weekly lectures and seminars. This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. During reading week (week 6), students will also be asked to conduct a court visit and to write up a short ethnographic project. This will be discussed in seminar after reading week.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Some useful background/overview readings include: Roberts, Simon 2013. *Order and Dispute: An Introduction to Legal Anthropology*. New York: Penguin. Fuller, Chris 1994. *Legal Anthropology, Legal Pluralism and Legal Thought*. In *Anthropology Today* 10(3): 9-12. Just, Peter 1992. *History, Power, Ideology and Culture: Current Directions in the Anthropology of Law*. In *Law and Society Review* 26(2): 373-412. Moore, S.F. 2001. *Certainties Undone: Fifty Turbulent Years of Legal Anthropology, 1949 - 1999*. In *Journal of the Royal Anthropological Institute* 7(1): 95 - 116. Snyder, Francine 1993. *Law and Anthropology: A Review*. Florence: European University Institute. Working Papers in Law 93/4. There are also a number of edited collections that are useful: Moore, Sally Falk 2005. *Law and Anthropology: A reader*. Malden: MA Blackwell. Mundy, Martha 2002. *Law and Anthropology*. Aldershot: UK Ashgate. Starre, June and June F. Collier 1989. *History and Power in the Study of Law: New Directions in Legal Anthropology*. Ithaca, NY: Cornell University Press. Lazarus-Black, M. and Susan Hirsch, 1994. *Contested States: Law, Hegemony and Resistance*. After the Law. New York and London: Routledge.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

AN480 Half Unit Not available in 2020/21

Public Anthropology

This information is for the 2020/21 session.

Teacher responsible: Dr Andrea Pia

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: What and how does anthropology contribute to public life? Do anthropologists have a responsibility to meaningfully contribute to communities beyond the academy that make the study of anthropology possible? This module explores the challenges, difficulties, and stakes of having ethnographic research encounter various publics, ranging from journalists, legal experts, and policymakers to activist groups, local populations, and other scholars. Students of this module engage critically with a variety of media (books, newspaper articles, documentaries, podcasts, social platforms and interactive digital tools) with a view of analysing the ways in which anthropological ideas are conveyed to broader audiences, reflecting on how to improve their representation and effectiveness, and proposing new ways of disseminating these ideas to different publics.

Teaching: 6 hours of lectures, 3 hours of seminars, 8 hours of classes and 12 hours of workshops in the LT.

The course is divided into ten weeks, consisting of a combination of lectures/movie workshops/classes. Each week students read excerpts from selected ethnographic texts across geographical areas that have spurred public interest for the sensitiveness of their subject matter or the questionability of their research ethics. Workshops introduce students to the public buzzes generated by these studies and ask them to reflect on the politics and situatedness of ethnographic research and on the relatability of its findings. In some of the seminars a 'local expert' will be present to serve as a resource in the discussion of the issues. The focus of this module is on the relationship between anthropological theory, the power fields in which it is inserted and its diverse publics. The types of questions this module address are both of critical and applied nature: to what extent can ethnographic studies of the food production system, waste management and water and energy provisions make global social infrastructures fairer? To what extent structure/agency debates in anthropology (and cognate disciplines) may move public perceptions of criminality and marginality towards more sympathetic positions? How effective have ethnographic-based critiques of trickle-down economics and social mobility really been, and why? How can anthropological accounts of systemic inequality take root into public representations of otherness?

The course ends by examining recent anthropological proposals within academia for a more vocal and engaged anthropology. It asks student to critically reflect on whether the discipline's colonial past may still weigh on today's attempts at engaging new publics. What disciplinary benchmarks of successful engagement should anthropologists set up for their own scholarship?

Formative coursework: Students will be expected to produce 1 project and 1 presentation in the LT.

Formative assessment consists in a series of dedicated methodological seminars (two sessions in total) where students familiarise with non-traditional methods of communicating ethnographic insights. In preparation of seminars (on week 4 and 8) students submit a draft proposal of their research in progress and present related research materials in small groups.

- Fassin, Didier 2013. *Enforcing Order: An ethnography of Urban Policing*. Blackwell's.

Assessment: Research project (100%) in the LT.

The course is assessed via a research essay (100%) at the end of LT

For the research essay, students carry out independent research to produce a document of a maximum of 5000 words which relates anthropological scholarships to a public issue of their choice.

AN481 Half Unit Not available in 2020/21

Health and Welfare: Anthropological Perspectives

This information is for the 2020/21 session.

Teacher responsible: Dr Clara Devlieger OLD 6.08

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Law, Anthropology and Society, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course will focus on the study of health and welfare from an anthropological perspective. The course departs from a focus on biomedicine, examining how anthropologists have analysed the individualising medical gaze and the consequences of biopolitics. We consider how understandings of illness, care and healing are socially defined in different socio-cultural contexts, paying attention to issues such as disease, old age, disability, and mental health. Such issues of health are increasingly shifting towards broader conceptions of 'well-being'. As we progress, therefore, we turn to examine how such ideas of health increasingly intersect with the policies and values of welfare, as the political management of well-being. Welfare is both a description of life, as well as a form of intervention that aims to improve those lives. We therefore consider how ethnographic approaches to redistributive work touch on issues concerned with what it means to fare well and how that might be secured in a world defined by inequalities. Ethnographic case studies here may include ethnographies of austerity, dependency and sharing.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the LT.

Indicative reading: Corsín Jiménez, Alberto, ed. 2008. *Culture and Well-Being: Anthropological Approaches to Freedom and Political Ethics*. London; Ann Arbor, MI: Pluto Press. Assessment: Essay (100%, 5000 words) in the LT.

AN497

Dissertation: Religion in the Contemporary World

This information is for the 2020/21 session.

Teacher responsible: Dr Mukulika Banerjee OLD 5.09 and Dr Gisa Weszkalnys OLD 6.14

Availability: This course is compulsory on the MSc in Social Anthropology (Religion in the Contemporary World). This course is not available as an outside option.

Pre-requisites: As for the Programme.

Course content: The dissertation will address a topic in the social sciences of Religion in the Contemporary World. This will normally be a library-based dissertation, but may be supplemented by minor original research elements in consultation with the academic adviser. The topic should make central use of concepts in the study of religion in the social sciences drawn from approved courses on the programme, particularly from the core course, and should demonstrate a good understanding of those concepts and their implications. The dissertation may draw on empirical topics suggested by the taught core and option courses of this programme, but must demonstrate an element of originality in analysis, content or both. The dissertation will normally contain an inter-disciplinary element which may be in the combination of material, the combination of critical, analytical or theoretical concepts, or both. Guidance on standards of presentation etc will be given in the MSc handbook, and will conform to the current standard laid down for the dissertations in MSc social anthropology.

Teaching: 1 hour of lectures in the MT. 3 hours of lectures in the LT. 3 hours of workshops in the ST.

There will be lecture on note taking and avoiding plagiarism in the MT. In addition to the two lectures in the LT and the dissertation workshop in the ST, students will discuss their projects and receive guidance during meetings with their mentors in MT, LT, and ST. This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected.

Formative coursework: Small group tutorials, individual mentoring, discussion of abstracts: please see Programme Proposal. Presentations and class discussions in all programme courses will also contribute towards the formative preparation for the dissertation.

Indicative reading: Angrist JD and Pischke J-S (2014). *Mastering Metrics: The Path from Cause to Effect*. Princeton University Press. Cartwright N and Hardie J (2012). *Evidence-Based Policy: A practical guide to doing it better*. Oxford, UK: Oxford University Press. Patton, MQ (2005). *Qualitative research*. John Wiley & Sons Ltd. Ovreteit, John. *Evaluating health interventions: an introduction to evaluation of health treatments, services, policies and organizational interventions*. McGraw-Hill International, 1998.

Assessment: Dissertation (100%, 10000 words) in August. The dissertation must not exceed 10,000 words including text and footnotes (but excluding bibliography and appendices) to be

submitted to the Department in late August.

AN498

Dissertation- MSc China in Comparative Perspective

This information is for the 2020/21 session.

Teacher responsible: Dr Johannes Steinmuller OLD 5.06A

Availability: This course is compulsory on the MSc in China in Comparative Perspective. This course is not available as an outside option.

Course content: The dissertation must demonstrate an adequate knowledge of relevant social science literature and empirical material from China and elsewhere. It should elaborate a theoretical framework to compare Chinese and non-Chinese data. The topic should have been discussed with and approved by the academic adviser. Note that the dissertation must be based on published sources rather than primary research undertaken by the student.

Teaching: 1 hour of workshops in the MT. 1 hour of workshops in the LT.

There will be a lecture on note taking and avoiding plagiarism in the MT.

Students attend a one-hour dissertation workshop at the end of Lent Term. After deciding on a topic during the Lent term, in consultation with their academic advisers (and other members of staff where appropriate), students submit a one-page abstract in the first week of the Summer term. Each student attends a one-on-one dissertation tutorial with his/her academic mentors in the ST. During these, abstracts will be evaluated and commented upon. Students continue to consult their academic mentors during the Summer Term.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

Student will receive detailed feedback on their project report outlines. Feedback received on the project outline will be helpful when developing the final project report.

Indicative reading:

- O'Keeffe, Aidan G., et al. "Regression discontinuity designs: an approach to the evaluation of treatment efficacy in primary care using observational data." *Bmj* 349 (2014): g5293.
- Kreif, Noémi, et al. "Examination of the synthetic control method for evaluating health policies with multiple treated units." *Health economics* 25.12 (2016): 1514-1528.

Assessment: Dissertation (100%, 10000 words).

The dissertation must not exceed 10,000 words including text and footnotes (but excluding bibliography and appendices) to be submitted to the Department in late August.

AN499

Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Mukulika Banerjee OLD 5.09 and Dr Gisa Weszkalnys

Availability: This course is compulsory on the MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is not available as an outside option.

Course content: The dissertation must demonstrate an adequate knowledge of relevant theoretical literature and the ethnography of one or more contexts. It should attempt to consolidate a theme introduced during the course, developing a sustained research focus on one specific issue in anthropology, using existing ethnographic literature as appropriate. Note that the dissertation must be based on published sources rather than fieldwork undertaken by the student. For the MSc Social Anthropology, the problem should be framed with reference to literature from within the discipline of anthropology (drawn from mainstream journals or ethnographic texts). For the MSc Anthropology and Development and the MSc Anthropology and Development Management, the topic should span the fields of both Social Anthropology and Development Studies - it may cover, but need not be restricted to, the area of overlap, i.e. the anthropology of development as narrowly defined. For the MSc Social Anthropology (Learning and Cognition), the dissertation should draw not only on specifically anthropological literatures and engage with anthropological themes, but also make judicious use of non-anthropological literature from cognitive science, and therefore from related disciplines such as psychology and/or philosophy.

Teaching: 1 hour of lectures in the MT. 3 hours of lectures in the LT. 3 hours of workshops in the ST.

There will be lecture on note taking and avoiding plagiarism in the MT. In addition to the two lectures in the LT and the dissertation workshop in the ST, students will discuss their projects and receive guidance during meetings with their mentors in MT, LT, and ST. This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

A draft protocol. Students will be asked to submit a short 1,000 word draft protocol within 3-4 weeks after the end of the course.

The draft protocol will serve as an outline of the final research protocol, which will account for 100% of the final mark.

While some aspects of their work may still be work in progress (e.g. using bullet points), students will be expected to write up one section of their protocol in a more detailed way. The outlines will be graded and feedback given to students. This allows students to get valuable experience of writing at MSc level at LSE, and they will also understand more specifically the expectations of the summative assessment. Students will be able to use this feedback in their writing of the summative work.

Indicative reading:

- Dupas, P., & Miguel, E. (2017). Impacts and Determinants of Health Levels in Low-Income Countries. In E. Duflo & A. Banerjee (Eds.), *Handbook of Field Experiments*: North Holland.

Assessment: Dissertation (100%, 10000 words) in August.

The dissertation must not exceed 10,000 words including text and footnotes (but excluding bibliography and appendices) to be submitted to the Department in late August.

DV400

Development: History, Theory and Policy

This information is for the 2020/21 session.

Teacher responsible: Prof James Putzel CON.8.03 and Dr Rajesh Venugopal CON.6.08

Availability: This course is compulsory on the MSc in Development Studies and MSc in Political Economy of Late Development. This course is available on the MPhil/PhD in Development Studies, MSc in Anthropology and Development, MSc in Empires, Colonialism and Globalisation, MSc in Environment and Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: None

Course content: The course integrates the concepts and perspectives of a range of disciplines to consider: major trends of development and change in modern history and interpretations of them in the social sciences and contemporary economic and social theory and their bearing on the policy and practice of development. During Michaelmas Term the course critically discusses concepts of 'development' and the historical evolution of paradigms of development thinking and policy. With reference to comparative historical experience, we explore the role of states and markets in development and/underdevelopment, colonial legacies, the political economy of growth and redistribution, and the role of politics and power in development. We examine key issues in development such as: the record of pro-market reforms; the experience of "developmental states"; and the challenges to development thinking and practice presented by feminist theory, environmental sustainability, globalisation and new patterns of global inequality. (Key issues may change from year to year) The Lent Term builds on these foundations to consider cutting edge debates about policy and practice usually including: aid, social policy; industrialisation and international trade; agriculture and land in the context of climate change and the impact of conflict and "state fragility". We will look at controversies such as those around new approaches to business and the role of new technologies, as well as problems and prospects in the use of data, and project and programme evaluation.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 18 hours of lectures and 15 hours of seminars in the LT.

A three hour revision session in the final week of LT

There will be a Reading Week in week 6 of MT and LT.

- Departmental expectations for a dissertation;
- Developing a research question;
- Critical appraisal of the literature;
- Overview of different methodological approaches;
- Scientific writing workshop;
- Communication of dissertation findings: policy and practice implications

Formative coursework: One 1,500 word essay with written feedback submitted in Michaelmas Term and at least two seminar presentations on literature (one in Michaelmas and one in Lent).

Indicative reading: The following are recommended basic readings for the course:

- A. Kohli, *State-Directed Development: Political Power and Industrialization in the Global Periphery* (Cambridge, 2004).
- A Sen, *Development as Freedom* (Anchor, 1999).
- HJ Chang,

Kicking Away the Ladder: Development Strategy in Historical Perspective (Anthem, 2002). HJ Chang, Economics: The User's Guide (Penguin, 2014). D Rodrik, One Economics, Many Recipes: Globalization, Institutions, and Economic Growth (Princeton University Press, 2008). J. Ferguson, The Anti-Politics Machine: 'Development', Depoliticisation and Bureaucratic Power in Lesotho (Cambridge, 1990). M. Jerven, Poor Numbers: How we are misled about African development statistics and what to do about it (Cornell, 2013). United Nations, "Transforming Our world: the 2030 Agenda for Sustainable Development" (SDGs) A/RES/70/1 (25 September 2015).

- Dunleavy, P. (1986) Studying for a Degree in the Social Sciences, Macmillan. (See Chapter 5: Writing a Dissertation)
- Denscombe, M. (2007) The Good Research Guide: for small-scale social research projects. Maidenhead: Open University Press. H61 D41
- Kotz, D. and Cals J.W.L. (2013) Effective writing and publishing scientific papers – part 1: how to get started. Journal of Clinical Epidemiology. Vol 66, no 4, p 397.
- Grix, J. (2004) The Foundations of Research. Houndmills: Palgrave Macmillan LB2369 G87
- Rudestam, K. and Newton, R. (2001) Surviving Your Dissertation: a comprehensive guide to content and process. 160 London: Sage. LB2369 R91

Assessment: Exam (80%, duration: 3 hours) in the summer exam period.

Essay (20%, 2000 words) in the LT.

DV407 Half Unit Poverty

This information is for the 2020/21 session.

Teacher responsible: Dr Sohini Kar CON.6.14

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV407 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: The course is an interdisciplinary analysis of poverty. With attention to both the macro-level political economy of poverty and the micro-level lived experiences of the poor, we will examine how and why poverty persists in developing countries and analyse policy interventions and their outcomes. The course is interdisciplinary in focus, drawing on a range of methodological approaches to poverty, and does not require any prior mathematical or statistical qualification.

The course begins with an examination of the definition and measurement of poverty. We will then consider social mobility, followed by the spatial dimensions of poverty, including urban and rural poverty. We will then turn to issues of work and employment, social protection, and the politics of poverty, followed by weeks on environmental poverty, and private sector involvement, including the question of financial inclusion. The course will end with focus on successful cases of pro-poor development.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will give one class presentation, and submit one formative essay of 1500 words.

Indicative reading: Javier Auyero, Patients of the State: The Politics of Waiting in Argentina (Duke University Press 2012); Abhijit Banerjee and Esther Duflo, Poor Economics: A Radical

Rethinking of the Way to Fight Global Poverty (Public Affairs/ Penguin 2011); Anirudh Krishna, Broken Ladder: The Paradox and Potential of India's One Billion (Cambridge University Press 2017); Tania Li Land's End: Capitalist Relations on an Indigenous Frontier (Duke University Press 2014); Rob Nixon, Slow Violence and the Environmentalism of the Poor (Harvard University Press 2011); Poverty Capital: Microfinance and the Making of Development (Routledge 2010)

Assessment: Essay (100%, 4000 words) in the ST.

DV410

Research Design and Dissertation in International Development

This information is for the 2020/21 session.

Teacher responsible: Dr Diana Weinhold CON 7.10

Availability: This course is compulsory on the MSc in Development Management, MSc in Development Studies, MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.

Course content: DV410 and MY410 together provide students a coordinated introduction to research design and to a selection of research methods used in development research. The objective is to enable students (a) to critically assess the quality and validity of academic research findings in development research and policy, including analyses they will read in their courses and for their dissertation; and (b) to independently design their own research proposal. Students will learn about the challenges of research design, including how to generate a research question and how to select a research method, the relative strengths and weaknesses of alternative research methods, and some of the practical and ethical dos and don'ts of doing fieldwork. Students will then apply these skills to prepare for and write an original dissertation.

Teaching: DV410: 6 hours of lectures in the MT. 8 hour workshop MY410: 15 hours of lectures and 15 hours of seminars in the MT. The development of the dissertation is conducted via a coordinated, joint collaboration between the individual student, his or her academic mentor in ID, instructors and seminar leaders in MY410, and dissertation workshop leaders. Additional support and feedback is also available from other ID faculty via the Department's open-door policy, and from individual and group sessions provided through LSE Life throughout the academic year. In the MT students will attend both MY410 lectures and seminars on research design, as well as three DV410 lectures on LSE Life and library resources, and ethics issues for MSc research. Students will also meet with their academic mentor at least twice per term. In MT week 11 students will submit a 1000-word research proposal#1 for summative assessment.

In LT week 3 students will receive a mark and written feedback on research proposal#1. Throughout the term they are expected meet with their academic mentor, other ID faculty, and/or MY410 Fellows on a regular basis as they develop their longer 3000-word dissertation proposal#2. In either LT or ST students will attend a full day dissertation workshop and receive oral feedback on their draft dissertation proposal#2. In ST they will submit their (revised) 3000-word dissertation proposal#2 for summative assessment. Students will receive a provisional mark and written feedback on their dissertation proposal#2 by the end of ST.

There will be a reading week in Week 6.

Formative coursework: Formative oral feedback of dissertation ideas and proposals are provided throughout the academic year from students' academic mentor and ID faculty. Formative coursework and feedback will be provided in MY410 seminars, and formative oral feedback on dissertation proposal#2 will be provided in the dissertation workshop.

Every student will have to complete the ethics review process by end of ST7. Where appropriate, students requiring travel risk assessment will have to complete this by end of ST7.

Indicative reading: Chalkidou, K., Tunis, S., Lopert, R., Rochaix, L., Sawicki, P. T., Nasser, M., & Xerri, B. (2009). Comparative Effectiveness Research and Evidence-Based Health Policy: Experience from Four Countries. *Milbank Quarterly*, 87(2), 339-367. Banta, H. D., & Luce, B. R. (1993). Health care technology and its assessment: an international perspective. Drummond, M. F., Schwartz, J. S., Jönsson, B., Luce, B. R., Neumann, P. J., Siebert, U., & Sullivan, S. D. (2008). Key principles for the improved conduct of health technology assessments for resource allocation decisions. *International journal of technology assessment in health care*, 24(03), 244-258. Sorenson, C., Drummond, M., & Kanavos, P. (2008). Ensuring value for money in health care: the role of health technology assessment in the European Union (No. 11). WHO Regional Office Europe. Sorenson, C. (2010). Use of comparative effectiveness research in drug coverage and pricing decisions: a six-country comparison. *Issue Brief (Commonwealth Fund)*, 91, 1-14.

Assessment: Dissertation (70%, 10000 words) in the ST. Coursework (30%) in the MT and LT.

MY410 component (30%).

Students will attend compulsory MY410 lectures and seminars and submit one dissertation proposal and one annotated bibliography:

- Annotated bibliography (33%) in the MT.

- Research proposal (67%) in the LT.

DV410 component (70%, Dissertation of 10000 words).

DV411 Half Unit Not available in 2020/21

Population and Development: an Analytical Approach

This information is for the 2020/21 session.

Teacher responsible: Prof Tim Dyson, CON.8.04

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Global Population Health, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Social Research Methods, MSc in Urban Policy (LSE and Sciences Po), MSc in Urbanisation and Development and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: Using the demographic transition as its framework, the course examines different analytic approaches to the main interrelationships between population change and socio-economic development. It draws on a variety of theoretical and historical experiences to address and explore these interconnections. It aims to provide balance between theoretical understanding, knowledge of empirical evidence and basic causal processes, and implications for policy.

The course begins by providing an overview of the world's current demographic situation at both the global and the regional levels. It then addresses Malthusian and anti-Malthusian perspectives on the basic relationships linking population growth and economic growth. These contrasting perspectives are considered in the context of both historical and contemporary experience. The course

then proceeds to assess demographic transition theories and their relationships to theories and processes of economic development, urbanisation and socio-structural change. Urban growth, migration, and urbanization receive special attention. The implications of population change for issues of employment, savings and investment are considered, as are issues relating to energy, food production and security, carbon emissions and climate change. Contemporary neo-Malthusian arguments, with their environmental components are also considered, as are issues relating to women's empowerment, democratization, and population aging. Further details will be provided at the start of the session.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of lectures in the LT. There will be a reading week in Week 6.

Formative coursework: Students will be given the opportunity to undertake a 'mock examination'. This will be graded and accompanied by written feedback within two weeks of its submission.

Indicative reading: A focussed reading list will be provided.

However, relevant readings include: Tim Dyson *Population and Development - The Demographic Transition*, Zed Books 2010; Tim Dyson 'A partial theory of world development: The neglected role of the demographic transition in shaping modern society' in *International Journal of Population Geography*, 7, 2001; Nancy Birdsall, A C Kelley and S Sinding (eds) *Population Matters: Demographic change, Economic Growth, and Poverty in the Developing World*, Oxford University Press 2001; M Livi-Bacci *A Concise History of World Population*, Blackwell Publishers, Oxford 2001; T Dyson, *Population and Food: Global Trends and Future Prospects*, Routledge, 1996; R H Cassen (Ed), *Population and Development: Old Debates, New Conclusions*, Overseas Development Council, Washington DC, 1994; World Bank, *Population Change and Economic Development*, Washington DC, 1985. and various contributions to G. McNicoll, J. Bongaarts and E. P. Churchill (eds.) *Population and Public Policy : Essays in Honor of Paul Demeny - Supplement to Population and Development Review* 38 (2012) which is available open access.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

DV413 Half Unit

Environmental Problems and Development Interventions

This information is for the 2020/21 session.

Teacher responsible: Prof Timothy Forsyth CON.8.05

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Accounting, Organisations and Institutions, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Global Politics, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in International Relations (Research), MSc in Political Economy of Late Development, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration, MSc in Regulation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Also available to students taking MSc International Relations or MSc International Political Economy as part of the LSE-Sciences Po Double Degree in Affaires Internationales programme.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

This course is capped at 72 students.

Pre-requisites: None

Course content: This course is for MSc students who wish to study social and political aspects of environmental change and its implications for international development. The aim is to summarise the key current debates about 'environment and development' from perspectives of social and political theory with special reference to institutional theory, livelihoods, and inclusive policy interventions.

The course is structured to analyse the challenges of making well-informed environmental interventions in the face of poverty and vulnerability, and then seeking practical solutions to these dilemmas. The course first considers the nature of environmental problems within a 'development' context, and what this means for environmental science and norms as applied in developing countries. Themes include assessing environmental science and expertise in concerning adaptation to population growth, resource scarcity, deforestation, desertification, vulnerability to 'natural' disasters, and risks associated with climate change, including questions of gender and environment. As the course progresses, it considers debates about policy interventions such as common property regime theory; theories of the state and environment (including resistance and social movements); community-based natural resource management and Sustainable Livelihoods; adaptation to climate change; forests; and urban environmental policy (these latter themes involve debates on multi-level, multi-actor governance involving the connections of local development and global climate change policy).

Learning outcomes:

- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual randomized controlled trials and collections of randomized controlled trials
- Critically evaluate the internal validity of randomized controlled trials
- Assess heterogeneity in a collection of randomized controlled trials
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the LT.

There is a ninety minute revision session in the LT.

There will be a reading week in Week 6

Formative coursework: Students will have the opportunity to produce 1 essay in MT

- Course convener will provide feedback on group presentations on the last day of the in-person teaching session
- Course convener will also provide written feedback on project outlines.

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. Students are not advised to buy a single textbook for this course but to read selectively and critically from various sources. The following books might be useful introductions. Adams, W.M. 2019. Green Development: environment and sustainability in a developing world. 4th edition. London: Routledge. Forsyth, T. 2003. Critical Political Ecology: the politics of environmental science, London, Routledge. Jones, S. and Carswell, G. 2004. The Earthscan reader in environment, development and rural livelihoods. London ; Sterling, VA : Earthscan. Kohler, P. (2019) Science Advice and Global Environmental Governance: Expert Institutions and the Implementation of International Environmental Treaties, London and New York: Anthem Press. Neumann, R. 2005. Making Political Ecology, London: Hodder Arnold. Nightingale, A. (ed) 2019. Environment and Sustainability in a Globalizing World, London: Routledge. Ostrom, E., Stern P.C., Diet, T., Dulsak, N. and Stonich, S.

(eds.) 2002 The Drama of the Commons: Understanding Common Pool Resource Management. Washington, D.C.: National Academy Press. L Schipper and I Burton (eds) (2008) The Earthscan Reader on Adaptation to Climate Change, London: Earthscan.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Essay (20%, 2000 words) in the LT.

DV415 Half Unit

Global Environmental Governance

This information is for the 2020/21 session.

Teacher responsible: Prof Kathryn Hochstetler

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Accounting, Organisations and Institutions, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy and Regulation, MSc in Global Politics, MSc in International Development and Humanitarian Emergencies, MSc in International Relations (Research), MSc in Political Economy of Late Development, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: This course is for any MSc student who wishes to study the politics of global environmental policy from the perspective of environmental governance and international development. The aim is to summarise debates about 'global' environmental problems and to review the contributions of debates about 'governance' to political solutions. The main theoretical focus of the course is on understanding the evolution of environmental policy regimes at multiple scales and with multiple actors. The guiding empirical focus is on the role of developing countries in global environmental governance and the effects of environmental policy regimes on their development strategies and outcomes. Some of this draws upon debates within International Relations, but this course also considers other literatures about environmental politics. Only part of global environmental governance takes place in formal spheres specifically devoted to environmental topics. Economic institutions like trade and financial institutions also play a key role and are covered here.

To make the course focused, it will consider primarily anthropogenic climate change, biodiversity and forests, and human movement in response to environmental change. In addition, these topics will be analysed from the perspective of the role of states and inter-state agreements; business actors and non-governmental organisations (NGOs); the regulation of trade; and the evolution of financial assistance, including from the World Bank.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

There will be a Reading Week in week 6.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: A detailed reading list will be presented at the beginning of the term. There is no single textbook for this course, but we recommend the following as a basic background reading list: Betsill, M. and Corell, E. (eds). 2007. NGO Diplomacy:

The Influence of Nongovernmental Organizations in International Environmental Negotiations, MIT Press. Biermann, F. Pattberg, P. and Zelli, F. (eds). 2010. Global Climate Governance Beyond 2012: Architecture, Agency and Adaptation, Cambridge University Press. Ciptet, D., J.T. Roberts, and M.R. Khan. 2015. Power in a Warming World: The New Global Politics of Climate Change and the Remaking of Environmental Inequality. MIT Press. Gallagher, K.S. 2014. The Globalization of Clean Energy Technology: Lessons from China. MIT Press. Humphreys D. 2009. Logjam: Deforestation and the Crisis of Global Governance, Earthscan. Lewis, J.I. 2014. The Rise of Renewable Energy Protectionism: Emerging Trade Conflicts and Implications for Low Carbon Development. Global Environmental Politics 14(4): 10-35. Najam, A. 2005. Developing Countries and Global Environmental Governance: From Contestation to Participation to Engagement. International Environmental Agreements 5: 303-321. Newell, P. and J.T. Roberts (eds). 2016. The Globalization and Environment Reader. Wiley. Raustiala, K. and D. Victor. 2004. The Regime Complex for Plant Genetic Resources. International Organization 58(2): 277-309.

Assessment: Essay (20%, 2000 words) and take-home assessment (80%) in the ST.

DV418 Half Unit African Development

This information is for the 2020/21 session.

Teacher responsible: Dr Eyob Balcha Gebremariam CON. 6.18A (Convenor)

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Health and International Development, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Urban Policy (LSE and Sciences Po), MSc in Urbanisation and Development and Master of Public Administration. This course is not available as an outside option.

Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit).

Course content: The major concern of the course is with the politics of development in the African context. The course will examine processes of historical, economic, political, social and cultural change in Sub-Saharan Africa. It provides critical analysis of key development interventions and processes. It seeks to combine general theoretical overviews with country case studies illustrating the variety of experiences and trajectories. It does not aim to provide comprehensive coverage of development issues or of regions. Course content will vary from year to year, depending on the specialities of staff.

Attention is paid to legacies of the colonial encounter; the constraints and opportunities presented by African countries' positions in the global economy; the political economy of industrialisation and agrarian transformation, resource mobilisation; trade diversification; urbanisation, demographic transition, institutional reforms and state capacity. Attention will also be paid to social policy with special focus on issues such as social protection and welfare, youth employment, education, health, horizontal inequality and conflict.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

The first 30 minutes of each seminar will be student-led presentation and discussion. Students will make a 10-12 minute

presentation in a maximum group of three and lead a discussion based on a set of questions provided on the theme of the week. There will be a ninety-minute revision session in early ST. There will be a reading week in Week 6.

Formative coursework: Students will write a 1,500-word essay chosen from class questions and in discussion with the course leader, to be submitted by the Wednesday at 12:00 of the reading week.

Indicative reading: A detailed weekly reading list will be provided at the first meeting. The following readings provide an introduction to the course:

1. Botchwey, K. and Stein, H., 2012. Good growth and governance in Africa: Rethinking development strategies. Oxford University Press.
2. Mkandawire, Thandika. (2017). State Capacity, History, Structure, and Political Contestation in Africa. In M. A. Centeno, A. Kohli, D. J. Yashar, & D. Mistree (Eds.), (pp. 184-216).

Continuous assessment (10%).

Presentation & Class Participation (10%)

DV420 Half Unit

Complex Emergencies

This information is for the 2020/21 session.

Teacher responsible: Prof David Keen CON.6.06

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Health and International Development, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Urban Policy (LSE and Sciences Po), MSc in Urbanisation and Development and Master of Public Administration. This course is not available as an outside option.

Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV420 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: The course examines the consequences and causes of humanitarian disasters. It looks at the changing nature of civil conflicts, at the famine process, and at the benefits that may arise for some groups from war and famine. It examines some of the roots of violence in civil wars, as well as the information systems that surround and help to shape disasters. The course is interdisciplinary and looks at political, economic and psychological functions of violence.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of lectures in the ST. There will be a ninety-minute revision session at the beginning of ST.

There will be a reading week in Week 6.

Formative coursework: Students will have the opportunity to receive feedback on formative work, in the form of a practice-assessed essay.

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. A useful text, which is designed in large part around the course, is David Keen, *Complex Emergencies* (Polity, 2008). Other texts of interest include David Keen, *Useful Enemies: When Waging Wars is More Important than Winning Them* (Yale University Press, 2012); Stathis Kalyvas, *The Logic of Violence in Civil War* (Cambridge University Press, 2006); David Keen, *Conflict and Collusion in Sierra Leone* (James Currey, 2005); David Keen, *Endless War? Hidden Functions of the 'War on Terror'* (Pluto, 2006); Michael Mann, *The Dark Side of Democracy: Explaining Ethnic Cleansing* (Cambridge University Press, 2005); Amartya Sen, *Poverty and Famines* (Oxford University Press, 1981); Frances Stewart and Valpy FitzGerald (eds.), *War and Underdevelopment, Volumes 1 and 2* (Oxford University Press, 2001); and Jeremy Weinstein, *Inside Violence: The Politics of Insurgent Violence* (Cambridge University Press, 2007); Tim Allen, *Trial Justice: The International Criminal Court and the Lord's Resistance Army* (Zed Press, 2006), Chris Dolan, *Social Torture: The Case of Northern Uganda, 1986-2006* (Berghahn, 2009); Zoe Marriage, *Not Breaking the Rules, Not Playing the Game: International Assistance to Countries in Conflict* (Hurst and Co., 2006); Christopher Cramer, *Civil War is Not a Stupid Thing: Accounting for Violence in Developing Countries* (Hurst and Co., 2006); Mats Berdal and David Malone, *Greed and Grievance: Economic Agendas in Civil Wars* (Lynne Rienner, 2000); Hugo Slim, *Killing Civilians: Method, Madness and Morality in War* (Hurst and Co., 2008).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

DV421 Half Unit

Critical Perspectives on Global Health and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Philipa Mladovsky CON.6.13

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Management, MSc in Development Studies, MSc in Global Health Policy, MSc in Global Politics, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV421 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: The course is concerned with health and international development in its social, cultural, historical and political context. Students will learn to think critically about how global health policy and practice reproduce and/or change power relations - between states, communities and individuals. The course does this by exploring the history of global health, interrogating taken-for granted concepts and understanding how they have been socially constructed and suggesting alternative perspectives. Drawing on anthropological, sociological and other literature, it investigates how global health policies reproduce, change or are changed by values, morals, ethics and people's identity and subjectivity. Themes that run through the course include: legacies of colonialism; the critique of neoliberalism; and interrogating positivism in global health research. Case studies are drawn mainly from sub-Saharan Africa, Latin America, and Asia and typically focus on specific diseases, conditions or parts of the health system. Drawing on theories of power such as structural

violence and governmentality, the course will enable students to question mainstream global health policy initiatives which might seek to promote equity and human rights, but may instead create new exclusions and marginalised populations.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. There will be a reading week in Week 6.

Formative coursework: Students are expected to prepare at least one class presentation and submit one essay.

Indicative reading: A detailed weekly reading list will be provided at the first lecture. The readings for this course are from journals and select book chapters mainly but not exclusively in the fields of anthropology and sociology. Readings will also include case studies from various countries and reports, papers and articles published by international organisations, think-tanks, and a variety of other sources. Farmer, P., Kim, J.Y., Kleinman, A. and Basilio, M., 2013. Reimagining global health: an introduction. Univ of California Press. Biehl, J. and Petryna, A. eds., 2013. When people come first: critical studies in global health. Princeton University Press. Adams, V., 2016. Metrics: What counts in global health. Duke University Press. Geissler, P.W., Rottenburg, R. and Zenker, J. eds., 2014. Rethinking biomedicine and governance in Africa: Contributions from anthropology (Vol. 15). transcript Verlag. Baer, H.A., Singer, M. and Susser, I., 2003. Medical anthropology and the world system. Greenwood Publishing Group. Dry, S. and Leach, M. eds., 2010. Epidemics: "Science, Governance and Social Justice". Routledge. Packard RM. 2016. A history of global health: interventions into the lives of other peoples. JHU Press

Assessment: Take-home assessment (100%) in the ST. The take-home assessment will take the form of a take-home essay (100%, 3,000 words) due at the start of Summer Term.

DV423 Half Unit

Global Political Economy of Development

This information is for the 2020/21 session.

Teacher responsible: Prof Robert Wade CON.7.07

Availability: This course is available on the Global MSc in Management, Global MSc in Management (MBA Exchange), MPA in International Development, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Global Politics, MSc in International Development and Humanitarian Emergencies and MSc in Political Economy of Late Development. This course is not available as an outside option.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: Undergraduate economics gives a big advantage, but is not pre-requisite.

Course content: The course examines the political economy of 'North-South' or 'core-periphery' relations, focusing on how changes in international organisations and the international policy framework affect developing countries' economic trajectories and national-level strategies (eg in production, trade, FDI, finance) for interaction with the global economy. It covers the performance of the world economy as a whole (trends in growth and shrink, inequality, poverty); international systems of production, trade, and finance; the rules or regimes which govern interaction between economies, states and firms (regimes such as Bretton Woods, and the Post Bretton Woods dollar standard); and several international organisations (such as the World Bank, IMF, UNCTAD, G20). Along the way it analyses the major financial/economic crises of 1997-99 and 2007-09. In contrast to much writing in International Political Economy, it looks at these things from the perspective of the low and middle-income countries (in the spirit of the Swahili proverb, "Until lions have their own historians, tales of hunting will always

glorify the hunters"), and does not assume that the G7 states provide a generally benign ('win-win') environment for development in the rest of the world (as in the G7 mantra "free trade and free entry for FDI benefits us all").

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of lectures in the LT. There will be a reading week in Week 6.

Formative coursework: Students have the option of writing one essay of 2,000 words in MT.

Indicative reading: Core text: John Ravenhill (ed), Global Political Economy, 5th edition, OUP, 2017.

Assessment: Take-home assessment (100%) in the LT. The paper will be released via the course Moodle site. Please note that as this is a 48 hour take-home examination in LT (Week 0), extensions for disabilities will apply only in exceptional circumstances. Students who cannot commit to be available for the exam period may NOT register for this course.

DV424 Half Unit

International Institutions and Late Development

This information is for the 2020/21 session.

Teacher responsible: Prof Kenneth Shadlen CON.6.07

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in International Political Economy, MSc in Media, Communication and Development and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit. Please note all students are asked to submit a brief statement of 150 words (max) on why they want to take the course.

2/3 of the spaces should go to ID and joint degree students, distributed on a random basis.

1/3 go to non-ID/joint students, distributed on a random basis.

Everyone else goes on the waitlist, and as spots open the course leader will allocate these, without regard to degree/dept, on the basis of the brief statements.

Course content: This course examines the politics of the international economy. We analyse the overarching rules and regulations that structure the international economy, and thereby provide context for development policy, and we assess the role of a range of actors (e.g. governments, firms, non-state actors) in shaping and reshaping the international economic order. We are particularly interested in understanding the ways that developing countries respond to and participate in international regimes and organisations, and how changes in global economic governance affect opportunities for economic development. The first week, which synthesises a variety of explanations of the role that international organisations play in global politics, establishes the theoretical spine for the course. We then examine governance in international sovereign debt and finance, public and private. We analyse the politics of debt relief for the poorest and most heavily-indebted countries, where most of the debt is owed to public creditors; and we analyse the politics of debt restructuring for middle-income countries where significant shares of the debt is owed to private/commercial creditors. The course then turns to the politics of international trade, investment, and intellectual property. This cluster of five sessions is organised around a dialogue between multilateral and regional frameworks for integration into the global economy, with the World Trade Organisation (WTO) serving as our principal point of reference. We examine the emergence of the WTO, both in terms of the substance of the Uruguay Round agreements and as an inter-governmental

organisation with its own set of procedures for agenda-setting, rule-making, and dispute-settlement. We then examine emerging arrangements for global governance in the areas of foreign investment and intellectual property. And, then we focus explicitly on the resurgence of new, North-South, bilateral and regional trade agreements, considering the implications of such agreements for development and the factors that contribute to their proliferation. In concluding the course, taking a step back and reviewing the term's material from a "birds-eye view," we analyse contrasting trajectories of change in two development regimes, one regarding "industrial transformation" and mobility in the international division of labour, and another regarding "humanitarianism" and poverty reduction.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 2 hours of lectures in the ST. This includes a 2 hour revision session in the ST. There will be a reading week in Week 6.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A detailed reading list is presented at the beginning of term. The Conduct of Hostilities under the Law of International Armed Conflict Documents on the Laws of War (Just and Unjust Wars) Law and War (War and Law Since 1945

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (15%, 1500 words) and essay (25%, 1500 words) in the LT. 2 essays (15% and 25%, each 1,500 words) in the LT. The larger weight goes to the essay receiving a higher mark, thus allowing the first to serve as "formative" for the second.

Essays are based on – and linked to – the questions discussed in the weekly seminars. Details distributed at the start of term.

DV428 Half Unit

Managing Humanitarianism

This information is for the 2020/21 session.

Teacher responsible: Dr Stuart Gordon CON.8.10

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Conflict Studies, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Gender, Peace and Security, MSc in Global Politics, MSc in Health and International Development, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in International Development and Humanitarian Emergencies, MSc in International Migration and Public Policy and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV428 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Generally, we provide sufficient places for all students who wish to take the course and register an interest in the first week of term.

Course content: The course looks at international, national and local responses to conflict and natural disasters. Building on an analysis of the causes, construction and consequences of humanitarian disasters, this course focuses on humanitarian actors (including aid workers, journalists, medics, government officials, soldiers, politicians and peace negotiators). It considers the principles and the politics of humanitarian action, exploring the overlaps and tensions between practices of humanitarian assistance and humanitarian intervention and how humanitarian institutions shape and are shaped by global governance and state power. It asks how humanitarianism relates to ideas about human rights and justice, and the politics of securitisation. It

considers why humanitarian organisations and governments respond to some crises and not to others as well as the critique of humanitarian assistance and the ways in which the UN and NGO communities have sought to professionalise their activities. The course also looks at how recipients of humanitarian aid respond to these programmes, and in some cases subvert or transform them into quite different projects. Case studies will be drawn primarily from Africa, Central and South Asia and Latin America. However, there is also likely to be discussion of ongoing humanitarian emergencies, wherever they are located.

Teaching: 32 hours of lectures and 15 hours of seminars in the MT.

The course will be taught in the Michaelmas Term and will consist of 10 lectures of 120 minutes each and ten seminars of one-and-a-half hours (various days and times). There be a Revision Lecture in MT.

Five or Six 'Voice of Experience' lectures of up to two hours (from 18:00 on Mondays or Tuesdays depending on speaker availability). There will be a reading week in Week 6.

Formative coursework: Students will receive feedback on seminar group presentations and have the option to write a formative essay, not exceeding 1,500 words. Essay topics will relate to seminar discussions and lecture material covered to date.

Students will receive an indicative grade and written feedback within three weeks of submission (if submitted on time). Students submit optional formative papers within two weeks of the seminar presentation.

Indicative reading: Stuart Gordon and Antonio Donini 'Romancing Principles and Human Rights - Are Humanitarian Principles Salvageable?' International Review of the Red Cross / Volume 97 / Issue 897-898 / June 2015, pp 77-109; M. Barnett, (2011). Empire of Humanity: A History of Humanitarianism, Ithaca: Cornell University Press; M. Barnett, M. Barnett & T. G. Weiss (Eds.), 2008. Humanitarianism in Question Politics Power and Ethics, Ithaca: Cornell University Press; A. De Waal, 1997. Famine Crimes: Politics and the Disaster Relief Industry in Africa. Oxford: James Currey; G. Loescher, (2001). The UNHCR and World Politics, Oxford University Press; D. Rieff, (2002). A Bed for the Night: Humanitarianism in Crisis, Vintage/Random House.

Assessment: Take-home assessment (100%) in the LT.

The exam paper will be released in week 11 of the Michaelmas Term. The course is assessed through the submission of two 2000-word essays by Tuesday of week 1 of the Lent Term.

DV431

Development Management

This information is for the 2020/21 session.

Teacher responsible: Dr Mahvish Shami CON.8.24 and Mr Jonathan Weigel CON.8.14

Availability: This course is compulsory on the MSc in Anthropology and Development Management and MSc in Development Management. This course is available on the MSc in Political Science and Political Economy. This course is not available as an outside option.

Course content: Why are some countries rich and others poor? Why are some governed well and others badly? This course employs a political economy approach to examine the causes of development, identify the underlying obstacles to development, and evaluate potential solutions. It focuses on the principles governing the institutions, politics, and organisations through which policies, programmes and projects are produced and implemented. Attention is given to the different kinds of authority, incentives and accountability mechanisms that govern the relationships between leaders, managers and recipients. It reviews ongoing debates about the best ways of designing state agencies, private firms and NGOs, by showing how centralised bureaucracies, markets, participatory and solidaristic agencies operate to provide services in practice. It explores the dynamics of different forms of democratic and authoritarian states, the

determinants of good and poor governance, and how social, political and economic forces interact to drive change and stability. In order to enable students to make practical judgments about institutional reform programmes in various contexts, competing approaches to development are critically and constructively analyzed in light of case studies. The course is divided into several parts: Analytical Assumptions, Government and Governance, Private Sector, and Civil Society. On completing the course students should be able to: (i) use theory to identify the causes of actual development challenges, (ii) identify and assess relevant case study material to inform development practice; and (iii) employ the insights developed throughout the course to formulate policy recommendations and plans of action for improving development.

Teaching: 20 hours of lectures, 15 hours of seminars and 10 hours of workshops in the MT. 18 hours of lectures, 13 hours and 30 minutes of seminars and 8 hours of workshops in the LT. 3 hours and 30 minutes of lectures in the ST.

There will additionally be an introductory workshop at the start of MT. Students are expected to attend all these sessions. Lectures will focus on the theoretical debates driving current policy practice in the development community, while seminars will relate these to practical problems of implementation, drawing on case studies, class exercises, and the personal experience of participants. Seminars will discuss topics covered in the lecture, and will be conducted on the basis either of a student presentation or a class exercise.

MSc in Development Management and MSc in Anthropology and Development students (only) will also take part in and be assessed on the Development Management Project, a live consultancy exercise for real development agencies in consultation with International Development staff. Workshops will be organised to assist student groups to formulate their proposals and negotiate their projects with their commissioning agencies. These students will also be offered mandatory special sessions specifically on practical and professional aspects of the consultancy projects, development management workshops, and a development policy debate. There will be a revision session in early ST.

Formative coursework: In the Michaelmas Term, all students are expected to produce one short essay on a topic agreed with an individual tutor, to prepare them for the final exam. In addition, MSc in Political Science and Political Economy students are expected to produce a formative case study analysis presentation in MT, to prepare them for their assessed presentation in LT.

Indicative reading: A detailed weekly reading list is provided at the first course meeting. Background readings include: Brett, E.A. (2009) *Reconstructing Development Theory*; Faguet, JP. 2012. *Decentralization and Popular Democracy: Governance from Below in Bolivia*. Ann Arbor: University of Michigan Press; Chang, H. 2003, *Rethinking development economics*, Anthem Press; London, *Intermediate Technology*; Kohli, A. 2004 *State-directed development: political power and industrialization in the global periphery*, Cambridge, Cambridge University Press; Linz, J. & A. Stepan, *Problems of democratic transition and consolidation*, Johns Hopkins; Olson, M. 1982 *The rise and decline of nations*, Yale University Press; North, D. 1990. *Institutions, Institutional Change and Economic Performance*. Assessment: Assessment path 1
Exam (20%, duration: 1 hour) in the summer exam period.
Project (40%) and presentation (5%) in the LT.
Take-home assessment (35%) in the ST.
Assessment path 2
Exam (25%, duration: 1 hour) in the summer exam period.

Take-home assessment (55%) in the ST.
Presentation (20%) in the LT.

Assessment Path 1 (for MSc in Development Management and MSc in Anthropology and Development Management students)
Assessment Path 2 (for MSc in Political Science and Political Economy students):

Students are required to pass the final exam in the main exam period in order to pass the course. A fail in the exam cannot be condoned by a pass in other elements of assessment.

DV432 Half Unit

China in Developmental Perspective

This information is for the 2020/21 session.

Teacher responsible: Prof Jude Howell CON. 8.02

Availability: This course is available on the CEMS Exchange, MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in International and Asian History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: Excellent reading and speaking skills ~(IELTS 7 minimum).

Course content: This course looks at China from a comparative developmental perspective, locating the discussion of China within the interdisciplinary field of development studies. It examines China's developmental trajectory since 1949, explaining the fundamental shift in developmental path from late 1978 onwards. It considers China's role in low-income countries, as a model of innovation, as a voice for developing country concerns and as an important aid donor. It reflects on China's recent achievements in reducing poverty and places these in comparative context. The course considers the governance challenges posed by rapid economic reform, the attempts to reform the Party-state and to manage social tensions. It examines the social dimensions of rapid economic reform and the implications for social policies. It looks at the emergence of NGOs and other forms of civil society organising and considers changing state-society relations. Finally it considers China's role as aid donor and its emergence as a global economic and political power. The course will enable students to obtain an understanding of key developmental issues and discussions about China and to link these discussions to broader debates and theories in development studies.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. In addition, one introductory seminar session in MT, one essay preparation session in MT and two exam revision sessions in MT.

Formative coursework: Students have the opportunity to receive feedback on a formative essay of 1,500 words. Students will also receive feedback on their seminar performance. Students are welcome to come to course convenor's office hours to discuss any issues.

Assessment: Essay (30%, 2500 words) and take-home assessment (70%) in the LT.

This course will be assessed by a 6 hour take-home exam and 2500 word essay.

DV433 Half Unit

The Informal Economy and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Kate Meagher CON 7.11

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: Contrary to standard development thinking, the informal economy has expanded rather than contracted in the face of liberalisation and globalisation, and now creates more jobs than the formal economy in most developing countries. Accounting for more than 50% of non-agricultural employment across much of the developing world, the informal economy is attracting growing policy attention. Practitioners, policy makers and academics seek a clearer understanding of its impact on poverty, employment, social exclusion, and governance. In a globalising environment, are large informal economies a poverty trap or an engine of growth? Do they stimulate entrepreneurship and popular empowerment, or promote criminality and exploitation? How does a greater understanding of the size and organization of informal economies affect policy on urban service provision, social protection or taxation? What are the implications of the informal economy for social cohesion and popular politics in developing countries?

This course will explore how high levels of informality in developing countries are shaping processes of growth and governance in the Global South. The effect of informality on new policy narratives of inclusive growth will be a central theme in the course. Using

a comparative institutional approach, we will examine informal economies in a range of regional contexts, including Africa, the Middle East, South and East Asia, and Latin America, highlighting variations in activities, relations with the state, global integration and development outcomes. Key issues covered in the course include the impact of the informal economy on labour markets, weak states, gender empowerment, urban services, social enterprise, social protection, taxation, and popular politics. Attention will be focused on the potential as well as risks of large informal economies in the face of contemporary development challenges, drawing on empirical evidence and comparative case studies from across the developing world.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a ninety minute revision session in Summer Term.

There will be a Reading Week in Week 6.

Formative coursework: Formative coursework will involve a 2,000 word essay during the term and at least one presentation.

Indicative reading:

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 3000 words) in the ST.

DV434 Half Unit Not available in 2020/21

Human Security

This information is for the 2020/21 session.

Teacher responsible: Dr Iavor Rangelov

Availability: This course is available on the MSc in Conflict Studies, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in International Development and

Humanitarian Emergencies, MSc in International Migration and Public Policy, MSc in Political Economy of Late Development, MSc in Social Research Methods and MSc in Women, Peace and Security. This course is available with permission as an outside option to students on other programmes where regulations permit. Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV434 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: This inter-disciplinary course will introduce students to the concept of human security. Human security refers to the security of individuals and communities as opposed to the security of the state. It combines physical security and material security; freedom from fear and freedom from want. The course will introduce students to the debates about the concept and its relevance in the contemporary era. It will combine political, military, legal and economic approaches to human security implementation. The course will cover topics including: intellectual foundations and debates over the concept of human security; new and old wars; persistent conflict; just war thinking and whether it can be applied to human security; international humanitarian law and human rights law; humanitarian intervention and the Responsibility to Protect; international capabilities for human security; counterinsurgency, stabilisation, and statebuilding; transitional justice.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

One Day Conference where group projects will be presented to peers and invited external experts

Formative coursework: Students will be expected to undertake class essays, class presentations, and a case study based group project. Students will receive feedback on all of these.

Indicative reading: Mary Kaldor, *New and Old Wars: Organised Violence in a Global Era*, Polity Press, 3rd edition 2012; Shannon Beebe and Mary Kaldor, *The Ultimate Weapon is no Weapon: Human Security and the New Rules of War and Peace*, Public Affairs, 2010; Christine Chinkin and Mary Kaldor, *New Wars and International Law*, Cambridge University Press 2017; Ruti Teitel, *Humanity's Law*, Oxford University Press, 2011; Marlies Glasius and Mary Kaldor, eds, *A Human Security Doctrine for Europe*, Routledge, 2005; World Development Report 2011: Conflict, Security, and Development, World Bank, 2011; Human Security Report 2005, University of British Columbia, 2005; Human Security Now: Report of the Commission on Human Security, Co-Chairs S Ogata and A Sen, United Nations, 2003; A Human Security Doctrine for Europe: From Hybrid Peace to Human Security: Rethinking EU Strategy Towards Conflict The Berlin Report of the Human Security Group 2016; G. Evans, M. Sahnoun, et al., *The Responsibility to Protect: Final Report of the International Commission on Intervention and State Sovereignty*, Ottawa, 2001; Independent International Commission on Kosovo, *The Kosovo Report*, Oxford University Press, 2001.

Assigned reading will be given for each session.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

DV435 Half Unit African Political Economy

This information is for the 2020/21 session.

Teacher responsible: Prof Catherine Boone

Availability: This course is available on the CEMS Exchange, MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Comparative Politics, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies and MSc in Political Economy of Late Development. This course is available with permission as an outside option to

students on other programmes where regulations permit.

Course content: This is an introduction to the study of contemporary African political economy, with a focus on sub-Saharan Africa. The goal of DV435 is to set major questions of state, national economy, and development in historical, geographic, and international context. Course readings and lectures stress marked unevenness in national and subnational trajectories and in the political-economic character of different African countries, drawing attention to causes of similarity and difference across and within countries. Students completing DV435 will come away with a better understanding of the economic and social underpinnings of order and conflict in African states.

There is a research-driven component to DV435: each student will read secondary literature, grey literature, and other sources to develop particular knowledge of two countries. These will be used as "case studies" in assessed coursework to evaluate general arguments concerning the political economy of Africa, and to compare/contrast the historical trajectories of different African states.

Teaching: 20 hours of lectures and 15 hours of classes in the MT. There will be a reading week in Week 6.

Formative coursework: Optional formative essay or similar written exercise due at end of October.

Indicative reading: Celestin Monga and Justin Yifu Lin, eds., *The Oxford Handbook of Africa and Economics*, Vol. 2, Politics and Practices (OUP 2015). Morten Jerven, *Poor Numbers: How we are misled by African development statistics and what we can do about it* (Cornell U. Press, 2011). Assessment: Essay (70%, 4000 words) in the LT Week 1.

Paper (30%) in the MT Week 8.

Summative short paper (30%, 1000 words) due Week 8 of MT, Essay (70%, 4,000 words) in the first week of LT.

DV442 Half Unit Key Issues in Development Studies

This information is for the 2020/21 session.

Teacher responsible: Dr Elliott Green CON.8.07

Availability: This course is compulsory on the MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is available on the MSc in Anthropology and Development, MSc in Environment and

Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is not available as an outside option.

Not available to students enrolled on DV400 & DV431.

Course content: The course integrates the concepts and perspectives of a range of disciplines to consider major trends of development and change in modern history and key issues and debates in international development. With reference to comparative historical experience, we explore the role of states and markets in development and/underdevelopment, colonial legacies, the political economy of growth and redistribution, and the role of politics and power in development. We examine key issues in development such as: the record of pro-market reforms; the experience of "developmental states"; and the challenges to development thinking and practice presented by feminist theory, environmental sustainability, globalisation and new patterns of global inequality (key issues may change from year to year).

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the LT.

There will be a reading week in Week 6.

Formative coursework: Students will give at least one class presentation, and submit one formative essay of 2000 words.

Indicative reading: The following are recommended basic readings for the course: A. Deaton, *The Great Escape: Health, Wealth and the Origins of Inequality* (Princeton University Press, 2013). D. Acemoglu and J. Robinson, *Why Nations Fail: The Origins of Power, Prosperity and Poverty* (Profile, 2012). A Sen, *Development as Freedom* (Anchor, 1999).

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Essay (20%, 2000 words) in the LT.

DV444 Half Unit

Global Health Challenges: Epidemics, Disease, and Public Health Response

This information is for the 2020/21 session.

Teacher responsible: Dr Arjan Gjonca CON.7.08

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Global Health Policy, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV444 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: No pre-requisites are required for this course.

Course content: This course aims at looking at some of the major global health challenges in the 21st century. It analyses health challenges from a multidisciplinary approach including public health, demography and development studies. The relationship between epidemics, diseases and the public health policies are core to the content of the course. The course takes an interest on population consequences of diseases and epidemics. It also addresses the social and environmental determinants of epidemics and disease in low and middle income countries. Moreover, the course does this in a comparative perspective to high income countries. The course uses both evidence-based and theoretical approaches. Another important aspect of the course is that it sheds light on the future of global health challenges as a result of anticipated population health changes.

Some of the main topics covered are: Epidemics and pandemics in historical perspective; the effects of pandemics in the overall health and mortality patterns of populations; Covid 19 pandemic

- characteristics and the public health response to it; obesity and undernourishment as public health challenges; The increased global burden of mental health, environmental challenges and the impact on health; the relationship of migration and health and its effect on urban population.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: One 1,500 word formative essay in MT.

Indicative reading: McMichael T (2001) *Human Frontiers, environment and disease*. Cambridge: Cambridge University Press
Merson, MH, Black, ER, Mills, AJ. (2012) *Global Health: Diseases, Programmes, Systems, and Policies*, London: Jones & Barlett Learning

Montgomery MR. (2008) *The health of urban populations in developing countries*. New York, New York, United Nations, Department of Economic and Social Affairs, Population Division

Assessment: Essay (100%, 4000 words) in the LT.

DV445

Cutting Edge Issues in Development Thinking & Practice

This information is for the 2020/21 session.

Teacher responsible: Prof Duncan Green and Prof James Putzel

Availability: This course is compulsory on the MSc in Development Management, MSc in Development Studies, MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is available on the MSc in Political Economy of Late Development. This course is available as an outside option to students on other programmes where regulations permit.

It is a compulsory course for all ID students.

Course content: The objectives of the course are: a) to introduce students to the practical world of development, which will both facilitate their 'career paths' and also prepare them for the consultancy projects by becoming more familiar with how such organisations think and work; b) to introduce students to the interface between policy practice and development academe. Each week speakers from different development organisations or research institutes will speak to students about a "hot topic" in development policy and research work and how their organisation uses research and for what purposes. Previous speakers have included senior economists, serving and former Government Ministers, NGO chief executives and senior staff, innovative academic researchers and consultants, among others.

Teaching: 16 hours of lectures in the MT. 10 hours of lectures in the LT.

Lectures followed by open discussion and debate. There will be a reading week in Week 6.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading:

- P. Wood. *Law and Practice of International Finance*, Sweet & Maxwell, 2008 (ca. £40, soft bound). This book is the first building block of the Basic Reading. Students might consider buying it.
- J. Benjamin, *Financial Law*, Oxford University Press 2007. Ca. £200. This volume is available at a heavily discounted price (ca. £100 for hardcover) at the Waterstones bookshop on the LSE

campus only.

- For an understanding of the underlying market aspects: S. Valdez, Ph. Molyneux, *An Introduction to Global Financial Markets*, 7th ed., Palgrave-McMillan 2013, ca. £29.-P. Wood. *Law and Practice of International Finance*, Sweet & Maxwell, 2008 (ca. £40, soft bound). This book is the first building block of the Basic Reading. Students might consider buying it.

- J. Benjamin, *Financial Law*, Oxford University Press 2007. Ca. £200. This volume is available at a heavily discounted price (ca. £100 for hardcover) at the Waterstones bookshop on the LSE campus only.

Assessment: This course is not assessed

DV447 Half Unit Not available in 2020/21 Youth and Gendered Violence

This information is for the 2020/21 session.

Teacher responsible: Prof Alcinda Honwana and Dr Naomi Pendle

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Studies, MSc in Gender (Sexuality), MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: Previous study of the social sciences or humanities is preferred.

Course content: The framework for this course considers the economic, social and political aspects of international development as reference points to examine structural inequalities affecting young men and women. It will consider young people's socio-economic and political exclusion as well as their challenging transitions into adulthood. The course will address issues concerning education, health, labour markets, the household, family, marriage and social reproduction. Youth social and political engagement and participation will be studied through the lenses of military mobilisation, social movements, political protests and contributions to processes of social change. The course will also examine the gendered constructions of young women and young men's places in the public and domestic spheres. It will interrogate assumptions about young people's lives and bodies made by development and public policy and the ways in which such are challenged or reinforced. The course will discuss diverse forms of violence – structural, organised, physical and sexual – perpetrated against and by youth in contexts of war, conflict and radicalisation. The course will also discuss ways of understanding war and conflict as a foundation to then critically considering

how masculinities and femininities, as well as ideas of youth, are remade during times of conflict and complex emergencies.

A particular focus will be given to the agency young people by exploring issues of identity, religion, culture and power and the way these permeate private and public life.

- the future of English law as reference law for international finance after Brexit
- financial markets and modern trends in conflict-of-laws
- the legal characteristics of the various types of networks used in financial markets (central, decentral, distributed)
- the disruption of law caused by 'blockchain' technology and FinTech
- the legal challenges flowing from the increasing use of 'big data' and artificial intelligence in financial services
- the future role of commercial law in managing risk
- the nature of so-called smart contracts and their role in standard documentation, risk management and due diligence
- legal issues associated with cryptocurrencies and crypto-money

Teaching: 15 hours of lectures and 15 hours of classes in the MT. There will be a ninety-minute revision session in late LT or early ST. There will be a Reading Week in week 6.

Formative coursework: Students will be expected to write a short paper of 800-1000 words on the topic on which they will lead a class.

Indicative reading: Enloe, C. (1998) 'All the men are in the militias, all the women are victims: the politics of masculinity and femininity in nationalist wars'. In L.A. Lorentzen and J.E. Turpin (eds.) *The Women and War Reader*. New York University Press, New York, NY. pp. 50–62. Honwana, Alcinda. (2012). *The Time of Youth: Work Social Change and Politics in Africa*. Bolder and London: Kumarian Press, Lynne Rienner. Chapter 2: Waithood; Chapter 3: Aspirations; and Chapter 4: Getting By. Sommers, Marc. (2011). *Stuck: Rwandan Youth and the Struggle for Adulthood*. Atlanta: University of Georgia Press. Chapter 5: *Striving for Adulthood*, pp. 115-139. Mannheim, Karl. 1952 (1927). *The problem of generations*. In *Essays on the Sociology of knowledge*. Edited by Paul Kecskemeti. London: Routledge. Jeffrey, Craig. (2010). *Timepass: Youth, class, and time among unemployed young men in India*. *American Ethnologist*, Vol. 37, No. 3, pp. 465–48. Thieme, Tatiana, (2018). *The hustle economy: Informality, uncertainty and the geographies of getting by*. *Progress in Human Geography*, Vol. 42(4) 529–548. Honwana, Alcinda (2013). *Youth and Revolution in Tunisia*. London: Zed Books

Assessment: Case study (80%) in the LT. Other (20%) in the MT.

The course will be assessed by a short paper linked to the seminar presentation and a researched developed case study.

DV453 Half Unit International Development Consultancy Project

This information is for the 2020/21 session.

Teacher responsible: Dr Stuart Gordon CON.8.10

Availability: This course is available on the MSc in Development Studies, MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.

Places for MSc Development Studies students requesting to take this course as an option are strictly limited (10 places). MSc Development Studies students must take either DV458 or DV428 to be able to apply for a place on DV453.

Course content: Students will gain practical experience of dealing with current policy issues and best practice in the fields of humanitarian assistance or international development by working on a live consultancy team project for a real client. The consultancies are based around an experiential learning format. Students receive guidance through a structured supervision process and work on the consultancy report in Michaelmas Term and Lent Terms with support from a staff coach.

Students are allocated to consultancy teams comprising between three and five people. Students are able to express preferences for particular clients but may not be allocated to one of these. Past project sponsors have included the UK Department of International Development (DFID), UNHCR, UNICEF, UN OCHA, the ICRC, MSF, the Disasters and Emergency Committee (DEC), Christian Aid, the UK Stabilisation Unit and NATO.

The consultancy project begins in Michaelmas Term with client reports due at the end of Lent Term. The client report and final presentation form part of the assessment.

Consultancy Skills Workshops - There will be up to three basic skills-oriented lectures and one group work session lasting up to three hours.

Teaching: 9 hours of lectures and 3 hours of workshops in the MT. There will be a reading week in Week 6.

Formative coursework: Students will contribute to the Group inception and final reports/presentations and will be given feedback and indicative grades for each of these. At the end of Michaelmas Term there is a progress board for each consultancy group.

Indicative reading:

- John Rowley and Frances Rubin, 'Effective Consultancies in Development and Humanitarian and Humanitarian Programmes' (Oxfam: Oxford: 2006);
- Michael Bamberger, Jim Rugh and Linda Mabry, 'Real World Evaluation: working Under Budget, Time, Data and Political Constraints' (Sage: London, 2012);
- Michael Quinn Patton, 'Utilization Focused Evaluation' 4th Edition (Sage: London, 2008);
- Michael Edwards and Alan Fowler, 'NGO Management' (Earthscan: Oxford, 2002);
- Eric James 'Managing Humanitarian Relief: An Operational Guide for NGOs' (Practical Action Publishing: Rugby, 2008).

Assessment: Project (80%, 10000 words), reflective learning report (10%) and group presentation (10%) in the LT.

Consultancy group project report (6000 minimum-10000 maximum words depending on the client's terms of reference and student group size), submitted at the end of Lent Term (80%).

The reflective learning report - individual mark element - is based on personal performance assessed through 360-degree reporting and coach assessment (10%).

Consultancy group presentation to clients: (10%) at the end of Lent Term.

Final client presentations are at the end of the Lent Term and are scheduled by the students in consultation with academic staff AND the clients. Students should be aware that presentations to clients MAY have to take place during the first week of Easter Vacation. They will be informed as soon as possible, but should not make any travel plans until presentation dates are confirmed.

where the regulations permit this option.

Course content: One of the longest running debates within the feminist literature, and one that has also played out in the field of gender and international development, relates to the relationship between women's access to labour market opportunities and their position within the family and community: the exploitation versus emancipation argument. These debates have been given fresh lease of life in the development literature as a result of the growing feminisation of labour markets in recent years in most regions of the Global South. They have been further complicated by additional claims (which have had a great deal of traction in policy circles) that greater gender equality in the labour market has enormous growth potential. At the same time, a great deal of contemporary feminist literature as well as international campaigns have highlighted the extremely exploitative terms on which most women take up paid work, contested the view that increased access to paid work has been empowering for women and questioned the instrumentality of the 'gender is good for growth' argument.

This course will be loosely organized around these debates. It will seek to equip students with the ability to analyse and assess these competing claims about what is a very critical issue in the field of international development by providing them with a firm grounding in theory, evidence and policy debates relating to gender and labour markets in the Global South. It will meet this objective through three components which will build on each other.

The first will focus on the different positions taken within these debates and the rationales put forward to justify these claims. It will examine key concepts and theories relating to gender, households and labour markets which provide the theoretical underpinning to these claims. In particular, it will distinguish between the concepts of capabilities, empowerment and economic citizenship as ways of capturing changes associated with work. It will also consider the different definitions of 'work' which feature in these theories and the extent to which they capture the labour market and livelihood strategies of households in different regions of the Global South.

The second component will draw together the empirical literature to consider the evidence relating to gendered patterns of labour market participation in different regions of the world. It will start out with a broad-brush account of the changes that have taken place in domestic and global labour markets over the last few decades. It will then consider in greater detail how these markets function in low-and middle-income countries and the intersectional segmentation of occupations and tasks that they generate. It will analyse how market forces are restructuring some of the intimate aspects of family relations through the commodification of reproductive and sexual services that were previously provided as part of the marital contract. It will conclude by considering what these changing dynamics of the labour market tell us about women's position within their families and the wider society and revisit the arguments about gender and growth.

The third component will evaluate various forms of public action by policy, corporations and civil society actors that have been taken up in response to their positions with regard to the gender dynamics in the economy. These include policy measures to promote greater gender equality in the labour market, including minimum wage legislation, social protection and corporate responsibility. They will also include new forms of unionism and collective action that have sought to promote economic citizenship and the rights of women workers at global and local levels.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

There will be a reading week in Week 6.

Formative coursework: Students will be required to submit a 1500 essay which will not count towards their final marks but which will allow them to receive feedback on their ability to read critically, to synthesise arguments and to ensure that their writing style meets the standards required by the school. It will also address learning outcomes 1 and 4.

DV455 Half Unit

Advocacy, Campaigning and Grassroots Activism

This information is for the 2020/21 session.

Teacher responsible: Prof Duncan Green and Mr Thomas Kirk
Dr Duncan Green is Professor in Practice in the International Development Department, and Senior Strategic Adviser at Oxfam GB, an international NGO. His blog, From Poverty to Power (<http://oxfamblogs.org/fp2p/>) is one of the most widely read international development blogs. His most recent book, How Change Happens (OUP, 2016) is the core text for this course.

Dr Thomas Kirk is a researcher and consultant based at the London School of Economics and Political Science. Interests include the provision of security and justice in conflict affected regions, social accountability, civil society, local governance and public authority. Lived and worked in Afghanistan, Pakistan, India, Timor-Leste, the DRC and Kenya.

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Health and International Development, MSc in Inequalities and Social Science, MSc in International Development and Humanitarian Emergencies and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course will be offered in Lent term and capped at 75 students. Selection criteria: applicants will be asked to submit 200 words on their background and why they want to take the course, to be assessed against interest, experience and passion. If there are any spare spaces, the course is available as an outside option.

Course content: There are two blocks in this course:

1. Understanding How Change Happens, including systems thinking and power analysis.
2. The analytical frameworks used by INGOs and other change agents to inform and design their advocacy.

This course introduces students to some of the analytical frameworks and practical techniques used by INGOs such as Oxfam (where the course leader is senior strategic adviser), Plan International and Crisis Action, along with other activists (broadly defined, including 'change agents' in governments and the private sector) in influencing political, social and economic policy and practice.

Lectures will introduce the importance of systems thinking and power analysis in understanding and influencing processes of change and the role of civil society and advocacy in driving such change.

These will be used to explore how activists and activist organizations use these as organizing tools for influencing, through both 'insider' or 'outsider' strategies.

The course is designed for students who have been, or intend to become, active in driving change, whether as members of civil society organizations, in government, in aid donors or in the private sector. You will develop your understanding both of endogenous change processes in developing countries, and the design and limitations of deliberate efforts to bring about political, social and economic change.

Students will be asked to come with an initial idea for an influencing exercise that they would personally like to design and implement (for example a campaign, policy reform, or effort to shift public attitudes) and will apply the coursework to that case study, developing a project proposal at the end of the term that will be assessed.

Students will be required to produce a blog post or vlog (video blog) summarizing their individual project, which will also be summatively assessed (students will receive a 'blogging for beginners' lecture on writing for impact).

Working in small groups, students will analyse past case studies of change, and be assessed against both their written assignment and their presentation of initial findings to their seminar group.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Teaching will consist of a combination of lecture presentations, involving powerpoint, video and group discussion, and seminar discussions. There will be one lecture of 120 minutes each week of term. This will be followed up by 60 minutes of seminar work. Reading week will occur in week 6, during which time there will be extended office hours available.

Formative coursework: Students will be asked to submit initial formative proposals (1000 words max) for their individual assignments in week 6, for feedback from the course leader. Following feedback, students will present their individual proposals to the seminar groups for further discussion.

First drafts of the group assignment will be presented in seminars in weeks 7 & 8 for verbal group/tutor feedback and an assessment of their presentations.

Indicative reading: Course Text: Green, D. 2016. 'How Change Happens'. Oxford University Press. M. Andrews, L. Pritchett and M. Woolcock, Building State Capability, (Oxford: OUP, 2017). R. Chambers, Revolutions in Development Inquiry (London: Earthscan, 2008). M. Edwards, Civil Society, 3rd edition (Cambridge: Polity, 2014). J. Ferguson, The Anti-Politics Machine: Development, Depoliticization and Bureaucratic Power in Lesotho, (University Of Minnesota Press, 1994). J. Gaventa and R. McGee, Citizen Action and National Policy Reform: Making Change Happen (London: Zed Books, 2010). J. Heimans and H. Timms (2018) New Power: How Power Works in Our Hyperconnected World—and How to Make It Work for You. New York: Doubleday. J. Howell and Pearce, J. (2001) Civil Society and Development: A Critical Exploration. London: Lynne Rienner Publishers. N. Kabeer, R. Sudarshan, and K. Milward. Organizing Women Workers in the Informal Economy: Beyond the Weapons of the Weak. (London, Zed Books, 2013). Chapter 5. R. Krznaric, How Change Happens: Interdisciplinary Perspectives for Human Development. R. Pascale, J. Sternin, and M. Sternin, The Power of Positive Deviance: How Unlikely Innovators Solve the World's Toughest Problems (Cambridge, MA: Harvard Business Press, 2010). D. Meadows and D.H. Wright, Thinking in Systems: A Primer (Abingdon: Routledge, 2009). S. Popovic, Blueprint for Revolution: How to Use Rice Pudding, Lego Men, and Other Nonviolent Techniques to Galvanize Communities, Overthrow Dictators, or Simply Change the World (New York: Spiegel & Grau, 2015). A. Rao, J. Sandler, D. Kelleher, and C. Miller, Gender at Work: Theory and Practice in 21st Century Organizations (Abingdon, Oxford: Routledge, 2016). J. Rowlands, Questioning Empowerment: Working with Women in Honduras (Oxford: Oxfam UK and Ireland, 1997). A. de Waal, Advocacy in

Conflict: Critical Perspectives on Transnational Activism (London: Zed Books, 2015).

Assessment: Project (50%, 2500 words), coursework (40%) and blog post (10%) in April.

Individual Project (40%, 2000 words) and blog post (10%) in April; Group Project (40%, 4,000 words) in April and group presentation (10%) in February/March.

The summative assessment will consist of both individual and group assignments:

a) Individual project proposals for an influencing project (individual) will be formatively assessed and feedback given. This will then inform the final project that will be summatively assessed in April. A blog or Vlog of the project will also be produced and summatively marked.

b) Historical case study (as groups of 3 or 4). Group membership will be assigned in advance. Students will select an agreed historical change episode. Assessment will be in two parts - a joint group presentation based on the group project and a written assignment, summatively marked.

DV456 Half Unit

Population, Health and Development: Evidence and Projections

This information is for the 2020/21 session.

Teacher responsible: Dr Tiziana Leone CON 8.11

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Global Health Policy, MSc in Global Population Health, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV456 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: Some familiarity with personal computers is required, but a high degree of technical proficiency is not required. Familiarity with excel (basic functions) needed otherwise attend a course at LSE Life. For more details on whether the course might be suitable for you please visit moodle.Fundamentals of International Commercial Arbitration

Course content: The course is practical in nature and overviews key methods used for planning in population and development with an emphasis on the health sector. Key questions which will be answered in this course are: what is the future of the world population; what are the family planning needs of couples in low income countries; what will be the number of newly HIV infected in the next 15 years; what is the future of major diseases; what is the impact of key health interventions. The focus will be both on producing information as well as on searching and understanding data provided by key international agencies and on learning how to relate the information meaningfully to policy makers. Relevance will be given to methods used for assessing the implications of high levels of mortality in developing countries with specific reference to the HIV/AIDS pandemic; as well as the assessment of high fertility levels due to low uptakes of family planning methods. During the course students will learn to apply interventions based models through the use of Spectrum to understand the impact on outcomes and on governments' health expenditure. The approach is practical and complements the more theoretical population courses giving additional skills such as an understanding of key international projections and estimates, planning for health workforce and for health supplies. Students will undertake a number of computer-based assignments (using either

Excel or Spectrum) which will follow the topics highlighted during the lectures. The course covers concepts used for population analysis; the role of population projections in the population planning and development process; the basis of projections made by international agencies such as the UN Population Division; the formulation of projection assumptions and methods of making projections; methods for projecting and assessing the impact of HIV/AIDS and the use of software such as AIM (AIDS Impact Model) as well as planning maternal and child health interventions with the use of LiST. The course will also give an overview of projections for non-communicable diseases, Malaria and TB among others. Emphasis will be given to the learning of analytical skills which include data and information searching on the internet as well as presentation of the information. Former students have found the course useful to get a foundation of how UN agencies involved in data collection work, to gain analytical skills which are transferable as well as getting a grasp of how to translate data into policy.

Teaching: 15 hours of lectures and 20 hours of seminars in the MT.

Formative coursework: Students will be expected to submit a formative assessment of 5 pages before the end of term.

Indicative reading: Relevant documents will be provided at the start of the course, mainly in the form of electronic documents. Suggested reading are Lutz "The future population of the world"; Cohen "How many people can the earth support"

Assessment: Coursework (85%) in the LT.

Continuous assessment (15%) in the MT.

Assessment will be by two forms of assessments.

Continuous assessment worth 15%: will be based on course participation, a group presentation along with homework submitted on Moodle during MT.

Coursework worth 85% - will be a 10 A4 page report. This will involve the formulation, execution and writing up of a project concerned with a model for population planning, to be agreed with the course teacher. This must be submitted by the second week of LT

DV457 Half Unit

Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation

This information is for the 2020/21 session.

Teacher responsible: Prof Ernestina Coast CON.8.15

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Gender, MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Global Health Policy, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV457 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: Firm knowledge of contract law and/or international sales law from previous studies.

Course content: This course aims to equip students with the knowledge and skills to be able to critically appraise data and evidence for assessing sexual and reproductive health programmes. This course deals with the effectiveness of sexual and reproductive health programmes, especially those that deliver services. The key issues addressed are the design of programmes, their effective implementation, and their evaluation. The course

focuses on the critical production and consumption of data and evidence – both quantitative and qualitative – for assessing sexual and reproductive health programmes. The course takes a global approach, incorporating evidence from a range of contexts, countries and populations.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. There will be a reading week in Week 6.

Formative coursework: Students are expected to prepare a seminar presentation and an annotated bibliography during the term.

Indicative reading: Lecture and seminar electronic reading lists are available in Moodle.

Assessment: Coursework (100%) in the ST.

Coursework assignment to be a maximum of 15 A4 pages.

DV458 Half Unit

Key issues in Global Health and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Tiziana Leone CON 8.11 and Dr Philipa Mladovsky CON 6.13

Availability: This course is compulsory on the MSc in Health and International Development. This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Gender, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV458 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: The course provides an up-to-date and comprehensive introduction to global health and health system trends in less developed societies. The course examines the main determinants of health issues as they relate to development and their principal consequences, policies and politics to improve health and development; barriers to implementing those policies; and ways of overcoming those barriers. Key topics include the politics of diseases, framing the health discourse, universal health coverage, the impacts of conflict and climate change on health, pharmaceutical governance and global health metrics. Drawing on disciplines such as political science, health policy, demography, sociology and economics, this course argues for the need to improve global health equity in order to contribute to development. It will equip students with the skills needed to work in and help to improve mainstream global health organisations such as WHO, the World Bank, Gates Foundation and MSF among others. The course is political in that it adopts a set of normative values such as equality, social justice and human rights.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students are expected to prepare a seminar presentation and complete a mock exam during MT.

Indicative reading: The course is supported by an electronic reading list. There is no single key text but here are some indicative readings:

- Birn, A. et al, 2017 "Textbook on global health"
- Marmot, M., 2005 "The social determinants of health"
- Shiffman, 2009, "The rise and fall of global health"
- Adams, V. 2016, "Metrics: what counts in global health"
- Marie Paule Kieny, Henk Bekedam, Delanyo Dovlo, James Fitzgerald 2017 "Strengthening health systems for universal health coverage and sustainable development"
- Watts et al 2018 "Countdown on health and climate change: from 25 years of inaction to a global transformation for public health"

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

DV460 Half Unit

Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference

This information is for the 2020/21 session.

Teacher responsible: Dr Tasha Fairfield CON 6.02

Availability: This course is available on the MSc in Comparative Politics, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in International Relations (Research) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be selected for DV460 based on a written statement of interest (max 150 words). Priority will be given to students on the programs listed above, if demand exceeds places.

Pre-requisites: This course has no prerequisites.

Students do not need any previous exposure to either Bayesian analysis or qualitative methods literature.

Course content: The way we intuitively approach qualitative case research is similar to how we read detective novels. We consider various different hypotheses to explain what occurred—whether the emergence of democracy in South Africa, or the death of Samuel Ratchett on the Orient Express—drawing on the literature we have read (e.g. theories of regime change, or other Agatha Christie mysteries) and any salient previous experiences we have had. As we gather evidence and discover new clues, we continually update our beliefs about which hypothesis provides the best explanation—or we may introduce a new alternative that occurs to us along the way.

Bayesianism provides a natural framework that is both logically rigorous and grounded in common sense, that governs how we should revise our degree of belief in the truth of a hypothesis—e.g., "mobilisation from below drove democratization in South Africa by altering economic elites' regime preferences," (Wood 2001), or "a lone gangster sneaked onboard the train and killed Ratchett as revenge for being swindled"—given our relevant prior knowledge and new information that we obtain during our investigation. Bayesianism is enjoying a revival across many fields, and it offers a powerful tool for improving inference and analytic transparency in qualitative research.

This course introduces basic principles of Bayesian reasoning with the goal of helping us leverage our common-sense understandings of inference and hone our intuition when conducting causal analysis with qualitative evidence. We will examine the foundations of Bayesian probability as well as concrete applications to single case studies, comparative case studies, comparative historical analysis, and multi-methods research. Students will practice applying Bayesian reasoning to assess the strength and quality of inferences in published studies, drawing on exemplars of qualitative research from various fields of socio-political analysis including development studies, comparative politics, international relations, and policy analysis. Students will also apply Bayesian principles to various aspects of their own dissertation research in progress—e.g., generating or revising hypotheses, selecting cases, identifying weaknesses in salient background literature, and assessing the inferential weight of available evidence.

Upon completing the course, students will be equipped with a concrete set of Bayesian-inspired best practices to deploy in their own research, as well as widely-applicable analytic skills that will help them to better evaluate and critique socio-political analysis.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 exercise and 1 project in the LT.

Students will receive written and oral formative assessment on in-class exercises, which will ask them to explain key Bayesian concepts (e.g., the "weight of evidence") in their own words and apply them to concrete examples (e.g. use Bayes' rule to derive an inference from several pieces of evidence).

In addition, students will receive oral feedback on the first section of their final project, which will set up rival hypotheses to be compared in light of case evidence.

Indicative reading: Methodological foundations:

Andrew Bennett, "Disciplining Our Conjectures: Systematizing Process Tracing with Bayesian Analysis," in Andrew Bennett and Jeffrey Checkel, eds, *Process Tracing in the Social Sciences: From Metaphor to Analytic Tool*, Cambridge University Press, 276–98, 2015; Tasha Fairfield and Andrew Charman, "Explicit Bayesian Analysis for Process Tracing," *Political Analysis* 25(363-380), 2017; ; Tasha Fairfield and Andrew Charman, "A Dialogue with the Data: The Bayesian Foundations of Iterative Research in Qualitative Social Science," *Perspectives on Politics* 17(1:154-167), 2019; Macartan Humphreys and Alan Jacobs, "Mixing Methods: A Bayesian Approach," *American Political Science Review* 109(4):653-673, 2015; Timothy McKeown, "Case Studies and the Statistical Worldview," *International Organization* 53(1):161-190, 1999.

Qualitative research exemplars:

Tasha Fairfield and Candelaria Garay, "Redistribution under the Right in Latin America: Electoral Competition and Organized Actors in Policymaking," *Comparative Political Studies* 50 (14) 1871-1906, 2017; Marcus Kurtz, "Reconsidering War and the 'Resource Curse' in Third World State Building," *Politics & Society* 37 (4) 479–520, 2009; Kenneth Schultz, "Fashoda Revisited" (Chapter 6) in *Democracy and Coercive Diplomacy*, Cambridge, 2001; Dan Slater, "Revolutions, Crackdowns, and Quiescence: Communal Elites and Democratic Mobilization in Southeast Asia," *American Journal of Sociology* 115 (1) 203-254, 2009; Elisabeth Wood, "An Insurgent Path to Democracy: Popular Mobilization, Economic Interests, and Regime Transition in South Africa and El Salvador," *Comparative Political Studies* 34 (8) 862-888, 2001.

Assessment: Project (100%, 3000 words) in the ST.

Students will choose a case-study article that is relevant to their dissertation topic and apply Bayesian reasoning to critique the article's inferences. This exercise entails assessing how the author's argument has been specified, identifying a plausible rival hypothesis (which may or may not be provided by the author), identifying the most salient pieces of evidence presented, and qualitatively evaluating the inferential weight the evidence provides in favour of the author's hypothesis relative to the rival.

DV461 Half Unit Not available in 2020/21

Critical Population Health Issues in High and Middle-Income Countries

This information is for the 2020/21 session.

Teacher responsible: Dr Arjan Gjonca OLD.2.45

Availability: This course is available on the MSc in Global Health Policy and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: No pre-requisites are required for this course.

Course content: This course brings together key issues on the social and environmental determinants of population size and structure and population health in high and middle income countries from a multidisciplinary approach including a range of social science disciplines, epidemiology, demography and public health. This course reflects the developments of research in recent years on health trends and differentials. Topics addressed in this course include the relationship between health and economic change such as the effect of recession; divergent trends in Western European and former USSR states; family changes and their implications for population health; role of early-life events; social support, social capital and health; socio-demographic determinants and

consequences of ageing at the individual and population level; comparison of trends in established market economies and BRICS; policy responses to inequalities in health; prospects for mortality and morbidity change - a compression of morbidity?

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT.

Formative coursework: One 1,500 word formative essay in MT.

Indicative reading: Merson, MH, Black, ER, Mills, AJ. (2012) *Global Health: Diseases, Programmes, Systems, and Policies*, London: Jones & Barlett Learning; Burlington, MA; London. Berkman L. F., Kawachi, I. and Glymour, M. M. (2014) *Social Epidemiology* (2nd ed.); Oxford University Press; Oxford; New York. Marmot, M. (2010) *The Marmot review final report: Fair society, healthy lives*: University College London. Wilkinson, R.G. and Pickett, K. (2009) *The spirit level: why more equal societies almost always do better*; Bloomsbury Press; London; New York. Bowling, A (2017) *Measuring Health: A Review of Subjective Health, Well-being and Quality of Life Measurement Scales*: McGraw-Hill Education.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2000 words) in the LT.

DV462 Half Unit

Forced Migration and Refugees

This information is for the 2020/21 session.

Teacher responsible: Dr Stuart Gordon

Availability: This course is available on the MSc in Conflict Studies, MSc in Development Management, MSc in Development Studies, MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Health and International Development, MSc in Human Rights, MSc in Inequalities and Social Science, MSc in International Development and Humanitarian Emergencies and MSc in International Migration and Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

We anticipate being able to offer places to all students who sign up in the first week of MT.

Course content: The course deals with the global governance of forced migration with a particular focus on refugees and their experiences. The first lectures critically evaluate the ways in which the drivers of forced migration, particularly conflict and environmental change, are identified. It problematizes notions of mono-causality in favour of more complex and dynamic understandings of the reasons which may underpin individual, familial and collective experiences of forced displacement or immobility.

The next section looks at the linkage between the refugee regime, international society and global order. We explore the governance of the overall refugee regime, looking in detail at the UN organisation with a specific mandate for refugee protection and relief, the UNHCR, as well as the issue of international refugee 'burden sharing.' We also explore the intersection between human rights and refugee law; challenging the idea of a separation between the regimes and asking whether this transforms the nature and role of UNHCR. We also examine the extent to which the securitisation of refugee issues has occurred and how these processes impact on their governance and management.

The final section brings to the fore the agency of refugees and explores differing approaches to the study of refugees' own lived experiences in flight and exile. We explore the tensions between the international community's interest in fixing refugee populations in camps and refugees' own practices (often irregular) of self-settlement in towns and cities. We also devote considerable attention to a critical examination of the significance of gender and its intersection with other identities (age, generation and disability) in narratives and analyses of displacement. We explore gendered experiences of immobility and displacement, looking at the multiple ways in which processes of and responses to forced migration influence broader gender identities, roles and relations.

The final section looks at how we might 'solve' protracted refugee situations and the limitations of the current approaches. It begins by looking at why refugee return has dominated international attempts to solve crises, the problems that have arisen from this 'push to repatriate' and the types of challenges faced by returnees.

Teaching: 22 hours of lectures and 15 hours of seminars in the LT. The teaching strategy is diverse and innovative: using both conventional discussions as well as a variety of small group exercises. These will feed directly into a formative piece of work related to the summative assessment. Students will work within small study groups to develop the formative work and will then work individually on the summative tasks.

Formative coursework: Students will co-produce seminar presentations with a supporting information brief for fellow students. Students will be allocated in groups of up to 4 to these presentations.

Indicative reading: First Lecture key readings

1 Sarah Kenyon Lischer, 'Conflict and Crisis Induced Displacement' in Elena Fiddian-Qasimiyeh, Gil Loescher, Katy Long and Nando Sigona (Eds) *The Oxford Handbook of Refugees and Forced Migration Studies* (OUP: Oxford, 2014) pp 317-329.

6 European Centre for Development Policy Management September 2018 Discussion Paper No. 228 at www.ecdpm.org/dp228

Assessment: Take-home assessment (100%) in the ST.

Students will produce 2 x 2000 word essays during a 72 hour take home exam sat in the early part of the ST. Students unable to commit to this are not to enrol in the course.

DV463 Half Unit Not available in 2020/21

Civil society, security and development

This information is for the 2020/21 session.

Teacher responsible: Prof Jude Howell

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is an advanced seminar organised around guided critical, in-depth reading and discussion of theories, concepts and empirical manifestations of civil society in relation to international development and security. The building-blocks of the course extend over 7 weeks, with 3 weeks devoted to case-material presentations related to broad thematic questions. The presentations in the three weeks may provide a basis for the long assessed essay.

The broad content of the course is as follows:

- Week 1: Introduction to course; introduction to key theories, history and concepts of civil society

- Week 2: Civil society, welfare and democratisation.
- Week 3: Civil society, security and violence
- Week 4: Civil society and securitization: terrorism and counter-terrorism
- Week 5: International donors, aid and security
- Week 6: Reading Week
- Week 7: Authoritarianism, security and civil society
- Week 8: Student case-study presentations
- Week 9: Student case-study presentations
- Week 10: Student case-study presentations
- Week 11: Critical perspectives on civil society

Teaching: 20 hours of seminars in the MT.

Each weekly seminar session is 2 hours. This comprises an overview of the week's topic by the seminar convenor and then detailed guided reading and discussion.

There will be 2 hour essay session in week 11.

There will be a reading week in Week 6.

Formative coursework: Students may submit a formative essay of 1,000 words, excluding references, by Friday, 12 noon, Week 5. The purpose of the formative essay is to identify core issues for each student in the devising and structuring of essay, framing of argument, development of concepts and use of references. The student will receive written feedback within 3 weeks and can discuss feedback in office hours.

Indicative reading:

- Howell and Lind, 2010, Counter-terrorism, Aid and Civil Society, Palgrave, Basingstoke
- Chambers, S. and W. Kymlicka (eds) 2002, *Alternative Conception of Civil Society*. Princeton University Press: Princeton

Assessment: Essay (70%, 4000 words) in the LT Week 2. Presentation (30%) in the MT.

DV472 Half Unit**Covid-19 pandemic: health, socio-economic and political implications for development (Special Topics in International Development)**

This information is for the 2020/21 session.

Teacher responsible: Dr Arjan Gjonca

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This year the course will focus on "Covid 19 pandemic: health, socio-economic and political implications for development" and will be run by Dr Arjan Gjonca. The main epidemiological, health, socio-economic and developmental issues related to the most important global health issue of the past 100 years will be addressed in this course. Some of the main topics to be covered are: Understanding Covid-19 pandemic – trends, patterns and differentials; Understanding the data, and assumptions in modelling the pandemic – Sensitivity and accuracy of the estimates; Health system readiness and public health intervention in the case of Covid-19; Demographic and health implications of Covid-19 pandemic; The implications for sexual and reproductive health and rights; Covid 19 pandemic in conflict and crisis regions. Drug discovery, production/supply/distribution, and patents in the Covid 19 pandemic; Globalisation in a post Covid 19 Pandemic – Implications for the role of international organisation; Globalisation in a post Covid 19 Pandemic – Implications for funding in development.

Teaching: 20 hours of seminars in the MT.

This is a 20-hour seminar course, running in 10 sessions in MT. Each session is 2-hour long and will focus on a particular topic. For each session up to four readings will be given in advance of the seminar. Students will be asked to read the literature in advance and discuss their findings in an interactive debate during the seminar, monitored and led by the academic instructor. For certain topics, special designed policy-relevant tasks will be assigned and team discussion and debate will be encouraged. A general reading list for the course will be provided at the start of the course.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: A detailed reading list will be provided at the start of the course each year.

Assessment: Essay (100%, 4000 words) in the LT.

DV480 Half Unit**Revolution and Development**

This information is for the 2020/21 session.

Teacher responsible: Prof Jean-Paul Faguet CON 8.06

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is also available with permission as an outside option to students on other programmes where regulations permit. ID and joint-degree students will have priority in the allocation of places. If there are more ID and joint-degree students than the course can accommodate, places will be allocated randomly. Non-ID/Joint Degree students will be allocated available places by random selection, with preference given first to those degrees where regulations permit this option.

Pre-requisites: No specific course pre-requisites. A good social

science background will be very helpful, especially politics and economics.

Course content: Revolutions break things, but do they also build? If so, what precisely? What causes revolutions? What do revolutions cause? This course examines the successes and failures of revolution as a model of change in generating large and sustainable improvements in economic, political and social development. We begin by defining "revolution" as a discrete, analytically distinct model of change. We then examine revolutions per se – abrupt, significant, and often violent changes in governance and the distribution of power and wealth in society. Classic examples include the French, Russian, Chinese and Vietnamese Revolutions. We evaluate the immediate and long-term costs of these episodes in light of changes that resulted in each country's development trajectory. We contrast these cases with 'right-wing revolutions', such as South Korea, Taiwan and Japan, as well as more gradual processes of change ('evolutions', often called "reform"), such as Finland and New Zealand. We contrast capitalist vs. socialist models of economic growth and development. We focus on the conditions that sustained left vs. right revolutions, and also revolutionary vs. non-revolutionary processes of change. We analyse the ability of each model to generate lasting improvements in societies' economic, political and social development.

Teaching: 20 hours of lectures, 13 hours and 30 minutes of seminars and 4 hours of workshops in the MT.

Lectures will present key theoretical insights and lay out the contours of major debates from the literature. Seminars will be student-led, and will probe each week's topic in more detail, both to clarify concepts and test them against evidence, some of which students will draw up and present independently. The workshop is a different sort of exercise, intended to give thorough review to students' research proposals in a constructively critical, collegial atmosphere. Each student will present their research proposal and then receive feedback from fellow students and faculty.

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the MT.

In preparation for their research essay, students will submit a formative research proposal, which they will present in a research workshop in MT. This will receive detailed written, and also oral, feedback intended to improve the proposal. They will then revise the proposal and re-submit as summative work.

Students will also complete seminar presentations, individually or in pairs (depending on student numbers), which will also receive formative feedback.

Indicative reading: A detailed, weekly reading list will be provided at the start of term.

Assessment: Presentation (10%) and research proposal (20%) in the MT.

Research project (70%) in the ST.

Further details:

Research paper (6,000 words, 70%) in the ST.

Research proposal (2,000 words, 20%) in MT.

Seminar presentation (10%) in MT.

DV483 Half Unit

Information Communication Technologies and Socio-economic Development

This information is for the 2020/21 session.

Teacher responsible: Dr Shirin Madon CON.8.09

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Management of Information Systems and Digital Innovation, MSc in Media, Communication and Development and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit. Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: This is an interdisciplinary course about understanding the role played by Information & Communication Technologies (ICTs) towards achieving developmental goals. We begin by reviewing dominant theoretical perspectives on development identifying assumptions held about the role of information, communication and technologies. Using this as our critical frame of reference, we focus on a variety of current topics including global software outsourcing, e-commerce/m-commerce, mobiles for smallholder agriculture, ICT and education, e-governance, health informatics, social media and collective action, ICT and humanitarianism.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. In addition, there will be a one hour revision session in late LT. There will be a reading week in Week 6.

Formative coursework: Students will be invited to submit an abstract of their summative essay for written comments.

Indicative reading: Avgerou, C. (2010) *Discourses on ICT and Development*, Information Technologies and International Development, 6, 3, pp. 1-18. Brown, A. and Grant, G. (2010) *Highlighting the Duality of the ICT and Development Research Agenda*, Information Technology for Development, 16, 2, pp. 96-111. Leviathan *The Social Contract* *The Spirit of the Laws* *Reflections on the Revolution in France* *Democracy in America* *Constitutional Theory* *On Human Conduct* *The Constitution of Liberty*

Assessment: Essay (100%, 4000 words) in the ST.

DV490 Half Unit

Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development

This information is for the 2020/21 session.

Teacher responsible: Dr Diana Weinhold

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit. Enrolment will be controlled through the use of a pre-quiz (see DV490 Moodle page for details).

Course content: This course explores the foundations of applied macroeconomic policy analysis by combining a rigorous but intuitive introduction to advanced econometric methods with applications to the theory and empirics of long-run growth in developing countries. Throughout the course, lectures provide analytical but non-technical overviews of broad themes in long-run growth and development policy, including growth theory, institutions and history, economic geography, globalization, inequality, balance of payments and financial crises, debt, environmental policy and international aid. There is a strong emphasis on how the body of knowledge has evolved over time via the synthesis of theoretical advances and rigorous empirical testing.

Seminars in the first half of term will introduce students to the statistical foundations of econometric analysis and build analytical skills to read, interpret, and critique econometric approaches to causal identification commonly used in the academic development literature. We engage directly with quantitative methodology and regression analysis, developing rigorous intuition rather than learning technical formulas, with the focus on teaching students from a broad range of backgrounds to understand and critically consume high-level applied research in a sophisticated manner. The seminars in the second half of term give students an opportunity to repeatedly practice and improve their analytical skills by working through methodologically-focussed problem sets based on top academic journal articles addressing issues from the lectures on macroeconomic development.

While some background in economics and/or statistics is helpful, the course is designed to be engaging and challenging for students from a broad variety of backgrounds, from those with no economics and statistics to those with more advanced skills in either one or both areas. Strong analytical skills (whether quantitative or not) and a sturdy work ethic are the best predictors of success.

Important: For students without strong skills in economics and statistics DV490 constitutes the foundational prerequisite for DV491 and/or DV492 in the Lent term. Students without a (very) strong background in economics and statistics are highly recommended to take both DV490 and either DV491 or DV492 or both, and consider them together as a full 1 or 1.5 unit course. Our experience is that the majority of students benefit most from a minimum of a full academic year of repeated practice and exposure to the techniques covered to develop their intuition and ability, and students who take only the first half unit with thus be at a distinct disadvantage. In addition, while DV490 will build a foundational knowledge, DV491 and DV492 will cover additional empirical approaches more commonly employed in micro-development economics, as well as providing an introduction to statistical programming in STATA, thus rounding out students' exposure to empirical methods more fully.

Students who would like to take DV490, DV491, or DV492 in isolation are invited to take a "Parachuter's Exam" at the beginning of MT to assess their quantitative skills. More information on the Parachuter's Exam can be found on the DV490, DV491 and/or DV492 Moodle page or from the course instructors.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 2 hours of lectures in the ST.

There will be two hours of lectures in the ST.

There will be a Reading Week in week 6.

Formative coursework: Weekly online quizzes provide formative feedback on student progress. In addition students are expected to complete weekly unassessed problem sets and come prepared to discuss them in seminars.

Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Useful reference texts include *Mastering 'Metrics: the Path from Cause to Effect*, by Angrist & Pischke, Princeton University Press (2014); and *The Quest for Growth* by W. Easterly, MIT Press (2001)

Assessment: Exam (70%, duration: 2 hours) in the January exam period.

In-class assessment (30%) in the MT.

DV491 Half Unit

Economic Development Policy II: Microeconomic Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Sandra Sequeira

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit. Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (DV490) or equivalent background in statistics and economics.

For students without strong skills in economics and statistics DV490 constitutes the foundational prerequisite for DV491 in the Lent term. Students without a (very) strong background in economics and statistics are highly recommended to take both DV490 and DV491 and consider them together as a full 1 course. Our experience is that the majority of students benefit most from a minimum of a full academic year of repeated practice and exposure to the techniques covered to develop their intuition and ability, and students who take only the first half unit with thus be at a distinct disadvantage. In addition, while DV490 will build a foundational knowledge, DV491 will cover additional empirical approaches more commonly employed in micro-development economics, as well as providing an introduction to statistical programming in STATA, thus rounding out students' exposure to empirical methods more fully.

Students who would like to take DV490 or DV491 in isolation are invited to take a "Parachuter's Exam" at the beginning of MT to assess their quantitative skills. More information on the Parachuter's Exam can be found on the DV490 and/or DV491 Moodle page or from the course instructors.

Course content: This course examines the microeconomic foundations of economic policy-making in developing countries. Classes will combine economic theory and rigorous empirical analysis to better understand the impact of economic development policy on development goals. We will focus on specific examples

chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future

The course is structured around three main themes:

(i) Human Development: health policy, education policy and intra-household dynamics

(ii) Institutions and Markets: labour markets, state capacity for public service delivery and private sector development

(iii) Behavioural Economics and Development Policy Design: the importance of psychology in explaining economic behaviour and how it can inform better development policy design

Teaching: 20 hours of lectures, 15 hours of seminars and 9 hours of workshops in the LT.

There will be a weekly Econometrics workshop in the LT.

There will be a Reading Week in week 6.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Cohen, J. and P. Dupas (2010) "Free Distribution or Cost-sharing? Evidence from a Randomized Malaria Prevention Program", *Quarterly Journal of Economics*. "Are Emily and Greg More Employable than Lakisha and Jamal? A Field Experiment on Labor Market Discrimination.", *American Economic Review*. Duflo, Esther, and Petia Topalova. (2004) "Unappreciated Service: Performance, Perceptions, and Women Leaders in India."

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

In-class assessment (30%) in the LT.

DV492 Half Unit

Economic Development Policy III: Government Policy Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Joana Naritomi CON.6.12

Availability: This course is available on the MPA in International

Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to MSc and MPA students from throughout the LSE subject to space constraints; specifically we reserve the right to limit enrolment of students from outside the Department of International Development. Entry onto the course might be limited at the discretion of the instructor.

Pre-requisites: 'DV490 Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development' or equivalent.

Course content: This course explores key issues in government policies in developing countries. The course will draw on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future. It begins introducing concepts from public economics to discuss the scope and impacts of government interventions. In particular, the course will cover issues related to market failures, redistribution, public goods and externalities. The course will also discuss theoretical and empirical work on the economic consequences of government interventions, with particular focus economic incidence, efficiency trade-offs and unintended consequences of policies. In the second part, it focuses on challenges in raising government revenue and delivering public service in the developing world context, where limited state and fiscal capacity impose important constraints in policymaking. Beyond these topics, the course will provide background on relevant analytical tools in quantitative research, and develop skills to interpret empirical evidence in development economics. Coursework will include a combination of class discussions, problem sets, presentations and computer-lab based sessions for students to explore programming and statistical skills. Students are strongly encouraged to take DV491, as a highly complementary course that will also apply the empirical methods taught in DV490 to topics in Human Development, Institutions and Markets, Social Networks, Economic History and Cultural Economics, and Behavioural Economics and Development Policy Design.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. There will be a two hour revision session in late LT or early ST.

Formative coursework: Students will be expected to produce 1 problem sets and 1 exercise in the LT.

Indicative reading: 1. Bandiera, O., Prat, A. and Valletti, T. 2009. "Active and Passive Waste in Government Spending: Evidence from a Policy Experiment." *American Economic Review*, 99(4): 1278-1308.

2. Besley, T. and Ghatak. 2004. "Public Goods and Economic Development". in *Policies for Poverty Alleviation* (ed.) Abhijit Banerjee, Roland Benabou, and Dilip Mookherjee.

3. Cohen, J., Dupas, P. and Schaner, S. 2015. "Price Subsidies, Diagnostic Tests, and Targeting of Malaria Treatment: Evidence from a Randomized Controlled Trial" *American Economic Review*, 105(2): 609-645.

4. Duflo, E., Hanna, R. and Ryan, S. 2012. "Incentives Work: Getting Teachers to Come to School." *American Economic Review*, vol. 102(4), pp. 1241-78.

5. Chetty, R. and Looney, A. (2005) "Income Risk and the Benefits of Social Insurance: Evidence from Indonesia and the United States" in Ito, T. and Rose, A. K., *Fiscal Policy and Management in East Asia*, NBER-EASE, Volume 16, University of Chicago Press.

6. Gordon, R. and Li, W. 2009. "Tax structures in developing countries: Many puzzles and a possible explanation," *Journal of Public Economics*, 93(7), pp.855-866.

8. Miguel, Edward, and Michael Kremer. 2004. "Worms: identifying impacts on education and health in the presence of treatment externalities." *Econometrica* 72.1: 159-217.

9. Pomeranz, Dina. 2015. "No Taxation without Information: Deterrence and Self-Enforcement in the Value Added Tax." *American Economic Review*, 105(8): 2539-69.

10. Singhal, M. and Luttmer, Erzo F.P. 2011. "Culture, Context, and the Taste for Redistribution" *American Economic Journal: Economic Policy*, 3(1):157-79. *Yale Journal of Regulation* *Modern Law Review* *European Business Law Review*

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Coursework (30%) in the LT.

The course assessment will be based on a final exam (70%) and problem sets and study aids (30%).

EC400

Introductory Course in Mathematics and Statistics

This information is for the 2020/21 session.

Teacher responsible: Dr Francesco Nava 32L.3.20, Dr Marcia Schafgans 32L.4.12 and Dr Shengxing Zhang 32L.1.16

Availability: This course is compulsory on the MRes/PhD in Accounting (EoA) (Economics of Accounting Track), MRes/PhD in Economics, MRes/PhD in Finance, MRes/PhD in Quantitative Economic History, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Economics and Management, MSc in Economics and Philosophy, MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway) and MSc in Quantitative Economic History. This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MRes/PhD in International Development, MSc in Political Science and Political Economy and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on the MRes/PhD in Economics may be exempted from EC400 at the Department's discretion.

Master of Public Administration students may only apply to take EC400 at the beginning of their second year.

Outside applications for EC400 must be made to the Department of Economics by the end of June. This applies to offer holders/students who do not have any EC4XX courses listed in their programme regulations for which EC400 is a pre-requisite.

Please contact econ.msc@lse.ac.uk for more information.

Students not on the compulsory programmes listed above who wish to continue studying Economics MSc-level courses must achieve an overall grade of 50% in EC400 with no one subject exam less than 40%. Non-MRes students wishing to study MRes-level courses must achieve an overall grade of 70% with no one subject exam less than 60%.

Pre-requisites: EC400 is an introduction to MSc level concepts in mathematics and statistics, and an undergraduate level understanding is assumed. EC400 is not intended as an introduction for students with little or no economics/mathematics background.

Course content: The aim of this introductory course is to provide students with the essential mathematical, statistical, economic and econometric background for the core Economics courses of these programmes. The course starts with Mathematics Revision sessions and progresses to sections covering Static Optimization & Fixed Points, Dynamic Optimization & Differential Equations, and Probability & Statistical Inference. All MSc Finance and Economics students are required to take mathematics for macroeconomics.

MSc Economics and Management students attend lectures on literacy in accounting instead of the mathematics for macroeconomics component.

Teaching: Approximately: 27.5 hours of lectures (delivered online through a mix of interactive live sessions and pre-recorded content) and 27.5 hours of online interactive live classes.

Formative coursework: Students will be required to complete daily sets of self-testing exercises during the course.

Indicative reading: Students will be advised of recommended readings and preparation materials in the summer.

Assessment: Students will be required to complete a set of self-testing exercises during the course. At the end of the course, students on MSc Management and Economics are examined on: Static Optimization & Fixed Points; Probability & Statistical Inference; but not on Dynamic Optimization & Differential Equations. All other students are examined on: Static Optimization & Fixed Points; Dynamic Optimization & Differential Equations; and Probability & Statistical Inference.

EC402

Econometrics

This information is for the 2020/21 session.

Teacher responsible: Dr Vassilis Hajivassiliou 32L.4.23 and Dr Rachael Meager 32L.3.13

Availability: This course is compulsory on the MRes/PhD in Accounting (EoA) (Economics of Accounting Track), MSc in Economics and MSc in Economics (2 Year Programme). This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MPhil/PhD in Environmental Economics, MSc in Economics and Philosophy and MSc in Quantitative Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Students should also have completed an undergraduate degree or equivalent in Economics and an introductory course in Econometrics.

In very exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via an online* face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk).

Course content: The course aims to present and illustrate the techniques of empirical investigation in economics.

- Regression models with fixed regressors (simple and multiple). Least squares and other estimation methods. Goodness of fit and hypothesis testing.
- Regression models with stochastic regressors.
- Asymptotic theory and its application to the regression model. Sampling error vectors. Large sample approximations.
- The partitioned regression model, multicollinearity, misspecification, omitted and added variables, measurement errors.
- Heteroskedasticity, autocorrelation, and generalized least squares.
- Exogeneity, endogeneity, and instrumental variables.
- Nonlinear regression modelling and Limited Dependent Variables models.
- An introduction to Non-classical econometric inference.
- Autoregressive and moving average representations of time series. Stationarity and invertibility.
- Vector auto-regressions.
- Unit roots and co-integration.
- Estimating causal effects in panel data: differences in difference estimator, matching methods, and regression discontinuity.

- Panel data and static models: fixed and random effect estimators, specification tests, measurement errors.
- Panel data and dynamic models: generalized method of moments.
- Binary choice models with heterogeneity.

Teaching: 30 hours of lectures and 10 hours of classes in the MT. 30 hours of lectures and 10 hours of classes in the LT.

This year at least for Michaelmas Term, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Two marked assignments per term.

Exercises are provided each week and are discussed in classes. In order to have any chance of completing the course successfully, these exercises must be attempted. Special test exercises will be set at three points during the year. These will be carefully marked and the results made available.

Indicative reading: W H Greene, *Econometric Analysis* (6th edn), James D. Hamilton, *Time Series Analysis* (1994), J Wooldridge, *Econometric Analysis of Cross Section and Panel Data* (2002), J Angrist and J Pischke, *Mostly Harmless Econometrics* (2009)

Assessment: Exam (50%, duration: 2 hours, reading time: 10 minutes) in the January exam period.

Exam (50%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.

EC411

Microeconomics

This information is for the 2020/21 session.

Teacher responsible: Dr Francesco Nava 32L. 3.20 and Prof Martin Pesendorfer 32L. 4.19

Availability: This course is compulsory on the MPhil/PhD in Environmental Economics and MRes/PhD in Accounting (EoA) (Economics of Accounting Track). This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MPhil/PhD in Economic Geography, MRes/PhD in Management (Marketing), MRes/PhD in Quantitative Economic History, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Economics and Philosophy, MSc in Environmental Economics and Climate Change, MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway) and MSc in Quantitative Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may enrol in the course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (at a face-to-face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: The aim of the course is to develop the basic tools for analysing problems of resource allocation used by economists working in research, government and business. The course deals with positive and normative problems. It aims to include modern developments without being overly mathematical, and to develop a capacity to apply economic concepts to real-world problems. The first part of the course focuses on classical theories of market behaviour and strategic interaction. We begin by presenting foundations to utility maximization, by analysing the optimisation problems of price-taking consumers and firms, and by modelling market interactions and the formation of prices in perfectly competitive markets. Then we study models of decision making under uncertainty and game theoretic solution concepts. Novel developments in these fields are also discussed in lectures. The second part of the course focuses on models

of imperfect competition and information economics. We begin with an analysis of models of monopoly, oligopoly, product differentiation, and public goods. Then, we study markets with imperfect and incomplete information including search, adverse selection, auctions, signalling, screening, and moral hazard. Special emphasis will be given to economic applications.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. This year at least for Michaelmas Term, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Two marked assignments per term.

Indicative reading: The course will draw on a variety of texts, the main ones being:

- 1 J G Riley, *Essential Microeconomics*, Cambridge;
- 2 J R Green, A Mas-Colell & M D Whinston, *Microeconomic Theory*, Oxford.

More detailed readings will be given at the beginning of the course. Some notes will be provided where textbook coverage is inadequate.

Intellectual Property Law

The Requirement for an Invention in Patent Law

Intellectual Property

The Economic Structure of Intellectual Property Law

Justifying Intellectual Property Law

Innovation and its Discontents

Assessment: Exam (50%, duration: 2 hours, reading time: 10 minutes) in the January exam period.

Exam (50%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.

EC413

Macroeconomics

This information is for the 2020/21 session.

Teacher responsible: Prof Wouter Den Haan 32L.1.08A and Prof Alwyn Young 32L. 2.20

Availability: This course is compulsory on the MSc in Economics and MSc in Economics (2 Year Programme). This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Quantitative Economic History, MSc in Economics and Philosophy, MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway) and MSc in Quantitative Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners, the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: The aim of the course is to give a wide-ranging overview of modern macroeconomics.

Economic growth (Michaelmas)

The Michaelmas term of EC413 is an introduction to the techniques needed to critically read and evaluate academic research in economic growth. Topics are facts about growth, the Solow growth model (theory and empirics), the Neoclassical Growth model (growth with dynamic optimization), and endogenous technical change.

Business Cycles (Lent)

During the Lent part of EC413 you will learn the main characteristics of business cycle fluctuations with a special emphasis on what happens during severe economic crises. We will consider a range of different macroeconomic models to study

business cycles. The course covers the Real Business Cycle model, the New-Keynesian model, models with frictions in labour and financial markets, agent-based models, the role of money, self-fulfilling beliefs, the role of monetary and fiscal policy (and in particular non-conventional monetary policy), and (un)sustainable sovereign debt. These models and policy studies will highlight important economic mechanisms that are relevant to analyse a range of past and current economic phenomena.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

This year at least for Michaelmas Term, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Two marked assignments per term.

Exercises are discussed in each class.

Indicative reading: Primary reading will be journal articles and a few chapters from Daron Acemoglu, *Introduction to Modern Economic Growth*. A full list will be available at the start of each term.

European Union Law

The Evolution of EU Law

The Past and Future of EU Law

Philosophical Foundations of EU Law

The Eurozone crisis: A Constitutional Analysis

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

EC417

Advanced Macroeconomics

This information is for the 2020/21 session.

Teacher responsible: Prof Benjamin Moll 32L.1.19

Dr Maarten De Ridder 32L.1.24

Availability: This course is compulsory on the MSc in Econometrics and Mathematical Economics. This course is not available as an outside option.

Pre-requisites: Students must have completed Introductory Course for MSc EME (EC451).

Course content:

Course objectives and main course elements:

1. The course will teach you the concepts used in empirical and theoretical macroeconomics.
2. The course will teach you the main empirical business cycle characteristics of developed economies and the main empirical findings regarding the growth of developed and less developed nations.
3. This course teaches you the main techniques used to analyse modern macroeconomics models. In particular, the course will focus on techniques such as dynamic programming, value function iteration, and the linearization of first-order conditions.
4. This course teaches you (prototype versions of) macroeconomic models used to analyse key questions related to business cycles and economic growth. Examples are New Keynesian models, Real Business Cycle models, Overlapping Generations models, the Solow growth model, and first-generation endogenous growth models.
5. The course will also discuss some more advanced models that have recently been developed to explain recent economic events, including models with heterogeneous agents, financial frictions and labour market frictions.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Some of the problem sets will consist of computer and data assignments and students will be taught some basic programming and data analysis skills.

This year, at least for MT, some of this teaching may have to be delivered through a combination of virtual webinars, online videos,

and virtual classes.

Formative coursework: Students are assigned problem sets. These problem sets focus on key elements of the lectures, but they will also promote creativity and critical thinking by going beyond the material explicitly discussed in the lectures. There will also be computer assignments. The problem sets will be discussed by the class teachers.

Indicative reading:

- Acemoglu, Daron, 2009, Introduction to Modern Economic Growth.
- Ljungqvist, Lars and Thomas J. Sargent, 2012, Recursive Macroeconomic Theory.
- Stokey, Nancy L. and Robert E. Lucas Jr., 1989, Recursive Methods in Economic Dynamics.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Exam (50%, duration: 2 hours) in the January exam period.

EC421 Not available in 2020/21 International Economics

This information is for the 2020/21 session.

Teacher responsible: Dr Swati Dhingra, Mr Justas Dainauskas and Dr John Morrow

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: A graduate course in international economics consisting of i) the fundamentals of trade theory and its application to policy and ii) international macroeconomics.

Trade: Comparative advantage and the gains from trade. Theories of comparative advantage. Factor endowments, the international location of production, and patterns of international trade.

Empirical tests of trade models. Trade and the labour market. Intra-industry trade. Firm heterogeneity and selection into trade. Foreign direct investment. General equilibrium trade policy.

International macroeconomics: Intertemporal trade and the current account balance. Dynamics of small open economies. The real exchange rate and the terms of trade. Uncertainty and international financial markets. Monetary model of exchange rate determination: flexible and sticky prices. Introduction to currency crises models.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term.

Indicative reading: A full reading list will be distributed at the beginning of the course. Some important items are: R Feenstra, Advanced International Trade: Theory and Evidence, Princeton, 2004; A Dixit & V Norman, Theory of International Trade, Cambridge, 1980; E Helpman & P Krugman, Market Structure and Foreign Trade, MIT, 1985; M Obstfeld & K Rogoff, Foundations of International Macroeconomics, MIT Press, 1996.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Essay (50%, 6000 words) in the ST.

EC423 Labour Economics

This information is for the 2020/21 session.

Teacher responsible: Dr Guy Michaels 32L.2.10

Dr Rui Costa 32L.2.01

Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: An advanced course in labour economics issues, including theory, evidence and policy. The aim of the course is to familiarise students with main theoretical and empirical issues in current labour economics, and to provide them with the tools for developing independent research interests. The course has a strong applied focus. For each major topic covered we will discuss theoretical implications, provide insights into the research methodology, discuss the advantages and limitations of existing empirical work, and where possible draw policy conclusions. The course will include hands-on experience in applying econometric tools, working with data, and thinking critically about results and their interpretation. Topics include: labour supply and welfare systems, human capital, immigration, inequality and technological change, unemployment and alternative work arrangements, gender and racial gaps, minimum wages, intergenerational mobility, labour market impacts of international trade and globalization and economics of crime.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

This year, at least for MT, some of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: At Least two marked assignments per term.

Indicative reading: Most of the reading is from journal articles. A detailed reading list is available on Moodle.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Essay (50%, 6000 words) in the ST.

EC424 Monetary Economics and Aggregate Fluctuations

This information is for the 2020/21 session.

Teacher responsible: Dr Kevin Sheedy 32L.1.09

Dr Saleem Bahaj 32L.4.14

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director

and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: The course aims to develop the student's ability to undertake research in macroeconomics by studying a number of current issues both theoretical and applied.

In the MT, we begin by studying money's role as a medium of exchange and the determination of the price level using money-in-the-utility-function and cash-in-advance models. We then look more carefully at the reasons for holding money by applying search theory. We also study money's role as a unit of account and the consequences of nominal rigidities such as sticky prices. We analyse the costs of inflation and optimal monetary policy, and we also look at unconventional monetary policies when a central bank is constrained by the interest-rate lower bound. Finally, we study firms' price-setting behaviour in more detail and its implications for the size of the real effects of monetary policy.

In LT, we discuss empirical tools monetary economists use to assess the impact of policy on the economy. We also consider the different policies available to a central bank to control inflation, to prevent financial crises and to communicate with the public.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. This year at least for MT, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Two marked assignments per term.

Indicative reading: A reading list will be handed out by the lecturers at the beginning of their sessions.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.
Essay (50%, 6000 words) in the ST.

EC426

Public Economics

This information is for the 2020/21 session.

Teacher responsible: Prof Frank Cowell 32L.2.25A, Dr Johannes Spinnewijn 32L.3.24 and Dr Xavier Jaravel 32L.3.14

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MPhil/PhD in Environmental Economics, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Environmental Economics and Climate Change, MSc in International Health Policy (Health Economics) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: A graduate course in the principles of public economics and topics in public economics. Principles of public economics cover: Welfare analysis; concepts of fairness, equity and efficiency; social welfare. Policy design: social insurance, income taxation. Taxation; household and firm behaviour. Public goods and externalities. Behavioural public economics; implications for welfare analysis and policy. Topics in public economics may include: Behavioural responses to taxation. Empirical strategies in public economics. Poverty, inequality and optimal low-income support. Compliance problems. Inheritance

and wealth taxation.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. This year at least for Michaelmas Term, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Two marked assignments per term.

Indicative reading: Most of the readings will be in the form of journal articles, but some use will also be made of the following texts: A Auerbach & M S Feldstein (Eds), *Handbook of Public Economics*, Vols I-III, North-Holland; A B Atkinson & J E Stiglitz, *Lectures on Public Economics*, McGraw-Hill, 1980; G Myles, *Public Economics*, Cambridge University Press, 1995.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.
Essay (50%, 6000 words) in the ST.

EC427

The Economics of Industry

This information is for the 2020/21 session.

Teacher responsible: Prof John Sutton 32L. 4.32, Dr Pasquale Schiraldi 32L. 4.22 and Prof Martin Pesendorfer 32L.4.19

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: A graduate course in Industrial Organization, which aims to provide students with a working knowledge of current theoretical and empirical methods for industry studies. Applications of these methods are considered in industry case studies.

Topics include: Pre-requisites in Game Theory, An introduction to current developments in Oligopoly Theory. A formal analysis of conduct in concentrated industries (cartel stability, limit pricing, predatory pricing, etc), Demand estimation in homogenous and differentiated product industries, Production function estimation, Empirical techniques for oligopoly models and auction markets, Identification of conduct, Economies of Scale, R&D, Advertising, Vertical restraints. The topics will be discussed with detailed applications for selected industries and considering competition policy questions.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. This year at least for Michaelmas Term, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Two marked assignments per term.

Indicative reading: Two books which provide a basic framework are J Tirole, *Theory of Industrial Organization*, MIT Press, 1989 and J Sutton, *Technology and Market Structure*, MIT Press, 1998. A full reading list will be supplied at the beginning of the course.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.
Essay (50%, 6000 words) in the ST.

EC428

Development and Growth

This information is for the 2020/21 session.

Teacher responsible: Prof Maitreesh Ghatak 32L.3.08A and Dr Gharad Bryan 32L.3.10

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Studies, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Environmental Economics and Climate Change. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Students should have completed courses in intermediate level microeconomics, macroeconomics and econometrics.

Course content: This course will cover a number of topics at forefront of development economics, combining theoretical and empirical analysis with a clear focus on policy implications. These include economic growth, poverty traps, inequality and occupational choice, credit markets, microfinance, property rights, land markets current methodological debates; the allocation of capital and labour across firms, space and sectors; structural change during the development process; finance; psychology and development; governance and accountability; conflict and civil war; motivation of civil servants; taxation and development; firms and markets; trade; infrastructure; energy and the environment; and climate change.

Development economics is, arguably, the fastest growing and most vibrant field within economics. The course will enable the students to apply their econometric and theoretical skills to what are some of the world's most pressing problems. The experience of applying their economic knowledge to these topics will generate analytical skills that can be used in wide variety of applied settings.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. This year at least for Michaelmas Term, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Two marked assignments per term.

Indicative reading: Most of the reading is from journal articles which appear on reading lists distributed at the start of each part of the course.

However, the following references may serve as an introduction to material included in the syllabus.

D Ray, Development Economics, Princeton UP, 1998, Abhijit Banerjee and Esther Duflo's Poor Economics, New York: Public Affairs, 2011, and the symposium on The Agenda for Development Economics - Journal of Economic Perspectives Volume 24, Number 3, Summer 2010: Articles by Deaton, Acemoglu, Ray, Rodrik, and Rosenzweig.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Essay (50%, 6000 words) in the ST.

theory and calculus is required.

Course content: The aim of the course is to:

- introduce the basic analytical tools that are necessary to conduct theoretical research in many fields in economics.
- give the students a full understanding of the classic Microeconomic Theory and of the modern developments of Microeconomic Theory
- enable students to address a microeconomic problem by structuring it as a mathematical model and enhance the understanding of economic issues through the use of mathematical tools.

Topics include: Consumer theory, producer theory, general equilibrium, welfare, choice under uncertainty, game theory, economics of information, agency theory, contracts, topics in mechanism design.

Teaching: 30 hours of lectures and 15 hours of classes in the MT. 30 hours of lectures and 15 hours of classes in the LT.

This year, at least for Michaelmas term, some or all of the lectures and classes may have to be delivered through a combination of virtual webinars, online videos and virtual classes. Attendance at lectures and classes is compulsory.

Formative coursework: Compulsory exercises are set for each class.

Indicative reading: The main text is Mas-Collel, Whinston & Green, Microeconomic Theory, OUP.

Other sources include:

D Fudenberg & J Tirole, Game Theory, MIT Press; D M Kreps, A Course in Microeconomic Theory, Harvester Wheatsheaf; H R Varian, Microeconomic Analysis (3rd edn), Norton; M J Osborne & A Rubinstein, A Course in Game Theory, MIT Press; G A Jehle & P J Reny, Advanced Microeconomic Theory, Longman.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC442

Macroeconomics for MRes students

This information is for the 2020/21 session.

Teacher responsible: Prof Per Krusell TBA, Prof Benjamin Moll 32L.1.19, Dr Ethan Ilzetzki 32L.1.11 and Prof Ricardo Reis 32L.1.27

Availability: This course is compulsory on the MRes/PhD in Economics and MRes/PhD in Finance. This course is not available as an outside option.

Course content: The course will cover topics in advanced macroeconomics with emphasis on fundamentals and applications to recent theoretical advances:

- Economic growth: Neoclassical Growth Model, Optimizing Behaviour in dynamic models under certainty, Endogenous Technological Change, Imitation and Convergence, Growth and Development Accounting, Appropriate Technology.
- Search and Matching: The Matching Model, Efficiency Wages, Growth and Unemployment.
- Dynamic Stochastic General Equilibrium Models : Real Business Cycles, applications to models of heterogeneous agents and open economy. Fiscal policy analysis.
- Monetary Economics: models with credit frictions, sticky prices, search.

Teaching: 30 hours of lectures and 15 hours of classes in the MT. 30 hours of lectures and 15 hours of classes in the LT.

This year, at least for Michaelmas term, some or all of the lectures and classes may have to be delivered through a combination of virtual webinars, online videos and virtual classes. Attendance at lectures and classes is compulsory.

Formative coursework: Compulsory exercises are set for each class.

Indicative reading:

A good general textbook that is mostly below the level of the course is:

D Romer, Advanced Macroeconomics, McGraw-Hill Advanced

EC441

Microeconomics for MRes students

This information is for the 2020/21 session.

Teacher responsible: Prof Michele Piccione 32L.4.07 and Prof Balazs Szentes 32L.4.05

Availability: This course is compulsory on the MRes/PhD in Economics and MRes/PhD in Finance. This course is not available as an outside option.

Pre-requisites: A good undergraduate knowledge of economic

Series in Economics, New York, 1996.

For the growth part the main references are the textbooks by:

D. Acemoglu, Introduction to Modern Economic Growth, Princeton University Press, 2009; R J Barro & X Sala-i-Martin, Economic Growth, McGraw-Hill, 1997.

Other useful texts include:

L Ljungqvist & T Sargent, Recursive Macroeconomic Theory, MIT Press, 2000; N Stokey & R E Lucas, Recursive Methods in Economic Dynamics, Harvard University Press, 1989.

More economic applications, with some required readings can be found in:

M Obstfeld & K Rogoff, Foundations of International Macroeconomics, MIT Press, 2000; P Aghion & P Howitt, Endogenous Growth Theory, MIT Press 1998; C A Pissarides, Equilibrium Unemployment Theory, MIT Press 2000. References for recent theoretical advances published in the journals will be given during the course.

Assessment: Exam (75%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Problem sets (25%) in the MT and LT.

EC443

Econometrics for MRes students

This information is for the 2020/21 session.

Teacher responsible: Dr Tatiana Komarova 32L.4.24, Dr Vassilis Hajivassiliou 32L.4.23 and Dr Yike Wang 32L.4.26

Availability: This course is compulsory on the MRes/PhD in Finance. This course is available on the MRes/PhD in Economics and MRes/PhD in Management (Marketing). This course is not available as an outside option.

Pre-requisites: Students should have completed an undergraduate level course in econometrics and statistical theory. Linear algebra and multivariate calculus will be used frequently.

Course content:

- First part [Inference, Classical- and Generalized Linear Regression] begins with methods of estimation and optimality, followed by an introduction to asymptotic theory. It proceeds with statistical inference and the trinity of classical testing (Wald, Likelihood Ratio, and Lagrange Multiplier). It then discusses the classical linear regression model and commences the discussion of violation of the classical assumptions by discussing the Generalized Linear Regression Model (heteroskedasticity and autocorrelation).
- Second part [Generalized Regression Methods] provides a further discussion of violations of the classical assumptions including measurement error, omitted variables, simultaneity, missing data; non-linear regression models and instrumental variables. It proceeds to the Generalized Method of Moments and efficient estimation methods under conditional moment restrictions. It also covers the topics of quantile regression and bootstrapping.
- Third part [Time-series, Panel-data, and Microeconomic Methods] begins with a discussion of Time-Series topics, including single equation theory for non-stationary variables; serially correlated errors with lagged dependent variables; unit roots; simultaneous equations for non-stationary variables; co-integration; and ARCH and GARCH models. It proceeds to Panel data methods such as fixed and random effects estimators and their extensions for applying to dynamic linear and non-linear panel data models. The next major topic presents models with Limited Dependent Variables.
- Final part [Specialized Econometric Methods] discusses simulation-based inference, nonlinear panel data, and duration models. Finally, it covers the topics of program evaluation, nonparametrics, kernel estimation, and differences in differences.

Teaching: 30 hours of lectures and 15 hours of classes in the MT. 30 hours of lectures and 15 hours of classes in the LT.

This year, at least for Michaelmas term, some or all of the lectures and classes may have to be delivered through a combination of

virtual webinars, online videos and virtual classes. Attendance at lectures and classes is compulsory.

Formative coursework: Compulsory exercises are set for each class.

Indicative reading: Lecture notes will be made available through the departmental website and in course-packs for each part of the course. Please note there is no set book for this course.

Recommended books are: W H Greene, Econometric Analysis, 6th edn, Pearson Education; R Davidson & J MacKinnon, Estimation and Inference in Econometrics, Oxford University Press, 1993; P. Ruud, An Introduction to Classical Econometric Theory, Oxford University Press, 2000; T Amemiya, Advanced Econometrics, Harvard University Press, 1985; J Johnston, Econometric Methods, 3rd edn, McGraw Hill; G Judge et al, A Course in Econometrics, Wiley, 1988; G Maddala, Econometrics, McGraw Hill, 1977.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC451

Introductory Course for MSc EME

This information is for the 2020/21 session.

Teacher responsible: Prof Francisco Hidalgo 32L.4.20

Prof Taisuke Otsu 32L.4.25

Prof Michele Piccione 32L.4.07

Prof John Moore 32L.4.14

Availability: This course is compulsory on the MSc in Econometrics and Mathematical Economics. This course is not available as an outside option.

The course is split into three parts: Microeconomics, Macroeconomics and Econometrics.

Non-EME students wishing to take EC487 Advanced Microeconomics as part of their programme must attend Week 1 of the EC451 course, Microeconomics, and sit the EC451 Microeconomics examination.

Non-EME students wishing to take EC484 Econometric Analysis as part of their programme must attend Week 3 of the EC451 course, Econometrics, and sit the EC451 Econometrics examination. Non-EME students are not permitted to attend Week 2 of the EC451 course, Macroeconomics.

Course content:

Microeconomics (Week 1):

This introduction to microeconomic theory introduces the economic concepts of choice, preference and utility, including discussion of the revealed-preference approach to hedonics. It describes the consumer's problem and explores conditions under which consumer preferences, as well as policy preferences, can sensibly be aggregated. The course will also cover the mathematics of correspondences and fixed-point theorems.

Macroeconomics (Week 2):

The prequel of the advanced macroeconomics core course focuses on topics in modern macroeconomic theory, starting with basic national income accounting and the real-business cycle model. Then sticky prices. Followed by matching frictions in the labour market. Finally credit market imperfections.

Econometrics (Week 3):

Day 1-4 (Prof Otsu): This part introduces basic concepts and theory for mathematical statistics and probability. This part mostly focuses on linear regression model and covers the topics, such as (i) Conditional expectation and projection, (ii) Algebra of least squares, (iii) Finite sample theory, (iv) Maximum likelihood (v) Introduction to asymptotic theory, and (vi) Hypothesis testing. Also, some background mathematical results are reviewed.

Day 5 (Prof Hidalgo): Last day is devoted to introduction to MT part of EC484. Further concepts and results on convergence of variables are discussed.

Teaching: The course is taught in September. It consists of approximately 45 hours of lectures and an additional 22 hours of classes, across a 3-week period. Lectures and classes will be

delivered online through a mix of interactive live sessions and pre-recorded content.

Formative coursework: After each lecture, some exercises will be handed to students. They will be solved during the classes.

Indicative reading: Prof Bruce Hansen's lectures note at University of Wisconsin-Madison (1st year PhD level), downloadable at: <https://www.ssc.wisc.edu/~bhansen/econometrics/>
<https://www.ssc.wisc.edu/~bhansen/probability/>
 (The first link is the main reference, and the second link is a background for the course.)

Rubinstein (2012) Lecture Notes in Microeconomic Theory
 Ljungqvist, Lars and Thomas J. Sargent (2012) Recursive Macroeconomic Theory.

Romer, David (2011) Advanced Macroeconomics.

Assessment: At the end of the course, students will be examined on all three modules, microeconomics, econometrics and macroeconomics.

Students from programmes other than MSc EME wishing to continue studying MSc EME core courses must achieve at least 40% in each subject exam.

EC453

Political Economy

This information is for the 2020/21 session.

Teacher responsible: Dr Stephane Wolton

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Environmental Economics and Climate Change and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Students should have completed courses in intermediate level microeconomics, macroeconomics and econometrics.

Course content: This course proposes a broad overview of seminal papers and recent advances in the growing field of Political Economy. The course covers both theoretical and empirical works. Each lecture is organized around a theme, with themes changing every year as a function of recent debates in the scholarly community and current problems in the world. In the academic year 2020-21, topics will include elections in developed and developing democracies, voters (ir)rationality, media, interest groups, populism, democratic backsliding, discrimination, as well as several lectures on politics in autocracies. The course material will expand students' capacity to think about policy and about relevant issues at the intersection of economics and political science.

Teaching: 22 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

This year at least for MT, some or all of this teaching may have to be delivered through a combination of virtual webinars, online lectures, and virtual classes.

There will be a mock exam and a revision session in the ST (on-campus if possible or online).

Formative coursework: At least two written assignment for handing in per term (assignment will include some work with data sets provided by the instructor).

Indicative reading: Most of the reading is from journal articles;

lists will be supplied at the start of each term. Two books are of particular interest for students to get started: T Besley, *Principled Agents? Selection and Incentives in Politics*, Oxford University Press, 2005 and T Persson & G Tabellini, *Political Economics: Explaining Political Outcomes*, MIT Press, 2000.

Assessment: Assessment path 1

Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 6000 words) in the ST.

Assessment path 2

Exam (100%, duration: 3 hours) in the summer exam period.

Students taking MSc Economics must take Assessment path 1 and will be required to submit the extended essay at the beginning of the ST.

EC465

Economic Growth, Development, and Capitalism in Historical Perspective

This information is for the 2020/21 session.

Teacher responsible: Dr Jeremiah Dittmar 32L.2.22 and Dr Neil Cummins SAR.5.13

Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Economic History, MSc in Economics and MSc in Economics (2 Year Programme).

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Students should also have completed courses in intermediate level microeconomics, macroeconomics, and econometrics.

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: This course will provide a rigorous introduction to the analysis of long run economic growth and development. The focus is on acquiring the necessary empirical skills to engage in advanced analysis of economic evidence, and to develop an understanding of how historical evidence can shape and inform economic theory. Topics at the forefront of economics and economic history will be covered. These include political economy, technological change, economic growth, education, demography, the economics of law and property rights, gender, culture, and the distribution of income. The emphasis will be on combining theory and data to evaluate fundamental ideas in economics concerning the determinants of well-being and the dynamics of market economies.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

This year at least for Michaelmas Term, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Students will be expected to produce at least 1 presentation and 1 exercise in the MT and LT. The formative coursework will consist of a combination of student presentations, written exercises, data analysis, and problems.

Indicative reading: Most of the reading is from journal articles which appear on reading lists distributed at the start of each part of the course. However, the following references may serve as an introduction to material included in the syllabus: Nunn, "The Importance of History for Economic Development" (2009); Robinson and Acemoglu, "Why Nations Fail" (2012); Acemoglu, "Introduction to Modern Economic Growth" (Princeton, 2009); Hall and Jones, "The New Kaldor Facts: Ideas, Institutions, Population, and Human Capital" (2010); Mokyr, "Lever of Riches" (1988); Piketty (2013) "Capital in the Twenty-First Century"; Clark (2007) "Farewell to Alms"; Diamond (1997) "Guns, Germs and Steel"; Clark et al.

(2014) "The Son also rises".

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Essay (50%, 6000 words) in the ST.

The summative assessment consists of an exam that reviews and synthesises all course materials and an essay. The essay will be a critical analytic essay providing an opportunity for original empirical research.

EC475

Quantitative Economics

This information is for the 2020/21 session.

Teacher responsible: Professor Mark Schankerman (Michaelmas term) 32L.4.30

Dr Xavier Jaravel (Lent term) 32L.3.14

Availability: This course is available on the MSc in Econometrics and Mathematical Economics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course for MSc EME (EC451).

A knowledge is expected of econometric theory and applied econometrics corresponding to Principles of Econometrics or Methods of Economic Investigation. Students must be prepared to read journal articles with a difficult mathematical and statistical content.

Course content: The course will focus on going through modern quantitative papers which demonstrate the application of econometric techniques to modelling the behaviour of individual economic agents (households and firms) and economies. The first half of the course will focus on papers in the empirical literature on productivity, innovation and intellectual property rights, illustrating the challenges of identification in both structural and reduced form models. The lectures will cover a wide range of topics in applied micro-econometrics with a view to illustrating the interplay between models, data and methods.

The second part of the course focuses on macroeconomic questions using data and tools from applied microeconomics. We cover four styles of empirical work: (1) "reduced-form" approaches (including difference-in-differences, event studies instrumental variables and Bartik research designs); (2) structural models; (3) "sufficient statistics" research designs, at the intersection of structural and reduced-form methods; and (4) machine learning techniques.

Topics covered include the effectiveness of fiscal stimulus, measurement of inflation, directed technical change, from trade, the macroeconomic impact of financial frictions over the business cycle, the macroeconomic impact of unemployment insurance, and the effect of Artificial Intelligence on the labour market.

- The place(s) of consumers and small enterprises in the Real Economy
- Aims and justifications of regulation in consumer and SME financial markets
- Consumers, SMEs and financial stability (including prudential regulation and its interaction with consumer/SME protection)
- Access to finance (basic banking; the cashless society; fintech)
- Complexity in financial products (including product design and the regulation of contract terms; information asymmetry and disclosure regulations; behavioural perspectives and 'nudging')
- Mis-selling scandals and legal responses (including mortgage lending crises and 'responsible lending'; SME derivatives mis-selling and investor protection rules)
- Cross subsidisation, price discrimination, and fairness in financial services pricing ('the poor pay more'; the 'loyalty penalty')
- The problem of high-cost credit and usury regulation (the Wonga saga and payday loan regulation; bank overdrafts; the role of price regulation in financial markets)
- Wall Street v Main Street (dispute resolution and enforcement; financial law-making)

- Financial failure and default (entrepreneurship and bankruptcy law; over-indebtedness and consumer bankruptcy)

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. This year at least for Michaelmas Term, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: During Michaelmas term, students are required to prepare a short (3-4 page) "referee report" on an assigned journal article each week. Two of these reports will be marked by the class teacher. In Lent term, there will be one marked assignment, a short research proposal (which will be developed based on the content of classes and based on feedback from the instructor).

Indicative reading: Articles in economic journals will be assigned at the start of Michaelmas and Lent terms. The course will also draw on methodological topics covered in Wooldridge, *Econometric Analysis of Cross Section and Panel Data* (2nd edition, 2010), and Angrist and Pischke, *Mostly Harmless Econometrics* (2009).

- Sir Ross Cranston, Emiliós Avgouleas, Kristin van Zwieten, Christopher Hare, and Theodor van Sante, *Principles of Banking Law* (3rd edition, OUP 2018)
- Geraint Howells, Iain Ramsay, and Thomas Wilhelmsson (eds.), *Handbook of Research on International Consumer Law*, (2 edition, Elgar 2018)
- Geraint Howells, Christian Twigg-Flesner and Thomas Wilhelmsson, *Rethinking EU Consumer Law* (1 edition, Routledge 2017).
- Iain Ramsay, 'Consumer Credit Law, Distributive Justice and the Welfare State' (1995) 15 *Oxford Journal of Legal Studies* 177.
- George A. Akerlof, 'The Market for 'Lemons'', 84 *The Quarterly Journal of Economics* 488 (1970)
- David Caplovitz, *Poor Pay More: Consumer Practices of Low-Income Families* (Free Press 1968).
- Luigi Zingales, 'Does Finance Benefit Society?' (2015) 70 *The Journal of Finance* 1327.
- Financial Conduct Authority, 'Fair Pricing in Financial Services' (FCA 2018) Discussion Paper DP18/9

Complexity in Financial Products:

Contract-as-Product

- Oren Bar-Gill, *Seduction by Contract: Law, Economics, and Psychology in Consumer Markets* (OUP Oxford 2012), Chapter 1.
- Margaret Jane Radin, *Boilerplate: The Fine Print, Vanishing Rights, and the Rule of Law* (Princeton University Press 2012), Chapters 1-4.

Consumers, SMEs, and Financial Stability:

Prudential Perspectives

- Anat Admati and Martin Hellwig, *The Bankers' New Clothes: What's Wrong with Banking and What to Do about It* (Updated edition, Princeton University Press 2014).
- Atif Mian and Amir Sufi, *House of Debt* (University of Chicago Press 2014).
- Kathleen C Engel and Patricia A McCoy, *The Subprime Virus: Reckless Credit, Regulatory Failure, and Next Steps* (OUP USA 2011)
- Sir Ross Cranston, Emiliós Avgouleas, Kristin van Zwieten, Christopher Hare, and Theodor van Sante, *Principles of Banking Law* (3rd edition, OUP 2018)
- Geraint Howells, Iain Ramsay, and Thomas Wilhelmsson (eds.), *Handbook of Research on International Consumer Law*, (2 edition, Elgar 2018)
- Anat Admati and Martin Hellwig, *The Bankers' New Clothes: What's Wrong with Banking and What to Do about It* (Updated edition, Princeton University Press 2014).
- Atif Mian and Amir Sufi, *House of Debt* (University of Chicago Press 2014).
- Kathleen C Engel and Patricia A McCoy, *The Subprime Virus: Reckless Credit, Regulatory Failure, and Next Steps* (OUP USA 2011)
- Iain Ramsay, 'Consumer Credit Law, Distributive Justice and the Welfare State' (1995) 15 *Oxford Journal of Legal Studies* 177.
- Luigi Zingales, 'Does Finance Benefit Society?' (2015) 70 *The*

Journal of Finance 1327.

- Financial Conduct Authority, 'Fair Pricing in Financial Services' (FCA 2018) Discussion Paper DP18/9

Assessment: Exam (80%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Report (10%) in the MT.

Research proposal (10%) in the LT.

The report will be two mark referee reports due in the MT.

EC476

Contracts and Organisations

This information is for the 2020/21 session.

Teacher responsible: Prof Gilat Levy 32L.4.31 and Prof Philippe Aghion 32L.2.02

Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Environmental Economics and Climate Change. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students on the MSc Econometrics and Mathematical Economics programme must have completed the Pre-session Course for MSc EME (EC451). All other students must have completed the Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: The course will cover topics from: social learning, reputation and career concerns, strategic information transmission, contract theory, incomplete contracts, the economics of moral hazard and adverse selection in strategic settings, dynamic theory of incentive contracts, optimal auctions and regulation, and the theory of mechanism design with multiple agents (multiple agents screening and common agency).

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. This year at least for Michaelmas Term, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Two marked assignments per term.

Indicative reading: No one book covers the entire syllabus; a list of references will be provided at the start of the course. The following textbooks provide a treatment of part of the material presented in the course: Jean-Jacques Laffont, *The Economics of Uncertainty and Information*, MIT Press; D Fudenberg & J Tirole, *Game Theory*, MIT Press; Jean-Jacques Laffont & Jean Tirole, *A Theory of Incentives in Procurement Regulations*, MIT Press; Bernard Salanié, *The Economics of Contracts: A Primer*, MIT Press, Bolton, P., and M. Dewatripont (2005), *Contract Theory*, MIT Press, Hart, O. (1995), *Firms, Contracts, and Financial Structure*, Oxford University Press.

Assessment: Assessment path 1

Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Assessment path 2

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Essay (50%, 6000 words) in the ST.

MSc Econometrics and Mathematical Economics students must follow Assessment path 1.

Non-MSc Econometrics and Mathematical Economics students must follow Assessment path 2.

EC484

Econometric Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Javier Hidalgo 32L.4.20 and Prof Taisuke Otsu 32L.4.25

Availability: This course is compulsory on the MSc in Econometrics and Mathematical Economics. This course is available on the MRes/PhD in Economics and MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course for MSc EME (EC451).

EC451 takes place prior to the start of Michaelmas Term, please contact econ.msc@lse.ac.uk for more information.

Course content: This course gives an advanced treatment of the theory of estimation and inference for econometric models. Part (a) Background; asymptotic statistical theory: modes of convergence, asymptotic unbiasedness, uniform integrability, stochastic orders of magnitude, convergence in distribution, central limit theorems, applications to linear regression, extensions to time series, consistency and asymptotic distribution of implicitly defined extremum estimators.

Part (b) General asymptotic theorems, nonlinear regression, quantile regression, nonparametric methods (kernel and series methods), generalized method of moments, conditional moment restriction, many and weak instruments, limited dependent variables, treatment effect, bootstrap, and time series.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

This year at least for Michaelmas Term, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Two marked assignments per term.

Indicative reading: No one book covers the entire syllabus; a list of references will be provided at the start of the course, and lecture notes and relevant articles will be circulated.

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Exam (50%, duration: 2 hours) in the summer exam period.

EC485

Further Topics in Econometrics

This information is for the 2020/21 session.

Teacher responsible: Prof Francisco Hidalgo 32L.4.20, Dr Tatiana Komarova 32L.4.24 and Dr Yike Wang

Availability: This course is available on the MSc in Econometrics and Mathematical Economics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course for MSc EME (EC451).

In exceptional circumstances, students may take this course without EC451 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc EME Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: The aim of the course is to introduce the student to topics at the frontier of econometric research of importance both at a theoretical and empirical level. The course consists of four series of ten lectures on **specialised topics** in econometrics. These lectures change from year to year. Presently they include: Bootstrap methods; dependence in economics: an overview; panel data models; machine learning for causal inference.

Session 2: Fund terms

Session 3: Fund structures: the limited partnership

Session 4: Private equity fund (and manager) regulation

Session 5: Venture capital investments

Session 6: Negotiating the VC deal: case study

Session 7: The buyout: structure and terms

Session 8: The buyout: corporate governance issues

Session 9: LBO debt financing

Session 10: Document review

Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT.

This year at least for Michaelmas Term, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Students will have the option of producing a formative essay of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: No one book covers the entire syllabus; lists of references will be provided and lecture notes circulated.

Core texts:

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Exam (50%, duration: 2 hours) in the summer exam period.

EC486

Econometric Methods

This information is for the 2020/21 session.

Teacher responsible: Dr Pasquale Schiraldi 32L 4.22

Prof Alessandro Gavazza, 32L 4.21

Availability: This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.

Course content: This course aims to present the theory and practice of empirical research in economics. Beyond the theory, the course will put a substantial amount of effort in having the students work with Stata and other econometric software in analyzing actual data sets, reproducing and criticising results in previous work and learning the actual practice of econometrics as undertaken by the best applied economists, both in general (in MT) and specifically within the IO field (in the LT). Topics include: (MT) Ordinary Least Squares, hypothesis testing, omitted and added variables, measurement error, the role of controls, and functional form. Panel data, fixed and random effects. Instrumental Variables. An introduction to the analysis of time series. The emphasis of this part is on the identification of causal effects, and applications in microeconomics (Labour Economics, Public Policy, IO, etc) are presented throughout. In LT you will learn the applications of many of these techniques to econometric questions in Industrial Organization, organizational economics and management.

Teaching: 20 hours of lectures and 8 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures and 2 hours of seminars in the ST.

Formative coursework: Students are required to complete answers to problem sets on a week by week basis.

Indicative reading: MT: James H. Stock and Mark W. Watson, Introduction to Econometrics; reading lists of chapters and journal articles will be supplied at the start of each term.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Problem sets (20%) in the MT.

Problem sets (20%) in the LT.

Two problem sets, one per term, with a weight of 20% each towards the final overall grade.

The exam includes four questions, two for each term; the students have to answer three questions, at least one for each term. Each question carries 20% of the final overall grade.

EC487

Advanced Microeconomics

This information is for the 2020/21 session.

Teacher responsible: Dr. Rafayal Ahmed and Prof. Balazs Szentes

Availability: This course is compulsory on the MSc in Econometrics and Mathematical Economics. This course is available on the MSc in Applicable Mathematics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit. Students on other programmes must get permission from the course conveners to take this course.

Pre-requisites: Students must have completed Introductory Course for MSc EME (EC451).

EC451 takes place prior to the start of Michaelmas Term, please contact econ.msc@lse.ac.uk for more information.

Course content: The aim of this course is to: (i) introduce and develop the analytical tools of graduate level Microeconomics with a special emphasis on mathematical models; (ii) provide the students with a firm grounding in classical Microeconomic Theory as well as its modern development. Topics include: Consumer theory, producer theory, general equilibrium, welfare, choice under uncertainty, game theory, oligopoly, economics of information, topics in mechanism design, topics in behavioural economics.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

This year, at least for MT, some of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Problem sets will be discussed in class and two marked assignments will be given in MT and LT.

Indicative reading: The main texts are A Rubinstein Lecture Notes in Economic Theory, Princeton University Press (with the most up-to-date version available for free download from the author's website) and Mas-Colell, Whinston & Green, Microeconomic Theory, OUP. Other sources include: D M Kreps, Microeconomic Foundations I: Choice and Competitive Markets, Princeton University Press; Fudenberg and Tirole, Game Theory, MIT Press.

Assessment: Exam (40%, duration: 2 hours) in the January exam period.

Exam (40%, duration: 2 hours) in the summer exam period.

Problem sets (20%) in the MT and LT.

Note that EC451 material will be covered on the exam.

EC4B5 Half Unit

Macroeconomics for MSc F&E

This information is for the 2020/21 session.

Teacher responsible: Prof Wouter Den Haan 32L.1.08A

Availability: This course is available on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: This course will teach you the main characteristics of business cycle fluctuations with a special emphasis on what happens during severe economic crises. We will consider a range of different macroeconomic models to study business cycles. The course covers the Real Business Cycle model, the New-Keynesian model, models with frictions in labour and financial markets, agent-based models, the role of money, self-fulfilling beliefs, the role of monetary and fiscal policy (and in particular non-conventional monetary policy), and (un)sustainable sovereign debt. These models and policy studies will highlight important economic mechanisms that are relevant to analyse a range of past and current economic phenomena.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.
• 24 August - 05 September 2020

• 14-19 December 2020

Formative coursework: Two marked assignments per term. Exercises are discussed in each class.

Indicative reading: IMF World Economic Outlook, Chapter 1: Global Prospects and Policies. Den Haan, Wouter, 2006, Macroeconomic Models without the Walrasian Auctioneer, Tinbergen Magazine 14, fall. IMF, 2013, Unconventional Monetary Policies – Recent Experience and Prospects. Nelson, Rebecca M., 2013, Sovereign debt in advanced economies: Overview and Issues for Congress. Carvalho, Vasco, 2014, From micro to macro via production networks, Journal of Economic Perspectives 28(4), 23-48. More readings will be provided at the start of the course.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

EC4B6 Half Unit

Microeconomics for MSc F&E

This information is for the 2020/21 session.

Teacher responsible: Dr Francesco Nava 32L.3.20

Availability: This course is available on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The aim of the course is to develop the basic tools for analysing problems of resource allocation used by economists working in research, government and business. The course deals with positive and normative problems. It aims to include modern developments without being overly mathematical, and to develop a capacity to apply economic concepts to real-world problems. The course focuses on classical theories of market behaviour and strategic interaction. We begin by presenting foundations to utility maximization, by analysing the optimisation problems of price-taking consumers and firms, and by modelling market interactions and the formation of prices in perfectly competitive markets. Then we study models of decision making under uncertainty and game theoretic solution concepts. Novel developments in these fields are also discussed in lectures.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

This year, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Two marked assignments.

Indicative reading: The course will draw on a variety of texts, the main ones being: 1 J G Riley, Essential Microeconomics, Cambridge; 2 J R Green, A Mas-Colell & M D Whinston, Microeconomic Theory, Oxford. More detailed readings will be given at the beginning of the course. Some notes will be provided where textbook coverage is inadequate.

Assessment: Exam (100%, duration: 2 hours, reading time: 10 minutes) in the January exam period.

EH401 Half Unit

Historical Analysis of Economic Change

This information is for the 2020/21 session.

Teacher responsible: Dr Leigh Gardner SAR 507

Availability: This course is compulsory on the MSc in Economic History, MSc in Economic History (Research), MSc in Political Economy of Late Development and MSc in Quantitative Economic History. This course is available on the MPhil/PhD in Economic History. This course is not available as an outside option.

Course content: The course provides an overview of the central themes and key theoretical questions in economic history and examines the ways in which economic historians collect, analyse

and interpret evidence. Specific topics evolve to reflect recent research trends, but include a range of issues such as processes of economic development; culture and economic behaviour; the role of institutions; and welfare outcomes. The course approaches these topics by considering problems of knowledge and explanation in economic history, and introduces quantitative and qualitative approaches to obtaining, analysing, and interpreting evidence. Lectures pair conceptual and theoretical reviews with historical case studies illustrating applied research on these topics.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students are expected to write one essay or equivalent pieces of written work during the term.

Indicative reading: D. North, Institutions, Institutional Change and Economic Performance (1990); A. Greif, Institutions and the Path to the Modern Economy (2006); K. Pomeranz, The Great Divergence: China, Europe and the Making of the Modern World Economy (2000); R. Allen, The British Industrial Revolution in Global Perspective (2009); D Rodrik (Ed), In Search of Prosperity (2003); E. Helpman, The Mystery of Economic Growth (2004); T Rawski (Ed), Economics and the Historian (1996); J. Tosh, The Pursuit of History (2nd Edition, 1991); D. Little, Varieties of Social Explanation (1991).

Assessment: Exam (90%, duration: 2 hours) in the January exam period.

Class participation (10%) in the MT.

EH402 Half Unit

Quantitative Analysis in Economic History I

This information is for the 2020/21 session.

Teacher responsible: Dr Olivier Accominotti SAR 5.14

Availability: This course is available on the MPhil/PhD in Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is not available as an outside option.

Course content: This course is concerned with how economic historians have used quantitative methods and with how researchers design and structure a research project. In terms of quantitative methods the emphasis is on the applied and practical rather than the theoretical and will range from the use of simple summary descriptive statistics to multiple regression. The course is concerned with the problems of analysing and interpreting quantitative historical evidence. It will consider topics such as sampling and statistical distributions, correlation, simple and multiple regression, specification problems, hypothesis testing, panel data analysis and instrumental variables, although the content may vary slightly from year to year. The course will also provide students with training in using an econometrics software package. An important component of the course is the deconstruction of historical articles that have used quantitative techniques.

Teaching: 9 hours of seminars and 20 hours of computer workshops in the MT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures in the form of recorded live webinars. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading:

- C H Feinstein and M Thomas, *Making History Count* (2002);
- P Hudson, *History by Numbers* (2002);
- C H Lee, *The Quantitative Approach to Economic History* (1977);
- G Hawthorn, *Plausible Words* (1991). Strategic Management Journal Harvard Business Review Strategic Management Journal Strategic Management Journal

Assessment: Essay (80%, 3000 words) and in-class assessment (20%).

EH404 Half Unit

India and the World Economy

This information is for the 2020/21 session.

Teacher responsible: Prof Tirthankar Roy SAR 616

Availability: This course is available on the CEMS Exchange, MBA Exchange, MRes/PhD in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: From the eighteenth century, the South Asia region played an important part in international transactions in goods, people, and money. The world economy, in turn, shaped potentials for economic growth in the region. The aim of the course is to impart an understanding of the global factors that shaped economic change in the South Asia region in the 18th through the early-20th century. It will also deal with the principal ways in which South Asia contributed to economic change in the rest of the world. The political context of globalization, especially imperialism and colonial policies, will be considered. The course will be divided into a set of topics, which together cover a large ground, but a selection from which will be discussed in the class. Lectures and seminars will centre on the readings assigned to each topic.

Topics to be covered: Introductory: India and the world economy in the eighteenth and nineteenth centuries - how each shaped the other; textiles in eighteenth century India: scale - organization - impact on global consumption and innovation - trade and territorial politics; nineteenth century market integration: de-industrialization and the artisans; nineteenth century market integration: Agricultural exports, land rights, and the peasantry - Trade and famines; Government finance in colonial setting: The drain controversy - public debt; overseas migration in the nineteenth century: Who went where, how many, and why - private gains and losses - social effects: slavery and indenture, women, nature of work and skill-formation - labour and non-labour migrants compared; foreign capital and industrialization; balance of payments and the monetary system; overview: Globalization and economic growth.

Teaching: 10 hours of lectures and 20 hours of seminars in the LT. This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students are expected to write one essay or equivalent pieces of written work.

Indicative reading:

- G. Balachandran, ed., *India and the World Economy 1850-1950* (2003);
- C. Bates and M. Carter, 'Sirdars as Intermediaries in Nineteenth-century Indian Ocean Indentured Labour Migration,' *Modern Asian Studies* (2017);
- L. Chaudhary, B. Gupta, T. Roy and A. Swamy, eds, *A New*

- T. Roy, *A Business History of India: Enterprise and the Emergence of Capitalism 1700-2015* (2018).

Assessment: Essay (100%, 5000 words) in the ST.

EH409 Half Unit Not available in 2020/21

Chinese Economy in Transition: 1850-1950

This information is for the 2020/21 session.

Teacher responsible: Dr Debin Ma SAR 612

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus), MSc in International and Asian History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Course content: This course provides a broad but selective survey of over 100 years of economic change in China leading towards the rise of the new Communist regime in 1950. With emphasis on the importance of ideological and institutional changes, the course gives in-depth coverage of some major debates and case studies on historical turning points such as the opening of China in mid-19th century, the collapse of Qing in 1911, economic transformation during China's Republican period. The course showcases the critical relevance of a long-term perspective on understanding both the constraints and capacity of Chinese economy to respond to past and future challenges and offers unique historical perspectives on the origin of Chinese modernization as well as the grand economic transformation during the past three decades.

Teaching: 20 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 essays in the MT.

Indicative reading:

- Naughton. B., *The Chinese economy, transitions and growth* (MIT Press);
- Rawski. T., *Economic growth in prewar China* (Univ. of Berkeley Press);
- Richardson, P. *Economic change in China, c. 1800-1950* (Cambridge University Press);
- Spence, J.D *The search for modern China* (New York : W.W. Norton);
- Brandt, Ma and Rawski "From Divergence to Convergence, Reevaluating the History Behind China's Boom" *Journal of Economic Literature* March 2014.
- Perkins, D. (ed.) (1975) *China's Modern Economy in Historical Perspective*. Stanford University Press.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

EH413 Half Unit

African Economic Development in Historical Perspective

This information is for the 2020/21 session.

Teacher responsible: Dr Leigh Gardner SAR 507

Availability: This course is available on the CEMS Exchange, MBA Exchange, MRes/PhD in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global

Economic History (Erasmus Mundus), MSc in International and World History (LSE & Columbia) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Many of Africa's current economic challenges, from persistent poverty to the weakness of state institutions, have deep historical roots. This course provides an introduction to the economic history of sub-Saharan Africa since the medieval period. Its overall aim is to bring Africa and Africans into global economic history, allowing students to understand how Africans contributed to that history, as well as how global changes have influenced the patterns of African development.

The course addresses a number of issues which are current in studies of African development, including:

- Globalization and development
- Environmental challenges
- The structure of institutions
- Economic development and welfare outcomes

Close attention is paid to the ways in which economic development is measured and assessed in different periods with the available data. Seminars address the diverse experiences of specific countries and regions in addition to broader trends.

Teaching: 20 hours of seminars in the LT.

This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual seminars or classes and/or flipped-lectures delivered as short online videos, if necessary. This course includes a reading week in Week 6 of Lent Term

Formative coursework: Students are required to complete one essay or equivalent during the term.

Indicative reading: Readings for this course reflect current trends in research on African economic history and development. Indicative work includes Emmanuel Akyeampong et al (eds), *Africa's Development in Historical Perspective* (Cambridge, 2014). Other such readings will include recent contributions in journals such as the *Economic History Review* special issue on African economic history (November 2014).

For a general overview of African history over the period, see R.J. Reid, *A History of Modern Africa* (2009), J. Iliffe, *Africans: The History of a Continent* (1995).

Assessment: Essay (100%, 5000 words) in the ST.

EH421 Half Unit

Economic History of Colonialism

This information is for the 2020/21 session.

Teacher responsible: Prof Tirthankar Roy SAR 616

Availability: This course is available on the MRes/PhD in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Debates about the effects of European colonial rule on the non-European world animated economic history scholarship since the 1850s when Karl Marx published essays on British rule in India in the *New York Daily Tribune*. The relationship between colonialism and economic development has an important place in a number of distinct literatures in economic history, including work on globalization, divergence, migration, global finance, environmental change, and the shaping of development policy after colonialism. The aim of the course is to introduce the key readings in these themes, build connections between the discourses, and lead students to an informed view of colonialism as a force in shaping the modern world.

The broad topics include, (a) trade and the origins of colonialism

(b) institutions and governance; (c) connections forged through trade, investment, migration, and the transfer of knowledge of institutions and technologies, including informal empire; (d) growth of corporate enterprise such as companies, factories, and plantation complexes, and the connection between state power and private enterprise, (e) decolonization, proximity between indigenous business and nationalist politics, the changing power of expatriate capital, and the appeal of new developmental ideology in the interwar period, (f) environmental change, studying a scholarship that sees European empires, alternatively, as catastrophic in their impacts on the environment and as forerunners of governmental regulation of the commons. Seminars compare and contrast the experiences of Asia and Africa.

Teaching: 20 hours of seminars in the LT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term.

This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to complete an essay and an equivalent assignment during term.

Indicative reading: The primary reading for the course will be:

Leigh Gardner and Tirthankar Roy, *Economic History of Colonialism* (Bristol, 2020)

Other indicative readings include: Acemoglu, D., Johnson, S. and Robinson, J. A. (2001), 'The Colonial Origins of Comparative Development: An Empirical Investigation', *American Economic Review*, 91(5), pp. 1369-1401. C.A. Assessment: Essay (100%, 5000 words) in the ST.

EH423 Half Unit Not available in 2020/21

Japan and Korea as Developing Economies

This information is for the 2020/21 session.

Teacher responsible: Prof Janet Hunter SAR 604

Availability: This course is available on the MRes/PhD in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will focus on selected issues of economic development that are of importance in contemporary debates and theories, and see how these issues were played out in Japan and Korea from the late 19th century to the latter half of the 20th century. The main themes discussed will be: natural endowments and climatic impact; changes in the agricultural and manufacturing sectors; the growth of market production; issues of state policy; economic institutions; colonialism and imperialism;

integration into the international economy; income levels and consumption; gender and development; culture and economy.

Teaching: 20 hours of lectures in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to write one essay or equivalent pieces of written work.

Indicative reading: A.H.Amsden, *Asia's Next Giant: South Korea and Late Industrialisation* (1989); H-J Chang, *The East Asian Development Experience* (2006); Y-I.Chung, *Korea Under Siege, 1876-1945: Capital Formation and Economic Transformation* (2006); P.G.Francks, *Japanese Economic Development* (3rd edition, 2015); C.H.Lee & I.Yamazawa (eds.), *Economic Development of Japan and Korea* (1990).

Assessment: Essay (100%, 5000 words) in the LT Week 1.

EH426L Half Unit Not available in 2020/21 Quantitative Analysis in Economic History II

This information is for the 2020/21 session.

Teacher responsible: Dr Natacha Postel-Vinay SAR 613 and Miss Jennifer Kohler

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students enrolled for this course are expected to have completed at least introductory undergraduate courses in statistics and/or econometrics and economic theory. The course will begin with a revision of the main quantitative approaches but will not provide a comprehensive training in econometric methods or computer applications.

Please note: EH426L cannot be taken with EH426M.

Course content: The course will provide an overview of quantitative approaches in economic history mainly using cross-section and panel data. The course will examine the use of quantitative techniques through practical exercises and critical discussion of their application in recent literature. Techniques discussed will include multiple regression analysis, regression diagnostics, instrumental variables, limited dependent variables, sample selection corrections, and panel data analysis. The course is organised on a topic basis, with subjects chosen to illustrate particular theoretical, quantitative and methodological issues.

Teaching: 20 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students are expected to write one essay or equivalent pieces of written work.

Indicative reading: There is no mandatory textbook for this course, but the brief overview of quantitative methods during the first four weeks will follow:

- Wooldridge, J.M. (2009), *Introductory Econometrics: A Modern Approach*, International Student Edition.

Useful background readings include:

- J.L. Van Zanden, *The Long Road to the Industrial Revolution: The European Economy in a Global Perspective, 1000-1800* (Leiden, 2009);
- K.H. O'Rourke and J.G. Williamson, *Globalization and History: The Evolution of a Nineteenth-Century Atlantic Economy* (Cambridge MA, 1998);
- C. Goldin and L.F. Katz, *The race between education and technology* (Cambridge, MA, 2008);
- D. Greasley and L. Oxley (eds.), *Economics and History: Surveys in Cliometrics* (Oxford, 2011).6).

Assessment: Essay (100%, 5000 words).

EH426M Half Unit Quantitative Analysis in Economic History II

This information is for the 2020/21 session.

Teacher responsible: Dr Natacha Postel-Vinay SAR 613 and Miss Jennifer Kohler

Availability: This course is compulsory on the MSc in Quantitative Economic History. This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students enrolled for this course are expected to have completed at least introductory undergraduate courses in statistics and/or econometrics and economic theory. The course will begin with a revision of the main quantitative approaches but will not provide a comprehensive training in econometric methods or computer applications.

Please note: EH426M cannot be taken with EH426L.

Course content: The course will provide an overview of quantitative approaches in economic history mainly using cross-section and panel data. The course will examine the use of quantitative techniques through critical discussion of their application in recent literature. Techniques discussed will include multiple regression analysis, regression diagnostics, instrumental variables, fixed and random effects, difference-in-difference analysis, regression discontinuity design, discrete choice models and limited dependent variables. The course is organised on a topic basis, with subjects chosen to illustrate particular theoretical, quantitative and methodological issues.

Teaching: 20 hours of seminars in the MT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures in the form of recorded live webinars. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students are expected to write one essay or equivalent pieces of written work.

Indicative reading: There is no mandatory textbook for this course, but the brief overview of quantitative methods during the first four weeks will follow:

- Wooldridge, J.M. (2009), *Introductory Econometrics: A Modern Approach*, International Student Edition.
- Useful background readings include:
- J.L. Van Zanden, *The Long Road to the Industrial Revolution: The European Economy in a Global Perspective, 1000-1800* (Leiden, 2009);
 - K.H. O'Rourke and J.G. Williamson, *Globalization and History: The Evolution of a Nineteenth-Century Atlantic Economy* (Cambridge MA, 1998);
 - C. Goldin and L.F. Katz, *The race between education and technology* (Cambridge, MA, 2008);
 - D. Greasley and L. Oxley (eds.), *Economics and History: Surveys in Cliometrics* (Oxford, 2011).6).

Assessment: Essay (100%, 5000 words).

EH427 Half Unit

Topics in Quantitative Analysis in Economic History

This information is for the 2020/21 session.

Teacher responsible: Dr Connson Locke NAB 4.16

Availability: This course is compulsory on the MSc in Quantitative Economic History. This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is not available as an outside option.

Pre-requisites: Students enrolled for this course are expected to have completed EH426 or the equivalent of undergraduate courses in econometrics and intermediate economic theory.

Course content: The course will provide an overview of quantitative approaches in economic history with a focus on time series data. The course will examine the use of quantitative methods through practical exercises and critical discussion of their application in recent literature. Techniques discussed will include filters, local projections, vector autoregressions, narrative identification, instrumental variables, textual analysis and principal components analysis.

Teaching: 20 hours of seminars in the LT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures in the form of recorded live webinars. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students are expected to prepare a group presentation and an individual essay.

Indicative reading:

- Stock and Watson, *Introduction to Econometrics* (2020)
- Wooldridge, *Introductory Econometrics: A Modern Approach* (2009)
- Organizational Dynamics, *Journal of Organizational Behaviour*
- Psychological Review
- Academy of Management Executive
- Organizational Behavior and Human Decision Processes
- Journal of Experimental Social Psychology
- Organizational Culture and Leadership

Assessment: Essay (100%, 5000 words) in the ST.

EH428 Half Unit Not available in 2020/21

History of Economics: Making Political Economy into a Social Science

This information is for the 2020/21 session.

Teacher responsible: Mr Patrick Wells

Availability: This course is available on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Economic History, MSc in Economic History (Research), MSc in Economics and Philosophy, MSc in Global Economic History (Erasmus Mundus), MSc in International and World History (LSE & Columbia), MSc in Philosophy of the Social Sciences and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course aim is to understand how the nature of economics changed from the verbally argued accounts of political economy and moral philosophy in the 18th century to become a technical social science by the end of the 20th century. The course will explore the long-term changes over two hundred

years in how economists came to know things about the economy by examining the history of their notion of the laws of economics, their analytical practices, and the evidence they used. Primary texts, chosen from a variety of European and American authors, will provide material for the study of these changes. Secondary literature will provide theoretical resources from history and philosophy of science to help analyse, understand and assess these changes in the nature of economics as a science.

Teaching: 20 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to write two essays or equivalent pieces of written work.

Indicative reading: The main domain of the course material is explained in "Economics" in T.M.Porter and D.Ross *The Cambridge History of Science*, Vol 7, *The Modern Social Sciences*, pp 275-305 (Cambridge University Press), while a key secondary text is Mary Morgan's "The world in the model: how economists work and think" (Cambridge University Press 2012).

A very readable introduction to the history of economics is Robert Heilbroner's "The Worldly Philosophers" (various editions, Penguin); a more detailed background text is Henry Spiegel's "The Growth of Economic Thought" (various editions, Duke University Press).

Full reading lists will be given out at the beginning of the course.

- Barr, N. (2012). *Economics of the Welfare State* (5th edition). Oxford: Oxford University Press
- Dees, G. (2012). "A Tale of Two Cultures: Charity, Problem Solving, and the Future of Social Entrepreneurship." *Journal of Business Ethics* 111(3): 321-334
- Eikenberry, A. (2009). "Refusing the Market: A Democratic Discourse for Voluntary and Nonprofit Organizations". *Nonprofit and Voluntary Sector Quarterly* 38(4): 582-596.
- Friedman, M. (1988). "The Social Responsibility of Business is to Increase Its Profits" in T. Donaldson, P. Werhane and M Cording (eds.), *Ethical Issues in Business: A Philosophical Approach*. Englewood Cliffs, N.J.: Prentice Hall. p.217-223

Assessment: Essay (100%, 5000 words) in the LT.

EH429 Half Unit

History of Economics: Ideas, Policy and Performativity

This information is for the 2020/21 session.

Teacher responsible: Professor Mary S. Morgan SAR 609

Availability: This course is available on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Economic History, MSc in Economic History (Research), MSc in Economics and Philosophy, MSc in Global Economic History (Erasmus Mundus), MSc in International and World History (LSE & Columbia), MSc in Philosophy of the Social Sciences and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students can take this course independently of EH428.

Course content: The course aim is to understand how economics has been used to change the world. It brings together the long tradition of analysis of economics as a policy science with more recent ideas about the performativity of economics. It draws on the literatures of economic history, history of economics, political economy and sociology of accounting and finance to explore the aims and methods used by economists to influence, shape and direct the economy. The focus of study will be on particular episodes from 20th century history in which economics features as a technical art (e.g. the transition from colonial to independent economies; the Soviet and Cuban revolutions; and the reconstruction of depressed and damaged economies).

Teaching: 20 hours of lectures in the LT.

This course is delivered through a combination of classes, lectures, and, if possible, archival visits, totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to write two essays or equivalent pieces of written work, and contribute reading notes to shared Moodle resources.

Indicative reading: Reading lists will be given out at the beginning of the course. Henry Spiegel's *The Growth of Economic Thought* (various editions, Duke University Press) provides a general background text to history of economics. T.M. Porter's *Trust in Numbers* (1995, Duke University Press) is an important item on the reading list that can be usefully read ahead of the course.

Assessment: Take-home assessment (100%) in the ST.

EH430

Monetary and Financial History

This information is for the 2020/21 session.

Teacher responsible: Dr Natacha Postel-Vinay SAR.6.13

Availability: This course is available on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no specific pre-requisites for this course. Nevertheless, some preliminary background in introductory macroeconomics and introductory statistics could be useful.

Course content: Where does money come from? How did financial markets first develop and integrate? What has been the impact of financial markets on economic development, growth, and business cycle fluctuations? When did financial crises first arise, and how did they develop in the twentieth century, up to the subprime and Euro crises of 2008-2015? This course offers an opportunity to delve into these questions and analyse the evolution of the role of money in Western economies over centuries, from the Middle Ages to the 2000s.

The first part of the course will allow students to acquire a broad overview of the origins of financial markets from 800 to the eve of World War 1. It will explore the creation of mints and central banks, the role of finance in processes of long-run growth such as the Industrial Revolution, how financial bubbles and banking panics first arose, and how financial markets integrated in the 19C with the Gold Standard. The second part of the course will start with a focus on the financial turmoil of the Great Depression, looking at the mechanisms leading to hyperinflation, bank failures, debt crises and capital flight on both sides of the Atlantic. It will then move on to analysing the evolution of financial institutions under Bretton Woods, sovereign debt crises, the 1990s bubbles, and the Great Recession in the US and in the Euro area. In the end, students will have a firm grasp of the evolution of financial markets

over centuries up until now.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures in the form of recorded live webinars.

This course includes a reading week in Week 6 of Michaelmas Term and week 6 of Lent Term.

Day 1

Day 2

Day 3

Day 4

Day 5

Formative coursework: Students are expected to write two essays or equivalent pieces of written work.

Indicative reading: Aliber, R., & Kindleberger, Charles P. (2015).

Assessment: Essay (50%, 5000 words) in the MT.

Essay (50%, 5000 words) in the LT.

EH446

Economic Development of East and Southeast Asia

This information is for the 2020/21 session.

Teacher responsible: Prof Kent Deng SAR 517

Availability: This course is available on the MRes/PhD in Quantitative Economic History, MSc in China in Comparative Perspective, MSc in Development Studies, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus), MSc in Global Politics, MSc in International and Asian History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no pre-requisites: knowledge of Asian history of the relevant period and region would be an advantage.

Course content: The course deals with the conditions and paths of economic development in East Asia (excluding Japan) and Southeast Asia in past centuries. The first part of the course looks at the debate on Asian economic history, including the effect of the availability of endowments, and the institutions, technology and economic structures that evolved independently in Asia to support a large population with reasonable standards of living. The second part of the course examines the reasons for the lack of indigenous modern growth in Asia, the conditions and timing of the 'growth miracle' of the Asian Tigers, ASEAN and Mainland China after World War Two, and the relationship to the growth of the world economy.

Topics covered include: traditional economic patterns in the region before the 17th century; the impact of the early European maritime traders; the impact of later Europeans traders backed by industrialisation; attempts and successes of Western colonisation; resistance to change from the core area in the East Asian Mainland; reforms and modernisation in Asia; Asia and globalisation.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour

of lectures in the ST.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

Formative coursework: Students are expected to write two essays or equivalent pieces of written work.

Indicative reading:

- A Booth, 'The Economic Development of Southeast Asia: 1870-1985' *Australian Economic History Review*, 31 (1);
- G Snooks et al *Exploring Southeast Asia's Economic Past* (1991);
- I Brown, *Economic Change in Southeast Asia* (1997);

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 3500 words).

EH452 Half Unit

Latin American Development and Economic History

This information is for the 2020/21 session.

Teacher responsible: Dr Alejandra Irigoin, SAR 611

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus), MSc in History of International Relations, MSc in International and World History (LSE & Columbia), MSc in Political Economy of Late Development and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will consider some of the major topics in the development and economic history of Latin America. The topics to be explored will be the role of geography, the environment and factor endowments, the role of institutions and policies, problems of taxation, spending and representation in the capacities of the state and constitutional and political developments in the 19th and 20th century, the protracted character of Latin America's inequality, the 'curse' from natural resources dependence, the macroeconomics of industrialization and the political economic nature of Latin American populism. Using reciprocal comparisons with the US, South East Asia, between Latin American countries, and across time the course will revisit the current interpretations of Latin American development in the long run and will frame the analysis of particular issues of policy-making of the present into the economic historical context.

Teaching: 20 hours of seminars in the LT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term.

This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students are required to write one essay or equivalent pieces of written work.

Indicative reading: V. Bulmer-Thomas, V (2014) *The economic history of Latin America since independence* 2nd ed Cambridge, Cambridge University Press. S. Edwards, 2010. *Left behind: Latin America and the false promise of populism*. Chicago:

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

EH454

Human Health in History

This information is for the 2020/21 session.

Teacher responsible: Dr Eric Schneider SAR.5.18 and Prof Patrick Wallis SAR.5.11

Availability: This course is available on the MRes/PhD in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

only

Course content: This course explores how human health has changed over time and tracks how the environment, society, public health infrastructure, medical practice and health systems have influenced health. The course begins with a survey of how health has changed from the Neolithic era onwards. Subsequent thematic sets of seminars study the following topics in more detail:

- Health in the pre-Industrial world including discussion of the Black Death and American slavery
- The epidemiological and health transition with weekly topics on the germ theory of disease, medical innovations, sanitation and the developmental origins of health
- The development of health systems from the early modern period to the present
- Combating epidemic disease with particular reference to smallpox, plague and AIDS
- The influence of health on society and the economy including topics on health and economic growth, gender disparities in health and morbidity

One of the focuses of the course will be critical engagement with the sources and methods that historians have used to reconstruct health history. Students will also complete a 5,000 word research paper based on primary sources or data on a health history topic as part of the summative assessment.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 1 hour of seminars in the ST.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

Formative coursework: Students will be expected to produce four essays or equivalent pieces of work. In MT this includes a group research project to prepare students for the individual research paper that forms part of the summative assessment.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%, 5000 words) in the LT.

The 5,000-word summative research project is an opportunity for students to conduct their own primary-source research into the history of health. Students can either use a primary source available as a dataset, or they can venture out to the archives to collect additional information as a basis for their project. The project must be historical (pre-1990) and cannot directly replicate studies in the literature using the same data. However, it can test another author's result using new sources or use the same sources to test a different question. The project can use quantitative or qualitative methods (or both) based on each student's preference.

permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines living standards from roughly the industrial revolution until the millenium through the prism of the British experience. The gradual move from subsistence agriculture to advanced industrial production was accompanied by a move towards urban living and radical demographic and social change, which transformed the lives of the population within a few generations. The population of Western economies experienced an exponential increase in average real incomes, which was driven by technical progress. This transformed the living standards of the majority of the population from bare subsistence to plenty, and was accompanied by a growing role for the state in providing for those excluded from the benefits of economic progress. Over the course of these three hundred years, the path of average incomes in Western countries also diverged from those in Asia, creating profound global imbalances in income and wealth.

The course is organised roughly chronologically, but within this, it concentrates on particular aspects of living standards that have proved most controversial within the existing literature; either because of an imperfect historical record, differences in method or approach, or sometimes because of ideological differences. This course will explore topics relating to: the transformation of work; the progress of average incomes; the distribution of income and wealth; changes in food consumption and nutrition; the relationship between demographic change and living standards; the transformation of the role of the state and the reasons for divergence in living standards across time and place. It will also explore the reasons why historians disagree about these topics.

Lecture 1: Introduction

Lecture 2: Finding a Job

Seminar 1:

Lecture 3: Day to Day Work

Seminar 2:

Lecture 4:

When at Work: Trading and Investment

Seminar 3:

Lecture 5: When at Work: Complying with the Rules

Seminar 4:

Seminar 5:

Teaching: 20 hours of seminars in the LT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term.

This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to complete two essays or equivalent pieces of work.

Indicative reading: Allen, Robert., *The British Industrial Revolution in Global Perspective* (Cambridge 2009). Assessment: Take-home assessment (90%) in the ST.

Class participation (10%) in the LT.

The online assessment for this course will be a Take Home Exam administered via Moodle. A review session will take place in Week 1 of the ST in preparation for this assessment. Assessment questions will be administered via Moodle in Week 2 of the ST.

EH457 Half Unit

Living Standards since the Industrial Revolution: The British experience c.1750-2000

This information is for the 2020/21 session.

Teacher responsible: Prof Ian Gazeley SAR 6.05

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with

Students will choose 2 of 8 questions. Answers to questions will be submitted in Week 5 of the ST.

EH463 Half Unit

The Long-Run Analysis of Firms and Industries

This information is for the 2020/21 session.

Teacher responsible: Dr Gerben Bakker SAR 509

Availability: This course is available on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MRes/PhD in Quantitative Economic History, MSc in Accounting, Organisations and Institutions, MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course comparatively explores the history of strategies, business organisations and industries since the nineteenth century. Different approaches to analyse this evolution are discussed, as well as the history of thinking about management and organisational structure and how this affected history itself. Introductory lecture(s) set the scene, discuss key concepts and various economic approaches to analyse the evolution of organisations. Subsequently the course looks at the origins of legal forms of organisation - such as the corporation, the private limited liability company and the cooperative - at the development of organisational structures, at the history of thinking about them, and at evolution of industries.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

This course is delivered through a series of seminars totalling 20 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual seminars and other online activities.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students are expected to write two essays or equivalent pieces of written work.

Indicative reading:

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

EH472 Half Unit

Essay in Quantitative Economic History

This information is for the 2020/21 session.

Teacher responsible: Prof Patrick Wallis

Availability: This course is compulsory on the MSc in Quantitative Economic History. This course is not available as an outside option.

Pre-requisites: No prerequisites.

Course content: The topic of the Essay is chosen by the students in close consultation with their supervisors. The purpose of the essay is to introduce students to the practice of historical research through the completion of a small, self-contained project that involves the use of quantitative methods in the analysis of historical change. It builds on competencies acquired in the core economic history and economics courses of the MSc. It must demonstrate the ability to formulate and motivate a research question, reflect adequate knowledge of the relevant literature in economic history and economics, make effective use of appropriate quantitative methods, and show critical capacity in the interpretation of the evidence and findings.

Part 1: Organisational culture: what is it, and why does it matter?

Part 2: Measuring organisational culture.

Part 3: Understanding and changing organisational culture.

Teaching: Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department (in the form of a document) and, individually, from their supervisors.

There will be several taught sessions in Michaelmas Term for all students on the programme in addition to meetings with supervisors during the course of the year.

Formative coursework: Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Lent Term (3) a one-page project summary and an extended draft by the end of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

Formative assessment 1.

Formative assessment 2.

Assessment: Essay (100%, 6000 words).

The essay should be no longer than 6,000 words, excluding tables, references and bibliography. Marks will be deducted for late submission or excessive length. The Essay counts for a half-unit in the four-unit MSc programme. The relevant marking criteria are set out in the Notes for Students.

EH473

Research Paper in Quantitative Economic History

This information is for the 2020/21 session.

Teacher responsible: Prof Patrick Wallis

Availability: This course is compulsory on the MRes/PhD in Quantitative Economic History. This course is not available as an outside option.

Course content: The Research Paper builds on the research training provided through the core courses of the MSc Quantitative Economic History and the MRes Quantitative Economic History, augmented by the optional economic history courses taken by students during the MRes. The topic of the Research Paper is chosen by the students in close consultation with their MRes supervisors who, normally, will be their prospective PhD supervisors. The Research Paper will present the results of an original enquiry into a clearly defined historical problem and use appropriate methods of quantitative analysis. It must demonstrate the ability to employ relevant concepts from economics and/or the wider social sciences effectively, an understanding of and critical engagement with the relevant economic history literature, an appreciation of the nature of historical explanation and analysis, and the ability to identify, collect and critically examine relevant quantitative information. Apart from it being an integral core component of the MRes programme, the Research Paper also serves as a first step towards the production of one of the three publishable papers envisaged for the students' prospective paper-based PhD thesis.

Teaching: Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department (in the form of a document) and, individually, from their supervisors. There will be several taught sessions in Michaelmas Term for all students on the programme in addition to meetings with supervisors during the course of the year.

Formative coursework: Students must submit a one page summary and a substantial draft for comment by the end of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

Indicative reading:

- Angrist, J.D., Pischke J-S. (2015). *Mastering 'Metrics: the Path from Cause to Effect*. Princeton: Princeton University Press.
- Gerber, A.S., Green, D.P. (2012). *Field Experiments: Design, Analysis, and Interpretation*. New York: Norton & Company.

- Mitchell, M.N. (2015). *Stata for the Behavioural Sciences*. College Station, TX: Stata Press.
- Burtless, G. (1995). The case for randomized field trials in economic and policy research. *Journal of Economic Perspectives*,

9(2), 63-84.

- Dolan, P., Galizzi, M.M. (2014). Getting policy-makers to listen to field experiments. *Oxford Review of Economic Policy*, 30(4), 725-752.
- Dolan, P., Galizzi, M.M. (2015). Like ripples on a pond: behavioural spillovers and their consequences for research and policy. *Journal of Economic Psychology*, 47, 1-16.
- Harrison, G.W., List, J.A. (2004). Field experiments. *Journal of Economic Literature*, XLII, 1009-1055.
- List, J.A. (2006). Field experiments: a bridge between the lab and naturally occurring data. *Advances in Economic Analysis and Policy*, 6, 8.

Assessment: Research project (100%).

The Research Paper should be no longer than 10,000 words, excluding tables, references and bibliography. Marks will be deducted for late submission or excessive length. The Research Paper counts for one full unit in the four-unit MRes programme. The relevant marking criteria are set out in the Notes for Students.

EH474

Research Prospectus

This information is for the 2020/21 session.

Teacher responsible: Prof Patrick Wallis SAR.5.11

Availability: This course is available on the MRes/PhD in Quantitative Economic History. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: The Research Prospectus is a detailed, c. 5,000 words long outline 'map' of the prospective PhD thesis. It serves to demonstrate the feasibility of the thesis and, in conjunction with the results achieved in the examinable components of the MRes programme (including the Research Paper), as an indicator of the student's readiness for further graduate work in economic history at PhD level. The Prospectus is non-examinable but subject to approval by a departmental board prior to progression into the PhD programme.

The Research Prospectus is expected (1) to set out the research questions and motivation of the three publishable papers students intend to produce in their prospective PhD thesis, (2) to demonstrate the thematic connections between the three papers, (3) to outline the conceptual/ theoretical frameworks and empirical approaches to be used, (4) to identify the main (data) sources to be exploited, and (5) to delineate the relevant historical and historiographical contexts of the thesis. Insights from the student's ongoing work on the Research Paper (EH473), as a first step towards the production of one of the three papers, are expected to inform the Research Prospectus.

Teaching: Students are expected to work on the Research Prospectus throughout the year and in close consultation with their supervisors who, normally, will be their prospective PhD supervisors.

Formative coursework: One optional mock policy exercise will be provided.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course

Assessment: The Research Prospectus is not formally assessed. However, it needs to be approved by the departmental Prospectus Review Board prior to progression to the PhD programme. Submission to the departmental Prospectus Review Board on a date in Summer Term to be confirmed.

EH476 Not available in 2020/21**The Economic History of War**

This information is for the 2020/21 session.

Teacher responsible: Prof Max-Stephan Schulze SAR 614

Availability: This course is available on the MRes/PhD in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research) and MSc in Global Economic History (Erasmus Mundus). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students enrolled on this course are expected to have completed the equivalent of undergraduate survey courses on European history. Knowledge of introductory undergraduate level economics is a distinct advantage.

Course content: This course explores the economic history of war(s) from the late Middle Ages to the 20th century within a comparative framework. Key themes examined include: long-term preparation for war - from bullionism to autarchy; state formation and deformation; organising warfare - from Renaissance condottiere to security firms; resource mobilisation - finance, material inputs, human capital; resource allocation - production and consumption; human and economic consequences of war; post-war reconstructions. The historical cases studied include the Hundred Years War, the Thirty Years War, the European wars of the 18th century, the Napoleonic Wars, the American Civil War, the First and Second World Wars.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There are no lectures on this course. Teaching will consist of 20 seminars of two-hours each in MT and LT; one revision session in LT. There will be pre-circulated papers for the seminars.

Students on this course will have a reading week in Week 6 of both MT and LT, in line with departmental policy.

Formative coursework: Three 2,000 word essays and one class presentation

Indicative reading: R. Bartlett, *The Making of Europe. Conquest, Colonization and Cultural Change, 950-1350* (1993). S. Broadberry, & M. Harrison, (eds) *The Economics of World War I* (2005). J. Brewer, *The sinews of Power: War, Money and the English State, 1688-1789* (1989). R. Chickering & S. Foerster (eds), *Great War, Total War* (2000). S. Foerster & J. Nagler (eds), *On the Road to Total War: The American Civil War and the German ars of Unification* (1997). D. Diamond, *Guns, Germs and Steel: The Fates of Human Societies* (1997). J.R. Hale, *War and Society in Renaissance Europe, 1450-1620* (1998). G. Hardach, *The First World War, 1914-18* (1977). M. Harrison (ed) *The Economics of World War II* (2000). A.S. Milward, *War, Economy and Society 1939-45* (1987). A. Offer, *The First World War. An Agrarian interpretation* (1989). K. O'Rourke, 'The worldwide economic impact of the French Revolutionary and Napoleonic Wars, 1793-1815', *Journal of Global History* (2006) 1, pp123-149. R. Overly, *Why the Allies Won* (2006). G. Parker, *The Military Revolution: Military Innovation and the Rise of the West, 1500-1800* (1996). D. Stevenson, *With Our Backs to the Wall: Victory and Defeat in 1918* (2011). D. Stevenson, *Armaments and the Coming of War: Europe, 1904-1914* (1996). H. Strachan, *Financing the First World War* (2004). A. Tooze, *Wages of Destruction* (2006).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

This course is compulsory for students at LSE for the first year of the MA Global Studies programme.

Pre-requisites: There are no formal pre-requisites, but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors if students haven't completed Empirical Methods for Public Policy (PP455E) and Economic Policy Analysis (PP440E).

Course content: The subject of the dissertation should relate broadly to one of the global history taught courses taken by the student. It should be either a critical survey of a well-defined problem in the literature, or a small self-contained research project using primary evidence. It must demonstrate adequate knowledge of appropriate literature in Global History and an ability to handle problems of evidence and explanation.

Teaching: Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department (in the form of a document) and, individually, from their supervisors.

There will be several taught sessions in Michaelmas Term for all students on the programme in addition to meetings with supervisors during the course of the year.

Formative coursework: Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Lent Term (3) a one-page project summary and an extended draft by the end of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Dissertation (100%, 6000 words) post-summer term. The dissertation should be no longer than 6,000 words, excluding tables, references and bibliography. Marks will be deducted for late submission or excessive length.

EH480**Research Dissertation in Global Economic History**

This information is for the 2020/21 session.

Teacher responsible: Prof Patrick Wallis SAR.5.11

Availability: This course is available on the MSc in Global Economic History (Erasmus Mundus). This course is not available as an outside option.

This course is compulsory for students at LSE for the second year of the MA Global Studies programme.

Pre-requisites: There are no pre-requisites for this course.

Course content: The dissertation should be an empirical study using primary source material to write on a topic in global history. The topic should relate broadly to one of the global history courses taken by the student.

Teaching: Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department (in the form of a document) and, individually, from their supervisors.

There will be several taught sessions in Michaelmas Term for all students on the programme in addition to meetings with supervisors during the course of the year.

Formative coursework: Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Lent Term (3) a one-page project summary and an extended draft by the end of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

Indicative reading: A full reading list will be distributed at the beginning of the course.

EH481 Half Unit

Economic Change in Global History: Approaches and Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Leigh Gardner SAR 507

Availability: This course is compulsory on the MSc in Global Economic History (Erasmus Mundus). This course is available on the CEMS Exchange and MBA Exchange. This course is available with permission as an outside option to students on other programmes where regulations permit. Students at LSE following the MSc Global Economic History (Erasmus Mundus) for the second year of the two-year programme are not required to take this course.

Pre-requisites: There are no formal pre-requisites, but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors if students haven't completed Empirical Methods for Public Policy (PP455E) and Economic Policy Analysis (PP440E) prior to this course.

Course content: The course provides an overview of the central themes and key theoretical questions in economic history and examines the ways in which economic historians collect, analyse and interpret evidence. Specific topics evolve to reflect recent research trends, but include a range of issues such as processes of economic development; culture and economic behaviour; the role of institutions; and welfare outcomes. The course approaches these topics by considering problems of knowledge and explanation in economic history, and introduces quantitative and qualitative approaches to obtaining, analysing, and interpreting evidence. Lectures pair conceptual and theoretical reviews with historical case studies illustrating applied research on these topics.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT. This course is delivered through a combination of classes and lectures (shared with EH401) totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students are expected to write one essay or equivalent pieces of written work during the term.

Indicative reading: D. North, *Institutions, Institutional Change and Economic Performance* (1990); A. Greif, *Institutions and the Path to the Modern Economy* (2006); K. Pomeranz, *The Great Divergence: China, Europe and the Making of the Modern World Economy* (2000); R. Allen, *The British Industrial Revolution in Global Perspective* (2009); D. Rodrik (Ed), *In Search of Prosperity* (2003); E. Helpman, *The Mystery of Economic Growth* (2004); T. Rawski (Ed), *Economics and the Historian* (1996); J. Tosh, *The Pursuit of History* (2nd Edition, 1991); D. Little, *Varieties of Social Explanation* (1991).

Assessment: Exam (90%, duration: 2 hours) in the January exam period. Class participation (10%) in the MT.

EH482

The Origins of the World Economy: Europe and Asia, 1000-1800

This information is for the 2020/21 session.

Teacher responsible: Dr Jordan Claridge SAR 505 and Prof Patrick Wallis SAR 511

Availability: This course is available on the MRes/PhD in

Quantitative Economic History, MSc in China in Comparative Perspective, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus), MSc in International and Asian History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no formal pre-requisites, but recommended advance readings will be distributed ahead of the course. Familiarity with the material covered in the EMPA/ EMPP Introduction to Statistics module is assumed.

Course content: This course surveys long-term processes of growth and development in pre-modern Europe and the wider world. Its central question is how and why economic performance differed between differently structured societies and across societies at the same point in time. The course raises fundamental questions about the nature of pre-industrial societies and economies and it critically examines the numerous theories put forward to explain long-run economic change.

First, it asks if stagnation and poverty were normal conditions in pre-industrial societies and growth an aberration. Were societies 'Malthusian', and what kind of growth and development did they experience? Second, it addresses debates over the timing and causes of Western economic growth and its connections with the region's expanding political and military power. Was British or European success from the 17th century the result of unique social, institutional, or cultural features? It focuses on the developments of markets and their integration, on the development of technology and on the extension of manufactory in a fundamentally agrarian world. Third, it explores the range of alternative development paths within Europe and in other regions of the world, such as premodern China and India, considering both regions' internal economic dynamics and the impact of interactions with European powers as contact grew over the course of the early modern period.

The course is not chronologically arranged but rather along core topics relevant in economic history. These are presented and discussed in an explicitly comparative way. Themes include: population, agriculture, technology, manufacturing, labour regimes, economic effects of legal, political, and constitutional structures; political economy; trade and market integration, money, finances and commercial institutions, and the causes and effects of the European expansion overseas.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

Formative coursework: Students are expected to write three essays or equivalent pieces of written work.

Indicative reading: J. Abu-Lughod, *Before European Hegemony: The World System*; A. G. Frank, *ReORIENT: Global Economy in the Asian Age* (1998); P. Limits of Globalization in the Early Modern World (2010); B Wong & J L. Rosenthal, *Before and Beyond Divergence* (2014)

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 3000 words) in the LT.

EH483

The Development and Integration of the World Economy in the 19th and 20th Centuries

This information is for the 2020/21 session.

Teacher responsible: Dr Natacha Postel-Vinay SAR 613

Availability: This course is available on the MRes/PhD in Quantitative Economic History, MSc in Accounting, Organisations and Institutions, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus), MSc in Global Politics and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.

Course content: This course aims to provide an overview of the development and integration of the world economy from 1800 to the present, giving an understanding of the origins of the challenges we face in the 21st century. The course raises fundamental questions about the sources of the unprecedented levels of economic growth in the last two centuries and the past and present challenges to economic development that have led to sharp divergences in income between countries and regions. The course explores the economic history at a global level, exploring developments in the western world as well as in Latin America, East and Southeast Asia, and Africa. Topics discussed will include fundamental transformations in economic experience, such as income and inequality, environmental change and the rise of population; sources of progress, such as technology, science, fiscal development; and explanations for divergent outcomes, for example human capital, economic policy, and management.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

Formative coursework: Students are expected to write three essays or equivalent pieces of work.

Indicative reading: Broadberry, S. and O'Rourke, K.H. (eds.) (2010), *The Cambridge Economic History of Modern Europe*; Acemoglu, D., and Robinson, J.A. (2006), *Economic origins of dictatorship and democracy*; Livi-Bacci, M. (2001), *A Concise History of World Population*; Broadberry, S.N. Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

EH486 Half Unit Not available in 2020/21

Shipping and Sea Power in Asian Waters, c 1600-1860

This information is for the 2020/21 session.

Teacher responsible: Prof Kent Deng SAR.5.17

Availability: This course is available on the MRes/PhD in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus), MSc in International and World History (LSE & Columbia) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.

Course content: This course examines the development of shipping, sea power and maritime-related industries in East and Southeast Asia, c1600-1860.

Topics include: Introduction to theories and models. Sailing conditions and sea routes in Asian waters. Strategic importance of Asian waters in the global sense. Development of shipping technology. Emergence of naval capacity. Function and pattern of long-distance trade; formation of regional markets and networks; linkages to the home economy. Migration. Investments and returns. Role of governments. Impact of modern capitalism. Regional hegemony. The context of the process and impact of globalisation in Asia.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

Taught during the LT. 10 weekly one hour lecture followed by one hour seminar in which student papers will be presented and discussed.

Formative coursework: Students are expected to write two essays or equivalent pieces of written work.

Indicative reading: K Bjork, 'The link that kept the Philippines Spanish: Mexican merchant interests and the Manila trade, 1571-1815' in *Journal of World History*, 1 (1998), 25B50; K N Chaudhuri, *The Trading World of Asia and the English East India Company* (1978); Gang Deng, *Chinese Maritime Activities and Socioeconomic Development c2100 b.c.-1900 a.d.* (1997); Gang Deng, *Maritime Sector, Institutions and Sea Power of Premodern China* (1999); D Flynn & A Giraldez, 'Born with a "Silver Spoon": World Trade's Origins in 1571' in *Journal of World History*, Vol6, No 2 (1995); Yen-P'ing Hao, *The Commercial Revolution in Nineteenth-Century China: The Rise of Sino-Western Mercantile Capitalism* (1986); Yen-P'ing Hao, *The Compradore in Nineteenth-Century China: Bridge between East and West* (1970); L Levathes, *When China Ruled the Seas: The Treasure Fleet of the Dragon Throne, 1405-1433* (1994); W Schurz, *The Manila Galleon* (1985: originally 1938); A So, *The South China Silk District: Local Transformation and World-System Theory* (1986); M Tampoe, *Maritime Trade between China and the West* (1989).

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2500 words).

EH496

Research Dissertation A: Contextualisation, Theory and Research Design

This information is for the 2020/21 session.

Teacher responsible: Prof Patrick Wallis SAR.5.11

Availability: This course is compulsory on the MSc in Economic History (Research). This course is not available as an outside option.

This course is taken in combination with EH497.

Pre-requisites: There are no pre-requisites for this course.

Course content: The dissertation must draw upon the research training provided through the core courses for the MSc (Research) and the generic courses taken by the student, and present the results of an original enquiry into a carefully defined problem. Students are expected to show an ability to draw on relevant social scientific concepts, an understanding of the advanced literature in one or more areas of economic history, and of the nature of historical explanation and analysis. Where appropriate, students are also expected to show the ability to use relevant quantitative techniques for data collection and analysis. The dissertation is intended as preparation for a research degree. Students expecting to continue on the MPhil/PhD programme within the Department may write their MSc dissertation on a different topic from that on which they plan to research at MPhil/PhD level.

Teaching: Co-taught with EH497.

Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department and, individually, from their supervisors. There will be several taught sessions in Michaelmas Term for all students on the programme in addition to meetings with supervisors during the course of the year.

Formative coursework: Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Lent Term (3) a presentation at a dissertation workshop; (4) a one-page project summary and an extended draft by the end of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

Indicative reading: Readings that are specific to project work will be distributed at the beginning of the course. Useful preliminary reading includes: Charles E. Lindblom and David K. Cohen, *Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979); Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989); Ray Pawson, *Evidence-based Policy: A Realist Perspective* (London: Sage, 2006); Office for Government Commerce *Common Causes of Project Failure* (London: OGC, 2004); *Strategy Survival Guide* (London: Prime Minister's Strategy Unit, July 2004); C. R. Cook, *Just Enough Project Management* (McGraw-Hill, 2004); J. E. McGrath and F. Tschan, *Dynamics in Groups and Teams: Groups as Complex Action Systems*, chapter three in M. S. Poole and A. H. Van de Ven (eds) *Handbook of Organizational Change and Innovation* (Oxford University Press, 2004).

Assessment: Dissertation (100%, 15000 words) post-summer term.

The final dissertation, is equivalent to two full modules (EH496 and EH497), and will be awarded two separate percentage marks. The first of these marks (EH496) will be based on the formulation of the dissertation topic, its historical and historiographical context (including critical literature survey), its creativity and originality, and overall presentation. The second mark (EH497) will relate to the student's research design and discussion of methods, their collection and evaluation of primary and secondary sources, and the quality of analysis of evidence and interpretation. The dissertation should not exceed 15,000 words, excluding tables, references and bibliography. Presentation must be in accordance with appropriate academic conventions as laid down in the MSc Handbook. Work that fails to meet appropriate academic standards of presentation, including English language, will be subject to a maximum deduction of 15% from the first percentage

mark. Marks will be deducted for late submission in accordance with the guidelines laid down in the MSc student handbook.

EH497

Research Dissertation B: Implementation, Analysis and Contribution

This information is for the 2020/21 session.

Teacher responsible: Prof Patrick Wallis SAR.5.11

Availability: This course is compulsory on the MSc in Economic History (Research). This course is not available as an outside option.

This course is taken in conjunction with EH496.

Pre-requisites: There are no pre-requisites for this course.

Course content: The dissertation must draw upon the research training provided through the core courses for the MSc (Research) and the generic courses taken by the student, and present the results of an original enquiry into a carefully defined problem. Students are expected to show an ability to draw on relevant social scientific concepts, an understanding of the advanced literature in one or more areas of economic history, and of the nature of historical explanation and analysis. Where appropriate, students are also expected to show the ability to use relevant quantitative techniques for data collection and analysis. The dissertation is intended as preparation for a research degree. Work that fails to meet appropriate academic standards of presentation, including English language, will be subject to a maximum deduction of 15% from the first percentage mark. Marks will be deducted for late submission in accordance with the guidelines laid down in the MSc student handbook.

EH498 Half Unit Dissertation

This information is for the 2020/21 session.

Teacher responsible: Prof Patrick Wallis SAR.5.11

Availability: This course is available on the MSc in Economic History and MSc in Political Economy of Late Development. This course is not available as an outside option.

This course is the default dissertation option for students following the MSc Economic History and the MSc Political Economy of Late Development. Students wishing to write a full-unit (10,000 word) dissertation may, with the approval of their academic adviser, request to take EH499 and fewer optional courses.

Pre-requisites: There are no pre-requisites for this course.

Course content: The subject of the dissertation should relate broadly to one of the economic history taught courses taken by the student. It should be either a critical survey of a well-defined problem in the literature, or a small self-contained research project using primary evidence. It must demonstrate adequate knowledge of appropriate literature in Economic History and an ability to handle problems of evidence and explanation.

Students on the MSc in Political Economy of Late Development are encouraged to consider topics that relate to themes in development, but are still required to develop a clear historical perspective within their analysis.

Teaching: Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department and, individually, from their supervisors. There will be several taught sessions in Michaelmas Term for all students on the programme in addition to meetings with supervisors during the course of the year.

Formative coursework: Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Lent Term (3) a one-page project summary and an extended draft by the end of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.

Assessment: Dissertation (100%, 6000 words) post-summer term. The dissertation should be no longer than 6,000 words, excluding tables, references and bibliography. Marks will be deducted for late submission or excessive length.

EH499 Research Dissertation

This information is for the 2020/21 session.

Teacher responsible: Prof Patrick Wallis SAR.5.11

Availability: This course is available on the MSc in Economic History and MSc in Political Economy of Late Development. This course is not available as an outside option.

Students following MSc Economic History or MSc Political Economy of Late Development may, with the permission of their academic adviser, request to take this full-unit dissertation course in place of EH498. Requests must be received, and approved, before the end of Michaelmas Term.

Pre-requisites: There are no pre-requisites for this course.

Course content: The dissertation should be an empirical study using primary source material to write on a topic of economic history. The topic should relate broadly to one of the economic history courses taken.

Students on the MSc in Political Economy of Late Development are encouraged to consider topics that relate to themes in development, but are still required to develop a clear historical perspective within their analysis.

Teaching: Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department

and, individually, from their supervisors. There will be several taught sessions in Michaelmas Term for all students on the programme in addition to meetings with supervisors during the course of the year.

Formative coursework: Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Lent Term (3) a one-page project summary and an extended draft by the end of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.

Assessment: Dissertation (100%, 10000 words) post-summer term.

The dissertation should not exceed 10,000 words, excluding tables, references, and bibliography. The title must be approved in advance by the student's supervisor. Marks will be deducted for late submission or excessive length.

EU409 Basic Economic Concepts for European Political Economy

This information is for the 2020/21 session.

Teacher responsible: Dr Angelo Martelli CBG.6.04

Availability: This course is available on the MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option. Students from other programmes within the European Institute can also follow the course. This course is for students with little economic background.

Pre-requisites: There are no pre-requisites for this course.

Course content: This is a Moodle-based course offering a series of reading material and study guides on some basic economics concepts and theory that are relevant to discussions concerning the political economy of Europe that students will come across in their other courses during their MSc degree. The course is not assessed and there is no formal instruction. Students are encouraged to work in teams and to develop discussions on Moodle- which will be partially moderated by the Course Convenor. The material is designed so as to be accessible to students with no previous knowledge of economics but students with some basic economics knowledge will also benefit from it. Example topics include: current account and budget deficits ("twin deficits"), inflation and unemployment ("Phillips Curve"), trade liberalisation and tariffs ("gains from trade"), competitiveness and unit labour costs ("internal devaluation"), and others.

Teaching: This is a Moodle-based course with no formal teaching. Students can arrange one-to-one sessions with the Course Convenor during Feedback Sessions/Office Hours. Depending on student demand, a limited number of 'EU409 Surgeries' can be arranged.

Formative coursework: One mock policy exercise will be offered.

Indicative reading: J Stiglitz & J Driffill, Economics, Norton, 2000 (or later editions); P Krugman & M Obstfeld, International Economics, Addison Wesley, 2003.

Assessment: There is no examination for this course.

EU410 Interdisciplinary Research Methods and Design

This information is for the 2020/21 session.

Teacher responsible: Dr Angelo Martelli, CBG.6.04

Availability: This course is compulsory on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Political Economy of Europe

and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available on the MSc in International Migration and Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: This series of workshops and lectures offers an introduction to research methods and design for all students taking masters degrees in the European Institute. Themes discussed include: methods in the social sciences and in the humanities; common problems of research design; advice on writing coursework essays and dissertations; advice on critical reading and interpretation of texts; the logic of comparative case-studies; comparative research and an introduction to quantitative methods and data sources. Each session will consist of short lecture elements followed by group work in which students with their different backgrounds help each other to solve specific problems of research design.

Teaching: This course is delivered via online and/or in-person teaching totalling a minimum of 10 hours spread across the Michaelmas and Lent Terms. This course includes a reading week in Week 6 of the Michaelmas and Lent Terms.

Formative coursework: One mock policy exercise will be offered.

Indicative reading: Bob Hancké, *Intelligent Research Design: A guide for beginning researchers in the social sciences*, Oxford UP 2009.

Assessment: There is no examination for this course.

EU421 Half Unit

Policy-Making in the European Union

This information is for the 2020/21 session.

Teacher responsible: Dr Eiko Thielemann CBG 7.02

Availability: This course is compulsory on the MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Environmental Policy and Regulation, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in Media and Communications (Media and Communications Governance), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A solid knowledge of the role and functions of EU institutions is required.

Course content: This course offers the theoretically informed study of the EU policy-making across a selection of key issue areas. The principal aim of the course is to provide a detailed knowledge of how national and EU institutions interact in European policy making. To achieve this, the course starts with a short summary of the actors and institutions governing the process of EU policy-making. The main part of the course analyses the evolving role of the EU and its policy-making dynamics in key policy areas such as the single market, regional policies, agricultural and environmental policies, immigration and asylum policies, social and employment policies, economic and monetary policies.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if a School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Lent Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: Students will be expected to submit two formative essays.

Indicative reading: H Wallace, M Pollack, & A Young, *Policy-Making in the European Union*; S Hix & B. Hoyland, *The Political System of the European Union*; M Pollack, *The Engines of Integration: Delegation, Agency and Agenda Setting in the European Union*; J J Richardson & S Mazey, *European Union: Power and Policy-making*.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU425 Half Unit Not available in 2020/21

Interest Representation and Economic Policy-Making in Europe

This information is for the 2020/21 session.

Teacher responsible: Dr Robert Hancke CBG 6.02

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no formal pre-requisites but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors.

Course content: The focus of this course is on the representation of interests in Europe, and their role in Economic policy-making. Students will analyse the main theoretical issues and selected empirical questions on how interests are differently organised across countries and at the EU level, on the interplay between interest representation and electoral politics, and on the policy outcome after interest intermediation. The objective is to understand the dynamics of economic policy-making in comparative perspective, with an emphasis on the globalisation period.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One presentation per student and one 1,500 word essay.

Indicative reading: Olson, M. (1982) *The Rise and Decline of Nations: economic growth, stagflation, and social rigidities*. New Haven, London, Yale University Press; Dahl, R. A. (1989) *Democracy and Its Critics*. New Haven and London Yale University Press. Chapter 20, pp.280-298; Bouwen, P. (2004) "Exchanging access goods for access. A comparative study of business lobbying in the European Union institutions." *European Journal of Political Research*, 43: 337-369; Streeck, W. and Schmitter, P. Assessment: Essay (25%, 2500 words) in the LT.

Online assessment (75%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

- 6,000 word policy paper

EU430 Half Unit

Europeanization: The Comparative Politics of Domestic Change

This information is for the 2020/21 session.

Teacher responsible: Prof Kevin Featherstone CBG 5.04

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines the effect of European Union membership on member states' policies, institutions and societies. The consequences of EU membership, as well as how and why we experience membership differently across our national political systems are increasingly important elements of the debate about the future of Europe. Crises of legitimacy, capability, and impact have been identified. Following this lead, this course evaluates the influence of European integration on member states, highlighting differences between policy mechanisms and sectors; institutional capacities and settings; and political (party and electoral) behaviour. The discussion and analysis is framed by the notion of 'Europeanization', to consider the linkages between the European and national levels.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 22.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures and student presentations, flipped lectures (online discussion of weekly topics) and in-person and online seminars. This course includes a reading week in Week 6 of the Michaelmas Term.

Formative coursework: Students will be expected to produce one formative essay (2000 words) and a presentation in the MT.

Indicative reading:

- Graziano, P. and Vink, M.P. (eds) (2006) Europeanization: New Research Agendas, Palgrave Macmillan;
- Exadaktylos, Claudio M. Radaelli (2012) Research Design in European Studies: Establishing Causality in Europeanization Palgrave;

- F. Schimmelfennig and U. Sedelmeier (eds) (2005) The Europeanization of Central and Eastern Europe, Ithaca: Cornell University Press.

Assessment: Project (100%, 5000 words) in the LT.

The summative assessment is a policy project (100%, 5000 words) due in the LT.

EU432 Half Unit

The Philosophy of Europe

This information is for the 2020/21 session.

Teacher responsible: Prof Simon Glendinning CBG 7.01

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: None

Course content: In this course we will read and discuss texts that draw the history of Europe into relation with philosophy. In its most classical form the assertion of this relation belongs to an understanding of Europe's history as inseparable from the project of a life predicated on reason. Europe, insofar as its cultural identity is caught up with the Greek ideal of scientific rationality, is not simply the place where philosophy was first elaborated and developed. On the contrary, Europe first arises as a place only in and through the elaboration and development of philosophy. Of course, philosophy is, historically speaking, a European phenomenon - although one which concerns above all the question, in principle open to anyone, of what it is to be a human being as such. Equally, however, Europe is itself a philosophical phenomenon - its identity inseparable from the idea of a project that concerns rational animality as such, and hence humanity as a whole.

The idea that Europe has a world-wide significance in virtue of its relation to philosophical thought is strikingly expressed in Kant's prediction of "a great political body of the future" emerging in Europe, a kind of league of nations, that will probably "legislate" - that is, at least serve as a guiding example - for all humanity. Indeed, the global "cosmopolitan existence" posited by Kant as the final end of world history is not just a philosopher's idea of humanity's collective political destiny: the very idea of a global human community is essentially philosophical. On this view, the (particular) history of the peoples of "our continent" has a relation to the (universal) destiny - the liberation or emancipation - of humanity world-wide. This is not simply because of the hegemonic political and economic ambitions of imperialist Europeans, but the world-wide movement of a cosmopolitan and humanist culture. Starting with Kant's classic essay on "Idea for a Universal History

with a Cosmopolitan Purpose" we will turn to the way in which Europe is understood and elaborated within the post-Kantian tradition: in Hegel, Marx, Husserl, Valéry, Berlin, Fukuyama, and Derrida.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Michaelmas Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: Two essays of 2,000 words each

Indicative reading: Immanuel Kant 'Idea of Universal History with a Cosmopolitan Purpose', in Political Writings; Edmund Husserl 'The Vienna Lecture', in The Crisis of European Sciences and Transcendental Phenomenology; Paul Valéry, in History and Politics; Jacques Derrida, 'Of the Humanities and the Philosophical Discipline. The right to philosophy from the cosmopolitical point of view (the example of an international institution)' (online).

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU437 Half Unit Europe Beyond Modernity

This information is for the 2020/21 session.

Teacher responsible: Prof Simon Glendinning CBG 7.01

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in International Relations (Research), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Social Anthropology (Religion in the Contemporary World) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course engages with the deepest roots and fundamental trajectory of the contemporary European world as identified by three major thinkers of the nineteenth and twentieth centuries: Nietzsche, Heidegger and Derrida. Taking up and problematising the claim made by Emmanuel Levinas that "Europe is the Bible and the Greeks", the course explores the idea that Europe today is a cultural and political movement in deconstruction, a movement beyond its own modern self-understanding which might be summarised by Nietzsche's madman's pronouncement of the death of God. As Derrida, a leading theorist of this conception puts it, "one should, more prudently, say "Greek, Christian and beyond" to conceive the formation of the contemporary European heritage. This suggestion not only makes it possible to acknowledge many other important cultural sources in this heritage (Judaic and Islamic at the very least) but also, and above all, directs us towards what, in Nietzsche's wake, can be identified as "the passage beyond" - the movement in which the European tradition "tends of itself to break with itself". There is no suggestion that the heritage and future of Europe are disconnected in this "passage beyond", and none of the authors explored in this course seek to reject the European heritage or want simply to destroy it. On the contrary, and always in its name, the attempt is made in their writings to effect a renewal of the European world which could propel it in a new direction beyond Enlightenment modernity. The key themes in this renewal will be explored in relation to a "beyond modernity" condition becoming visible in philosophy, politics, technology and religion.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if School closure demands it, online) virtual seminars. This course includes a reading week in Week 6 of the Lent Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: Two 2,000 word essays; seminar presentation.

Indicative reading:

- Friedrich Nietzsche, Beyond Good and Evil
- Martin Heidegger, The Question Concerning Technology
- Jacques Derrida, "Faith and Knowledge" in Religion (eds Derrida and Vattimo)
- Robert Pippin, Modernism as a Philosophical Problem.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU439 Half Unit Not available in 2020/21 Political and Fiscal Integration and Disintegration in EU Member States

This information is for the 2020/21 session.

Teacher responsible: Dr Joan Costa-Font

Availability: This course is available on the MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science and Political Economy and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: With the expansion of processes of economic integration and disintegration in the European Union the traditional economic role of the state requires redefinition. Monolithic states progressively become more flexible structures to respond to constituents demands. This is especially the case of those policy areas that are highly relevant for European citizens such as language, culture and welfare. This course draws upon new political economy and social economics theories to study the design of formal and informal institutions in European Union member states and the European Union as a whole. Given that the European Union is progressively evolving towards some unique form of federalism, the course discusses how theories of political and fiscal federalism, constitutional political economy as well as new social economics can help to understand and inform the process. The course covers the design of both fiscal and political decentralisation process with a European perspective, and particularly it examines inter-jurisdictional competition between different levels of government and its role in giving rise to 'institutional convergence' with European Union member states. It covers the constitutional design of the European Union and the effects of European integration on the design of the welfare state. Finally, it examines the economics design of informal institutions including the economics of 'language', 'culture', 'ideas', and finally 'identity', to study the presence of 'cultural' convergence in the European Union.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two essays of up to 1,500 words each

Indicative reading: Albert Breton (1996) *Competitive Governments. An Economic Theory of Politics and Public Finance*, New York: Cambridge University Press). Alesina, Alberto, Guido Tabellini, and Francesco Trebbi. "Is Europe an optimal political area?." *Brookings Papers on Economic Activity* (2017): 169-214.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

EU440 Half Unit Not available in 2020/21

The Balkans in Europe: Transition, Democratisation, Integration

This information is for the 2020/21 session.

Teacher responsible: Dr Spyridon Economides CBG 5.03 and Dr Vassilis Monastiriotis CBG 5.05

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

Course content: An examination of South East Europe from a politics, political economy and international relations perspective, with particular emphasis on post-1989 developments. Topics include: The Balkans in Europe and Historical Legacies; the Dissolution of Yugoslavia; The Western Balkans and economic transition; the EU and the Balkans: regionalism and economic integration; Democratisation, state-building and Europeanisation in the Western Balkans; Conditionality and the mechanics of accession; the SEE2020 strategy and the structural reforms agenda; the Balkans and other external actors.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One 1,500 word essay and one group policy document review

Indicative reading:

- M. Todorova, *Imagining the Balkans*, Oxford University Press, 1997;
- M. Glenny, *Balkans 1804-1999. Nationalism, War and the Great Powers*, Granta Publishers, 1999;

- *Stuck in Transition?*, Transition Report 2013, European Bank for

Reconstruction and Development, London.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

EU443 Half Unit

European Models of Capitalism

This information is for the 2020/21 session.

Teacher responsible: Dr Abigail Innes CBG.6.03

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in China in Comparative Perspective, MSc in Global Politics, MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on the MSc in Global Politics who wish to take this course must seek approval from the teachers responsible.

Students are required to obtain permission from the teaching department to take this course.

Course content: The course consists of three parts. In the first part we will discuss the basic arguments and methodological considerations of the *Varieties of Capitalism* literature and conduct a comparative analysis of the core issue areas in the political economy of contemporary capitalism: how capital, labour and product markets are structured. The second part will build on these thematic treatments to discuss the structure of and dynamics of the main Western, Southern and Central European models of capitalism. In the final part of the course we consider the various critiques of *Varieties of Capitalism* theory and distinguish VOC from the other main theories of comparative capitalism. We close the course with an application of competing theories of comparative capitalism to the key developmental challenge of our time: climate change.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across the Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Michaelmas Term.

Formative coursework: Students will write a short, 500 word essay every week on a key concept as part of a small group, and the same group will also prepare a presentation on their preferred topic to be presented either online or in person when their week 'arrives'. Students will also develop their summative essay plan with the teacher late in Michaelmas term and early in Lent term

Indicative reading: Peter A Hall & David Soskice (Eds), *Varieties of Capitalism: The Institutional Foundations of Competitiveness*. Oxford University Press, 2001; Hancké, Bob, Martin Rhodes and Mark Thatcher (eds.) 2007. *Beyond Varieties of Capitalism: Conflict, contradiction and complementarities in the European Economy*. (Oxford UP 2007) (henceforth HRT); Crouch, Colin, *Capitalist Diversity and Change*, Oxford University Press, 2005; Hancké, Bob (ed.), 2009, *Debating Varieties of Capitalism: A Reader*, Oxford UP. Wolfgang Streeck, (2011) *E Pluribus Unum? Varieties and Commonalities of Capitalism*, MPIfG Discussion Paper No. 10/12; Natasha van der Zwan (2014) *Making sense of financialization*, *Socio Economic Review*, 12: 99-129; Kathleen Thelen, (2014) *Varieties of Liberalization and the New Politics of Social Solidarity*, Cambridge University Press; Colin Hay (2019) *Does Capitalism Still Come in Varieties?* *Review of International Political Economy*, Volume 27, 2020.

Assessment: Essay (100%, 5000 words) in the LT.1 A presentation to the project team and LSE Cities staff, which counts for 20% of the total mark.

2 A group project report not exceeding 5,000 words, which will count for 80% of the final grade.160160

3 Additionally, each group member must write a personal reflection on their contribution in no more than 600 words, and should include specific details of the student's contributions to the project.

EU446 Half Unit

The Political Economy of European Monetary Integration

This information is for the 2020/21 session.

Teacher responsible: Prof Paul De Grauwe CBG 6.12

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science and Political Economy and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A basic understanding of macroeconomics is essential, which is why the auditing of the EU409 Moodle course is highly recommended.

Course content: The purpose of this course is to analyse the process of European monetary integration and its implications for the institutions of economic governance in the EU. There will be a strong emphasis on using the experience of the financial and economic crises since 2008 and the COVID-19 pandemic as sources of evidence to assess both the performance of EMU and the theories about monetary integration. We consider the political and economic rationale for the establishment of EMU. We study the theory of optimal currency areas and its relevance today. In particular, we study the incomplete nature of the Eurozone and how this incompleteness is a source of instability. Indicative questions addressed in this course include: how and why did the EU develop the EMU project? Did economic theories prepare us for the Euro area crisis of 2010-12? What are the challenges for member states in adjusting to the discipline of the 'Euro-zone'? How does the Euro affect the ability of member states to adjust to periods of crisis and to external shocks, in particular to a shock such as the COVID-19 pandemic? Is the sovereign debt crisis of 2010 indicative of imbalances within the EU and basic flaws in its institutional design? What are the collective action problems that explain the incompleteness of the monetary union? What is the role of the ECB in this process? Is a fiscal union necessary to make a monetary union sustainable in the long run?

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person and/or virtual seminars. This course includes a reading week in Week 6 of the Michaelmas Term.

Formative coursework: One 2,000-word essay and one group essay of up to 3,000 words.

Indicative reading: Paul De Grauwe (2020) *The Economics of Monetary Union* (Oxford University Press, 13th ed.); Kenneth Dyson and Kevin Featherstone (1999) *The Road to Maastricht*, OUP; Waltraud Schelkle (2017) *The Political Economy of Monetary Solidarity, Understanding the Euro Experiment*, Oxford University

Press; Special issue (2006): 'Economic Governance in EMU Revisited', *Journal of Common Market Studies* vol.44, No.4 (November); Jean Pisani-Ferry (2014) *The Euro Crisis and Its Aftermath*, Oxford University Press.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU447 Half Unit

Democracy, Ideology and the European State

This information is for the 2020/21 session.

Teacher responsible: Prof Jonathan White CBG 7.09

Availability: This course is available on the MSc in Comparative Politics, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European Studies (Research), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course investigates various ways in which the State's authority to act has been underpinned in Europe, both ideologically and institutionally, in the modern period. It looks at how the State has been used to give expression to the democratic principle, and the ways this has been undermined or rejected. The module aims to provide students with a deep analytical understanding of the changing role of the State in European society. There will be three parts: A) Theorising the political (including sessions on: the State; collective self-rule and the liberal-democratic compromise; ideology, public opinion and the idea of democracy), B) Democracy in post-War Europe (parties and the structuring of political conflict; the emergence and crisis of the Welfare State; 1968, 1989 and the rediscovery of 'civil society'), and C) Contemporary European trends (ideological convergence and the politics of risk and security; political participation and populism; the challenge of transnational integration: 'governance', 'output legitimacy' and the diffusion of State power). The course will conclude with an overview on possible trajectories to come, under the heading 'post-ideological, post-democratic and post-statal? - Europe today and beyond'.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 22.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded remarks, in-person (or, if a School closure demands it, online) workshops, and online seminars. This course includes a reading week in Week 6 of the Michaelmas Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: One 2,000 word unassessed essay

Indicative reading: Quentin Skinner (1989) 'The State', in Ball and Hanson (eds.) *Political Innovation and Conceptual Change*; Peter Wagner (2008) *Modernity as Experience and Interpretation*; James Tully (2002) 'The Unfreedom of the Moderns', *Modern Law Review* 63; Margaret Canovan (2005) *The People*; Michael Freeden (1996) *Ideologies and Political Theory*; Claus Offe (1996) *Modernity and the State: East and West*; Chantal Mouffe (2005) *On the Political*; Frank Furedi (2005) *Politics of Fear: Beyond Left and Right*; Nina Eliasoph (1998) *Avoiding Politics*; Peter Mair (2006), 'Ruling the Void? The Hollowing of Western Democracy', *New Left Review* 42; Jonathan White (2019), *Politics of Last Resort: Governing by Emergency in the European Union* (Oxford UP).

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete

the answers to questions and upload their responses back into Moodle.

EU449 Half Unit Not available in 2020/21

Emerging Markets, Political Transition and Economic Development in Central and Eastern Europe

This information is for the 2020/21 session.

Teacher responsible: Dr Abigail Innes CBG 6.03

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Science and Political Economy. This course is not available as an outside option.

Pre-requisites: EU409 Basic Economic Concepts for European Political Economy or equivalent.

Course content: This course applies concepts of political economy, economics and political science to its investigation of Central and Eastern Europe's development from post-communist transition, through EU accession to their condition as highly open, FDI-dependent markets within the European Single Market. Placing the region in the comparative context of both the EU15 and comparable emerging markets, the course investigates the ongoing challenges of political and institutional consolidation and the developmental consequences of the liberalization and the consumption and FDI-led growth model of the 1990s/2000s. The course examines the emerging strengths and persistent weaknesses of these political economies and considers their implications for the region's emerging varieties of capitalism, relative international competitiveness and political stability. It also considers the comparative political economy of the 'middle income trap', corruption and nationalist populism. The lectures aim to provide analytical frameworks and an overview of the major research findings and debates about systemic transformation, the influence of EU accession and the difficulties of consolidating democratic capitalism in open emerging markets in a globalised world. The seminars link key concepts with the empirical evidence arising from comparable cases.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One 1500 word essay

Indicative reading:

- Hilary Appell and Mitchell Orenstein, (2018) *From Triumph to Crisis: Neoliberal economic Reform in Postcommunist Countries*, Cambridge University Press;
- Jan Drahekoupil and Martin Myant (eds.) (2015) *Transition Economies after 2008: Responses to the Crisis in Russia and Eastern Europe*, Routledge.
- Rachel Epstein (2017) *Banking on Markets: The Transformation of Bank-State Ties in Europe and Beyond*, Oxford University Press;
- Nick Barr (ed.) (2005) *Labor Markets and Social Policy in Central and Eastern Europe: The Accession and Beyond*, Washington DC: The World Bank;
- Dorothee Bohle and Bela Greskovits (2012) *Capitalist Diversity on Europe's Periphery*, Ithaca: Cornell University Press;
- Hilary Appel (2011) *Tax Politics in Eastern Europe: Globalisation, Regional Integration and the Democratic Compromise*, Ann Arbor: The University of Michigan Press;
- H. Grabbe (2006); Alfred Stepan and Juan Linz (1996) *Problems of Democratic Transition and Consolidation: Southern Europe, South America and Post-Communist Europe*, London: Johns

Hopkins University Press;

- Anna Grzymala-Busse (2007) *Rebuilding Leviathan: Party Competition and State Exploitation in Post-Communist Democracies*, Cambridge, New York: Cambridge University Press;
- Stephen Haggard and Robert R. Kaufmann, (2008) *Development, Democracy and Welfare States: Latin America, East Asia and Eastern Europe*, Princeton: Princeton University Press.
- Michael Ellman (2015) *Socialist Planning*, Cambridge University Press;
- J Kornai (1992) *The Socialist System: The Political Economy of Communism*, Princeton University Press. Journals often cited: *East European Politics and Society*, *Journal of Democracy*, *Economics of Transition* and *Europe-Asia Studies*.

The reading list above is intended to encourage students to explore a few texts that they feel will inspire them, rather than to feel obliged to somehow complete all of them before arrival (too much!). These are relevant texts for the whole course and we will visit individual chapters in many of them as the course proceeds. The most useful background/preparatory reading that interested students can undertake for this course is to familiarise yourselves with the diverse historical political and economic developments of individual countries in the region from the communist era to the present day. This preparation will deepen the empirical knowledge you can deploy to critically judge the comparative theory with which the course then engages. In this respect Tony Judt's 'Postwar' is a particularly engaging text and Judt was unusual for writing with a deep knowledge of both Western and Central Europe alike.

Assessment: Essay (25%, 2000 words) in the LT.

Online assessment (75%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU450

Engaging with Europe: Professional Skills

This information is for the 2020/21 session.

Teacher responsible: Dr Mareike Kleine CBG 6.07

Availability: This course is compulsory on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available on the MSc in International Migration and Public Policy and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is not available as an outside option.

Course content: This innovative programme introduces European Institute students to professional skills for a successful career that engages with Europe. The course consists of a number of workshops, seminar series and interactive simulations from which students can choose. The aim of the course is that European Institute students leave LSE with a competitive CV and connections with alumni and professionals.

Teaching: EU450 sessions are offered in both the Michaelmas and Lent Terms and will typically be held online. The teaching format and hours for each session will vary across the different workshops and seminars on offer. Details about how to sign up for a place on sessions of interest will be sent to students' LSE email accounts on a rolling basis throughout the Michaelmas and Lent Terms.

Students are not required to attend all workshops and seminars on offer. Students only need to attend those sessions for which they have signed up to attend and for which they have received a

confirmed place.

Formative coursework: Formative work will vary based on the workshops attended.

Assessment: There is no examination for this course. Students will qualify for a certificate of participation for some workshops upon completion of formative work.

EU453 Half Unit

The Political Economy of European Welfare States

This information is for the 2020/21 session.

Teacher responsible: Prof Waltraud Schelkle CBG 6.01

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science and Political Economy and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: None

Course content: The aim of the course is to apply concepts of economics and political economy to social policies in European welfare states. The lectures establish the theoretical context, summarise the findings of quantitative case studies and discuss European experiences in the context of broader international experience. The seminars will further develop political-economic concepts, such as market and government failure, and apply them to qualitative case studies of welfare state arrangements in member states, considering in particular the role of social policy legislation and coordination at the EU level. The course will provide students with the conceptual and empirical background to enable them to answer questions such as: What does economic theory and political economy tell us about the design of welfare states? How do social policies in European welfare states reconcile equity and efficiency? What drives or stalls reform dynamics in member states? Is the EU gradually developing into a social union, through international mobility and the portability of social entitlements?

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if a School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Lent Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: One individual formative essay of 2,000 words.

Indicative reading:

- Barr, N. (2020) *The Economics of the Welfare State*, 6th ed., Oxford: Oxford UP;
- Pierson P. (ed) (2001) *The New Politics of the Welfare State*, Oxford: Oxford University Press

Assessment: Essay (25%, 2000 words) in the LT.

Online assessment (75%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU455 Half Unit

Concepts in Political Economy

This information is for the 2020/21 session.

Teacher responsible: Prof Waltraud Schelkle CBG 6.01

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MPhil/PhD in European Studies, MSc in European Studies (Research), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The aim of the course is to engage students with relevant concepts in political economy and their main applications in European studies. The course will anchor the degree in historical and current debates about the nature of political economy, the role of institutions and the pros and cons of different methodological approaches taken by political economists. The aim of the lectures is to outline key political economy concepts and their theoretical background while the seminars explore the uses and limits of the respective concepts through the systematic analysis of relevant research papers.

This course is particularly recommended for students who wish to pursue a research path in political economy, but also for those who have no background in political science and therefore not familiar with conceptual debate. EU455 is also one of the three core course options for the MSc Political Economy of Europe, two of which must be chosen.

Among the topics covered are: concepts and theories in political economy; the role of ideas, interests and institutions; the tension between democracy and capitalism; rational choice versus behavioural political economy; two-level games; delegation to independent agents; accountability and legitimacy in policy-making; veto players and joint-decision traps; representation and partisanship.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if a School closure demands it, online) seminars. This course includes a reading week in Week 6 of Michaelmas Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: One formative essay of 1,200 words on any seminar question. Another essay of 1,500 words will consist of the analysis of the research paper that is presented in class.

Indicative reading: Caporaso, J and Levine, D (1992) *Theories of Political Economy*, Cambridge; Olson, M (2000) *The Rise and Decline of Nations*, London: Yale University Press.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU457 Half Unit

Culture and Security in Global Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Jennifer Jackson Preece CBG 7.05

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Global

Politics, MSc in Human Rights, MSc in Human Rights and Politics and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit. This is a capped course. Students are required to obtain permission from the teaching department to take this course

Course content: This course will explore the relationship between culture and (in)security with a particular focus on the (in)security dilemmas of minorities and migrants within a world of nation-states. In so doing, our discussion will draw upon a variety of theoretical perspectives, including (de)securitization, ontological (in)security, human security, critical terrorism studies, postcolonial and feminist security studies.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 22.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded remarks and student presentations, flipped lectures (online discussion of weekly topics) and in-person and/or online seminars. This course includes a reading week in Week 6 of the Michaelmas Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: Essay (2000 words) due in MT

Indicative reading:

- Z. Bauman, *Wasted Lives: Modernity and Its Outcasts*, 2003;
- B. Buzan, O. Weaver and J. de Wilde, *Security: A New Framework For Analysis*, 1998;
- J. Jackson-Preece, *Minority Rights: Between Diversity and Community*, 2005;
- W. Kymlicka, *Multicultural Odysseys: Navigating the New International Politics of Diversity*, 2009;
- J. Mayall, *Nationalism and International Society*, 1990.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU458 Half Unit

Public Policy and Cultural Narratives in a Global Europe

This information is for the 2020/21 session.

Teacher responsible: Dr Jennifer Jackson Preece CBG 7.05

Availability: This course is available on the MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

This is a capped course. Students are required to obtain permission from the teaching department to take this course.

Course content: This course is concerned with cultural and identity politics in contemporary states. Taking a narrative approach, this course will examine competing representations of minorities and migrants. Europe will be a major focus. Nevertheless, students with interests and expertise outside of Europe should feel free to include this wider perspective in their seminar discussions and assignments.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 22.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded remarks and student presentations, flipped lectures (online discussion of weekly topics) and in-person and/or online seminars. This course includes a reading week in Week 6 of the Lent Term. A review session will be held at the start of the Summer Term to prepare for the online

assessment.

Formative coursework: Students are required to submit an essay (2000 words) in the LT.

Indicative reading:

- Z. Bauman, *Wasted Lives: Modernity and Its Outcasts*, 2003;
- B. Buzan, O. Weaver and J. de Wilde, *Security: A New Framework For Analysis*, 1998;
- J. Jackson-Preece, *Minority Rights: Between Diversity and Community*, 2005;
- W. Kymlicka, *Multicultural Citizenship*, 1995;
- C. K. Riessman, *Narrative Methods for the Human Sciences*, 2008;
- G. Rose, *Visual Methodologies: An Introduction to Researching With Visual Materials*, 2012.

A more detailed reading list is available from Dr Jackson-Preece.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU464 Half Unit

International Migration: EU Policies and Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Eiko Thielemann CBG 7.02

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

This is a capped course. Students are required to obtain permission from the teaching department to take this course.

Pre-requisites: A good knowledge of EU institutions and EU policy-making is required.

Course content: This course examines the management of 'unwanted migration' to Europe. In particular, it deals with the European Union's governance of migratory flows such as asylum seekers and irregular migrants whose immigration states often seek to prevent or discourage. As the willingness of sovereign states to advance global governance in the area of immigration policy remains very low and unilateral national policy-responses are limited in their effectiveness, interest in regional governance has grown. The European Union is without any doubt the front-runner in developing such regional governance initiatives. The course provides an in-depth treatment of the origins, evolution and major policy issues within this policy field which has been the fastest growing EU policy area since the 1990s. The course will normally focus on the following three policy areas: (1) the emerging EU asylum and refugee determination system; (2) border management, detention and deportation; and (3) responsibility allocation (the 'Dublin system'), burden-sharing and solidarity. Those taking the course will learn how to systematically examine the origins and impact of EU policy instruments and judgments by the European Courts. After completion, students will be able to answer questions such as: Why have Member States intensified cooperating on asylum and immigration issues? What is the relationship between international human rights law and EU law? Given the influence of the EU's supranational institutions, do the Member States still effectively control policies on asylum and immigration? Has EU policy-making lead to a convergence of "lowest common denominator" policies or to higher human rights standards in the Member States?

For their assessment, students will have the opportunity to

conduct a policy case-study, allowing them to apply the analytical skills developed in this course to analyse a specific EU immigration policy of their choice.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person and/or virtual seminars. This course includes a reading week in Week 6 of the Lent Term.

Formative coursework: A prospectus for the assessed research project (policy case study).

Indicative reading:

- Zaun N. (2019) *EU Asylum Policies: The Power of Strong Regulating States*, Palgrave;
- Chetail V. and P. De Bruycker (2016) (eds.), *Reforming the Common European Asylum System: The New European Refugee Law*, Brill;
- Peers, S (2016) *EU Justice and Home Affairs Law*, Oxford University Press;
- Geddes A and Boswell C (2010) *Migration and Mobility in the European Union*, Palgrave/Macmillan;
- Geddes A. (2008) *Immigration and European integration: Towards fortress Europe*, Manchester University Press;
- Thielemann E R (ed.) (2003) "European Burden-Sharing and Forced Migration", special issue of the *Journal of Refugee Studies*, Vol.16, No.3.

Assessment: Project (100%, 5000 words) in the ST.

The summative assessment takes the form of a research project (policy case study).

EU467 Half Unit

The Political Economy of the Neoliberal State

This information is for the 2020/21 session.

Teacher responsible: Dr Abigail Innes CBG 6.03

Availability: This course is available on the MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course offers a political economic account of the neoliberal state. It offers critical analysis of the supply-side revolution of the last forty years – the tendency towards the strong marketization of the state – that has characterised not just strongly neoliberal advanced capitalist economies such as the UK but also, increasingly, those such as Sweden we traditionally think of as social democratic. The course begins by looking at how 'the state' is currently understood (and indeed, somewhat neglected) in comparative political economy in theory. The course then establishes the historical and analytical context in which orthodoxy around the 'optimal' role of the state in the political economy shifted: thus we look at the turn from the mixed market and Weberian states of the post-war era through to rise of neoliberalism.

Moving to the intellectual foundations of the supply-side revolution we explore the roots of reform in deductive 'public choice theory'. From a normative political theory point of view these arguments have strongly utopian qualities and to investigate these we examine the idea of the state in neoclassical economics and specifically, in the public choice analyses of state failure, and the idealised economic constitution. Given the highly utopian qualities of these arguments we then compare these operating assumptions and goals with those of Marxism Leninism: the other closed system ontology of the economy in twentieth century political economic thought. Marxism Leninism is a body of theory shares remarkable intellectual affinities with neoliberalism, from the dependence on hyper-rationality in the model for human motivation to the idealisation of a post-state utopia; from the

assumptions of a blueprint that is good for all time and places to the asserted 'automaticity' of the political economy in the post-revolutionary world. In demonstrating the common teleology of revolutionary completion and an idealised constitution the reforms of the last forty years are placed in comparative intellectual context.

The second half of the course is constituted by a theoretical and practical evaluation of supply-side reforms within the UK. This evaluates the logic of reform in the state's main functions in the political economy: welfare, regulation and the management of future public risk. The course offers a consistent methodology for this analysis: it contrasts the 'first best world' economics of the supply-side agenda with the 'second-best world' economic theory that comes from critical neoclassical economics and the more holistic rational choice institutionalism of political economy, but also from the critical political economy of Soviet Communism. One of the historical ironies of the supply-side revolution is that it not only shares conceptual and ideological affinities with Marxism Leninism but in practical terms it also replicates a remarkable number of the pathologies of the Soviet planning system, from the central planning of private enterprises (via public sector outsourcing) to the dependence on quantification, metrics, target-setting and performance measurement and a rejection of relational, pluralist, tacit-knowledge based systems of government and organisation. The course closes by considering the political-system consequences of state transformation and indeed, policy and state failure.

The findings of the course hold clear implications for emerging markets and less developed economies, where these reforms are also increasingly on the agenda, and where they pose particular risks.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Lent Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.

Students write a short (1500 word) formative essay during the term, submitted within two weeks of their class presentation, and this is purely to enable the student to receive feedback on their understanding of the subject matter but also on their essay writing technique more generally. This means that students receive due preparatory help for the later summative work, which is also essay based.

Assessment: Online assessment (100%) in the ST.

Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU468 Half Unit

The Political Economy of Migration and Spatial Inequality in Europe

This information is for the 2020/21 session.

Teacher responsible: Dr Angelo Martelli, CBG.6.04

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A basic understanding of economics and economic terms is highly recommended. Students who never had any teaching in economics should take the online Moodle Course EU409, and speak to the course convener.

Course content: This course on the Political Economy of Migration and Spatial Inequality is divided into three main sections. In the first part we rely on the main models used to explain the migration decision and explore what are the main economic effects of migration and its welfare state nexus. Subsequently we investigate the role played by public opinion and attitudes in the configuration of migration policies and support for redistribution. In the last part, we take up topical debates in the political economy of spatial inequality. From the rural-urban gap and the patterns of social mobility to the role of informality and insecurity. A G20 Simulation and the final two lectures on the need for a global migration response and climate-induced displacement will conclude the course. The course would deepen students' understanding of the role played by migration and spatial inequality in different phases of European integration and policy-making.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person and/or virtual seminars. This course includes a reading week in Week 6 of the Lent Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

In addition to standard lectures and seminars, there will be a simulation of G-20 negotiations on migration near the end of LT, played over 2.5 hours. The simulation will see students working in teams to represent the interests of particular nations and international organisations involved in global migration governance. Students will be asked to tackle a major topic, and will have the opportunity to practice agenda setting. The final goal is a Master Document consisting of a set of statements on which the caucus votes one by one. To prepare for this game, students will be given detailed instructions early in the term, so that they have time to prepare.

Formative coursework: Students will be expected to produce 1 presentation and 1 short formative essay (1500 words).

Assessment: Essay (25%, 1500 words) in the period between LT and ST.

Online assessment (75%) in the ST.

EU469 Half Unit

The Political Economy of Finance in Europe

This information is for the 2020/21 session.

Teacher responsible: Prof Waltraud Schelkle CBG 6.01

Availability: This course is available on the MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A basic understanding of economics and economic terms is highly recommended. Students who never had any teaching in economics should consult the online course EU409 and talk to the course convener.

Course content: In the first half, the course gives students insights into the post-war evolution of finance, its regulation and its relationship to the other sectors of the economy. The historical evolution, continuities and innovations, will be explored in a comparative perspective. In the second half, we take up topical debates in the political economy of finance literature. Two questions run through the course: first, how does the international experience differ from or resonate with discernible trends in European countries and the experience of European integration? And how do non-financial actors (governments, transnational firms, middle-class households) support the rise of finance even though the risks involved are not well understood and hard to manage? The course would deepen students' understanding of the core courses in the Political Economy of Europe by making them aware of the role that finance played in different phases of post-war history and in European integration.

Teaching:

- This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if a School closure demands it, online) seminars.
- This course includes a reading week in Week 6 of Michaelmas Term.
- We do a simulation of G-20 negotiations on financial regulation in week 10, which has been successfully tried and tested before with MPA students. Using the report of the G20 Eminent Persons Group report on Global Financial Governance – Making the Global Financial Systems Work for All – the simulation will see students working in teams to represent the interests of particular nations and international organisations involved in global financial governance.
- A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: Students will be expected to produce one (1200 word) essay in the MT.

Students must write up two 500 word answers to a question that follows from the lecture in the MT.

Indicative reading:

- Abdelal, Ravi (2007). Capital rules. The construction of global finance. Cambridge, MA and London, England: Harvard University Press
- Epstein, Rachel A. (2017). Banking on markets: the transformation of bank-state ties in Europe and beyond Oxford: Oxford University Press

Assessment: Online assessment (100%) in the ST.

EU475 Half Unit Not available in 2020/21 Religious Diversity and Conflict in Europe

This information is for the 2020/21 session.

Teacher responsible: TBD

Availability: This course is available on the MSc in Comparative Politics, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Empires, Colonialism and Globalisation, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in History of International Relations, MSc in International Migration and Public Policy, MSc in Social Anthropology (Religion in the Contemporary World) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Europe has never been homogenous, but it is increasingly more so heterogenous religiously, ethnically, and culturally since the World War II. We will start by discussing the making and transformation of the concepts of religion and nation in modern times. We will then talk about the importance of imperial encounter in the creation of world religions and also in post-colonial nationalisms and fundamentalisms. We will then discuss how religions became nationalized and move on to the discussion of religious qualities of nationalism and the concept of civil religion. We will discuss how religious diversity is dealt with in different countries in and around Europe such as Germany, France, U.K, Turkey, Israel, India, and Russia. Students will have a chance to discuss the concepts we explored in class in the context of a country of their choice.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Weekly response papers to readings. One 15 minute presentation during the term - possibly with another student.

500 word summary of the final essay

Indicative reading:

Assessment: Essay (100%, 5000 words) in the ST.

Students will write an essay on a topic determined together with the instructor.

EU476 Half Unit Not available in 2020/21 Politics of Memory: Germany, France, UK and Turkey

This information is for the 2020/21 session.

Teacher responsible: TBD

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in History of International Relations, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: None

Course content: Political and social actors frequently mobilize memory to make claims about the present. All nations and groups have memories that make them proud and others they have learned lessons from and sometimes others they deny. What kinds of memories show influence bottom up and what kinds of memories are top down? How are some memories commemorated and how are some of them silenced? What is the role of memories in making identities and also resolving conflicts? What is the best way to remember atrocities? To whom do memories and responsibility belong? This course will give an overview of the literature on politics of memory and discuss how politics of imperial, national, post-colonial, and other alternative memories compete with each other with specific references to Germany, France, U.K. and Turkey.

Teaching: 10 hours of lectures and 15 hours of classes in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework:

- Abstract and outline for essay (no longer than 500 words) 160 in MT

Indicative reading: In addition to weekly readings, the following sources are likely to enhance the benefits derived from the course: Maurice Halbwachs On Collective Memory; Esra Ozyurek Nostalgia for the Modern; Paul Gilroy Postcolonial Melancholia; Alaine Assman Cultural Memory and Western Civilization; Michael Rothberg Multidirectional Memory; James Young The Texture of Memory.

Assessment: Essay (100%, 5000 words) in the LT.

Students will write an essay on the topic they choose together with the instructor.

EU477 Half Unit Not available in 2020/21

Labour Markets and the Political Economy of Employment in Europe

This information is for the 2020/21 session.

Teacher responsible: Dr Vassilis Monastiriotis CBG 5.05

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science and Political Economy, MSc in The Global Political Economy of China and Europe (LSE and Fudan) and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A solid background in economics and knowledge of some basic calculus is required. Attendance of EU409 'Basic Economic Concepts for Political Economy' is highly recommended irrespective of background.

Course content: The course offers an analytical treatment of key labour market issues, from unemployment and wage determination to skill formation and labour market regulation, within the context of processes of integration and governance in Europe. To do so, it combines a Labour Economics perspective on imperfect labour markets with a Political Economy perspective on EU institutions and policies. In the lectures, we address analytically policy-making questions on topics such as minimum wages, unions and collective bargaining, unemployment benefits, employment protection legislation, regulation of working hours, migration, and others. These topics are then linked in the seminars to the European policy-making context, and the challenges that this raises for labour market regulation and performance at the national and European levels. Examples of this include: EMU, optimum currency area theory, wage flexibility and internal devaluation; structural unemployment, labour market reforms, the European Employment Strategy and flexicurity; skills shortages, activation policies, European education policy and labour mobility; and others.

Teaching: 10 hours of lectures, 15 hours of seminars and 2 hours of workshops in the LT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST.

The course will have 10 1-hour lectures and 1.5-hour seminars in weeks 1-5 and 7-11. In week 6 students will make poster presentations on a preliminary draft of their group essay.

Formative coursework: Students will be expected to produce 6 problem sets and 2 other pieces of coursework in the LT and 1 presentation in the Week 6.

Formative assessment comprises a weekly set of problem sets / exercises; brief oral presentations on pre-allocated readings in the seminars; a poster presentation on a group project during the week-6 workshop; and submission of a draft / extended outline of the group project (following the poster presentation).

Indicative reading:

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%, 4000 words) in the period between LT and ST.

One group project (50% of the final mark; approx. 4,000 words, excluding tables and appendices), due after the LT, and a two-hour exam in the ST (50% of the final mark, comprising one essay question and five short-answer questions).

EU478 Half Unit

The Culture of European Politics

This information is for the 2020/21 session.

Teacher responsible: Prof Simon Glendinning CBG.7.01

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Social Anthropology (Religion in the Contemporary World) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Over the last three hundred years European societies have undergone a fundamental changeover from a traditional form, with a largely self-sufficient agrarian economy, into a modern, industrial and technological form based on international trade and tele-communication. This revolution developed in the seventeenth century first and only in Europe, but today, through processes of globalization that are, in some parts of the world, inseparable from colonialism, it has spread worldwide and increasingly dominates the entire planet. This course explores one of the basic dimensions of this unprecedented globalization: the culture of European politics.

We are used to speaking about globalization as a political-economic phenomenon, but its European origin makes it also an unavoidably cultural one. Europe's predominant cultural form – its double form, both Christian and secular – is not a neutral set-up, and other world cultures can find themselves alienated from and in revolt against everything that belongs to what might be called the Christianizing of the world, whether the forces in play are colonial, commercial, or ideological. International migrations and projects of European integration sharpen these concerns and add new ones. This is the background to our study of the culture of European politics, its history and heritage from ancient European empires, to the European Union and beyond.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if a School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Lent Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: 2 essays of 2000 words

Indicative reading:

- Norman Davies, 'Introduction' to *Europe: A History*
- Anthony Pagden (ed) *The Idea of Europe*
- Roger Scruton, *The West and the Rest*.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU481 Half Unit**The Future: Political Responses to a Challenge**

This information is for the 2020/21 session.

Teacher responsible: Prof Jonathan White CBG 7.09

Availability: This course is available on the MSc in Comparative Politics, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Global Politics, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Sociology and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The future is unknowable, but it can be made intelligible. It raises practical and conceptual problems, as well as reasons for conflict, but also promises to resolve contradictions. This course examines how the future is conceptualised in salient domains of contemporary politics, the implications arising for theory and practice, and the contestable assumptions on which perspectives rely. It investigates the methods by which the future is ordered, anticipated, and factored into the practice of government. The course begins historically, looking at the future as an emerging theme in eighteenth-century European Enlightenment thought, the socio-cultural developments that prompted this, and some of the key features of its thematisation in the high-modern period. It goes on to examine future-oriented ideas, ideologies and practices as they arise in contemporary settings. Sessions move through the following themes: The Birth of the Future: Utopias in place and time; Sovereignty of the Living? Constitutional and political horizons; Socialism and the Future; Capitalism and the Future; In the Shadow of War; Debt, Accounting and other Practices of Quantification; Globalising and Privatising the Future: Climate change and generationalism; Planning for Emergency: Anticipation, pre-emption and preparation; In the Age of Algorithms and Tech; Democratising the Future. The course should provide students with a cross-disciplinary grasp of how present-day public affairs are shaped by the ways the future is conceived and acted upon.

Teaching: This course is delivered through a combination of seminars and lectures. This year, some or all of this teaching will be delivered through a combination of recorded remarks, in-person (or, if a School closure demands it, online) workshops, and online seminars, totalling a minimum of 22.5 hours across Lent Term. This course includes a reading week in Week 6 of the Lent Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework:

- One 2000-word essay, written in response to two of eight questions. This timed assessment will be administered via Moodle.
- A class presentation, on which students will receive one-to-one feedback.

Indicative reading:

- Nowotny, H. (2016), *The Cunning of Uncertainty* (Cambridge: Polity).
- Adam, B. & C. Groves (2007), *Future Matters: Action, Knowledge, Ethics* (Leiden: Brill).

Assessment: Online assessment (100%) in the ST.

EU482 Half Unit**Europe in World Trade**

This information is for the 2020/21 session.

Teacher responsible: Dr Johann Basedow CBG 6.11

Availability: This course is available on the MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: After decades of globalisation and trade liberalisation, the world economy faces significant protectionist challenges. The global Covid-19 pandemic, the spread of populism and the US-China trade war put considerable pressure on global value chains, the international trade regime and global governance. The purpose of this course is to provide students with the necessary knowledge to understand and analyse the EU's role in the global economy and evolving international trade regime. It familiarises students with the workings of EU trade and foreign economic policy and the World Trade Organisation. It further introduces students to different substantive trade domains including goods and services trade, trade defence instruments, the diffusion of free trade agreements, investment regulation and investor-to-state dispute settlement as well as sources of regulatory power in world markets. It also dwells on the implications of the rise of new economic powers such as China and India for EU trade and foreign economic policy and the World Trade Organisation.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or if a School closure should demand it online) seminars. This course includes a reading week in Week 6 of the Lent Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: Students will be expected to produce 1 presentation and 1 essay in the LT.

Indicative reading:

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU484 Half Unit

Europe's Role in Global Migration Governance

This information is for the 2020/21 session.

Teacher responsible: Dr Natascha Zaun CBG 6.08

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides an overview of Europe's role in global migration governance. The course will address different aspects in this regard, including the externalisation of EU and European Member States' migration policies, bilateral and multilateral agreements with third countries, cross-references between regional bodies of integration as well as regional/international courts and Europe's cooperation with international organisations such as the International Organization for Migration (IOM) and the United Nations High Commissioner for Refugees (UNHCR). Students will be equipped with a variety of theories to analytically assess these areas of European activity, including theoretical frameworks such as venue-shopping, diffusion and securitisation.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person and/or virtual seminars. This course includes a reading week in Week 6 of the Michaelmas Term. A review session will be held at the start of the Summer Term to prepare for the online assessment."

Formative coursework: Formative coursework consists in regular (i.e. weekly) participation in the Moodle debate and the submission of one mock exam (answering two out of eight questions) in the MT.

Indicative reading:

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU485 Half Unit

Post-Conflict Justice and Reconciliation in Europe and Beyond

This information is for the 2020/21 session.

Teacher responsible: Dr Denisa Kostovicova CBG 7.03

Availability: This course is available on the MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po) and MSc in Gender, Peace and Security. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The pursuit of justice in the aftermath of mass atrocity and gross human rights violations has become a norm in a globalised post-Cold War world. It rests on the premise that states and societies ought to engage with the difficult past in order to transition from conflict to peace. Provisions including redress for human rights violations have now become the staple of peace-agreements, whether through retributive instruments such as war crimes trials or restorative instruments such as truth commissions and reparations. However, scholars and practitioners have simultaneously been confronted with the limitations of transitional justice. Instead of promoting peace and reconciliation, it has often had the opposite impact: it has further divided ethnic communities, distorted the truth about suffering, and traumatised rather than dignified the victims. With a focus on Europe's contribution to global transitional justice norm and policy, this course examines how the pursuit of post-conflict justice is theorised and tackles the puzzle of its unintended effects on peace-building in post-conflict societies.

The course starts out by introducing transitional justice as a field study and practice, with a focus on the nature of contemporary violence to contextualise human rights violations for which justice is sought. The first part of the course relates the emergence of a global norm of transitional justice to the lessons from Europe's history, such as the legacies of the Nuremberg Trials and Germany's coming to terms with the Holocaust. The second part of the course is a comparative assessment of three key mechanisms of transitional justice: international trials, truth and reconciliation commissions, and lustration, with empirical examples from Europe and beyond. The third part addresses transitional justice as public policy with a focus on the European Union. In conclusion, the course addresses the question how we know and study the effects of transitional justice, and reflects critically on theorising, methods and data in transitional justice research.

The course engages with multi-disciplinary literature and approaches to transitional justice which have defined the

emergence of this new field of study. The course provides a critical evaluation of theories of transitional justice and draws implications for policy making.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures and student presentations, flipped lectures (online discussion of lecture materials), and in-person (or, if a School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Michaelmas Term.

The course will provide or mediate additional learning opportunities, such as research seminars on topics directly linked to the theme(s) covered in the course. These will serve to reinforce learning objectives by creating an opportunity for students to engage with core issues outside regular classes.

Formative coursework: Students will be expected to produce 1 exercise, 1 presentation and 1 essay in the MT.

Indicative reading:

Assessment: Essay (100%, 5000 words) in the LT.

EU486 Half Unit

Imaging Violence, Imagining Europe

This information is for the 2020/21 session.

Teacher responsible: Dr Eray Cayli CBG 7.11

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe and MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Since the late 18th century, a growing body of European cultural production has focused on raising awareness about suffering by aestheticizing it. How has this production shaped customary understandings of the relationship between violence and culture and, in so doing, imagined Europe and Europeanness? Specifically, how has it informed widespread understandings of violence and culture being mutually antithetical,

and imaginations of Europe and Europeanness premised upon this antithesis? What are the critical responses with which these understandings and imaginaries have been met, and how might they be entangled in the very object of their criticism due to their approach to the relations between power, ethics, and aesthetics? This course explores these questions through contemporary artistic practice, focusing especially on its responses to colonialism, racism, imperialism, patriarchy, and Anthropocene(s). The teaching format comprises seminars, requiring everyone to show up having read the weekly texts, having reflected on them and having prepared to discuss them at length during the seminar. As and when relevant and logistically possible, seminars may involve visits to museums and galleries in London.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 22.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures and student presentations, flipped lectures (online discussion of weekly topics) and in-person and online seminars. This course includes a reading week in Week 6 of the Lent Term.

Formative coursework: The formative component of coursework comprises the following:

- a research question and long abstract in preparation for essays, submitted at the end of reading week;
 - a new and improved research question and long abstract in preparation for essays, presented orally and in person the final week of term.
- In addition to the above, students are required to come to class every week having read the weekly texts and prepared to discuss them at length.

Assessment: Essay (100%, 5000 words) in the ST.

EU487 Half Unit

European Integration from a Global Governance Perspective

This information is for the 2020/21 session.

Teacher responsible: Dr Mareike Kleine CBG 6.07

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students who have little or no background in political science, international relations, public policy or related disciplines are strongly advised to take the EU4V9 Moodle course.

Course content: Distances on a world scale are shrinking through the emergence and thickening of networks of connection – a process commonly referred to as globalization. The process is far from complete, with Europe being highly integrated and other regions lagging behind. This course engages recent positive and normative scholarship in various disciplines on governance in and beyond Europe. Putting European integration in this global and comparative perspective promises to illuminate current public and scholarly debates about nature and future of European integration. We study these questions by posing four issues: the nature of globalization; its actors, institutions and processes; the form and scope of governance; and its normative implications. For each of these themes, European integration will serve as the principal case study to be discussed in light of developments in the rest of the world. The course will give students a conceptual and thematic overview of European integration as a phenomenon of global governance. There will be no descriptive introduction to specific global governance institutions or policy fields. Instead, the course revolves around current public and academic debates about European integration and global governance that are discussed from a political science and political economy vantage point, while also engaging recent positive and normative scholarship in Comparative Politics and Political Theory.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person and/or virtual seminars. This course includes a reading week in Week 6 of the Lent Term.

Formative coursework: Students are required to submit a draft and a final non-assessed research paper outline in the LT.

Indicative reading:

- Keohane, Robert O., Andrew Moravcsik, and Anne-Marie Slaughter. 2000. Legalized Dispute Resolution: Interstate and Transnational. *International Organization* 54 (3): 457-488.

Assessment: Essay (85%, 4000 words) in the ST. Critical evaluation (15%) in the LT.

The summative assessment consists of one 500-word critical summary of one session's required readings in light of a current news item. In addition, students submit by the beginning of the following term a 4,000 words research essay. Deadlines to be confirmed in class.

EU488 Half Unit

European Policy-Making and International Cooperation

This information is for the 2020/21 session.

Teacher responsible: Dr Mareike Kleine CBG 6.07

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in

Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students who have little or no background in political science, international relations, public policy or related disciplines are strongly advised to take the EU4V9 Moodle course.

Course content: This course is an introduction to the causes and nature of regional integration in Europe and the EU's governance system. The topic is presented from a historical, social scientific and normative perspective. We critically examine various theories and current debates about the European Union by studying the process of regional integration through different decades and crises, its effects on its members and third states, and its constitutional character. The first part of this course analyzes different stages in the integration process and asks under what conditions states have delegated (or not) authority to EU institutions and other regional integration bodies. The second part discusses a number of big public policy questions that this transfer of authority raises. What are the consequences of the single market and currency on national institutions? What is their impact on other markets and currencies? How does the EU enforce its laws and how does its legal system compare with the legalization of world politics? What is the EU's role and power in world politics? We conclude by reflecting on current and future challenges to the EU, notably questions of its legitimacy, democratic quality and the populist challenge. At the end of this course students will have gained an overview of the process of European integration, political science theories of regional integration, the EU's governance system as a political order beyond the nation-state, as well as public and scholarly debates about the reality and ideal of European regional integration.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person and/or virtual seminars. This course includes a reading week in Week 6 of the Michaelmas Term

Formative coursework: Students are required to submit a draft and a final non-assessed research paper outline in the MT. Deadline to be confirmed in class.

Assessment: Essay (85%, 4000 words) and critical evaluation (15%) in the LT.

The summative assessment consists of one 500-word critical summary of one session's required readings in light of a current news item. In addition, students submit by the beginning of the following term a 4,000 words research essay. Deadlines to be confirmed in class.

EU489 Half Unit

Analytical Politics and Policymaking in Europe

This information is for the 2020/21 session.

Teacher responsible: Prof Christopher Anderson CBG 6.05

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course introduces students to governance in Europe at the national and European Union levels. This course has two objectives, one substantive and one methodological. First, students learn about politics and policymaking in European democracies and the European Union. Topics include the demand for and supply of policy options: e.g., public policy preferences, government formation and duration, direct democracy and accountability, and supranational policy coordination. Second, this course is intended to introduce students to a set of analytical and empirical tools and concepts for understanding how political institutions and political agents jointly generate public policy, and to apply these tools in examining political and policy outcomes in European states. Lessons about political decision making, institutions, and the policy making process will be understood from the perspective of decision makers – that is, an individual or organisation that develops strategy in order to advance policy change. The course runs for the Lent Term.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person and/or virtual seminars. This course includes a reading week in Week 6 of the Lent Term. A review session will be held at the start of the Summer Term to prepare for the online assessment

Formative coursework: Students will be expected to produce 1 presentation in the LT.
