Availability: This course is compulsory on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course aims to provide students with the knowledge and skills to collect, analyse, and communicate evidence in order to evaluate policies and interventions by international organisations, the European Union or national and local governments, as well as to explore and analyse voters' responses to such interventions. Students become familiar with research methods that will allow them to critically appraise policy interventions from the decision-making to the implementation stage as well as with the practical skills to communicate their findings professionally and effectively. The course starts by familiarising students with the principles of social science research methods and causal inference. It then covers applied policy analysis, drawing on observational and experimental approaches to evidence and discussing a policy's effectiveness. For the final project, students are expected to demonstrate conceptual understanding and practical knowledge of the methods covered in the course.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if a School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Michaelmas Term.

Formative coursework: One formative assessment (1,000 words or equivalent worksheet/ problem set) to demonstrate conceptual understanding and practical application of a method of analysis.

Indicative reading:

- Versluis, E., Van Keulen, M. and Stephenson, P. (2011). *Analyzing the European Policy Process*. London: Palgrave.

Assessment: Project (100%, 5000 words) in the LT.

The summative assessment requires students to engage critically with the conceptual framework introduced in the course and demonstrate a good practical knowledge of the statistical software studied.

EU491 Half Unit

Political Economy in Theory and History

This information is for the 2020/21 session.

Teacher responsible: Dr Johann Basedow CBG 6.11

Availability: This course is compulsory on the MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available on the MSc in European Studies (Research), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

Course content: This course aims to provide a comprehensive coverage and analytical understanding of the evolution of the political economies of Europe within the context of the process of European integration. The course tries to understand how the relation between state and economy in both Western Europe and Central and Eastern Europe has evolved over the post-war period. We look at how capitalism and democracy were reconciled in different European socio-economic models and what role European integration played in their evolution.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or if a School closure demands it online) seminars. This course includes a reading week in Week 6 of the Michaelmas Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading:

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU492 Half Unit

Political Economy of Integration and Fragmentation in Europe

This information is for the 2020/21 session.

Teacher responsible: Dr Vassilis Monastiriotis

Availability: This course is compulsory on the MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available on the MSc in European Studies (Research), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

Course content: This course examines the politics and economics of the formation, governance and continuing development of the EU through the prism of Comparative and International Political Economy. Looking at particular cases of EU policy-making (EU budget, trade policy, the European social model) and instances of integration and fragmentation (such as Brexit, the management of the Eurozone crisis, the rise of economic patriotism, and others), it discusses key contemporary questions for the political economy of Europe, especially in relation to recent and past crises of economic and political integration and the attempts to complete and reform the existing union.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if a School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Lent Term. A review session will be held at the start of the Summer Term to prepare for the online assessment.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the LT.

Indicative reading:

- Alesina A. and Giavazzi F. (2006) *The Future of Europe: Reform or Decline?*, Cambridge Mass.: MIT Press
- Bickerton, C. (2012) *European Integration: From Nation States to Member States*, Oxford: OUP

- De Grauwe P. (2014), *The Economics of Monetary Union*, Oxford University Press (10th edition)
- Dinan, D. (2004): *Europe Recast: A History of the European Union*, Houndmills: Palgrave Macmillan.
- Dinan D. (2010), *Ever Closer Union: an introduction to European integration*, Palgrave MacMillan (4th edition)
- Dyson K. and Featherstone K. (1999): *The Road to Maastricht, Introduction*, Oxford University Press.
- Eichengreen B. (2007), *The European Economy Since 1945: coordinated capitalism and beyond*, Princeton University Press

- Majone, G. (2014) Rethinking the Union of Europe Post-Crisis: Has Integration gone too far?, Cambridge: CUP

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU495

Policy Incubator

This information is for the 2020/21 session.

Teacher responsible: Prof Christopher Anderson CBG 6.05

Availability: This course is available on the MSc in European and International Public Policy and MSc in European and International Public Policy (LSE and Sciences Po). This course is not available as an outside option.

Pre-requisites: Students must have completed Engaging with Europe: Professional Skills (EU450) and Evidence and Analysis in Policy-Making (EU490).

The Policy Incubator is a project available to students on the MSc European and International Public Policy who wish to research a current policy issue instead of submitting a dissertation.

Course content: Student will work on an applied research project related to a public policy problem in lieu of a dissertation. This policy problem can be situated at the international, European, national, or sub-national level. Thematically, it can be related to a wide range of policy fields (e.g., international trade, social policy, environmental policy, or justice and home affairs and migration). The workshops will cover theories and the practice of policy-making as well as overviews of different styles and types of policy analysis writings and dissemination. Students will have regular meetings with their supervisors. While working on the Policy Incubator, students will be able to draw on the methodological skills they acquire in EU490 (Evidence and Analysis in Policy-Making) and on the practical writing and communication skills taught in EU450 (Europe: Professional Skills). Students will produce a set of two applied policy papers: a policy advocacy brief and a policy study.

Teaching: This course is delivered through workshops totalling a minimum of 5 hours across both the Michaelmas and Lent Terms. Some or all of this teaching will be delivered through a combination of online lectures and in-person and/or virtual help sessions with an assigned Supervisor, as well as student presentations. This course includes a reading week in Week 6 of the Michaelmas and Lent Terms

Formative coursework: Students will be expected to produce 1 condensed summary of the policy brief and 1 presentation in the LT.

Indicative reading: Useful preliminary reading:

Charles E. Lindblom and David K. Cohen, Social Science and Social Problem Solving (New Haven: Yale University Press, 1979); Martha S. Feldman, Order Without Design: Information Production and Policy-making (Stanford, CA: Stanford University Press, 1989); Ray Pawson, Evidence-based Policy: A Realist Perspective (London: Sage, 2006); Howard White, Theory-based Impact Evaluation: Principles and Practice (3ie, 2011); Curtis Cook, Just Enough Project Management (McGraw-Hill, 2004); J. E. McGrath and F. Tschan, 'Dynamics in Groups and Teams: Groups as Complex Action Systems', chapter three in M. S. Poole and A. H. Van de Ven (eds) Handbook of Organizational Change and Innovation (Oxford University Press, 2004).

Assessment: Policy brief (30%) in the ST Week 1. Policy paper (70%) post-summer term.

The assessment consists of two parts:

1. A 3,000 word policy brief; policy advocacy for the solution to a specific policy problem in/for the real world (not a theoretical or empirical question suitable for a conventional academic

dissertation)

2. A 7,000 word policy study; exploring policy options and engaging in policy analysis

EU499

Dissertation

This information is for the 2020/21 session.

Teacher responsible: All teachers of taught courses within the European Institute.

Availability: This course is compulsory on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European Studies (Research), MSc in European and International Public Policy (LSE and Bocconi), MSc in International Migration and Public Policy, MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available on the MSc in European and International Public Policy and MSc in European and International Public Policy (LSE and Sciences Po). This course is not available as an outside option.

Course content: Students are required to write a 10,000-word dissertation on a topic within the field of their chosen programme. Those seeking further guidance on topic selection should approach their Academic Mentor in the first instance. A Dissertation Supervisor will be assigned later in the academic year after students have submitted a preliminary topic proposal. The dissertation should be an account of original research, but can rely on secondary sources. In preparation for the dissertation, students must submit a Preliminary Dissertation Topic Proposal, a Dissertation Prospectus and a Final Dissertation Topic Proposal, along with a research ethics review checklist. Students must submit all required documents to be able to submit the Dissertation. Students must also receive approval of their Final Dissertation Topic Approval Form before they are allowed to submit.

Students are strongly advised to attend the relevant methodology course for their programme, which will cover topics on how to conduct research and write a dissertation. Detailed information on timing, deadlines and presentation can be found in the EU499 Moodle page. Students are required to read any additional information relevant to their particular programme.

Teaching:

- Students taking MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Culture and Conflict in a Global Europe, MSc Culture and Conflict in a Global Europe (LSE and Sciences Po) are expected to attend EU410 Interdisciplinary Research Methods and Design.
- Students taking MSc in European Studies (Research) are required to choose a research course from their Paper 2 options.
- Students taking MSc in International Migration and Public Policy are expected to attend SO476 Researching Migration: Research Questions and Research Methods.
- Students taking MSc in European and International Public Policy, MSc in European and International Public Policy (Sciences Po) and MSc in European and International Public Policy (LSE and Bocconi) are required to take EU490 Evidence and Analysis in Policy-Making.

Formative coursework: A written essay (prospectus) of 2,000 words is required as part of the approval process.

Assessment: Dissertation (100%, 10000 words) post-summer term.

EU4A1 Half Unit

The Politics and Policies of 'Brexit': The UK's changing relationship with the European Union

This information is for the 2020/21 session.

Teacher responsible: Prof Kevin Featherstone CBG 5.04 and Prof Antony Travers

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The UK's exit from the European Union (EU) represents the biggest and most complex challenge to British politics and policy for generations. At the same time, it will be a major part of the EU27's agenda: for both the negotiations process and the adaptation and implementation phase thereafter. Public and private institutions - in both the UK and the EU - will be obliged to manage the public policy consequences for years to come. This course will provide the knowledge and analytical skills relevant in this regard for those intending policy-related careers or further research. More generally, in analysing a dynamic and uncertain process in 'real time', it offers students a practical example of contemporary public policy analysis.

While 'BREXIT' is a dynamic and uncertain agenda, it prompts a series of challenges to existing knowledge that demand critical analysis of the emerging empirical evidence and modelling. Thus, the course will develop a broad disciplinary perspective - covering the political, political sociology, political economy, constitutional, and foreign policy/external relations dimensions. In doing so, it will place the key issues within the relevant theoretical and conceptual debates.

The following is an indicative outline of topics covered.

- 'Europe' in Post-War British Politics: why the reluctant partner?
- The EU Issue in Party Politics
- The Brexit Divide in Electoral Politics
- Getting to a Deal/ No Deal: the two sides in the BREXIT negotiations
- Managing BREXIT and Beyond: the impact on Whitehall
- BREXIT and foreign and security policies
- BREXIT and migration
- BREXIT and The City
- BREXIT and the UK economy
- The US: 'BREXIT' and Europe.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 22.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures and remarks, flipped lectures (online discussion of weekly topics) and in-person (or, if School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Michaelmas Term.

Formative coursework: An early formative essay will address a challenging interpretive question of a historical nature or of current political behaviour. Thereafter, group work/presentations will be part of the learning process for the the origination of an individual, extended policy paper (summative). The group work will have explored the issues and implications of a particular policy area; tutor support will be provided for the subsequent individual papers (design; coverage; sources; analytical frame).

Indicative reading:

- D. Dinan et al, eds. (2017) *The European Union in Crisis*; London: Palgrave.
- A. Geddes (2013) *Britain and the European Union*; London: Palgrave.
- B. Simms (2016) *Britain's Europe: A Thousand Years of Conflict and Cooperation*. London: Allen Lane.
- S. Wall (2008) *A Stranger in Europe: Britain and the EU from Thatcher to Blair*. Oxford: OUP.
- H. Young (1998) *This Blessed Polot: Britain and Europe from Churchill to Blair*. London: Macmillan.
- K. Armstrong (2017) *BREXIT Time: Leaving the EU -why, how and when?* Cambridge: Cambridge University Press.

- H. Clarke, M. Goodwin and P. Whiteley (2017) *BREXIT: Why Britain voted to leave the European Union*. Cambridge: Cambridge University Press.
- E. O. Eriksen and J. E. Fossum (2015) *The European Union's Non-Members: independence under hegemony?* London: Routledge.
- S. Hobolt (2016) 'The BREXIT vote: a divided nation, a divided continent', *Journal of European Public Policy*, 23, 9. And 'Debate Section': 'British exit from the EU - legal and political implications', in the same issue.
- L. Halligan and G. Lyons (2017), *Clean BREXIT: Why leaving the EU still makes sense*; London: Biteback Publishing.
- The LSE project: 'Generation BREXIT'.

Assessment: Project (100%, 5000 words) in the LT.

The summative assessment for this course is a Policy Project which requires students to prepare an extended analysis of a specific policy issue that has arisen from the 'BREXIT' process.

EU4A2 Half Unit

Globalisation, Conflict and Post-Conflict Reconstruction

This information is for the 2020/21 session.

Teacher responsible: Dr Denisa Kostovicova CBG 7.03

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender, Peace and Security, MSc in Global Politics, MSc in Human Rights, MSc in Human Rights and Politics and MSc in International Development and Humanitarian Emergencies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE and SciencesPo), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and SciencesPo), MSc in European and International Public Policy & Politics (LSE and Bocconi), MSc in European Studies (Research) and MSc in Conflict Studies.

This course has limited availability (is capped), and requires that students (regardless of Department or MSc programme) apply for access via the Graduate Course Choice process.

Course content: The course offers a theoretically informed account of the challenges faced by countries transitioning from conflict to peace in the era of globalisation, and examines them empirically in reference to examples from the Balkans, the Caucasus and the Middle East. The regions chosen are those which have experienced particular difficulties with a peaceful transition to democracy, market economy and integration in a multilateral system. The course will start with an introduction to theories of globalisation, a comparative analysis of the legacy of totalitarianism and authoritarianism and an overview of conflict analysis. The course is structured around three issue areas: political ideologies and state breakdown; transition economy and organised crime; post-totalitarian society. It looks at nationalism linked to global diasporas and fundamentalist networks, new wars in the context of international intervention, and international protectorates. Transition economy includes an introduction to transition strategies (privatisation, liberalisation and macro-economic stabilisation) and to perverse effects of illegal economic networks and organised crime stemming both from the totalitarian past and the impact of globalisation. The last block of questions investigates post-conflict reconstruction from the perspective of transitional justice, (un)civil societies and new minorities. While analysing these issues accompanied with relevant regional illustrations particular attention is made to grasp unique aspects of

post-totalitarianism triggered by the simultaneity of transition and globalisation. The course concludes by examining the European Union state-building policies in relation to critical approaches to post-conflict reconstruction.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures and student presentations, flipped lectures (online discussion of lecture materials), and in-person (or, if a School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Michaelmas Term.

Formative coursework: All students are expected to produce one written essay, plus one short presentation on topics assigned to them.

Indicative reading:

- Mary Kaldor, *New and Old Wars: Organised Violence in a Global Era*, Polity, 1999;
- Vesna Bojicic-Dzelilovic, James Ker-Lindsay and Denisa Kostovicova (eds) *Civil Society and Transitions in the Western Balkans*, Palgrave Macmillan, 2013;

Assessment: Essay (100%, 5000 words) in the LT.

EU4A4 Half Unit

The Politics of Inequality and Redistribution

This information is for the 2020/21 session.

Teacher responsible: Prof Jonathan Hopkin

Availability: This course is available on the MSc in Comparative Politics, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Global Politics, MSc in Inequalities and Social Science, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides an overview of the politics of inequality in the rich democracies. The objective is to explain why the distribution of wealth, income and opportunities differs so much between democratic countries with similar levels of economic development, particularly in Europe. The course draws largely on political science, although perspectives from other disciplines - such as economics and social policy - are brought in as appropriate. The focus is on understanding how institutions and policies redistribute resources in different ways across countries and over time. The course explains why welfare states emerged in the twentieth century and how welfare policies differ in different countries, the impact of labour market institutions, the

redistributive implications of age, gender and ethnic differences, the role of competing economic and political ideologies, and the way inequality has been affected by structural changes to the global economy. The aim is to understand the striking differences in social cohesion and human development amongst the world's rich democracies.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person (or, if a School closure demands it, online) seminars. This course includes a reading week in Week 6 of the Michaelmas Term.

Formative coursework: All students are expected to submit one non-assessed essay.

Indicative reading:

- Esping-Andersen, Gosta (1990), *The Three Worlds of Welfare Capitalism*. Cambridge: Polity Press
- Piketty, Thomas (2014), *Capital in the Twenty-First Century*. Cambridge: Belknap
- Alesina, Alberto and Edward Glaeser (2004). *Fighting Poverty in the US and Europe. A World of Difference*. Oxford: Oxford University Press.

Assessment: Essay (100%, 5000 words) in the LT.

EU4A5 Half Unit

Public Opinion in Europe

This information is for the 2020/21 session.

Teacher responsible: Prof Christopher Anderson CBG 6.05

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Sociology and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides a focused overview of the connection between citizen preferences and the political economy in European democracies. It will cover the contours and determinants of public preferences and how these shape and are shaped by political decision making, policy outputs and outcomes, and democratic institutions. Among others, it will examine public opinion about the quality and authority of political institutions and decision processes, as well as public policy preferences in areas such social and foreign policy. While the primary focus will be on European nations as well as the European Union, we will also compare public opinion across a wide variety of contemporary democracies.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 27.5 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of recorded lectures, flipped lectures (online discussion of lecture materials), and in-person and/or virtual seminars. This course includes a reading week in Week 6 of the Michaelmas Term.

Formative coursework: Students will be expected to produce 1 presentation, 1 other piece of coursework and 1 other piece of coursework in the MT.

The formative coursework will take the form of a research design outline (500 words), a brief oral presentation, and a reaction paper (500 words).

Indicative reading:

- Alesina, Alberto, Rafael Di Tella, and Robert MacCulloch. 2004. "Inequality and Happiness: Are Europeans and Americans

- Different?" *Journal of Public Economics* 88 (9–10): 2009–2042.

 - Svallfors, Stefan. 2006. *The Moral Economy of Class: Class and Attitudes in Comparative Perspective*. Palo Alto: Stanford University Press.

Assessment: Essay (100%, 5000 words) in the period between MT and LT.

EU4C9

MSc in The Global Political Economy of China and Europe Policy Incubator

This information is for the 2020/21 session.

Teacher responsible: Dr Angelo Martelli, CBG.6.04

Availability: This course is compulsory on the MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is not available as an outside option.

Course content: Students will undertake a group project (in teams usually of 3 to 5 people) relating to a policy problem faced by an external organisation. Such organisations might be public sector bodies, companies operating in the public management or public policy sector, international organisations, think tanks and NGOs.

Teaching: This course is delivered through a combination of workshops and help sessions totalling a minimum of 5 hours across both the Michaelmas and Lent Terms. Some or all of this teaching will be delivered through a combination of online lectures and in-person and/or group virtual help sessions with an assigned Policy Incubator Supervisor, and student group presentations. This course includes a reading week in Week 6 of the Michaelmas and Lent Terms.

Formative coursework: During the LT, students will present their project and policy proposals to a jury of policy incubator supervisors in a group presentation. Relevant alumni, members of faculty and/or visiting fellows will also be invited to attend for the purposes of providing feedback. Each group presentation will last 20 minutes with 10 minutes for questions from the jury.

Indicative reading: Useful preliminary reading:

- Charles E. Lindblom and David K. Cohen, *Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979);
- Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989);
- Ray Pawson, *Evidence-based Policy: A Realist Perspective* (London: Sage, 2006);
- Common Causes of Project Failure (London: OGC, 2004);

Assessment: Policy brief (30%) in the LT.

Policy paper (70%) post-summer term.

Students are asked to present a group report in the form of a policy advocacy brief (3000 words, 30%). They will then, individually, submit a full policy report in which they discuss alternative policy options and evaluate their suggested policy solutions (7000 words,

70%).

EU4V9

Concepts in Political Science and Public Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Christopher Anderson CBG 6.05 and Dr Spyridon Economides CBG 5.03

Availability: This course is compulsory on the MSc in European Studies (Research). This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is not available as an outside option. Students from any MSc programme within the European Institute can follow the course. This course is for students with little background in European Politics and Policy-making.

Course content: This course, run online via Moodle, offers an informal introduction to basic concept of political science, public policy and adjacent fields by providing links to a number of resources such as introductory readings, background texts, news websites, academic journals, and external media sources such as podcasts. Students will also find material which will allow them to familiarize themselves with research design and the basic methodologies in political science and public policy. The main aim of this course is twofold: First, to provide some basic conceptual knowledge for European Institute students who have little or no background in political science, international relations, public policy or related disciplines. Second, to provide a resource to which students can return throughout their year at LSE, should they want to revise some concepts or look for data sources, for example when working on their dissertation or the policy incubator project. Additional resources will be added to the Moodle page throughout the academic year. Students may also enrol on course sister Moodle course EU409 (Basic Concepts for Political Economy) if they are interested in learning more about specific concepts in economics.

Teaching: This is a Moodle-based course with no formal teaching. Students can arrange one-to-one sessions with the Course Convenor during Feedback Sessions/Office Hours. Depending on student demand, a limited number of 'EU4V9 Surgeries' may be arranged with the Course Convenor.

Assessment:

There is no assessment for this course.

FM402 Half Unit

Financial Risk Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Christian Julliard

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Risk and Finance, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

Please note, Global MSc in Management (Accounting and Finance concentration only)

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit.

Pre-requisites: The course assumes a basic knowledge of finance theory, statistics and mathematics (calculus, linear algebra).

Course content: This course aims to provide an overview of the main theoretical concepts underlying the analysis of financial risk and to show how these concepts can be implemented in practice in a variety of contexts. This course shares some topics with FM442 Quantitative Methods in Finance and Risk Analysis. The course will include a selection of:

- 1 Conceptual foundations: diversification, hedging and their limits
- 2 Fixed income securities
- 3 Options and dynamic replication
- 4 Value at Risk
- 5 Endogenous risk
- 6 Ideas from Behavioural Finance
- 7 Credit risk (ratings based models, structural models, reduced form models)
- 8 Credit derivatives

Teaching: 20 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students will be expected to produce 8 problem sets in the MT.

Indicative reading: Course readings will vary from year to year depending upon the topics covered. Useful references are M Crouhy, D Galai and R Mark, Risk Management, McGraw-Hill, 2001; P Jorion, Value at Risk, McGraw-Hill, 2007; J Hull, Risk Management and Financial Institutions, Prentice-Hall, 2015; J Hull, Options, Futures and Other Derivatives, Prentice-Hall, 2014 and D Duffie and K Singleton, Credit Risk, Princeton University Press, 2003.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

regulation of insurance and pensions; the tools of microprudential regulation; the challenges of assessment of systemic risk and macroprudential regulation.

Section C. Financial Risk Analysis - Examines issues in financial risk including risk and regulation in the insurance markets; tools of financial risk management, including diversification, hedging and capital provisions; risk measurement for financial instruments (market risk, value at risk); credit risk, ratings and credit derivatives; operational and business risk.

Section D: Strategy, Control and Risk in Organisations - Provides a strategic management perspective on risk analysis and management, including an examination of strategic visioning. Also considers: issues of enforced self-regulation as a method of risk management with reference to occupational health and safety regulation; risk management and decision making in organisations; enterprise-wide risk management and auditing.

Section E: Risk Analysis and the Psychology of Risk Bearing

- Explores the meaning of risk as perceived by different agents; methods of dealing with risky situations; analysis of risk taking by groups, behavioural analysis of financial risk taking.

Section F: Possible Specific areas of risk analysis

- 1) Liquidity and operation risks in exchanges;
- 2) Counter-party risks in the OTC markets, potential triggers for market failure;
- 3) Legal analysis of risk, conditions when legal risk exists and how it can be mitigated, legal tools to influence conduct.

Teaching: 22 hours of lectures in the MT. 22 hours of lectures in the LT.

12 hours of case discussion and classes, and 10 hours of practitioner seminars across MT and LT.

Formative coursework: Students will be given weekly problem set assignments.

Indicative reading: J. Hull, Risk Management and Financial Institutions. 2nd Edition.; S Dawson, Analysing Organisations (Macmillan, 1996); S French, Readings in Decision Analysis (Chapman and Hall, 1989); C Hood & D K Jones, Accident and Design (UCL Press, 1996); Jorion Value At Risk 3rd Edition 2007 (McGraw Hill); M.Power. Organized Uncertainty: Designing a World of Risk Management (Oxford University Press, 2007); M.Fenton-O'Creevy, N.Nicholson, E.Soane and P. Willman, Traders: Risks, Decisions, and Management in Financial Markets (Oxford University Press, 2005); B A Turner & N F Pidgeon, Man-made Disasters (Butterworth-Heinemann, 1997). The Economics of Climate Change: The Stern Review (Cambridge University Press, 2007).

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Essay (50%, 10000 words) in September.

Class participation (10%).

A substantial (10,000 word essay) is an integral part of the course and represents 50% of the assessment. As part of the multi-disciplinary approach taken in the programme, students are actively encouraged to select topics that involve several of the relevant core competencies in an integrated way. Analyses of complex cases are suitable for this. However, conceptual and theoretical works are also welcome.

FM403

Management and Regulation of Risk

This information is for the 2020/21 session.

Teacher responsible: Professor Kathy Yuan

Availability: This course is compulsory on the MSc in Risk and Finance. This course is not available as an outside option.

Course content: This course is designed to expose students to the breadth of risk management thinking and approaches across different areas. The course material is divided into the following areas:

Section A. Risk and Regulation - Introduction and Overview: Sets out the problem of risk management and regulation. It formulates a general conceptual framework that can be used in devising solutions to risk either as a management problem or as a regulatory problem, or both.

Section B. Financial Market and Regulation - Discusses the role of regulation in the financial sector, bank competition and moral hazard; distinguishes prudential regulation of banks and the

FM404 Half Unit Not available in 2020/21

Forecasting Financial time Series

This information is for the 2020/21 session.

Teacher responsible: Dr Christian Julliard

Availability: This course is available on the MSc in Accounting and Finance, MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway), MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course

is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Quantitative Methods for Finance and Risk Analysis (FM442).

The first half of FM437 Financial Econometrics, or alternatively FM442 Quantitative Methods for Finance and Risk Analysis, is a required prerequisite. Students who can demonstrate comparable background may be granted an exemption from this requirement.

Course content: This course will examine the techniques involved with forecasting key variables in finance, and how to incorporate model uncertainty into financial forecasts. Students will learn both the theory and the practice of forecasting in finance.

- The following topics will be covered: introduction to time series analysis; Maximum Likelihood Estimation (MLE), and MLE based model selection; Bayesian inference, posterior probabilities, and Bayesian Model Averaging; Markov Chain Monte Carlo methods; Present value regressions; Multivariate models and Bayesian Vector Autoregressions; Cointegration; Asset pricing and the Generalized Method of Moments (GMM); Dynamic factor models and their connection with principal components; Introduction to Machine Learning and Finance.

Additional information can be found on Moodle (for current students)

Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of computer workshops in the LT.

Formative coursework: Regular problem sets.

Indicative reading: Lecture notes will be provided, and some journal articles may also be used.

Assessment: Exam (90%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Coursework (10%).

Summative coursework during term time teaching in LT

FM405 Half Unit

Fixed Income Securities and Credit Markets

This information is for the 2020/21 session.

Teacher responsible: Dr Peter Kondor

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed either Asset Markets (FM423) and Corporate Finance (FM422) or Financial Economics (FM436)

Course content:

- Interest rate modelling and derivatives
- Credit risk
- Credit derivatives and risk management

This course provides a thorough grounding in recent developments in fixed income securities pricing, hedging and portfolio management.

By the end of the course, the students will be familiar with the fixed income state of the art business practice and a variety of topics including (i) an analysis of the main products traded in the credit markets, such as government and corporate bonds, bond options, swaps, caps, floors, swaptions, callable, puttable and convertible bonds, and an analysis of the main credit derivatives such as total-return swaps, spread options and credit default swaps; (ii) the specific tools used in the industry practice to evaluate and hedge these products, which range from no-arbitrage trees and the calibration of yield curve derivatives to the main tools used to monitor and manage credit risk; (iii) the process of securitization, with particular reference to collateralized default obligations and mortgage-based securities.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is

no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Indicative reading: The primary source for this course is a comprehensive set of Lecture Notes, tutorials and case studies and the main reference is Pietro Veronesi: Fixed Income Securities, (Wiley 2010).

Assessment: Continuous assessment (100%) in the LT.

FM406 Half Unit

Topics in Portfolio Management

This information is for the 2020/21 session.

Teacher responsible: Dr Michela Verardo

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed either Asset Markets (FM423) and Corporate Finance (FM422) or Financial Economics (FM436)

Course content:

- Portfolio optimization and the Black-Litterman model
- Dynamic Investment Strategies
- Selecting and Monitoring Portfolio Managers: Mutual funds and hedge funds
- Transactions Costs and Liquidity Risk

The course covers a wide range of topics in portfolio management, with a strong focus on empirical applications. The first part of the course reviews the basics of portfolio theory and develops the Black-Litterman approach to portfolio optimization. The second part of the course introduces students to the implementation of several dynamic investment strategies and to the estimation of their performance; portfolio strategies include size, value, momentum, betting-against-beta, and quality-minus-junk. The third part of the course focuses on selecting and monitoring portfolio managers, with particular emphasis on the identification of selectivity, allocation, and timing skills for mutual funds and hedge funds. The last part of the course examines trading costs and liquidity risk, as well as their impact on the profitability of investment strategies. The course is based on recent empirical studies and applied exercises using financial data.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular coursework will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are: Investments, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin; Modern portfolio theory and investment analysis, by E. J. Elton, M. J. Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; Modern investment management, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press.

Assessment: Continuous assessment (100%) in the LT.

FM407 Half Unit

Mergers, Buyouts and Corporate Restructurings

This information is for the 2020/21 session.

Teacher responsible: Dr Vicente Cuñat

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).

Course content:

- Financial Analysis of Firms and Corporate Transactions
- Mergers, Acquisitions and Leveraged Buyouts
- Distress, Bankruptcy and Corporate Restructuring

This course covers advanced topics in Corporate Finance. It focuses on the strategy, valuation and execution of corporate deals. In particular, the first part of the course covers mergers, divestitures, partial-divestitures (e.g. equity carve outs) and leveraged buyouts. The second part of the course provides a framework of analysis for the resolution of financial distress and bankruptcy. Each of the topics introduced in this course covers both institutional details and results of relevant academic research. It is furthermore supported by case studies.

Teaching: 30 hours of seminars in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular coursework will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: A course pack will be distributed that includes case studies as well as additional readings such as textbook chapters, and practitioner articles.

Assessment: Continuous assessment (100%) in the LT.

FM408 Half Unit

Financial Engineering

This information is for the 2020/21 session.

Teacher responsible: Dr Jean-Pierre Zigrand

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed either Asset Markets (FM423 or FM423E) and Corporate Finance (FM422 or FM422E) or Financial Economics (FM436). Students will be expected to show some familiarity with calculus (including stochastic calculus) and statistics.

Course content: This course provides a thorough grounding in the theory and practice of financial engineering. The emphasis is on the application of derivatives pricing and hedging methodology to equity and volatility derivatives and to structured products. The course aims to cover the basics in derivatives theory, and to apply them to a multitude of financial securities and structured products, with a special emphasis on recent products in the equity and volatility derivative worlds. We review selected case studies in order to gain a better understanding of their practical usage. We also implement the models numerically in R and VBA.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is

interactive.

Indicative reading: Based on a set of extensive lecture notes. No one book covers the material of the entire course. Books recommended include *The Volatility Surface: A Practitioner's Guide*, 2nd Edition, by Jim Gatheral, and *The Volatility Smile* by Derman, Miller and Parikh. Background reading can be found in *Volatility: Practical Options Theory* by Adam Iqbal, *Derivatives Markets* by Robert McDonald or *Options, Futures and Other Derivatives* by John Hull.

Assessment: Continuous assessment (100%) in the LT.

FM409 Half Unit Not available in 2020/21

Risk Management in Financial Markets

This information is for the 2020/21 session.

Teacher responsible: Dr Christian Julliard

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed either Asset Markets (FM423) and Corporate Finance (FM422) or Financial Economics (FM436).

Course content:

- Hedging in equity and fixed income markets
- Market Risk, Value at Risk and Expected Shortfall
- Endogenous Risk and Limits to Arbitrage
- Credit risk and structured products

The aim of this course is to offer an introduction to the analysis and management of risk within financial markets. The course develops a conceptual framework for thinking about financial risk and shows how these concepts are implemented in practice in a variety of contexts. First, the course offers an overview of risk management in the context of portfolios of fixed income securities and derivatives. Next, we discuss the implementation and the merits of Value at Risk measures. We will spend some time on endogenous risk and limits to arbitrage. In the context of credit risk we will cover ratings based and structural models, as well as credit risk on portfolios and credit derivatives. A final topic covers regulation and the recent credit crisis. Throughout, the course spends a significant amount of time on practical applications of the theories that are introduced. Some limitations of current approaches are also discussed.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Problem sets. In addition, students will have the opportunity to present the results of a case study to the class.

Indicative reading: Course readings will vary from year to year depending upon the topics covered. The main reference is: John C. Hull, *Risk Management and Financial Institutions*, Wiley, 2015, 4th edition.

Additional useful references are: Michel Crouhy, Dan Galai and Robert Mark, *Risk Management*, McGraw-Hill, 2001. Philippe Jorion, *Value at Risk*, McGraw-Hill, 2007, 3rd edition. Jon Danielsson, *Financial Risk Forecasting*, Wiley, 2011. John C. Hull, *Options, Futures and Other Derivatives*, Pearson, 2012, 8th edition. Darrell Duffie and Ken Singleton, *Credit Risk*, Princeton University Press, 2003.

Assessment: Exam (90%, duration: 2 hours) in the summer exam period.

Coursework (5%) and presentation (5%) in the LT.

FM410 Half Unit

Private Equity

This information is for the 2020/21 session.

Teacher responsible: Prof Ulf Axelsson

Availability: This course is compulsory on the MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Course content:

- Evaluating and executing Private Equity Deals
 - Business Plans, Venture Capital, and Entrepreneurial Finance
 - Private Equity as an asset class and the private equity landscape
- This course provides a thorough grounding in the theory and recent developments in the field of private equity.

Starting by examining how private equity funds are raised and structured the course will examine how private equity can be used in start-ups, in scaling-up cash flow businesses, and in restructuring firms facing financial distress. The course explores the link between private and venture capital on the one hand and public securities markets on the other. The course will examine the process through which private equity investors exit their investments. The course will also give a detailed analysis of the types of finance used in private equity and an evaluation of the short and long-run performance of private equity investments. The course will include an evaluation of the performance of different types of private equity investment and a comparison with other forms of ownership will be undertaken.

This course takes a rigorous theoretical examination of private equity. It also employs some case study teaching and is taught in conjunction with a range of practitioners in the field.

Teaching: 30 hours of lectures and 30 hours of seminars in the LT. This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Each week there will typically be a formative case study assignments (similar to summative cases). Students will also be given formative feedback on their class participation.

Indicative reading: Ulf Axelsson, Tim Jenkinson, Per Strömberg, and Michael S. Weisbach. *Leverage and Pricing in Buyouts: An Empirical Analysis*. August 28, 2007; Steven N. Kaplan and Per Strömberg. *Leveraged Buyouts and Private Equity*, Social Science Research Network, June 2008; Cendrowski, Harry. *Private Equity: Governance and Operations Assessment*. Assessment: Continuous assessment (100%) in the LT.

FM411

Finance Work Placement and Assessment

This information is for the 2020/21 session.

Teacher responsible: MSc Academic Programme Director

Availability: This course is compulsory on the MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics (Work Placement Pathway) and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course must be taken in addition to the full 4 units of courses prescribed by the programme regulations. Completion of the work placement and assessment is a requirement for students to be eligible for graduation from the Work Placement Pathway.

Pre-requisites: The Finance Work Placement and Assessment is only available to students who are registered on the Work Placement Pathway for the following programmes: MSc in Finance

(full-time), MSc in Finance and Private Equity or MSc in Finance and Economics. Students must complete the work placement and assessment in addition to four full units of courses, as described in the programme regulations.

Course content: There are no classes for this course. Students instead undertake a work placement during which they will be employed by an external company or institution. However, the work placement should be relevant to the topics studied during the student's academic modules, and be likely to build on and enhance topics studied during the year. Academic modules studied during the programme should also have a direct bearing on the role that a student will undertake on their placement. Students must hold a formal offer in writing of an appropriate work placement before approval will be granted to join the work placement pathway, and the aspects outlined above will be considered by the Department before approval to undertake a placement is granted. The student will be an employee of the relevant company or institution for the duration of the placement; they will be expected to undertake tasks as appropriate and all management of the placement will be undertaken by the employing institution or company. The course will be assessed by an essay which students are required to submit to the Department of Finance at the end of the placement.

Teaching: There will be no direct teaching for this course. Students will participate on a work placement which will be entirely delivered and managed by the company or institution with which they are employed. Students' learning and experience will be gained through participation in the placement as an employee of that company and they will be required to submit an assessed essay to the Department of Finance upon completion of the placement.

Formative coursework: There is no formative coursework for this course. Students will participate on a work placement which will be entirely delivered and managed by the company or institution with which they are employed. Students' learning and experience will be gained through participation in the placement as an employee of that company and they will be required to submit an assessed essay to the Department of Finance upon completion of the placement.

Assessment: Essay (100%, 2000 words) post-summer term.

The assessment of the work placement will be on the basis of submission of a written piece of work following completion of the work placement. Students will be required to submit their work to the Department following completion of the placement.

The essay will be required to be in the region of 2,000 words in which the student should describe:

- How the work placement built on or shed further light on the topics covered during the programme's academic modules, and/or how the elements of theory learned were applied in practice;
- How topics covered in the academic modules were relevant to the student's role on the work placement;
- How/whether the academic and pastoral aspects of the programme prepared students for their experiences in the workplace;
- What the student feels they have learned from the placement.

The essay submission will be marked on a Pass/Fail basis.

Students will need to demonstrate that they have fully addressed the topics described above, evidenced with examples from their placement, to be eligible for a pass mark. Students enrolled on the work placement pathway must satisfactorily complete the work placement and assessment in order to be eligible for graduation from the work placement pathway.

FM412 Half Unit

Quantitative Security Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Jean-Pierre Zigrand

Availability: This course is available on the Global MSc in Management, MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in

Finance and Private Equity (Work Placement Pathway) and MSc in Risk and Finance. This course is not available as an outside option. Global MSc in Management (Accounting and Finance concentration only).

This course is not available as an outside option

Pre-requisites: Some familiarity with finance and accounting.

Course content: This course is an applied course on quantitative analysis of investment opportunities in public debt and equity markets. We consider valuation of macro assets (such as government bonds, and diversified portfolios of equities and corporate bonds) as well as the valuation of equities of individual firms and of their risky debt. We rely on theoretical concepts that students have learnt in their core courses (such as the CAPM, no-arbitrage pricing of option and models of corporate debt as contingent claims on a firm's asset) and also examine in depth the historical behaviour of asset returns. The focus is on applying theoretical and empirical models of asset markets to evaluate investment opportunities in realistic, sometimes, live situations. The course involves in-class analysis of investment questions, extensive analysis of financial data, study of financial statements and analyst reports and two projects. The course is structured around the following topics:

1. Valuation of macro assets I: Global Yield Curves
2. Valuation of macro assets II: Global Equity Indices
3. Valuation of macro assets III: Volatility and Credit Risk Premium
4. Identifying value in individual equities: capturing breadth via quantitative screening systems
5. Digging deep in search of value: case studies on firm-level equity valuation
6. Fair value of growth
7. Valuing single name credit opportunities: investment-grade and high-yield debt
8. Valuation of the capital structure of banks

Teaching: 30 hours of seminars in the LT.

Formative coursework: Students will be expected to complete 2 group projects. In the first project, students analyse and value the equity of a publicly traded firm, evaluate its risks and make an investment recommendation. This project is done in two parts: first part focuses on a historical performance analysis of the chosen firm and second on a forward-looking valuation analysis. The second project requires the students to study and critically examine the investment decisions and style of a well-known value investor.

FM413 Half Unit

Fixed Income Markets

This information is for the 2020/21 session.

Teacher responsible: Dr Walker Ray

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Risk and Finance, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit.

Pre-requisites: Students taking this course are expected to be familiar with the theory of asset evaluation at the level of FM429 Asset Markets A.

Course content: This advanced course is designed for students seeking an understanding of fixed income valuation and hedging methods, and a basic familiarity with the major fixed income markets and instruments.

By the end of the course, the students will be familiar with a variety of topics, including (i) the basic concepts of fixed-income instruments, such as yield, duration, convexity; (ii) the basic techniques to analyse and hedge fixed income products, such as "curve fitting", "bootstrapping", duration-based hedging and asset-liability management; (iii) the forces, or "factors", driving the variation in the entire spectrum of interest rates at different maturities; (iv) the main evaluation tools, which can be applied to evaluate a wide range of products (trees, no arbitrage trees, calibration and some continuous time models); (v) the main fixed income products such as government bonds, corporate bonds (convertible, callable, puttable), and their evaluation; (vi) plain vanilla interest derivatives (caps, floors and collars, swaps, swaptions, etc.) and their evaluation; (vii) mortgage backed securities and credit risk transfers; (viii) the analysis of the "destabilizing" effects related to the use of certain derivatives written on fixed income instruments.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Indicative reading: The primary source for this course is a comprehensive set of Lecture Notes, tutorials and case studies, and a reading pack containing chapters from the following books: Sundaresan, S. (2001), Fixed Income Markets and Their Derivatives, South Western College Publishing. Duffie, D and Singleton, K (2003), Credit Risk: Pricing, Management, and Measurement, Princeton: Princeton University Press (Princeton Series in Finance). Tuckman B. and A. Serrat (2011), Fixed Income Securities: Tools for Today's Markets, 3rd Edition, John Wiley & Sons. Veronesi, P. (2010), Fixed Income Securities: Valuation, Risk, and Risk Management, John Wiley & Sons.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

FM414 Half Unit

Corporate Investment and Financial Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Daniel Ferreira

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as

an outside option.

Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).

Course content:

- Supporting the firm's strategy with Long-term and short-term financial management
 - Real options and strategic investment decisions
 - Family firms, IPOs, and corporate governance
 - Risk management, International valuation, and currency exposure
- This is a case-based course aimed at deepening the understanding of how to apply corporate finance concepts in a wide variety of business situations. In particular, we will try to build on concepts in business strategy, valuation techniques, and capital structure theories covered in previous courses, and see how to apply those tools in a systematic and rigorous way when approaching complicated real-life corporate finance problems. Examples of topics include working capital management, capital structure, risk management, real options, initial public offerings, international corporate finance, and family firms. Students will have to read up on cases before class and be prepared to discuss them interactively in class.

Teaching: 30 hours of seminars in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: 5 formative case study assignments (similar to summative cases).

Indicative reading:

- Berk and DeMarzo, "Corporate Finance"
- Around 10 case studies
- A number of related scientific articles

Assessment: Continuous assessment (100%) in the LT.

FM421 Half Unit

Applied Corporate Finance

This information is for the 2020/21 session.

Teacher responsible: Dr Ashwini Agrawal

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics, MSc in Economics and Management, MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway) and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. Students on the Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only), MSc in Econometrics and Mathematics Economics, MSc Economics, MSc Economics (Two Year Programme), and MSc in Economics and Management may take this course only if they have fulfilled the compulsory prerequisites:

Students may only take this course if they have taken at least one of the following courses in **Michaelmas Term**: FM473M Financial Markets, FM474M Managerial Finance or FM431M Corporate Finance A. There will be no exceptions to this rule.

Pre-requisites: This is an advanced applied course and a thorough understanding of the major theoretical issues and concepts is required.

Students on the MSc in Econometrics and Mathematics Economics, MSc in Economics and Management, MSc in Management and Strategy may take this course if they have fulfilled the compulsory prerequisites. These students may only take this course if they have taken at least one of the following courses in Michaelmas Term: FM473M Finance I, FM474M Managerial Finance or FM431M Corporate Finance A.

Course content: The course will provide a thorough treatment of various topics within corporate finance, such as capital budgeting, financing decisions, and corporate valuation.

Teaching: 30 hours of seminars in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

This course will be taught in two or three separate groups. Each group will meet for a single block of three hours once a week. Each student will be assigned to one group. Students will **not** be allowed to choose their groups or to switch groups.

The course requires weekly in-class activities and discussions. Students must prepare for class activities in advance. Attendance is required.

Formative coursework: Weekly assignments based on case studies will be assigned to students. They will receive feedback on their performance, and will also be provided suggested solutions.

Indicative reading: Course materials (lecture notes and case studies) will be provided to the students at the start of the course.

Assessment: Exam (90%, duration: 2 hours and 30 minutes) in the summer exam period.
Coursework (10%) in the LT.

FM422

Corporate Finance

This information is for the 2020/21 session.

Teacher responsible: Professor Amil Dasgupta

Dr Pedro Saffi

Availability: This course is compulsory on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:

- Financing
- Valuation

This core course provides a broad introduction to the key issues in corporate finance. The first half of the course, the Financing Module, investigates how companies should finance their activities by issuing securities (debt, equity and convertible claims) and the interaction of business policy with financial policy. The aim is to understand what factors determine optimal capital structure and how the interplay of these factors can affect financing decisions in a way that creates value. The second half of the course, the Valuation Module, covers firm and project valuation and establishes how companies should select among investable assets. The module focuses on fundamental valuation techniques based on discounting future cash flows. The course goes on to introduce further valuations methods, such as real options analysis, as well as key applications of valuation concepts to major corporate decisions such as mergers and acquisitions and initial public offerings. The course interweaves key conceptual material with a series of cases.

Teaching: 60 hours of lectures in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: The recommended textbook for this course is Berk and DeMarzo, Corporate Finance. Other recommended readings from relevant journal articles will be included in a study pack.

Assessment: Continuous assessment (100%) in the MT.

FM423

Asset Markets

This information is for the 2020/21 session.

Teacher responsible: Dr Dong Lou and Dr Igor Makarov

Availability: This course is compulsory on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:

- Investments and Securities Valuation
- Portfolio choice and performance evaluation
- Derivatives

The aim of the course is to familiarize students with the workings of financial markets, and equip them with the fundamental tools of asset valuation. The course will focus on the three main asset classes - fixed income, stocks, and derivatives - giving a unified perspective of modern valuation methods. The starting point will be the present value formula. The course will then proceed to fixed-income securities, focusing mainly on government bonds. These will be valued off the term structure of interest rates, using the present value formula. The connection with the principle of no-arbitrage will be emphasized. The course will then move to stocks, starting with portfolio theory and then deriving the relation between risk and return (CAPM). The CAPM will provide a risk-adjusted discount rate that will be used to discount stocks' cash flows with the present value formula. Alternative pricing models such as the APT and multi-factor models will also be covered, and the models will be applied to issues of asset allocation and portfolio selection. The last topic will be derivatives, especially futures and options. After familiarizing students with the use of derivatives, the course will cover the main valuation methods (binomial model, Black-Scholes) emphasizing again the principle of no-arbitrage.

Teaching: 60 hours of lectures in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: The organisation of topics of the course follows closely the treatment in Berk and DeMarzo, Corporate Finance, 3rd Global Edition, Pearson International, and Bodie, Kane, and Marcus, Investments, 10th Edition, McGraw Hill. Other recommended readings and case studies will be included in a study pack.

Assessment: Continuous assessment (100%) in the MT.

FM429 Half Unit

Asset Markets A

This information is for the 2020/21 session.

Teacher responsible: Dr Georgy Chabakauri

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Financial Mathematics, MSc in Real Estate Economics and Finance, MSc in Risk and Finance, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

Global MSc in Management (Accounting and Finance Concentration only)

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is available to other students from the Departments of Mathematics and Statistics where regulations permit.

This course cannot be combined with FM473 Financial Markets or FM474 Managerial Finance.

Outside students should consider the alternative option of FM473 Financial Markets or FM474 Managerial Finance.

Pre-requisites: Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised.

Course content: This course aims to equip students with the fundamental concepts and tools underlying the asset markets side of modern finance. The course covers asset markets and valuation. The valuation of fixed-income securities is covered first, followed by the valuation of stocks, and derivatives such as futures and options. Concepts emphasized include the present-value formula, valuation by arbitrage, portfolio theory, the CAPM, market efficiency, and binomial and Black-Scholes models.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT.

Formative coursework: Weekly problem sets covered in classes.

Indicative reading: J. Berk and P. DeMarzo, Corporate Finance, Pearson International Edition. Z. Bodie, A. Kane and A. Marcus, Investments, 8th edition, McGraw Hill. ISBN:0-07-338237-X. Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

Assessment: Exam (100%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the summer exam period.

Please note this exam is the half unit version of the examination taken on FM430 Corporate Finance and Asset Markets. Any student who takes both FM429 and FM431 will be re-registered to sit the FM430 full-unit exam paper in Summer Term.

FM430

Corporate Finance and Asset Markets

This information is for the 2020/21 session.

Teacher responsible: Dr Georgy Chabakauri

Availability: This course is available on the MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Financial Mathematics, MSc in Real Estate Economics and Finance and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised. This course is a combination of two half-unit courses: FM429 Asset Markets A and FM431L Corporate Finance A.

This course cannot be combined with FM429 Asset Markets A, FM431 Corporate Finance A, FM473 Financial Markets or FM474 Managerial Finance.

Course content: This course aims to equip students with the fundamental concepts and tools underlying modern finance, both in the asset markets and the corporate finance side. Provides a foundation for subsequent courses offered by the Department. In the Michaelmas Term, the course covers asset markets and valuation. The valuation of fixed-income securities is covered first, followed by the valuation of stocks, and derivatives such as futures and options. Concepts emphasized include the present-value formula, valuation by arbitrage, portfolio theory, the CAPM, market efficiency, and binomial and Black-Scholes models. In the Lent Term, the course covers corporate finance. This part starts with capital budgeting techniques, in relation to CAPM and other valuation instruments. The course then proceeds identifying the driving forces behind capital structure decisions and choices over debt and equity finance. Special consideration is given to the tax implications of those choices, the possible costs of financial

distress, the incentive implications of financial decisions and the signalling impact of those for financial market participants. A final part of the course covers some specific topics in corporate finance: decision to go public, mergers and acquisitions and possibly (time permitting), dividend policy, corporate governance issues.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT. 20 hours of lectures and 9 hours of seminars in the LT.

Formative coursework: Weekly problem sets covered in classes.

Indicative reading: J. Berk and P. DeMarzo, *Corporate Finance*, Pearson International Edition. Z. Bodie, A. Kane and A. Marcus, *Investments*, 8th edition, McGraw Hill. ISBN:0-07-338237-X. Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Please note this examination is the full unit version of the exams taken on FM429 Asset Markets A (H) and FM431 Corporate Finance A (H).

FM431L Half Unit Corporate Finance A

This information is for the 2020/21 session.

Teacher responsible: Dr Juanita Gonzalez Uribe

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics and MSc in Risk and Finance. This course is not available as an outside option. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only)

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is not available as an outside option.

Outside students should consider taking FM474L Managerial Finance as an alternative option.

This course cannot be combined with FM430 Corporate Finance and Asset Markets or FM474 Managerial Finance.

Pre-requisites: Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised

Course content: The course covers range of topics in corporate finance starting with capital budgeting techniques, in relation to CAPM and other valuation instruments. The course then proceeds identifying the driving forces behind capital structure decisions and choices over debt and equity finance. Special consideration is given to the tax implications of those choices, the possible costs of financial distress, the incentive implications of financial decisions and the signalling impact of those for financial market participants. A final part of the course covers some specific topics in corporate finance: decision to go public, mergers and acquisitions and start-up finance (time permitting).

Teaching: 20 hours of lectures and 9 hours of seminars in the LT.

Formative coursework: Students will be set weekly problem set assignments. Solutions and guidance will be provided during the weekly seminar classes. The final seminar class, students will solve a formative mock exam. Students will receive individual feedback on the mock exam prior to the final exam.

Indicative reading: J. Berk and P. DeMarzo, *Corporate Finance*, Pearson International Edition. Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

Assessment: Exam (100%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the summer exam period.

Please note this exam is the half unit version of the examination taken on FM430 Corporate Finance and Asset Markets. Any student who takes both FM429 and FM431 will be re-registered to sit the FM430 full-unit exam paper in Summer Term.

FM431M Half Unit Corporate Finance A

This information is for the 2020/21 session.

Teacher responsible: Dr Juanita Gonzalez Uribe

Availability: This course is compulsory on the MSc in Economics and Management. This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Risk and Finance. This course is not available as an outside option. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director. This course is not available as an outside option.

Outside students should consider taking FM474 Managerial Finance as an alternative option.

This course cannot be combined with FM430 Corporate Finance and Asset Markets or FM474 Managerial Finance.

Pre-requisites: Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised.

Course content: The course covers range of topics in corporate finance starting with capital budgeting techniques, in relation to CAPM and other valuation instruments. The course then proceeds identifying the driving forces behind capital structure decisions and choices over debt and equity finance. Special consideration is given to the tax implications of those choices, the possible costs of financial distress, the incentive implications of financial decisions and the signalling impact of those for financial market participants. A final part of the course covers some specific topics in corporate finance: decision to go public, mergers and acquisitions and start-up finance (time permitting).

Teaching: 20 hours of lectures and 9 hours of seminars in the MT.

Formative coursework: Students will be set weekly problem set assignments. Solutions and guidance will be provided during the weekly seminar classes. The final seminar class, students will solve a formative mock exam. Students will receive individual feedback on the mock exam prior to the final exam.

Indicative reading: J. Berk and P. DeMarzo, *Corporate Finance*, Pearson International Edition. Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

Assessment: Exam (100%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the summer exam period.

Please note this exam is the half unit version of the examination taken on FM430 Corporate Finance and Asset Markets. Any student who takes both FM429 and FM431 will be re-registered to sit the FM430 full-unit exam paper in Summer Term.

FM436 Financial Economics

This information is for the 2020/21 session.

Teacher responsible: Prof Ian Martin, Dr Igor Makarov and Prof Michael Burkart

Availability: This course is compulsory on the MRes/PhD in Accounting (EoA) (Economics of Accounting Track), MRes/PhD in Finance, MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Mathematical background at the level of the September Courses in Mathematics and Financial Economics Preparatory Course is assumed.

Course content: Financial Economics provides students with an in-depth introduction to the theories of asset pricing and corporate finance. The course analyses investors' behaviour, market equilibrium, the pricing of securities, the valuation of real

assets, and capital structure choice. Topics in asset pricing will encompass portfolio choice, complete and incomplete markets, mean-variance portfolio theory and equilibrium asset pricing, pricing with no arbitrage, Black-Scholes and other contingent claims pricing models, and the behaviour of financial markets during crises. Topics in corporate finance will encompass valuation methods and financing decisions in the presence of taxation, agency frictions, and asymmetric information.

Teaching: 60 hours of lectures in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Problem sets, covered in classes.

Indicative reading: Readings will be based on teaching notes and journal articles.

Assessment: Exam (80%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Coursework (20%).

FM437

Financial Econometrics

This information is for the 2020/21 session.

Teacher responsible: Dr Thummim Cho and Dr Christian Julliard

Availability: This course is compulsory on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Mathematical background to the level of the course taught in September in the Economics Department (EC400) is assumed.

Course content: This course covers the techniques of empirical investigation in economics and finance. Students are introduced to recent empirical findings based on asset pricing and corporate finance models. The course includes a selection of the following topics: multivariate regression; maximum likelihood and methods of moments estimation; hypothesis testing; omitted variables and misspecification; asymptotic theory; measurement error and instrumental variables; time-series modelling; predictability of asset returns; event study analysis; econometric tests of the CAPM and multifactor models; volatility modelling; generalised method of moments estimation.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Exercises are provided each week and they are discussed in class.

Indicative reading: The textbook for the Michaelmas Term is *Econometrics* by Bruce E. Hansen, available online. A complete reading list is available at the beginning of session. Will be based on Greene, *Econometric Analysis*, Prentice-Hall; Campbell, Lo & MacKinlay, *The Econometrics of Financial Markets*, Princeton University Press; *Econometric Analysis of Cross Section and Panel Data*, J. Wooldridge; selected published articles.

Assessment: Exam (45%, duration: 2 hours) in the January exam period.

Exam (45%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.

Coursework (10%) in the MT and LT.

FM441 Half Unit

Derivatives

This information is for the 2020/21 session.

Teacher responsible: Dr Rohit Rahi

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Risk and Finance, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

Pre-requisites: This is an advanced course. Students will be expected to have a good grasp of basic probability theory and multivariate calculus.

Course content: The course provides a thorough grounding in the theory of derivatives pricing and hedging. Both discrete-time and continuous-time models will be covered, including a comprehensive treatment of the Black-Scholes model. A special feature of the course is its emphasis on the modern theory of no-arbitrage pricing using martingale methods. These methods will be applied to the pricing of equity options, forwards, futures and interest rate derivatives. The uses of derivatives in hedging and risk-management will be discussed as well.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Weekly problem sets in classes (10).

Indicative reading: Teaching notes will be distributed. No one book covers the entire course, but the following is an excellent reference: John C Hull, *Options, Futures and Other Derivatives*.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

FM442 Half Unit

Quantitative Methods for Finance and Risk Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Philippe Mueller

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Risk and Finance, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit.

Pre-requisites: A strong background in statistics and quantitative methods at the undergraduate level is required. Prior programming experience is helpful.

Course content: This graduate-level course covers important quantitative and statistical tools in applied finance. It studies financial markets risk, with a particular focus on models for measuring, assessing and managing financial risk. Students will be introduced to the application of these tools and the key properties of financial data through a set of computer-based homework assignments and classes.

The course aims to introduce quantitative concepts and techniques in many areas of finance. Sample topics include Risk Measures (e.g., Value-at-Risk and Expected Shortfall, including implementation and backtesting), univariate and multivariate volatility models, Factor Models, Principal Components Analysis,

Options Pricing, Binomial Trees, Monte Carlo Simulations, and associated topics in Econometrics. This list is meant to be representative, but topics may be added or removed. Implementing the models and tools in R is an essential part of the course. The homework assignments are designed to guide the students to all stages of the analytical process, from locating, downloading and processing financial data to the implementation of the tools and interpretation of results. Students will have the opportunity to explore the databases available at the LSE and to become comfortable working with real data.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Six homework assignments to be solved using R.

Indicative reading: No single text covers the course material. The relevant sections of the following readings would be appropriate for individual topics: Jon Danielsson (2011), *Financial Risk Forecasting*; Ruey Tsay (2010), *Analysis of Financial Time Series*; Pietro Veronesi (2010), *Fixed Income Securities: Valuation, Risk, and Risk Management*.

Assessment: Exam (30%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the summer exam period.

Project (70%) in the MT.

FM445 Half Unit Portfolio Management

This information is for the 2020/21 session.

Teacher responsible: Dr Walker Ray

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics, MSc in Economics and Management, MSc in Financial Mathematics and MSc in Risk and Finance. This course is not available as an outside option. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit. This course is not available as an outside option.

Course content: This course aims to cover the main topics in equity portfolio management. Some of the topics covered in the course include: Portfolio optimization techniques; Multi-factor models and their applications; Trading strategies; International portfolio management and currency hedging; Trading costs; Portfolio performance measurement and attribution; Style analysis; Mutual funds; Hedge funds. The course is based on a number of empirical applications and case studies, so that students can gain a better understanding of implementation issues related to managing an equity portfolio.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course. For the most part, the classwork is based on Excel applications of the models and empirical studies covered in lectures.

Indicative reading: A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are *Modern portfolio theory and investment analysis*, by E. J. Elton, M. J. Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; *Modern investment management*, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press; *Investments*, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin.

Assessment: Exam (80%, duration: 2 hours, reading time: 10 minutes) in the summer exam period. Coursework (20%).

The 20% coursework comprises five homework assignments and one project.

FM447 Half Unit Global Financial Systems

This information is for the 2020/21 session.

Teacher responsible: Dr Jon Danielsson

Availability: This course is available on the MSc in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not open to students on the MSc Economics and Managements and students from the following departments: Economics, Finance, Mathematics, and Statistics

Pre-requisites: Students should have some background in economics, and be comfortable with formal arguments

Course content: This course examines the academic and policy debates on the operation of the global financial system. The course will aim to be topical, where the analysis of the issues will be based on economic arguments. The course begins with analysis of systemic risk, followed by an overview of important financial crisis and key institutions. The role of cryptocurrencies, fintech, artificial intelligence and machine learning on the financial system will be discussed. Several theories of financial crises are then developed in some detail, and are assessed by reference to historical experience. The course concludes by analysis of the 2008 crisis, the latest policy and regulatory developments (including Basel III), monetary policy and interest rate normalization and their relationship with inequality, the current situation in the European Union, Brexit, Trump, the role of China and the impact of Coronavirus on the financial system.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students are expected to attempt the problem sets and essay questions set in the classes.

Indicative reading: Most material will be provided by the book *Global Financial Systems* (www.globalfinancialsystems.org), by Jon Danielsson, published by Pearson

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

FM457 Not available in 2020/21 Applied Computational Finance

This information is for the 2020/21 session.

Teacher responsible: Mr Alberto Pellicoli

Availability: This course is available on the MSc in Accounting and Finance, MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway) and MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

FM457A is intended for students taking FM442 Quantitative Methods for Finance and Risk Analysis and FM404 Forecasting Financial Time Series.

FM457B is available to students on the MSc Finance (Full-time), MSc Finance and Private Equity, MSc Finance and Economics and MSc Risk and Finance programmes.

Course content: Applied Computational Finance is a non-assessed, optional course intended to provide a solid foundation in the R numerical programming package. It does not assume students have any prior programming knowledge. It is based on the R/RStudio environment and basic programming concepts, moving on to libraries, functions, plotting, source code management, how to import data locally and via internet APIs, basic analysis and big data techniques. The course uses practical problems in finance for illustration, like risk analysis, price forecasting and derivative pricing.

Teaching: FM457A: 10 hours of seminars in the MT.

FM457B: 10 hours of seminars in the MT.

Indicative reading: Teaching notes will be distributed.

Assessment:

This is an additional, non-assessed computer course to supplement MSc level courses in the Department of Finance.

FM458 Not available in 2020/21 Financial Economics Preparatory Course

This information is for the 2020/21 session.

Teacher responsible: Mr Karamfil Todorov

Availability: This course is compulsory on the MSc in Finance and Economics. This course is not available as an outside option.

Course content: The aim of this course is to supplement the Economics pre-session course and provide students with the essential quantitative methods for the core Finance course FM436. The course will introduce foundational material essential to the study of both asset pricing in continuous time and corporate finance theory.

Teaching: 30 hours of lectures in the MT.

Indicative reading: Mikosch, Elementary Stochastic Calculus

(1998), World Scientific; Shreve, Stochastic Calculus for Finance I, II

Assessment: No formal assessment. Students will sit a mock exam based upon the material to aid learning.

FM472 Half Unit International Finance

This information is for the 2020/21 session.

Teacher responsible: Dr Elisabetta Bertero

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting and Finance and MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on other MSc programmes are welcome to choose this course, provided their MSc programme regulations permit and provided they meet the pre-requisites below. These students need to sign up for the course on LfY first and then email the course leader with information on their economics and/or finance background and their motivation for choosing the course. The course leader will then approve their application on LSE for You. In the past students on the International Political Economy MSc, MPP, MPA, MSc in Economic History, European Institute, Master of Science in Development Management, Master of Science in Economy Risk and Society, Master of Science in Law and Accounting have enjoyed this course.

This course is not open to students from the following departments: Economics, Finance, Mathematics, and Statistics.

Pre-requisites: Essential information for the compulsory research project and an overview of the course are provided during the first lecture and the first class in January 2021. Students interested in this course, whether already enrolled or exploring the course as a possible option, are required to attend both lecture and class during the first week of term.

Course content: The objective of the course is to equip students with the relevant academic research, techniques and analytical skills to interpret current developments in the fast-changing area of international finance, from the shifts in capital flows to the electrification of forex trading, from the persisting dominance of the US dollar in the international monetary order to China's alleged exchange rate manipulations, from the development of cryptocurrencies to the turbulence in the oil market, from the rise in global imbalances to the Eurozone response to COVID-19. This course approaches such key issues and topics in international

finance using foreign exchange and exchange rates as a unifying theme. The foreign exchange market is the largest financial market, turning over every couple of weeks the equivalent of the yearly value of pre-C19 global GDP. It is also a unique market where prices are determined not only by the fundamentals of this asset class but also by government and central bank interventions. Exchange rates are an open economy's most important price as they can affect the relative value of the entire economy.

This course provides a 360-degree perspective on exchange rates divided into four parts: theory, government policy, global risk and markets.

First, the course considers what finance and economic theory identify as the determinants of the relative price of two currencies. Macroeconomic, market microstructure and behavioural finance approaches are examined. Second, the course analyses governments' available policy choices to influence the level and volatility of the relative price of its currency and how these choices differ for higher income and lower income economies. Third, the course examines exchange rates as a source and conduit of global financial instability. Fourth, the course focuses on the risk and exposure for investors and firms arising from exchange rate market volatility. It examines the valuation of currency instruments and their use in strategies to hedge that exposure. It also analyses the structure, trading and organisation of the forex market and its central role in international finance.

The course incorporates theoretical, empirical, policy and institutional dimensions. The teaching approach emphasises the intuitions at the core of the quantitative aspects. It also discusses how the historical evolution of research in this area has resulted in the currently used theoretical frameworks.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students are required to undertake a group research project on a given topic in international finance.

Indicative reading: A selection of journal articles; background reading from a textbook such as Keith Pilbeam International Finance (Palgrave, 2013, 4th edition)

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Research project (10%) and continuous assessment (10%) in the LT.

Continuous assessment takes the form of class preparation throughout the teaching term and is worth 10%.

FM473L Half Unit Financial Markets

This information is for the 2020/21 session.

Teacher responsible: Dr Cynthia Balloch

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Real Estate Economics and Finance, MSc in Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

Students on the MSc in Accounting, Organisations and Institutions need permission from the Programme Director to enrol in this course.

This course is not open to students in the MSc Accounting and Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.

This course cannot be combined with FM429 Asset Markets A or FM430 Corporate Finance and Asset Markets.

Pre-requisites: The course assumes no previous knowledge of finance, economics and statistics, and requires only basic knowledge of mathematics. However, the course is quantitative and students must be willing to learn and work with new concepts in mathematics and statistics. Course work will involve a

significant amount of algebra and numerical exercises. Students should be comfortable with 'High School' level Mathematics and simple algebra, e.g. the ability to solve linear systems of two equations and two unknowns.

Course content: This course is a self-contained introduction to finance and it covers roughly the same topics as FM429. The course explores the way that firms and the capital market function to channel savings toward productive investments. From the investor's perspective it considers characteristics of the major financial contracts and the principles used in their valuation. It considers how investors should select their portfolios and the implications of this behaviour for pricing assets in stock and bond markets. It explores the question of whether stock markets are efficient in reflecting investors' information. It applies these insights to the firm's financial management decision of whether or not to invest in a risky project and how to select among alternative investments. In addition, the course also covers some core corporate finance questions, such as capital structure choices. The course is also related to FM474 (Managerial Finance): both are introductory courses in Finance. FM473 focuses mostly on understanding the workings of financial markets, the determination of asset prices, and the decisions made by financial investors. FM474 studies financial decisions from the perspective of firms (i.e., "Corporate Finance"). Although there is some small amount of overlap between FM473 and FM474, both courses can be taken simultaneously or sequentially, in any order.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

There will be 10 three-hour sessions. Attendance is required.

This course is taught twice, in both Michaelmas and Lent Term. Students must either register for FM473M which is taught in Michaelmas Term, or FM473L which is taught in Lent Term.

Indicative reading: Brealey, Myers and Allen, Principles of Corporate Finance.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

FM473M Half Unit Financial Markets

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Burkart

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Real Estate Economics and Finance, MSc in Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

Students on the MSc in Accounting, Organisations and Institutions need permission from the Programme Director to enrol in this course.

This course is not open to students in the MSc Accounting and Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.

This course cannot be combined with FM429 Asset Markets A or FM430 Corporate Finance and Asset Markets.

Pre-requisites: The course assumes no previous knowledge of finance, economics and statistics, and requires only basic knowledge of mathematics. However, the course is quantitative and students must be willing to learn and work with new concepts in mathematics and statistics. Course work will involve a significant amount of algebra and numerical exercises. Students should be comfortable with 'High School' level Mathematics and simple algebra, e.g. the ability to solve linear systems of two

equations and two unknowns

Course content: This course is a self-contained introduction to finance and it covers roughly the same topics as FM429. The course explores the way that firms and the capital market function to channel savings toward productive investments. From the investor's perspective it considers characteristics of the major financial contracts and the principles used in their valuation. It considers how investors should select their portfolios and the implications of this behaviour for pricing assets in stock and bond markets. It explores the question of whether stock markets are efficient in reflecting investors' information. It applies these insights to the firm's financial management decision of whether or not to invest in a risky project and how to select among alternative investments. In addition, the course also covers some core corporate finance questions, such as capital structure choices. The course is also related to FM474 (Managerial Finance): both are introductory courses in Finance. FM473 focuses mostly on understanding the workings of financial markets, the determination of asset prices, and the decisions made by financial investors. FM474 studies financial decisions from the perspective of firms (i.e., "Corporate Finance"). Although there is some small amount of overlap between FM473 and FM474, both courses can be taken simultaneously or sequentially, in any order.

Teaching: 30 hours of lectures in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive. There will be ten three-hour sessions. Attendance is required.

This course is taught twice, in both Michaelmas and Lent Term. Students must either register for FM473M which is taught in Michaelmas Term, or FM473L which is taught in Lent Term.

Indicative reading: Brealey, Myers and Allen, Principles of Corporate Finance.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

FM474L Half Unit Managerial Finance

This information is for the 2020/21 session.

Teacher responsible: Dr Hongda Zhong and Dr Huan Tang

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting, Organisations and Institutions, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

This course is not open to students in the MSc Accounting and Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.

This course cannot be combined with FM430 Corporate Finance and Asset Markets or FM431 Corporate Finance A.

Course content: This course is a self-contained introduction to finance and it covers roughly the same topics as FM431. The aim of the course is to provide a comprehensive overview of firms' financial decision making. The course is designed to provide an applied and practical approach to finance, enabling the students to address topical issues that modern corporations face. In particular, the course builds on concepts such as valuation and capital structure theories, and applies those tools in a systematic and rigorous way to real-life financial management problems. After a brief introduction to financial markets, the course focuses on corporate finance and business valuation. Topics such as mergers and acquisitions and initial public offerings will also be covered. The course is also related to FM473 (Financial Markets): both are introductory courses in Finance. FM473 focuses mostly on

understanding the workings of financial markets, the determination of asset prices, and the decisions made by financial investors. FM474 studies financial decisions from the perspective of firms (i.e., "Corporate Finance"). Although there is some small amount of overlap between FM473 and FM474, both courses can be taken simultaneously or sequentially, in any order.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

This course will be taught in two or three separate groups. Each group will meet for a single block of three hours once a week. Each student will be assigned to one group. Students will not be allowed to choose their groups or to switch groups.

The course requires weekly in-class activities and discussions. Students must prepare for class activities in advance. Attendance is required.

Formative coursework: Weekly homeworks.

Indicative reading: Brealey, Myers and Allen, Principles of Corporate Finance.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

FM474M Half Unit Managerial Finance

This information is for the 2020/21 session.

Teacher responsible: Dr Hongda Zhong and Dr Huan Tang

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting, Organisations and Institutions, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

This course is not open to students in the MSc Accounting and Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.

This course cannot be combined with FM430 Corporate Finance and Asset Markets or FM431 Corporate Finance A

The course requires weekly in-class activities and discussions.

Students must prepare for class activities in advance. Attendance is required.

Formative coursework: Weekly homeworks.

Indicative reading: Brealey, Myers and Allen, Principles of Corporate Finance.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

FM476 Half Unit Entrepreneurial Finance

This information is for the 2020/21 session.

Teacher responsible: Professor Daniel Paravisini

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting and Finance, MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway), MSc in Management (1 Year Programme), MSc in Risk and Finance and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This half unit is capped with a capacity limit to the number of students registered on the course. A lottery process is undertaken to allocate places on units which are oversubscribed. Students are recommended to have clear alternatives in mind should they not be successful with an application for this capped half unit.

Pre-requisites: Basic Mathematics and Statistics knowledge.

N.B. - It is **mandatory** to attend the first week's class in Lent Term in order to register for FM476 Entrepreneurial Finance. Students who did not attend these classes will **not** be permitted to then join the course.

Course content: After introducing students to methods to assess business plans as well as methods to identify and value business ventures and growth opportunities in the opening part of the course, the bulk of the first half of the course concentrates on obtaining financial resources. It covers a broad set of instruments (venture capital, angel finance, crowdsourcing, venture debt) used by entrepreneurial firms and aims to help the student understand how the staged financing process of a new venture works, and to be able to assess when to raise financing and how to structure it. The second half of the course focuses on practical applications in negotiation, development of a business plan, and evaluation of real-life ventures raising funding.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

This course will be taught in two separate groups. Each group will meet for a single block of three hours once a week. Each student will choose which group they want to belong to at the beginning of the course and continue with the same group for the rest of the term.

The course requires weekly in-class and out-of-class activities and discussions. Students must prepare for class activities in advance. There is a significant amount of in-term work, group work, and other activities. Attendance is required.

Formative coursework: All the work done in and out of the classroom will be assessed.

Indicative reading: Detailed course programmes and reading lists

are distributed at the start of the course. The course pack include lecture notes and case studies for summative and formative assessments.

Assessment: Continuous assessment (100%).

Summative assessment will take the form of individual reports, group reports, business plan exercises and peer evaluations.

FM477 Half Unit

International Finance for MSc Finance and Economics, MSc Finance and Economics, MSc Finance & Private Equity

This information is for the 2020/21 session.

Teacher responsible: Dr Liliana Varela

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed either Asset Markets (FM423 or FM423E) and Corporate Finance (FM422 or FM422E), or Financial Economics (FM436)

Course content: Following an introduction to the exchange rate market, the course will focus on key elements of international financial management, international risk exposure, hedging via FX derivatives (forwards, futures, options, and swap contracts), international capital budgeting and valuation techniques, international corporate fund raising, as well as cross-border mergers. The course will next focus on exchange rate determination and forecasting, the international monetary system, balance of payments, crises in open economies and current issues of the global economy. Relevant concepts will be illustrated throughout via topical business and country cases.

Teaching: 30 hours of seminars in the LT.

The course will be taught in an interactive Harvard-style three-hour lecture block integrating lectures and classes.

Formative coursework: Weekly problem sets covering both theoretical methods and practical applications.

Indicative reading: Detailed course readings, cases, and slides will be distributed at the start of the course. Illustrative texts include: International Financial Management by C. S. Eun and B. G. Resnick, McGraw-Hill Education; 8th edition (2018), International Financial Management by G. Bekaert and R. Hodrick, Cambridge University Press; 3rd edition (2017) and Maurice Obstfeld and Kenneth Rogoff, Foundations of International Macroeconomics, The MIT Press (1996).

Assessment: Continuous assessment (100%) in the LT.

FM478 Half Unit

International Finance for MSc Finance and Economics, MSc Finance and Economics, MSc Finance & Private Equity - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Liliana Varela

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: This is the dissertation course for FM477.

Students must have completed either Asset Markets (FM423 or FM423E) and Corporate Finance (FM422 or FM422E), or Financial Economics (FM436).

Course content: See entry for FM477

Teaching: 30 hours of seminars in the LT.

Indicative reading: Detailed course readings, cases, and slides will be distributed at the start of the course. Illustrative texts include: International Financial Management by C. S. Eun and B. G. Resnick, McGraw-Hill Education; 8th edition (2018), International Financial Management by G. Bekaert and R. Hodrick, Cambridge University Press; 3rd edition (2017) and Maurice Obstfeld and Kenneth Rogoff, Foundations of International Macroeconomics, The MIT Press (1996).

Assessment: Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

FM481 Not available in 2020/21

Financial Econometrics for Research Students

This information is for the 2020/21 session.

Teacher responsible: Dr Christian Julliard

Prof Alexey Onatskiy

Availability: This course is compulsory on the MRes/PhD in Finance. This course is available as an outside option to students on other programmes where regulations permit. Optional on MRes/PhD Economics.

Pre-requisites: Strong background in statistics and mathematics; some knowledge of Economics and Finance.

Course content: The Lent Term of FM481 is shared with FM404 Forecasting Financial Time Series.

Part 1 – Probability, Mathematical Statistics, and Asymptotic Theory, provides students with an understanding of basic concepts in probability and statistics with a view of eventual use for econometric analysis of financial data. Including Basic Probability Concepts, Random Variables, Selected Probability Distributions, Modes of Convergence, Properties of Estimators, Frequentist Hypothesis Testing and Bayesian Inference.

Part 2 - Theory and application of regression analysis, covers estimation and inference theory for regression models. The topics covered are least squares estimation, maximum likelihood estimation, instrumental variable estimation, and generalized method of moments estimation, with applications to linear models, many and weak instrument problems, limited dependent variable models, and panel data models.

Part 3 - The course provides a survey of the theory and application of time series methods in econometrics. The main objective of this course is to develop the skills needed to do empirical research in fields operating with time series data sets. The topics covered are: Hilbert spaces, projections, Wold theorems, ARMA models, Z-transform, convolution theorem, W-K prediction, Spectral analysis; Structural VAR Models; State Space Representations; Models with time-varying coefficients and stochastic volatility; Nonlinear filtering (particle filters); Unit Roots, Spurious Regressions and Cointegration; Predictability.

Teaching: 22 hours of lectures in the MT. 22 hours of lectures in the LT.

Formative coursework: Weekly classwork and problem sets.

Indicative reading:

- Cameron and Trivedi: Microeconometrics. Methods and Applications.
- Campbell, Lo and MacKinlay: The Econometrics of Financial Markets
- Geweke: Contemporary Bayesian Econometrics and Statistics
- Gouriéroux and Jasiak: Financial Econometrics: Problems, Models and Methods.

- Greene: Econometric Analysis.
- Johannes and Polson: Computational Methods for Bayesian Inference.
- Hamilton: Time-Series Analysis.
- Hayashi: Econometrics
- Roberts and Whited: "Endogeneity in Empirical Corporate Finance," Handbook of the Economics of Finance, vol. 2.
- Sargent, T., (1987), Macroeconomic Theory, chapters IX-XI.
- Wooldridge: Econometric Analysis of Cross-Section and Panel Data.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

FM482

Research paper in Finance

This information is for the 2020/21 session.

Teacher responsible: PhD Programme Director

Availability: This course is compulsory on the MRes/PhD in Finance. This course is not available as an outside option.

Course content: Students produce a research paper, between 6,000 and 8,000 words, related to the student's designated major field, to be submitted at the end of August.

Teaching: There are no direct teaching hours.

Formative coursework: Feedback on progress will be provided by the student's PhD Supervisor.

Assessment: Research paper (100%).

The research paper will be 6-8,000 words in length.

FM4T1 Half Unit Not available in 2020/21

Forecasting Financial Time Series - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Christian Julliard

Availability: This course is available on the MSc in Economics, MSc in Economics (2 Year Programme), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM404

Teaching: See entry for FM404

Assessment: Dissertation (90%, 6000 words) in the ST. Coursework (10%).

6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline is towards the end of Summer Term.

FM4T2 Half Unit

Applied Corporate Finance - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Ashwini Agrawal

Availability: This course is available on the MSc in Economics, MSc in Economics (2 Year Programme), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM421

Teaching: See entry for FM421

Assessment: Dissertation (90%, 6000 words) in the ST. Coursework (10%) in the LT.

6,000 word dissertation (90%) on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course

teacher who will act as the student's supervisor. Submission deadline is towards the end of Summer Term.

FM4T4 Half Unit

Corporate Investment and Financial Policy - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Prof Daniel Ferreira

Availability: This course is available on the MSc in Finance (full-time) and MSc in Finance (full-time) (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM414.

Teaching: See entry for FM414.

Assessment: Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

FM4T5 Half Unit

Portfolio Management - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Walker Ray

Availability: This course is available on the MSc in Economics, MSc in Economics (2 Year Programme), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM445

Teaching: See entry for FM445

Assessment: Dissertation (80%, 6000 words) in the ST.

Coursework (20%) in the LT.

6,000 word dissertation (80%) on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline is towards the end of Summer Term.

FM4T6 Half Unit

Topics in Portfolio Management - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Michela Verardo

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM406

Teaching: See entry for FM406

Assessment: Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

FM4T7 Half Unit Not available in 2020/21 Global Financial Systems - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Jon Danielsson

Availability: This course is not available as an outside option.

Course content: See entry for FM447

Teaching: See entry for FM447

Assessment: Dissertation (100%, 6000 words) in the ST.

6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline is towards the end of Summer Term.

FM4T8 Half Unit Financial Engineering - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Jean-Pierre Zigrand

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM408

Teaching: See entry for FM408

Assessment: Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

FM4T9 Half Unit Not available in 2020/21 International Finance - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Elisabetta Bertero

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM472

Teaching: 30 hours of seminars in the LT.

See entry for FM472

Assessment: Dissertation (70%, 6000 words) and coursework (30%) in the ST.

6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline is towards the end of Summer Term.

FM4U1 Half Unit Fixed Income Markets - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Walker Ray

Availability: This course is available on the MSc in Economics and MSc in Economics (2 Year Programme). This course is not available as an outside option.

Course content: See entry for FM413

Teaching: See entry for FM413

Assessment: Dissertation (100%, 6000 words) in the ST.

6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline is towards the end of Summer Term.

FM4U2 Half Unit Quantitative Methods for Finance and Risk Analysis (Dissertation)

This information is for the 2020/21 session.

Teacher responsible: See FM442 Course Guide

Availability: This course is available on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM442

Teaching: See entry for FM442

Assessment: Dissertation (80%, 6000 words) in the ST.

Coursework (20%) in the MT.

6,000 word dissertation (80%) on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline is towards the end of Summer Term.

FM4U4 Half Unit Quantitative Security Analysis - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Jean-Pierre Zigrand

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM412

Teaching: See entry for FM412

Assessment: Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

FM4U5 Half Unit Fixed Income Securities and Credit Markets - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Peter Kondor

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM405

Teaching: See entry for FM405

Assessment: Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor.

Submission deadline will be in Summer Term.

FM4U7 Half Unit

Mergers, Buyouts and Corporate Restructurings - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Vicente Cuñat

Availability: This course is available on the MSc in Finance (full-time) and MSc in Finance (full-time) (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM407

Teaching: See entry for FM407

Assessment: Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

FM4U9 Half Unit Not available in 2020/21

Risk Management in Financial Markets - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Christian Julliard

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM409

Teaching: See entry for FM409

Assessment: Dissertation (90%, 6000 words) and coursework (5%) in the ST.

Presentation (5%).

6,000 word dissertation in lieu of examination (90%) on a topic to be agreed with the course teacher, and coursework (10%). The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be towards the end of Summer Term.

GI402 Half Unit

Gender, Knowledge and Research Practice

This information is for the 2020/21 session.

Teacher responsible: Dr Marsha Henry

Availability: This course is compulsory on the MPhil/PhD in Gender, MSc in Gender and MSc in Gender (Research). This course is available on the MSc in Culture and Society, MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. Please note the course is limited to 30 students.

Course content: This course introduces students to the central issues at stake in designing and carrying out gender research at graduate and postgraduate level and beyond. The course maps the history of debates about gender and feminist research, and asks what difference it makes to take gender as the subject or object of research. Of particular concern are the ethical and political issues

arising from doing gender research with respect to representing others and seeking to influence and engage with broader social contexts among other topics. The course is interdisciplinary, introducing students to a range of perspectives on knowledge production and research practice. It engages with epistemologies and methodologies that are centered in decolonial, black feminist, queer, trans, anti-abelist, and other intersectional approaches. Offering critiques of existing knowledge practices, it highlights the specific challenges to 'mainstream knowledge' that come from intersectional gendered and feminist perspectives. It explores how knowledge is produced and offers critical assessments of the dominant debates in gendered research practice, asking how we ensure that we conduct research ethically. Finally, the course focuses on the methodological challenges arising within interdisciplinary research.

Teaching: This course runs in Michaelmas term. It contains both asynchronous and interactive teaching and learning elements. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Proposal Essay (1500 words) in the MT.

Indicative reading:

- Patricia Hill Collins (2000) *Black Feminist Thought: Knowledge, Consciousness and the Politics of Empowerment*. New York: Routledge.
- Sara Ahmed (2016) *Living a feminist life*. Duke University Press.
- Uma Narayan and Sandra Harding, eds (2000) *Decentering the Center: Philosophy for a Multicultural, Postcolonial and Feminist World*. 160Bloomington: Indiana University Press.

Assessment: Project (100%, 3000 words) in the LT.

The project includes one part research proposal and one part reflective essay.

GI403 Half Unit

Gender and Media Representation

This information is for the 2020/21 session.

Teacher responsible: Dr Leticia Ines Alexandre Sabsay PAN 11.01D

Availability: This course is compulsory on the MSc in Gender, Media and Culture. This course is available on the CEMS Exchange, MBA Exchange, MPhil/PhD in Gender, MSc in Culture and Society, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Policy and Inequalities and MSc in Organisational and Social Psychology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course aims to enable students: to think critically about representations of gender in a range of different media; to apply a range of theoretical and methodological approaches to the study of the media; to examine changing representations of gender in the context of wider social changes and to explore questions concerning the interpretation and use of different media formats and content. The course focuses on examples largely drawn from Anglo-American media and usually includes topics such as news media and gender; gendered approaches to contemporary cinema; online environments and gender, and critically explores terms such as 'postfeminism' in relation to media content. The course also considers themes such as the nature of contemporary celebrity and questions of media representations of gender in relation to dimensions such as sexuality, class, race, age and (dis)ability. Students will be expected to maintain familiarity with contemporary UK media, although there is opportunity to research and write on other national contexts.

Teaching: The course runs across the MT. It contains both asynchronous and interactive teaching and learning elements.

Formative coursework: A short essay to be submitted during MT.

Indicative reading:

- Carter C and Steiner L (eds) (2004) *Critical Readings: Media and*

Gender

- Dyer, R. (2002) *The Matter of Images: Essays on Representation*.
- Gill, R. (2007) *Gender and the Media*
- Hall, S. (1997) *Representation: Cultural Representations and Signifying Practices*.
- Tasker, Y. and Negra, D. (eds) (2007) *Interrogating Postfeminism: Gender and the Politics of Popular Culture* (Console-ing Passions).
- van Zoonen, L. (1994) *Feminist Media Studies*.
- Waters, M. (ed) (2011) *Women on Screen*.

Assessment: Essay (100%, 3000 words) in the LT.

GI407

Globalisation, Gender and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Nazanin Shahrokni

Availability: This course is compulsory on the MSc in Gender, Development and Globalisation. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MPhil/PhD in Gender, MSc in Development Management, MSc in Development Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Policy and Inequalities, MSc in Human Rights and MSc in Human Rights and Politics. This course is available as an outside option to students on other programmes where regulations permit.

This course cannot be taken alongside GI409 Gender, Globalisation and Development: An Introduction, or GI420 Globalisation, Gender and Development: Theorising Policy and Practice.

Course content: This course will provide students with a thorough knowledge of two key interconnected and intersecting literatures: gender and development and gender and globalisation. We begin by defining and theorising gender, development and globalisation and their operation in material spaces, policy and practice. The first part of the course considers contemporary theories of globalisation and development and the differences that a gender perspective makes. A particular focus is on how globalisation is associated with widening social, spatial and gender inequalities. Specific reference is made to household inequalities, state policies, global care chain and migrant labourers, the emergence of the "global city," and "natural" disasters and pandemics, and their implications for social and gender inequalities. The final session brings the issues raised in the first part of the course to a conclusion by addressing some alternative visions of social change in the context of a globalised world.

The second half of the course is concerned with theorising policies and practice in the field of gender and international development. The course outlines key contributions to the analysis of power within public policy making processes and examines feminist visions of social change which draw on ideas about capabilities, empowerment, citizenship and gender justice to engage with these policy processes. This is explored in greater detail through case studies of feminist struggles over recognition, redistribution and representation as they play out in relation to particular policy issues, namely violence against women, microfinance, social protection, gender quotas and collective action.

Teaching: This course runs across both MT and LT. It contains both asynchronous and interactive teaching and learning elements. There will be a reading week in both terms in week 6 in line with departmental policy.

Formative coursework: Essay (1500 words) in the MT.

Indicative reading:

- Agarwal, B. (2016) *Gender Challenges* (Vol 1, 2 and 3). India: Oxford University Press.

GI409 Half Unit

Gender, Globalisation and Development: An Introduction

This information is for the 2020/21 session.

Teacher responsible: Dr Anouk Patel-Campillo

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPhil/PhD in Gender, MSc in Development Management, MSc in Development Studies, MSc in Empires, Colonialism and Globalisation, MSc in Environment and Development, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Human Geography and Urban Studies (Research), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit. This course cannot be taken alongside GI407 Globalisation, Gender and Development.

This course will have limited numbers, but seminar allocation will be available across GI409 and GI407 where possible.

Course content: This course will provide students with a knowledge of two key interconnected and intersecting literatures: gender and development and gender and globalisation. We begin by defining and theorising gender, development and globalisation and their operation in material spaces, policy and practice. The course considers contemporary theories of globalisation and development and the differences that a gender perspective makes. A particular focus is on how globalisation is associated with widening social, spatial and gender inequalities, illustrated by case studies of global integration and uneven development. Specific reference is made to household inequalities, state policies, global care chain and migrant labourers, the emergence of the "global city," and "natural" disasters and pandemics, and their implications for social and gender inequalities. The final session brings the issues raised in the first part of the course to a conclusion by addressing some alternative visions of social change in the context of a globalised world.

Teaching: This course runs in the Michaelmas Term. It contains both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6, in line with departmental policy.

Formative coursework: Essay (1500 words)

Indicative reading: Agarwal, B. (2016) Gender Challenges (Vol 1, 2 and 3). India: Oxford University Press.

Assessment: Essay (100%, 3000 words) in the LT.

GI410 Half Unit Not available in 2020/21

Screening the Present: contemporary cinema and cultural critique

This information is for the 2020/21 session.

Teacher responsible: Dr Sadie Wearing, Pankhurst House.11.01C

Availability: This course is available on the MPhil/PhD in Gender, MSc in Culture and Society, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality) and MSc in Gender, Development and Globalisation. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students need to have an awareness of and interest in contemporary cultural theory.

Course content: The aims of the course are to offer students the opportunity to critically explore contemporary international cinema as a site for the interrogation of contested contemporary social and political processes such as migration, globalisation and conflict. The course links cinematic representations to the preoccupations of contemporary cultural theory in relation to themes such as, colonial/postcolonial memory, neo liberalism and cultural dislocations, ethics and subjectivity, gendered migration and gendered violence. The course introduces students to a range of international film and will develop the critical tools for

the analysis of both mainstream and marginal (or marginalised) cultural productions. It explores a range of critical and theoretical writing on film considering questions such as cinema as oppositional practice, the emergence of transnational cinema, questions of representation, global spectatorship and 'witnessing' and the affective dimensions of cinema. Indicative films are: *Unknown Pleasures* (dir. Jia Zhang-Ke), *Persepolis* (dir. Marjane Satrapi), *Black Skin White Mask* (dir. Isaac Julien), *Waltz with Bashir* (dir. Ari Folman), *Cache* (dir. Michael Haneke), *The Road to Guantanamo* (dir. Michael Winterbottom).

Teaching: 10 hours of lectures, 10 hours of seminars and 20 hours of classes in the LT.

Class is a compulsory film screening.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Essay (1500 words) including an element of film analysis in the LT.

Group Presentation as part of Class Conference held at the end of course LT. This session will take place in week 11 and will last the whole morning.

Indicative reading:

- Downing, L. and Saxton, L. (2010) *Film and Ethics: foreclosed encounters*.
- Marks, L. (2000), *The Skin of the Film: intercultural cinema, embodiment and the senses*.
- Wilson, R. and Dissanayake, W. (eds) (1996) *Global/Local: cultural production and the transnational imaginary*.
- Appadurai, A. (1986) *Modernity at Large: cultural dimensions of globalization*.
- Pines, J. and Wilemen, P. (eds) (1989) *Questions of Third Cinema*.
- Hamid, Naficy (ed) (1999) *Home Exile Homeland: film, media and the politics of place*.
- Sobchak, V. (1996) *The Persistence of History: cinema, television and the modern event*.
- Shohat, E. and Stam, R. (2003) *Multiculturalism, Postcoloniality and Transnational Media*.
- Gayatri, G. (2005) *Impossible Desires: queer diasporas and South Asian public cultures*.
- Ezra, E. and Rowden, T. (eds) (2005) *Transnational Cinema: the film reader*.
- Kaplan, A. (2005) *Trauma Culture: the politics of terror and loss in media and literature*.
- Martin, M. (1995) *Cinemas of the Black Diaspora: diversity, dependence and oppositionality*.
- Butler, J. (2009) *Frames of War*.
- Imre, A., Marciniak, K. and O'Healy, A. (eds.) (2007) *Transnational Feminist Encounters in Film and Media*.

Assessment: Essay (100%, 4000 words) in the ST.

GI411 Half Unit

Gender, Post/coloniality and Development: Critical Perspectives and New Directions

This information is for the 2020/21 session.

Teacher responsible: Dr Sumi Madhok Pankurst House, 11.01G

Availability: This course is available on the MPhil/PhD in Gender, MSc in Development Management, MSc in Empires, Colonialism and Globalisation, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: While there are no specific requirements, it is preferred that students have a background in social science or the humanities.

Course content: The aim of this course is to introduce students to the growing body of scholarship that critically interrogates coloniality, gender and developmentalism at various postcolonial

sites. It provides an opportunity for students to encounter and critically engage with canonical works within postcolonial and decolonial theories alongside those of gender and feminist theory in order to examine the historical and contemporary policy and practices in relation to gender and development. As such, the course combines a study of the historical/textual/cultural/political and philosophical in relation to and alongside the political-economic in order to explore questions of developmentalism, critical race theories, coloniality, decoloniality, subalternity, orientalism, representation, agency, neoliberalism, globalisation, human rights and humanitarianism. Finally, the course also introduces students to new directions in contemporary theoretical thinking that are either explicit critiques of postcolonial scholarship, i.e. texts such as 'Empire' and 'Ethics' or are critical engagements and even critical extensions of postcolonial thinking into new directions e.g. Transnationalism.

Teaching: This course runs in Michaelmas Term. It contains both asynchronous and interactive teaching and learning elements.

In line with departmental policy, there is a reading week in week 6.

Formative coursework: A formative essay (1500 words) that will be workshopped in online peer group work.

Indicative reading:

- Fanon, Frantz. (1963) *The Wretched of the Earth*. New York: Grove Inc..
- Rodney, Walter (1972) 'How Europe Underdeveloped Africa', Verso.
- Mohanty, Chandra Talpade. (2003) *Feminism Without Borders: Decolonizing Theory, Practising Solidarity*, Duke University Press, Durham
- Escobar, Arturo, (1995) *Encountering Development: The Making and Unmaking of the Third World*, Princeton, N.J, Princeton University Press
- Kapoor, Ilan, (2008) *The Postcolonial Politics of Development*, Routledge, London: New York; Mignolo, Walter, (2000), *Local Histories/Global Designs: Coloniality, Subaltern Knowledges and Border Thinking*, Princeton University Press, Princeton, N.J;
- Said, Edward. (1985, 1995) 'Orientalism', Penguin, Harmondsworth;;
- Spivak, Gayatri. Chakravorty (1999) *A Critique of Postcolonial Reason*, Harvard University Press.
- Grewal, Inderpal and Caren Kaplan (1994) *Scattered Hegemonies*
- Mbembe, Achille 'Postcolony', University of California Press, Berkeley.
- Mignolo, W.D. and Walsh, C.E., (2018) *160° On Decoloniality: Concepts, analytics, praxis* 160° Duke University Press.

Assessment: Essay (100%, 3000 words) in the LT.

GI413 Half Unit

Gender, 'Race' and Militarisation

This information is for the 2020/21 session.

Teacher responsible: Dr Marsha Henry

Availability: This course is available on the MPhil/PhD in Gender, MSc in Comparative Politics, MSc in Conflict Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Development and Humanitarian Emergencies, MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit. This course will only have 30 places available.

Course content: This course will provide students with a critical introduction to militarisation and its gendered and racialised

basis and effects. Students will be introduced to theories of militarisation and martial politics; militarised masculinities and femininities; different geopolitical experiences of violence and war; 'diversity' issues within a variety of national militaries; racialised representations of gender and terror; the global colour-line and gendered division of labour in peacekeeping; and the global politics of peace and anti-militarism activities.

Teaching: This course runs in the Lent term. It contains both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6 in line with departmental policy.

Formative coursework: Blog post (800 words) in the LT

Indicative reading: Cockburn, C. (2012) *Anti-militarism: political and gender dynamics of peace movements*, Palgrave. Sjöberg, L., and S. Via, eds. (2010) *Gender, war, and militarism: Feminist perspectives*. New York: Praeger Security International. Lorentzen, L.A. and Turpin, J. (eds.) (1998) *The Women and War Reader*, New York University Press. Zillah Eisenstein. (2007). *Sexual Decoys: Gender, Race, and War in Imperial Democracy*. London, UK: Zed Books. Cynthia Enloe. (2000). *Maneuvers: The International Politics of Militarizing Women's Lives*. Berkeley, CA: University of California Press. Robin Riley and Naeem Inayatullah. (2006). *Interrogating Imperialism: Conversations on Gender, Race, and War*. New York, NY: Palgrave Macmillan.

Assessment: Project (100%, 3000 words) in the ST. This will be an essay-diary.

GI414 Half Unit

Theorising Gender and Social Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Wendy Sigle PAN 11.01J

Availability: This course is compulsory on the MSc in Gender, Policy and Inequalities. This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Gender (Sexuality) and MSc in Inequalities and Social Science. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course aims to equip students with an understanding of how feminist scholars use theoretical and analytic concepts to engage with social policy issues and debates. The course provides an overview of mainstream theoretical explanations for the structure and evolution of welfare states, and feminist critiques and modifications of that literature. Students will develop an understanding of how key concepts like citizenship, work, and well-being have been conceptualized and applied in the academic literature to document and explain gendered inequalities. The use of gender as a category of analysis is examined and attention is paid to the potentially modifying effects of other social hierarchies such as race and class.

Teaching: This course runs in MT. It will be delivered using both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6, in line with departmental policy.

Formative coursework: Group work: Students will be asked to work as part of a group to discuss papers and to complete assignments (presentations, assessments of papers, answers to questions) in preparation for seminars. Students are asked to submit a 1,500 formative exercise which should include a self-assessment form attached as a coversheet during MT.

Indicative reading: C L Bacchi, *Analysing Policy: the Problem Represented to Be?*, 2009; Ferree, M. M., Khan, S. & and Morimoto, S.A., (2007). *Assessing the Feminist Revolution: The Presence and Absence of Gender in Theory and Practice*. Pp. 354–84 in *Sociology in America: The American Sociological Association Centennial History*, edited by Craig Calhoun. Chicago: University of Chicago Press. O'Connor, J. S. (2013). *Gender, citizenship and*

welfare state regimes in the early twenty-first century: 'incomplete revolution' and/or gender equality 'lost in translation'. *A Handbook of Comparative Social Policy*. Risman, B. J., & Davis, G. (2013). From sex roles to gender structure. *Current Sociology*, 61(5–6), 733–755. Chappell, L. and Waylen, G. (2013) *Gender and the hidden life of institutions*. *Public Administration* 91: 599–615. D Beland and R

Assessment: Project (100%, 3000 words) in the ST.

The production of a final 3000 word report (due in ST: 90% of the final mark) with milestones including a progress report (due the last week of MT), a first draft (due in LT), and 500-1000 word peer review report (due in LT). The content of the peer review is assessed and contributes 10% of the final mark.

GI415 Half Unit

Gender and European Welfare States

This information is for the 2020/21 session.

Teacher responsible: Prof Wendy Sigle

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Sexuality), MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Inequalities and Social Science and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

This course may be of particular interest to masters students in the European Institute.

Course content: The course investigates the ways in which gender is incorporated into national welfare states and the impact of national structures on the patterns and prevalence of gender inequalities. The course covers the theory and methodology of comparative studies and considers their applicability to the analysis of gender. It also considers feminist critiques of mainstream methodological approaches to the comparative study of social policies. The role of the European Union in the development of gendered policies and outcomes in EU countries provides the point of focus and interrogation. A number of key patterns of inequality and policy areas are studied, including: the organisation of caring services; migration; family policy; provisions for lone parents; the labour market and labour market policies; the practices and roles of men, especially regarding fatherhood; and fertility and aging. In looking at these areas students will be encouraged to compare and contrast different welfare systems and consider the particularism of national approaches.

Teaching: This course runs in LT. It will be delivered using both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6 in line with departmental policy.

Formative coursework: Students will be asked to prepare seminar facilitation activities in group work and submit a formative piece of work (1500 words) during the LT.

Indicative reading: G. Abels and J. M. Mushaben (2012) *Gendering the European Union*. K.M. Anderson, (2015) *Social Policy in the European Union*. R. Crompton et al. (2007) *Women, Men, Work and Family in Europe*. H. M. Dahl et al. (eds) (2011) *Europeanization, Care and Gender: Global Complexities*. M. Daly and K. Rake, (2003) *Gender and the Welfare State*. G. Esping-Andersen (2009) *The Incomplete Revolution: Adapting to Women's New Roles*. J. Gornick and M. Meyers (2003) *Families that Work*. J. Kantola (2010) *Gender and the European Union*. R. Lister (2003) *Citizenship: Feminist Perspectives*, 2nd ed. J. Lewis (2009) *Work-Family Balance, Gender and Policy*.

Assessment: Essay (100%, 3000 words) in the ST.

GI417 Half Unit Not available in 2020/21 Feminist Population Politics

This information is for the 2020/21 session.

Teacher responsible: Prof Wendy Sigle PAN 11.01J

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Population Health and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Students on the MSc in Gender Policy and Inequalities degree must take either GI414 OR GI417

Course content: This course considers both the politics of knowledge production in population studies and the politics surrounding population policies. Although population change cannot be described, understood, or responded to without taking into account the wider – and profoundly gendered – social, political and economic context, feminist theory and gender theory have had relatively limited impact on the way population scientists approach their research. This course explores the implications both theoretically and practically. Students will explore and evaluate the ways that feminist demographers have sought to redress social and gender injustices. Moreover, they will be asked to consider how the integration of a feminist and gendered perspective might change the way research is carried out and used to inform policy.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

There will be a reading week in week 6 in line with department policy.

Formative coursework: Students will be asked to work as part of a group to discuss papers and to complete assignments (presentations, assessments of papers, answers to questions) in preparation for seminars.

Students are asked to submit a 1,500 formative exercise which should include a self-assessment form attached as a coversheet during MT.

Indicative reading: Eberhardt, P., & Schwenken, H. (2010). Gender Knowledge in Migration Studies and in Practice. *Gender Knowledge and Knowledge Networks in International Political Economy*, 94. Greenhalgh, S. (2012). On the Crafting of Population Knowledge. *Population and Development Review*, 38(1): 121–131. Intemann, K. (2010). Twenty-five years of feminist empiricism and standpoint theory: Where are we now? *Hypatia: A Journal of Feminist Philosophy* 25(4): 778-796. Riley, N.E. and McCarthy, J. (2003) *Demography in the Age of the Postmodern*. Cambridge: Cambridge University Press. Thornton, A. (2001). The developmental paradigm, reading history sideways, and family change. *Demography* 38(4): 449-465. Watkins, S.C. (1993) If all we knew about women was what we read in *Demography*, what would we know? *Demography* 30(4): 551-577.

Assessment: Project (100%) in the ST.

The production of a final 4000 word report (due in ST: 90% of the final mark) with milestones including a progress report (due the last week of MT), a first draft (due in LT), and 1000 word peer review report (due in LT). The content of the peer review is assessed and contributes 10% of the final mark.

GI418 Half Unit Not available in 2020/21 Feminist Economics and Policy: An Introduction

This information is for the 2020/21 session.

Teacher responsible: Prof Naila Kabeer and Prof Diane Perrons

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Gender,

MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities and MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management). This course is available as an outside option to students on other programmes where regulations permit.

There will be 30 places available on this course.

Pre-requisites: The course is run by the Department of Gender Studies – an interdisciplinary department. One of the key objectives is to bring a multi-perspectival approach to understanding of economic processes. As economic processes have a profound influence on social life, gender relations and gender equality, and vice versa, this course seeks to expose students interested in gender to the work of Feminist Economists. An interest in gender issues is essential and undergraduate level course in economics would be an advantage.

Course content: Recent decades have seen the emergence of gender equality as a key policy concern and Feminist Economics as a sub discipline. The purpose of the course is to engage with the theoretical foundations and intellectual contributions of Feminist Economics and to develop an analytical understandings of gender issues with respect to economic processes and policies operating at macro and micro levels. At the macro level, the course explores the implications of contemporary economic and financial governance from a gender perspective, the gender bias in macroeconomic analyses, and the gendered impact of austerity policies. At the micro level, the course analyses the gender dynamics of household and labour market inequalities, engages with the economic foundations and explanations of gender inequality within employment and within the household, focusing on wage and productivity differences and the gender division between 'productive' and 'reproductive' work. Attention to gender as economically significant marker of identity is contextualised, where possible, in relation to race, social class, sexuality and migrant status. Attention is also given to the way in which individual well-being is influenced by the level of development and transnational trade relations. Accordingly, the course seeks to bridge the macro-micro divide by drawing together the gendered critique of existing biases in economic thinking and to provide an analytical foundation for alternative approaches to policies that aim to contribute towards securing sustainable development and gender equal well-being.

Teaching: 15 hours of lectures and 10 hours of seminars in the LT. There will be a reading week in week 6 in line with departmental policy.

Formative coursework: Essay (2000 words) in the LT.

Indicative reading:

- Bargawi, H., Cozzi, G and Himmelweit, R. (2017) Economics and Austerity in Europe Gendered impacts and sustainable alternatives.
- Berik, G., Rodgers, Y. and Seguino, S. (2011) Inequality, Development, and Growth.

Assessment: Essay (100%, 4000 words) in the ST.

GI420 Half Unit

Globalisation, Gender and Development: Theorising Policy and Practice

This information is for the 2020/21 session.

Teacher responsible: Prof Naila Kabeer

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in Development Management, MSc in Development Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Human Geography and Urban Studies (Research), MSc in Human Rights, MSc in Human Rights and Politics, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

This course cannot be taken alongside GI407 Globalisation, Gender and Development.

There will be limited availability on this course - 34 places.

Course content: This course is concerned with theorising policies and practice in the field of gender and international development. The course outlines key contributions to the analysis of power within public policy making processes and examines feminist visions of social change which draw on ideas about capabilities, empowerment, citizenship and gender justice to engage with these policy processes. This is explored in greater detail through case studies of feminist struggles over recognition, redistribution and representation as they play out in relation to particular policy issues, namely violence against women, microfinance, social protection, gender quotas and collective action.

Teaching: This course runs in Lent Term. It contains both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6 in line with departmental policy.

Formative coursework: One essay of 1500 words to be handed in midway through the LT.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

GI421 Half Unit

Sexuality, Gender and Culture

This information is for the 2020/21 session.

Teacher responsible: Mr Jacob Breslow

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Culture and Society, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Human Rights and Politics and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students wanting to take GI421 but who are not part of a listed degree programme should provide a statement about their reasons for wanting to follow the course. This should include background in sexuality or gender studies, areas of related interest and experience, or other conceptual or theoretical grounding that might be relevant. GI421 is an interdisciplinary course with a high theory content, and students who do not provide evidence - e.g. prior courses in gender and/or sexuality, professional or political experience in related areas - of being at the appropriate level in this regard will not be admitted to the course.

Course content: 'Sexuality, Gender and Culture' introduces students to historical and theoretical components of the field, and explores case studies of the development of sexual cultures, identities and social movements from the late 19th century to the present. The course provides theoretical foundations in sexuality studies, incorporating intersectional, black feminist, postcolonial, queer, crip, trans, and critical race perspectives. Indicative topics include: colonialism and sexuality, sexualisation of culture; transformation of intimacy; abortion and migration; transgender studies and bisexuality; queer theory and social movements. The course is interdisciplinary and demands a high level of student participation, but does not require a background in the field. It is also available as a first half of a full unit 'Transnational Sexual Politics'.

Teaching: This course runs during MT. It contains both asynchronous and interactive teaching and learning elements each week. It is taught alongside students from GI422.

Formative coursework: One 1500 word critical analysis to be submitted at the end of week 5.

Indicative reading:

- Jacqui Alexander (1994) 'Not Just (Any) Body Can Be a Citizen: The Politics of Law, Sexuality and Postcoloniality in Trinidad and Tobago and the Bahamas', *160Feminist Review* 16048: 5-23. 160

Assessment: Essay (100%, 3000 words) in the LT.

Assessment is due at the beginning of LT.

GI422

Transnational Sexual Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Jacob Breslow and Prof Clare Hemmings

Availability: This course is compulsory on the MSc in Gender (Sexuality). This course is available on the LLM (extended part-time), LLM (full-time), MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Global Politics, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

Course content: 'Transnational Sexual Politics' takes a case-study

approach to questions of sexuality, gender and culture (in the first term) and to sexuality in the contexts of globalization (in the second). The full unit considers a variety of ways in which sexuality is central to any understanding of the social world, and it explores queer methods for interrogating the world. It is an interdisciplinary course within which intersectional, black feminist, postcolonial, queer, crip, trans, and critical race perspectives are used to interpret particular sexual phenomena and contexts – rights, citizenship, fertility, representation, kinship, asylum and technology, for example. The course will allow a thorough grounding in sexuality and gender studies. Although it is interdisciplinary, it does not have a pre-requisite.

Teaching: This course runs across both MT and LT. It contains both asynchronous and interactive teaching and learning elements. In the MT, this learning will be done alongside students from GI421. In LT, there will be an additional skills-building element that is directed towards the conference assessment.

Formative coursework: One 1500 word critical analysis to be submitted at the beginning of week 5 (MT); submission of draft abstract for conference presentation by the Friday of week 5 (LT).

Indicative reading:

- Jacqui Alexander (2006) *Gay Tourism: Culture and Context* (Binghamton, NY: Haworth Press).
- Clare Hemmings, ed. (2014) 'Sexuality Section', Mary Evans et al, eds, *Handbook of Feminist Theory* (London: Sage).
- Kamala Kempadoo (2004) *Sexing the Caribbean: Gender, Race and Sexual Labour* (New York: Routledge).
- Susanne YP Choi and Ming Luo (2016) 'Performative Family: Homosexuality, Marriage and Intergenerational Dynamics in China', *160British Journal of Sociology* 16067(2): 260-280. 160

- Laura Ann Stoler (1995) *Race and the Education of Desire* (Durham: Duke University Press).
- Susan Stryker and Talia M. Bettcher (eds.), (2016) "Trans/ Feminisms" [Special Issue] *Transgender Studies Quarterly* 3(1-2).
- H. Sharif 'Herukhuti' Williams (2016) 'Introduction to Afrocentric Decolonizing Kweer Theory and Epistemology of the Erotic', *Journal of Black Sexuality and Relationships* 2(4): 1-31.

Assessment: Essay (50%, 3000 words) in the ST.

Paper (30%) in the LT.

Critical evaluation (20%) in the MT.

The paper will be submitted for an online student conference at the end of LT, and will include the previous submission of a 300 word abstract.

The critical evaluation will be of a cultural event (virtual lecture; exhibition; performance; conference), and submitted at the end of MT (2000 words).

GI423 Half Unit Not available in 2020/21

Globalisation and Sexuality

This information is for the 2020/21 session.

Teacher responsible: Dr Jacob Breslow

Availability: This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Human Rights and MSc in Women, Peace and Security. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students wanting to take GI423 but who are not part of a listed degree programme should provide a statement about their reasons for wanting to follow the course. This should include background in sexuality or gender studies, areas of

related interest and experience, or other conceptual or theoretical grounding that might be relevant. GI423 is an interdisciplinary course with a high theory content, and students who do not provide evidence - e.g. prior courses in gender and/or sexuality, professional or political experience in related areas - of being at the appropriate level in this regard will not be admitted to the course.

Course content: 'Globalisation and Sexuality' explores the importance of sexuality for global politics and society. Starting from the assumption that 'sexuality matters' in today's globalised world, the course considers histories, theories and contexts within which the role of sexuality is pivotal. Since sexual identities, rights and health are central to citizenship and to how nations and states relate to one another contemporarily, this course combines theory and case study to think through how as well as why sexuality has become so important. Students will be introduced to theories of sexual citizenship and rights, homonationalism and homophobia, affect and fantasy, sexuality and labour, and use these to explore topics such as sex tourism, reproductive technologies, lesbian and gay asylum, abortion, sexual violence and sexual cultures globally. The course is interdisciplinary and takes a transnational approach to sexuality and globalisation. Students will join existing students taking the full unit GI422 for lectures, but may have separate seminars.

Teaching: 15 hours of lectures and 10 hours of classes in the LT. Seminars precede lectures on the same day.

Formative coursework: An abstract of the student essay (up to 300 words) submitted on Friday of week 5, with written feedback; a detailed outline (up to 2000 words) of the essay to be submitted by Monday of week 9, with written and in person feedback in office hours before the end of term.

Indicative reading: Jacqui Alexander (2006) *Gay Tourism: Culture and Context* (Binghamton, NY: Haworth Press). Rutvica Andrijašević (2014) 'The Figure of the Trafficked Victim: Gender, Rights and Representation', *The Handbook of Feminist Theory* (London: Sage), pp. 359-373. Sonia Corrêa et al (2008) *Sexuality, Health and Human Rights* (New York: Routledge), Paisley Currah, Richard Juang and Shannon Minter (2006) *Transgender Rights* (University of Minnesota Press). Fatima El-Tayeb (2012) "'Gays Who Cannot Properly be Gay": Queer Muslims in the Neoliberal European City', *European Journal of Women's Studies* 19.2: 79-95. Clare Hemmings, ed. (2014) 'Sexuality Section', Mary Evans et al, eds, *Handbook of Feminist Theory* (London: Sage). Jasbir Puar (2007) *Terrorist Assemblages: Homonationalism in Queer Times* (Durham: Duke UP); Laura Ann Stoler (1995) *Race and the Education of Desire* (Durham: Duke University Press); Susan Stryker and Talia M. Bettcher (eds.), (2016) "Trans/Feminisms" [Special Issue] *TSQ* 3(1-2). Omise'eke Tinsley (2018) *Ezili's Mirrors: Imagining Black Queer Genders* (Durham: Duke UP)

Assessment: Essay (100%, 4000 words) in the ST. Final essay due Monday week 1 of summer term

GI424 Half Unit

Gender Theories: An Interdisciplinary Approach

This information is for the 2020/21 session.

Teacher responsible: Dr Jacob Breslow, PAN.11.01N

Availability: This course is compulsory on the MPhil/PhD in Gender, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available on the MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course aims to enable students to: become familiar with the fullest range of gender theories with particular attention to the intersections of gender, sexuality and race; develop

a critical appreciation of these different theories of gender; use gender theories to inform their appreciation of existing work in their own disciplines and in an interdisciplinary context; use the analysis of gender as a basis for case study evaluation and research.

It is a half unit course which runs for 15 weeks. It begins with a review of the formative influences on the development of gender theory, including the sex/gender distinction, race and intersectionality, production/reproduction and social structures of gender, theories of power and the relations between the psyche and the social. Building on these foundations it enables students to consider the implications for analysis of a variety of sites and topics including post/coloniality, representation, affect, queer theory, nation, nationalism, and rights. The course considers the impact of gender analysis on key areas of social science investigation, and develops these with particular attention to location, ethics and the importance of global and transnational dimensions. Our expectation is that this course provides a thorough grounding for work across all other courses and for the dissertation module.

Teaching: This half-unit foundational course runs across all of MT and the first half of LT. It contains both asynchronous and interactive teaching and learning elements. In LT, the teaching ends just prior to Reading Week. The take-home assessment for the course happens during Reading Week of LT.

Formative coursework: Timed assessment to be written during the first term.

Indicative reading:

- Valerie Amos and Pratibha Parmar (1984) *Challenging Imperial Feminism*. *Feminist Review* 17: 3-19.
- Sedef Arat-Koç (2018) *Migrant and domestic care workers: Unfree labour, crises of social reproduction and the unsustainability of life under 'vagabond capitalism'*. in Juanita Elias and Adrienne Roberts, eds. *Handbook on the International Political Economy of Gender*. Cheltenham: Edward Elgar Publishing.
- Judith Butler (1990) *Gender Trouble: Feminism and the Subversion of Identity*. New York: Routledge.
- Kimberle Crenshaw (1989) *Demarginalizing the Intersection of Race and Sex: A Black Feminist Critique of Antidiscrimination Doctrine, Feminist Theory and Antiracist Politics*. *University of Chicago Legal Forum* 139-168.
- Sylvia Rivera Cusicanqui (2012) *Ch'ixinakax utxiwa: A Reflection on the Practices and Discourses of Decolonization*. *South Atlantic Quarterly* 111(1): 95-109.
- Michel Foucault (1976) *The History of Sexuality Volume 1: An Introduction*. New York: Pantheon Books.
- Gail Lewis (2017) *Questions of Presence*. *Feminist Review* 117: 1-19.
- Petrus Liu (2012) *Queer Human Rights in and Against China: Marxism and the Figuration of the Human*. *Social Text* 110 30(1): 71-89.
- Santa Cruz Feminist of Color Collective (2014) *Building on "the Edge of Each Other's Battles": A Feminist of Color Multidimensional Lens*. *Hypatia* 29(1): 23-40

Assessment: Exercise (100%) in the LT.

The exercise will be a fixed period timed assessment.

GI425 Half Unit

Introduction to Gender, Peace and Security

This information is for the 2020/21 session.

Teacher responsible: Dr Aiko Holvikivi

Availability: This course is compulsory on the MSc in Gender, Peace and Security. This course is available on the MSc in Conflict Studies, MSc in Gender, MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in International Development and Humanitarian Emergencies and

MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Please note we will only have 30 places on this course, including those students on MSc Gender, Peace and Security.

Course content: This course provides a critical examination of gender peace and security issues in conflict and postconflict contexts. Specifically, the course focuses on the UN Women, Peace and Security (WPS) agenda, which originated in Security Council Resolution 1325 (2000) followed by a series of subsequent resolutions to date. The course covers the main pillars of the WPS agenda, namely participation; protection from gendered violence; the prevention of conflict and violence; and gendered approaches to relief and recovery in conflict and post-conflict settings. The course examines a range of issues through a gender and feminist lens.

Topics include: the socio-legal context of the Women, Peace and Security agenda; the history of Women, Peace and Security laws and policies; definitions and scope of gender-based and sexual violence in conflict; combating impunity and addressing accountability; peace processes, peacekeeping and humanitarian assistance; and evaluation of a range of different critiques of the Women, Peace and Security agenda.

Teaching: This course runs in the Michaelmas Term. It contains both asynchronous and interactive teaching and learning elements. Students will have a reading week in Week 6 in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Buss, D., Lebert, J., Rutherford, B., Sharkey, D., & Aginam, O. (Eds) (2014) *Sexual Violence in Conflict and Post-Conflict Societies: International Agendas and African Contexts*, Routledge; Cohn, C. (Ed) (2013) *Women and Wars*, Polity Press; Olonisakin, F., Barnes, K., & Ikpe, E. (Eds) (2010) *Women, Peace and Security: Translating Policy into Practice*, Routledge; Mlibenge C.S. (2013) *Sex and International Tribunals: The Erasure of Gender from the War Narrative*, University of Pennsylvania Press; Otto, D. and Heathcote, G. (Eds) (2014) *Rethinking Peacekeeping, Gender Equality and Collective Security: An Introduction*, Routledge; Global Study on Preventing Conflict, Transforming Justice, Securing Peace: A Global Study on the Implementation of United Nations Security Council Resolution 1325; Davies, SE and True, J (eds) (2018) *The Oxford Handbook of Women Peace and Security*, Oxford University Press

Assessment: Essay (100%, 3000 words) in the LT.

Summative assessment to be submitted in the first week of LT.

GI426 Half Unit

Gender and Human Rights

This information is for the 2020/21 session.

Teacher responsible: Dr Sumi Madhok COL.11.01G

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Relations (Research), MSc in International Relations Theory and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A background in the Humanities and/or the Social Sciences with a basic familiarity with human rights and/or gender studies.

Course content: This course will provide the students with a transnational and intersectional gender perspective on contemporary theories and practices of rights/human rights and humanitarianism. It brings together different sets of scholarship: gender theories, decolonial, queer and postcolonial scholarship,

theoretical perspectives on human rights along side with legal and policy perspectives - and will be of interest to students wanting to study the question of human rights in an interdisciplinary manner but also one that is crucially sutured to the question of gender. Consequently, the course will introduce students to key scholars: CLR James, Sylvia Wynter, Gayatri Spivak, Michel Rolph Trouillot, Ratna Kapur, Hannah Arendt, Audra Simpson, Walter Mignolo, Giorgio Agamben, Jacques Ranciere, Judith Butler, Lila Abu Lughod, Wendy Brown among others while drawing attention to the evolution and working of international legal frameworks for securing women's rights and other marginal groups. The course will pay special attention to the struggles over 'humanity', 'civilisation' and 'indigeneity', as well as to tensions between citizenship rights and human rights, and the transformation of the former in the light of the latter. It will also focus on feminist demands and struggles over sexuality, sexual rights, bodily rights, culture, development and citizenship; over entitlements to material resources; to gendered protections in conflict; and on vulnerability and precarity under neoliberal economic and political regimes. The course is focused on encouraging critical thinking on human rights together with introducing students to alternative, decolonial and anti colonial perspectives on rights and human rights.

Teaching: This course runs in Lent Term. It contains both asynchronous and interactive teaching and learning elements. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Formative essay assignment.

Indicative reading: Essential readings:

Trouillot, M.R., 1995. *Silencing the past: Power and the production of history*. Beacon Press. James, C.L.R., 2001. *The Black Jacobins: Toussaint L'Ouverture and the San Domingo Revolution*. Penguin UK. Sylvia Wynter: *On Being Human as Praxis*. McKittrick K. (2015) ed. 'Sylvia Wynter: On Being Human as Praxis', Duke University Press. Lughod, L. (2013) 'Do Muslim Women Need Saving', Harvard University Press. Kapur, R., 2018. *Gender, Alterity and Human Rights: Freedom in a Fishbowl*. Edward Elgar Publishing., Giorgio. *Homo sacer: Sovereign power and bare life*. Stanford University Press, 1998. Arendt, Hannah. *The Origins of Totalitarianism*. Houghton Mifflin Harcourt, 1973. Balibar, Étienne. *Equaliberty: Political Essays*. Duke University Press, 2014. Fassin, D. (2012) 'Humanitarian Reason', Harvard University Press. Moyn, Samuel (2010) *The Last Utopia*, Columbia University Press. Correa, Sonia, Rosalind Petchesky and Richard Parker (2008) (eds.) *Sexuality, Health and Human Rights*, Routledge, New York.

Assessment: Essay (100%, 3000 words) in the ST.

GI427 Half Unit

Advanced Issues in Gender, Peace and Security

This information is for the 2020/21 session.

Teacher responsible: Dr Marsha Henry

Availability: This course is available on the MSc in Gender, Peace and Security. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introduction to Gender, Peace and Security (GI425).

Course content: Advanced Issues in Gender, Peace and Security provides an in-depth examination of peace and security issues from a gender perspective. The course further explores issues emerging from, and beyond, the Women Peace and Security agenda (WPS) and specifically considers areas not covered in as much depth as in the prerequisite (GI425) course, including: 1) critical approaches to peace and security: feminist foreign policy; queer perspectives on conflict and post-conflict spaces; GPS in cultural perspective 2) understanding implementation: perspectives on national action plans; complex humanitarian emergencies; and peace and security case studies 3) violence, masculinities and accountability: conflict-related gender-based

violence; men, peace and security; and redress, repair and reparation for gendered harm. The course ends with a workshop.

Teaching: This course runs in Lent Term. It contains both asynchronous and interactive teaching and learning elements. Students will have a reading week in week 6 in line with departmental policy.

Formative coursework: Essay title, 2-page PowerPoint presentation for written feedback and to present at workshop. Students can present this work at a workshop at the end of term. Students will be organised into panels and present to the full group and provide peer feedback to each other's work.

Indicative reading: Cockburn, C, (2004) 'The Continuum of Violence: A Gender Perspective on War and Peace', in Wenona Giles and Jennifer Hyndman (eds), *Sites of Violence: Gender and Conflict Zones* (Los Angeles: University of California Press); 'The Futures of Women, Peace and Security', (2016) special issue of *International Affairs*, eds Paul Kirby and Laura J. Shepherd (Vol. 92, No. 2, March); 'Oxford Handbook of Gender and Conflict', (2018) eds Dina Hayes, Naomi Cahn, Fionnuola Ni Aoláin & Nahla Valji, Oxford University Press; Satterthwaite, M. L. and Huckerby, J. (eds.) *Gender, National Security and Counter-Terrorism: A Human Rights Perspective*. Routledge. pp. 36-59

Assessment: Essay (100%, 3000 words) in the ST.

GI428 Half Unit Bodies, Culture and Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Leticia Ines Alexandre Sabsay Pankhurst House.11.01D

Availability: This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation and MSc in Gender, Policy and Inequalities. This course is available as an outside option to students on other programmes where regulations permit.

Course content: 'Bodies, Culture and Politics' explores different constructions and understandings of gendered, racialised and sexualised bodies, with a focus on how these have been mobilised by transnational artistic and cultural practices and politics of resistance. Bodies have been at the centre of renewed debates in the light of the emergence of new critical approaches within the social sciences and the humanities and the developments of the natural sciences. Parallel to these debates, increasing attention has been paid to the significance of bodies in contemporary democratic politics. In the last decades, the uses of bodies and the arts in popular mobilisations and political activism have acquired renewed relevance, hand in hand with transnational dialogues and exchanges. Focusing on these trends, the course considers different theoretical approaches to bodies and embodiment (i.e. phenomenological, deconstructivist, materialist, psychoanalytic), and a set of related areas of inquiry, including the materiality of bodies, the differential value socially assigned to bodies, the affective dimension of embodiment, intersectional processes of racialisation, gendering and sexualisation, vulnerability, beauty ideals, and (dis)ability. These questions will inform our exploration of the imaginaries of the body mobilised by feminist and queer political art, activism, and cultural practices, as well as popular mobilisations and anti-racist and anti-austerity social movements, among others.

Teaching: The course runs across the LT. It contains both asynchronous and interactive teaching and learning elements.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.

Indicative reading: Ahmed, Sara (2006) *Queer Phenomenology*. Braidotti, Rosi (1994) *Nomadic Subjects: Embodiment and Sexual Difference in Contemporary Feminist Theory*. Butler, Judith (2014) *Notes Towards a Performative Theory of Assembly*. Crimp, Douglas (2002) *Melancholia and Moralism: Essays on AIDS and Queer Politics*. Franklin, Sarah, Celia Lury and Jackie Stacey (2000)

Global Nature, Global Culture. Griznik, Marina and Sefik Seki Tatlik (2014) *Necropolitics, Racialization, and Global Capitalism: Historicization of Biopolitics and Forensics of Politics, Art, and Life*. Grosz, Elizabeth (1994) *Volatile Bodies: Towards a Corporeal Feminism*. Pollock, Griselda (2013) *After-Affects/After-Images: Trauma and Aesthetic Transformation in the Virtual Feminist Museum*. Salamon, Gayle (2010) *Assuming a Body: Transgender and Rhetoric of Materiality*. Tate, Shirley (2015) *Black Women's Bodies and the Nation: Race, Gender and Culture*

Assessment: Essay (100%, 3000 words) in the ST.

GI499

Dissertation - Independent Research Project

This information is for the 2020/21 session.

Teacher responsible: Members of Department of Gender Studies.

Availability: This course is compulsory on the MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available on the MPhil/PhD in Gender. This course is not available as an outside option.

Course content: The Independent Research Project is a student-led module facilitating learning on how to conduct original research independently, with support to develop research ideas and to achieve research 'milestones' during development stages. The completion of the Independent Research Project module entails the following:

- Achievement of all 'milestones'/ development stages of your project throughout the academic year.
- Completion of GI499 Methodologies Series - attendance at all compulsory (varies between six to eight) and a minimum of three optional classes.
- Submission of a dissertation/independent study project, meeting departmental standards and requirements.

The Independent Research Project and resulting dissertation may be on any approved topic within the field of the MSc programme studied.

The 'methodologies series' provides introductory compulsory and optional workshops in the Michaelmas, Lent and Summer Terms designed to provide support for the conception, development and completion of the Independent Research Project. Students will be introduced to dissertation guidelines, common difficulties, ethical issues, basics in research practice, managing sources, the process of research and writing, and ways of creating research impact.

The sessions will consider challenges raised by quantitative and qualitative methods, and include examples from and approaches to policy research, interviewing, discourse analysis, oral histories, archival studies, and visual and media analysis. The workshops may vary and are taught within the Department of Gender Studies according to expertise, and will involve student participation.

Teaching: The 'methodologies series' involves a combination of compulsory and optional dissertation workshops of up to 90 minutes spread across the MT, LT and ST.

Students are provided supervision for the Independent Research Project during the LT and ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Indicative reading:

- Ackely, B. and True, J. (2010) *Doing Feminist Research in Political and Social Science*, Houndmills, Basingstoke: Palgrave Macmillan.
- Badgett, Lee (2016) *The Public Professor: How to Use Your Research to Change the World*. NY: New York University Press.
- Belcher, W. L. (2009) *Writing Your Journal Article in 12 Weeks: A Guide to Academic Publishing Success*, Chicago, London: Chicago University Press.
- Biggam, J. (2017) *Succeeding with your Master's Dissertation: A Step-by-Step Handbook*, Maidenhead: Open University Press.

- Creswell, J. W, Creswell, J. D (2018) *Research Design: Qualitative, Quantitative and Mixed Methods Approaches*, California: Sage.
- Harding, Sandra G. (ed.) (2003) *The Feminist Standpoint Theory Reader: Intellectual and Political Controversies*. NY: Routledge.
- Hart, C (2005) *Doing your Masters Dissertation: Realising Your Potential as a Social Scientist*, London: Sage.
- Hesse-Biber, S. N., Leavey, P. L. (2007) *Feminist Research Practice: A Primer*, Thousand Oaks, London: Sage.
- Swetnam, D., Swetman, R. (2000) *Writing Your Dissertation: How to Plan, Prepare and Present Your Work Successfully*, Oxford: How to Books.
- Weiss, Robert S. (1995) *Learning From Strangers: The Art and Method of Qualitative Interview Studies*. NY: The Free Press.

Assessment: Dissertation (100%, 10000 words) in August. Additionally, in the LT students will submit milestone documents: (a) title or topic of research; (b) summary proposal including research question, methodological and analytical / theoretical approach; (c) and an annotated bibliography at the beginning of Summer Term.

GV408 Half Unit

Contemporary Disputes about Justice

This information is for the 2020/21 session.

Teacher responsible: Bruno Leipold

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Pre-requisites: None, though some previous exposure to normative political theory may be an advantage.

Course content: The course offers a critical analysis of key debates about justice which have followed the publication of John Rawls's *A Theory of Justice* in 1971. The first part of the course focuses on Rawls's own theory of justice as fairness and critiques of that theory by liberals, feminists, socialists and critical race theorists. The second part of the course explores a number of alternative accounts of justice, such as Iris Marion Young's focus on injustice and oppression, and some of the egalitarian alternatives to Rawls's difference principle, such as Ronald Dworkin's equality of resources and Elizabeth Anderson's democratic equality. The final third of the course delves into various ways in which discussions of justice have been extended and applied. This includes discussion of whether principles of domestic justice apply globally; how we should understand historical injustice and what remedies and reparations are justified in light of those injustices; and what sort of economic systems could realise the demands of justice, such as a property-owning democracy and liberal socialism, as well as discussion of specific economic institutions, such as workplace democracy and universal basic income.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours in the Lent Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in week 6 of the LT for private study and formative/summative assessment preparation.

Formative coursework: All students are expected to submit one formative (non-assessed) essay.

Indicative reading: J. Rawls, *A Theory of Justice*; Susan Moller Okin, *Justice, Gender and the Family*; Iris Marion Young, *Justice and the Politics of Difference*; Elizabeth Anderson 'What is the Point of Equality?' *Ethics*; Ronald Dworkin 'What is Equality? Part 2: Equality of Resources', *Philosophy and Public Affairs*; Charles Beitz, *Political Theory and International Relations*; Lea Ypi, *Global Justice & The Political Avant-Garde*; David Miller, *National Responsibility &*

Global Justice; Laura Valentini, *Justice in a Globalized World*.

Assessment: Essay (100%, 4000 words).

GV432 Half Unit Not available in 2020/21

Government and Politics in China

This information is for the 2020/21 session.

Teacher responsible: Prof Chun Lin

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Comparative Politics and MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups.

The deadline for applications is 17:00 on Tuesday 1 October 2019.

You will be informed of the outcome by 17:00 on Wednesday 2 October 2019.

Course content: Contemporary experiences and contradictions of socioeconomic and political transformations of China since 1949 and especially 1978; their rival explanations and interpretations: Often in comparison with other postcommunist transitions, other Asian states and other national developing trajectories, our discussions cover the evolving historical, international and geopolitical contexts of China's development, its social and political geography and demography; state power at all levels of governance, central-local interactions and semi-federalism; bureaucracy as tradition and as invention; political economy and market transition in global integration; social structure and organisation; class, ethnic, and gender relations; ideology, cultural politics, and issues concerning democracy and legitimacy; official and popular nationalism, "one country, two systems", the Taiwan question; and China's military, security, and changing foreign policy and global positioning. Students are expected to gain extensive historical and empirical knowledge about the PRC and be capable of tackling related conceptual and theoretical questions in the social sciences.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. This course is offered in LT, constituting 10 teaching weeks and one reading week (week 6 of the LT) for essay and learning support activities. The teaching is structured as a 1 hour lecture followed by a 1.5 hour seminar.

Formative coursework: Students are required to give at least one seminar presentation, and to write one 1,500 word essay.

Indicative reading: M Meisner, *The Deng Era* (1996); J Gray, *Rebellions and Revolutions* (2003); C Bramall, *Chinese Economic Development* (2008); CK Lee, *Against the Law* (2007); W Sun and Y Guo, *Unequal China* (2013); S Helmann and E Perry, *Mao's Invisible Hand* (2011); W Tang, *Populist Authoritarianism* (2016); K Brown, *China's World* (2017).

Assessment: Essay (100%, 4000 words).

GV439 Half Unit

Government and Politics in Central and Eastern Europe

This information is for the 2020/21 session.

Teacher responsible: Dr Vesselin Dimitrov

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday

30 September 2020.

Course content: The course provides an analytical assessment of the transition from communism to liberal democracy in Central and Eastern Europe and integration with the European Union, including the Eurozone. It offers an in-depth analysis of institutions, party systems, government and public administration, nationalism, and EU integration, including the Eurozone. Topics covered include: The Communist system. Constitution-making and the development of democratic party systems. Reform of executive institutions and public administration. (Mis)management of ethnic conflict: the case of Yugoslavia. Integration with the European Union, including the Eurozone.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 32 hours in the Lent Term and Summer Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars.

There will be a reading week in Week 6 of the LT for private study and formative/summative assessment preparation.

Formative coursework: Students are required to produce two essays.

Indicative reading: V Dimitrov, K H Goetz and H Wollmann, *Governing after Communism: Institutions and Policymaking*; A Przeworski, *Democracy and the Market*; H Grabbe, *The EU's Transformative Power: Europeanization through Conditionality in Central and Eastern Europe*; J Elster et al, *Institutional Design in Post-Communist Societies*; R Taras (Ed), *Postcommunist Presidents*; R Crampton, *Eastern Europe in the Twentieth Century*, 2nd edn; G Schopflin, *Politics in Eastern Europe*; S White, J Batt & P Lewis (Eds), *Developments in Central and East European Politics 3*.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GV441 Half Unit States and Markets

This information is for the 2020/21 session.

Teacher responsible: Dr David Woodruff

Availability: This course is available on the MSc in Comparative Politics, MSc in Development Studies, MSc in Global Politics, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 3 groups. Priority will be given to MSc Comparative Politics students. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: To introduce politics students to basic economic theorising; to discuss the nature of markets; review contemporary discussions regarding the role of the state in the economy; provide a comparison of the relationship of states and markets in different political settings and historical contexts. Indicative topics: The state and the institutional foundations of markets; states and markets in the Great Depression; domestic and international monetary institutions; varieties of capitalism and change in varieties of capitalism; economics and politics of market bubbles; politics and policy in the financial crisis of 2007-2009; the Eurozone crisis.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 28 and a half hours in the Michaelmas Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. Lectures are very likely to be exclusively online. Online seminars, if required, will involve a mix of virtual meetings and other forms of online engagement.

There will be a reading week in Week 6 of the MT.

Formative coursework: All students are expected to submit one

non-assessed essay, in addition to any smaller pieces of writing that may be required attendant to online seminars.

Indicative reading: Block, Fred. "The Roles of the State in the Economy." *The Handbook of Economic Sociology*, edited by Neil J Smelser and Richard Swedberg, Princeton University Press, 1994, pp. 691–710. Keynes, John Maynard. "The Means to Prosperity." *The Collected Writings of John Maynard Keynes*, edited by Elizabeth Johnson and Donald Moggridge, vol. VI, Cambridge University Press, 1978, pp. 335–66, doi:10.1017/UPO9781139524162. Fourcade-Gourinchas, Marion, and Sarah L. Babb. "The Rebirth of the Liberal Creed: Paths to Neoliberalism in Four Countries." *American Journal of Sociology*, vol. 108, no. 3, 2002, pp. 533–79, doi:10.1086/367922. Tooze, Adam. *Crashed: How a Decade of Financial Crises Changed the World*. Allen Lane, 2018.

Assessment: Essay (35%, 1500 words) in the MT.

Online assessment (65%) in January.

GV444 Half Unit Democracy and Development in Latin America

This information is for the 2020/21 session.

Teacher responsible: Prof Francisco Panizza

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Comparative Politics and MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit. Other postgraduate students may follow the course with permission. This course is capped at 2 groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: The course studies the relations between democracy, political institutions and economic development in contemporary Latin America. It aims at providing information and developing skills for independent analysis of the advances and setbacks of democracy and development in the region. Although due attention is given to country differences, the course approaches the study of democracy and development in the region thematically rather than on a country by country basis. The first five weeks focus on the study of democracy and political institutions. Topics to be covered include the condition of democracy, the nature of the state, presidentialism, parties and party systems, civil society and social movements and informal institutions. The second half of the course studies the economic development of the region since transition to democracy in the 1980s. It looks at the economic context of democratisation, the politics of neoliberal reform in the 1990s, attempts at alternative models of development in the early 21st century and the social and economic transformations of the region over the past decade.

Teaching: This course provides a combination of seminars and lectures totalling 20 hours in the Lent term and 2 hours in the Summer term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in Week 6 of the LT.

Formative coursework: All students are expected to submit one non-assessed essay and to make at least one seminar presentation, as well as contribute to group discussions.

Indicative reading: ECLAC, *Preliminary Overview of the Economies of Latin America and the Caribbean 2020* (www.cepal.org); ECLAC *Social Panorama of Latin America 2020* (www.cepal.org); Forewarker J and D. Treviso (eds) (2016) *Democracy and its Discontents in Latin America*. Grugel, J. and P. Riggirozzi (2009) *Governance After Neoliberalism in Latin America* Helmen, G. and S. Levitsky (eds.) *Informal Institutions and Democracy*. Lessons from Latin America. Mainwaring S. (2018) *Party Systems in Latin America*; Mainwaring, S. and A. Perez Linan (2015) *Cross Currents*

in Latin America, *Journal of Democracy* 26 (1); Panizza, F. (2009) *Contemporary Latin America: Development and Democracy Beyond the Washington Consensus*, Philip, G. and F. Panizza (2011) *The Triumph of Politics. The Return of the Left in Venezuela, Bolivia and Ecuador*; O'Donnell, G. (1994) 'Delegative Democracy' *Journal of Democracy* 5, 1; Schneider, B. R. (2013) *Hierarchical Capitalism in Latin America*.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (30%) and class participation (10%) in the LT.

GV450 Half Unit Not available in 2020/21 European Politics: Comparative Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Vesselin Dimitrov
Prof Michael Bruter, Dr Eiko Thielemann, Dr Florian Foos

Availability: This course is available on the MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: The course is intended to provide students with a systematic introduction to central conceptual and theoretical debates in the comparative analysis of politics and government in Europe. The core syllabus focuses on both traditional fields of comparative enquiry, such as the study of party competition and voting behaviour, and emerging fields of interest, such as national and European identities, and immigration. The course takes a thematic approach and places particular emphasis on the diverse experiences of liberal democracy in individual European countries. The main themes addressed include: Transformation of European politics; electoral behaviour and party systems; government formation and coalitions; regionalism and federalism; national and European identities; immigration.

Teaching: 15 hours of lectures and 18 hours of seminars in the MT.

There will be a reading week in Week 6 of the MT for private study and assessment preparation.

Formative coursework: All students are expected to submit one formative essay and make one seminar presentation.

Indicative reading: Readings include: T. Bale, *European Politics: A Comparative Introduction*, 4th ed; M. Gallagher et al, *Representative Government in Modern Europe*, 5th ed; P. Heywood et al (Eds), *Developments in European Politics*; M. Bruter, *Citizens of Europe*; S. Hix and B. Hoyland, *The Political System of the European Union*, 3rd edition; J. Hayward & A. Menon (Eds), *Governing Europe*; A. Lijphart, *Patterns of Democracy*, 2nd ed; Y. Deloye & M. Bruter (Eds) *Encyclopaedia of European Elections*; K. Shepsle & P. Bonchek, *Analysing Politics*; G. Cox, *Making Votes Count*; G. Tsebelis, *Veto Players*.

Assessment: Essay (100%, 3000 words).

GV454 Half Unit Parties, Elections and Governments

This information is for the 2020/21 session.

Teacher responsible: Prof Torun Dewan

Availability: This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po) and MSc in Political Science

and Political Economy. This course is available as an outside option to students on other programmes where regulations permit. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Pre-requisites: There are no formal prerequisites.

Course content: The course focuses on key topics in political science concerning voting and representation. Topics covered include:

- Party and Candidate Strategy
- The Role and Origins of Parties
- Government Formation and Termination
- Electoral Systems: Franchise, Ballot, and Allocation formulas
- Leadership
- Political Careers
- Government Accountability

Examples will be drawn from a wide range of democracies.

Teaching: This course is delivered through seminars totalling 20 hours across the Lent Term. Some or all of this teaching will be delivered through a combination of online and on-campus seminars. There is a reading week in week 6 of the LT.

In week 11 students will sit a two hour mock exam.

Formative coursework: All students are expected to submit one non-assessed essay.

Indicative reading: The course is focussed mainly on journal articles. However the following books are relevant to some of the topics covered

Gary Cox, *Making Votes Count* (1995); Gary Cox & Mathew McCubbins, *Setting the Agenda* (2005); George Tsebelis, *Veto Players* (2002); Kenneth Shepsle and Mark Bonchek, *Analysing Politics* (1997); Tim Besley, *Principled Agents* (2005); John Aldrich, *Why Parties* (1995); Bruce Bueno de Mesquita, Alastair Smith, Randolph Siverson and James Morrow, *The Logic of Political Survival* (2003); Giovanni Sartori, *Comparative Constitutional Engineering* (1997); Michael Laver & Norman Schofield, *MultiParty Government: The Politics of Coalition in Europe* (1990).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GV465 Half Unit Not available in 2020/21 War, Peace and the Politics of National Self-Determination

This information is for the 2020/21 session.

Teacher responsible: Prof Sumantra Bose

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Comparative Politics, MSc in Empires, Colonialism and Globalisation, MSc in Gender, Peace and Security, MSc in Global Politics, MSc in Human Rights and MSc in Human Rights and Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority consideration will be given to students taking the MSc Comparative Politics and the MSc Global Politics. Students on other programmes (including MSc Human Rights, MSc Empires, Colonialism, Globalisation, MSc International Relations and MA/ MSc History of International Relations) are welcome to apply and will be admitted subject to availability of space. Students on all programmes are required to obtain permission from the teaching department to take this course.

This course is capped at 4 groups, and admission cannot be guaranteed. ALL interested students must apply online via LSEForYou (LFY) as per the stipulated procedure and by the deadline, which is 17:00 on Tuesday 29 September 2020. Students should write a brief, one-paragraph rationale for wishing to take the course in the application. Students will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This course examines some of the most intractable and violent disputes over sovereignty and national self-

determination in the world today, and inquires into the prospects of moving from war to peace through accommodation and compromise. The conflicts studied are drawn from the Middle East (Israel and Palestine), South Asia (Kashmir, Sri Lanka), the Balkans (former Yugoslavia and within it, Bosnia-Herzegovina and Kosovo) and the EU area (Northern Ireland, Cyprus). Students are exposed to the specific histories and contexts of these cases but are also encouraged to think comparatively across countries and regions. The course materials are online on Moodle, the LSE's electronic teaching and learning system.

Are disputes arising from conflicting claims to national self-determination inherently of a zero-sum nature, or can they be resolved? If the latter, how? What factors drive conflict at the local level? Which sorts of institutional arrangements might be able to anchor peace settlements? Can we draw useful comparative lessons from the experience of peace processes that have sought or seek to craft solutions to this type of conflict in diverse parts of the contemporary world? What roles can international actors—influential and/or interested foreign states, regional alliances of states, multilateral institutions—play in such processes and their outcomes?

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 24 hours in the Michaelmas Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. The first lecture is a set-up and introductory session. There will be a reading week in week 6 of the MT for private study and assessment preparation.

Formative coursework: Students will be required to prepare and make one seminar presentation and write one unassessed essay of 1,500 words.

Indicative reading: Sumantra Bose, *Contested Lands: Israel-Palestine, Kashmir, Bosnia, Cyprus and Sri Lanka* (2007); Edward Said, *The Question of Palestine* (1980); Bernard Wasserstein, *Israel and Palestine* (2004); John McGarry (ed.), *Northern Ireland and the Divided World* (2001); Sumantra Bose, *Kashmir: Roots of Conflict, Paths to Peace* (2003); David Hannay, *Cyprus: The Search for a Solution* (2005); Sumantra Bose, *Bosnia after Dayton: Nationalist Partition and International Intervention* (2002); Sumantra Bose, *States, Nations, Sovereignty: Sri Lanka, India and the Tamil Eelam Movement* (1994).

Assessment: Essay (100%, 5000 words) in the ST. A paper of 5,000 words, due in the ST, will determine 100% of the final grade. Students have wide latitude in choosing the topic of their assessed paper, in consultation with the instructor. Students can choose to write on one of the assigned seminar presentation questions, or modify one of those questions, or formulate a research question of their choice.

GV467 Half Unit

Introduction to Comparative Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Steffen Hertog

Availability: This course is compulsory on the MSc in Comparative Politics. This course is available on the MSc in China in Comparative Perspective. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students from the MSc in China in Comparative Perspective will be accepted onto the course if space permits. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This course serves as the 'core', compulsory course for the MSc in Comparative Politics and is intended to provide an overarching theoretical and methodological backdrop for all of the diverse course offerings available to students on this programme. The course introduces students to the field of

Comparative Politics as represented in contemporary journals like *World Politics*, *Comparative Political Studies*, and *Comparative Studies in Society and History*, and among the various members of Faculty with Comparative Politics interests in the Government Department here at the LSE. Students examine the theoretical and methodological underpinnings of Comparative Politics, important critiques of these underpinnings, and diverse examples of 'best practice' in research and writing in this sub-field of the discipline of Political Science.

Lectures and seminar discussions focus both on important areas of research in comparative politics and methodological challenges involved. Readings treat such variegated topics of inquiry and debate in comparative politics as democracy, ethnic conflict, civil society, and revolutions.

The course does not follow a 'great books' approach nor does it rely on a textbook. Instead, the course treats examples of real existing Comparative Politics as practiced - and published - by leading scholars in the field in recent years. These examples are chosen to cover diverse forms of comparison, diverse modes of analysis, diverse topic areas, and diverse countries and regions of the world.

Cutting across these forms of diversity are a set of questions that will be addressed throughout the course concerning the possibilities and limitations of various methods of comparative analysis for explaining observable patterns in politics.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours in the Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. Week 11 will focus on revision. This course also includes a reading week in Week 6.

Formative coursework: One unassessed essay of roughly 1,500 words and shorter group and individual assignments for the seminars.

Indicative reading: Theda Skocpol, *States and Social Revolutions*. Hall, Peter A. 'Adapting Methodology to Ontology in Comparative Politics'. Doner, Richard F., Bryan K. Ritchie, and Dan Slater 'Systemic Vulnerability and the Origins of Developmental States: Northeast and Southeast Asia in Comparative Perspective'. David Collier and Henry Brady, *Rethinking Social Inquiry*.

Assessment: Essay (100%) in the LT.

GV477 Half Unit

Comparative Public Policy Change

This information is for the 2020/21 session.

Teacher responsible: Mr Christian Willmes

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped at 3 groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Pre-requisites: Students should normally be taking GV4E9 *Approaches and Issues in Public Policy and Administration* or already have a good knowledge of comparative public policy. Waiving of these requirements will be at the discretion of the course teacher.

Course content: The course examines explanations of policy change using cross-national comparison.

The course will focus on cases in key policy domains (chosen

according to the literature available and interest for wider analytical questions, as well as the expertise available), but in the examination and assessed essay, any set of (2) countries or international jurisdictions such as the EU can be used as examples. Key topics include: economic and social policy, education and labour market reform, technological change.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours across the Lent Term and the Summer Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will write one unassessed essay during the term.

Indicative reading: There is no single textbook but the following are particularly useful introductions: B G Peters, *Institutional Theory in Political Science: The New Institutionalism*. Third edition (Pinter, London and New York, 2011); P John, *Analysing Public Policy* (Pinter, 2000); W Parsons, *Public Policy* (Edward Elgar, 1995); P A Hall & D Soskice (Eds), *Varieties of Capitalism* (2001); W. Streeck and K Thelen (Eds), *Beyond continuity: institutional change in advanced political economies* (Oxford: Oxford University Press, 2005); Dodds, *A Comparative Public Policy* (Basingstoke, Palgrave, 2013); VA Schmidt and M Thatcher (Eds), *Resilient Liberalism in Europe's Political Economy* (Oxford: Oxford University Press, 2013).

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.
Essay (50%, 3000 words).

GV481 Half Unit

Quantitative Analysis for Political Science

This information is for the 2020/21 session.

Teacher responsible: Dr Mathilde Emeriau

Availability: This course is compulsory on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

MSc Political Science and Political Economy students will be granted priority access as this is a compulsory course for their programme. Other postgraduates wanting to take the course (space permitting) require the permission of the teachers responsible.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: The course provides an introduction to quantitative thinking in the field of political science. Its goal is to give students the tools to ask the right questions, be skeptical when appropriate, and distinguish between useful and misleading evidence. Students will be introduced to the basic toolkit of quantitative analysis, which includes hypothesis testing, regression, experiments, differences in differences, and regression discontinuity. Students will also learn how to use a statistical software program to organize and analyze data.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours in the Michaelmas Term, with an additional 2 hours for a revision lecture in the Summer Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in Michaelmas Term Week 6.

Formative coursework: Three problem sets.

Indicative reading: Angrist, J. D., & Pischke, J. S. (2008). *Mostly harmless econometrics: An empiricist's companion*. Princeton University Press.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GV482 Half Unit

Political Science and Political Economy: Current Issues

This information is for the 2020/21 session.

Teacher responsible: Dr Stephane Wolton

Availability: This course is compulsory on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

MSc Political Science and Political Economy students will be granted priority access as this is a compulsory course on this programme. Other postgraduates wanting to take the course (space permitting) require the permission of the teachers responsible.

Pre-requisites: Students should either have attended GV4C8 and GV481 or equivalent courses. Knowledge of game theory at the level of GV4C8 and empirical method to the level of GV481 is required.

Course content: The course will cover five topics in political science and political economy. Topics will change every year as a function of the most recent research in political economy. Each topic will be covered over two weeks. During these two weeks, students will learn how game theory and empirical methods can be used to understand and think critically about pressing political issues. For the academic year 2020-21, the topics covered will be: 1) Populism, 2) Discrimination, 3) Do elections work?, 4) Autocracy or democracy?, and 5) Understanding and fighting terrorism. During the lecture, students will be taught important papers on the topics covered. Seminars will be of two sorts. On each topic, one seminar will be problem set based, the other will be a replication exercise of a paper on the relevant topic.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Lent Term (20 hours of lectures and 20 hours of seminars). There will also be a two-hour mock exam and a two-hour revision lecture (either on-campus or online) in the ST. This year, some or all of this teaching may be delivered through a combination of online and on-campus lectures and seminars.

There will be a reading week in LT Week 6.

Formative coursework: Students will hand in one problem set and one replication exercise before the reading week.

Indicative reading: Mostly journal articles. The reading list varies each year.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Coursework (50%) in the LT.

The coursework will consist of a replication exercise of a published paper, and the exam will consist of a problem question using game theory and an essay question.

GV483 Half Unit

Public Management Theory and Doctrine

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Lodge

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Management, MSc in Development Studies, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration, MSc in Regulation and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other postgraduates require permission of teachers responsible. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: The course offers an intensive introduction into key areas of public management with reference to both developed and lesser developed world contexts. Topics include administrative doctrine, implementation, organizational change and inertia, capacity building, performance-management, leadership, institution creation, transparency and risk management. Public management is treated as an interdisciplinary field of study, with a particular emphasis on the administrative practices and change as well as the critical analysis of practical arguments about Public Management

Teaching: This course will be delivered through a combination of seminars and lectures, amounting to a minimum of 23 and a half hours across the Michaelmas term. This year, some or all of this teaching will be delivered through a combination of on-campus and online lectures and seminars. This course includes a reading week in week 6 of term.

Formative coursework: Students are expected to complete two formative essays.

Indicative reading: M Barzelay, *The New Public Management*, 2001; C Hood, *The Art of the State*, 1998; C Hood and M Lodge, *Politics of Public Service Bargains*, 2006; L. Lynn and C. Hill, ; E. Ferlie, L. Lynn and C. Pollitt *Oxford Handbook of Public Management*, 2005; C Hood and H Margetts, *Tools of Government in the Digital Age*, 2007.

Assessment: Essay (60%, 2500 words) in the LT. Blog post (40%) in the MT.

The blog would have a word limit of 1000 words, and would be due for submission at the end of Week 11 of MT.

GV488

Law and Politics of Regulation

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Lodge and Prof Veerle Heyvaert

Availability: This course is compulsory on the MSc in Regulation. This course is not available as an outside option.

Course content: The course aims to give students an essential grounding in theories of regulation encountered in the legal, political science and law and economics literatures. It examines competing explanations of the origins, development and reform of regulation; the styles and processes of regulation; issues surrounding enforcement; the inter-organisational and international aspects of regulation; and questions of evaluation and accountability. Some specific cases will be explored through the medium of an additional practitioner seminar series, which will be led by experienced practitioners invited on a one-off basis. The course focuses on the following key themes: contrasting perspectives on regulation, differences in regulatory styles, dynamics and processes, regulatory standard-setting, regulatory enforcement, evaluating regulation.

Teaching: This course will be delivered through a combination of seminars and lectures, amounting to a minimum of 58 hours across the Michaelmas and Lent terms. This year, some or all of this teaching will be delivered through a combination of on-campus and online lectures and seminars. This course includes a reading week in week 6 in both terms.

Formative coursework: All students are expected to produce three written essays.

Indicative reading: R Baldwin, M Cave and M Lodge *Understanding Regulation* (2012); M Moran, *The British Regulatory State* (2003); A Ogus, *Regulation* (2004); R Baldwin & C McCrudden, *Regulation and Public Law* (1987); C Hood, H Rothstein & R Baldwin, *The Government of Risk* (2001); R Baldwin, *Rules and Government* (1994); J Black, M Lodge and M Thatcher, *Regulatory Innovation*, (2005), C Sunstein, *Risk and Reason* (2002), R. Baldwin, M. Cave

and M. Lodge *Oxford Handbook of Regulation* (2010), M Lodge and K Wegrich, *Managing Regulation* (2012), D. Carpenter and D. Moss, *Preventing Regulatory Capture* (2013).

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2500 words) in the ST.

The summative assessment is composed of:

- Final online exam (75 per cent, 3x1200 words, 3h) in ST.
- Individual research paper (25 per cent, 2500 words), to be submitted in Week 1 of ST.

GV498 Half Unit

Multiculturalism

This information is for the 2020/21 session.

Teacher responsible: Dr Paul Apostolidis

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in International Migration and Public Policy and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This seminar explores political-theoretical questions associated with contemporary debates about multiculturalism. First, we confront normative issues concerning what it means for a state and its citizens to give “recognition” to particular cultures in societies with diverse cultural attachments and dominant cultural tendencies. On what principles of freedom, equality, or moral duty can group demands for cultural recognition be justified? What questionable assumptions about the meaning of “culture” might arguments regarding cultural recognition involve and what political implications follow from probing these assumptions? Next, we place these normative problems in a wider context by considering how cultural activities are entangled with systems of social domination. Texts in this phase combine political theory with empirical studies of indigenous, racial/ethnic minority, and religious politics. How might demands for social justice and pluralistic cultural expression mutually reinforce or conflict with one another? What confluences and tensions exist between liberal principles invoked in debates about multiculturalism and subaltern groups’ struggles for power through cultural action? How has imperial power shaped the composition of cultural identities, and how should frictions between multiculturalist projects and anti-imperial struggles be navigated?

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in Week 6 of the Lent Term.

Formative coursework: Students are invited to write one 1500 word formative essay, due no later than week 8.

Indicative reading: Charles Taylor, “The Politics of Recognition”; Will Kymlicka, “Multicultural Citizenship”; Iris Marion Young, “Polity and Group Difference”; Cristina Beltrán, “The Trouble with Unity: Latino Politics and the Creation of Identity”; Saba Mahmood, “Religious Reason and Secular Affect”; Glenn Coulthard, “Red Skin, White Masks”; Charles W. Mills, “Multiculturalism as/and/or Anti-Racism?”

Assessment: Essay (100%, 4000 words) in the ST.

GV499**Dissertation**

This information is for the 2020/21 session.

Availability: This course is compulsory on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Global Politics, MSc in Political Science and Political Economy, MSc in Political Theory, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is not available as an outside option.

Course content: A compulsory 10,000 word dissertation is required to be submitted as part of the assessment for each Government MSc programme. The dissertation is due by 5:00 pm on Tuesday 24 August 2021.

Assessment: Dissertation (100%, 10000 words) in August.

GV4A2 Half Unit Not available in 2020/21

Citizens' Political Behaviour in Europe: Elections Public Opinion and Identities

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Bruter

Availability: This course is available on the MSc in Comparative Politics, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 1 group. The deadline for applications is 12:00 noon on Friday 5 October 2018. You will be informed of the outcome by 12:00 noon on Monday 8 October.

Note that students from Masters or Doctoral programmes not listed above may still take the course subject to approval by the course convenor.

Pre-requisites: In order to be accepted on the course, all students must submit a research project idea by the end of MT Week 2. The document should be around 1-2 pages in length and should at least do two things: first, indicating a course-related research topic and a specific research question and explain what makes it interesting, and second suggesting the methodology the student intends to use to answer this question empirically. You may, but are not obliged to include references from existing literature (which would be a good thing to do); please also include a mini-bibliography.

Course content: This course intends to familiarise students with the study of electoral psychology and political behaviour in Europe in a broad sense. The three main objects of study in political science are institutions, policies, and citizens, and the study of political behaviour and political psychology is the field that centres on the third. A very important part of political behaviour is electoral participation and vote choice. We will explore general models of voting behaviour, electoral psychology, and participation, as well as specific aspects such as extremist politics. We will look closely at public opinion, how it is formed and how it can be studied. In the final part of the course, special consideration is given to political identities and how they are related to political behaviour.

Teaching: 20 hours of seminars in the LT. 4 hours of seminars in the ST.

Indicative reading: Bruter, M. 2005 *Citizens of Europe?* Basingstoke: Palgrave. LeDuc, L, Niemi, R, and Norris, P. 2010. *Comparing Democracies 3: Elections and Voting in the 21st Century*. London: Sage. Van der Eijk, C, and Franklin, M. 2009. *Elections and Voters*. Basingstoke: Palgrave Macmillan. Franklin, Mackie, et al. 1992. *Electoral Change*. Cambridge: Cambridge UP. Bruter, M. and Harrison, S. 2009. *The Future of our Democracies?* Basingstoke: Palgrave. Zaller, J. 1992. *The Nature and Origins of*

Mass Opinion. Cambridge: Cambridge University Press. Harrison, S. and Bruter, M. *Mapping Extreme Right Ideology*. Basingstoke: Palgrave.

Assessment: Project (80%, 5000 words) in the ST.

Class participation (20%) in the LT.

One empirical research project on a topic relevant to the course and approved by the course co-ordinator with a word limit of 5,000 words (80%).

GV4A5 Half Unit**International Migration and Immigration Management**

This information is for the 2020/21 session.

Teacher responsible: Dr Eiko Thielemann

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Comparative Politics, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Global Politics, MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in International Migration and Public Policy, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is not available as an outside option.

This course has limited availability and requires that students (regardless of Department or MSc programme) obtain permission from the teacher responsible via the 'LSE For You' capped course management system. This is a core course on the MSc International Migration and Public Policy. Priority will be given to students on that programme. Last year, very few students from other programmes could be accommodated on this course.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This course offers a theoretically informed account of the challenges posed by international migration and resulting policy responses. The focus is on the comparative analysis of immigration control policies in OECD countries. The course is structured in three parts. The first introduces a number of theoretical models that seek to explain the dynamics of international migration and migration control policies, addressing questions such as: Why do people migrate? Why do states accept migration? How effective are policies that aim to manage migration? The second, comparative part deals with national public policy responses to the issue of asylum & refugees, 'illegal' migration & human trafficking and (legal) immigration. The final part focuses on the analysis of multilateral policy initiatives on migration management at the global, regional and bi-lateral level.

Teaching: This course is delivered through seminars and lectures totalling 25 hours in the Michaelmas Term, and 1 hour for a revision lecture in the Summer Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There is a reading week in Week 6 of the Michaelmas Term.

Formative coursework: All students are expected to submit one non-assessed essay.

Indicative reading: There is no single textbook but the following texts are useful introductions:

S Castle & M J Miller, *The Age of Migration*, 2019; A Betts and P Collier, *Refuge: Transforming a Broken Refugee System* 2018; A. Betts, *Global Migration Governance*, 2010; C Boswell, *European Migration Policies in Flux: Changing Patterns of Inclusion and Exclusion*, 2003; C Brettell, *Migration Theory: Talking Across the Disciplines*, 2000; M Baldwin-Edwards & M Schain, *The Politics*

of Immigration in Western Europe, 1994; P Collier, *Exodus: How Migration is Changing our World*, 2015; W A Cornelius et al, *Controlling Immigration: A Global Perspective*, 2004; A Geddes, *The Politics of Migration and Immigration in Europe*, 2003; A Geddes, *Immigration and European Integration*, 2000; V Guiraudon & C Joppke, *Controlling a new migration world*, 2001; J F Hollifield, *Immigrants, Markets, and States: The Political Economy of Postwar Europe*, 1992; C Joppke, *Challenges to the Nation-State: Immigration in Western Europe and the United States*, 1998; G Loescher, *Beyond Charity: International Cooperation and the Global Refugee Crisis*, 1996; J Money, *Fences and Neighbours: The Political Geography of Immigration Control*, 1999; S Sassen, *Guests and Aliens*, 2000; D Thranhardt, *Europe, a New Immigration Continent*, 1994; A R Zolberg et al, *Escape from Violence: Conflict and the Refugee Crisis in the Developing World*, 1997.

Assessment: Online assessment (100%) in the ST.

Online 24 hour (take home) Exam (100%), in the summer exam period. Estimated amount of effort required: 3 hours in the 24 hour period.

GV4A8 Half Unit

Nationalist Conflict, Political Violence and Terrorism

This information is for the 2020/21 session.

Teacher responsible: Prof James Hughes

Availability: This course is available on the MSc in Conflict Studies. This course is available with permission as an outside option to students on other programmes where regulations permit. Availability to students outside the MSc Conflict Studies is subject to space. This course is capped at two groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: How can we distinguish legitimate resistance and political violence from terrorism? What is the relationship between war and terror? What distinguishes a combatant from non-combatant? Should we erode civil liberties and democratic values to fight terrorism? How do social scientists theorise about political violence and terrorism? This course attempts to answer these and similar questions by a comparative examination of the theories and ethics of political violence and the root causes, nature and types, and dynamics of violence. This course also evaluates different political and security policies and methods of conflict resolution as change agents. A number of case studies of historical and contemporary conflicts are examined to illustrate the theoretical and policy dilemmas. The course has two parts. Firstly, it examines definitions and concepts, the root causes and motivations for engaging in political violence, the ethical dilemmas, the principles and efficacy of the laws and norms of armed conflict, and repertoires of political violence. We examine the historical evolution from the era of nineteenth century ideologically driven violence, through decolonization to the present day of state counterinsurgency and counterterrorism policies. Key policies in counterinsurgency and counterterrorism will be examined, including coercive versus cooperative approaches, the spectrum of dealing with communal resistance from genocide to cooption, policies of criminalization, and the balance between security and liberty. Secondly, the course explores the key issues and debates through a number of case studies that analyse political violence and terrorism in democracies and non-democracies, including the insurgency and counterinsurgency in Northern Ireland, Chechnya and Iraq, and different forms of extremist ideologically driven violence, including the transnational challenges posed by Al Qaeda and ISIS, and new forms of White Supremacism. Throughout the course comparisons will be made and lessons drawn from the performance of different regime types (colonial, democratic, and authoritarian) in managing political violence. This is a Moodle course.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 31 hours in the Michaelmas Term (including a 1 hour lecture for exam discussion). Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in week 6 of the MT for private study and assessment preparation.

Formative coursework: One essay of 2,500 words. Students must also contribute to a team presentation.

Indicative reading: Tore Bjorgo ed. *Root Causes of Terrorism*, Routledge (2005); Andrew Silke ed. *Terrorists, Victims and Society, Psychological Perspectives on Terrorism and its Consequences*, Wiley (2003); David Whittaker, *The Terrorism Reader*, Routledge (3rd edn, 2007); Michael Walzer, *Just and Unjust Wars: A Moral Argument with Historical Illustrations*, Basic Books (1992); *Arguing about War*, Yale University Press (2004); Michael Ignatieff *The Lesser Evil. Political Ethics in an Age of Terror*, Edinburgh University Press (2005); James Hughes, *Chechnya from Nationalism to Jihad*, University of Pennsylvania Press (2008); Marc Sageman, *Understanding Terror Networks*, University of Pennsylvania Press (2004) and *Leaderless Jihad, Terror Networks in the Twenty-First Century*, University of Pennsylvania Press (2007), and *Misunderstanding Terrorism*, University of Pennsylvania Press (2016); Jeff Victoroff and Arie W. Kruglanski eds, *Psychology of Terrorism. Classic and Contemporary Insights*, Psychology Press (2009); Cas Mudde, *The Populist Radical Right: A Reader*, Routledge (2017).

Assessment: Online assessment (100%) in January. 2 hour online exam in the January exam period.

GV4B6 Half Unit Not available in 2020/21

Kant's Political Philosophy

This information is for the 2020/21 session.

Teacher responsible: Prof Katrin Flikschuh

Availability: This course is available on the MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

Optional for MSc Political Theory; open to others as an outside option on request.

This course is capped at 2 groups.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Pre-requisites: None, though an appetite for abstract philosophical thought will be an advantage (however, no previous experience is required).

Course content: An introduction to and critical appraisal of Immanuel Kant's political philosophy. Despite the enormous influence which Kant's moral philosophy has exerted on debates in contemporary liberal thinking, his political philosophy has until recently been largely ignored. This is beginning to change: Kant's political philosophy is beginning to be studied in its own right. Such study shows that his political thinking diverges in many of its central aspects from contemporary liberal thinking: the impact of Kant's thought upon the latter must, therefore, be re-assessed. Through close reading and analysis of the primary texts, this course introduces students to Kant's distinctive approach to political thinking. Core texts will include selected passages from the *Doctrine of Right* (Part 1 of the *Metaphysics of Morals*); Kant's celebrated essay, 'On Perpetual Peace'; and his less well known, but no less important essay 'On the Common Saying: "This may be true in theory, but does it work in Practice"'. The analytic and substantive focus will be on three interrelated themes: Kant's idea of freedom as an idea of reason; his account and justification of individual property rights and related conception of state authority; and his cosmopolitan conception of justice. Although the analytic and philosophical focus will be on Kant's own political thinking, we shall compare and contrast Kant's position with contemporary

Kantian liberalism wherever appropriate.

Teaching: 20 hours of seminars in the LT.

There will be a reading week in week 6 of the LT for private study and formative/summative assessment preparation.

Formative coursework: Students are expected to come well prepared and take an active role in seminar discussion. Students are expected to write one formative essay (of up to 2500 words). These will be marked and commented on, but do not count towards formal assessment for this course.

Indicative reading: Kant, *The Metaphysics of Morals*, Part 1; Kant, *Groundwork of the Metaphysics of Morals*; M Timmons (ed.), *Kant's Metaphysical of Morals. Interpretative Essays*; Katrin Flikschuh; Arthur Ripstein, *Force and Freedom. Kant's Legal and Political Philosophy*; Onora O'Neill, *Towards Justice and Virtue*; Onora O'Neill, *Constructions of Reason*; Pauline Kleingeld, *Kant and Cosmopolitanism*; Stephen Darwall, *The Second-Person Standpoint*.

Assessment: Essay (100%, 5000 words).

GV4B7 Half Unit

The Idea of Freedom

This information is for the 2020/21 session.

Teacher responsible: Bruno Leipold

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Theory. This course is not available as an outside option.

This course is capped at two groups. Priority will be given to students enrolled on the MSc in Political Theory.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Pre-requisites: Basic familiarity with concepts and methods in normative political theory.

Course content: The concept of freedom is often invoked in political life. Many policies and broader political agendas are justified in its name. Nearly all modern ideologies from liberalism to socialism and conservatism claim liberty as a central value. But what, exactly, does freedom mean? Is freedom best understood in terms of absence of interference or in terms of non-domination? Is one made unfree only when one's rights are violated? Does poverty constitute a constraint on freedom? Does wage-labour make workers unfree? And could citizens of an authoritarian regime be described as free? These are some of the questions addressed in this module. Depending on the particular year in which the module is taught, the approach taken may be either historical or contemporary-analytic or a combination of the two. Consequently, authors discussed may include key historical thinkers such as Hobbes, Locke, Rousseau, and Kant, as well as contemporary scholars such as Isaiah Berlin, Hannah Arendt, Charles Taylor, Philip Pettit, Nancy Hirschmann, Quentin Skinner, Amartya Sen, Martha Nussbaum and others. The overall aim of the course is to enable students to assess the quality and strength of different theorists' conceptions of freedom and to deploy those conceptions in the analysis and justification of some core institutions within the modern state.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours in the Michaelmas Term. Some or all of this teaching will be delivered through a combination of online and on-campus seminars. There will be a reading week in week 6 of the MT for advice and feedback.

Formative coursework: All students are expected to submit one formative (non-assessed) essay.

Indicative reading: Isaiah Berlin, 'Two Concepts of Liberty' in Berlin, *Liberty* (edited by Henry Hardy); Hannah Arendt, 'Freedom and Politics', in Miller (ed.), *The Liberty Reader*; Gerald MacCallum, 'Negative and Positive Freedom', in *Philosophical Review*, 76 (1967); Nancy Hirschmann, *The Subject of Liberty*; Phillip Pettit, *A Theory of Freedom*; Robert Nozick, *Anarchy, State, and Utopia*; G.

A. Cohen, 'Capitalism, Freedom and the Proletariat' in Miller (ed.) *The Liberty Reader*; John Stuart Mill, *On Liberty*; Jean-Jacques Rousseau, *The Social Contract*; Thomas Hobbes, *Leviathan*; John Locke, *Second Treatise of Government*.

Assessment: Essay (100%, 4000 words).

GV4B8 Half Unit

Civil Wars: Concepts and Cases

This information is for the 2020/21 session.

Teacher responsible: Dr William Kissane

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po) and MSc in Gender, Peace and Security. This course is available as an outside option to students on other programmes where regulations permit.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: The course examines social science explanations of the origins, intractability and outcomes of civil wars. It does this through the comparative analysis of various cases. These cases may vary from year to year. Particular stress is on: Civil War and Civilization. The Concept of Civil War. Patterns of civil war since 1945. Large N approaches. Decolonisation, and Democratisation as causes of civil war. The emergence of security dilemmas. Partition and Civil War. The idea of global civil war.

Teaching: This course provides a combination of seminars and lectures totalling a minimum of 25 hours in the Lent Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in week 6 of the LT for private study and assessment preparation.

Formative coursework: All students are expected to submit one non-assessed essay of 1500 words.

Indicative reading: Bill Kissane, *Nations Torn Asunder; The Challenge of Civil War*, OUP 2016.

Assessment: Essay (100%, 3000 words) in the ST.

These assessments and their values will be the same whether a student receives teaching on campus or online.

GV4B9 Half Unit

The Second Europe

This information is for the 2020/21 session.

Teacher responsible: Dr Vesselin Dimitrov

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: The course explores the problems of delayed modernisation, problematic democratisation, conflictual nation-building and geopolitical insecurity in the European semi-periphery, including countries such as Russia, Poland, Spain, Italy, Austria-Hungary, and Sweden. It analyses the socio-economic structures, political issues and problems shared by the European semi-periphery from the first wave of liberal globalisation and the emergence of mass politics in the late 19th century to

European integration in the early 21st century. It analyses the strategies adopted by political elites and social classes in the face of modernisation, imperial decline, nationalism, and European integration.

Course topics include: The emergence of core and semi-periphery in Europe; Problems of modernisation; Ruling elites and structures of power; State nationalism, sub-state nationalism and problems of nation-state building; Religion: the socio-political power of the church; Political parties and ideologies; Fascism and varieties of right-wing authoritarianism in the 1920s and 1930s; Communism; Empire and EU integration.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 26 and a half hours in the LT and ST. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars.

There will be a reading week in Week 6 of the LT for private study and assessment preparation.

Formative coursework: Students are required to submit one formative essay of 2000 words.

Indicative reading: J Breuilly, *Nationalism and the State* (MUP, 1993); E Hobsbawm, *The Age of Capital, 1848-1875* (London, 1975), *The Age of Empire, 1875-1914* (London, 1989), *Age of Extremes: The Short Twentieth Century, 1914-1991* (London, 1994), and *Nations and Nationalism since 1780* (Cambridge, 1992); D Lieven, *Empire* (London, 2000), and *The Aristocracy in Europe, 1815-1914* (London, 1992); M Mann, *The Sources of Social Power. Vol. 2, The Rise of Classes and Nation States, 1760-1914, Vol. 3, Global Empires and Revolution, 1890-1945, and Vol. 4, Globalizations, 1945-2011* (Cambridge, 2012-13); B Moore, *Social Origins of Dictatorship and Democracy* (Boston, 1967); K Polanyi, *The Great Transformation: The Political and Economic Origins of Our Time* (Boston, 2001); N Stone, *Europe Transformed 1878-1919* (Oxford, 1999); J Zielonka, *Europe as Empire: The Nature of the Enlarged European Union* (Oxford, 2007).

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2500 words).

GV4C8 Half Unit

Game Theory for Political Science

This information is for the 2020/21 session.

Teacher responsible: Dr Rafael Hortalá-Vallve

Availability: This course is compulsory on the MSc in Political Science and Political Economy. This course is available on the MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit. MSc Political Science and Political Economy students will be granted priority access as this is a compulsory course on the programme. Other postgraduates wanting to take the course (space permitting) require the permission of the teachers responsible.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: Game theory provides a scientific approach to the study of social interactions which focusses on the strategic aspects of decision-making between two or more individuals or groups. This course will cover the basic elements of game theory and how they have been applied in the area of political science and political economy. The aim of the course is to provide a deeper understanding of game theoretic tools and to help you understand how these ideas have been developed and applied in the political science literature. The first part of the course will look at static games where all players move simultaneously and the second part of the course will look at dynamic games players move in

sequence. In each part we will start with a simple setting where all information is known to all players (complete information) and we will then move to more complex setting where some information is not known to all players (incomplete information).

Teaching: This course provides a combination of seminars and lectures totalling 40 hours in the Michaelmas Term and 2 hours in the Summer Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in Week 6 of the MT.

Formative coursework: Weekly problem sets to be completed and discussed in class and a two hour mock exam in week 11 of MT.

Indicative reading: The core text for the course is M J Osborne, *An Introduction to Game Theory*, Oxford University Press 2004

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GV4C9 Half Unit

Globalization and Democratization in Southeast Asia

This information is for the 2020/21 session.

Teacher responsible: Prof John Sidel

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Development Management, MSc in Development Studies, MSc in Global Politics and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 1 group. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This course focuses on the diverse processes of globalization and democratization observed in Southeast Asia over the past few decades. Special attention is paid to democracy in Indonesia and the Philippines, regression from democracy to military rule in Thailand, recent movements towards democracy in Myanmar, and 'creeping pluralism' and 'creeping constitutionalism' in Vietnam. The course examines important trends and developments accompanying globalization and democratization in the region - in government-business relations, in local politics, in civil society, in religious practices, in inter-communal relations, and in the organization and use of violence in politics. Throughout the course, the countries examined are treated as cases suitable for analysis and comparison in the light of the broader Comparative Politics and Global Politics literatures on globalization and democratization.

The course begins by situating globalization and democratization in Southeast Asia against a comparative historical and sociological backdrop, paying close attention to the variegated patterns of class, state, and religious formation in the region.

The course compares processes and patterns of globalization and democratization across the Philippines, Thailand, Indonesia, and Myanmar. Lectures, readings, and seminar discussions then turn to key trends accompanying democratization in Southeast Asia. The trends examined include campaigns against 'corruption' and in support of 'the rule of law' and 'good governance'; social movements and struggles for popular empowerment; the democratization of religious practices and institutions; religious violence, and separatist mobilization. These trends are treated through comparative analysis of different cases within Southeast Asia and in the light of relevant theoretical literatures drawn from Comparative Politics and Global Politics.

Teaching: This year, the lectures will all be recorded and available online, and seminars will be run through a combination of online and/or on-campus provision as circumstances permit and require. This course provides a combination of seminars and lectures totalling 25 hours in the Michaelmas Term. Insofar as the course is limited to online modes of teaching, supplementary activities and forms of interaction and communication will be provided in

addition to the lectures and seminars.

There will be a reading week in week 6 of the MT for complementary structured learning activities.

Formative coursework: One non-assessed 1,000 word essay.

Indicative reading: Martin van Bruinessen (ed.), *Contemporary Developments in Indonesian Islam: Explaining the "Conservative Turn"* (Singapore: Institute of Southeast Asian Studies, 2013); Nicole Curato (ed.), *A Duterte Reader: Critical Essays on Rodrigo Duterte's Early Presidency* (Ithaca, NY: Cornell University Southeast Asia Program, 2017); Renaud Egret, *Caretaking Democratization: The Military and Political Change in Myanmar* (Oxford: Oxford University Press, 2016); Federico Ferrara, *The Political Development of Modern Thailand* (Cambridge: Cambridge University Press, 2015); Michele Ford and Thomas B. Pepinsky (eds.), *Beyond Oligarchy: Wealth, Power, and Contemporary Indonesian Politics* (Ithaca, NY: Cornell University Southeast Asia Program 2014); Eva-Lotta E. Hedman, *In the Name of Civil Society: From Free Election Movements to People Power in the Philippines* (Honolulu: University of Hawai'i Press, 2006); Annette Miae Kim, *Learning to Be Capitalists: Entrepreneurs in Vietnam's Transition Economy* (Oxford: Oxford University Press, 2008); Hue-Tam Ho Tai and Mark Sidel (eds.), *State, Society and the Market in Contemporary Vietnam* (London: Routledge, 2013).

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Essay (50%, 3000 words).

GV4D3 Half Unit

Local Power in an Era of Globalization, Democratization, and Decentralization

This information is for the 2020/21 session.

Teacher responsible: Prof John Sidel

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Development Studies and MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has limited availability (is capped), and requires that students (regardless of Department or MSc programme) obtain permission from the teacher responsible. It is capped at 1 group. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: Over the course of the past two decades, the inter-related processes of globalization, democratization, and decentralization are said to have generated new social forces and political freedoms in localities around the world. Market reforms and village elections in China, the end of Communist Party rule in Russia and Eastern Europe, and trends of (re)democratization in Asia, Africa, and Latin America have all offered new opportunities for local people to effect change in local politics around the world. Yet academic, journalistic, and policy accounts have highlighted the rise and resilience of 'local despotisms' – "authoritarian enclaves," "bosses," "caciques," "chiefs," "clans," "local strongmen," "mafias," "warlords" – in the midst of this reworking of market, electoral, and administrative circuitries. This course focuses on this phenomenon of what scholars have come to call 'subnational authoritarianism', competing explanations for its emergence and entrenchment, the diversity of its manifestations, and various challenges mounted against its perpetuation. The goals of the course are twofold. First, the course offers a critical examination of competing accounts of and explanations for the phenomenon of 'subnational authoritarianism' in the developing world. Second, the course helps students think more carefully, critically, and creatively about local politics more broadly, and to do so with an eye towards the comparative analysis of local power structures rooted in local economies and societies. The course begins with an examination of an emerging new political-science literature on 'subnational

authoritarianism' and a more established body of scholarship on clientelism and machine politics. The course then turns to case studies in diverse settings, ranging from southern Italy to China, India, Indonesia, Nigeria, and Russia, and extending to cases of 'warlordism' in contexts such as contemporary Afghanistan, Iraq, and Somalia. The readings allow students to examine and evaluate competing explanations for the rise and entrenchment of local bosses, chiefs, clans, and mafias, diverging descriptions of their modes of domination, and alternative accounts of their disappearance, evolution, or transformation in the face of economic, social, and political change. Successive weeks also explore the links between constellations in local politics on the one hand, and patterns of economic development, ethnic conflict, and religious mobilization on the other. The final weeks of the course shift attention to the efforts to challenge entrenched local power structures and to create "countervailing power" through popular mobilization, political participation, and social empowerment in localities in diverse settings across the world.

Teaching: This year, the lectures will all be recorded and available online, and seminars will be run through a combination of online and/or on-campus provision as circumstances permit and require. This course provides a combination of seminars and lectures totalling 23.5 hours in the Lent Term and 1 hour in the Summer Term. Insofar as the course is limited to online modes of teaching, supplementary activities and forms of interaction and communication will be provided in addition to the lectures and seminars.

There will be a reading week in week 6 of the LT for complementary structured learning activities.

Formative coursework: One non-assessed 1,000 word essay.

Indicative reading: Jacqueline Behrend and Laurence Whitehead (eds.), *Illiberal Practices: Territorial Variance within Large Federal Democracies* (Baltimore, MD: Johns Hopkins University Press, 2016); Judith Chubb, *Patronage, Power, and Poverty in Southern Italy: A Tale of Two Cities* (Cambridge: Cambridge University Press, 1982); Edward L. Gibson, *Boundary Control: Subnational Authoritarianism in Federal Democracies* (Cambridge: Cambridge University Press, 2013); Ben Hillman, *Patronage and Power: Local State Networks and Party-State Resilience in Rural China* (Stanford, CA: Stanford University Press, 2014); Kimberly Marten, *Warlords: Strong-Arm Brokers in Weak States* (Ithaca, NY: Cornell University Press, 2012); Dipali Mukhopadhyay, *Warlords, Strongman Governors, and the State in Afghanistan* (Cambridge: Cambridge University Press, 2014); Kelly McMann, *Economic Autonomy and Democracy: Hybrid Regimes in Russia and Kyrgyzstan* (Cambridge: Cambridge University Press, 2006); Gulnaz Sharafutdinova, *Political Consequences of Crony Capitalism inside Russia* (Notre Dame: Notre Dame University Press, 2010); Jane C. Schneider and Peter T. Schneider, *Reversible Destiny: Mafia, Antimafia, and the Struggle for Palermo* (Berkeley: University of California Press, 2003); Milan Vaishnav, *When Crime Pays: Money and Muscle in Indian Politics* (New Haven, CT: Yale University Press, 2017).

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 3000 words).

GV4D7 Half Unit

Dilemmas of Equality

This information is for the 2020/21 session.

Teacher responsible: Dr Sarah Goff

Availability: This course is available on the MSc in Gender, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 3 groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the

outcome by 17:00 on Wednesday 30 September 2020.

Course content: The course starts with the general questions of why equality matters and what is to be equalized. It then introduces some of the major debates in the contemporary egalitarian literature: equality of opportunity versus equality of outcome; luck egalitarianism versus relational equality; and social equality versus global equality. Throughout the course, and particularly in the latter half, we consider concrete social problems and dilemmas faced by those who are committed to the ideal of equality. Topics covered this year include discrimination, and policies that aim to reduce inequalities between social groups.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours in the Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars.

There will be a reading week in Week 6 of the MT for private study and assessment preparation.

Formative coursework: Students will submit a short formative essay (up to 1500 words) and will be given feedback on this before submitting their assessed coursework.

Indicative reading: Samantha Brennan, 'Feminist Ethics and Everyday Inequalities' *Hypatia* 24, 2009; Derek Parfit, 'Equality and Priority' *Ratio* 10, 1997; Ronald Dworkin, *Sovereign Virtue: the Theory and Practice of Equality* (Harvard University Press, 2000); Amartya Sen, *Development as Freedom* (Oxford University Press, 1999); Elizabeth Anderson, 'What is the Point of Equality?' *Ethics* 109, 1999; Harry Frankfurt, 'The Moral Irrelevance of Equality' *Public Affairs Quarterly* (2000); and Deborah Hellman, *When is Discrimination Wrong?* (Harvard University Press, 2011).

Assessment: Essay (100%, 4500 words).

GV4E1 Half Unit

Comparative Democratization in a Global Age

This information is for the 2020/21 session.

Teacher responsible: Dr William Kissane

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies and MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: To introduce students to the fundamental political science debates about the phenomenon of democratization, to explore the explanatory strength of key paradigms, and to compare distinct modes of democratization. Specific topics are: Definitions of democratization and democratic consolidation; waves of democratization, capitalist development and democratization, elite transitions, post-civil war democracy, hybrid regimes, democratic backsliding, the current crisis of democracy.

Teaching: This course provides a combination of seminars and lectures totalling a minimum of 25 hours in the Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in week 6 of the MT for private study and assessment preparation.

Formative coursework: All students are expected to submit one non-assessed essay of 1500 words.

Indicative reading: D Potter et al, *Democratization*, J. Grugel, *Democratization*, Rueschmeyer, Stephens and Stephens, *Capitalist Development and Democracy*; J Linz and A S Stepan, *Problems of Democratic Transition and Consolidation*

Assessment: Essay (100%, 3000 words) in the LT.

These assessments and their values will be the same whether a student receives teaching on campus or online.

GV4E2 Half Unit

Capitalism and Democracy

This information is for the 2020/21 session.

Teacher responsible: Prof Jonathan Hopkin and Dr David Woodruff

Availability: This course is available on the MSc in Comparative Politics, MSc in Global Politics, MSc in Political Science and Political Economy and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

Available as an outside option for students on other programmes with the teachers' consent. This course is capped at 3 groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: Compatibility and incompatibility of capitalism and democracy; Constitutional restraints on economic policymaking in central banking and property rights; Democracy and economic inequality; World context and the compatibility of democracy and capitalism; Democracy and economic crisis. This course examines the uneasy interaction between the two dominant concepts underpinning political and economic institutions in advanced industrial societies. It addresses in particular questions about the relationship of capitalism to democracy, both conceptually and empirically. We consider whether democracy undermines or supports capitalism, focusing on policies relating to central banking, redistribution, and property rights. We also examine how capitalism may undermine or sustain democracy and whether contemporary international circumstances heighten the tension between democracy and capitalism.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 31 and a half hours over the Lent and Summer Terms. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. Online seminars, if required, will involve a mix of virtual meetings and other forms of online engagement.

There will be a reading week in week 6 of the LT.

Formative coursework: All students are expected to submit one non-assessed essay

Indicative reading: Schumpeter, *Capitalism, Socialism, and Democracy*. Holmes, 'Precommitment and the Paradox of Democracy'. Mill, *Considerations on Representative Government*. Kalecki, 'Political Aspects of Full Employment'. Olson, 'Dictatorship, Democracy, and Development'. Stiglitz, 'Central Banking in a Democratic Society'. Beard, *An Economic Interpretation of the Constitution of the United States*. Kenworthy and Pontusson, 'Rising Inequality and the Politics of Redistribution in Affluent Countries'.

Assessment: Online assessment (100%) in the ST.

GV4E3 Half Unit

Democratisation, Conflict and Statebuilding

This information is for the 2020/21 session.

Teacher responsible: Prof James Hughes

Availability: This course is available on the MSc in Conflict Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at one group. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This course provides a theoretically informed assessment and critique of the debates on the relationship between democratization, violent conflict and state-building. It seeks to explain why some state-building projects have succeeded while others failed or are failing. Case studies will be drawn from post-communist Europe and Eurasia, principally focusing on

the Western Balkans, North and South Caucasus, and Central Asia, including Afghanistan. Themes considered include: state collapse of the USSR and Yugoslavia, theories and forms of state-building, democratization, nationalism and nation-state building, internal armed conflicts and civil wars; conceptualising 'failed state'; nationalist mobilisation and the 'nationalising' state; 'ethnic democracies'; authoritarian state-building; secession and national and ethnic conflict management; 'coloured revolutions'; democracy promotion, international conditionality and intervention, in particular by the EU and U.S.; the politics and security challenges posed by 'frozen conflicts'. As an LSE Moodle course, most of the weekly essential readings are available online.

Teaching: This course provides a combination of seminars and lectures totalling 31 hours in the Lent Term (including a 1 hour lecture for essay discussion). This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in LT Week 6.

Formative coursework: Students are expected to submit one essay outline (1000 words) in preparation for the assessed essay, and prepare one group seminar presentation.

Indicative reading: David Laitin, *Nations, States and Violence*, Oxford, 2007; Philip G. Roeder and Donald Rothchild eds, *Sustainable Peace. Power and Democracy after Civil Wars*, Cornell, 2005; James Hughes, *Chechnya. From Nationalism to Jihad*, Penn Press, 2007; Gwendolyn Sasse, *The Crimea Question. Identity, Transition and Conflict*, Harvard, 2007; James Hughes & Gwendolyn Sasse (Eds), *Ethnicity and Territory in the Former Soviet Union*, Routledge, 2001; Christoph Zurcher, *The Post-Soviet Wars: Rebellion, Ethnic Conflict, and Nationhood in the Caucasus*, New York University Press, 2007; David Chandler, *From Kosovo to Kabul: Human Rights and International Intervention*, Pluto, 2002; David Chandler, *Empire in Denial. The Politics of State-Building*, Pluto, 2006; Jan Koehler and Christoph Zurcher eds, *Potentials of Disorder Explaining Conflict and Stability in the Caucasus and in the Former Yugoslavia*, Manchester, 2003; Roberto Belloni, *State building and international intervention in Bosnia*, Routledge, 2007.

Assessment: Essay (100%, 5000 words).

GV4E8 Half Unit

Conflict and Institutional Design in Divided Societies

This information is for the 2020/21 session.

Teacher responsible: Dr Vesna Popovski

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Global Politics and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students on the MSc in Conflict Studies.

This course is capped at 1 group.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: The internal resolution of serious ethnic and national conflicts almost inevitably involves some form of power sharing and/or power division (autonomy and federation). While power sharing is often invoked in normative and comparative accounts of conflict resolution, it is less frequently systematically examined. Conflict and Institutional Design (CID) is a comparative analysis of the making, maintenance and too often breaking of power sharing agreements. When and how are peace agreements negotiated? Does UN peacekeeping make a positive difference? What role than transitional justice mechanisms perform? Do they help? What type of power-sharing and federal designs are available? Under what conditions is power sharing likely

to help contain conflict, and when does it fail? The course will pay particular attention to what happens after a power-sharing agreement is reached. The institutional focus will include analysis of electoral system design for divided societies, the dynamics of electoral and party competition within ethnic segmentation and consociational governance (power-sharing constitutions, executives, legislatures and federations). Why do some power-sharing regimes succeed while others fail?

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours in Lent Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in Week 6 of the LT.

Formative coursework: Two briefing papers on pre-selected key concepts/cases.

Indicative reading: Lijphart, Arend (2008). *Thinking about Democracy: Power Sharing and Majority Rule in Theory and Practice*. London: Routledge; .Noel, Sid (2005, ed), *From Power Sharing to Democracy*. Montreal: McGill-Queen's University Press; Norris, Pippa (2008). *Driving Democracy: Do Power-Sharing Institutions Work?* Cambridge University Press; Reynolds, Andrew (ed) *The Architecture of Democracy: Constitutional Design, Conflict Management and Democracy*. Oxford UP; Powell, G. Bingham (2000). *Elections as Instruments of Democracy: Majoritarian and Proportional Visions*. New Haven: Yale UP; Hayner, Priscilla (2011, 2nd edition). *Unspeakable Truths: Transitional Justice and the Challenge of Truth Commissions*. Routledge; Shugart, Matthew Soberg and John Carey (1992). *Presidents and Assemblies: Constitutional Design and Electoral Dynamics*. Cambridge UP; Roeder, Philip and Donald Rothchild (2005). *Sustainable Peace: Power and Democracy After Civil Wars*. Cornell UP; Lijphart, Arend (1977). *Democracy in Plural Societies: A Comparative Exploration*. New Haven: Yale University Press; Nordlinger, Eric (1972). *Conflict Regulation in Divided Societies. Occasional Papers in International Affairs*. Cambridge, MA: Center for International Affairs, Harvard University; O'Leary, Brendan, Ian Lustick and Thomas Callaghy (2001, eds). *Right-Sizing the State: The Politics of Moving Borders*. Oxford UP; Diamond, Larry and Marc Plattner (2006, eds). *Electoral Systems and Democracy*. Johns Hopkins UP; Gallagher, Michael and Paul Mitchell (2005, eds), *The Politics of Electoral Systems*. Oxford: Oxford University Press; Reilly, Benjamin (2001). *Democracy in Divided Societies: Electoral Engineering for Conflict Management*. Oxford UP; Birnir, Johanna Kristin (2007). *Ethnicity and Electoral Politics*. Cambridge University Press.

Assessment: Essay (100%, 5000 words) in the ST.

The research essay will be on a topic of your choice. Having said that the topic will be discussed between each of you and myself and I must approve the topic. The research paper should ideally examine a research question using relevant concepts and theories, and must have an empirical dimension that is relevant to the themes of the course. 'Empirical' is understood in the broadest sense: your material could be a case study set in an appropriate theoretical framework, it could examine a theme with comparative case studies, it could be quantitative or qualitative. Whatever is deemed appropriate to the research question at hand. Bear in mind though that broad surveys are generally not a good idea. After all 5000 words is about half the standard size of a journal article. Much more advice about the essay will be given as the course progresses both collectively and in individual meetings with each of you. One of the aims in asking participants to write a paper is to help you to think about research questions and appropriate research design. Thus we are aiming at more than a traditional essay (which largely summarizes what significant others have said), and to begin to make the transition towards 'postgraduate research' in which you help develop new insights and/or new empirical knowledge. This should also help you when approaching the planning and writing of your MSc dissertation. Since you will be working on something that really interests you I hope that this will be an enjoyable experience.

GV4E9

Approaches and Issues in Public Policy and Administration

This information is for the 2020/21 session.

Teacher responsible: Prof Edward Page, Dr Daniel Berliner and Dr Charlotte Haberstroh

Availability: This course is compulsory on the MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: The course is designed to introduce MSc students to major issues in understanding public administration and policy. Students will be divided into three to four classes depending on the number of students taking the course. 18 of the lectures will reflect the topics to be covered in the weekly classes (18 plus 1 revision class) addressing key themes in Public Policy and Public Administration. Some of the lectures may be given by other colleagues teaching on the MSc degree as well as by outside speakers. 2 lectures and classes will cover dissertation writing (for GV499) in the field of public policy and administration.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across the Michaelmas, Lent and Summer Terms. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. This course includes reading weeks in Week 6 of both the MT and LT terms.

Formative coursework: Two formative essays, one in the Michaelmas Term and one in the Lent Term.

Indicative reading: Paul Cairney (2012) *Understanding Public Policy*; Merilee Grindle (2012) *Jobs for the Boys*; B Guy Peters (2018) *Politics of Bureaucracy* (7th edn); David L Weimer and Aidan R Vining (2016) *Policy analysis: Concepts and practice*; Steve Balla, Martin Lodge and Edward C Page (eds) (2015) *Oxford Handbook on the Classics of Public Policy*.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 3000 words) in the LT.

GV4F2 Half Unit

Popular Politics in the Middle East

This information is for the 2020/21 session.

Teacher responsible: Prof John Chalcraft

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies and MSc in Global Politics.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 2 groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: The course explores the role of popular politics in the making of the contemporary Middle East and North Africa. The primary focus is on the Arab world but reference is also made to Iran, Israel and Turkey. We study the origins, course and consequences of popular protest, social and political movements, uprisings and revolutions in the region. We ask how a wide variety of subaltern social groups have challenged subordination and brought about new social relations. Our cases are drawn from the early twentieth century to the present. Common topics include the Iranian revolution of 1979, everyday forms of resistance, the first intifada in the Occupied Palestinian Territories (1987-1991), social justice and labour movements, Islamic activism, the Arab uprisings of 2011 and the Rojava Revolution. The course draws on critical, historically-minded and Gramscian approaches, aims to grasp the

role of active subjectivity and leadership in context, and evaluates the ways in which a wide variety of movements have aimed to bring about change, and how they have succeeded and/or failed to do so.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours in Lent Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. Week 6 of the LT is a reading week.

Formative coursework: In order to develop essay skills and obtain feedback outside of formal assessment, students will complete a 2,000 word formative essay on which they will receive feedback as to overall standard, argument, evidence, structure and style. Students will choose one essay from a list of titles. To prepare for the 5,000 word essay, students will submit for approval a proposed title and a two-page handout summarising the question or puzzle that their essay will address. A seminar will also be held as a workshop to assist students prior to the final submission of their 5,000 word essay.

Indicative reading: Abrahamian, Ervand. *Iran between Two Revolutions* (Princeton University Press, 1982); Achcar, Gilbert. *The People Want*. (Saqi Books 2012); Bayat, Asef. *Street Politics: Poor People's Movements in Iran* (Columbia University Press, 1997); Beinín, Chalcraft, John. *Popular Politics in the Making of the Modern Middle East* (Cambridge University Press, 2016); Cronin, Stephanie. *Subalterns and Social Protest* (Routledge, 2007); Kurzman, Charles. *The Unthinkable Revolution in Iran* (Harvard University Press, 2004); Swedenburg, Ted. *Memories of Revolt: The 1936-1939 Rebellion and the Palestinian National Past* (Fayetteville: University of Arkansas Press, 2003); Tripp, Charles, *The Power and the People* (Cambridge: CUP, 2013).

Assessment: Essay (100%, 5000 words).

GV4F4 Half Unit

Policy Advice in Theory and Practice

This information is for the 2020/21 session.

Teacher responsible: Dr Paolo Belardinelli

Availability: This course is available on the MSc in International Migration and Public Policy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 3 groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: Many masters graduates in public policy and administration go on to work in organizations that produce or consume policy advice. With this in mind, this course will look at how policy advice is produced and used. It has three objectives: to introduce students to a range of theoretical and empirical scholarship on the issues involved in producing and using policy advice; to develop practical policy analysis and communication skills required of policy advisors; and to expose students to practitioners who produce and use policy advice. Students will develop their policy analysis and communication skills by critically analysing the theoretical scholarship on policy advice, the science-policy link, and research impact. Moreover, we will apply this analysis to real-world cases during the seminars, in group presentations and exercises, and in the formative and assessed coursework.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: One formative essay (2,000 words), one

group presentation, and a mock examination.

Indicative reading: Bardach, Eugene (2009) *A Practical Guide for Policy Analysis*, Third Edition. Washington, DC: CQ Press. Stone, D.A., (2002). *Policy paradox: The art of political decision making*, New York: Norton. Scott, C. and Baehler, K. (2010) *Adding Value to Policy Analysis and Advice*, Sydney: University of New South Wales Press. Weimer, David L. and Vining, Aidan R. (2005) *Policy Analysis: Concepts and Practice*, Fourth Edition. Upper Saddle River, NJ: Pearson.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.
Project (50%, 2500 words).

GV4F5 Half Unit

Advanced Study of Key Political Thinkers

This information is for the 2020/21 session.

Teacher responsible: Dr Signy Gutnick Allen

Availability: This course is available on the MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 1 group.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Pre-requisites: An advanced undergraduate course in the History of Political Thought or Political Philosophy, or following consultation with the course teacher.

Course content: This course provides an opportunity to study the work of Thomas Hobbes in-depth. It will focus on his major works, with an emphasis on themes in his political theory: authorisation and the state, free will, the nature of the law, political resistance, the international sphere, and the relationship between civil and religious authority. We will situate Hobbes's arguments in their political and theoretical context, as well as exploring both how subsequent theorists understood and employed his ideas, and the major contemporary critical debates in Hobbes scholarship. The seminar will therefore blend intellectual history and political theory. In our final seminars, we will consider how a trio of controversial twentieth-century thinkers (Carl Schmitt, Hannah Arendt and Giorgio Agamben) responded to Hobbes's theory of political sovereignty.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours in the Lent Term. Some or all of this teaching will be delivered through a combination of online and on-campus seminars. There will be a reading week in week 6 of the LT for private study and assessment preparation.

Formative coursework: Students will be encouraged to submit one formative extended essay plan of no more than 1500 words. This will form the basis of the final summative assessment. The course leader will provide written feedback on this plan, and provide the opportunity for a one-to-one meeting to discuss the plan, but will not provide a numerical grade or classification for it.

Indicative reading: Hobbes, T., *The Elements of Law*; Hobbes, T., *Leviathan*; Hobbes, T., *De Cive*; Hobbes, T., *A Dialogue Between a Philosopher and a Student of the Common Laws of England*; Hobbes, T. *Writings on Liberty and Necessity*; Schmitt, C. *The Concept of the Political*; Arendt, H., *The Origins of Totalitarianism*; Agamben, G. *Homo Sacer*.

Students will also be asked to prepare short written summaries of relevant secondary literature of their choice. Examples could include: Hoekstra, K. (2012). *Hobbesian Equality*. In S. Lloyd (Ed.), *Hobbes Today: Insights for the 21st Century* (pp. 76-112). Cambridge: Cambridge University Press; ABIZADEH, ARASH. "Hobbes on the Causes of War: A Disagreement Theory." *The American Political Science Review*, vol. 105, no. 2, 2011, pp. 298-315; Baumgold, D. (2009). *Hobbesian Absolutism and the Paradox of Modern Contractarianism*. *European Journal of Political Theory*, 8(2), 207-228; Pettit, P. (2005). *Liberty and Leviathan*. Politics,

Philosophy & Economics, 4(1), 131-151; Ristroph, Alice. "Respect and Resistance in Punishment Theory." *California Law Review*, vol. 97, no. 2, 2009, pp. 601-632.

Assessment: Essay (80%, 4000 words).

Continuous assessment (10%) and group presentation (10%) in the LT.

The continuous assessment element would be based on the student's online portfolio of secondary literature summaries.

GV4F8 Half Unit Not available in 2020/21

Institutions and Global Trade

This information is for the 2020/21 session.

Teacher responsible: Prof Stephanie Rickard

Availability: This course is available on the MSc in Comparative Politics, MSc in Political Science and Political Economy and Master of Public Policy. This course is not available as an outside option. The deadline for applications is 17:00 on Tuesday 1 October 2019. You will be informed of the outcome by 17:00 on Wednesday 2 October 2019.

Course content: This course examines the role institutions play in global trade. Theories from both economics and political science are used to understand how formal institutions shape states' trade policies. Both domestic and international institutions influence countries' trade policies. Therefore, this course examines domestic political institutions, such as electoral systems, as well as international institutions, such as the World Trade Organization.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. There will be a reading week in week 6 of the LT for private study and assessment preparation.

Formative coursework: Students will be asked to complete weekly writing assignments.

Indicative reading: Rose, Andrew K. (2004) *Do We Really Know That the WTO Increases Trade?* *American Economic Review* 94(1): 98-114; Rickard, Stephanie (2010) *Democratic Differences: Electoral Institutions and Compliance with GATT/WTO Agreements*. *European Journal of International Relations*; Moravcsik, Andy (1989) *Disciplining Trade Finance: The OECD Export Credit Arrangement*, *International Organization*; Nooruddin, Irfan and Joel W. Simmons (2006). *The Politics of Hard Choices: IMF Programs and Government Spending*. *International Organization* 60: 1001-1033.

Assessment: Essay (100%, 4000 words) in the ST.

GV4F9 Half Unit

The Challenges of Governance and Conflict in sub-Saharan Africa

This information is for the 2020/21 session.

Teacher responsible: Dr Omar Shahabudin McDoom

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Gender, Peace and Security and MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: Where does the colonial legacy end and the responsibility of Africa's own leaders for the continent's current predicaments begin? Why have the modern state, democracy, and the rule of law proved so difficult to build in Africa and are there any indigenous institutions to promote instead? Is it simply trite to say overseas development assistance has hurt Africa more that it has helped? How do we choose between the myriad

explanations - natural resource abundance, high ethnic diversity, poor geography, weak state capacity, arbitrary borders, inter-group inequalities, and general poverty - in accounting for Africa's high incidence of civil wars? This course is a survey of the major issues in sub-Saharan African politics which have confronted its leaders and peoples and engaged scholars and policy-makers since the end of colonial rule. As it is a graduate-level course in comparative politics, its content is guided by the aim of encouraging students to reflect critically on these big questions and to challenge widely-held assumptions about the continent. Students will be encouraged to place the issues studied into comparative historical and regional perspective. The application of important theoretical constructs in political science to real-world issues is central to the course's ethos. The ultimate goal of the course is to equip students who seek to enter the policy-making arena with a strong theoretical foundation for looking critically at Africa's ongoing challenges and the current strategies to meet them. With these questions in mind then, the course lectures then will address the following themes: (i) The colonial legacy; (ii) The modern African state; (iii) Africa's political institutions: regime type and political culture; (iv) The causes of civil wars and communal violence; (v) The termination of civil wars and communal violence; (vi) Aid and the challenge of underdevelopment; (vii) Political liberalization, elections, and democracy; (viii) The effect of natural resources; (ix) Africa in the international system: China and the West; (x) Emerging challenges on the continent - for example environmental change and demographic transition. The course will illustrate each of these themes through country case studies. The case studies will vary from year-to-year, but the goal is to select from all the major country groupings to minimize the risk of students forming a regionally-skewed perspective on a diverse continent: west, east, central, and southern Africa will be represented. The course will also draw on a range of methodological approaches - quantitative, historical, and qualitative - though students will not need any prior specialized training in these research methods.

Teaching: For 2020-21, some or all of this course will be delivered through a combination of online and on-campus lectures and seminars. Students should expect a minimum of 35 hours teaching (lecture and seminars) in the Lent Term. Students will also be encouraged to participate in smaller, peer group-only meetings in advance of the seminars to discuss and prepare the week's topic. There will be a reading week in week 6 of the LT for private study and assessment preparation.

Formative coursework: Students will be required to complete one formative essay (1,500 words).

Indicative reading: Rodney, W. (1981). *How Europe underdeveloped Africa*. Washington, D.C., Howard University Press, Hyden, Goran. *African Politics in Comparative Perspective*, Cambridge: Cambridge University Press, 2006; Bratton, M. & Van de Walle N., *Democratic Experiments in Africa*, New York, Cambridge University Press, 1997; Jackson, R. and Rosberg C., *Personal Rule: Theory and Practice in Africa*, Comparative Politics 16:4, 1984. Posner D., *Institutions and Ethnic Politics in Africa*, New York: Cambridge University Press, 2005; Clapham C., *Africa and the International System*, New York, Cambridge University Press, 1996; Englebert P., *State Legitimacy and Development in Africa* Boulder: Lynne Rienner, 2000; Rotberg R, and Gisselquist R., *The Index of African Governance*, Cambridge, World Peace Foundation, 2009; Herbst J., *States and Power in Africa: Comparative Lessons in Authority and Control*, Princeton: Princeton University Press, 2000; Bates R., *Markets and States in Tropical Africa*, Berkeley: University of California Press, 1981.

Assessment: Essay (80%, 4000 words) in May and classroom participation (20%).

GV4G1 Half Unit

Applied Quantitative Methods for Political Science

This information is for the 2020/21 session.

Teacher responsible: Prof Valentino Larcinese

Availability: This course is available on the MRes/PhD in Political Science and MSc in Political Science and Political Economy.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 2 groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

All MSc students from the Department of Government are welcome to apply for this course.

Pre-requisites: A good knowledge of statistics and of the generalized linear model at the level of MY452.

Course content: This course provides an introduction to current empirical research in political science with a focus on methods for causal inference. The 2 hours weekly meetings consist of a mix of lectures and tutorials. The lectures will present the techniques and illustrate their applications by making extensive use of the most up-to-date empirical literature. The tutorials will give feedback on formative work and will provide an opportunity to learn how to apply the methods with the statistical software Stata. After reviewing the rationale for simple OLS estimation, particularly focussing on the conditions for a causal interpretation of the coefficients, the course will cover instrumental variables, panel data, differences-in-differences, regression discontinuity and several applications to political science. Students will be stimulated to think in experimental terms and the main theme will be how to replicate or get close to the experimental ideal of natural sciences by using non-experimental observational data.

Teaching: This course is delivered through a minimum of 20 hours of lectures and tutorials in the Lent Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and tutorials. There will be a reading week in Week 6 of Lent Term.

Formative coursework: There will be two pieces of formative work to be submitted to the lecturer.

Indicative reading: Most readings will be journal articles. The main references for the methods will be: Thad Dunning: *Natural experiments in the social sciences*, Cambridge University Press 2012. Angrist & Pischke: *Mostly Harmless Econometrics*, Princeton University Press 2009. Stock & Watson: *Introduction to Econometrics*, Pearson 2007 (Second edition)

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Group Project (40%) of max 5000 words to be submitted by first week of ST.

Presentation on the project (10%) to be delivered by each group in week 11 of LT.

GV4G4 Half Unit

Comparative Conflict Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof James Hughes, Dr William Kissane and Dr Paul Mitchell

Availability: This course is compulsory on the MSc in Conflict Studies. This course is not available as an outside option.

Compulsory core course for, and entry restricted to, MSc Conflict Studies students only. It is capped at 4 groups.

Course content: What is intra-state conflict? How should we investigate and measure political violence? What causes national and ethnic conflict and other forms of political violence and why does it take particular forms? What are the most effective means of conflict resolution? This course will introduce students to the core theoretical debates on intra-state conflict and political

violence by analysing the major research in the field, both quantitative and qualitative. The course is structured around three categories of analysis and explanation: causation, dynamics and outcomes. Central themes include: the role of violence in state formation, development and collapse; theories of legitimacy, contentious politics and control regimes; the causes, dynamics and consequences of civil war; the interaction of group identities, interests and political violence; macro- and micro-analyses of conflict; and top-down and bottom-up methods for ending violent conflict, including intervention, the role of civil society, and institutional designs. The course offers students the opportunity to engage with the main methodological approaches to the study of conflict, including critical case studies, process tracing, small n and large n research, which will enhance their skills for the dissertation. In the weekly lectures and seminars the themes will be explored through a mix of theory-based readings and works which provide in-depth case studies.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours in the Michaelmas Term. Some or all of this teaching will be delivered through a combination of online and on-campus seminars and lectures. There will be a reading week in Week 6.

Formative coursework: Students are required to complete one formative essay of 2,000 words.

Indicative reading: Charles Tilly (2003) *The Politics of Collective Violence*, Cambridge: CUP; Paul Collier and Nicholas Sambanis eds (2005), *Understanding Civil War*, The World Bank, Vols 1-2; Stathis N. Kalyvas (2006) *The Logic of Violence in Civil War*, Cambridge, CUP; Philip G. Roeder, and Donald Rothchild (2005) *Sustainable Peace. Power and Democracy after Civil Wars*, Ithaca, Cornell University Press, 2005; Arend Lijphart (2008) *Thinking about Democracy: Power Sharing and Majority Rule in Theory and Practice*. Abingdon: Routledge; Sid Noel ed (2005) *From Power-Sharing to Democracy. Post-Conflict Institutions in Ethnically Divided Societies*. London: McGill-Queens University Press; James Fearon and David Laitin (2003) 'Ethnicity, Insurgency and Civil War', *American Political Science Review*, 97, 1: 75-90; David Laitin (2007). *Nations, States and Violence*. Oxford, OUP; Christopher Cramer (2006) *Civil War is not a stupid thing*, Hurst; Paul Collier (2009) *War, Guns & Votes: Democracy in Dangerous Places* New York: Harper; Jack L. Snyder (2000) *From Voting to Violence: Democratization and Nationalist Conflict*, New York London: Norton, 2000; Mats Berdal and David Malone eds (2000) *Greed and Grievance. Economic Agendas in Civil Wars*, Rienner; Karen Ballentine and Jake Sherman (2003) *The Political Economy of Armed Conflict. Beyond Greed and Grievance*, Rienner; Donald Horowitz (1985) *Ethnic Groups in Conflict*, Berkeley, University of California Press; James Hughes (2007) *Chechnya. From Nationalism to Jihad*, Philadelphia, University of Pennsylvania Press; *Unsettled states, disputed lands: Britain and Ireland, France and Algeria, Israel and the West Bank-Gaza*. Ithaca, N.Y.: Cornell University Press, 1993. Ashutosh Varshney (2003) *Ethnic Conflict and Civic Life: Hindus and Muslims in India* New Haven: Yale University Press; Jeremy Weinstein (2006) *Inside Rebellion: the Politics of Insurgent Violence* Cambridge: CUP; Reynolds, Andrew (2010). *Designing Democracy in a Dangerous World*. Oxford University Press; Marianne Heiberg, Brendan O'Leary and John Tirman eds (2007) *Terror, Insurgency and the State: Ending Protracted Conflicts*. Philadelphia: University of Pennsylvania Press.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

GV4G7 Half Unit Marx and Marxism

This information is for the 2020/21 session.

Teacher responsible: Jan Kandiyali

Availability: This course is available on the MSc in Political Theory.

This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 2 groups.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This course will provide a detailed assessment of Karl Marx's political philosophy. It is divided into three sections. The first will focus on Marx's early writings, which contain his critique of liberalism, his analysis of religion, and his depiction of alienated labour under capitalism. The second will consider the materialist theory of history, the view that history is characterised by the development of productive power, as well as his theory of the state and ideology. The third will focus on Marx's economics and ethics: his view that capitalism is inherently exploitative and the vexed debate about whether such exploitation constitutes an injustice. In this part of the course we'll also consider his vision of communism. In addition to the writings of Marx, we will also read some contemporary writings in the analytical Marxist tradition. The focus throughout will be on understanding and assessing Marx's complex arguments. The course should be of interest to MSc students taking existing courses on liberalism and justice but also to students in Law, IR, Sociology, and International History.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. This year some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. This course includes a reading week in LT Week 6.

Formative coursework: One formative essay of around 2,000 words.

Indicative reading: McLellan, D., *Karl Marx: Selected Writings* (Oxford, Oxford University Press, 2000). Cohen, G.A., *Karl Marx's Theory of History: A Defence* (Oxford, Oxford University Press, 2000). Elster, Jon, *Making Sense of Marx* (Oxford: OUP, 1985). Wolff, Jonathan, "Karl Marx", *Stanford Encyclopaedia of Philosophy* (Winter 2017 Edition), Edward N. Zalta (ed.): <https://plato.stanford.edu/entries/marx/>. Wood, Allen, W. *Karl Marx*, (London: Routledge and Kegan Paul, 1981).

Podcasts:

Gareth Stedman-Jones, Anthony Grayling and Frances Wheen talking about Marx's life and ideas: <http://www.bbc.co.uk/programmes/p003k9jg>. Jonathan Wolff talking about Marx's concept of alienation: <http://philosophybytes.com/2008/05/jonathan-wolff.html>

Assessment: Essay (80%, 3000 words) and blog post (20%).

GV4H1 Half Unit Chinese Political Thought

This information is for the 2020/21 session.

Teacher responsible: Prof Leigh Jenco

Availability: This course is available on the MSc in China in Comparative Perspective and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. Priority will be given to students enrolled on the MSc in Political Theory.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This course will introduce students to recurring debates and concepts within Chinese political thought. We focus on the germinal texts of the Warring States period (circa 400 BCE), such as the *Analects of Confucius* and the *Dao De Jing* of Laozi, which continue to shape political debate in East Asia. Reading texts in translation, we will critically examine the variety of normative frameworks that have structured political thinking in Chinese history, with a particular focus on the relationship between personal agency and political outcomes. This is NOT a history

course; its broader goal is to help students use Chinese thought to think critically and creatively about political and social life in general and not just in "Chinese" contexts. This course is suitable for students interested in political theory, philosophical approaches to politics, Chinese studies, and/or the history of political thought. Readings are entirely in English and NO prior knowledge of Chinese or China is required.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours in the Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. This course includes a reading week in Week 6 of the MT.

Formative coursework:

- One review essay of a secondary source from the course reading list, 750-1000 words;
- One formative essay of 1500 words maximum excluding footnotes and bibliography, on an assigned topic.

Indicative reading: Ivanhoe, Philip J. *Readings in Classical Chinese Philosophy*. Edited by Philip J. Ivanhoe and Bryan W. Van Norden. 2nd ed. Hackett Pub Co, 2006. Selections from De Bary, Wm. Theodore, and Richard John Lufrano. *Sources of Chinese tradition*. Vol. 2, From 1600 through the twentieth century. New York: Columbia University Press, 2000.

Assessment: Essay (30%, 1500 words) and class participation (20%) in the MT.

Essay (50%, 2500 words) in the LT.

The class participation element will be assessed via two group projects, quality of contribution to seminar discussion, and participation in online forums.

GV4H2 Half Unit Not available in 2020/21

Contemporary India: The World's Largest Democracy in the Early 21st Century

This information is for the 2020/21 session.

Teacher responsible: Prof Sumantra Bose

Availability: This course is available on the MSc in Comparative Politics and MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students taking the MSc Comparative Politics and the MSc Global Politics. Students on other Master's programmes, in all Departments of the School, are welcome to apply to take the course and will be considered subject to availability of space. This course is capped at 30 students (two seminar groups).

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

All students, regardless of programme and department, must apply via LFY to take this course by the stipulated deadline.

Course content: This course is an advanced introduction to the politics and international relations of contemporary India, the world's most populous and diverse democracy and one of the "rising powers" of the 21st century.

After the first week's introductory and overview session, the next six weeks cover in depth the trajectory of India's democracy since the 1950s. The emphasis is on transformative political changes and transitions since the 1990s. Key topics include the transition from a polity dominated by a single party (Congress) to a highly plural and competitive polity defined by the rise of "regional" parties in many of the 29 states of the Indian Union; the evolution from a relatively centralised state to a federal polity; and the rise of Hindu nationalism as India's dominant political force and its implications for India's "secular state". Two continuing challenges with deep roots in the past are also surveyed: the Kashmir problem, and Maoist insurgency in a few areas of the country.

The final three weeks look at India's role in the international politics

of the early 21st century. The focus is on India's three most important (and interconnected) external relationships: with China, the United States, and Pakistan.

Teaching: 15 hours of lectures and 10 hours of seminars in the LT. There will be a reading week in Week 6.

Formative coursework: Students will be required to make one in-class seminar presentation and write one formative essay of 2,000 words, due at the end of the LT.

Indicative reading: Sumantra Bose, *Transforming India: Challenges to the World's Largest Democracy* (2013); Sumantra Bose, *Secular States, Religious Politics: India, Turkey, and the Future of Secularism* (2018); Jean Dreze and Amartya Sen, *An Uncertain Glory* (2013); Ramachandra Guha, *India after Gandhi* (2007); Atul Kohli (ed.), *The Success of India's Democracy* (2001); Christophe Jaffrelot, *India's Silent Revolution* (2003); Paul Brass, *The Politics of India since Independence* (1994); David Malone, *Does the Elephant Dance? Contemporary Indian Foreign Policy* (2011); William Antholis, *Inside Out, India and China: Local Politics Go Global* (2013); Sumantra Bose, *Kashmir: Roots of Conflict, Paths to Peace* (2003)

Assessment: Essay (100%, 5000 words) in the ST.

A research paper of 5000 words will determine 100% of the grade. Students can either choose from a set of supplied questions or formulate their own question (subject to the instructor's approval).

GV4H3 Half Unit

Feminist Political Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Anne Phillips

Availability: This course is available on the MPhil/PhD in Gender, MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 2 groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This course covers some of the central debates in contemporary feminist political theory, with a particular emphasis on the legacy and usefulness of liberalism. The course focuses on debates and differences within feminist political theory, rather than justifications for, or defences of, feminist political theory.

Among the problems raised are conceptions of the individual and individual autonomy; the relative invisibility of gender issues in mainstream literature on justice and equality; the tendency to conceive of equality in sex-blind terms; the tendency to presume a universally applicable set of norms. We consider the theoretical debates in relation to a number of contemporary political issues. Topics likely to be addressed include: feminism and contract, individualism and autonomy, identity politics, equality and the politics of difference, marriage, multiculturalism, and universalism.

Teaching: This course provides a combination of seminars and lectures totalling 20 hours in the MT. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in MT Week 6.

Formative coursework: Students will be required to submit a short essay of roughly 1,500 words. Students will be given a list of questions to choose from, and should choose a topic other than the one they choose for their final assessment.

Indicative reading: Most of the material is in the form of articles, and a detailed list will be handed out at the beginning of the course. The following is only an indicative list: Carole Pateman (1988) *The Sexual Contract*; Iris M Young (1990) *Justice and the Politics of Difference*; Wendy Brown (1995) *States of Injury*; Anne Phillips (1995) *The Politics of Presence*; Clare Chambers (2017) *Against Marriage: An Egalitarian Defence of the Marriage-*

Free State; Eleonore Lepinard (2011) 'Autonomy and the Crisis of the Feminist Subject: Revisiting Okin's Dilemma', *Constellations* 18/2:205-221.

Assessment: Essay (100%, 4000 words).

The nature and value of the assessments will be the same whether a student receives teaching on campus or online.

GV4H4 Half Unit

Foundations of Political Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Kai Spiekermann and Dr Bruno Leipold

Availability: This course is compulsory on the MSc in Political Theory. This course is not available as an outside option.

Course content: This course provides an introduction to the philosophical and methodological foundations of political theory. It aims to give participants a conceptual toolbox that can be brought to bear on many different substantive problems and research questions in political theory and neighbouring fields. The course introduces some central methodological debates in contemporary political theory, explores the links between political theory and related disciplines, and familiarises students with different approaches to political theorising.

Teaching: This course provides a combination of lectures, seminars, and other activities totalling 25 hours in Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars.

There will be a reading week in MT Week 6.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: David Leopold and Marc Stears (eds.) (2008) *Political Theory: Methods and Approaches* (Oxford: Oxford University Press); John S. Dryzek, Bonnie Honig and Anne Phillips (eds.) (2008) *The Oxford Handbook of Political Theory* (Oxford: Oxford University Press); Robert E. Goodin and Philip Pettit (eds.) (1993) *A Companion to Contemporary Political Philosophy* (Oxford: Blackwell); Michael Smith (1994) *The Moral Problem* (Oxford: Blackwell); Keith Dowding (2015) *The Philosophy and Methods of Political Science* (Palgrave).

Assessment: Essay (85%, 2500 words) in the LT.

Blog post (15%) in the MT.

The blog post component involves students submitting an online wiki/blog team assignment of up to 1000 words.

GV4H5 Half Unit

The Political Philosophy of Epidemics

This information is for the 2020/21 session.

Teacher responsible: Prof Kai Spiekermann

Availability: This course is available on the MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped at 2 groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Pre-requisites: No formal requirements, but some background in political theory or philosophy and a willingness to study contributions from various disciplines, including the natural sciences, is expected.

Course content: This course analyses political and philosophical questions arising in the context of a pandemic. The approach will be interdisciplinary and exploratory. While the focus is on normative-philosophical issues, we will also make use of positive-analytical and empirical literature. Some of the possible questions to be discussed are: How do epidemics develop and what are the mechanisms and dynamics of contagion? How should we think

about and manage the complexity and uncertainty arising from a global pandemic? Which principles should guide the interaction of politics and science? How should scarce health care resources be allocated? Under which circumstances, if any, is it permissible to impose health risks on others? Do we have special reasons to obey the authority of the state during a health crisis? Is it permissible to suspend civil liberties in order to fight an epidemic? Which individual obligations and responsibilities do we have to limit the spread of an epidemic?

Teaching: This course provides a combination of seminars and lectures totalling 30 hours in the MT. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in MT Week 6.

Formative coursework: One team-work assignment.

Indicative reading: Kucharski, Adam. 2020. *The Rules of Contagion: Why Things Spread - and Why They Stop*. London: Profile. Mitchell, Sandra D. 2009. *Unsimple Truths: Science, Complexity, and Policy*. Chicago: The University of Chicago Press. Allen, Danielle, Lucas Stanczyk, I. Glenn Cohen, Carmel Shachar, Rajiv Sethi, Glen Weyl, and Rosa Brooks. n.d. "Securing Justice, Health, and Democracy against the COVID-19 Threat." Edmond J. Safra Center for Ethics, Harvard. <https://ethics.harvard.edu/justice-health-white-paper>. Barry, Christian and Seth Lazar. "Justifying Lockdown." 2020. *Ethics & International Affairs* (blog). May 22, 2020. <https://www.ethicsandinternationalaffairs.org/2020/justifying-lockdown/>.

Assessment: Essay (80%, 3000 words) in the LT.

Blog post (20%) in the MT.

The blog post/wiki entry (500 words) would be due for submission during the MT, and the essay (3000 words) would be due for submission at the beginning of LT.

GV4H6 Half Unit

Behavioural Political Economy

This information is for the 2020/21 session.

Teacher responsible: Dr Rafael Hortala-Vallve

Availability: This course is available on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Pre-requisites: It is required that students have some familiarity with formal models (game theory) and basic statistical concepts.

Course content: In this course we will introduce behavioural concepts and use them at explaining decisions of politicians, candidates for political office, voters, lobbyists, and other actors in the political and policymaking arena. The focus of the course will be academic but we will also visit the recent development by public policy practitioners – both the UK and the US have behavioural insights teams working closely with the executive branch.

We will analyse different political phenomena that do not perfectly fit our rational choice models. We will cover issues such as turnout in large elections, populist policies, framing of public policies to influence public opinion, attribution of blame to politicians, opt-in/opt-out policies and paternalism in policy recommendations, etc. By introducing insights from psychology to our classical political economy models we will study the effects of social, cognitive, and emotional factors on political decisions. Parallel to this formal analysis we will also introduce experimental methods.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 24 hours in the Lent Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in LT Week 6.

Formative coursework: 1 formative essay of 1000 words to be

submitted in LT Week 7.

Indicative reading: Berggren, N (2011), "Time for behavioural political economy? An analysis of articles in behavioural economics", mimeo. De Rooij, E (2009), "Field Experiments on Political Behavior and Collective Action", Annual Review of Political Science. Druckman, J (2006), "The growth and Development of Experimental Research in Political Science", American Political Science Review. Druckman, J, D Green, J Kuklinski, and A Lupia (2011), Cambridge handbook of Experimental Political Science, Cambridge University Press. Kagel, J and A Roth (1995), Handbook of Experimental Economics, Princeton University Press. McDermot, R (2002), "Experimental Methods in Political Science", Annual Review of Political Science. Morton, R and K Williams (2010), Experimental Political Science and the study of causality: from nature to the lab, Cambridge University Press. Palfrey, T (2009), "Laboratory experiments in Political Economy", Annual Review of Political Science. Thaler, RH and CR Sunstein (2009), Nudge: improving decisions about health, wealth and happiness, Yale University Press. Wilson, R (2011), "The contribution of behavioural economics to political science", Annual Review of Political Science.

Assessment: Essay (50%, 3000 words) in the ST.

Take-home assessment (50%).

Each student is required to submit an essay (3000 words including footnotes and appendix) in week 1 of Summer Term composed of two parts: the analysis of a behavioural aspect in a political economy situation and a novel experimental design proposal related to it. This essay will count for 50% of the final mark. The remaining 50% will be assessed by means of a take home exam.

GV4J4 Half Unit Not available in 2020/21

Citizen Representation and Democracy in the European Union

This information is for the 2020/21 session.

Teacher responsible: Prof Sara Hobolt

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Comparative Politics, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Global Politics, MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 1 group. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This course offers the theoretically and empirically informed study of citizen representation in the European Union. The principal aim of the course is to develop a better understanding of the functioning of democracy in the European Union and provide the analytical tools to evaluate proposals for reform to alleviate the Union's so-called 'democratic deficit'. This course will examine both how citizens are represented in the European Union and how the EU shapes democratic politics in the member states. The first part of the course assesses pathways of representation and accountability in the European Union, focusing on representation of citizens' interests in the Council, Commission and the European Parliament as well as other avenues for citizen influence, such as referendums and the Citizens' Initiative. The second part of the course examines political conflict over European integration at the domestic level, focusing on the role of European integration in national politics and public opinion, including the study of euroscepticism. The final part of the course evaluates different proposals for reform with the aim of strengthening democracy and representation in the EU, and students will have the opportunity to develop their own reform

proposal.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One formative essay (1,750 words)

Indicative reading: D Curtin, P Mair and I Papadopoulos (2012) Accountability and European Governance (London: Routledge); S Hix, A Noury and G Roland (2007) Democratic Politics in the European Parliament (Cambridge: Cambridge University Press); S Hobolt and J Tilley (2014) Blaming Europe: Responsibility Without Accountability in the European Union; L McLaren (2006) Identity, interests and attitudes to European integration (Basingstoke: Palgrave Macmillan); G Marks and M Steenbergen, (2004) European Integration and Political Conflict (Cambridge: Cambridge University Press); C van der Eijk and M Franklin (1996) Choosing Europe? European Electorate and National Politics in the Face of Union (Ann Arbor: Michigan University Press); F Scharpf (1999) Governing in Europe: Effective and Democratic? (Oxford: Oxford University Press).

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2500 words) in the LT.

GV4J6 Half Unit Not available in 2020/21

Game Theory for Research

This information is for the 2020/21 session.

Teacher responsible: Dr Stephane Wolton

Availability: This course is available on the MRes/PhD in Political Science and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

The deadline for applications is 17:00 on Tuesday 1 October 2019. You will be informed of the outcome by 17:00 on Wednesday 2 October 2019.

Pre-requisites: Knowledge of game theory at the level of GV4C8 is required.

Course content: This course will help students think about the way game theory is applied to research in political science and political economy. Each week, students will study one working paper using game theory. Each lecture will have a substantive and a technical part. There will be an in-depth discussion of the paper (substantive part) and the lecturer will cover the main proofs of the paper on the board (technical part).

Teaching: 21 hours of lectures and 1 hour of lectures in the MT.

There will be 1 introductory 1 hour lecture in Week 1, and then 6 lectures of three hours, each covering a different paper, in weeks 2-5 and weeks 7 and 8. In week 11, there will be a three-hour lecture where students will present a research project using game theory.

Formative coursework: Students will meet with the instructor to discuss their research project twice during the MT.

Indicative reading: Two useful (but advanced) game theory textbooks are:

- Game Theory. Drew Fudenberg and Jean Tirole. MIT Press (1991).
- Game Theory. Michael Maschler, Eilon Solan, and Shmuel Zamir. Cambridge University Press (2013).

A reading list of the papers reviewed in the first six lectures will be provided at the beginning of the term.

Assessment: Presentation (50%) and essay (50%) in the MT Week 11.

Students will be assessed on a class presentation on a research project of their choosing which involves game theory (weight 50%) and on writing a referee report on one of the papers covered in the lectures (weight 50%).

GV4J7**Introductory Mathematics for Political Science**

This information is for the 2020/21 session.

Teacher responsible: Emiel Awad

Availability: This course is available on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is strongly recommended for MSc Political Economy and Political Science students. It is available for students from other programmes with permission of the instructor.

Course content: The aim of this pre-sessional course is to provide students with the essential mathematical background for the core courses in the MSc PSPE programme. The course will cover key concepts in algebra (definition of function, derivation, limits), maximization problems (constrained and unconstrained, Envelope and Implicit Function Theorems), and some notions of probability (Bayes' rule, random variables).

Teaching: This course provides 10 hours of introductory sessions at the beginning of the Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus sessions.

Please note that all the teaching for this course will take place in Michaelmas Term Week 0 (21-25 September 2020).

Indicative reading: There is no required reading for this course.

GV4J8 Half Unit**Middle East Politics in Transnational Perspective**

This information is for the 2020/21 session.

Teacher responsible: Prof John Chalcraft

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Global Politics and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This course offers an advanced introduction to the politics of the Middle East and North Africa in transnational perspective. It takes a critical, sociological, historically-informed, and qualitative approach. It focuses on cross-border forms of resistance and subaltern activism. We study such topics as transnational revolutionary movements, Third World national liberation, popular movements on the Arabian peninsula, feminism, Salafi-Wahhabism, human rights advocacy, and transnational Palestinian activism. Students will develop an advanced introductory understanding of the transnational politics of the region.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours in the Michaelmas Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Assessment: Essay (100%, 5000 words).

GV4J9 Half Unit**Populism**

This information is for the 2020/21 session.

Teacher responsible: Professor Francisco Panizza

Availability: This course is available on the MSc in Comparative Politics. This course is available with permission as an outside option to students on other programmes where regulations permit. The course is capped at two groups. It will be made available as an outside option to students in the MSc programme in Conflict Studies and the MSc programme in Global Politics.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Pre-requisites:

Course content: The course studies populism from a conceptual and comparative perspective. Given the highly contested nature of populism, the first weeks will look in depth to different theories of populism, including ideational, strategic and performative understandings of populism. It will then move to explore the cultural and socio-economic conditions of emergence of populism, the relation between populism and democracy and the relations between populism, political systems and popular movements. The last three lectures will seek to apply the conceptual tools presented in the first part of the course to regional and country case studies. Among the topics to be explored are: what do we talk about when we talk about populism? Populism as a "thin ideology" and as a political strategy; populism as a mode of political identification; the cultural and socio-economic causes of populism; populism and democracy; populism and political systems; populism and grassroots movements; and varieties of populism across different regions of the world.

Teaching: This course provides a combination of seminars and lectures totalling 25 hours in the Lent Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in LT Week 6.

Formative coursework: Students will be expected to produce 1 essay in the LT.

One essay to be submitted in LT. The formative essay will offer an outline of the final essay - including key indicative reading. The feedback will be used in two ways: 1) to guide students' critical thinking in line with course learning outcomes; 2) to guide students on the key aspect of formatting an academic argument using literature and critical debate. Students will also be encouraged to reflect upon their learning from the presentation and use this to refine their summative essay.

Indicative reading:

Assessment: Essay (90%, 4000 words) in the ST.

In-class assessment (10%) in the LT.

The in-class assessment (10%) consists of a student-led seminar based on a presentation of 15-20 minutes, followed by a structured discussion of the issues raised by the lecture and the presentation.

GV4K1 Half Unit

Transparency and Accountability in Government

This information is for the 2020/21 session.

Teacher responsible: Dr Daniel Berliner

Availability: This course is available on the MSc in Development Studies, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 2 groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: Is "sunlight the best disinfectant"? Can information empower citizens to hold their government accountable? How have information technologies been used to enable civic engagement and participation? What are the relationships between transparency, secrecy, corruption, and accountability?

This course will familiarise students with the theory and practice of transparency and accountability in government, enabling them to critically address these questions and engage meaningfully in fast-moving contemporary policy debates.

The course will offer a grounding in theories of democracy, representation, and accountability, as well as debates over the merits of different transparency policies in light of competing values like secrecy and privacy. The course will also enable students to evaluate the role played by different forms of information in political systems, as well as to critically assess the theories of change and assumptions behind information-based policy initiatives, and to evaluate the evidence base supporting such initiatives.

The course has a global scope, focusing on applications in both developed and developing countries, and on policy types including freedom of information, information-based regulation, participatory budgeting, crowdsourced policymaking, "civic tech," open data,

campaign finance and asset disclosures, and applications of transparency to sectors like extractive industries, the environment, and public health.

Teaching: This course is delivered through a combination of seminars, lectures and workshops totalling a minimum of 25 hours in the Lent Term and 4 hours (for a presentation session) in the Summer Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures, workshops and seminars. There will be a Reading Week in Week 6 of LT.

Formative coursework: Students will be expected to produce one formative essay of 1,000 words in the LT.

Indicative reading:

- Roberts, Alasdair. 2012. "WikiLeaks: the illusion of transparency." *International Review of Administrative Sciences* 78(1): 116-133.

Assessment: Essay (90%, 3000 words) and presentation (10%) in the ST.

The assessment consists of:

- A research essay, of 3000 words, in the ST.
- A case study presentation in the ST.

GV4K2 Half Unit

Postcolonial and Comparative Political Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Leigh Jenco

Availability: This course is available on the MSc in Global Politics and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. Priority will be given to students enrolled on the MSc in Political Theory programme. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This course will examine the consequences of, and responses to, the historic domination of Euro-American forms of knowledge in the field of political theory. Situating political theory as one of many disciplines that reinforce the cultural imperialism of colonial orders, the course will consider how postcolonial theorists have diagnosed this form of epistemic imperialism. We will go on to discuss how recent attempts at forging a "comparative political theory" might (or might not) productively engage more diverse forms of thinking for the

purpose of making our conversations about political life more truly global, rather than parochially "Western." The course will provide students with the vocabulary and conceptual tools to navigate this difficult theoretical terrain, through a focus on a close reading of primary texts, including both classics of postcolonial criticism as well as texts from the non-Western world that respond to or challenge such diagnoses of the modern condition. This course examines the very question of marginalization in the field of political science, using a huge range of writing from thinkers across space and time (from East, South, and Southeast Asia; from the early modern period; from the mid-20th century; from contemporary debates), including some in translation.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours in the Lent Term. This year, some or all of this teaching may be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in LT Week 6.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading:

- Nandy, Ashis. 1988. *The Intimate Enemy: Loss and Recovery of Self Under Colonialism*. New Delhi: Oxford University Press.
- Chakrabarty, Dipesh. 2000. *Provincializing Europe: Postcolonial Thought and Historical Difference*. Princeton: Princeton University Press.
- Césaire, Aimé. [1956] 2010. "Culture and Colonization." *Social Text* 103 (2): 127-144.

- Dallmayr, Fred. 2004. "Beyond Monologue: For a Comparative Political Theory." *Perspectives on Politics* 2 (2): 124–44.

Assessment: Essay (45%, 2000 words) and in-class assessment (10%) in the LT.

Essay (45%, 2000 words) in the ST.

Further information: The 10% assessment will be in the form of a 30 minute, in-class quiz during the LT.

GV4K4 Half Unit

The Politics of Globalization

This information is for the 2020/21 session.

Teacher responsible: Dr Benjamin Faude

Availability: This course is compulsory on the MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit. Students on the MSc Global Politics are guaranteed access; compatibly with this provision, the course is capped at two groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

Course content: This is the core course of the MSc Global Politics. It examines the nature, the causes and the political consequences of globalization in a variety of domains, including security, culture,

the economy, and the environment. The course aims at enabling students to assess the extent of continuity and transformation in key areas of global politics.

The course will analyse how globalization shapes and in turn is shaped by, politics within countries, between countries and beyond countries. It will introduce the main approaches to the study of globalization and examine how it affects patterns of conflict, cooperation and competition between a range of politically relevant actors, including governments, political parties and citizens: great powers: intergovernmental and nongovernmental organisations: global companies and other non-state groups. These patterns of patterns of conflict, cooperation and competition will be illustrated with examples drawn from a variety of policy domains, such as security, economy, environment, health and migration. The course will also assess the challenges to and opportunities for democracy in a global age.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours in the Michaelmas Term. Some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in week 6 of the MT for private study and assessment preparation.

Formative coursework: All students are expected to produce one written essay plus one short presentation in the MT on topics assigned to them.

Indicative reading:

- Held, David, Anthony McGrew, David Goldblatt and Jonathan Perraton (1999), *Global Transformations*, Cambridge: Polity Press.
- Scholte, Jan Aart (2005). *Globalization: A critical introduction*. Second edition. Houndmills Basingstoke: Palgrave.

- Wilson, Kalpana. "Worlds beyond the political? Post-development approaches in practices of transnational solidarity activism." *Third World Quarterly* (2017): 1-19.

A reading list with further readings will be provided at the beginning of the teaching term.

Assessment: Essay (100%, 4000 words).

GV4M6 Half Unit Not available in 2020/21

Modern African Political Philosophy

This information is for the 2020/21 session.

Teacher responsible: Prof Katrin Flikschuh

Availability: This course is available on the MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at one group.

The deadline for applications is 17:00 on Tuesday 1 October 2019.

You will be informed of the outcome by 17:00 on Wednesday 2 October 2019.

Pre-requisites: N/A

Course content: This course introduces students of political theory to post-independent African philosophical and political thinking. The chief objective of the course is to get students to engage with the intellectual heritage of the African continent and critically to re-think historically ingrained misperceptions about its peoples and cultures. Please note that this course focuses on African philosophical thinking. It will suit students who enjoy the analysis and interpretation of abstract ideas. The orientation is not anthropological or developmental; nor is this a course in 'post-colonial studies' more broadly conceived. There will be three broad blocks:

1. Methodology: 'What is African Philosophical Thinking?' We will examine the development from an oral to a written tradition and the particular methodological challenges involved.
2. Substantive Issues: 'Personhood, Agency, and Community'. We will discuss African thinkers' claims to the distinctiveness of African cultures' conceptions of self and society, and how these in turn impact conceptions of moral and political agency.
3. Implications: We shall ask how African thinkers conceive their social and political contexts and how their views do or do not cohere with Western thinking about African developmental challenges.

Teaching: 20 hours of seminars in the MT.

There will be 10 weekly sessions of 2 hours each. There will be a reading week in Week 6 of MT, during which there will be no seminar. Instead, there will be extended office hours for individual tutorials to discuss planned course work. The seminars will be discussion based, with 30 minute introductory lectures that introduce the weekly reading material and establish the intended focus of discussion. There will be some assigned group work within some of the weekly sessions.

Formative coursework: Students will be expected to produce 1 formative essay in the MT.

Formative assessment will consist of an essay of maximally 2500 words in length. A list of essay questions will be made available by Week 3 of MT. Students may design their own essay questions, if they prefer to do so. However, they must clear their proposed essay question with the course convener beforehand. Course work must be submitted by the end of Week 7. The essay will be read and commented on. It will be assigned a guide-mark but will not form part of the summative assessment. Essays substantially above 2500 words will not be read.

Indicative reading: Anthony Kwame Appiah, *In My Father's House. Africa in the Philosophy of Culture* (OUP 1992). Kwame Gyekye, *Tradition and Modernity. Philosophical Reflections on the Africa Experience* (OUP 1997). Barry Hallen, *A Short History of African Philosophy* (Indiana University Press 2002). Paulin Hountondji, *African Philosophy: Myth and Reality* (Indiana University Press, 1996). Teodros Kiros (ed.) *Explorations in Africa Political Thought* (Routledge 2001). V.Y. Mudimbe, *The Invention of Africa. Gnosis, Philosophy, and the Order of Knowledge* (Indiana University Press 1988). Kwasi Wiredu, *Philosophy and an African Culture* (CUP 1980). Kwasi Wiredu (ed.), *A Companion to African Philosophy* (Blackwell 2006). Lee Brown (ed.) *African Philosophy* (OUP 2006). Placide Temples, *Bantu Philosophy*, 1945. Paulin Hountondji, *The Struggle for Meaning* (Ohio State University Press 2002). Kwasi Wiredu, *Cultural Universals and Particulars* (CUP 1996). Odera Oruka, *Sage Philosophy*, 1990. Emmanuel Chukwudi Eze, *On Reason. Rationality in a World of Cultural Conflict and Racism*

(Duke University Press 2008).

Assessment: Essay (100%, 5000 words) in the LT.

The assessed work for this course consists of one extended essay of 5000 words, on a course topic either chosen from the list of essay questions or designed by the student him or herself in consultation with the course convener. Students are permitted to use their formative essay as a basis for their assessed essay. However, the assessed essay must advance substantially beyond the argument made in the formative essay; students must not submit the same work twice. The assessed essay must be submitted electronically to the Departmental Office. The submitted essay will undergo a plagiarism check, including self-plagiarism. Plagiarism is a serious academic offence which, if proven, will likely incur the penalty of official course failure. Late submissions will incur penalties in the form of mark deduction.

GY400 Half Unit Not available in 2020/21

The Economics of Urbanisation

This information is for the 2020/21 session.

Teacher responsible: Prof John Henderson Stc.506b

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MPhil/PhD in Economic Geography, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: No specific LSE course requirements. At a minimum, students must have an analytical 1 unit course in intermediate micro economics (or equivalent) and a basic statistics or econometrics course. A more advanced econometrics course would be very helpful.

Course content: This MSc course will offer students the opportunity to learn some of the conceptual foundations and empirical regularities involved in studying why countries urbanise, the nature of structural and spatial transformation involved in the urbanisation process and the development of systems of cities. Complementing this will be a study of the internal spatial transformation of cities, the evolution of the location of production activities, the formation and role of slums, and the evolution of land market regulations and property right assignments. Critical to understanding these processes will be learning about the role of regulation and political processes, as well as policy initiatives, in shaping outcomes. The course will also examine the current process of urbanisation in Asia and Africa in the various special contexts of different regions and countries, drawing from lessons of the past as experienced in Latin America and parts of the developed world.

Teaching: 20 hours of lectures and 20 hours of seminars in the LT. The first two weeks of seminars will involve a review of basic statistical methods to help prepare students for class and lecture material.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: Duranton G. (2008), 'Viewpoint: From cities to productivity and growth in developing countries', *Canadian Journal of Economics*, Vol. 41, No. 3, 689-736. Ghani E, S. O'Connell and E. Rossi-Hansberg (2014) 'The Spatial Development of India', *Journal of Regional Science*, forthcoming. Henderson, J.V. T. Regan, and A. J. Venables (2017) "Building the city: urban transition and institutional frictions," SERC and CERP working paper. Bertaud A and J Brueckner (2005) 'Analyzing building height restrictions: predicted impacts and welfare costs' *Regional Science and Urban Economics*, 35, 109-125. Donaldson D, (2017) 'Railroads of the Raj' *American Economic Review*, forthcoming. Galiani S. and E.

Schargrodsky (2011), 'The dynamics of land titling regularization and market development', United Nations University – World Institute for Development Economic Research, Working Paper No. 2011/88.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Presentation (30%) in the LT.

GY403 Half Unit

Contemporary Debates in Human Geography

This information is for the 2020/21 session.

Teacher responsible: Dr Murray Low STC S512

Other teacher involved: Dr Ryan Centner

Availability: This course is compulsory on the MPhil/PhD in Human Geography and Urban Studies and MSc in Human Geography and Urban Studies (Research). This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in International Migration and Public Policy, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit. Compulsory for MPhil/PhD Human Geography and Urban students without MSc Human Geography and Urban Studies.

Course content: This is a reading seminar course, organised around key works pertinent to cities, development and human geography. While by no means comprehensive, the syllabus provided in the first week of the course will detail some key debates in geography, urban studies and development studies, which we explore in some detail over the term. The readings will reflect a range of approaches to the disciplines of human geography, urban studies and development studies, in order to convey the dynamic interplay between these three areas of scholarship. Discussions with colleagues in these areas of research, alongside readings of foundational texts, will be aimed at exploring how theory and evidence connect in critical geographical research.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of interactive lectures across Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of Michaelmas Term and Lent Term.

Formative coursework: A 2,500 word essay

Indicative reading: Readings focused on in this course will vary from session to session. A detailed syllabus will be provided at the beginning of the course, but would include works such as T Cresswell (2013) *Geographic Thought*; D Gregory et al, *The Dictionary of Human Geography* (5th edn), 2009; D Harvey, *Social Justice and the City*, 2009; D Harvey, *The Enigma of Capital*, 2010; N Smith, *Uneven Development*, 2008; D Massey, *Space, Place and Gender*, 1994; E Soja, *Seeking Spatial Justice*, 2010; R Peet and M Watts, *Liberation Ecologies*, 2004; J Ferguson, *The Antipolitics Machine*, 1994; T Mitchell, *Rule of Experts*, 2002; A Roy, *Poverty Capital*, 2010; and D Gregory and Allan Pred, *Violent Geographies*, 2006.

Assessment: Essay (100%, 5000 words) in the ST.

GY404 Half Unit

Inclusive Growth

This information is for the 2020/21 session.

Teacher responsible: Prof Neil Lee

Availability: This course is available on the MPhil/PhD in Economic

Geography, MSc in Local Economic Development and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A good background in economic geography, economics, public policy, social policy or regional and urban studies.

Course content: Economic change is reshaping local economies, with important implications for work, incomes and poverty. Trade and new technologies are polarising labour markets and creating new types of employment in both the developed and developing world. Despite global falls in poverty, living standards in many disadvantaged regions have been stagnant. And while some cities and regions have managed to create skilled jobs, others have struggled to do so. How can policymakers manage this change and create good jobs in disadvantaged cities and regions? How can local policymakers reduce poverty and disadvantage? Is Inclusive Growth feasible?

This course focuses on the relationship between local economic development, labour markets, poverty and living standards. Each week we cover academic theory and evidence and then relate this to a current policy challenge. Topics include the geography of poverty, spatial labour markets, labour market change, the challenge of high- and low-skills equilibriums, and the geography of social mobility. The second half of the term focuses on the critical analysis of policy agendas. Topics include the impact of high-tech strategies on low-wage workers, spatial targeting of anti-poverty efforts, microfinance and entrepreneurship, and Inclusive Growth.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered via a series of seminars in Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students are expected to present, debate, and participate actively in seminars.

Indicative reading: Lee, N. 2018. Inclusive Growth in Cities: A Sympathetic Critique, *Regional Studies*, 53(9), 424-434. OECD. 2014. All on board: Making inclusive growth happen. Paris: OECD; E Moretti, 2013, *The New Geography of Jobs*.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GY409 Half Unit

Globalization and Regional Development

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Storper

Availability: This course is available on the MPhil/PhD in Economic Geography, MSc in City Design and Social Science, MSc in Development Management, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator.

Course content: The economic geography of globalization, and examination of some of the principal effects of globalization on economic development of cities, regions and nations. Theories of regional economic development, location, and trade are applied to the contemporary process known as "globalization", and used to decipher this phenomenon and its effects on development, employment, and political institutions. A number of major issues

for regional and industrial policy are considered, including trade, convergence/divergence, corporate power, knowledge and technology, governance, and inter-place competition.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of lectures and workshops across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas.

Formative coursework: Students will be expected to participate in group debates throughout the course, with written presentation slides required. Feedback is provided in the sessions.

Indicative reading: P Aghion; J G Williamson, *Growth, Inequality and Globalization*, Cambridge University Press, 1998; S Brakman, H Garretsen; C van Marrewijk, *The New Introduction to Geographical Economics*, Cambridge University Press, 2009; G Clark, M Gertler; M Feldman (Eds), *The Oxford Handbook of Economic Geography*, Oxford University Press, 2000; C Crouch, P Le Galès, C Trigilia; H Voelzkow (Ed), *Local Production Systems in Europe: Rise or Demise?* Oxford University Press, 2001; J H Dunning (Ed), *Regions, Globalization and the Knowledge-Based Economy*, Oxford University Press, 2000; P Krugman; M Obstfeld, *International Economics: Theory and Policy*, Harper-Collins, 1991; A Scott (Ed), *Global City Regions*, Oxford University Press, 2000; M Storper, *The Regional World: Territorial Development in a Global Economy*, Guilford Press, 1997.

A number of more specialised texts will be recommended at the beginning of the course.

Assessment: Take-home assessment (100%) in the ST.

GY410 Half Unit Not available in 2020/21 Economics of Local and Regional Development

This information is for the 2020/21 session.

Teacher responsible: Prof Riccardo Crescenzi STC S417

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MPhil/PhD in Economic Geography, MSc in Development Management, MSc in Environmental Economics and Climate Change, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator.

Course content: Why do some regions and territories perform systematically better than others in terms of economic development and wealth? What are the key drivers of local and regional economic performance? How can local and regional economic development policies boost economic activity and improve socio-economic conditions in disadvantaged areas? Globalisation and technological change have challenged the 'traditional' answers to these questions and call for new analytical and policy tools. This course provides students with an in-depth understanding of the macro and meso-level determinants of regional and local economic development and of the policies influencing these drivers. After examining the existing disparities in regional economic performance between and within a number of advanced, emerging and developing countries, the course illustrates the scope and justification for government intervention in this area. Various theories and approaches to local and regional economic development, leading to different policy prescriptions, are analysed in order to identify different macro and meso

determinants of economic performance (from innovation and human capital to knowledge spillovers and global networks). In particular, the course dwells on the regional policy of the European Union (EU) - one of the most important large-scale regional policy experiences - in order to discuss the pros and cons of existing policy tools and illustrate the benefits of a 'balanced' approach to the analysis, design, management and implementation of regional and local economic development policies in a globalising world. In this context, special attention will also be devoted to the cases of the United States, China and India in a comparative perspective.

Teaching: 20 hours of lectures and 27 hours of seminars in the MT.

Seminar teaching consist of a combination of seminars and debates.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT in order to prepare for the Take Home Exam.

Indicative reading: H W Armstrong & J Taylor, *Regional Economics and Policy*, Macmillan, 2000; R Capello, *Regional Economics 2nd Edition*, Routledge, 2016; R Crescenzi & M Percoco *Geography, Institutions and Regional Economic Performance*, Springer, 2013; R Crescenzi & A Rodríguez-Pose *Innovation and Regional Growth in the European Union*, Springer, 2011; C Jones *Introduction to Economic Growth 2nd edition*, Norton 2001; P McCann *Urban and Regional Economics*, OUP 2001; A Pike, A Rodríguez-Pose & J Tomane, *Local and regional development 2nd Edition*, Routledge, 2017.

A number of more specialized texts will be recommended at the beginning of the course.

Assessment: Take-home assessment (100%) in the LT.

GY413 Half Unit Regional Development and Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Andres Rodriguez-Pose STC S4.07

Availability: This course is available on the MPhil/PhD in Economic Geography, MSc in Environment and Development, MSc in Inequalities and Social Science, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator.

Pre-requisites: A good background is required in one of the fields of management, economics, economic geography, regional and urban studies.

Course content: This course deals with the management and institutions of local and regional economic development. It dwells on the socio-economic implications of the emergence of local and regional governments and institutions as key actors in the design and implementation of economic development strategies across the world. In particular, the first section of the course analyses the consequences for economic efficiency and equality of the gradual but relentless shift of development responsibilities from the national and the supranational to the local and regional scale, linked of political and fiscal decentralisation. The second section of the course focuses, from a theoretical and empirical perspective, on the strategies being implemented by subnational governments across the world in order to cope and redress development problems. Strategies based on the building of infrastructure, the attraction of foreign direct investment, the support to local production and the promotion of local human resources are analysed in different institutional and governance contexts. The course draws on examples from Europe, the US, Latin America,

and Asia.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to participate in group debates throughout the course, with written presentation slides required. Feedback is provided in the sessions.

Indicative reading: R J Bennett, *Decentralization, Local Governments and Markets: Towards a Post-Welfare Agenda*, Clarendon Press, 1990; N Brenner, *New state spaces: Urban governance and the rescaling of statehood*, Oxford University Press, 2004; P Dicken, *Global Shift: Mapping the Changing Contours of the World Economy*, Sage, 2007; J D Donahue, *Disunited States*, Harper Collins, 1997; R Kanbur and A J Venables, *Spatial inequality and development*, Oxford University Press, 2005; A Pike, A Rodríguez-Pose and J Tomaney, *Local and regional development*, Routledge, 2006; R J Putnam, *Making Democracy Work: Civic Traditions in Modern Italy*, Princeton University Press, 1993; A Pike, A Rodríguez-Pose & J Tomaney, *Handbook of Local and Regional Development*, Routledge, 2011; A J Scott, ed., *Global city-regions*, Oxford University Press, 2001; M Storper, *The Regional World: Territorial Development in a Global Economy*, Guilford Press, 1997. A number of more specialised texts will be recommended at the beginning of the course.

Assessment: Take-home assessment (100%) in the ST.

GY415 Half Unit

Local Capacity and Economic Development Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Simona Iammarino STC S410

Availability: This course is available on the MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

Course content: This course is aimed at understanding the micro foundations of local economic development, that is the determinants and effects of the behaviour, strategies and choices of key economic actors: local firms, both small and large, multinational enterprises, universities and other education and research organisations, government bodies, NGOs, and local communities. The study of different theoretical approaches, empirical evidence and implications of the behaviour of such actors, and their interactions and linkages, will help building up the analytical framework to interpret the genesis of localised economic systems, their dynamics and evolution over time and the policy options available, particularly, but not exclusively, from a bottom-up perspective. We will make use of an extended array of empirical examples and case studies across regions and industries, both in advanced and emerging economies, and consider the transferability of lessons and insights over space and time. The course is particularly concerned with place-sensitive approaches and locally initiated and managed processes which may involve a wide range of actors in shaping and implementing local economic development initiatives.

There is a 3-day field-trip (not including travel time) to L'Aquila, Italy, associated with this course. For the academic year 2020-21 the field-trip will take place during the Lent Term Reading Week (Week 6). Students should be aware that, as participation is voluntary, they will need to fund themselves. Participation is encouraged, however it will not be assessed in any way. Students who decide they do not want to participate will not be detrimentally affected on the course. Further information will be provided in Week 1. Estimated costs will be communicated to all offer holders in

advance of registration.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of workshops and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Policy Brief outline to be submitted by week 5 and group presentations on case studies in different weeks of MT: written feedback will be provided on all formative coursework in order to help prepare for the assessed Policy Brief.

Indicative reading: The course is mainly based on academic articles and papers, all available through @reading list. Some chapters will also be used from books such as: A. Pike, A. Rodríguez-Pose & J. Tomaney, *Local and Regional Development*, 2006; B-A. Lundvall, KJ Joseph, C. Chaminade & J. Vang (eds.), *Handbook of Innovation Systems and Developing Countries*, 2009; J Cantwell & E Amann (eds.), *Innovative Firms in Emerging Market Countries*, 2012; S Iammarino & P McCann *Multinationals and Economic Geography. Location, Technology and Innovation*, 2013. In general, all readings are electronically available from the LSE Library unless otherwise indicated.

Assessment: Policy brief (100%) in the MT.

A 2,500 word Policy Brief is due in the week after the end of MT.

GY420

Environmental Regulation: Implementing Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Richard Perkins STC.S413, Dr Eugenie Dugoua, Dr Nora Sylvander and Dr Michael Mason

Availability: This course is compulsory on the MSc in Environmental Policy and Regulation. This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Local Economic Development, MSc in Regulation, MSc in Risk and Finance and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

This course cannot be taken with GY465 Concepts in Environmental Regulation or GY475 Issues in Environmental Governance.

Course content: This course provides critical insights into the characteristics, processes and evolving dynamics of environmental policy, regulation and governance. In MT, the course considers the rationale for public policy intervention, and the factors that shape the influence of different interest groups over government policy making. It proceeds to examine the nature, design and performance of different policy instruments, together with the various influences governing policy implementation processes. In LT, the course highlights key themes in environmental regulation informed by the concept of multi-level governance. This concept suggests new alignments and forms of regulation within and across state borders: the themes chosen to explore this concept include governing technological change, international negotiations, governance beyond the state, and different rationalities of regulation (science, ethics and justice).

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/

seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across both Michaelmas Term and Lent Term. This course includes a reading week in Week 6 of Michaelmas Term and Lent Term.

Formative coursework: Students are expected to prepare one formative piece of coursework in the MT: feedback will be provided. In the LT, students are required to give one presentation on an agreed topic: feedback will be provided.

Indicative reading: While there is no one single text that covers all aspects of the course, you are encouraged to consult the following:

- MT:
- J Holder and M Lee (2007) *Environmental Protection Law and Policy* (2nd edition), Cambridge: Cambridge University Press;
 - N Carter (2018) *The Politics of the Environment: Ideas, Activism, Policy* (3rd edition), Cambridge: Cambridge University Press;
 - S Bell, D McGillivray, O Pedersen, E Lees and E Stokes (2017) *Environmental Law* (9th edition), Oxford: Oxford University Press.
- LT:

- A Gupta and M Mason (eds.) (2014) *Transparency in Global Environmental Governance*, Cambridge, MA: MIT Press;
- A Randall (2011) *Risk and Precaution*, Cambridge: Cambridge University Press;
- S Barrett (2005) *Environment and Statecraft: The Strategy of Environmental Treaty-Making*, Oxford: Oxford University Press;
- S Piattoni (2010) *The Theory of Multi-level Governance*, Oxford: Oxford University Press.

Assessment: Coursework (50%, 3500 words) in the LT.

Take-home assessment (50%) in the ST.

The LT summative coursework will be a policy brief with critical reflection, based on the material taught in the MT.

GY426

Environmental and Resource Economics

This information is for the 2020/21 session.

Teacher responsible: Dr Sefi Roth

Dr Eugenie Dugoua

Dr Cristobal Ruiz-Tagle

Availability: This course is compulsory on the MSc in Environmental Economics and Climate Change. This course is available on the MPhil/PhD in Environmental Economics. This course is available with permission as an outside option to students on other programmes where regulations permit. The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: A background in economics and calculus is highly desirable.

Course content: Environmental and resource economics is at the forefront of the response to local, national and global environmental problems. As such, it has become an essential part of the thinking and actions of national and regional governments, as well as international agencies and organizations. This course seeks to develop a rigorous treatment of the theory of environmental and natural resource economics, and to show how formal economic thinking can assist real world policymaking in areas such as climate change, ecosystem & biodiversity conservation and water resource management.

The course consists of four components which cluster together the principal areas of interest and research in environmental and natural resource economics:

PART I: Environmental Economics and Pollution Control

PART II: Behavioural Economics, Evaluation and the Environment

PART III: The Economics of Natural Resources: Efficiency, Optimality and Sustainability

PART IV: Economics of Climate Change and Low-Carbon

Transitions

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

Formative coursework: Students will complete one written formative assignment of 1,500 words in Michaelmas Term, on which they will receive written feedback.

Indicative reading: Detailed reading lists will be provided to support each course component. The following texts will be particularly useful:

Michaelmas Term:

Kolstad, C., *Environmental Economics*, Oxford: Oxford University Press, (2000). L. Perman, R., Y. Ma, J. McGilvray and M. Common, *Natural Resource and Environmental Economics*, Pearson Addison Wesley, Fourth Edition (2011), and Third Edition (2003). Bondy M, Roth S, and Sager, L. (2020) Crime Is in the Air: The Contemporaneous Relationship between Air Pollution and Crime, *Journal of the Association of Environmental and Resource Economists* 7:3, 555-585. Dugoua E (2019) International Environmental Agreements and Directed Technological Change: Evidence from the Ozone Regime. Working Paper available at http://eugeniedugoua.com/papers/Dugoua2018_Montreal_Innovation.pdf

Lent Term:

Conrad, J., *Resource Economics*, Cambridge: Cambridge University Press, (2005); L Perman, et al., *Natural Resource and Environmental Economics*, Pearson Addison Wesley, Fourth Edition (2011), and Third Edition (2003); Arrow et al. (2013). Determining Benefits and Costs for Future Generations. *Science* 26 Jul 2013:Vol. 341, Issue 6144, pp. 349-350.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2500 words).

GY427 Half Unit

Climate Change: Science, Economics and Policy

This information is for the 2020/21 session.

Teacher responsible: Professor Simon Dietz

Availability: This course is compulsory on the MSc in Environmental Economics and Climate Change. This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Environment and Development and MSc in Environmental Policy and Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

Priority will be given to students on the MSc in Environmental Economics and Climate Change followed by students on the MSc in Environment and Development and MSc in Environmental Policy and Regulation. Students on the MPA will only be offered a place if spaces are available. For further details, please contact your relevant Programme Coordinator.

Course content: A comprehensive guide to the issue of climate change, from fundamental concepts in climate science, through estimating the future impacts of climate change on economies and societies, to cutting greenhouse gas emissions by using economic instruments such as carbon trading. Interdisciplinary, but with an emphasis on economic analysis, albeit taught in a non-technical style.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through interactive lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas.

Formative coursework: Students will carry out regular assignments.

Indicative reading: Detailed reading lists will be provided to support each course component.

The following texts will be particularly useful:

Intergovernmental Panel on Climate Change (2014). *Climate Change 2014: Fifth Assessment Report of the Intergovernmental Panel on Climate Change*. Cambridge: Cambridge University Press.

Maslin, M. (2008). *Global Warming: a Very Short Introduction*. Oxford: Oxford University Press.

Stern, N. (2007). *The Economics of Climate Change: the Stern Review*. Cambridge: Cambridge University Press.

Assessment: Take-home assessment (100%) in the period between MT and LT.

GY428 Half Unit

Applied Quantitative Methods

This information is for the 2020/21 session.

Teacher responsible: Dr Daniele Fanelli (COL 7.07)

Dr Cristobal Ruiz-Tagle (STC)

Dr Quentin Coutellier (STC)

Availability: This course is compulsory on the MSc in Environmental Economics and Climate Change. This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Regional and Urban Planning Studies, MSc in Local Economic Development and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: A background in undergraduate statistics or, preferably, econometrics is required

Course content: This course will provide an introduction to quantitative methods in use in modern environmental and resource economics. Emphasis will be placed on the practical use of empirical tools. This applied focus will be complemented by the investigation of assumptions and proofs that can improve the understanding of empirical results. Students will apply the methods taught using statistical/econometric software and data documenting some topical public policy questions. These applications will take place in ten seminars of one hour each. During the seminars the students will gain understanding of the statistical software STATA. Additionally, in the lectures and sometimes seminars, selected papers in quantitative environmental economics will be critically discussed. In general the course will attempt to use examples from relevant and topical empirical papers published in the area of applied econometrics and environmental economics. The module will cover several estimators. We will start with the standard linear regression model, its assumptions, violations and testing procedures. Some non-Linear models will also be presented, including Multivariate Probit and Logit Models (Maximum Likelihood). Extensions of the Linear regression model to incorporate panel data estimators and Instrumental Variables (IV) approaches (e.g. Two Stage Least Squares and Fixed and Random Effects models) will be also covered. The course will conclude with a discussion of programme evaluation methods and randomised control trials (RCTs).

The course follows the MY452 (delivered by Methodology Department) for the first 6 lectures and seminars, before switching over to the Geography and Environment Department for the last 4 lectures and seminars.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: There will be an opportunity to get feedback on weekly exercises.

Indicative reading: Detailed reading lists will be provided to support each course component, but the following texts will be particularly useful: Part I: (Weeks 1-7 with Daniele Fanelli): A Agresti & B Finlay, *Statistical Methods for the Social Sciences*. Part II: (Weeks 8-11 with Cristobal Ruiz-Tagle): a) Stock J.H. and M.W. Watson (2011). *Introduction to Econometrics*. Third Edition Pearson International Edition; b) J. Wooldridge (2006), *Introductory Econometrics: A modern approach*, Thomson; c) Angrist J and Pischke J.S. (2009) *Mostly Harmless Econometrics*, Princeton.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the MT.

The coursework assessment will take the form of problem sets or exercises that recap on some of the most important topics.

GY431 Half Unit

Cities, People and Poverty in the South

This information is for the 2020/21 session.

Teacher responsible: Deen Shariff Sharp

Availability: This course is available on the MSc in African Development, MSc in City Design and Social Science, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Health and International Development, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Experience and/or knowledge of development and/or urbanisation in the South would be a distinct advantage

Course content: The course examines the patterns, processes and implications of urbanisation in developing societies, with particular reference to the survival and well-being of low-income groups, and the variability of urban life and poverty in different geographical contexts. The conceptual and empirical focus of the course revolves around strategies adopted at individual household and community levels to ensure sustainable livelihoods, and the interrelations of grassroots processes with policy interventions on the part of governments, international development agencies and NGOs. Specific themes include: trends in urban development in the 20th and 21st centuries; the conceptualisation and measurement of poverty and the urban; the 'urbanisation' of poverty; the 'feminisation of poverty'; poverty reduction strategies by international organisations; urban livelihood strategies and economic restructuring; urban social movements; participatory urban governance; and civil society.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas.

Formative coursework: Students will be expected to produce one formative essay during the course, as well as to prepare seminar presentations (usually in pairs), and to be actively involved in seminar discussions, including as discussants and rapporteurs.

Indicative reading: Detailed reading lists will be provided during the course. No one book covers the entire course. However, recommended essential reading is as follows: N. Brenner (ed), *Implosions/Explosions: Towards a Study of Planetary Urbanization*, 2014; S.Chant and C.McIlwaine *Cities, Slums and Gender in the Global South*, 2016; S.Parnell and S.Oldfield (Eds), *The Routledge Handbook on Cities of the Global South*, 2014; J Elyachar, *Markets of Dispossession: NGOs, Economic Development, and the State in Cairo*, 2005; T Mitchell, *The Rule of Experts: Egypt, Techno-Politics, Modernity*, 2002; R Rolnik, *Urban Warfare: Housing under the Empire of Finance*, 2019; M Dikec, *Urban Rage: The Revolt of the Excluded*, 2017; United Nations Sustainable Development Goals: Knowledge Platform.

Assessment: Essay (50%, 2500 words) in the LT.

Essay (50%, 2500 words) in the ST.

GY432 Half Unit Not available in 2020/21 Urban Ethnography

This information is for the 2020/21 session.

Teacher responsible: Prof Gareth Jones S506

Availability: This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course considers the role of ethnography to how we understand cities. We will look in detail at different types of ethnography and compare with other means of representing the city, through the novel and film, starting with Rem Koolhaas on Lagos. Specific themes will cover the urban flâneur and ethnographer, street ethnography, culture of poverty and marginality, time and waiting, bodies and sex; infrastructure and mobility, gates and the middle class; drugs, the gang and violence, and slums. The course will consider the role of ethnography in developing world cities in particular but also draw from studies of developed world. The course offers an opportunity to reflect on urban places in a way which does not reduce them to arenas for technical, policy-driven planning, and so as to consider the urban experience more broadly. The course will raise issues of methodology.

Teaching: 20 hours of seminars and 4 hours of workshops in the LT.

Formative coursework: A 2,000 word essay or review of readings on a chosen topic from class list.

Indicative reading: There are some useful Readers on urban ethnography such as Duneier, M. et al., *The Urban Ethnography Reader*, (2014); Oejo, R.E. *Ethnography and the City: readings on doing urban fieldwork*, (2012). The course is based on identification of a key ethnography for each week supplemented by articles. J. Auyero, *The Patients of the State: the politics of waiting in Argentina*, 2012; J. Auyero & D. Swistun, *Flammable: environmental suffering in an Argentine Shantytown*, 2009; T. Belmonte, *The Broken Fountain*, 2005; J. Biehl, *Vita: life in a zone of social abandonment*, 2005; P. Bourgois. *In Search of respect: selling crack in El Barrio*, 2003; P. Bourgois and J. Schonberg, *Righteous Dopefiend*, 2009; M. Duneier, *Sidewalk*, 2000; L. Fernandes, *India's New Middle Class: Democratic Politics in an Era of Economic Reform*, 2006; D. Gandolfo, *The City at its Limits: taboo, transgression and urban renewal*, 2009; D. Goldstein, *Laughter out of Place: race, class, violence and sexuality in a Rio Shantytown*, 2003; C. Jeffrey, *Timepass: youth, class the politics*

of waiting in India, 2010; S. Jensen, *Gangs, Politics and Dignity in Cape Town*, 2008; P. Kelly, *Lydia's Open Door: inside Mexico's most modern brothel*, 2008; M. Leichty, *Suitably Modern: Making Middle-Class Culture in a New Consumer Society*, 2003; D. Levenson, *Adios Nino: the gangs of Guatemala City*, (2013); D. Mains, *Hope Is Cut: Youth, Unemployment, and the Future in Urban Ethiopia*, 2011; L.A. Ring, *Zenana: everyday peace in a Karachi apartment building*, 2006; E. Tarlo, *Unsettling Memories: Narratives of India's 'Emergency' in Delhi*, 2003; S. Venkatesh, *Gang Leader for a Day*, 2008; L. Wacquant, *Urban Outcasts*, 2008; A. Wilson, *The Intimate Economies of Bangkok: tomboys, tycoons, and Avon Ladies in the Global city*, 2004; J. Wolseth, *Jesus and the Gang: Youth Violence and Christianity in Urban Honduras*, 2011; L. Zhang, *In Search of Paradise: Middle-class Living in a Chinese Metropolis*, 2010; T. Zheng, *Red lights: The lives of sex workers in postsocialist China*, 2009.

Assessment: Essay (100%, 5000 words) in the ST.

GY438 Half Unit Cities and Social Change in East Asia

This information is for the 2020/21 session.

Teacher responsible: Prof Hyun Shin STC. S601f

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in China in Comparative Perspective, MSc in City Design and Social Science, MSc in Development Studies, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in International and Asian History, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

The number of students able to be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator

Pre-requisites: N/A

Course content: This is an interdisciplinary urban course that encourages students to develop a critical understanding of how urban space is transformed in diverse social, economic and political settings, and what social implications are made upon the powerless and the poor. Examining the process of socio-spatial transformation in times of condensed urbanisation and economic development, this course makes use of Asia as an empirical site to unsettle Western notions of urban development. Various examples of urban policies and practices will be drawn from cities across East and Southeast Asia, with emphasis on newly industrialised capitalist economies as well as transitional economies such as mainland China.

Focusing on urban questions in particular, the course comprises of lectures and seminars on the following themes:

- the political economy of urbanisation;
- the politics of land;
- global gentrifications;
- displacement and dispossession;
- cities of spectacle and mega-events;
- urban social movements

Students will also have opportunities to view and discuss various sources of audiovisual materials and documentaries related to these themes.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars, workshops and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students are expected to complete one essay plan for their assessed essay and blog.

Indicative reading: Chen, Y.-L. and Shin, H.B. (eds.) *Neoliberal Urbanism, Contested Cities and Housing in Asia*. Palgrave Macmillan; Chua, B.H. (2017) *Liberalism Disavowed: Communitarianism and State Capitalism in Singapore*. Cornell University Press; Doucette, J., and Park, B.-G. (2019) *Developmentalist Cities? Assessment: Coursework (30%, 1500 words) and essay (60%, 3000 words) in the ST.
Class participation (10%) in the LT.
Coursework (30%) refers to a blog piece. Students are to submit regular reading responses via Moodle as part of class participation. Further details will be included in the course guide.

GY439 Half Unit Cities, Politics and Citizenship

This information is for the 2020/21 session.

Teacher responsible: Dr Murray Low STC.S.512

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in City Design and Social Science, MSc in Culture and Society, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Perspectives on contemporary urban politics. The course will equip students interested in urban change and development to understand and critically assess the variety of ways in which urban politics and policies are imagined and discussed in universities as well as in the world of policy. It will also develop their understandings of key debates and themes in contemporary urban political life. Topics covered will include: imagining urban politics; theories of urban politics, 'globalisation' and urban political life; urban governance; civil society and urban social movements; urban

dimensions of citizenship and migration; policing, violence and urban politics; urban politics and 'neoliberalism.'

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of interactive lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: J Borja and M Castell, *Local and Global*, 1997; J Davies and D Imbroscio, eds., *Theories of Urban Politics* (2nd Edition), 2009; M Douglass and J Friedmann, eds., *Cities for Citizens*, 1998; D Judge, G Stoker and H Wolman, eds., *Theories of Urban Politics*, 1995; P Le Galegrave, s, *European Cities*, 2002; L Sandercock, *Towards Cosmopolis*, 1998; S. Sassen *Territory, Authority, Rights*, 2006; M P Smith, *Translocal Urbanism*, 2001.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GY441 Half Unit The Politics of Housing

This information is for the 2020/21 session.

Teacher responsible: Dr Romola Sanyal

Availability: This course is available on the MSc in City Design and Social Science, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to examine the politics of housing from a transnational and comparative perspective. The course will link the empirical analyses on housing to theoretical discussions on class, community, gender, ethnicity and design. It will analyse housing issues ranging from informality, homelessness and gated communities to housing tenure, architectural design and housing as a humanitarian tool. This is an interdisciplinary course, drawing upon debates in fields such as Architecture, Urban Planning, Geography, Sociology, Anthropology and Development Studies. The course will help students develop a broad knowledge of the politics of housing in different countries and how they intersect with issues such as urban development, housing finance and public policy. It will also encourage students to think about housing issues relationally and globally.

Themes

Some of the themes covered in this course include: Traditional Housing, Communities, Gender and Housing, Race and Ethnicity and Housing, Homelessness, Housing and Emergencies etc.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

One 1500 word essay and 4 one page reading responses

Indicative reading:

- Grewal, I. (1996) *Home and Harem: Nation, Gender, Empire and the Cultures of Travel*. Durham: Duke University Press
- Caldeira, Teresa. (2001) *City of Walls: Crime, Segregation and Citizenship in Sao Paulo*. Berkeley: University of California Press.
- Gowan, T. (2010) *Hobos, Hustlers, and Backsliders: Homeless in San Francisco*. Minneapolis: University of Minnesota Press.
- Gottesdiener, L (2013) *A Dream Foreclosed: Black America and the Fight for a Place to Call Home*. Westfield: Zuccotti Park Press

- Jackson, K. (1985) *Crabgrass Frontier: The Suburbanization of the United States*. New York: Oxford University Press.
- King, A. (1995) *The Bungalow: The Production of a Global Culture*, New York: Oxford University Press.
- Smart, A. (2006) *The Shek Kip Mei Myth: Squatters, Fires and Colonial Rule in Hong Kong, 1950-1963*. Hong Kong University Press.

Assessment: Essay (80%, 5000 words) in the ST. Presentation (20%) in the LT.

GY446 Half Unit

Planning for Sustainable Cities

This information is for the 2020/21 session.

Teacher responsible: Dr Nancy Holman STC318a
Dr Erica Pani - STC305

Availability: This course is available on the MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: A critical examination of the issues involved in planning for sustainable development at the urban level together with a review of policies and practice; the course focus largely on the problems facing developed countries. The course comprises ten lectures covering issues of physical, economic and social measures to promote sustainability alongside understandings of how this may be measured in an urban context.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students are expected to prepare a seminar paper and presentation.

Indicative reading: Detailed reading on specific policy areas will be provided.: J Agyeman & B Evans (Eds), *Local Environmental Policies and Strategies*, 1994; S. Wheeler. *Planning for Sustainability: Creating livable, equitable, and ecological communities*, 2004; Y. Rydin, *Governing for Sustainable Urban Development*, 2010; S. Davoudi, J. Crawford and A. Mehmood (Eds), *Planning for Climate Change: Strategies for Mitigation and Adaptation for Spatial Planners*, 2009.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GY447 Half Unit

The Economics of Regional and Urban Planning

This information is for the 2020/21 session.

Teacher responsible: Dr Felipe Carozzi S416

Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available on the CEMS Exchange, MBA Exchange, MPhil/PhD in Economic Geography, MSc in Development Management, MSc in Development Studies, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator

Pre-requisites: Students should normally have completed an introductory course in economics. Students without this background may wish to attend the micro-economic section of EC100 Economics A together with the Pre-session GY447 and GY447.1 workshops.

Course content: The course aims to provide an economic framework in which to analyse the structure of economic activity within the urban and regional context; the impact of this structure on urban form; the role of government at the local level and local economic policy applications. Topics include: The determinants of industrial, commercial and residential location. The interaction between activities within a spatial context. The economics of land markets and of the development process. The determinants of rents and densities. Economic models of urban structure. Sources of market failure in the urban economy. The rationale of government intervention. Techniques of intervention in the urban and environmental context. The role of the public sector: pricing, allocation, production and investment decisions. Urban and regional economic policy issues.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term only.

The course will also feature a pre-session element in week 0 of Michaelmas Term and a reading week in Week 6 of Michaelmas Term.

160160160160160160

Formative coursework: A take home formative exam will be carried out during Lent Term.

Indicative reading:

- 1) A O'Sullivan *Urban Economics*;
 - 2) J F McDonald and Daniel P. McMillen, *Urban Economics and Real Estate*;
 - 3) J Stiglitz, *Economics of the Public Sector*;
 - 4) Pindyck & Rubinfeld *Microeconomics*, Suslow & Hamilton Study Guide.
 - 5) J Brueckner, *Lectures in Urban Economics*
 - 5) D DiPasquale & W C Wheaton, *Urban Economics and Real Estate Markets*;
 - 6) R W Vickerman, *Urban Economics*;
 - 8) H Dunkerley (Ed), *Urban Land Policy: Issues and Opportunities*;
- More detailed readings will be provided during the course.

Assessment: Take-home assessment (100%) in the ST.

GY448 Half Unit

Urban Planning: Society, Market and Sustainability

This information is for the 2020/21 session.

Teacher responsible: Dr Alan Mace STC315a

Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available on the MSc in City Design and Social Science and MSc in Human Geography and Urban Studies (Research). This course is available as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: The course seeks to bring into conversation with one another the theory and practice of urban planning. While we

draw primarily on our experience of, and ideas generated in the global north we also draw on practice in and perspectives from the global south. You will look at key planning ideas such as; the neighbourhood, community, the region and regional planning, networked planning and partnerships, and sustainability as a rationale for contemporary urban planning. A number of themes run through the course including; social justice and the relationship between planning, state and markets. Our analysis of planning practice provides a critique of past and present practice that provides the basis for considering future urban planning practice.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will submit a 1,500 word assignment.

Indicative reading:

- Friedmann, J., 2011. *Insurgencies: Essays in Planning Theory*, Routledge.
- Joss, S. 2015. *Sustainable Cities; Governing for Urban Innovation*. Palgrave.
- Sanyal, B., Lawrence, J.V and Rosan C.D.R. 2012. *Planning Ideas That Matter*. MIT Press.

Once on the course, all key readings are available online being either journal articles or electronic book chapters.

Assessment: Essay (100%, 4500 words) in the LT.

GY449 Half Unit

Urban Futures

This information is for the 2020/21 session.

Teacher responsible: Dr Austin Zeiderman

Availability: This course is available on the MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is strictly capped at 34. Students are required to apply through Graduate Course Choice on LSE for You by providing a short written statement of why they are interested in taking the course (this includes students on Geography and Environment MSc programmes). If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. Priority will be given to students on the MSc programmes listed above. For further details, please contact your relevant Programme Coordinator.

Course content: By now we are accustomed to hearing that, for the first time in history, the majority of the world's population lives in cities. We may also be aware that more than one billion people now live in the urban slums and shantytowns of the global South, and that this is where the majority of world population growth will take place. But what sort of futures are being imagined for the cities of the twenty-first century? In response to this question, GY449 Urban Futures will critically analyze how the future of cities, and the cities of the future, have been thought about and acted upon in different times and places. Students will learn to adopt a geographical and historical approach to urban futures by exploring how ways of envisioning the future of cities differ across time and space. Treating the future as a social, cultural, and political reality with a profound influence on the present, the course will examine how urban areas are planned, built, governed, and inhabited in anticipation of the city yet to come. Each week will be organised around a particular model for the future of the city: the ideal city, the dystopian city, the modernist city, the colonial

city, the capitalist city, the socialist city, the organic city, the global city, and the secure city. These models will be examined through concrete examples and will enable the discussion of broader theoretical perspectives in urban studies, with a specific focus on the critical analysis of urban futures. Though grounded in urban geography, this course will draw upon texts and other materials from anthropology, sociology, history, cultural studies, literature, film, philosophy, social theory, architecture, art, and city planning. Its primary objective is to equip students with sophisticated, critical ways of thinking about the future of cities, since doing so has real significance for the kind of city we want to, and eventually will, ourselves inhabit.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 1 presentation in the MT.

The formative presentation will be an opportunity for students to begin preparing for the assessed essay and to receive feedback from peers and from the lecturer. Presentations will be delivered in a workshop setting during seminar.

Indicative reading: A detailed reading list will be provided at the beginning of the course, but will include works such as: Arjun Appadurai, *The Future as Cultural Fact: Essays on the Global Condition* (2013); Raymond Williams, *The Country and the City* (1973); Reinhart Koselleck, *Futures Past: On the Semantics of Historical Time* (2004); Justin McGuirk, *Radical Cities: Across Latin America in Search of a New Architecture* (2014); Thomas More, *Utopia* (1516); Ruth Eaton, *Ideal Cities: Utopianism and the (Un) Built Environment* (2002); Matthew Gandy, *The Fabric of Space: Water, Modernity, and the Urban Imagination* (2014); David Harvey, *Spaces of Hope* (2000); Mike Davis, *Planet of Slums* (2006); James C. Scott, *Seeing like a State: How Certain Schemes to Improve the Human Condition Have Failed* (1998); James Ferguson, *Expectations of Modernity: Myths and Meanings of Urban Life on the Zambian Copperbelt* (1999); Svetlana Boym, *The Future of Nostalgia* (2001); Gwendolyn Wright, *The Politics of Design in French Colonial Urbanism* (1991); Timothy Mitchell, *Colonising Egypt* (1991); Jane M. Jacobs, *Edge of Empire: Postcolonialism and the City* (1996); Friedrich Engels, *The Condition of the Working Class in England* (1845); Walter Benjamin, "Paris: Capital of the Nineteenth Century" (1935); Georg Simmel, "The Metropolis and Mental Life" (1903); David Harvey, *The Condition of Postmodernity: An Enquiry into the Origins of Cultural Change* (1990); Ebenezer Howard, "The Town-Country Magnet" (1898/1902); Jane Jacobs, *The Death and Life of Great American Cities* (1961); David Pinder, *Visions of the City: Utopianism, Power, and Politics in Twentieth-century Urbanism* (2005); Michel Foucault, *Security, Territory, Population: Lectures at the Collège de France* (2007); Teresa P. R. Caldeira, *City of Walls: Crime, Segregation, and Citizenship in Sao Paulo* (2000); Stephen Graham, *Cities Under Siege: The New Military Urbanism* (2011).

Assessment: Essay (100%, 5000 words) in the LT.

The assessed essay will be a critical and creative exercise in the analysis of urban futures. Students will be given a choice: 1) Identify and research one vision of the urban future that exists in the present; or 2) Take a particular city and research the ways its future has been envisioned in the past, and how it is currently being envisioned in the present. Essays must contain no more than 5,000 words of text although they may also include images, as well as any other media that pertains to the argument.

GY450

Planning Practice and Research

This information is for the 2020/21 session.

Teacher responsible: Dr Nancy Holman STC315b and Dr Alan Mace STC315a

Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to provide students with an understanding of the current planning issues faced by practitioners and their policy responses. This will begin with an introduction to the planning context of London and an overview of the British planning system. This will be followed by weekly sessions with invited speakers involved in planning practice and research. They will be engaged in relevant current research or be practicing planners or policy-makers from central or local government, research agencies or consultancy. The content will consist of a series of guided walks, lectures and seminars covering issues of current concern and debate within urban and regional policy and planning.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is normally delivered through a combination of events, field trips and walks across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Assessment:

There is no Assessment in this course but the content will be relevant to the assessed courses in the MSc Regional and Urban Planning Studies Programme.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Flyvbjerg, B. (2001) Making social science matter: Why social inquiry fails and how it can succeed again. Cambridge: Cambridge University Press. Hay, I. (ed.) (2010) Qualitative Research Methods in Human Geography. 3rd edition. Oxford: Oxford University Press. Heimer, M. and Thøgersen, S. (eds.) (2006) Doing fieldwork in China. Copenhagen: NIAS Press. Hennink, M. et al (2011) Qualitative Research Methods. London; Thousand Oaks, CA: SAGE. Sayer, A. (1992) Method in social science: A realist approach. London: Routledge. Ward, K. (ed.) (2012) Researching the city: a guide for students. London: Sage

Assessment: Essay (70%, 2500 words) and research proposal (30%) in the ST.

GY454 Half Unit

Urban Policy and Planning

This information is for the 2020/21 session.

Teacher responsible: Dr Nancy Holman S315b and Dr Alan Mace S315a

Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy and MPA in Social Impact. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: Students must have completed Urban Planning: Society, Market and Sustainability (GY448). Urban Planning; Society, Markets, Sustainability (GY448) NEW NAME OF GY448

Course content: The course provides a synthesised approach to the analysis of urban policy-making and plan formulation. It will explore the way in which economic, political and social forces interact to effect policy approaches in different spatial settings. We will cover urban regeneration policy and community development as they relate to neighbourhood planning. The aim is also to gain an understanding of the causes of similarity and difference in policy approaches. Students will undertake a group research project based on a London neighbourhood including an assessment of local planning policy.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Urban Task Force, Urban Renaissance; DETR, Our Towns and Cities: The future; R Atkinson ; G Moon, Urban Policy in Britain; P Hall ; C Ward, Sociable Cities; E Blakely ; M Snyder, Fortress America; D Judd ; S Fainstein, The Tourist City; J Mannigan, Fantasy City; T Hall ; P Hubbard, The Entrepreneurial City.

Assessment: Essay (80%, 4000 words). Presentation (20%) in the LT.

A 4,000 word essay linked to the London neighbourhood planning project.

A group presentation and short film based on the London

GY452 Half Unit

Urban Research Methods

This information is for the 2020/21 session.

Teacher responsible: Prof Hyun Shin S601F

Additional teacher(s): Professor Gareth Jones; Prof Neil Lee; Dr Romola Sanyal; Dr Deen Sharp; Dr Austin Zeiderman; Dr Jessie Speer

Availability: This course is compulsory on the MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is not available as an outside option.

This course is available on the MSc in Urban Policy (LSE and Sciences Po) for those students who choose the MSc in Urbanisation and Development track for their Year 2 studies.

Course content: The course aims to introduce students to the key methods that are frequently mobilised to carry out research on urbanising societies around the world. Additionally, the course is to help students think more systematically about methodological considerations in order to execute a successful dissertation research. Below is an indicative list of themes that are normally covered in the course:

- Designing an urban research project and ethics
- Comparative (case) studies
- Visual methods
- Working with archives
- Interviews and focus groups
- Conducting ethnography
- Quantitative data and questionnaires
- Analysis and write-up

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Lent Term.

neighbourhood planning project.

GY455 Half Unit

Economic Appraisal and Valuation

This information is for the 2020/21 session.

Teacher responsible: Prof Giles Atkinson S302, Prof Susana Mourato S503 and Dr Eugenie Dugoua S421D

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in City Design and Social Science, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Risk and Finance, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator

Course content: This course is concerned with the foundations and practical use of applied economics in the context of project appraisal and policy evaluation. Course content will be drawn from the following. Introduction to economic aspects of project appraisal and cost-benefit analysis. Efficiency, equity and distributional concerns. Measurement of costs and benefits with a specific emphasis on practical methods to value non-market goods and services. The use of appraisal and evaluation in policy processes. The application of project appraisal and policy evaluation methods to policy sectors such as transport, health and the environment. Seminars and lectures will focus on applied case studies and the tools involved in the appraisal of projects. Examples particularly from environmental, health, development and transport policy in the developed and developing world.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course will be delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Indicative reading: Detailed reading lists will be provided to support each course component. Emphasis will be placed on texts, case study material and state-of-the-art contributions to, for example, the literature on non-market valuation. For an overview and introduction to the main issues covered by the course, students may wish to consult the following: G Atkinson and S Mourato, "Cost-Benefit Analysis and the Environment", OECD Environment Working Paper No. 97; G Atkinson et al. (2018) Cost-Benefit Analysis and the Environment: Further Developments and Uses, 2018; AE Boardman et al, Cost-Benefit Analysis: Concepts and Practice, 2018 (chapters 1 and 2).

Assessment: Essay (100%, 4000 words) in the LT.

A 4000 word essay linked to real-life examples of economic appraisal and valuation

International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and MPhil/PhD in Economic Geography. This course is available with permission as an outside option to students on other programmes where regulations permit. The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: The course assumes that students already have knowledge of economics equivalent to a good first degree in the subject. It is available as an option to students who can show that they are suitably qualified.

Course content: This course aims to provide students with a theoretical and empirical understanding of urban economic processes and price determination in land and real property markets within an institutional context. Examples of topics covered include: the functioning of cities and the urban system; the determinants of urban structure; patterns of urban land use; the determinants of urban growth - theory and evidence; land and real property markets; the impact of land market regulation including the economic impact of land use planning; local public finance and house price capitalisation; real estate cycles; homeownership; commercial real estate. The institutional frame of reference within which the course is taught relates mainly to Western Europe and the United States.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across the Michaelmas and Lent Term

This course includes a reading week in Week 6 of Michaelmas Term and in week 6 of Lent Term.

Formative coursework: Students can submit up to two essays of up to 1500 words (one per teacher/teaching term). Essay topics are exam questions from a previous year. Submission is voluntary. Upon request, teachers are happy to provide feedback on seminar presentations.

Indicative reading: Detailed reading list will be given out at the beginning of the course. Much of the reading will be journal articles. However, some important items are: J. Brueckner, Lectures on Urban Economics, 2011; P.C. Cheshire & E.S. Mills, Handbook of Regional and Urban Economics Vol. III: Applied Urban Economics, North Holland, 1999; P.C. Cheshire, M. Nathan & H. Overman, Urban Economics and Urban Policy: Challenging Conventional Policy Wisdom, 2014; D. DiPasquale & W. Wheaton, Urban Economics and Real Estate Markets, 1996; M. Fujita, Urban Economic Theory, 1988; E.L. Glaeser, Triumph of the City, 2011; Henderson, J.V. and J.F. Thisse, Handbook of Regional and Urban Economics Vol. IV, North Holland, 2004; J.F. McDonald, Fundamentals of Urban Economics, 1997; J.F. McDonald & D.P. McMillen, Urban Economics and Real Estate, Theory and Policy, 2011; B. O'Flaherty, City Economics, 2005; A. O'Sullivan, Urban Economics (7th edn.), 2009.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

GY458 Half Unit

Real Property Market Practice

This information is for the 2020/21 session.

Teacher responsible: Prof Paul Cheshire STC402, Dr Felipe Carozzi STC416 and Miss Yixi Liao STC317

Availability: This course is compulsory on the MSc in Real Estate Economics and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

GY457

Applied Urban and Real Estate Economics

This information is for the 2020/21 session.

Teacher responsible: Prof Christian Hilber and Prof Gabriel Ahlfeldt

Availability: This course is compulsory on the MSc in Real Estate Economics and Finance. This course is available on the MPA in

It is available by arrangement with the teacher responsible as an option to other students on other programmes who have an appropriate academic background and an interest in real estate markets.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator

Course content: An examination of how real property markets operate in practice and of the analytical techniques and data available for analysts and practitioners. Specific areas of study include: the availability and structure of data sets in the context of property: problems of: price measurement; user/investment categories; professional methods of valuation (appraisal) and possible impact on price formation: creating and manipulating datasets; measuring property performance; analysis to guide portfolio selection; anticipating and evaluating investment opportunities. Specific sector case studies: industrial, retail, commercial, and residential: investment portfolio choice and management. Briefing on course project/essay. Defining research objectives and methodology in practice.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars, workshops and lectures across Michaelmas Term and workshops and help sessions in Lent Term.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

Indicative reading: There is no course text. CSO guides to Government Statistics; publications from Investment Property Databank and other research departments and organisations in the real property markets; Journal of Property Research, Estates Gazette.

Assessment: Essay (100%, 3000 words).

A 3,000 word project or essay identifying a research problem in real estate markets on a specific issue (e.g., 'The Impact of the 2008 Financial Crisis on Office Rents in Hong Kong', 'Impact of Incomes on House Prices in the UK', 'Which Side of Beijing-Tianjin High-Speed Railway Benefits Most in terms of Housing Prices?' or 'The Economic Implications of Use-Class Designations in England') which will require the student to investigate data sources, suggest techniques of data analysis and provide conclusions on the problem set. Topics must be agreed with the teachers responsible.

GY459 Half Unit

Urban Theory and Policy in the Global South

This information is for the 2020/21 session.

Teacher responsible: Professor Gareth A Jones, Dr Deen Sharp, Dr Alexandra Abello Colak

Availability: This course is compulsory on the MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research) and MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: None.

Course content: This course aims to provide a grounding in key debates in urban studies and policy with reference to the Global South. It highlights the interconnections between evolving urban

ideas and research and policy. Anticipated topics include The City and Comparative Urbanism; Critical Urban Theory, Covid-19 and Urbanism; Urban Political Ecology, Social Life of Cities; Infrastructures and Environment; Elites and Inequalities; Global Protest; Violence, Conflict and Security. Lectures will draw from staff research, with particular emphasis on Brazil, Colombia, India, Lebanon, Mexico, and South Africa.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One essay of 1,500 words (formative).

Indicative reading: A comprehensive reading list mostly focussing on articles will be provided. Useful books include:

- A. Amin & N. Thrift Seeing like a City (2016);
- S. Chant & C. McIlwaine, Cities, Slums and Gender in the Global South (2016);
- M. Dikec, Urban Rage: the revolt of the excluded (2017);
- R. de Satge & V. Watson, Urban Planning in the Global South: conflicting rationalities in contested space (2019);
- S. Fox & T. Goodfellow, Cities and Development (2016);
- E. Glaeser, Triumph of the City (2012);
- S. Graham, Cities under Siege: the new military urbanism (2010);
- C. Lemanski & C. Marx (eds) The City and Urban Poverty, (2015);
- M. Murray, The Urbanism of Exception: the dynamics of global-city building in the twenty-first century (2017);
- S. Parnell & E. Pieterse, Africa's Urban Revolution, (2014);
- R. Rolnik, Urban Warfare: Housing under the Empire of Finance (2019);
- A. Roy & A. Ong (eds.) Worlding Cities: Asian experiments and the art of being global (2011);
- P. Sendra & R. Sennett, Designing Disorder: experiments and disruptions in the city (2020);
- A. Simone, City Life from Jakarta to Dakar, (2010);

Assessment: Essay (50%, 2500 words) in the LT.

Essay (50%, 2500 words) in the ST.

GY460 Half Unit

Techniques of Spatial Economic Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Steve Gibbons S511

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Regional and Urban Planning Studies, MSc in Environmental Economics and Climate Change, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Statistics (Social Statistics), MSc in Statistics (Social Statistics) (Research) and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. Students requesting this course should provide information on their prior econometrics and statistics training and their motivation for study. If the course is over-subscribed, places will be allocated at the Department's discretion based on this information and a waiting list may be created. For further details, please contact your relevant Programme Coordinator

Pre-requisites: Students must have a good understanding of statistics and applied micro-econometrics at an undergraduate level or, for example, have studied Applied Quantitative Methods (GY428) in Michaelmas term or another course which introduces topics such as instrumental variables and panel data methods. It is advisable to look at the first two key readings listed below before signing up for this course. Students who are comfortable working with computers, data and already have basic familiarity with

STATA, R or other statistics/econometrics software will get the most out of this course.

Course content: The aim of the course is to develop the technical tools necessary to understand and analyse spatial economic and social phenomena and to apply quantitative techniques to analyse economic and social problems, processes and policies at the urban and regional scale. The course also provides a hands-on introduction to using Geographical Information Systems and other spatial computer applications for research purposes, but you should not expect to get a full training in GIS from this course. Topics typically include: Spatial representation, spatial data and Geographical Information Systems; spatial weights, aggregation and smoothing methods; spatial econometric models and neighbourhood effects; answering causal questions in the spatial context; spatial interaction and discrete choice models; spatial cluster and point pattern analysis; inequality, competition and diversity.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of computer practical classes/seminars and lectures across the Lent Term. There are surgeries and opportunities for support for projects in the ST.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Throughout the term, progress and understanding will be assessed by short in-class assessments. Students will receive feedback on one piece of work, such as answers on questions related to one of the computer class assignments.

Indicative reading: A reading list and outline is available on Moodle. Important readings are Gibbons, S., H.G Overman and E. Patacchini (2015) Spatial Methods, Ch. 3 in Duranton, G, J.V. Henderson and W. Strange (eds) Handbook of Urban and Regional Economics Vol 5a, Elsevier. Baum-Snow, N. and F. Ferreira (2015) Causal Inference in Urban Economics, Ch. 1 in Duranton, G, J.V. Henderson and W. Strange (eds) Handbook of Urban and Regional Economics Vol 5a, Elsevier. An overview of some topics is provided by: A Fotheringham, C Brunsdon; M Charlton, Quantitative Geography: Perspectives on Spatial Data Analysis. Sage Publications, 2000.

Assessment: Project (100%, 5000 words) in the ST.

A quantitative research project of not more than 5000 words to be handed in at a specified date in the ST (100%). This project is carried out independently, but with guidance and support from teaching staff.

estate, structured investment deals and waterfall analysis; fixed and flexible rate mortgage loans and mortgage payment issues; tax transparent real estate investment vehicles (REITs); and current and international trends in real estate (time permitting).

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of classes/seminars and lectures across the Lent Term (plus one revision session in Summer Term).

External interventions by real estate practitioners will be scheduled when feasible.

This course includes a reading week in Week 6 of Lent Term. Some enrichment (non-compulsory) activities related to the course might be scheduled during this period (e.g. sessions on cash-flow modelling in excel).

Formative coursework: Students will be expected to complete in-class exercises and up to two take-home case-studies.

Indicative reading: Key texts are: Brueggeman, W. B. and J. D. Fisher (2005) Real Estate Finance & Investments (13th edition or newer), New York City, NY: McGraw-Hill/Irwin; Linneman, Peter (2004) Real Estate Finance & Investments: Risks and Opportunities, (2nd edition or newer). Philadelphia: Linneman Associates. A more detailed reading list will be handed out at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.

Presentation (30%) in the LT.

70% of the students' final grade will come from a two-hour closed book examination. The exam will consist of three questions and students will have to answer two out of these three questions. These questions will assess the material covered by the lecturers during the Lent Term as well as the topics discussed by the external speakers (two to three external interventions are planned every year; these are subject to confirmation).

30% of students' final grade will come from a group work and presentation on a "case study" in real estate financial investment. Students will be provided with some material and instructions before reading week of LT and will be assigned to groups of 4-5 students. They will have to work both on an xl cash flow analysis of this real estate investment opportunity as well as on a short (20min) presentation they will give as a group. They will then be allocated some time during one of the classes of Week 9 of LT to present their solution as a group (in person or online) and will be assessed both on their presentation skills and the technical understanding of the cash flow analysis used in their financial investment decision.

GY462 Half Unit Real Estate Finance

This information is for the 2020/21 session.

Teacher responsible: Prof Olmo Silva S506A

Availability: This course is compulsory on the MSc in Real Estate Economics and Finance. This course is available on the MSc in Accounting and Finance, MSc in Risk and Finance and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: This course aims to provide students with concepts and techniques for analysing financial decisions in real estate development and investment. Topics include: basic real estate investment analysis and financial leverage; real options approach applied to real estate; real estate investment performance and portfolio considerations; private equity in real

GY465 Half Unit Concepts in Environmental Regulation

This information is for the 2020/21 session.

Teacher responsible: Dr Richard Perkins STC. S413 and Dr Nora Sylvander

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Regulation, MSc in Risk and Finance and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

This course cannot be taken with GY420 Environmental Regulation: Implementing Policy or GY475 Issues in Environmental Governance.

Course content: This course provides critical insights into the nature, dynamics and practice of environmental regulation. It considers the rationale for policy intervention and the influence of different interest groups on environmental policy making. The course proceeds to examine the characteristics, design and performance of different policy instruments, together with the various influences governing policy implementation processes.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students are expected to prepare one piece of formative coursework in the Michaelmas Term: feedback will be provided..

Indicative reading: While there is no one single text that covers all aspects of the course, you are welcome to consult the following:

- J Holder and M Lee (2007) Environmental Protection Law and Policy (2nd edition), Cambridge: Cambridge University Press;
- N Carter (2018) The Politics of the Environment: Ideas, Activism, Policy (3rd edition), Cambridge: Cambridge University Press;
- S Bell, D McGillivray, O Pedersen, E Lees and E Stokes (2017) Environmental Law (9th edition), Oxford: Oxford University Press.

Assessment: Coursework (100%, 3500 words) in the LT. The summative assignment will be a policy brief with critical reflection (3500 words).

GY470 Half Unit Not available in 2020/21 Urban Africa

This information is for the 2020/21 session.

Teacher responsible: Prof Claire Mercer STC.418

Availability: This course is available on the MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to students in other departments and on other programmes where their regulations allow, and if there is space on the course.

Course content: The course begins with an overview of the ideas and debates on urban Africa in theory and policy. The rest of the course looks at key issues currently facing African cities drawing on contemporary policy debates and research in human geography, African studies, development studies, urban studies, anthropology, sociology and planning studies. These include: urban pasts, urban economies, informality, rural-urban connections, planning, land, housing and infrastructure.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

There will be a Reading Week in Week 6.

Formative coursework: Students will be expected to produce 1 draft essay plan for the assessed essay in MT.

Indicative reading: de Boeck F and S Baloji (2016) Suturing the city: living together in Congo's urban worlds, Autograph ABP, London. Diouf M and R Fredericks (eds) (2014) The arts of citizenship in African cities: infrastructures and spaces of belonging, Palgrave Macmillan, Basingstoke. Obeng-Odoom F (2016) Reconstructing urban economies: towards a political economy of the built environment, Zed, London. Myers G (2011) African cities: alternative visions of urban theory and practice,

Zed, London. Parnell S and E Pieterse (eds) (2014) Africa's urban revolution, Zed, London. Pieterse E and AM Simone (eds) (2013) Rogue urbanism: emergent African cities, Jacana Media with African Centre for Cities, University of Cape Town. Quayson A (2014) Oxford Street, Accra: city life and the itineraries of transnationalism, Duke University Press, Durham and London. Robinson J (2006) Ordinary cities: between modernity and development, Routledge, Abingdon. Simone AM (2004) For the city yet to come: changing African life in four cities, Duke University Press, Durham and London

Assessment: Essay (100%, 5000 words) in the LT. Students will submit an extended essay addressing an issue of urban development in African cities.

GY472 Half Unit Not available in 2020/21 Real Estate Investment

This information is for the 2020/21 session.

Teacher responsible: Ms Lindsay Relihan STC S409

Availability: This course is available on the MSc in Real Estate Economics and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Entry into the MSc Real Estate Economics and Finance or by request from other qualified MSc students. Those qualified will already have knowledge of economics equivalent to a good first degree in the subject.

Course content: The objective of this course is to educate students in the tools for evaluating real estate investment decisions and in incorporating the insights from urban economics to improve the profitability of their investments. The course will begin with a brief introduction to standard methods in evaluating risk and return in real estate investment and development. We will then discuss empirical techniques for identifying the impact of a shift in the demand or supply of space on the risk and return of an investment. From there, we will examine the theory and evidence for variation in risk and return within and across cities, as well as the institutional factors that create cross-country variation in investment outcomes. We will then discuss the construction of REITS, their ability to diversify across geography, and their performance. The remainder of the course will dive deeper into evaluating the impact of major emerging trends in urban economics on investment valuations that outperform spatially blind evaluations. Assessment for the course will center on valuation of a mixed-use retail property in London. A field trip to tour the property and surrounding urban environment may occur during the term.

Teaching: 20 hours of lectures, 5 hours of seminars, 4 hours of workshops and 1 hour of computer workshops in the LT. At the end of the course students should be able to estimate the expected risk and return of an investment using the appropriate tools and methods. In that estimate, they should be able to evaluate which local economic factors are likely to impact the expected risk and return from an investment and account for them in their analysis. They should also be able to combine data with empirical techniques to measure the impact of those forces for which no good existing empirical estimates are available. Finally, they should be able to clearly articulate their assumptions and how those impact their results.

Formative coursework: Students will be expected to produce 2 essays in the LT.

In their first essay, students will work in their groups to conduct the quantitative analysis for a case study using the standard tools in real estate investment. Each student will prepare a 1000 word essay based on this quantitative work, analyzing the assumptions and methods used and the results. The second essay will also be 1000 words and center on assessing the students ability to incorporate urban economic theory and empirical research into their valuation. These formative exercises closely match the style

and structure of the summative coursework.

Indicative reading:

- Archer, Wayne R., and David C. Ling. "The three dimensions of real estate markets: Linking space, capital, and property markets." *Real Estate Finance* 14.3 (1997): 5-11.
- Brueggeman, W. B. and J. D. Fisher (2005) *Real Estate Finance & Investments* (13th edition or newer), New York City, NY: McGraw-Hill/Irwin
- Clayton, Jim, David C. Ling, and Andy Naranjo. "Commercial real estate valuation: fundamentals versus investor sentiment." *The Journal of Real Estate Finance and Economics* 38.1 (2009): 5-37.

- Danielsson, Jón. *Financial risk forecasting: the theory and practice of forecasting market risk with implementation in R and Matlab*. Vol. 588. John Wiley & Sons, 2011.

Assessment: Essay (100%, 3500 words) in the ST Week 1.

The summative essay will be 3500 words and count for 100% of the student's final grade. It will center on assessing the students' ability to produce empirical estimates of the impact of shifts in demand and supply for commercial real estate using data and rigorous methods that they incorporate into their evaluation of an investment proposal's risk and return. The valuation should also contain other relevant estimates from the literature and justification for assumptions based on empirical evidence.

GY473 Half Unit

Economic Development and the Environment

This information is for the 2020/21 session.

Teacher responsible: Dr Charles Palmer STC.3.03 and Prof Giles Atkinson STC.3.02

Availability: This course is compulsory on the MPhil/PhD in Environmental Policy and Development and MSc in Environment and Development. This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Environmental Economics and Climate Change and MSc in Environmental Policy and Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: Students who have not completed a course in first year undergraduate level Economics might find it useful to audit EC100 Economics A.

Course content: With a focus on individuals and countries in the global south, the starting point for this course is recognition of the importance of resource use and the environment as building blocks for economic development. Using concepts and tools of environmental and development economics, the course aims to

impart knowledge and develop critical thinking about a number of selected topics concerned with the interface between environment and development, at both the macro- and micro-scale. Central to this is an examination of the trade-offs and complementarities between environment and development.

Structured over 10 weeks, the course is divided into two distinct parts.

- After introducing the course (week 1), Part I concentrates on the sustainability of the national and global economy, focusing on the role of managing wealth in shaping development prospects, whether green growth can deliver sustainability and the role of global trade in explaining resource use and environmental degradation, at the macro-scale. It concludes by emphasizing the overarching role of institutions in governing development paths and the way in which resources are managed.
- What then follows in Part II is a consideration of a number of topics that explore different resources and areas of sustainability policy at the micro-scale. Specifically, the demand for and supply of key ecosystem services - energy, food, and water - have important implications for resource use and the environment. They also serve as building blocks for economic development in poorer countries. The impacts of current development trends on natural and man-made ecosystems, in particular, forest and urban ecosystems, are examined at the end of course along with their implications for public policy.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures in Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 1 essay in the MT.

There will be a piece of formative work – a 'mock' exam question – during MT to help students prepare for the take-home exam.

Indicative reading:

- D Helm, *Natural Capital*, Yale University Press, 2015.
- G Atkinson et al. (eds.), *Handbook of Sustainable Development*, Edward Elgar, 2014.
- R Lopez and M Toman (eds.), *Economic Development and Environmental Sustainability*. Columbia University Press, 2006.

- A Banerjee and E Duflo, *Poor economics: a radical rethinking of the way to fight global poverty*, Public Affairs, 2011

Assessment: Take-home assessment (100%).

There will be an online assessment ('exam'). Timing TBC.

GY474 Half Unit

Politics of Environment and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Julia Corwin STC 4.14 and Dr Jayaraj Sundaresan STC 3.04

Availability: This course is compulsory on the MSc in Environment and Development. This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Environmental Economics and Climate Change and MSc in Environmental Policy and Regulation. This course is available with

permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: This course explores key themes at the intersection of development and environmental politics. Specifically, the course is centred on the applications of political ecology, critical development studies, and materialist human geography to topics in environment and development. In exploring the complex relationships between historical dynamics of development, inequality, and the environment, it covers a range of important natural resource and environmental issues, such as climate change, conservation, waste, and environmental social movements.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading:

- Li, T (2007), *The Will to Improve*, Durham: Duke University Press.
- Robbins, P (2012), *Political Ecology: A Critical Introduction*, Oxford: Wiley-Blackwell
- Scott, J (1991) *Seeing Like a State: How Certain Schemes to Improve the Human Condition Have Failed*, New Haven: Yale University Press.

- Wolford, W (2010) *This Land Is Ours Now: Social Mobilization and the Meanings of Land in Brazil*. Durham: Duke University Press.

Assessment: Essay (100%, 4000 words) in the ST.

GY475 Half Unit

Issues in Environmental Governance

This information is for the 2020/21 session.

Teacher responsible: Dr Richard Perkins ST.S413, Dr Michael Mason and Dr Eugenie Dugoua

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Local Economic Development, MSc in Regulation, MSc in Risk and Finance and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit. This course cannot be taken with GY465 Concepts in Environmental Regulation or GY420 Environmental Regulation: Implementing Policy.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: This Lent Term course is designed to highlight key themes impacting on environmental regulation across different scales of governance. While the emphasis is on global and transnational policy processes, attention is also paid to the implications of these processes at regional and local scales. The organising framework of 'multi-level governance' suggests new alignments and forms of regulation which require us to consider

environmental decision-making within and beyond the territorial authority of a single state. The indicative themes chosen explore distinctive challenges for multi-level governance - governing technological change, international negotiations, governance beyond the state, and different rationalities of regulation (science, ethics and justice). These themes, which will be explored in student-led seminars, run explicitly or implicitly through many environmental policy debates.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across the Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: All students are required to make one presentation on an agreed topic: feedback will be provided.

Indicative reading: While there is no one single text that covers all aspects of the course, students are advised to consult the following: Barrett, S. (2005) *Environment and Statecraft: The Strategy of Environmental Treaty-Making*, Oxford: Oxford University Press. Gupta, A. and M Mason (eds.) (2014) *Transparency in Global Environmental Governance*, Cambridge, MA: MIT Press. Li, T. (2007) *The Will to Improve: Governmentality, Development and the Practice of Politics*. Durham, NC: Duke University Press. Piattoni, S. (2010) *The Theory of Multi-level Governance*, Oxford: Oxford University Press. Randall, A. (2011) *Risk and Precaution*, Cambridge: Cambridge University Press.

Assessment: Take-home assessment (100%) in the ST.

GY479 Half Unit

Urban Transformations

This information is for the 2020/21 session.

Teacher responsible: Dr Ryan Centner

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in City Design and Social Science, MSc in Culture and Society, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course introduces students to key theories and debates about societies undergoing rapid urban change. Course lectures examine large urban transformations in three ways. The first pertains to 'urbanisation' as a historical process by which social life, even outside of cities, becomes 'urban'. This means addressing the relationship between the country and the city, the idea of the urban in historical perspective, and the relationship between urban life in the global North and South. The second approach considers the city as a site for radical political change, as well as social experimentation in planning and development. This means studying cities as spaces of movement, resistance, and innovation, with an emphasis on urban experiments (especially in 'Southern' cities). Thirdly, urban transformation is analysed in terms of the explosion of theorisations about the nature of the urban, how to study it, and how to make a difference in 'the urban', both intellectually and materially, within a global economy. Through these three overlapping lenses – history, politics/planning, and theory – the course aims to equip students with a conceptual and empirical foundation for analysing city transformations and globalised urbanisation, with particular attention to emerging urbanisms in the global South.

Topics covered may include the following: industrialisation and immigration; processes of suburbanisation, ghettoisation, and

gentrification; global cities; the colonial and postcolonial city; urban citizenship and the right to the city; urban uprisings; the geopolitics of urban theory; urban nostalgia; urban innovation and the politics of urban self-regard/self-representation.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 1 essay in the MT.

An optional short essay of 2000 words (maximum). Critically explore the applicability of one week's readings from the first 5 weeks of the course to an empirical case outside the course reading. This will be due in Week 7 of MT.

Indicative reading: R. Beauregard. *When America Became Suburban*, 2006; J. Brown-Saracino (ed). *The Gentrification Debates*, 2010; T. Caldeira, *City of Walls: Crime, Segregation, and Citizenship in Sao Paulo*, 2000; M. Davis, *Planet of Slums*, 2006; D. Harvey, *Rebel Cities: From the Right to the City to the Urban Revolution*, 2012; J.M. Jacobs, *Edge of Empire: Postcolonialism and the City*, 1996; G. Moussawi, *Disruptive Situations: Fractal Orientalism and Queer Strategies in Beirut*, 2020; J. Robinson, *Ordinary Cities: Between Modernity and Development*, 2006; A. Roy and A. Ong (eds), *Worlding Cities: Asian Experiments and the Art of Being Global*, 2011; T. Samara, S. He, and G. Chen (eds), *Locating Right to the City in the Global South*, 2013; The reading list is intended only to be indicative of literatures broached in the course. Actual readings will consist of particular articles and chapters on a weekly basis, as well as a wider range of inclusions.

Assessment: Essay (90%, 5000 words) in the LT.

Class participation (10%) in the MT.

Due in the first half of LT, the essay (5000 words, maximum) will be based on a range of questions provided by the instructor during MT. Some options will be very specific about certain issues and/or regions, whereas others will be more conceptual and open for student exploration. Across all these options, there will be wide enough scope for students with different academic backgrounds and thematic or geographical interests to be accommodated, while still hewing to the organising topics of the course.

Attendance and active participation in seminar is also essential, and assessed. Students will be required to co-lead discussion with a peer and the instructor for one (out of ten) seminars.

GY480 Half Unit Not available in 2020/21

Remaking China: Geographical aspects of Development and Disparity

This information is for the 2020/21 session.

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: N/A

Course content: The recent decades have seen China emerging as one of the most important global economic and political players. The course aims to offer opportunities to gain comprehensive and yet critical insights into China's development in urban, regional and global dimensions by reflecting upon the significance of China's

role in the world economy as well as the challenges emerging within China. Tentative topics are as follows:

China's rise in the global capitalism; Uneven development and regional disparities; Governing China and the role of the state; Speculative urbanisation; Mega-city regions; Gender and China; Factory of the World and work inequalities; Migration, hukou and local citizenship; Public participation and rights activism.

Teaching: 15 hours of lectures and 9 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Campanella, T.J. (2008) *The concrete revolution: China's urban revolution and what it means for the world*. Princeton Architectural Press. Hsing, Y-T (2010) *The great urban transformation*. Oxford University Press. Hsing, Y.T and Lee C. K (eds) (2009) *Reclaiming Chinese Society, The New Social Activism*. Routledge. Jacques, M. (2009) *When China rules the world: The rise of the Middle Kingdom and the end of the Western world*. Allen Lane. Lee, C.K. (2007) *Against the law: Labor protests in China's rustbelt and sunbelt*. University of California Press. Ngai, P (2005) *Made in China: Women Factory Workers in a Global Workplace*. Duke Univ. Press. Shao, Q. (2013) *Shanghai Gone: Domicide and defiance in a Chinese megacity*. Rowman & Littlefield Publishers. Wu, W. and Gaubatz, P. (2012) *The Chinese city*. Routledge. Zhang, L and Ong, A (2008) (eds) *Privatizing China*. Cornell University Press. Wu, F. (2015) *Planning for Growth: Urban and Regional Planning in China*. Routledge

Assessment: Essay (100%, 4000 words) in the LT.

GY484

Dissertation - MSc Regional and Urban Planning Studies

This information is for the 2020/21 session.

Teacher responsible: Dr Erica Pani

Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies. This course is available on the MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through combined seminars and lectures across Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of both Michaelmas and Lent Term.

Assessment: Dissertation (100%, 10000 words) post-summer term.

GY485

Dissertation - MSc Real Estate Economics and Finance

This information is for the 2020/21 session.

Teacher responsible: Programme Director

Availability: This course is compulsory on the MSc in Real Estate Economics and Finance. This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/

seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of workshops and one to one supervision across Michaelmas, Lent and Summer Term.

Assessment: Dissertation (100%, 10000 words) post-summer term.

GY486

Dissertation - MSc Local Economic Development

This information is for the 2020/21 session.

Teacher responsible: Dr Erica Pani

Availability: This course is compulsory on the MSc in Local Economic Development. This course is available on the MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through combined seminars and lectures across Michaelmas Term and Lent Term. The course includes a reading week in Week 6 of both Michaelmas and Lent Term.

Assessment: Dissertation (100%, 10000 words) post-summer term.

GY487

Dissertation - MSc in Human Geography and Urban Studies (Research)

This information is for the 2020/21 session.

Teacher responsible: Programme Director - Dr Ryan Centner

Availability: This course is compulsory on the MSc in Human Geography and Urban Studies (Research). This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

Assessment: Dissertation (100%, 10000 words) post-summer term.

GY488

Dissertation - MSc Urbanisation and Development

This information is for the 2020/21 session.

Teacher responsible: Programme Director

Availability: This course is compulsory on the MSc in Urbanisation and Development. This course is available on the MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of workshops as well as one to one supervision meetings across Michaelmas, Lent and Summer Terms.

Assessment: Dissertation (100%, 10000 words) post-summer term.

GY489

Dissertation - Environment Programme - MSc Environmental Economics and Climate Change, MSc Environmental Policy and Regulation and MSc Environment and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Charles Palmer
Programme Director of relevant MSc programme.

Availability: This course is compulsory on the MSc in Environmental Economics and Climate Change and MSc in Environmental Policy and Regulation. This course is available on the MSc in Environment and Development. This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through combined workshops and lectures across Michaelmas Term and Lent Term.

The course includes a reading week in Week 6 of both Michaelmas and Lent Term.

Assessment: Dissertation (100%, 10000 words) post-summer term.

HP400 Half Unit

Financing Health Care

This information is for the 2020/21 session.

Teacher responsible: Prof Elias Mossialos COW 2.12

Availability: This course is compulsory on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course aims to give students a thorough grounding in health financing policy. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in European countries, but the general principles studied apply internationally.

The course provides an overview of key health financing policy issues, including the advantages and disadvantages of different ways of raising revenue for health; the role of private financing mechanisms; the importance of pooling; decisions about whom to cover, what services to cover, and how much of service cost to cover; allocating resources to purchasers, purchasing market structure and the principles of strategic purchasing; the incentives associated with different methods of paying providers; and the issue of financial sustainability.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 23 hours during Michaelmas Term. Students will have access to lecture material delivered as short online videos. Seminars will take place in small groups and additional group feedback sessions will be held a few days after each seminar meeting. Students will work together in small groups on structured learning activities set by the course leads, ahead of the seminars.

There will be a departmental reading week in week 6 of term.

There will be a 2 hour revision session held in the ST ahead of the final exams.

Formative coursework: Students will receive feedback on formative activities of in-class group work and presentations.

Indicative reading: WHO, World Health Report 2010 - Health systems financing: the path to universal coverage (2010); E Mossialos, A Dixon, J Figueras & J Kutzin (eds), Funding health care: options for Europe, Open University Press (2002); J Kutzin, Health financing policy: a guide for decision-makers, World Health Organization (2008); T Rice, The economics of health reconsidered, Health Administration Press (3rd edn, 2009).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

HP401 Half Unit

Introduction to Health Policy and Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Mrigesh Bhatia COW 1.04 and Dr Justin Parkhurst COW 2.08

Availability: This course is compulsory on the MSc in Global Health Policy and MSc in International Health Policy. This course is available on the MSc in Global Population Health, MSc in Health Policy, Planning and Financing and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

Course content: A comparative approach to the development of health and healthcare policies in high, middle, and low income country settings, emphasising the goals of health policymaking, public health approaches, the political nature of health policy issues, and core concepts from policy studies that can be used to conceptualise policy change dynamics in health.

The course will introduce concept of risk and risk reducing strategies, theories of planning, and priority setting techniques in health care. In addition, the course will examine the processes and forces shaping the development and implementation of health policy. The course will examine core concepts such as power, the role of the state and other policy stakeholders (e.g. NGOs, international organisations, etc.), institutions, and evidence, in shaping health policy agendas or choices.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 23 hours during Michaelmas Term. Students will have access to lecture material delivered as short online videos. Seminars will take place in small groups. Students will work together in small groups on structured learning activities set by the course leads, following some of the seminars. Additional group feedback sessions will be held a few days after these tasks are assigned.

There will be a departmental reading week in week 6 of term.

Formative coursework: Students will sit a mock written exam in the last week of term.

Indicative reading: Green, A., An Introduction to Health Planning for Developing Health Systems, new edn, OUP, 2007. Walt, Gill. 1994. Health policy: an introduction to process and power. London: Zed Books. Hill, M. The Policy Process, a reader, second ed. Harlow: Prentice Hall 1997. Buse, Kent, Nick Mays, and Gill Walt. 2012. Making Health Policy. Maidenhead, Berkshire: Open University Press. D Leon & G Walt (eds), Poverty, Inequality and Health: An international perspective, OUP (2001); B Amick et al., Society and Health, OUP (1995); Parkhurst, J. The politics of evidence: from evidence based policy to the good governance of evidence. London Routledge 2016.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

HP402 Half Unit Not available in 2020/21

Measuring Health System Performance

This information is for the 2020/21 session.

Teacher responsible: Dr Irene Papanicolas COW 3.04

Availability: This course is compulsory on the MSc in International Health Policy. This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course aims to present a framework to discuss the opportunities and challenges with performance measurement in health care, examine the various dimensions and levels of health system performance, identify the measurement instruments and analytic tools needed, and examine the implications of these issues for policy makers and regulators. Lectures generally focus on measuring health system performance in high-income countries but draw on the experience of other countries where relevant.

After taking this course students are expected to:

- understand the principles of performance measurement
- appreciate the challenges, approaches, and opportunities in performance measurement in four dimensions: population health, patient outcomes, equity, quality and appropriateness of care, and productivity
- understand the methodological issues facing performance measurement relating to risk adjustment, developing composite measures, and measuring attribution and causality
- identify key issues relevant to policy makers relating to: developing targets and reporting on progress to the public, and developing incentives to improve performance

Teaching: 15 hours of lectures, 9 hours of seminars and 5 hours of workshops in the LT.

Teaching will be delivered as 10 lectures of 1.5 hours, plus 6 seminars of 1.5 hours and 2 workshops of 2.5 hours

Indicative reading: Papanicolas I, Smith P (Eds) Health System Performance Comparison: An Agenda for Policy, Information and Research. Maidenhead: Open University Press, 2013; P Smith, E Mossialos, I Papanicolas S. Leatherman (Eds), Performance measurement for health system improvement: experiences, challenges and prospects. Cambridge University Press, 2010. Institute of Medicine, Crossing the Quality Chasm: A New Health System for the 21st Century. Washington, DC, National Academies Press, 2001; OECD, Measuring up: improving health system performance in OECD countries. Paris: OECD, 2002. World Health Organization (WHO), (2000). The world health report 2000: Health systems: Improving performance, Geneva: WHO Publications

Assessment: Presentation (25%) in the LT.

Essay (75%, 3000 words) in the ST.

HP403 Half Unit Not available in 2020/21

Health Systems and Policies in Developing Countries

This information is for the 2020/21 session.

Teacher responsible: Dr Mrigesh Bhatia OLD 1.17

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

Course content: In recent years, debates in health policy have moved to consider a system-wide approach to understanding the demands and challenges of health in low and middle income settings. Importantly, systemic barriers remain to health care, centred around institutions, organisations and resources. In particular, a system-wide approach focuses on the importance of

developing and strengthening broader healthcare infrastructure, rather than a focus on disease specific interventions. This course will be based around three key areas of the health system in low income settings; the physical, financial and human. The physical will consider the delivery of health in developing countries - examining the role of the public, for profit and non profit sectors, decentralisation (and recentralisation) and physical access to primary healthcare. The financing arm will consider options for financing healthcare in low income settings, including the role of user fees, results based financing and community financing schemes. The human element will analyse the acute shortages of health workers, brain drain and capacity building in the workforce. As part of this three pronged approach, this course will consider a range of health policies and health sector reforms which have been implemented to overcome challenges in resource poor settings. It will examine the assumptions upon which health system reforms are based, and an assessment of their success. Finally, the course will consider some case studies for health systems and policy analysis in developing countries, including maternal health and system resilience to health crises

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 3 hours of lectures in the ST.

Formative coursework: An essay of not more than 2,000 words.

Indicative reading: Mills, A (2014) Health Care Systems in Low and Middle Income Countries, New England Journal of Medicine, 370 (6), 552-557; Crisp, N & Chen, L, (2014) Global Supply of Health Professionals, New England Journal of Medicine, 370 (10), 950-957; Hafner, T., & Shiffman, J (2013) The emergence of global attention to health systems strengthening, Health Policy and Planning, 28 (1), 41-50; Shkariskvili, G, Atun, R., Hsiao, W., Burgess, C., & Lansang, M (2010) Converging health system frameworks: towards a concepts-to-actions roadmap for health systems strengthening in low and middle income countries, Global Health Governance, 3(2); Ottersen, T, Evans, D., Mossialos, E., Rottingen J-A, (2017) Global Health Financing towards 2030 and beyond, Health Economics, Policy & Law, 12 (2); Balabanova, D., McKee, M., Mills, A., Walt, G., & Haines, A., (2010) What can global health institutions do to help strengthen health systems in low income countries? Health Research Policy and Systems, 8,(1), 22, Kieny, M., Evans, D., Schemts, G & Kadandale, S, (2014) Health system resilience: reflections on the Ebola crisis in West Africa, Bulletin of the World Health Organisation, 92(12) 850, de Savigny, D., & Adam T, (2009) System Thinking for Health Systems Strengthening, Geneva Alliance for Health Policy and Systems Research; Buse; K & Hawkes, S., (2015) Health in the Sustainable Development Goals: ready for a paradigm shift? Globalisation and Health, 11(1), 13. Pratt B & Hyder A (2015) Global Justice and Health Systems Research in Low and Middle Income Countries, Journal of Law, Medicine & Ethics, 43 (1), 143-161

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2000 words) in the LT.

HP404 Half Unit

Global Health Policy: Institutions, Actors and Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Clare Wenham COW 1.03

Availability: This course is compulsory on the MSc in Global Health Policy. This course is available on the MSc in Global Population Health, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit. This course is compulsory on the MSc Global Health Policy. This course is available on Msc International Health Policy, Msc International Health Policy (HE), Msc Health Policy Planning and

Financing and MSc in Health and International Development.

This course is available as an outside option to students on other programmes where regulations permit.

Course content: Globalization has not only impacted on the nature of emerging global health but the policy responses to these challenges. This module critically examines the transnational institutions and actors involved in global health policy and the interplay between them. The governance of global health issues has traditionally been carried out by states and various United Nations agencies (namely, the World Health Organisation), but given the transboundary nature of many global health issues, a diverse range of actors, including the private sector, civil society organizations and national governments, are now integrally involved. The funding of global health programmes and policies, for example, has shifted from primarily bi-/multilateral donors to include private and public sectors and philanthropists in a global health governance mosaic. The module will use a number of case studies to examine the organisation and role of global health institutions, the challenges and opportunities presented by these governance arrangements, and their (intended and unintended) impacts on global health policy and practice. In doing so, the module will draw on contributions from a range of social sciences including sociology, political science and health services research.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 25 hours during Michaelmas Term. Students will have access to lecture materials delivered as short online videos. Seminars will be discussion-based and take place in small groups each week.

There will be a departmental reading week in week 6 of term.

Formative coursework: One essay (1000 words) focusing on different approaches to framing global health

Indicative reading: Frenk, J., & Moon, S. (2013). Governance challenges in global health. New England Journal of Medicine, 368(10), 936-942. Taylor, S. (2018). 'Global health': meaning what?. BMJ Global Health, 3(2) e000843. Davies, S. (2010). Global politics of health. Polity. McInnes, C., & Lee, K. (2012). Global health and international relations. Polity.

Assessment: Essay (100%, 4000 words) in the MT.

One extended essay (4000 words) will be due at the end of MT.

Essay questions will be provided at the start of the course, or students are welcome to select an essay topic of their choice, with approval from the course convener.

HP405 Half Unit Not available in 2020/21

Social Determinants of Health

This information is for the 2020/21 session.

Teacher responsible: Dr Justin Parkhurst COW.3.08

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

This course is a listed option on MSc's in the department of Health Policy and for the MSc in Health and International Development. The course will be capped at 30 and priority may be given to students in the Department of Health Policy or related MSc degrees as needed.

Course content: The course introduces the social determinants of health from a global perspective. Content will draw on low, middle, and high income country examples, (although a majority of material will come from middle and high income cases). The course begins by exploring the shift in focus from individual to population health, the link to social determinants, and methodological challenges. It then goes into specific social determinants and issues such as poverty, education, gender and the built environment. Specific health and intersectional issues are then introduced, before final lectures that consider the politics

of policy responses dealing with social determinants. A set of 6 seminars compliment the lectures with the final seminar linked to assessment.

Teaching: 15 hours of lectures and 12 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

An outline or early draft of the term essay will be submitted in week 8 to allow feedback and guidance from teaching staff before final submission.

Indicative reading: Rose, Geoffrey. 2001. "Sick individuals and sick populations." *International journal of epidemiology* 30 (3):427-432. WHO Commission on the Social Determinants of Health. 2008. *Closing the gap in a generation: health equity through action on the social determinants of health. Final report of the Commission on Social Determinants of Health.* Geneva: World Health Organization. Birn, Anne-Emanuelle, Yogan Phillay, and Timothy H. Holtz. 2009. *Textbook of international health: global health in a dynamic world.* New York: Oxford University Press. Sallis, James F, Neville Owen, and Edwin B Fisher. 2008. "Ecological models of health behavior." In *Health behavior and health education: Theory, research, and practice*, edited by Karen Glanz, Barbara K. Rimmer and K. Viswanath, 465-486. San Francisco: John Wiley & Sons. Subramanian, S. V., Paolo Belli, and Ichiro Kawachi. "The macroeconomic determinants of health." *Annual review of public health* 23.1 (2002): 287-302.

Assessment: Essay (75%, 3500 words) in the ST.

In-class assessment (25%) in the LT.

25% of the grade will be based on small group presentations in the final seminars.

75% of the grade will be based on a term essay (3500 words) that requires them to address a key health concern facing a population in a specific country of interest from a social and political perspective. They will need to write a policy brief that reviews literature, considers policy responses in relation to critical conceptual approaches covered, and proposes potential approaches to the problem.

HP406 Half Unit Not available in 2020/21

Principles of Modern Epidemiology

This information is for the 2020/21 session.

Teacher responsible: Mr Allan Hackshaw

Availability: This course is available on the MSc in Global Health Policy and MSc in Global Population Health. This course is available with permission as an outside option to students on other programmes where regulations permit.

An optional course for students taking MSc Global Health and available to other students taking relevant MSc programmes, particularly Health, Population and Society and Health and Population Development

Course content: The course provides students with an understanding of key epidemiological concepts associated with describing disease/mortality or other health-related features of a population (such as causes of disease or early death), and evaluating ways to treat disease, or prevent disease or early death. This will include: (a) tools for descriptive epidemiology (incidence, prevalence and survival); (b) measures of association, using relative and absolute measures; and (c) confounding and bias. The course introduces the concepts associated with the design and analysis of research studies that are used to examine features of population health and burden of disease. It also introduces students to the principles of causality and risk factors. Students will cover the most common types of research studies used to evaluate human health (observational studies and clinical trials). The course includes fundamentals of data interpretation, including effect sizes, and data analysis (e.g. regression modelling). Teaching is structured in the form of lectures and seminars. Lectures introduce students to key epidemiological concepts and methods, and complemented by seminars. Most lectures

and seminars are based around specific published papers in epidemiology, used to illustrate the concepts. These articles would be sent to students in advance of each class, and students are expected to prepare a short review of the article, using an accompanying set of questions on the study design and interpretation.

Summative assessment is based on an examination to assess student's understanding of epidemiological concepts and their ability to interpret study results. Summative assessment also includes a research proposal in which students are expected to apply the basic principles of epidemiology in the context of a well-defined research question.

Teaching: 14 hours of lectures and 10 hours of seminars in the LT. 3 hours of help sessions in the ST.

Four 2-hour lectures, six 1-hour lectures, and 5 2-hour seminars in the LT. One 3-hour revision seminar in the ST.

Formative coursework: Students will be expected to produce 1 project in the LT.

Students will be expected to produce one project in the LT, based on designing a research study, using a topic chosen by the student. In week 6, students would submit a draft report (up to 2000 words) of their project so far (not assessed, but feedback provided), as formative coursework. After this, the report would be expanded and finalised (~3000 words). In the report, students are expected to: (i) identify an epidemiological research question of relevance to global health, with justification, (ii) provide a summary of the key literature, and identify gaps in knowledge, and (iii) describe an epidemiological study to address their research question, including the methods.

Indicative reading:

- A concise guide to observational studies in healthcare. Hackshaw A. Blackwells/BMJ Books (2015)
- A concise guide to clinical trials. Hackshaw A. Blackwells/BMJ Books (2009)
- Epidemiology: an introduction. Rothman K. Oxford Univ Press (2002 or later)
- Epidemiological studies: a practical guide. Silman & Macfarlane. Cambridge Univ Press (2002 or later)

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Project (25%, 3000 words) in the LT.

An assessed research project paper of 3,000 words (25%) to be submitted at the end of the LT and a two-hour written examination in the ST (75%).

HP407 Half Unit

Evidence Review and Synthesis for Decision Making

This information is for the 2020/21 session.

Teacher responsible: Dr Huseyin Naci COW 3.01

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit. This course is relevant to all students with an interest in the health and social care interventions.

Course content: Evidence review and synthesis methods (such as systematic reviews and meta-analyses) are increasingly used to evaluate the relative benefits and harms of healthcare interventions. In situations where direct, head-to-head comparisons of interventions do not exist, researchers also increasingly perform indirect comparisons (e.g., network meta-analyses) of two or more interventions to address comparative effectiveness questions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need individuals

equipped with the methods of reviewing and synthesising the existing body of evidence by performing systematic reviews and meta-analyses.

This course will be focused on the principles of reviewing and synthesising the existing body of literature. The course will have three components. The first will provide the rationale for adopting a systematic approach for evidence review and synthesis. It will equip students with the methods to undertake risk of bias assessments of randomised and non-randomised studies. The second component will focus on the quantitative synthesis of multiple studies in meta-analysis. The third component will discuss the opportunities and challenges of using evidence for decision-making.

The intended learning outcomes of this course will be the following:

- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual studies and collections of studies
- Critically evaluate the quality of randomised and non-randomised studies in oral and written form
- Assess heterogeneity in a collection of studies
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 25 hours during Michaelmas Term. Students will have access to lecture materials delivered as short online videos. Students will also work in small groups to complete weekly self-directed learning activities and meet with seminar leads for weekly feedback on their progress. An online computer workshop will be held to introduce students to systematic review and meta analysis software. There will be a departmental reading week in week 6 of term.

Formative coursework:

- Systematic review and meta-analysis protocol (submitted individually) - feedback provided by course instructor

Indicative reading: Cochrane Handbook for Systematic Reviews of Interventions (version 5.1.0, updated March 2011). Institute of Medicine. Finding what works in health care: standards for systematic reviews. 23 March 2011. Sutton AJ et al. Methods for Meta-analysis in Medical Research. Wiley, Chichester, UK, 2000. Cook DJ. Systematic reviews: synthesis of best evidence for clinical decisions. *Annals of internal medicine* 1997;126(5):376–80. Higgins, Julian PT, et al. The Cochrane Collaboration's tool for assessing risk of bias in randomised trials. *Bmj* 343 (2011): d5928.

Assessment: Project (100%, 3000 words) in the LT. Systematic review and meta-analysis report resembling an original article submission to a peer-reviewed journal (100%). Students will develop their meta-analysis project in a group and individually write up as their summative assessment.

HP409

Dissertation for MSc Health Policy, Planning and Financing

This information is for the 2020/21 session.

Teacher responsible: Currently Dr. J Parkhurst and Dr. M Bhatia (LSE) and Dr H. Walls (LSHTM) as Programme Directors though the Programme Directorship sometimes varies from year to year.

Availability: This course is compulsory on the MSc in Health Policy, Planning and Financing. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The aim of the course is to provide core information to students on dissertation-writing as well as to address queries students may have in relation to their dissertation topic, the methodology used, the likelihood of ethical approval, and data acquisition, among others.

The dissertation could be on any topic in the field of health policy, planning and/or financing. The main body of the dissertation should include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

Teaching: Teaching comprises two 2-hour seminars, one in the LT and one in the ST. It may be merged with other MSc students in the Department when covering overlapping issues. Finally, there is individual supervision for students on the dissertation.

Formative coursework: Students will be required to write a summary of the proposed dissertation, outlining the title, background to the topic, methods to be employed, and likely expected results.

Assessment: Dissertation (100%, 10000 words).

HP412 Half Unit

Global Health Security

This information is for the 2020/21 session.

Teacher responsible: Dr Clare Wenham COW 1.03

Availability: This course is compulsory on the MSc in Global Health Policy. This course is available on the MSc in Global Politics, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in International Health Policy, MSc in International Health Policy (Health Economics) and MSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Global health security has become a dominant paradigm in global health. Recent outbreaks of COVID-19, Ebola, Zika and pandemic influenza have heightened the global sense of vulnerability to the spread of infectious disease, and as a consequence global health policy is now complete with references to such health emergencies. These threats are even listed on national security strategies of many governments, and as such we see the ever increasing link between security and health across policy areas and levels. As we have all witnessed, COVID-19 has affected every part of the world, and every part of socio-economic life as we know it. Thus, we must understand how this has happened, and what we can do to prevent the next outbreak, and mitigate against future downstream effects of pandemics. This course interrogates this health-security nexus. It considers different conceptual understandings of security including global health security, national security, biosecurity and human security and considers these in multiple health contexts. These empirical explorations include COVID-19, Ebola, Zika, Anti-microbial resistance (AMR) and conflict and health. Yet, this course also asks students to consider the assumptions inherent to the security discourse, and the challenges these has on global health policymaking. Should the global health community be championing global health security, or has the terminology run its course.

To examine these concepts, empirics and broader political questions, this module will draw on contributions from international relations, political science, law, epidemiology and public health research.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 20 hours during Lent Term. Seminars will be led by a small group of students who will present the key discussion points to their colleagues. Small group work will be undertaken in the seminars to allow for more in-depth discussion and class debate. Additional seminar activities will provide students with real-life scenarios of global health security crises. Activities will aim to bring to life the theories, challenges and politics discussed during the course.

There will be a departmental reading week in week 6 of term.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will submit a short 1000 word essay (on the topic that they are writing on for the summative) during the teaching term. These will be graded and feedback given to students. This allows students to get valuable experience of writing critical essays have they not before in previous modules or degrees, and the expectations of the summative assessment. For example, if a student's formative work flagged particular concerns this could be addressed ahead of the summative submission.

Assessment: Essay (75%, 3500 words) and blog post (25%) in the LT.

1 x 3500 word essay – 75% of grade

Students will be asked to pick one essay question. They will be given the option to choose their own essay topic (after discussion with their seminar leader) or to select from a provided list of questions. The questions will be broad, allowing for student individuality to come across in their answers.

1 x Blog post – 25% of grade

Students will be assessed on their reflections of the course and any simulation/role play activity undertaken

HP420 Half Unit Health Economics

This information is for the 2020/21 session.

Teacher responsible: Prof Andrew Street COW 1.02

Availability: This course is compulsory on the MSc in International Health Policy. This course is available on the MSc in Health Policy, Planning and Financing and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit. In allocating places in this course, students enrolled in the MSc in International Health Policy and MSc in International Health Policy (Health Economics) have priority.

Course content: This course develops basic economic concepts as they are applied to the health sector. We shall discuss economics issues at system-level, including options for financing health care, predicting future expenditure, and assessing the degree of health equity and equality. We shall consider demand for health care and for health insurance, discussing matters such as moral hazard, adverse selection and risky health behaviours. Then we shall turn to the supply-side of health care provision,

considering the agency relationship between patients and physicians, the competitiveness of health care markets, the geographical configuration of health care services, and methods for paying health care providers. The course is designed to provide an intuitive understanding of a wide range of economic concepts, illustrated by practical examples.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 33 hours during Michaelmas Term. Students will have access to lecture material delivered as short online videos. Synchronous workshops will be held throughout the term to enable students to work through key problem sets. Students will also take part in small group seminars. There will be a departmental reading week in week 6 of term.

Formative coursework: Mock exam in the MT.

Indicative reading: The course draws from a variety of textbooks and articles, with a thorough reading list provided prior to the lectures. The course makes repeated use of the following textbook: J Bhattacharya, T Hyde & P Tu, *Health Economics*, Palgrave Macmillan, 2014.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

HP421 Half Unit Not available in 2020/21 Economic Analysis for Health Policy in Low- and Middle-Income Countries

This information is for the 2020/21 session.

Teacher responsible: Dr Mylene Lagarde COW.3.02

Availability: This course is compulsory on the MSc in Global Health Policy. This course is available on the MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The aim of the course is to provide students with some key analytical methods and concepts used by economists to study health care policies in low- and middle-income countries. The course takes a micro-economic perspective, in that it will study how individuals involved in health care systems (patients, providers, insurers) make decisions which affect the utilisation and delivery of health care services.

The course will present key theoretical concepts and use empirical evidence particularly relevant for policy questions in low- and middle-income settings. The course will be applied in nature, as students will learn through case studies which will expose to different types of data and evidence to analyse decisions made by individuals and then articulate recommendations for health policy. By the end of this course, students will be able to:

- define fundamental principles and concepts of health economics relevant to health policy challenges in low- and middle-income countries
- understand the economic models of decisions made by individuals on the demand- and supply-side of health care markets in low and middle-income countries;
- apply economic reasoning and models to identify problems and to recommend relevant health care policies;
- refer to seminal literature and evidence in the health economics and health policy fields in low- and middle-income countries;
- be able to interpret simple results from empirical economic studies, and formulate policy recommendations.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 3 hours of help sessions in the ST. Ten 1.5 hour lectures and nine 1.5 hour seminars, plus a three-hour revision seminar in the ST.

Formative coursework: Coursework assessed throughout the LT

Indicative reading: The course draws from a variety of textbooks and articles, providing essential references to understand the theoretical concepts and read key empirical studies. A complete reading list is provided at the start of the term.

The following papers are a selection of readings used in the course:

- Dupas P (2011) "Health Behavior in Developing Countries" Annual Review of Economics, Vol. 3
- Lepine, A., M. Lagarde and A. Le Nestour (2018). "How effective and fair is user fee removal? Evidence from Zambia using a pooled synthetic control." Health Economics 27(3): 493-508.

- Björkman Nyqvist, M. and S. Jayachandran (2017). "Mothers Care More, but Fathers Decide: Educating Parents about Child Health in Uganda." American Economic Review 107(5): 496-500.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

HP422 Half Unit Health Care Economic Evaluation

This information is for the 2020/21 session.

Teacher responsible: Dr Ranjeeta Thomas COW 2.07

Availability: This course is compulsory on the MSc in International Health Policy (Health Economics). This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing and MSc in International Health Policy. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Resource allocation is at the heart of decision-making in the health care sector. Economic evaluation is an approach used to support decision-makers in allocating resources by providing tools to compare the costs and benefits associated with multiple alternative scenarios or interventions.

This course will enable students to understand and apply the analytic methods used in the economic evaluation of health interventions. By the end of the course, students are expected to:

- Explain the welfare economic principles underlying health-care economic evaluations
- Identify the different approaches to economic evaluations (cost-effectiveness, cost-benefit, cost-utility etc)
- Measure and analyse costs and effects of health care

interventions

- Construct a decision-analytic model to compare the costs and benefits of different interventions
- Apply statistical methods to deal with uncertainty in economic evaluations
- Evaluate how to make decisions under-uncertainty in health-care economic evaluations

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 26 hours during Michaelmas Term. Students will have access to lecture material delivered as short online videos. Students will attend seminars where they will work together in small groups on structured learning activities set by the course leads.

There will be a departmental reading week in week 6 of term.

Formative coursework: A piece of formative coursework will be set in the middle of the term, and feedback provided to students.

Indicative reading: The following are basic readings for the course: Drummond MF, Sculpher MJ, Claxton K, Stoddart GL, Torrance GW (2015). Methods for the Economic Evaluation of Health Care Programmes. Fourth edition: Oxford University Press, Oxford. Gray A, Clarke P, Wolstenholme J, Wordsworth S (2011) Applied Methods of Cost-Effectiveness Analysis in Health Care, Oxford University Press, Oxford.

More technical and advanced textbooks, especially for statistical analysis.

Briggs A, Sculpher M, Claxton K (2006). Decision Modelling for Health Economic Evaluation. Oxford University Press, Oxford.

Supplementary Reading List

This is made available on Moodle along with all other course materials, and includes references to specialised texts and articles on each subject covered within the course.

Assessment: Project (100%, 3000 words) in the LT.

Assessment is through a project that students will undertake in small groups and write up individually (3,000 word paper), to be submitted at the end of the course.

HP423 Half Unit Advanced Health Economics

This information is for the 2020/21 session.

Teacher responsible: Prof Alistair McGuire COW 2.02

Availability: This course is compulsory on the MSc in International Health Policy (Health Economics). This course is available on the MSc in Health Policy, Planning and Financing and MSc in International Health Policy. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Health Economics (HP420).

Alternative introductory economics courses are acceptable.

Course content: The course will cover: international comparisons of health care expenditure, individual health-seeking behaviour, health care insurance, contract theory applied to the health care sector (including principal-agent theory and incentive payment mechanisms), and equity in health care.

Students may find material from the half unit HP426 Applied Health Econometrics, to be beneficial to studying this course. See the HP426 course guide for further detail.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 25 hours during Lent Term. Students will have access to lectures material either delivered in person or as short online videos. Seminars will take place in small groups with students presenting assigned topics each week.

There will be a departmental reading week in week 6 of term.

Formative coursework: Students will give a presentation in seminars and receive feedback from seminar leads

Indicative reading: Culyer, A.J., and Newhouse, J.P., (eds.), 2001, Handbook of Health Economics Volumes 1A & 1B, (North-Holland, Amsterdam); Zweifel, P. and Breyer, F., 1997, Health Economics,

(OUP, Oxford).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

HP424 Half Unit

Pharmaceutical Economics and Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Panagiotis Kanavos COW 1.05

Availability: This course is compulsory on the MSc in International Health Policy. This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to introduce students to the economics of pharmaceutical markets and related policies that affect national and international markets broadly. The course will - Provide students with an understanding of basic features of pharmaceutical markets, how pharmaceutical markets work and how competition manifests itself in different parts of pharmaceutical markets.

- Illustrate to students how the pharmaceutical market is linked to the health care market, why it is often the focus of much regulation, and to help students understand the multidimensional goals of pharmaceutical policies.

- Introduce students to the economic and policy problems encountered in managing pharmaceutical markets and how to evaluate the impact of alternative policy approaches. The course will also give students some experience in critically evaluating the impact of policy on market outcomes.

- Facilitate consideration of various country-specific political, cultural and economic factors that may drive governments' approaches to pharmaceutical regulation. In this context, this course will help students consider the extent to which policies may be transferable.

- Enable students to analyse pharmaceutical markets from the perspectives of several main actors: governments, third party payers, the pharmaceutical industry, doctors, patients, pharmacists and wholesalers. Literature from Health Economics, Industrial Organisation and Health Policy will be incorporated into lectures, discussions and seminars.

- Introduce students to the economics of pricing and reimbursing pharmaceutical products, to explore different models of pricing and reimbursing medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing, among others.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum of 24 hours during Lent Term. Students will have access to lecture material delivered either in person or as short online videos. Seminars will take place in small groups and ahead of the seminars students will work on structured learning activities set by the course leads.

There will be a departmental reading week in week 6 of term.

Formative coursework: A formative essay under exam conditions (1 question in 1 hour) will be a requirement and is to be submitted immediately after the revision session.

Indicative reading: E Mossialos, M Mrazek & T Walley (eds), *Regulating Pharmaceuticals in Europe. Striving for Efficiency, Equity and Quality*, Buckingham, Open University Press (2004); S O Schweitzer, *Pharmaceutical Economics and Policy*, Oxford University Press (2006); W S Comanor, 'The Political Economy of the Pharmaceutical Industry', *Journal of Economic Literature*, XXIV (September): 1178-1217 (1986); F M Scherer 'The Pharmaceutical Industry', Chapter 25, in: A J Culyer & J P Newhouse (Eds), *Handbook of Health Economics*, Vol 1, Amsterdam, Oxford, Elsevier, 2000.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

HP425 Half Unit

Statistical Methods in Health Care Economic Evaluation

This information is for the 2020/21 session.

Teacher responsible: Prof Alistair McGuire COW 2.02

Availability: This course is compulsory on the MSc in International Health Policy (Health Economics). This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing and MSc in International Health Policy. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: This course assumes knowledge of elementary mathematics and statistics. Students who wish to take HP425, but who have not taken an introductory university course in statistics or econometrics, may wish to consider auditing MY451 (Introduction to Quantitative Analysis) in Michaelmas Term in order to prepare themselves for this course. Students who are unsure whether they have the requisite background are encouraged to approach the Lecturer before the start of Lent Term.

This course is envisaged to be complementary to HP422 (Cost-Effectiveness Analysis in Health Care), which is offered in Michaelmas Term.

Course content: This course develops the statistical and modelling techniques necessary to apply economic evaluation to the health care sector. Introduction to random variables and probability distribution, linear regression analysis, logistic regression analysis, survival analysis for health outcomes, survival analysis for treatment costs, parametric and non-parametric approaches for missing data, economic evaluation and clinical trials. Estimation of confidence intervals for cost-effectiveness ratios. Transformation of ratios - net benefit approach. Presentation of results, acceptability curves.

This is the same course as HP4B5E Statistical Methods in Health Care Economic Evaluation (modular), but it has different teaching and assessment arrangements.

Teaching: This course will be delivered through a combination of lectures and workshops totalling a minimum 30 hours during Lent Term. Students will have access to lecture material either delivered in person or as short online videos. Students will also take part in computer workshops to complete problem datasets and practice key skills from the course.

Formative coursework: 1000 word essay

Indicative reading: A full reading list is provided at the start of the course. The course makes use of selected parts of the following texts:

- M Drummond & A McGuire (eds), *Economic Evaluation in Health Care: Merging Theory with Practice*, OUP, 2001.
- D Machin, YB Cheung & MKB Parmar, *Survival analysis: a practical approach*, 2nd edn, Wiley, 2006.
- J Klein & M Moeschberger, *Survival Analysis: Techniques for Censored and Truncated Data*, 2nd edn, Springer, 2005.
- M Cleves, W Gould, R Gutierrez & Y Marchenko, *An Introduction to Survival Analysis Using Stata*, 3rd edn, Stata, 2010.
- M Drummond, M Schulpher, K Claxton, G Stoddart & G Torrance, *Methods for the Economic Evaluation of Health Care Programmes*, 4th edn, OUP, 2015.
- M Gold, J Siegel, L Russell & M Weinstein, *Cost-Effectiveness in Health and Medicine*, OUP, 1996.
- M Johannesson, *Theory and Methods of Economic Evaluation of Health Care*, Kluwer, 1996.
- P Johansson, *Evaluating Health Risks: An Economic Approach*, CUP, 1995.

Assessment: Project (100%, 4000 words) in the ST.

HP426 Half Unit

Applied Health Econometrics

This information is for the 2020/21 session.

Teacher responsible: Dr Joan Costa-Font and Dr Laia Maynou-Pujolas

Availability: This course is compulsory on the MSc in International Health Policy (Health Economics). This course is available on the MSc in International Health Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Health Economics (HP420).

Alternatively, students should have completed another foundation course in microeconomics. If this was completed outside of the LSE at an undergraduate level, please contact Dr. Costa-Font for further advice.

Course content: Most research questions, in health economics require students to apply econometric techniques. This course will introduce these techniques and students exiting the course can expect to have acquired a competency in econometrics as it is applied to health economics. The seminars- which are lab based- will allow students to apply these methods to practical problems using Stata and interpret the results.

This content of this course may be useful to those considering the half unit HP423 Advanced Health Economics.

Teaching: This course will be delivered through a combination of lectures and workshops totalling a minimum 25 hours during Lent Term. Students will have access to lecture material delivered either in person or as short online videos. Students will also take part in computer workshops to complete problem datasets and practice key skills from the course.

There will be a departmental reading week in week 6 of term.

Formative coursework: One formative assessment will require the analysis of some data in STATA and the description of the results.

Indicative reading:

- Joshua David Angrist, Jorn-Steffen Pischke (2015) Mastering 'Metrics: The Path from Cause to Effect. (most relevant to the course)
- Jeffrey M. Wooldridge, (2009) Introductory econometrics: a modern approach, 4th edition.

100% One Research project (data analysis with STATA and write-up of 3,500 words) submitted in ST

HP428 Half Unit

Randomised evaluations of health programmes: from design to implementation

This information is for the 2020/21 session.

Teacher responsible: Dr Mylene Lagarde COW 3.02

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Randomized trials have long been used in the clinical world to test the efficacy of medical treatments. Increasingly, social scientists have used the same approach, randomly assigning groups to different interventions, in order to determine which policies are most likely to address the key behavioural problems faced by health systems, from inadequate provider performance to low adherence to treatment or risky health behaviours.

This course proposes a hands-on and intuitive approach to designing and conducting a randomised evaluation of a behavioural health programme. The aim of the course is to provide students with the skills required to design and implement a successful randomised evaluation. By the end of the course, students should be able to:

- Explain the reasons for undertaking randomised evaluations;
- Design and plan a randomised experiment to ensure it answers relevant questions, informed by a conceptual framework;
- Understand the technical aspects of the randomised evaluation, including be able to perform and understand simple sample size calculation;
- Explore potential threats to randomisation, and implement strategies to mitigate them;
- Determine how to best measure the outcomes of interest, including reflecting on the accuracy of survey instruments;
- Understand the best practices in how to conduct and manage fieldwork, and follow ethical principles to conducting research.
- Understand the best practices to analyse data from different types of randomised evaluations.

Seminars will be designed to encourage students to critically engage with the topics and apply the technical skills taught in lectures. Each seminar will be closely aligned with the lecture content to give students the opportunity to apply the new knowledge. Case studies will be chosen from various cultural backgrounds, to allow the presentation of a diverse range of settings and issues. Throughout the courses, but more extensively in the second half of the term, seminars will be dedicated to discussing issues and problems raised in lectures in relation to the project chosen by students in their group for the research protocol.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum of 20 hours during Lent Term. Students will have access to lecture material delivered either in person or as short online videos. Seminars will take place in small groups and consist of a mix of case studies and discussions/presentations of the students' own work. Ahead of the seminars students will work in small groups on structured learning

activities set by the course lead. Each seminar will also be a forum for discussing, presenting and receiving feedback on students' research protocols.

There will be a departmental reading week in week 6 of term.

Formative coursework: A draft protocol. Students will be asked to submit a short 1,500 word draft protocol by week 5. While some aspects of their work may still be work in progress (e.g. using bullet points), students will be expected to write up the start of their protocol in a detailed way. Detailed feedback will be given to each student.

Indicative reading: The main textbook that will be used throughout the course is:

- Glennerster, R., & Takavarasha, K. (2013). *Running Randomized Evaluations: a Practical Guide*. Princeton University Press.

Other useful resources include:

- Gerber, A. S., & Green, D. P. (2012). *Field Experiments: Design, Analysis and Interpretation*. New York, NY: Norton.
- Duflo, Esther, et al. (2006) *Using Randomization in Development Economics Research: A Toolkit*.
- White, Howard (2009) 'Theory-based impact evaluation: principles and practice', *Journal of Development Effectiveness* 1(3)
- Drost, E.A. (2011) *Validity and Reliability in Social Science Research*. *Education Research and Perspectives*, 38, 105- 123
- Olken, B. A. (2015). "Promises and Perils of Pre-analysis Plans." *Journal of Economic Perspectives* 29(3): 61–80.
- Rachel Glennerster and Shawn Powers *Balancing Risk and Benefit: Ethical Tradeoffs in Running Randomized Evaluations*
- Dupas, P., & Miguel, E. (2017). *Impacts and Determinants of Health Levels in Low-Income Countries*. In E. Duflo & A. Banerjee (Eds.), *Handbook of Field Experiments*: North Holland.

Other general interest books that discuss randomised evaluations (applications, challenges) include:

- Halpern, D. (2016). *Inside the Nudge Unit*. London, Penguin Press.
- Leigh, A. (2018). *Randomistas: How Radical Researchers Are Changing Our World*, Yale University Press.

Assessment: Research proposal (100%) in the LT.

The objective of the research protocol (4,000 words max) will be to plan the randomised evaluation of a particular health programme. Students will be asked to choose an intervention to address a particular behavioural problem from a proposed list (e.g. increasing health insurance uptake, improving doctor performance or quality of care; reducing risky health behaviours; increasing patient adherence to treatment etc.). Students will also be given the option to choose their own topic (pending agreement by their seminar leader).

HP429 Half Unit

Behavioural Incentive Design in Health and Health Care

This information is for the 2020/21 session.

Teacher responsible: Dr Joan Costa-Font COW 1.06

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

Access to the course will be given in priority to students from the Health Department.

Course content: The course covers the role of social and monetary incentives in modifying related health behaviour, and especially prevention and health care use. It will primarily draw on theoretical frameworks from several social sciences including applied microeconomics and behavioural economics, psychology, and sociology to provide an integrated framework about how to think about incentives in health and health care. The course will extend health economics teaching to cover quasi-rational behaviour and behavioural economics issues, and it will primarily focus on non-experimental evidence, although it will sometimes draw from

policy and quasi-experiments. Its main purpose will be to discuss key theoretical and empirical background to guide the design of health and health care policies.

The course will focus on the following issues: Quasi-rational actor and motivation. Risk-benefit decision-making framework. Monetary and non monetary incentives. Esteem, Stigma. Obesity and payments. Monetary Incentives, co-payment design, Social Incentives. Reference Points. Risk preferences and perceptions. Locus of Control and Health and Health Care Behaviour. Anchoring and social cues. Taxes and Health: the role of Sin Taxes. Subsidies and Health: the role of conditional cash transfers. Myopia and Insurance Purchase: the case of long-term care insurance. Defaults and Presumed Consent. Motivation Crowding-Out and organ Donation. Information provision: risk information campaigns on food labelling, GM food. Stigma and Esteem: Smoking, Obesity. Cultural economics of health and health care: the role of traditional medicines. Body Self-Identity and Anorexia. Sleep and working time trade-off. Media, narratives and health-related behaviour. Culture, social norms: use of traditional medicine. Identity and blood donation, Food disorders. Health Inequality Aversion and Attitudes to Health Care. Behavioural incentives private and public health insurance design.

Teaching: This course will be delivered through a combination of lectures, seminars and workshops totalling a minimum 25 hours during Lent Term. Students will have access to lecture material either delivered in person or as short online videos. Students will take part in seminars presenting key readings and leading discussion. Students will work in small groups in workshops to develop skills in specific health policy problems and prepare their project to be presented to the entire class and submitted as a course assessment.

There will be a departmental reading week in week 6 of term.

Formative coursework: Students will submit slides of a presentation based on their group project and complete in-class quizzes

Indicative reading: Hanoch, Y A. Barnes and T Rice (2017) *Behavioral Economics and Healthy Behaviors: Key Concepts and Current Research*. Routledge.

Assessment: Essay (100%, 3000 words) in the ST.

The assessment will be an individual essay based on group project work.

HP431 Half Unit

Dissertation in Health Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Justin Parkhurst COW 3.08

Availability: This course is compulsory on the MSc in Global Health Policy, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is not available as an outside option.

Course content: The dissertation could be on any topic relevant to topics studied in the student MSc. It should attempt to integrate approaches and knowledge learned across courses and present results to address a health policy issue or a problem identified through the use of either primary or secondary data. It must demonstrate adequate knowledge of relevant theoretical and empirical literature in the field. In addition, careful analysis of the policy implications and formulation of policy recommendations is essential. The main body of the dissertation should, in principle, include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

Teaching: 6 hours of workshops in the LT.

These will be complemented by sessions of individual supervision. The course comprising a total of 3 2-hour lectures that will focus on issues pertaining to the dissertation (topic selection, structure, methods, result reporting, ethics approval), as well as general guidance on potential methodological approaches. The course will serve as a means to assist students with the preparation and

finalisation of their dissertation proposals. In this context, students will also receive feedback and assistance from their supervisors, with whom they will need to meet separately.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT and ST.

Indicative reading: Dunleavy, P. (1986) *Studying for a Degree in the Social Sciences*, Macmillan. (See Chapter 5: Writing a Dissertation). Denscombe, M. (2007) *The Good Research Guide: for small-scale social research projects*. Maidenhead: Open University Press. H61 D41. Dunleavy, P. (2003) *Authoring a PhD: how to plan, draft, write and finish a doctoral thesis or dissertation*. Basingstoke: Palgrave-Macmillan. LB2369 D92. Grix, J. (2004) *The Foundations of Research*. Houndmills : Palgrave Macmillan LB2369 G87. Rudestam, K. and Newton, R. (2001) *Surviving Your Dissertation: a comprehensive guide to content and process*. London: Sage. LB2369 R91

Assessment: Dissertation (100%, 6000 words).

HP432 Half Unit Not available in 2020/21 Mental health policy

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Knapp

Availability: This course is available on the MSc in Global Health Policy, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

The proposed course should appeal to students interested in the challenges of, and policy responses to mental illness across a wide range of societies and economies.

Priority will be given to students from the Health Policy Department.

Pre-requisites: Students are required to have some knowledge of health systems or mental health issues.

Course content: The course will consider how public policy can be shaped to address the personal, social and economic challenges posed by mental illnesses, across the life-course. Mental health will be considered in various contexts: high-, medium- and low-income settings. An important emphasis will be on the global nature of the challenges, and the need to find responses that have relevance across different societies.

The strong associations with disadvantage will be a theme running through the course, linked to social determinants of health. Key areas of policy-making will be covered: e.g. evaluating effectiveness, cost-effectiveness and viability of treatments, and social impacts of prevention and interventions in different contexts and life-stages.

Students will discuss issues and strategies on how public policy (not just health policy) can play crucial roles in prevention and risk-reduction, access to and funding of treatments, recovery and re-integration, social and economic inclusion. In addition to coursework, students will have the opportunity, if they wish, to link with an ongoing mental health-related research project in the Department of Health Policy. (This will not be compulsory, and students who do not make such links will not be disadvantaged.) Students may wish to use this as a platform for their group-based summative assessment (see below).

Course outline (by week)

1. What is mental illness? Cultural, clinical and other interpretations and definitions; prevalence; incidence; disability; consequences across the life-course for individuals, families, societies (including subgroups with different risks, such as migrants, LGBTQ+, those experiencing natural or other disasters) and economies (broad introduction); links to broader concepts of wellbeing.
2. Responses? History of responses to mental illness (across a range of sectors); stigma; discrimination; help-seeking and treatment; institutionalisation; bi-directional implications (e.g. links to economic disadvantage, social marginalisation, crime, physical

health, mental health comorbidities). The survival movement; interpretations of recovery.

3. Mental health in low- and middle-income settings: particular challenges in those contexts, although these issues will feature in all later topics too.

4. Perinatal mental health: meaning; risk and protective factors; interventions; policy challenges and responses.

5. Child and adolescent mental wellbeing: meaning; risk and protective factors; interventions; policy challenges and responses.

6. Adult mental health (including addictions and workplace issues): meaning; risk and protective factors; interventions; policy challenges and responses.

7. Old age mental health (especially dementia): meaning; risk and protective factors; interventions; policy challenges and responses.

8. Financing responses to mental illness, including issues of parity

9. Making mental health policy and legislation: contributions from a policy-maker and someone with lived experience of mental illness.

10. Enduring lessons for mental health policy: bringing the strands together.

Teaching: 10 hours of lectures, 10 hours of seminars and 2 hours of help sessions in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT (of up to 1500 words) during the course, which could be linked to the topic of their group-based project.

Indicative reading:

Assessment: Project (100%, 3000 words) in the ST.

HY400

Crisis Decision-Making in War and Peace 1914-2003

This information is for the 2020/21 session.

Teacher responsible: Prof David Stevenson SAR 3.11

Availability: This course is compulsory on the MSc in International Affairs (LSE and Peking University). This course is available on the MSc in History of International Relations, MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: The course is intended for students with or without a detailed knowledge of the international relations of the twentieth century. Students without a detailed knowledge are advised to

undertake preliminary background reading.

Course content: The history of international relations from the First World War to the Iraq War. Particular stress is placed upon key turning points and on crisis decision-making. Topics examined in this course include German decision-making in 1914; peacemaking, 1919; the Ruhr occupation crisis; Manchuria, Abyssinia and the crises of collective security; the Munich agreement; the Nazi-Soviet Pact and the outbreak of war in 1939; Hitler's decision to invade the Soviet Union; the outbreak of the Pacific War; the creation of the state of Israel, 1948-49; the Berlin Blockade; the outbreak and escalation of the Korean War; the Suez Crisis; the Cuban Missile Crisis; the US and Vietnam, 1961-65; the Arab-Israeli Wars of 1967 and 1973; German reunification and the collapse of the Soviet bloc; the origins of the Gulf War, 1990-91; the road to the 2003 Iraq War.

Teaching: Students will engage with seminar content in large and small group meetings. There is one reading week in the MT and one in the LT. Students will be expected to read widely in documentary and other primary sources, and to participate actively in the seminars, which will address the historiographical debates raised in the secondary literature on the topics covered.

Formative coursework: Students will write three essays, each of up to 3,000 words in length, drawing upon primary sources.

Indicative reading: Full bibliographies are provided in the seminars. Students may consult the following introductory accounts: W. R. Keylor, *The Twentieth-Century World: an International History*; A. Best, J. M. Hanhimäki, J. A. Maiolo, and K. E. Schulze, *International History of the Twentieth Century*; S. Marks, *The Ebbing of European Ascendancy: an International History of the World, 1914-1945*; Z. Steiner, *The Lights that Failed: European International History, 1919-1933*; Z. Steiner, *The Triumph of the Dark: European International History, 1919-1939*; R.W. Boyce and J. A. Maiolo (eds.), *The Origins of World War Two: The Debate Continues*; O. A. Westad, *Reviewing the Cold War: Approaches, Interpretation, Theory*; D. J. Reynolds, *One World Divisible: a Global History since 1945*; M. P. Leffler and O. A. Westad, eds, *The Cambridge History of the Cold War*.

Assessment: Take-home assessment (100%) in the ST.

HY411

European Integration in the Twentieth Century

This information is for the 2020/21 session.

Teacher responsible: Prof David Stevenson SAR 3.11 and Prof Nicholas Ludlow SAR 2.16

Availability: This course is available on the MSc in Comparative Politics, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A prior knowledge of 20th century European history will be an advantage. Students unfamiliar with the subject should do some preliminary reading. A reading knowledge of French and/or German will be useful but in no sense essential.

Course content: The antecedents and development of Western European integration from the First World War to the 1990s. European integration before 1914; German and Allied projects during the First World War; inter-war developments and the Briand Plan; the Nazi New 'Order'; Resistance and Allied planning during the Second World War; the impact of the Marshall Plan; Federalism and Christian Democracy; the Schuman Plan and the Coal and Steel Community; the European Defence Community project; the Treaties of Rome; the Common Agricultural Policy; the integration policies of the Six and Britain; de Gaulle and the Communities; enlargement; monetary integration; developments in the 1970s and

1980s; Treaty of Maastricht.

Teaching: Students will engage with lecture and seminar content in large and small group meetings. There will be a reading week in the Michaelmas and the Lent Terms.

Formative coursework: Three essays will be required in the course of the year. The essay in the LT will be an assessed piece of work counting towards the final assessment.

Indicative reading: Full bibliographies are provided. As introductory reading, students should consult: P M Stirk, *A History of European Integration since 1914* (London, 1996); D. Dinan, ed, *Origins and Evolution of the European Union* (Oxford, 2006); M. Gilbert, *European Integration: a Concise History* (Lanham, Md, 2012); J Gillingham, *Coal, Steel, and the Rebirth of Europe, 1945-55* (Cambridge, 1991); A S Milward, *The Reconstruction of Western Europe, 1945-51* (London, 1984); A S Milward, *The European Rescue of the Nation State* (London, 1992); N P Ludlow, *Dealing with Britain: the Six and the First UK Application to the EEC* (Cambridge, 1997); W I Hitchcock, *France Restored: Cold War Diplomacy and the Quest for Leadership in Europe, 1944-1954* (Chapel Hill, 1998); A Moravcsik, *The Choice for Europe: Social Purpose and State Power from Messina to Maastricht* (Cornell, 1998); N P Ludlow, *The European Community and the Crises of the 1960s* (London, 2006); W. Kaiser, *Christian Democracy and the Origins of the European Union* (London, 2008); W. Kaiser, B. Leucht and M. Rasmussen, *The History of the European Union: Origins of a Trans- and Supranational Polity 1950-72* (London, 2009); A C Knudsen, *Farmers on Welfare: The Making of Europe's Common Agricultural Policy* (Cornell, 2009).

Assessment: Essay (25%) in the LT.

Take-home assessment (75%) in the ST.

HY422

Presidents, Public Opinion, and Foreign Policy, from Roosevelt to Reagan, 1933-89

This information is for the 2020/21 session.

Teacher responsible: Prof Steven Casey SAR 2.10

Availability: This course is available on the MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Using a range of secondary sources, the course explores the dynamic interaction between presidents, public opinion, and foreign policymaking in order to test a range of common assumptions about the determinants of American foreign policy in the period from 1933 to 1989. The course explores the interaction between opinion and policy in three periods: First, the Roosevelt era, with emphasis on FDR's response to American isolationism, the media and public attitudes towards Nazi Germany and the Second World War, and the influence of public pressures upon US policy. Second, the period of consensus on the Cold War, examining how Americans viewed the Communist world before, during and after the Korean War, the influence of the atomic bomb upon popular thinking, the limits of dissent in the period of McCarthyism, and the impact of public opinion upon policy-making during the Berlin and Cuban crises. Third, the period when the Cold War consensus broke down, focusing not just on the opposition to the Vietnam war and the new cleavages that emerged within US society but also on the changing nature of the American media and the very different attempts made by Nixon, Carter and Reagan to respond to this new environment.

Teaching: 110-minute weekly seminars, on campus or online as circumstances dictate, with weekly activities determined by the teacher.

Students are expected to keep up with readings for the weekly meetings and to participate in the seminar discussions.

There will be a reading week in the Michaelmas and the Lent terms.

Formative coursework: Students are required to produce one 3,000 word essay in the MT.

Indicative reading: A full bibliography accompanies the course and the teacher will advise on reading. M Small, *Democracy and Diplomacy* (1996); ; S Casey, *When Soldiers Fall* (2014); S Casey, *Cautious Crusade* (2001); S Casey, *Selling the Korean War* (2008); D Foyle, *Counting the Public In* (1999); R Sobel, *The Impact of Public Opinion on US Foreign Policy since Vietnam* (2001) O R Holsti, *Public Opinion and American Foreign Policy* (1996).

Assessment: Essay (40%, 4000 words) in the LT.

Essay (60%, 6000 words) in the ST.

HY423

Empire, Colonialism and Globalisation

This information is for the 2020/21 session.

Teacher responsible: Dr Taylor C. Sherman SAR M.10

Availability: This course is compulsory on the MSc in Empires, Colonialism and Globalisation. This course is available on the MSc in Global Economic History (Erasmus Mundus), MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History and MSc in International and World History (LSE & Columbia). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: None.

Course content: This course covers the comparative history of empires from the fifteenth century to the present day. Students will study the Ottoman, Mughal, Qing, Spanish, British and American empires in depth. We explore different approaches to these empires, and the dynamics of their rise and fall. We also explore the extent to which the imperial past has helped shape the processes of globalisation in early modern, modern and contemporary times. A number of major themes are addressed, including: gender and Islam in the Ottoman Empire, cultural cosmopolitanism in the Mughal Empire, religious conversion in the Spanish Empire, governing through ethnicity in the Qing Empire; the history of race; the global system of African slavery; the environmental history of India under the British Empire, colonial Medicine in Africa, and settler colonialism in Australia. The course is structured so as to encourage general and comparative discussions rooted in specific case studies.

Teaching: Learning engagement includes seminars, recorded content, small group meetings and asynchronous Moodle posts. There will be a reading week in the Michaelmas and the Lent terms.

Formative coursework: Students are expected to submit 1 draft essay (1200 words) in the MT, and one essay (2500 words) in the MT

Indicative reading: A full reading list will be provided. For general surveys of the subject, students may consult: Jane Burbank & Frederick Cooper, *Empires in World History: Power and the Politics of Difference* (Princeton, NJ, 2010); Frederick Cooper, *Colonialism in Question: Theory, Knowledge and History* (Berkeley, 2005); David B. Abernethy, *The Dynamics of Global Dominance: European Overseas Empires, 1415-1980* (New Haven, CT, 2000); Susan E. Alcock, *Empires: Perspectives from Archaeology and History* (Cambridge, 2001); Christopher A. Bayly, *The Birth of the Modern World, 1780-1914: Global Connections and Comparisons* (Oxford, 2004); Alejandro Colás, *Empire* (Cambridge, 2007); John Darwin, *After Tamerlane: The Global History of Empire* (London, 2007); Michael W. Doyle, *Empires* (Ithaca, NY, 1986); Michael Hardt & Antonio Negri, *Empire* (Cambridge, MA, 2001); Stephen R. Howe, *Empire: A Very Short Introduction* (Oxford, 2002); Herfried Münkler, *Empires: The Logic of World Domination from Ancient Rome to the United States* (Cambridge, 2007); Jürgen Osterhammel, *Colonialism: A Theoretical Overview* (Princeton, NJ, 1997); Jürgen Osterhammel & Niels P. Peterson, *Globalization: A Short History*

(Princeton, NJ, 2005).

Assessment: Essay (45%, 5000 words) in the LT.

Essay (45%, 5000 words) in the ST.

Class participation (10%) in the MT and LT.

HY424

The Napoleonic Empire: The Making of Modern Europe

This information is for the 2020/21 session.

Teacher responsible: Dr Paul Keenan SAR.2.13

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International and Asian History and MSc in International and World History (LSE & Columbia). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The Napoleonic Empire was crucial in the formation of modern Europe. Much of Europe was dominated by the Napoleonic Empire and its impact was felt across the continent and in parts of the non-European world. Through an analysis of both those areas directly incorporated into the Napoleonic empire and of those that lay beyond it, this course will examine the extent of the direct and indirect influence of this era on the development of what we understand by a modern European society and a modern state system. The course analyses how this empire was created, as well as the states and societies that it forged. The varied and sometimes contradictory elements of this era will be analysed - from the impact of the growth of secularisation, constitutionalism and the codification of laws to the beginnings of Romanticism, manifestations of early nationalism and monarchical reaction after 1815. The course will also assess the significance of both the reality and the 'myth' of empire, in the assessment of contemporary observers and also in the later nineteenth and twentieth centuries. The course will cover the following topics: the origins of the Empire; changes in armies and warfare; analysis of the changing nature of the Napoleonic Empire from the core to the periphery; the impact of the Empire on countries that remained beyond it; Europe's relationship with the non-European world during this period; the diplomacy of war and the 'system' that emerged after 1815; the impact of the Napoleonic era on the modernisation of society, the economy, law and the state; early manifestations of nationalism in the Italian and German lands, Spain and Russia; reaction against the Napoleonic 'system' after 1815. The course will also assess the significance of both the reality and the 'myth' of Napoleon and his empire, for contemporary commentators and also in the later nineteenth and twentieth centuries.

Teaching: Learning engagement activities will include preparatory small group work, presentations, and live discussion.

There will be a reading week in the MT and the LT.

Formative coursework: Students will be expected to produce 1 essay in the MT, 1 essay in the LT and 1 essay in the ST.

The third essay will be a mock exam answer, which can be completed by students over the Easter break. It will be graded and students given written feedback in the first week of Summer Term.

Indicative reading: A detailed Reading List will be issued at the beginning of the course.

Useful introductory works include: G. Ellis, *Napoleon*; G. Ellis, *The Napoleonic Empire*; M. Broers, *Europe under Napoleon 1799-1815*; S. J. Woolf, *Napoleon's Integration of Europe*; P. Dwyer (ed), *Napoleon and Europe*; C. Esdaile, *Napoleon's Wars: An International History*; O. Connolly, *Napoleon's Satellite Kingdoms*; P. Geyl, *Napoleon, For and Against*.

Assessment: Essay (35%, 3500 words) in the LT.

Presentation (15%) in the MT and LT.

Take-home assessment (50%) in the ST.

HY429

Anglo-American Relations from World War to Cold War, 1939-91

This information is for the 2020/21 session.

Teacher responsible: Prof Nigel Ashton SAR M.07

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course analyses the changing nature of the Anglo-American "special" relationship from its creation against the backdrop of the Second World War in Europe through to the end of the Cold War. It will illuminate the foundations of the relationship in terms of culture and ideology, and also the threat posed by common enemies in the Second World War and Cold War. The competitive dimension of the Anglo-American relationship will also be highlighted as a means of explaining instances of discord such as the Suez Crisis of 1956.

The topics covered include: Anglo-American relations in historical perspective; the creation of the Anglo-American alliance, 1939-41; competitive co-operation in war strategy and politics, 1941-45; the American "Occupation" of Britain during the Second World War; the emergence of the Cold War in Europe, 1945-49; the Cold War in Asia, 1945-54; the Palestine question; the Suez Crisis, 1956; nuclear relations and the Skybolt Crisis; Kennedy, Macmillan and the Cuban Missile Crisis; Anglo-American relations and European integration, decolonisation and Anglo-American relations since 1945; the impact of the Vietnam War; the Cultural Cold War; intelligence co-operation; Anglo-American relations in the 1970s; Thatcher, Reagan and the Cold War in the 1980s; the Falklands War; the significance of personal relations at the top; retrospect and prospects for Anglo-American relations.

Teaching: 110-minute live session. Students will engage with seminar content in large and small group meetings. There will be one reading week in the MT and one in the LT.

Formative coursework: Three pieces of written work must be submitted by students taking this course. These consist of two essays of up to 3,000 words in length and one timed class essay.

Indicative reading: For an introduction to Anglo-American relations, students should consult the following texts: K. Burk, *Old World, New World: the Story of Britain and America* (2007); D Reynolds & D Dingley, *An Ocean Apart: the Relationship between Britain and America in the Twentieth Century* (1988); J Dumbrell, *'A Special Relationship': Anglo-American Relations from the Cold War to Iraq* (2006); C Bartlett, *The Special Relationship: A Political History of Anglo-American Relations Since 1945* (1992); W R Louis & H Bull (Eds), *The Special Relationship: Anglo-American Relations since 1945* (1984); D C Watt, *Succeeding John Bull: America in Britain's Place, 1900-75* (1984). A detailed reading list will be issued at the start of the course.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: International relations from the early 1980s to the late 1990s examining tensions, rivalries and linkages not merely between the Western and Communist blocs, but also within them, as well as studying the events reflecting the shift from the era of bipolarity to the post-Cold War world. The aim is to address from a historical perspective the diplomacy of the end of the East-West conflict, China's exit from the Cold War, German reunification, Soviet disintegration, Yugoslavia's bloody implosion, European integration, and NATO enlargement. The domestic bases of as well as the political relations between the leading figures (Gorbachev, Yeltsin, Reagan, Bush, Deng, Thatcher, Major, Mitterrand, Delors and Kohl) and respective government machineries will be covered. Major topics include Thatcherism; Reaganomics; Gorbachev's new thinking; the reunification of Germany; the collapse of the Soviet Union and its wider empire; the Kuwait crisis and Yugoslavian Wars; America's unipolar moment; the Single European Act, the Maastricht Treaty and the Euro; the security arrangements of Russia and NATO after 1991.

Teaching: Twenty 110-minute live seminars, on campus or on Zoom as circumstances dictate, with various weekly activities determined by the teacher and bilateral essay planning supervision. There will be a reading week in the MT and the LT.

Formative coursework: Students will be required to present one short class paper during the MT or the LT as well as to submit a practice essay (1,500 words) during the MT.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, as well as selected documents will be available at the beginning of the course on Moodle. Key books include: Kristina Spohr, *Post Wall, Post Square* (2019); Philip Zelikow & Condoleezza Rice, *To Build a Better World* (2019); Hal Brands, *The Unipolar Moment* (2016); Kristina Spohr and David Reynolds, eds, *Transcending the Cold War* (2016); Margaret Thatcher, *The Downing Street Years* (1993); EHH Green, *Thatcher* (2006); Julius W Friend, *The Long Presidency, France in the Mitterrand Years* (1998); George Bush & Brent Scowcroft, *A World Transformed* (1999); William Taubman, *Gorbachev* (2018); Misha Glenny, *The Balkans 1804-1999* (2012); Saki Dockrill, *The End of the Cold War Era* (2005); Kenneth Dyson and Kevin Featherstone, *The Road to Maastricht* (1999); Sean Kay, *NATO and the Future of European Security* (1998); Daniel S. Hamilton and Kristina Spohr, eds, *Open Door: NATO and Euro-Atlantic Security After the Cold War* (2019).

Assessment: Essay (40%, 4000 words) in the LT. Essay (60%, 5000 words) in the ST.

HY434

The Rise and Fall of Communism in Europe 1917-1990

This information is for the 2020/21 session.

Teacher responsible: Prof Anita Prazmowska SAR.M.09

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will examine the rise, survival and collapse of the Soviet Communist ideology and Communist regimes based in Russia and Eastern Europe during the period 1917-1990. The course will also deal with the struggle for Communist influence in Western Europe during the same period. The course will start with the study of the Russian revolution and the civil war to the establishment of the Stalinist regime in the

HY432

From Cold Warriors to Peacemakers: the End of the Cold War Era, 1979-1999

This information is for the 2020/21 session.

Teacher responsible: Professor Kristina Spohr, SAR 2.17

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of

Soviet Union. This will be followed by the study of the history of Soviet involvement in the Second World War and the extension of Soviet influence into Eastern Europe after the Second World War. An examination of the installation of Soviet style regimes in that region will be followed by the analysis of Soviet post-war objectives and Soviet objectives towards Germany. The death of Stalin and the Soviet responses to the Polish and Hungarian events in 1956 is linked to the study of Khrushchev and the Brezhnev eras. Additionally the course analyses the extension of Communist influence into Western Europe through the Comintern and the Cominform. The role of the Communist parties in French and Italian political life will be analysed. The course concludes with a consideration of détente, the Gorbachev period, and the collapse by the end of 1990 of the Soviet Union and other Communist regimes in Europe.

Teaching: Seminars will be on campus or via Zoom, as circumstances dictate. There will be a reading week in the Michaelmas and the Lent Terms.

Formative coursework: Students will be required to write one 3000 word essay in the MT. Submission week 7 of MT. A timed one hour essay is scheduled for the last week of the LT.

Indicative reading: A full bibliography will be provided at the beginning of the academic year. For an introduction, the following may be of assistance:

- F Claudin, The Communist Movement from Comintern to Cominform;
- R C Tucker (Ed), Stalinism: Essays in Historical Interpretation;
- C Kennedy-Pipe, Russia and the World, 1917-1990;
- P Kenz, A History of the Soviet Union from the Beginning to the End;
- C Read, The Making and Breaking of the Soviet System;
- V Mastny, Russia's Road to the Cold War. Diplomacy, Warfare and the Politics of Communism 1941-1945;
- F A Fejtó, A History of the People's Democracies: Eastern Europe since Stalin;
- A Heller & F Feher, From Yalta to Glasnost. The Dismantling of Stalin's Empire;
- G Stokes, The Walls Came Tumbling Down;
- Ronald Grigor Suny, The Soviet Experiment;
- Raymond Pearson, The Rise and Fall of Soviet Europe;
- Archie Brown, The rise and fall of Communism

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.
Essay (25%, 3000 words) in the LT Week 7.

Political Islam: From Ibn Taymiyya to ISIS

This information is for the 2020/21 session.

Teacher responsible: Dr Kirsten Schulze SAR 2.12

Availability: This course is available on the MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia), MSc in Social Anthropology (Religion in the Contemporary World) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course has six objectives: i. To examine the evolution of political Islam as a set of ideas. ii. To compare and contrast different models of Islamic State. iii. To explore the strategies used by Islamist movements to Islamise a state as well as state strategies to prevent this. iv. To explore the phenomena of transnational Islamism and international jihadism. v. To analyse and evaluate the relationship between Islam and the West. vi. To familiarise the student with some of the primary sources (in translation) and the historiographical controversies. This course looks at the evolution of Islamist philosophy and movements, focusing on ideas as well as intellectual, religious

and political leaders. The key areas covered are: Islamist thinkers - Ibn Taymiyya, Wahab, Rida, al-Banna, Qutb, Maududi, Khomeini, Faraj, Azzam and Zawaheri; Models of Islamic State - Iran, Pakistan, Afghanistan, and Malaysia; Islamist Movements – the Muslim Brotherhood, Islamic Jihad, Hizb'Allah, Hamas, the Islamic Salvation Front, and Boko Haram; transnational Islam and international jihadism - Al-Qaeda, Jamaah Islamiyah, and ISIS.

Teaching: This course has an online option in addition to being taught in the classroom.

There will be a reading week in the Michaelmas and the Lent Terms.

Formative coursework: One formative essay (3,500 words) in Michaelmas Term.

Assessment: Essay (35%, 3500 words) in the LT.

Essay (35%, 3500 words) in the ST.

Race, Violence and Colonial Rule in Africa

This information is for the 2020/21 session.

Teacher responsible: Dr Joanna Lewis SAR G.02

Availability: This course is available on the MSc in Conflict Studies, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International Migration and Public Policy, MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines the nature of colonial rule in Africa and its impact. It is focused upon the violence inherent in this encounter, its different forms and origins. It seeks to provide an explanation of the conflicts which erupted in Africa after 1989 by developing a historical perspective from the pre-colonial period onward. It is essentially a political history but includes cultural, social and economic aspects. The main thread running through the narrative is provided by the British empire in Africa but Belgian and Portuguese rule are also studied. Topics covered include pre-colonial African kingdoms, the 'Scramble for Africa'; white settler culture and the colonial state; the origins of apartheid South Africa; indirect rule and Chiefs;; the Mau Mau uprising in Kenya; the Congo crisis and the assassination of Patrice Lumumba; the rise and fall of 'white' Rhodesia; the wars of liberation in Mozambique; the end of the apartheid state; the genocide in Rwanda; the civil war in Sierra Leone; Mugabe and Zimbabwe; Somali warlordism and the 'collapsed state'.

Teaching: Learning engagement may include recorded content, Moodle work in groups, and live Zoom sessions; to be determined by the teacher. There will be a reading week in the Michaelmas and the Lent terms.

Formative coursework: Each student is required to write one formative essay of 4000 words in the Michaelmas Term.

Indicative reading: John Iliffe, Africans: The History of a Continent (CUP, 2017 edn); Cheikh Anta Diop, Precolonial. Black Africa: A Comparative Study of the Political and Social Systems of Europe and Black Africa, from Antiquity to the Formation of Modern States (1988); E Akyeampong et al, Africa's Development in Historical Perspective (Cambridge University Press, 2014); Mary Kingsley, Travels in West Africa (Penguin Classic, 2015); Petina Gappah, Out of the Darkness, Shining Light (2020); Thomas Pakenham, The Scramble for Africa (Abacus, 1992); Sylviane A. Diouf, Dreams of Africa in Alabama: The Slave Ship Clotilda and the Story of the Last Africans Brought to America (OUP, 2009); Adam Hirsch, King Leopold's Ghost (Pan Books, 2012 edn); F Furedi, The Silent War: Imperialism and the Changing Perception of Race (Pluto Press, 1998); M. Essay (60%, 6000 words) in the ST.

HY440

The Iranian Revolution

This information is for the 2020/21 session.

Teacher responsible: Dr Roham Alvandi SAR M.12

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Please note that students taking this course cannot take GV4E7 Islamic Republic of Iran: Society, Politics, the Greater Middle East (H).

Course content: This course examines the origins of the 1978-79 Iranian Revolution in the cultural, diplomatic, intellectual, political, and social history of Pahlavi Iran. The course begins with the emergence of the modern Iran during the Constitutional Revolution in the Qajar era, before turning to the Iranian encounter with decolonisation and the Cold War under the Pahlavi monarchy. We discuss Iran's experience of American modernisation and the crisis of legitimacy that engulfed the last Shah of Iran, Mohammad Reza Pahlavi, following the 1953 coup in Iran. The course locates the origins of the Iranian Revolution in the global contest between the Shah and the Iranian opposition throughout the 1960s and 1970s, as both the state and its opponents contested notions of modernity, Shi'a Islam, universal human rights, and Third Worldism. Students are asked to look in depth at the politics and ideology of the Pahlavi state and the opposition forces arrayed against the Shah, both in a national and global context. A particular emphasis of the course is on the international relations of Pahlavi Iran, particularly Iran's relations with the United States, and the transnational connections between the Iranian opposition and the anti-imperialist movements of the global 1960s and 1970s. The course culminates with the fall of the Pahlavi monarchy in 1979 and the subsequent creation of the Islamic Republic.

Teaching: Students will engage with class content in large and small group meetings. Learning engagement includes recorded content, live sessions, small group meetings, asynchronous moodle posts, and short presentations

There will be a reading week in the MT and the LT.

Formative coursework: Students are required to submit one 3,500-word essay in the MT.

Indicative reading: Abrahamian, Ervand, *The Iranian Mojahedin* (New Haven: Yale University Press, 1989). Janet Afary and Kevin B. Anderson, *Foucault and the Iranian Revolution: Gender and the Seductions of Islamism* (Chicago: The University Press of Chicago, 2005). Islam, State and Conflict in Southeast Asia

This information is for the 2020/21 session.

Teacher responsible: Dr Kirsten Schulze SAR 2.12

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course looks at Indonesia, Malaysia, and the Philippines from the colonial period to the present day. It focuses on Islam, state and conflict, starting with a broader discussion on the Islamisation of Southeast Asia and the entry of the European colonial powers. This is followed by a closer analysis of the relationship between Islam and the colonial state with seminars on the Dutch East Indies, 'British' Malaya, and the 'Spanish' Philippines. The course then looks at the rise of nationalism and the interplay between Islam and nationalism in the Muslim-majority states of Indonesia and Malaysia as well as the Muslim-minority state of the Philippines. In the second term this course studies the dynamics of Islam, the state, and local society in the Darul Islam rebellions (Indonesia), the Aceh conflict (Indonesia), the Mindanao conflict (the Philippines), the Poso and Ambon conflicts (Indonesia). It also looks at Islam and social conflict in Malaysia as well as the rise of regional and international jihadism with Jemaah Islamiyah and the Southeast Asian affiliates of ISIS.

Teaching: 20 two-hour seminars in the Michaelmas and the Lent Terms. This course will be taught online in 2020-21.

Formative coursework: One formative essay (3,500 words) in Michaelmas Term.

Assessment: Essay (35%, 3500 words) in the LT.

Essay (35%, 3500 words) in the ST.

HY444

The Cold War in Latin America

This information is for the 2020/21 session.

Teacher responsible: Dr Tanya Harmer SAR M.11

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History

of International Relations. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This seminar is designed to introduce students to new historical approaches to the Cold War in Latin America. It responds to new research and debates that have arisen in recent years regarding the meaning of the Cold War in a Latin American context. Students will examine the conflict's origins, who its protagonists were, the extent to which the superpowers were involved in it and its significance at a local, regional, and global level. The course places particular emphasis on the role of ideas and ideological struggles; the intersection between these ideas and the challenges of modernity and economic development; the causes of revolutionary and counter-revolutionary upheaval; the manifestations of violence and its effects; and the cultural Cold War. Students will be encouraged to explore the intra-regional and transnational dynamics of the Cold War in Latin America. They will study how events in one part of Latin America (for example, the overthrow of Jacobo Arbenz in Guatemala, the Cuban Revolution, the Brazilian and Chilean coups or the Central American crises in the 1980s) impacted upon other areas of region. The seminar will also devote time to looking at Latin America's experience of the Cold War from a global comparative perspective, particularly in contrast to other parts of the Third World. Although the seminar will mostly involve intensive reading and discussion of secondary sources, students will also be encouraged to reflect on new online archival material, published writings of principal thinkers and oral histories as a means of understanding key concepts and ideas.

Teaching: Students will engage with seminar content in a variety of ways, including live sessions, small group meetings, asynchronous moodle posts, and short presentations.

There will be a reading week in the Michaelmas and Lent terms.

Formative coursework: Students are required to write one 3,000 word formative essay in the Michaelmas Term and weekly discussion posts on Moodle.

Indicative reading: Gilbert Joseph and Daniela Spenser (eds.), *In From the Cold: Latin America's New Encounter with the Cold War* (2007); Greg Grandin and Gilbert Joseph (eds.), *A Century of Revolution: Insurgent and Counterinsurgent Violence During Latin America's Long Cold War* (2011); Michael Löwy (ed.), *Marxism in Latin America from 1909 to the Present: An Anthology* (1992); Michelle Chase, *Revolution within the Revolution: Women and Gender Politics in Cuba, 1952-1962* (2015); Benjamin Cowan, *Securing Sex: Morality and Repression in the Making of Cold War Brazil* (2016); Jean Franco, *The Decline and Fall of the Lettered City: Latin America in the Cold War* (2002); John Dinges, *The Condor Years: How Pinochet and His Allies Brought Terrorism to Three Continents* (New York: The New Press, 2004); Dirk Kruijt, *Guerrillas: War and Peace in Central America* (2008); Odd Arne Westad, *The Global Cold War: Third World Interventions and the Making of Our Times* (2005); Piero Gleijeses, *Conflicting Missions: Havana, Washington, and Africa, 1959-1976* (2003); Renata Keller, *Mexico's Cold War: Cuba, the United States, and the Legacy of the Mexican Revolution* (2015)

HY448 Not available in 2020/21

Living with the Bomb: An International History of Nuclear Weapons and the Arms Race from the Second World War to the end of the Cold War

This information is for the 2020/21 session.

Teacher responsible: Prof Matthew Jones SAR 3.09

Availability: This course is available on the MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE

& Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course takes as a prime focus the nuclear policies pursued by some of the major powers in the international system from the initial use of nuclear weapons against Japan in 1945 until the collapse of the Soviet Union in 1991. It introduces and explores three main themes: how the advent of nuclear weapons came to influence national strategies and crisis behaviour; why the development of nuclear weapons and their delivery systems fuelled an arms race that became one of the defining features of the Cold War; and how major powers have attempted to curb the testing of such weapons, the numbers contained in their arsenals, and their spread, through measures of arms control and non-proliferation. After examining the controversy over the atomic bombing of Japan in 1945, including the moral and ethical questions raised by nuclear use, the course includes consideration of some of the most important events and debates in post-war nuclear history – the course is not designed or intended to be a potted history of the Cold War, but rather looks at the influence and role of nuclear weapons (and the strategic thinking that accompanied their development). The movement to ban the testing of nuclear weapons is also covered, and attention given to the Chinese, British and French national nuclear programmes, as well as those of the Soviet Union and United States. The last portion of the course offers close analysis of the international negotiations over arms control and non-proliferation that have featured since the late 1960s. Throughout the course students will engage with contemporary writings and study primary source documents which will accompany each topic.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of help sessions in the ST.

Students will be expected to read essential primary and secondary material for each weekly class, to deliver presentations, and to participate in seminar discussions. Reading week will take place in week 6 of MT and LT.

Formative coursework: Students will be required to produce a 2,000 word formative essay during week 6 of the Michaelmas Term.

Indicative reading: Barton Bernstein (ed), *The Atomic Bomb: The Critical Issues* (1976). Richard K. Betts, *Nuclear Blackmail and Nuclear Balance* (1987). Kai Bird and Lawrence Lifschultz (eds), *Hiroshima's Shadow* (1998). McGeorge Bundy, *Danger and Survival: Choice About the Bomb in the First Fifty Years* (1988). Gerard DeGroot, *The Bomb: A History of Hell on Earth* (2004). Robert Divine, *Blowing on the Wind: The Nuclear Test Ban Debate, 1954-60* (1978). Hogan (ed), *Hiroshima in History and Memory* (Cambridge, 1996). David Holloway, *Stalin and the Bomb: The Soviet Union and Atomic Energy, 1939-1956* (London, 1994). John W. Lewis and Xue Litai, *China Builds the Bomb* (Stanford, 1988). Shane J. Maddock (ed), *The Nuclear Age* (Boston, 2001). Ernest R. May, John L. Gaddis, Philip H. Gordon and Jonathan Rosenberg (eds), *Cold War Statesmen Confront the Bomb: Nuclear Diplomacy since 1945* (1999). Eric Schlosser, *Command and Control* (London, 2013). Martin Sherwin, *A World Destroyed: Hiroshima and the Origins of the Arms Race* (original ed 1975, rev ed, 1987). Marc Trachtenberg, *History and Strategy* (1991).

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (25%, 3000 words) and essay (25%, 3000 words) in the LT. Assessment will be through two methods:

An unseen two hour examination paper, where students will have to write two essays drawn from a list of questions covered in the weekly classes (50%).

Two summative essays, each maximum 3,000 words, and taken from a set list of questions (25% for each essay).

HY458

LSE-Columbia University Double Degree Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Roham Alvandi SAR M.12

Dr Victoria Phillips

Availability: This course is compulsory on the MSc in International and World History (LSE & Columbia). This course is not available as an outside option.

Pre-requisites: During their first year at Columbia University, students will identify a topic for the dissertation and will submit a detailed dissertation proposal form to their LSE supervisor. They will also have undertaken substantial research over the course of the summer, have written a Dissertation Research Report before arriving at LSE and be in a position to talk in a detailed manner with regards to their dissertation. These and the completion of other formal requirements for year one of the Double Degree will be needed before students can proceed to the second year of the programme at LSE.

Course content: The individual dissertation will be supervised and assessed at LSE in accordance with the Department's MSc regulations. It will be in the form of a thesis of no more than 15,000 words. The dissertation workshop will complement this by offering sessions on methodological topics, and 7 sessions in which the students will each present updates on their research over the summer (MT) and a 3,000 word extract from their dissertations for group discussion, evaluation and analysis (LT).

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. Seminars will take place on campus or via Zoom, as circumstances dictate.

Formative coursework: Students will be requested to submit a Dissertation Research Report for discussion in the MT. Students are also required to circulate a 3000-word extract of their dissertation for discussion in the LT.

Indicative reading: A reading list will be provided at the start of the course but will include the following introductory surveys: Berger, Feldner and Passmore, *Writing History*; D Cannadine (Ed), *What is History now?*; L Jordanova, *History in Practice*; R Evans, *In Defence of History*; J Tosh, *The Pursuit of the Past*; M Bloch, *The Historian's Craft*; R G Collingwood, *The Idea of History*.

Assessment: Dissertation (100%, 15000 words) in the ST.

HY459 Not available in 2020/21

The Ottoman Empire and its Legacy, 1299-1950

This information is for the 2020/21 session.

Teacher responsible: Prof Marc Baer SAR 3.17

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The Ottoman Empire (1299-1923) was one of the longest lasting and most territorially extensive of all empires in history. Yet today few know about its nature, whether in Turkey or abroad. Who were the Ottomans? How did they run their empire? How did they manage diversity? How did their understanding and practice of Islam change over time? What was the secret of their success, and what ultimately caused the empire's fall? How do the Ottomans compare to other contemporary empires? What is the Ottoman legacy, especially in Turkey and Greece? What is the significance of the Ottoman Empire for world history?

In order to answer these questions we will study the following topics: three pillars of Ottoman inheritance: Byzantium, Islam, Mongols; the origins and rise of the Ottoman Empire; the conquest of Constantinople and its significance for world history; Ottoman

state institutions in the "classic age," gendering Ottoman History; the Ottomans and the Renaissance; the Ottomans and the Age of Exploration; the Ottoman-Safavid-Habsburg struggle for supremacy; Ottoman Jews: model minority?; sixteenth- and seventeenth-century transformations; pietism, conversion, and interreligious relations; reform and repression, 1839-1908; Orientalism and the Ottomans; the Young Turks and the revolution of 1908; World War I and the Armenian genocide; Atatürk: the "Father" of Modern Turkey and the new Turkish Republic; the Kurdish issue; the legacy of the Ottoman Empire in comparative perspective; and the Ottoman past in Turkish historical fiction.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in the Michaelmas and the Lent terms and a revision session in the Summer Term.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Weekly written and oral reading reports in MT and LT. Completion of these is mandatory, in order to facilitate good seminar discussions.

Indicative reading: Jane Burbank and Frederick Cooper, *Empires in World History: Power and the Politics of Difference* (Princeton 2010); Marshall Hodgson, *Rethinking World History: Essays on Europe, Islam, and World History* (Cambridge 1993); Caroline Finkel, *Osman's Dream: The History of the Ottoman Empire* (London 2005); Giancarlo Casale, *The Ottoman Age of Exploration* (Oxford 2011); Marc David Baer, *Honored by the Glory of Islam: Conversion and Conquest in Ottoman Europe* (Oxford 2008); Marc David Baer, *The Dönme: Jewish Converts, Muslim Revolutionaries, and Secular Turks* (Stanford 2010); Mark Mazower, *Salonica City of Ghosts: Christians, Muslims, and Jews 1430-1950* (Vintage 2006).

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (35%, 3000 words) in the LT.

Presentation (15%) in the MT and LT.

The participation grade will be based on the quality of the student's contribution to seminar discussions, and weekly posting of reading responses.

HY461

East Asia in the Age of Imperialism, 1839-1945

This information is for the 2020/21 session.

Teacher responsible: Dr Antony Best SAR 3.14

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no formal pre-requisites for this course, but some knowledge of the international history of East Asia would be useful.

Course content: The course looks at the origins and the political, strategic, economic and cultural consequences of the arrival of Western imperialism in East Asia. Subjects covered by the course include the clash between the Westphalian and Sinocentric international orders; the opium wars; the fall of the Tokugawa shogunate; the Japanese, Korean and Chinese responses to the arrival of the West; the history of Western imperialism in China and the rise of Chinese nationalism; the rise of Japanese imperialism; the Russo-Japanese War and its consequences; pan-Asianism, race and immigration; the Chinese revolution of 1911-12; the rise of intra-Asian trade; the effect of Wilsonian and communist internationalism; Japan's move towards aggressive expansion in the 1930s; the outbreak of the Pacific War.

Teaching: Students will engage with seminar content in group meetings, including short presentations.

This course has an online option in addition to being taught in the class room.

Students on this course will have a reading week in Week 6 of the MT and the LT.

Formative coursework: Students will be required to write three essays over the academic year. The second essay will be assessed and the third essay will be a mock examination.

Indicative reading: A detailed reading list will be issued at the start of the course, but the following provide a useful introduction to the themes, events and historiography:

- Shigeru Akita (ed.), *Gentlemanly Capitalism, Imperialism and Global History* (Basingstoke, 2002);
- Warren Cohen, (ed), *Pacific Passage: The Study of American-East Asian Relations on the Eve of the Twenty-First Century* (New York, 1996);
- Merle Goldman & Andrew Gordon, (ed.), *Historical Perspectives on Contemporary East Asia* (Cambridge, Mass. 2000);
- Akira Iriye, *Japan and the Wider World: From the Mid-Nineteenth Century to the Present* (London, 1997);
- Jonathan Spence, *The Search for Modern China* (1999);
- Chushichi Tsuzuki, *The Pursuit of Power in Modern Japan 1825-1995* (Oxford, 2000).

Assessment: Essay (25%, 3000 words) in the LT.

Take-home assessment (75%) in the ST.

HY463

The Origins of the Cold War, 1917-1962

This information is for the 2020/21 session.

Teacher responsible: Prof Vladislav Zubok SAR 3.13

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines the origins of the Cold War and the dynamics of its rise during the period from World War II to the Cuban Missile Crisis in 1962. It looks at long-term trends as well as specific events in order to elucidate how the Cold War originated and evolved. It deals with the Cold War as international history, covering the period from a wide variety of geographical and national angles: while some meetings necessarily centre on an individual state or a bilateral relationship, there will be others that deal with a wider region or with global trends. Intellectually, therefore, the course stresses the transformation of the field from the study of (primarily American) national foreign policy to a broader international approach.

There are seminars on the following topics: Introduction. The Origins of the Origins, 1917-1943; The Breakdown of the Grand Alliance, 1943-1946; The Division of Germany, 1945-1952; The Sovietisation of Eastern Europe and the Yugoslav Exception; The Marshall Plan and the Foundation of NATO; Nuclear Weapons, Science, and Technology at the Start of the Cold War, 1945-1952; The Communist Victory in China and the Origins of the Korean War; The Korean War; Grand Strategy I: The Soviet Union and the Post-War World, 1945-1953; Grand Strategy II: The United States and the Post-War World, 1945-1953; Cold War Liberalism and McCarthyism: Anti-Communism and the Cold War in American Politics and Culture, 1947-1954; The Sino-Soviet Alliance, 1954-1962; Indochina Wars: From the French Indochina War to the Eve of American Intervention; Eastern Europe from 1953 to the Aftermath of the 1956 Revolutions; The Berlin Crisis, 1958-1962; From the Cuban Revolution to the Cuban Missile Crisis, 1958-1962; Grand Strategy III: Soviet Foreign Policy from Stalin's Death to the

Cuban Missile Crisis; Grand Strategy IV: US National Security Policy from Eisenhower to Kennedy; World Economy, Technology, and the Cold War; The Ideologies, Identities, and the Cold War.

There are lectures (joint with HY206) covering the following topics: The Breakdown of the Grand Alliance, 1943-1946; The Division of Germany; The Iron Curtain; The Marshall Plan and the Foundation of NATO; The United States and Japan, 1945-1965; The Outbreak of the Korean War; The Sino-Soviet Alliance; The 1956 Hungarian Revolution; Technologies, Weapons, and the Arms Race; The Cuban Revolution and the 1962 Missile Crisis; Culture and Mindsets.

Teaching: Seminars will be taught on campus or via Zoom as circumstances dictate. The twofold emphasis of the seminars is on working with the historiography and with the primary sources, in order to understand how historians have interpreted (and re-interpreted) the origins of the Cold War in light of their access to new sources.

Recorded lectures from HY206 The International History of the Cold War will also be available to HY463 students.

There will be a reading week in the Michaelmas and the Lent terms.

Formative coursework: Students are required to make brief historiographical notes for each seminar starting from week 3, to give two oral presentations during the year and to submit one 3000-word formative essay in the Michaelmas Term (the second essay is assessed, see below).

Indicative reading: M.P. Leffler/O.A. Westad (eds), *The Cambridge History of the Cold War*; J.M. Hanhimäki/O.A. Westad (eds), *The Cold War: A History in Documents and Eyewitness Accounts*; J.L. Gaddis, *The Cold War: A New History*; V.M. Zubok, *A Failed Empire*.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 3000 words) in the LT.

HY465

The International History of the Balkans since 1939: State Projects, Wars, and Social Conflict

This information is for the 2020/21 session.

Teacher responsible: Dr Svetozar Rajak SAR.3.15

Availability: This course is available on the MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines the history of the Balkans in the second half of the Twentieth century and on the threshold of the Twenty First century. It is not, however, designed to provide a simple historical overview of the region during this period. The course aims to integrate broader themes and interpretations of the Cold War and its legacy, and of deeper civilizational undercurrents of the second half of the Twentieth Century, with the study of the region and its only federation, Yugoslavia. To do so, it will invoke three main themes that will also facilitate insight into the interaction between the global, regional, and country specific. Firstly, the course will explore the regional and inter-bloc dynamics within the structured Cold War system by looking at the impact the Cold War had on the region and, in turn, at the influence the Balkans, in particular the Greek Civil War and Yugoslavia's conflict with the USSR exercised on the institutionalization and the dynamics of the Cold War during its nascent decade. Secondly, the course will look into the unique role Yugoslavia played in the creation of the alternatives and challenges to the bipolar structure and rigidity of the Cold War world, namely the Non-aligned Movement, and the ideological heresy, the so called "Yugoslav road to Socialism" that created a schism within one of the ideological poles of the Cold War, the Soviet Communism. Thirdly, the course

will offer insight into the dramatic impact the end of the Cold War on the developments in the region, in particular on the collapse of the Yugoslav federation; at the same time, it will assess the role that the disintegration of Yugoslavia and the subsequent wars of secession had on the creation of the concepts that became the building blocks of the post-Cold War international system, namely nation-building, humanitarian intervention, international community, conflict-resolution, limited sovereignty, decreasing role of the UN, American hegemony, etc.

Teaching: Seminars will be taught on campus or via Zoom as circumstances dictate. There will be a reading week in week 6 of the Michaelmas and Lent Terms.

Formative coursework: Students are required to write one 3,000 word essay in the Michaelmas term. There will also be a mock exam (a one-hour essay) in the end of the Lent term.

Indicative reading: Crampton, Richard J., *The Balkans Since the Second World War*, (New York: Longman, 2002). Glenny, Misha, *The Balkans 1804 - 1999: Nationalism, War and the Great Powers*, (London, Granta Books, 1999). Ramet, Sabrina, *The Three Yugoslavias: State Building and Legitimation, 1918-2005*, (Washington D.C.: Woodrow Wilson Center Press/Bloomington and Indianapolis: Indiana University Press, 2006). Todorova Maria, *Imagining the Balkans*, Oxford University Press, 1997. Lawrence S. Wittner, *American Intervention In Greece, 1943-1949*, (New York, Columbia University Press, 1982). Peter J. Stavrakis, *Moscow and Greek Communism, 1944-1949*, (Ithaca and London, Cornell University Press, 1989). Rajak, Svetozar, *The Cold War in the Balkans: From the Greek Civil War to the Soviet-Yugoslav Normalization in Leffler, Melvyn and Westad, Arne (eds), The Cambridge History of the Cold War, Volume I: Origins*, (Cambridge: Cambridge University Press, 2010). Woodward, Susan L., *Balkan Tragedy: Chaos and Dissolution after the Cold War*, (Washington D.C.: The Brookings Institution, 1995). Latawski, Paul, and Smith Martin A., *The Kosovo Crisis and the Evolution of Post-Cold War European Security*, (Manchester and New York: Manchester University Press, 2003).

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (25%, 3000 words) in the ST.

Class participation (10%) and presentation (15%) in the MT and LT.

HY469

Maps, History and Power: The Spaces and Cultures of the Past

This information is for the 2020/21 session.

Teacher responsible: Dr Paul Stock SAR 2.15

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: How did past societies and cultures understand the world around them? How did those societies use maps to represent physical, social and imaginative spaces? Do maps merely reflect particular mentalities and social practices, or do they actively shape the experience and perception of the world? Maps, History and Power addresses these and other questions by exploring mapping practices and spatial thought in several European and non-European contexts from the medieval to the modern periods. The course explores how past societies have used maps to serve a number of practical and ideological purposes: to express religious belief, to aid navigation and commerce, to assert cultural superiority, and to enable state formation or imperial control. Alongside readings in history and

cartography, the course will make extensive and innovative use of the latest digital resources, allowing students to view and discuss historical maps from the world's great research libraries and collections.

Teaching: Learning engagement may include recorded content, live sessions, small group meetings, asynchronous Moodle posts, and short presentations. The course operates reading weeks in the MT and LT.

Formative coursework: Students will be required to submit two 3,000 word formative essays (one per term). They will also have the opportunity to sit a mock exam.

Indicative reading: Jeremy Black, *Maps and History: Constructing Images of the Past* (New Haven: Yale University Press, 1997). Jerry Brotton, *A History of the World in Twelve Maps* (London: Allen Lane 2012). David Buisseret, *The Mapmakers' Quest: Depicting New Worlds in Renaissance Europe* (Oxford: Oxford University Press, 2003). Denis Cosgrove (ed.), *Mappings* (London: Reaktion, 1999). J.B. Harley, *The New Nature of Maps: Essays in the History of Cartography* (Baltimore: Johns Hopkins University Press, 2001). Christian Jacobs, *The Sovereign Map: Theoretical Approaches in Cartography throughout History*, trans. Tom Conley, ed. Edward H. Dahl (Chicago: Chicago University Press, 2006). Mark Monmonier, *How to Lie with Maps* (Chicago: Chicago University Press, second ed. 1996). David Turnbull, *Maps are Territories, Science is an Atlas* (Chicago: Chicago University Press, 1993). Denis Wood, *The Power of Maps* (London: Routledge, 1993).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

Unseen examination paper; in person or online as circumstances permit.

HY471

European Empires and Global Conflict, 1935-1948

This information is for the 2020/21 session.

Teacher responsible: Dr David Motadel SAR 3.16

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines the history of the European empires in the Second World War. It covers the history of the war fought in the imperial world and its impact on the lives of millions of colonial civilians; the political, military, and social history of colonial soldiers who fought in Europe's multi-ethnic and multi-religious armies; the history of anti-colonial movements during the war, from Ho Chi Minh's Viet Minh to Gandhi's Quit India movement; and the history of the war's impact on decolonisation and the twentieth century world order. Overall, the course explores the non-European experience of the Second World War, examining the ways in which the conflict shaped societies and political orders in Africa, Asia, and beyond. Drawing on key secondary texts, primary sources, and visual material, the course provides a broad introduction to the most destructive and cataclysmic conflict in modern global history.

Teaching: Seminars will be taught on campus, with online teaching via Zoom as a back-up if required.

There will be reading weeks in the MT and the LT.

Formative coursework: Students will be expected to produce one essay (2,500 to 3,000 words) in MT; one presentation in MT; and one presentation in LT. Students will also be required to prepare short summaries of the readings (bullet points) for the weekly meetings.

Indicative reading: C. A. Bayly and Tim Harper, *Forgotten Armies:*

HY472

China and the External World, 1711-1839

This information is for the 2020/21 session.

Teacher responsible: Dr Chung Yam Po SAR 2.18

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides a critical overview of the history of Qing China from the early eighteenth to the mid-nineteenth centuries, tracing political, institutional, cultural, and social continuities and changes, particularly in China's land and maritime frontiers. Beginning in the Qianlong period, the Qing Empire became involved in an ever-growing network of commerce and cultural exchange, extending from Manchuria to Inner Asia, and from the East Sea to the Indian Ocean. Following the bloody suppression of the Lhasa riots in 1750, a series of events further connected China to the external world: the infamous Dzungar genocide, European encroachment in Asian seas, the rise of port cities in Southeast Asia that were dominated by Chinese entrepreneurs, and increasing tension between China and Western powers over sea lanes and maritime boundaries. This course will use China's shifting frontiers as a fulcrum to re-examine Chinese history in the modern era, factoring in the movement of people, commodities, ideas, cultural meanings, and imaginaries, which clearly indicate "China's outwardness." This challenges the common perception of China as isolated and inward-looking.

Teaching: Students will engage with class content in large and small group meetings. Learning engagement will include live sessions, small group meetings, asynchronous moodle posts, video clips, and short presentations. There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

Formative coursework: One formative essay in the Michaelmas Term.

Indicative reading: Mark C. Elliot, *Emperor Qianlong: Son of*

HY477

Race, Gender and Reproduction in the Caribbean, 1860s-1980s

This information is for the 2020/21 session.

Teacher responsible: Dr Oscar Webber SAR M.13

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available as an outside option to students on other programmes where regulations permit.

Course content: In the wake of slavery, debates about the intersecting politics of race, gender, and reproduction arose in the Francophone, Anglophone, and Hispanic Caribbean and continued well into the 1960s. This module explores the ways in which the formerly enslaved as well as former planters, imperial officials, newly indentured labourers from South Asia, philanthropists, medical professionals, and welfare workers contributed to and shaped colonial social welfare, health policies, and ideas surrounding racial uplift and improvement. Students will engage in comparative intellectual and social history by drawing on primary and secondary sources to consider the influence of European and American imperialism in the Caribbean. A range of topics will be explored including post-emancipation population decline; infant mortality; illegitimacy; venereal disease; birth control; inter- and extra regional migration; eugenics; tropical medicine; interwar population increase and the impact these issues had on the First and Second World Wars, decolonisation, departmentalisation and other independence struggles. Each week students will focus on a topic in relation to different Caribbean islands. All primary sources will be available in English.

Teaching: Students will engage with seminar content in small group meetings. Learning engagement includes a mixture of live sessions, small group meetings, short presentations and recorded content.

There will be a reading week in the MT and the LT.

Formative coursework: Students will be expected to produce one essay (2,500 to 3,000 words) in MT; and one presentation in either the MT or the LT. Students will also be required to prepare short summaries of the readings for the weekly meetings.

Teacher responsible: Dr Gagan D. S. Sood SAR 2.07

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is about the developments that led to the emergence of our modern world. A variety of conditions have been highlighted by historians as responsible for this, including government reform, agricultural practices, empirical rationality, consumption patterns, military conflict, property rights, family arrangements, territorial conquest, revenue administration, and sheer accident. Although scholarly consensus on the leading-edge conditions still eludes us, there is broad agreement that the polities of northwestern Europe, eastern China and northern India played critical roles, and that the fateful step change occurred between the sixteenth and early nineteenth centuries.

We examine these regions and the relations between them from two distinct but complementary perspectives. These perspectives define the two terms of the course. One is historiographical and centres on received interpretive frameworks, the other is historical and builds on our best current knowledge of Eurasia in the period. In Michaelmas Term, we study the most influential paradigms and narratives that have been elaborated by historians to make sense of the early modern step change which transformed the capacities of human endeavour. Each crystallises a specific set of structures and gives primacy to different polities of Eurasia, with a particular stress on Early Modern England and the English Atlantic, Late Ming and High Qing China, and Mughal and post-Mughal India. In studying these frameworks, we will gain familiarity with the most significant attributes of these polities, and how they have been interpreted by scholars. In Lent Term, we study the ways in which

individual polities of the three regions addressed the near-universal problems that mark all complex states and societies. The solutions to these problems - grouped under the rubric of 'centralised institutions and ideology of rule', 'indirect rule and political economy', and 'plurality, them and us' - powerfully shaped their future trajectories, and had a direct bearing on relations between Europe, China and India. By recovering the most consequential structures and solutions over the two terms of this course, we seek to apprehend the genesis of the modern world.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

There will be a reading week in both the MT and the LT. As no prior knowledge of the course's subject is either assumed or required, it is essential for students to do the set readings and assignments, attend the seminars and engage actively in discussion. It is also strongly recommended that students meet informally outside the class setting to compare notes and learn from each other.

Formative coursework: A 3000-word essay will be due towards the end of MT on a historiographical topic decided in consultation with the instructor. Each week, students will work through one or more core readings which provide important background information, as well as selected further readings in line with their developing interests. These tasks will be supplemented with short response papers/memos to be posted on Moodle before the weekly seminars and unassessed debates and oral presentations during the seminars themselves.

Indicative reading: For general surveys, students may consult:

- David B. Abernethy, *The Dynamics of Global Dominance: European Overseas Empires, 1415-1980* (New Haven, CT, 2000);
- Christopher A. Bayly, *The Birth of the Modern World, 1780-1914: Global Connections and Comparisons* (Oxford, 2004);
- John Darwin, *After Tamerlane: The Global History of Empire* (London, 2007).

Signal contributions to the subject include:

- Fernand Braudel, *Civilization and Capitalism, 15th-18th Century*, 3 vols (New York, 1981-1984);
- Marshall G. S. Hodgson, *Rethinking World History: Essays on Europe, Islam, and World History* (Cambridge, UK, 1993);
- Antony G. Hopkins (ed.), *Globalization in World History* (London, 2002);
- Victor Lieberman, *Strange Parallels: Southeast Asia in Global Context, c. 800-1830*, 2 vols (Cambridge, UK, 2003-2009);
- Geoffrey Parker, *Global Crisis: War, Climate Change and Catastrophe in the Seventeenth Century* (New Haven, NH, 2013);
- Kenneth Pomeroy, *Great Divergence: Europe, China and the Making of the Modern World Economy* (Princeton, NJ, 2000).

Assessment: Essay (40%, 4000 words) in the LT.

Essay (45%, 4000 words) in the ST.

Class participation (15%) in the MT and LT.

Assessment will be via course participation (15%) and two 4000-word essays (40% and 45%, respectively). Students will be required to submit a formative essay in MT and an essay plan in LT as preparation for the assessed essays. The first assessed essay will be due in Week 9 of LT, the second in Week 1 of ST. The questions for these essays will be selected from an approved list supplied at the start of the course.

HY480

Cold War Public Diplomacy: United States Cultural Battles Abroad

This information is for the 2020/21 session.

Teacher responsible: Dr Victoria Phillips

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission

as an outside option to students on other programmes where regulations permit.

Pre-requisites: The course is intended for students with or without a detailed knowledge of public diplomacy. However, students without a detailed knowledge of Cold War history are advised to undertake preliminary background reading.

Course content: Because the Cold War was a series of ideological battles for the "hearts and minds of mankind," culture became a weapon. This seminar examines the United States' export of its ideals to counter communism abroad. Although the course focuses on American-led projects, soft power, and psychological warfare, the reach was global and thus offers the opportunity to examine nations world-wide. The class opens with an examination of American political power from the 19th-century's claims about the frontier through the American Century and Cold War conceptions of "truth," "propaganda," and "informational" practices. The intersection of American governmental branches and clandestine operations with international private foundations, the press, advertising agencies, universities, corporations, and private individuals unpack the complexity of export operations. The course continues to explore cultural diplomacy through radio, music, modernist art, dance, literature, books, magazines, film, television, architecture, and sports. It examines the power of race, gender, and religion. The concept of soft power is challenged by its intersection with military operations, hot wars, or the threat of nuclear attacks in case studies of Korea, Berlin, Cuba, and Vietnam. Cultural exports are examined in the context of secondary source readings and primary sources including conventional archival documents as well as examples of art, film, and performances.

Teaching: Seminars will either be on campus or via Zoom, as circumstances dictate.

There will be a reading week in the Michaelmas and the Lent Terms.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the MT. Students are required to produce one formative essay (3,000 words maximum) by the conclusion of the reading week in the MT. A formative primary source analysis exercise will be due at the conclusion of the MT.

Indicative reading:

- Leigh Armistead, ed., *Information Operations: Warfare and the Hard Reality of Soft Power*;
- Richard Arndt, *The First Resort of Kings: American Cultural Diplomacy in the Twentieth Century*;
- Greg Barnhisel, *Cold War Modernists: Art, Literature, & American Cultural Diplomacy*;

- Margaret E. Peacock, *Innocent Weapons: The Soviet and American Politics of Childhood in the Cold War*;
- Alfred A. Reisch, *Hot Books in the Cold War: The C.I.A. Funded Secret Western Book Distribution Program Behind the Iron Curtain*;
- Laura Roselle, *Media and the Politics of Failure: Great Powers, Communication Strategies, and Military Defeats*;
- Tony Shaw and Denise J. Youngblood, *Cinematic Cold War: The American and Soviet Struggle for Hearts and Minds*;
- Anders Stephanson, *Manifest Destiny: American Expansion and*

the Empire of Right;

- Stephen Wagg and David Andrews, eds., *East Plays West: Sport and the Cold War*;
- Audrea J. Wolfe, *Freedom's Laboratory: The Cold War Struggle for the Soul of Science*;
- Odd Arne Westad, *The Cold War: A World History*.

Assessment: Essay (55%, 5000 words) in the ST.

Presentation (10%), class participation (10%) and online assessment (25%) in the MT and LT.

On alternate weeks, students will post a brief essay on the syllabus topic (500 word-maximum – 25%) and participate in the seminar discussions (10%). During either the MT or LT, each student will give an in-class presentation relating to the week's agenda (maximum fifteen minutes, 10%). In lieu of a final exam, students will write one maximum 5,000 word essay (including footnotes) based on a primary and secondary source analysis due in the ST (55%).

HY483 Not available in 2020/21

Land and Conflict in Latin America since 1750

This information is for the 2020/21 session.

Teacher responsible: Dr Anna Cant SAR 3.12

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Extending from the late Spanish colonial era, through the wars of independence and up to present-day social conflicts, this course will focus on land. How has land been conceptualised and fought over? How have different social groups developed relationships with the land? In what ways have conflicts over land shaped Latin American politics? Students will be encouraged to take an interdisciplinary approach to these questions, drawing on new research in geography, anthropology and political science, as well as various strands of history. Despite the great diversity of the Latin American continent, land is a constant reference point and one that lends itself to rich comparative study. Topics will include the global and local politics of the colonial hacienda system, anti-colonial indigenous rebellions, scientific exploration and population displacement, peasant movements, land reform, Cold War development policies and ongoing social protests over land and resource extraction.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

Formative coursework: Students will be expected to produce 1 essay and 2 other pieces of coursework in the MT. Students are required to write one 2,500-word formative essay in the Michaelmas Term and two formative discussion posts at the beginning of the year.

Indicative reading:

- Richard Boyer and Geoffrey Spurling (eds.), *Colonial Lives: Documents on Latin American History, 1550-1850* (OUP, 2009);
- Brooke Larson, *Cochabamba, 1550-1900: Colonialism and Agrarian Transformation in Bolivia* (Duke University Press, 1998);
- Steve J. Stern (ed.), *Resistance, Rebellion, and Consciousness in the Andean Peasant World, 18th to 20th Centuries* (University of Wisconsin Press, 1988);
- F. Salomon and S. Schwartz (eds.), *Cambridge History of the Native Peoples of the Americas: South America* (CUP, 1999);
- Nora E. Jaffary et al (eds.), *Mexican History: A Primary Source Reader* (Westview Press, 2009);
- Laura Gotkowitz, *A Revolution for Our Rights: Indigenous Struggles for Land and Justice in Bolivia, 1880-1952* (Duke

University Press, 2007);

- Joe Foweraker, *The Struggle for Land: A Political Economy of the Pioneer Frontier in Brazil from 1930 to the Present Day* (CUP, 2002);
- Carmen Diana Deere and Magdalena León, *Empowering Women: Land and Property Rights in Latin America* (University of Pittsburgh Press, 2001);
- Enrique Mayer, *Ugly Stories of the Peruvian Agrarian Reform* (Duke University Press, 2009);
- Bettina Engels and Kristina Dietz (eds.), *Contested Extractivism, Society and the State: Struggle over Mining and Land* (Palgrave Macmillan, 2017).

Assessment: Essay (50%, 5000 words) in the ST.

Online assessment (35%) and class participation (15%) in the MT and LT.

Online assessment comprises online discussion posts of 500 words; 6 in the MT and 6 in the LT

HY485

Germanness in the 20th century: Identity, Politics, and Violence in Germany from the First World War to Re-Unification

This information is for the 2020/21 session.

Teacher responsible: Professor Martina Kessel

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Notions of collective identity are deeply intertwined with the phenomenon of how politics are understood and acted out. The class will discuss which notions of Germanness were constructed over the course of the twentieth century. It will ask how they impacted politics and society in key moments of German history, and how they were influenced in turn by political developments. We will pursue two major lines of inquiry. On the one hand, we will analyse how contemporaries framed their imagined identity of 'being German' by deciding who might belong or not belong to German society, in political, legal, confessional, or cultural terms. On the other hand, we will trace how such projections were used to justify various forms of exclusion or violence. The course will start by analysing issues of race, class, gender, and confession before the First World War, as important categories of boundary work. The class will then debate how notions of Germanness served to legitimize violence and non-democratic politics during the First World War and the Weimar Republic. The third section will focus on National Socialism, exploring the construction of imagined identities on the one hand through popular culture and various practices of implementing a 'people's community' and on the other hand through warfare and genocide. Finally, we will discuss the competition between the two German states between 1949 and 1990 in terms of politics and collective identity.

Teaching: 110-minute live session. Some weeks may include break-out sessions on Zoom or other forms of individual and/or group work.

There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Alon Confino, *A World without Jews. The Nazi imagination from persecution to genocide*, New Haven, Conn. et al.: Yale University Press, 2014. Chin, Rita et al. Assessment: Essay (35%, 3500 words) and presentation (15%) in the LT.

Essay (35%, 3500 words) in the ST.

Class participation (15%) in the MT and LT.

3500-word historiographical essay due in Lent Term (35%); 3500-word state-of-the-field essay due in Summer Term (35%).

HY486

Practicing Abolition in the Atlantic World, c. 1807-1870

This information is for the 2020/21 session.

Teacher responsible: Dr Jake Richards

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Britain's parliamentary act to abolish the transatlantic slave trade in 1807 is a standard reference point in histories of slavery and abolition. But much less is known about the consequences of enforcing that act in West Africa, Latin America, and the Caribbean. Enforcement required huge investment in colonial and naval forces to try to stop slave ships from crossing the Atlantic; it caused a build-up of captives on the African coast because some traders could no longer sell them overseas; it prompted other traders to develop a huge illegal slave trade to Brazil and Cuba; and it generated new forms of bonded labour (such as indenture) in the Americas to replace the diminishing supply of enslaved Africans. These changes altered Britain's political and commercial relationships with polities in Africa and the Americas. This module envisages transatlantic abolition as a set of practices between British agents and the rulers, traders, slaves, and free(d) peoples of different Atlantic societies. How did Britain's colonial empire adapt to accommodate the influx of Africans from captured slave ships? How did political authorities in Africa and Latin America respond to British demands for abolition? And what did the enslaved make of the transformations wrought by abolition? We will explore these questions using sources such as slave narratives, political pamphlets, travel literature, and diplomatic correspondence. Through this course, students will examine how abolishing the transatlantic slave trade produced new modes of encounter, empire, and labour in the Atlantic world.

Teaching:

- Students will engage with class content in large and small group meetings.
- Learning engagement includes recorded content, live sessions, small group meetings, asynchronous Moodle posts, and short presentations.
- There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading:

Assessment: Essay (40%, 4000 words) in the LT.

Essay (60%, 6000 words) in the ST.

HY498

Dissertation: LSE-PKU Double Degree MSc in International Affairs; MSc Theory and History of International Relations

This information is for the 2020/21 session.

Teacher responsible: Prof Vladislav Zubok SAR 3.13

Availability: This course is compulsory on the MSc in International Affairs (LSE and Peking University) and MSc in Theory and History of International Relations. This course is not available as an outside option.

Course content: The dissertation is an exercise in using primary source material to write on a precise topic in the history of international affairs. Although candidates may engage with relevant theories and concepts, the dissertation should be largely devoted to utilising such theories and concepts in the analysis of one or more specific historical events and should be based largely upon primary sources. Candidates should aim to include an element of originality in the conceptualising of the thesis or the treatment of evidence. The subject must fall within the syllabus of the degree and must be supervised by a member of staff in the Department of International History

Teaching: Four recorded lectures in the Michaelmas Term. Each lecture will be followed by a live large-group Zoom session for Q&A. HY498 teaching is provided through HY498 Dissertation workshop sessions and through the individual supervision of dissertation projects by supervisors in the Department of International History. Students should use the Michaelmas Term to find, decide on, and develop a suitable dissertation topic and consider possible dissertation supervisors. Help with this process is available from the students' personal advisers. Students are then required to

complete the HY498 Dissertation Proposal Form and to seek approval for their project from their dissertation supervisor. It is the students' responsibility to locate a supervisor. They should meet with the potential supervisor in late Michaelmas term (every member of staff has weekly office hours) to discuss their dissertation proposal, and then ask the supervisor to sign the HY498 Dissertation Proposal Form before the published deadline. It is the student's responsibility to contact their supervisor to arrange at least one but no more than three meetings in the Summer Term to discuss their dissertation. At this stage the supervisor will be prepared to read and give feedback on a draft table of contents and a draft chapter, or a section or a detailed plan of the dissertation of no more than 1,000 words. Students should note that if they submit a dissertation proposal after the deadline the Teacher Responsible for the course may need to allocate them to a non-subject-specialist supervisor, if no specialists are available.

Assessment: Dissertation (100%, 10000 words) in September.

The dissertation must not exceed 10,000 words (100% of course mark), including text and footnotes but excluding the cover page, the table of contents, the list of abbreviations, the bibliography and appendices. A Fail cannot be compensated, and a degree cannot be awarded unless HY498 has been passed. The dissertation must be submitted by the published deadline.

HY499

Dissertation

This information is for the 2020/21 session.

Teacher responsible: Prof Vladislav Zubok SAR 3.13

Availability: This course is compulsory on the MSc in Empires, Colonialism and Globalisation and MSc in History of International Relations. This course is not available as an outside option.

Course content: The HY499 dissertation is an exercise in using primary sources to write on a precise topic in International History. The only formal limit on the choice of subject is that it must fall within the syllabus - i.e. it has to be a topic in International History, and the dissertation has to be a study in the discipline of history. Dissertations that represent contributions to disciplines outside history, such as International Relations or Politics, will not be approved or accepted. Dissertations must therefore be based substantially on a critical analysis of primary sources, and candidates should aim to include an element of originality in the argument and/or the treatment of the evidence. The subject must involve an element of engagement with the analysis of relations between states and/or societies; alternatively it may involve the study of the history of attitudes and/or policies in one society towards others or comparative studies involving at least two states and/or societies. The topic must not be confined purely to the domestic affairs of one society or state. The dissertation supervisor is the final judge of whether a particular topic falls within the syllabus.

Teaching: Four recorded lectures in the Michaelmas Term. Each lecture will be followed by a live large-group Zoom session for Q&A. HY499 teaching is provided through HY499 Dissertation workshop sessions and through the individual supervision of dissertation projects by supervisors in the Department of International History. Students should use the Michaelmas Term to find, decide on, and develop a suitable dissertation topic and consider possible dissertation supervisors. Help with this process is available from the students' personal advisers. Students are then required to complete the HY499 Dissertation Proposal Form and to seek approval for their project from their dissertation supervisor. It is the students' responsibility to locate a supervisor. They should meet with the potential supervisor in late Michaelmas term (every member of staff has weekly office hours) to discuss their dissertation proposal, and then ask the supervisor to sign the HY499 Dissertation Proposal Form before the published deadline. It is the students' responsibility to contact their supervisor to

arrange at least one but no more than three meetings in the Summer Term to discuss their dissertation. At this stage the supervisor will be prepared to read and give feedback on a draft table of contents and a draft chapter, or a section or a detailed plan of the dissertation of no more than 1,000 words. Students should note that if they submit a dissertation proposal after the deadline the Teacher Responsible for the course may need to allocate them to a non-subject-specialist supervisor, if no specialists are available.

Assessment: Dissertation (100%, 10000 words) in September. 100% by dissertation. A Fail cannot be compensated, and a degree cannot be awarded unless HY499 has been passed. Dissertations must not exceed 10,000 words, including text and footnotes but excluding the cover page, the table of contents, the list of abbreviations, the bibliography and appendices. The dissertation must be submitted by the published deadline.

HY4A4

Dissertation with an Asian focus

This information is for the 2020/21 session.

Teacher responsible: Dr Kirsten Schulze SAR 2.12

Availability: This course is compulsory on the MSc in International and Asian History. This course is not available as an outside option.

Course content: The dissertation is an exercise in using primary sources to write on a precise topic in International and Asian History. The only formal limit on the choice of subject is that it must fall within the syllabus - i.e. it has to be a topic in International History with an Asian angle, and the dissertation has to be a study in the discipline of history. Dissertations that represent contributions to disciplines outside history, such as International Relations or Politics, will not be approved or accepted. Dissertations must therefore be based substantially on a critical analysis of primary sources, and candidates should aim to include an element of originality in the argument and/or the treatment of the evidence. The subject must involve an element of engagement with the analysis of relations between states and/or societies; alternatively it may involve the study of the history of attitudes and/or policies in one society towards others or comparative studies involving at least two states and/or societies. The topic must not be confined purely to the domestic affairs of one society or state. The dissertation supervisor is the final judge of whether a particular topic falls within the syllabus.

Teaching: Four recorded lectures in the Michaelmas Term. Each lecture will be followed by a live large-group Zoom session for Q&A.

Assessment: Dissertation (100%, 10000 words) in September.

IR410

International Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Jennifer Jackson Preece CBG.7.05

Availability: This course is compulsory on the MSc in International Relations and MSc in International Relations (LSE and Sciences Po). This course is not available as an outside option.

Course content: This course is a graduate-level introduction to the study of international relations. It has 5 objectives: (i) to enquire into the nature of international politics and the role of general theory in advancing our understanding of it; (ii) to introduce students to the main contributions to the general theory of international politics; (iii) to provide students with a range of concepts, ideas, and perspectives to enable them to widen and deepen their understanding of international politics; (iv) to encourage critical, independent thought on international politics; and (v) to ascertain the extent to which progress has been made in our understanding of international politics. At the end of the

course students should be able to think, talk and write in an informed, precise and critical manner about developments within the field of International Relations, past and present.

Teaching: This course is delivered through a combination of classes and lectures totaling a minimum of 40 hours across Michaelmas, Lent and Summer Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT. Students deliver seminar presentations and write two 2,000-word essays for their seminar teachers.

Indicative reading: H. Bliddal, C. Sylvest and P. Wilson (eds.) *Classics of International Relations: Essays in Criticism and Appreciation* (2013). Brown, C., *Understanding International Relations*, 5th edn. (Palgrave Macmillan, 2019). Dunne, T., Cox, M., and Booth, K., (eds.) *The Eighty Years' Crisis: International Relations 1919-1999* (Cambridge University Press, 1998). Special Issue, *Review of International Studies*. Grieco, J., Ikenberry, J. and Mastanduno, M. *Introduction to International Relations: Enduring Questions and Contemporary Perspectives* (Palgrave, 2014). Hobson, J., *The Eurocentric Conception of World Politics: Western International Theory, 1760-2010* (Cambridge University Press, 2012).

Assessment: Take-home assessment (100%) in the ST.

IR411

Foreign Policy Analysis III

This information is for the 2020/21 session.

Teacher responsible: Dr Federica Bicchì CBG.9.11

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students taking the MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in International Affairs (LSE and Peking University) may be able to take this course if spaces are available. All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: Students need not have studied Foreign Policy Analysis before, but some familiarity with theories of International Relations and modern international history is essential.

Course content: Foreign Policy Analysis (FPA) looks at the way that policies affecting external relations are made and shaped by actors within the state, but also below and above the state level. This makes it distinct from approaches to International Relations that take the structure of the international system as a starting point for analysis. By understanding how policies are shaped by domestic and international politics and structures, it is possible to arrive at new understandings of the foreign policies of individual states and to critique and enrich scholarship in the mainstream of International Relations. This course prepares students for such tasks by introducing them to the major theoretical concepts and approaches of FPA, and applying them to a range of case studies selected from a wide variety of states and international organisations.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas and Lent Term. This year, some or all of this teaching

will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce two 1,500 word essays for their seminar leader (1 essay in the MT and 1 essay in the LT). Students will also be expected to present one seminar topic.

Indicative reading:

- Alden, Chris and Aran, Amnon, Foreign policy analysis: new approaches: understanding the diplomacy of war, profit and justice, (Abingdon: Routledge, 2016).
- Hudson, Valerie M., Foreign policy analysis: classic and contemporary theory (Latham: Rowman & Littlefield, 2019).
- Morin, Jean-Frédéric, and Jonathan Paquin, Foreign Policy Analysis: A Toolbox, (Springer, 2018).
- Smith, Steve, Hadfield, Amelia and Dunne, Tim, (eds.), Foreign policy, theory, actors, cases, (Oxford: Oxford University Press, 2016).

Assessment: Take-home assessment (100%) in the ST.

IR412

International Institutions

This information is for the 2020/21 session.

Teacher responsible: Dr Theresa Squatrito CBG 8.08

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Course content: The first part of the course introduces the main theoretical approaches that provide alternative explanations for key questions about international institutions: their creation, institutional design, decision-making processes, their impact and their interactions with other international institutions. The second part analyses these key questions with regard to specific international institutions, including the United Nations, the European Union, the North Atlantic Treaty Organisation, the World Trade Organisation, the International Monetary Fund and the World Bank, as well as international institutions in the areas of human rights, environmental protection, and health policy.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas and Lent Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person seminars/seminars delivered online.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 formative essay in the MT and 1 comparable formative assessment in the LT.

Each seminar participant is required to give presentations on seminar topics.

Indicative reading: Volker Rittberger, Bernhard Zangl, Andreas Kruck and Hylke Dijkstra. 2019. International Organization: Polity, Politics and Policies, Third Edition, London: Red Globe Press. Ian Hurd. 2018. International Organizations: Politics, Law, Practice, Third Edition. Cambridge: Cambridge University Press. Aggarwal, V. K. and Dupont, C. (2014) Cooperation and conflict in the global political economy. In: Ravenhill, John, Global political economy. 4th

edition. Oxford: Oxford University Press. Fehl, C. (2004) 'Explaining the International Criminal Court: A 'Practice Test' for Rationalist and Constructivist Approaches', European Journal of International Relations 10(3): 357-94. Niemann, A. (2006) 'Beyond Problem-Solving and Bargaining: Genuine Debate in EU External Trade Negotiations', International Negotiation 11: 467-97

Assessment: Essay (100%, 4000 words) in the ST.

IR415 Not available in 2020/21

Strategic Aspects of International Relations

This information is for the 2020/21 session.

Teacher responsible: Prof Christopher Coker CLM 5.09

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: A working knowledge of international history since 1815 and of traditional theories of international politics is desirable.

Course content: This is not a conventional Strategic Studies course. It is about the cultural context of military conflict between states and within them. The place of war in international relations, and the social, political, and economic consequences of the use of force. The greater part of the course is concerned with force in international relations since 1945. The Western Way of War; Non Western Ways of Warfare; Technology and War. Clausewitz and the Western Way of Warfare; war and genocide; war in the developing world; terrorism and crime; NATO and its future; Globalisation and Security; the 'end of war' thesis.

Teaching: 10 hours of lectures and 12 hours of seminars in the MT. 6 hours of lectures and 12 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

The majority of seminar topics will be on strategic aspects of postwar international relations and examination papers will reflect this. Students on this course will have a reading week in week 6 in line with departmental policy.

Formative coursework: Three 2,000-word essays will be set and marked by the seminar teacher.

Indicative reading: The following short list comprises some of the most important and some of the best currently available books.

An asterisk indicates publication in paperback edition. R Aron, Peace and War; C M Clausewitz, On War (Ed by M Howard & P Paret); J L Gaddis, Strategies of Containment; M E Howard, War and the Liberal Conscience; F M Osanka, Modern Guerrilla Warfare; C Coker, War and the Twentieth Century; J Keegan, A History of Warfare; C Coker, War and the Illiberal Conscience.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

IR416

The EU in the World

This information is for the 2020/21 session.

Teacher responsible: Prof Karen Smith CBG.10.04

Availability: This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in

International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory, MSc in The Global Political Economy of China and Europe (LSE and Fudan) and MSc in Theory and History of International Relations. This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: Some basic knowledge of International Relations as an academic discipline is desirable, together with some acquaintance with the general evolution of world politics over the last one hundred years.

Course content: The development of the external activities of the European Communities, now the European Union, since 1957, including the development of European Political Cooperation and the Common Foreign and Security Policy, and trade and development policy. The relationship between the member states and these external activities, in particular the impact of the evolution of EU institutions and policies on national foreign policies. Relations between the EU and non-EU states and regions, including the United States, Russia, the Middle East, Asia and Africa.

Watch a short introductory video on this course:

IR418

International Politics: Asia & the Pacific

This information is for the 2020/21 session.

Teacher responsible: Prof Christopher Hughes CBG.8.04 and Dr Jurgen Haacke CBG.9.01

Availability: This course is available on the MSc in Development Studies, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Course content: The course looks at how states in the Asia-Pacific region develop policies and strategies to manage international crises and build stability through regionalization. The first term develops knowledge of the policies and strategies of the states

in Northeast Asia and uses scenario building to explore the management of the challenges posed by the rise of China and the role of the US, disputes over territory in the East China Sea between China and Japan, the status and security of Taiwan, and the nuclear crisis on the Korean Peninsula. The second term focuses on Southeast Asia's international relations. Topics covered include the region's state-formation processes; Southeast Asia's inter-state relations, ASEAN's search for regional order, the development and potential of economic regionalism, the Southeast Asia strategies and policies pursued by the United States and China, the foreign policy ambitions and roles of Indonesia as the largest state in the sub-region, the multi-faceted (e.g. hedging) strategies adopted by maritime and continental Southeast Asian states vis-à-vis great powers and China in particular, and the case of Myanmar to explore the prospects for peace and stability, democracy, and human rights against the backdrop of geopolitical change.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Michaelmas, Lent and Summer Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce one 2,000-word policy paper in the MT and one 2,000-word essay in the LT on dates stipulated by the teacher responsible.

Indicative reading:

- Michael Yahuda, *The International Politics of the Asia-Pacific, 1945-1995* (Routledge Curzon, 4th edn, 2019);
- Alagappa (Ed), *Asian Security Order* (Stanford University Press 2003);
- Amitav Acharya, *The Making of Southeast Asia* (Cornell University Press, 2013);
- Christopher Dent, *East Asian Regionalism* (Routledge, 2nd ed., 2016);
- Evelyn Goh *The Struggle for Order: Hegemony, Hierarchy, and Transition in Post-Cold War East Asia* (Oxford, 2015);
- Leszek Buszynski, *Geopolitics and the Western Pacific: China, Japan and the US* (Routledge, 201)
- Maung Aung Myoe, *In the Name of Pauk-Phaw: Myanmar's China Policy Since 1948* (ISEAS, 2011)

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Coursework (50%, 2000 words) in the LT.

The 50% coursework will be a policy memo. The exam will cover LT material.

IR419

International Relations of the Middle East

This information is for the 2020/21 session.

Teacher responsible: Prof Fawaz Gerges CBG.10.03

Availability: This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is intended primarily for students on programmes run by the Department of International Relations (IR). Students on the MSc in Comparative Politics and MSc in Global Politics may take the course, but this is subject to students demonstrating that they have a grasp of International Relations theory, or have made efforts to cover this ground before starting the course.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for

You. Admission is not guaranteed; students external to the IR department must clearly outline the extent to which they are familiar with IR theory/ efforts they will make to familiarise themselves with this area before the course begins.

Pre-requisites: A knowledge of the international political system, of the major issues in its contemporary development, and at least a basic understanding of core International Relations theory, is required. Background in IR and/or political science and/or history is a prerequisite.

Course content: The course is intended to provide an analysis of the regional politics of the Middle East since 1918, and of their interaction with problems of international security, global resources and great power/super power/hyperpower politics.

Topics covered include: The emergence of the state system in the Middle East during the inter-war period; the interplay of domestic politics, regional conflicts and international rivalries; the Cold War and post-Cold War significance of the Middle East in global politics; the importance of oil and other economic factors and interests; conflict in the Gulf and the Arab-Israeli conflict; the foreign policies of major Middle Eastern states and the Lebanese civil war; the role of ideologies and social movements: Arab nationalism, militarism, political Islam and global jihadism; state and non-state actors; democracy and human rights issues, the Arab Spring uprisings; and international relations theory and its significance for the study of Middle East politics.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Michaelmas, Lent and Summer Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 essays and 2 presentations in the MT and LT.

Seminar attendees will be expected to submit two 2,500-word essays, based on past examination papers, to be marked by their seminar teacher, and to give presentations in both the MT and LT.

Indicative reading:

Students are strongly advised to read before the beginning of the course:

- Fawaz A. Gerges, *Making the Arab World: Nasser, Qutb, and the Clash That Shaped the Middle East*
- F. Halliday, *The Middle East in International Relations: Power, Politics and Ideology*
- Madawi al-Rasheed, *A Most Masculine State: Gender, Politics and Religion in Saudi Arabia*
- Fawaz A. Gerges, *The Superpowers and the Middle East: Regional and International Politics*
- Louise Fawcett, *International relations of the Middle East*

In addition they are recommended to consult:

- Nazih Ayubi, *Over-stating the Arab State: politics and society in the Middle East*
- Lisa Anderson, 'The State in the Middle East and North Africa' *Comparative Politics*, October 1987
- R Hinnebusch & A Ehteshami (Eds), *The Foreign Policies of Middle East States*
- B Korany & A Dessouki (Eds), *The Foreign Policies of Arab States*
- John Chalcraft, *Popular Politics in the Making of the Middle East*
- Madawi al-Rasheed, *Demystifying the Caliphate*
- Fanar Haddad, *Sectarianism in Iraq: Antagonistic Visions of Unity*
- Fawaz A. Gerges (ed.), *The New Middle East: Protest and Revolution in the Arab World*
- Z. Lockman, *Contending Visions of the Middle East: The History and Politics of Orientalism*

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

IR422

Conflict and Peacebuilding

This information is for the 2020/21 session.

Teacher responsible: Dr David Rampton

Availability: This course is available on the MSc in Conflict Studies, MSc in Gender, Peace and Security, MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: A basic background knowledge of the subject would be an advantage.

Course content: This course is intended for those interested in theoretical and practical approaches to the question of peace, the problems of war, conflict and violence, and responses to them particularly in the form of liberal peacebuilding and statebuilding. The course is divided into three unequal but interconnected parts. The first part examines ideas and debates about the concepts, causes, contexts, dynamics and representations of conflict, violence and war. The second explores and problematises the concept of peace and the nature, meanings and goals of peace and peacebuilding. This leads into the third section which is concerned with a critical engagement with the range of international responses to conflict associated with the discourses and practices of liberal peacebuilding and statebuilding. The seminars explore the nexus between theory and practice. Although the course and its readings are mainly theoretical and conceptual rather than empirical, students are encouraged to apply the ideas to actual cases, past and present.

Teaching: This course is delivered through a combination of classes and lectures totaling a minimum of 40 hours across Michaelmas and Lent Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy. The course also features film showings linked to some of the lecture themes. These are delivered in person but due to the current situation are now unlikely to commence until the Lent Term.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 piece of coursework in the LT.

The MT formative essay up to 2,000 words. The LT essay outline up to 1,500 words.

Indicative reading: Jacob Bercovitch, Victor Kremenyuk and William Zartman (eds.) *The Sage Handbook of Conflict Resolution* (Sage Publications, 2009). Mark Duffield *Global Governance and the New Wars* (Zed Books 2014). Sinisa Malesevic *The Sociology of War and Violence* (Cambridge University Press 2010). Edward Newman and Karl DeRouen (eds.) *Routledge Handbook of Civil Wars* (Routledge, 2016). Roland Paris and Timothy Sisk (eds.), *The Dilemmas of Statebuilding* (Routledge 2008). Oliver Richmond (ed.) *Palgrave Advances in Peacebuilding: Critical Developments and Approaches* (Palgrave MacMillan UK 2010). Hugh Miall, Oliver Ramsbotham, and Tom Woodhouse, *Contemporary Conflict Resolution: The Prevention, Management and Transformation of Deadly Conflicts*, 3rd ed (Polity, 2011).

Assessment: Essay (40%, 2500 words) in the LT.

Essay (60%, 4000 words) in the ST.

IR429

Economic Diplomacy

This information is for the 2020/21 session.

Teacher responsible: Dr Stephen Woolcock CBG.8.09

Availability: This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students will be required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for you. Admission to the course is not guaranteed, due to limited space.

The course is primarily for students on the IPE Masters and LSE-Sciences-Po Double Degree masters.

Course content: The first term of this full unit course introduces students to the theories and analytical frameworks relating to decision-making and negotiation in international economic relations. It also covers the application of these theories and analysis to cases in economic diplomacy. There is coverage of the respective roles of the main actors, institutional settings and processes involved in domestic decision-making and international negotiation, and their interaction. The course is essentially concerned with the process of international economic negotiations, which distinguishes it from other optional courses that cover more on the substance of trade, finance, money, environment, etc.

The second term takes the form of a simulation of a relevant international negotiation. The simulation is supported by lectures on the substance of the policy issues to be negotiated as well as negotiating techniques. In this second term the seminar sessions will then cover discussion of the substantive policy issues as well as the simulation in working groups, delegations and plenary sessions.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Michaelmas and Lent Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Bayne, Nicholas and Woolcock, S. The new economic diplomacy: decision-making and negotiation in international economic relations, Third edition, Ashgate, Stephen 2013. Odell, John Negotiating the world economy 2000. van Bergeijk Economic Diplomacy: The Issues . 2011. Okano-Heijmans, Maaikje Conceptualizing Economic Diplomacy: The Crossroads of International Relations, Economics, IPE and Diplomatic Studies 2011. Woolcock, Stephen European Union Economic Diplomacy: the role of the EU in international economic relations, Ashgate 2013.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Essay (40%, 3000 words) and class participation (20%) in the LT.

IR433 Half Unit Not available in 2020/21

The International Politics of EU Enlargement

This information is for the 2020/21 session.

Teacher responsible: Prof Karen Smith CLM.4.09

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an

outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE4You. Admission is not guaranteed.

Course content: This course examines EU enlargement from the point of view of International Relations. The principal aim is to understand the interplay between enlargement, EU (foreign) policy and wider geopolitics. With this in mind enlargement is considered both as an act of European foreign policy and as a phenomenon impacting on the (foreign) policies of other states and actors. The course begins with a discussion of the theoretical issues of the international dimension of EU enlargement, including: size; diversity; pace of change; reach; external reactions; and the widening v. deepening dilemma within the EU. It moves on to a broadly chronological discussion of the various phases of enlargement from 1973 to the present, examining the inputs from key Member States as well as from the EU institutions, and analysing the extent to which strategic policy-making characterised each round. In the last part of the course attention switches to more thematic concerns: the impact of EU enlargement on the self-excluded states (Norway, Switzerland, Iceland, and the UK); security, NATO and the post-Cold War European order; the geopolitical issue of Europe's final border; and the view from outsiders, such as the United States and Russia. Watch a short introductory video on this course: <http://www.lse.ac.uk/internationalRelations/video/IR433-EUE-video.aspx>

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two 2,000-word essays.

Indicative reading: Marise Cremona, ed, The Enlargement of the European Union (Oxford University Press, 2003); Heather Grabbe, The EU's Transformative Power: Europeanization Through Conditionality in Central and Eastern Europe (Palgrave, 2006); IDEAS, Special Report, The Crisis of EU Enlargement, 2014; Neill Nugent, ed., European Union Enlargement (Palgrave, 2004); Frank Schimmelfennig and Ulrich Sedelmeier, eds., The Politics of European Union Enlargement: Theoretical Approaches (Routledge, 2005); Christina J. Schneider, Conflict, Negotiation and European Union Enlargement (Cambridge University Press, 2009); Helene Sjursen, ed., Questioning EU Enlargement: Europe in Search of Identity (Routledge, 2006); Karen E. Smith, The Making of EU Foreign Policy: The Case of Eastern Europe, 2nd edition (Palgrave, 2004)

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR434 Half Unit Not available in 2020/21

European Defence and Security

This information is for the 2020/21 session.

Teacher responsible: Dr Spyridon Economides COW 2.07

Availability: This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE4You. Admission is not guaranteed.

Course content: This course examines the role of defence and security issues in European integration. It traces the evolution

and nature of decision-making with respect to European defence initiatives, and examines the structures and institutions of EU defence and security. It also seeks to understand the relationship between foreign policy and security/defence policy in the EU especially in the context of transatlantic relations, and NATO, and the EU's wider international role. The course is divided into two parts. Part one provides a theoretical overview of the role of defence and security issues in European integration. It addresses the question of defence and European identity, the relationship between European defence and the national objectives of Member-States, the link between collective defence and collective security as well as the role of defence in the EU's evolution as a civilian, normative and global actor in international relations. It also looks at the historical evolution of the plans, structures and institutions of European defence and security. It places this evolution in the context of the early post-Second World War era, the Cold War and German rearmament and the issues of extended deterrence, burden-sharing within NATO and the emergence of a European pillar to Western defence. Part two examines the more contemporary developments in European defence and security and concentrates on the relationship with European Political Cooperation/Common Foreign and Security Policy, moves to institutionalise defence and provisions for crisis management and conflict prevention. Included in the second part are examinations of the EU's 'comprehensive approach', and recent CSDP missions and the implications of this on the EU's role in the world.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 essays in the MT.

Students are expected to submit one 2,000-word essay and one Group Policy Analysis paper 2,500 words.

Indicative reading: Anne Deighton (Ed), *Western European Union: Defence Security Integration*; Andrew Cottee, *Security in the New Europe*; Jolyon Howorth, *Security and Defence Policy in the European Union*; Simon Duke, *The Elusive Quest for European Security*; From EDC to CFSP; Paul Gebhard, *The United States and European Security*; Heather Grabbe, *The Sharp Edges of Europe*; Francois Heisbourg et al, *European Defence: Making it Work*; Sean Kay, *Nato and the Future of European Security*; G Rees Wyn, *The Western European Union at the Crossroads*; Stanley Sloan, *The United States and European Defence*; Panos Tsakaloyannis, *The European Union as a Security Community* (1996).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR436

Theories of International Relations

This information is for the 2020/21 session.

Teacher responsible: Dr Jennifer Jackson Preece CBG.7.05 and Dr Tristen Naylor CBG.10.07

Availability: This course is compulsory on the MSc in International Relations (Research) and MSc in International Relations Theory. This course is not available as an outside option.

Course content: This course examines the ways that different theories conceive, analyse and explain the character of international relations. The purpose of the course is to provide a thorough interrogation of these theories, exploring debates both within and between them. Theoretical approaches to be considered include: classical and neo-realism; liberal institutionalism and neo-liberalism; Marxism; constructivism; English School theory; critical theory; post-structuralism; and feminism. The course also interrogates issues relating to the philosophy of science and philosophy of history.

Watch a short introductory video on this course: <http://www2.lse.ac.uk/internationalrelations/video/IR436-IRT-video.aspx>

Teaching: This course is delivered through a combination of classes and lectures totaling a minimum of 40 hours across Michaelmas, Lent and Summer Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to prepare at least one 500 word blog post and one 250 word response to another's blog post on a Moodle forum (weeks assigned by instructor). All students are expected to prepare for and participate in seminar discussions.

Indicative reading:

- Chris Brown and Kirsten Ainley (2010) *Understanding International Relations*, 4th Ed. (Palgrave Macmillan);
- Patrick Jackson (2010), *The Conduct of Inquiry in International Relations*, (London: Routledge);
- Christian Reus-Smit and Duncan Snidal (eds, 2010), *The Oxford Handbook of International Relations*, (Oxford: Oxford University Press);
- Scott Burchill et al (eds, 2009), *Theories of International Relations*, 4th ed. (London: Palgrave).

Assessment: Essay (100%, 4000 words) in the ST.

China and the World

This information is for the 2020/21 session.

Teacher responsible: Prof William Callahan CBG.9.05

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed. Preference will be given to students on the MSc in International Relations programmes.

Course content: This course will provide students with an historical overview of the development of Chinese foreign and security policy, the theoretical concepts used for analysing the making of Chinese foreign policy, and an up-to-date survey of China's evolving relations around the world. The first five weeks will be dedicated to providing a long historical perspective, and use a number of case studies to show how basic factors used in foreign policy analysis shape policy outcomes, including economic factors, the role of perception, geopolitical influences, bureaucratic politics, nationalism, and socialisation into the international system. The remainder of the course will involve analysing case studies on China's relations with the United States, Japan and Korea, Southeast Asia, South Asia, Russia and Central Asia, Australasia and the Pacific Islands, the EU, Africa, Latin America, the Middle East.

Watch a short introductory video on this course: <http://www2.lse.ac.uk/internationalrelations/video/IR445-CFSP-video.aspx>

Teaching: 10 hours of lectures and 12 hours of seminars in the MT. 18 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will complete three 2,000 word essays during the course and will make two presentations to the seminar. It is permissible for the presentations to be on the same topics as the essays.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

IR447 Half Unit Not available in 2020/21 Political Economy of International Labour Migration

This information is for the 2020/21 session.

Teacher responsible: Dr Covadonga Meseguer CBG.9.13

Availability: This course is available on the MSc in Development Studies, MSc in International Affairs (LSE and Peking University), MSc in International Migration and Public Policy, MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit. All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed

Pre-requisites: No pre-requisites

Course content: The mobility of workers is one of the pillars of globalization. However and surprisingly, international political economists have paid less attention to the political causes and consequences of international migration in comparison to that paid to other aspects of globalization such as trade or finance. In this course, we shall employ a political economy perspective to study the historical evolution of migration policy, the relationship between trade and migration, and the political causes and consequences of migration flows. I shall place special emphasis on the study of the political consequences of migration for sending (rather than receiving) countries. We shall also pay attention to an important capital flow associated to international migration: remittances. Rather than focusing on the economic/developmental consequences of remittances, we shall discuss how remittances impact political outcomes as diverse as democratization, the survival of dictatorships, political clientelism, corruption, political participation, and political accountability.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT. Students are expected to write one essay of 2000 words and make one class presentation.

Indicative reading:

- Rosenblum, M and Tichenor, D (eds). 2012. *The Oxford Handbook of the Politics of International Migration*. New York: Oxford University Press.

Assessment: Essay (100%, 3500 words) in the ST.

IR448 Half Unit American Grand Strategy

This information is for the 2020/21 session.

Teacher responsible: Prof Peter Trubowitz CBG 10.16

Availability: This course is available on the MSc in International Relations, MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed

Course content: This course will explore American foreign policy at the broadest level of analysis – the level known as grand strategy. The course will showcase the main theoretical perspectives that inform the study of US grand strategy and apply them to historical and contemporary cases of American statecraft. In this connection, we will assess the relevance of the US experience for theorizing about power politics and the implications of alternative theories for thinking critically about American behaviour. Students will gain an appreciation of the debates and controversies that animate the study of US foreign policy, as well as of the unique challenges posed by making foreign policy in the American political, economic, and cultural context.

Teaching: This course is delivered through a combination of seminars and lectures totaling a minimum of 20 hours across Michaelmas Term (MT). This year some or all of this teaching will be delivered via online lectures and in-person seminars or seminars delivered online.

Formative coursework: Students will write short weekly blog posts on Moodle and provide an 800-word outline of their assessed essay by the end of Week 8. This will be returned by the end of MT.

Indicative reading:

- John Lewis Gaddis, *Strategies of Containment* (2005)
- Peter Trubowitz, *Politics and Strategy* (Princeton 2011)
- Linda Weiss, *America Inc.?* (Cornell 2014)
- Fareed Zakaria, *From Wealth to Power* (Princeton 1998)
- Robert Kagan, *The Jungle Grows Back* (Knopf, 2018)

Assessment: Essay (100%, 4000 words) in the LT.

Students will write a 4,000-word assessed essay selecting from a list of topics and questions provided by the course coordinator. The essay will be due at the end of Week 1 of the LT.

IR452 Half Unit Empire and Conflict in World Politics

This information is for the 2020/21 session.

Teacher responsible: Prof Tarak Barkawi CBG.9.03

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Gender, Peace and Security, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed

Course content: This is a course about war and empire. Many peoples and places in the world have been shaped by imperialism. This course explores some of the violent dimensions of the imperial past and present. It imagines world politics as a space of co-constitution and war or violent conflict as a form of social interconnection. The course considers armed conflict in imperial context from colonial "small war" through to the War on Terror. It looks at how warfare shapes (and is shaped by) the societies, cultures and politics that populate world politics. The course considers also some of the intellectual traditions that have arisen out of the experience of, and inquiry into, colonial violence, from the thought of resistance leaders to subaltern and postcolonial studies. The premise of the course is that imperial warfare and violence have been generative forces in shaping world politics, well beyond the times and places of specific battles and killings. This course familiarises students with some themes from scholarship on empire and conflict in the social sciences and humanities. This involves, first, understanding the limitations of the sovereign nation-state as the basic unit of world politics. For most people in most times and places, international relations have taken imperial form of one kind or another. What would it mean to take empire seriously in international thought and inquiry? The course approaches this question by looking at the relations between empire and globalisation in historical and theoretical context. Second, although much scholarship on empire concerns economy and culture, the history of empire is a history of continual warfare and armed resistance. Such "small wars" have shaped society and politics in both the core and periphery of the international system, and often continue to do so long after the guns fall silent (as for example in the case of the US and the Vietnam War). The course will cover the histories, strategies and theories associated with such wars and their effects. Third and finally, the course will explore the intersection between empire and knowledge in political theory and social inquiry. Not only did anti-colonial resistance produce its own theorists, such as Frantz Fanon and Mao Zedong, but in recent decades empire has been the site of new turns in social and political theory and inquiry, as for example in subaltern studies and post-colonialism. The course will introduce students to this work and its applications to understanding world politics.

MSc Seminars

The seminars will develop students' abilities to read, digest, and critique monograph length texts. Each will be based upon a single book. Students will be expected to read the assigned book in its entirety before each seminar. Every student will be expected to come to seminar prepared to participate. There will be no individual seminar presentations. Every student is expected to speak in every seminar. Students should be prepared to comment on the main argument of each book; to place each text in a wider intellectual context, concerning for example the debates and audiences the book is speaking to; and to offer a critical assessment of the book's contributions.

There will be some variation in the texts assigned to MSc students each year.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/ classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading:

Assessment: Essay (100%, 5000 words) in the ST.

IR453 Half Unit

Global Business in International Relations

This information is for the 2020/21 session.

Teacher responsible: Dr Robert Falkner FAW 11.01B

Availability: This course is available on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed

Course content: This course examines the role of global business as an actor in international relations. It reviews the political and economic theories that seek to explain the rise of global business, paying attention in particular to International Relations and International Political Economy theories (realism, liberalism, Marxism), but also covering the main economic explanations of MNCs. Thereafter, the course examines the interaction between global business and states in international relations. This involves the study of corporate power and how to conceptualise it in IPE, the study of state-firm bargaining over investment decisions, and the regulation of global business by states and international governance institutions. The final part of the course considers the role that global business plays in selected global policy areas: economic development, environmental protection and human rights.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/ classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy. 10 lectures and 10 seminars on the following topics:

1. Introduction: global business in international relations
2. Globalisation and the rise of MNCs
3. Economic theories of the global firm
4. The political economy of MNC-state relations
5. International rules for MNCs I: trade and investment
6. International rules for MNCs II: taxation and offshore finance
7. The UN and global business regulation
8. MNCs, FDI and developing countries
9. MNCs and environmental protection
10. MNCs, corporate social responsibility and human rights

Formative coursework: Students will be expected to produce 1 essay in the LT.

Formative essay of 2,000 words.

Indicative reading:

- Bonnitich, J., Poulsen, L. N. S., & Waibel, M. (2017). *The political economy of the investment treaty regime*: Oxford University Press.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR454 Half Unit Not available in 2020/21

Governing International Political Economy: Lessons from the Past for the Future

This information is for the 2020/21 session.

Teacher responsible: Dr James Morrison 95 ALD 1.14

Availability: This course is available on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: History has always been central to the study and practice of international political economy. The most influential scholars and practitioners of international political economy have repeatedly turned to history both to explain, and to offer a fresh perspective on, the great challenges of their day. This course is designed to help students cultivate that invaluable skill and habit of mind.

Proceeding from the seventeenth century to the present, it examines:

- seminal theorists' particular treatments of international political economy
 - the ongoing, timeless debate between these theorists
 - the major shifts in the global economic order
 - the interaction between theories and policy in each shift
- The course begins with mercantilism and the 'age of empires.' It then explores the great critics of mercantilism—Adam Smith and David Hume—and the relationship between their critique and the revolutions in IPE that followed. It goes on to analyse the rise of so-called 'English' political economy and the 'First Era of Globalisation' in the 19th Century.

The course then pivots to consider two major challenges to this hegemony of thought and practice. First, it traces the development of socialism from an internal critique through the writings of Marx & Engels to an instantiated alternative system in the early Soviet Union. Second, it considers the German Historical School's return to mercantilism and the ascent of the American Empire onto the global stage. The clash of empires then leads to the cataclysm of the First World War.

In the interwar period, the course analyses the failed attempts to restore the global order. It analyses the radical challenge posed by fascist political economy. It also considers the variety of responses issued by different types of liberals. The course then transitions into a discussion of the several postwar orders, from Keynes's

neoliberal institutionalism to Gandhi's rejection of Eurocentric political economy.

Last, the course turns to the modern era. It analyses the trajectories of the postwar global trade and financial systems. It then turns to contemporary issues, such as the post-Cold War order, the 2008 Global Financial Crisis, and the rise of emerging markets.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay and 2 presentations in the MT.

Indicative reading: Thomas Munn. *England's Treasure by Foreign Trade*. Adam Smith. *An Inquiry into the Nature and Causes of the Wealth of Nations*. Karl Marx. *Communist Manifesto*. JM Keynes. *General Theory of Employment, Interest, & Money*. Gandhi, Mohandas K. *Hind Swaraj or Indian Home Rule*.

Assessment: Essay (100%, 2000 words) in the LT.

IR461 Not available in 2020/21

Islam in World Politics

This information is for the 2020/21 session.

Teacher responsible: Prof John Sidel

Availability: This course is available on the MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Global Politics, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection LSE for You. Admission is not guaranteed.

Course content: The course focuses on the role of Islam in world politics, posing two inter-related questions: First, how can we explain the varying nature and strength of Islam as a discursive and mobilizational force in world politics? Second, how should we understand the impact of changes in world politics on the institutions, authority structures, and identities associated with Islam? In this course, the approach to these questions is comparative. The course begins with an examination of the distinctive transnational structures of Islam as compared with another major world religion: Christianity. The trajectory of Islam as a force in international relations since the late 19th century is examined across successive periods in world history. The course covers the rise of transnational Islamist networks from the late Ottoman era through the tumultuous years of mass mobilisation in the interwar era, demobilisation with the formation of new nation-states in the early Cold War era, and the revival of Islam in world politics by the 1970s with the Iranian Revolution and developments elsewhere in the Muslim world. But most of the course covers the contemporary post-Cold War era, examining the varying role of Islam in diverse regional settings - Asia, Africa, the Middle East, and Europe - and in the contexts of globalization and democratization, mass migration, separatist struggles and regional conflicts. Close attention is paid to the role of Saudi Arabia and Iran and the rise of sectarian conflict between Sunnis and Shi'a. The course also focuses important cases like Al Qa'ida and the Taliban in Afghanistan and Pakistan, civil wars in settings as varied as Chechnya and Somalia, the rise of the so-called 'Islamic State' in Iraq and Syria, as well as important trends in Western Europe, including the UK.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 10 hours of lectures and 15 hours of seminars

in the LT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST.

Professor Sidel will be solely responsible for the lectures and the seminars. Students will be divided into seminar discussion groups at the beginning of the course.

Formative coursework: Students are expected to submit two essays of 2,000-3,000 words in length - one in Michaelmas term; one early in Lent term. These essays will help students develop their knowledge of specific topics of particular interest to them and to receive feedback and guidance from Professor Sidel. Students will also produce a 2-3 page outline of their assessed essay in Week 7 of the Lent Term. The outline should include a research question, an overview of the argument, a draft structure and an indicative reading list. Advice and approval will be provided within two weeks of submission of essay outlines.

Indicative reading: Akbar Ahmed, *The Thistle and the Drone: How America's War on Terror Became a Global War on Tribal Islam* (Washington, DC: Brookings Institution Press, 2013); Seema Alavi, *Muslim Cosmopolitanism in the Age of Empire* (Cambridge, MA: Harvard University Press, 2015); Faisal Devji, *Landscapes of the Jihad: Militancy, Morality, Modernity* (Ithaca: Cornell University Press, 2005); Fawaz A. Gerges, *ISIS: A History* (Princeton, NJ: Princeton University Press, 2016); Nasher Hashemi and Danny Postel (eds.), *Sectarianization: Mapping the New Politics of the Middle East* (London: C. Hurst, 2017); Gilles Kepel, *Terror in France: The Rise of Jihad in the West* (Princeton, NJ: Princeton University Press, 2017); Jytte Klausen, *The Cartoons That Shook the World* (New Haven, CT: Yale University Press, 2009); Laurence Louer, *Shiism and Politics in the Middle East* (London: C. Hurst, 2013); Carrie Rosefsky Wickham, *The Muslim Brotherhood: Evolution of an Islamist Movement* (Princeton, NJ: Princeton University Press, 2013); Olivier Roy, *Globalised Islam: The Search for a New Ummah* (London: C. Hurst, 2004).

Assessment: Essay (100%, 5000 words) in the ST.

The essay topic must be approved by the course convener and focus on observable patterns and/or processes of mobilisation in the name of Islam in world politics.

IR462 Half Unit Not available in 2020/21 International Political Theory

This information is for the 2020/21 session.

Teacher responsible: Dr Henry Radice

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Global Politics, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory, MSc in Political Theory and MSc in Theory and History of International Relations. This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Course content: Introduction to International Political Theory; the ethics of statehood; the politics of humanity; human rights and their critiques; humanitarianism; the ethics of war and violence; global justice; borders, migration, and refugees; climate ethics.

Teaching: 18 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 x 2,000 word essay and a 2-page outline of the summative essay.

Indicative reading: Appiah, K.A. *Cosmopolitanism: Ethics in a World of Strangers* (Allen Lane, 2006); Benhabib, S. *Another Cosmopolitanism* (Oxford, 2006); Brown C. and Eckersley R. *The Oxford Handbook of International Political Theory* (Oxford, 2018); Brown C. *International Society, Global Polity* (Sage, 2015); Crawford, N. *Argument and Change in World Politics* (Cambridge,

2002); Erskine, T. *Embedded Cosmopolitanism* (Oxford, 2008); Griffin, J. *On Human Rights* (Oxford, 2009); Hutchings, K. *Global Ethics: An Introduction* (Polity, 2010); Walzer M. *Just and Unjust Wars* (Basic Books, 2006).

Assessment: Essay (100%, 4000 words) in the LT.

IR464 Half Unit Not available in 2020/21 The Politics of International Law

This information is for the 2020/21 session.

Teacher responsible: Dr Kirsten Ainley

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Global Politics, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is not available as an outside option.

Course content: An introduction to the politics of the creation and implementation of international law, intended for non-lawyers. The course focuses on the areas of international law most relevant to International Political Theory: human rights, the use of force and international crime, and examines the increasing legalization of international politics, the tensions between international politics and international law, alternatives to international law and international law post 9/11.

Watch a short introductory video on this course: <http://www2.lse.ac.uk/internationalRelations/video/IR464-PIL-video.aspx>

Teaching: 20 hours of seminars in the LT. 4 hours of seminars in the ST.

There are no lectures on the course, but there are a number of voluntary workshops as well as a voluntary class trip to international courts in The Hague. Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: A 2000-2500 word essay.

Indicative reading: Alter, K. *The New Terrain of International Law* (Princeton, 2014); Armstrong, D. *International Law & International Relations* (Cambridge, 2007); Bass, G. *Stay the Hand of Vengeance: The Politics of War Crimes Tribunals* (Princeton UP, 2000); Charlesworth, H. & Chinkin, C. *The Boundaries of International Law* (Manchester UP, 2000); Koskeniemi, M. *The Politics of International Law* (Hart, 2011); Maogoto, J. *War Crimes and Realpolitik: International Justice from World War I to the 21st Century* (Lynn Rienner, 2004); McGoldrick, D. *From 9-11 to the Iraq War 2003: International Law in an Age of Complexity* (Hart Publishing, 2004); Orford, A. *Reading Humanitarian Intervention* (Cambridge, 2003); Reus-Smit, C. ed. *The Politics of International Law* (Cambridge, 2004); Simpson, G. *Law, War & Crime* (Polity, 2007).

Assessment: Essay (100%, 4000 words) in the ST.

IR465 Not available in 2020/21 The International Politics of Culture and Religion

This information is for the 2020/21 session.

Teacher responsible: Dr Katerina Dalacoura CBG.9.14

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Human Rights, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher

Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: Background in International Relations or a related discipline.

Course content: The overall objective of the course will be to explore the role of culture and religion in the discipline of IR from both a theoretical and an empirical perspective, using Islam as a major case study. The first part of the course will place culture and religion within the broader context of global history, global modernity and social science. In its second part, the course will concentrate on the role of culture and religion in a number of international relations theories, such as constructivism, the English School, cosmopolitanism and communitarianism, historical sociology, post-colonialism and feminism. The third part of the course will examine the role that cultural and religious issues play in the practice of international relations and in particular their influence on international norms, foreign policy, conflict and war and theories of the state.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 2 essays in the LT.

Formative essays 2,000 words.

Indicative reading: A detailed reading list will be available online and in printed form well before the first lecture/seminar. W.C. Smith (1991) *The Meaning and End of Religion* (Fortress Press). Monica Toft (2013) 'Religion and International Relations Theory', in: Risse, Thomas, Walter. Carlsnaes, and Beth A Simmons. *Handbook of International Relations*, edited by Thomas Risse, et al. (SAGE Publications). Christian Reus-Smit (2018) *On Cultural Diversity* (Cambridge University Press). Brenda Shaffer, ed. (2006) *The Limits of Culture: Islam and Foreign Policy* (MIT Press). Ashis Nandy (1988) *The Intimate Enemy: Loss and Recovery of Self under Colonialism* (Oxford University Press)

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

IR466 Half Unit Genocide

This information is for the 2020/21 session.

Teacher responsible: Dr Jens Meierhenrich CBG.10.01
Dr Pilar Elizalde CBG.9.08

Availability: This course is available on the MSc in Conflict Studies, MSc in Gender, Peace and Security, MSc in Global Politics, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory, MSc in Theory and History of International Relations and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Course content: This seminar course provides an introduction to the study of genocide. The course's disciplinary ambit ranges from anthropology to economics, from history to law, and from political science to sociology. Against the background of diverse disciplinary approaches, it explores major theoretical and empirical aspects of the role(s) of genocidal campaigns in international politics, inter alia, their origins, development, and termination; the manner of their perpetration, progression, and diffusion; their impact on the maintenance of international peace and security; their consequences for the reconstruction and development of states and the building of nations; and their adjudication in

domestic and international courts and tribunals. Empirical cases to be discussed include Australia, Cambodia, China, the Democratic Republic of Congo, East Timor, Nazi Germany, Guatemala, Iraq, Northern Ireland, the Ottoman Empire, Rwanda, Uganda, the Soviet Union, Sudan, and the former Yugoslavia, among others. The course is designed to equip students with the analytic tools necessary for making sense of the evolution of the international system from the nineteenth century to the present and for critically assessing the promise and limits of responding to collective violence.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

The formative assessment is a 2,000 word essay.

Indicative reading:

- Christian Gerlach, *The Extermination of the European Jews* (Cambridge: Cambridge University Press, 2016)
- Michael Mann, *The Dark Side of Democracy: Explaining Ethnic Cleansing* (Cambridge: Cambridge University Press, 2005).

Assessment: Essay (100%) in the ST.

IR467 Half Unit Global Environmental Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Robert Falkner FAW 11.01B

Availability: This course is available on the MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations, MSc in International Relations (Research), MSc in Political Science and Political Economy and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit. All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Course content: An introduction to concepts and issues in the study of global environmental politics, with special emphasis on the political economy of environmental protection. Environmentalism and the greening of international society; domestic sources of environmental diplomacy; environmental

leadership in international negotiations; international environmental regimes and their effectiveness; the role of nonstate actors (business, NGOs); corporate environmentalism; private environmental governance; trade and environment; international environmental aid; greening foreign direct investment; climate change; biosafety regulation; deforestation.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/ classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Topics:

1. Introduction: The rise of global environmentalism in international politics
2. States and foreign environmental policy
3. Nonstate actors (NGOs and business) in global environmental politics
4. International environmental regimes and regime effectiveness
5. International trade and global environmental protection
6. Global finance, aid and sustainable development
7. Multinational corporations and private environmental governance
8. Climate change: international negotiations and multi-level governance
9. Biosafety: scientific uncertainty and the politics of precaution
10. Deforestation: non-regimes and private governance

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading:

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR468 Half Unit

The Political Economy of Trade

This information is for the 2020/21 session.

Teacher responsible: Dr Stephen Woolcock CBG.8.09

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research) and MSc in Political

Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed due to limited space.

Course content: The course begins with a discussion of the ideational factors that have shaped and continue to shape trade policy, before introducing some of the core analytical models that help with our understanding of the political economy of trade. The course then covers the nature of trade and investment in the 21st century, including among other things the impact of the growth of global supply chains on the political economy of trade and investment. The domestic and international institutional frameworks within which trade and investment policy are conducted are discussed. The course then considers some of the underlying trends in trade towards the use of preferential and plurilateral rather than multilateral approaches. There is coverage of the links between trade and development, the main topics in current negotiations including agriculture and food security, trade in manufactures, services and investment, digital trade and sustainable trade. The current crisis in the world trading system is discussed as are the sources of international trade frictions.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

The formative assessment is 2,000 words.

Indicative reading:

- Heydon, K and Woolcock, S (eds) (2012) *The Ashgate Research Companion to International Trade Policy*, HF 1379 A 82: e-book and hard copies available.
- Hoekman, B and Kosteki. (2009) *The Political Economy of the World Trading System* HF 1359 H69 e-book available but reasonably price in paperback so something to purchase.
- Martin, L (ed) (2014) *Oxford Handbook of The Political Economy of International Trade*, available as an e-book.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

IR469 Half Unit

Politics of Money in the World Economy

This information is for the 2020/21 session.

Teacher responsible: Prof Jeffrey Chwieroth CBG.10.12

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in Political Science and Political Economy and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: Students intending to take the course should have

a strong background in monetary economics.

Course content: This course is designed as a component of the study of a global system in which the management and mismanagement of money and finance are matters of fundamental consequence for international relations. It is intended to be of particular relevance to students specialising in international political economy. This is a course in applied international political economy theory. It deals with the basic concepts regarding the creation, use and management of money and finance in the global system. Students are then introduced to the political foundations of international monetary governance. Issues covered include the use of national currencies as international money, the politics of exchange rate adjustment, the operations of banks and other institutions in international money and capital markets, the evolution of global financial markets, the relationship between states and markets in the arena of global finance, international monetary cooperation, and the choices of monetary and financial policies open to developed and developing countries. The course emphasises that contemporary issues, such as international financial crises, international financial regulation and the politics of IMF conditionality, are best understood in a broader theoretical and analytical context.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students are expected to make presentations on topics of their choice and to write one 1,500 word essay, to be marked by the seminar teacher.

Indicative reading: No one book covers the entire syllabus, but the following general works provide a useful introduction:

- B Eichengreen, *Globalizing Capital* (2019);
- T Porter, *Globalization and Finance* (2005);
- D Andrews (ed), *International Monetary Power* (2006);
- J Frieden, *Currency politics: the political economy of exchange rate policy* (2015);
- E Helleiner, *The status quo crisis: global financial governance after the 2008 meltdown* (2014);
- C. Norloff, *America's global advantage: US hegemony and international cooperation* (2010);
- B Cohen, *Currency power: understanding monetary rivalry* (2015);
- J Chwieroth and A Walter, *The Wealth Effect* (2019)

Assessment: Take-home assessment (100%) in the LT. Assessment will be undertaken in the January exam period

IR470 Half Unit International Political Economy

This information is for the 2020/21 session.

Teacher responsible: Dr James Morrison CBG.10.12

Availability: This course is compulsory on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is not available as an outside option.

Course content: An advanced introduction to concepts and contending theoretical, analytical, and methodological approaches in international political economy, and an overview of contemporary issues in international economic relations. This course is the core course for MSc International Political Economy. It aims to introduce students to various approaches to the study of international political economy (IPE), and to apply theories to important contemporary empirical issues. The first part of the course introduces students to the main theoretical concepts in and analytical approaches to political economy,

emphasising the overlap between international and comparative approaches. After surveying the main schools of thought in the subject, it examines more recent theoretical developments, including the comparative and domestic approaches that have become increasingly prominent in the literature. The second part of the course examines the evolution of the international economic system since the Second World War, with particular reference to contemporary concerns, debates and issues. Previous background in international relations, international economics, comparative politics and history is helpful but is not a requirement.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One 2,000-word essay will be set and marked by the seminar teacher. Students will also give a presentation delivered during the seminars.

Indicative reading: It is advisable to begin reading before the lectures start, and the following general texts are recommended. A more complete source-list is provided in the course outline.

- Oatley, 'International Political Economy' (2017)
- Ravenhill, 'Global Political Economy' (2020);
- Walter and Sen, 'Analyzing the Global Political Economy' (2009);
- J Frieden, D Lake and JL Broz (eds), 'International Political Economy' (2017);

Assessment: Take-home assessment (100%) in the LT. Assessment will take place in the January exam period

IR471 Half Unit Not available in 2020/21 The Situations of the International Criminal Court

This information is for the 2020/21 session.

Teacher responsible: Dr Jens Meierhenrich CBG.10.01

Availability: This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory, MSc in Theory and History of International Relations, MSc in Theory and History of International Relations and MSc in Women, Peace and Security. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application linked to the course selection on LSE for You. Admission to the course is not guaranteed.

Course content: This taught seminar introduces students to the practices of the International Criminal Court (ICC). Focusing on the ICC's ongoing investigations and prosecutions - its so-called 'Situations' - the courses exemplifies the politics of international law in the context of one of the most embattled international organisations in the international system. On the foundation of 'practice theory', it blends methodological approaches from law, the social sciences and the humanities. By adopting an evolutionary perspective to the ICC, the seminar raises - and answers - pertinent theoretical questions about institutional design and development of in international politics. Empirical cases to be discussed include the settings of the ICC's nine Situations (the DRC, Uganda, the Central African Republic, Sudan, Kenya, Libya, Cote d'Ivoire, and Mali) as well as the territories of the ICC's preliminary examinations (Afghanistan, Columbia, Georgia, Guinea, Iraq, Nigeria, Palestine, and Ukraine). Students will learn to work with both court documents and theoretical texts.

Teaching: 20 hours of lectures in the LT.

In line with departmental policy, students on the course will have a

reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will also receive feedback on their seminar participation. Students are required to research and write one essay (2,500 words). In addressing a given essay topic, students must integrate theory and history and bring empirical evidence to bear on the research question they have chosen. Essays must be fully - and carefully - referenced using one of the major conventions consistently. Submissions are due in Week 8 and must be in hard copy. Feedback is provided by the course teacher, who is responsible for marking essays.

Several criteria are applied in the evaluation of student essays, notably: (1) originality of argument. (2) use of literature: has relevant scholarship been digested and put to good use? (3) soundness of analysis: is the inquiry comprehensive and logically consistent? (4) organisation of evidence: have argument and evidence been introduced and presented in a compelling manner? (5) validity of findings: does the argument remain valid when applied empirically? (6) clarity of presentation: are grammar, punctuation and references flawless?

Indicative reading: Jens Meierhenrich (ed) 'The Practices of the International Criminal Court', Law and Contemporary Problems Special Issue (Vol.76, Nos 3 & 4: 2014). Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR472 Half Unit Not available in 2020/21 Nuclear Non-proliferation and World Politics (Advanced Topics in International Relations)

This information is for the 2020/21 session.

Teacher responsible: Professor Etel Solingen (Susan Strange Visiting Professor during 2019/20)

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is not available as an outside option. All students are required to obtain permission from the Teacher Responsible by completing the online application linked to the course selection on LSE for You. Admission to the course is not guaranteed.

Course content: This course will apply theories of international relations to explain why some states have pursued nuclear weapons whereas most others have abstained. What is the role of the nonproliferation regime, major powers, international norms, democracy, and globalization on decisions to acquire or renounce nuclear weapons? How do international institutions, major powers and other states respond to violations of international legal commitments not to develop nuclear weapons? What is the relative effectiveness of sanctions and positive inducements in persuading states to abandon nuclear weapons programs? Countries under focus will be North Korea, Iran, Japan, Taiwan, Iraq, Libya, South Korea, India, Pakistan, Israel, and Egypt, among others. There will be simulations of negotiations geared to dissuade actual or potential nuclear proliferators from pursuing such designs and Oxford-style debates.

Teaching: 9 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

In line with departmental policy, students on the course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the LT.

1 x 1,500 word essay, 1 x 1 page outline summary for the summative essay.

Indicative reading: Solingen, Etel, Nuclear Logics: Contrasting Paths in East Asia and the Middle East (Princeton University Press, 2007). William Potter and G. Mukhatzhanova, "Divining Nuclear Intentions" International Security 33, 1 (2008). Nicholas L. Miller, "The Secret Success of Nonproliferation Sanctions," International Organization 68, No. 4 (2014): 913-944. Nicholas L. Miller "Nuclear Dominoes: A Self-Defeating Prophecy?" Security Studies 23, No. 1 (2014): 33-73. Nina Tannenwald, The Vanishing Nuclear Taboo? Foreign Affairs November/December 2018. Solingen, Etel (ed.), Sanctions, Statecraft, and Nuclear Proliferation (Cambridge University Press, 2012)

Assessment: Essay (100%, 4000 words) in the ST.

IR473 Half Unit China and the Global South

This information is for the 2020/21 session.

Teacher responsible: Prof John Alden CBG.9.04

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission of the Teacher Responsible by completing the online application linked to LSE for You. Admission to the course is not guaranteed.

Course content: This course focuses on the substantive role that China plays in the Global South where its preponderance of material power and putative developing country status confers upon it a dominant position in bilateral and regional political economies. China's economic position, coupled to an astute use of finances flowing from its mercantilist policies, has enabled it to become the leading trading partner and a significant investor in the developing world. Moreover, the Global South is increasingly figuring in Beijing's expanding security interests and soft power provisions. Interpretations embedded in prevailing academic discussions like socialisation, threat and peaceful rise take on new meaning when studied through the lens of ties with developing countries. Understanding how dynamics in this relationship are impacting upon a host of global and contemporary issues (BRICs, multilateralism, peacekeeping, the environment) is crucial to the shape of the 21st century. Students will acquire a deeper appreciation of the concept of agency linked to the varied response of countries and regional organisations in the Global South, from policy elites to local communities, to China's growing structural power, as well as placing Chinese engagement within the context

of other 'traditional' and emerging powers. This will offer a deeper analysis of the way in which the dynamics of China's economic and political model impact on its relationship with the Global South.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Essay length 1500 words

Indicative reading: Ariel Ahram, 'Theory and Method of Qualitative Area Studies', *Qualitative Research* (11:1 2011), pp. 69-90. Chris Alden and Chris R Hughes, 'Harmony, Discord and Learning in China's Foreign Policy', *China Quarterly*, Special Issue (No.9 December 2009), pp.13-34. Carol Wise and Margaret Myers (eds), *The Political Economy of China-Latin America Relations in the New Millennium: Brave New World* (Routledge: 2016)

Assessment: Essay (80%, 4000 words) in the LT. Presentation (20%) in the MT.

During the course of the seminars students will participate in a group presentation (20%) and submit a 4,000 word essay (80%) at the start of the LT.

IR474 Half Unit Not available in 2020/21 Revolutions and World Politics

This information is for the 2020/21 session.

Teacher responsible: Dr George Lawson CBG.9.12

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission of the Teacher Responsible by completing the online application linked to LSE for You. Admission to the course is not guaranteed.

Course content: Revolutions are often considered to be a 'side order' to the 'main course' of International Relations. But as this course explores, the lack of attention paid to revolutions is a mistake - revolutions have played a major part in the making of the modern international order. From the 'Atlantic Revolutions' of the late 18th and early 19th centuries to the 'colour revolutions' of the early 21st century, revolutions have been constitutive of notions of sovereignty, order, justice, and more. Revolutions have also been tightly bound up with dynamics of war and peace. This course explores both the theory and practice of revolutions, teasing out their effects and examining the prospects for revolutionary change in the contemporary world.

List of Topics:

Part 1: Thinking about revolutions

1. What are revolutions?
2. Key themes in the study of revolutions
3. Revolutions in world politics

Part 2: The experience of revolutions

4. The Atlantic 'age of revolutions'

5. Socialist revolutions
6. Reading week - session on the assessed essay
7. 'Third World' revolutions
8. The 'last great revolution'?
9. 'Colour' revolutions
- Part 3 Revolution today
10. The Arab uprisings
11. Rethinking revolutions

Teaching: 10 hours of lectures, 20 hours of seminars and 4 hours of workshops in the MT.

The main aim of the course is to provide an opportunity for students to make informed judgements about how and in what ways revolutions have impacted on core features of modern international order. Additional aims include assessment of the place of revolutions in the contemporary world and, more generally, the ability to connect theoretical arguments about revolutions with the substantive experience of revolutions.

In line with departmental policy, students on the course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Formative essay 1,500 words.

Indicative reading: Hannah Arendt, *On Revolution* (Penguin: 1963). Colin Beck, *Radicals, Revolutionaries and Terrorists* (Polity: 2015). Mlada Bukovansky, *The American and French Revolutions in International Political Culture* (Princeton: 2002). John Foran, *Taking Power* (Cambridge: 2005). Jeff Goodwin, *No Other Way Out* (Cambridge: 2001). Fred Halliday, *Revolution and World Politics* (Palgrave: 1999). Doug McAdam, Sidney Tarrow and Charles Tilley, *Dynamics of Contention* (Cambridge: 2001). Daniel Ritter, *The Iron Cage of Liberalism* (Oxford: 2015). Theda Skocpol, *States and Social Revolution* (Cambridge: 1979). Stephen Walt, *Revolutions and War* (Cornell: 1996)

Assessment: Essay (70%, 4000 words), presentation (15%) and blog post (15%) in the MT.

Students are expected to produce 10 weekly blog posts of 250 words.

IR475 Half Unit Gender/ed/ing International Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Katharine Millar CBG.8.13

Availability: This course is available on the MSc in International Relations, MSc in International Relations (Research) and MSc in International Relations Theory. This course is not available as an outside option.

All students are required to obtain permission of the Teacher Responsible by completing the online application linked to LSE for You. Admission to the course is not guaranteed.

Course content: This course foregrounds gender - as noun, verb and structure - in understanding the practices/events studies as global politics and the discipline/study of international relations. The course is grounded in feminist theory and provides students with an introduction to feminist epistemologies and methods. It proceeds in two sections, moving from theoretical foundations to an examination of gender and the macro, transnational and historical processes of global politics. Each 'macro' examination of the gendering of international politics is followed by a corresponding examination of several substantive areas of international politics, including security, development, NGOs and transnational social movements and international law/organisations. These overarching topics are balanced with issue-specific case studies (eg sexual/sexualised violence in conflict; gendering of the informal economy), derived from current events, to be discussed in seminars. Particular thematic attention will be paid to the on-going construction (and transmission) of global/transnational hierarchies that are gendered and gendering.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across

Lent Term. This year, some or all of this teaching will be delivered through a combination of in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students must submit formative essay questions and outlines in LT in order to support success in the summative.

Indicative reading: B Ackerly, J True and M Stern (eds), *Feminist Methodologies for International Relations* (CUP: 2006). C Enloe, *Bananas, beaches and bases: making feminist sense of international relations*, rev'd 2nd ed (University of California Press: 2014). C Mohanty, *Feminism without Borders: Decolonising Theory; Practising Solidarity* (Duke University Press: 2003). L Sjobeg, *Gender, War and Conflict* (Polity: 2014). C Weber, *Queer International Relations: sovereignty, sexuality and the will to knowledge* (OUP:2016)

Assessment: Essay (65%, 4000 words) in the ST. Coursework (35%) in the LT.

The coursework entails three components.

One (500 word max) blog posts, to a Moodle forum on a week assigned by the instructor (marked with grade, 20%).

Two (250 word max) response to colleagues' blog posts and two (for two different weeks) questions posed for discussion in seminar (completion/participation grade, 15%).

IR476 Half Unit Not available in 2020/21 Gender and Political Violence

This information is for the 2020/21 session.

Teacher responsible: Dr Katharine Millar CBG.8.13

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is not available as an outside option. All students are required to obtain permission of the Teacher Responsible by completing the online application linked to LSE for You. Admission to the course is not guaranteed.

Course content: This course foregrounds gender as an analytic lens to highlight and question received wisdom regarding the interrelations of various practices of violence and manifestations of conflict. It moves away from the concept of 'security' to examine assemblages of threats and vulnerabilities that connect and problematise traditional international relations concepts of scale (eg local, national, international) as well as the public and private. Taking gender seriously allows us to trace the 'systems level' war into the everyday, and to follow everyday practices of violence into the global. The course encourages students to consider not only the ways different practices of violence are masculinised/feminised, but also how these gendering violences are implicated in social power relations, sexualised/sexual hierarchies, and the production of order/normality. Geographically, this approach brings the Global North and South into the same analytical frame. Particular thematic emphasis is placed on the questions of what constitutes violence, and how this key conceptualisation relates to our ways of analysing, interpreting and making sense, both academically and experientially, of the phenomenon.

Teaching: 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 2 essays in the LT.

Indicative reading: M Zalweski, *Feminist International Relations: Exquisite Corpse* (2013). C Sylvester, *War as Experience* (2012). M Erikson Baaz and M Stern, *Sexual Violence as a Weapon of war?* (2013). V Hudson, *Sex and World Peace* (2012). C Nordstrum, *Shadows of War* (2004). M Jackman, 'Violence in Social Life', *ARS* (Vol.28, 2002). T N Coates, *Between the World and Me* (2015)

Assessment: Essay (100%, 4000 words) in the ST.

IR477 Half Unit Not available in 2020/21 Sub-Saharan Africa: Governance, Peace, and Security

This information is for the 2020/21 session.

Teacher responsible: Dr Milli Lake

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission of the Teacher Responsible by completing the online application linked to LSE for You. Admission to the course is not guaranteed.

Course content: This course examines contemporary sub-Saharan African politics and society in three parts, exploring some of the toughest challenges the continent has faced in the post-independence period. It begins with a review of twentieth century African politics, exploring the experiences and legacies of colonial occupation, and what these tell us about the present day. Following this, it turns to the common challenges of the post-independence period, as newly created states struggle to establish and maintain authority at home while finding their place in the international system. Finally, it explores humanitarian governance and development aid in the twenty-first century, drawing from literature spanning a wide variety of subfields and epistemological traditions. This component of the course considers the nature of public and private authority, as well as the role played by countries in the global north in intervening in the domestic political affairs of sovereign states.

Teaching: 20 hours of seminars in the LT.

In line with departmental policy, students on the course will have a reading week in week 6.

Formative coursework: Students will be expected to produce 1 essay and 6 other pieces of coursework in the LT.

For six of the ten sessions, students on the course will submit a one-page reading memo of approximately 600 words, pulling together key themes from that week's discussions.

In addition, students will produce an assessed essay outline in week 10 consisting of a research question, an overview of the argument, a draft structure and an indicative reading list. Feedback will be provided via email and/or individual sessions with students.

Indicative reading:

- Séverine Autesserre, 'Dangerous Tales: Dominant Narratives on the Congo and Their Unintended Consequences', *African Affairs* (2012)

Assessment: Essay (80%, 4000 words) in the ST. Class participation (20%).

Students will submit a 4,000 word essay (80%) due in week 1 of the ST.

IR478 Half Unit Not available in 2020/21

Critical War Studies

This information is for the 2020/21 session.

Teacher responsible: Prof Tarak Barkawi CBG.9.03

Tarak Barkawi is Professor in the Department of International Relations at the London School of Economics and Political Science. He studies warfare between the West and the non-European world, past and present. He writes on the pivotal place of armed force in globalization, imperialism, and modernization, and on the neglected significance of war in social and political theory. He is author of *Soldiers of Empire, Globalization and War* and many scholarly articles.

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed

Course content: War transforms the social and political orders in which we live, just as it obliterates our precious certainties. Nowhere is this more obvious than in the fate of truths offered about war itself. War regularly undermines expectations, strategies and theories, and along with them the credibility of those in public life and the academy presumed to speak with authority about it. This course begins with the recognition that the unsettling character of war has been a profound opportunity for scholarship. For it is precisely in war's disordering and unsettling of politics and identities that the socially and historically generative powers of war are exposed. In bending, stretching and even breaking institutions and societies, war reveals them to us anew and offers perspectives obscured in times of peace. At the same time, these disruptions shape and inform the course and character of war. This violent but fecund juncture between war, society and politics is what this course seeks to understand.

Teaching: 10 hours of lectures and 18 hours of seminars in the LT. This course consists of ten lectures, nine seminars and eight film evenings. It is primarily a book-based graduate seminar. The lecture series provides concepts, ideas and histories - intellectual scaffolding - against which to read the course books. Each of the nine seminars for this course will be based upon a single book. The seminars will develop students' abilities to read, digest, and critique monograph length texts. Students will be expected to read the assigned book in its entirety before each seminar. Every student will be expected to come to seminar prepared to participate. There will be no individual seminar presentations. Every student is expected to speak in every seminar. Students should be prepared to comment on the main argument of each book; to place each text in a wider intellectual context,

concerning for example the debates and audiences the book is speaking to; and to offer a critical assessment of the book's contributions.

The optional film series provides an opportunity for sociability and the exploration of course themes in popular cultures. Films are an important way in which war has shaped modern culture. The course coordinator will briefly introduce each film and a short discussion will follow the screening.

Formative coursework: To help them prepare for their summative essay, students will write two 2000 word book reviews of seminar books of their choosing.

Indicative reading: 1 Hew Strachan, *Clausewitz's On War* (New York: Grove Press, 2007). 2 Michel Foucault, *Society Must be Defended* (London: Penguin, 2004). 3 Anders Engberg-Pedersen, *Empire of Chance: The Napoleonic Wars and the Disorder of Things* (Cambridge, MA: Harvard University Press, 2015). 4 Helen M. Kinsella, *The Image Before the Weapon: A Critical History of the Distinction between Combatant and Civilian* (Ithaca: Cornell University Press, 2011). 5 Paul Fussell, *The Great War and Modern Memory* (New York: Oxford University Press, 1975). 6 Adam Tooze, *The Deluge: The Great War and Remaking of Global Order* (London: Allen Lane, 2014). 7 Debbie Lisle, *Holidays in the Danger Zone: Entanglements of War and Tourism* (Minneapolis: University of Minnesota Press, 2016). 8 Hugh Gusterson, *Nuclear Rites: A Weapons Laboratory at the End of the Cold War* (Berkeley: University of California Press, 1998). 9 Banu Bargu, *Starve and Immolate: The Politics of Human Weapons* (New York: Columbia University Press, 2014)

Assessment: Essay (100%, 5000 words) in the LT.

The course will be 100% assessed by essay due after the end of term and based on a topic of the student's choice.

IR479 Half Unit Not available in 2020/21

Russia in World Politics

This information is for the 2020/21 session.

Teacher responsible: Prof Tomila Lankina CBG.10.13

Availability: This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Political Economy (LSE and Sciences Po), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is not available as an outside option.

The course offers an analysis of key issues in the development of Russian foreign and security policies and the role that it plays in global politics. It is primarily intended for the courses listed above and is available as an outside option on the MSc in Comparative Politics to students with permission from the course convenor.

Pre-requisites: There are no formal prerequisites but some knowledge of social science methods and an interest in Russian politics will be taken for granted.

Course content: The course covers the various factors shaping Russian foreign and security policy. It will explore both the traditional foreign policy and security issues, such as Russia's recent military build-up, economic power projection, the geopolitics of oil and gas, as well as soft power and soft security aspects of Russia's foreign policy, including the role of the media and propaganda; hybrid warfare; the role of ideas and norms; we will also explore the historical legacies influencing how Russia sees the world and its neighbours. Each of the ten topics covered will speak to the major theoretical debates on the factors shaping security and foreign policy and students will be encouraged to evaluate the merits of the various theories based on available evidence. The background seminar focuses on the domestic and international context preceding Russia's emergence as a successor to the Soviet Union. The subsequent sessions analyse post-communist Russian foreign policy with a special focus on foreign policy under President Putin, including the military interventions in Georgia and

Ukraine, the securitisation of Russia's media and Russia's attempts to influence politics in the EU and beyond.

Some of the questions to be addressed in the course of the ten seminars are: How have domestic institutions and political regime change following the collapse of the USSR impacted on foreign policy making and thinking? How has Russia sought to use traditional security mechanisms, hard power and soft power to influence the "near abroad"? What explains the failure of "reset" policy between the US and Russia? Has Russian engagement with Europe and its main institutions, the EU and NATO, suggested that it is part of or apart from Europe? What are the key mechanisms of Western influence on Russia's foreign policy? What kind of a relationship has Russia forged with China and what are the factors shaping this relationship? What drives the nuances of Russia's policy in the Middle East? What role do energy politics play in Russia's relations with its neighbours and in Russia's foreign policy globally? The final section will address the question of the other longer-term historical influences shaping the foreign policy of Russia.

Teaching: 20 hours of seminars in the LT.

Students who are new to international politics are advised to attend the lectures for IR202, Foreign Policy Analysis.

Formative coursework: Students will be expected to produce 1 presentation, 1 other piece of coursework and 1 other piece of coursework in the LT.

Each student will write a review of one of the required readings in no more than 500 words.

In the course of the academic term, each student will be also expected to make one presentation on a given topic. Presenters will be expected to distribute a 1 paragraph summary of the main points of their presentations to Professor Lankina and students in advance of the seminar.

Students will also produce a 2-3 page outline of their assessed essay by Week 6 of the Lent term.

Indicative reading: Stent, Angela, *The Limits of Partnership: U.S-Russian Relations in the Twenty-First Century*. Princeton: Princeton University Press, 2015. Mankoff, Jeffrey, *Russian Foreign Policy: The Return of Great Power Politics*. Lanham: Rowman and Littlefield, 2009 (or 2016, 2017 edition if available). Allison, Roy, *Russia, the West, and Military Intervention*. Oxford: Oxford University Press, 2013. Tsygankov, Andrei, *Russia's Foreign Policy: Change and Continuity in National Identity*. Oxford: Rowman and Littlefield, 4th edition, 2016. Tsygankov, Andrei, *Russia and the West from Alexander to Putin: Honor in International Relations*. New York: Cambridge University Press, 2012. Cadier, David and Light, Margot, (eds.) *Russia's Foreign Policy: Ideas, Domestic Politics and External Relations*. Basingstoke: Palgrave Macmillan, 2015. Allison, Roy, *Russia, the West, and Military Intervention*. Oxford: Oxford University Press, 2013

Assessment: Essay (80%, 5000 words) in the ST.

Class participation (20%) in the LT.

IR480 Half Unit

Globalisation and the State in Developing Countries

This information is for the 2020/21 session.

Teacher responsible: Dr Jostein Hauge CBG.8.14

Availability: This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the

online application form linked to course selection on LSE for You.

Admission is not guaranteed

Course content: What role should the state play in economic development? How has globalisation effected what the state can still actually do to promote economic development? Between the 50s and 80s, the East Asian 'developmental state' model delivered rapid industrialisation through extensive state intervention, seemingly refuting not only the claims of free market economics, but also of dependency theory: that poor countries could never develop due to the very nature of the capitalist world system. Since the 80s, the applicability of the East Asian model was challenged in new ways. Structural changes in the global political economy, including the end of fixed exchange rates, increased capital mobility, the development of international financial markets, privatisation of the commanding heights of the economy, the proliferation of restrictive trade and investment agreements, and the rise of global value chains, led many to argue that even if it was economically beneficial for other countries to implement the East Asian model, this was no longer possible because globalisation had dramatically constrained the power of the nation state. Others argued that concerns over the constraints posed by globalisation were overblown, and that domestic interests, institutions, and ideas were responsible for holding back structural transformation of the economy.

This course will combine debates in IPE, over how the process of globalisation has transformed the capacity for state action, with debates in the political economy of development over the role of the state in the process of late development. Students will gain an understanding not only of the debate over how much domestic policy autonomy developing countries have after globalisation, but also of the kinds of policies they need this policy space for. Problems of underdevelopment are approached through the prism of both core-periphery power relations, and power relations arising from the domestic productive structure.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/ classes delivered online.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.

Indicative reading: Chang, H. J., & Grabel, I. (2014). *Reclaiming development: an alternative economic policy manual*. Zed Books Ltd. Haggard, S. (2018). *Developmental States*. Cambridge University Press. Cardoso, F. H., & Faletto, E. (1979). *Dependency and development in Latin America (Dependencia y desarrollo en América Latina, engl.)*. Univ of California Press. Strange, S. (2015). *States and markets*. Bloomsbury Publishing. Chang, H. J. (2002). *Kicking away the ladder: development strategy in historical perspective*. Anthem Press. Hirst, P., Thompson, G., & Bromley, S. (2015). *Globalization in question*. John Wiley & Sons.

Assessment: Essay (90%, 2500 words) in the ST.

Continuous assessment (10%) in the LT.

The continuous assessment will be weekly writings: 10 x 1-page bullet point outlines answering one of the assigned seminar questions.

IR481 Half Unit Not available in 2020/21

Europe, the US and Arab-Israeli Relations

This information is for the 2020/21 session.

Teacher responsible: Dr Federica Bicchì CLM. 4.13

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Global Politics, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available with permission

as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: A knowledge of post-1945 world history of the European Union governance system and of Middle East politics is required.

Course content: The course focuses on the foreign policy of the EU and of EU member states towards Arab-Israeli relations (with a special emphasis on Palestinian-Israeli relations), in comparison with the US foreign policy. The main focus will be on the European perspective, but it would be impossible to analyse this subject without taking into account the US position and, to some extent, Transatlantic relations. After an overview of Palestine during the British mandate, the course will cover the period from 1948 to nowadays with a particular emphasis on contemporary issues. The British mandate on Palestine. The partition of Israel and the birth of Israel. Early support for Israel. The Suez crisis. The evolution of European and US policy towards Israel. The birth of the "special relationship" between the US and Israel. The 1973 war, the energy crisis and the Euro-Arab Dialogue. The Venice Declaration. The US and European contribution to the Arab-Israeli peace process in the 1990s. The Euro-Mediterranean Partnership and the European Neighborhood Policy. Western democracy promotion and trade. Western aid to the Palestinians. The legalisation of relations with Israel. The collapse of the peace process and attempts at reviving it.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One 2,000-word essay during the course and one presentation (or alternatively two 2000-word essays), to be marked by seminar teachers. These do not count towards the final mark.

Indicative reading: Students will be expected to read widely in appropriate books and journals. A detailed reading list will be provided at the beginning of the course. The following provide a general background to the topic: Bicchieri, Federica, *European Foreign Policy Making toward the Mediterranean*, New York: Palgrave (2007); Fawcett, L. (2013) *International Relations of the Middle East*, 3rd ed., Oxford: Oxford University Press; Lesch, David, ed. *The Middle East and the United States*. Boulder: Westview (2012), 5th ed.; Pardo, S. and J. Peters (2009), *Uneasy Neighbours: Israel and the European Union*, Lexington Books; Quandt, W.B. (1993) *Peace Process. American Diplomacy and the Arab-Israeli Conflict Since 1967*, Washington /Berkeley/Los Angeles: The Brookings Institution/University of California Press; Roberson, B.A. (1998) *The Middle East and Europe. The Power Deficit*, London/New York: Routledge; Spiegel, Steven, *The Other Arab-Israeli Conflict: Making America's Middle East Policy from Truman to Reagan*, Chicago, (1985); Youngs, Robert, *Europe and the Middle East. In the Shadow of September 11*. Boulder/London: Lynne Rienner, (2006).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

The normal length of the examination paper is eight questions, of which candidates are invited to answer any two.

IR485

Dissertation in International Political Economy

This information is for the 2020/21 session.

Teacher responsible: Dr Ranjit Lall CBG.08.01

Availability: This course is compulsory on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is not available as an outside option.

Course content: MSc students are required to write a 10,000 word dissertation on a topic within the field of IPE approved by

the student's dissertation lead. The dissertation need not be an account of original research and may rely on secondary sources.

Teaching: 1 hour of lectures in the MT. 4 hours of lectures and 4 hours of workshops in the LT. 1 hour of workshops in the ST. There will be a 60-minute preliminary lecture in the MT about the Dissertation process and 4 lectures in the LT on specific topics and concepts relevant to the dissertation process. In the 60-minute of small group workshops, the students apply the concepts introduced in the lecture to their own research projects. Two members of the teaching faculty will work between groups to support them and answer questions. The last ST session will be a 'drop in' opportunity for students to raise questions and discuss their specific concerns.

Formative coursework: Students submit the initial topic and research question early in LT; and a more detailed 4-5 page dissertation plan later in LT.

Indicative reading: George, A., & Bennett, Andrew. (2005). *Case studies and theory development in the social sciences* (BCSIA studies in international security). Cambridge, Mass.: MIT Press. Gerring, J. (2006). *Case study research : Principles and practices* (Second ed., *Strategies for social inquiry*). King, G., Keohane, Robert O., & Verba, Sidney. (1994). *Designing social inquiry: Scientific inference in qualitative research* (Princeton paperbacks). Seawright, J., & Gerring, J. (2008). *Case Selection Techniques in Case. Study Research: A Menu of Qualitative and Quantitative Options*. *Political Research Quarterly*, 61(2), 294-308.

Assessment: Dissertation (100%, 10000 words) in August.

IR486

Dissertation in International Relations Theory and International Relations (Research)

This information is for the 2020/21 session.

Teacher responsible: Dr Peter Wilson CBG.10.10

Availability: This course is compulsory on the MSc in International Relations (Research) and MSc in International Relations Theory. This course is not available as an outside option.

Course content: MSc students are required to write a 10,000 word dissertation on a topic within the field of IR approved by the student's academic mentor. The dissertation need not be an account of original research and may rely on secondary sources.

Teaching: There will be an initial lecture in the MT providing an overview about the Dissertation process. This will be followed by further sessions later in MT and LT on choosing a topic and research question, research design and components of a thesis and case selection and case analysis. A further final 'troubleshooting' session will be held in ST. Students submit the initial topic and research question in LT; and a more detailed dissertation plan later in LT

Assessment: Dissertation (100%, 10000 words) in August.

IR487 Half Unit

Critical Theories of International Relations

This information is for the 2020/21 session.

Teacher responsible: Dr Tristen Naylor

Availability: This course is available on the MSc in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines the ways that different theories conceive, analyse and critique the character of international relations. The purpose of the course is to provide a thorough interrogation of these theories, exploring debates both within and between them. Theoretical approaches to be considered include: Critical theory; post-colonialism; post-structuralism; race and empire, and gender and feminism. The course also interrogates issues relating to the philosophy of

science and philosophy of history.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

In line with departmental policy, there will be a reading week in week 6 LT.

Formative coursework: Students will be expected to produce 2 essays in the LT.

Students are required to submit formative coursework (two 2,000-word essays) and to deliver at least one formal seminar presentation. All students are expected to prepare for and participate in seminar discussions.

Indicative reading: Chris Brown and Kirsten Ainley (2010) *Understanding International Relations*, 4th Ed. (Palgrave Macmillan); Patrick Jackson (2010), *The Conduct of Inquiry in International Relations*, (London: Routledge); Christian Reus-Smit and Duncan Snidal (eds, 2010), *The Oxford Handbook of International Relations*, (Oxford: Oxford University Press); Scott Burchill et al (eds, 2009), *Theories of International Relations*, 4th ed. (London: Palgrave).

Assessment: Essay (100%, 4000 words) in the ST.

IR499

Dissertation in International Relations

This information is for the 2020/21 session.

Teacher responsible: Prof John Sidel CBG.3.35

Availability: This course is compulsory on the MSc in International Relations and MSc in International Relations (LSE and Sciences Po). This course is not available as an outside option.

Course content: All MSc IR student are required to write a 10,000-word dissertation on a topic within the field of IR, to be determined in consultation with their academic mentors. The dissertation does not need to entail original empirical research and may rely solely on secondary sources.

Teaching: All MSc IR students will be assigned dissertation supervisors before the end of the Michaelmas Term. The Department will allocate dissertation supervisors on the basis of the relevant expertise and availability of members of academic staff, with student preferences taken into consideration. Dissertation supervisors will be available to provide guidance in one-on-one meetings and through other forms of communication over the late Michaelmas, Lent, and Summer terms. Thereafter students are expected to work independently on their dissertations without further supervision.

In addition, the Department will provide support by offering a number of lectures and workshops throughout the academic year. An introductory lecture in the Michaelmas Term will provide an overview of the MSc Dissertation and the processes involved in terms of requirements, oversight and supervision, research and writing, submission and assessment. Bespoke workshops will be offered in the Michaelmas, Lent, and Summer terms in collaboration with LSE Life. In the Lent Term workshop, students will be split into four separate groups, within which Dissertation outlines will be presented for comments, questions, and suggestions from other students. The MSc IR programme director will also offer a question-and-answer session in the Summer Term in conjunction with the LSE Life workshop. Over the summer period the Department will also offer 'drop in' sessions for students with individual queries.

Assessment: Dissertation (100%, 10000 words) in August.

LL468 Half Unit

European Human Rights Law

This information is for the 2020/21 session.

Teacher responsible: Dr Kai Möller

Availability: This course is available on the LLM (extended part-

time), LLM (full-time), MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students.

Course content: The course will offer a theoretically informed introduction to the law of the European Convention on Human Rights. It will focus on both the doctrinal framework that the European Court of Human Rights has developed – in particular: proportionality, the margin of appreciation, negative and positive obligations, the living instrument doctrine, and the emerging consensus doctrine – and the substantive questions of what the values underlying human rights are and what these values require in specific contexts. With regard to the latter, more philosophical, aspect, we will pay special attention to the idea of human dignity, exploring in some depth the Court's view that respect for human dignity [and human freedom] is the 'very essence' of the Convention.

Topics include: An introduction to the European Convention. Basic concepts of European Convention law: proportionality, the margin of appreciation, living instrument, emerging consensus. Human dignity - 'the very essence' of the Convention? Freedom from torture and inhuman or degrading treatment or punishment and the role of religious arguments in human rights law. The right to freedom of expression and the protection of offensive expression. Militant democracy and democratic backsliding in Europe. The right to private life and the enforcement of morality. The right to freedom of religion and religious pluralism in Europe.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: There will be a formative assessment, its format to be confirmed at the start of the course.

Indicative reading: There is no single text covering the course and required readings will be uploaded to Moodle before the seminar. The readings will consist of a mixture of cases and theoretical materials. The following are useful textbooks:

- Jacobs, White and Ovey, *The European Convention on Human Rights*, 8th edn (OUP 2020)
- Harris, O'Boyle and Warbrick, *Law of the European Convention on Human Rights*, 4th edn (OUP 2018).

A strong European perspective is to be found in:

- van Dijk, van Hoof, van Rijn and Zwaak (eds), *Theory and Practice of the European Convention on Human Rights* 5th edn (Intersentia, 2018)

Very good edited books include:

- Brems and Gerards (eds), *Shaping Rights in the ECHR* (CUP 2013)
- Follesdal, Peters and Ulfstein (eds), *Constituting Europe* (CUP 2013)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL469 Half Unit Not available in 2020/21

UK Human Rights Law

This information is for the 2020/21 session.

Teacher responsible: Prof Conor Gearty NAB 6.11

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where

regulations permit.

Those seeking to take it will need to discuss this first with the course teacher: the course is quite legal in focus.

This course is capped at 30 students.

Course content: This course will be made up of a detailed study of the UK Human Rights Act. The origins and the political background to the Act will be explained, and the structure of the measure will be fully elaborated, relying on the text of the Act itself but also on the burgeoning case law that accompanies the measure. The course will identify the principles that underpin the Act and explain its proper place in English law. It will also explore the wider constitutional implications of the measure, looking at its effect on the relationship between courts and Parliament. The political context in which the measure has had to operate will be considered, and the relationship with the change to human rights protection likely to follow the UK's departure from the EU will be considered.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: The key text is now C A Gearty, *On Fantasy Island. Britain, Strasbourg and Human Rights* (OUP, 2016). See also R Costigan and R Stone, *Civil Liberties and Human Rights* (11th edn, OUP, 2017); Kavanagh, *Constitutional Review under the UK Human Rights Act* (Cambridge, 2009); Hickman, *Public Law After the Human Rights Act* (Hart, 2010); Gearty, *Principles of Human Rights Adjudication* (Oxford University Press, 2004).

While these books will be referred to, students will also be expected to read cases: they will receive a detailed Reading list for each topic.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

This subject is examined by one two-hour paper, composed of at least six questions of which two must be attempted. There will be a fifteen minute reading time during which the exam paper may be written on.

LL475 Half Unit

Terrorism and the Rule of Law

This information is for the 2020/21 session.

Teacher responsible: Prof Conor Gearty NAB.6.11

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Conflict Studies, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available across all courses and potentially suitable for all but is particularly designed for LLM, MSc Conflict Studies, MSc Human Rights students.

This course is capped at 60 students.

Course content: This course will provide a theoretical and historical introduction to the concept of terrorism. It will critically consider definitions of terrorism, and analyse the relationship between terrorism and the right to rebel, and the right to engage in civil disobedience. The historical development of the idea of 'terrorism' from the late eighteenth century through to the present will then be traced, with the emphasis on locating the practice of political terror in its political and military/quasi-military context. The role of international law generally and international human rights law in particular in the context of terrorism and anti-terrorism action will be considered in detail. The course will teach the material in context, so the subject will be analysed by reference to particular situations where necessary, e.g. Northern Ireland, the Palestine/Israel conflict and the post 11 September 'war on terror'. The recent extension of state controls from terrorism to 'extremism' will be analysed. The aim of the course is to give the student a good critical understanding of this most controversial of

subjects, and also to impart an understanding of the role of law in shaping the fields of terrorism and of counter-terrorism.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: One 2,000 word essay.

Indicative reading: There is no set text though reliance is made on the work of authors such as Richard English, Adrian Guelke, Lawrence Freedman, Igor Primoratz, Paul Wilkinson and the course teacher Conor Gearty. Students will receive a detailed Reading list for each topic, which will include legal cases from time to time. Two recommended texts are Gearty, *Liberty and Security* (Polity Press, February 2013) and English, *Terrorism How to respond* (Oxford 2009).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

This subject is examined by one two-hour paper, composed of at least six questions of which two must be attempted. There will be a fifteen minute reading time during which the exam paper may be written on.

LL4A6 Half Unit

Climate Change and International Law

This information is for the 2020/21 session.

Teacher responsible: Dr Stephen Humphreys NAB 6.15

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Environmental Policy and Regulation, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course covers international law in relation to climate change with a view to assessing how the harms and burdens associated with climate change are governed and allocated in different legal regimes. The course adopts the stance that the political and ethical questions raised by climate change cannot be addressed by reference to climate change law or international environmental law alone. Climate change gives rise to a series of profound problems touching upon a range of bodies of law (trade, human rights, migration, state responsibility) in a complex political and ethical environment. In approaching climate change as a concrete concern relevant to these various bodies of law and practice, the course will address the normative bases for choosing between actions designed to prevent and/or manage climate change and its consequences, given developmental imperatives and the concerns raised by the 'fragmented' nature of international law. Projected seminars include: climate change science, politics and ethics; the theory of international law; international environmental law; trade law; human rights law; migration law. The course includes two case studies, from among the following: climate technology transfer; carbon markets; food security.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: One 1,800 word essay to be submitted by

the end of week 6.

Indicative reading: IPCC, Fifth Assessment Report, Cambridge UP (2013-14); IPCC, Special Report on Global Warming of 1.5C; Rosemary Rayfuse and Shirley Scott (eds), *International Law in the Era of Climate Change*, Edward Elgar (2011); Stephen Gardiner, Simon Caney, Dale Jamieson and Henry Shue (eds), *Climate Ethics: Essential Readings*, Oxford UP (2010); Stephen Humphreys (ed.), *Climate Change and Human Rights*, Cambridge UP (2010); Larry Lohmann, *Carbon Trading*, Dag Hammarskjöld Foundation (2006); Margaret Young (ed.), *Regime Interaction in International Law: Facing Fragmentation*, Cambridge UP (2012).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4A8 Half Unit

International Law and the Use of Force

This information is for the 2020/21 session.

Teacher responsible: Dr Devika Hovell, NAB 6.32

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Conflict Studies, MSc in Gender, Peace and Security, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Some prior knowledge of international law is useful but not essential.

Course content: This half-unit course examines the law relating to when it is permissible to use force (*jus ad bellum*). The aim of this course is to develop an understanding of the principles of international law that regulate the use of force in international society. It concentrates on the prohibition of resort to force in Article 2(4) of the United Nations Charter and the exceptions to that prohibition. It looks in detail at the right of self-defence, humanitarian intervention and the responsibility to protect, pro-democratic intervention, the protection of nationals and the criminalization of aggression. The use of force by or with the authorization of the United Nations is also considered.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 2,000 word essay.

Indicative reading: A detailed reading list will be issued at the first seminar. See, in particular: Dinstein, *War, Aggression and Self-Defence* (5th ed, 2011); Gray, *International Law and the Use of Force* (3rd ed., 2008).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4A9 Half Unit Not available in 2020/21

Law in War

This information is for the 2020/21 session.

Teacher responsible: Dr Stephen Humphreys NAB 6.15

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights, MSc in Women, Peace and Security and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where

regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Some prior knowledge of international law is useful but not essential. LL4A8 is useful but not essential.

Course content: This course covers the international law governing the conduct of hostilities (*jus in bello*, also known as the law of armed conflict (LOAC) or international humanitarian law (IHL))—as distinct from the law on the resort to force (*jus ad bellum*), which is covered in a separate course (LL4A8). The course will take a critical and historical approach to the international regulation and facilitation of armed conflict. As well as the laws governing the means and methods of war ('Hague' law), the 'protected' groups hors de combat ('Geneva' law), and the distinction between international and non-international armed conflict, the course will cover 'lawfare' more generally: the recourse to law as a means of waging war. It will examine the application of the laws of war, including occupation law, in historical, actual, and ongoing conflicts, including recent wars in Iraq, Afghanistan, and Syria, the 'war on terror', and the Occupied Palestinian Territories. Students can expect to have a thorough grasp of the principles and regulations governing the conduct of hostilities, the context and efficacy of enforcement mechanisms, and a critical understanding of the normative and political stakes of international law in this area.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: Students have the option of submitting a 1,800 word essay to be submitted at the end of week 6.

Indicative reading: It is worthwhile acquiring the following book: Yoram Dinstein, *The Conduct of Hostilities Under the Law of International Armed Conflict* (Cambridge UP, 3rd ed., 2016). The following book of primary texts may be taken into an exam (unannotated) and may be worth acquiring: Roberts and Guelff, *Documents on the Laws of War* (Oxford UP, 2000); Michael Walzer, *Just and Unjust Wars* (Basic books, 4th ed. 2006); David Kennedy, *Of Law and War* (Princeton UP, 2006); Geoffrey Best, *War and Law Since 1945* (Oxford UP, 1997). Current debates in this field are very lively on blogs such as *Opinio Juris*, *EJILTalk!* and *Lawfare*. Detailed readings for each seminar will be made available on Moodle.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AD Half Unit Not available in 2020/21

Rethinking International Law: International Law and Contemporary Problems

This information is for the 2020/21 session.

Teacher responsible: Prof Susan Marks NAB 7.14

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is part of the following LLM specialism: Public International Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: There are no formal prerequisites.

Course content: This course is primarily designed for students who have already had some exposure to public international law and wish to deepen their understanding of the international legal dimensions of contemporary problems. Each week the relation will be explored between international law and a different global issue or theme, such as war, poverty, terrorism, humanity, and territory. Course readings will encompass both legal scholarship and relevant writing by scholars from other disciplines (geography, anthropology, philosophy, literary studies, etc.).

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Students are expected to have done the set reading and be willing to participate in seminar discussion.

There will be a reading week in week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading lists will be provided for each seminar on Moodle. Relevant readings are likely to include: David Kennedy, *Of War and Law*; Sundhya Pahuja, *Decolonising International Law: Development, Economic Growth and the Politics of Universality*; and Balakrishnan Rajagopal, *International Law from Below: Development, Social Movements and Third World Resistance*.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AE Half Unit Not available in 2020/21

Rethinking International Law: International Legal Thought

This information is for the 2020/21 session.

Teacher responsible: Prof Gerry Simpson NAB 6.13

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is part of the Public International Law specialism.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Course content: This course can be thought of as an argument that international law is a literary and historical project that has come to represent the "last of the humanities": a space (enclaval, utopian, imaginative) where a different politics might be conjured – even perhaps advanced and defended – amidst the drive to technique and professionalisation often/sometimes found in the humanities in general. So, we begin with this idea before tracing a history commencing in 1919 with the apparent revitalisation of international law (and the re-colonisation of The Levant) at Versailles and in Geneva (Weeks 2 and 3). In Weeks 4 to 6, we turn to the Cold War as a legal project and international law as a Cold War project by de-centring the UN (Week 4), re-inhabiting nuclear war as a lawful moment (Week 5) and understanding neutrality or non-alignment as an international legal doctrine and a Cold War ideal. The course ends with three thematic classes on international law as lived experience, international law as historical (anti-) method, and international law as imaginative bet.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Students are expected to have done the set reading and be willing to participate in seminar discussion.

There will be a Reading Week in Week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading lists will be provided for each seminar on Moodle. Readings likely to be set include a selection of international legal texts (including work-in-progress and "new authors") and readings from the fields of intellectual history, 18th century literature and political theory. The key works, apart from the usual contemporary international lawyers, are by Carl Schmitt, Friedrich Schiller and David Scott

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AF Half Unit

Principles of Global Competition Law

This information is for the 2020/21 session.

Teacher responsible: Dr Niamh Dunne

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Competition, Innovation and Trade; Corporate and/or Commercial Law; European Law; International Business Law.

This course is capped at 60 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This module provides an overview of the major features of contemporary competition (antitrust) law. Competition law comprises a set of legal rules which aim to control the socially-harmful exercise of private market power, whether through hardcore cartels, single firm monopoly behaviour, or mergers that reduce structural competition. This is a discipline that has undergone a remarkable process of expansion in recent decades, and competition laws are now actively enforced in around 130 jurisdictions worldwide. Instead of focusing on a particular regime, the module puts an emphasis on the fundamental debates underlying the adoption and evolution of this field, addressed in comparative perspective. Examples drawn primarily from EU and US competition law will be generally used by way of illustration. The course assumes no prior knowledge of competition law or economics, but aims to equip students to understand and analyse the key substantive elements found within most competition regimes. These include:

- Competition policy and basic concepts of antitrust economics;
- Anti-competitive agreements, including cartels and vertical restraints;
- Unilateral conduct rules, including refusal to deal and exclusionary practices; and
- Merger control, including horizontal and vertical mergers.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: All students are expected to produce one 1,500-word formative essay during the course.

Indicative reading:

- Whish & Bailey, *Competition Law* (9th ed., 2018);
- Jones & Sufrin, *EU Competition Law: Cases and Materials* (7th ed., 2019);
- Roger van den Bergh, *Comparative Competition Law and Economics* (2017); and
- Hovenkamp, *The Antitrust Enterprise* (2005).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AG Half Unit

Competition Law, Technology and Intellectual Property

This information is for the 2020/21 session.

Teacher responsible: Prof Pablo Ibanez Colomo

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Competition, Innovation and Trade; Corporate and/or Commercial Law; European Law; International Business Law. This course is capped at 60 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Prior knowledge of Competition Law is desirable, but not essential.

Course content: This module addresses some of the most topical and intellectually challenging aspects of contemporary Competition Law. The emphasis will be put on US antitrust and EU Competition Law, but developments from other jurisdictions are discussed where relevant. The module examines, inter alia, the application of competition law in high-technology industries as well as its intersection with intellectual property (standard-setting agreements and issues arising in relation to the enforcement of patents in the pharmaceutical sector).

Topics may include the following:

- Competition Law, Intellectual Property and Innovation
- Competition Law in High-Technology Markets (including investigations involving the Big Tech giants like Google and Amazon)
- Online distribution and brand protection over the Internet
- Competition Law and the pharmaceutical industry
- Standard-setting and technology licensing

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Whish, *Competition Law* (9th edn, 2018); Jones & Sufrin, *EU Competition Law: Cases and Materials* (4th edn, 2016); Elhauge & Geradin, *Global Competition Law and Economics* (3rd edn, 2018); Hovenkamp, *The Antitrust Enterprise* (2005).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AH Half Unit Corporate Governance

This information is for the 2020/21 session.

Teacher responsible: Dr Eva Micheler

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students (or two groups of 30 students each, i.e. 60 students depending on demand). LLM Specialisms This course will be relevant to the following LLM specialisms: Corporate and/or Commercial Law; Corporate and Securities Law; International Business Law.

Pre-requisites: Students should have some knowledge of corporate law.

Course content: This course will focus on the corporate governance of companies. The course will be taught largely on a comparative basis, focussing on English and German law. We will also cover the relevant EU materials. Topics such as the following will be discussed:

- 1- Corporate governance: law, codes and theory
- 2- Allocation of decision making within the company
- 3- Board structure (one tier boards/two tier boards/board committees) and board remuneration
- 4- Directors' duties – proper purpose
- 5- Directors' duties – duty of care/business judgement

- 6- Directors' duties – related party transactions and corporate opportunities
- 7- Auditors
- 8- Stakeholders
- 9- Extended reporting and employee interests
- 10- Shareholder activism/stewardship

These topics may slightly change from year to year reflecting current developments.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: All students are expected to produce one 1,500 word formative essay during the course.

Indicative reading: Gordon and Ringe, *The Oxford Handbook of Corporate Law and Governance* (OUP 2018); M Moore and M Petrin, *Corporate Governance: Law, Regulation and Theory* (Palgrave 2017)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AJ Half Unit Corporate Rescue and Reorganisation

This information is for the 2020/21 session.

Teacher responsible: Ms Sarah Paterson

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Corporate and/or Commercial Law. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Course content: This course focuses on registered companies and is concerned with the use of formal legal procedures to rescue financially distressed companies and businesses. US, UK and European law procedures and initiatives are examined. Topics include: rescuing the business and assets of a company as a going concern; restructuring and small companies; restructuring and large companies; the reform agenda; and theory of rescue and restructuring.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 1,500 word essay.

Indicative reading: A full Reading List will be distributed during the course. The recommended text is V. Finch and D. Milman, *Corporate Insolvency Law: Perspectives and Principles* (Cambridge University Press, 2009) (3rd edition). Wider background reading will include some comparative law reform and other material including: The Report of the Review Committee on Insolvency Law and Practice (Cork Report) (Cmd 8558, 1982); T H Jackson, *The Logic and Limits of Bankruptcy Law*, Harvard (1986).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AK Half Unit

Principles of Corporate Insolvency Law

This information is for the 2020/21 session.

Teacher responsible: Ms Sarah Paterson

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Corporate and/or Commercial Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: It is recommended that students have completed Corporate Rescue and Reorganisation (LL4AJ), although this is not essential.

Course content: This course focuses on registered companies and is concerned with the principles and policies underlying the realisation and distribution of assets in an insolvency. The impact of these procedures and approaches on third parties such as corporate groups, secured and unsecured creditors, directors and employees, is also considered. Topics include: setting aside transactions; the *pari passu* principle and the distributional order of priority in insolvency; secured creditors and security devices; the problem of corporate groups; company directors in troubled times; employees in distress; and EC and international recognition of insolvency proceedings.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: One 1,500 word essay.

Indicative reading: A full Reading List will be distributed during the course. The recommended text is V. Finch, *Corporate Insolvency Law: Perspectives and Principles* (Cambridge University Press, 2009) (2nd edition).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AL Half Unit

International Business Transactions: Commercial Litigation

This information is for the 2020/21 session.

Teacher responsible: Dr. Jacco Bomhoff, NAB 6.09

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Specialism International business law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Knowledge of conflict of laws (private international law) would be useful but is not essential. A good general understanding of commercial law is essential.

Course content: Jurisdictional problems arising in litigation resulting from international business transactions. The following topics will be studied from the point of view of English (common and statute) law, European Union law, Canadian law and US law: a. General jurisdiction over companies and individuals; b. Jurisdiction over branches and agents; c. Specific jurisdiction over contract and tort claims; d. Constitutional limitations on jurisdiction in the United States.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students

will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Core textbook: Trevor C Hartley, *International Commercial Litigation* (Cambridge University Press, 2nd edn, 2015, or newer) (selected chapters). Further reading: Born (Gary B) and Rutledge (Peter B), *International Civil Litigation in United States Courts: Commentary and Materials* (Wolters Kluwer, Austin, Boston, Chicago, New York, the Netherlands, 6th edn, 2018); Fentiman (Richard), *International Commercial Litigation* (Oxford University Press, Oxford, 2nd edn, 2015).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AM Half Unit Not available in 2020/21

International Business Transactions: Advanced Procedure and Tactics

This information is for the 2020/21 session.

Teacher responsible: Prof Trevor Hartley, NAB 7.24

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Specialism International business law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students must have completed International Business Transactions: Commercial Litigation (LL4AL). Students must have taken LL4AL International Business Transactions: Commercial Litigation or obtained equivalent knowledge elsewhere. Knowledge of conflict of laws (private international law) would be useful but is not essential. Non-LLM students must have a full law degree (a degree which fulfils the degree requirement for becoming a lawyer in your country). A good general understanding of commercial law is essential.

Course content: Litigation resulting from international business transactions. The following topics will be studied from the point of view of European Union law, English law, Canadian law and US law: choice-of-court agreements; forum non conveniens and lis pendens; antisuit injunctions; freezing orders; arbitration and the Brussels Regulation; obtaining evidence abroad; recognition and enforcement of foreign judgments.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in Week 6 of LT.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Core textbook: Trevor C Hartley, *International Commercial Litigation* (Cambridge University Press, 3rd edn, 2020) (specified chapters only). For reference: Trevor C Hartley, *Civil Jurisdiction and Judgments in Europe* (Oxford University Press, 2017). Further reading: Born (Gary B) and Rutledge (Peter B), *International Civil Litigation in United States Courts: Commentary and Materials* (Wolters Kluwer, Austin, Boston, Chicago, New York, the Netherlands, 6th edn, 2018); Fentiman (Richard), *International Commercial Litigation* (Oxford University Press, Oxford, 2nd edn, 2015); Hartley, "Jurisdiction in Conflict of Laws – Disclosure, Third-Party Debt and Freezing Orders" (2010) 126 LQR 194

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AN Half Unit Not available in 2020/21

International Business Transactions: Conflict of Laws, Extraterritoriality, and Global Governance

This information is for the 2020/21 session.

Teacher responsible: Dr Jacco Bomhoff NAB 6.09

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Knowledge of conflict of laws (private international law) would be useful but is not essential.

Course content: States often aim to regulate activities that transcend their own borders. When such measures are challenged or enforced through litigation, domestic courts become important sites of global governance. This course brings together perspectives from tort & company law, private international law (conflict of laws), public law, and regulation theory, to study such forms of extraterritorial and transnational regulation. Questions for discussion include: What law should a court in England apply to a case involving environmental damage allegedly caused abroad by a multinational mining company? Should companies operating in China ever be bound by US competition law rules or other US regulations? Should the UK Human Rights Act apply to actions by British soldiers in a foreign country? Topics to be studied throughout the course are: (1) Choice of law in tort law and in company law (especially in Europe and the US); (2) Extraterritorial application of statutes (incl. competition law, securities law, and environmental regulations); (3) extraterritorial application of constitutional- and human rights law; (4) theories of transnational regulation (e.g. institutional roles of courts, regulatory arbitration).

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Core textbook: Trevor C Hartley, *International Commercial Litigation* (Cambridge University Press, 2nd edn, 2015, or newer) (specified chapters only). Further reading: Christopher Whytock, *Domestic Courts and Global Governance*, 84 *Tulane Law Review* (2009); Campbell McLachlan, *Foreign Relations Law* (Cambridge University Press, 2016); Brilmayer, Goldsmith & O'Hara O'Connor, *Conflict of Laws: Cases and Materials* (7th edn., 2015).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Canadian law and US law: 1) Principles and theories of choice of law; 2) Proof and application of foreign law; 3) Contracts: applicable law; 4) The international reach of legislation for the regulation of business and the protection of consumers and employees; 5) The private international law aspects of boycotts and embargoes; 6) Exchange controls; 7) Currency problems in international contracts; 8) The international aspects of property transactions; 9) The recognition of foreign expropriations and other governmental acts affecting property (including financial assets).

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Core textbook: Trevor C Hartley, *International Commercial Litigation* (Cambridge University Press, 3rd edn, 2020) (selected chapters). Further reading: Dicey, Morris & Collins, *The Conflict of Laws* (Sweet and Maxwell, London, 15th edn, 2012 by Sir Lawrence Collins with specialist editors); Plender (Richard) and Wilderspin (Michael), *The European Private International Law of Obligations* (Sweet & Maxwell, London, 4th edn, 2015)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AQ Half Unit Not available in 2020/21

Constitutional Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Loughlin NAB 7.12

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Human Rights Law, Legal Theory, Public Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course examines the role of constitutions and the nature of constitutional discourse. It considers the ways in which theorists have advanced understanding of constitutions and devised solutions to a range of constitutional questions. The course addresses the following topics: constitutions, constitutional order, constitutional foundation; constitutionalism; constitutional exception; constitutional rights; constitutional democracy; constitutional adjudication; constitutional recognition; and cosmopolitan constitutionalism.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Much of the reading for the course consists of readings available online and the course is delivered through Moodle. A background text is Martin Loughlin, *The Idea of Public Law* (OUP, 2003).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AP Half Unit

International Business Transactions: Contracts and Property

This information is for the 2020/21 session.

Teacher responsible: Prof Trevor Hartley NAB 7.24

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Knowledge of conflict of laws (private international law) would be useful but is not essential. Good general understanding of commercial law is essential. Non-LLM students must have a full law degree (a degree which fulfils the degree requirement for becoming a lawyer in your country).

Course content: The following topics will be studied from the point of view of European Union law, English (common and statute) law,

LL4AR Half Unit

International Criminal Law: Core Crimes and Concepts

This information is for the 2020/21 session.

Teacher responsible: Prof Gerry Simpson NAB 6.13

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Criminology and Criminal Justice, Public International Law, Human Rights Law. This course is capped at 30 students.

Course content: The course looks at the rules, concepts, principles, institutional architecture, and enforcement of what we call international criminal law or international criminal justice, or, sometimes, the law of war crimes. The focus of the course is the area of international criminal law concerned with traditional "war crimes" and, in particular, four of the core crimes set out in the Rome Statute (war crimes, torture as a crime against humanity, genocide and aggression). It adopts a historical, philosophical and practical focus throughout, though the course is mainly directed at the conceptual problems associated with the prosecution of war criminals and, more broadly, legalised retribution. Attention, in this respect, will be directed towards the moral and jurisprudential dilemmas associated with bureaucratic criminality and individual culpability. Topics might include Pre-History (Vitoria, Grotius, Gentili, Cicero), Versailles, Nuremberg and Tokyo, the Trial of Adolf Eichmann, Crimes Against Humanity, the Crime of Aggression, Anti-Anti-Impunity, International Criminal Law's Historical Method.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Gerry Simpson, *Law, War and Crime*, (2007). Philippe Sands, *East-West Street*, (2017). Georg Schwarzenberger, *International Law and Totalitarian Lawlessness*, (1943). Judith Shklar, *Legalism*, (1964). Maurice Hankey, *Politics, Trials, Errors* (1950). Christine Schwobel, *Critical Approaches to International Criminal Law: An Introduction* (2015). Sam Moyn, *The Last Utopia*, (2010). Mark Lewis, *The Birth of the New Justice: The Internationalization of Crime and Punishment, 1919-1950* (2014)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

of international criminal law. Rather than examining the history and core crimes, the course focuses on the fora for prosecution of international crimes and the practice, procedure and politics of international prosecutions.

In terms of the forum for prosecution, we examine the ad hoc international criminal tribunals for Rwanda and the former Yugoslavia and hybrid tribunals such as the Special Tribunal for Lebanon, the Extraordinary Chambers in the Courts of Cambodia and the Special Court for Sierra Leone. We then consider the opportunities for prosecution of international crimes in domestic courts, looking in particular at the principle of universal jurisdiction. Finally, we turn to the International Criminal Court. We consider the foundation of authority of international criminal tribunals, the relationship between the various international criminal tribunals and controversial questions about jurisdiction in current cases. In terms of practice and procedure, we examine the modes, limits, exclusion and enforcement of individual criminal responsibility. We will look at questions, theory and case law surrounding modes of liability, immunities, defences and state cooperation. Finally, we will consider future challenges for the prosecution of international crimes. The course will respond to current controversial issues in international criminal law, such as Palestine's accession to the Rome Statute, the selectivity of international criminal prosecutions, the relationship between domestic legal systems such as Libya and the ICC and the implications of these issues for the legitimacy of the international criminal law project.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading lists will be provided for each week's seminar on Moodle. Indicative reading includes Jose Alvarez, 'Crimes of States/Crimes of Hate: Lessons from Rwanda' (1999) 24 *Yale Journal of International Law* 365; Henry Kissinger, 'The Pitfalls of Universal Jurisdiction', *Foreign Affairs* (July 2001); Dapo Akande & Sangeeta Shah, 'Immunities of State Officials, International Crimes and Foreign Domestic Courts' (2010) 21(4) *European Journal of International Law* 815. Students may wish to refer to Robert Cryer et al., *An Introduction to International Criminal Law and Procedure* (Cambridge, 2010), 2nd edition.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AT Half Unit

Regulation: Strategies and Enforcement

This information is for the 2020/21 session.

Teacher responsible: Prof Veerle Heyvaert NAB7.06

Also taught by: Prof. Nicola Lacey NAB 6.12

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is NOT available for students of the MSc Regulation programme.

This course will be relevant to the following LLM specialisms: Banking Law and Financial Regulation; Corporate and/or Commercial Law; Criminology and Criminal Justice; Information Technology, Media and Communications Law; Intellectual Property Law; Legal Theory; and Public Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEForYou.

Course content: The course provides an introduction to key topics

LL4AS Half Unit Not available in 2020/21

International Criminal Law: Prosecution and Practice

This information is for the 2020/21 session.

Teacher responsible: Dr Devika Hovell

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Criminology and Criminal Justice, Public International Law, Human Rights Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEForYou.

Course content: This course examines the practice and procedure

relating to regulatory strategies and their implementation. It deals with issues from a systemic and comparative perspective and draws on approaches encountered in public administration, socio-legal studies and institutional economics. Topics include:

- Introduction: What is Regulation and why regulate?
- Regulation Strategies: Command-and-control; regulating through rules, standards and principles; alternative approaches including emissions trading; and self-regulation
- Risk regulation as a regulatory paradigm
- Enforcement: tools, strategies and principles
- Regulatory Policy: Cost/benefit Assessment, Regulatory Impact Assessment and Better Regulation;
- Regulatory competition; and
- Transnational Regulation

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 1,000 - 1,500 (upper limit) word essay. Students will also have the opportunity to sit a mock exam.

Indicative reading: R Baldwin, M Cave and M. Lodge Understanding Regulation 2nd ed.(OUP, 2012); R. Baldwin, M. Cave and M. Lodge (ed.) Oxford Handbook on Regulation (OUP, 2010) Ian Ayres and John Braithwaite, Responsive Regulation: Transcending the Deregulation Debate by (OUP, 1992); V. Heyvaert, Transnational Environmental Regulation and Governance (CUP, 2019) B. Morgan and K. Yeung, An Introduction to Law and Regulation (CUP, 2007).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AU Half Unit Not available in 2020/21 Regulation: Legal and Political Aspects

This information is for the 2020/21 session.

Teacher responsible: Prof Veerle Heyvaert

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Law and Accounting, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is NOT available for students of the MSc Regulation programme.

This course will be relevant to the following LLM specialisms: Banking Law and Financial Regulation; Corporate and/or Commercial Law; Criminology and Criminal Justice; Information Technology, Media and Communications Law; Intellectual Property Law; Legal Theory; and Public Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: Students must have taken Regulation: Strategies and Enforcement (LL4AT) .

Course content: The course aims to give students an essential grounding in theories of regulation as these relate to the evaluation of regulatory regimes and the challenges of accounting for regulatory practice. Different ways of understanding regulatory developments will be discussed as will the set of challenges that arise when regulation is carried out by numbers of regulators at different levels of government. Topics dealt with will include:

- What is Good Regulation?

- Accountability & Regulation
- Regulation and Cost Benefit Analysis
- The Better Regulation Movement
- Self-Regulation
- Rules, Standards and Principles
- Regulatory Competition
- Regulatory Networks
- Lenses for Viewing Regulation
- The Future of Regulation

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: R Baldwin, M Cave and M. Lodge, Understanding Regulation 2nd ed.(OUP, 2012); R. Baldwin, M. Cave and M. Lodge (ed.) Oxford Handbook on Regulation (OUP, 2010) R Baldwin, C Hood & C Scott, Socio-Legal Reader on Regulation (OUP, 1998); Responsive Regulation: Transcending the Deregulation Debate by Ian Ayres and John Braithwaite (OUP, 1992). B. Morgan and K. Yeung (2007,) An Introduction to Law and Regulation (Cambridge University Press, 2007); J. Jordana and D. Levi-Faur (2004/eds), The Politics of Regulation (Edward Elgar, 2004) A Ogus, Regulation (OUP, 1994); R Baldwin, Rules and Government (OUP, 1995); I Ayres & J Braithwaite, Responsive Regulation (OUP, 1992).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AV Half Unit

International Economic Law and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Mona Pinchis-Paulsen

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: None. The course will provide students with a brief background in international economic law, however students may also find it helpful to take International Trade Law (LL4B1) and Investment Treaty Law (LL4E7). Students with no background in international trade law, may wish to consult a succinct summary of international trade law beforehand, see, for example, M. Trebilcock & J. Trachtman, Advanced Introduction to International Trade Law (Elgar, 2nd ed., 2020).

Students will benefit from an introduction into the foundations of public international law. Students with no previous background in public international law may find it helpful to consider consulting a standard textbook such as M. Evans (ed.), International Law (OUP, 5th ed., 2018) or J. Crawford, Brownlie's Principles of Public International Law (OUP, 9th ed., 2019).

Course content: This course is designed for lawyers and policymakers who seek a deeper understanding of international economic governance and development in the international political economy. The focus of the course is how international economic law and its institutions interact with major concepts and debates in international development studies. The course adopts a global governance model, moving beyond a state-centric focus towards a more complicated picture of the world, examining regime design, institutions, corporations and trans-national networks, and the disaggregated state. Students will examine economic growth through theoretical, historical, and practical approaches to learn how the trade, finance, and international investment regimes establishes principles, standards, and mechanisms which impact economic development. In addition, students will use an historical lens to assess competing perspectives of globalisation as they work to

understand processes of development and international economic governance. Overall, the course seeks to allow students to imagine new structures, focus, and ambitions for international economic law in development processes.

Topics to be covered may include: the law and development movement; the new developmentalism; the institutionalisation of economic development; the concept of equitable treatment; the idea of common concern of humankind; food security and agricultural trade; special and differential treatment for developing countries; public interests in international investment law; responsibilities of multi-national corporations; the concept of sustainability and its application in trade, investment, and finance; international health; gender equality; and the increasing role of technology and data.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Reading lists will be provided for each seminar on Moodle. Relevant readings may include: H.W. Arndt, *Economic Development: The History of an Idea* (Chicago UP, 1987); J. Bonnitche et al., *The Political Economy of the Investment Treaty Regime* (OUP, 2017); L. Eslava, *Local Space, Global Life: The Everyday Operation of International Law and Development* (CUP, 2015); C. Deere, *The Implementation Game: The TRIPS Agreement and the Global Politics of Intellectual Property Reform in Developing Countries* (OUP, 2009); K. Pistor, *The Code of Capital: How the Law Creates Wealth and Inequality* (Princeton UP, 2019); J. Linarelli et al., *The Misery of International Law: Confrontations with Injustice in the Global Economy* (OUP, 2018); A. Narlikar, *Power Narratives and Power Paradoxes in International Trade Negotiations and Beyond* (CUP, 2020); J. Pohl, 'Societal Benefits and Costs of International Investment Agreements,' *OECD Working Papers on International Investment* (2018); D. Rodrik, *Straight Talk on Trade: Ideas for a Sane World Economy* (Princeton UP, 2018); A. Santos et al., *World Trade and Investment Law Reimagined: A Progressive Agenda for an Inclusive Globalization* (Anthem, 2019); A. Sen, *Development as Freedom* (Random House, 1999); G. Fiti Sinclair, *To Reform the World: International Organizations and the Making of Modern States* (OUP, 2017); J. Stiglitz, 'Dealing with Debt: How to Reform the Global Financial System' (2003) 25 *Harvard International Review* 54; T. St John, *The Rise of Investor-State Arbitration* (OUP, 2018); J. Trachtman & C. Thomas, *Developing Countries in the WTO Legal System* (OUP, 2009); and K.E. Davis & M.J. Trebilcock, 'The Relationship between Law and Development: Optimists versus Skeptics' 56 (2008) *American Journal of Comparative Law* 895.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AW Half Unit Not available in 2020/21

Foundations of International Human Rights Law

This information is for the 2020/21 session.

Teacher responsible: Prof Susan Marks NAB 7.14

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is part of the following LLM specialisms: Public International Law, Human Rights Law. This course is capped at 30 students.

Pre-requisites: None

Course content: The course provides an introduction to key developments, issues and ideas that have given shape to the regime of international human rights law. We consider enduring debates around the foundations and universality of human rights, and look at a range of controversies relating to the interpretation and application of human rights treaties. Through the study of relevant concepts, norms, processes and debates, students are encouraged to develop an informed and critical assessment of the significance of international human rights law as a force for emancipatory change.

Teaching: 20 hours of lectures in the MT. 2 hours of lectures in the ST. There will be a reading week in week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading lists will be provided for each seminar on Moodle. Relevant readings may include: Charles Beitz, *The Idea of Human Rights* (2009); Conor Gearty and Costas Douzinas (eds.), *The Cambridge Companion to Human Rights Law* (2012); and Philip Alston and Frédéric Mégret, *The United Nations and Human Rights: A Critical Appraisal* (2017).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AX Half Unit Not available in 2020/21

Selected Topics in International Human Rights Law

This information is for the 2020/21 session.

Teacher responsible: Dr Margot Salomon NAB 6.16

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is part of the following LLM specialisms: Public International Law, Human Rights Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: None

Course content: This course explores the contribution and limits of international human rights law through a range of contemporary topics. We consider international human rights law and such issues as water, property, sexuality, and indigenous rights to land and resources. We also investigate overarching topics of relevance including human rights as resistance, the fragmentation of international law, and current developments at international human rights institutions. Through the study of relevant concepts, norms, processes and debates, students are encouraged to develop an informed and critical assessment of the significance of international human rights law as a force for emancipatory change.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading lists will be provided for each seminar on Moodle. Readings may include: O de Schutter, *International Human Rights Law: Cases, Material and Commentary*; P Mecklem, *Human Rights in International Law: Three Generations or One?* 3 *London Review of International Law* 1 (2015); C Clark, 'Of What Use is a Deradicalized Human Right to Water?' 17 *Human Rights Law Review* 2 (2017); W Schabas, 'The Omission of the Right to Property in the International Covenants' 4 *Hague Yearbook of International Law* (1991); J Kozma, M Nowak and M Scheinin, *A World Court of Human Rights - Consolidated Draft Statute and Commentary* (Neuer Wissenschaftlicher Verlag, 2010)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4AY Half Unit International Tax Systems

This information is for the 2020/21 session.

Teacher responsible: Eduardo Baistrocchi NAB 7.33

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: International Business Law, Taxation.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students should have at least a basic knowledge of a tax system of a country (not necessarily the UK) or be studying LL4Z1 Business Taxation.

Course content: This course examines how taxation applies to transactions in the international context. The focus is on rules that operate at an international or supra-national level, though we will look at some domestic rules that are important to international taxation and that can be found in a number of tax systems. The course will look at a series of international transactions, starting with the very basic example of an export and import of goods and culminating with the treatment of some complex and artificial structures. The features of tax systems will be studied through these transactions, particularly those features found in double tax conventions and in the law of the European Union. In the first part of the course this will be supplemented by introductions to some key foundation concepts that are needed in the study of international taxation. Throughout the course examples will be drawn from the tax systems of a range of G20 countries.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students are asked to submit one 2,000-word essay.

Indicative reading: Detailed reading lists will be provided during the course via Moodle.

Recommended preliminary reading: Avi-Yonah, Reuven S., 'Double Tax Treaties: An Introduction' (2007). Available at SSRN: <http://ssrn.com/abstract=1048441>; Baistrocchi, Eduardo A., 'The Use and Interpretation of Tax Treaties in the Emerging World: Theory and Implications' [2008] British Tax Review 352. Available at SSRN: <http://ssrn.com/abstract=1273089>; Roxan, Ian, 'Limits to Globalisation: Some Implications for Taxation, Tax Policy, and the Developing World' (January 30, 2012). LSE Legal Studies Working Paper No. 3/2012. Available at SSRN: <http://ssrn.com/abstract=1995633>

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students should have at least a basic knowledge of a tax system of a country (not necessarily the UK) or be studying LL4Z1 Business Taxation.

Course content: This course offers both theoretical and practical understanding of the fundamentals of the transfer pricing problem. The course will begin with an overview of the transfer pricing issue, including its history, current importance and global trends. General concepts, special rules and the different types of transfer pricing transactions will be discussed, as well as the specific rules and methods for tangible goods, intangibles, services and loans. Finally, the course will provide a review of transfer pricing controversy in G20 countries.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

This is based on a format of lecture-discussions with the possibility of guest speakers where appropriate and depending on numbers, corresponding fortnightly one-hour classes.

There will be a reading week in week 6.

Formative coursework: Students are asked to submit one 2,000 word essay.

Indicative reading: Detailed reading lists will be provided during the course via Moodle.

Recommended preliminary reading

E. Baistrocchi, 'Transfer Pricing Dispute Resolution: The Global Evolutionary Path' in E. Baistrocchi and I. Roxan (eds.), *Resolving Transfer Pricing Disputes: A Global Analysis* (Cambridge University Press). Available at SSRN: <https://ssrn.com/abstract=2337717>

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4B1 Half Unit International Trade Law

This information is for the 2020/21 session.

Teacher responsible: Dr Mona Pinchis-Paulsen

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: None. Students with no previous background in public international law may find it helpful to consider consulting a standard textbook such as M. Evans (ed.), *International Law* (OUP, 5th ed., 2018) or J. Crawford, *Brownlie's Principles of Public International Law* (OUP, 9th ed., 2019).

Course content: This course provides a comprehensive overview of the multilateral trading system, particularly the law governing international trade as established by the World Trade Organization (WTO). The course begins with an intellectual history of international trade theory and policy, and introduces students to major competing perspectives on trade and globalization. The course proceeds to concentrate on the WTO agreements' coverage of goods and services, dispute settlement procedures, and transparency mechanisms. In addition, the course will explore specialized areas of international trade regulation, such as health standards and safety, contingent protection measures, agriculture, intellectual property, and environment.

Beyond the detailed coverage of WTO law, the course emphasizes in-depth analysis of the history and the political economy of international trade law. We will carefully examine what WTO legal institutions do and how they operate to understand how the law and institutions of the WTO impact national regulation and policy goals. We will also evaluate how economic, political, and social questions have shaped, and may continue to shape, the decision-making, trade negotiations, and dispute settlement processes of

LL4AZ Half Unit Not available in 2020/21 Taxation of Multinational Enterprises: Transfer Pricing

This information is for the 2020/21 session.

Teacher responsible: Eduardo Baistrocchi, Room NAB 7.33.

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: International Business Law, Taxation.

the WTO. Finally, with our study of WTO functions, legal disciplines, and case law we will develop informed assessments of the future governance of the WTO, particularly in light of the WTO's diverse membership and current global concerns, such as cybersecurity, pandemics, and climate change.

Students interested in development and public international law may complement this course with LL4AV: International Economic Law and Development.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading lists will be provided for each seminar on Moodle. Relevant readings may include: P. Van den Bossche & W. Zdouc, *The Law and Policy of the World Trade Organization: Text, Cases and Materials* (CUP, 4th ed., 2017). J. Pauwelyn, A. Guzman, & J. Hillman, *International Trade Law* (Aspen, 3rd ed., 2016); and M. Matsushita et al., *The World Trade Organization: Law, Practice, and Policy* (OUP, 3rd ed., 2017). Primary WTO source materials are available for download from the WTO website.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4BA Half Unit

International Law and the Movement of Persons within States

This information is for the 2020/21 session.

Teacher responsible: Dr Chaloka Beyani NAB7.04

Associate Professor of Law and former UN Special Rapporteur on the Human Rights of Internally Displaced Persons 2010-2016. Member of the UN Secretary General's Human Rights Up Front 2014 and continuing.

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights, MSc in International Migration and Public Policy and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Public International Law and Human Rights Law. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The course provides a detailed study of the international legal framework in which the causes, problems, policies, standards, techniques and institutions concerning the movement of persons within States and protection of internally displaced persons are situated. The course explores the overlap between International Human Rights Law, International Humanitarian Law and Humanitarian Assistance with respect to internally displaced persons. It covers: the definition of internally displaced persons; individual criminal responsibility for forcible displacement before ad hoc Tribunals with criminal jurisdiction and the International Criminal Court; standards applicable in international law to the protection of internally displaced persons, the regime of humanitarian assistance to displaced persons; and finally the institutional protection of internally displaced persons by the United Nations Special Rapporteur on the Human Rights of Internally Displaced Persons, the United Nations High Commissioner for Human Rights, and the United Nations High Commissioner for Human Refugees. Topics include:

- Regulation of movement within States in International Law
- Territorialism, movement, and displacement
- Internally displaced persons and the role of the UN Special

- Rapporteur on the Human Rights of Internally Displaced Persons
- Protection of Internally Displaced Persons in International Human Rights Law
- Protection of Internally Displaced Persons in International Humanitarian Law
- The Regime of Climate Change induced Displacement
- Individual Criminal Responsibility for Forcible Displacement
- Institutional Protection and Humanitarian Assistance
- Internally Displaced Persons in Post-Conflict Situations
- Remedies and 'durable' solutions for Internally Displaced Persons.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: G.S. Goodwin-Gill and Jane MacAdam, *The Refugee in International Law*, 3rd ed., (Oxford, 2007). Allehone Abebe, *The Emerging Law of Forced Displacement in Africa: Development and Implementation of the Kampala Convention on Internally Displaced Persons* (Routledge, 2017). C. Phuong, *International Protection of Internally Displaced Persons* (Cambridge, 2009). J. McAdam, *Climate Change, Forced Migration, and International Law* (OUP, 2012)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4BB Half Unit

International Law and the Movement of Persons Between States

This information is for the 2020/21 session.

Teacher responsible: Dr Chaloka Beyani NAB7.04

Associate Professor of Law and former UN Special Rapporteur on the Human Rights of Internally Displaced Persons 2010-2016. Member of the UN Secretary General's Human Rights Up Front 2014 and continuing.

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights, MSc in International Migration and Public Policy and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Public International Law and Human Rights Law. This course is capped at 60 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The course provides a detailed study of the international legal framework in which the causes, problems, policies, standards, techniques and institutions concerning the protection of asylum seekers, refugees and refugee women, and migrants are situated. The course explores the overlap between International Refugee Law, International Human Rights Law, International Criminal Law, the phenomenon of Migration, including Human Trafficking in the context of refugees, legal and illegal migrants. It covers: the definition of refugees, legal and illegal migrants, including trafficking in human beings; the concepts of 'well-founded fear' of persecution and group eligibility to refugee protection; procedures for determining refugee status on an individual and group basis, in Africa, Asia, Australia, the European Union, North America, and Latin America; temporary protection; the process of exclusion from refugee protection; the role, in refugee law and human rights, of the principle of non-refoulement in refugee protection; the cessation of refugee status, voluntary repatriation, and safe return; standards applicable in international

law to the protection of refugees, migrants, and evolving standards against human trafficking; the regulation of migration in regional economic and political unions, namely the European Union, East African Community, the Union of West African States, the Caribbean Community and the Southern African Development Community; and finally the institutional protection of refugees and migrants by the United Nations High Commissioner for Refugees and the, the International Organisation for Migration. Topics include:

- International Law and the Movement of Persons Between States
- Definition of Refugees
- The Right to Seek and Obtain Asylum and Determination of Refugee Status
- Exclusion from Refugee Protection
- Protection of asylum seekers and refugees from Refoulement
- Standards of Protection and cessation of refugee status
- Definition of Migrants
- Protection of Migrants in International Human Rights Law
- Regional Integration and Migration
- Trafficking in Human Beings and Human Smuggling

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: G.S. Goodwin-Gill and Jane MacAdam, *The Refugee in International Law*, 3rd ed., (Oxford, 2007) J. Hathaway, *The Rights of Refugees under International Law* (Cambridge, 2005) E. Feller, V. Turk and F. Nicholson, *Refugee Protection in International Law: UNHCR's Global Consultations on International Protection* (Cambridge University Press 2003) I. Brownlie and G. Goodwin-Gill, *Basic Documents on Human Rights* latest edition, Oxford: Clarendon Press, OR Ghandi, *International Human Rights Documents*, latest edition, Oxford: Clarendon Press

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4BF Half Unit Not available in 2020/21 International Financial Regulation

This information is for the 2020/21 session.

Teacher responsible: Philipp Paech

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Accounting, Organisations and Institutions, MSc in Regulation, MSc in Risk and Finance and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

This course will be relevant to the following LLM specialisms: Banking Law and Financial Regulation, Corporate and Securities Law and International Business Law. This course is capped at 60 students.

Course content: This course focuses on the micro- and macro-prudential regulation of financial institutions and the financial system. It examines the prudential regulation of banks, bank resolution schemes, the regulation of shadow banking and other regulatory attempts to ensure financial stability, including with regard to novel, technology-induced types of financial services ('FinTech'). The focus will be on the regulation of national and international aspects of financial institutions and the financial system, rather than on private law and transactional aspects. No previous knowledge of financial market regulation or

background in economics is required for those wishing to follow this course. For non-lawyers, a willingness to engage in legal analysis will be necessary, although a legal background is not required.

The syllabus may include the following topics:

The Rational of International, EU and UK Regulatory Structures
Core concepts of Financial Regulation, pre- and post-Crisis
Financial Stability – Policy Issues, Principles and Global Standard
Setters
Prudential Regulation of Banks – The Basel Accords
National and Cross-border Resolution of Failing Banks
Regulating Shadow Banks
Regulating Credit Rating Agencies
Regulating FinTech

Teaching: 20 hours of lectures and 5 hours of classes in the MT. 2 hours of lectures in the ST.

There will be 10 two-hour lectures, plus 'follow-up' classes if numbers exceed 30. Guest lecturers may also be invited to give seminars on their specialist areas. There will be a Reading Week in week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course. The course offers also a voluntary mock exam.

Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students electronically where possible. In addition, the students will be invited to do independent reading. A good general introduction is J. Armour et al, *Principles of Financial Regulation*, OPU 2016

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4BG Half Unit Rethinking EU Law

This information is for the 2020/21 session.

Teacher responsible: Dr Michael Wilkinson NAB 6.28

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

For the LLM (Specialisms: European Law, Legal Theory, Public Law, Human Rights Law)

Course content: The course examines the theoretical underpinnings of the EU and European Union law: it explores issues such as the nature and evolution of the EU and its legal order, its democratic and constitutional credentials, the place of fundamental rights and values and their relationship to market freedoms, the idea of a European economic constitution, and the impact of the Euro-crisis, the rule of law crisis, populism and Brexit on the trajectory of integration. It offers students a deeper understanding of the structures and systems that constitute the EU but also an opportunity to think about how European integration informs our ideas about law and the modern state.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading:

- K. Tuori and K. Tuori, *The Eurozone Crisis: A Constitutional Analysis* (Cambridge University Press, 2014);
- J Habermas, *The Crisis of the European Union: A Response* (Polity 2012);
- C Bickerton, *European Integration: From Nation-States to Member States* (Oxford University Press, 2012);
- P Lindseth, *Power and Legitimacy: Reconciling Europe and the Nation-State* (OUP 2010);
- L van Middelaaar, *The Passage to Europe: How a Continent Became a Union* (Yale University Press, 2013);
- F Scharpf, *Governing in Europe* (OUP 1999); A Stone Sweet, *The Judicial Construction of Europe* (OUP 2004);
- JHH Weiler, *The Constitution of Europe: "Do the New Clothes Have an Emperor?" And Other Essays on European Integration* (CUP 1999);
- A Wiener and T Diez (eds), *European Integration Theory* 2nd ed (OUP 2009)

Assessment: Essay (100%) in the ST.

LL4BH Half Unit Not available in 2020/21 Law and Government of the European Union

This information is for the 2020/21 session.

Teacher responsible: Dr Floris De Witte

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

For the LLM (Specialisms: European Law, Public Law, Human Rights Law)

Pre-requisites: Basic knowledge (at an undergraduate level) of EU law is required.

Course content: How is the European Union governed? This course will discuss this question in both a descriptive and a normative fashion. In descriptive terms, the course looks at the way in which the EU institutions are structured, how they function internally, and the powers that they have. It looks at the power of the European Court of Justice, at the role of fundamental rights, and the way in which the Treaty can be amended. This descriptive discussion forms the backdrop for the (more central) normative discussion: how should Europe be governed? Is the EU democratic? Should it be? Should Member States have more or less power to challenge EU measures? What will the future of the EU look like? And what should it look like?

Students will be challenged to think about the EU as an institutional structure in which both law and politics play a crucial role. Really understanding the EU requires knowledge of both areas as well as knowledge of their interaction. At no other time in the development of the EU has the interaction between law and politics so fundamentally affected the direction of the integration process. The coming years will see fundamental changes to the EU's structure; which are informed as much by political dynamics as by legal mechanisms. This course prepares you to fully understand those changes - and allow you to analyse critically both their normative content and institutional structure.

Teaching: 20 hours of seminars in the MT.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course. The formative essay serves as a basis for the assessed essay.

Indicative reading:

- G de Búrca and JHH Weiler (eds), *The Worlds of European Constitutionalism* (CUP 2012),
- P Lindseth, *Power and Legitimacy: Reconciling Europe and the*

Nation-State (OUP 2010);

- F Scharpf, *Governing in Europe* (OUP 1999);
- JHH Weiler, *The Constitution of Europe: "Do the New Clothes Have an Emperor?" And Other Essays on European Integration* (CUP 1999).

Assessment: Essay (100%, 8000 words) in the ST.

LL4BK Half Unit Corporate Crime

This information is for the 2020/21 session.

Teacher responsible: Professor Jeremy Horder

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Accounting and Finance, MSc in Criminal Justice Policy, MSc in Regulation, MSc in Risk and Finance and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms:

Banking Law and Financial Regulation Corporate and/or Commercial Law Corporate and Securities Law Criminology and Criminal Justice International Business Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course focuses on crime committed within the commercial and business environment. The course considers the principles of corporate criminal liability and the consequences of conviction for a corporation. The exercise of prosecutorial discretion in corporate crime cases, with a consideration of options such as deferred prosecution agreements, is examined. The course addresses the challenges in the international fight against corruption. As well as exploring the nature, extent and consequences of corruption, the course examines the law of fraud and false accounting, as well as international responses to corporate crime and their implementation into domestic law. The increasing emphasis placed by the law on a company's obligation to prevent the occurrence of corporate crime is also examined. The course concludes with an exploration of the various ways in which a corporation can be abused by fraudulent trading, as well as by organised criminals to conceal the proceeds of their criminal activity. There is no overlap between this course and the course on Financial Crime in the Lent (second) Term.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 2,000-word essay.

Indicative reading: Reading is prescribed for each lecture and seminar. There are no core textbooks available for the course; however, all the reading material is available from resources easily accessible through LSE Moodle, LSE Electronic Library and the internet. Preliminary reading is not required but for an understanding of the areas covered in the course students may read Wells: *Corporations and Criminal Responsibility*, 2nd edition, 2001, Oxford University Press; Gobert & Punch: *Rethinking Corporate Crime*, 2003, Butterworths LexisNexis; Green: *Lying, Cheating and Stealing: A Moral Theory of White Collar Crime*, 2007, Oxford University Press.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4BL Half Unit

Financial Crime

This information is for the 2020/21 session.

Teacher responsible: Mr Jonathan Fisher

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Accounting and Finance, MSc in Criminal Justice Policy, MSc in Regulation, MSc in Risk and Finance and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course will be relevant to the following LLM specialisms: Banking Law and Financial Regulation Corporate and/or Commercial Law Corporate and Securities Law Criminology and Criminal Justice International Business Law. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course focuses on financial crime committed within the commercial and business environment and explores current perspectives in the detection, investigation and prosecution of these cases.

The first part of the course explores the emergence of anti-money laundering regimes, through criminal offences and regulatory compliance, as the primary response to financial crime. In addition, the course examines models for confiscation of criminally obtained property following conviction and frameworks for non-conviction-based confiscation and taxation in the civil courts. The case for illicit enrichment offences and use of special investigation tools such as unexplained wealth orders and compulsory interrogation powers in the detection of financial crime is explored. The course addresses the compatibility of these initiatives with protections on due process and the rights to privacy and property set out in the European Convention on Human Rights and other international instruments.

The second part of the course explores the engagement between financial crime and the global financial markets, with a close focus on offences such as insider dealing, misleading the financial markets and false accounting. The challenges of detection and enforcement are discussed, and the contribution of financial crime to the global financial crisis in 2008 is studied. In addition, the course explores the potential criminality of other market practices such as manipulating the financial markets, short selling and reckless risk taking.

The course is bracketed by two introductory sessions which examine the taxonomy of financial crime. The first session explores the nature and extent of financial crime, the relationship between organised crime groups and financial crime, and the social and economic impact of financial crime. The second session addresses the perceived ambivalence to the prosecution of financial crime cases, the limitations on public authorities to fight financial crime, and the rise of private prosecutions. The course concludes with a session on the principles of sentencing in financial crime cases and an examination of alternatives to the imposition of lengthy custodial sentences. There is no overlap between this course and the course on Corporate Crime in the Michaelmas (first) Term. Corporate Crime is not a pre-requisite for this course.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: One 2,000-word essay.

Indicative reading: Reading is prescribed for each lecture and seminar. There are no core textbooks available for the course; however, all the reading material is available from resources easily accessible through LSE Moodle, LSE Electronic Library and the internet. Preliminary reading is not required but for an understanding of the areas covered in the course students may read Green: Lying, Cheating and Stealing: A Moral Theory of White

Collar Crime, 2005, Oxford University Press; Ryder: Financial Crime in the 21st Century, Law and Policy, 2011, Edward Elgar; Edelbacher, Kratcoski, Theil: Financial Crimes, A Threat to Global Security, 2012, CRC Press Taylor & Francis Group.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4BM Half Unit

The Legal Protection of Inventions

This information is for the 2020/21 session.

Teacher responsible: Dr Siva Thambisetty NAB 7.29

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Information Technology, Media and Communications Law, Intellectual Property Law, Corporate and Commercial Law, International Business Law, and Competition, Innovation and Trade Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students interested in this subject are encouraged to consider enrolling onto Innovation, Technology and Patent Law (LL4BN) in the Lent Term.

Course content: This course provides an advanced and comprehensive introduction to the legal protection of invention through patents. Legally defined inventions are everywhere - in the velcro used to fasten a gym bag, in the tap or touch of a smartphone, in the food we eat, the medicines we take, the clothes we wear and in the buildings we live in. There are yet more inventions in the innovation pipeline and some that live only in our fertile technical imagination. Patent rights over such inventions increasingly intersect with diverse values such as competitive innovation, income equality, universal healthcare, regulation of risky technologies and the autonomy to pursue scientific prospects. In this course we will study the basics of patent prosecution as well as the theoretical and actual relationship between patents and innovation, both in law and in economics. Students will address central patentability criteria as well as patent eligibility for inventions that incorporate software, biotechnology or morally controversial technologies. These topics often call for a comparative approach based on UK, EU and US patent law. The aims of this course are to gain in-depth knowledge of patent law doctrine, familiarity with widely different contexts of innovation and a sound critical approach to the general principles of the legal protection of inventions. Students do not need a scientific background and will be supported in learning the relevant technical aspects.

Topics covered include: Novelty, inventive step, person skilled in the art, industrial applicability, sufficiency of disclosure, computer implemented inventions and business methods, biotechnology, exclusions (such as animal varieties, diagnostic methods, on grounds of morality) and the fundamentals of claim construction and infringement.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Weekly reading will include core chapters from books, cases and articles from law reviews. Bentley, Sherman,

Gangjee and Johnson Intellectual Property Law Oxford University Press 2018. Fysh et al The Modern Law of Patents Lexis Nexis Butterworths. Michael Spence Intellectual Property Clarendon Law Series 2007. Tanya Aplin Intellectual Property Law: Text, Cases and Materials (Oxford University Press 2013). Justine Pila The Requirement for an Invention in Patent Law (OUP 2010)

Assessment: Essay (100%, 8000 words) in the LT.

LL4BN Half Unit Not available in 2020/21 Innovation, Technology and Patent Law

This information is for the 2020/21 session.

Teacher responsible: Dr Siva Thambisetty NAB 7.29

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Information Technology, Media and Communications Law, Intellectual Property Law, Corporate and Commercial Law, International Business Law and Competition, Innovation and Trade Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students must have completed The Legal Protection of Inventions (LL4BM).

Course content: This course will build on the comprehensive introduction to patent law provided in LL4BM to address sophisticated issues of law and public policy through multiple perspectives. Indicative list of weekly seminar topics include biotechnology and biodiversity, synthetic biology, artificial intelligence, pharmaceuticals and access to medicines, research use exception, competition law and policy with respect to the patent rights in particular sectors, patent offices and patent litigation, and the Unitary Patent Convention. The course will allow students to bring a wide variety of interests to the table and will address questions of reform of law and institutions. Course content complements several areas of national and international law and policy including competition law, access and benefit sharing issues around genetic resources, transnational rules that impact domestic innovation policy, institutional theory, affordability of patented medicines, human rights and bioethics.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

This is a Lent term course, and consists of 10 weekly two-hour seminars in variable format including lecture-discussions, student-led seminars and guest lecturers where appropriate. Students are expected to participate in class discussions and critically explore further implications of the reading covered each week.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Weekly readings will include book chapters, law review articles, reports and studies as well as cases.

Robert Merges Justifying Intellectual Property Law HUP 2011. James Boyle The Public Domain: Enclosing the Commons of the Mind Yale University Press 2008 (free access online). Justine Pila The Requirement for an Invention in Patent Law OUP 2010. A Pottage and B Sherman Figures of Invention: A History of Modern Patent Law OUP 2011

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4BP Half Unit

Current Issues in Intellectual and Cultural Property Law

This information is for the 2020/21 session.

Teacher responsible: Dr Sivaramjani Thambisetty Ramakrishna NAB.7.29

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law, Anthropology and Society and University of Pennsylvania Law School LLM Visiting Students.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

This course will be relevant to the following LLM specialisms: Intellectual Property Law; Legal Theory and Competition, Innovation and Trade Law.

Course content: This course takes a broadly historical, theoretical and contextual approach to the study of intellectual and cultural property law. It focuses on a set of topical questions that illuminate paradigms, institutional models and social and economic formations that cut across the diversity of intellectual and cultural property regimes; questions about the nature of property in intangible things, about the implications of the transnational expansion of intellectual property forms and institutions, about the role of comparative analysis in the study of intellectual property, or about how regimes forged in the era of industrialization have adapted to new modes of production and distribution.

These expansive questions are not asked in abstraction. Seminars will focus on specific case studies of institutions, transactional forms and social effects. Many of these studies are chosen for their topicality, so the contents of the course will evolve from year to year, but seminar topics might include: the nature of the link between legal incentives and technological innovation; the usefulness of economic models in understanding the proprietary value of patents, the emergence of new regimes of open source biotechnology and the governance of synthetic biology, the re-emergence of old tensions between author's rights in copyright in the context of digitised information and distribution of works, what follows from the consideration of intellectual property as a human right, the use and misuse of the public domain in intellectual property discourses, the nature of 'negative spaces' (the fashion industry, magicians, manga and stand up comedy) within the otherwise pervasive order of intellectual property, the evolution of non-conventional trade marks such as scents, textures and shapes; the effects of regime-shifting between different international frameworks for the regulation of questions of intellectual property; the use and circulation of genetic resources under the Convention on Biological Diversity and the UN Law of the Sea Convention and the tensions with IP norms and sustainable use of these resources, the bases of markets in cultural property and heritage. The object of the course is to introduce key themes in critical debates about intellectual property, and to offer a set of conceptual resources that might be drawn upon in more specialized LLM courses in intellectual property.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading:

- Biagioli, Jaszi & Woodmansee, Making and Unmaking Intellectual Property (2011).
- Benkler, The Wealth of Networks (2006).
- Boyle, The Public Domain. Enclosing the Commons of the Mind (2009).
- Miles, Art as Plunder. The Ancient Origins of Debate About

Cultural Property (2008).

Assessment: Essay (100%, 8000 words) in the ST.

LL4BQ Half Unit

Trade Mark Law

This information is for the 2020/21 session.

Teacher responsible: Luke McDonagh

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law, Anthropology and Society and University of Pennsylvania Law School LLM Visiting Students.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Intellectual Property Law; Information Technology, Media and Communications Law

Pre-requisites: None

Course content: This course offers in depth analysis of legislation and case law concerning trade marks in the UK and EU. In so doing the module considers relevant developments in international and comparative law. Topics covered include: national, regional and international trade mark registration systems; absolute grounds and relative grounds of refusal; the scope of trade mark rights; trade mark infringement; exceptions and defences; and the ownership of brand image in the context of the interaction between consumers and corporate brands.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Core Textbook - S Karapapa and L McDonagh, Intellectual Property Law 1st edition (OUP, Oxford 2019). Students will be expected to read widely in designated journals and books. All of the recommended cases and journal articles are available in electronic form and additional materials will be made available on the Moodle website which supports this course. A detailed reading list will be provided for the course, but the following are indicative: Available in the Library: L Bently, J Davis, J Ginsburg (eds) Trade Marks & Brands: An Interdisciplinary Critique (CUP, Cambridge 2008); A Arvidsson, Brands. Meaning and Value in Media Culture (Routledge, London 2006); C Lury, Brands. The Logos of the Global Economy (Routledge, London 2004); G Dinwoodie & M Janis (eds) Trade Mark Law and Theory: A Handbook of Contemporary Research (Edward Elgar, Cheltenham 2008); S Maniatis & D Botis, Trade Marks in Europe: A Practical Jurisprudence 2nd ed (Sweet & Maxwell, London 2010).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4BT Half Unit

Cultural Property and Heritage Law

This information is for the 2020/21 session.

Teacher responsible: Dr Tatiana Flessas NAB.5.15

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law, Anthropology and Society and University of Pennsylvania Law School LLM Visiting Students.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Intellectual Property Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Course content: This course looks at cultural property and

heritage law from legal, social theoretical and practice-oriented perspectives. It provides an overview of existing and emerging cultural property and heritage legislation (domestic and international). We will be looking in particular at the development of cultural property legislation in the 20th century and emerging international cultural property and heritage initiatives under the auspices of the UN and UNESCO. Topics to be covered include the origins of cultural property law, the problems in defining cultural property and heritage, current issues and cases in repatriation and restitution of cultural objects, the National Trust and other heritage protection regimes, and intangible cultural heritage. The course also addresses the creation and management of museums and heritage sites, primarily within the UK, but also including sites in North and South America, Europe and Asia. We consider how the issues that we've identified throughout the course arise in the ongoing construction, protection, and (primarily economic) uses of heritage. Along with specialist seminars, the course includes visits to museums and contact with practising experts in the field.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 2,000 word essay or other type of formative assessment.

Indicative reading: Neil Cookson, Archaeological Heritage Law (2000 Barry Rose); John Henry Merryman and Albert E. Elsen, Law, Ethics and the Visual Arts (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, Law and the Cultural Heritage Vol 1 (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, Law and the Cultural Heritage Vol 3 (1989 Butterworths); J.E. Tunbridge and G.J. Ashworth, Dissonant Heritage: the management of the past as a resource in conflict (1996 J. Wiley); Norman Palmer, Museums and the Holocaust: law, principles and practice (2000 Institute of Art and Law); John Henry Merryman, Thinking about the Elgin Marbles: critical essays on cultural property, art and law (2000 Kluwer Law International); Nick Merriman, Beyond the Glass Case: the past, the heritage and the public in Britain (1991); Jeanette Greenfield, The Return of Cultural Treasures (1989); Richard Prentice, Tourism and Heritage Attractions (1993); G.J. Ashworth and P.J. Larkham, eds. Building a New Heritage: tourism, culture, and identity (1994); Peter Mandler, The Fall and Rise of the Stately Home (1997); Patrick J O'Keefe, Trade in Antiquities: reducing destruction and theft (1997); Ismail Serageldin, Ephim Shluger, Joan Martin-Brown, eds. Historic Cities and Sacred Sites: cultural roots for urban futures (2001); Federico Mayor, Memory of the Future (1995); Peter J. Fowler, The Past in Contemporary Society: then, now (1992); David Brett, The Construction of Heritage (1996); Karl Ernest Meyer, The Plundered Past (1974).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4BU Half Unit Not available in 2020/21

Art Law

This information is for the 2020/21 session.

Teacher responsible: Dr Tatiana Flessas NAB.5.15

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law, Anthropology and Society and University of Pennsylvania Law School LLM Visiting Students.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Intellectual Property Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Course content: This course engages in a discussion of specific

cases and issues regarding acquisition, ownership, and restitution of works of art, and the problems that arise in regulating markets in art and cultural artefacts. We will look at domestic (UK and US) and international legislation regulating the art trade. Against this legislative background, the course examines important cases in disputes regarding commodification and sale of cultural goods, including the issues that arise in the operation of the art market (dealers, museums, collectors and auction houses). 'Art Law' is a specialized area of practice and an emerging area of theory and scholarship. We will look at some of the cases and theory of art and law, including the practices of dealers and auction houses in valuing (and mis-valuing) art for sale; the recent developments in addressing the restitution of art taken during the Nazi era; museum loans and the cross-border movement of art; the restoration and conservation debate(s) and then turn to a scholarly and interpretive approach to the issues that arise in considering the art market. We will also return to the questions that arise in dealer, auction house and museum policies more generally. Finally, practitioners in these areas, museum and auction house professionals, archaeologists, and art experts will be contributing to the seminars on the emerging legal issues in this area.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Week 6 in the LT is a Reading Week.

Formative coursework: One 2,000 word essay.

Indicative reading: Colin Renfrew, *Loot, Legitimacy and Ownership: The Ethical Crisis in Archaeology* (2000 Duckworth); Neil Cookson, *Archaeological Heritage Law* (2000 Barry Rose); James Cuno, *Who Owns Antiquity? Museums and the Battle over our Ancient Heritage* (2010 Princeton University Press); John Henry Merryman and Albert E. Elsen, *Law, Ethics and the Visual Arts* (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 1* (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 3* (1989 Butterworths); Norman Palmer, *Museums and the Holocaust: law, principles and practice* (2000 Institute of Art and Law); Olav Velthuis, *Talking Prices: Symbolic Meanings of Prices on the Market for Contemporary Art* (2007 Princeton University Press); Jason Felch & Ralph Frammolino, *Chasing Aphrodite: The Hunt for Looted Antiquities at the World's Richest Museum* (2010 Houghton Mifflin Harcourt); Sarah Thornton, *Seven Days in the Art World* (2009 Granta Books); Jeanette Greenfield, *The Return of Cultural Treasures* (1989); Patrick J O'Keefe, *Trade in Antiquities: reducing destruction and theft* (1997); Karl Ernest Meyer, *The Plundered Past* (1974).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4BV Half Unit

Transnational Environmental Law

This information is for the 2020/21 session.

Teacher responsible: Prof Veerle Heyvaert NAB7.06

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Environmental Policy and Regulation, MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: European Law, Public International Law, Public Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Course content: The course instructs students on key issues in environmental law and governance beyond the state. Through the study of recent developments in international environmental law, regional law (including EU law) and private environmental regulation, the course investigates how new transnational environmental laws are made, what the role is of science in environmental decision-making and dispute resolution, how

transnational environmental law is implemented and enforced, and whether transnational corporations can be held accountable for environmental damage. The questions are illustrated through case studies relating to, among others, climate change, biodiversity protection and chemical risk control.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 1,000 - 1,500 (upper limit) word essay. The students are given an opportunity to sit a mock exam in Week 9 of MT.

Indicative reading: A detailed reading list will be provided for each seminar. The overwhelming majority of readings are electronically available as e-books or in journals. Essential reference works include the journal *Transnational Environmental Law*; Heyvaert, *Transnational Environmental Regulation and Governance* (CUP, 2019); Heyvaert & Duvic-Paoli, *Research Handbook on Transnational Environmental Law* (Edward Elgar, 2020 forthcoming); Kingston, Heyvaert & Cavoški, *European Environmental Law* (CUP, 2017); Sands & Peel, *Principles of International Environmental Law* (4th ed, CUP, 2018); Bodansky, *The Art and Craft of International Environmental Law* (2010, Harvard University Press); Bodansky, Brunnee & Hey, *The Oxford Handbook of International Environmental Law* (OUP, 2007); and the *Stern Review Executive Summary* (online).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4BW Half Unit Not available in 2020/21

Law and Political Thought

This information is for the 2020/21 session.

Teacher responsible: Professor Thomas Poole

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Political Theory and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

This course will be relevant to the following LLM specialisms:

Human Rights Law, Legal Theory and Public Law

Pre-requisites: None.

Course content: This course examines the relationship between law and political theory. It does so through the study of classic texts of political thought: typically Hobbes, *Leviathan*, Rousseau, *Social Contract*; Burke, *Reflections on the Revolution in France*; Schmitt, *Constitutional Theory*; Oakeshott, *On Human Conduct*; Hayek, *Law, Legislation and Liberty*. In this way, the course deals with major topics of theoretical and juridical interest, such as the rule of law, liberalism and republicanism, cultural pluralism, theories of authority and legitimacy, revolution and the state, nationalism and cosmopolitanism.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: The reading for the course consists of classic texts in political thought. Many are available online and the course is delivered through Moodle.

Assessment: Essay (100%, 8000 words) in the ST.

LL4C2 Half Unit

World Poverty and Human Rights

This information is for the 2020/21 session.

Teacher responsible: Dr Margot Salomon Law Department

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies, MSc in Global Politics, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: None but some knowledge of public international law is helpful.

Course content: This course examines world poverty and inequality in light of international law aimed at the protection of human rights. Drawing on rights and obligations, the course considers the duties of states and non-state actors and the ways in which they may be implicated in the deprivation which has 2.7 billion people concentrated in the South, and many in the North, unable to exercise even their minimum essential levels of human rights. The course is interested in studying conceptual, normative, and critical approaches to human rights and will draw on literature that situates human rights and development in broader interdisciplinary contexts. It will explore the role of international actors and institutions that impact positively or negatively on human rights today, as well as examine global developments and the application of legal standards to some areas of outstanding concern. Topics to be covered may include:

- Poverty as a human rights issue
- Human rights and development
- The right to development and claims against the public international order
- The scope, content and limits of the obligation of international cooperation
- Human rights, the World Bank and IMF
- Human rights and international trade, investment, and finance
- Interrogating the Sustainable Development Goals.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: One 2,000 word essay.

Indicative reading: G. Abi-Saab, 'The Legal Formulation of the Right to Development', in R-J Dupuy (ed), *The Right to Development at the International Level*, Hague Academy of International Law (1980); B.S. Chimni, 'International Institutions Today: An Imperial Global State in the Making' *European Journal of International Law* (2004); C. Chinkin, 'The United Nations Decade for the Elimination of Poverty: What Role for International Law?' *54 Current Legal Problems* (2001) 553; A. Eide, 'Human Rights-Based Development in the Age of Economic Globalization' in B.A. Andreassen and S.P. Marks (eds), *Development as a Human Right: Legal, Political and Economic Dimensions* (2010); M.E. Salomon, *Global Responsibility for Human Rights: World Poverty and the Development of International Law* (2007); R. Danino, 'The Legal Aspects of the World Bank's Work on Human Rights' in P. Alston and M. Robinson (eds), *Human Rights and Development* (2005); P. Muchlinski, 'Holistic Approaches to Development and International Investment Law: The Role of International Investment Agreements' in J. Faundez and C. Tan (eds), *International Law, Economic Globalization and Development* (2010). *Maastricht Principles on Extraterritorial Obligations of States in the area of Economic, Social and Cultural Rights* (2011). M.E. Salomon, 'Of Austerity, Human Rights and International Institutions' *European Law Journal* (2015); Report of the UN Independent Expert on the effects of foreign debt and other related international financial obligations of states on the

full enjoyment of all human rights, particularly economic, social, and cultural rights: Mission to Greece' UN Doc A/HRC/31/60/Add2 (29 Feb 2016). O.C. Okafor, 'The Bandung Ethic and International Human Rights Praxis: Yesterday, Today and Tomorrow' in L. Eslava, M. Fakhri and V. Nesiah (eds) *Bandung, Global History, and International Law* (2017). J. Linarelli, M.E. Salomon and M. Sornarajah, *The Misery of International Law: Confrontations with Injustice in the Global Economy* (2018). A detailed reading list will be issued at the first seminar.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4C5 Half Unit

Fundamentals of International Commercial Arbitration

This information is for the 2020/21 session.

Teacher responsible: Dr Jan Kleinheisterkamp

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 60 students.

Course content: This course offers the fundamentals of international commercial arbitration, the most important dispute settlement mechanism for international commercial transactions. The course provides a complete introduction to the functioning of arbitration in theory and in practice. London being one of the main centres of arbitration in the world, this course focuses mainly on English arbitration law which is put into a comparative perspective and contrasted especially with the UNCITRAL Model Law on International Commercial Arbitration and French law. Special attention is given to the different types of rules that may have to be taken into consideration in an international arbitration. This course prepares for LL4C6 *Advances Issues of International Commercial Arbitration* and provides for some of the procedural basics for LL4E7 *Investment Treaty Law*.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: One 2,500 word essay after week 6 on previous exam questions (choice of 1 out of 3).

Indicative reading: M. Moses, *The Principles and Practice of International Commercial Arbitration* (3rd edn, CUP 2017); G. Born, *International Arbitration: Law and Practice* (2nd edn, Kluwer 2015); N. Blackaby & C. Partasides, *Redfern and Hunter on International Commercial Arbitration* (6th edn, OUP 2015); J.-F. Poudret & S. Besson, *Comparative Law of International Commercial Arbitration* (Sweet & Maxwell 2007); E. Gaillard & J. Savage, *Fouchard Gaillard Goldman on International Commercial Arbitration* (1999).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4C6 Half Unit Not available in 2020/21

Advanced Issues of International Commercial Arbitration

This information is for the 2020/21 session.

Teacher responsible: Dr Jan Kleinheisterkamp NAB 7.09

Availability: This course is available on the LLM (extended part-

time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 60 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: It is recommended that students have completed Fundamentals of International Commercial Arbitration (LL4C5) in Michaelmas Term, or a course on arbitration in previous studies, or have solid practical experience in the field.

Course content: This course aims at giving students who already are acquainted with the fundamentals of arbitration the possibility to go into depth into selected problems of international commercial arbitration. The course is based on student presentations and intense discussions of these problems in order to raise the sensitivity for the issues at stake. The course is highly relevant for those wanting to specialise in arbitration practice, as the theoretical problems have a significant impact on practical solutions. The course will treat a selection of topical contemporary issues of international commercial arbitration, such as the law applicable to arbitration agreements; the extension of arbitration agreements to non-signatories; third party funding; the effects of insolvency; arbitration and fraud and corruption; the enforcement of awards set aside abroad; and the role of public policy. The course seeks to be as topical as possible, so that some content may change in the light of new developments.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6

Formative coursework: One group presentation in the seminar and an essay of 2,500 words.

Indicative reading: G. Born, *International Arbitration: Law and Practice* (2nd edn, Kluwer 2015); N. Blackaby & C. Partasides, *Redfern & Hunter on International Commercial Arbitration* (6th edn, OUP 2015); J.-F. Poudret & S. Besson, *Comparative Law of International Commercial Arbitration* (Sweet & Maxwell 2007); E. Gaillard & J. Savage, *Fouchard Gaillard Goldman on International Commercial Arbitration* (Kluwer 1999).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4CB Half Unit Not available in 2020/21

Modern Legal History: Private Law and the Economy 1750-1950

This information is for the 2020/21 session.

Teacher responsible: Prof. Michael Lobban

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Economic History, MSc in Economic History (Research), MSc in Law, Anthropology and Society, MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

LLM Specialisms This course will be relevant to the following LLM specialisms: Legal Theory; Corporate and/or Commercial Law.

Course content: This course will examine how the common law aided or hindered economic growth in the era between 1750 and 1950, by focusing in particular on the development of doctrines of private law. The course will concentrate on a number of themes and topics. It will begin with a discussion of the nature of the common law, and the modes of common law reasoning, to establish what kind of legal system economic actors were dealing with. It will then look at the developing law of contract, to explore how far the ideology of 'freedom of contract' assisted growth. It will further explore the law relating to civil wrongs (including the law relating to compensation for accidents and pollution) and unjust enrichment (particularly in the context of business failures).

It will also explore some specific topics, including the law relating to corporate enterprise, bankruptcy and insurance.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: J. Oldham, *English Common Law in the Age of Mansfield* (Chapel Hill, 2005). W.R. Cornish et al, *The Oxford History of the Law of England* vols. 11-13 (Oxford, 2010). W.R. Cornish and et al, *Law and Society in England 1750-1950* (London, 2019). P.S. Atiyah, *The Rise and Fall of Freedom of Contract* (Oxford, 1979). R. Harris, *Industrializing English Law: Entrepreneurship and Business Organization, 1720-1844* (Cambridge, 2000). Rob McQueen, *A Social History of Company Law: Great Britain and the Australian Colonies 1854-1920* (Ashgate, 2009). J. Taylor, *Creating Capitalism: Joint Stock Enterprise in British Politics and Culture 1800-1870* (Boydell, 2006). M. Finn, *The Character of Credit: Personal Debt in English Culture, 1740-1914* (Cambridge 2003).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4CC Half Unit Not available in 2020/21

Commercial Remedies

This information is for the 2020/21 session.

Teacher responsible: Dr Solene Rowan NAB 7.26, Prof Charles Webb NAB 6.26 and Dr Andrew Summers

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

Specialisms: Corporate and/or Commercial Law; International Business Law

Pre-requisites: Undergraduate contract law

Course content: The objective of the course is to provide students with a detailed understanding of remedies in a commercial context. The reading addresses both case law and academic commentary. Here is an indicative list of the issues that will be considered on the course:

1. The aims of commercial remedies: What interests and other policies may be served by the law when remedying commercial disputes?
2. The function of contract damages: How do the courts assess damages for breaches of contract? Should the courts do more to protect the claimant's interest in performance? What limits are placed on the recovery or measure of damages?
3. Punishment: Is punishment of a defaulting defendant ever a legitimate aim in commercial remedies? Should punitive damages be given a greater role in English commercial law?
4. Agreed remedies: To what extent are commercial parties free to fix the remedies available to them in the event of breach? Does freedom of contract extend to the parties' secondary obligations?
5. Unjust enrichment: What is the law of unjust enrichment? What is its relationship to the law of contract? What can commercial parties recover under the law of unjust enrichment?
6. Comparative law: How do other jurisdictions deal with these questions? What might the common law learn from civil law systems?

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: All students are expected to produce one 1,500 word formative essay during the course. Formative assessment opportunities will be provided (essay or problem questions)

Indicative reading: Rowan, *Remedies for Breach of Contract: A Comparative Analysis of the Protection of Performance* (OUP 2012). Burrows, *Remedies for Torts and Breach of Contract*

(4th edn OUP 2019). Virgo and Worthington (eds), *Commercial Remedies: Resolving Controversies* (CUP 2017). Webb, *Reason and Restitution* (OUP 2016)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4CD Half Unit Not available in 2020/21 European Company Law

This information is for the 2020/21 session.

Teacher responsible: Mr Edmund-Philipp Schuster NAB 6.30

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting, MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You. This course will be relevant to the following LLM specialisms: Corporate and/or Commercial Law; Corporate and Securities Law; European Law.

Pre-requisites: There are no formal prerequisites, but some understanding of European law and EU law-making is of advantage.

Course content: This course will examine the EU harmonization programme for companies. It will analyse the framework of primary EU law within which companies and national legislators must operate (the Treaty provisions on the right of establishment and the free movement of capital), as well as secondary measures of EU law regulating companies and relevant soft law initiatives. The course will also deal with the most important European forms of company, notably the SE (Societas Europaea or European Company) and investigate the implications that corporate mobility within the EU has for regulating companies at the national level. Topics include:

- EU company law harmonization programme
- 1st Company Law Directive: formation and disclosure
- Right of establishment: primary and secondary establishment, transfer of seat, jurisprudence of the European Court of Justice (in particular: Centros, Überseering, SEVIC, Cartesio, VALE)
- Free movement of capital: golden shares jurisprudence of the European Court of Justice, BAA, KPN/TPG, VW; proportionality principle in the EU
- 2nd Directive and capital structure: minimum capital; payment for shares; publicity; distributions; stock repurchase; increases in capital and capital reductions; serious loss of capital; case law interpreting the 2nd Directive; reform initiatives (e.g., SLIM Working Group)
- Corporate governance regulation in the EU: abandoned 5th Directive; Recommendation on the role of non-executive or supervisory directors of listed companies; remuneration policies; Shareholder Rights Directive
- European Company Law Forms: European company (SE) and European private company
- State of European company law harmonisation; potential for regulatory competition and regulatory arbitrage

Teaching: 20 hours of lectures in the MT. 2 hours of lectures in the ST.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: M Andenas and F Wooldridge, *European Comparative Company Law*, Cambridge University Press 2009; S M Bartman (ed), *European Company Law in Accelerated Progress*, Kluwer Law International 2006; U Bernitz and W-G Ringe, *Company Law and Economic Protectionism: New Challenges to European Integration*, Oxford University Press 2010; A F M Dorresteyn et al (eds), *European Corporate Law*, Kluwer Law International 2009; Vanessa Edwards, *EC Company Law*, Clarendon Press 1999; S Grundmann, *European Company Law*, 2nd ed, Hart 2012; Jonathan Rickford (ed), *The European Company: Developing a Community*

Law of Corporations, Intersentia 2003; Gert-Jan Vossestein, *Modernisation of European Company Law and Corporate Governance*, Kluwer Law International 2010

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4CE Half Unit Not available in 2020/21 Security and Criminal Law

This information is for the 2020/21 session.

Teacher responsible: Prof Peter Ramsay NAB 6.27

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Undergraduate study of criminal law (or equivalent).

Course content: This is a course in advanced criminal law theory. The central concern of contemporary criminal justice policy is public protection. The course examines the different security interests that are protected by the different categories of criminal offence and the issues at stake in the expansion of the scope of the substantive criminal law. Examples will be drawn mainly from the criminal law of England and Wales, but also from other jurisdictions. An introduction to the structure of the criminal law in the common law world will be included. The theoretical issues are universal.

Seminars cover:

- the concept of security;
- the concept of criminal law;
- the presumption of innocence;
- 'true crimes';
- public welfare offences;
- inchoate offences;
- pre-emptive offences;
- fear, harassment and speech offences;
- pre-crime;
- the right to security.

Each seminar consists of a student presentation on a key question, class discussion and a teacher presentation. There is a reading week in Week 6.

Teaching: 20 hours of seminars in the LT.

There will be a Reading Week in week 6 of MT.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A Ashworth and L Zedner *Preventive Justice* (OUP 2014); I Dennis and GR Sullivan (eds), *Seeking Security: Pre-empting the Commission of Criminal Harms* (Hart, 2012); A Brudner, *Punishment and Freedom* (OUP, 2009); RA Duff, *Answering for Crime* (Hart, 2007); P Ramsay *The Insecurity State: Vulnerable Autonomy and the Right to Security In the Criminal Law* (OUP, 2012); A Ashworth (et al), *Prevention and the Limits of Criminal Law* (OUP, 2013).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4CF Half Unit UK Corporate Law

This information is for the 2020/21 session.

Teacher responsible: Prof. David Kershaw and Dr Elizabeth Howell

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School

LLM Visiting Students. This course is not available as an outside option.

This course is capped at 90 students. This course will be relevant to the following LLM specialisms: Corporate and Securities Law; Corporate and/or Commercial Law.

Course content: 1. The Evolution of the UK company. This session will address the evolution of the corporate form from the mid-19th century, and outline the partnership based conception of UK company. It will contrast the partnership conception with the corporate / entity conception. 2. Legal personality, formation and structure – considering the implications and function of separate legal personality and the scope to disregard the corporate veil; the process of formation; and the constitutional make-up of the company. 3. Corporate Actions – considering how the company acts in contract, tort and crime. 4. The distribution of power in a UK company – considering the location and contractual distribution of power in a UK corporation; the problem of separation of ownership and control / the agency problem; mandatory versus default rules; core mandatory rights: removal of directors and calling shareholder meetings. 5. Director's duties I: the nature of duties; who owes them; to whom; the corporate objective; the duty to promote the success of the company. 6. Directors Duties II: the duty of care (business judgments, business process, monitoring, systems and controls, risk management) 7. Directors Duties III: the duty of loyalty (self-dealing transactions, corporate opportunities, competing with the company, bribes and commissions). 8. Company law and creditor protections – shareholder incentives to exploit creditors; the scope for unlimited liability, duties to creditors; wrongful trading. 9. Derivative Actions: the rule in *Foss v Harbottle*; the new derivative action mechanism; indemnity orders and contingency fees; reflective loss. 10. Minority shareholder protections – common law restraints on the exercise of majority shareholder power and influence; statutory constraints on the exercise of such power and influence (122(g) Insolvency Act 1986 and section 994 Companies Act 2006).

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Core Texts: David Kershaw, *Company Law in Context* (2nd ed, OUP 2012). Paul Davies, Gower and Davies' *The Principles of Modern Company Law* (9th eds, Sweet & Maxwell, 2012). For detailed reading lists please see the Moodle website.

Assessment: Exam (100%, duration: 2 hours, reading time: 30 minutes) in the summer exam period.

LL4CG Half Unit

Tax Law and Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Ian Roxan NAB.7.25

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: This course is suitable for students from any disciplinary background within the social sciences. No previous study of taxation is required. Some prior familiarity with tax concepts is advantageous but not essential.

Course content: This course looks at the interaction of tax law and tax policy in modern societies. Taxation is fundamental and pervasive in modern society in both developed and developing

countries. It has an impact on the work of lawyers in many fields, and tax lawyers themselves have to consider the operation of tax law in many contexts, such as corporate and commercial law, family and trust law, labour and employment law, environmental law and intellectual property law. And, as taxpayers seek to minimise their tax burdens, whether legally or by less than legal means, tax law becomes more complex in response.

Using a series of topical examples drawn from different countries and globally, this course will explore what is involved in 'doing' tax law, how tax policy is made, and the different perspectives through which tax law and policy, and the interaction between them, can be understood, including law itself, economics, economic analysis of law, politics, sociology and anthropology.

Seminars discussing these principles and perspectives will be complemented by the monthly LSE Taxation Seminars during the Michaelmas Term, which will provide students with direct exposure to leading speakers from a wide range of backgrounds on current debates in taxation. The LSE Taxation Seminars series, established since the 1960s, brings together a wide variety of participants, including lawyers, economists, accountants and government officials. The Taxation Seminars provide an important forum for topical discussion on taxation.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students are expected to submit one 1,500-word formative essay.

Indicative reading:

- Avi-Yonah, et al., *Global Perspectives on Income Taxation Law* (Oxford: Oxford Univ. Press, 2011);
- Mirrlees, et al., *Tax by Design: the Mirrlees Review* (Oxford: Oxford Univ. Press: 2011);
- Mirrlees, et al. (eds), *Dimensions of Tax Design: the Mirrlees Review* (Oxford: Oxford Univ. Press, 2010);
- Lamb, et al. (eds), *Taxation: An Interdisciplinary Approach to Research* (Oxford: Oxford Univ. Press, 2004);
- Murphy and Nagel, *The Myth of Ownership* (New York: Oxford Univ. Press, 2002);
- Weisbach, "Formalism in the Tax Law" (1999), 66 U. Chicago L. Rev. 680;
- James and Nobes, *The Economics of Taxation* (2018), (Birmingham: Fiscal Publications, 17th or 18th ed.);
- Brys, et al., 'Tax Design for Inclusive Economic Growth', OECD Taxation Working Papers, No. 26 (Paris: OECD Publishing, 2016);
- Keen and Konrad, 'The Theory of International Tax Competition and Coordination' (2014), Working Paper of Max Planck Inst. for Tax Law and Public Fin. No. 2012-06;
- Marc Leroy, 'Tax Sociology: Sociopolitical Issues for a Dialogue with Economists' (2008) 3 socio-logos.

Detailed reading lists will be provided during the course via Moodle.

Assessment: Essay (100%, 8000 words).

LL4CH Half Unit

Tax in the Digital Economy

This information is for the 2020/21 session.

Teacher responsible: Dr Ian Roxan

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: This course is suitable for students from any disciplinary background within the social sciences. No previous study of taxation is required. Some prior familiarity with principles of tax design is advantageous but not essential.

Course content: Economic activity across the world is increasingly digital. Taxation systems across the world developed in the pre-digital age, but they have been rapidly finding ways to adapt to the new reality. This course will look in depth at the present and proposed responses of tax systems to the challenges of the digital economy. The issues will be examined both from a legal perspective and with wider interdisciplinary approaches including economics, sociology and political science.

Topics to be covered will include: the challenges posed by the digital economy (what is the digital economy?), taxing work in the digital economy, taxing sales and consumption in the digital economy, international tax challenges and solutions (the BEPS 2.0 project), tax challenges for developing countries, and digital solutions for tax compliance and administration.

Students will collaborate in groups to develop a deeper understanding of specific topics in the course. The summative assessment will be an essay building on this work.

Seminars discussing these issues will be complemented by the monthly LSE Taxation Seminars during the Lent Term. Established since the 1960s, the LSE Taxation Seminar series brings together a wide variety of participants, including lawyers, economists, accountants and government officials. The Seminars provide an important forum for topical discussion on taxation. They provide students with the opportunity to actively participate in current debates, link insights from the Seminars to other issues studied in the course and connect with leading speakers from a wide range of backgrounds on current debates in taxation.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students are expected to submit one 1,500-word formative essay or an equivalent assignment.

Indicative reading:

- James & Nobes, *Economics of Taxation*, Avi-Yonah, et al., *Global Perspectives on Income Taxation Law*, or another introductory tax policy book
- Dean Curran, 'Risk, Innovation, and Democracy in the Digital Economy' (2018), 21(2) *European Journal of Social Theory* 207–26
- OECD, *Addressing the Tax Challenges of the Digital Economy: Action 1 Final Report*, OECD/G20 Base Erosion and Profit Shifting Project (Paris: OECD Publishing, 2018), chapters 3, 4, 7 and 8
- Wolfgang Schön, 'Ten Questions about Why and How to Tax the Digitalized Economy' (2017), Max Planck Institute for Tax Law and Public Finance Working Paper 2017 – 11 (also (2018), 72(4/5) *Bulletin for Int'l Taxation* 278-92)
- David R. Agrawal & William F. Fox, 'Taxes in an e-commerce generation' (2017), 24(5) *Int'l Tax Public Finance* 903-26.

Detailed reading lists will be provided during the course via Moodle.

Assessment: Essay (100%, 8000 words).

LL4CL Half Unit

Explaining Punishment: Philosophy, Political Economy, Sociology

This information is for the 2020/21 session.

Teacher responsible: Prof Peter Ramsay NAB 6.27

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes

where regulations permit.

This course is capped at 30 students.

Course content: The course aims to provide students with a comprehensive overview of the theories that explain the practice of punishment, a practice that defines the criminal law. It will do this by introducing students to philosophical, sociological, political economy and comparative approaches to punishment. It will involve the discussion of all the major philosophical justifications and critiques of state punishment, and sociological and political economy explanations and critiques of punishment.

After an introduction discussing the different approaches to punishment, three seminars will discuss the classical philosophical justifications of punishment and a fourth the contemporary critiques of those classical approaches. Seminars 5 and 6 will discuss punishment from the perspective of sociology and political economy. Seminar 7 will consider comparative approaches to punishment. Seminars 8 and 9 will look at two key aspects of the sociology of punishment, punishment as a cultural phenomenon and punishment as an exercise of power and authority. The final seminar considers the relation between these different perspectives.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading:

- A von Hirsch, A Ashworth and J Roberts, *Principled Sentencing: Readings on Theory and Policy* (Hart, 2009)
- B Hudson, *Understanding Justice* (Open University Press 2003)
- N Lacey, *The Prisoners' Dilemma: Political Economy and Punishment in Contemporary Democracies*, (Cambridge University Press 2008)
- J Simon and R Sparks (eds), *The Sage Handbook of Punishment and Society* (Sage 2013)
- D Garland, *Punishment and Modern Society: A Study in Social Theory* (Oxford University Press 1990)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4CO Half Unit

Taxation of Wealth

This information is for the 2020/21 session.

Teacher responsible: Dr Andrew Summers NAB.6.06

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Inequalities and Social Science and University of Pennsylvania Law School LLM Visiting Students.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: This course is suitable for students from any disciplinary background within the social sciences. No previous study of taxation is required. Some prior familiarity with principles of tax design is advantageous but not essential.

Course content: The course examines the taxation of wealth from a variety of academic perspectives, drawing on research from political theory, economics, sociology and law. Taxes on wealth are defined broadly to include taxes on transfers of wealth, returns on wealth, and holdings of wealth. The course equips students with an interdisciplinary framework for explaining and evaluating taxes on wealth, and applies these approaches to existing tax policies and options for reform. The focus is on the UK and US contexts although comparisons are also made with other jurisdictions.

Part I of the course introduces key debates from across the social sciences relevant to the taxation of wealth. Seminars 1-5 cover: (i) defining and measuring wealth; (ii) inequality and distributive justice; (iii) property rights; (iv) economic perspectives; and (v) social and political perspectives. Part II applies these debates to specific wealth tax policies. Seminars 6-10 cover: (i) taxes on transfers: inheritance/estate tax, lifetime receipts tax, comprehensive income tax; (ii) taxes on returns: capital gains tax, capital income tax and (iii) taxes on holdings: property tax, land-value tax, net wealth tax.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will receive formative feedback on two essay-plans (comprising 300-word abstract, outline of sub-headings, and bibliography) based on past or sample summative essay titles.

Indicative reading: Atkinson, *Inequality: What can be Done?* (Harvard University Press 2015); Graetz & Shapiro, *Death by a Thousand Cuts: The Fight over Taxing Inherited Wealth* (Princeton University Press 2005); Hills et al, *Wealth in the UK: Distribution, Accumulation and Policy* (OUP 2013); Institute for Fiscal Studies, *The Structure and Reform of Direct Taxation: The Meade Report* (Allen & Unwin 1978); Institute for Fiscal Studies, *Tax by Design: The Mirrlees Review, Vols 1 & 2* (OUP 2011); Murphy and Nagel, *The Myth of Ownership: Taxes and Justice* (OUP 2002); Piketty, *Capital in the Twenty-First Century* (Harvard University Press 2014); Sandford, *Taxing Personal Wealth* (Allen & Unwin 1971); Scheve & Stasavage, *Taxing the Rich: A History of Fiscal Fairness in the United States and Europe* (Princeton University Press 2016); Waldron, *The Right to Private Property* (OUP 1991); Young, *The Myth of Millionaire Tax Flight: How Place Still Matters for the Rich* (Stanford University Press 2017)

Assessment: Essay (100%, 6000 words) in the ST. Students must answer two essay questions (3,000 words each) from a set of essay titles.

LL4CP Half Unit

Tax Avoidance

This information is for the 2020/21 session.

Teacher responsible: Dr Michael Blackwell (NAB 7.21)

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course will provide a comprehensive overview of the phenomenon of tax avoidance and of the attempts by states to combat it: both unilaterally and multilaterally. Whilst using examples predominantly from the UK, Australia and USA the issues addressed by the course are general across many jurisdictions and so will be applicable to those with interests beyond the UK, Australia and USA.

The course will be multi-disciplinary, in that the course will draw on accessible social-science literature.

Taxpayers have always sought to minimise their tax burden. However recent decades have witnessed a sharp rise in popular and governmental concern with tax shelters and other tax avoidance. Traditional strategies of tax avoidance have included postponement of taxes and tax arbitrage, in addition to attempting to exploit 'loopholes' through a formalist interpretation of

legislation. In recent years the proliferation of complex financial instruments has increased the opportunities for such avoidance. Additionally, globalisation and the development of the digital economy have facilitated tax avoidance strategies of base erosion and profit shifting (BEPS). This rise in opportunities for tax avoidance has been accompanied by an increased public concern that individuals and companies pay their 'fair share' of taxation: which states have responded to both through unilateral and multilateral actions (including the OECD's project on BEPS and the EU's Anti Tax Avoidance Package).

Particular topics covered will include (i) defining avoidance; (ii) strategies of tax avoidance; (iii) statutory interpretation and judicial approaches to tax avoidance especially with reference to the UK and USA; (iv) General Anti-Abuse and Anti-Avoidance Rules and Specific and Targeted Anti-Avoidance Rules; (v) reporting rules and other policies to deter avoidance; (vi) BEPS and the EU; and (vii) corporate social responsibility, professional ethics and public attitudes with regard tax avoidance.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students should submit a detailed essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises and act as either a presenter or discussant during seminars.

Indicative reading: Michael Blackwell, 'The April 2019 loan charge' [2019] (3) British Tax Review 240-257. Michael Blackwell, 'Conduct Unbefitting: Solicitors, the SRA and Tax Avoidance' [2019] (1) British Tax Review 31-55. Michael Blackwell, 'Variation in the Outcomes of Tax Appeals Between Special Commissioners: An Empirical Study' [2013] British Tax Review 154-174. Dhammika Dharmapala, 'What Do We Know about Base Erosion and Profit Shifting? A Review of the Empirical Literature' (2014) 35(4) Fiscal Studies 421. J Feldman and JA Kay, 'Tax Avoidance' in Paul Burrows and Cento G Veljanovski (eds), *The Economic approach to law* (Butterworths 1981). Edward J McCaffery, *Income Tax Law: Exploring the Capital Labour Divide* (OUP 2012) 12-22; 182-202 (ie 1.6 until the end of Chapter 1 and 'Chapter 7, 'A Summary, of Sorts: Anatomy of a Tax Shelter'). Judith Freedman, 'Interpreting Tax Statutes: Tax Avoidance and the Intention of Parliament' (2007) 53 LQR 123. David A Weisbach, 'An Economic Analysis of Anti-Tax-Avoidance Doctrines' [2002] American Law and Economics Review 88. Grahame R Dowling, 'The curious case of corporate tax avoidance: Is it socially irresponsible?' (2014) 124 Journal of Business Ethics 173. Judith Freedman, 'The Tax Avoidance Culture: Who is Responsible?' (2006) 59 Current Legal Problems 359. Kevin Holland, Sarah Lindop, and Fatimah Zainudin, 'Tax Avoidance: A Threat to Corporate Legitimacy? An Examination of Companies' Financial and CSR Reports' [2016] (3) BTR 310

Assessment: Essay (100%, 6000 words) in the ST.

LL4CQ Half Unit

Legal Aspects of Private Equity and Venture Capital

This information is for the 2020/21 session.

Teacher responsible: Ms Sarah Paterson New Academic Building 6.06 and Dr Simon Witney

Simon Witney teaches weeks 1-5, and 7-9. Sarah Paterson teaches weeks 10 and 11.

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students should note that private equity is a specialist asset class, and the basics of debt and equity are not covered in LL4CQ. The course is, therefore, recommended for students who are taking other, relevant corporate law and financial law courses, or who have relevant experience.

Course content: This course will equip students with a detailed understanding of the legal structures and issues arising in international private equity and venture capital. It is founded on deep academic analysis of pertinent theoretical and legal issues complemented by insights from relevant practitioners. It will have a UK focus but will include relevant aspects of European Union law with comparative global perspectives.

Class 1: Introduction to private equity and venture capital and some basic theory

This introductory session will include a critical discussion of the academic research suggesting that private equity outperforms other asset classes and will introduce some of the theoretical frameworks that will underpin the course.

Class 2: Fund structures and terms: the limited partnership and other international structures

This class looks at the structures adopted, and the reasons why, with particular emphasis on the legal, tax and regulatory characteristics of limited partnerships. We also examine some key fund terms.

Class 3: Fund terms and structures (continued)

This class continues our analysis of fund terms and structures, including the fund management vehicle.

Class 4: Private equity fund (and manager) regulation

This session looks at UK and EU regulatory initiatives, and critically evaluates the provisions of the Alternative Investment Fund Managers Directive which affect private equity funds.

Class 5: Venture capital investments

Starting from a theoretical perspective, we will analyse the terms of a typical venture capital investment into a portfolio company by reference to example documents. We will also examine various aspects of contract and company law which have particular relevance to VC structures.

Class 6: The VC deal: feedback from a practitioner

This week the students will discuss the key points arising from a venture capital investment case study with a leading VC lawyer. We will focus on key points which have a legal as well as a commercial aspect, and connect these to the theoretical discussions in Class 5.

Class 7: The buyout: structure and terms

This class will examine the structure of a buyout and how it differs from a VC investment. We will focus on pertinent company law rule and the main commercial terms.

Class 8: The buyout: corporate governance issues

This class will examine recent developments in corporate governance of large, private companies and their relevance for and application to portfolio companies in buyouts.

Class 9: Financing

This class will look at the leveraged finance model, advantages of leverage, the LMA Leveraged Loan Agreement, High Yield Bonds, the Inter-creditor Agreement and 'covenant-lite' and incurrence covenants.

Class 10: This week we will analyse a suite of leveraged loan deal documentation for a typical private equity buyout. Students will be provided with a fact pattern and asked to apply the theory that they have studied in week 9 to the deal documentation.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: A formative essay will be due in Week 7 and detailed feedback will be provided shortly after. The essay will have a word limit of 1,500 and will provide invaluable preparation for the summative assessment.

Indicative reading: Example core readings:

Blake J., and Robinson, L., "Private equity fund structures – the limited partnership", in Hale, C. (ed.), *Private Equity: A Transactional Analysis*, 3rd edition (Globe Law and Business, 2015). Cooke, D.J., *Private Equity: Law and Practice*, 5th edition (Sweet & Maxwell, 2015), selected chapters. Gullifer, L. and Payne J., *Corporate Finance Law: Principles and Policy* (Hart Publishing, 2015), 768-790. Jensen, M.C. & Meckling, W.H., "Theory of the firm: Managerial behavior, agency costs and ownership structure", 1976, *Journal of Financial Economics*, 3(4), pp.305–360. Talmor, E. & Vasvari, F., *International Private Equity* (John Wiley & Sons, 2011), selected chapters. Witney, S., *Private Equity Finance and Buyouts*, in Dunne, P., (ed). *Company Acquisitions Handbook* (Tottel Publishing Ltd, 2007), p. 651. Witne, S., *The Corporate Governance of Private Equity-Backed Companies*, 2017, PhD thesis (<http://etheses.lse.ac.uk/3557/>). Additional weekly readings will be provided to the students at the beginning of the course.

Assessment: Take-home assessment (100%) in the ST.

Students will be given a period of time in which to complete and return a take home exam, with penalties for late submission. Students will be asked to complete 2 questions from a possible 6 (with a requirement to choose one question from Part 1 and one question from Part 2) and each answer will be limited to 1,500 words, with penalties for exceeding the word limits. The length of time set for this assessment already takes into account that students may also have one or more other exams during this period.

For more information regarding penalties, please refer to the LLM Handbook.

LL4CS Half Unit

Law and Economics of Network Industries

This information is for the 2020/21 session.

Teacher responsible: Pablo Ibáñez Colomo

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

Course content: The module provides an overview of the regulation of network industries. It encompasses not only sector-specific regimes but also the ways in which competition law contributes to shaping the said industries.

Instead of focusing on a particular system, it revolves around the main underlying issues. The EU-UK system provides the basis for class discussions. Examples from the US will be used where relevant.

The module is divided into three parts: one that discusses generalities about the law and economics of network industries; a second that focuses on the sector-specific regimes applying to three sectors (telecommunications, energy and transport); a third that covers the application of competition law and examines how these fields of law are transformed and adapted when it engages with them.

Part I: Generalities

Session 1: The Economics of Network Industries.

This session addresses the features of network industries, in particular the concepts of natural monopoly, network effects and two-sided markets. It discusses the implications of the tendency of these industries towards monopoly.

Session 2: Regulatory approaches to network industries

The second session discusses the various regulatory techniques that have been used to deal with network industries. These techniques are also put in perspective: it covers the days of exclusive rights, the liberalisation efforts in the 1980s and 1990s (in the US, the EU and beyond) as well as the modern regimes.

Part II: Specific issues

Session 3: Telecommunications and electronic communications (I)
This session provides an overview of the regulation of telecommunications (or electronic communications in the EU system). After a brief overview of the basic technology-related concepts (access, interconnection) and of the evolution of regulation, it will cover the EU Regulatory Framework for electronic communications.

Session 4: Telecommunications and electronic communications (II)
This session covers some specific issues at length, in particular access to the incumbent network by new entrants and network neutrality.

Session 5: Energy (I)

The first session covers the basic concepts (TSO, DSO) as well as the regulatory models that have been put in place in the EU and the US.

Session 6: Energy (II)

The second session would deal in detail with some contemporary challenges, namely the decarbonisation of the economy and energy prices.

Session 7: Transport

The regulation of railways gives rise to major challenges and has been controversial, in the UK and beyond. This session covers the UK model and the various liberalisation steps taken in the EU.

Part III: Competition law and network industries

Session 8: The relationship between competition law and regulation

Competition law overlaps to some extent with regulation. The question is whether the former takes precedence, or vice versa. This session covers the EU and US responses.

Session 9: Competition law and network industries (I)

Competition law is transformed when it applies to network industries. This session explores the reasons for this transformation with some concrete examples.

Session 10: Competition law and network industries (II)

See above. It builds and expands on the preceding session.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading:

- Christopher Decker, *Modern Economic Regulation* (Cambridge University Press 2014)
- Niamh Dunne, *Competition Law and Economic Regulation: Making and Managing Markets* (Cambridge University Press 2015)
- Christopher Jones (ed), *EU Energy Law* (Claeys & Casteels 2020)
- Tony Prosser and Luke Butler, 'Rail Franchises, Competition and Public Service' (2018) 81 *Modern Law Review* 23
- Oz Shy, *The Economics of Network Industries* (Cambridge University Press 2001)
- Ian Walden, *Telecommunications Law and Regulation* (5th edn, Oxford University Press 2018)

Additional Reading:

- Robert Baldwin, Martin Cave and Margin Lodge, *Understanding Regulation* (2nd edn, Oxford University Press 2012)
- Leigh Hancher, 'Community, State and Market' dans Paul Craig and Grainne de Burca (eds), *The Evolution of EU Law* (Oxford University Press 1999), pp. 721-743
- Stuart Minor Benjamin et James Speta, *Telecommunications Law and Policy* (4ème édition, Carolina Academic Press 2015), pp. 187-216
- Stephen Breyer, *Regulation and Its Reform* (Harvard University Press 1984)
- Pierre Larouche, *Competition and Regulation in European Telecommunications* (Hart Publishing 2000)
- Christopher Jones (ed), *EU Energy Law, Volume I - The Internal Market* (Claeys & Casteels 2020)

Assessment: Essay (100%, 8000 words) in the ST.

Students will be free to choose a topic concerning the regulation of network industries, whether or not covered in class (for instance, postal services, or broadcasting). The essay can relate both to sector-specific regulation and to the application of competition law to network industries.

LL4E6 Half Unit

International Dispute Resolution: Courts and Tribunals

This information is for the 2020/21 session.

Teacher responsible: Dr Devika Hovell

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Some prior knowledge of international law is useful but not essential.

Course content: Increasingly, international law is developed, applied and amended through litigation in international, regional and domestic courts. Richard Goldstone, former Prosecutor of the Yugoslav Tribunal, has gone so far as to say, 'it seems to me that if you don't have international tribunals, you might as well not have international law'. In this course, we examine key courts and tribunals operating on the world stage, including the International Court of Justice, the International Criminal Court, the European Court of Human Rights and the WTO Dispute Settlement Body. We look at the theory, politics and practical difficulties of international dispute resolution in these courts.

The course has practical and theoretical aspects. For those interested in a career in international law, we will have the opportunity to hear from a range of interesting and eminent practitioners currently working in the courts and tribunals we study. Interested students can engage in a 'mini-moot' before our guest speakers, providing an opportunity to hone their advocacy skills.

The theoretical dimension of the course involves three main elements:

1. First, the course examines the structure and work of the International Court of Justice, the principal judicial organ of the United Nations, focusing on jurisdiction/admissibility, contentious cases and advisory opinions.
2. Secondly, the course introduces a variety of other international courts and tribunals, such as the International Criminal Court, domestic and regional courts dealing with international law and human rights, including the European Court of Human Rights and the European Court of Justice, the WTO Dispute Settlement Body and investment treaty arbitral tribunals. Using contemporary and controversial case studies, the course will critically analyse and contrast the institutional design and jurisdiction of these courts and tribunals.
3. Thirdly, throughout the course we explore key theoretical controversies surrounding the adjudication of international law, focusing in particular on (a) how these courts and tribunals relate to one another (hierarchy, specialization and fragmentation); (b) what criteria should be used in assessing the legitimacy and effectiveness of these courts and tribunals; and (c) whether and how these courts and tribunals create international law.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of

Michaelmas Term.

Formative coursework: Students are asked to choose from EITHER an oral moot presentation and written submissions OR one 2,000 word formative essay.

Indicative reading: Reading lists will be provided for each week's seminar on Moodle.

Indicative reading includes Karen Alter, *The New Terrain of International Law: Courts, Politics, Rights* (2014 Princeton); Gleider Hernández, *The International Court of Justice and the Judicial Function* (2014 OUP); Yuval Shany, 'No Longer a Weak Department of Power? Reflections on the Emergence of a New International Judiciary' (2009) 20(1) *European Journal of International Law* 73; Frederic Megret and Marika Giles Samson, 'Holding the Line on Complementarity in Libya: the Case for Tolerating Flawed Domestic Trials' (2013) 11 *Journal of International Criminal Justice* 571.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4E7 Half Unit Investment Treaty Law

This information is for the 2020/21 session.

Teacher responsible: Dr Jan Kleinheisterkamp NAB 7.09 and Dr Mona Pinchis

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The aim of the course is to introduce students to international investment law and dispute settlement, the latter emphasizing developments in investment treaty arbitration. The course focuses on the public international law rules and institutions that govern investments and investment treaty disputes. The course has four components: (1) the historical, theoretical and policy background behind investment treaties and dispute settlement by arbitration; (2) the rules governing jurisdiction and admissibility of investor-state arbitration cases; (3) the substantive principles and standards - such as national treatment, most-favoured-nation treatment, expropriation, and the minimum standard in international law - that may apply to the investor-state relationships; and (4) recognition and enforcement of investor-state arbitral awards and interaction between international tribunals and national courts.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students are asked to choose from EITHER an oral moot presentation and written submissions OR one 2,000 word formative essay.

Indicative reading: C.L. Lim, J. Ho, M. Paparinskis, *International Investment Law and Arbitration* (CUP 2018); R. Dolzer and C. Schreuer, *Principles of International Investment Law* (2nd edn, OUP 2012); G. Van Harten, *Investment Treaty Arbitration and Public Law* (OUP 2006)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4F2 Half Unit The Law and Practice of International Finance

This information is for the 2020/21 session.

Teacher responsible: Dr Joanne Braithwaite NAB 7.28

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 90 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: LL4F2 examines the legal issues which arise in international financial markets based in London. This course looks at various types of financial transactions and structures which are widely used in the financial markets, such as derivatives and syndicated loans. We make reference to certain sets of trade association drafted terms throughout the course, subject to obtaining the necessary licences from the trade associations in question. With an emphasis on private law, the course considers the relevant legal, commercial and regulatory background, and the risks and protections available to participants in the global financial markets. The course is based upon an analysis of the relevant issues under English law with some reference to other systems for comparative purposes. The subject matter ties in well with the LLM evening seminars in financial and corporate law. The course will be underpinned by discussion of the legal principles involved in international finance, but the case studies referenced will be topical. In this sense, the content of the course will be adapted to the fast-moving developments affecting international markets in capital and in risk (for example, in recent sessions the course has examined mis-selling litigation in the international derivatives markets, the legal basis of prime brokerage relationships, the related Lehman Brothers litigation and the ongoing regulatory reform of the OTC derivatives markets, including the new requirement of mandatory CCP clearing triggered by the G20 statement in 2009).

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be asked to submit one essay, which may be completed in exam conditions. The course also involves group presentations and other classwork.

Indicative reading: Examples of texts which will be referenced on the course: J Braithwaite, 'Law after Lehmans' (LSE Law Working Paper 11/2014); J Braithwaite 'Standard form contracts as transnational law' (2012) 75(5) *MLR* 779; L Gullifer and J Payne, *Corporate Finance Law: Principles and Policy* (Hart, 3rd edition, 2020). A full reading list will be distributed via Moodle.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Assessment is by closed book written examination.

LL4F3 Half Unit Mergers, Acquisitions and Restructurings in Europe

This information is for the 2020/21 session.

Teacher responsible: Mr Edmund-Philipp Schuster NAB 6.30

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 90 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: In this course, we will explore the corporate law aspects of company mergers, acquisitions and restructurings in Europe. The course will examine the available legal techniques for the combination and restructuring of business operations in Europe, with a particular focus on cross-border transactions. Areas covered will include corporate mobility in Europe, an introduction to transaction structures, domestic and cross-border mergers, demergers, spin-offs, and public takeovers. Particular attention will be paid to the interaction between the relevant legal concepts and the economic and financial environment firms operate in.

Content overview

- The market for corporate control, corporate ownership structures and transaction structures for public and private acquisitions, and corporate restructurings in Europe
- European takeover regulation
- Domestic mergers
- Divisions & spin-offs
- Cross-border mergers in Europe
- Employee participation and its relevance for corporate transactions

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: One 1500 word essay, due in Week 7 of LT.

Indicative reading: A full reading list will be made available via Moodle at the beginning of the course. Sample readings: R. Romano, A Guide to Takeovers: Theory, Evidence and Regulation (1992) 9 Yale Journal of Regulation 119; RD Kershaw, Principles of Takeover Regulation (OUP 2016); RD Kershaw, Company Law in Context (2012), Web Chapter A [available here: http://global.oup.com/uk/orc/law/company/kershaw2e/resources/chapters/Web_Chapter_A.pdf]; S Grundmann, European Company Law (Intersentia, 2nd ed. 2011); PL Davies et al, The Takeover Directive as a Protectionist Tool? [available here: <http://ssrn.com/paper=1554616>]; C Clerk et al, A Legal and Economic Assessment of European Takeover Regulation ; E-P Schuster, The Mandatory Bid Rule: Efficient, After All? (2013) 76 Modern Law Review 529; KJ Hopt and E Wymeersch (eds), European Takeovers: Law and Practice.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4F4 Half Unit Not available in 2020/21 Takeover Regulation in the UK and the US

This information is for the 2020/21 session.

Teacher responsible: Prof. David Kershaw

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 90 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course will look at the regulation of the market for corporate control in the United Kingdom and the United States. The course focuses in particular on the regulation of the bid process and takeover defence regulation in the UK and the US. For a full topic and reading list, see the Moodle web site.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6 of MT.

Formative coursework: 1,500 word essay.

Indicative reading: A full reading list will be made available via Moodle at the beginning of the course. Background material can be found in D. Kershaw, Principles of Takeover Regulation (OUP, 2016), R. Kraakman et al, The Anatomy of Corporate Law (2004).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4F9 Half Unit

Legal Research and Writing Skills

This information is for the 2020/21 session.

Teacher responsible: Prof Thomas Poole

Availability: This course is compulsory on the LLM (extended part-time) and LLM (full-time). This course is not available as an outside option.

Course content: This course on Legal Research and Writing has a taught component focusing on research and writing skills and a stand-alone dissertation (details about which may be found in the LLM Handbook), to be written in a substantive law area of the student's choice.

The two components will be carefully integrated. Over the taught part of the course, students should gain a better understanding of:

- the nature of research in general; the distinctive features of legal research and the range of questions and research methodologies to be found within legal scholarship;
- how to conduct legal research, including research design, refining a research question, resource identification and searching for relevant materials; legal referencing and citation skills;
- how to develop legal writing skills, relating to both the process of writing, as well as the end-product; integrating a literature review; and presenting findings to a scholarly audience, etc.

Topics for the lectures will be: (1) Choosing your dissertation topic; (2) Research methods; (3) Writing skills; (4) Library skills, referencing and plagiarism.

The two tutorials will have a small group format (usually 4-5 students in each tutorial) and will focus on: (1) developing your research proposal; and (2) writing skills. One of the aims of the tutorials will be to prepare students for their two dissertation supervisions with faculty members.

The course will also offer the opportunity to participate in workshops. For example, there are skills sessions run by the LSE Library designed for students on this course to develop their legal research skills and awareness of the resources on offer in the LSE Library and beyond. The course also links in closely to the programme of workshops and events offered by the LSE Life centre, and the most relevant of these support sessions will be referenced on this course.

Teaching: This course is delivered through a combination of classes and lectures throughout Michaelmas and Lent terms. Students will usually have additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus.

Formative coursework: Students will be invited to prepare a short writing samples and dissertation plans, etc., for their tutorials.

Assessment: Dissertation (100%, 10000 words) post-summer term.

See the LLM handbook for full details and regulations about the dissertation.

LL4G8 Half Unit Law of Corporate Finance

This information is for the 2020/21 session.

Teacher responsible: Dr Eva Micheler (NAB 5.14) and Mr Edmund-Philipp Schuster (NAB 6.30)

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 90 students.

Course content: The course examines the private law rules governing how companies raise finance. The issues covered include e.g. capital structures, an introduction to basic finance concepts relevant to understanding the legal rules covered, the rules on raising equity capital, initial legal capital and alternatives, dividends, reduction of capital and share buy-backs, disclosure obligations for listed companies, property rights in shares, the settlement and holding of securities including through distributed ledger (blockchain) technology and insider dealing and market manipulation.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will have the opportunity to write a formative essay for each of the seminars. All students are strongly encouraged to write at least one essay.

Indicative reading: Gower and Davies, *Principles of Modern Company Law*, 10th edn, 2016; Eilis Ferran and Look Chan Ho, *Principles of Corporate Finance Law*, 2014, Eva Micheler, *Interests in Securities*, 2007.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4H2 Half Unit Not available in 2020/21 Freedom of Speech, Media and the Law

This information is for the 2020/21 session.

Teacher responsible: Dr Andrew Scott NAB 6.25

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Media and Communications (Media and Communications Governance) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines freedom of speech and the legal and administrative regulation of mass media publication that bears upon it (principally the press, the broadcast media, and institutionalised Internet publication). The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media publication practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines potential restrictions on publication that are aimed at promoting or preserving specific private and/or public interests. The key private interests considered are those in reputation (defamation), privacy, and confidentiality. The key public interests considered are the integrity of the judicial process (contempt and reporting restrictions), the impartiality of political representations, the avoidance of offence (obscenity and religion), and national security.

Teaching: 20 hours of seminars in the LT.

There will be a reading week in week 6.

10 weekly two-hour seminars in LT. The course is also supported by a series of specialist seminars with outside speakers, and by an online discussion forum.

Formative coursework: Students must submit either a formative essay of 1,500 words or an essay plan and working bibliography for the assessed essay.

Indicative reading: Supporting texts for the course include Greenawalt, 'Free Speech Justifications' (1989) 89 Columbia Law Review 119; Parkes and Mullis (eds), *Gatley on Libel and Slander* (Rev 12th edn, Sweet & Maxwell, 2015); Waldron, *The Harm in Hate Speech* (Harvard University Press, 2012); Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (OUP, 2016), Kenyon and Scott (eds), *Positive Free Speech: Rationales, Methods and Implications* (Hart Publishing, 2020), and Barendt et al, *Media Law: Texts, Cases and Materials* (Pearson, 2013). Most materials relevant to the course are made available via the BLPEs electronic resources or online.

Assessment: Essay (100%, 8000 words).

LL4H3 Half Unit Not available in 2020/21 Media Law: Regulating Newsgathering

This information is for the 2020/21 session.

Teacher responsible: Dr Andrew Scott NAB 6.25

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Media and Communications (Media and Communications Governance) and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course examines the legal and administrative regulation of newsgathering and content production practices undertaken by journalists and others working in the media sector. The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media newsgathering practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines a number of newsgathering practices that are either facilitated or proscribed by law and/or other forms of regulation. These include the protection of sources and journalistic materials; 'cheque-book journalism' (including payments to witnesses and to criminals); access to information held by the state (freedom of information); access to courts and legal documents; media-police interaction; harassment and media intrusion, and the regulation of surreptitious newsgathering practices (hacking, tapping and subterfuge).

Teaching: 20 hours of seminars in the LT.

There is a reading week in week 6.

The course is also supported by a series of specialist seminars with outside speakers, and by an online discussion forum.

Formative coursework: Students must submit an essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises, and to submit one 1,500 word formative essay.

Indicative reading: Supporting texts for the course include Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (Oxford University Press, 2016); Leveson, *An Inquiry Into the Culture, Practices and Ethics of the Press: Report*, HC 780, 2012, Warby, Moreham and Christie (eds), *Tugendhat and Christie: The Law of Privacy and the Media*, (3rd ed, OUP, 2015), *Flat Earth News* (Chatto & Windus, 2008); de Burgh, *Investigative Journalism* (Routledge, 2nd ed, 2008). Many of these and other materials

relevant to the course are made available via the BLPES electronic resources or online.

Assessment: Essay (100%, 8000 words) in the ST.

LL4H4 Half Unit

International Financial Law

This information is for the 2020/21 session.

Teacher responsible: Dr Philipp Paech

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The law of the traditional financial market sectors of insurance, commercial banking, derivatives, capital markets and asset management are converging in practice, but their academic analysis is still largely sector-based. The main goal of this course is to offer a cross-sectoral, functional understanding of the commercial, property and insolvency law of finance, permitting students to grasp the big picture and apply acquired understanding to very diverse legal constellations in finance. The course also highlights certain anomalies in differing legal treatment of the respective sectors or certain types of transactions that induce regulatory arbitrage. Further, students will acquire the ability to identify and put into context key trends in finance.

The course provides an overview of the substantive law aspects (UK, EU and international) of international financial and business transactions. The focus is mainly on broad principles and policy issues rather than a detailed examination of statute, case law and drafting. However, where appropriate, legal concepts and market practice will be explained by reference to case law and other legal sources. The course is designed to be as topical as possible, and the content may change in the light of developments. While the precise topics covered will vary from year to year they typically will include the following:

- Introduction:

Logic and players of the financial market

Overview of types of financial transactions

Reasoning and sources of financial law and regulation

The different types of risk and the role of financial law

European and global legal and regulatory architecture

- Raising capital:

Taking risk through funded positions

The nature of banks, deposit taking, loans, syndicated loans

Issuance of debt securities, eurobonds and equity

Investment funds

Cross-comparison of funded positions, common patterns and differences

- Mitigating risk:

Simple financial positions (guarantee, insurance, derivatives and credit default swaps)

Close out netting, clearing

Financial collateral

- Insolvency policy:

Preferential treatment of financial firms

- Cross-jurisdictional analysis:

Private international law analysis in financial law

International bank insolvencies

- Specific constellations:

Intermediated securities and cross-border collateral

Securitisation

Crypto assets, blockchain and other FinTech-related issues

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on

campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be asked to submit a 2,000 word essay during LT. A voluntary mock exam is also offered.

Indicative reading: A detailed reading list will be made available on Moodle prior to teaching.

Recommended general reading: (a) Joanna Benjamin, *Financial Law*, Oxford University Press, 2007; (b) Colin Bamford, *Principles of International Financial Law*, Oxford University Press, 2011; (c) Philip Wood, *Law and Practice of International Finance* (University Edition) 2007, Sweet&Maxwell; (d) S. Valdez, Ph. Molyneux, *An Introduction to Global Financial Markets*, 6th ed., Palgrave-McMillan, 2010 (this last one is not a legal work but ideal for understanding market practice).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Assessment is by closed book written examination. The exam is two hours plus 15 minutes reading time.

LL4H8 Half Unit

Employment Law

This information is for the 2020/21 session.

Teacher responsible: Dr Astrid Sanders

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Inequalities and Social Science and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: Regulation of the content and the form of the employment relation. The contract of employment, including express and implied terms and the scope of employment law. Regulation of minimum wage and working time. Protection against discrimination in the workplace. Discipline and protection from dismissal and termination of employment. Business reorganisation and economic dismissals. Freedom of association and the right to strike. The approach involves theoretical perspectives, economic analysis, comparative law of employment, and examination of relevant European law.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Detailed syllabus of weekly readings will be available and the materials can all be accessed through Moodle. Hugh Collins, *Employment Law*, 2nd edn (Oxford University Press, 2010), Chapters 1-9.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Candidates are allowed to take an unannotated copy of a collection of statutory materials into the examination.

LL4H9 Half Unit Not available in 2020/21**Human Rights in the Workplace****This information is for the 2020/21 session.****Teacher responsible:** Dr Astrid Sanders**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The sources and application of human rights in the workplace, including international and European laws and conventions. Civil liberties of employees. Social and economic rights of workers. Protection from discrimination in the labour market and employment. As well as detailed examination of legal materials, the approach involves discussion of theories of human rights and comparisons between legal systems.**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.**Formative coursework:** One 2,000 word essay and one presentation.**Indicative reading:** A detailed syllabus of weekly readings will be available and the materials can all be accessed through Moodle Preliminary reading: Hugh Collins, *Employment Law*, 2nd edn (Oxford University Press, 2010), Chapters 9-10.**Assessment:** Essay (100%, 8000 words) in the ST.

doctrine in relation to international law and human rights. Those taking the course will gain an appreciation for self-determination's particular contribution to political and economic liberty.

Teaching: 20 hours of seminars in the MT.

(Please note that week six will be a reading week.)

Formative coursework: Students will be asked to submit one 2,000 word essay.**Indicative reading:** Introductory reading: James Crawford, "The Right of Self-Determination in International Law: Its Development and Future" in Philip Alston, ed., *People's Rights* (Oxford: Oxford University Press, 2001) 7. Additional sources: Philip Alston, ed., *Peoples' Rights* (Oxford: Oxford University Press, 2001); S. James Anaya, , *Indigenous Peoples in International Law*, 2nd ed. (Oxford: Oxford University Press, 2004); Allen Buchanan, *Justice, Legitimacy, and Self-Determination: Moral Foundations for International Law* (Oxford: Oxford University Press, 2004); Cassese, Antonio, *Self-Determination of Peoples: A Legal Reappraisal* (New York: Cambridge University Press, 1995); Hillary Charlesworth, & Christine Chinkin, *The Boundaries of International Law* (Manchester: Manchester University Press, 2000); James Crawford, ed., *The Rights of Peoples* (Oxford: Clarendon Press, 1988); Hurst Hannum, *Autonomy, Sovereignty, and Self-Determination: the Accommodation of Conflicting Rights*, rev. ed. (Philadelphia: University of Philadelphia Press, 1996); James Irving, "Self-Determination and Colonial Enclaves: The Success of Singapore and the Failure of Theory" (2008) 12 S.Y.B.I.L. 97-122.; Christian Walter, Antje von Ungern-Sternberg & Kavus Abushov, eds., *Self-Determination and Secession in International Law* (New York: Oxford University Press, 2014).**Assessment:** Essay (100%, 8000 words).**LL4K4 Half Unit Not available in 2020/21****The International Law of Self-Determination****This information is for the 2020/21 session.****Teacher responsible:** Dr James Irving**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Some prior knowledge of international law is useful but not essential.**Course content:** This course will provide a general introduction to the doctrine of self-determination in international law. Self-determination will be historically contextualised from its intellectual progenitors in the Enlightenment through to its political birth at the 1919 Paris Peace Conference and its formal induction into international law by virtue of the 1945 UN Charter. Both the detail of the doctrine's content and the dynamic governing its development will be explored. The relationship between self-determination and state formation (including decolonisation and secession), minority rights, aboriginal rights, women's rights and the nascent right to democratic governance will be central topics. Reference will also be made to the interplay between self-determination and economic rights, including permanent sovereignty over natural resources, the right to development and the "third generation rights" movement more generally. Self-determination's influence upon the international rules governing the use of force will be discussed, but these rules will not be a primary focus. Upon completion of the course students will be in a position to legally analyse contemporary fact patterns and to identify both strengths and weaknesses in the existing legal framework. Students will have considered new and novel approaches to self-determination and will be able to situate the**LL4K5 Half Unit****International Commercial Contracts - General Principles****This information is for the 2020/21 session.****Teacher responsible:** Dr Jan Kleinheistercamp, NAB 7.09**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Firm knowledge in contract law and/or international sale of goods from previous studies.**Course content:** The course treats what can be called the general part of transnational contract law, i.e. the general principles of law which are of relevance in any kind of international contract, be it sale, construction, shipping, financing, or joint venture.

These general principles relate to contractual formation and negotiations, interpretation, transversal general principles, changed circumstances and hardship, agency, third parties, assignment, self-help and set-off, direct performance and damages and penalties. At present, such contracts are governed either by uniform rules of international conventions or by the national laws applicable by virtue of conflict of law rules. The course puts the existing national and international solutions in a comparative perspective so as to work with the sources of such generally accepted principles. Where there are divergences between existing solutions, the course focuses on the elaboration of new efficient solutions that are internationally acceptable and have the potential of becoming general principles in the future. For these purposes, special attention is given to the UNIDROIT Principles on International Commercial Contracts. Other national laws, however, are drawn upon from time to time. Students are also encouraged, in both classes and examination, to reflect upon the similarities and differences between their own national laws and the UNIDROIT Principles.

Teaching: This course is delivered through a combination of classes

and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: One 2,500 word essay after week 6 on previous exam questions (choice of 1 out of 3).

Indicative reading: S. Vogenauer & J. Kleinheisterkamp, Commentary on the UNIDROIT Principles of International Commercial Contracts (1st edn, OUP 2009); H. Kötz, European Contract Law (OUP 1997); K. Zweigert & H. Kötz, An Introduction to Comparative Law (3rd edn, OUP 1998); H. Beale et al., *Ius Commune Casebook on the Common Law of Europe: Cases Materials and Text on Contract Law* (2nd edition, OUP 2010); T. Kadner Graziano, *Comparative Contract Law* (Palgrave 2009).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4K7 Half Unit Not available in 2020/21

Mental Health Law: The Criminal Context

This information is for the 2020/21 session.

Teacher responsible: Prof Jill Peay NAB.5.08

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students.

Course content: This course aims to integrate a practical and theoretical understanding of mental health law, as it relates to mentally disordered offenders. It is not intended to provide a comprehensive understanding of the detail of the relevant law in England and Wales, but rather aims at broader conceptual understanding of the problem areas that are likely to bedevil any law relating to those with mental disabilities who have offended. The course makes reference to both the Mental Health Act 1983 and the Criminal Justice Act 2003.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6. Summer term is a review and revision session.

Formative coursework: One 2,000 word essay.

Indicative reading: J. Peay (2011) *Mental Health and Crime*, Routledge. B. Hale (2017) *Mental Health Law*, Sweet and Maxwell

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Two-hour unseen examination in ST (100%).

LL4K8 Half Unit Not available in 2020/21

Law of Corporate Finance: Securities Regulation

This information is for the 2020/21 session.

Teacher responsible: Prof Niamh Moloney NAB6.08

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 60 students.

Course content: The course examines the legal issues arising out of the operation of the capital markets as intermediaries between investors and issuers; it focuses on the regulation of capital-raising through the markets. The topics covered include: disclosure theory;

the role of trading markets in finance-raising and their regulation; prospectus disclosure; ongoing disclosure; market abuse; and the internationalization of capital-raising and harmonization. The course will focus primarily on English law. Course coverage may vary slightly from year to year.

Teaching: 22 hours of lectures and 5 hours of seminars in the LT. Teaching on this course takes the form of weekly two-hour lectures in LT. Five classes/seminars (of one-hour duration) will also take place as scheduled in the LL4K8 timetable.

Formative coursework: A mock examination will be held at a time to be advised during LT.

Indicative reading: Reading lists will be provided in advance for each session. Sample texts include: Ferran and Ho, *Principles of Corporate Finance Law*, 2 ed 2014; Payne and Gullifer, *Corporate Finance Law*, 2011.

Preliminary reading

Ferran and Ho, *Principles of Corporate Finance Law*, 2 ed 2014, Chapters 1 and 13.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4K9 Half Unit

European Capital Markets Law

This information is for the 2020/21 session.

Teacher responsible: Prof Niamh Moloney NAB6.22

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The course examines the EU's regulation of the capital markets. It considers the harmonized regulatory regime which applies to capital market actors across the Member States and which supports the integrated market. The topics which may be covered include: the rationale for integration and the role of law and the evolution of the integration project, including the impact of the financial crisis; the deregulation, liberalization, harmonization, and re-regulation mechanisms used to integrate and regulate the EU market; market access and the passport for investment services; the liberalisation of order execution and the regulation of trading markets; retail investor protection; the prospectus and disclosure regime; the regulation of gatekeepers; and the institutional structure supporting regulation and supervision, including the role of the European Securities and Markets Authority. Course coverage may vary slightly from year to year.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: A mandatory in-class formative assessment (in the form of a timed exam question) will be held in week 6.

Indicative reading: Reading lists will be provided in advance for each seminar. Sample texts include: Moloney, *EU Securities and Financial Markets Regulation*, 3rd edition (2014); Veil (ed), *European Capital Markets Law*, 2nd edition (2017); Mugge (ed), *Europe and the Governance of Global Finance* (2014); Ferran, *Building an EU Securities Market* (2004).

Preliminary reading

Moloney, *EU Securities and Financial Markets Regulation* (2014), chapter 1

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4L1 Half Unit Not available in 2020/21

The Theory and Practice of Alternative Commercial Dispute Resolution

This information is for the 2020/21 session.

Teacher responsible: Dr Jan Kleinheisterkamp (Convener) NAB 7.09, Dr Philipp Paech NAB 7.21

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law, Anthropology and Society and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course will be relevant to the following LLM specialisms: Commercial Law; International Business Law. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: None.

Course content: Given the high cost and risk of litigation and arbitration, parties to commercial transactions have an interest in managing, and hedging against, the risk of future disputes with their business partners and others. This course introduces and explores the different methods of alternative dispute resolution (ADR), i.e. those methods for settling commercial disputes out of courts, both from a theoretical and a practical perspective. The first half of the course lays the foundations of alternative resolution of commercial disputes, exploring its history, socio-legal context and its embedding in procedural law and reform. The second half will then focus on the particularities of disputes in commodities trade, including shipping, maritime and insurance; construction; IP; financial markets; regulatory and inter-agency / interstate disputes and international tax disputes.

The course prepares for LL4L7 – Advanced Negotiation and Mediation. It complements LL4C5 – Fundamentals of International Commercial Arbitration and LL4E7 – Investment Treaty Law.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a Reading Week in week 6 of MT.

Formative coursework: One 2,000 word essay.

Indicative reading: H Brown / A Marriott, ADR Practice and Principles (Sweet & Maxwell 2011); S Roberts / M Palmer, Dispute Processes: ADR and the Primary Forms of Dispute Resolution (2nd edn, CUP 2005); R Fisher / W Ury, Getting to Yes: Negotiating an Agreement Without Giving In (2011)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4L5 Half Unit Not available in 2020/21

Socio-legal Theory and Practice

This information is for the 2020/21 session.

Teacher responsible: Dr Meredith Rossner NAB 6.33

Availability: This course is compulsory on the MPhil/PhD in Law (Socio-Legal Theory). This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. Proposed +4 ESRC PhD students registered in the law department (and in other departments with permission). This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course will explore the interface between social theory, methodology and socio-legal practice. After an initial engagement with literature on the history, scope and nature of doctrinal, realist, critical and socio-legal approaches to law, the course will focus on seminal empirical studies of law and legal phenomena. In particular students will be asked to identify how specific theoretical frameworks for research have influenced choice of methodology, methods and the subsequent

interpretation of data. Empirical studies exploring central legal concepts such as rights, regulation, access to justice, judgment, neutrality, due process and equality will be selected for in-depth analysis. An important feature of the course is that authors of leading socio-legal research outputs will be invited to lead 'master classes' in order to discuss the intellectual origins of their work and how this impacted on design and implementation.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6.

Formative coursework: Students will be asked to prepare a poster presentation outlining the theoretical framework, methodological choices, ethical implications and practical obstacles for a research project they would like to undertake. The 'ideas map' they present will be used as a plan for the formal summative assessment. Each student will present their poster to the class before week seven of the term and will receive detailed feedback on their presentation by the end of the same term. This will give students the time to reflect on the comments made before writing up their ideas in their course dissertation. A fuller version of the presentation will later be submitted as the coursework component of the course. This is an unusual form of assessment for law students but is used extensively in other disciplines. Students will be directed to websites which provide guidance in preparing a poster presentation and will also be given the opportunity to study examples of posters collected by the course convener.

Indicative reading: Roger Cotterrell, Why Must Legal Ideas Be Interpreted Sociologically? (1998) 25 Journal of Law and Society pp171-92; David Nelken, Blinding Insights? The Limits of Reflexive Sociology of Law (1998) 25 Journal of Law and Society 407-26; Simon Halliday and Patrick Schmidt (eds) Conducting law and Society Research: Reflections on methods and Practices, Cambridge University Press, 2009; Max Travers, The sociology of law in Britain The American Sociologist, Vol 32, no 2, June 2001.

Assessment: Essay (100%, 8000 words) in the ST. The essay will take the form of a research proposal (100%).

LL4L6 Half Unit Not available in 2020/21

Theory of Constitutional Rights

This information is for the 2020/21 session.

Teacher responsible: Dr Kai Moller NAB7.01

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some knowledge of human or constitutional rights law of any jurisdiction may be helpful, but is not essential. A knowledge of philosophy is not required.

Course content: The course will provide an introduction to the theory of constitutional rights. The emphasis is on a combination of law and theory; to this end, each seminar will rely on a mixture of cases from various jurisdictions and theoretical and philosophical materials. Topics to be discussed will include: Robert Alexy's Theory of Rights as Principles; Ronald Dworkin's Theory of Rights as Trumps; The Debate about Proportionality; Absolute Rights; The Justifiability of Judicial Review; The Culture of Justification and the Right to Justification.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: The course will rely on both cases from various jurisdictions and articles and book chapters from authors including Ronald Dworkin, Robert Alexy, Matthias Kumm, Jeremy Waldron and Frances Kamm.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4L7 Half Unit Not available in 2020/21**Advanced Mediation and Negotiation**

This information is for the 2020/21 session.

Teacher responsible: Dr Philipp Paech (Convener) NAB 7.21
Dr Jan Kleinheisterkamp NAB 7.09

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law, Anthropology and Society and University of Pennsylvania Law School LLM Visiting Students.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms:

Commercial Law; International Business Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: Students wishing to take Advanced Negotiation and Mediation are recommended to have taken LL4L1 - The Theory and Practice of Alternative Commercial Dispute Resolution, or have equivalent prior experience.

Course content: This course explores the dynamics of disputes and the use of negotiation and mediation to assist in their resolution. These techniques can allow parties to overcome antagonistic positions or disputes, refocus on their actual needs and to come to an agreement over how to align their interests and to allocate risk for the future – and to draw a line under tensions of the past. The course pays particular attention to understanding the dynamics of disputes; obstacles to their resolution arising from cultural differences and the role of language, including techniques such as non-violent communication; different theories and models of negotiation and mediation and their practical applications, such as facilitative, evaluative, narrative / transformative and transactional approaches; the sometimes/often problematic role of lawyers; the nature of settlement and its potential dangers for weaker parties or public interests.

In sum, the course aims to facilitate not only an advanced theoretical but also practical understanding of the processes and techniques involved in negotiation and mediation. For that purpose, case studies will illustrate some specific challenges, such as in negotiations of international transactions, family mediation, mediation in international crisis situations or policy negotiations in the context of public institutions. Experienced practitioners will be invited to share their insights from experiences in the field.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: R Fisher / W Ury / B Patton, *Getting to Yes: Negotiating Agreement Without Giving In* (revised edn, 2011); W Ury, *Getting Past No: Negotiating with Difficult People* (1992); M Rosenberg, *Non-Violent Communication* (2015); O Fiss, 'Against Settlement' (1983/84) 93 Yale LJ 1073-1090; S Roberts / M Palmer, *Dispute Processes: ADR and the Primary Forms of Dispute Resolution* (2nd edn, CUP 2005).

Assessment: Essay (100%, 8000 words) in the ST.

LL4N6 Half Unit**Principles of Copyright Law**

This information is for the 2020/21 session.

Teacher responsible: Dr Martin Husovec
Other Staff Involved: Dr Luke McDonagh

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: None

Course content: The course explains the foundations and structure of copyright law. It is aimed at those who have not studied the subject in detail before but also those wishing to deepen their understanding of copyright law in the comparative context. Topics to be covered will include the history and evolution of copyright, protected subject matter, the scope of the economic and moral rights, and the principles underlying copyright enforcement.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading lists will be issued on a weekly basis. The legislation, cases and soft law instruments will make up additional required reading for this course. All of this material is available in electronic form via the Moodle site which supports the course. Useful texts include Lionel Bently and Brad Sherman, *Intellectual Property Law* 4th ed. (OUP, Oxford 2018); Thomas Dreier and P. Bernt Hugenholtz (eds.) *Concise European Copyright Law* (Kluwer, 2016); Paul Goldstein and P. Bernt Hugenholtz, *International Copyright Law* 3rd ed. (OUP 2019); and Eleonora Rosati, *Copyright and the Court of Justice of the European Union* (OUP 2019).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4S1 Half Unit**Cyberlaw**

This information is for the 2020/21 session.

Teacher responsible: Professor Andrew Murray NAB 6.08
Other Staff Involved: Dr. Valerie Verdoodt NAB 7.23

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: This course does not require an in-depth understanding of contemporary computer technology.

Course content: This course examines and discusses topical issues in relation to the law and digital data information storage, access and exchange through digital information devices (computers, smartphones, tablets etc.). It opens by examining the issues relating to network regulation or control by addressing questions such as "can internet-enabled communications be regulated?" and "who is competent to police online content and activity?" It concludes its examination of structural controls by examining the highly topical and politically charged issue of enshrined network neutrality: by asking the question: should Internet Service Providers be allowed to vary service conditions by types of content? It will also address cutting edge issues such as algorithmic regulation, profiling, deceptive content, protection of children, influencer and advertiser regulation and "smart" devices (Internet of Things).

Students taking the course will be expected to develop knowledge and understanding of the different values brought to bear in the regulation of new media technologies and communities formed through such technologies and the factors leading towards choices of particular values, regulatory institutions and process. Such knowledge and understanding will operate both at the theoretical level and the level of particular examples of regulatory regimes. Students will be expected to apply organisational and analytical skills to the investigation of evidence and problems and show effective communication through written work and seminar

discussion. Students shall research an assessed extended essay.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students should submit an essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises, and to submit one 2,000 word formative essay.

Indicative reading: Murray, Information Technology Law: The Law and Society (OUP, 4th ed, 2019). Edwards (ed), Law, Policy and the Internet (Hart, 2018). Reed & Murray, Rethinking the Jurisprudence of Cyberspace (Edward Elgar, 2020). Murray, The Regulation of Cyberspace (Routledge, 2007). Reed, Making Laws for Cyberspace (OUP, 2012). Lessig, Code Ver, 2.0 (Basic Books, 2006). Zittrain, The Future of the Internet (Penguin, 2009)

Assessment: Essay (100%, 8000 words) in the ST.

LL4S2 Half Unit E-Commerce Law

This information is for the 2020/21 session.

Teacher responsible: Prof Andrew Murray NAB 6.08

Other Staff Involved: Dr. Martin Husovec

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 60 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course is to introduce students from a legal background to the specialised legal structure which surrounds e-commerce. The course looks at the specific problems an e-commerce start-up must overcome in order to begin trading, including arranging hosting agreements, designing terms and conditions of service and delivery, and arranging distribution agreements. From here the course will develop to examine the problems of more mature e-commerce businesses including jurisdiction, payment systems (including cryptocurrency and distributed ledger technology) and rules on marketing and privacy. Special classes on Online Dispute Resolution and the regulation of gig economy platforms will complete the analysis. The course is designed to act as an interface between ICT law and commercial law and practice in that it examines in detail the close sub-set of online transactions which are clearly commercial in nature.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students should submit an essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises, and to submit one 2,000 word formative essay.

Indicative reading: Murray: Information Technology Law: The Law and Society 4ed (OUP, 2019); Lodder & Andrew Murray (eds) EU Regulation of E-Commerce: A Commentary (Edward Elgar, 2017); Edwards (ed): Law, Policy and the Internet (Bloomsbury, 2018); Tapscott & Tapscott: Blockchain Revolution: How the Technology Behind Bitcoin is Changing Money, Business and the World (Penguin, 2016); Kuner: Transborder Data Flows and Data Privacy Law (OUP, 2013)

Assessment: Essay (100%, 8000 words).

LL4S4 Half Unit

Digital Rights, Privacy and Security

This information is for the 2020/21 session.

Teacher responsible: Dr Orla Lynskey NAB 6.23

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students and priority is given to LLM and MSc in Regulation students when allocating places. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Basic knowledge of EU law is desirable, but not essential, for this course. Students who do not have this background knowledge are advised to do some preparatory reading (2-3 chapters) before the seminar begins.

Course content: Personal data is an important factor of production in data-driven economies, and the processing of personal data can generate significant economic and social benefits. However, personal data processing can also have a detrimental impact on established rights and values, such as autonomy, privacy and data protection. As a result, legal frameworks to regulate personal data processing have been enacted across the world, with the EU legal model used as a blueprint. Yet, despite the development of such legal frameworks, critical questions remain unanswered. For instance, the objectives of data protection frameworks differ with some prioritising a fundamental-rights approach to data protection regulation while others frameworks are based on an economic free-trade rationale. Disagreement also persists regarding how the balance should be struck between effective data protection and other rights (such as freedom of expression and freedom of information) and interests (such as innovation and national security).

This course will critically evaluate the legal framework applicable to personal data processing. It will be done predominantly with reference to the EU framework, as this has served as a model for over 100 other jurisdictions. Participants will be introduced to techniques and technologies for monitoring and processing personal data in the information society. In order to bring key issues to life, a number of case studies will be considered, including the application of data protection rules to online behavioural advertising and the use of automated decision-making in the criminal justice context.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: All students are expected to contribute to a series of class exercises and to submit one piece of formative work for assessment.

Indicative reading:

- Bygrave: Data Privacy Law: An International Perspective (OUP, 2015)
- Cohen: Between Truth and Power (OUP, 2019)
- Kuner: Transborder Data Flows and Data Privacy Law (OUP, 2013)
- Lynskey: The Foundations of EU Data Protection Law (OUP, 2015)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

This is an open-book exam.

LL4S5 Half Unit Not available in 2020/21**Copyright Law**

This information is for the 2020/21 session.

Teacher responsible: Dr Martin Husovec

Other Staff Involved: Prof Andrew Murray NAB 6.08

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The course examines the law and policy issues relating to a number of key aspects of online piracy, copyright protection and other forms of intellectual property rights (IPRs). At the end of the course, students should be able to:

- critically evaluate ongoing developments in law relating to IPRs and the digital environment;
- display an understanding of how these developments relate to one another;
- examine areas of doctrinal and political debate surrounding rules and theories;
- evaluate those rules and theories in terms of internal coherence and practical outcomes;
- draw on the analysis and evaluation contained in primary and secondary sources.

The speed of technological innovation means that even as laws and regulatory practices are formulated, they are already under pressure from the next wave of development. One of the greatest challenges of the digital environment has been the compression and transmissibility of all data including entertainment data such as music, movies, TV shows and video games. For more than twenty years the entertainment industries have found themselves under continuous assault from their own customers and have often been painted as the villains of the piece. Lawyers and lawmakers have been forced to respond, often following behind the technology.

This class explores how legislators, regulators and those in the entertainment and luxury products industries interact in their attempts to develop a coherent and flexible body of law and regulatory practice for an increasingly globalised environment. This will involve consideration of current and potential legal and regulatory strategies that can be used to achieve aims such as protection of copyright content, software, luxury branded goods and the battle between open source and proprietary software.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6.

Formative coursework: All students are expected to contribute to a series of class exercises, and to submit to one one-hour mock exam.

Indicative reading: Murray: Information Technology Law: The Law and Society 4ed (OUP, 2019). Husovec: Injunctions against Intermediaries in the European Union: Accountable but Not Liable? (CUP, 2017). Koo: The Right of Communication to the Public in EU Copyright Law (Hart, 2019). Klein, Moss & Edwards: Understanding Copyright Intellectual Property in the Digital Age (Sage 2015). Rosati: Copyright and the Court of Justice of the European Union (OUP, 2019)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou. Students from other Departments are allowed to apply with permission of the course convener.

Course content: This course covers both the comparison of law and legal institutions from different legal systems and traditions (comparative law), and the study of forms of legal regulation beyond the state (transnational law). For each these two fields, topics for discussion are selected based on their relation to one or both of two broad themes: First, the connections between law and its surroundings (culture, society, economy, etc.); and second, the character of 'law' generally (as a form of reasoning, or a set of institutional arrangements, or a distinctive 'worldview', etc.). Studying these two classic themes across of a range different national- and transnational settings allows us to ask a series of more concrete questions, such as: "Why are courts in some legal systems more powerful or more trusted than courts in other systems?"; "Why do some countries send far more people to prison than others?"; "Is it possible for a lawyer from one legal system to really understand what law means or how law works in some other system; or for a legal doctrine from one system to be 'transplanted' to another?"; and: "How is 'law' in non-state contexts similar to and different from state law?".

The course combines attention to theory (social- and cultural theory, theories of comparison, and of the transnationalisation of law) with detailed case studies in selected areas from different fields of law (comparative constitutional law, comparative private law, comparative criminal justice, EU law; and commercial arbitration, among others). The course might be especially interesting for students already taking other courses with a comparative- or a transnational law dimension, and for all students interested in the ways law works, and does not work, and in how lawyers think, in different parts of the world.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course. This essay is due in Week 7.

Indicative reading:

- Adams, Maurice & Bomhoff, Jacco, Practice and Theory in Comparative Law (Cambridge, 2013)
- Cotterrell, Roger, What is Transnational Law?, LAW & SOCIAL INQUIRY (2012)
- Frankenberg, Gunther, Critical Comparisons: Re-thinking Comparative Law, 26 HARVARD INTERNATIONAL LAW JOURNAL (1985)
- Pirie, Fernanda, The Anthropology of Law (Oxford, 2013)
- Reimann, Mathias and Zimmermann, Reinhard, The Oxford Handbook of Comparative Law (Oxford, 2006)
- Ruskola, Teemu, Legal Orientalism (Harvard, 2013)
- Shaffer, Greg, Theorizing Transnational Legal Ordering, ANNUAL REVIEW OF LAW AND SOCIAL SCIENCE (2016)
- Special Issue: 'Comparative Socio-Legal Studies', INTERNATIONAL JOURNAL OF LAW IN CONTEXT (2017)

Assessment: Take-home assessment (100%) in the ST.

The take home exam will consist of 2 essay questions (out of 6 set), each with a 3000 word limit. Students will be given their exam questions at 9:00 am on Wednesday morning of Week 1 Summer Term, via Moodle, and will have until 5:00 pm on Thursday afternoon of Week 2 Summer Term to submit the exam. The length of time set for this assessment already takes into account that students may also have one or more other exams during this period.

LL4Y9 Half Unit**Comparative and Transnational Law**

This information is for the 2020/21 session.

Teacher responsible: Dr Jacco Bomhoff NAB 6.09

Availability: This course is available on the LLM (extended part-

LL4Z1 Half Unit Business Taxation

This information is for the 2020/21 session.

Teacher responsible: Eduardo Baistrocchi NAB.7.33 and Ian Roxan NAB 7.25

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: The course is suitable both for those who have not studied taxation before and for those who have. It is recommended for those studying LL4AY International Tax Systems, LL4CJ Comparative Corporate Taxation or LL4CK Taxation of Corporate Transactions who have not studied taxation previously.

Course content: This course looks at how businesses are taxed in the UK. The course focuses on the key elements of the taxation of the income of businesses, including:

- taxation of trading income
- corporation tax, the nature of taxes on companies and the taxation of dividends
- capital allowances - relief for depreciation
- capital gains taxation
- partnership taxation
- tax relief for losses

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Indicative reading: Loutzenhiser, Tiley's Revenue Law; Fairpo and Salter (formerly Lee), Revenue Law Principles and Practice; Salter, Lee and Snape, Revenue Law: Text and Materials. Legislation: Tolley's Yellow Tax Handbook, or CCH The Red Book. Current editions need to be used. Detailed reading lists will be provided during the course via Moodle.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Relevant legislation may be taken into the examination room (Tolley's Yellow Tax Handbook or CCH The Red Book) if unannotated.

LL4Z2 Half Unit Not available in 2020/21 Principles of Taxation and Tax Disputes

This information is for the 2020/21 session.

Teacher responsible: Eduardo Baistrocchi NAB 7.33

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: The course is suitable both for students who have not studied taxation before and for those who have. It is recommended for students who have not studied taxation previously, as well as for those who are studying any of the other tax courses offered at LLM/MSc level.

Course content: This course looks at how tax systems work and the principles that lie behind tax systems. Topics covered include the reasons for taxation and the main types of tax, how income is taxed, how the tax administration operates, and the impact

of tax competition among countries on international tax policy. The course uses tax disputes from G20 countries to illustrate the issues discussed. The course is suitable for those who have not studied taxation before, as well as for those with a background in tax who are interested in exploring the principles of taxation in greater depth.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: One 2,000 word essay.

Indicative reading: Appropriate readings from journal articles and from books including: Avi-Yonah, Sartori and Marian, Global Perspectives on Income Taxation Law; Messere et al., Tax Policy: Theory and Practice in OECD Countries; Baistrocchi, A Theory of International Taxation; Dagan, International Tax Policy: Between Competition and Cooperation; Murphy and Nagel, The Myth of Ownership, Taxes and Justice; Thuronyi, Comparative Tax Law; James and Nobes, The Economics of Taxation; Mirrlees et al., Tax By Design. Further materials include: Morse and Williams, Davies Principles of Tax Law; Kay and King, The British Tax System; Thuronyi, Tax Law Design and Drafting. Detailed reading lists will be provided during the course via Moodle.

Recommended preliminary reading: Avi-Yonah, Sartori and Marian, Global Perspectives on Income Taxation Law (Oxford University Press, 2011).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4Z5 Half Unit Not available in 2020/21 EU State Aid Law

This information is for the 2020/21 session.

Teacher responsible: Prof Pablo Ibanez Colomo NAB5.16

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Competition, Innovation and Trade; Corporate and/or Commercial Law; European Law; International Business Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: Member States of the EU are not free to award subsidies to companies or to support them in a comparable way (by, inter alia, granting them loans at favourable rates or by providing unlimited guarantees). In the wake of the recent financial crisis, for instance, bailout measures adopted across the EU had to be cleared by the European Commission in accordance with Articles 107 and 108 TFEU. The first part of the course explores the economic rationale underpinning the principle whereby State aid is incompatible with the EU internal market (the reasons why similar regimes are not implemented at the national level in federal countries facing similar issues, such as the United States, will also be explored). The second part is devoted to (i) the notion of State aid within the meaning of Article 107(1) TFEU (that is, the range of measures that are subject to ex ante control by the European Commission) and to (ii) the conditions under which such measures may be declared to be in the interest of the EU as a whole. The third part provides an overview of the application of the law in some sectors (including the energy or the communications sectors) or for some purposes (e.g. research and development, regional aid). The fourth part is devoted to the procedural aspects of the discipline and to the application of similar rules beyond the EU (in particular in the context of the WTO, the EEA and other trade agreements concluded by the EU).

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in

the ST.

There will be a reading week in week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Quigley, *European State Aid Law and Policy* (3rd Edition, 2015); Jones and Sufrin, *EU Competition Law* (online Chapter, 6th Edition, 2017); Bacon (ed), *European Community Law of State Aid* (3rd Edition, 2017).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4Z6 Half Unit

Comparative Constitutional Law

This information is for the 2020/21 session.

Teacher responsible: Dr Jo Murkens NAB7.31

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: Comparative Constitutional Law is a rejuvenated discipline that attracts a broad range of interdisciplinary interest in the formation, design, and operation of constitutions. This course examines the central issues across a range of jurisdictions and from a variety of perspectives. Part I discusses various approaches to the study of CCL as well as the migration of constitutional ideas and related notions of constitutional borrowing and legal transplants. Part II deals with key constitutional concepts, such as fundamental law, constitutional change, the rule of law, as well as an introduction to the constitution of the United Kingdom, which are discussed from a historical and comparative perspective. Part III deals with constitutional design, a classic as well as topical area of comparative law. As well as offering a critique of mainstream liberal thought that idealises constitutions as normative constraints on politics, these sessions examine whether formal constitutions in divided and authoritarian societies facilitate democratisation and political change or whether they undermine democracy and entrench the rulers. The study of law, like the study of all social phenomena, is always comparative - and inevitably fragmented. This objective of the course is to study comparative constitutional law comprehensively, critically, and contextually (historical, conceptual, regional). This approach enables the student to branch out independently into related areas and topics.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: One 2,000-word essay.

Indicative reading: There is not a set book for this course. All materials will be made available in advance on Moodle.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4Z7 Half Unit Not available in 2020/21

Comparative Constitutional Rights

This information is for the 2020/21 session.

Teacher responsible: Dr Kai Möller NAB 7.01

Availability: This course is available on the LLM (extended part-

time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course examines a range of controversial issues in human and constitutional rights law from a comparative perspective. These issues include: abortion; euthanasia and physician-assisted suicide; same sex marriage; religion in the public sphere; hate speech and denial of the holocaust; obscenity. We will approach them by comparing and contrasting judgments from courts all over the world, with a certain emphasis on cases from the U.S. Supreme Court, the Canadian Supreme Court, the South African Constitutional Court, the European Court of Human Rights, the U.K. Supreme Court, and the German Federal Constitutional Court. The goals of the course are, first, to introduce the students to the jurisprudence of those powerful and influential courts, and, second, to invite them to think about and critically analyse some of the most controversial, difficult, and important rights issues of our time.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: The course is mainly case-based; however, interested students may find the following book helpful: V Jackson and M Tushnet, *Comparative Constitutional Law*, 3rd edition, 2014.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4Z9 Half Unit

Banking Law

This information is for the 2020/21 session.

Teacher responsible: Dr Joanne Braithwaite NAB.7.28

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 60 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course focuses on the private law of banking as it relates to the core banking activities not covered elsewhere on the LLM (ie, on courses about the financing activities of banks; the debt markets and the regulation of banking activities). In particular, we look at the deposit-taking relationship, the legal issues surrounding bank payment services, and the interdisciplinary debates about the nature of money and payments. The course aims to be both domestic and international in perspective, though the emphasis will be on English law. Topics include: 1. The deposit-taking relationship; 2. Money, transfers of money and payment including the development of new digital currencies and decentralised payment systems; 3. Bank payment methods: funds transfers and unauthorised payments; and 4. Bank payment services in an international context.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be asked to submit one essay, which may be written in exam conditions. Students will also be expected to take part in group presentations during the course.

Indicative reading: For introductory purposes, students are referred to Cranston et al, *Principles of Banking Law* (OUP, 3rd ed,

2017). Full reading lists will be distributed during the course.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

MA400

September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management)

This information is for the 2020/21 session.

Teacher responsible: Dr Christoph Czichowsky

Availability: This course is compulsory on the MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students who wish to select this course as an outside option must have a quantitative background.

Course content: The purpose of this course is to review some key concepts of probability used in finance. The course develops the common mathematical background that is assumed by the MSc Financial Mathematics and addresses some aspects of the mathematical theory that is central to the foundations of the programme: probability spaces, random variables, distributions, expectations and moment generating functions are reviewed; the concepts of conditional probability and conditional expectation as random variables are introduced using intuitive arguments and simple examples; stochastic processes, martingales, the standard Brownian motion are introduced; Itô integrals, Itô's formula and Girsanov's theorem are discussed on a formal basis.

Teaching: This course is delivered through a combination of classes and lectures over two weeks in September, prior to the start of the academic year. This year, all of the teaching will be delivered through a combination of virtual classes and lectures delivered as online videos. The material covered in the lectures will be totalling to an amount of roughly 30 hours of lecturing. There will be 8 hours via video link. There will be an informal examination at the end of the course. Its purpose is to provide student feedback and it does not count towards the degree.

Formative coursework: Exercises are assigned and form the basis of class discussion.

Indicative reading: Lecture notes will be provided.

S. Shreve, Stochastic Calculus for Finance II Continuous-Time Models, Springer. D. Williams, Probability with Martingales, Cambridge University Press.

Assessment: This course does not form part of the degree award.

MA402 Half Unit

Game Theory I

This information is for the 2020/21 session.

Teacher responsible: Prof Bernhard Von Stengel

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Applicable Mathematics, MSc in Financial Mathematics and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

It is not available to students who have taken Game Theory (MA300) or Game Theory I (MA301).

Pre-requisites: The course emphasises a formal treatment of mathematical Game Theory through definitions, theorems and proofs. Familiarity with a rigorous treatment of mathematics is expected. Students must know basics of linear algebra (matrix multiplication, geometric interpretation of vectors) and probability theory (expected value, conditional probability, independence of random events).

Course content: Concepts and methods of mathematical game theory with some applications to economics. Nim and combinatorial games. Congestion games. Game trees with perfect information. Backward induction. Extensive and strategic (normal) form of a game. Expected utility. Nash equilibrium. Commitment. Zero sum games, mixed strategies, maxmin strategies. Nash equilibria in mixed strategies. Finding mixed-strategy equilibria for two-person games. Extensive games with information sets, behaviour strategies, perfect recall. If time permits: The Nash bargaining solution, multistage bargaining, private-value auctions.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Weekly exercises are set and marked.

Indicative reading: Lecture notes will be provided. Supplementary reading: K Binmore, Playing for Real: Game Theory CUP, 2007; E Mendelson, Introducing Game Theory and Its Applications, CRC 2004

Assessment: Exam (90%, duration: 2 hours) in the summer exam period.

Coursework (10%).

Weekly exercises will be set and marked, and count as coursework.

MA407 Half Unit

Algorithms and Computation

This information is for the 2020/21 session.

Teacher responsible: Prof Konrad Swanepoel and Prof Julia Boettcher

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Data Science, MSc in Operations Research & Analytics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. The course is compulsory for students on the MSc Applicable Mathematics who are not taking MA421 Advanced Algorithms; it is optional for students on the MSc Applicable Mathematics who take MA421 Advanced Algorithms.

Pre-requisites: Good general knowledge of mathematics, including familiarity with abstract concepts. A willingness to cope with technical details of computer usage, and with a rapid introduction to programming.

Course content: Introduction to programming in Java. Introduction to the theory of algorithms: running time and correctness of an algorithm. Recursion. Data structures: arrays, linked lists, stacks, queues, binary search trees. Sorting algorithms. Greedy algorithms. Dynamic programming. Inheritance and Generics in Java.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Michaelmas Term. There are also optional computer help sessions for this course. Before the start of Michaelmas Term there will be 6 hours of pre-session programming tutorials. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Weekly exercises are set and marked.

Many of these will require implementation of programming exercises in Java.

Indicative reading: R Sedgewick, K Wayne, Introduction to programming in Java. T H Cormen, C E Leiserson, R L Rivest and C Stein, Introduction to Algorithms.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Coursework (25%) in the LT.

Coursework (15%) in the MT.

Continuous assessment (10%).

MA408 Half Unit Not available in 2020/21 Discrete Mathematics and Graph Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Jozef Skokan

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should be taking the course MA407 Algorithms and Computation or have taken an equivalent course to provide a basic knowledge of algorithms, and should have experience with proofs and proof techniques used in pure mathematics.

Course content: This course provides an introduction to discrete mathematics, particularly graph theory. Emphasis will be placed on the algorithmic aspects of the area.

Topics to be covered include: Brief Introduction to discrete mathematics and graph theoretic terminology; Ramsey's Theorem; matchings and Hall's Theorem; graph search algorithms; stable marriages and the Gale-Shapley Theorem; network flows and the Ford-Fulkerson Theorem; connectivity and Menger's Theorems; graph colouring and Brooks' Theorem; and other topics that may vary from year to year.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 2 exercises in the MT.

Weekly exercises are set and solved in the seminar.

Indicative reading: Norman L. Biggs, Discrete Mathematics, Oxford University Press; T H Cormen, C E Leiserson & R Rivest and C Stein, Introduction to Algorithms, Cambridge University Press; R Diestel, Graph Theory, Springer; H S Wilf, Algorithms and Complexity, Prentice Hall.

Several of these texts are available online. More information, plus additional notes, will be provided during the course.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Coursework (25%) in the MT.

MA409 Half Unit Continuous Time Optimisation

This information is for the 2020/21 session.

Teacher responsible: Prof Adam Ostoja-Ostaszewski

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Operations Research & Analytics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students will need adequate background in linear algebra (facility with diagonalization of matrices for the purposes of solving simultaneous first-order differential equations is key here; knowledge of the relation between the range of a matrix transformation and the kernel of its transpose would be helpful), and in advanced calculus (manipulation of Riemann integrals such as 'differentiation under the integral' and the associated Leibniz Rule). Students unsure whether their background is appropriate should seek advice from the lecturer before starting the course.

Course content: This is a course in optimisation theory using the methods of the Calculus of Variations. No specific knowledge of functional analysis will be assumed and the emphasis will be on examples. It introduces key methods of continuous time optimisation in a deterministic context, and later under

uncertainty. Calculus of variations and the Euler-Lagrange Equations. Sufficiency conditions. Pontryagin Maximum Principle. Extremal controls. Transversality conditions. Linear time-invariant state equations. Bang-bang control and switching functions. Dynamical programming. Control under uncertainty. Itô's Lemma. Hamilton-Jacobi-Bellman equation. If time allows: Applications to Economics and Finance: Economic Growth models, Consumption and investment, Optimal Abandonment, Black-Scholes model, Singular control, Verification lemma.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 34 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Background review of (i) elementary methods for solving differential equations, and (ii) pertinent linear algebra (diagonalization) will be included in the virtual classes of Weeks 1 and 2.

Four of the 34 hours are dedicated to Exam Revision which will also be delivered through a combination of virtual classes and lectures delivered as online videos.

Indicative reading: A full set of lecture notes will be provided.

Reference will be made to the following essential books: D Burghes & A Graham, Control and Optimal Control Theories with Applications, Horwood; E R Pinch, Optimal Control and the Calculus of Variations, Oxford Science Publications; A. Sasane, Optimization in Function Spaces, Dover; J L Troutman, Variational Calculus and Optimal Control, Springer; and occasionally to: D G Luenberger, Optimization by Vector Space Methods, Wiley. Further Reading and Advanced Literature: G Leitmann, Calculus of Variations and Optimal Control, Plenum; A K Dixit & R S Pindyck, Investment under Uncertainty, Princeton University Press; D Duffie, Security Markets, Academic Press; D J Bell & D H Jacobsen, Singular Optimal Control, Academic Press; W H Fleming & R W Rishel, Deterministic and Stochastic Optimal Control, Springer; W H Fleming; H M Soner Controlled Markov Processes & Viscosity Solutions, Springer; G Hadley; M C Kemp, Variational Methods in Economics, North Holland;

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA410 Half Unit Information, Communication and Cryptography

This information is for the 2020/21 session.

Teacher responsible: Prof Jozef Skokan and Dr Robert Simon

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should be taking the course MA407 Algorithms and Computation or have taken an equivalent course to provide a basic knowledge of algorithms, and should have experience with proofs and proof techniques used in pure mathematics.

Course content: This course provides an introduction, for students with a mathematical background, to the applications of mathematics in information theory, coding theory, cryptography, and related areas. The course will cover mathematical aspects of the following topics: Noiseless coding, the Kraft-McMillan criterion, optimal coding, entropy, Shannon's first theorem; Noisy channels, capacity, system entropy; Error-correcting codes, decoding rules, bounds, construction and properties of linear and cyclic codes; Structure of natural languages, redundancy, the frequency table, making and breaking cryptosystems, historic examples; Public-key cryptography, complexity issues, the RSA system, authentication schemes, the ElGamal system. Subject to available time we may also cover elliptic curve cryptography and/or cryptocurrencies.

Teaching: This course is delivered through a combination of

classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Weekly exercises are set and discussed in seminars.

Students will be expected to produce 5 exercises in the MT which will be marked.

Indicative reading: N L Biggs, Codes, An Introduction to Information, Communication and Cryptography; G A Jones & J M Jones, Information and Coding Theory; C M Goldie & R G E Pinch, Communication Theory; D J A Welsh, Codes and Cryptography; D T Stinson, Cryptography Theory and Practice.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Coursework (25%) in the MT.

MA411 Half Unit Probability and Measure

This information is for the 2020/21 session.

Teacher responsible: Dr Pavel Gapeev

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some background in real analysis is essential.

Course content: The purposes of this course are (a) to explain the formal basis of abstract probability theory, and the justification for basic results in the theory, and (b) to explore those aspects of the theory most used in advanced analytical models in economics and finance. The approach taken will be formal. Probability spaces and probability measures. Random variables. Expectation and integration. Convergence of random variables. Conditional expectation. The Radon-Nikodym Theorem. Martingales. Stochastic processes. Brownian motion. The Itô integral.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Indicative reading: Full lecture notes will be provided. The following may prove useful: J S Rosenthal, A First Look at Rigorous Probability Theory; G R Grimmett & D R Stirzaker, Probability and Random Processes; D Williams, Probability with Martingales; M Caplinski & E Kopp, Measure, Integral and Probability; J Jacod & P Protter, Probability Essentials.

Assessment: Online assessment (100%) in the ST.

The course will be assessed online this academic year.

MA412 Half Unit Not available in 2020/21 Functional Analysis and its Applications

This information is for the 2020/21 session.

Teacher responsible: Dr Robert Simon

Availability: This course is available on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should have taken a course in finite dimensional linear algebra which includes diagonalisation and inner products. General knowledge of real analysis and calculus would be helpful.

Course content: This course aims at familiarizing the student with the basic concepts, principles and methods of functional

analysis and its applications. The topics covered are: normed and Banach spaces, continuous linear transformations, inner product and Hilbert spaces, compact operators, Hahn-Banach and Baire Category Theorems, applications to differential equations, numerical analysis, and approximation theory with illustrative examples.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 2 hours of lectures in the ST.

Indicative reading: Jean-Pierre Aubin, Applied Functional Analysis, Wiley, 2000; A.V. Balakrishnan, Applied Functional Analysis, Springer, 1981; Erwin Kreyszig, Introductory Functional Analysis with Applications, John Wiley, 1989; David Luenberger, Optimization by Vector Space Methods, Wiley-Interscience, 1997; Walter Rudin, Functional Analysis, McGraw-Hill 1991; Nicholas Young, An Introduction to Hilbert Space, Cambridge University Press, 1988.

Assessment: Exam (90%, duration: 2 hours) in the summer exam period.

Coursework (10%) in the LT.

MA413 Half Unit Not available in 2020/21 Games of Incomplete Information

This information is for the 2020/21 session.

Teacher responsible: Dr Robert Simon COL 4.07

Availability: This course is available on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should be familiar with the related mathematics of topology and functional analysis. Some degree of mathematical maturity is expected.

Course content: The techniques and results of game theory are increasingly important to economic analysis. This course focuses on the problems of information incompleteness and information asymmetry. This is a relatively new but rapidly expanding area of game theory with connections to several areas of economic theory, for example conflict resolution, auctions, principal-agent problems, and the logic of knowledge. The course is divided into three parts, I Basic Results, II Repeated Games, III Bayesian Games. For the first part we cover the Min-max Theorem and Nash's Theorem of Equilibrium Existence, Extensive Form and Discounted Games. For the second part we cover Zero-sum Games with Vector Payoffs, Repeated Game of Incomplete Information on One Side, and myopic equilibria. For the third part we cover Common Knowledge, Zero-Sum Bayesian Games, Locally Finite Games, and Non-Zero-Sum Bayesian Games in the theoretical context of ergodic theory.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Weekly exercises are set and marked.

Indicative reading: A full set of lecture notes will be provided. Useful accompanying texts are Robert J. Aumann and Michael B. Maschler, Repeated Games with Incomplete Information, MIT Press, 1995; L. Breiman, Probability; K. Border, Fixed Point Theorems with Applications to Economics and Game Theory; R. Myerson, Game Theory, Analysis of Conflict, Harvard University Press; D. Fudenberg & J. Tirole, Game Theory, MIT Press.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA414 Half Unit Not available in 2020/21 Stochastic Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Arne Lokka

Availability: This course is available on the MSc in Applicable

Mathematics and MSc in Financial Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: ST409 or MA411.

Course content: This course is concerned with a rigorous introduction to the area of stochastic analysis with emphasis on Itô calculus. The course begins necessary preliminaries, followed by a construction of the standard Brownian motion and a study of its properties. Subsequently, Lévy's characterisation of Brownian motion, martingale representation theorems and Girsanov's theorem are established. The course then expands on a study of stochastic differential equations.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Indicative reading: Full lecture notes will be provided. The following may prove useful: I Karatzas and S E Shreve, Brownian Motion and Stochastic Calculus, Springer; B Øksendal, Stochastic Differential Equations: An Introduction with Applications, Springer; D Revuz and M Yor, Continuous Martingales and Brownian Motion, Springer; L C G Rogers and D Williams, Diffusions, Markov Processes, and Martingales, Cambridge.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA415 Half Unit

The Mathematics of the Black and Scholes Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Mihail Zervos

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (MA400).

Course content: This course is concerned with a mathematical development of the risk-neutral valuation theory. In the context of the binomial tree model for a risky asset, the course introduces the concepts of replication and martingale probability measures. The mathematics of the Black & Scholes methodology follow; in particular, the expression of European contingent claims as expectations with respect to the risk-neutral probability measure of the corresponding discounted payoffs, pricing formulae for European put and call options, and the Black & Scholes PDE are derived. A class of exotic options is then considered. In particular, pricing formulas for lookback and barrier options are derived using PDE techniques as well as the reflection property of the standard Brownian motion. The course also introduces a model for foreign exchange markets and various foreign exchange options.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Indicative reading: N H Bingham and R Kiesel, Risk-Neutral Valuation, Springer; T Björk, Arbitrage Theory in Continuous Time, Oxford; P J Hunt and J Kennedy, Financial Derivatives in Theory and Practice, Wiley; D Lamberton and J Kennedy, Introduction to Stochastic Calculus Applied to Finance, Chapman & Hall; D. Lamberton and B. Lapeyre, Introduction to Stochastic Calculus Applied to Finance, Chapman & Hall/Crc Financial Mathematics Series, 2nd edition, 2007; S E Shreve, Stochastic Calculus for Finance: Continuous-time Models: vol. 2, Springer

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA416 Half Unit

The Foundations of Interest Rate and Credit Risk Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Mihail Zervos

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Course content: This course studies the mathematical foundations of interest rate and credit risk theory. The course starts with a development of the multi-dimensional Black & Scholes theory with stochastic market data. This is then used to show how discount bond dynamics modelling can be approached by (a) the modelling of the short-rate process and the market price of risk, which underlies the family of short-rate models, or (b) the modelling of the market price of risk and the discount bond volatility structure, which gives rise to the Heath-Jarrow-Morton (HJM) framework. The course then expands on the theory of interest rate market models and credit risk.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Two sets of written homework will be marked with feedback provided.

Indicative reading: T R Bielecki and M Rutkowski, Credit Risk Modeling, Valuation and Hedging, Springer; M Musiela and M Rutkowski, Martingale Methods in Financial Engineering, Springer; R Rebonato, Modern Pricing of Interest-rate Derivatives: The LIBOR Market Model and Beyond, Princeton.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA417 Half Unit

Computational Methods in Finance

This information is for the 2020/21 session.

Teacher responsible: Dr Luitgard Veraart

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (MA400).

Course content: The purpose of this course is to (a) develop the students' computational skills, and (b) introduce a range of numerical techniques of importance to financial engineering. The course starts with random number generation, the fundamentals of Monte Carlo simulation and a number of related issues. Numerical solutions to stochastic differential equations and their implementation are considered. The course then addresses finite-difference schemes for the solution of partial differential equations arising in finance.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Weekly exercises and practicals are set and form the basis of the seminars.

Indicative reading: P.Glasserman, Monte Carlo Methods in Financial Engineering, Springer; R.U. Seydel, Tools for Computational Finance, Springer; P.E.Kloeden and E.Platten, Numerical Solution of Stochastic Differential Equations, Springer;

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%) in the ST.

MA418 Half Unit Not available in 2020/21

Preferences, Optimal Portfolio Choice, and Equilibrium

This information is for the 2020/21 session.

Teacher responsible: Dr Albina Danilova

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Financial Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed either Stochastic Processes (ST409) or Probability and Measure (MA411) or The Mathematics of the Black and Scholes Theory (MA415).

Course content: This course is concerned with the theory of optimal investment and consumption. The course starts with the derivation of utility functions from the axioms of an agent's preferences. Utility functions are then used as a measure of portfolio performance in a financial market. Optimal investment and consumption strategies are obtained for various utility functions in both complete and some types of incomplete markets. Equilibrium and asset price formation are considered in the context of complete and informationally incomplete markets

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Indicative reading: R.A.Dana and M.Jeanblanc, Financial Markets in Continuous Time; Springer; I.D.Duffie, Dynamic Asset Pricing, Princeton University Press; I.Karatzas and S.E.Shreve, Methods of Mathematical Finance, Springer.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MA420 Half Unit

Quantifying Risk and Modelling Alternative Markets

This information is for the 2020/21 session.

Teacher responsible: Dr Christoph Czichowsky and Dr Pavel Gapeev

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Pre-requisite: Students must have completed Stochastic Processes (ST409).

Course content: This course studies various issues arising in the context of investment risk specification as well as with the mathematical theory of so-called alternative markets, such as commodity and energy markets. In particular, the course considers the structural credit risk models and the quantification of risk by means of copulas and risk measures. Also, the course expands on the modeling of alternative markets and addresses the problem of valuation of investments in real assets.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across

Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Two sets of written homework will be marked with feedback provided.

Indicative reading: F.Benth, J.Benth, S.Koekebakker, Stochastic Modelling of Energy and Related Markets, World Scientific 2008. H.Föllmer and A.Schied, Stochastic Finance, 3rd edition, De Gruyter, 2011. A.McNeil, R.Frey and P.Embrechts, Quantitative Risk Management, Princeton University Press, 2005. A.K.Dixit and R.S.Pindyck, Investment under Uncertainty, Princeton University Press, 1994.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA421 Half Unit

Advanced Algorithms

This information is for the 2020/21 session.

Teacher responsible: Dr Tugkan Batu and Prof Gregory Sorkin

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Algorithms and Computation (MA407) or have taken an equivalent course to provide a basic knowledge in analysis of algorithms: running time and correctness of an algorithm, and basic knowledge of computer programming (preferably in Java). Students should be comfortable with proofs and proof techniques used in pure mathematics.

Course content: Introduction to NP-Completeness, followed by Approximation Algorithms, Randomised Algorithms, and other topics such as some of Average-Case Analysis, Streaming Algorithms, Exponential-Time Algorithms, and Numerical Algorithms.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Weekly exercises are set and marked.

Some of these will include programming exercises in Java.

Indicative reading: Cormen, Leiserson, Rivest and Stein, Introduction to Algorithms; Williamson, Shmoys, The Design of Approximation Algorithms; Motwani and Raghavan, Randomized Algorithms.

Assessment: Exam (65%, duration: 2 hours and 30 minutes) in the summer exam period.

Coursework (35%) in the LT.

MA422 Not available in 2020/21

Research Topics in Financial Mathematics

This information is for the 2020/21 session.

Teacher responsible: Ms Chhaya Trehan

Availability: This course is available on the MPhil/PhD in Mathematics, MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes where regulations permit.

PhD students in the departments of Mathematics and Statistics along with other members of the research community are welcome to attend.

Course content: The seminar ranges over many areas of financial mathematics, stochastic analysis and stochastic control theory.

Teaching: 6 hours of seminars in the MT. 6 hours of seminars in the LT.

6 x 1 hour talks by researchers in the MT and LT. Additional seminars will be scheduled throughout the year. Please see the Timetables website for further information.

Formative coursework: This course is not assessed.

Assessment:

This is a non-assessed course.

MA423 Half Unit Fundamentals of Operations Research

This information is for the 2020/21 session.

Teacher responsible: Dr Ahmad Abdi

Availability: This course is compulsory on the MSc in Operations Research & Analytics. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must know basics of Linear Algebra (matrix multiplication, geometric interpretation of vectors), Probability Theory (expected value, conditional probability, independence of random events) and Calculus (derivatives, limits).

Course content: An introduction to a range of Operations Research techniques, covering: foundations of linear programming, including the simplex method and duality; integer programming; markov chains; queueing theory; dynamic programming; inventory models; game theory.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year all of the teaching will be delivered through a combination of virtual seminars and lectures delivered as online videos.

Formative coursework: Students will be expected to produce 3 problem sets in the MT.

Indicative reading: The course will be taught from lecture notes and slides.

Students may also wish to consult:

- F S Hillier & G J Lieberman, Introduction to Operations Research, 9th edition (2009) (7th edition of Hillier & Lieberman (2000) is also acceptable).
- Wayne Winston, Operational Research; Applications and Algorithms, Fourth/International Student Edition.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MA424 Half Unit Modelling in Operations Research

This information is for the 2020/21 session.

Teacher responsible: Dr Katerina Papadaki

Dr Grammateia Kotsialou

Availability: This course is compulsory on the MSc in Operations Research & Analytics. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange) and MSc in Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must know basics of linear algebra (matrix multiplication, geometric interpretation of vectors), linear programming, and probability theory (expected value, conditional probability, independence of random events). For students in the MSc in Operations Research & Analytics, MA423 and ST447 more than cover the prerequisites.

Course content: The course will be in 2 parts, covering the two most prominent tools in operational research: mathematical

optimisation, the application of sophisticated mathematical methods to make optimal decisions, and simulation, the playing-out of real-life scenarios in a (computer-based) modelling environment.

Optimisation (12 lecture hours): This part enables students to formulate, model and solve real-life management problems as Mathematical Optimisation problems. In providing an overview of the most relevant techniques of the field, it teaches a range of approaches to building Mathematical Optimisation models and shows how to solve them and analyse their solutions. Topics include: formulation of management problems using linear and network models; solution of such problems with a special-purpose programming language; interpretation of the solutions; and formulation and solution of nonlinear models including some or all of binary, integer, convex and stochastic programming models.

Simulation (8 lecture hours): This part develops simulation modelling skills, understanding of the theoretical basis which underpins the simulation methodology, and an appreciation of practical issues in managing a simulation modelling project. Topics include: generating discrete and continuous random variables; Monte Carlo simulation; variance reduction techniques; and other topics such as, for example discrete event simulation, Markov Chain Monte Carlo methods. The course will teach students how to use a simulation modelling software package.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term and a minimum of 18 hours of computer workshop sessions delivered in Michaelmas Term and Lent Term. Lectures and solutions to exercises will be delivered as online videos; classes will be delivered as a combination of virtual and on campus question and answer sessions. Computer workshops are help sessions, where an instructor is available to students virtually to answer questions while they work on their computer assignment (computer workshops are not mandatory).

Formative coursework: Students will be expected to produce 1 project in the MT.

Feedback will be provided in the virtual/on campus weekly classes (question and answer sessions), where the weekly homework will be discussed. Additional feedback on programming assignments will be provided to students attending the virtual optional computer workshops.

Indicative reading: The reading will be a combination of lecture notes and chapters from the following list of books.

Optimisation

- W L Winston, Operations Research: Applications and Algorithms, Brooks/Cole (4th ed., 1998)
- D Bertsimas and J N Tsitsiklis, Introduction to Linear Optimization, Athena Scientific (3rd ed., 1997)
- George B. Dantzig and Mukund N. Thapa, Linear Programming 2: Theory and extensions, Springer (2003)

Simulation

- S Ross, Simulation, Academic Press (5th ed., 2012)
- A M Law and W D Kelton, Simulation Modelling and Analysis, McGraw Hill (3rd ed., 2000)
- M Pidd, Computer Simulation in Management Science, Wiley (5th ed., 2006)

Assessment: Project (100%) in the LT.

The project will be on Mathematical Optimisation, Simulation, or a combination of the two. The deliverable is a report of at most 12 pages (main report, excluding executive summary and technical appendices), along with a soft copy of any computer code and solver output.

MA425 Project in Operations Research & Analytics

This information is for the 2020/21 session.

Teacher responsible: Mr David Collier

Availability: This course is available on the MSc in Operations

Research & Analytics. This course is not available as an outside option.

Cannot be taken with MA426 Dissertation in Operations Research & Analytics.

Course content: The student will carry out and report upon a substantial practical piece of Operational Research or Data Analytics. The project will either be found by the course leader or may be suggested by the student, with the approval of his/her teachers.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 16.5 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Each student will be assigned an internal project supervisor who will monitor his/her progress on a continuing basis and give tutorial advice as required.

Indicative reading: Detailed suggestions for reading will be provided in the course of supervision.

Assessment: Project (100%).

Assessment is based entirely on the project report.

The student is expected to work on this full-time from early June to end of August. The project report must be submitted on a specified date in late August/early September. The page limit for the report is 40 pages, excluding appendices.

MA426

Dissertation in Operations Research & Analytics

This information is for the 2020/21 session.

Teacher responsible: Prof Laszlo Vegh

Availability: This course is available on the MSc in Operations Research & Analytics. This course is not available as an outside option. Cannot be taken with MA425 Project in Operations Research & Analytics.

Course content: The aim of the dissertation is for students to pursue an independent piece of research within the field of management science. The dissertation is a quantitative or qualitative investigation in the field. It may be either a theoretical or empirical piece of research. Students must obtain the approval of their advisor before embarking on any research.

Teaching: There will be a minimum of 12 hours of lectures and seminars delivered across Michaelmas and Lent terms. Most of the teaching will be shared with MA498. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos. The ratio of lecture time and seminar time varies each week. Seminars do not include personal supervision time, which is scheduled independently with the supervisors.

An initial seminar will include presentations by members of the Operations Research Group in the Department of Mathematics on proposed topics for dissertations that they would be interested in supervising. Additional seminars will cover important aspects of writing a dissertation in mathematics, including: what plagiarism is and how to avoid it, the use of libraries for research, electronic research, general aspects of writing mathematics, and preparing a manuscript using mathematical text processing software (in particular, LaTeX). Each student will be assigned a supervisor who will monitor their progress and provide appropriate guidance throughout the LT, ST, and over the summer.

Formative coursework: Students are required to submit Dissertation Plans to their supervisor in LT and ST.

Assessment: Dissertation (100%, 10000 words) post-summer term. Two paper copies of the dissertation must be submitted on a specified date in late August/early September. An electronic version of the dissertation must also be submitted.

MA427 Half Unit

Mathematical Optimisation

This information is for the 2020/21 session.

Teacher responsible: Dr Giacomo Zambelli

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in Applicable Mathematics, MSc in Operations Research & Analytics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have sufficient knowledge of linear algebra (linear independence, determinants, matrix inversion and manipulation) and of basic multivariate calculus (derivatives and gradients).

Course content: Introduction to the theory and solution methods of linear and nonlinear programming problems, including: linear programming duality, Lagrangian duality, convex programming and Karush-Kuhn-Tucker conditions, algorithms for linear and convex optimisation problems, theory of good formulations for integer linear programming models, integer linear programming methods (branch and bound and cutting planes).

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Weekly exercises will be given that will be solved and discussed during the seminars. Three of those exercises will be handed in as formative coursework and the students will be given feedback on their submissions.

Indicative reading: Extensive lecture notes covering all parts of the course will be provided. Students interested in further readings can look at the books below.

- D Bertsimas and J N Tsitsiklis, Introduction to Linear Optimization (1997)
- S Boyd and L Vandenberghe, Convex Optimization (2004)
- M Conforti, G Cornuejols, G Zambelli, Integer Programming (2014)

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

The exam will take place online.

MA428 Half Unit

Combinatorial Optimisation

This information is for the 2020/21 session.

Teacher responsible: Katerina Papadaki

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some familiarity with graph theory and some knowledge of linear programming is desirable. For students that have no linear programming background, it is recommended that they read the material of the first four lectures of course MA423, which can be found on the Moodle page of MA423.

Course content: The course is intended as an introduction to discrete and combinatorial techniques for solving optimisation problems, mainly involving graphs and networks. Topics covered include: minimum spanning trees, with a brief introduction to matroids; shortest path algorithms; maximum flow algorithms; minimum cost flow problems; matching and assignment problems; and other topics that may vary from year to year.

Teaching: This course is delivered through a combination of

classes and lectures totalling a minimum of 30 hours across Lent Term. Lectures and solutions to exercises will be delivered as online videos; classes will be delivered as a combination of virtual and on campus question and answer sessions.

Formative coursework: Students will be given weekly exercises. Oral feedback will be provided in the virtual/on campus weekly classes (question and answer sessions), where the weekly homework will be discussed. Two of those exercises will be handed in as summative coursework and the students will be given written feedback on their submissions.

Indicative reading: Lecture notes will be supplied for most topics; otherwise reading from books will be indicated.

Most of the lectures will be based on topics from: R K Ahuja, T L Maganti and J B Orlin, *Network Flows* (2013).

Some topics might be from: David P. Williamson and David B. Shmoys, *The Design of Approximation Algorithms* (2011).

Assessment: Coursework (10%) in the LT.

Take-home assessment (90%) in the ST.

MA429 Half Unit

Algorithmic Techniques for Data Mining

This information is for the 2020/21 session.

Teacher responsible: Gregory Sorkin

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Marketing and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

The course will be capped to 45 students.

Pre-requisites: Students are not permitted to take this course alongside ST443, Machine Learning and Data Mining. Students must have knowledge of Statistics and the programming language R to the level of ST447, Data Analysis and Statistical Methods.

Course content: Data Mining is an interdisciplinary field developed over the last three decades. Vast quantities of data are available today in all areas of business, science, and technology as well as social networks. The goal of data mining is to extract useful information from massive-scale data. The aim of the course is to equip students with a theoretically founded and practically applicable knowledge of data mining. The theoretical foundations of the field come from mathematics, statistics, computer science and artificial intelligence.

The course introduces fundamental machine learning methods for basic data analytics problems. For classification and regression problems, these methods include naive Bayes, K-nearest neighbours, tree and forest construction, support vector machines, and neural networks. The course will also cover unsupervised learning methods such as clustering. The ethics of data mining is also discussed, from data collection through applications. The methods are illustrated on practical problems arising from various fields. The course uses data mining packages in R.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: There will be weekly homework assignments, some of which will be submitted for formative feedback. A mock project will be given, as preparation for the summative group project.

Indicative reading:

- James, Witten, Hastie, Tibshirani, *An Introduction to Statistical Learning: with Applications in R* (2016)
- Hastie, Tibshirani, Friedman, *The Elements of Statistical Learning: Data Mining, Inference and Prediction*, 2nd ed. (2009)
- Witten, Frank, Hall, *Data Mining: Practical Machine Learning Tools and Techniques*, 3rd or 4th ed. (2016)
- Torgo, *Data Mining with R: Learning with Case Studies* (2010)

Assessment: Exam (50%, duration: 2 hours) in the summer exam

period.

Project (40%) in the ST.

Coursework (10%) in the LT.

The examination is critical to assessment. In order to pass this course, students need to achieve a mark of at least 50% in the examination. A fail mark in the exam will result in an overall fail mark for the course and cannot be compensated by the mark achieved in the coursework element.

MA431 Half Unit Not available in 2020/21

Advanced Topics in Operations Research and Applicable Mathematics

This information is for the 2020/21 session.

Teacher responsible: Dr Ahmad Abdi and Dr Neil Olver

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic knowledge of graph theory and optimisation. Fundamentals of Operations Research (MA423) or an equivalent background knowledge of linear programming.

Course content: An examination of advanced topics in Operations Research. The topics selected differ year to year; the topic for 2020/21 will be "Optimisation on Graphs". Topics covered in the course, such as the theory of perfect graphs, multicommodity flows, and the use of semidefinite programming. These topics are fundamental, but have important applications to (for example) communication over noisy channels, the design of communication and transportation networks, and network routing.

More detailed information is available on Moodle or from the Department of Mathematics administrative office.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Formative coursework: Details will be provided at the start of the course.

Indicative reading: Detailed suggestions for reading will be given before the start of the course.

Assessment: Assessment path 1

Exam (50%, duration: 2 hours) in the summer exam period.

Coursework (50%) in the LT.

Assessment path 2

Coursework (50%) in the LT.

Project (50%) in the ST.

Exam (50%, duration 2 hours). Coursework (50%) in the LT.

PhD students are expected to complete a research-based project in the ST as a replacement for the final exam.

MA433 Half Unit

Mathematics of Networks

This information is for the 2020/21 session.

Teacher responsible: Prof Andrew Lewis-Pye

Availability: This course is available on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Mathematical maturity and an ability to write mathematical proofs. Linear algebra (diagonalisation, eigenvalues and eigenvectors), some graph theory and some basic game theory would be useful, but necessary knowledge from these areas will be revised during the course.

Course content: Globalisation and the growth of the internet have meant not only an increasing need to understand the way in which social and communication networks form and operate,

but also an unprecedented amount of data available to aid in this analysis. The last decade has seen a coming together of multiple scientific disciplines in an effort to understand how these highly connected systems function. The aim of this course will be to give an introduction to the study of networks, requiring as little background knowledge as possible. The course will begin with an analysis of some of the fundamental properties normally observed in real world networks, such as the small world property, high degrees of clustering and power law degree distributions. After reviewing required notions from game theory, we shall then apply these techniques to an analysis of the spread of behavioural change on networks, together with cascading effects and epidemic models. The final part of the course will be concerned with specific applications to the world wide web and page ranking.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading:

(1) D. Easley, J. Kleinberg. Networks, crowds and markets, Cambridge University Press, 2010.

(2) M. Newman. Networks: An Introduction, Oxford University Press, 2010.

(3) The Rise of the Network Society, The Information Age: Economy, Society and Culture, 2010 edition, Manuel Castells.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Presentation (20%).

20% of the final grade will be determined by groupwork, in which groups of around four or five students are each allocated a research paper by the lecturer. The students then have to meet (virtually or in person) in order to discuss and understand the paper, before giving a group presentation on the subject matter.

MA434 Half Unit Algorithmic Game Theory

This information is for the 2020/21 session.

Teacher responsible: Dr Paul Duetting Columbia House COL 3.08

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Algorithms and Computation (MA407) or have taken an equivalent course that provides basic knowledge in the analysis of algorithms. No prior knowledge about Game Theory is required.

Course content: The last 15-20 years have witnessed a lively interaction between computer science and economics. Many problems central to computer science – from resource allocation problems in large networks to online advertising – fundamentally involve the interaction of multiple self-interested parties. Game theory and mechanism design offer a host of models and definitions to reason about such problems. But the flow of ideas also travels in the opposite direction, as research in computer science has complemented the traditional economics literature in several ways. For example, computer science offers a focus on and a language to discuss computational complexity, has popularised the use of approximation guarantees in situations where exact solutions are unrealistic or unknowable, and proposes several alternatives to Bayesian- or average-case analysis that emphasise robust solutions to economic design problems. This course gives an overview over the key ideas and developments of this young research field. The focus is on the various new techniques and methods that have been developed, and the new insights that they yield.

Topics covered:

- Complexity of equilibria: hardness of computing pure Nash equilibria, poly-time algorithm for correlated equilibria
- Best response dynamics and no-regret learning: existence and speed of convergence
- Tools for bounding the inefficiency of equilibria: price of anarchy, price of stability, the smoothness framework
- Algorithmic mechanism design: the VCG mechanism and its computational complexity, characterization of truthful mechanisms and techniques for obtaining truthful poly-time approximation mechanisms
- Tools for the design and analysis of simple, robust, non-truthful mechanisms
- Posted price mechanisms and prophet inequalities

Teaching: This course is delivered through a combination of classes and lectures totaling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Written answers to set problems will be expected on a weekly basis.

Indicative reading:

1 Noam Nisan, Tim Roughgarden, Eva Tardos, Vijay V. Vazirani.

Algorithmic Game Theory. Cambridge University Press. September 2007.

2 Tim Roughgarden. Twenty Lectures on Algorithmic Game Theory. Cambridge University Press. August 2016.

3 David C. Parkes and Sven Seuken. Introduction to Economics and Computation: A Design Approach. Cambridge University Press. June 2019.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA498 Dissertation in Mathematics

This information is for the 2020/21 session.

Teacher responsible: Andrew Lewis-Pye

Availability: This course is compulsory on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The Dissertation in Mathematics is an individual, substantial project as an introduction to mathematical research methods. The student will investigate and study an area of mathematical research or application of advanced mathematical techniques, and to write a report on their findings. The project may include some programming. The dissertation topic will normally be proposed by the Department.

Teaching: A minimum of 15 hours of lectures/seminars across the Michaelmas and Lent terms. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos. The ratio of lecture time and seminar time varies each week. Seminars do not include personal supervision time, which is scheduled independently with student supervisors.

Several seminars will include presentations by members of the Department of Mathematics on proposed topics for dissertations that they would be interested in supervising. Additional seminars will cover important aspects of writing a dissertation in mathematics, including: what plagiarism is and how to avoid it, the use of libraries for research, electronic research, general aspects of writing mathematics, and preparing a manuscript using mathematical text processing software (in particular, LaTeX). Each student will be assigned a supervisor who will monitor their progress and provide appropriate guidance thorough the LT, ST, and over the summer.

Formative coursework: Students will be expected to produce an initial report (in LT) and an interim report (in ST) for which feedback will be provided.

Indicative reading: Detailed suggestions for reading will be provided by the supervisor.

Assessment: Dissertation (90%) in the LT and ST.
Oral examination (10%) in the ST.

Assessment is primarily based entirely on the Dissertation, three hard copies and one electronic copy of which must be submitted by early September (exact date to be specified later). The report may include some software relating to the project. Detailed information about the required format for this submission will be provided during the Seminars.

At the end of summer term, each student will give a presentation to an audience of two members of staff on the topic of their dissertations. If restrictions mean that presentations cannot be given in person this year, then they will be recorded and uploaded for assessment. The presentation will be graded and worth 10% of the course grade. Students will be given support in the seminars on how to prepare, how to present and what is expected.

MC401 Half Unit

Mediated Resistance and Activism

This information is for the 2020/21 session.

Teacher responsible: Professor Bart Cammaerts

Availability: This course is available on the MSc in Media and Communications and MSc in Politics and Communication.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on the various ways in which citizens, activists and social movements use, appropriate and shape media and communication technologies to resist, to mobilise for resistance, but also how resistance and movement discourses are represented and mediated, by activists themselves through movement and social media as well as by the mainstream media. The course will address several aspects of the intricate relationship between media and communication, resistance and activism. The course is organised around the core-concept of the 'mediation opportunity structure' referring to the opportunities for agency through media and communication, as well as the structural constraints preventing agency and stifling dissent. Both Information and Communication Technologies (ICT's) and more traditional media will be considered and a dialectical perspective on power and the relationship between agency and structure is adopted with a particular emphasis on strategies of resistance and circumvention.

At a theoretical level this course is situated at the intersection of social movement theory, political theory and media and communication theory. The different lectures will focus on various aspects of the mediation opportunity structure, including action repertoires, self-mediation practices, mainstream media representations, counter-hegemony, networked opportunities – using examples from various regions in the world. Some case-studies will be situated at a local level of analysis, others at a national, while again others might relate to regional contexts or even transnational levels of contestation.

Seminar discussion revolve around relevant readings as well as case study presentations. The seminars are student-led.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advanced reading, prepare seminar presentations and submit one essay of 1,500 words.

Indicative reading:

- Bailey, Olga, Cammaerts, Bart and Carpentier, Nico (2007) *Understanding Alternative Media*, Maidenhead: Open University Press.
 - Barassi, Veronica (2015) *Activism on the Web: Everyday Struggles Against Digital Capitalism*. London: Routledge.

 - Downing, John (2001) *Radical Media: Rebellious Communication and Social Movements*, Thousand Oaks, CA: Sage.
 - Earl, Jennifer and Kimport, Katrina (2011) *Digitally Enabled Social Change: activism in the Internet Age*. Boston, MA: MIT Press.
 - Fenton, Natalie (2016) *Digital, Political, Radical*. Cambridge: Polity.
 - Johnston, Hank (2014) *What is a Social Movement?*. Cambridge: Polity.
 - Martín-Barbero, Jesús (1993) *Communication, Culture and Hegemony: From the Media to Mediation*. London: Sage.
- Assessment:** Essay (100%, 3000 words) in the ST.

MC402 Half Unit

The Audience in Media and Communications

This information is for the 2020/21 session.

Teacher responsible: Professor Sonia Livingstone

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Culture and Society, MSc in Marketing, MSc in Media and Communications, MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: This course examines a variety of social, cultural and psychological issues as they relate to the audiences for mass and social media. It analyses people's everyday engagement with a mediated world. We will review the history of audiences and audience research from the vantage point of the present digital age, also examining key theories of audiences' and users' interpretation, engagement, fandom and creativity in a global and cross-media perspective. Students will be encouraged to read widely, to forge links with other aspects of media, communications and cultural studies in order to critically examine the positioning of audiences and users within the field, and to debate the nature and future of audiences in a changing media landscape.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading:

- Abercrombie, N. & Longhurst, B. (1998) *Audiences: A Sociological Theory of Performance and Imagination*, Sage.
- Athique, A. (2016) *Transnational Audiences: Media Reception on a Global Scale*. Cambridge: Polity.
- Barker, M. (2018) *Participations: Journal of Audience & Reception Studies*, Volume 15 issue 1 (or other volumes).
- Brooker, W. & Jermyn, D. (Eds.) (2003) *The Audience Studies Reader*, Routledge.
- Butsch, R., & Livingstone, S. (Eds.) (2013) *Meanings of Audiences: Comparative discourses*, Routledge; chapter 1 at <http://eprints.lse.ac.uk/59640/>
- Hill, A. (2018) *Media Experiences: Engaging with drama and reality television*. London, Routledge.
- Nightingale, V. (ed.) (2011) *The Handbook of Media Audiences*, Wiley-Blackwell.
- Sender, K. (2012). *The makeover: Reality television and reflexive audiences*. New York: New York University Press.

Assessment: Essay (100%, 3000 words) in the ST.

MC403 Half Unit

Contemporary Issues in Media and Communications Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Damian Tambini

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Marketing, MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance) and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be particularly beneficial to students with some background knowledge of media policy, regulation and governance. You are advised to consult the course teacher if you have not taken MC424, or if you do not have relevant professional experience.

This course is capped, meaning that there is a limit to the number of students who can be accepted.

Pre-requisites: No formal pre-requisite, but preparation for the course could include seeking additional reading in discussion with the course convenor, or auditing MC424 course materials and lectures from Moodle.

Course content: This course examines live issues in internet, broadcasting, press and telecommunications policy with a focus on current debates and an innovative format including practical exercises in policy engagement and guest speakers who are active in media policy. The aim will be to develop a practical approach to current debates at the same time referring to the longer term normative and theoretical background to intervention in this sector. After the first session, discussion will focus on a current issue each week, and the reading contains items relating to that issue. There may be some changes to the order of the sessions depending on availability of guest speakers, and supplementary readings may be advised during seminars or by email. Students will be encouraged to debate current policy issues including those that regulators and the government are currently consulting on, and develop a critical understanding of policy intervention, the policy process and strategy.

Teaching: This course is delivered through lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advanced reading, prepare seminar presentations and submit one essay of 1,500 words.

Indicative reading: A reading list will be provided for each topic.

General works relevant to the course include:

Assessment: Essay (100%, 3500 words) in the ST.

MC404 Half Unit

Political Communication in Democracies

This information is for the 2020/21 session.

Teacher responsible: Dr Nick Anstead

Availability: This course is compulsory on the MSc in Politics and Communication. This course is not available as an outside option.

Note: MC404 is a core course for the MSc Politics and Communication. It is not available to students outside the programme.

Course content: The aim of the course is to examine the relationship between the media and political processes in comparative perspective. It offers a critical review of key aspects of contemporary theory and research in political communications, examining a range of interconnected issues concerning the relationship between politics and media including: the political influence of the media; public opinion; election and referendum campaigning; political marketing and branding; political reporting; media and public knowledge; and public diplomacy.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the LT.

MC407 Half Unit Not available in 2020/21 International Media and The Global South

This information is for the 2020/21 session.

Teacher responsible: Prof Shakuntala Banaji FAW.7.01F

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Inequalities and Social Science, MSc in Media and Communications, MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: This course challenges students to raise questions about the power and role of international media – including media originating in the global south, and that circulated by NGOs – in shaping discourses about development, group identities and the global south. Building on empirical examples, the lectures aim to demonstrate that the reporting and discussion of gender, poverty, disasters, political unrest, underdevelopment and development by international media organisations has implications, not only for the way the global south and its diverse populations are imagined and represented, but also for the arena of international and national policy and politics. Using theories of ideology, critical political economy and postcoloniality, the course critically investigates key questions concerning the role of international, national, NGO and subaltern media in development, including the failure of colonial relationships of power to pass away. The course offers insight into how to approach the study of media constructions, discourses and representations of, and about, the global south and its citizens. The objectives are to: (a) Introduce debates about how media power shapes international development discourses and political realities for citizens in

the global south; (b) Link dominant development theories to the paradigms of mediated NGO development interventions; (c) Provide a postcolonial critique of the study of representations of poverty, development, participation and the global south; (d) Critically assess aspects of the political economy of international media production within the contexts in which both local media groups and NGOs research, package and produce information about international development, especially in and about the global south and (e) Investigate whether and in what ways new and mobile technologies, and small and participatory media formats enable alternative voices and critical frameworks from the global south to be heard. The course is organized into three sections: 1) a historical and theoretical overview of international media, development and the global south locating the debate(s) around development and communication within postcolonial and other critical frameworks, 2) Critical perspectives, drawn selectively from studies of development theory, political economy and cultural studies and pertaining to identity, ideology, representation, regulatory frameworks, good governance and democracy and 3) Cases and practices in reporting development, poverty, inequality and humanitarian issues. Cross-cutting themes will include a consideration of gender, NGO communications, ethnic and social conflict, tourism campaigns, social media and ICTs in the context of international media and change in the global south.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, contribute to Moodle forums, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading: Abbas, M. A. and J. N. Erni (2004) (eds.) *Internationalizing Cultural Studies: an Anthology*. Oxford: Blackwell; Banaji, S. (ed.) Assessment: Essay (100%, 3000 words) in the ST.

MC408 Half Unit

Theories and Concepts in Media and Communications

This information is for the 2020/21 session.

Teacher responsible: Dr Dylan Mulvin

Availability: This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MPhil/PhD in Data, Networks and Society, MPhil/PhD in Media and Communications, MSc in Culture and Society, MSc in Gender, Media and Culture and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course addresses key theoretical and conceptual issues in the study of media and communications, within a broadly interdisciplinary social science perspective. It grounds the analysis of media and communications phenomena within broader sociological and political theories of social order and social change, thereby revealing the shifting significance of the media environment for relations among the state, market and public sphere in a globalising knowledge society. The course is divided into two main sections. The first part examines what we study, which ranges from content and infrastructures to audiences, communities, algorithms and data. The second part explores selected critical perspectives which have proved influential in the field of media and communications and which provide answers to the question why we study what we study.

As a team-taught course that combines weekly lectures and seminars, its purpose is to expose students to a wide range of research-led debates at an advanced level, and to enable students to develop their understanding and critical appraisal of the relation between media and power at the levels of institutions, culture and social processes.

The course also includes an invited speaker series ('Media Agenda Talks') which addresses the interface between academic issues taught on the Media and Communications programmes and professional issues facing the media and communications industry. Speakers will normally include a mix of journalists and executives working for UK and global media companies or in the NGO-sector in London. The purpose is to provide an opportunity for students to relate the topics and themes addressed within their academic studies to the debates and concerns currently facing practitioners.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

As part of this course there will also be a series of 'Media and Communications in Action' Talks; a series of recorded interviews with practitioners in the media and communications industries, which students will be expected to participate in online and submit questions.

Formative coursework: All students are expected to complete

advance reading, prepare seminar presentations, and submit one essay of 1,500 words during MT.

Indicative reading: A specialist reading list will be provided for each topic. General reference readings relevant to the course include:

- Atton, C. (2015) *The Routledge Companion to Alternative and Community Media*. London: Routledge.

Assessment: Essay (100%, 3000 words) in the LT.

MC409 Half Unit

Media, Technology and Everyday Life

This information is for the 2020/21 session.

Teacher responsible: Dr Leslie Haddon

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: The course aims to explore how information and communication technologies are experienced in everyday life. This includes examining how ICTs are socially shaped, through

looking at current theoretical frameworks as well as historical and contemporary examples. The course covers such matters as the domestication of ICTs, their place in social networks and their implications for time and space. Finally, a range of potential social consequences are considered, from the specific implications for parent-child relationships to broader questions about the extent to which these technologies are changing social life.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading:

- Ito, M. (2010) *Hanging Out, Messing Around and Geeking Out: Kids Living and Learning with New Media*, MIT Press, Cambridge, MA.
- Boyd, D. (2014) *It's Complicated: The Social Lives of Networked Teenagers*, Yale University Press, New Haven.
- Byam, N. (2015) *Personal Communications in a Digital Age*, Cambridge, Polity.
- Turkle, S. (2011) *Alone Together: Why we Expect More from Technology and Less from Each Other*, Basic Books, New York.
- Curran, J., Fenton, N. and Freedman, D. (eds) (2016) *Misunderstanding the Internet (Second Edition)*, Routledge, London.

Assessment: Essay (100%, 3000 words) in the ST.

MC411 Half Unit Media and Globalization

This information is for the 2020/21 session.

Teacher responsible: Dr Wendy Willems

Availability: This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT) and MSc in Global Media and Communications (LSE and USC). This course is not available as an outside option.

Course content: The aim of this course is to explore and demonstrate the role of media and communications in processes of globalisation by introducing the relevant literature, by examining various theories of globalisation and by identifying their relevance in understanding the media. Topics taught include media imperialism, global media production, cosmopolitanism, global representations, global consumption, and comparative research.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, participate actively in seminar discussions, carry out seminar presentations and submit one essay of 1,500 words.

Indicative reading: A reading list will be provided for each topic. General works relevant to the course include:

- Appadurai, A. (1996). *Modernity at Large: Cultural Dimensions of Globalisation*. Minneapolis, MN: University of Minnesota Press.
- Eriksen, T. (2014) *Globalization*. London: Bloomsbury.
- Flew, T. (2018). *Understanding Global Media*. London: Red Globe Press.

Assessment: Essay (100%, 3000 words) in the LT.

MC413 Half Unit Not available in 2020/21 Information, Communication and Knowledge Systems

This information is for the 2020/21 session.

Teacher responsible: Prof Robin Mansell FAW.6.01E

Availability: This course is available on the MPhil/PhD in Data, Networks and Society and MSc in Media and Communications (Media and Communications Governance). This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course examines how innovation and policy influence the development of digital technologies and the information, communication and knowledge environment they support. It critically assesses media and communications (and internet) policy and practice which aim to secure public benefit that is equitable, just and inclusive. Policy and practice influence, and are influenced by, institutional arrangements in distinctive political, social and cultural contexts. This course offers an opportunity to acquire an understanding of critical approaches to policy analysis in relation to information / knowledge societies and their contributions to the Sustainable Development Goals. It explores dominant and alternative perspectives, comparing and contrasting their discourses and consequences. Students will critically assess developments in their own regions/countries and examine the reasons that policy formation and implementation are contested in this area, resulting in both empowering and disempowering outcomes.

Provisional Lectures:

- 1) Introduction: What are information or knowledge societies?
- 2) Digital Technologies and the Sustainable Development Goals (SDGs): Mainstream Views
- 3) Dominant Strategies for Assessing the Contribution of Digital Technologies to the SDGs
- 4) What is Critical Policy Analysis?
- 5) Using Critical Policy Analysis to Critique Mainstream Views of the Contribution of Digital Technologies to the SDGs - Reading Week
- 7) Critical Reflections on Digital Applications and SDGs I: Policy Communities and the Capabilities Approach
- 8) Critical Reflections on Digital Applications and SDGs II: Power Relations and Discourse Analysis
- 9) Applying Critical Policy Analysis to Digital Divide Debates
- 10) Applying Critical Policy Analysis to Governance of the Digital Environment Environment Debates
- 11) Conclusion: Influencing Digital Policy and SDG Debates for Equity, Inclusion and Justice.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: All students are expected to complete advance reading, participate in seminar role playing tasks, and submit one essay of 1,500 words. Students will be encouraged to

draw upon policy documents developed in their own countries as resources to inform their role playing.

Indicative reading: Braum, K. (2015) 'Between Representation and Narration: Analysing Policy Frames' in F. Fischer, D. Torgerson, A. Durnova, and M. Orsini (eds) *Handbook of Critical Policy Studies*. Cheltenham: Edward Elgar Publishing, pp. 441-461. Cummings, S., Regeer, B., de Haan, L., Zweekhorst, M., and Bunders, J. Unwin, T (2017) *Reclaiming Information and Communication Technologies for Development*. Oxford: Oxford University Press.

Assessment: Essay (100%, 3000 words) in the LT.

MC416 Half Unit

Representation in the Age of Globalisation

This information is for the 2020/21 session.

Teacher responsible: Professor Shani Orgad

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications and MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: Images and stories circulated in the media play a central role in informing how we imagine the world, others and ourselves. We become increasingly dependent, often exclusively, on what we see, read and hear in the news, on social media, our favourite television drama series, in advertisements, and films, or on the radio. This course focuses on the way media representations are implicated in the exercise of power over how we think and feel through the construction of meaning. It explores the opportunities that media representations present for the creation of a global and interconnected space, which enables the people living in it to conduct their social, cultural, political and economic lives in positive, just and inclusive ways. At the same time, the course discusses some of the critical challenges, limits and threats those visual and textual representations present. The discussion focuses on the representation of the Other and the production of difference, the representation of gender, suffering and migration - timely issues which are ever more urgent in contemporary public life. It examines how transformations in the contemporary media landscape, such as the expansion of social media platforms, the increasing commodification and global scope of communication, shape the ways in which public issues are framed, imaged, and constructed, the consequences this may have for the moral judgements people make and the possibilities for disrupting dominant narratives and imaginaries.

Teaching: This course is delivered through a combination of lectures, seminars and a workshop totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading:

- Amin, A. (2012). *Land of Strangers*, Polity.
- Bauman, Z. (2016). *Strangers at Our Door*, Polity.
- Hall, S. (1997) *Representation: Cultural Representations and Signifying Practice*, Sage; Macdonald, M. (2003) *Exploring Media Discourse*, Arnold.

- Silverstone, R. (2007) *Media and Morality: On the Rise of the Mediapolis*, Polity.

Assessment: Essay (100%, 3000 words) in the ST.

MC418 Half Unit

Communication: Cultures and Approaches

This information is for the 2020/21 session.

Teacher responsible: Professor Myria Georgiou

Availability: This course is compulsory on the MSc in Media and Communications. This course is available on the MPhil/PhD in Data, Networks and Society, MPhil/PhD in Media and Communications, MSc in Gender, Media and Culture, MSc in Media and Communications (Media and Communications Governance) and MSc in Media and Communications (Research). This course is not available as an outside option.

In order to accommodate academic staff leave, and in order to maintain smaller group sizes, this course is capped, meaning there is a limit to the number of students who can be accepted.

Course content: This course examines key concepts and critical perspectives on the processes of communication that underpin social, economic and cultural relations across diverse spheres of modern life. It takes an interdisciplinary and theoretical perspective, comparing the claims and contribution of selected key approaches of communication in order to understand and critique the symbolic and material power of communication media. With a substantive focus on the shifts from mass to networked media and from national to globalised communication processes, the course offers a selective introduction to key approaches in communication. It examines a series of critical perspectives, drawing on current research debates in the field of media and communications and beyond. The course is team taught by active researchers in the field of media and communications and aims to enable students to develop their critical understanding of the communication processes central to the contemporary media and communications environment.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit an essay of 1,500 words.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the LT.

MC419 Half Unit

Modern Campaigning Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Nick Anstead

Availability: This course is compulsory on the MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is recommended for MSc Politics and Communication students. Additionally, it is open to students from other degrees in the department and from other departments.

Course content: The focus of this module is the intersection between practical politics and academic research. The course is taught by a series of invited guest lecturers who are experts in the field of political campaigning for political parties and NGOs. It will connect with theory taught on other courses in the department and will enable students to see how theory is relevant and applied to the practice of modern political campaigns in the context of the evolving nature of contemporary political communication. It will examine core and general concepts in campaigning including political strategy and how it is developed; the shaping and measurement of public opinion; and the role of data targeting in modern campaign.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: This formative coursework for this course is a reduced length version of the summative assessment (see below for further details):

- A 500 word campaign memo advocating a specific strategy for a campaign of your choice (this might be for a candidate, a political party or a campaign / protest group).
- A 1000 word academic reflection on the strategy memo, where you will justify and explain your strategic recommendations with reference to relevant academic research.

Indicative reading:

- Campbell, A. (2007). *The Blair years: extracts from the Alastair Campbell diaries*. Knopf.
- Chadwick, A. 2013. *The Hybrid Media System: Politics and Power*. Oxford: Oxford University Press.

- Denton E. D. (Ed.) (2000) *Political Communication Ethics: An Oxymoron?*, Praeger Publishers.
- Gould, P. (1998) *The Unfinished Revolution: How the Modernisers Saved the Labour Party*, Little Brown.
- Issenberg, S. (2012). *The Victory Lab: The Secret Science of Winning Campaigns*. Crown.

- Nielsen, R. K. (2012). *Ground wars: Personalized communication in political campaigns*. Princeton University Press.
- Nimmo, D. D. (2001) *Political persuaders: the techniques of modern election campaigns*, Transaction Publishers.
- Stanyer, J. (2007) *Modern Political Communication*, Polity.
- Swanson, D. L. & Mancini, P. (1996) *Politics, Media, and Modern Democracy An International Study of Innovations in Electoral Campaigning and Their Consequences*, Greenwood.
- Ross, T. (2015). *Why the Tories Won*. London: Biteback.
- Trent, J. S. & Friedenberg, R. V. (2007) *Political Campaign Communication: Principles and Practices - 6th edition*, Rowman & Littlefield.

Assessment: Essay (100%, 3000 words) in the ST.

This summative assessment for this course is a two-part piece of coursework.

- A 1000 word campaign memo advocating a specific strategy for a campaign of your choice (this might be for a candidate, a political party or a campaign / protest group).
- A 2000 word academic reflection on the strategy memo, where you will justify and explain your strategic recommendations with reference to relevant academic research.

NB. One additional requirement of the summative coursework is that it cannot be on the same example used in the formative coursework.

MC420 Half Unit

Identity, Transnationalism and the Media

This information is for the 2020/21 session.

Teacher responsible: Professor Myria Georgiou

Availability: This course is available on the MSc in Culture and Society, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course examines the relation between identity and the media in the context of migration and transnationalism. As the world becomes increasingly interconnected – not least as a consequence of technological advances that enable information, people and things to move between places and across distances – questions are raised about the consequences of those changes for identity. More particularly, the course examines (i.) how those who move, but also those who don't, develop a sense of self in an interconnected, mediated world; (ii.) how digital communication connects or disconnects people within and across space and what those connections mean for collective identities, communities and nations; and (iii.) how mediated communication raises or erases boundaries between people – locally, nationally and transnationally. Engaging with a range of theories, case studies and creative activities, the course invites students to develop a globally oriented and critical understanding of identity, media and transnationalism.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit a 1,500 words case study.

Indicative reading:

- Amin, A. (2012) *Land of Strangers*. Cambridge: Polity.
- Appadurai, A. (2006) *Fear of Small Numbers*, Duke University Press.
- Coates, T-N. (2015) *Between the world and me*. Melbourne: TPC.
- Du Gay, P. et al. (eds.) (2000) *Identity: A Reader*, London: Sage.
- Hall, S. and P. du Gay (eds.) (1996) *Questions of Cultural Identity*, Sage.
- Georgiou, M. (2006) *Diaspora, identity and the media*, Hampton Press.
- Gilroy, P. (2004) *After Empire: Multiculture or Postcolonial Melancholia*, Routledge.
- Smets, K., K. Leurs, M. Georgiou, S. Witteborn and R. Gajjala (2020) *The Sage Handbook of Media and Migration*, Sage.

- Werbner, P. (2008) *Anthropology and the New Cosmopolitanism: Rooted, Feminist and Vernacular Perspectives*, Berg.
- Vertovec, S. (2009) *Transnationalism*, Routledge.

Assessment: Essay (80%, 3000 words) in the LT.

Project (20%, 500 words) in the MT.

A 3000-word essay on a case study of students' choice and a 500-word blog on one of the identities taught in the course.

MC421 Half Unit

Critical Approaches to Media, Communication and Development

This information is for the 2020/21 session.

Teacher responsible: Professor Shakuntala Banaji

Availability: This course is compulsory on the MSc in Media, Communication and Development. This course is not available as an outside option.

Course content: The content of the course addresses the history of and tensions between 'media for development' and 'communication for development', while challenging mainstream development perspectives on aid, modernisation, and the role of ICTs and media and communication in low income countries and unequal social contexts. It achieves this aim by emphasising the conflictual relationships between economic and political power structures and the empowerment of individuals, as well as among collective groupings within their local and regional contexts. In particular, paying attention to issues of history, colonisation, race and gender, this course questions who constructs knowledge and how knowledge is constructed in modernisation approaches to Media, Communication and Development. It explores the ways in which the concepts of ideology, discourse, orientalism, reflexivity and power can enable a critical understanding of social life, participation and change in the global south. The course also offers a sharp critique of scholarly and policy oriented literature that regards the media, information, and communication strategies, and information and communication technology applications, as obvious direct means of alleviating poverty, improving health outcomes and fostering democracy and human rights in low-income countries. It offers alternative theorisations of the contested way in which developments in these areas become embedded in the cultural and social fabric, especially where injustice, poverty and unequal power relations influence the capacities of individuals to make changes in their lives and communities.

Teaching: This course is delivered through a combination of lectures, seminars and a film screening totalling a minimum of 33

hours across Michaelmas Term and 1 hour in Summer Term. This year, all of this teaching will be delivered through a combination of virtual or face-to-face classes and flipped-lectures delivered as online videos and/or synchronous online lectures and Q and A. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, participate in case studies and discussions on moodle forums, prepare seminar presentations, organise and attend practitioner seminars and film/documentary viewings and submit one essay of 1,500 words.

Indicative reading:

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

This is a seen examination, and the questions are made available to students up to seven days prior to the sitting.

MC422 Half Unit Not available in 2020/21 Critical Studies in Media and Journalism

This information is for the 2020/21 session.

Teacher responsible: Prof Charles Beckett FAW.7.01K

Availability: This course is available on the MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Women, Peace and Security. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: The news media is vital not just for the dissemination information but as a forum for debate. Journalism shapes our individual and community lives. It frames ideological disputes and is a site of contestation. But journalism and the news itself is changing because of technological, social, economic and political forces. This course led by a media professor with 20 years of experience as a journalist, takes an ethical perspective on media change. It asks what impact journalism has, what kind of journalism do we want, and how will journalism reconstruct itself according to competing national, cultural, or political contexts. On completion of this course, students should be able to: understand the role of journalism in society today; critically discuss different theoretical conceptions of journalism as practiced in a wide variety of social and political contexts; compare and contrast the role of journalism in contexts ranging from mainstream to alternative media outlets; evaluate the normative and empirical connections between media journalism, the production of news and ethical considerations; critically assess contemporary debates about the changing nature of journalism and its implications for cultural understanding and democracy.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading: Allan, S. (2009) *The Routledge Companion to News and Journalism*, London: Routledge; Beckett, C. (2008) *Supermedia*, London: Blackwell; Bell, E & Owen, T (2017) *The Platform Press: How Silicon Valley Re-engineered Journalism* (Tow Center, Columbia University). Assessment: Essay (100%, 3000 words) in the LT.

MC423 Half Unit Not available in 2020/21 Global Media Industries

This information is for the 2020/21 session.

Teacher responsible: Dr Bingchun Meng FAW.7.01H

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course

is not available as an outside option.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: This course helps you understand the operation of global media industries at the intersection of politics, business and culture. The course presents an overview of the changing mechanisms of media production, distribution and consumption in the age of digital networks and global interconnection. We will examine how media industries work, why they work as they do, and their broader social and cultural implications. We will take a comparative perspective to compare and contrast the arrangement of media and communication industries in different countries/regions. We will also highlight the changes that digital technologies have brought to different types of media industries, including news industry, entertainment industry, and marketing and advertising. Questions to be explored include "How modes of media production have changed in different contexts and periods?" "What are the key issues facing media industries?" "What role do advertising and market research play in the life and design of media products?" "How do technological and legislative developments influence the way that the products of media industries are produced, distributed and consumed?" In order to address these questions, we will utilize key concepts such as convergence, commodification, flexible accumulation, and creative labour. We draw upon theoretical insights offered by political economy, cultural studies, sociology and feminism to analyze cases of media industries across the globe. Students will be encouraged to reflect on the industrial dynamics of media production as well as their own engagement with cultural industries.

Course objectives:

This course aims to help you:

- Understand different approaches to the study of media industries
- Examine the transformation of media industries in the context of globalization
- Critically analyse the relationship between institutional arrangements of media industries and the content being produced and disseminated
- Critically evaluate global regulatory attempts to establish a new communication order and the dynamics of alternative media

Topics are structured as follows:

- Media production and distribution in a changing context
- The many lives of media commodities
- Creative labour in media industries
- Convergence: Top-down and bottom-up
- Policy and regulation
- Political economy of film industry
- Cultural analysis of Reality TV
- Advertising and marketing
- Sociology of news production
- Summary and reflection

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading:

- Harvey, D. (1989) *The Condition of Postmodernity*. Oxford: Blackwell;
- Hesmondhalgh, D. (2012) *The Cultural Industries* (3rd Edition). London: Sage;
- Maxwell, R. (2016) *The Routledge Companion to Labor and Media*. London: Routledge.

- Mosco, V. (2014) *To the Cloud*. Boulder: Paradigm;
- Turow, J. (2011) *The Daily You*. New Haven: Yale University Press.

Assessment: Essay (80%, 3000 words) in the ST.

Case study (20%) in the LT.

MC424 Half Unit

Media and Communication Governance

This information is for the 2020/21 session.

Teacher responsible: Dr Seeta Peña Gangadharan

Availability: This course is compulsory on the MSc in Media and Communications (Media and Communications Governance).

This course is available on the MPhil/PhD in Data, Networks and Society. This course is not available as an outside option.

Course content: This course begins from the assumption that media and communication can only be fully understood if their governance and its implications for citizens and consumers, as well as producers and providers, are understood. Communication governance includes all attempts by public bodies to fund, licence or otherwise regulate or govern communication services or the providers of those services, usually for an alleged public benefit. The term 'governance' refers to the norms, rules and resources together with their theoretical underpinnings that inform the production and consumption of media and communication services. This course provides students with core theoretical perspectives and concepts required to critically analyse both the substance and processes of media and communication governance. Students will compare different rationales used to justify regulation of media and communication services. Students will also develop an understanding of regulatory instruments, institutional arrangements and institutional practices that help public authorities, corporations, citizens and consumers decide how to allocate public resources for the provision of such services. Illustrations are drawn from national and international contexts, thereby presenting a multi-levelled analytical approach to governance issues in the field.

Some of the questions addressed in this course include: Under what conditions should platforms be governed? Are industry professionals or regulators best positioned to determine when broadcasting institutions adequately serve the diverse information needs of a population? To what extent should legacy media laws and policies be relaxed in the light of technological change? In what ways can 5G providers serve the public interest? These and other questions reflect the course's focus on developing a critical, informed and authoritative account of 'why', 'who', and 'how to' govern media and communication services.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, participate in seminar activities, prepare seminar presentations, contribute to online discussion on Moodle and submit an essay of 1,500 words in MT.

Assessment: Take-home assessment (100%) in the ST.

This is a take-home examination, and the questions are made available to students up to seven days prior to the due date.

MC425 Half Unit

Interpersonal Mediated Communication

This information is for the 2020/21 session.

Teacher responsible: Professor Ellen Helsper

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Students are asked to write a short personal statement on LSE for You indicating why they want to take this course. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: Communication media have simultaneously been blamed for a breakdown of social relationships and been hailed as powerful social tools that can connect people from all walks of life. This discussion is more important than ever, especially now the COVID 19 pandemic has moved our social lives online in unprecedented ways. The course looks at the impact digitisation might have on relationships and interactions. The aim of this course is to provide students with a critical understanding of mediated communication within small groups and dyadic relationships. It examines the influence of media on three key fields

of interpersonal interaction which are identified as personal, social and professional communication. We will study the ways in which interpersonal relationships and communication are influenced by mediation, looking at harassment, discrimination, and social isolation but also at collaboration, connection and mutual understanding.

The first half of the course addresses the history of media in interpersonal communication as well as general interpersonal communication and relationship theories. The second half looks in more detail at how the interaction between media and interpersonal communication has been studied in relation to the cross-cutting themes of privacy/trust, isolation/socialisation and multi-modality. These central concepts of the course are reflected upon through theories of social norms, affordances, social capital and supplementation/substitution, and discussed from the perspective of different disciplinary and methodological paradigms. Application of theory to everyday life, practitioner and policy examples will give students the tools to understand what the practical implications are of the ways in which these different paradigms suggest that interpersonal communication processes vary depending on the type of platform this communication takes place on as well as the type of relationship that is under investigation and the context in which this relationship develops. As a result of the course the students will be able to evaluate the weaknesses and strengths of the theories that aim to explain apparently contradictory observations about the practise of interpersonal mediated communication. This can be applied to professional areas such as intra-organisational communication, and the design, moderation and regulation of social media and discussion forums.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, participate in the creation of a course wiki, prepare group seminar presentations and write an individual essay (1500 words) based on the presentation and the material provided for the wiki (due the week after the week in which the student is responsible for the wiki).

Assessment: Essay (100%, 3000 words) in the ST.

MC426 Half Unit Film Theory and World Cinema

This information is for the 2020/21 session.

Teacher responsible: Professor Shakuntala Banaji

Availability: This course is available on the MSc in Gender (Sexuality), MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: This course is designed to enable a consistent, informed and plausible reading of popular film representations, discourses and cultures of consumption in specific geopolitical contexts. Introducing theories from the humanities and the social sciences, lectures offer alternative approaches to theorising sexuality, gender, race, class, religion, national identity, childhood, history and politics in popular commercial films and their interpretation by audiences. The impact of unequal power relations – on how representations are reproduced, spectatorship is theorised and censorship policies are formulated – will be demonstrated and analysed. While the course offers a particular focus on Bollywood, Hindi commercial cinema, as an example of World cinema, it refers more widely to examples from other National Cinemas such as those of China, Korea, Australia, Spain and Iran. A key learning method is the extensive interrogation of audiovisual materials. To this end, there will be five film screenings and accompanying discussions alongside the lectures and seminars. Additionally, films referred to on the course will be made available through the library or can be downloaded and watched from popular film sites on the internet.

Teaching: This course is delivered through a combination of lectures, seminars, film screenings and discussions totalling a minimum of 40 hours across Michlmas Term. This year, all of this teaching will be delivered through a combination of virtual film screenings and discussions, virtual or face-to-face classes, recorded flipped-lectures online and/or synchronous online lecture and Q and A. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, participate in Moodle forums, present in seminar discussions, attend 5 film screenings and submit one essay of 1,500 words.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the LT.

MC427 Half Unit Not available in 2020/21 Digital Media Futures

This information is for the 2020/21 session.

Teacher responsible: Dr Alison Powell PEL.7.01J

Availability: This course is available on the MSc in Media and Communications, MSc in Media and Communications (Data and Society) and MSc in Media and Communications (Research). This course is available as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course provides an historical, theoretical and methodological basis through which to assess the social and cultural transformations related to digital media infrastructures and related social practices. It focuses on the materiality and affordances of new media, as well as on the social transformations that have co-evolved, focusing on emerging media of the past, present and future. It critiques and questions the assumptions about the transformation of social and cultural life but also attempts to help students develop conceptual strategies beyond critique. Conceptual approaches draw from materialist studies of media and communication, as well as science and technology studies. Topics include but are not limited to: peer to peer and open source cultural movements, the political economy and ecology of digital media, the politics of algorithms, remembering and forgetting, the anthropocene, artificial intelligence.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will complete a 1,500 word formative essay or creative proposal. They will also receive formative feedback on class participation and on a formative assignment.

Indicative reading: Marvin, Carolyn (1989) *When Old Technologies Were New*. Cambridge: MIT Press. Chun, Wendy Hui Kyong and Thomas Keenan (2006) *New Media, Old Media: A History and Theory Reader*. Assessment: Essay (100%, 3000 words) in the ST.

MC428 Half Unit

Media Culture and Neoliberalism in the Global South

This information is for the 2020/21 session.

Teacher responsible: Dr Wendy Willems

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media, Communication and Development and MSc in Politics and Communication.

This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: This course offers a comparative perspective on changing national media cultures in the Global South in the context of the neoliberal turn. The course not only considers neoliberalism as a crucial factor that has brought media industries such as private broadcasting stations, mobile phone companies and digital platforms into existence but also examines the extent to which these new forms of media and technology have played a role in reproducing neoliberalism as a process. It provides an understanding of how shifting economic policy regimes have impacted on the way in which people engage with media and technology, and how media and technology engage with people in the Global South. The first part of the course introduces the key concepts of 'media culture', 'neoliberalism' and 'Global South' which will be deployed throughout the course. The second part of the course discusses how key processes of social change in the Global South are linked to changing media cultures, including the commodification of national imaginaries, informality, crime and the rising middle class, religion and the prosperity gospel, self-help media and the neoliberal subject, and mobility and social relations. The course examines these themes through a series of empirically-grounded, mostly ethnographic case studies. The course encourages students to critically evaluate the extent to which the three key concepts in the course are helpful in gaining an understanding of changing media cultures in the Global South.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: Students will complete a formative 1,500 word essay based on a case study.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

MC429 Half Unit Not available in 2020/21

Humanitarian Communication: vulnerability, discourse and power

This information is for the 2020/21 session.

Teacher responsible: Dr Samuel Mejias

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media, Communication and Development and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Today more than ever, images and narratives of vulnerable people in zones of poverty, disaster, violence and conflict routinely populate everyday lives in the West. Taking our starting point on these images and narratives produced by a number of actors (NGOs, journalists, citizens, militants or regular armies) and appearing in a large number of digital platforms (NGO websites, news networks, social media and celebrity advocacy), we explore the changing practices of humanitarian communication in the 21st century – broadly understood to encompass disaster communication, human rights appeals, and conflict reporting. We do so by addressing questions such as: What are the histories of humanitarian communication? How is it changing today and why? What are the tensions and dilemmas that organizations face as they struggle to communicate the plight of distant others? What kind of politics of visibility and voice is played out in the mediation of distant suffering? What are the ideological and ethical positions informing and informed by the digital narratives and spectacles of vulnerable others in those zones? And finally, what are the challenges of 21st century humanitarian communication and can we do it better?

To explore these issues, the course adopts an interdisciplinary and case-based approach that enables students to both debate the theoretical links between vulnerability, discourse and power, and to reflect on concrete examples of the communication of humanitarian messages and conflict news today. The course consists of three parts: the politics of mediating humanitarianism; humanitarian communication histories, practices and challenges; and case studies exploring practices of NGOs, celebrity advocacy, and war and conflict reporting.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

All students are expected to complete advance reading, prepare reading-based seminar presentations, and submit one essay of 1,500 words.

Indicative reading: Barnett M., & Weiss T. (2008). *Humanitarianism in Question. Politics, Power, Ethics*. Ithaca: Cornell University Press. Boltanski L. Assessment: Essay (100%, 3000 words) in the ST.

MC430 Half Unit

Data in Communication and Society

This information is for the 2020/21 session.

Teacher responsible: Dr Jean-Christophe Plantin

Availability: This course is compulsory on the MSc in Media and Communications (Data and Society). This course is available on the MPhil/PhD in Data, Networks and Society. This course is not available as an outside option.

Course content: This course investigates the significance of data in communications, social and cultural life. It introduces core theoretical perspectives on data and information from a social scientific perspective, and outlines research approaches that take account of the contemporary influence of data within communication and society. The course begins with the social history of data, providing a strong baseline from which to analyse the contemporary position of data. The course will provide students with conceptual tools that will help unpack the logic of data, and train them to critically analyse phenomena such as big data, algorithmic regulation and augmented civic space. Its focus on contemporary issues allows an investigation of the politics and culture of data production, and the use of data as evidence in a range of fields including politics, advocacy and audience research. Some of the questions addressed through the course include: Who owns data? Who makes data? Who makes sense of data? Is data public or private? How do different actors get access to data? How is data protected and regulated? What significance do new analysis methods have for the influence of data? These and other questions reflect the course's focus on developing a critical account of how data is implicated in the structures that shape social life. How does culture both rely upon and push back against data-based communication?

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: Students will be expected to produce 1 presentation (group project, student-led session) in the MT, along with written formative coursework. There are two options for written formative coursework on this course. Students can choose to submit either a 1500 word essay; or a 1000 word proposal for case analysis and recommendation

Assessment: Assessment path 1

Essay (100%, 3000 words) in the LT.

Assessment path 2

Project (100%, 3000 words) in the LT.

The project comprises of a case analysis and recommendation:

1 Description of case

2 Analysis

3 Recommendations

4 Theoretical and normative contextualization

Case study analysis and recommendation: Students choose a current data-related product, service or use case, providing an analysis of how data are theoretically constructed, valued, managed and conceived within the project, using relevant theoretical material. The case study must identify an area of ethics, governance or social justice that this product, service or use case could improve, and provide a concrete set of recommendations, grounded in the existing theoretical, historical and empirical literature. This analysis and recommendation will be accompanied by a critical reflection that highlights the theoretical and normative aspects of the case, your analysis and your recommendation. This section should be grounded in the relevant theoretical material.

MC431 Half Unit

Critical Approaches to Strategic Communications

This information is for the 2020/21 session.

Teacher responsible: Dr Lee Edwards

Availability: This course is compulsory on the MSc in Strategic Communications. This course is not available as an outside option.

Course content: This course provides an advanced understanding of theoretical knowledge in the field of media and communication as it relates to strategic communications and the key promotional industries of advertising, branding and public relations. The focus is on the role, scope and activities of strategic communications in contemporary societies and in the context of globalisation and the digital age. Topics cover the context, practices and challenges of strategic communications, and are likely to include: the advance of promotional culture in and across public, political, non-profit and corporate institutions; professional structures and identities of the strategic communications industries; discourses of strategic communications, including reputation and relationship management; technologies of strategic communications; globalisation and strategic communications; strategic communications and inequalities (gender, 'race', class); and the ethics of strategic communications.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: Students will be expected to produce one 1,500 word essay in the MT.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the LT.

MC432 Half Unit

Strategic Communication in Practice: Professional Perspectives

This information is for the 2020/21 session.

Teacher responsible: Dr Lee Edwards

Availability: This course is available on the MSc in Media and Communications, MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course will be delivered as a combination of academic lectures and presentations from leading industry practitioners, in order to facilitate a cross-fertilisation between professional experience, academic perspectives, public debates and research. Students will be expected to critically engage with ideas from practice in the seminars, developing reflexivity and analytical skills through the course.

The professional lecturers will be experts working on various forms of strategic communication in a wide range of sectors, including the corporate sector; the not-for-profit sector such as global NGOs and activist organisations; voluntary sector; government and public sector organisations; and journalists. The course will culminate in a group-based practical presentation from students of their own campaigns, which will form part of the course assessment. The academic lectures will focus on campaign theory and development. The topics covered in the practitioner lectures will change each year depending on speaker availability, but as an illustration, they could include: connecting with elusive audiences; global media industries; global NGOs; communications in the retail industry; communicating in complex contexts; communicating change; communicating government policy; crisis communication.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in

Week 6 of term.

Formative coursework: Students will be expected to produce one 1500 word essay in the LT.

Indicative reading:

- Sussman, G. 2011. *The propaganda society: Promotional culture and politics in global context*. New York: Peter Lang.
- Cornelissen, J. 2014. *Corporate communication: A guide to theory and practice*. London: Sage.
- Amiso, G. and Kwansah-Aidoo, K. 2017. *Culture and crisis communication: Transboundary cases from non-western perspectives*. Piscataway, NJ: IEEE Press.

Assessment: Essay (100%, 3000 words) in the ST.

MC433 Half Unit Technology and Justice

This information is for the 2020/21 session.

Teacher responsible: Dr Seeta Peña Gangadharan

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Inequalities and Social Science, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should apply by answering a few questions during Course Choice. Prior to the first class, students must also view a recorded lecture and complete select readings.

Course content: This course addresses questions of justice and inequity in relation to communication technologies of the 20th and 21st centuries. It begins with two premises: 1) communication technologies are critical in shaping the conditions for individual and collective self-government, and 2) policies that regulate such technologies influence the nature of democracy and inclusion in society today. The course engages historical perspectives, normative theories of justice and democracy, and legal theories of technology and innovation to assess the power of communication technologies and consider their costs and benefits to historically marginalized groups. In so doing, this course questions the adequacy of regulation in the development and deployment of technologies which exacerbate existing social, political, and economic divides, on the one hand, or address or alleviate such divides, on the other. The course will primarily focus on histories and contexts of marginalized groups in the United States and the Global South.

The first part of the course will introduce students to the theoretical and historical frameworks for the course and concentrate on mass communication technologies of the 20th century, such as print and broadcasting, and policy debates

highlighting issues of justice and inequity. The second part of the course will centre on digital communication technologies in the late 20th and early 21st centuries and examine the intersection between networked communication, justice, and rights in historically marginalized communities. The third part will investigate innovations in automated technologies with respect to redistribution and recognition, issues core to the notion of social justice. By the end of the course, students will be able to evaluate differences between justice-based and rights-based approaches, explore the nature of digital inclusion, and compare the nature of communication inequalities across technologies.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, view and respond to interactive lectures, participate in seminar activities, and contribute to online discussion. Students are also expected to produce 1 piece of coursework in MT, which consists of short answers to four essay questions. Questions will be made available to students up to seven days prior to the due date.

Essay (70%, 3000 words) in the ST.

MC434 Half Unit Not available in 2020/21

Digital Platforms and Media Infrastructures

This information is for the 2020/21 session.

Teacher responsible: Dr Jean-Christophe Plantin, PEL.701.i

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research) and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Pre-requisites: No pre-requisites

Course content: While GAFAM companies (Google, Amazon, Facebook, Apple, Microsoft) are still studied as digital platforms, they now constitute major operators of the internet infrastructure, as witnessed by their involvement since 2010 in four sectors: data centers, undersea cables, telecommunications networks, and satellites. This course will study this radical extension of platform power on the internet architecture, uses, and governance. It will demonstrate how GAFAM companies become dominant actors in these four infrastructure sectors by using the platform strategy that granted them their initial success, and by adapting it from the web economy to infrastructure management.

The course presents key readings in media & communications and sciences & technology studies to analyse contemporary instances of digital media platforms. Students will explore the multiple facets of the increasing power of digital platforms, by critically analysing how platforms replace, conflict with, or influence existing infrastructures, and what are the social, political and epistemological consequences of these tensions. This focus on the relations between existing and emerging media configurations will invite students to investigate how platforms constitute ubiquitous media in everyday life, and how they increasingly shape communication, knowledge production, circulation of data, online participation and mobility.

The first part of the course will introduce the theoretical framework, blending together platform studies (coming from media & communication studies, political economy, management) with infrastructure studies (coming from history, information science, sciences & technology studies). The second part illustrates these interactions through four case studies that see tech giants taking over the existing infrastructure for global connectivity: data

centers, undersea cables, telecommunications networks, and satellites. The third part addresses current social debates around the platformization of the internet infrastructure, e.g. in terms of global access to internet, tension between states and sovereignty, and governance and regulation.

At the end of the course, students will be able to critically assess the increasing power that tech giants have over the global infrastructure for connectivity, and to discuss the challenges this process brings in terms of access to communication, knowledge and democratic life.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework:

- EITHER a 1,500-word formative essay on current theoretical debates around platforms, infrastructure, and society.
- OR a 1,500-word proposal for a case study analysis of a digital platform.

Indicative reading:

- Gillespie, Tarleton. 2018. Custodians of the Internet: Platforms, Content Moderation, and the Hidden Decisions That Shape Social Media. Yale University Press.

Assessment: Essay (100%) in the ST.

MC435 Half Unit

Disruptive Digital Worlds: Competing Economic and Political Economy Explanations

This information is for the 2020/21 session.

Teacher responsible: Professor Robin Mansell

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society) and MSc in Media and Communications (Media and Communications Governance). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The world economy is characterised by rising income, wealth disparities and increasing dependence on digital technologies - especially in the wake of COVID-19. This course will help students to understand how applications of economic theory shape developments in digital platforms and services and the consequences for citizens and consumers. A background in economics is not needed to take this course. The consequences of high levels of digital market concentration, job losses due to artificial intelligence and online monitoring applications are treated differently in various traditions in economics. For some digital 'disruption' is a sign of progress. For others it brings risks and harms. For some increasing dependence on digital technologies is seen as inevitable. For others radical change is needed to protect the rights of citizens and consumers. Students will learn about the differences between free market (neoclassical), market reform (institutional) and critical political economy theories of

digital disruption, how they are applied and how they influence business and policy. Does everyone have to adapt to the latest digital services and applications? Is there a link between rising inequality and the spread of digital technologies? Does the goal of tech driven economic growth always conflict with goals of equity, inclusion and fundamental human rights?

Week 1: Introduction: What is Digital Disruption?

Week 2: Digital Transformation - Theoretical Perspectives

Week 3: Digital Platforms - What They Do and Why it Matters

Week 4: Digital Business Strategies and Policy Responses

Week 5: Technical Standards and Why They Matter

Week 6: (reading week)

Week 7: Artificial Intelligence, Employment and Labour Conditions

Week 8: Transforming Audio-visual Markets

Week 9: Transforming Mobile Service and App Markets

Week 10: Digital Inequalities: Catching Up or Falling Behind

Week 11: Conclusion: Comparing Economic Perspectives

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: Students will be expected to produce 1 essay in the LT.

A 1,500 word essay on a topic selected from a list of questions.

Indicative reading:

- Bauer, J. M. (2018) The Internet and Income Inequality: Socio-Economic Challenges in a Hyperconnected Society, *Telecommunications Policy*, 42(4): 333-343.
- Fuchs, C. (2009) 'Information and Communication Technologies and Society: A contribution to the critique of the political economy of the Internet'. *European Journal of Communication*, 24(1): 69-87.

- Zuboff, S. (2019) *The Age of Surveillance Capitalism: The fight for a human future at the new frontier of power*. New York: Public Affairs.

Assessment: Essay (80%, 3000 words) in the ST. Presentation (20%) in the LT.

Students will select an essay topic from a list of questions.

Students will make a presentation during the seminars.

MC436 Half Unit Mediating the Past

This information is for the 2020/21 session.

Teacher responsible: Dr Omar Al-Ghazzi

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications

(Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course starts with the premise that the understanding of the past and the future is socially-constructed, mediated, and shaped by power relations within the present. It critically explores cultural, political and technological issues in relation to the passing of time. It addresses questions such as: How do different kinds of media represent and structure collective notions about time whether in relation to the present, the past or the future? How do power relations shape understandings and experiences of time? How do we learn about history through media and why does that matter? How does the trauma of colonialism impact collective understandings of history and national futures? In addressing these questions, this course makes creative connections between various topics in media and communication studies. It introduces students to the field of collective memory, differentiating it from history and historiography. It then considers critical issues within the relation between history, memory and politics, which are colonialism/postcolonialism, nationalism, collective action, trauma, witnessing and war. The second part of the class focuses on the analysis of technology and media in the ways they contribute to the social construction of time. It addresses how privilege and access to technology regulate the speed and slowness of people's lives. It moves on to exploring how particular media conventions represent temporality, with a focus on news media, digital technologies and popular culture. By the end of the course, students will be able to identify key debates in the study of time and temporality, particularly as approached from the disciplinary perspective of communications and media studies.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: Students will be expected to produce one 1500 word essay.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

MC437 Half Unit

Media, Data and Social Order

This information is for the 2020/21 session.

Teacher responsible: Professor Nick Couldry

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff leave, and in order to maintain smaller group sizes, this course is capped, meaning there is a limit to the number of students who can be accepted.

Pre-requisites: No formal pre-requisites, but students will need to apply by submitting a statement via LSE for You during the Course Choice period.

Course content: Visions of contemporary society and its reliance on data processes are highly polarised: do they represent the end of freedom under a regime of continuous surveillance or the freeing up of an extended group mind through awesome computing power? Today's starkly opposed visions of media's contribution to social order have however a much longer history which we must grasp if today's transformations are to be understood. Since the 19th century, technologies for mediated communication have developed in increasingly institutionalised forms. Those forms – from the traditional mass media (the press, radio, television) to contemporary media and information infrastructures – have played important roles in the organization of everyday life, and have been imagined to play a central role in the 'order' of society, even of the world. But do today's digital platforms for social interaction (especially 'social media'), and the data processes that underlie those platforms (the process sometimes called datafication), create a completely different type of social order from in the past? How is that order being constructed, and what are its implications for social life?

This course offers a primarily sociological, but also interdisciplinary, exploration of how a social order is being constructed in the era of social platforms and large-scale data-collection, and the social –indeed ethical - challenges to which the

new 'datafied' social order is giving rise. The course is structured into two main parts. After the introductory lecture, Lectures two to five will explore alternative entry-points for analysing this social order, via transformations of social space, the creation of social relations, the creations of new forms of meaning via algorithms, and macro-theories of the emerging order. Lectures six to nine will apply these theoretical insights to the expanding uses of data in four areas of daily life: social justice, personalized marketing, surveillance (at work and at home), and the formation of individual subjects (in education and through self-tracking). The concluding lecture will draw together the course's themes with a particular focus on the normative implications of the datafied social order, with particular reference to the questions of autonomy, surveillance and data extraction.

The course will be aimed at all MSc students interested in acquiring a broad social-theoretical understanding of the role that media institutions play in ordering contemporary societies and developing their own critical perspective on whether media and datafication, as processes do, or do not, overall enhance human life, especially its social and ethical dimensions.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: Students will be given the option of choosing one of two alternative pieces of formative coursework in preparation for the summative essay. Students can submit either (1) a short essay on a theoretical approach to understanding data's role in social order (1200-1500 words); or (2) a short reflection: students should choose a short (200 word maximum) text of theory or business discourse, and then reflect on that text's implications for a data practice of their choice (1200-1500 words).

- Turow, Joseph (2017) *The Aisles Have Eyes*. Yale University Press.
- Van Dijck, Jose (2013) *The Culture of Connectivity*. Oxford: Oxford University Press.

Assessment: Essay (100%, 4000 words) in the ST.

Students will submit one piece of written work for the summative assessment: a 4000 word essay on questions set by the course convenor in which students will bring together theoretical discussion with the consideration of specific data practices.

MC438 Half Unit

Mediated Feminisms

This information is for the 2020/21 session.

Teacher responsible: Professor Sarah Banet-Weiser

Availability: This course is available on the MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media, Communication and

Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Media have been crucial to feminist politics across the globe, from 19th century pamphlets to early television representations to 90s zine culture to the multitude of hashtag feminisms in contemporary social media. This course explores the ways that feminisms, in both the Global North and Global South, materialize as a kind of media, appearing on a variety of media platforms from print to digital. The course addresses the relationship between forms of feminisms in different geographical regions and media contexts. There are many different feminisms that circulate in popular media in different historical moments, and some of these feminisms become more visible than others. Mediated feminisms are networked across all media platforms, some connecting with synergy, others struggling for priority and visibility.

The goal of the course is to critically examine the ways in which feminism, and its intersections with race, ethnicity, nationality, and class, is enacted and represented in the media, and how mediated feminisms have an impact on cultural formations and communication. The course will also examine misogynistic and sexist reactions to feminism, within the frame of the normalization of hierarchy and violence.

The course is designed to historicize and conceptualize past and current developments, as well as recurrent themes and movements, in media representations of feminisms. Specifically, the course historicizes the recent explosion of mediated feminisms, and offers students a long-term theoretically-informed critical perspective on the ways feminisms have been mediated. It presents a historical examination of "mediated feminisms" as sites for the restructuring of knowledge. Furthermore, the course insists that in order to develop a complex and inclusive understanding of how media representations of feminism influence viewers and users, we must consider feminism beyond the West in terms of global and transnational perspectives.

The course is framed around broad histories of feminist media productions (from newspapers to zines to hashtags) and feminist consumption/commodity feminism. Using theories from cultural and media studies, creative industry studies, film and gender studies, and communication studies, it explores different processes and practices of feminism and their relationship to media forms and media production. The discussions will examine feminist media production from early suffrage movements to global feminist practices of the mid 20th century to post-colonial feminist productions of the later 20th century, to queer feminist and post- and popular feminist productions of the current moment. The course is structured into three parts:

Part One, Historical Mediated Feminisms (Lectures 1-5), will review historic approaches to the ways feminisms have been mediated, from the 19th century to the present;

Part Two, Feminist Media Productions (Lectures 7-9) will explore feminist media productions both within and outside the mainstream media (ranging from alternative press to zines to digital media production);

Part Three, Popular Feminism and Activism Today (Lectures 10-11) will draw together the course's themes with a particular focus on the contemporary moment of popular feminism, asking students to engage in the ambivalent spaces of mediated feminisms.

The course is intended for all MSc students interested in acquiring a broad cultural-theoretical understanding of the role that media institutions play in defining feminisms for broad audiences, as well as those who are interested in feminist media productions across history.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

Formative coursework: Students will be expected to produce 1 project in the MT.

Students will be given the option of choosing one of two alternative forms of preparation for the summative project:

Either

(1) A 1200-1500 word Short Analysis in which an individual student explains the relationship between media and its representation of feminism(s) during a specific historical period;

Or

(2) A Group Project: students can work in groups of 3-4, and will write a 2000-2500 word analysis of the relationship between media and its representations of feminisms during a specific historical period. The aim of the group project is for students to work collaboratively and reflect on the analysis in a group setting.

Assessment: Essay (80%, 2000 words) in the ST. Assignment (20%).

The summative assignment consists of a 2,000 word essay in the ST, and a media product, about a particular historical period we discuss in class.

For the essay component (80%) students will be asked to choose a case study from a particular historical period that was discussed in the course and analyze how particular media from that period represents, engages with and/or negotiates the meanings of

feminism. Students will be instructed to write their summative essay on a different historical period from that on which they wrote their formative essay.

For the media production assignment (20%), students will be required to produce an example of a media form that relates to the period on which they write their summative essay. This task asks students to create a media artifact, with "media" understood as a broad category. For the purposes of this class, media production involves the use of technology (from print to music to digital media) to be able to produce a tactile, visual, digital, or audio artifact. These media products could range from creating a social media plan for a feminist action, or a hashtag campaign that would cross platforms, to a YouTube channel where they can give tutorials on feminism. Students can create a short documentary or educational video, or a pitch for a reality show, or storyboard, zine, comic strip, podcast, etc. The media product does not have to correspond with the actual historical period analyzed, so students can imagine a different medium paired with the era: a podcast "from" suffragette era, a Tumblr from the Second Wave era, etc. Students do not have to have experience in production; this is more of a creative assignment to think through the connections between feminist theories and how these theories might be represented in media productions. Assessment will be based on a well-thought out product, the amount of difficulty inherent in chosen medium, and the ability to apply ideas from the course to a media product.

MC499

Dissertation: Media and Communications

This information is for the 2020/21 session.

Teacher responsible: Dr Simidele Dosekun will convene the teaching and organisation of this course, and will oversee allocation of dissertation supervisors (one per student).

Availability: This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is not available as an outside option.

Course content: The aim of this dissertation is for students to pursue an independent piece of research within the field of media and communications following the guidelines provided in the MSc Dissertation Guide and the instructions by the School's staff members. The dissertation is usually a combination of theoretical enquiry and original empirical enquiry concerning an issue in the field of media and communications. On rare occasions it is based on a theoretical interrogation. Students are encouraged to select a topic that reflects the content of their MSc programme. In all cases, students must obtain the approval of their supervisor before embarking on any research.

Teaching: This course will be delivered through a combination of lectures, workshops and one-to-one supervision in Michaelmas, Lent and Summer Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of Michaelmas and Lent Term.

Formative coursework: Students are required to submit ethics checklist, literature review and dissertation plan to their dissertation supervisor in LT and ST.

Indicative reading: There are no formal reading lists, but students are encouraged to consult departmental handbooks on how to write dissertations.

Assessment: Dissertation (100%, 12000 words) in August.

The dissertation must be not less than 10,000 words and not more

than 12,000 words in length.

MC4M1 Half Unit

Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2020/21 session.

Teacher responsible: Dr Jean-Christophe Plantin

Availability: This course is available on the MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is not available as an outside option.

Course content: The aims of the course are to provide students with a general training in research methods and techniques, including research design, the collection, analysis and interpretation of data, and to enable students to evaluate critically their own research and that of professional researchers. The course has three components:

i. Principles of Research in Media and Communications: a series of lectures offered by media and communications staff in MT. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, critical discourse analysis, social network analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

ii. Principles of Social Research: a series of five three-hour workshops (each comprised of two 1.5-hour sessions) offered by media and communications staff in the LT. Students are required to participate in two of the workshops.

iii. Quantitative Analysis: Students have to take the following course offered by the Department of Methodology: MY464 Introduction to Quantitative Methods for Media and Communications. Please note that this course is compulsory and automatically included within the MC4M1 course.

Teaching: This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 55 hours across Michaelmas and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

i. Principles of Research in Media and Communications: Lecture (one hour) x 10 MT; Lecture on Writing Methodological Critiques (one hour) x 1 LT.

ii. Principles of Social Research: Workshop (three hours) x 2 LT (each comprised of two separate 1.5 hour sessions).

iii. Revision sessions for summative method essay: Q&A session (two hours) x 1 LT and x 1 ST.

iv. Quantitative Analysis MY464: This course is delivered through a combination of classes and lectures in MT. This year, this teaching will be delivered through a combination of short online recorded films for the lectures and live classes, which will be delivered face-to-face where feasible, or online where not. Combined hours across lectures and classes will be equivalent to a minimum of 30 hours face-to-face teaching.

v. Methodology pilot drop in clinics: Workshop (two hours) x 1 LT and ST.

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to complete advance readings and submit one essay of 1,500 words to their supervisors in the MT.

ii. Principles of Social Research: All students are expected to complete advance readings and submit workshop assignments.

iii. Quantitative Analysis: Most statistics courses require weekly assignments

Indicative reading:

Assessment: Coursework (80%, 3000 words) in the ST.

Online assessment (20%).

Description of assessment:

Coursework: One written assignment of not more than 3,000 words, relating to the combination of Principles of Research in Media and Communications and Principles of Social Research to be submitted in the ST (80%).

Three-hour online assessment in the January exam period relating to Quantitative Analysis (MY464) (20%).

MC4M2

Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2020/21 session.

Teacher responsible: Professor Ellen Helsper

Availability: This course is compulsory on the MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students taking non-research track media and communications MSc programmes may take this course instead of MC4M1 subject to their own degree regulations and with the agreement of the teacher responsible.

Course content:

i. Principles of Research in Media and Communications: A series of lectures offered by media and communications staff in MT. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, social network analysis, critical discourse analysis, content analysis, visual analysis, survey design/questionnaires, experiments, ethnography and participant observation, as well as research ethics.

ii. Principles of Social Research and Specialist social research workshop: A series of ten three-hour workshops (10 comprised of

two x 1.5 hour sessions) offered by media and communications staff in LT. Students are required to participate in all ten workshops.

iii. Quantitative Analysis: Students take two statistics courses offered by the Department of Methodology: MY464 Introduction to Quantitative Methods for Media and Communications; MY452L Applied Regression Analysis. Please note that these courses are compulsory and automatically included when you register for the standard MC4M2 course. Students may be permitted to substitute a more advanced course offered by the Department of Methodology in place of MY464 and/or MY452L, with the approval of the MC4M2 course convenor and subject to timetabling constraints.

Teaching: This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 95 hours across Michaelmas and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

i. Principles of Research in Media and Communications: Lecture (one hour) x 10 MT; Lecture on Writing Methodological Critiques (one hour) x 1 LT.

ii. Principles of Social Research: Workshop (three hours) x 10 LT.

iii. Quantitative Analysis:

• **MY464:** This course is delivered through a combination of classes and lectures in the MT. This year, this teaching may be delivered through a combination of short online recorded films for the lectures and live classes, which will be delivered face-to-face where feasible, or online where not. Combined hours across lectures and classes will be equivalent to a minimum of 30 hours face-to-face teaching.

• **MY452L:** This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in the LT. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

iv. Methodology pilot drop in clinic: Workshop (two hours) x 1 LT and ST.

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to complete advance readings and submit one essay of 1500 words in the MT.

ii. Principles of Social Research Workshops: All students are expected to complete advance readings and submit workshop assignments.

iii. Quantitative Analysis: Most statistics courses require weekly assignments

Indicative reading:

- Alasuutari, P. (1995). *Researching Culture: Qualitative Method and Cultural Studies*. London; Thousand Oaks, Calif: SAGE Publications Ltd.
- Bauer, M. W., & Gaskell, G. D. (2000). *Qualitative Researching with Text, Image and Sound: A Practical Handbook for Social Research*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

- Silverman, D. (2013). *Doing Qualitative Research: A Practical Handbook*. London; Thousand Oaks, Calif: SAGE Publications Ltd.
- Assessment

Assessment: Coursework (66%, 5000 words) and take-home assessment (14%) in the ST.

Continuous assessment (3%) in the LT.

Online assessment (17%).

Description of assessment:

1. Coursework: One written assignment of not more than 5000 words to be submitted in the ST (66%).
2. Three assessments relating to Quantitative Analysis: One three-hour online assessment in the January exam period for MY464, as well as one two-hour take home assessment in ST and continuous assessment in LT for MY452L (see Methodology Department course guides) (34%).

MC4M7 Half Unit

Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis)

This information is for the 2020/21 session.

Teacher responsible: Dr Jean-Christophe Plantin

Availability: This course is available on the MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is not available as an outside option.

Course content: The aims of the course are to provide students with a general training in research methods and techniques, including research design, the collection, analysis and interpretation of data, and to enable students to evaluate critically their own research and that of professional researchers.

The course has three components:

i. Principles of Research in Media and Communications: A series of lectures offered by media and communications staff in MT. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, critical discourse analysis, social network analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

ii. Principles of Social Research: A series of five three-hour workshops (each comprised of two 1.5-hour sessions) offered by media and communications staff in the LT. Students are required to participate in two of the workshops.

iii. Quantitative Analysis: Students have to take the following course offered by the Department of Methodology: MY452M Applied Regression Analysis. Please note that this course is compulsory and automatically included in the MC4M7 course.

Teaching: This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 43 hours across Michaelmas and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

i. Principles of Research in Media and Communications: Lecture (one hour) x 10 MT; Lecture on Writing Methodological Critiques (one hour) x 1 LT.

ii. Principles of Social Research: Workshop (three hours) x 2 LT (each comprised of two separate 1.5 hour sessions)

iii. Revision sessions for summative method essay: Q&A session (two hours) x 1 LT and x 1 ST.

iv. Applied Regression Analysis MY452: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in MT. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

v. Methodology pilot drop in clinic: Workshop (two hours) x 1 LT and ST.

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to complete advance readings and submit one essay of 1500 words to their supervisor in the MT.

ii. Principles of Social Research: All students are expected to complete advance readings and submit workshop assignments.

iii. Applied Regression Analysis: Most statistics courses require weekly assignments

Assessment: Exam (16%, duration: 2 hours) in the summer exam period.

Coursework (80%, 3000 words) in the ST.

Continuous assessment (4%) in the MT.

Description of assessment:

1 Coursework: One written assignment of not more than 3000 words, relating to the combination of Principles of Research in Media and Communications and Principles of Social Research to be submitted in the ST (80%).

2 Two-hour take home assessment in ST and continuous assessment in MT for MY452M (see Methodology Department course guides) (20%).

to their own degree regulations and with the agreement of the teacher responsible.

Course content:

i. Principles of Research in Media and Communications: A series of lectures offered by media and communications staff in MT. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, social network analysis, critical discourse analysis, content analysis, visual analysis, survey design/questionnaires, experiments, ethnography and participant observation, as well as research ethics.

ii. Principles and Specialist Research workshops: A series of ten three-hour workshops (10 comprised of two x 1.5 hour sessions) offered by media and communications staff in LT. Students are required to participate in all ten workshops.

iii. Quantitative Analysis: Students take two statistics courses offered by the Methodology Department: MY452M Applied Regression Analysis; MY455 Multivariate Analysis and Measurement. Please note that these courses are compulsory and automatically included when you register for the standard MC4M8 course.

Teaching: This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 85 hours across Michaelmas and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

i. Principles of Research in Media and Communications: Lecture (one hour) x 10 MT; Lecture on Writing Methodological Critiques (one hour) x 1 LT.

ii. Principles and Specialist Research Workshops: Workshop (three hours) x 10 LT.

iii. Quantitative Analysis:

- MY452M: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in MT. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.
- MY455: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across LT. This year, the lectures may be delivered live or as short online videos. The classes will be live and in person, and delivered online or in class.

iv. Methodology pilot drop in clinic: Workshop (two hours) x 1 LT and ST.

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to complete advance readings and submit one essay of 1500 words in the MT.

ii. Principles and Specialist Research Workshops: All students are expected to complete advance readings and submit workshop assignments.

iii. Quantitative Analysis: Most statistics courses require weekly assignments

Indicative reading:

MC4M8

Advanced Methods of Research in Media & Communications (including Qualitative & Advanced Quantitative Analysis)

This information is for the 2020/21 session.

Teacher responsible: Professor Ellen Helsper

Availability: This course is available on the MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students taking non-research track media and communications MSc programmes may take this course instead of MC4M1 subject

Researching Communications: A Practical Guide to Methods in Media and Cultural Analysis. London: Hodder Education.

Assessment: Exam (17%, duration: 2 hours) in the summer exam period.

Coursework (66%, 5000 words) and take-home assessment (14%) in the ST.

Continuous assessment (3%) in the MT.

Description of assessment:

1 Coursework: One written assignment of not more than 5000 words to be submitted in the ST (66%).

2 One two-hour exam in ST relating to MY455, as well as one take-home assessment due in ST and continuous assessment in MT relating to MY452M (see Methodology Department course guides) (34%).

MG401 Half Unit

Operations Management for Management Consultancy

This information is for the 2020/21 session.

Teacher responsible: Prof Richard Steinberg NAB.3.08

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Management of Information Systems and Digital Innovation. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 45. Students on the waiting list will be selected based on their academic background.

Pre-requisites: There is a pre-assignment that is due at the first lecture of Lent term 2021. The specification of the pre-assignment will be posted to Moodle on the last day of Michaelmas term 2020.

Note that the pre-assignment is compulsory and cannot be accepted late.

Course content: The course covers eight topics: (1) Process Flow Analysis, (2) The Toyota Production System, (3) Inventory Management, (4) Assembly Line Balancing, (5) Project Management, (6) Quality Management for Services, (7) Forecasting, and (8) Scheduling. The course is structured in three parts. Part I is called 'Cases', and is based around a set of 5 readings: three Harvard Business School cases and two articles. Part II is called 'Techniques'. Part III is called 'The Goal', which takes place during the final 2-hour session, and consists of an in-depth discussion of the book, *The Goal*, by E.M. Goldratt and J. Cox.

Teaching: 16 hours of lectures and 12 hours of seminars in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: In addition to the pre-assignment students will have six assignments throughout the term covering the material in the course, and will be expected to work as a group on each assignment. The problems comprising each assignment will be discussed in the seminar classes, and each student will be individually responsible for answering all the problems for each assignment.

Indicative reading:

(1) Case: 'National cranberry cooperative (abridged)'

(2) Case: 'Toshiba: Ome works'

(3) Case: 'Toyota Motor Manufacturing, U.S.A., Inc.'

(4) Article: 'Controlling variation in health care: a consultation from Walter Shewhart'

(5) Article: 'Monitoring patients using control charts: systematic review'

(6) Book: *The Goal*, Fourth revised (30th anniversary) edition, E.M. Goldratt and J. Cox, 2014.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG402 Half Unit

Public Management: A Design-Oriented Approach

This information is for the 2020/21 session.

Teacher responsible: Professor Michael Barzelay NAB 3.19

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Management, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course cannot be combined with MG467 Strategy and Change in Public Sector Management. This course is available on course is available as an outside option to students on other programmes where regulations permit.

Course content: The public needs capabilities from public organizations, such as those to implement major shifts in public policies; to provide safe and otherwise adequate public services; to deliver technological and programmatic systems through projects; to create credible scientific information for public and policy use; and to deter corruption across the public sector. Furnishing capability to accomplish such purposes requires management of public organizations, and, management, in turn, involves using professional knowledge and skilful abilities to devise mechanisms that will work in challenging situations and settings.

In this course, students will learn how to engage creatively – as designers and managers – with practical theories and case-based knowledge in creating mechanisms that work in enabling public organizations to play their crucial roles in government. In particular, the course will focus on how a design-orientation in professional practice can be directed toward overcoming specific conditions and widespread tendencies that work against any specific public

organization's success in furnishing the capabilities required of it. Case studies will be used to develop this design-orientation, while also expanding students' familiarity with varied roles played by public organizations, e.g., using regulation to promote waste-reduction in a region's industrial sector; using international cooperation projects to promote advanced technological education in a partner country; using design-projects to formulate and test operational concepts for performing sanitation functions in delivering a public event attended by millions; using project organizations and tools to control the use of public money and authority in infrastructure projects; and using national-level auditing and criminal investigation tools to combat corruption at the local level. In this sense, and by using pedagogical methods common to professional schools of public policy and management, the course is emblematic of the design-oriented professional discipline of Public Management. (Additional course content information on the Course Moodle site.)

Teaching: 30 hours of combined lecture/seminars in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Essay: Write a 1500-2500 word essay about a specific publication on the reading list to develop the skilful ability of presenting a research publication that furnishes professional knowledge about public organizations and their management.

Case analysis: Contribute to a group-project whose deliverable is a report about how a specific organizational mechanism (namely, the Brazil in Action management system) worked in achieving innovative change and in fulfilling the functional-intent of public administration, from a whole-of-government standpoint, so that the analysis can be used in tackling challenges elsewhere.

Based on a specific teaching case, write a 2000-3000 word script, supported by 4-7 presentation slides, that explains how a public organization's capability was furnished by its value-chain configuration and/or was changed through a design-project.

Indicative reading: Publications:

L Andrenacci, M Barzelay, & Y Yan, 'Managing the Government's Emblematic Project: The Case of the 2019 Kumbh Mela Pilgrimage Festival in Uttar Pradesh, India' (2020); E Bardach, 'The Extrapolation Problem' (2004); M Barzelay, Public Management as a Design-Oriented Professional Discipline (2019); M Barzelay & C Campbell, Preparing for the Future: Strategic Planning in the U.S. Air Force (2003); M Barzelay & S Seabra, 'Auditing Against Corruption' (2020); J Bryson, Strategic Planning in Public and Nonprofit Organizations (2017); T Cellucci, 'Developing Operational Requirements' (2008); B George, 'Revisiting Public Management as a Design Science' (2020); J Koopenjan, et. al., 'Competing Management Approaches in Large Engineering Projects' (2011); B Lawson, What Designers Know (2004); J Tendler & S Freedheim, 'Trust in a Rent-Seeking Society' (1994); J van Aken et. al., Problem-Solving in Organizations (2007); D Vaughan, 'Organizational Rituals of Risk and Error' (2005).

Videos: 'Programs and their Mechanisms' (2017); 'Public Management Gallery Tour' (2017); 'Furnishing Professional Knowledge about Public Management with Case Studies: A Long Primer' (2020).

Teaching case studies: 'Paying the Bills in the Junta of Andalusia'; 'Preventing Pollution in Massachusetts: The Blackstone Project'; Cleanliness for Millions: Preparing to Keep the Festival Grounds Clean During the 2019 Kumbh Mela in Prayagraj, Uttar Pradesh, India."

Assessment: Essay (45%, 2500 words) in the ST.

Case analysis (45%) and class participation (10%) in the LT.

Essay: Write an essay about one of a small selection of publications on the course reading list to (a) explicate the publication's argumentation about its case study and overall topic and (b) assess its relevance and importance in furnishing professional knowledge about public organizations (2500 maximum word length). (45%)

Case analysis: Write an individual case-analysis based on the formative case analysis assignment completed in groups (3000 maximum word length) (45%)

Class participation: Based on attendance and contribution to class discussion. (10%)

MG403 Half Unit

Pricing Strategy

This information is for the 2020/21 session.

Teacher responsible: Prof Om Narasimhan NAB5.06

Availability: This course is available on the MSc in Marketing.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is meant for the MSc Marketing students only and involves a higher degree of quantitative treatment. Students who are not enrolled in the MSc Marketing degree should not take this course, and should take the "MG4J3 Principles of Pricing" course instead.

The content of the course is organised into two principal modules: (1) pricing strategy and fundamentals and (2) pricing tactics and implementation. The first module of the course covers the fundamental analytical tools, theories, and conceptual frameworks needed for price strategy formulation. Basic principles from marketing, economics, and psychology will be briefly reviewed and extended. The module provides an in-depth treatment of the role of price in the firm's value proposition to the customer and the determination of customer response to price. The second module of the course covers pricing tactics and opportunities for achieving price customisation.

Teaching: 30 hours of seminars in the LT.

Formative coursework: Students will be engaged in analysing a number of cases, doing numerical problems, as well as analysis data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve numerical problems, case analysis, and analysing data sets).

Indicative reading: The Strategy and Tactics of Pricing: A Guide to Growing More Profitably (2010): Nagle, Hogan, and Zale, Prentice Hall. Pricing Information: How to customize both the product and the price (1998): Carl Schapiro and Hal Varian, Harvard Business School Chapters. 'How to Fight a Price War' (2000): Akshay Rao, Mark Bergen, Scott Davis, Harvard Business Review. 'Is it time to rethink your pricing strategy?' (2012): Andreas Hinterhuber and Stephan Liozu, Sloan Management Review. 'Pricing as a Strategic Capability' (2002): Mark Bergen, Shantanu Dutta, Mark Ritson, Sloan Management Review

Assessment: Coursework (55%) and project (45%) in the LT. Coursework is an Individual Take-home assignment and the project will be in groups.

MG404 Half Unit

Consumer Insights: Behavioural Fundamentals

This information is for the 2020/21 session.

Teacher responsible: Dr Nicolette Sullivan NAB 5.36

Availability: This course is compulsory on the MSc in Marketing.

This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: For many companies, non-profit organisations, and political figures, success relies on understanding the "consumers." What is it that they really want, and why? What information will they attend to, and what will they ignore? How do they make decisions, why do they sometimes make bad ones, and how can we help them make better ones? It can be tempting to answer these questions intuitively, based on your own experiences

as a consumer. However, intuitions about human psychology are often wrong.

- Chronic and temporary sources of customer needs, desires, and motivations
- How customers search for information, acquire, and process information
- How customers allocate attention and how to attract it
- Customer decision-making processes, and the heuristics and biases that play a role
- The formation of attitudes and intentions, and processes for persuasively changing them
- Social influences on intentions and behaviour, including unconscious determinants
- Why intentions are or are not translated into behaviour, and what strategies can be used to narrow the intention-behaviour gap.

Teaching: 30 hours of seminars in the MT.

This course has a reading week in Week 6 of MT.

Formative coursework: One quiz prior to the summative quizzes.

Indicative reading:

- Consumer Behavior, 6th edition. Hoyer, MacInnis, & Pieters. South-Western Cengage Learning, 2010;
- Consumer Behavior: Science and Practice. Kardes, Cronley & Cline. South-Western Cengage Learning.
- Influence: The Psychology of Persuasion. Cialdini, Robert. Collins Business, 2006.

Further references, especially for journal articles and HBS case studies, will be provided at the commencement of the course.

Assessment: Coursework (10%), in-class assessment (40%), class participation (10%) and group project (40%) in the MT.

The in-class assessment is two quizzes (each worth 20%) in MT.

The coursework is an Individual assessment - based on the group project (10%) in MT.

MG409 Half Unit

Auctions and Game Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Richard Steinberg NAB 3.08

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), MBA Exchange, MSc in Applicable Mathematics, MSc in Economics and Management, MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 45. Students on the waiting list will be selected based on their academic background.

Pre-requisites: Students should have a course equivalent to the LSE course Quantitative Methods (Mathematics) (MA107), which covers techniques of calculus (differentiation, partial differentiation, optimisation and integration), methods of linear algebra (use of matrices), with emphasis on their application to economic problems. Students should also have some knowledge of probability.

Course content: The course provides an introduction to auctions and game theory. Topics covered are: noncooperative games, cooperative games, social choice, sequential games, auctions, and combinatorial auctions. In addition to the theory, a significant portion of the course will discuss applications. Specifically, four one-hour lectures each will be devoted to a single real-world application: caller display, competing Internet service providers, public housing space, and spectrum. We will also devote a two-hour lecture session to a Harvard Business School case based on five real-world applications of auctions: publishing, professional sport, on-line auctions, state privatization, and mergers and acquisitions.

Teaching: 16 hours of lectures and 12 hours of seminars in the LT. 2 hours of lectures in the ST.

A reading week will take place during Week 6. There will be no

teaching during this week.

Formative coursework: Very full lecture notes are provided, and every week a set of problems is given out in the lecture. These are discussed in the following seminars.

Indicative reading:

- Book: P. Cramton, Y. Shoham, and R. Steinberg, eds., Combinatorial Auctions.
- Book chapter: 'Auction Pricing', R. Steinberg, Chapter 27 in O. Ozer and R. Phillips, eds., Oxford Handbook of Pricing Management.
- Case study: 'Auction Vignettes', Harvard Business School Publishing.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG410 2.0 Units

Term Abroad

This information is for the 2020/21 session.

Availability: This course is compulsory on the Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: CEMS MIM degree:

During Year 2 of the Global MSc in Management (CEMS MIM), students can apply to spend an international exchange term at a leading CEMS school, along with exclusive CEMS core courses in Global Management, skills seminars, block seminars, and an international internship.

MBA Exchange Term Abroad:

During Year 2 of the Global MSc in Management (MBA Exchange) students can apply to spend a term abroad at one of LSE's leading partner business schools in the US and Asia. Students will join an MBA class at their chosen school, and take a choice of optional elective courses offered by the school.

All students should register for the course code MG410 (Term Abroad) as their only LSE course for LT 2021. (This applies to 2020/21 only)

Teaching: July/August/September (according to the host school timetable) to December. (For 2020/21 CEMS/MBA students this will refer to Term 2 teaching at the host school)

CEMS MIM partner schools: <https://www.cems.org/academic-members/our-members/list/>

MBA Exchange partner schools:

- Cornell University - Samuel Curtis Johnson Graduate School of Management
- University of Chicago - Booth School of Business
- University of Texas at Austin - McCombs School of Business
- Emory University - Goizueta Business School
- University of Michigan - Ross School of Business
- Yale University - School of Management
- Duke University - Fuqua School of Business
- Peking University - Guanghua School of Management
- Northwestern University - Kellogg School of Management

Information for MBA Exchange track students

All MBA Exchange students must take the following minimum number of credits/courses during the exchange term:

- Cornell: 12 credits
- Duke: 12 credits
- Kellogg: 4 credits
- Yale: 16 units
- Chicago Booth: 4 courses / 400 units
- Michigan Ross: 12 credits
- UT Austin: 12 credits
- Peking: 8-12 credits (4 classes)

Please be aware of the course choice regulations whilst on the MBA Exchange:

- LSE cannot validate non-taught courses as part of a student's term abroad grade. E.g. language, sports, skills workshops, society activities, oral communication etc. Only taught courses will be accepted.

- All students must ensure they take courses that award actual grades such as alphabetical grades etc.
- We are unable to use pass/fail courses as we cannot quantify or convert them back into the LSE framework.
- LSE will not accept language courses.

Information for LSE CEMS track students

All LSE CEMS students must take 30 academic ECTS credits in Term 1. **(This will be in Term 2 for 2020/21 CEMS students)**

All LSE students are required to take at least 30 ECTS credits in Term 1 so that they can meet the overall CEMS MIM Year ECTS course requirements.

- Total number of CEMS course (academic) credits that need to be taken in Term 1: 30 ECTS. 160 Students should not take courses that exceed the 30 ECTS requirement (unless due to the weighting of each course it is inevitable that the total amount of ECTS goes over by slightly by one or two ECTS credits).
- Total number of CEMS credits that should be acquired in Term 1: 34 ECTS. Academic courses and electives = 30 ECTS, Block Seminar = 3 ECTS, CEMS Skills Seminars = 1 ECTS.
- Maximum number of credits you are allowed to take in Term 1: 37.5 ECTS. This includes the Block Seminar and CEMS Skill Seminars.

Please be aware of the course choice regulations whilst on the CEMS term abroad:

- CEMS students must take the mandatory CEMS courses at their host institution and at LSE. In Term 1, this is Global Business Strategy (or similarly titled). In term 2, this is Global Leadership and the Business Project.
- Language courses are not included in the 30 ECTS requirement for LSE as the LSE GMiM degree does not recognise languages courses as part of your LSE degree requirements. Students can take CEMS language courses to satisfy the CEMS language requirement only.

Final considerations when choosing your classes on your term abroad:

Students are not allowed to take more than the amount stated (unless due to the weighting of each course it is inevitable that the total amount of credits goes over by slightly by one or two credits). LSE are not responsible for the course selection at the exchange schools. Some exchange schools do not offer a wide range of courses and you may find that some courses do not appeal to you. However, you will still have to abide by minimum credit rule. The GMiM Programme Office will not be held responsible for students who fail to meet the requirements listed above.

Credit transfer from host university to LSE:

The LSE term abroad does not operate on a pass/fail basis, and you will receive ONE final grade for your overall term abroad that will show as 2.0 units for MG410 in your second year.

LSE will then assign a number grade that will be used for LSE MG410, which is calculated using a weighted average of all the grades from courses taken during the exchange term.

We also take into consideration the variation in units for different courses.

Students can be awarded a 45 or 0 for failed courses depending on the nature of the fail.

Assessment: Courses equivalent to the value of 2.0 LSE units should be taken at one of the partner CEMS or MBA Exchange Institutions.

MG411

Firms and Markets

This information is for the 2020/21 session.

Teacher responsible: Prof John Sutton

Availability: This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.

Course content: A graduate course in microeconomic analysis, geared towards those parts of the subject that are of primary

importance in the Management area. The first section focuses on competition between firms, using standard game theoretic models. This leads to a general treatment of market competition by reference to the concept of firms' capabilities. The next section traces the basis of firms' capabilities to the set of elements of know-how possessed by the individuals comprising the firm, and by the mode of internal organization of those individuals. The analysis draws on the several strands in the modern literature on the theory of the firm. The final section of the course deals with the link between strategy and structure, and with the formulation of strategies in environments characterized by complexity and uncertainty.

The course syllabus covers Walrasian Equilibrium: Supply and Demand. Beyond the Walrasian model: Nash Equilibrium. Applications of Nash Equilibrium: options and bargaining. General approaches to the analysis of competition in oligopolistic markets. Applications in Industrial Organisations. The concept of capabilities. The roots of firms' capabilities: individuals and their collective know-how. The internal organization of firms. Contract theoretic approaches to the theory of the firm. The Chandlerian nexus: from strategy to structure.

Teaching: 20 hours of lectures and 20 hours of seminars in the MT. 20 hours of lectures and 20 hours of seminars in the LT.

A weekly seminar devoted to problem sets. A weekly seminar devoted to case studies.

Indicative reading: Milgrom and Roberts, Economics, Organization and Management; Sutton, Sunk Costs and Market Structure

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MG412 Half Unit Not available in 2020/21

Globalization and Strategy

This information is for the 2020/21 session.

Teacher responsible: Prof John Sutton

Availability: This course is available on the MSc in Economics and Management. This course is not available as an outside option.

Course content: The course studies the strategies of multinational corporations in an international context, with reference to make or buy, organization, and location choices. It studies current developments in the global economy with a focus on the key decisions that multinationals make in framing their global strategies:

1 Economic analysis of globalization process. Assessing the growth of Chinese and Indian manufacturing, 1990-2010. Evidence from benchmarking studies.

2 Production: What determines the strategies multinationals adopt - product range; generic strategies.

3 Location: Competitive advantage of different countries; growth in outsourcing and Offshoring; particularly emphasizing India and China and analyzing their increasing role in the global economy.

4 Organization: how multinationals combine the necessary local adaptation with the need to standardize to achieve efficiency.

5 The Globalization Debate.

6 The Prospects for sub-Saharan Africa.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students are required to make two class presentations and submit written reports on selected case studies

Indicative reading: A reading list will be provided at the start of the course.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MG417 Half Unit Extended Essay

This information is for the 2020/21 session.

Teacher responsible: Various (depending on title chosen).

Availability: This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.

Course content: Students will undertake an extended essay which should normally be based on one of the two option courses taken. Students can, with special permission, base this piece of work on one of the compulsory courses.

Teaching: A supervisor will be allocated to individual students based on the essay title chosen who will provide students with supervision for this piece of work.

Assessment: Essay (100%, 6000 words) in the ST. Extended essay of no more than 6,000 words to be submitted the week before Summer Term commences.

MG418 Half Unit Open Innovation

This information is for the 2020/21 session.

Teacher responsible: Dr Nadia Millington NAB 3.14

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in Management of Information Systems and Digital Innovation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Open innovation is a fresh take on innovation whereby a firm looks beyond its boundaries to exploit the creative power of users, communities and customers to co-develop new products, services and processes. Whether it is the fortune 500 companies that have used open innovation to transform their businesses (e.g. Procter and Gamble and IBM) or even start-ups (such as iStock Photo); Open Innovation, through tools like crowdsourcing or open sourcing is disrupting markets and altering the nature of industries.

This course is divided into 2, a lecture stream and a project stream. During the lecture stream (roughly the first 5 weeks of the course) students will:

- (1) Learn about the emergence of OI and how OI differs from other sources of external innovation.
- (2) Learn to differentiate between the different types of OI tools (Crowdsourcing, Lead Users, Innovation Intermediaries, Design intermediaries, Innomediaries, Open Source) and to choose the right OI tool for different problem sets.
- (3) Explore an emerging range of companies using open business models (e.g. Google, Facebook) in contrast to more traditional business approaches.
- (4) Learn about the challenges of implementing OI and the drivers of success, not only based on practitioner sources but also in the context of organisational behaviour, innovation and network theory. During the project stream (roughly the last 5 weeks of the course) students work on a real live OI project developing solutions via the implementation of one or more open innovation tools. These last five weeks will also involve guidance from our Innovation partners (which in the past included companies like Google, Ludic Group, KPMG, Eidos) and in the final week of the term students will present their final solution.

Teaching: 30 hours of lectures in the LT.

In addition, students will also be expected to attend

- Three 30-minute group sessions to help refine the scope of the project and develop the innovative solution
- An introduction to your project session which lasts approximately 2 hours after class. This is usually held after class in the 4th week of the semester and refreshments are provided.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be provided with a formative essay, either in week 3 or 4 of the semester and grades and comments will be provided during week 7 or 8.

Indicative reading: Chesbrough, H.W. (2003). Open Innovation: The new imperative for creating and profiting from technology. Boston: Harvard Business School Press (chapter 1-3). Brabham, D. (2008). Moving the crowd at iStockphoto: The composition of the crowd and motivations for participation in a crowdsourcing application First Monday, 13. Fredberg, T., Elmquist, M. & Ollila, S. (2008) Managing Open Innovation: Present Findings and Future Directions, Vinnova VR 2008:02. Raffi Amit, C. Zott (2012), Creating value through business model innovation, Sloan Management Review, 53 (3), 41 - 49. Tushman, M. L. and O'Reilly, C. A. (1996) 'Ambidextrous Organizations: Managing Evolutionary and Revolutionary Change', California Management Review, vol. 38, no. 4, pp. 8-30

Assessment: Essay (45%, 2000 words), group project (45%) and class participation (10%) in the LT.

MG421 Half Unit International Business Strategy and Emerging Markets

This information is for the 2020/21 session.

Teacher responsible: Prof Saul Estrin NAB4.32 and Dr Christine Cote NAB4.05

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: An undergraduate or graduate course in micro-economics or competitive strategy. Pre-requisites to be assessed by teacher responsible.

Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. It will combine the development of conceptual frameworks primarily through the lectures with the analysis of key cases in the classes. There will also be some external speakers from large international firms and from the banking and consulting community to bring contemporary views and arguments to bear. Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused on developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The "new institutional economics" has recently developed as a field to understand the impact of variation in institutions on economies' performance.

This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concept such as the resource based view. We will provide an analysis of economic performance and growth in emerging markets building on the new institutional economics and working with a large variety of data sets and sources. The course

will then turn to key topics. These will include the determinants of FDI; the effects of FDI on the host economy; entry mode choices; measures of institutional and cultural distance; and the growing importance of multinationals from emerging markets. Students will work with case material as well as the required reading, and the group project will comprise a case write up, which will be presented prior to submission in class for comment and discussion.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be required to write a 1,000 word essay and will be provided with feedback. They will also be required to present their group project in class.

Indicative reading: R. Caves, *Multinational Enterprise and Economic Analysis*, 2nd Edition, Cambridge University Press 1996; P. Ghenawet, *Redefining Global Strategy*, Harvard Business School Press, 2007; J. Williamson, *The New Institutional Economics*, *Journal of Economic Literature*, 2000; Estrin et. al., *Entry Mode in Emerging Markets*, *Strategic Management Journal*, 2009; T. Khanna and K. Palepu, *The Future of Business Groups in Emerging Markets*, *Academy of Management Journal* 2004.

Assessment: Project (40%) and class participation (10%) in the LT. Essay (50%) in the ST.

MG422 Half Unit Not available in 2020/21 Thinking Strategically

This information is for the 2020/21 session.

Teacher responsible: Prof Ignacio Palacios-Huerta NAB.5.24

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management (1 Year Programme) and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of basic algebra is necessary to take this course.

Course content: This course is concerned with strategic thinking. The course is an interaction of game theory, economics and business strategic management. The focus is the study of situations in which two or more decision-makers (e.g., individuals, firms, political parties, etc) interact in a strategic manner. Understanding strategic situations that involve conflict and/or cooperation has proven critical in many areas of economics, business, political science, sports, law and other areas. The emphasis is to provide the fundamental thinking of good strategic making in these situations, rather than a mathematical and formal analysis.

The purpose of this course is threefold: (1) first, to introduce relevant tools of game theory in order to capture the key elements of different strategic situations and determine the most likely outcome in each situation; (2) second, to study various real-life applications and case-studies where thinking strategically has proven critical; (3) third, to cover modern developments in behavioural game theory, in particular in the areas of intertemporal choices and strategies, decision-making under risk and uncertainty, and experiments in strategic interaction.

Students should note that this course will involve weekly calculations and numerical reasoning.

Teaching: 20 hours of lectures and 8 hours of seminars in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will have to complete 5-8 written assignments throughout the course, handing in 1-2 of them, and feedback will be provided.

Indicative reading: *Thinking Strategically: Competitive Edge in Business, Politics and Everyday Life*, WW Norton, 1993, by Avinash Dixit and Barry Nalebuff. *The Art of Strategy*, WW Norton, 2008, by Avinash Dixit and Barry Nalebuff. *Games of Strategy*, WW Norton, 3rd edition, 2009, by Avinash Dixit, Susan Skeath and David Reiley. *Beautiful Game Theory*, Princeton University Press, NJ, 2014, by Ignacio Palacios-Huerta. Set of academic articles and/or case studies, plus lecture notes written by instructor. Set of articles from the media.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG430 Half Unit Firms & Markets in Emerging Economies

This information is for the 2020/21 session.

Teacher responsible: Dr Rocco Macchiavello NAB.5.28

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Marketing. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course applies tools from microeconomics, industrial organisation and organisational economics to the analysis of strategy. The emphasis is on the application of these concepts to business situations, and as such the course relies heavily on the analysis of case studies.

The course is divided into two parts. The first part focuses on the external context of strategy. It first reviews basic tools for understanding industry economics and the determinants of industry-wide profitability, focusing on positional aspects. It then applies basic game theory to analyse competitive interactions when the number of players is small and the industry profitability is largely determined by these players' interactions. This tool is used to analyse issues such as bargaining power, price competition and entry and exit decisions.

The second part studies the internal content of strategy. Topics vary from year to year and include, among others, strategy in the presence of standard setting and network effects, the scope of the firm, outsourcing and supply chain organizations, corporate governance in adding value and capturing synergies, internal management practices. This part relies on the application of both game theory, principal-agent problems and the analysis of empirical academic papers.

The course is heavily based on case discussions. For each class meeting, study questions will be assigned concerning a case study. We will discuss these questions and the material in the case during the class discussions. Students will need to prepare for class discussions by reading the assigned case and analysing it in view of the assignment questions. For each case, students are expected to prepare short slide deck discussing the case and be ready, if asked, to present their slides in the classroom to lead the discussion. Required cases and supplementary readings will be available on Moodle. The textbook, together with the lectures, contains the concepts necessary to analyse the cases.

Teaching: 20 hours of lectures and 12 hours of seminars in the LT. Students on this course will have a reading week in Week 6 of LT, in line with departmental policy

Formative coursework: Students are expected to prepare for classes and actively participate in case discussions. Students will receive feedback on their class participation. Students might be asked to present during the class discussion to practice in view of the assessment. They will also be given the opportunity to discuss their preparation for the individual and group cases that count toward assessment during office hours devoted to this.

Indicative reading: A primary text will be: Saloner, G., Shepard, A. and Podolny, J. *Strategic Management*. New York, NY: John Wiley, 2001.

As mentioned above, cases and additional readings will be made available online.

Assessment: Group assignment (80%) in the ST.

Class participation (20%) in the LT.

(Class participation will be evaluated based on the quality and quantity of the student's participation in class.)

MG431 Half Unit Managerial Economics

This information is for the 2020/21 session.

Teacher responsible: Prof Ignacio Palacios-Huerta

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: A graduate-level introduction to the foundations of managerial economics. Topics include:

1. Economics as a theory of organisation.
2. Economic Agents: Rationality and the co-ordination powers of the market (Demand and supply and equilibrium: the determinants of consumers' and firms' market responses and the nature of non-strategic interaction).
3. Strategic interaction and dynamic competition.
4. Information and efficiency.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6 of MT, in line with departmental policy

Formative coursework: A problem set will be assigned and is due two weeks later. It will be marked for feedback purposes only.

Indicative reading: Main textbooks:

T van Zandt; *Firms, Price and Markets*, available online (2006); S.

Estrin et al, *Microeconomics*, Prentice Hall (2008).

Students can also consider: D M Kreps, *Microeconomics for Managers*, W. W. Norton (2004); B. Douglas Bernheim and Michael

D. Whiston, *Microeconomics*, McGraw Hill (2008).

Reading lists will be provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG434 Half Unit Organisational Behaviour

This information is for the 2020/21 session.

Teacher responsible: Dr Emma Soane NAB 4.02 and Dr Niranjana Janardhanan NAB 4.28

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: This course seeks to understand individual, team and organisational-level attributes, processes and outcomes. It does this by reviewing psychological theories, thus demonstrating the contribution of a psychological perspective to understanding behaviour at work, and by critically evaluating empirical evidence. The course will balance theory and practice by applying the theories to organisations.

Topics covered will include personality and individual differences; work motivation; rewards systems and the design of work; performance; health and well-being at work; creativity and innovation; groups and teams; leadership; power, influence and politics at work; organisational culture; organisational decision processes and risk.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures and 1 hour and 30 minutes of seminars in the ST. The teaching includes lectures and seminars. The teaching style

is highly participative. Group work in seminars is an integral part of the course and students are expected to actively contribute to all group exercises. The course requires student commitment and willingness to engage fully with the readings and with class activities.

Students on this course will have a reading week in Week 6 of LT, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: All course readings are articles from leading journals such as the *Academy of Management Journal*, *Journal of Applied Psychology*, *Journal of Organizational Behaviour*. A full reading list is provided at the start of the course.

There is no set textbook for this course, however students may wish to consult one of the following:

- Colquitt, J., LePine, J. A., & Wesson, M. J. (2012). *Organizational Behaviour: Improving Performance and Commitment in the Workplace* (3rd edition). McGraw-Hill;
- Robbins, S. P., & Judge, T. (2017). *Organizational Behavior* (17th Global Edition). Prentice Hall.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Presentation (25%) in the LT.

Students will work in groups to prepare and deliver a presentation that applies organisational behaviour concepts to a real organisation. Each group will select one specific organisation to focus on. Presentations must cover two topics from the course and must include clear application of a minimum of three relevant theories. Presentations will be evaluated on the depth of subject knowledge; the quality of theoretical application and recommendations made; and, the structure and style of the presentation, including the quality of the materials and delivery of the presentation.

MG439 Half Unit Organisational Behaviour for Master's in Management

This information is for the 2020/21 session.

Teacher responsible: Dr Shoshana Dobrow NAB 4.14

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

This course is a core course for the one year MiM.

Course content: This course is about the people side of business. Although skills in finance, accounting, marketing and operations are crucial for organisational success, the ability to manage and understand an organisation, its groups, and its individuals is equally crucial. Technical skills may help you land a job, but people skills are likely to determine whether or not you keep it, and how much you can accomplish in your career.

In this course, we will explore a variety of perspectives and theories that explain the dynamics of individual, interpersonal, group, and organisational processes. Learning about these ideas will help you develop and apply insights about human behaviour in organisational settings. The course material will be useful in planning careers, managing relationships with other people, making complex decisions, designing jobs, becoming a leader, and making sense of today's – and tomorrow's – corporate world. This course will also help you understand some of the challenges involved in both managing and being managed. Ultimately, the tools and skills developed in this course should equip you to become more effective contributors to the organisations that you join. Much of our learning in this course will be through case studies, exercises, and class discussions.

Teaching: 30 hours of lectures and 3 hours of classes in the LT.

The format of the course is highly participatory and interactive and will involve a combination of case studies, interactive exercises, discussions and readings. Students are expected to attend course

sessions and to participate actively in the discussions. Students' learning in this course is directly related to their willingness to expose their ideas and conclusions to the critical judgement of the class, and to their efforts to build on and evaluate the comments of classmates.

Full preparation for each session is essential. Students are to complete readings prior to the session for which they are assigned. Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 project and 1 other piece of coursework in the LT.

The formative assignment will be to complete a mock exam as well as a Self-Reflection Exercise. Details of the assignments will be provided during the teaching term.

Indicative reading: There is no set text for this course. The following are examples of articles that will be assigned: Harvard Business School case studies, academic journal articles, Harvard Business Review articles. Students will be given electronic access to cases, texts and articles during the teaching term.

Assessment: Final Project (40%), mid-term assessment (30%) and continuous assessment (30%) in the LT.

Final Project (40%). This is a term-long individual paper, due the final week of Lent Term, further details will be provided in the teaching term.

Mid-Term Assessment (30%). This will be a written case analysis; further details will be provided in the teaching term. This will be a timed 48-hour assessment and issued during week 7 of Lent Term. Continuous Assessment (30%). The format of the course is highly participatory and interactive, and will involve a combination of case studies, interactive exercises, discussions and readings. Details will be provided in the teaching term.

MG449 Half Unit Not available in 2020/21 Research Methods for Studies in Global Management

This information is for the 2020/21 session.

Teacher responsible: Dr Jonathan Liebenau NAB.4.20

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

This is a core course for first year Global Masters in Management students only.

Pre-requisites: None

Course content: This course will deliver the core methodological training for students completing a dissertation or extended essay for the Global MSc in Management. It covers issues of research design and research methods for management studies, including sessions on the collection and analysis of both qualitative and quantitative data. Lectures will introduce the principles of a range of research design issues and methodological approaches, while classes will contextualise this teaching in relation to management research. Drawing on a variety of examples, the course will provide the platform for students to consider a range of design options, as well as methodological techniques, to adopt in their own dissertations or extended essays. By the end of the course, students will be familiar with a range of research design options and will be better equipped to not only design, but also to collect and analyse data for, their own dissertations or extended essays.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

A formative assignment will be due at the end of the teaching term (MT) for which students will be expected to submit a 1,000 word initial proposal for their dissertation/extended essay.

Indicative reading: Wray, Alison and Mike Wallace (2006). Critical Reading and Writing for Postgraduates. London: Sage. Booth,

Wayne C., Gregory G. Colomb and Joseph Williams (2008). The Craft of Research. Chicago: University of Chicago Press. Ridley, Diana (2008). The Literature Review: A Step-by-step guide for students. London: Sage. Tharenou, Phyllis, Ross Donohue, and Brian Cooper (2007). Management Research Methods. Cambridge: Cambridge University Press. Gill, John and Phil Johnson (2010) Research Methods for Managers (3rd edition). London: Sage. Easterby-Smith, Mark, Richard Thorpe, and Paul Jackson (2012). Management Research (4th edition). London: Sage. Other readings will be provided during the course.

Assessment: Essay (100%, 3000 words) in the ST. 3000 word essay

MG452 Half Unit Not available in 2020/21 Behavioural Economics for Management

This information is for the 2020/21 session.

Teacher responsible: Dr Kristof Madarasz NAB5.36

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Graduate level Microeconomics, Game Theory or Managerial Economics, Graduate level Econometrics or Quantitative Analysis is required.

Course content: The course covers formal (mathematical) models of behavioural economics and discusses both experimental and field evidence that motivate and test various aspects of these models.

This course is a post-graduate introduction to behavioural economics and strategy. The topics to be discussed are

1. Risk Perceptions, Loss Aversion and Reference-Dependence.
2. Procrastination, Self Control and Choice over Time.
3. Social Motivation: Image, Reciprocity and Inequity.
4. Processing Information and Mistakes in Cognition
5. Naivite and Heuristics in Strategic Thinking
6. Happiness and Welfare

Teaching: 30 hours of lectures in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: A mock exam comprising of problem sets.

Indicative reading: Camerer, Colin, Linda Babcock, George Loewenstein, and Richard Thaler (1997) "Labor Supply of New York City Cabdrivers: One Day at a Time," Quarterly Journal of Economics. Fehr Ernst and Simon Gächter (2002) Fairness and Retaliation: The Economics of Reciprocity Journal of Economic Perspectives, 2000 (14): 159-181. Quarterly Journal of Economics. Laibson, David. (1997) Golden Eggs and Hyperbolic Discounting. Quarterly Journal of Economics. List, John A. 2004. "Neoclassical Theory Versus Prospect Theory: Evidence from the Marketplace," Econometrica, 72(2): 615-625. Madarasz, Kristof (2012) Information Projection: Model and Applications. Review of Economic Studies. Thaler, Richard and Shlomo Benartzi (2004). Save More Tomorrow: Using Behavioral Economics to Increase Employee Saving, Journal of Political Economy. Rabin, Matthew (2002) Inference by the Believers in the Law of Small Numbers. Quarterly Journal of Economics. Stortz, Richard. (1955) Myopia and Inconsistency in Dynamic Utility Maximization. Review of Economic Studies

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG455 Half Unit

Decisions, Biases and Nudges

This information is for the 2020/21 session.

Teacher responsible: Dr Barbara Fasolo

Availability: This course is available on the Global MSc in Management, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Marketing, MSc in Operations Research & Analytics, MSc in Risk and Finance and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit. This course is available as an outside option to students on any other programmes where regulations permit and is complementary to other behavioural courses offered at LSE, including MG456, which focuses on Decision Analysis.

Note for Exchange students: You can take this course if your programme deadlines do not conflict with the beginning of the summer term deadline for MG455 summative coursework.

Pre-requisites: It is an advantage to have had an introductory social science course in one of these fields: economics, management, psychology or sociology. It is important to be comfortable with multi-disciplinary research and group work.

Course content: This course introduces students to Behavioural Decision Science: the science that explains and predicts how humans make decisions (the decision 'process') and how well (the decision 'outcome'). The course will focus on the process, and unveil the subtle and sometimes unconscious influences played by our mind (biases) and the context in which decisions are faced: What has been chosen in the past? Is there positive or negative affect - perhaps because of risk and uncertainty? Can AI be involved? All of these (and more) are factors that often determine how information is searched before choosing, how decisions are made, and the quality of the decision made.

In the first part of the course, you will be guided to the scientific language of decisions, judgments and biases, and learn how to elaborate on behavioural science articles. In the second part of the course, you will work as a group and apply the steps of our proprietary tool 'Decision Canvas' to improve a real decision that you will select, applying different behavioural interventions – from 'process nudges' to 'debiasing' and 'choice architecture'.

The course is entirely seminar-based and balances theory, evidence and experience. It involves group-work throughout the course. We will alternate teaching with interactive activities designed to observe and feel the process of decision making from the 'inside', before reviewing behavioural decision theories and evidence from lab and field studies. Students will be able to apply the decision making skills acquired across different sectors and domains (e.g., managerial, policy, health, consumer).

The assessment is designed to give students the opportunity to work as a group and apply their new skills to support a real decision, as well as produce, individually, a rigorous and scholarly report on a specific aspect of decision making, of their interest.

Teaching: 25 hours of seminars in the LT.

Students on this course will have a reading week in line with departmental policy.

Formative coursework:

1. **Individual review** of anonymous summative assessments (Week 10). Students will play the role of the "examiner" and review the anonymous summative assessments (submitted by students from a previous year) by implementing the marking criteria which we use in this course. This exercise will help you improve your summative assessment.

2. A short and timed **group presentation** (week 11). You will give a brief group presentation of all the group-work that you have done in the second part of the course with the use of the 'Decision Canvas'. After the presentation you will receive feedback as a group. This feedback will help you prepare for the summative assessment.

Indicative reading:

- Bazerman, M. (2017) Judgment in Managerial Decision Making. New York: Wiley. 8th edition;
- Kahneman, D. (2011) Thinking Fast and Slow. London: Allen Lane;
- Russo, J. E. & Schoemaker, P. J. H. (2002) Winning decisions: How to make the right decision the first time, Piatkus Publ. Limited.
- Larrick, R.P. (2004). Debiasing (Chapter 16). In D.J. Koehler, & N. Harvey, Blackwell Handbook of Judgement and Decision Making. Malden: Blackwell Publishing

Assessment: Coursework (100%, 3000 words) in the ST. Summative (due beginning of ST): It will comprise two parts. In Part 1 (no more than 1,000 words), you will be asked to report on the decision, the bias and behavioural interventions recommended within the 'Decision Canvas' work that you did with your group. Part 2 (no more than 2,000 words) will be an essay where you will zoom in on a particular aspect of the decision process (e.g. decision frame, a judgement, a bias, a de-biasing or choice architecture technique) which you as a developing behavioural scientist have found intriguing and important (be it as a 'buddy' or as a 'decision maker'). This is done in a scholarly and rigorous manner. Part 1 will count for 25% of your mark while 75% will come from Part 2. You will be required to provide full essay-style referencing. Although the summative assignment will tackle the decision problems presented in groups, all students will write both parts of the summative assessment on their own and receive an individual mark.

PDAM skills

- self-management
- team working
- problem solving
- application of information skills
- communication

MG456 Half Unit Not available in 2020/21

Strategic Decision Making

This information is for the 2020/21 session.

Teacher responsible: Dr Shashwat Pande

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Marketing. This course is available as an outside option to students on other programmes where regulations permit. This course is complementary to any behavioural course offered at LSE.

Pre-requisites: Elementary statistical and mathematical concepts, as well as a curiosity towards the fascinating field of decision making and a strong interest in rebooting your analytical "decision-ware".

As this course embraces the two key stages of the decision making process, i.e. the initial divergent and creative stage and the subsequent convergent and analytical one, please note that it is important to feel comfortable with interdisciplinary research, as well as with the use and discussion of both qualitative and quantitative strategies for successful decisions. Group work will also be a key component of the course.

Course content: This course is about making successful strategic decisions and building decision resilience during challenging times, in both the professional domain and the personal one. In this era of unprecedented uncertainty, learning how to make decisions against the backdrop of external factors that we cannot control or predict represents a fundamental skill for any sector of society and business. Knowledge of what it takes to develop a good decision making process is thus an invaluable part of everyone's toolbox, particularly for rising stars that will be in positions of leadership in the future. It is this ability that will be developed in this course, which introduces students to the key concept of decision quality

and to cutting edge strategies and tools to integrate data and judgments and develop winning strategies.

This course's lectures will propose you a deep dive into the progressive stages of a strategic decision making process, with interactive experiments and puzzles to develop bias awareness and decision analysis expertise. Seminars will consist in interactive hands on sessions to master an actionable decision framework and become confident decision analysts. The learning outcomes of this course are twofold. First, you will discover what are the key decision traps we tend to fall into when framing, structuring and modelling decisions and why they are dangerous. Second, you will understand and master cutting edge, replicable and versatile solutions for framing, structuring, modelling and communicating better decisions.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

A reading week will take place in Week 6. There will be no teaching during this week.

Formative coursework: Students will be expected to produce 1 presentation and 1 essay in the LT.

There are two pieces of formative assignments:

1. Group project plan presentation (i.e. the selected decision context, due in week 7)
 2. Group project pitch of the key decision analysis' impacts observed as a result of the strategic decision making process developed as a group across classes 2, 3, 4, and 6. Students will present and discuss the key impacts of their decision making process (e.g. discovery of new objectives that were not in their original mental models, recommendation of a different solution to the decision as a result of the used elicitation protocols, etc.) and receive real time feedback, from both their peers and the lecturer. Feedback will be provided following specific criteria (i.e. the same criteria that will be used to evaluate the individual technical account of the group project's impacts that is summative assignment n.2) and by completing a set of both descriptive and evaluative tasks (e.g. indicating the strongest part of the presentation, as well as parts that need revision, etc.).
- The above two formative assignments have been designed to prepare the students for the following two summative works: (i) the group project presentation of the chosen decision making problem/opportunity and (ii) the individual technical account of one key impact observed in the group project.

The topic of the group project (i.e. a decision making problem or opportunity to be modelled and analysed by means of Multicriteria Analysis) can be a personal decision (e.g. which job offer to accept when confronted with multiple ones, which master to apply for, etc.) or a real world case (e.g. how to reduce plastic consumption in the LSE new coffee place). Students will have to collect data, develop and apply a quantitative model, interpret the results and refer to the key scientific literature for the main steps in the development of the model. Students are allowed to work in groups of maximum 4/5 people. This summative assignment will help students develop their strategic problem solving skills by demonstrating their ability to apply both qualitative and quantitative tools to frame, structure and model a decision, interpret its results, and develop sound recommendations. In the individual technical account of the group project's impacts (max 1500 words), students will have to report on the developed process by focusing on the observed key impacts of the used tools. This second summative assignment will help students develop their critical thinking skills

Indicative reading: Belton, V. and Stewart, T. (2002) Multiple Criteria Decision Analysis. London, Kluwer. Keeney, R.L. (1992) Value-Focused Thinking: A Path to Creative Decision-making. Cambridge: Harvard Univ. Press. HD30.23 K21 (Course Collection). G.S. Parnell et al. (2013) Handbook of Decision Analysis. Hoboken, Wiley. Spetzler C., Winter H., Meyer J. 2016. Decision quality: value creation from better business decisions. Wiley.

Assessment: Presentation (40%) in the LT.

Coursework (60%) in the ST.

Group presentation (40%) in the LT.

Technical report (60%) in the ST.

The presentation is a group project due in Week 11 of Lent Term. The other assessment is an individual technical report (1500 words maximum) which will provide an explanation and insightful discussion of one key impact observed in the developed group decision making process. The individual report is due in Week 1 of Summer Term.

MG458 Half Unit

Foundations of Management I: Organisations and Management Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Alexander Pepper NAB.4.30

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: This course is designed to equip students with a holistic understanding of the evolution of management theory and organisational forms and practices since the emergence of modern industrial organisations in the 19th century. Students will be provided with an overview of the development of management as a practice and as a subject of study, and will develop an understanding of the disciplinary anchors in Sociology, Psychology and Economics. Within each field we will cover origins, disciplinary boundaries, triggers for growth, core concepts and the current state of play and debate. Weekly topics cover:

1. Course Introduction and the Origins of Management
2. Management and the Firm
3. Taylorism, Motivation, and Performance
4. The Rise and Decline of Labour
5. The Rise of Human Resources Management
6. Decision Making
7. Understanding Organisational Structures
8. The Origins of Modern Strategy
9. Contemporary Strategic Management: Firms as Bundles of Resources
10. Financialisation and Capitalism's Crisis

Teaching: 20 hours of lectures and 15 hours of classes in the MT. Lectures will cover theoretical materials and concepts. Case discussions (classes) will apply content covered in lectures to a business situation.

Seminars will cover the assigned readings in more depth and develop critical thinking and writing skills for postgraduate study. Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Willman, P. (2014) Understanding Management: Social Science Foundations. Oxford University Press. Wallace, M and A. Wray (2012). Critical Reading and Writing for Postgraduates (Second Edition). London: Sage.

A full reading list will be provided at the beginning of the course.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Case study (25%) in the MT.

MG459 Half Unit

Foundations of Management 2

This information is for the 2020/21 session.

Teacher responsible: Dr Yally Avrahampour NAB.4.37

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: The aims of this course are to provide a basic

grounding in the management literatures covering disciplines relating to financial control and management science, and of the literatures on the evolving managerial, organisational and professional contexts within which these disciplines are practiced. Students will be provided with an overview of each discipline with the aim that they acquire a basic working knowledge of each. The course will cover origins and disciplinary boundaries, the foundations of these disciplines in the social sciences, core concepts, practical applications and current state of play and debate. Weekly topics include:

- 1: Making Business Decisions that Commit Capital
- 2: Representing a Firm's Financial Condition: 1
- 3: Representing a Firm's Financial Condition: 2
- 4: Valuing and Managing Costs
- 5: Origins of Management Science
- 6: READING WEEK
- 7: Balanced Performance Measurement
- 8: Measuring Shareholder Value
- 9: Occupations, Professions and Expertise
- 10: Individual and Institutional Investors in a Historical Context
- 11: Organisation and Management Theory

Teaching: 22 hours of lectures and 30 hours of seminars in the LT. 3 hours of lectures in the ST.

Weeks 1-11: LT: 1 two hour lecture and 1 three hour case discussion, weekly. Students on this course will have a reading week in Week 6 of LT, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will be expected to jointly produce 2 group case discussion summaries.

Indicative reading: Weeks 1-8: Berk, J. & DeMarzo, P. (2014) Corporate Finance, Weetman, P. (2019) Financial Accounting: An Introduction; Kaplan, R. & Atkinson, A. (2014) Advanced Management Accounting; Keys, P. (1994). Understanding the Process of Operational Research.

Weeks 9-11: Chandler (1990) Scale and Scope

Assessment: Essay (50%, 1500 words) in the LT.

Essay (50%, 1500 words) in the ST.

MG460 Half Unit

Emergencies Management: Humanitarian Intervention and Digital Innovation

This information is for the 2020/21 session.

Teacher responsible: Dr Shirin Madon NAB 3.36/ CON 3.09 and Mr Francesco Gualdi NAB 3.20

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Information Systems and Innovation), MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Globally, the world is dealing with an unprecedented number of humanitarian crises such as natural disasters, armed conflict, forced displacement and major disease outbreaks such as Covid-19.

The course is anchored on two main observations:

First, over the past few decades humanitarian emergencies have been increasing in number and duration with the most devastating and long-lasting socio-economic effects in countries with weak physical and institutional infrastructures. Information and communication technologies have opened up new possibilities for the mitigation, preparedness and response to disasters, but its effective use requires change in the collaboration of humanitarian

organisations and affected communities. In this course we will critically examine the potential opened by ICT innovation for managing crises.

Second, the course will connect core concepts and perspectives from humanitarian emergency literature to the unprecedented humanitarian crisis that the world is currently experiencing as a result of Covid-19 pandemic. At the global level, we will review and evaluate global networks and their value, while at the level of national economies and organisations we will study country strategies put in place to deal with the crisis. At all levels, digital innovations and technologies have become an absolute lifeline at different stages of the disaster management life cycle. As the Covid-19 crisis shows, the contribution from ICTs adoption needs to be carefully assessed in order to account for the economic, social and democratic challenges it might create.

More specifically, the course will cover the following thematic areas:

- humanitarian emergencies management and coordination structures for effective mitigation, preparedness and response
- emergency logistics and supply chain management
- ICT innovation and the development of organizational capacity for effective emergency action
- the link between episodic emergencies and long-term development in low-and-middle income countries
- managing pandemics through recent experiences

Teaching: 10 hours of lectures and 20 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will receive formative comments on both the group project and their individual essays. The formative essay is intended to help students explore available literature on the topic of their summative essay and give them feedback on how to proceed.

Assessment: Project (30%, 5000 words), essay (60%, 3000 words) and class participation (10%) in the LT.

Group Project (30%, 25-30 pages) – this will relate to aspects of crisis management during the Covid-19 crisis.

Individual essay (60%, 3000 words) – enabling students to explore available literature on a topic related to the course'

Class participation (10%)

MG463 Half Unit

CEMS Global Leadership

This information is for the 2020/21 session.

Teacher responsible: Dr Connson Locke

Availability: This course is compulsory on the CEMS Exchange. This course is not available as an outside option.

Pre-requisites: It is assumed that the students have already taken introductory Organisational Behaviour or Global Business courses. The 2nd year Global Master's in Management students are offered these prerequisites during their 1st year.

Course content: This course aims to answer the question "How internationally operating companies such as multinational companies (MNCs) build efficient and effective organisations in order to realise the company's international objectives?" The focus of the course is on cooperation and management in an international context.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 project in the LT.

Indicative reading: Luthans, F., and Doh, J. (2009). *International management: culture, strategy, and behavior*. London: McGraw-Hill Irwin. Steers, R. M., Nardon, L., and Sanchez-Runde, C. J. (2013). *Management across cultures* (2nd edition). Cambridge: Cambridge University Press. HD62.4 S81

Assessment: Project (50%) and project (40%) in the LT. Class participation (10%).

The project worth 50% will be an individual assignment, and the project worth 40% will be a group assignment.

MG464 Half Unit

CEMS Global Business Strategy

This information is for the 2020/21 session.

Teacher responsible: Dr Christine Cote NAB.4.05

Availability: This course is compulsory on the CEMS Exchange and Global MSc in Management (CEMS MiM). This course is available on the Global MSc in Management and Global MSc in Management (MBA Exchange). This course is available as an outside option to students on other programmes where regulations permit.

This course is compulsory for CEMS students, whether LSE based (for 2019/20 intake only) or visiting CEMS students.

Course content: The course examines how firms shape their international strategies in an ever-changing global environment. It will consider the context of globalisation with a focus on the relationship between international trade and investment, the emergence of global supply chains and the transformative role played by technology and innovation. It will seek to understand why and how firms internationalise as well as how they can create and sustain competitive advantage while operating across borders and in different institutional environments. Themes covered in this course will include the growing importance of emerging markets, the role of

disruptive technologies in transforming industries, exploiting firm's resources and capabilities and sustaining cross border competitive advantage through strategies of global integration or local adaptation, managing staff across borders and creating shareholder value while ensuring corporate social responsibility.

Teaching: 30 hours of lectures in the MT.

Students on this course will have a reading week in Week 6 of MT, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Baldwin, Richard., 'The Great Convergence. *Information Technology and the New Globalisation*', Harvard University Press, 2016. Dunning, John H. (2000). 'The eclectic paradigm as an envelope for economic and business theories of MNE activity'. *International Business Review*. 9: 163–190. Peng, M.W. (2003), "Institutional Transitions and Strategic Choices", *Academy of Management Review*. Rugman, A (2010) "Reconciling Internationalisation Theory and its Eclectic Paradigm" *Multinational Business Review*, 18:2. Bartlett, C. and Ghoshal, S., 'Tap Your Subsidiaries for Global Reach', *Harvard Business Review*, 1986

Assessment: Essay (40%, 2000 words), in-class assessment (40%) and class participation (20%) in the MT.

For the in-class assessment, the total mark (40%) will be comprised of one in-class group presentation.

MG465 Half Unit

Managerial Economics for Master in Management Students

This information is for the 2020/21 session.

Teacher responsible: Daniel Gottlieb

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This course is a graduate-level introduction to managerial economics with a focus on its applicability to business decisions. Students will develop a rigorous way of thinking about managerial problems, issues and decisions that managers face, as well as enabling a better understanding of the external business environment in which an organisation operates. The emphasis is on widely-used theoretical principles. Topics include an in-depth understanding of the geometric structure of the supply & demand model and its applications, the interaction of government and markets, efficiency analysis, international trade, game theory, monopoly and oligopoly strategy, price discrimination, dynamic competition, strategic moves, and information economics. This course develops tools that are the foundation of courses in Marketing, Business Strategy, and Finance, which students will take in core courses throughout the rest of the year.

Teaching: 20 hours of seminars and 9 hours of classes in the MT.

Formative coursework: Students will be expected to produce 5 problem sets in the MT.

Indicative reading: T van Zandt; *Firms, Price and Markets*, available online (2006); S. Estrin et al, *Microeconomics*, Prentice Hall (2008). D M Kreps, *Microeconomics for Managers*, W. W. Norton (2004); B. Douglas Bernheim and Michael D. Whiston, *Microeconomics*, McGraw Hill (2008).

Assessment: Exam (60%, duration: 3 hours) in the January exam period.

Class participation (15%) and in-class assessment (25%) in the MT.

MG466 Half Unit Supply Chain Management

This information is for the 2020/21 session.

Teacher responsible: Anran Li

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: None

Course content: Supply chain management is concerned with matching supply with demand. Excess supply is too costly, inadequate supply adversely impacts both current revenue and future demand. The course will cover the following key topics: supply chain inventory management, demand forecast and information sharing in supply chain, the manufacturer-retailer supply chain, centralised vs decentralised supply chains, sourcing policy and the buyer-supplier relationship, global sourcing and supplier management, supply chain network design. The course will also discuss tools for managing supply chains, re-engineering the supply chain, and the role of IT in supply chain integration.

Teaching: 18 hours of lectures and 12 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 6 exercises in the LT.

Six exercises in the last six weeks of the course.

Indicative reading:

- "Fast, Global, and Entrepreneurial: Supply Chain Management, Hong Kong Style (An interview with Victor Fung)"
- "Sorenson Research Company, Abridged," Harvard Business School, Case 9-677-257.
- The Bullwhip Effect in Supply Chains. H.L. Lee, V. Padmanabhan, & S. Whang, Sloan Management Review, Spring 1997.
- "Sport Obermeyer Ltd." Harvard Business School, Case 695022
- "Northco (A)," Harvard Business School, Case 9-697-017.
- "Barilla SpA (A)," Harvard Business School, Case 9-694-046.

Assessment: Essay (50%, 3000 words), presentation (20%), continuous assessment (20%) and class participation (10%) in the LT.

The presentation will be completed in groups of no more than three students per group.

MG467 Half Unit Not available in 2020/21 Strategy and Change in Public Sector Management

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Barzelay NAB 3.19

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Management of Information Systems and Digital Innovation. This course is available as an outside option to students on other programmes where regulations permit. This course cannot be combined with MG402 Public Management: A Design-Oriented Approach.

Pre-requisites: N/A

Course content: The course is designed to strengthen professional competences in effectuating the intent of public organizations,

public programs, and related forms of enterprise within government. In support of this aim, the course enables students to acquire – and use – professional knowledge about public organizations, especially the performance of their constitutive management functions of planning, directing, coordinating and controlling. The focus of knowledge-use is within design-projects whose role within public organizations is to generate novel mechanisms in the form of systems, plans, and performances. The use of this knowledge is accentuated through theory-based experiential learning aimed at improving the professional abilities of sense-making, designing, argumentation, and dramatization – all of which involves mechanism-intent thinking about public organizations. Further, the course teaches how to translate purposive theories of enterprise-management into useful reference points for public organizations and their design-projects; in complementary fashion, the course examines the theory and practice of conducting case studies with the aim of providing insight into how mechanisms work within situated public organizations to perform their management and other functions and, thereby, to effectuate their intent in creating public value. The teaching format includes discussion of case study analysis and design. The course also considers the past and future of public management as a design-oriented professional discipline.

Teaching: 30 hours of lectures in the LT.

It will be open to students on this course to attend a writing skills workshop in Week 6 on foundations of understanding and presenting mechanism-intent argumentation about enterprises and managing. This session does not form part of the formal teaching on the course.

Formative coursework: Students will be expected to produce 1 essay in the LT and 1 essay in the ST.

Indicative reading: M. Barzelay, Public Management as Design-Oriented Professional Discipline (2019), M Moore, Creating Public Value: Strategic Management in Government (1995); S Funnell & P Rogers, Purposeful Program Theory: Effective Use of Change and Logic Models (2011), M Barzelay & C Campbell, Preparing for the Future: Strategic Planning in the U.S. Air Force (2003); J Bryson, Strategic Planning for Public and Nonprofit Organizations (2018); E Bardach, 'The Extrapolation problem: How can we learn from the experience of others?' (2004); J van Aken, et al, Problem-Solving in Organizations (2007), J Tendler & S Freedheim, 'Trust in a rent-seeking world: Health and government transformed in northeast Brazil' (1994), P Coughlan, J Suri, & K Canales, 'Prototypes as (design) tools for behavioral and organizational change: A design-based approach to help organizations change work behaviors' (2007), and W Booth, G Colomb & J Williams, The Craft of Research (2006).

Assessment: Essay (45%, 2500 words) and case analysis (45%). Class participation (10%) in the LT.

The assessment for this course consists of the following:

A 2,500 word case analysis (45% of overall mark)

A 2,500 word individual essay (45% of overall mark)

Class participation (10% of overall mark)

MG468 Half Unit Foundations of Management III: Business Ethics, Corporate Governance and Leadership

This information is for the 2020/21 session.

Teacher responsible: Prof Alexander Pepper NAB 4.30

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

This is a second year core Global Masters in Management course and is not available to any other students.

Pre-requisites: This is a second year course for Global Masters in Management students so students on this course must have successfully completed the first year of the programme.

Course content: This is a core course for second year GMiM students. The purpose of the course is to help students to understand key ideas in business ethics, corporate governance and leadership, to prepare them for future leadership roles. Business leaders have a special role to play because of their ability to determine an organisation's mission, vision and values, how companies should be governed and led, and the ethical standards which business should aspire to.

In the first part of the module, we consider two historical approaches to the ethical responsibilities of managers. According to the shareholder approach, the interests of shareholders take priority over the interests of other stakeholders. According to the stakeholder approach, managers are morally obliged to balance competing stakeholder interests in their decision-making. We discuss how both these approaches are importantly incomplete, and how a combination of two more recent approaches, the so-called "team-production theory of company law" and "market failures approach", may provide a viable alternative.

In the second part of the module we look at corporate governance, focusing in particular on the different roles of directors, managers and the main board.

In the final part of the module we look at organisational leadership in the context of business ethics and corporate governance. We examine various models of organisational leadership, including Michael Maccoby's thesis that many business leaders today are "productive narcissists".

Our teaching encourages students to address questions such as:

- What obligations do business leaders owe to shareholders, employees, customers and other stakeholders?
- What is the difference between corporate governance and organisational management?
- What is the difference between organizational management and business leadership?
- What are the incredible pros and inevitable cons of narcissistic leadership?
- Are normative questions of "character" relevant in an organizational context?
- What constituted good ethical decision-making?

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: The formative assignment will involve the preparation of an assignment plan for a business case analysis involving issues relating to leadership, corporate governance and business ethics.

Indicative reading:

- Friedman, Milton (1970): "The Social Responsibility of Business is to Increase its Profits", New York Times Magazine, Sept. 13.
- Donaldson, Thomas; Preston, Lee E. (1995). "The Stakeholder Theory of the Corporation: Concepts, Evidence, and Implications". *Academy of Management Review*. Academy of Management. 20 (1): pp.70-
- Heath, Joseph (2014): "A Market Failures Approach to Business Ethics", in *Morality, Competition, and the Firm: The Market Failures Approach to Business Ethics*, pp. 25-41. Oxford: Oxford University Press.
- Maccoby, Michael (2000) "Narcissistic Leaders" *Harvard Business Review*. 78 (1) pp.68-77
- Goffee, Robert., & Jones, Gareth (2000) "Why Should Anyone Be Led by You". *Harvard Business Review*, 78 (5) pp. 62-70

In addition to the core readings, students will be encouraged to read more widely in:

For weeks 2-4: Heath, Joseph (2014) *Morality, Competition, and the Firm: The Market Failures Approach to Business Ethics*. Oxford: Oxford University Press.

For weeks 8-10: Maccoby, Michael (2007) *The Leaders We Need: And What Makes Us Follow*. Harvard Business Review Press.

For week 11: Moore, Geoff (2016) *Virtue at Work – Ethics for Individuals, Managers, and Organizations*. Oxford University Press, especially chapters 3 and 4.

Assessment: Assignment (75%), group exercise (15%) and other (10%).

Assessment is in three parts:

- (1) A slide deck (5 slides only) to be submitted in connection with a case study (15% of total marks, assessed on a group basis).
- (2) Speaker's notes (500 words) to be submitted in connection with the debate in Week 11 (10% of total marks, assessed on an individual basis)
- (3) A 3500 word summative assignment (75% of total marks, assessed on an individual basis).

MG469 Half Unit

Extended Essay for Management

This information is for the 2020/21 session.

Teacher responsible: Dr Jonathan Liebenau

Availability: This course is compulsory on the Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Pre-requisites: Students must have taken MG449 Research Methods for Studies in Global Management (CP-1016)

Course content: Students will undertake an extended essay which should normally be based on previously studied courses. It will not involve any primary research.

Teaching: 1 hour of lectures in the MT. 2 hours of lectures in the ST.

Formative coursework: Students will be required to submit a short outline of their proposed topic in week 8/9 of Lent term in order for a supervisor to be allocated. The supervisor will provide "light touch" supervision.

Indicative reading:

- Wray, Alison and Mike Wallace (2006). *Critical Reading and Writing for Postgraduates*. London: Sage
- Booth, Wayne C., Gregory G. Colomb and Joseph Williams (2008). *The Craft of Research*. Chicago: University of Chicago Press.
- Ridley, Diana (2008). *The Literature Review: A Step-by-step guide for students*. London: Sage.
- Tharenou, Phyllis, Ross Donohue, and Brian Cooper (2007). *Management Research Methods*. Cambridge: Cambridge University Press.
- Gill, John and Phil Johnson (2010) *Research Methods for Managers* (3rd edition). London: Sage
- Easterby-Smith, Mark, Richard Thorpe, and Paul Jackson (2012). *Management Research* (4th edition). London: Sage.

Assessment: Essay (100%, 6000 words).

MG470

Management Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Jonathan Liebenau NAB 5.14

Availability: This course is compulsory on the Global MSc in Management. This course is not available as an outside option. This is available to students on Global Masters in Management only.

Pre-requisites: Students must have taken MG449 Research Methods for Studies in Global Management and another methods course from the electives list

Course content: Dissertations are based on a research question which students are required to agree with their assigned dissertation supervisor in year two.

Research questions may be investigated by:

- (a) Framing the question via a literature review and examining the problem in more detail through a small scale empirical research project, using either primary or secondary data sources; OR
- (b) Carrying out an extended literature review to provide a rigorous analysis of existing research investigating the problem.

This course is compulsory on the Global MSc in Management. This course is not available as an outside option.

Teaching: 3 hours of lectures in the MT. 4 hours and 30 minutes of

lectures in the LT.

Formative coursework: No formative work is appropriate but students will meet regularly with advisers so will have an indication of how they are progressing.

Indicative reading:

- Wray, Alison and Mike Wallace (2006). *Critical Reading and Writing for Postgraduates*. London: Sage
- Booth, Wayne C., Gregory G. Colomb and Joseph Williams (2008). *The Craft of Research*. Chicago: University of Chicago Press.
- Ridley, Diana (2008). *The Literature Review: A Step-by-step guide for students*. London: Sage.
- Tharenou, Phyllis, Ross Donohue, and Brian Cooper (2007). *Management Research Methods*. Cambridge: Cambridge University Press.
- Gill, John and Phil Johnson (2010) *Research Methods for Managers* (3rd edition). London: Sage
- Easterby-Smith, Mark, Richard Thorpe, and Paul Jackson (2012). *Management Research* (4th edition). London: Sage.

Other readings will be provided during lectures in MT and by dissertation advisors.

Assessment: Dissertation (90%, 10000 words) in August. Essay (10%, 1000 words) in the LT.

MG472 Half Unit

Global Strategy, Management and Information Systems

This information is for the 2020/21 session.

Teacher responsible: Prof Susan Scott NAB 3.12

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: This course has a strong management focus and assumes a general knowledge of information and communication technologies. Students are expected to have a basic understanding of the challenges of implementing and managing information systems in organisations.

Course content: The objective of this core course on the MSc MISDI programme is to address how organizations formulate global strategy and manage its execution in a rapidly digitizing business world. Whether organizations operate globally, regionally or nationally they are highly dependent on digital innovations produced by information and communication technologies for fulfilling their missions. This course reviews the foundations of global business management and examines key insights about the emerging roles of ICTs and digital innovation in contemporary organizations operating internationally. To manage effectively it is important to recognize the varieties of management practices across regions and the different approaches involved in international business management. On this course we examine how the interrelationship between international strategy, digitization and global operations plays out in dynamic global, regional and national contexts. Having reviewed distinctive global business management strategies, we identify contemporary issues of critical importance for information systems management including: the importance of institutions to international digital business; decisions points in formulating robust sourcing operational sub-strategies; managing uncertainty and risk in different contexts; challenges associated with international project management; identifying the corporate social responsibilities of global digital businesses (stakeholder relations and sustainability); approaches and policies for managing privacy; the effects of information security breaches; and how to best support the development of a 'learning organization'. The course provides a strategic overview of the management of information systems and innovation. We review theoretical approaches and frameworks

used in practice and consider them alongside the academic literature on processes of internationalization, information systems strategy, and organization studies. Students studying this course will gain an understanding of how trends in strategy and operations are entangled with current processes of digitization and what these conditions of possibility mean going forward.

At the end of the course participants will be able to:

1. Understand global, business and digital issues in strategy formulation
2. Analyse business environments at competitive, country, regional and global/societal levels
3. Understand and analyse regional differences and how regional and international trade is conducted
4. Use analytical frameworks for arriving at business and digital strategy
5. Recognise and make recommendations on the strategic potential and impact of information systems and digital innovation in different organizational contexts.
6. Decide how organizations can best evolve in new markets.
7. Analyse international management issues in operational areas of human resources, marketing, logistics, sourcing, R&D, and project management
8. Apply ethical standards to issues of corporate social responsibility and sustainability
9. Understand the complexity and importance of digital security and approaches to privacy.
10. Participate in managing culture, difference, diversity, across borders.

Teaching: 10 hours of lectures and 20 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

A reading week will take place in W6. There will be no teaching on MG472 during this week.

Formative coursework: Classes are based around reading and discussing selected journal articles from the course reading list. Formative feedback is provided on class participation. A mock examination, with questions from MG472, MG481 and MG487 will be held.

Indicative reading:

- Chaffey, D., Hemphill, T. and D. Edmundson-Bird (2019). *Digital Business and E-Commerce Management*. Pearson, London, 7th edition.
- Ghemawat, P. (2017). *The Laws of Globalization and Business Applications*. Cambridge University Press : Cambridge.
- Hill, C. and Hult, G.T.M. (2020) *International Business: Competing in The Global Marketplace*. McGraw Hill, New York, 13th edition.
- Rugman, A. and Collinson, S. (2012) *International Business*. FT Prentice Hall, London. 6th edition.
- Willcocks, L. (2014/16) *Global Business Management Foundations*. Brookes Publishing, Stratford, Second/Third edition (Kindle, White Plume publishing and Steve Brookes Publishing versions)

Essential Readings to be done on a weekly basis to build up general knowledge:

- The Economist – weekly news and regular relevant special studies.
- The Financial Times – daily world commentary, regular regional/ theme special issues and archive.
- The Wall Street Journal – detailed daily world commentary.

The main journals that students may wish to search for additional articles on globalisation, business strategy, management and digital business are:

- Academy of Management Executive
- Academy of Management Review
- Strategic Management Journal
- Long Range Planning
- Journal of Management Studies
- Journal of International Business Studies
- Journal of Management
- Management Information Systems Quarterly
- Executive
- Journal of Strategic Information Systems
- Organization Science

- Management International Review
- Harvard Business Review
- Sloan Management Review
- California Management Review

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the MT.

The individual course assessment will be made based on two pieces of individual course work:

1. An in-class presentation of a key course reading. The student will be assessed on the presentation, the Powerpoint slides and a two-page summary of the reading submitted in advance of the presentation.
2. An in-class presentation of a key class case study. The student will be assessed on the presentation, the Powerpoint slides and a two-page summary of the case study submitted in advance of the presentation.

MG473 Half Unit Negotiation Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof David Marsden NAB 4.22

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course highlights the importance of power, tactics, strategy, information and trust in shaping the structure and outcomes of negotiations. It covers basic negotiation concepts such as distributive and integrative bargaining, sometimes called pie-slicing and pie-expanding approaches, two-party and multi-party negotiation, as well as more advanced issues such as the impact of culture and the psychology of judgement and decision-making. Students will engage in weekly negotiation simulation exercises to help them understand the concepts and develop their negotiating skills.

Teaching: 30 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will compile a weekly learning log reflecting on their experience in the negotiation exercises and linking that to the concepts and theories in the literature. Formative feedback is provided on class participation. Students will also complete a formative essay.

Indicative reading: The main text, covering most of the material in the course is: Leigh Thompson, *The Mind and Heart of the Negotiator*, 6th edn, Pearson, Harlow, 2014. The following are also useful: Roger Fisher and William Ury, *Getting to Yes: Negotiating Agreement Without Giving In*, Penguin Books, New York, 2012; Ken Binmore, *Game theory: A Very Short Introduction*, Oxford University Press, Oxford, 2007; and Andrew M. Colman, *Game Theory and its Application to the Social and Biological Sciences*. Routledge, Hove, 1999; Roy Lewicki et al *2020 Negotiation*. Students will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.

Assessment: Essay (75%, 2000 words) in the ST.

Learning log (25%) in the LT.

Essay (75%, 2000 words) and Learning Log (25%) in the LT.

This course utilises continuous assessment. Students are required

to complete a Learning Log for each weekly lecture / negotiation session. In Weeks 1 and 2 the logs are formative and will not count towards students' overall grade. Those for Weeks 3-11 are a required part of the course and count towards the final assessment.

Students will receive an overall mark for the learning logs based on their four highest scores. Those who submit less than four logs will receive a mark of 0 for each missed assessment. Those who fail to submit any learning logs will be deemed not to have completed the course and cannot be awarded the degree until they submit the work at resit. All marks for the Learning Logs will be scaled proportionately.

Deadlines are strictly enforced and late submissions will not be accepted.

MG475 Half Unit Organisational Theory

This information is for the 2020/21 session.

Teacher responsible: Dr Mariana Bogdanova

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Organisational Behaviour). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources) and MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Organisations exert a central force in contemporary work and society. From the rise of large, machine-like bureaucracies in the 19th century to the flat, networked firms of nowadays, different assemblages of people and technology have produced a rich ecology of organisational forms – multinationals, social enterprise and charities, R&D laboratories etc. Organisational theory examines these multifarious arrangements with respect to their internal and external environment elements and dynamics - e.g. organisational culture and identities, power and politics, inter-organisational collaboration, effect of globalisation on organisational activities etc. The course readings include a selection of classic views and more recent research on organisation theory with the aim of helping students understand organisations as entities, how they influence the life of their members, and how they affect work and society more generally.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will complete a formative assessment using a sample exam question. Details will be provided in class.

Indicative reading: Hatch, M.J., 2018. *Organization theory: Modern, symbolic, and postmodern perspectives*. Oxford University Press. Clegg, S.R., Hardy, C. and Nord, W.R., 2003. *Handbook of Organization Studies*. SAGE Publications Ltd.

Assessment: Exam (65%, duration: 2 hours) in the summer exam period.

Project (35%).

The project is composed of two parts (individual and group work) and is submitted in the MT and the LT.

MG476 Half Unit Corporate Social Responsibility and International Labour Standards

This information is for the 2020/21 session.

Teacher responsible: Prof Sarah Ashwin NAB 4.19

Availability: This course is available on the MRes/PhD in

Management (Employment Relations and Human Resources), MSc in Accounting, Organisations and Institutions, MSc in Global Politics, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Any social science background.

Course content: Corporate Social Responsibility (CSR) is becoming an expected element of corporate strategy. This course critically evaluates CSR, focusing on firms' attempts to prevent labour standards violations in their supply chains. We begin by analysing the rise of CSR, setting it in the context of global value chains, international labour standards, and emerging private forms of regulation. We then analyse topics such as: the impact of CSR on corporate financial performance; whether CSR is an effective means of raising labour standards; theories of CSR; how to embed CSR within the firm and comparative CSR. The course includes plenty of examples of how large firms are dealing with the ethical challenges posed by global supply chains. The course is interdisciplinary, and students are encouraged to bring insights from their "home" discipline so that seminars become a mutual learning experience. The course will include one lecture from a CSR professional.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Formative coursework: One 2,000 word essay in LT.

Indicative reading: Vogel, D. (2005) *The Market For Virtue: The Potential and Limits of Corporate Social Responsibility*, Washington D.C.: Brookings Institution Press. Crane, A. et al. (2008) *The Oxford Handbook of Corporate Social Responsibility*, Oxford: OUP. Locke, R. (2013) *The Promise and Limits of Private Power: Promoting Labor Standards in a Global Economy*, Cambridge: Cambridge University Press

Assessment: Essay (45%, 2000 words) and take-home assessment (50%) in the ST.
Class participation (5%).

MG477 Half Unit

Strategic Reward: Key Models and Practices

This information is for the 2020/21 session.

Teacher responsible: Dr Rebecca Campbell NAB 4.27

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will provide an analysis of the types of reward systems commonly used in private and public sector organisations, drawing on economic, psychological and sociological principles, covering all-employee reward, senior executive reward, fixed pay, short-term incentives, long-term incentives, benefits and pensions.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Students are expected to prepare for, and contribute to, the seminars. Seminars will include group work, preparing and giving presentations, case analyses, small group discussions, and self-assessment exercises. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be required to prepare a short paper (maximum 750 words) during week 7 in connection with the material covered during that week and will receive feedback on their understanding of the issues.

Indicative reading: Course text books

Perkins, S., and White, G (2008). *Employee Reward: Alternatives, Consequences and Contexts*. CIPD, London. (all editions are acceptable); White, G and Druker, J (2008) *Reward Management – a Critical Text*. Second edition. Routledge.

General reading

Gerhardt, B and Rynes, S (2000) *Compensation in Organizations, Current Research and Practice*. San Francisco, Jossey Bass.
Gomez-Mejia, L., Berrone, P., & Franco-Santos, M. (2010) *Compensation and Organizational Performance – Theory, research and Practice*. M.E. Sharpe.
Hallock, K. (2012) *Pay – Why People Earn What They Earn (and What You Can Do Now to Make More)*. Cambridge University Press.
Pepper, A. (2015) *The Economic Psychology of Incentives*. Palgrave Macmillan.
Pepper, S. (2006) *Senior Executive Reward – Key Models and Practices*. Gower Publishing.
Trevor, J. (2011) *Can Pay Be Strategic?* Palgrave Macmillan.

Assessment: Case analysis (25%) in the LT Week 9.

Case analysis (75%) in the ST Week 1.

MG478 Half Unit

The Management of Human Resources in Global Companies

This information is for the 2020/21 session.

Teacher responsible: Dr Elaine Yerby, NAB 3.26

Dr Chunyun Li, NAB 3.18

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD) and MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management). This course is available on the Global MSc in Management, Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Organisational Behaviour) and MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on the management of human resources in global corporations. The central theme in the course is the link between HR strategy and business strategy. The course involves an examination of how diverse global firms articulate and execute global HR strategies and how these strategies are reflected in a variety of HR practices such as global talent management, global performance management, global value chains and labour standards, global diversity policies, global employment relations, and the management of HR in global mergers and acquisitions. Given the limitations of empirical studies of HR practices in global corporations, the method of instruction is through the analysis of cases, supplemented by lectures and guest lectures from Global HR leaders. This is a more practical course, but informed by HR theories that students would have been exposed to in the introductory HRM course (MG480 *Management of Human Resources: Strategies and Policy*), as well as other courses. Students without the required theoretical background will be provided with supplemental readings. In the course modules, we will:

- Evaluate the strategic choices facing global corporations, including the choice between adopting highly centralized or predominantly decentralized HR policies, with regard to a range of HR issues such as performance and talent management and diversity.
- Understand HR considerations in the outsourcing and offshoring of work; and the role of HRM in managing international mergers and acquisitions.

- Analyse how institutions and culture affect the HR practices and employment relations in diverse global corporations from advanced and emerging market countries.
- Analyse the challenges faced by global corporations in structuring global assignments with specific reference to global mobility (expatriation and repatriation of global managers), and how corporations are dealing with global talent management.
- Taking a global value chain approach, examine how global firms extend their HRM/ER policies to their supply chain, and evaluate the efficacy of methods to improve labour standards and human rights in global supply chains.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. Teaching will be supplemented by guest lectures from leading industry practitioners.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: During the first week of classes, students will be instructed in the art of case analysis, and will be instructed as to what is required in case memos. The objective of the case analysis is to develop students' ability to analyse concrete company experiences in order to generate insights for both the practice of HRM in global companies and the development of new theory.

A formative take-home case analysis will be given in Week 5, which will be completed during the reading week and written feedback will be provided. This case analysis is a time-limited project that requires an analysis of the case problem, a solution to the case, and a statement of broad take-aways (anchored in either practice or theoretical literature). In particular, students should be able to articulate what are the key lessons from the case for HR theory and practice.

Indicative reading: Edward, T., and Rees, C. (2017). *International HRM, Globalisation, National Systems and Multinational companies* (3rd Ed.). Harlow, England: Pearson Education Limited. Ellet, W. (2018). *The Case Study Handbook; Revised Edition: A Student's Guide*. Boston, USA: Harvard Business Review Press. Wright, P.M and Ulrich, M, D. (2017). *A Road Well Travelled: The Past, Present and Future Journey of Strategic Human Resource Management*. *The Annual Review of Organizational Psychology and Organizational Behavior*, 2017, Volume 4, pp 45-65. Brewster, C. Mayrhofer, W. and Smale, A. (2016) *Crossing the Streams: HRM in Multinational enterprises and comparative HRM*. *Human Resource Management*. *Human Resource Review*. Vol.26 (4).

Assessment: Class participation (10%).

Case analysis (30%) and take-home assessment (60%) in the ST. For the case analysis memos, each student will be expected to provide an individual solution to the case and articulate the lessons learned from the case. The take home exam will consist of a case and a comprehensive reflective essay question.

The take home exam questions will be released to students in Week 1 of ST and will be due for submission the following week.

MG479 Half Unit

Information Systems for the Public Sector: Digital Government and Service Innovation

This information is for the 2020/21 session.

Teacher responsible: Dr Antonio Cordella NAB3.30

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Management (Information Systems and Innovation), MSc in Management (1 Year Programme), MSc in Management of

Information Systems and Digital Innovation, MSc in Strategic Communications and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Digital government and digital public sector services are the result of the widespread adoption of ICTs, Web processes and social media in public sector organisation - which cumulatively transform and may 'producize' the nature of public services delivered to citizens. This course covers the recent and likely-future major organizational and technology change processes in the government sector. Core topics include: the distinctive aspects of the public administration context for technology-enabled innovation; digital government and public sector reform; public sector ICT innovation and public value creation; the use of ICTs to streamline public services as part of wider business process changes; measuring and growing productivity via digital changes; 'digital by default' services and social media in government; and next-generation shifts to EDGE (Essentially Digital Governance).

Teaching: 20 hours of lectures, 10 hours of seminars and 4 hours of workshops in the LT.

A reading week will take place in W6. There will be no teaching during this week.

Formative coursework: Students will be expected to produce 1 essay in the LT.

One 1000-word formative essay to be submitted in week 7.

Formative feedback is also provided on class participation with seminars based around reading and discussing selected journal articles.

Indicative reading:

Assessment: Essay (100%, 5000 words) in the LT and ST.

MG480 Half Unit

Management of Human Resources: Strategies and Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Elaine Yerby, NAB 3.26

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

Course content: The course examines central issues pertinent to the theory and practice of Human Resource Management (HRM). It introduces students to a range of theoretical perspectives which underpin the ways in which organisations manage the employment relationship through the deployment of HRM strategy and policy. From a practice perspective, it reviews challenges involved in the design, implementation and evaluation of both overall HRM strategy and specific practice areas. In this respect we review HR policy and practice in the areas of recruitment and selection, job redesign, pay and rewards, training and development, employee voice and conflict, engagement, retention and attrition, performance management and appraisal, and strategic HRM.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Students are expected to read widely in the appropriate journals; a detailed reading list will be provided at the start of the course.

For students who have not formally studied Human Resource Management previously and/or would like an introduction to course fundamentals, we recommend the following textbook:

Torrington, et al. (2017). *Human Resource Management*. 10th edition.

If you already have an understanding of Human Resource Management foundations, we recommend the following textbook as it encompasses more than a fundamental text:

Boxall, P.; Purcell, J.; & Wright, P. (2008): *The Oxford Handbook of Human Resource Management*, Oxford University Press.

Additional textbooks of interest include:

J Baron & D Kreps, *Strategic Human Resources: Frameworks for General Managers*, John Wiley, New York, 1999. Boxall, P, and Purcell, J. (2016) *Strategy and human resource management*.

4th ed. Palgrave. Marsden, David (1999) *A theory of employment systems*, Oxford University Press.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (40%, 1500 words) in the LT.

MG481 Half Unit

Innovating Organisational Information Technology

This information is for the 2020/21 session.

Teacher responsible: Dr Carsten Sorensen NAB 3.11 and Dr William Venters NAB 3.13

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A basic knowledge of computing, including hardware and software. Students are expected to have a basic understanding of the challenges of implementing and managing information systems in organisations.

Course content: The course provides students with a practical and theoretical insight into the processes and practices of developing contemporary Information Systems. The course reflects the diversity of contemporary information systems contexts; discussing how we should manage the development of complex Internet enabled systems and services. The course focuses on new technologies and practices including cloud computing, Software as a Service, mobile and ubiquitous information technology, innovating customer relationship management, DevOps, mediating mutual adjustment and mass-scale mediated communities. The changing architectures of information systems towards an Internet based cloud are key themes of the course. Attention is however also given to the development of traditional ERP and information management systems which remain important in enterprises. The course also discusses the development challenges in small start-ups leveraging existing development platforms. Particular attention is given to problem structuring and problem design issues within such complex settings using Soft Systems Methodology and the Unified Modeling Language as a toolkit. Agile methods form a core part of the teaching, with Extreme Programming, Rapid Application Development and Internet-speed development contrasted with development formalism such as the Rational Unified Model and Capability Maturity Models. To ensure that students gain practical experience we include a one-week intensive "bootcamp" group Sprint project run during reading week in which outside consultants present a "real-world" case study of systems development and the groups undertake to rapidly analyse and design a proposal for a technical solution. This allows students to support their theoretical understanding with a strong practical experience of the pressures and difficulties of systems development today. The "bootcamp" group sprint project provides a realistic experience of developing systems within a consulting role and is supported by classes and question and answer session

and face to face discussion. Students gain an understanding of the benefits and difficulties of working within a small team under pressure.

Teaching: 20 hours of lectures, 5 hours of seminars and 10 hours of seminars in the MT.

8 hours of these lectures, and 5 hours of classes will occur be during the "Bootcamp" Sprint week which runs during reading week (Week 6) of MT.

Formative coursework: Students discuss articles, practice systems development techniques, and critically evaluate their success. Formative feedback is provided on class participation.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%) in the MT.

A two-hour unseen examination taken in the ST (50%). The team 'boot camp' project in Week 6 of the MT (50%).

MG482 Half Unit Innovation and Technology Management

This information is for the 2020/21 session.

Teacher responsible: Dr Jonathan Liebenau NAB.5.20

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The main focus of this course is on how innovative technologies are managed and their consequences. It includes technological innovation in areas such as telecoms, hi tech industries, pharmaceuticals, biotechnology, space technology,

financial technologies. Aspects covered are how new industries are created, how existing industries can be transformed by new technologies, linkages between technological development and the creation of wealth, and implementation success and failure of technological systems. Topics include: technology and entrepreneurship, technology strategy, R&D management, patents and intellectual property, disruptive radical and incremental innovation, technology policy. Economic, systems, managerial and sociological approaches will be compared using a variety of case studies.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Classes are based around reading and discussing selected journal articles and case studies available on or through the course Moodle site. Formative feedback is provided on class participation. In addition, students will present an essay plan in preparation for the final case-based essay, on which formative feedback will be provided.

Indicative reading: JJ Howells, *The Management of Innovation and Technology*, Sage, 2005; J Fagerberg, D.C. Mowery, and R.R. Nelson (Eds.), *The Oxford handbook of innovation* (Series Oxford Handbooks in Business and Management), Oxford University Press, 2006; D MacKenzie, *Knowing Machines: Essays on Technical Change*, MIT Press, 1998; M Bauer (Ed), *Resistance to New Technology: Nuclear Power Information Technology and Biotechnology*, CUP 1995; M Biagioli (Ed), *The Science Studies Reader*, Routledge, 1999; H Collins & T Pinch, *The Golem at Large: What you should know about technology*, Cambridge University Press, 1998; C Perrow, *Normal Accidents: living with high-risk technologies*, Basic Books, 1984; D Mowery & N Rosenberg, *Paths of Innovation: technological change in 20th century America*, Cambridge University Press, 1998;

Assessment: Essay (80%, 5000 words) in the LT. Presentation (20%) in the MT.

MG483 Half Unit eHealth: Policy, Strategy and Systems

This information is for the 2020/21 session.

Teacher responsible: Dr Elzbieta Taylor NAB3.37
Teacher known as Ela Klecun.

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Information Systems and Innovation), MSc in Health and International Development and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites. Students should have some appreciation of information management and systems implementation issues, and some understanding of healthcare systems. A short set of readings will be provided for students who require this background understanding.

Course content: This course aims to give the students theoretical and practical insights into the key issues informing policy and practice for digitalisation of healthcare. It does not teach technical design or programming skills but rather it aims to develop 'hybrid professionals' able to bridge healthcare management and information technology worlds. Hence, students from all backgrounds are welcomed.

As the result of COVID-19 pandemic healthcare is facing unprecedented challenges. Digital technologies are seen as critical in handling those. Many governments around the world are using digital channels to provide information to the public. Various apps are helping us to stay fit, to look after our mental health and to connect with health professionals. New systems have been

developed for contact tracing. More significantly perhaps, the way the mainstream healthcare services, such as primary care are delivered is being transformed, from face-to-face to online. Simulation modelling and population based management tools are increasingly utilised to better plan and manage health of populations and delivery of health services. Robotics and AI are hailed as breakthrough innovations. Many of the information technologies (IT) and service models utilized currently have existed in some form for years. Their adoption has been hindered by complex regulatory, organizational, social and technical problems. Significant challenges still remain. In this course we will explore opportunities for transforming healthcare and challenges faced in planning for, developing and adopting digital services and underlying healthcare information systems and infrastructures. The approach taken in this course to understanding those issues is informed by a socio-technical perspective that considers society (institutions, rules and regulations, work practices and people) and technology as inter-related. Both lectures and seminars are dedicated to presenting different aspects of eHealth. The seminars consist of student-led, in-depth discussions on issues related to particular topics within eHealth. The course assignments (blog post and essay) offer the students an opportunity to critically engage with their chosen topic. Topics addressed in the course include: assessing the transformative potential of digital technologies for health, the evolution and current state of information systems in primary and secondary care with international comparisons, healthcare policies for digital technologies and information infrastructures, issues of information systems implementation and use, evaluation of IT and building of an evidence base, new trends in health IT. Selected application domains discussed include: electronic health records and national information infrastructures, medicine management systems and e-prescribing, health apps, big data and data analytics, AI and robotics.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

A reading week will take place in W6. There will be no teaching during this week.

Formative coursework: Seminars are based around reading and discussing selected journal articles. Formative feedback is provided on class participation. In addition, students complete formative proposals for their blog post and essay on which written feedback is provided.

Indicative reading: Berg, M. (2004) *Health Information Management: Integrating Information Technology in Health Care Work*, Routledge, London. Christensen, C., Grossman, J.H. and Hwang, J. (2009) *The Innovator's Prescription*. McGraw-Hill, New York. Coiera, E. (2015) *Guide to Health Informatics* (Third Edition), CRC Press. Rivas, H. and Wac K. (2019) *Digital Health: Scaling Healthcare to the World*, Springer International Publishing. Taylor, P. (2006) *From Patient Data to Medical Knowledge: The Principles and Practice of Health Informatics*, BMJ Books, London. Timmermans, S. and M. Berg (2003) *The Gold Standard: The Challenge of Evidence Based Medicine and the Standardization of Health Care*, Temple University Press, Philadelphia. Topol, E. (2012) *The Creative Destruction of Medicine: How the digital revolution will create better health care*, Basic Books, New York. Topol, E. (2015) *The Patient Will See You Now: The Future of Medicine is in Your Hands*, Basic Books. Trotter, F. and Uhlman, D. (2013) *Hacking Healthcare*, O'Reilly, Sebastopol CA. Wachter R. (2016) *Using information technology to improve the NHS*, London: Department of Health. Warner, N. (2011) *A Suitable Case for Treatment: the NHS and Reform*, Grosvenor House.

Assessment: Essay (70%, 4000 words), class participation (10%) and blog post (20%) in the LT.

MG485 Half Unit Not available in 2020/21 Management and Economics of E-Business

This information is for the 2020/21 session.

Teacher responsible: Dr Antonio Cordella NAB3.30

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Management of Information Systems and Digital Innovation. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: None, but a basic understanding of information systems within organisational contexts is assumed. Students are expected to have a basic understanding of the challenges of implementing and managing information systems in organisations.

Course content: The course discusses managerial, economics and innovation aspects of online business. The foundations of e-business are introduced to discuss the managerial challenges of the different e-business practices: platform-based businesses; digital business models; infomediaion; e-marketing; and IT in supply chain management. Economic theories, such as network economics; transaction costs and pricing, are used to discuss the impact of e-business on market structure and organisation. The course introduces practical and management aspects of the impact of diverse technologies on interorganisational relationships, new organisational forms, such as networked organisations, and electronic markets. Strategies for e-business innovation including digital ecosystems and similar developments are also discussed.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. A reading week will take place in W6. There will be no teaching during this week.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Classes are based around reading and discussing selected journal articles from the course reading list and case studies. Formative feedback is provided through class presentations and a formative essay of 1000 words on which feedback will be provided.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MG486 Half Unit

Social Computing, Data Analytics, and Information Services

This information is for the 2020/21 session.

Teacher responsible: Dr Antonio Cordella

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Information Systems and Innovation), MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Media and Communications (Data and Society). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course is about the growing importance ordinary users assume in spinning the fabric of the Web and supporting the operations of social media platforms and networks. This social transformation of the Web that is often referred to as social computing is closely associated with the diffusion of potent lightweight technologies such as smart phones, tablet computers and wearables and the continuing development of advanced interactive software applications. It is also linked to architectural and other software-based innovations that help construct interoperable information systems and infrastructures. Taken together, these trends set the stage for the transition from a transaction-based Web (e.g. buying items) to a Web in which online interaction, talk and communication become the backbone activities for the production of data that are variously used by social media platforms to generate economic value. In this context, social media platforms emerge as key entities that mark the social transformation of the Web and the production of services that accommodate a great deal of stakeholders, such as platform owners, platform users and third parties such as advertisers and digital analytics companies. The course deals with the ways by which social media platforms operate as business organizations by analysing how they engineer user participation to produce a computable data footprint that is subsequently used to develop a range of data-based resources and services. The course also deals with the most relevant data analytics technique used by social media and digital platforms to deploy personalization strategies as a means of boosting user platform engagement and generating data. It covers the current and emerging approaches in data extraction and analysis, personalization and communication,

and digital experimentation, which shape the future of digital business strategy that build on big data and analytical thinking. Overall, the course takes a unique approach to social media by examining the data-work they perform -data analytics techniques- from both the managerial and technical perspective.

The course blends theories, ongoing research insights, data analytics techniques and real-life examples to analyse the social and economic implications of these significant developments.

- Explain the drives behind social computing
- Describe the technological developments and the architectural principles that govern social computing and the growing involvement of lay publics in the Web
- Link data-based practices with social systems and the digital economy
- Explain how social media platforms operate as business organisations
- Understand the formation of ecosystems and the role they play in sustaining the operations of social media platforms and the digital economy
- Describe social media as important actors in the digital economy
- Understand techniques and methods of data extraction and analysis
- Understand personalization strategies and their implications
- Understand the purpose and principle of digital experimentation
- Design digital business strategy using big data and algorithmic thinking
- Acquire critical awareness of the current digital economy and the ways it operates

Teaching: 20 hours of lectures, 10 hours of seminars and 3 hours of workshops in the LT.

There is a Reading Week in Week 6. There will be no teaching during this week.

Formative coursework: Written formative feedback is provided on the 500 words proposal for the summative essay.

Assessment: Essay (100%, 3000 words) in the LT.

MG487 Half Unit

Innovation and Information Systems: Concepts and Perspectives

This information is for the 2020/21 session.

Teacher responsible: Dr Elzbieta Taylor

Teacher known as Ela Klecun.

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Management (1 Year Programme), MSc in Media and Communications (Media and Communications Governance) and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course explores the theoretical foundations for the study of digital innovation and concomitant organizational and social change. It integrates concepts and perspectives of innovation from the field of information systems and a range of other disciplines of the social sciences. In completing this course students should be able to draw critically from existing theories in order to address issues of technology-based innovation, organizational change and information systems management. The lectures cover literature related to three broad themes: digital ecosystems; the socio-technical process of the construction of digital technologies; information technology and organizational change. For each of these themes we identify and discuss relevant theoretical concepts and perspectives. The discussion of theories is structured in terms of technical/rational and socially embedded approaches.

Teaching: 10 hours of lectures, 18 hours of seminars and 5 hours of workshops in the MT. 1 hour of lectures in the ST. A reading week will take place in W6. There will be no teaching during this week.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Seminars are based around reading and discussing selected journal articles. Workshops assist students to develop their critical literature review essay, summative essay. Formative feedback is provided on seminar and workshop participation.

In addition, students will complete a formative essay of 750 words on which feedback will be provided.

A mock examination, shared with MG472 will be held. students will be given one question to answer (max 500 words).

Indicative reading:

- Brynjolfsson E (2010), *Wired for innovation*, Cambridge, MA, The MIT Press

- Ciborra, C (1993) *Teams, Markets, and Systems: Business Innovation and Information Technology* Cambridge, Cambridge University Press.

- Willcocks, L., and Mingers, J. (2004) *Social Theory and Philosophy for Information Systems*, Chichester, Wiley.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 3000 words) in the MT.

MG488A

GMiM Capstone Course - Management in Action

This information is for the 2020/21 session.

Teacher responsible: Dr Emma Soane NAB4.02

and Dr Rebecca Newton

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: The GMiM Capstone Course builds connections between management theory and practice and equips students with the skills necessary to succeed in their managerial careers. MG488 runs throughout the Global Master's in Management's first and second years.

The MG488A programme comprises ten Capstone lectures throughout the first year. Capstone lectures run fortnightly in MT and LT, and will include sessions led by the course teachers and guest speakers from a range of organisations. Lectures will cover a range of topics such as leadership, strategy and entrepreneurship. Each lecture will contribute to the overall goal of achieving a deeper understanding of management practice in organisations. In addition to attending sessions, in the first year, each student is assigned to a group of approximately 5 students. Each group will produce a blog on one of the Capstone lecture topics. A schedule for the group blogs will be made available at the start of the first year. Each group will receive feedback on their assignment. There will also be one 30-minute session for each blog group to discuss the development of their blog with a member of the Capstone team. A schedule of blog group meetings will be made available at the start of the first year.

The remaining sessions comprise of optional one to one meetings with a member of the Capstone team from the Department of Management to discuss issues relating to Capstone lectures.

In the second year, students will attend sessions that will introduce the term's business projects. Students are also encouraged to attend at least one business project presentation by another team. Second year students apply the theoretical knowledge and business management skills gained in the first year by working on a business project. This takes place in either MT or LT and culminates in a presentation by each project team to their company sponsors, LSE faculty and student peer group. At the start of term students will be allocated to a client project team, typically comprising 5 or 6 students, supported by a sponsoring executive and a faculty coach, to carry out research on a business question posed by the client company. The actual topic is for the sponsoring organisation to decide and questions have historically been very diverse.

Students have the option of proposing companies as business project company sponsors ("self-sponsored projects") or of developing a viable business plan for an entrepreneurial idea

("entrepreneurial business projects"), although these options must be agreed in advance with the faculty member responsible for business projects to ensure their suitability.

Teaching: 7 hours and 30 minutes of lectures and 5 hours of help sessions in the MT. 7 hours and 30 minutes of lectures and 5 hours of help sessions in the LT.

GMIIM Capstone Lectures run once a fortnight throughout the Michaelmas and Lent Terms. First year students are expected to attend all sessions. Second year students may choose to attend sessions.

Additionally there is a 60 minute Q&A session in Lent Term to help students prepare for their assignments.

Students on this course will have a reading week in Week 6 of MT and week 6 of LT, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will produce an individual essay which considers the links between theory and practice. Essay titles will be made available in MT of the first year. Essays will be submitted in LT of the first year.

Indicative reading: Recommended readings will be provided for Capstone lectures when relevant.

Assessment: Essay (25%, 2000 words) in the MT.

Project (65%) and class participation (10%) in the MT and LT.

Attendance at Capstone lectures - 10% of total course marks.

Students are required to attend 10 Capstone lectures over the two years of the programme, with credits for attendance attached pro-rata to each session. Students must engage fully with session activities in order to receive attendance credit. It is recommended that students attend the 10 Capstone lectures in the first year of the programme.

Individual Summative Assignment – 25% of the total course marks. In year 2, students will write an academic essay on one of the Capstone lecture topics. Essay questions will be provided by the MG488 course team and will be made available in LT of the first year. Essays must consider application of management theory and practice. Students will submit their essays in MT of the second year.

Group Business Project - 65 % of total course marks. All business projects take place during the second year of study. Business projects are assessed on a group basis under three headings: quality of group presentation; quality of research (including application of theoretical concepts); quality of outcomes (recommendations and solutions) and other deliverables. Presentations for students working on their business projects in MT take place during LT. Presentations for students working on their business projects in the LT take place during the last week of LT.

MG488B Half Unit

GMIIM Capstone Course - Management in Action

This information is for the 2020/21 session.

Teacher responsible: Dr Emma Soane NAB.4.02, Dr Rebecca Newton and Dr Nadia Millington NAB 3.14
Dr Nadia Millington (Group Business Projects)

Availability: This course is compulsory on the Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is available on the Global MSc in Management. This course is not available as an outside option. This course is not available to Global MSc in Management (CEMS MiM) in 2020/21

Pre-requisites: Students must have completed GMIIM Capstone Course - Management in Action (MG488A).

Course content: The GMIIM Capstone Course builds connections between management theory and practice and equips students with the skills necessary to succeed in their managerial careers. MG488 runs throughout the Global Master's in Management's first and second years.

First year students are prepared for MG488B by attending MG488A sessions during the first year of the programme. The MG488A programme comprises five speaker-led sessions for each of MT and LT. The remaining sessions can be used by students to have one to one meetings with a Careers Consultant or a member of the Capstone team from the Department of Management. Second year students are welcome to attend MG488A sessions.

Second year students in MG488B apply the theoretical knowledge and business management skills gained in the first year by working on a business project. This takes place in either MT or LT and culminates in a presentation by each project team to their company sponsors, LSE faculty and student peer group. At the start of term students will be allocated to a client project team, typically comprising 5 or 6 students, supported by a sponsoring executive and a faculty coach, to carry out research on a business question posed by the client company. The actual topic is for the sponsoring organisation to decide and questions have historically been very diverse.

Students have the option of proposing companies as business project company sponsors "self-sponsored projects", this options must be agreed in advance with the faculty member responsible for business projects to ensure its suitability.

Teaching: 7 hours and 30 minutes of lectures and 5 hours of help sessions in the MT. 7 hours and 30 minutes of lectures and 5 hours of help sessions in the LT.

GMIIM Capstone Lectures run once a fortnight throughout the Michaelmas and Lent Terms. First year students are expected to attend all sessions. Second year students may choose to attend sessions.

There are two additional introductory sessions of 60-90 minutes each in early MT and LT in which the Business Projects for that term are introduced, as well as a 60 minute Q&A session on the subject of the summative essay in LT.

Students on this course will have a reading week in week 6 of MT and week 6 of LT, in line with departmental policy.

Formative coursework: The formative assessment will have been completed in the first year in line with the MG488A course guide.

Indicative reading: Recommended readings will be provided for Capstone lectures when relevant.

Assessment: Project (65%) and class participation (10%) in the MT and LT.

Essay (25%, 2000 words) in the MT.

Attendance at Capstone lectures - 10% of total course marks.

Students are required to attend 10 Capstone lectures over the two years of the programme, with credits for attendance attached pro-rata to each session. Students must engage fully with session activities in order to receive attendance credit. It is recommended that students attend the 10 Capstone lectures in the first year of the programme.

Individual Summative Assignment – 25% of the total course marks. In year 2 students will write an academic essay on one of the Capstone lecture topics. Essay questions will be provided by the MG488 course team and will be made available in LT of the first year. Essays must consider application of management theory and practice. Students will submit their essays in MT of the second year.

Group Business Project - 65 % of total course marks. All business projects take place during the second year of study. Business projects are assessed on a group basis under three headings: quality of group presentation; quality of research (including application of theoretical concepts); quality of outcomes (recommendations and solutions) and other deliverables. Presentations for students working on their business projects in MT take place during LT. Presentations for students working on their business projects in the LT take place during the last week of LT.

MG492 Half Unit**Data Governance: Privacy, Openness and Transparency**

This information is for the 2020/21 session.

Teacher responsible: Dr Edgar Whitley NAB3.32

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Media and Communications (Data and Society). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course provides a detailed consideration of the key elements of the concept of informational privacy, the open data movement and transparency. These topics lie at the intersection of diverse contemporary issues including, public sector reform, human rights, digital ecosystems and social networking, and the global and national regulation of business. The course content is international in focus, and reviews contemporary issues arising from new technologies, new policies of governments, new practices and business models in the private sector. Topics include personal privacy and identity systems; motivations for information sharing and transparency and its potential for driving beneficial change; transformations in the management of government information and processing practices; the technological and regulatory challenges faced by public sector and business; the protection of sensitive personal data including medical and financial information; data-mining in the context of national security and anti-terrorism policies; communications surveillance policies; behavioural studies of privacy attitudes and the evolution of trust and consent in online environments. The course enables students to develop their understanding of the challenges presented by new informational regimes, their regulatory development and emerging governance structures.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. A reading week will take place during Week 6. There will be no teaching during this week.

Formative coursework: Classes are based around reading and discussing selected journal articles. Formative feedback is provided on class participation. In addition, students will complete a formative essay plan on which feedback will be provided.

Indicative reading:

- Elliot, M., Mackey, E., O'Hara, K., and Tudor, C. (2016). The anonymization decision-making framework, UKAN Manchester (available at <http://ukanon.net/ukan-resources/ukan-decision-making-framework/>).
- ENISA (2015). Privacy and Data Protection by Design, (available at <http://www.enisa.europa.eu/activities/identity-and-trust/library/deliverables/privacy-and-data-protection-by-design>).
- Janssen, M., Charalabidis, Y., and Zuiderwijk, A. (2012). Benefits, Adoption Barriers and Myths of Open Data and Open Government, *Information Systems Management* 29(4), 258–268.
- Kaye, J., Whitley, E. A., Lund, D., Morrison, M., Teare, H., and Melham, K. (2014). Dynamic Consent – A Patient Interface for 21st Century Research Networks, *European Journal of Human Genetics* 23(2), 141–146.
- Murray, A. (2010). Chapter 18: Data protection, in *Information technology law: the law and society*, Oxford University Press Oxford
- Solove, D. J. (2008). Privacy: A concept in disarray, in *Understanding privacy*, Harvard University Press Cambridge, Mass., 1–11
- Whitley, E. A., Gal, U., and Kjaergaard, A. (2014). Who do you think you are? A review of the complex interplay between information systems, identification and identity, *European Journal of Information Systems* 23(1), 17–35.

Assessment: Coursework (20%, 800 words) and essay (70%, 5000 words).

Class participation (10%) in the LT.

10% class participation.

20% 800 word "blog" article that summarises the key argument of

the research essay.

70% 5000 word research essay on an approved topic

MG493**Dissertation**

This information is for the 2020/21 session.

Teacher responsible: Various

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

Course content: This course consists of an academic dissertation in which students explore a research question that is grounded in the academic literature. While students will be assigned a dissertation supervisor, the supervisor will only provide guidance as needed – students are expected to take the lead and demonstrate their ability to conduct independent research. Students can also apply for a Links project and, if accepted, will conduct research on an HR question posed by the Links sponsor. More information about Links projects will be provided in class.

Teaching: 12 hours of lectures in the MT. 4 hours of lectures in the LT.

12 hours of lectures in the MT during Weeks 1 to 4 inclusive. Lectures will explain dissertation requirements and expectations. 4 hours of lectures in LT will introduce students to quantitative and qualitative research methods. Students will be expected to work independently on preparing a dissertation proposal, to be submitted at the end of MT. Supervisors will be assigned during the first few weeks of LT.

Formative coursework: Students will work with their dissertation supervisors in order to gauge their progress.

Indicative reading: Students will be instructed on how to conduct literature searches in order to find readings relevant to their research project.

Assessment: Dissertation (100%).

MG496**Study Skills and Contemporary Topics in Information Systems and Digital Innovations**

This information is for the 2020/21 session.

Teacher responsible: Dr Stephen Smithson NAB3.31

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is not available as an outside option.

Course content: This course provides students with both a broader context for the study of information systems and digital innovation as well as the essential skills relevant to the MISDI programme.

The course will discuss the most contemporary trends in information systems and digital innovation and provide an overview of the changing nature and environment of information technology. It will include seminars by various visiting speakers from academia and industry who discuss a wide range of issues relevant to contemporary information systems. It will also offer an overview of different IS research domains and trends.

Career advice, study skills, and other practical skills will be provided.

Teaching: 20 hours of lectures in the MT.

Indicative reading: T Cornford & S Smithson, *Project Research in Information Systems*, Macmillan, 2nd edn, 2005.

Other books and journal articles will be recommended.

Assessment: The course is not formally assessed.

MG497 Half Unit

Dissertation: MSc Management and Strategy

This information is for the 2020/21 session.

Teacher responsible: Dr Jorn Rothe NAB5.01

Availability: This course is compulsory on the MSc in Management and Strategy. This course is not available as an outside option.

Course content: The dissertation consists of a research project within the subject of management. Students work on this project individually under the guidance of a dissertation advisor. The dissertation should make a contribution towards understanding a topic or question related to management based on original analysis and empirical evidence.

Teaching: There will be an introductory meeting, which will set out the requirements for the dissertation, the process, caution of plagiarism, etc. After this meeting students are welcome to approach staff with preliminary ideas in one-to-one meetings.

Formative coursework: Students will submit a preliminary proposal by the end of Michaelmas Term and will be allocated a dissertation advisor, under whose guidance they will complete a detailed project proposal by the end of Lent Term. Students work on their dissertation over the summer, with supervision available until the end of the Summer Term.

Assessment: Dissertation (100%, 6000 words) post-summer term.

MG4A1

Introduction to Studying for GMiM

This information is for the 2020/21 session.

Teacher responsible: Prof Alexander Pepper NAB 4.30

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: The course is divided into the following subject areas: Statistics, Understanding Company Accounts, Quantitative skills for Postgraduates, and Writing Skills for Postgraduates.

The Statistics course is for all students and covers basic probability and statistics; hypothesis testing; analysis of variance; association, correlation and regression.

Students in the final portion of the course can opt for one of two options: Quantitative Skills, or Writing Skills for Postgraduates.

The Quantitative portion of the course is an introductory mathematics course which covers the following topics with application reference to economics and business: Functions, Linear Equations, Natural Logarithm, Comparative Statics Analysis. The Writing Skills sessions are intended to help students who have backgrounds outside the social sciences and humanities make the transition to postgraduate work. Topics covered will include identifying and making an argument and the fundamentals of essay writing.

Teaching: Sessions will be delivered in the week prior to Michaelmas Term. There will also be some workshops and tutorial sessions for the statistics portion of the course, to support students preparing practical exercises. Rounding out the schedule is a full programme of talks and activities designed to smooth your transition to postgraduate study at LSE.

Indicative reading:

Statistics:

- Anderson, D., Sweeney, D., Williams, T., Freeman, J., Shoesmith, E. (2009). *Statistics for Business and Economics* (2nd edition), Hampshire: Cengage Learning.
- Huff (1991). *How to Lie with Statistics*. Penguin.

Quantitative Skills:

- Hammond, P. and Sydsaeter, K. (2002). *Essential Mathematics for Economic Analysis*. Prentice Hall; and Jacques, I. (2010). *Mathematics for Economics and Business*. (7th edition), Pearson.

Writing skills:

- Wallace, M. and Wray, A. (2011). *Critical Reading and Writing for Undergraduates* (2nd edition), London: Sage.

Assessment:

No formal assessment. Students will sit a mock exam at the end of the statistics course based upon the material to aid learning.

MG4A3 Half Unit

Incentives and Governance in Organisations

This information is for the 2020/21 session.

Teacher responsible: Dr Catherine Thomas

Availability: This course is compulsory on the MSc in Management and Strategy. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Marketing and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of Mathematics and Economics.

Course content: The course uses economic theory to gain insight into issues related to internal organisation, structure, and management of firms. The course will draw on various fields including management science, industrial organisation and microeconomics.

The course deals with three main topics:

- the provision of incentives in organisations;
- the use of information in markets and firms, and;
- the relationship between corporate finance and organisational decisions.

A major theme concerns the question of how to provide incentives efficiently in organisations. Other important themes include efficiency, coordination, incompleteness of contracts and the use of the market versus internal exchange. A section of the course deals with capital structure. The implications of asymmetric information are examined. Corporate governance is discussed in a principal-agent framework.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with Departmental policy.

Indicative reading:

Main texts:

- Roberts J (2004), *The Modern Firm. Organizational Design for Performance and Growth*, Oxford University Press, UK;
- Brealey, RS, Myers, and F Allen (2006), *Corporate Finance*, 8th edition (older editions are fine too);
- McGraw-Hill International Edition (US edition is titled "principles of corporate finance"; older versions by Brealey and Myers only).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4A5 Half Unit

The Analysis of Strategy A

This information is for the 2020/21 session.

Teacher responsible: Dr Kristof Madarasz NAB.5.05

Availability: This course is compulsory on the MSc in Management and Strategy. This course is not available as an outside option.

Course content: The objective of the two courses (A and B) is to provide students with a critical appreciation of behavioural economics and game theory relevant for strategic management.

These two courses will help students to understand how managers in the real world ought to read situations from an economic and strategic angle. Attention will be given to conceptual underpinnings.

The course focuses on decision making in individual and strategic settings also through the lens of behavioural economics. It is an amalgam of insights from economics, game theory, and strategic management. Some lectures will discuss key aspects of choice under uncertainty, risk perceptions, choice over time, and the social aspects of value. A powerful tool to study strategic situations is game theory. Lectures will then also be devoted to developing the basic concepts of game theory including Nash and sub-game-perfect Nash equilibrium. These issues will be deepened further in the accompanying seminars.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with Departmental policy.

Indicative reading: D Besanko, D Dranove & M Shanley, *Economics of Strategy*, John Wiley, 6th Edition.; A Dixit & B Nalebuff, *Thinking Strategically: The Competitive Edge in Business, Politics and Everyday Life*, Norton, 1998.; J Roberts, *The Modern Firm: Organizational Design for Performance and Growth*, OUP 2007; Angner, E, *Behavioural Economics*, 2nd edition, 2016.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4A6 Half Unit

The Analysis of Strategy B

This information is for the 2020/21 session.

Teacher responsible: Dr Jorn Rothe NAB5.01

Availability: This course is compulsory on the MSc in Management and Strategy. This course is not available as an outside option.

Pre-requisites: Students must have completed The Analysis of Strategy A (MG4A5).

Course content: In this course we continue, deepen and extend the analysis of strategy. The success of a firm depends on the decisions it makes, and these decisions have to take the behaviour of competitors into account who themselves try to make optimal decisions. Thus the firm faces a problem of strategic interaction, and game theory takes this interaction consistently into account. This course aims at a strategic understanding of these situations and the decisions firms face. We will study general principles of strategic thinking, the application of these principles to specific problems and general conclusions we can draw in these situations. This part of the course focuses on the strategic aspects of competing against other firms within the same industry. We start by analysing market structure and various dimensions of competition - pricing, capacity choices, research and development and advertising. We will then discuss different aspects of strategic commitment and the commitment aspects of pricing, investment and financing decisions. We then focus on the dynamic aspect of pricing rivalry, in particular collusion and price wars. We will finally discuss the incentives for innovation and market entry and exit decisions. Our approach will emphasise both the power and the limits of a game-theoretic approach. We will use simple models to clarify the logic of strategic reasoning, and case studies to illustrate the link between the analysis of strategy and managerial decision making.

Teaching: 20 hours of lectures and 8 hours of seminars in the LT. 2 hours of seminars in the ST. Students on this course will have a reading week in Week 6, in line with Departmental policy.

Indicative reading: There is no fully adequate textbook for this course.

The most important text is D Besanko, D Dranove & M Shanley and S Schaefer, *The Economics of Strategy*, John Wiley (6th edition, 2012). Among the other sources are:

L M B Cabral, *Introduction to Industrial Organization*, MIT Press (2000); P Ghemawat, *Games Businesses Play: Cases and Models*, MIT Press (1997); D M Kreps, *Game Theory and Economic Modelling*, Clarendon Press (1990); J Sutton, *Technology and Market Structure*, MIT Press (1998). A detailed reading list will be provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4A8 Half Unit

Strategy for the Information Economy

This information is for the 2020/21 session.

Teacher responsible: Dr Jorn Rothe

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic knowledge of economics.

Course content: The internet has created many new market opportunities. Web-based technology allows for new kinds of market interactions and products. Understanding the design and functioning of these new markets is central for business strategy. This course develops the relevant economic principles and applies them to the formulation of strategies for the provision of information goods and the competition between online market platforms. The first part of the course is concerned with strategic aspects of the provision of information goods (such as music, software, product reviews, search results). Topics include the pricing of information goods, versioning, switching costs lock-ins, standards and network effects, and the strategic competition in platform markets.. The second part focuses on the design and application of online auctions in market design for e-commerce, in particular Google's use of auctions in search-based advertising. The course provides a theoretical background and relates theory to various examples and case-studies.

Teaching: 10 hours of lectures and 9 hours of seminars in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

Formative coursework: Two exercise sets with a mixture of qualitative and quantitative questions.

Indicative reading: Hal R. Varian: *Intermediate Microeconomics*, W.W.Norton, 2014 (selected chapters); Carl Shapiro and Hal R. Varian: *Information Rules*, HBS Press, 1999 (selected chapters). A detailed reading list will be provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4A9 Half Unit

Foundations of Business and Management for Human Resources

This information is for the 2020/21 session.

Teacher responsible: Dr Kathryn Hartwell NAB 4.29

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

Course content: A basic grounding in the key management

disciplines for students specialising in Human Resource Management. The aim of the course is for students to acquire a general understanding of the business and managerial context in which human resource management takes place.

Course contents include management theory, theory of the firm, business strategy, accounting and finance. Successful students will become intelligent discussion partners on these subjects and critical readers of financial information and the financial press.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures and 1 hour and 30 minutes of seminars in the ST.

Students are expected to prepare for, and contribute to, the seminars. Seminars will include group work, preparing and giving presentations, case analyses, small group discussions, and self-assessment exercises. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One formative assignment of 750 words: preparation of a detailed essay plan in preparation for summative assignment.

Indicative reading: G. Pearson, *The Rise and Fall of Management*, Gower Publishing, 2009. Wren & A.G. Bedeian, *The Evolution of Management Thought*, 6th Edition, Wiley 2009. Atrill, P. & McLaney, E (2015) *Accounting & Finance for Non-Specialists*. Ninth Edition. Pearson. Boakes, K, *Reading and Understanding the Financial Times*. Second Edition. Prentice Hall, 2010. Willman, P. (2014) *Understanding Management - the Social Science Foundations*. Oxford University Press.

Assessment: Exam (50%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.
Essay (50%, 2000 words) in the LT.

MG4B1 Half Unit Corporate Strategy

This information is for the 2020/21 session.

Teacher responsible: Dr Jordi Blanes I Vidal NAB 5.18

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students will need to have some understanding of microeconomics and knowledge of basic statistical methods would be an advantage

Course content: This course is an introduction to the strategic management of modern diversified firms. It studies how the firm's portfolio of products and its internal organisation can be designed to maximise corporate performance.

The course addresses the following questions facing modern managers: what products and activities should the firm focus on? Which tasks should be subcontracted and which should be carried out inside the firm? How should the firm be organised internally in order to coordinate and motivate employees, managers and other stakeholders? How should the firm's scope and internal organisation adapt to changes in the environment?

Teaching: 30 hours of lectures in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be required to undertake the analysis of two Corporate Strategy problems which will be marked and handed back with feedback.

Indicative reading: *Corporate Strategy, Tools for Analysis and Decision-Making*, Phanish Puranam and Bart Vanneste, First Edition, Cambridge University Press, 2016.

Assessment: Take home exam (100%, duration: 48 hours) in the summer exam period.

MG4B3 Half Unit International Marketing: A Strategic Approach

This information is for the 2020/21 session.

Teacher responsible: Prof Amitav Chakravarti NAB 5.13

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Management and Strategy, MSc in Operations Research & Analytics, MSc in Social Innovation and Entrepreneurship and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of a simulated case study to develop participant's skills at analysing and making sense of complex real world business situations.

Teaching: 30 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

Indicative reading:

- Baker, M. J. and Saren, M. (eds.) (2014) *Marketing theory: a student text*. SAGE Publications Ltd. (2nd Edition).
- Alex Chernev (2011), *Strategic Marketing Management* (6th edition), Cerebellum Press
- Philip Kotler and Gary Armstrong (2001), *Principles of Marketing* (9th edition), Prentice Hall
- Philip Kotler and Kevin Keller (2011), *Marketing Management* (14th edition), Pearson PrenticeHall
- Homburg, C., Kuester, S. and Krohmer, H. (2009), *Marketing Management: A Contemporary Perspective*, McGrawHill
- Jobber, D. (2010), *Principles and Practice of Marketing* (6th edition), McGrawHill
- Lambin, J-J, Chumpitaz, R. & Schuiling, I. (2007), *Market-driven management: Strategic and operational marketing* (2nd edition). London: Palgrave Macmillan

Further references will be provided at the commencement of the course.

Assessment: Take-home assessment (50%), group project (40%) and class participation (10%) in the MT.

The group project is a non-assessed presentation and an assessed project report of 2,500 word max.

The take-home assessment is an individual assignment.

MG4B6 Half Unit Design and Management of Organisations

This information is for the 2020/21 session.

Teacher responsible: Prof Yona Rubinstein NAB 5.31

Availability: This course is compulsory on the MSc in Management and Strategy. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: In this course we investigate aspects of management and the internal organisation of the firm from birth to end.

What makes a successful entrepreneur? Are managers subject to human biases in decision making?

Our starting point is that entrepreneurs and managers are human. We neglect neither general heuristics nor biases exhibited by individuals and groups and their impact on firms' performance. We further recognise that they make decisions in situations in which information is not perfect and not symmetrically shared, neither internally with their employees nor externally. We also consider the capabilities of organisations to design management strategies to cope with that.

How can firms attract and select the 'right' employees? Can pay and promotions be structured to screen the best workers and extract their efforts? Should firms develop employees' talent and if so, how? Why do firms from teams and how these are used most effectively? Do experts follow the crowd? Why they turn to be "yes-men"? Can pay incentives be structured to motivate experts to share their private knowledge?

Design and Management of Organisations introduces students to a set of conceptual tools to cope with these key managerial challenges and critically evaluate contemporary management approaches.

The organising principle of much of the content of the course has its conceptual origins in economic strategy and behavioral economics applied to issues that are relevant to management. Additionally we draw upon findings from psychology and sociology. The course complements MG4A3 (Incentives and Governance in Organisations) but can be taken as a stand-alone course.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Students on this course will have a reading week in Week 6, in line with Departmental policy.

Formative coursework: Students will be expected to produce 1 problem sets in the LT.

Multiple exercises will be provided throughout the term and will be discussed during lectures and review sessions. In addition a major problem set will be circulated at the end of the week 5. This problem set will be discussed in class for feedback purposes only.

Indicative reading: The first set of slides will be provided during lecture 1 and subsequent sets will be posted online. These slides constitute the backbone of the course. You are expected to flesh out the slides using models, graphs, and examples discussed during the lectures.

Additional readings:

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4B7 Half Unit Not available in 2020/21 Organisational Change

This information is for the 2020/21 session.

Teacher responsible: Prof Jacqueline Coyle-Shapiro

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Development Management, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course adopts a psychological framework to explore the content, process and outcomes of organisational change. The aim of the course is to provide students with different psychological theories to understand the process and consequences of organisational change and in doing so addresses the following issues: type of organisational change, creating readiness for organisational change and leading change, the change agent, strategies for change, resistance to change and evaluation of and institutionalization of organisational change. Models and frameworks for analyzing and diagnosing change; the role of the change agent, leading change from the top, bottom up change specific interventions; strategies of change; a justice perspective on organisational change; understanding recipients reactions to change; theory and methods of evaluation of organisational change and reinforcing change interventions.

Teaching: 21 hours of lectures and 12 hours of seminars in the LT. 5 hours of lectures and 1 hour and 30 minutes of seminars in the ST.

The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and students are expected to actively contribute to their syndicate group throughout the year. The course is demanding of students and depends partly upon commitment and willingness to participate fully. The course is taught in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will take part in a mock exam in the LT.

Indicative reading: The course relies heavily on journal articles (for example, *Academy of Management Journal*, *Journal of Applied Psychology*, *Journal of Organizational Behaviour*, and *Journal of Applied Behavioural Science*) and the use of case studies. The following book is also useful: Oreg, S., Michel, A., & By, T. B., (Eds.) (2013), *The psychology of organizational change: Viewing change from the employee's perspective*, Cambridge University Press.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4B8 Half Unit Not available in 2020/21 Evolutionary Psychology and Management

This information is for the 2020/21 session.

Teacher responsible: Dr Satoshi Kanazawa NAB5.33

Availability: This course is available on the MSc in Management and Strategy. This course is available as an outside option to

students on other programmes where regulations permit.

Course content: Principles of evolutionary psychology. The nature and limitations of the human brain as an evolved and adapted organ. Evolutionary origins of cognitive biases, and their effects on organisational behaviour. Sex differences in organisational behaviour. The importance of physical attractiveness and general intelligence in organisational behaviour. "Discrimination" in labour market. Evolutionary psychological perspectives on cooperation, reciprocity, altruism, hierarchy, and leadership in modern corporations. Evolutionary origins of organisationally relevant emotions such as envy, spite, and positional bias. This course introduces the evolutionary psychological perspective on business and management. The emerging science of evolutionary psychology sheds entirely new light on, and offers different solutions to, old problems of management, such as glass ceiling, occupational sex segregation, sexual harassment and suboptimal decision making, and points to new potential problems.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: One class presentation and one essay based on the class presentation.

Indicative reading: Browne, Kingsley R. 2002. *Biology at Work: Rethinking Sexual Equality*, New Brunswick: Rutgers University Press; Kanazawa, Satoshi. 2012. *The Intelligence Paradox: Why the Intelligent Choice Isn't Always the Smart One*. Pinker, Susan. 2008. *The Sexual Paradox: Troubled Boys, Gifted Girls and the Real Difference Between the Sexes*.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4B9 Half Unit

The World Trading System

This information is for the 2020/21 session.

Teacher responsible: Dr Veronica Rappoport NAB 5.29

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Economics and Management, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic Knowledge of Mathematics and Economics

Course content: The course studies a key component of the "globalization" process: the negotiation, implementation and implications of international trade agreements (ITAs). These include the World Trade Organisation and the fast-growing web of regional trade agreements. We analyse the challenges and opportunities faced by companies engaged in the global economy in this context. The course relies on recent theoretical and empirical research to gain insight into the motivations for ITAs and their consequences for consumers and firms. Globalisation - trends in the international economy and overview of their causes and effects. The sources of international trade. Trade barriers - restrictions to international trade and their consequences. The economics and politics of international trade agreements. The rules, accomplishments and shortcomings of the GATT/WTO system. Regional trade agreements - motivation, implications, and recent trends. The costs and benefits from exporting for individual firms. Challenges and opportunities for national and multinational firms in the global economy.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line

with departmental policy.

Formative coursework: In-class exercises.

Indicative reading:

- Robert Feenstra and Alan Taylor, *International Economics*, Worth Publishers, 2008.
- Kyle Bagwell and Robert W. Staiger, "The Economics of the World Trading System," MIT Press, 2004.
- The World Trade Organisation, "The WTO and preferential trade agreements: From co-existence to coherence," World Trade Report, 2011.
- Bernard M. Hoekman, Aaditya Mattoo, Philip English (editors), "Development, Trade, and the WTO: A Handbook," World Bank, 2002.
- Andrew Bernard, J. Bradford Jensen, Stephen Redding and Peter Schott, *Firms in International Trade*, *Journal of Economic Perspectives* 21(3), 105-130, 2007.

Assessment: Class participation (10%), group assignment (40%) and in-class assessment (50%) in the MT.

The assessment consists of Group assignments (40%), class participation (10%) and an in-class exam during the last week of the term (50%).

MG4C2 Half Unit

Organisational Behaviour

This information is for the 2020/21 session.

Teacher responsible: Dr Hyun-Jung Lee NAB 4.15

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available on the CEMS Exchange, MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Organisational Behaviour), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Marketing and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available in the Michaelmas Term only.

Course content: This course seeks to understand individual attitudes and behaviour in an organisational context. Specifically, we primarily take a psychological perspective to understanding human behaviour at work by reviewing psychological theories as they apply to organisations and critically evaluating the associated empirical evidence.

Key topics include: personality and individual differences, work motivation, decision-making, power, leadership, group processes and organisational culture.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures and 1 hour and 30 minutes of seminars in the ST.

The teaching is highly participative and includes lectures and seminars. The course is demanding of students and its success depends partly upon student commitment and willingness to participate fully.

Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: The course relies heavily on journal articles (from, for example, *Academy of Management Journal*, *Journal of Applied Psychology*, *Journal of Organizational Behavior*). An extensive reading list is provided at the start of the course. No

suitable textbook exists but students may wish to consult one of the following: Kolb, D. A., Osland, J. S., & Rubin, I. M. (2007). *The Organizational Behavior Reader* (8th ed.). Pearson. Porter, L. W., Bigley, G. A., & Steers, R. M. (2002). *Motivation and work behavior* (7th ed.). McGraw-Hill. Staw, B. M. (2004). *Psychological dimensions of organizational behavior* (3rd ed.). Prentice-Hall.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4C3 Half Unit Information Technology and Service Innovation

This information is for the 2020/21 session.

Teacher responsible: Dr Carsten Sorensen

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MRes/PhD in Management (Information Systems and Innovation), MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is limited to 60 students.

Course content: The course aims to give the students theoretical and practical insights into the key issues informing the design of contemporary digital technology (IT). The course relates the diversity of the design challenges facing contemporary IT development. It embraces the shifting conditions for small teams of developers to design significant services in the context of technology-based startups, or as part of entrepreneurship within an existing enterprise or public institution. The design challenges relate to constantly shifting possibilities, for example, for the capture and processing of digital data previously beyond reach, the ability to leverage existing boundary resources (APIs, SDKs etc), and the expanding possibilities for reaching end-users in new ways. The course is constructed as the meeting of theory and practice. The former is constituted by the presentation and discussion of theoretical themes aimed at sharpening the student's ability to reason fundamentally about contemporary design challenges and opportunities. This aspect is also examined through an individual essay. The practical design skills are primarily honed through a group design project running throughout the course. Conducting this group design project will engage students in highly detailed and constructive design discussions leading to the submission of a designed IT artifact. The practical design skills sought practiced in the course are related to but largely independent from skills solely aimed at setting and analysing requirements on the one hand, and expressing the design through programming, on the other. The course, therefore neither requires, nor teaches detailed programming techniques, but instead focuses on teaching design skills through practices and to sensitise these design skills through the discussion of pertinent theoretical themes. These themes take their outset in the increasing complexity of designing IT artifacts as the granularity of technology and data capture is decreasing to enable increasing tracking of more and more granular aspects of human activities. These relate to a variety of personal-, local-, and global communications infrastructures, as well as a variety of possible multi-sided platforms, and software middleware layers enabling rapid prototyping of complex designs. Topics addressed will be: Digital infrastructure innovation; Digital platform strategies; Designing technology affordance diversity; Understanding technology performances; Individual interaction intimacy; Amplified teams; The technological organisation; Global crowd innovation with IT; Global technology innovation tussles; Business innovation with information technology; and decentralised consensus arrangements through blockchains and cryptoassets. The weekly seminars will consist of presentations

and discussions offering students opportunity to critically reflect on theoretical and pragmatic issues related to the subject matter of the course, such as; the IT artifact and ecosystem, the role of IT in business innovation, understanding the paradoxes of technology performances, intimate technology experiences, IT mediated team-working, the IT-enabled organisation, innovating global IT mediated crowds, innovation as organisational tussles, and the role of IT-based innovation for business development.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. A reading week will take place in W6. There will be no teaching during this week.

Formative coursework: Classes are based around both the design group projects, as well as reading and discussing selected journal articles. Formative feedback is provided on class participation.

Indicative reading:

Assessment: Project (70%) and essay (30%, 1500 words).

The course has two summative elements: an individual theoretical essay (30%), and from the group design project, a technical report (50%) and a separate submission of an individual essay reflecting

on the group work and on group participation (20%), which jointly comprise one summative component (70%).

MG4D2 Half Unit

International Employment Relations

This information is for the 2020/21 session.

Teacher responsible: Dr Frido Wenten, NAB 4.04

Availability: This course is compulsory on the MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management). This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources) and MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A general knowledge of the social sciences is required.

Course content: The course aims to provide an introduction to the comparative analysis of work and employment relations at national, firm and workplace level throughout the world. It will introduce the dynamics of employment relations across the increasingly global markets, the key concepts and topics surrounding it (such as employee voice, dignity of work, outsourcing, labour conflicts, labour productivity, skills), and the theories required to understand it. The strategies and policies of the main actors will be explored through cross-national comparative analysis. The course will also introduce the main 'models' of employment relations: the US/British, Japanese and European Social Models, as well as models of employment relations in the transitional economies.

The course ensures that students have both the conceptual and empirical grounding they need to take the options offered in international comparative human resource management and cross-cultural management.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and students are expected to actively contribute to their class groups. The course is demanding of students, and depends for its success partly upon, their commitment and willingness to participate fully. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to submit an essay outline in Week 4, matching the topic of their first summative essay.

Indicative reading: C Frege & J Kelly (Eds) *Comparative Employment Relations in the Global Economy*, Routledge, 2013; G Bamber, R Lansbury & N Wailes (Eds), *International and Comparative Employment Relations*, 5th edn, Sage, 2011; R Hyman, *Understanding European Trade Unionism: Between Market, Class and Society*, Sage, 2001; M J Morley, P Gunnigle & DG Collings (Eds), *Global Industrial Relations*, Routledge, 2006.

Assessment: Essay (40%, 2500 words) in the MT.

Essay (50%, 2500 words) in the LT.

Class participation (10%).

and Human Resources), MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Introductory OB course required. MG4C2, MG434, MG105, or equivalent course in another institution. Students will be required to write a paragraph about their motivation for taking this course.

Course content: In this seminar, students will learn about a variety of topics related to the dark side of the organisation, (e.g. workplace aggression, retaliation, discrimination, substance abuse, corporate corruption, extreme stakeholder responses to organisations, and the dark side of impression management/emotional intelligence). In organisational behaviour courses, topics generally cover the 'light side' of the organisation and often explore how employee motivation and behaviour can promote beneficial outcomes for the organisation, as well as investigate the precursors to these more positive behaviours. However, not all workplace behaviours and outcomes are beneficial and positive for employees and their organisations. Dark side behaviours typically lead to negative outcomes. Those who engage in these negative behaviours generally are aware that their actions can cause harm to others, their employer, and/or to them; hence, the instigator usually has intent. It is imperative that we more fully understand these behaviours and their antecedents and consequences so that we can identify these behaviours, as well as control, prevent, mitigate, or ameliorate their occurrences.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Anand, V, Ashforth, B. E., & Joshi, M. 2005. Business as usual: The acceptance and perpetuation of corruption in organizations. *Academy of Management Executive*, 19, 9-23. gay and lesbian employees. *Journal of Applied Psychology*, 86, 1244-1261. Vaughan, D. 1999. The dark side of organizations: Mistake, misconduct, and disaster. *Annual Review of Sociology*, 25, 271-305.

Assessment: Essay (40%, 1500 words) and video (20%) in the ST. Class participation (20%) and group presentation (20%) in the LT. The video assessment submitted by students in ST consists of a take-home video presentation.

MG4D4 Half Unit

Cross Cultural Management

This information is for the 2020/21 session.

Teacher responsible: Dr Hyun-Jung Lee NAB 4.15

Availability: This course is available on the MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some background in psychology and organisational behaviour, and/or international business is useful, but not required.

Course content: The ability to communicate cross-culturally and to understand the diverse perspectives of people from different cultures is a necessity in order to achieve a competitive advantage in the global economy. The aims of the course are to understand the impact of culture on management; to identify the areas in which cultural differences pose challenges as well as opportunities in managing people across cultures; and, to become more self-aware of our cultural conditioning, individual biases and assumptions. Topics include i) understanding my own and others' cultural conditioning, ii) analytical frameworks of cross-cultural comparisons, iii) multicultural teams, iv) managing global organisations, v) ethical dilemmas and global responsibility of multinational corporations, vi) cross-cultural communication and negotiation, vii) global leadership and cultural intelligence, viii) international assignments and global careers.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. Experiential learning is emphasised and team working is an integral part of the course. The teaching is highly participative. Students will be asked to make presentations and participate in various class exercises including role playing. The course is demanding of students and success depends partly upon student commitment and willingness to participate fully. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: The following reading list contains some easily accessible introductory discussions. Most of the course reading is taken from journals. A full reading list will be issued at the start of the course. B. Gehrke and M-T. Claes (eds.) (2014), *Global leadership practices: A cross cultural management perspective*, Palgrave Macmillan. R. Steers et al. (2016), *Management across cultures*, Cambridge University Press; R Nisbett (2003), *The geography of thought*, Nicholas Brealey Publishing

Assessment: Essay (50%), project (40%) and class participation (10%).

The essay is completed individually, and the project is completed as part of a group.

MG4D5 Half Unit

Leadership in Organisations: Theory and Practice

This information is for the 2020/21 session.

Teacher responsible: Professor Connson Locke, NAB 4.16

Availability: This course is available on the Global MSc in Management, Global MSc in Management (MBA Exchange), MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Accounting and Finance, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Marketing and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to Department of Management students

Course content: This course is designed to provide students with the knowledge, skills and analytical capabilities needed to exercise leadership in organisations. It explores several facets of leadership and considers how leadership develops. The emphasis will be on application of theory and comparing and contrasting different approaches to leadership.

The course examines topics such as: leadership and management; trait, behavioural and contingency theories of leadership; individual differences in leadership; leadership development; transformational and transactional forms of leadership; and issues of gender and culture.

Teaching: 25 hours of seminars in the LT.

Each 2.5 hour session will include a combination of lecture and seminar work. Students are expected to prepare for and contribute to each session. Seminar work will include case analyses and small group discussions.

Dedicated office hours will be available to students in ST to support revision for the final exam.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will complete in-class case discussions which will prepare them for the case-analysis summative assessments

Indicative reading: A full reading list will be provided at the beginning of the term. There is no required text. Indicative readings include: Antonakis, J., Cianciolo, A.T., & Sternberg, R.J. (2004) *Leadership: Past, Present and Future* (Chapter 1). In Antonakis, J., Cianciolo, A.T. & Sternberg, R.J. (Eds.) *The Nature of Leadership*, pp. 3-15. London: Sage Publications. George, J. M. (2000). Judge, T., Bono, J., Ilies, R., & Gerhardt, M. (2002). *Personality and leadership: A qualitative and quantitative review*. *Journal of Applied Psychology*, 87(4), 765-780.

Assessment: Case analysis (20%) in the LT.

Case analysis (80%) in the ST.

MG4D7 Half Unit

Dissertation: MSc MISDI

This information is for the 2020/21 session.

Teacher responsible: All members involved with MSc MISDI are involved in dissertation support.

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is not available as an outside option.

Course content: The aim of the dissertation is for students to pursue an independent piece of research within the field of information systems. The dissertation is a quantitative or

qualitative, theoretically informed, piece of research of IS-related questions. Students must obtain the approval of their advisor before embarking on any research. The course MG496 Study Skills and Contemporary Topics in Information Systems and Digital Innovations and the course MY401 on research design provide guidance and background material on undertaking dissertation work.

Arrangements for supervision: Advisors will normally be allocated according to student dissertation proposals. The dissertation advisor will help the student identify an appropriate research question, and to work out a plan for a literature informed empirical study.

Teaching: Two courses prepare students for the dissertation: MY401 Research Design for Studies in Digital Innovation and MG496: Study Skills and Research Methods. Students must follow both of these courses.

Formative coursework: Students will use the feedback to the summative essay of the MY401 course as a starting point for their dissertation research. They will also present their research topic and research design at a workshop in mid-June and get feedback from fellow students and faculty.

Assessment: Dissertation (100%, 8000 words) post-summer term. Two paper copies of the dissertation must be handed in on a specified date in late August. An electronic version of the dissertation must also be submitted. Penalties will be applied to any late submission. The word limit for the dissertation is 8000 words. The dissertation is critical to assessment on the programme.

MG4E2 Half Unit Marketing Management

This information is for the 2020/21 session.

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange) and MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of case studies to develop participant's skills at analysing and making sense of complex real world business situations.

Teaching: 30 hours of seminars in the MT. 2 hours of seminars in the ST.

Course instruction will be conducted using lectures, case discussions, readings, and analysis of data.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

The formative will be undertaken by students in teams. The formative will comprise the plans that teams have formulated for the summative project together with their rationale. As a result the formative will provide a foundation for the summative project and also help students practice the use of marketing theory, a skill that will be very useful for the exam.

Indicative reading: Alex Chernev (2018), *Strategic Marketing Management* (9th edition), Cerebellum Press. Philip Kotler and Gary Armstrong (2017), *Principles of Marketing* (17th edition),

Further references, especially for journal articles and case studies, will be provided at the commencement of the course.

Assessment: Exam (45%, duration: 3 hours) in the summer exam period.

Project (45%) in the MT.

Class participation (10%).

MG4E7 Business Fundamentals

This information is for the 2020/21 session.

Teacher responsible: Prof Amitav Chakravarti NAB 5.13 and Prof Om Narasimhan NAB 5.06

Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option. This is a non-assessed introductory course.

Course content: The aim of the introductory Core is to deliver some critical business prerequisites to incoming MSc Marketing students. Broadly, there will be four kinds of course materials covered during this one week: (1) Some modules are intended to strengthen participants' analytical skills. These modules comprise sessions on microeconomics/business economics that enables participants to analyze firms and markets in more depth, and sessions that impart basic knowledge in analytics/statistics that is becoming absolutely essential in the current age of Big Data; (2) Some other modules will expose participants to the fundamentals of other functional areas like Accounting, Finance, & Controls, Leadership, Organizational Behavior, and Team Building; (3) Some modules will look deeper into one of the fundamental skills that marketing managers try to hone—understanding and eliciting consumer insights; and finally, (4) The remaining modules will assist in career planning, coaching for marketing problem solving (e.g., as is common in consulting and/or case study-based interviews), with a broad understanding of the numerous options for internships, employment, companies, functions, and roles.

Teaching: 10 hours of teaching over one week prior to the Michaelmas Term. Full details of this will be sent to offer holders as part of their offer pack. The schedule will also include a full programme of activities and talks designed to welcome you to the LSE and the MSc Marketing programme.

Formative coursework: No formal assessment.

Indicative reading: Statistics: Anderson, D., Sweeney, D., Williams, T., Freeman, J., Shoemith, E. (2009). *Statistics for Business and Economics* (2nd edition), Hampshire: Cengage Learning. Huff (1991). *How to Lie with Statistics*. Penguin. Accounting: Boakes, K. (2010). *Reading and Understanding the Financial Times*. (2nd edition), Harlow: FR Prentice Hall; and Parker, R. (2007). *Understanding Company Financial Statements*. (6th edition), London: Penguin. Quantitative Skills: Hammond, P. and Sydsaeter, K. (2002). *Essential Mathematics for Economic Analysis*. Prentice Hall; and Jacques, I. (2010). *Mathematics for Economics and Business*. (7th edition), Pearson. Writing skills:

Wallace, M. and Wray, A. (2011). *Critical Reading and Writing for Undergraduates* (2nd edition), London: Sage.

Assessment: No formal assessment.

MG4E8 Half Unit

Principles of Marketing

This information is for the 2020/21 session.

Teacher responsible: Prof Amitav Chakravarti NAB 5.13

Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.

Pre-requisites: Completion of the MSc in Marketing pre-session course, MG4E7 Business Fundamentals.

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of case studies and data analysis to develop participant's skills at analysing and making sense of complex real world business situations.

Teaching: 30 hours of lectures in the MT.

Indicative reading:

- Alex Chernev (2011), *Strategic Marketing Management* (6th edition), Cerebellum Press
- Philip Kotler and Gary Armstrong (2001), *Principles of Marketing* (9th edition), Prentice Hall
- Philip Kotler and Kevin Keller (2011), *Marketing Management* (14th edition), Pearson PrenticeHall
- Homburg, C., Kuester, S. and Krohmer, H. (2009), *Marketing Management: A Contemporary Perspective*, McGrawHill
- Jobber, D. (2010), *Principles and Practice of Marketing* (6th edition), McGrawHill
- Lambin, J-J, Chumpitaz, R. & Schuiling, I. (2007), *Market-driven management: Strategic and operational marketing* (2nd edition). London: Palgrave Macmillan

Further references, especially for journal articles and HBS case studies, will be provided at the commencement of the course.

Assessment: Coursework (50%), project (40%) and class participation (10%) in the MT.

Group Project (40%) - a non-assessed presentation and an assessed project report 2,500 word max

Individual take home assignment (50%)

Class participation (10%)

MG4E9 Half Unit

Marketing Analytics I: Consumer Analysis Fundamentals

This information is for the 2020/21 session.

Teacher responsible: Dr Xiaolin Li

Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.

Course content: This course lays down the foundations of Marketing Analytics which is an absolute essential in the age of Big Data. The broad objective of this course is to provide a fundamental understanding of marketing analytics and research

methods employed by well-managed firms. The course focuses on integrating problem formulation, research design, questionnaire construction, sampling, data collection and data analysis to yield the most valuable information. The course also examines the proper use of statistical applications as well as qualitative methods, with an emphasis on the interpretation and use of results. Since analytics is the discovery and communication of meaningful patterns in data, this course will also provide students with an analytics toolkit, reinforcing basic probability and statistics while throughout emphasizing the value and pitfalls of reasoning with data. Applications will focus on connections among analytical tools, data, and business decision-making. Advanced analytical tools will be discussed in-depth in the follow-up course Marketing Analytics II.

Teaching: 30 hours of lectures in the MT.

Formative coursework: Students will be engaged in analysing a number of cases, doing numerical problems, as well as analysis data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve numerical problems, case analysis, and analysing data sets).

Indicative reading:

- Churchill, Gilbert A. Jr., and Dawn Iacobucci. *Marketing Research: Methodological Foundations*. 8th ed. Chicago: The Dryden Press, 2002.
- Lehmann, Donald, *Market Research and Analysis*, Homewood, IL: Irwin (1989)

- McQuaire, E. F. (1993), *Customer Visits: Building a Better Market Focus*, Newbury Park, Sage.

Assessment: Project (40%, 2500 words), class participation (10%) and take-home assessment (50%) in the MT.

The Group Project (40%) consists of a non-assessed presentation and an assessed project report 2,500 word max.

MG4F1 Half Unit

Marketing Action Learning Project

This information is for the 2020/21 session.

Teacher responsible: Prof Amitav Chakravarti NAB 5.13

Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.

Pre-requisites: Completion of the MSc in Marketing pre-session course, MG4E7 Business Fundamentals.

Course content: For the Marketing Project, each team selects a target issue for an organization and uses the marketing techniques developed in the course to arrive at a recommendation. The Marketing Project is aimed at producing an in-depth report that provides two critical classes of information: (a) Section 1 tells us how a "live" business is being run and what makes it tick (or not) from a marketing value-creation point of view, and (b) Section 2 provides data-based, scientific analysis of what the firm could do better for a more sustainable and competitive future.

Teaching: 2 hours of lectures in the LT.

One formal lecture, plus individual appointments through LT and ST with groups to discuss their chosen projects.

Indicative reading:

- Building a Marketing Plan, by Ho Yin Wong; Kylie Radel; Roshnee Ramsaran-Fowda, Harvard Business School Publishing.
- Writing Great Marketing Plans, 2005, by T. Caulkins, Kellogg's/ Northwestern University.
- The Marketing Plan Handbook Paperback – 1 Sep 2011 by Alexander Chernev

Assessment: Project (95%) in August.

Class participation (5%) in the LT and ST.

Students will undertake a peer review providing feedback on the other members of their project group.

MG4F2 Half Unit

Marketing Analytics II: Analytics for Managing Innovations, Products and Brands

This information is for the 2020/21 session.

Teacher responsible: Prof Om Narasimhan NAB.5.06

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Marketing and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Marketing managers make ongoing decisions about product features, prices, advertising (online and offline), distribution, sales compensation plans, and so on. In making these decisions, managers choose from among alternative courses of action in a complex and uncertain world. Increasingly, in this age of Big Data, companies that emerge as market leaders tend to be the ones that employ sophisticated Marketing Analytics. This course in Marketing Analytics will entail a deep-dive into the state-of-the-art Marketing Analytics models that allow managers to make scientific decisions regarding launching new products or innovations and managing more mature products and brands.

This course will focus upon the use of cutting-edge data analytic techniques to understand and inform managerial decision making with a primary focus on the formulation of dynamic marketing policies. The course is structured to enable the student to gain familiarity with techniques for scraping the web for data, sentiment analysis, multivariate regression, discrete choice modelling, probability models for customer management, causal inference through A/B testing, classification and regression trees, and introductory machine learning.

Teaching: 30 hours of lectures in the LT.

Formative coursework: Students will be engaged in analysing a number of data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve analysing data sets given to them).

Indicative reading:

- Lilien GL, Kotler Ph, Moorthy KS. Marketing Models. Prentice Hall: Englewood Cliffs, 1992
- Leeflang PSH, Wittink DR, Wedel M, Naert PA. Building Models for Marketing Decisions. Kluwer Academic Publishers: Dordrecht / Boston 2000.
- Hanssens DM, Parsons LJ, Schultz RL. Market Response Models: Econometric and Time Serie Analysis. Kluwer Academic Publishers, Boston 2001.
- Lilien GL, Rangaswamy A. Marketing Engineering, 2nd edition. Prentice Hall: Upper Saddle River, NJ, 2003.
- Little JDC. Models and Managers: The Concept of a Decision Calculus. Management Science 1970; 16: B466-B485.

Assessment: Take-home assessment (55%) and group project (45%) in the LT.

Coursework is an Individual Take-home assignment and the project will be in groups.

MG4F3 Half Unit Not available in 2020/21

Digital Marketing

This information is for the 2020/21 session.

Teacher responsible: TBC

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Marketing and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students taking this course are expected to be able to demonstrate a strong foundation in quantitative analysis.

Course content: Marketing is evolving from an art to a science and decisions in new media are on the forefront of this transformation. This course is aimed at developing state-of-the-art knowledge in the area of online marketing (e.g., display ads and search ads, SEO, mobile marketing etc.) and social media (e.g., Twitter, Facebook, etc.). Furthermore, important topics of cross-cutting relevance to online marketing and social media will be addressed, including big data, data science, analytics, and integrative marketing. Many firms have extensive information about consumers' choices and how they react to marketing campaigns, but few firms have the expertise to intelligently act on such information. In this course, students will learn the scientific and strategic approach to marketing with hands-on implementation of online marketing and social media strategies (e.g., strategic design and launch of a website, implementation of SEO strategies, design and manage of a corporate social media account). Using simple yet powerful hands-on interactive models and exercises, the course will cover both theory and applications.

Teaching: 30 hours of lectures in the LT.

Formative coursework: Students have the opportunity to submit a formative coursework in the LT. The formative course work might be an in-depth case analysis of a new media company. Students might be requested to use theory and frameworks to make sense of a case. Students might also be requested reflect on analytics and conduct simple data analysis.

Indicative reading:

- Larsen and Draper (2015): Internet Marketing Essentials, Digital Textbook.
- Chaffey, D. and Ellis-Chadwick, F. (2012): Digital Marketing. Strategy, Implementation, and Practice. Pearson Education.
- Laudon, K. C. and Traver, C. G. (2015), E-Commerce 2015: Business. Technology. Society. Prentice Hall.

More readings in form of academic research papers and media outlets (e. g., The Economist) will be added for each week.

Assessment: Take-home assessment (50%), group project (40%) and class participation (10%) in the LT.

MG4F4 Half Unit

Strategy and Innovation in a Global Context

This information is for the 2020/21 session.

Teacher responsible: Dr Lourdes Sosa NAB 5.19

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This course focuses on understanding the drivers of differences in profitability among firms in our economy, both in the short and long term. The overarching teaching objective is to learn to design managerial recommendations that can help a firm improve and defend its competitive advantage both immediately and for its future. Consequently, the course's topics are in a necessary sequence moving from short-term concepts such as industry factors to long-term concepts such as disruptive innovation.

This course provides an introduction to strategic analysis aiming to explain the design of managerial recommendations to improve and defend the competitive advantage of a firm both immediately (cross-sectional analysis) and in the future (longitudinal analysis). It requires significant use of analytical reasoning as well as the ability to switch between considering the big picture and the fine-grained detail. A key step for the learning objectives of the course is the completion of a 1-week trip to an economy where students will be able to see strategy in the making in its full natural context.

Teaching: 10 x 180 minute seminars in the period after exams and summer term plus a week study trip abroad.

Formative coursework: Students will be expected to produce 1 exercise in July.

Formative assessment will be done during lecture time on the basis of a case study analysis

Indicative reading:

1. Barney, J.B. 1995. Looking Inside for Competitive Advantage. Academy of Management Executive.
2. Christensen, C.M., Bower, J.L. 1996. Customer Power, Strategic Investment and the Failure of Leading Firms. Strategic Management Journal.
3. Dierickx, I., Cool, K. 1989. Asset Stock Accumulation and Sustainability of Competitive Advantage. Management Science.
4. Sosa, L. 2011. From Old Competence Destruction to New Competence Access: Evidence from the Comparison of Two Discontinuities in Anticancer Drug Discovery. Organization Science.
5. Winter, S.G. 2003. Understanding Dynamic Capabilities. Strategic Management Journal.

Assessment: Essay (90%, 2000 words) post-summer term. Class participation (10%) in the ST.

This course is assessed on a report that makes use of the concepts from the course and their application illustrated in the international trip. Details will be discussed during lectures.

MG4F5 Half Unit

Business in the Global Environment

This information is for the 2020/21 session.

Teacher responsible: Dr Veronica Rappoport-Redondo NAB 5.29

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: In this course we study two key components of the process called 'globalisation'. First, we consider the negotiation, implementation and implications of international trade agreements. These include the World Trade Organisation and the fast-growing web of regional trade agreements. Second, we look at the process of globalisation at the level of industries, firms and nations. We seek a solid understanding of the external, economy-wide factors that affect the performance and management of firms in today's global economy. The course relies on recent theoretical and empirical research. Topics include the changing structure of industries, the response of companies, both those based in the advanced industrial countries and those based in emerging markets, to increasing international competition; and the differences between countries in their institutions and policies. Course topics:

- 1) Globalisation: trends in the global economy, overview of their causes and effects
- 2) The workings, accomplishments and shortcomings of the GATT/WTO system
- 3) Trade barriers: causes and consequences of restrictions to international trade
- 4) The economics and politics of international trade agreements
- 5) Implications of trade agreements for national and multinational firms
- 6) Location of Production: Theory of Comparative Advantages
- 7) Location of Production: Factor Endowments across countries
- 8) Location of Production: Testing empirically the predictions of the theory
- 9) Location of Production: Empirical Analysis, institutions as a source of competitive advantage
- 10) Foreign Direct Investment and International Contracts

Teaching: 10 x 180 minute seminars in the period after exams and summer term

Formative coursework: Students will be expected to produce 1 piece of coursework in July.

Indicative reading: Giorgio Barba Navaretti & Anthony J Venables, Multinational Firms in the World Economy, Princeton, 2004. Robert Feenstra and Alan Taylor, International Economics, Worth Publishers, 2008. Kyle Bagwell and Robert W. Staiger, "The Economics of the World Trading System," MIT Press, 2004.

The World Trade Organisation, "The WTO and preferential trade agreements: From co-existence to coherence," World Trade Report, 2011.

Assessment: Continuous assessment (15%), research project (40%) and in-class assessment (45%) in the ST.

MG4F7 Half Unit

Business Analysis

This information is for the 2020/21 session.

Teacher responsible: Noam Yuchtman

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: The course is designed to achieve an understanding of fundamental notions of data presentation and data analysis and to use statistical thinking in the context of business problems. The course deals with modern methods of data exploration (designed to reveal unusual or problematic aspects of databases), the uses and abuses of the basic techniques of inference, and the use of regression as a tool for management and for financial analysis.

Teaching: 15 hours of lectures and 9 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 project in the MT.

The two formative assessments will be in class exercises with two components. One component will help prepare students for the Project (i.e., an application of a statistical technique to solve a company problem or research question), and the other component will help prepare students for the Final Exam.

Indicative reading:

- Statistics for Business Decision Making and Analysis, by Robert Stine and Dean Foster (S & F) second edition Pearson.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Project (35%, 3000 words) and continuous assessment (15%) in the MT.

MG4F8 Half Unit

Managerial Economics and Quantitative Measurement for Social Entrepreneurs

This information is for the 2020/21 session.

Teacher responsible: Prof Saul Estrin NAB 4.24 and Dr Yally Avrahampour NAB 4.37

Professor Saul Estrin - Managerial Economics

Dr Yally Avrahampour - Quantitative Measurement

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: This course comprises an Economics and Accounting stream.

A: Managerial Economics

The course will start with an introduction to economics for social entrepreneurs, with attention focused on markets and market failures, notably externalities and public goods. Questions of social welfare and income inequality will also be discussed. We then move to a series of economics topics of particular relevance in analysing the problems of social entrepreneurs, namely the representation and analysis of firm costs, revenues and profits; measures of efficiency and company performance; analysis of consumer demand and finally firm strategy.

B: Quantitative Measurement

The course will continue by introducing topics relating to the measurement and disclosure of information regarding the performance of the social enterprise. We will introduce techniques used to measure and monetize social impact, adopted by

performance measures such as Social Return on Investment (SROI). We will critically assess the SROI performance measure by introducing topics such as investment appraisal, costing and performance measurement. We will also consider alternative performance measures to SROI.

Course Objectives

Students should learn:

- Key theoretical approaches in two streams, namely, economics and accounting, which includes related quantitative methods, to understanding social innovation and entrepreneurship;
- Empirical findings - typically from recent economics, accounting and management research.
- The most important economic, accounting and quantitative/statistical insights, concepts, theoretical approaches required to set-up, manage, and scale up social innovation and enterprises;
- To relate theoretical and methodological insights, concepts and frameworks for social innovation and enterprise to real world phenomena and social problems through the use of case studies.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

Theoretical material and analytical frameworks from accounting and economics respectively of relevance to social entrepreneurs will be taught in the lecture slots, while the seminars will cover a relevant case study each week. Although the course covers two distinct disciplines, there will be an effort, where possible, to treat the issues in an integrated manner.

In addition students are expected to attend two introductory sessions, for the quantitative measurement part of the course, each lasting two hours.

Formative coursework: Students will be expected to produce 1 essay in the MT.

The formative essay is a voluntary 'pre-run' of the examination questions, where the academic insights of the course are combined and synthesised with new insights sourced from academic literature by the student. Students receive feedback on their formative essay.

Indicative reading: Each week we draw on a variety of required and further readings. We also make suggestions regarding textbooks that provide background for the concepts outlined in the course.

For **Quantitative Measurement** the textbooks representing these background readings are:

Weetman, P. (2013) Financial Accounting: An Introduction. (Available as an e-book through the LSE library).

Kaplan, R. & Atkinson, A. (2014) Advanced Management Accounting 3rd edition.

The following books provide an introduction to accounting for social entrepreneurship and social accounting:

Barman, E. (2016) Caring Capitalism: The Meaning and Measure of Social Value

Epstein, M. & Yuthas, K. (2014) Measuring and Improving Social Impacts: A Guide for Nonprofits, Companies and Impact Investors

Mook, L., Quarter, J. & Richmond, B. (2007) What Counts: Social Accounting for Non-profits and Cooperatives

For **Managerial Economics**, people without an economics background might start with the textbook by D.Begg, G. Vernasca, Fischer, Dornbusch (11th Edition) Economics, McGraw Hill.

A more advanced treatment is contained in S. Estrin, D. Laidler and M. Dietrich, Microeconomics (5th Edition), Pearson.

Introductory reading: There are also a number of books that inform the field, that students might wish to read in advance or during the course as background material.

A. Sen, 2009, The Idea of Justice, Harvard University Press. A.V. Banerjee and E. Dufo, 2011, Poor Economics, BBS Publications.

R.L. Martin and S.R. Osberg, 2015, Going Beyond Better, Harvard Business Review Press

Assessment: Essay (90%, 3000 words) in the LT.
Class participation (10%) in the MT.

MG4F9 Half Unit

Organisational Behaviour and Marketing for Social Entrepreneurs

This information is for the 2020/21 session.

Teacher responsible: Dr Niranjana Janardhanan and Prof Naufel Vilcassim

Prof Vilcassim - Marketing

Dr Janardhanan - Organisational Behaviour

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: The course is a rigorous examination of key insights, concepts and theoretical frameworks that are essential in understanding social innovation and enterprises from the perspectives of Marketing and Organisational Behaviour (OB). Students learn to understand, synthesise and relate these insights, concepts and theoretical frameworks to real-life phenomena and problems through interactive lectures, cases, empirical studies and videos. In a very practical sense, students will test this knowledge in a group marketing project as well as will apply it to effecting social change in relation to such topics as motivation, team management, and organizational culture, in the OB portion of the course.

More specifically, students learn:

- Key theoretical approaches (through the lenses of organisational behaviour and marketing) to understanding social innovations and entrepreneurship;
- Empirical findings - typically from recent management research and related fields; this is a young field - on how Marketing and OB aspects of social innovations and enterprises are associated with social impact;
- A rigorous synthesis of the most important marketing and organisational behaviour insights, concepts, theoretical approaches to set-up, manage, and scale up social innovation and enterprises;
- Relating theoretical and methodological insights, concepts and frameworks for social innovation and enterprise to real world phenomena and social problems, through a group project (in Marketing), as well as through applied case-related individual essays (in OB);
- Also importantly this course provides essential knowledge for the individual design or consulting projects on actual management problems for social innovation and enterprise in the capstone/dissertation course.

This course comprises a Marketing and Organisational Behaviour stream.

A: Organisational Behaviour

- Personality and Individual Differences
- Motivation and Rewards
- Organisational Culture, Ideological Currency & Making a difference
- Well-being at Work
- Leadership and Self-Initiative

B: Marketing

- Application of marketing concepts to social enterprises
- Evaluating stakeholder exchanges
- Attitudes, beliefs & values; models of buyer behaviour
- Segmentation, targeting and positioning strategy for ventures
- Developing a product & promotion strategy

Teaching: 30 hours of lectures and 3 hours of workshops in the MT.

Five weeks (15hrs) will focus on Marketing and five weeks (15hrs) will focus on core insights from Organisational Behaviour, with the aim of imparting key managerial knowledge and skills required to catalyse the changes required to launch and lead successful entrepreneurial ventures in social innovation.

Formative coursework: Students will be expected to produce 1 essay in the MT.

The topic of the formative essay will be based on the Marketing section of the course.

Indicative reading: For Marketing:

- Karnani, A., (2007). The Mirage of Marketing to the Bottom of the Pyramid: How the Private Sector Can Help Alleviate Poverty. *California Management Review* 49 (4), 90-111.
- Madeline Powell, Stephen P. Osborne, "Can marketing contribute to sustainable social enterprise?", *Social Enterprise Journal*, (2015) Vol. 11 Iss: 1, pp. 24-46.
- Choi, N. and Majumdar, S. (2014) Social entrepreneurship as an essentially contested concept: Opening a new avenue for systematic future research. *Journal of Business Venturing* (29), 363–376

For Organisational Behaviour:

- Bargsted, M., Picon, M., Salazar, A., & Rojas, Y. (2013). Psychosocial characterization of social entrepreneurs: A comparative study. *Journal of Social Entrepreneurship*, 4(3), 331–346.
- Davis, G. & White, C. (2015). How your company can change the world. *Harvard Business Review* (5), 48-55.
- Fauchart, E., & Gruber, M. (2011). Darwinians, communitarians, and missionaries: The role of founder identity in entrepreneurship. *Academy of Management Journal*, 54(5), 935-957.

Assessment: Project (45%, 2500 words) and class participation (10%) in the MT.

Essay (45%, 2000 words) in the LT.

MG4G1 Half Unit

Understanding Social Problems for Innovation and Entrepreneurship

This information is for the 2020/21 session.

Teacher responsible: Prof Harm Barkema NAB 4.24, Dr Flora Cornish COL 8.09 and Dr Lamees Tanveer

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: The aim of this course, together with Social Organization Design (MG4G2) in the Lent term, is to help you to better understand, design, lead, and grow your social enterprise. This course – MG4G1 – focuses on the first part of your entrepreneurial journey, starting with the crucial issue of understanding the social problem of your relevant target group. We will also discuss, during the second part of this course, key elements of your entrepreneurial journey, such as Lean Startup, pivots and learning from failure, as well as how to engage with others, such as other entrepreneurs, investors, incubators and accelerators to help you reach your goals better. The second course – MG4G2 – builds on this course in terms of better understanding and designing the business model and its key elements; value proposition, revenue model, and internal organization (leadership, incentives, processes for learning & innovation) and external organization (partners & ecosystems) of your social enterprise, as well as scaling strategies. Both courses are interactive and problem-based. At the heart of both courses is one real-life, evidence-based design challenge for a social enterprise, in the form of a group project (5-6 students) in a low-income neighbourhood in Nairobi or a township in Cape Town. The project starts with building a Theory of Change, based on your understanding of the social problem of your target group, anchored in fieldwork.

Each week of the course consists of:

- Preparation: A set of core readings (journal articles, cases, etc.) for that week
- A lecture (1.5 hours) where key insights are shared and discussed
- An interactive seminar (1 hour), starting with a mini-lecture, followed by in-depth discussion in student groups (5-6 students), and a plenary discussion
- Student-moderated group discussions of a case or key topic of the week (30 mins, groups of 5-6 students) with a short summary of insights and conclusions to be posted online
- Reflection log, a short impression of your personal key learnings

of the week ('Aha-moments'), posted online in the form of a 3-minute video or PPT.

Other key elements of the course are:

- A real-life group design project (5-6 students) addressing a real social problem in an emerging economy (in low-income neighbourhoods in Nairobi, Kenya, and in townships in Cape Town, South Africa), The group project is fully integrated into the program, and students work on it throughout the course.

- A 1-week international field trip to collect data for the group project to these sites (in week 8: Reading week). If the journey is not possible due to health and safety reasons (e.g., COVID-19) then the fieldtrip will be held 'on-line,' in cooperation with our local partners including local 'navigators,' in Nairobi and Cape Town to facilitate data collection through virtual interviews. This will be the situation in MT 2020.

- An individual assignment, via two tracks – self-selected by students; a) designing your own social enterprise (in cooperation with Generate, our LSE incubator/accelerator) or alternatively, b) a consulting project, for an existing social enterprise or social business unit of a company, or an NGO, incubator, or impact investor of your choice.

Teaching: 15 hours of lectures, 10 hours of classes and 5 hours of classes in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Beteille, A. (2003). Poverty and inequality. *Economic and Political Weekly*, 4455-4463. Wright, E.O., 2009, Understanding class, *New Left Review*, Nov-Dec. Banerjee, A. V., & Duflo, E. (2007). The economic lives of the poor. *The journal of economic perspectives: a journal of the American Economic Association*, 21(1), 141. Dolan, C. and M.J. Johnstone-Louis, 2011, Re-siting Corporate Responsibility: The Making of South Africa's Avon Entrepreneurs, *Fiscaal: European Journal of Global and Historical Anthropology*, 60 (Summer) 21-33. Dolan, C., Johnstone-Louis, M., & Scott, L. (2012). Shampoo, saris and SIM cards: seeking entrepreneurial futures at the bottom of the pyramid. *Gender & Development*, 20(1), 33-47. Morduch, J. (1999). The microfinance promise. *Journal of economic literature*, 37(4), 1569-1614. Shaky, Y. B., & Rankin, K. N. (2008). The politics of subversion in development practice: an exploration of microfinance in Nepal and Vietnam. *The Journal of Development Studies*, 44(8), 1214-1235.

Assessment: Project (35%, 5000 words), class participation (10%), class participation (10%) and learning log (10%) in the MT. Essay (35%, 1500 words) in the LT.

MG4G2 Half Unit

Social Innovation Design

This information is for the 2020/21 session.

Teacher responsible: Prof Harm Barkema NAB 4.24

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: The course provides a rigorous overview of insights, concepts, frameworks, methods, tools and evidence for designing a new business model for a social enterprise. The pedagogy implies interactive lectures, classes, guest speakers on selected core topics for the course, FB posts and discussions, cases, and most importantly, applying and synthesizing insights from all these sources and relating them to a real life social problem by designing a new social enterprise, with your group. This course – in the Lent term – directly builds on – and complements – the MT courses MG4G1 'Understanding Social Problems,' leading to the design of a fully-fledged, evidence-based social enterprise. The course will have the same student teams as in MG4G1, that culminated in developing an actual, initial idea/ proposal for problem-based intervention, based on an in-depth understanding of a key social problem. This proposed idea is the starting point for

the business model design project in this course. Student teams will present parts of their design in class at subsequent stages, for feedback, culminating in 'pitching' the full-fledged social enterprise design for an external panel of experts in the last session. As part of their evidence-based design, students will have the opportunity to go over for field work and data collection (i.e., those students who did not go on the first field trip in MG4G1).

More specifically, students learn:

- Key theoretical approaches (insights, concepts, methodologies/frameworks, tools) related to social and economic goals, value propositions, revenue models, partners/alliances/ ecosystems, own organizational characteristics) for designing innovative social organizations for major social impact;
- Empirical findings and evidence-based insights – from recent management research and related fields; this is a young field – on social implications of a variety of social innovation designs; moderators; how these implications differ across contexts (cultural, economic, sociological, political);
- A rigorous framework synthesizing insights, concepts, methodologies/frameworks, and tools for social innovation design, including for extreme affordability (based on the course material developed at the LSE over the past ten years);
- Synthesizing and relating theoretical and methodological insights, concepts, and frameworks for social enterprises to real world phenomena and problems, by designing an actual social enterprise;
- How social enterprise designs are contingent – and can vary strongly – depending on the identified social problem.
- How to scale up your social enterprise for major social impact.

Teaching: 21 hours of lectures and 9 hours of classes in the LT. In addition to 21hrs of lectures and 9hrs of seminars, students will attend a 3hr group dynamics workshop.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Johnson, M. W., Christensen, C. M., Kagermann, H., 2008. Reinventing your business model. *Harvard Business Review* 86(12), 50-59. Yunus, M., Moingeon, B., & Lehmann-Ortega, L. (2010). Building social business models: lessons from the Grameen experience. *Long range planning*, 43(2), 308-325. Dees, J. G., Anderson, B. B., & Wei-Skillern, J. (2004). Scaling social impact. *Stanford social innovation review*, 1(4), 24-32. Seelos, C., & Mair, J. (2005). Social entrepreneurship: Creating new business models to serve the poor. *Business horizons*, 48(3), 241-246. Battilana, J., Sengul, M., Pache, A.C., Model, J., 2015, Harnessing productive tensions in hybrid organizations; The case of work integration social enterprises, *Academy of Management Journal*, vol. 58, no. 6, 1658-1685. Elsie Onsongo, 2017, Institutional Entrepreneurship and social innovation at the base of the pyramid: the case of M-Pesa in Kenya, *Industry and Innovation*.

Assessment: Project (45%) and class participation (10%) in the LT. Essay (45%, 1500 words) in the ST.

MG4G4 Half Unit

Topics in Management Research

This information is for the 2020/21 session.

Teacher responsible: Prof Diane Reyniers NAB5.22

Availability: This course is available on the CEMS Exchange, Diploma in Accounting and Finance, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management and MSc in Management and Strategy. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course addresses various interesting topics which will be used to encourage creative and logical thinking, structuring of clear arguments and critical assessment of evidence. The focus is on interpretation of findings rather than statistical or econometric techniques.

The intellectual backbone of the course is applied and empirical economics (including behavioural economics) and finance but, wherever appropriate, contributions from the psychology, sociology and management literature will be discussed. We will mainly deal with issues which are amenable to rigorous empirical investigation. The course is designed around a set of empirical research papers. Examples of questions considered are whether pain killers are more effective when they are expensive, whether creative people cheat more, whether people overvalue their own ideas.

The main objective of the course is to enable students to comprehend and critically assess the management literature, to evaluate statements in terms of evidence and to detect false reasoning or logic.

Topics vary each year (based on student feedback) but examples are racial discrimination, negotiation and gender, graduate earnings, leadership, optimism and entrepreneurship.

Teaching: 10 hours of lectures and 9 hours of seminars in the MT. 2 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

Formative coursework: Two mock exams in the MT.

Indicative reading:

Lecture 1: Creativity and cheating

Gino, F. & D. Ariely (2012) The dark side of creativity: Original thinkers can be more dishonest. *Journal of Personality and Social Psychology*, 102 (3), 445-459.

Lecture 2: Marketing and placebos

Shiv, B.; Z. Carmon & D. Ariely (2005) Placebo effects of marketing actions: consumers may get what they pay for. *Journal of Marketing Research*, XLII (November), 383-393.

Lecture 3: Do we know what we want?

Ariely, D.; G. Loewenstein & D. Prelec (2003) Coherent arbitrariness: Stable demand curves without stable preferences. *Quarterly Journal of Economics*, 73-105.

Lecture 4: Racial discrimination

Bertrand, M. & S. Mullainathan (2004) Are Emily and Greg more employable than Lakisha and Jamal? A field experiment on labor market discrimination. *American Economic Review*, 94, 4, 991-1013.

Lecture 5: Morale and pay inequality

Breza, E. ; S. Kaur & Y. Shamdasani (2018) The morale effects of pay inequality. *Quarterly Journal of Economics*, 611-663.

Lecture 6: Graduate earnings

Belfield et al. (2018) The relative labour market returns to different degrees. Institute of Fiscal Studies. https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/714517/The_relative_labour_market_returns_to_different_degrees.pdf

Lecture 7: Optimism and entrepreneurship

de Meza, D. et al. (2019) Curb your enthusiasm: Optimistic entrepreneurs earn less. *European Economic Review*, 11, 53-69.

Lecture 8: The dark side of leadership

Nevicka, B.; F.S. Ten Velden, A.H.B. De Hoogh & A.E.M. Van Vianen (2011) Reality at odds with perceptions: Narcissistic leaders and group performance. *Psychological Science*, 22, 10, 1259-64.

Lecture 9: We love our own ideas

Hooshangi, S. & G. Loewenstein (2016) The impact of idea generation and potential appropriation on entrepreneurship: An experimental study. *Management Science*, (not published yet)

Lecture 10: Negotiation

Small, D. A., M. Gelfand, L. Babcock & H. Gettman (2007) Who goes to the bargaining table? The influence of gender and framing on the initiation of negotiation. *Journal of Personality and Social Psychology*, 93, 4, 600-613. Bowles, H.R., L. Babcock & L. Lai (2007) Social incentives for gender differences in the propensity to initiate negotiations: Sometimes it does hurt to ask. *Organizational Behavior and Human Decision Processes*, 103, 84-103.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4G7 Half Unit Not available in 2020/21

Contemporary Topics in Advanced Technology Management

This information is for the 2020/21 session.

Teacher responsible: Dr Edgar Whitley NAB 3.32

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Media and Communications (Data and Society).

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: This course has a strong management focus and assumes a general knowledge of information systems and their management equivalent to MG472 Global Strategy, Management and Information Systems.

Course content: This course introduces students to two Contemporary Topics in Advanced Technology Management. It uses academic perspectives on the topics to provide a detailed contextualisation of technology's historical and intellectual development and combines this with practitioner perspectives to highlight the management challenges associated with these technological developments. The topics are expected to be Artificial intelligence and Machine learning and Financial Technologies including Open Banking, Distributed Ledgers and Blockchains.

Teaching: 20 hours of lectures and 9 hours of seminars in the LT. Lecture durations vary by week and a detailed schedule is available on Moodle.

A reading week will take place during Week 6. There will be no teaching during this week.

Formative coursework: Students will be present two draft presentations and evolving essay plans in the LT.

Indicative reading: The reading list will be technology specific, and determined by the guest academics. As such, they are likely to vary from year to year. Detailed readings will be made available on Moodle.

Artificial intelligence and Machine learning

- Fogel, M. (2016). The 10 Best AI, Data Science and Machine Learning Podcasts, Medium (available at <https://medium.com/startup-grind/the-10-best-ai-data-science-and-machine-learning-podcasts-d7495cfb127c#v7943hwof>).

- UK Government Chief Scientific Adviser (2016). Distributed ledger technology: Blackett review, (available at <https://www.gov.uk/government/publications/distributed-ledger-technology-blackett-review>).

review).

- Underwood, S. (2016). Blockchain Beyond Bitcoin, Communications of the ACM 59(11), 15–17.
- Zachariadis, M., and Ozcan, P. (2017). The API Economy and Digital Transformation in Financial Services: The case of Open Banking, The Swift Institute (available at <https://www.swiftinstitute.org/papers/the-api-economy-and-digital-transformation-in-financial-services-the-case-of-open-banking/>)

Assessment: Essay (50%, 2500 words), presentation (40%) and class participation (10%) in the LT.

The individual essay will focus on the emergent management challenges introduced by one advanced technology not covered in the lectures. Two group presentations will make up the 40% presentation mark: Group Presentation 1 (15%) and Group Presentation 2 (25%).

MG4G8

Human Resource Management Skills and Practitioner Speaker Series

This information is for the 2020/21 session.

Teacher responsible: Dr Elaine Yerby, NAB 3.26

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD). This course is not available as an outside option.

Course content: The course has a taught component, which is compulsory for all students in the stream, and a free-configuration component where students can choose among a variety of sessions that target specific skill development needs they have identified through their Skills Development Portfolio. There is also a Group Project that runs between weeks 2 and 5 in MT.

Group project

The group project is intended to build skills that will be useful in the workplace: the ability to work in culturally-diverse teams, think critically about a work-related issue, and make realistic and achievable recommendations. These are relevant to several of the 7SBL learning outcomes, and will therefore contribute to your Skills Development Portfolio. The group project is assessed through a group submission due in week 5, and an individual reflective statement due in week 7. Additionally, there will be a peer assessment survey where students can provide feedback to their fellow team members on their team working skills. All details, including team allocations and the project brief will be disclosed during a compulsory project launch session in week 2.

Taught sessions

There are six 2-hour weekly sessions during Michaelmas Term (weeks 5 and 7-11). A prospective list of topics includes the following: Leadership, Consultancy and Project Management for HRM, Diversity and Inclusion Management, Selection Interviewing, Managing Difficult Conversations, and Ethics in HRM.

Skills Development Portfolio

Students will plan their own individualised skills development, including the MG4G8 free-configuration sessions, through the Skills Development Portfolio. The aim of this tool is to help each student identify gaps in their general and HRM management skills (as defined in CIPD's 7SBL module), plan for their development during their studies, and document achievements and newly developed skills at the end of the programme. Two submissions are required:

- A self-assessment and development plan, due in MT week 7 (formative).
- A portfolio documenting skill development and attainment, due in September 2021 (summative).

Free-configuration sessions

Students will be able to attend their choice of sessions within the HRO Practitioner Panel series, relevant LSE LIFE, LSE Career workshops and CIPD London events to suit their development needs. Attendance to a minimum of 15 hours between these activities and/or up to 3 hours of external activity is required.

- HRO Practitioner Panel Series: The HRO team will arrange 3

sessions with external speakers on topics that are relevant to our subject. These will be 2-hour evening sessions, and will run during LT. A prospective programme will be announced in MT, and detailed arrangements publicised in due course.

- LSE LIFE workshops and LSE career workshops: LSE LIFE and LSE Careers run a broad range of 1-hour and 2-hour workshops on many topics that are relevant to the 7SBL module. Many of these sessions are run several times during MT and LT. Students will need to book a place in the relevant sessions themselves.
- CIPD London Events: In Lent Term, HRO CIPD students become student members of the HR professional body. CIPD London run in excess of 10 events a month that students can sign up to attend that are relevant for the skills development.

External activities

Where appropriate, students may apply to receive credit for attending an external session that is relevant to the 7SBL module and conducive to significant skill attainment. External activities can count up to 3 hours within the 15 hours free configuration. Please note LSE is unable to fund external activities.

Teaching: 12 hours of lectures in the MT. 6 hours of lectures in the LT.

Please note that the LT sessions will take the form of a Practitioner Panel Series.

Formative coursework: Students will receive written formative feedback on two pieces of work:

1. Students will be set in groups of about 5 to work on an applied HRM problem. Each group will submit a short presentation with their analysis and recommendations due at the end of MT Week 5, for which formative feedback will be provided. Additionally, students will be asked to provide anonymous written feedback to their team peers.
2. Students will submit Sections 1 and 2 of the Skills Development Portfolio (Self-Assessment and Development Plan), due in MT Week 7. Formative feedback will be provided.

Indicative reading: Readings are provided to students to support the taught sessions and students are provided with a range of career and skills development materials at the start of the course. The emphasis of the readings are practitioner and practically focused.

Assessment: The course is not formally assessed as part of the MSc Human Resources and Organisations. However, a pass is needed on the summative submission of the Skills Development Portfolio, due in September, for attaining CIPD accreditation.

MG4J1

Introduction to Mathematics and Data Analysis for Managers

This information is for the 2020/21 session.

Teacher responsible: Dr Ricardo Alonso NAB 5.31

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: The course is divided into two separate subjects: Data Analysis (Statistics) and Mathematics for Managers.

The Data Analysis (Statistics) course is for all students and covers basic probability and statistics; hypothesis testing; analysis of variance; association, correlation and regression. It also includes basic training on data analysis software (STATA). It provides students with the basic analytical tools required in MG4F7 Business Analysis to analyse business data for decision making. The Mathematics for Managers course is an introductory mathematics course which covers the following topics with application reference to economics and business: Functions, Linear Equations, Basic Calculus, and Comparative Statics Analysis. It provides students with the basic analytical tools required in MG465 Managerial Economics to analyse models of product market and factor markets competition.

Teaching: 20 hours of lectures in the two weeks prior to the

Michaelmas Term. Rounding out the schedule is a full programme of talks and activities designed to smooth your transition to postgraduate study at LSE.

Indicative reading: Statistics: Anderson, D., Sweeney, D., Williams, T., Freeman, J., Shoesmith, E. (2009). Statistics for Business and Economics (2nd edition), Hampshire: Cengage Learning. Huff (1991). How to Lie with Statistics. Penguin. Quantitative Skills: Hammond, P. and Sydsaeter, K. (2002). Essential Mathematics for Economic Analysis. Prentice Hall; and Jacques, I. (2010). Mathematics for Economics and Business. (7th edition), Pearson. Writing skills: Wallace, M. and Wray, A. (2011). Critical Reading and Writing for Undergraduates (2nd edition), London: Sage.

Assessment: No formal assessment.

MG4J2 Half Unit

Designing Innovative Social Enterprises

This information is for the 2020/21 session.

Teacher responsible: Dr Nadia Millington NAB 3.14

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course can be broken into two parts:

The foundation (weeks 1-5)

During the foundational element, students will be provided with a theoretical overview of this young field, including but not limited to: definitions / taxonomies of social entrepreneurship /business models for social innovation/ understanding beneficiaries via the theory of change/ minimum viable offer approaches for social change/ social intrapreneurship/ drivers of success, social impact and impact measurement for social mission organizations. Throughout the course, examples are given of real social entrepreneurs and social entrepreneurial organizations in order give practical insight to complement the theory covered in these 5 weeks.

Developing a new innovation social enterprise (weeks 7-11)

Over the 5 interactive teaching sessions students will focus on unravelling the problem/ opportunity, developing / assessing viable solutions, testing and developing a new business model.

As an overarching approach, students will be using a human-centred, action-oriented approach to real world problem solving working in collaborative teams to actively create solutions directly with users through prototyping and visualisation techniques in creative spaces. They will progress from an introduction to design thinking principles of problem solving to creating an enterprise through an iterative design process, including imagining, prototyping, testing, building, modelling, pricing, branding, marketing, resourcing, analysing financial viability and obtaining proof of concept. An additional benefit of the course for students will be their opportunity to discover that design thinking is an approach to problem solving that spans all disciplines and can be used by social scientists, engineers, policy makers, creative designers, entrepreneurs or anyone seeking an effective, human-centred focus to create a solution to a problem.

This approach strengthens the problem-solving competences of sense-making, designing, analysis, and decision-making. The pedagogical approach is problem-solving and students will be informed of ethical guidelines and considerations which they must employ to guide their projects in line with LSE standards and policy.

Teaching: 30 hours of lectures and 10 hours of seminars in the MT.

In addition, student groups will also be expected to attend:

- Three 30-minute group sessions to help refine the scope of the project and develop the venture solution
- An introduction to your project session which lasts approximately

2 hours. This is usually held after class in the 4th week of the semester and refreshments are provided
Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

The formative essay is 800-1000 words based on the evidence of initial field research. We recommend that each team keeps a field work journal (electronic or printed) with dates of field work, names of interviewees, places visited, observations with photos etc to support the formative assessment.

Indicative reading: Essential readings (weeks 1-5)

- Hervieux, C.; Voltan, A. (2018). Framing Social Problems in Social Entrepreneurship. *Journal of Business Ethics*, 151(2):79-293
- Margolis, J. D.; Walsh, J.P. (2003). Misery Loves Companies: Rethinking Social Initiatives by Business. *Administrative Science Quarterly*.48 (2): 268–305.
- Mair, J.; Marti, I. (2004). Social entrepreneurship: What Are We Talking About? A Framework for Future Research. IESE Research Papers D/546, IESE Business School.

Essential readings (weeks 7-11)

- Maurer, I. and Ebers, M. (2006). Dynamics of social capital and their performance implications: Lessons from biotechnology start-ups. *Administrative Science Quarterly*, 51(2): 262–292.
- Ozcan, P., & Eisenhardt, K.M. (2009). Origin of alliance portfolios: Entrepreneurs, network strategies, and firm performance. *Academy of Management Journal*, 52: 246-279.
- Prahalad, C., & Ramaswamy, V. (2008). *The New Age of Innovation: Driving Cocreated Value Through Global Networks*, McGraw-Hill.

Assessment: Essay (50%, 1800 words) in the MT and project (50%) in the LT.

The project assessment comprises an oral presentation (business pitch) and submission of PowerPoint slides with detailed appendices which provide evidence in support of your business pitch.

MG4J3 Half Unit Not available in 2020/21 Principles of Pricing

This information is for the 2020/21 session.

Teacher responsible: Teacher is TBC

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The content of the course is organised into two principal modules: (1) pricing strategy and fundamentals and (2) pricing tactics and implementation. The first module of the course covers the fundamental analytical tools, theories, and conceptual frameworks needed for price strategy formulation. Basic principles from marketing, economics, and psychology will be briefly reviewed and extended. The module provides an in-depth treatment of the role of price in the firm's value proposition to the customer and the determination of customer response to price. The second module of the course covers pricing tactics and opportunities for achieving price customisation.

Teaching: 30 hours of lectures in the LT.

Formative coursework: Students will be engaged in analysing a number of cases, doing numerical problems, as well as analysis data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve numerical problems, case analysis, and analysing data sets).

Indicative reading:

- The Strategy and Tactics of Pricing: A Guide to Growing More

Profitably (2010): Nagle, Hogan, and Zale, Prentice Hall.

- Pricing Information: How to customize both the product and the price (1998): Carl Shapiro and Hal Varian, Harvard Business School Chapters.
- 'How to Fight a Price War' (2000): Akshay Rao, Mark Bergen, Scott Davis, Harvard Business Review.
- 'Is it time to rethink your pricing strategy?' (2012): Andreas Hinterhuber and Stephan Liozu, Sloan Management Review.
- 'Pricing as a Strategic Capability' (2002): Mark Bergen, Shantanu Dutta, Mark Ritson, Sloan Management Review

Assessment: Project (45%), coursework (45%) and class participation (10%) in the LT.

The coursework is an Individual Take-home assignment and the project will be in groups.

MG4J5

Dissertation: Social Innovation and Entrepreneurship

This information is for the 2020/21 session.

Teacher responsible: Prof Harm Barkema NAB 4.24

Availability: This course is available on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: The dissertation gives an opportunity to apply, integrate, and/or deepen the knowledge, insights, and skills that the students have learned in the master's programme, by selecting one of the following options:

- (i) An applied master thesis, applying the knowledge, insights and skills students have learned in the programme to analyse – and develop compelling recommendations regarding – a real world social problem
 - (ii) Designing a new social enterprise
 - (iii) A research project in the domain of the master's program
- Each thesis will be anchored in theory and methodology/evidence to meet academic standards, but in different ways and to different degrees. More specifically, students will be able to choose between:

- 1) An individual applied project. In the projects, students apply and integrate what they have learned in the previous courses in terms of theory, evidence, methodologies, and tools, as well as individually and additionally researched from relevant academic literature. These insights are used to analyse a real-world social problem in the broad domain of the Master's program. Students are expected to support their analysis with relevant theory – sourced from academic journals – and with primary data analysis and collection in situ (tapping into the methodological knowledge acquired during the programme), leading to a theory- and evidence-based analysis, and compelling recommendations. One notable criterion for evaluation will be the way theory/research from academic journals as taught in the programme and, importantly, additionally independently sourced, are used to strengthen the analysis and recommendations, as reflected in the report.
- 2) An individual design of a new social enterprise. In the design projects students apply and integrate what they have learned in previous courses in terms of theory, evidence, methodologies, and tools, as well as individually and additionally researched from the relevant academic and design literatures. These insights are used to develop a new social enterprise / social business that addresses an important, clearly defined real world problem. Students are expected to support their analysis underlying (key parts of) the design with theory sourced from academic journals, as well collect and analyse primary data in situ (tapping into the methodological knowledge acquired during the programme), leading to a theory- and evidence-based analysis and business plan/ business model. One notable criterion for evaluation will be the way theory/ research from academic journals as taught in the programme and, importantly, additionally independently sourced, are used to strengthen the design, as reflected in the report.

3) An empirical research project. The objective of the research project is to develop a novel theoretical contribution to better understand an important phenomenon in the domain of social innovation and enterprise. The contribution needs to build on – and contribute to – the state of the art of the academic literature in the domain of the masters programme, tapping into the theoretical and methodological knowledge acquired during the course, as well as – especially – acquired in self-study, leading to a qualitative or a quantitative research project. A major criterion for evaluation will be the way theory/research from academic journals as taught in the programme and, especially, independently sourced, are used to strengthen the research, as reflected in the report.

Teaching: 6 hours of seminars in the LT. 6 hours of workshops in the ST.

- 3 hours of interactive lecture in the LT: Introduction, the three types of theses/tracks; the role of theory & academic literature in thesis development
- 3 hours of interactive lecture in the LT: Core methodological insights for thesis development

For each of the three tracks: A dissertation workshop (mandatory for all participants of the track,) at the start of the Summer Term; 6 hours (maximum) depending on the number of theses in the track. In total, students will be expected to attend around 12 hrs of classes for the dissertation module.

Projects will be guided by a pool of 6-10 dedicated supervisors for these dissertations.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Students will be expected to produce – before the dissertation workshop – a dissertation proposal outlining the core question of the thesis (with sub-questions), a review/synthesis of relevant academic literature, the methodology for the study (qualitative or quantitative, sample selection, type of analysis, etc.). This proposal will be presented and discussed during the workshop. It will also serve as formative course work.

Indicative reading: Core reading: Skovdal, M. & Cornish, F. Qualitative research for Development (currently the students already study several chapters of this book as part of MG4G1). Additional readings will be announced before the start of the Lent term.

Assessment: Dissertation (100%, 10000 words) in August.

MG4J6 Half Unit Brand Strategy

This information is for the 2020/21 session.

Teacher responsible: Dr Hye-Young Kim

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Marketing. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The most valuable assets that firms have are the products/services that they offer and the brands that are associated with them. Managing Products & Brands is a rigorous examination of the theory and corporate practices relevant to product and brand management. Its core objectives are to provide an understanding of the important issues in planning and evaluating product/brand strategies, to provide the appropriate theories, models, and analytical tools that enable managers to make well-informed product/brand management decisions, and to provide a platform for students to apply these principles. The critical approach adopted will blend theory and practice so as to promote effective managerial decision making on a short as well as long term basis.

Teaching: 30 hours of lectures in the LT.

Formative coursework: Students will meet in their groups with

the course leader several times during the term and receive feedback on their work. Detailed guidelines on the group project will be provided in the course syllabus and sample projects will be available.

Indicative reading:

- Keller, K. (2007) Strategic Brand Management, 3rd Edition, Pearson
- Lehmann, D. And Winer, R. (2005) Product Management, 4th Edition, Chicago: Irwin.
- Keller, K. (2001) Building Customer-Based Brand Equity. Marketing Management. 10(2), 14-19.
- Lilien, Gary L., and Rangaswamy, Arvind, Marketing Engineering, 2nd Edition, Prentice Hall
- Lodish, Leonard M., and Carl F. Mela (2007), "If Brands Are Built Over Years, Why Are They Managed Over Quarters?," July/August, Harvard Business Review, 85, 7/8 (July-August), 104-112
- Rangaswamy, Arvind, Raymond R. Burke, and Terence Oliva (1993) "Brand Equity and the Extendibility of Brand Names," International Journal of Research in Marketing, Special Issue on Brand Equity, Vol. 10, p. 61-75

Assessment: Coursework (45%), project (45%) and class participation (10%) in the LT.

Coursework will be an Individual Take-home assignment and the Project will be completed in groups.

MY400 Half Unit Fundamentals of Social Science Research Design

This information is for the 2020/21 session.

Teacher responsible: Dr Alasdair Jones COL8.12

Availability: This course is compulsory on the MSc in Applied Social Data Science and MSc in Social Research Methods. This course is available on the MPhil/PhD in Demography/Population Studies, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology, MSc in Applied Social Data Science, MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in International Migration and Public Policy and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.

Research students please see MY500.

Course content: Research design necessitates trade-offs between the strengths and weaknesses of different feasible options. This course aims to introduce the broad range of design options and to foster an appreciation of these alternatives for particular research objectives. Drawing on a variety of examples from the social scientific literature, this course will explore design considerations and options across quantitative, qualitative and mixed-methods research. At the end of the course, students will be able to read a wide variety of empirical social science with a critical and balanced perspective and will be better equipped to implement and make arguments defending the methods they use in their dissertations.

Teaching: This course is delivered through a combination of lectures and seminars totaling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online seminars and lectures delivered as short recorded videos.

This course has a Reading Week in Week 6 of MT.

Formative coursework: For the formative coursework, students will be expected to articulate and set-up (via recourse to the literature) a research question or set of interlinked research questions that they would like to answer for a topic of their choosing. Assignments should be 1-2 pages long (including in-text citations and reference list).

Indicative reading: Robson, Colin and McCartan, Kieran (2015, 4th edition). Real World Research. London: John Wiley.

Assessment: Research proposal (30%) and other (10%) in the MT. Research design (60%) in the ST.

(MT: Research proposal 1500 words, 30%; seminar participation (including online seminar participation), 10%; ST: Research design: 4000 words, 60%)

MY401 Half Unit

Research Design for Studies in Digital Innovation

This information is for the 2020/21 session.

Teacher responsible: Dr Eleanor Power COL.8.03

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is not available as an outside option.

Course content: This course will deliver the core methodological training for students completing a dissertation for the MSc in Management of Information Systems and Digital Innovation. It covers issues of research design and research methods for information systems studies, including sessions on the collection and analysis of both qualitative and quantitative data. Lectures will introduce the principles of a range of research design issues and methodological approaches, while classes will contextualise this teaching in relation to information systems research. Drawing on a variety of examples in information systems, the course will provide the platform for students to consider a range of design options, as well as methodological techniques. By the end of the course, students will be familiar with a range of research design options and will be better equipped to not only design, but also to collect and analyse data for, their own dissertations. The course is also intended to help students become more informed and critical readers of social scientific, and specifically information systems, research. The course therefore has the dual aim of helping students become both critical “consumers” and “producers” of information systems research. In doing so, it should make positive contributions to students’ learning experience both in their dissertation process, and in other courses they take at the LSE. The topics covered will include discussions of the alignment between research question and research design, questions of inference, and the relationship between theory and data, as well as brief introductions to research methods, with a focus on when they will be appropriate to particular questions and projects.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course has a reading week in Week 6 of LT.

Lectures for this course will be delivered by staff by the Department of Methodology. To help to contextualise the materials covered in the course for the students, and to ensure a good fit with the requirements of the MISDI dissertation, the seminars will be led by staff from the Department of Management.

Formative coursework: Students will be expected to produce 1 essay in the LT.

A formative assignment will be assigned for Week 8 (LT) for which students will be expected to submit a 1,000 word initial proposal for their dissertation.

Indicative reading: Agresti, A. and Finlay, B. (2009) Statistical Methods for the Social Sciences [4th edition]. Prentice Hall. Bauer, M. and Gaskell, G. (2000) Qualitative Researching with Text, Image and Sound. Sage. Flick, U. (2014) An Introduction to Qualitative Research [5th edition]. Sage. King, G., Keohane, R. and Verba, S. (1994) Designing Social Inquiry. Princeton University Press. Robson, C. and McCartan, K. (2016) Real World Research [4th edition]. John Wiley. Seale, C. [ed.] (2004) Social Research Methods: A Reader. Routledge.

Assessment: Essay (70%, 2500 words) in the ST.

Group essay (30%) in the LT.

Group essay (30%) is 3000 words.

MY405 Half Unit

Research Design for Policy and Programme Evaluation

This information is for the 2020/21 session.

Teacher responsible: Dr Flora Cornish COL.8.09

Availability: This course is available on the MPhil/PhD in Health Policy and Health Economics, MSc in Applied Social Data Science, MSc in Global Health Policy, MSc in Health and International Development, MSc in Human Geography and Urban Studies (Research), MSc in Marketing and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course aims to equip students with the methodological knowledge and research skills to be able to design and critically appraise evaluation research, in the context of the rise of evidence-based policy. It covers the powerful research designs used in applied fields including international development, health, and public policy, addressing both widely-used and more innovative designs. The course takes a mixed methods approach. It covers the major quantitative designs, including randomized experiments and observational (i.e. non-randomized) research designs such as selection on observables, difference-in-differences, and the regression discontinuity design. It covers qualitative and participatory research designs and their contribution to formative research, process evaluation, realist evaluations, interpreting outcomes, and assessing transferability to other settings. As well as the major design issues, the course addresses practical and ethical issues of evaluation research, how to write a study protocol, and how to draw lessons from a body of evidence through reviewing and synthesis. Examples from the fields of health, international development and public policy will be used throughout the lectures and seminars.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students write a critical review (1,500 words) of a published evaluation report.

Indicative reading: Angrist, J. D. and Pischke, J-S. (2014) Mastering Metrics: The Path from Cause to Effect. Princeton University Press. Bell, S. & Aggleton, P. (2016). Monitoring and Evaluation in Health and Social Development: Interpretive and Ethnographic perspectives. London: Routledge. Cartwright, N. & Hardie, J. (2012). Evidence-Based Policy: A practical guide to doing it better. Oxford, UK: Oxford University Press. Glennerster, R. and Takaarasha, K. (2013) Running Randomized Evaluations: A Practical Guide, Princeton University Press. Patton, M. Q. (2015). Qualitative Research and Evaluation Methods. (4th Edition). London: Sage.

Assessment: Essay (50%, 2500 words) in the ST.

Research design (50%) in the LT.

MY410

Fundamentals of Research Design for International Development

This information is for the 2020/21 session.

Teacher responsible: Dr Flora Cornish COL.8.09

Availability: This course is compulsory on the MSc in Development Management, MSc in Development Studies, MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.

This course is compulsory for all MSc students in International Development.

Course content: This course introduces MSc students in the

Department of International Development to theoretical and practical foundations of social science research design. It is neither qualitative nor quantitative in focus, but rather is concerned with core interdisciplinary principles of research design that span disciplinary and methodological traditions.

Grounded in examples from International Development research, the course is centred on exploring principles of research design for different types of research questions. The course will provide a platform for students to consider a range of research design options, as well as methodological techniques. It is intended to help students become more informed and critical readers of social scientific, and specifically International Development, research. It is also intended to help students become more critical producers of research, able to articulate the various rationales, strengths, weaknesses and trade-offs entailed in research design choices so that they can make decisions about which to adopt in their own dissertations. By the end of the course, students will be familiar with a variety of research design options and will be better equipped to embark on their own research projects. The course is not designed to provide students with all the skills and techniques they need, i.e., it is not an explicitly "methods" course, but it will familiarize students with the important design considerations involved in adopting particular approaches and incorporating various forms of evidence and information into their dissertations. The course therefore has the dual aim of helping students become both critical "consumers" and "producers" of International Development research. In doing so, it should make positive contributions to students' learning experience both in their dissertation process, and in other courses they take in ID (and elsewhere at LSE).

The teaching on the course is premised on the idea that how we do research ultimately depends on the nature of the particular research question and the type and kinds of evidence that are available. There are strengths, weaknesses, and trade-offs to most of the decisions we make when planning and doing research, and as the weeks of the course progress, the strengths and weaknesses, and thus the implicit trade-offs, of the research designs we consider will vary. Our goal is for students to better understand the consequences of these research design decisions, both in the published research that they read, and that they will need to make in their own research.

The topics covered will include discussions of the alignment between research question and research design, questions of inference, issues of measurement, uses of literature and secondary material, and the relationship between theory and evidence, as well as brief introductions to particular methods, with a focus on when they will be appropriate to particular questions and projects.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual seminars and flipped lectures delivered as short online videos.

This course has a reading week in Week 6 of MT.

Lectures for this course will be delivered by staff from the Department of Methodology. Seminars will be led by LSE Fellows recruited jointly by ID and MY, to assure experience in and familiarity with international development research.

Formative coursework: Plan for an Annotated Bibliography analysing the research design choices of published work, 1 page, due in MT.

Indicative reading:

- Robson, Colin and McCartan, Kieran (2016). *Real World Research*. 4th Edition. Chichester: John Wiley.
- Shaffer, P. (2013). *Q-Squared. Combining Qualitative and Quantitative Approaches in Poverty Analysis*. Oxford: Oxford University Press.
- Sumner A. and M. Tribe (2008). *International Development Studies: Theories and Methods in Research and Practice*. London: Sage

Assessment: Annotated bibliography (33%) in the MT. Research proposal (67%) in the LT.

MY421 Half Unit

Qualitative Research Methods

This information is for the 2020/21 session.

Teacher responsible: Dr Aliya Rao (MT) and Dr Chana Teeger (LT)

Availability: This course is available on the MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Research), MSc in Global Health Policy, MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science, MSc in International Social and Public Policy (Research), MSc in Marketing and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course presents the fundamentals of qualitative research methods. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding qualitative methods, and with practical skills to put those methods into practice. It prepares students to design, carry out, report, read and evaluate qualitative research projects. First, students learn how to collect data using methods including interviews, focus groups participant observation, and selecting documents and new media data. Second, we cover analysis, using thematic and discourse analysis. Issues of research design, quality indicators and ethics are addressed.

This is a generalist, introductory course and we invite students who have little previous experience of qualitative methods. Students with prior training in qualitative methods might be interested in more specialist alternatives offered by the Department of Methodology, such as MY425 Case Studies and Comparative Methods for Qualitative Research or MY428 Qualitative Text Analysis.

Lectures introduce the main conceptual and practical issues. Seminars provide practical experience with the methods.

Teaching: The course runs twice per year: in MT (MY421M) and again in LT (MY421L). The content of the course is exactly the same in each term.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term and 20 hours in Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a reading week in Week 6 of MT and LT.

Formative coursework: Students submit a portion of their practical work, with some written commentary, for formative assessment in Week 7.

Indicative reading:

- Maria J Mayan (2009) *Essentials in qualitative inquiry*, Walnut Creek, CA: Left Coast Press.

- M Bauer & G Gaskell, (2000) *Qualitative Researching with Text, Image and Sound*, London: Sage.
 - U Flick, (2009) *An Introduction to Qualitative Research*, 4th edition, London: Sage.
 - C Seale, G Gobo, JF Gubrium, & D Silverman, (2004). *Qualitative Research Practice*. London: Sage.
- Please Note: No single publication covers the whole content of the course.

Assessment: Project (100%, 3000 words) in the LT and ST. The summative assignment is a small project, demonstrating skills in using some of the qualitative methods covered during the course. It takes the form of a project report, with detailed appendices documenting the methods of data collection and analysis used. Students taking the course in MT submit in LT, and students taking the course in LT submit in ST.

MY425 Half Unit

Case Studies and Comparative Methods for Qualitative Research

This information is for the 2020/21 session.

Teacher responsible: Dr Eleanor Knott COL 7.08

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Development Studies, MSc in Inequalities and Social Science, MSc in Political Sociology and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. This course is freely available to any MSc or MRes students interested in case study research designs. MY525 is available for PhD students interested in case study research designs. The course is most suited to students within macro- or meso-sociological traditions (e.g. political science, IR, sociology, political sociology, policy studies, development studies) than those within a micro-sociological/individualist tradition (e.g. micro-interactionist perspectives, psychology, psychiatry).

Course content: This course focuses on the approach and practice of designing and conducting case study and comparative research. Thinking outside of the areas of interest and specialisms and topics, students will be encouraged to develop the concepts and comparative frameworks that underpin these phenomena. In other words, students will begin to develop their research topics as cases of something.

The course will cover questions of design and methods of case study research, from single-n to small-n case studies including discussions of process tracing and Mill's methods. The course will address both the theoretical and methodological discussions that underpin research design as well as the practical questions of how to conduct case study research, including gathering, assessing and using evidence. Examples from the fields of comparative politics, IR, development studies, sociology and European studies will be used throughout the lectures and seminars.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars (9 seminars of 1.5 hours) in the LT. This year, some or all of this teaching may be delivered through a combination of virtual synchronous webinars and recorded asynchronous lectures delivered as short online videos.

Lectures will provide students with the key concepts, ideas and approaches to case study and comparative research. Seminars will provide students with practical experience of assessing the approaches of case study and comparative research design, as well as opportunities to design and develop their own research projects.

This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the LT. 1 formative paper: literature review and project outline (1-2 pages) due in Week 8. Students will receive written feedback on this by

Week 11.

1 peer marking exercise: in-class oral peer feedback session for students to exchange ideas on formative assignment (Week 9). This in-class activity may be delivered via webinar.

Indicative reading: Key texts:

Beach, D., & Pedersen, R. B. 2019. *Process-tracing methods: Foundations and guidelines*. University of Michigan Press. Bennett, A. and Checkel, J.T. eds., 2014. *Process tracing: From metaphor to analytic tool*. Cambridge University Press. Della Porta, D. and Keating, M. eds., 2008. *Approaches and methodologies in the social sciences: A pluralist perspective*. Cambridge University Press. George, Alexander L. and Andrew Bennett. 2005. *Case Studies and Theory Development in the Social Sciences*. Gerring, J. 2017. *Case study research: principles and practices*. Second edition. Cambridge University Press.

Example readings for discussion:

Briggs, Ryan C. 2017. "Explaining case selection in African politics research", *Journal of Contemporary African Studies*. Finkel, E. (2017) *Ordinary Jews: choice and survival during the Holocaust*. Princeton University Press. Lund, Christian. 2014. "Of What is This a Case? Analytical Movements in Qualitative Social Science Research." *Human Organization* 73(3): 224–234. Simmons, E. (2016) *Meaningful resistance: market reforms and the roots of social protest in Latin America*.: Cambridge University Press. Simmons, E. S. and Smith, N. R. (2017) 'Comparison with an Ethnographic Sensibility', *PS: Political Science & Politics*, 50(01), pp. 126–130. doi: 10.1017/S1049096516002286. Slater, D. and Wong, J. (2013b) 'The Strength to Concede: Ruling Parties and Democratization in Developmental Asia', *Perspectives on Politics*, 11(03), pp. 717–733. doi: 10.1017/S1537592713002090.

Assessment: Class participation (10%) and research proposal (90%) in the LT.

It is recommended that students base the research design proposal (4000 words) on their dissertation topic (or a related topic, e.g. a PhD proposal) subject to approval by students' home department. Where students also take MY400 (which has a similar summative assessment), students will be guided towards a modified version of the research proposal (e.g. a different research question) to avoid self-plagiarism between assignments. Students must consult with their home department regarding overlap between the proposal and their dissertation.

Weekly participation grade (10%) preparation and active participation in seminars and group presentation.

MY426 Half Unit Not available in 2020/21

Doing Ethnography

This information is for the 2020/21 session.

Teacher responsible: Dr Chana Teeger COL7.06

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science, MSc in International Social and Public Policy (Research), MSc in Marketing and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convenor if unsure.

Course content: Doing ethnography enables us to examine how social order is produced as people go about their everyday interactions. Multiple sources of naturally-occurring data are used to understand how communities, organisations and institutions work, informally as well as formally. Contemporary conditions of globalisation, individualisation, bureaucratisation and digitisation introduce new challenges for such fieldwork. This interdisciplinary course equips students with a practical understanding of how to do, and to think about, contemporary ethnography. Core

conceptual, ethical and methodological debates are introduced through in-depth engagement with book-length exemplars, and through students' experience of fieldwork. Fieldwork is a key component of the course, with students collecting data locally, followed by data analysis and presentation activities. Methodological concerns regarding case selection, establishing rigour, reflexivity, representing others, and ethical issues are addressed in detail. Practical issues addressed include identifying and accessing study sites, studying elite and marginalised groups, innovative sources of data, and writing field notes. Emphasising that ethnography relies on the researcher-as-research-instrument, the course aims to develop students' sensitivity and rigour as ethnographic researchers.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 is a Reading Week during which students work independently on their formative assignments.

Formative coursework: An excerpt of field-notes from the field visit undertaken as part of the course (up to 2,500 words). Field-notes should record rich details of observations (the data), researcher reflections, and brief interpretations of the significance of these observations. Written feedback will be provided.

Indicative reading: DeWalt, K. M.; DeWalt, B. R. (2002). Participant observation: A guide for fieldworkers. AltaMira Press. Emerson, R. M., Fretz, R. I.; Shaw, L. L. (1995). Writing ethnographic fieldnotes. University of Chicago Press. Hammersley, M; Atkinson, P. (2007). Ethnography: Principles in practice. Taylor; Francis. Wacquant, L. (2004) Body and Soul: Ethnographic Notebooks of an Apprentice Boxer. New York: Oxford University Press. Laureau, Annette. (2011). Unreal Childhoods: Class, Race, and Family Life (2nd Edition). Berkeley: University of California Press

Assessment: Essay (100%, 4000 words) in the ST.

MY427 Half Unit Not available in 2020/21

Qualitative Research with Digital and Visual Data

This information is for the 2020/21 session.

Teacher responsible: Dr Jennifer Tarr COL8.06

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Culture and Society, MSc in Gender (Research), MSc in Gender, Media and Culture, MSc in Human Geography and Urban Studies (Research), MSc in International Social and Public Policy (Research), MSc in Marketing and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is also available to PhD students, please see MY527.

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is required, equivalent to the level of MY421. Please contact the course convenor if unsure.

Course content: Most qualitative research is in the form of written or spoken texts, produced through interviews and field notes or collection and analysis of documents. However, new technologies now offer a range of new tools for producing, gathering and analysing new kinds of data. This course will focus primarily on digital and visual methods and how they are reshaping qualitative research. Topics will include mobile methods, social network analysis; social media; emojis, memes and gifs; photo elicitation; video; and visual analysis. Key example readings will be assigned, discussed and assessed each week. Seminars provide practical skills through hands on exercises of data collection and analysis, closely tied with the lecture content. These skills will be developed further in a final research project on a topic of the students' choosing to be submitted at the beginning of summer term. The course aims to understand how qualitative methods can be used in relation to these emerging streams of data. The course is aimed at students who are considering one or more of these elements as part of their dissertation research design and/or who are interested in gaining more advanced skills in qualitative

research.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 will be a Reading Week during which students work independently on their formative assignment. An optional enrichment activity will be assigned.

Formative coursework: Seminar activities will receive in-class feedback. A brief proposal for final summative coursework (c. 1000 words) should be submitted and will receive formative feedback and guidance.

Indicative reading: Note: No one text covers the whole course. Rose, G, 2016. Visual methodologies: An introduction to researching with visual materials. London: Sage. Rogers, R, 2013. Digital methods. Boston: MIT press. Pink, S, Horst H, Postill J, Hjorth L, Lewis T, Tacchi J. (2016) Digital Ethnography: Principles and Practice. London: Sage.

Assessment: Project (100%, 4000 words) in the ST. One 4000-4500 word research project related to the course material, on a topic selected by the student (100%).

MY428 Half Unit

Qualitative Text and Discourse Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Audrey Alejandro COL.7.10

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Culture and Society, MSc in Development Studies, MSc in Gender (Research), MSc in Gender, Media and Culture, MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science, MSc in International Social and Public Policy (Research) and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

This course is freely available to any MSc or MRes students interested in text and discourse analysis.

The course is also available to PhD students interested in text and discourse analysis, please see MY528.

Pre-requisites: There are no prerequisites but some prior training in research methods is expected (including finding bibliographical resources, conducting a literature review, creating one's own research question...). Please contact the course convenor if unsure.

Course content: How can we use texts and discourses to create meaning about the social world? The goal of this course is to provide students with the skills to construct and conduct social sciences research using text and discourse as an entry point. While acquiring these skills, students also learn how to interpret textual data by exploring the concepts and case studies developed across disciplines. The course both establishes a theoretical foundation for text/discourse analysis and takes a practical and applied approach, so that students can acquire greater independence and confidence to conduct their research project autonomously. Discourse Analysis is the overarching method that structures the content of the course. The first part of the course focuses on the application of the most common methods used to analyse texts and discourses (including thematic analysis and content analysis). The second part of the course places the in-depth analysis of texts in the broader context of research methods and design, to ensure students know how to critically self-assess their work and produce research to the highest standards. Beyond learning the skills of qualitative text/discourse analysis, this course is an invitation to produce more structured, analytical and critical research capable of grasping not only the visible but also the invisible and implicit dimensions of politics and society. Examples from across the social sciences will be used throughout the lectures and seminars.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as

short online videos.

This course has a Reading Week in Week 6 of LT.

Formative coursework: A project proposal (c.1,000 words) focusing on the topic that the student will develop in their summative assignment. The project proposal comprises a blog post and a project outline.

Indicative reading: Baker, P. and Ellece, S. (2010). *Key Terms in Discourse Analysis*, London: Continuum. Dunn K. and Neumann I. B. (2016). *Undertaking Discourse Analysis for social research*, Ann Arbor: University of Michigan Press. Kuckartz U. (2014). *Qualitative text analysis: a guide to methods, practice & using software*. Los Angeles: Sage. Scheier, M. (2012). *Qualitative Content Analysis*. Sage, Thousand Oaks, CA.

Assessment: Research proposal (100%) in the ST.

A research proposal (100%, 4000 words) in the ST. Students can base their research proposal on a dimension/sub-question of their dissertation topic (or a related topic, e.g. a PhD proposal) subject to the approval of their home department.

MY451 Half Unit

Introduction to Quantitative Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Jonathan Jackson COL.8.05 (LT) and Dr Indraneel Sircar COL.7.04 (MT)

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Research), MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in International Social and Public Policy (Research), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is also available to research students as MY551.

Course content: An intensive introduction to quantitative data analysis in the social sciences. The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students should be able to carry out univariate and bivariate data analysis and have an appreciation of multiple linear regression. The computer exercises give 'hands-on' training in the application of statistical techniques to real social science research problems. No prior knowledge of any statistical software is necessary.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours per term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY451M which is taught in Michaelmas Term, or MY451L which is taught in Lent Term.

This course has a Reading Week in Week 6 of MT and LT.

Formative coursework: Self-guided computer exercises to be completed before weekly classes for discussion.

Indicative reading: A course pack will be available for download online. Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*. Pearson Education. Or Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*. Pearson Education (note that the second book is more

advanced and is particularly useful if you are planning to take MY451 and MY452.

Assessment: Take-home assessment (80%) in the ST.

Continuous assessment (20%) in the MT and LT.

(Homework and participation will constitute 20% of the final overall mark).

MY452 Half Unit

Applied Regression Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Daniele Fanelli and Dr Indraneel Sircar

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in International Migration and Public Policy, MSc in International Social and Public Policy (Research), MSc in Local Economic Development, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration, MSc in Social Research Methods and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students are required to have completed MY451 or an equivalent level statistics course

MY452 is open to any and all post-grad students around the School who have already have a grounding in quantitative methods.

Course content: The course is designed for students with a good working knowledge of elementary descriptive statistics; sampling distributions; one and two sample tests for means and proportions; correlation and the linear regression model with one or more predictor variables. The course is concerned with deepening the understanding of the generalized linear model and its application to social science data. The main topics covered are linear regression modelling and binary, multinomial and ordinal logistic regression.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours per term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY452M which is taught in Michaelmas Term, or MY452L which is taught in Lent Term.

This course has a Reading Week in Week 6 of MT and LT.

Formative coursework: Self-guided computer exercises to be completed before weekly classes for discussion.

Indicative reading: A Agresti & B Finlay, *Statistical Methods for the Social Sciences*.

A course pack will be available for download online. Additional reading will be recommended.

Assessment: Take-home assessment (80%) in the ST.

Continuous assessment (20%) in the MT and LT.

(Homework and participation will constitute 20% of the final overall mark).

MY455 Half Unit

Multivariate Analysis and Measurement

This information is for the 2020/21 session.

Teacher responsible: Prof Jouni Kuha COL8.04

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Human Geography and Urban Studies (Research), MSc in International Social and Public Policy (Research), MSc in Marketing, MSc in Political Science and Political Economy and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. The course is also available to research students as MY555.

Pre-requisites: The course will assume a knowledge of standard linear regression models, to the level covered in MY452 (Applied Regression Analysis).

Course content: An introduction to the application of modern multivariate methods used in the social sciences, with particular focus on latent variable models for continuous observed variables, and their application to questions of measurement in the social sciences. The following topics will be covered: principal components analysis, exploratory factor analysis, confirmatory factor analysis, structural equation models, latent class models and latent trait models. The R software will be used to apply and illustrate the methods in data analysis exercises.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, the lectures may be delivered live or as short online videos. The classes will be live and in person, and delivered online or in class.

This course has a Reading Week in Week 6 of LT.

Formative coursework: Answers to questions based on data analysis exercises can be submitted for formative feedback.

Indicative reading: D J Bartholomew, F Steele, I Moustaki; J I Galbraith (2008) *Analysis of Multivariate Social Science Data* (Second Edition).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MY456 Half Unit

Survey Methodology

This information is for the 2020/21 session.

Teacher responsible: Prof Patrick Sturgis COL8.10

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Human Geography and Urban Studies (Research), MSc in Marketing, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Knowledge of basic descriptive and inferential statistics, to the level of MY451 or equivalent. MY456 can also be taken in parallel with MY452L. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent.

Course content: This course provides an introduction to the methodology of the design and analysis of social surveys. It is intended both for students who plan to design and collect their own surveys, and for those who need to understand and use data from existing large-scale surveys. Topics covered include concepts of target populations, survey estimation and inference, sampling error and nonsampling error; sample design and sampling theory; modes of data collection; web surveys; survey interviewing; cognitive processes in answering survey questions; design and evaluation of survey questions; nonresponse error; survey weights;

analysis of data from complex surveys; accessing, preparing and working with secondary data from existing social surveys; comparative and longitudinal surveys. The course includes computer classes, using the statistical computer package Stata; no previous knowledge of Stata is required.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching may be delivered live or as short online videos. The classes will be live and delivered online or in person depending on access to campus in LT.

This course has a reading week in Week 6 of Lent Term.

Formative coursework: Exercises from some of the seminars and computer classes are submitted for feedback.

Indicative reading: Groves, R M, Fowler, F J, Couper, M P, Lepkowski, J M, Singer, E, and

Tourangeau, R (2009). *Survey Methodology* (2nd ed.). Wiley.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%, 2500 words).

The project is a report of approximately 20 to 30 pages, including tables and figures, or approximately 2,500 words, reporting the data analysis of a given research question and data set.

MY457 Half Unit

Causal Inference for Observational and Experimental Studies

This information is for the 2020/21 session.

Teacher responsible: Dr David Hendry

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Behavioural Science, MSc in Human Geography and Urban Studies (Research), MSc in International Social and Public Policy (Research), MSc in Political Science and Political Economy, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Knowledge of multiple linear regression and some familiarity with generalised linear models, to the level of MY452 or equivalent. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent.

Course content: This course provides an introduction to statistical methods used for causal inference in the social sciences. Using the potential outcomes framework of causality, topics covered include research designs such as randomized experiments and observational studies. We explore the impact of noncompliance in randomized experiments, as well as nonignorable treatment assignment in observational studies. To analyse these research designs, the methods covered include experiments, matching, instrumental variables, difference-in-difference, and regression discontinuity. Examples are drawn from different social sciences. The course includes computer classes, where the R software is used for computation.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, the lectures may be delivered live or as short online videos. The classes will be live and in person, and delivered online or in class.

This course has a reading week in Week 6 of LT.

Formative coursework: Exercises from the computer classes can be submitted for feedback.

Indicative reading:

- Angrist, J. D. and Pischke, J.-S. (2009). *Mostly Harmless Econometrics*.
- Princeton University Press. Rosenbaum, P.R. (2010). *Design of Observational Studies*. Springer.

- Holland, Paul W. "Statistics and Causal Inference." *Journal of the American Statistical Association* 81(396): 945-960.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MY459 Half Unit

Special Topics in Quantitative Analysis: Quantitative Text Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Blake Miller COL.7.14

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Data Science, MSc in Human Geography and Urban Studies (Research), MSc in Political Science and Political Economy, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. The course is also available to research students as MY559.

Pre-requisites: Students must have completed Applied Regression Analysis (MY452).

Course content: The course surveys methods for systematically extracting quantitative information from text for social scientific purposes, starting with classical content analysis and dictionary-based methods, to classification methods, and state-of-the-art scaling methods and topic models for estimating quantities from text using statistical techniques. The course lays a theoretical foundation for text analysis but mainly takes a very practical and applied approach, so that students learn how to apply these methods in actual research. The common focus across all methods is that they can be reduced to a three-step process: first, identifying texts and units of texts for analysis; second, extracting from the texts quantitatively measured features - such as coded content categories, word counts, word types, dictionary counts, or parts of speech - and converting these into a quantitative matrix; and third, using quantitative or statistical methods to analyse this matrix in order to generate inferences about the texts or their authors. The course systematically surveys these methods in a logical progression, with a practical, hands-on approach where each technique will be applied using appropriate software to real texts. Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a reading week in Week 6 of LT.

Formative coursework: Exercises from the computer classes can be submitted for marking.

Indicative reading: quanteda: An R package for quantitative text analysis. <http://kbenoit.github.io/quanteda/>. Grimmer, Justin and Brandon M. Stewart. 2013. "Text as Data: The Promise and Pitfalls of Automatic Content Analysis Methods for Political Texts." *Political Analysis* 21(3):267–297. Loughran, Tim and Bill McDonald. 2011. "When Is a Liability Not a Liability? Textual Analysis, Dictionaries, and 10-Ks." *The Journal of Finance* 66(1, February): 35–65. Evans, Michael, Wayne McIntosh, Jimmy Lin and Cynthia Cates. 2007. "Recounting the Courts? Applying Automated Content Analysis to Enhance Empirical Legal Research." *Journal of Empirical Legal Studies* 4(4, December):1007–1039.

Assessment: Project (40%, 3000 words) in the ST. Coursework (60%, 2000 words) in the LT.

MY461 Half Unit

Social Network Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Eleanor Power COL.8.03 and Dr Milena Tsvetkova COL.8.06

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Data Science, MSc in Human Geography and Urban Studies (Research), MSc in Media and Communications (Data and Society), MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on data about connections, forming structures known as networks. Networks and network data describe an increasingly vast part of the modern world, through connections on social media, communications, financial transactions, and other ties. This course covers the fundamentals of network structures, network data structures, and the analysis and presentation of network data. Students will work directly with network data, and structure and analyse these data using R. Social networks have always been at the centre of human interaction, but especially with the explosive growth of the internet, network analysis has become increasingly central to all branches of the social sciences. How do people influence each other, bargain with each other, exchange information (or germs), or interact online? A diverse array of deep questions about human behaviour can only be answered by examining the social networks encompassing and shifting around us. Network analysis has emerged as a cross-disciplinary science in its own right, and has in fact proven to be of even greater generality and broader applicability than just the social, extending to ecology, physics, genetics, computer science, and other domains.

This course will examine the key papers in the development of social network analysis, and will develop the theory and methodological tools needed to model and predict social networks and use them in social sciences as diverse as sociology, political science, economics, health, psychology, history, or business. The core of the course will comprise the essential tools of network analysis, from centrality, homophily, and community detection, to random graphs, network formation, and information flow. Alongside this we will read a series of substantive and seminal papers, shaped in part by the interests of the students and their various backgrounds, with a particular focus on the difficult task of causal inference in social networks. The course will also provide an introduction to network modelling, analysis and visualisation using R.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 2 problem sets in the LT.

Type: Structured formative problem sets in two of the weeks will build on what was covered in the staff-led lab session, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.

Indicative reading:

- Newman, M.E.J. (2010). *Networks: An introduction*. Oxford, UK: Oxford University Press.
- Scott, J. (2017). *Social Network Analysis*. Los Angeles: SAGE. 4th edition.
- Easley, D., and Kleinberg, J. (2010). *Networks, Crowds, and Markets: Reasoning about a highly connected world*. New York: Cambridge University Press.

Assessment: Problem sets (50%) and take-home assessment (50%) in the LT.

5 summative problem sets will be marked in five of the weeks.

These will constitute 50% of the final overall mark.

MY464

Introduction to Quantitative Methods for Media and Communications

This information is for the 2020/21 session.

Teacher responsible: Prof Patrick Sturgis COL8.05

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MPhil/PhD in Media and Communications, MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is not available as an outside option.

Course content: An intensive introduction to quantitative data analysis in the social sciences, with illustrative examples and class exercises drawn from the field of Media and Communications. The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students will have an understanding of how to carry out and interpret significance tests and be able to implement univariate and bivariate data analysis and simple multiple linear regression. The computer classes give 'hands-on' training in the application of statistical techniques to real social science research problems using the R computer package (no prior knowledge of R is necessary).

Teaching: This course is delivered through a combination of classes and lectures in Michaelmas Term. This year, this teaching will be delivered through a combination of short online recorded films for the lectures and live classes, which will be delivered face-to-face where feasible, or online where not. Combined hours across lectures and classes will be equivalent to a minimum of 30 hours face-to-face teaching.

This course has a Reading Week in Week 6 of MT.

Formative coursework: Self-guided computer exercises implementing statistics covered in the lectures with weekly online homework on the material covered in the lectures and exercises.

Indicative reading: A course pack will be available for download online.

Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*, and Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*.

Assessment: Online assessment (100%).

Three-hour online assessment (100%) in the January exam period.

MY465 Half Unit

Intermediate Quantitative Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Jonathan Jackson COL8.05

Availability: This course is available on the MSc in Human Geography and Urban Studies (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Participants should have studied introductory statistics or quantitative methods before, up to an introduction to descriptive statistics and basic statistical inference. Students with

no previous studies in quantitative analysis should take instead Introduction to Quantitative Analysis (MY451).

Because of the overlaps between these courses, it is not possible to take both this course and either of Introduction to Quantitative Analysis (MY451) or Applied Regression Analysis (MY452) as assessed courses.

Course content: The course is intended for students with some (even if limited) previous experience of quantitative methods or statistics. Using examples from psychological research, it covers first a review of the foundations of descriptive statistics and statistical inference, in the context of the analysis of two-way contingency tables and comparisons of means between two groups. The main topic of the course is linear regression modelling and related methods, including scatterplots, correlation, simple and multiple linear regression, and analysis of variance and covariance. An introduction to binary logistic regression modelling is also included. The computer classes give hands-on training in the application of these statistical techniques.

Teaching: This course is delivered through a combination of classes and lectures in Michaelmas Term. This year, this teaching will be delivered through a combination of short online recorded films for the lectures and live classes, which will be delivered face-to-face where feasible, or online where not. Combined hours across lectures and classes will be equivalent to a minimum of 30 hours face-to-face teaching.

This course has a Reading Week in Week 6 of MT.

Formative coursework: Self-guided computer exercises implementing statistics covered in the lectures with weekly online homework on the material covered in the lectures and exercises.

Indicative reading: A course pack will be available for download online.

Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*, and Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*.

Assessment: Continuous assessment (20%) in the MT.

Online assessment (80%).

Three-hour online assessment (80%) in the January exam period.

Continuous assessment (20%) in the MT.

Homework and participation will constitute 20% of the final overall mark.

MY470 Half Unit

Computer Programming

This information is for the 2020/21 session.

Teacher responsible: Dr Milena Tsvetkova COL8.06

Availability: This course is compulsory on the MSc in Applied Social Data Science. This course is available on the MSc in Data Science, MSc in Human Geography and Urban Studies (Research) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course introduces students to the fundamentals of computer programming as students design, write, and debug computer programs using the programming language Python and R. The course will also cover the foundations of computer languages, algorithms, functions, variables, object-orientation, scoping, and assignment. The course will rely on practical examples from computational social science and social data science.

Students will learn how to design algorithms to solve problems and how to translate these algorithms into working computer programs. Students acquire skills and experience as they learn Python and R, through programming assignments with an approach that integrates project-based learning. This course is an introduction to the fundamental concepts of programming for students who lack a formal background in the field, but will include more advanced problem-solving skills in the later stages

of the course. Topics include algorithm design and program development; data types; control structures; functions and parameter passing; recursion; data structures; searching and sorting; and an introduction to the principles of object-oriented programming. The primary programming languages used in the course will be Python and R.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 10 problem sets in the MT.

Students will work on weekly, structured problem sets in the staff-led class sessions. Example solutions will be provided at the end of each week.

Indicative reading: Guttag, John V. *Introduction to Computation and Programming Using Python: With Application to Understanding Data*. MIT Press, 2016. Gries, Paul, Jennifer Campbell, and Jason M Montojo. *Practical Programming: An Introduction to Computer Science Using Python 3*. The Pragmatic Bookshelf, 2013. Miller, Bradley N. and David L. Ranum. *Problem Solving with Algorithms and Data Structures Using Python*. Available online at <http://interactivepython.org/runestone/static/pythonds/index.html>. Python, Intermediate and advanced documentation at <https://www.python.org/doc/>. Venables, William N., David M. Smith, and the R Core Team. *An Introduction to R*. Available online at <https://cran.r-project.org/doc/manuals/r-release/R-intro.pdf>. Zuur, Alain, Elena N. Ieno, and Erik Meesters. *A Beginner's Guide to R*. Springer Science & Business Media, 2009.

Assessment: Take-home assessment (50%) and problem sets (50%) in the MT.

MY472 Half Unit Data for Data Scientists

This information is for the 2020/21 session.

Teacher responsible: Friedrich Geiecke

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Human Geography and Urban Studies (Research), MSc in Media and Communications (Data and Society) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course will cover the principles of digital methods for storing and structuring data, including data types, relational and nonrelational database design, and query languages. Students will learn to build, populate, manipulate and query databases based on datasets relevant to their fields of interest. The course will also cover workflow management for typical data transformation and cleaning projects, frequently the starting point and most time consuming part of any data science project. This course uses a project-based learning approach towards the study of online publishing and group-based collaboration, essential ingredients of modern data science projects. The coverage of data sharing will include key skills in on-line publishing, including the elements of web design, the technical elements of web technologies and web programming, as well as the use of revision-control and group collaboration tools such as GitHub. Each student will build one or more interactive website based on content relevant to his/her domain-related interests, and will use GitHub for accessing and submitting course materials and assignments. In this course, we introduce principles and applications of the electronic storage, structuring, manipulation, transformation, extraction, and dissemination of data. This includes data types, database design, data base implementation, and data analysis through structured queries. Through joining operations, we will also cover the challenges of data linkage and how to combine

datasets from different sources. We begin by discussing concepts in fundamental data types, and how data is stored and recorded electronically. We will cover database design, especially relational databases, using substantive examples across a variety of fields. Students are introduced to SQL through MySQL, and programming assignments in this unit of the course will be designed to insure that students learn to create, populate and query an SQL database. We will introduce NoSQL using MongoDB and the JSON data format for comparison. For both types of database, students will be encouraged to work with data relevant to their own interests as they learn to create, populate and query data. In the final section of the data section of the course, we will step through a complete workflow including data cleaning and transformation, illustrating many of the practical challenges faced at the outset of any data analysis or data science project.

Online publishing and collaboration tools forms the second part of this course, along with the tools and technologies that underlie them. Students will develop interactive, secure and powerful projects for the World Wide Web using both client and server side technologies. Collaboration and the dissemination and submission of course assignments will use GitHub, the popular code repository and version control system. The course begins with an indepth look at the markup languages that form the foundations of building web sites with a study of HTML and CSS. Students next study basic programming in JavaScript, to provide client and server side tools including the customization of web content using Bootstrap and Jekyll to publish web pages, which will provide the basis for a class project.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 10 problem sets in the MT.

Students will work on weekly, structured problem sets in the staff-led class sessions. Example solutions will be provided at the end of each week

Assessment: Take-home assessment (50%) and problem sets

(50%) in the MT.

MY474 Half Unit

Applied Machine Learning for Social Science

This information is for the 2020/21 session.

Teacher responsible: Dr Blake Miller COL7.14

Availability: This course is available on the MSc in Applied Social Data Science and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Priority will be given to students in the MSc in Applied Social Data Science.

Pre-requisites: Applied Regression Analysis (MY452) or equivalent is required.

Course content: Machine learning uses algorithms to find patterns in large datasets and make predictions based on them. This course will use prominent examples from social science research to cover major machine learning tasks including regression, classification, clustering, and dimensionality reduction. A particular emphasis will be placed on the ethical issues surrounding machine learning applications, including privacy, algorithmic bias, and informed consent. Lectures will use case studies to introduce specific machine learning algorithms including LASSO, ridge regression, logistic regression, k-nearest neighbour classification, decision trees, support vector machines, k-means clustering, hierarchical clustering, principal component analysis, and linear discriminant analysis. Students will learn to apply these algorithms to data and validate and evaluate models. Students will work directly with social data and analyse these data using Python or R.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 problem set in the LT.

One structured problem set will be provided in the first weeks of the course. Students will start the problem set in the first computer workshop session and complete it outside of class.

Assessment: In-class assessment (40%) and quiz (30%) in the LT. Report (20%) and take-home assessment (10%) in the ST.

MY498

Capstone Project

This information is for the 2020/21 session.

Teacher responsible: Dr Blake Miller

Availability: This course is compulsory on the MSc in Applied Social Data Science. This course is not available as an outside option.

Course content: The capstone course is a dissertation project that represents the final element in the construction of a student's data science master's education. The capstone project takes the form of a written thesis of up to 10,000 words, is based on an empirical investigation of a problem related to some social science field and using the tools of data science to leverage it. The topic will be developed with and agreed to by the student's supervisor, and developed throughout the research design seminar.

Formative coursework: Each student will be required to give a short presentation outlining the subject of his/her project and the proposed argument of the project in a session organised for all students during ST.

Assessment: Dissertation (100%, 10000 words) post-summer term.

MY499

Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Indraneel Sircar COL7.04
Dissertation supervisors.

Availability: This course is compulsory on the MSc in Social Research Methods. This course is not available as an outside option.

Course content: Students are required to write a 10,000 word dissertation. The dissertation is based on an empirical investigation of an issue relevant to the programme content and on a topic within the field covered by their specialist subject and agreed with their supervisor.

Formative coursework: Each student will be required to give a short presentation outlining the subject of his/her dissertation and the proposed argument of the dissertation in a session organised for all students during ST.

Assessment: Dissertation (100%, 10000 words) post-summer term.

MY4M1

Foundations of Social Research 1

This information is for the 2020/21 session.

Teacher responsible: Dr Alasdair Jones, Dr Indraneel Sircar and Prof Jonathan Jackson

MY400: Dr Alasdair Jones

MY421: Dr Aliya Rao (MT) and Dr Chana Teeger (LT)

MY451: Dr Indraneel Sircar (MT) and Prof Jon Jackson (LT)

Availability: This course is available on the MSc in European Studies (Research), MSc in International Political Economy (Research) and MSc in International Relations (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course is designed to give students a

good introduction to quantitative and qualitative methods and to acquaint them with the strengths and limits of different methodologies. The course has three main components:

1 MY451 **Introduction to Quantitative Analysis** (MY451M in Michaelmas Term or MY451L in Lent Term) - this course is intended for students with no previous experience of quantitative methods or statistics. Students who have already studied statistics and data analysis should take MY4M2.

2 MY400 **Fundamentals of Social Science Research Design**

3 MY421 **Qualitative Research Methods** (MY421M in Michaelmas Term or MY421L in Lent Term)

Teaching: See separate course outlines.

Formative coursework: See separate course outlines.

Indicative reading: See separate course outlines.

Assessment: Project (33%, 3000 words), research design (20%) and take-home assessment (26%) in the ST.

Class participation (4%) and research proposal (10%) in the MT. Continuous assessment (7%) in the MT and LT.

Students registered on MY4M1 will be assessed as follows:

MY400: research proposal (1500 words due in MT, 10%), research design (4000 words due in ST, 20%), seminar participation (ongoing in MT, 4%)

MY421: project (3000 words due in ST, 33%)

MY451: take-home assessment (due in ST, 26%), continuous assessment (ongoing in MT or LT, 7%)

MY4M2

Foundations of Social Research 2

This information is for the 2020/21 session.

Teacher responsible: Dr Alasdair Jones, Dr Daniele Fanelli and Dr Indraneel Sircar

MY400: Dr Alasdair Jones

MY421: Dr Aliya Rao (MT) and Dr Chana Teeger (LT)

MY452: Dr Daniele Fanelli (MT) and Dr Indraneel Sircar (LT)

Availability: This course is available on the MSc in European Studies (Research), MSc in International Political Economy (Research) and MSc in International Relations (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This programme is designed to give students a good introduction to quantitative and qualitative methods and to acquaint them with the strengths and limits of different methodologies. The course has three main components:

1 **MY452 Applied Regression Analysis.** This course is intended for students with some previous experience of quantitative methods or statistic, as described in the prerequisites for MY452. Students who have not previously studied quantitative methods or statistics should take MY4M1. The course can be taken either in MT (as MY452M) or in LT (as MY452L).

2 **MY400 Fundamentals of Social Science Research Design**

3 **MY421 Qualitative Research Methods** (either MY421M in Michaelmas Term or MY421L in Lent Term).

Teaching: See separate course outlines.

Formative coursework: See separate course outlines.

Indicative reading: See separate course outlines.

Assessment: Project (33%, 3000 words), research design (20%) and take-home assessment (26%) in the ST.

Class participation (4%) and research proposal (10%) in the MT. Continuous assessment (7%) in the MT and LT.

Students registered on MY4M2 will be assessed as follows:

MY400: research proposal (1500 words due in MT, 10%), research design (4000 words due in ST, 20%), seminar participation (ongoing in MT, 4%)

MY421: project (3000 words due in ST, 33%)

MY452: take-home assessment (due in ST, 26%), continuous assessment (ongoing in MT or LT, 7%)

PB400 Not available in 2020/21

Psychological and Behavioural Science

This information is for the 2020/21 session.

Teacher responsible: Dr Alex Gillespie

Availability: This course is compulsory on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

PB400 is a compulsory component of courses: PB401

Contemporary Social and Cultural Psychology; PB402

Organisational and Social Psychology; PB403 Psychology of

Economic Life; PB404 The Social Psychology of Communication;

PB405 Foundations in Behavioural Science.

Course content: The course provides a broad introduction to social, cultural and organisational psychology, and behavioural science, through the lens of cutting-edge research conducted by PBS faculty. Although the topics of research will be diverse, varying year-by-year, the course will draw out the core themes and debates that constitute the current state of the art.

The entry point for each lecture will be ongoing research conducted by faculty within the Department of Psychological and Behavioural Science. Through research on a wide range of phenomena, fundamental and cross-cutting concepts will be introduced, such as: attitudes, beliefs, common sense, communication, context, cultural evolution, embodied cognition, entrepreneurship, group work, inequality & social stratification, leadership, motivation, narratives, organisational culture, power & status, science, social change, social identity, values and wellbeing. The common theme across the course is that the major problems we face today are created by human behaviour. Thus, understanding how people think and act provides our best basis for intervening in those problems. Secondary themes will include: the importance of the micro context in shaping thought and behaviour; the role of institutions, social structures and culture in shaping behaviour more generally; the scope for cultural variation between companies, groups and historical periods; the need for diverse methods and original theory; and, complementarity between lab and field research.

The course will also introduce the debates that are occurring at the forefront of research. Faculty will discuss the pushes and pulls of big data vs. small data and disciplinary vs. inter-disciplinary. The relative merits of psychological vs. behavioural interventions will be debated. And, in the ongoing tension between applied vs. fundamental research, faculty will question whose interests are being served by changing human behaviour.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT.

Formative coursework: A 500 word annotated bibliography for any 2 readings from the first 3 lectures (250 words for each annotated reference). For each reading in the bibliography there should be: 1) the reference in APA style; 2) a concise summary; 3) an evaluation, comment, and/or question that may create links between readings and/or literature in the core course.

Indicative reading: Hogg, M., & Vaughan, G. (2013) Social Psychology. Harlow: Pearson.

Assessment: A 1500 word annotated bibliography for any 6 readings from the fourth and subsequent lectures (250 words for each annotated reference). For each reading in the bibliography there should be: 1) the reference in APA style; 2) a concise summary; 3) an evaluation, comment, and/or question that may create links between readings and/or literature in the core course.

PB401

Contemporary Social and Cultural Psychology

This information is for the 2020/21 session.

Teacher responsible: Prof Sandra Jovchelovitch and Dr Alex

Gillespie

Availability: This course is compulsory on the MSc in Social and Cultural Psychology. This course is not available as an outside option.

Course content: The course presents and critiques selected topics in cultural and modern social psychology, and the interface between mind, society and culture, with a core focus on: 1) the relationship individual-society and 2) culture as a universal and as a particular context for human cognition, emotion and behaviour. In addition: cultural transmission; ontogenesis and sociogenesis; intersubjectivity, perspectivity; thought and language; action and joint intentionality; mediation and artefacts; culture and the cross-cultural; global identities; intergroup relations; self and community; theory and research relevant to different fields of application including communication, education, racism, and multiculturalism; health community development; social exclusion and disadvantage; mass media, amongst others. Topics are explored at different levels of analysis of social and cultural psychology: ontogenetic (individual self); sociogenetic (social interaction, inter-group relations); phylogenetic (evolutionary history of homo sapiens). Central to the syllabus is to sensitise and train students' to understand and manage cultural and societal variation in cognition, emotion and behaviour. Please note that fields of application and applied content may vary depending on faculty research.

Teaching: 20 hours of lectures, 10 hours of seminars and 10 hours of help sessions in the MT.

The help sessions will be formatted as an online interactive Q&A discussion.

Formative coursework: Students will be expected to produce formative coursework to support each summative assessment (1 x essay plan (1000 words) and 1 x annotated bibliography (500 words)). Both to be submitted in MT.

Indicative reading: M Tomasello, *The Cultural Origins of Human Cognition*. Harvard University Press, 1999. M Cole, *Cultural Psychology: A once and future discipline*. Palgrave Macmillan, 2011. J Israel & H Tajfel, *The Context of Social Psychology*, Academic Press, 1972. M Billig, *Arguing and Thinking: A Rhetorical Approach to Social Psychology*, CUP, 1987. K Deaux & G Philogene, *Representations of the Social*, Blackwell, 2001. R M Farr, *The Roots of Modern Social Psychology*, Blackwell, 1996. U. Flick, *The Psychology of the Social*. Cambridge University Press, 1998. H Tajfel, *Human Groups and Social Categories; Studies in Social Psychology*, CUP, 1981. J. Wertsch (ed.) *Culture, Communication and Cognition*. Cambridge University Press, 1985. In addition, reading lists on specific topics will be distributed during the course.

Assessment: Essay (80%, 4000 words) in the LT. Annotated bibliography (20%) in the MT.

PB402

Organisational Social Psychology

This information is for the 2020/21 session.

Teacher responsible: Dr Lucia Garcia, Dr Ilka Gleibs and Dr Tom Reader

Availability: This course is compulsory on the MSc in Organisational and Social Psychology. This course is not available as an outside option.

Course content: The course addresses both the social psychology of organisations and social psychological processes within

organisations. It also provides multidisciplinary coverage of the organisational contexts in which social psychologists may work in a variety of professional domains. A basic familiarity with social psychological methods is assumed, but their application within organisational processes and contexts will be examined in detail within the course. Issues and techniques in organisational analysis, discourse, decision-making, and change management are covered with emphasis on their social psychological aspects.

Lectures and seminars will cover key social psychological concepts and theories and their application to the understanding of organisations and the implementation of change processes. The topics covered will include: 1) Introduction: critique of the tradition and logic underlying organisational psychology; history and frameworks in organisational analysis; "Scientific" management; Taylorism and Fordism; the Human Relations movement and the Socio-Technical approach; 2) Frameworks for analysis: for example, the cultural image of organisations; culture and identity in organisations; power, knowledge and organising; 3) People organising: for example, motivation; work groups and teams; decision-making; leadership, networking and collaborative work; 4) Implications for practice: for example, managing organisational change.

The course also operates a Bridging Theory and Practice seminar and workshop series which centres on discussion of practical and research applications in domains where organisational social psychological investigation and analysis play a leading role.

Topics will be presented by faculty or an external expert working practically in the domain.

Teaching: 15 hours of lectures, 10 hours of seminars and 10 hours of online Q&A sessions in the MT.

Additionally, 15 hours of Bridging Theory and Practice in Organisational and Social Psychology seminars/workshops across MT/LT/ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 case study in the LT.

Indicative reading: Reading lists on specific topics will be distributed during the course. Texts which are recommended for general use throughout the course are:

S Clegg & C Handy, *Studying Organisations: Theory and Method*, Sage, 1998; E H Schein, *Organisational Psychology* (3rd edn), Prentice Hall, 1988; G Morgan, *Images of Organisation* (2nd edn), Sage, 1997; A Bryman (Ed), *Doing Research in Organisations*, Routledge, 1988; Hosking, D.-M., & Morley, I. E. (1991). *A Social Psychology of Organizing*. Hemel Hempstead: Harvester Wheatsheaf. K E Weick, *Sense Making in Organisation*, Addison Wesley, 1995. A Furnham, *The Psychology of Behaviour at Work: The Individual in the Organisation*, Psychology Press, 2005; S Haslam, *Psychology in Organisations: The Social Identity Approach*, Sage, 2004. P Spector, *Industrial and Organisational Psychology: Research and Practice*, John Wiley & Sons, 2012.

Assessment: Essay (75%, 3000 words) in the MT. Case study (25%) in the LT.

- 1 x 3000 word essay (75%) submitted in MT
- 1 x 1500 word case study development (25%) submitted in LT

PB403

Psychology of Economic Life

This information is for the 2020/21 session.

Teacher responsible: Prof Saadi Lahlou
Dr Frédéric Basso

Availability: This course is compulsory on the MSc in Psychology of Economic Life. This course is not available as an outside option.

Course content: Psychology of Economic Life presents a social psychological approach different and complementary to the rational choice models which depict economic actors as information processors whose behaviour can be understood independently of specific contexts.

Framed by our distinctive approach to economic psychology (articulating history of thought and contemporary analyses),

The course pays particular attention to the social environments that enable and support positive behaviour change in settings characterised by cultural diversity, a need for sustainability and alternative models to growth.

Beyond Homo Economicus, we consider Homo Sapiens with its rationality, but also with its embodied, emotional, social and cultural dimensions as well as the cognitive characteristics and drives inherited from evolution. Our framework acknowledges the importance of context and socio-technical constraints but uses psychology to explain social-psychological aspects of economic phenomena.

The problem addressed by the Psychology of Economic Life is therefore to explore new ways of constructing sustainable Production-Consumption Systems, and to manage the transition from the current state to a more sustainable one, taking into account actual humans (Homo Sapiens) rather than Homo Economicus. This exploration must be informed by a realistic psychology, with a critical but practical, constructive approach and concrete application to real cases, which is the object of this course.

Teaching: Michaelmas Term: 20h of lectures; 8 x weekly seminar sessions of 2 hours and 1 x workshop of 3 hours; in Lent Term: 6 hours of lectures, 4 hours of seminars and 1 workshop of 3 hours.

Formative coursework: Students will be expected to produce two PB403 mini-essays that precede each summative assessment.

Indicative reading: There is no single text for PB403 but one may find the following texts useful.

Diamond, J. (2005). *Collapse. How societies choose to fail or succeed*. New York: Penguin Books. Farr, R. M. (1997). "The new economic mind: The social psychology of economic behavior: A. Lewis, P. Webley, and A. Furnham (eds.)" Book review. *Journal of Economic Psychology*, 18(6), 713-717. Goffman, E. (1959). *The presentation of self in everyday life*. New York: Doubleday Anchor books. Himmelweit, H. T. & Gaskell G. (1990). *Societal psychology*. London: Sage Publications, Inc. Johansson, T. (2000). *Social Psychology and Modernity*. Buckingham & Philadelphia: Oxford University Press. Kahneman, D. (2011). *Thinking, fast and slow*. New York: Farrar, Straus and Giroux. Lahlou, S. (2017) *Installation Theory. The societal construction and regulation of individual behaviour*. Cambridge: Cambridge University Press. Laland, K. N., & Brown, G. R. (2011). *Sense and nonsense: Evolutionary perspectives on human behaviour*. Oxford University Press. Lewis, A. (Ed.). (2008). *The Cambridge Handbook of Psychology and Economic Behaviour*. Cambridge: Cambridge University Press. Lewis, A., Webley, P., & Furnham, A. (1995). *The New Economic Mind*. Hemel Hempstead: Harvester/ Wheatsheaf Books. Mead, G. H. (1934). *Mind, self & society: from the standpoint of a social behaviorist*. Chicago: The University of Chicago press. Thaler, R. H., & Sunstein, C. R. (2008). *Nudge: Improving decisions about health, wealth, and happiness*. New Haven & London: Yale University Press. Webley, P., Burgoyne, C., Lea, S., & Young, B. (2001). *The Economic Psychology of Everyday Life*. Hove & Philadelphia: Psychology Press

Assessment: Essay (50%, 2000 words) in the MT.

Essay (50%, 5000 words) in the LT.

The 2000-word PB403 essay is an individual essay which will be marked separately. The 5000-word PB403 essay is written in groups, which will be marked collectively (i.e. all students in one group will receive the same mark)

PB404

The Social Psychology of Communication

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Bauer and Dr Jennifer Sheehy-Skeffington

Availability: This course is compulsory on the MSc in Social and Public Communication. This course is not available as an outside option.

Course content: The course examines core theories towards a

social psychology of communication. Issues raised will refer to verbal and non-verbal, face-to-face, rumours and mass mediated, as well as private and public, communal and strategic forms of communication. The second half of the course will provide an overview of applied communication research in various professional areas of public communication.

Theories of communication covered in the course include evolutionary theory, classical rhetoric, diffusion research, pragmatics and relevance theory, semiotics and system theory and the theory of communicative action. Issues will be raised as to the critical analysis and the design of communicative action. Issues will be raised as to the critical analysis and the design of communication efforts in professional fields such as business corporations, NGOs, scientific professional bodies, health promotion, governments and political parties, police campaigns, and international organisations.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: 1 x formative essay and 1 x annotated bibliography to correspond with each summative assessment. Both to be submitted in MT.

Indicative reading: No one book covers the entire syllabus; students will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course. J Habermas, *Theory of Communicative Action*, Vol 1 + 2, Polity Press, 1997. R Heath & B Jennings, *Human Communication Theory and Research: Concepts, Contexts, and Challenges* (2nd edn), Lawrence Erlbaum, 2000. A Mattelart & Mattelart, *Theories of Communication: a Short Introduction*, Sage, 1998. D McQuail, *McQuail's Mass Communication theory* (4th edn), Sage, 2000. D Hook, B Franks, MW Bauer, (eds) *The Social Psychology of Communication*, London, Palgrave, 2011. R Rice & C Atkin, *Public Communication Campaign*, Sage, 2000; E Rogers, *Diffusion of Innovation*, Free Press, 1995. D Sperber & D Wilson, *Relevance: Communication and Cognition*, Cambridge, 1995.

Assessment: Essay (80%, 4000 words) and annotated bibliography (20%) in the MT.

Two assessments to be submitted in MT. 1 x essay (4000 words) and 1 x bibliographic exercise (1000 words).

PB405

Foundations in Behavioural Science

This information is for the 2020/21 session.

Teacher responsible: Prof Liam Delaney and Dr Chris Krekel

Availability: This course is compulsory on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: This course aims to introduce students to the main concepts and tools of behavioural science, drawing on the most recent evidence from economics, psychology, and neuroscience to explain what motivates action and human behaviour. To achieve this aim, the course will focus on a variety of topics integral to the discipline, such as: 1) what is behavioural science?; 2) choices under risk and uncertainty; 3) intertemporal decisions and social and moral preferences; 4) biases, heuristics, and rules of thumb; 5) the role of emotions in decision-making; 6) norms in decision-making; 7) dual-process models of behaviour; 8) the power of nudges; 9) compensating behaviours; and 10) ethical considerations.

Teaching:

- 10 x 1 hour lectures covering the core topics in behavioural science in MT
- 10 x 1.5 hour seminars which allow for an in-depth discussion and analysis of lecture content in MT
- 5 x 1602160hour160faculty discussions on160cutting-edge issues in behavioural science in MT

Formative coursework: Students' will complete one opinion piece (op-ed) of 1,500 words on a topic covered in PB405, to be submitted in MT.

Indicative reading: Books

Ariely, D. (2010). *Predictably Irrational: The Hidden Forces That Shape Our Decisions*. New York: HarperCollins.

Assessment: Essay (80%, 4000 words) and other (20%) in the LT. Students will have two PB405 summative assignments: one essay of 4,000 words and one opinion piece (op-ed) of 1,500 words. Both to be submitted in LT.

PB410**Dissertation**

This information is for the 2020/21 session.

Teacher responsible: Dr Frederic Basso

Availability: This course is compulsory on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

Course content: The dissertation is an empirical investigation, carried out by the student, under the supervision of a member of staff. Research topics and methodologies vary considerably, but they must relate to the student's MSc Programme. All dissertation topics will need to be approved by a supervisor who is a faculty member of the Department of Psychological and Behavioural Science. The supervisor will advise the student, help provide information and bibliography, and provide feedback on the research.

Teaching: 10 hours of seminars in the LT. 7 hours of seminars in the ST.

Students will be supervised primarily in group laboratory meetings/seminars; individual support will also be available as appropriate and necessary.

All students should attend all components timetabled as part of PB411

Formative coursework: Students will receive formative feedback from their supervisor on the following coursework (1,000 max words): A Dissertation Progress Report

Assessment: Dissertation (100%, 10000 words) post-summer term.

PB411**Methods for Social Psychology Research: Qualitative and Quantitative Methods**

This information is for the 2020/21 session.

Teacher responsible: Dr Ilka Gleibs

Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option. All components of this course are compulsory for students taking

- MSc in Organisational Social Psychology
- MSc in Psychology of Economic Life
- MSc in Social and Cultural Psychology
- MSc in Social and Public Communication

Course content: This course is for MSc students in the Department of Psychological and Behavioural Science. It will: 1) provide an overview of methodological issues for psychological research; 2) cover core skills in research design in Psychology; and 3) provide training in core psychological methods of analysing quantitative and qualitative data.

By the end of the course, as a whole, students will be equipped with methodological skills that will enable them to conduct empirical research for their MSc dissertation and research in a variety of real world contexts.

Teaching: Teaching takes place in the MT, LT and ST. The course has four components:

- 13 hours of lectures on methodological issues and research design, as preparation for completing the course, PB410 Dissertation (LT)
- MY421M Qualitative Research Methods (MT)
- MY465 Intermediate Quantitative Analysis (MT)
- A series of non-compulsory and non-assessed specialist workshops in LT and ST on specific research methods that students can choose to attend for preparation of their dissertation.

Formative coursework: Students will follow the formative work requirements on the MY course(s) that they take under each stream.

Indicative reading:

- Bauer, M. and Gaskell, G. (2000) *Qualitative researching with text, image and sound - a practical handbook* London, Sage
- Breakwell, G. Foot, H. and Gilmour. (1988) *Doing Social Psychology: Laboratory and Field Exercises*. Cambridge: Cambridge University Press.
- Haslam, S.A., & McGarty, C. (2014). *Research Methods and Statistics in Psychology*. London: Sage.
- Miell, D. and Wetherwell, M. (1998) *Doing Social Psychology*. Milton Keynes: Open University Press.

Assessment: Report (50%) in the LT.

Continuous assessment (10%) in the MT.

Online assessment (40%).

Three-hour online assessment (40%) in the January exam period.

Report (50%) in the LT.

Continuous assessment (10%) in the MT.

PB411: Not assessed

MY421: 50% 3,000 word report (LT)

MY465: 40% Three-hour online assessment (January Exam Period). 10% homework and participation throughout MT.

PB413 Half Unit**Experimental Design and Methods for Behavioural Science**

This information is for the 2020/21 session.

Teacher responsible: Dr Matteo M Galizzi and Dr Dario Krpan

Availability: This course is compulsory on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: Behavioural science is the scientific study of

human behaviour, and it combines research techniques from psychology and economics. The course offers an integrated training in advanced behavioural science methods by introducing students to state-of-the-art techniques that stretch across the spectrum of both disciplines.

The course covers the following topics: randomised controlled experiments in behavioural science, causality, selection bias; online, lab, and field experiments in behavioural science; principles of experimental design; transparency and reproducibility of behavioural science research, pre-registration, pre-analysis plan; best practices in modern behavioural science experiments; tests of hypotheses and sample size calculations for experiments in theory and practice; determining evidential value of behavioural science research, p-curve analysis; measuring preferences, attitudes, beliefs, willingness-to-pay; behavioural game theory and experimental games of strategic interaction; designing behavioural priming experiments and measures that tap into implicit cognition; state-of-the-art physiological research techniques; regression analysis of experimental data in theory and practice; understanding the mechanisms behind behavioural effects by employing experimental-causal-chain, measurement-of-mediation, and moderation-of-process designs.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Additionally, there will be lab help sessions in collaboration with PB4A7

Formative coursework: Students will be expected to produce 1 presentation in the LT.

For the formative assignment, students will work in small groups (3-4 students) to produce a presentation in which they will need to propose a design and implementation of a behavioural science experiment entailing the use of (at least) two different software packages introduced in the course.

Assessment: Report (100%) in the ST.

Students will be expected to write a 3,000 word report. The reports will need to be submitted individually and will require students to elaborate on the group-work undertaken as part of the formative assignment.

PB414

Advanced Methods for Social Psychology Research: Qualitative and Quantitative Methods

This information is for the 2020/21 session.

Teacher responsible: Dr Ilka Gleibs

Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option. Students will have to choose between PB411 and PB414.

Course content: This course is for MSc students in the Department of Psychological and Behavioural Science. It will: 1 provide an overview of methodological issues for psychological research; 2 cover core skills in research design in Psychology; and 3 provide training in core psychological methods of analysing quantitative and qualitative data.

By the end of the course as a whole, students will be equipped with methodological skills that will enable them to conduct empirical research for their MSc dissertation and in a variety of real world contexts.

Teaching: Teaching takes place in the MT, LT and ST. The course has four components:

- 13 hours of lectures on methodological issues and research design, as preparation for completing the course, PB410 Dissertation (LT)
- MY421M Qualitative Research Methods (MT)
- MY452M Applied Regression Analysis (MT)
- A series of non-compulsory and non-assessed specialist workshops in LT and ST on specific research methods that students can choose to attend for preparation of their dissertation.

Formative coursework: Students will follow the formative work requirements on the MY course(s) that they take under each stream.

Indicative reading:

- Bauer, M. and Gaskell, G. (2000) Qualitative researching with text, image and sound - a practical handbook London, Sage
- Breakwell, G. Foot, H. and Gilmour. (1988) Doing Social Psychology: Laboratory and Field Exercises. Cambridge: Cambridge University Press.

- Miell, D. and Wetherwell, M. (1998) Doing Social Psychology. Milton Keynes: Open University Press.
- Agresti, A and Finlay, B, Statistical Methods for the Social Sciences. A course pack will be available for download online. Additional reading will be recommended.

Assessment: Report (50%) in the LT.

Take-home assessment (40%) in the ST.

Continuous assessment (10%) in the MT.

- PB414: Not assessed
- MY421: 50% 3,000 word report (LT)
- MY452M: 40% take-home assessment (ST) and 10% continuous assessment (MT)

PB415 Half Unit Not available in 2020/21 Behavioural Science

This information is for the 2020/21 session.

Teacher responsible: Prof Paul Dolan QUE.3.08

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Environmental Economics and Climate Change, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other

programmes where regulations permit.

This course is available as an outside option to students on other programmes where regulations and room sizes permit.

This is a capped course. In teaching Week 1 places will be allocated to students from the Department of Psychological and Behavioural Science on a first come first served basis. At the start of Week 2 any remaining places will be allocated to students from other departments, again on a first come first served basis.

Course content: This course aims to introduce students to the main concepts and tools of behavioural science. To achieve this aim, the course is based around ten lectures covering: 1) what is behavioural science?; 2) choices under risk and uncertainty; 3) intertemporal decisions; 4) social and moral preferences; 5) biases and heuristics and rules of thumb; 6) the role of emotions in decision making; 7) dual-process models of behaviour; 8) the power of nudges; 9) compensating behaviours; 10) ethical considerations.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

There are ten topics, and the seminars allow for in depth discussion and analysis of the issues raised in the lectures.

Formative coursework: Students will be expected to produce 1 essay (1000 words) in the MT.

Indicative reading: Rabin, M. (1998). Psychology and Economics. *Journal of Economic Literature*, 36, 11-46. Weber, E.U., and Johnson, E.J. (2009). Mindful judgment and decision making. *Annual Review of Psychology*, 60, 53-85. Loewenstein, G., Weber, E.U., Hsee, C.K., and Welch, N. (2001). Risk as feelings. *Psychological Bulletin*, 127, 267-286. Dolan P, Hallsworth M, Halpern D, King D, Metcalfe R, Vlaev I, Influencing behaviour: the mindspace way, *Journal of Economic Psychology*, 33, 1, 264-277, 2012. Thaler, R. and Sunstein, C. (2003) Libertarian paternalism, *American Economic Review*, 93, 2, 175-179.

Assessment: Essay (100%, 2500 words) in the LT.

PB416 Half Unit Not available in 2020/21 Cognition and Culture

This information is for the 2020/21 session.

Teacher responsible: Prof Bradley Franks QUE.3.05

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Anthropology (Religion in the Contemporary World), MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course examines recent directions in research relating to the relationships between mind and culture. Specific content will include a variety of theoretical issues, for example: relationships between social facts and psychological facts; naturalistic and non-naturalistic concepts of culture; symbolic culture; cultural relativity and universals; evolutionary and developmental constraints on the relations between mind and culture; communication, cultural transmission and change. These issues will be discussed with reference to specific domains of investigation, such as: emotions, representations of religion, race and natural kinds; pragmatics and communication; and social divisions of labour in meaning and representation, including deference and expertise.

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 3 presentations, 1 quiz and 1 other piece of coursework in the LT. Will consist of:

- a plan for an answer to an essay or case study question
- group presentations of core readings over the term
- a self-administered multiple choice quiz

Indicative reading: Detailed references and a synopsis of lectures and class topics are distributed in the first lecture of the series, and

are available in S315 and in Outlook/Public Folders/Departments/Social Psychology. The following are of general use:

- S Atran, *Cognitive Foundations of Natural History*, Cambridge University Press, 1990;
- P Boyer, *The Naturalness of Religious Ideas*, University of California Press, 1996;
- D E Brown, *Human Universals*, McGraw-Hill, 1991;
- D M Buss & D T Kenrick, *Evolutionary Social Psychology*, 1998, cited in D T Gilbert, S T Fiske & G Lindzey (Eds), *The Handbook of Social Psychology*, Vol 2, McGraw-Hill, pps. 982-1026;
- M Cole, *Cultural Psychology*, Harvard University Press, 1996;
- S T Fiske et al, *The Cultural Matrix of Social Psychology*, cited in D T Gilbert, S T Fiske & G Lindzey (Eds), *The Handbook of Social Psychology*, Vol 2, McGraw-Hill;
- B Franks, *Culture and Cognition: Evolutionary Perspectives*, Palgrave MacMillan, 2011;
- L Hirschfeld, *Race in the Making: Cognition, Culture and the Child's Construction of Social Kinds*, MIT Press, 1996;
- R Nisbett & D Cohen, *The Culture of Honor: The Psychology of Violence in the South*, Westview Press, 1995;
- P B Smith & M H Bond, *Social Psychology Across Cultures* (2nd edn), Prentice Hall, 1998;
- D Sperber, *Explaining Culture*, Cambridge University Press, 1996.

Assessment: Coursework (100%, 3000 words) in the LT.

Students may choose to write **either**

- a 3000 word essay **or**
- a 3000 word case study.

PB417 Half Unit Consumer Psychology

This information is for the 2020/21 session.

Teacher responsible: Dr Liora Moskovitz

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The objectives of the course are: 1) to provide students with an understanding of the social, psychological and cognitive processes underpinning the consumption of goods and services and their impact; 2) to explore alternative ways of relating to users/consumers than those based solely on market and competition and use these understandings to develop/move towards alternative sustainable routes for consumption; and 3) to prepare students to build better business models (e.g. social entrepreneurship, more sustainable, and so on) for the provision of goods and services.

The course will address the psychology of consumption at different levels of analysis: individual, group and societal. It will ground this psychology in the relevant literature, and teach students the field's foundational theories, allowing them to develop a mental model of human behaviour as it relates to consumption. This is not a standard marketing or consumer research course. It is not about brand territories and market shares, but about how understanding various psychological processes in conjunction with these forces can provide us with tools to improve the world. How can we leverage consumer psychology to solve our sustainability problem?

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: 1 x essay plan submitted in the LT.

Indicative reading:

- Baca-Motes, K., Brown, A., Gneezy, A., Keenan, E. A., & Nelson, L. D. (2012). Commitment and behavior change: Evidence from the field. *Journal of Consumer Research*, 39(5), 1070-1084.

- Waring, T. M., Goff, S. H., & Smaldino, P. E. (2017). The coevolution of economic institutions and sustainable consumption via cultural group selection. *Ecological Economics*, 131, 524–532.

Additional readings will be recommended throughout the course.

Assessment: Essay (100%, 3000 words) in the LT.

The assignment is part of the learning process: analysing a real case and making sound recommendations will help to provide students with the transferable skills necessary to make the world a better place. In the first part, 'memorandum' (1,000 words), you will be asked to prepare a memorandum or open letter to the head of an organisation of your choice, with recommendations to improve the organisation by making it more sustainable. The recommendations must be realistic – they must be achievable and make business sense. In the second part of the essay, 'justification' (2,000 words), you will justify the specific recommendations presented in the memorandum with reference to theoretical and empirical literature and concepts. We encourage the best essays to be published as open letters.

PB418 Half Unit Corporate Communications

This information is for the 2020/21 session.

Teacher responsible: Dr Ben Shenoy

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Behavioural Science, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology, MSc in Social and Public Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Corporate communications is about the coordination of an organisation's internal and external communication, with the overall purpose of establishing and maintaining a favourable reputation for that organisation in the eyes of relevant stakeholder groups. As such, organisations' corporate communications affect each one of us in various guises: as employees, customers, citizens, investors or, more generally, as observers of today's world. It is therefore essential to develop a critical understanding of the practice of corporate communications. The field of corporate communications is grounded in professional practice, and has its roots in a variety of disciplines.

This course aims to bridge theory and practice by analysing contemporary cases of organisations handling communications challenges through the perspective of key organisational and psychological concepts. This approach will shed light on how key concepts and theories are having to adapt to explain how modern corporate communications is evolving.

Teaching: 15 hours of lectures and 5 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 case study in the LT.

Indicative reading: J Cornelissen, *Corporate Communications: A Guide to Theory and Practice*. Sage, 2020. J M T Balmer & A Stephen (eds), *Revealing the Corporation: Perspectives on Identity, Image, Reputation and Corporate Branding*, Routledge, 2002. Chapters 5, 6, 7, 8, 9 and 15.

Assessment: Essay (100%, 3000 words) in the LT.

PB419 Half Unit Not available in 2020/21 Creativity and Innovation

This information is for the 2020/21 session.

Teacher responsible: Dr Alex Gillespie QUE.3.03

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Marketing, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

This course is available to any graduate student within the Department of Psychological and Behavioural Science. This course is available as an outside option to students' on other programmes where regulations permit.

Pre-requisites: An undergraduate degree in a social science related discipline or equivalent.

Course content: This course examines creativity and innovation from a social psychological standpoint. The first lectures of the course examine creativity, focusing on the social conditions which lead to new ideas. Then we will examine the way in which new ideas and technologies are instituted and resisted. The role of play and materiality in creative production are discussed next, followed by creative problem solving and the societal transmission of innovation. The course will end with a focus on societal creativity, utopias and imagining the future. Guiding questions will be: How do new ideas and technologies come about? What social contexts are conducive to creativity and innovation? Can the resistance to innovation lead to innovation? What is the human imagination? Why do humans enjoy play, games and fiction? What leads to insightful problem solving? How does perspective-taking help us understand if something new is creative, productive or useful? The course will cover the social conditions (i.e., face-to-face or online, one-to-one or group, autocratic or democratic, specialisation or integration, etc.) conducive to creativity and innovation, including the social conditions for socialisation creative individuals and the social and institutional factors which enable productive novelty to be recognised and instituted. Specific topics will include: theories of creativity, play & imagination, insight

and problem solving, identifying good ideas, materiality, cultural evolution, the resistance to innovation, user innovation, utopias and how people imagine the future.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: Bauer, M. (2014). *Atoms, Bytes and Genes: public resistance and techno-scientific responses*. New York: Routledge. Bechtoldt, M.N., De Dreu, C.K., Nijstad, B.A., and Choi, H.S. Assessment: Essay (100%, 3000 words) in the LT.

PB420 Half Unit Not available in 2020/21 Current Communication Research

This information is for the 2020/21 session.

Teacher responsible: Prof Bradley Franks QUE.3.05

Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on degrees without a psychology or communications component may only attend subject to numbers, their own degree regulations and at the discretion of the teacher responsible.

Pre-requisites: None

Course content: The course content changes every year. It can either be a full thematic course or a collection of current research topics, and will involve contributions of staff members from the Department of Psychological and Behavioural Science and of visiting academics to the Department. The course provides research-led teaching on communication, using a range of theoretical approaches and addressing a wide variety of practical issues.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 3 presentations and 1 other piece of coursework in the LT.

Formative assessment involves:

i. ONE written plan for an answer to an essay question, selected from a range of topics

ii. THREE group presentations on core readings

Indicative reading: The reading list varies according to the particular contents taught in each year.

Indicative readings will be made available during MT

The reading list varies according to the particular contents taught in each year.

Indicative readings will be made available during MT

Assessment: Essay (100%, 3000 words) in the LT.

Summative assessment for this course comprises a 3000 word essay, submitted at the end of LT

PB421 Half Unit Happiness

This information is for the 2020/21 session.

Teacher responsible: Dr Christian Krekel CON.3.12

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course aims to introduce students to the main concepts and tools of the growing science of happiness, with a focus on applicability in policies across all sectors (government, private business, and the voluntary sector). To achieve this aim, the course is based on ten lectures covering: 1) what is happiness?; 2) evaluations of happiness; 3) experiences of happiness; 4) attention, adaptation, and mistakes; 5) happiness by design; 6) the narrative trap; 7) happiness in the corporate world; 8) policy appraisal using preferences; 9) policy appraisal using happiness; 10) happiness as the ultimate objective.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay (1000 words) in LT.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

PB422 Half Unit Health Communication

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Bauer

Availability: This course is available on the MSc in Behavioural Science, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Population Health, MSc in Health and International Development, MSc in Media, Communication and Development, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course centres on the application of societal psychology to the challenges of health communication in a global context. While considering both health and communication in their widest sense, we will focus on public debates and controversies involving 'health issues' in modern society. We will begin with an introduction to expert-based approaches to science and health communication, and consider health and illness in their wider societal context.

'Health' is a boundary object with many stakeholders: a major news value that evaluates scientific progress on health outcomes (health news); a criterion of societal modernisation and development (increasing life expectancy); the grievance of social movements against inequality (patient groups; AIDS campaign); a matter of risk communication in emergencies (epidemics, pandemics, nuclear accidents); a criterion to evaluate new technology on health risks (GM food, AI); an industrial sector (health business) and the NHS (public health systems); health is a life style (wellness); a consumer issue of food and service quality; 'unhealthy behaviour' inherits religious connotations (of 'sinning') in secular society; and health creates professional voices that enjoy high levels of trust and confidence as communicators in modern society (doctors, nurses, epidemiologists, pharmacists). The course examines different angles of the conversation of health in modern society and will enable participants to critically appraise health communication. Throughout, we will view individual studies of controversies in rapidly changing settings (Thalidomide, smoking & cancer, vaccinations, GM food, pandemics, quackery, pseudo-science, alternative medicine etc).

Through lectures, readings and seminar discussions, we will encounter theoretical debates about health-related communication and behaviours, and the processes through which communication impacts on health. At the same time, we will consider the implications of these debates for health promotion campaigns, learning about real-world examples through guest lectures, and gaining hands-on experience in appreciating, designing and critiquing health communication in the 21st century.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: Bauer MW (2015) *Atom, Bytes and Genes – techno-scientific responses to public resistance*, NY, Routledge. Berger, P. L., & Luckmann, T. Assessment: Essay (100%, 3000 words) in the LT.

PB424 Half Unit Not available in 2020/21 Organisational Life

This information is for the 2020/21 session.

Teacher responsible: Mr Barry Rogers

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Organisational Life has been turned upside down in recent years. In an increasingly volatile, uncertain, complex world disruptive technologies challenge taken-for-granted assumptions and established business models. Simultaneously, issues like climate change and Covid19 underscore the fragility of the system while also questioning the usefulness of many traditional approaches. This begs a simple, but fundamental, question - how do we make sense of these circumstances and equip ourselves to shape, lead and enable change?

The course will address a range of emerging organisational questions such as:

- What does it mean to manage and lead in an increasingly VUCA world?
- Why do we work? How do we engage five generations at work?
- Post 'Zoom' have we moved from the workplace to the 24/7 workspace? What does that mean for sustainable working lives?
- Organisational time(s) and the crisis in attention: how do we equip ourselves for the diminishing gap between stimulus and response?
- In the wake of MeToo where now for organisational equality, diversity and inclusion?
- Organisational purpose: how do organisations meaningfully relate to wider stakeholders
- Power, politics and navigating relationships – how do we mobilize resources to get things done?
- 'Showing up' in challenging times - what does the post-heroic leader look like?
- Beyond the 'ivory tower': how do we bridge organisational theory to practice?

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: One formative piece of coursework to be submitted in the LT.

Indicative reading: Berg, J. L. (2015). The role of personal purpose and personal goals in symbiotic visions. *Frontiers in Psychology*, 6. Choi, S. (2019). Breaking Through the Glass Ceiling: Social Capital Matters for Women's Career Success? *International Public Management Journal*, 22(2), 295–320. Hoffman, A. J. (2016). Reflections: Academia's Emerging Crisis of Relevance and the Consequent Role of the Engaged Scholar. *Journal of Change*

Management, 16(2), 77–96. Leroy, S. (2009). Why is it so hard to do my work? The challenge of attention residue when switching between work tasks. *Organizational Behavior and Human Decision Processes*, 109(2), 168–181. Moran, C. (2015). Time as a social practice. *Time & Society*, 24(3), 283–303. Paoli, D. D., Sauer, E., & Ropo, A. (2019). The spatial context of organizations: A critique of 'creative workspaces.' *Journal of Management & Organization*, 25(2), 331–352. Weick, K.E. (2003). 'Theory and Practice in the Real World' In: Tsoukas, H. & Knudsen, C. (eds.) *The Oxford Handbook of Organizational Theory*. London: OUP, pp 453–476. Wood, M., & Dibben, M. (2015). Leadership as Relational Process. *Process Studies*, 44(1), 24–47.

Assessment: Essay (100%, 3000 words) in the LT.

The essay is structured as a three-part process involving a practical topic of choice, a theoretical exploration of the practical issue and a 'translation' of theory back to a real-world setting. The logic is to enable students to bridge the gap between theory and practice in ways that are rigorous, relevant and connect with real world needs.

PB425 Half Unit

Organisations, Groups and Identity

This information is for the 2020/21 session.

Teacher responsible: Dr Ilka Gleibs

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students who come to this course without any background in social psychology are expected to familiarise themselves with the relevant literature. To this end, we strongly suggest that those students read the following books: Hogg, MA & Vaughan, G. (eds) (2017). *Social Psychology*. 8th edition. Harlow: Pearson
Brown, R. (2000). *Group processes: Dynamics within and between groups*. 2nd edition. Oxford: Blackwell Publisher.
Brown, R. & Peherson, S. (2019). *Group processes*. Oxford, UK: Blackwell.

Course content: In any successful organisation understanding group dynamics, identity processes, and interpersonal skills are an essential element and often provide a competitive advantage in managing organisations of all sorts. Thus, the dynamics within and between groups directly informs the ability of an organisation and organisational members to think, learn, and innovate together. This course provides students with a critical understanding of the different theories and practices associated with identity and group dynamics in organisational settings. The objectives of the course are two-fold:

1. To introduce past and present theories of identity and group dynamics by introducing concepts used by social and organisational psychologists to understand and improve organisational behaviour
2. To apply and critical evaluate how identity and group dynamics theory help us explain and predict real-life experiences in organisational settings and beyond.

The course aims at highlighting how a better understanding of key social and organisational psychological concepts can contribute to understanding and managing the effectiveness of groups in various organisational and social settings. Examples of topics that will be covered include: Why group dynamics?; Influence and power; Identity and inclusion; Collective behaviour; Importance of groups on mental and physical health; Performance and decision-making; Diversity management; Organisational change; Group dynamics and the internet.

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.

Indicative reading: Brown, R. & Peherson, S. (2019). *Group processes*. Oxford, UK: Blackwell. Forsyth, D. (2019). *Group dynamics*. 7th edition Cengage Learning. Haslam, S.A., (2004). *Psychology in Organisations. A Social Identity Approach*. London: Sage. Levi, D. (2013). *Group dynamics for teams*. Los Angeles: Sage Publications.

Assessment: Essay (100%, 3000 words) in the LT.

PB426 Half Unit Not available in 2020/21

Knowledge Processes in Organisations

This information is for the 2020/21 session.

Teacher responsible: Dr Lucia Garcia-Lorenzo QUE.3.23

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in Behavioural Science, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course explores organisations in the 21st century and the challenges they face. We particularly focus on what we can accomplish through the acquisition and creation of new management and organising knowledge; its sharing and transmission as well as how we can improve its use. We will explore the processes of knowing and learning and the varied ways in which they support people working in a number of contexts, from project teams within single organisations to inter-organisational partnerships, networks and alliances. We will work together in lectures, seminars and workshops to understand both theoretically and practically how we create, disseminate and share knowledge in all types of 21st century organisations and work settings.

Concretely, the course addresses the following questions :

1 What is organisational knowledge? Lectures will explore the differences and overlaps between personal, social/organisational and cultural knowledge and between the processes of learning and knowing.

2 How do we create new knowledge in organisations and work settings? To answer this question we will look into processes of creativity, innovation and entrepreneurship.

3 How can we efficiently share/transmit knowledge in organisations? The course will address the challenges generated through the use of new technologies in the work place, the use of stories and narratives as a mode of knowledge transmission, the development of collaborative practices, and power relations in organisations.

4 How do we 'store' and use current organisational and personal knowledge? To answer this question lectures will address the uses of organisational history and memory as well as look into how we practice knowledge in every day organisational work.

The focus of the course is both theoretical and practical. Students' will be expected to engage with both current theoretical debates and emerging practical issues in organisational life through lectures, seminars and practical workshops.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. Students will be expected to make extended use of the course intranet - for on-line discussions and group presentations.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: Reading lists will be provided for each topic, the following are introductory texts of general use: Amabile, T. A., & Khaire, M. (2008). *Creativity and the role of the leader*. Cambridge, MA: Harvard Business School Publishing; Davenport, T.H. & Prusak, L. (1998). *Working knowledge: How organisations manage*

what they know. Harvard Business Press; Drucker, P. (2014). *Innovation and entrepreneurship*. Routledge; Gabriel, Y. (Ed.). (2004). *Myths, stories, and organizations: Premodern narratives for our times*. Oxford University Press on Demand; Huxham, C., & Vangen, S. (2013). *Managing to collaborate: The theory and practice of collaborative advantage*. Routledge; Weick, K. E. (1995). *Sensemaking in organisations*. London: Sage.

"I have never let my schooling interfere with my education." Mark Twain. If you like to read/use social media, you might want to look beyond academic materials into these other sources of knowledge that explore topics we will discuss in the course: Bregman, R. (2017). *Utopia for realists: And how we can get there*. Bloomsbury Publishing; Clay, A., & Phillips, K. M. (2016). *The Misfit Economy: Lessons in Creativity from Pirates, Hackers, Gangsters and Other Informal Entrepreneurs*. Simon and Schuster; Frayne, D. (2015). *The refusal of work: The theory and practice of resistance to work*. Zed Books Ltd.; Harari, Y. N. (2018). *21 Lessons for the 21st Century*. Random House; How leaders use storytelling to share knowledge and influence followers: e.g. Obama's fire-up-ready-to-go story: <https://www.youtube.com/watch?v=5AhRqg0ADbk>; IDEO CEO Tim Brown talks about the powerful relationship between creative thinking and play: https://www.ted.com/talks/tim_brown_on_creativity_and_play?referrer=playlist-the_creative_spark

Assessment: Essay (100%, 3000 words) in the LT.

PB427 Half Unit Not available in 2020/21 Organisational and Social Decision Making

This information is for the 2020/21 session.

Teacher responsible: TBC

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Behavioural Science, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology, MSc in Social and Public Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course teaches theory and engages with research from the field of organisational and social decision-making. It is primarily focused on high-risk organisational settings, and explores contexts where there is uncertainty, high-consequences for failure, and complex social systems. The course provides a historical introduction to decision-making, and introduces the core concepts used by social psychologists to understand (and improve) decision-making processes in organisations. It draws upon the social, cognitive and organisational psychology literatures, and considers the core concepts and tools used to understand, research, and support decision-making in organisations. These theories and tools are contextualized through empirical and case study examples taken from domains such as finance, healthcare, the energy industry, government, and the military. Students will be encouraged to take a critical perspective, and to consider how the principles taught on the course can be applied to (and used to improve) a variety of social or organisational scenarios. The course will cover psychology (or 'Human Factors') concepts such as: intuitive and analytical forms of decision-making; individual traits and cognitive factors that influence decision-makers (e.g. biases and emotions); human error and decision-failures; rule breaking; and group decision-making processes (e.g. teamwork, leadership). It will teach methods for analysing decision errors, identifying decision-making competencies, observing decision-making, and supporting group decision processes.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 case study in the LT.

Indicative reading: Brown, R. V. (2005). *Rational choice and judgment: Decision analysis for the decider*. Wiley. Furnham, A. (2005). *The Psychology of behaviour at Work*. Psychology Press. Kerr, N., & Tindale, R. S. (2004). *Group performance and decision-making*. *Annual Review of Psychology*, 55, 623-655. Klein, K., Ziegert, J. C., Knight, P., & Xiao, Y. (2006). *Dynamic delegation: Shared, hierarchical, and deindividualized leadership in extreme action teams*. *Administrative Science Quarterly*, 51, 590-621. Koehler, D., & Harvey, H. (2007). *Handbook of judgment and decision-making*. Blackwell. Lipshitz, R., Klein, G., Orasanu, G., & Salas, E. (2001). *Taking stock of naturalistic decision making*. *Journal of Behavioural Decision Making*, 14, 331-352. Mellers, B., Schwartz, A., & Cooke, A. (1998). *Judgement and decision-making*. *Annual Review of Psychology*, 49, 447-477.; Reason, J. (1990). *Human error*. New York: Cambridge University Press. Reason, J. (1997). *Managing the risks of organizational accidents*. Aldershot, Ashgate.

Assessment: Essay (100%, 3000 words) in the LT.

PB428 Half Unit

Political Psychology: Inequality & Intergroup Relations

This information is for the 2020/21 session.

Teacher responsible: Dr Jennifer Sheehy-Skeffington

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course looks at how psychology shapes political behaviour, and how sociopolitical contexts shape psychology. It introduces students to political psychology through three lenses, focusing on individual attitudes, intergroup dynamics, and ideological discourse. It then applies these lenses to the understanding of contemporary issues concerning intergroup inequality. We will explore the psychosocial processes underpinning racism and prejudice, and will ask why some conflicts are so intractable, and why some people turn to extremism and violence. We will consider political participation in its conventional and non-conventional forms, asking why people vote the way they do, and when they will turn to the streets to protest. We will also apply a political psychology lens to examine contemporary challenges such as migration, populism, and economic inequality. Students will be equipped with the conceptual tools to consider the psychological antecedents and consequences of inequality in its various forms: to understand why intergroup hierarchy is so persistent, and how it might change. Lectures aim to achieve a balance between theoretical and applied issues, critically investigating the ways in which psychology can enhance our understanding of intergroup relations and inequality, and also contribute to broader social and political debates. Through integrating evolutionary, cognitive, social, ideological, and societal perspectives, we will be in a position to take stock of the field of political psychology and where it might go.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: One short response paper (500-1000 words), that can be developed into an essay plan or blog post.

Indicative reading: Augoustinos, M. & Reynolds, K. (2001). *Understanding Prejudice, Racism and Social Conflict*. London: Sage. Bar-Tal, D. Assessment: Essay (100%, 3000 words) in the LT.

PB429 Half Unit Not available in 2020/21 Science Communication and Controversies

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Bauer QUE.3.04

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Consider vaccinations, climate change, nuclear energy, CRISPR or genetically-modified crops and food. Regarding these developments, science is a cultural authority and a voice of reason, but increasingly also a protagonist. No surprise therefore that science is discussed controversially, battling with 'fake news'. In this course we will look at these and other issues and ask the question more generally: what is the role of public controversy, science communication, and public opinion for the development of science and technology? The classical diffusion model (Roger, 1962) remains influential: scientists discover, engineers innovate, and social scientists market the novelty and provide public acceptance. This model is however more wishful thinking than realistic; valid at most when there is no or little public controversy. More commonly, techno-scientific innovations encounter resistance which refocuses attention, strengthens the collective, evaluates on-going developments and urges strategic adaptation (Bauer, 1991, 1995, 2002, 2015, 2017). In light of this, we will examine science communication and its formats of public engagement in relation to the historical controversies over nuclear power, genetic engineering and IT leading into emergent mobilisations for nanotechnology, genetic enhancement, synthetic biology, AI, autonomous driving and robotic automation. Students' are expected to appreciate theory driven empirical research.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Baranger P and B Schiele (2013) Science Communication today – international perspectives, issues and strategies, Nancy Journee Hubert-Curien, CNRS Editions. Bauer MW, P Pansegrau, and R Shukla (2019) (eds) The Cultural Authority of Science – comparing across Europe, Asia, Africa and the Americas, , London, Routledge. Bauer, M.W. (2015). Atoms, Bytes & Genes: public resistance and techno-scientific responses.

New York: Routledge. Bauer, M.W. (2013). Bauer MW and M Bucchi (2007) (eds) Journalism, Science and Society – science communication between news and public relations, NY, Routledge. Bauer, M.W. & Gaskell, G. (Eds) (2002). Biotechnology - the making of a global controversy. Cambridge, CUP. Bucchi M and B Trench (2014) (eds) Routledge Handbook of Public Communication of Science and Technology, 2nd edition, London, Routledge. Godin B and D Vinck (2017) (eds) Critical Studies of Innovation. Alternative approaches to the pro-innovation bias, Cheltenham, Edward Elgar. Gregory J and S Miller (1998) Science in Public – communication, culture, and credibility, Cambridge MA, Perseus. Marteau, T. & Richards, M.P.M. (1996) (Eds), The troubled helix: Social and psychological implications of the new human genetics, CUP. Roger, E.M. (1996). Diffusion of innovation, 4th edition. New York: Free Press. Weart, S.R. (1988). Nuclear fear: A history of images, Harvard University Press.

Each session will have its own particular readings, divided into essential texts and additional readings. This will be revised on an annual basis. No one text covers the entire syllabus; students' will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.

Assessment: Essay (100%, 3000 words) in the LT.

PB430 Half Unit Not available in 2020/21 Social Influence

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Bauer QUE.3.04

This is taught jointly with Dr Gordon Sammut, Lecturer at University of Malta, and Visiting Fellow to the Department of Psychological and Behavioural Science.

Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: The course is primarily intended for MSc and PhD students in Social Psychology, in particular those who follow PB404 Social Psychology of Communication or equivalent core modules in Social Psychology. But, conditional to available space, it will be open to any interested MSc or Research Student from across the school.

Course content: This course explores the many modes and modalities of social influence which social psychology has studied and developed concepts for. Modalities of social influence cover processes by which social groups and actors normalise, assimilate and accommodate private and public opinion, attitudes, social stereotypes, institute normative expectations and ways of life, and achieve recognition and social change. We will discuss the social psychological traditions such as rhetoric, crowd behaviour, public opinion, leadership, norms, opinion and attitude formation, majority and minority influence, resistance and obedience to authority, dual-processes of persuasion, mass media effect models; fait-accompli, inter-subjectivity and inter-objectivity. This discussion will unfold under three parallel perspectives: 1) the theoretical and empirical grounding of influence models; 2) the socio-historical context of their formulation, many models came out of WWII and Cold War; and 3) in the mirror of current formulations which often deploy new language without necessarily treading new ground. The course will discuss current ideas and models in comparison with canonical paradigms in order to assess 'real progress' of what often seems 'old wine in new bottles'. The course builds a theoretical integration of modalities of influence in the 'cycle of normativity and common sense' including the normalisation, assimilation and accommodation of social diversity (Sammut & Bauer, 2011). The moral ambiguity of social influence treads a fine line between promoting wellbeing and social recognition, and manipulating beliefs, opinion and attitudes. This raises ethical issues involved

in the study and exercise of social influence in the modern public spheres.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. Teaching arrangement: the course will be taught as a combination of weekly lecture and discussion seminar. Participants are expected to prepare at least one seminar discussion.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.

Participants will contribute to the reading seminars with a presentation, and they will be able to present an essay plan for formative feedback before the end of term.

Indicative reading: Some key references:

- Billig M (1987) *Arguing and thinking – a rhetorical approach to social psychology*, Cambridge, CUP;
- Gigerenzer G (2007) *Gut feelings*, New York: Viking;
- Habermas J (1989) *The structural transformation of the public sphere*, Cambridge, Polity Press;
- Kahnemann D (2011) *Thinking, fast and slow*; London: Penguin Books.
- Paicheler G (1988) *The psychology of social influence*, Cambridge, CUP;
- Pratkanis AR (2007) *The Science of Social Influence*, NY, Psychology Press;
- Sloane T O (Ed) (2001) *Encyclopedia of Rhetoric*, Oxford, OUP [various entries: logos, pathos, ethos, argumentation, audience, classical rhetoric, persuasion, rhetorical situation];
- Sammut G and MW Bauer (2011) 160 Social influence: modes and 160 modalities, in: D W Hook, B Franks & M W Bauer (Eds) *The Social Psychology of Communication*, London, Palgrave, pp87-106.

Each session will have its own particular readings, separated in essential texts and additional readings. This will be revised on an annual basis. No one book covers the entire syllabus; students' will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.

Assessment: Essay (100%, 3000 words) in April.

PB431 Half Unit

Social Psychology of Economic Life: Advanced Topics

This information is for the 2020/21 session.

Teacher responsible: Dr Frederic Basso

Availability: This course is available on the MRes/PhD in Management (Organisational Behaviour), MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The idea of a social psychology of economic life is not obvious. From the point of view of mainstream economics, economic life – usually understood as the production, distribution, and consumption of goods and services – is under the scope of economics. As a mathematical science, economics is, to some extent, a rejection of social and psychological dimensions in the analysis of economic life. As the “queen of social sciences”, mainstream economics was even considered by some authors as the framework (the so-called “economic imperialism”) for studying social and psychological processes out of the economic life. Yet, some of the most important advances over the last four decades in the understanding of human economic behaviour (and its link to some of the most pressing societal issues nowadays) are derived from concepts and methods of psychology and other social sciences. The course presents how social psychology (broadly interpreted to include micro-sociology, cultural anthropology and social neuroscience) is the key to understanding real-world economic life by taking into account cognitive, affective and social processes, and also to contributing to better solutions to societal

problems.

Main concepts: cognitive dissonance, analytic/experiential systems in decision-making, metaphors and decision-making, narratives and decision-making, self/extended self in consumption, dramaturgy/staging, social roles, face-to-face interactions, emotional labour/dissonance, gift economy, sharing economy, social group (inclusion/exclusion), stigma, social norms, nudging, disenchantment of the economic world, post-modern hyper-realities, experience economy, resistance to persuasion (inertia, scepticism, reactance), resistance to consumption (avoidance, minimisation, boycott/active rebellion).

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: Reading lists will be provided for each topic, the following are of general use; S E G Lea, R M Tarpy & P Webley, *The Individual in the Economy*, Cambridge University Press, 1987
A Lewis, P Webley & A Furnham, *The New Economic Mind: The social psychology of economic behaviour*, Harvester, 1995.

Assessment: Essay (100%, 3000 words) in the LT.

PB432 Half Unit

Social Representations: Social Knowledge and Contemporary Issues

This information is for the 2020/21 session.

Teacher responsible: Prof Sandra Jovchelovitch

Availability: This course is available on the MSc in Behavioural Science, MSc in Culture and Society, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on social representation as a theory in social and cultural psychology and as phenomena in social life. It explores concepts, empirical studies and fields of application of social representations. The course aims to equip students with in-depth understanding of the production, transformation and contestation of representations in public spheres. Through an examination of concepts and key studies in the field, the course explores the dynamics of social thinking and the power of representations to construct meanings and social realities. It highlights process of communication and contestation between different knowledge systems and the dynamics of social change.

The course covers: 1) origins and theoretical roots of social representations in the field of socio-cultural psychology and situated cognition; 2) processes and functions of social representation, including dialogicality, cognitive polyphasia, relating to the unfamiliar, semantic enablers and barriers, and the future of common sense vis-a-vis systemic encroachment and artificial intelligence; and 3) ongoing research on how communities think and the transformation of common sense in contemporary societies, in areas such as self and community, cultural encounters/cultural conflict, health, professional practices, urban transformations, social exclusion (these can vary depending on the research at hand).

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: An essay plan of not more than 500 words is required.

Indicative reading:

Assessment: Coursework (100%, 3000 words) in the LT.

PB433 Half Unit

Theory and Practice of Organisational Development

This information is for the 2020/21 session.

Teacher responsible: Dr Lucia Garcia-Lorenzo

Availability: This course is available on the MSc in Behavioural Science, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Why is Organisational Development (OD) important? Organisations are becoming increasingly complex, more dynamic and faster changing social systems. To confront these changes, organisations need to become nimble, innovative and effective if they are to survive and thrive. 21st century organisations require therefore more flexible organisational structures, new types of leadership and new ways of managing. OD can help organizations navigate this difficult terrain. What is OD? OD is a critical behavioural science-based process that helps organisations build their capacity to navigate change and achieve greater effectiveness by developing, improving, and reinforcing strategies, structures, and processes. OD objectives: Through a deep analysis of needs and goals, OD strategies aim to bring about specific changes and to ensure that appropriate steps are taken to secure those changes within organisations. This course explores the management of organisational change and development from a theoretical and practical perspective. While the course is strongly informed by key theoretical frameworks, OD comes into its own in application. Students will be actively encouraged to relate key OD theoretical perspectives to current organisational challenges. The aim of the course is, therefore, two fold: first to explore the body of core theory underpinning the practice; second, to examine the practice of OD as a 'process' (not a 'product' or a 'programme'). The course will provide also practical hands-on experience. In seminars and workshops students will gain experience on drafting organizational change interventions, thinking about their implementation and evaluating their potential impact in organised contexts.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Detailed references and class topics are distributed in the first lecture of the series. The following represents key readings covering some of the topics discussed in the course: Alvesson, M., & Sveningsson, S. (2015). Changing organizational culture: Cultural change work in progress.

Routledge. Argyris, C. (2008). *Teaching smart people how to learn*. Harvard Business Review Press. Cameron, E., & Green, M. (2019). *Making sense of change management: A complete guide to the models, tools and techniques of organizational change*. Kogan Page Publishers. Gallos, J. V. (2006). *Organization development: A Jossey-Bass reader*. Jossey-Bass. Ghislieri, C., Molino, M., & Cortese, C. G. (2018). *Work and organizational psychology looks at the fourth industrial revolution: How to support workers and organizations?*. *Frontiers in psychology*, 9, 2365. Gioia, D. A., & Chittipeddi, K. (1991). Sensemaking and sensegiving in strategic change initiation. *Strategic management journal*, 12(6), 433-448. Hisrich, R. D., & Kearney, C. (2013). *Managing innovation and entrepreneurship*. Sage Publications. Vangen, S., & Huxham, C. (2003). Nurturing collaborative relations: Building trust in interorganizational collaboration. *The Journal of Applied Behavioral Science*, 39(1), 5-31. Weick, K. E. (1995). *Sensemaking in organizations* (Vol. 3). Sage. Western, S. (2019). *Leadership: A critical text*. SAGE Publications Limited.

Assessment: Essay (100%, 3000 words) in the LT.

PB434 Half Unit

Behavioural Science in an Age of New Technology

This information is for the 2020/21 session.

Teacher responsible: Dr Dario Krpan

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

Course content: When Psychology and Economics got "married", the product was Behavioural Science. Although this discipline has elevated theoretical and practical understanding of human behaviour to previously unseen heights, recent technological developments have produced new insights in understanding and predicting people's actions that not only supplement traditional tools of behavioural science but also go beyond them. The future of the discipline will therefore likely depend on how effectively behavioural scientists can harness new developments in technology to understand and change the way people act. The aim of this course is to a) Introduce major technological advancements that are relevant for predicting, influencing, and understanding human behaviour; b) Outline how they supplement and extend commonly used tools of behavioural change; and c) Examine how they can be used to propel behavioural science into the future. The course will tackle behavioural science in relation to motion tracking, virtual environments, social robotics, social networks, and other relevant developments in information technology.

Example topics explored on the course:

Understanding minds by reading bodies: Implications of motion tracking for behavioural science; Changing behaviour through gamification; Social robots: Our new friends?; Behavioural science in virtual worlds; Behavioural informatics; Change thyself: Using technology to influence our own behaviour; Digital footprints and human behaviour; Psychological targeting in digital age; The ethics of emerging technologies in the context of behavioural science.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Formative coursework will serve as your preparation for the summative assignment. You will need to create a 5-minute presentation on the topic of the summative assignment: Propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to create behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). In the presentation, you will

need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through the class material and personal literature search.

Similar to the summative assignment, the presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). The main aim of the formative assignment is for me to evaluate your approach to tackling points a), b), and c) mentioned above so I can give you relevant feedback that will help you when preparing the summative presentation, and also for you to get comfortable with producing the video presentation.

- Sparrow, R. (2017). Robots, rape, and representation. *International Journal of Social Robotics*, 9(4), 465-477.

Assessment: Presentation (100%) in the ST.

The aim of the summative assessment will be to propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to produce behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). This intervention will be conveyed in the form of a 15 minute presentation that will count as your summative assignment. More precisely, in the presentation, you will need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through the class material and personal literature search.

The presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). Together with the video presentation, you will need to submit an annotated bibliography that contains a) a list of scientific references you used for the presentation; and b) a short text below each reference (1-2 sentences) describing why exactly the reference is important in the context of your presentation. The main purposes of the annotated bibliography will be to demonstrate the academic background upon which your presentation was built.

PB452 Half Unit

Behavioural Science for Health in the Time of a Pandemic

This information is for the 2020/21 session.

Teacher responsible: Dr Matteo Galizzi

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: No pre-requisites required.

Course content: Using responses to the recent Covid-19 pandemic as a starting point, the course aims at introducing students to the main state-of-the-art applications of behavioural science to health policy, practice, economics and management. The course is designed to enhance students' abilities to apply behavioural science tools in a critical and rigorous way to concrete public health challenges related to Covid-19 and other pandemics, as well as to many other health- and healthcare-related areas, such as: infectious diseases; vaccinations; wellbeing and mental health; patients' and healthcare professionals' decisions and behaviours; doctor-patient interaction and shared decision-making; money, time, blood and organ donations; end-of-life decisions; diet and nutrition; physical exercise; alcohol abuse; tobacco and drug use; medication adherence; compliance; prevention and screening. The course utilises a rotating lectureship of PBS faculty members who will apply research-led teaching to address the different perspectives and challenges in this area.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to work in small groups to produce a presentation in the LT, in which they will propose a design and implementation of a possible behavioural science intervention in health.

Indicative reading: Brodeur A, Clark AE, Flèche S, and Powdthavee N. (2020). COVID-19, Lockdowns and Well-Being: Evidence from Google Trends. IZA Discussion Paper, 13204. Assessment: Coursework (100%, 3000 words) in the ST.

PB453 Half Unit Not available in 2020/21 Corporate Behaviour and Decision Making

This information is for the 2020/21 session.

Teacher responsible: TBC

Availability: This course is available on the MSc in Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course provides the opportunity for students to learn how the tools of behavioural science can help to improve the outcomes of the firm. Specifically, behavioural science lessons

for search and hiring, diversity and inclusion, firm culture, conduct, and high stakes decision making are covered.

Each topic starts with equipping students with the predictions from traditional economic models. We then proceed to consider the individual biases which distort the decision making process, and how this distorts outcomes. We consider interventions and solutions to these problems with a specific emphasis on : 1. is there a problem, 2. menu of solutions for the problem 3. quantifying if the solutions worked.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 case study in the LT.

Case study with short questions that matches the style of the summative assessment

Indicative reading: Bertrand Marianne and Duflo Ester. Field Experiments on Discrimination. in *Handbook of Economics Field Experiments*. Volume 1, pages 309 - 393 2017. MLA: Gneezy, Uri, Kenneth L. Assessment: Coursework (100%, 4000 words) in the ST.

Two case studies with short questions

PB457 Half Unit Organisational Culture

This information is for the 2020/21 session.

Teacher responsible: Dr Thomas Reader

Availability: This course is available on the MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Students from the MSc in Organisational and Social Psychology will be prioritised for the course, because the half-unit is associated with this MSc.

Course content: The course aims to introduce to students the concept of Organisational Culture, its relationship with success and failure in institutional settings, the factors that shape organisational culture, and methodologies for studying and changing it. The course will draw on a mixture of seminal research, state-of-the-art literature, and work being conducted at the LSE. Course content will include the following:

Part 1: Organisational culture: what is it, and why does it matter? In this first phase of the course, the concept of organisational culture will be introduced. Student will be made familiar with key models on organisational culture (e.g. Schein, Hofstede, Cameron & Quinn), the distinction between organisational culture and climate, and academic literature investigating the cultural properties of organisations that lead them to be more competitive, safer, and nicer places to work. Students will be asked to reflect upon the organisations they have worked or studied within, and to consider where they might 'fit' within the academic models being presented. We will also focus on assessing organisational culture. Specifically, we will examine traditional methodologies of culture measurement including interviews, observations, and surveys. We will explore

what makes a 'good measure', how you interpret culture data, and the limitations of using observations from 'within' an organisation to measure culture. Second, we explore novel and cutting-edge forms of culture measurement, and in particular, research being conducted at LSE on unobtrusively measuring culture.

Part 2: What creates an organisational culture? Here, the course will examine more precisely how organisational culture influences behaviour and performance. In particular, we will examine how 'cultures' of decision-making, risk-taking, ethical practices, and citizenship activities emerge within organisations. Furthermore, we will examine how these behaviours in turn feed and shape the culture of an organisation. Material from the course leader's work (in aviation, heavy industries, and finance) will be used to explore this. We will consider, in particular, how culture emerges in groups, how leaders can influence organisational culture, and also the interaction between national culture and organisational culture. Case studies will be drawn on to illustrate.

Part 3. Changing organisational culture. Here, we consider how culture change emerges. Specifically, we will focus on the role of leadership, regulation and policy, and collaborative activity as a catalyst to culture change. Students will be asked to design a culture measurement and change strategy for their organisation.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will prepare for the summative assignment through a formative essay, which is a plan of the larger essay. This involves: i) considering the relevance of organisational culture to their own (or a relevant) intuition, ii) designing a culture measurement battery, and iii) outlining a culture change strategy. Students will also engage in seminar tasks (e.g. producing culture change strategies), that will contribute to their formative learning.

Assessment: Essay (100%, 3000 words) in the period between LT and ST.

The course will be assessed through a 3000 word case study essay. Submission of the summative assessment will be after Lent Term. Students will be asked to i) identify a real-life institution where organisational culture is the 'ingredient' for success or

failure, ii) to explain - using the concepts taught on the course - why this is the case (with a particular focus on behaviour), and iii) to identify a strategy for measuring (and improving) culture within that organisation.

PB458 Half Unit

Dialogue: Conflict & Negotiation

This information is for the 2020/21 session.

Teacher responsible: Dr Alex Gillespie CON.4.16

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Dialogue is central to interpersonal conflicts, corporate negotiations, and societal debates. While dialogue is popularly construed in terms of reaching consensus, the reality entails rhetoric, manipulation and deception. This course takes the view that conflict is necessary, and it examines how dialogue can make a clash of difference productive and creative.

Topics covered will be: theory and science of dialogue; misunderstandings (when you see it, it is gone); negotiation and bargaining (creating wins, and win-wins); conflict mediation (when negotiation didn't work); the dark arts and their detection (persuasion, framing, deception); the defenses and their detection (denial, dismissing, rationalizing); reading verbal and non-verbal cues (listening beyond the words); creativity & dialogue (the emergence of something new); crisis dialogue & speaking up (power and dissent); digital dialogues (silos and measuring the 'quality' of dialogue).

The course will provide practical hands-on experience. In workshops students will gain experience intervening in dialogue, analyzing dialogue (transcripts, videos), and trying out cutting edge methods for the automated analysis of dialogue.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

500 word essay or report plan outlining the approach to the summative assessment.

Indicative reading: Burris, E. R. (2012). The risks and rewards of speaking up: managerial responses to employee voice. *Academy of Management Journal*, 55(4), 851-875. Deutsch, M., Coleman, P. T., & Marcus, E. C. (2011). *The handbook of conflict resolution: theory and practice*. San Francisco, CA: John Wiley & Sons. Gillespie, A., & Corti, K. (2016). (2013). *The social psychology of bargaining and negotiation*. London, UK: Academic Press. Vrij, A., Hartwig, M., & Granhag, P. A. (2019). Reading lies: nonverbal

communication and deception. Annual Review of Psychology, 70(1), 295–317. Yarkoni, T. (2010). Personality in 100,000 words: A large-scale analysis of personality and word use among bloggers. Journal of Research in Personality, 44(3), 363–373.

Assessment: Essay (100%, 3000 words) in the period between LT and ST.

PB4A7 Half Unit

Quantitative Applications for Behavioural Science

This information is for the 2020/21 session.

Teacher responsible: Dr Ganga Shreedhar

Availability: This course is compulsory on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: The main aim is to familiarize students with the main statistical tools required to understand the myriad contextual and individual-level causes of human behaviour and to put students in a position to do their own research. The course will cover leading methods used by psychologists and economists to test behavioural science hypotheses about cause-effect questions. It will first introduce students to null hypothesis testing and regression analysis. It will then delve into quasi-experimental methods like differences-in-differences, regression discontinuity design and instrumental variables regression. Students will learn how to identify, interpret, and critically evaluate different research designs, to eventually conducting their own data analysis and writing a report of the same. They will keep abreast of contemporary methodological debates and best practices in data analysis in psychology and economics, apart from learning to critically appraise and navigate behavioural science studies from a methodological perspective. To this end, there will also be an emphasis on teaching students how the same analyses are presented in psychology and economics so students can understand how to integrate research from these two fields that constitute behavioural science. This course complements PB413: Experimental Design and Methods for the Behavioural Science, which covers experimental design and research for MSc Behavioural Science students.

Teaching: The course is delivered in Michaelmas Term (MT) over 10 lectures of 1 hour and 10 weekly seminar sessions of 1 hour. Students on this course will have a reading week in MT Week 6. There will also be additional lab help sessions in collaboration with PB413.

Formative coursework: Students will have to complete and submit weekly problem sets. Some of these will be marked to provide indicative assessment. All formative coursework is compulsory.

Indicative reading:

Assessment: Report (60%) and poster (20%) in the ST. Problem sets (20%) in the MT.

PB4D2

Happiness - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Christian Krekel

Availability: This course is available on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: The course aims to introduce students to the main concepts and tools of the growing science of happiness, with a focus on their applicability in policies across all sectors (government, private business, and the voluntary sector). To achieve this aim, the course is based on ten lectures covering: 1) what is happiness?; 2) evaluations of happiness; 3) experiences of happiness; 4) attention and adaptation; 5) mistakes about happiness; 6) happiness by design; 7) the narrative trap; 8) policy appraisal using preferences; 9) policy appraisal using happiness; 10) happiness as a policy objective.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Indicative reading:

Books

Economic Journal, 124(580), F720-F738. Wilson, T., and Gilbert, D. (2003). Affective forecasting. Advances in Experimental Social Psychology, 35, 345-411.

Assessment: Dissertation (100%, 10000 words) post-summer term.

You are required to write a 10,000 word dissertation (replacing the 3000 word summative assesment on PB421). You are expected to attend the course teaching on the half-unit that you choose to write your dissertation on.

PB4D3

Behavioural Science in an Age of New Technology - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Dario Krpan

Availability: This course is available on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: When Psychology and Economics got "married", the product was Behavioural Science. Although this discipline has elevated theoretical and practical understanding of human behaviour to previously unseen heights, recent technological developments have produced new insights in understanding and predicting people's actions that not only supplement traditional tools of behavioural science but also go beyond them. The future of the discipline will therefore likely depend on how effectively behavioural scientists can harness new developments in technology to understand and change the way people act.

The aim of this course is to a) Introduce major technological advancements that are relevant for predicting, influencing, and understanding human behaviour; b) Outline how they supplement and extend commonly used tools of behavioural change; and c) Examine how they can be used to propel behavioural science into the future. The course will tackle behavioural science in relation to motion tracking, virtual environments, social robotics, social networks, and other relevant developments in information technology.

Example topics explored on the course:

Understanding minds by reading bodies: Implications of motion tracking for behavioural science; Changing behaviour through gamification; Social robots: Our new friends?; Behavioural science in virtual worlds; Behavioural informatics; Change thyself: Using technology to influence our own behaviour; Digital footprints and human behaviour; Psychological targeting in digital age; The ethics of emerging technologies in the context of behavioural science.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Assessment: Dissertation (100%, 10000 words) post-summer term. You are required to write a 10,000 word dissertation (replacing the video presentation). You are expected to attend the course teaching on the half-unit that you chose to write your dissertation on.

PB4D4

Behavioural Science for Health in the Time of a Pandemic - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Matteo Galizzi

Availability: This course is available on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: Using responses to the recent Covid-19 pandemic as a starting point, the course aims at introducing students to the main state-of-the-art applications of behavioural science to health policy, practice, economics and management. The course is designed to enhance students' abilities to apply behavioural science tools in a critical and rigorous way to concrete public health challenges related to Covid-19 and other pandemics, as well as to many other health- and healthcare-related areas, such as: infectious diseases; vaccinations; wellbeing and mental health; patients' and healthcare professionals' decisions and behaviours; doctor-patient interaction and shared decision-making; money, time, blood and organ donations; end-of-life decisions; diet and nutrition; physical exercise; alcohol abuse; tobacco and drug use; medication adherence; compliance; prevention and screening. The course utilises a rotating lectureship of PBS faculty members who will apply research-led teaching to address the different perspectives and challenges in this area.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Indicative reading: Brodeur A, Clark AE, Flèche S, and Powdthavee N. (2020). COVID-19, Lockdowns and Well-Being: Evidence from Google Trends. IZA Discussion Paper, 13204. Assessment: Dissertation (100%, 10000 words) post-summer term.

You are required to write a 10,000 word dissertation (replacing the essay). You are expected to attend the course teaching on the half-unit that you chose to write your dissertation on.

PB4D5 Not available in 2020/21

Corporate Behaviour and Decision Making - Dissertation

This information is for the 2020/21 session.

Teacher responsible: TBC

Availability: This course is available on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: The course provides the opportunity for students to learn how the tools of behavioural science can help to improve the outcomes of the firm. Specifically, behavioural science lessons for search and hiring, diversity and inclusion, firm culture, conduct, and high stakes decision making are covered.

Each topic starts with equipping students with the predictions from traditional economic models. We then proceed to consider the individual biases which distort the decision making process, and how this distorts outcomes. We consider interventions and solutions to these problems with a specific emphasis on : 1. is there a problem, 2. menu of solutions for the problem 3. quantifying if the solutions worked.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Indicative reading: Bertrand Marianne and Duflo Ester. Field Experiments on Discrimination. in Handbook of Economics Field Experiments. Volume 1, pages 309 - 393 2017. MLA: Gneezy, Uri, Kenneth L. "Market Efficiency, Long-Term Returns, and Behavioral Finance," Journal of Financial Economics.

Assessment: Dissertation (100%, 10000 words) post-summer term.

You are required to write a 10,000 word dissertation (replacing the essay). You are expected to attend the course teaching on the half-unit that you chose to write your dissertation on.

PH400

Philosophy of Science

This information is for the 2020/21 session.

Teacher responsible: Prof Roman Frigg LAK 101

Availability: This course is available on the MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is not available as an outside option.

Pre-requisites: None.

Course content: Science is chock full of miraculous predictions, shocking revolutions, and unexpected results that few science fiction writers could have ever dreamed of. What makes science so special? This course is a tour of the philosophical underpinnings of modern science. No background in any science is needed for this course; everything you need to know will be covered.

Indicative topics include: Theory and Observation: Hume's problem of induction and Goodman's new riddle of induction, Popper's falsificationism, underdetermination of theory by evidence, the positive instance account of confirmation, Bayesianism. Laws of Nature: the regularity view of laws, laws as universals, the best systems account, instrumentalism. Explanation: the DN model of explanation, statistical explanation, causal explanation, unification. Intertheory relations: reductionism and pluralism. Realism versus Antirealism: Scientific realism and antirealism, the no miracles argument, inference to the best explanation, the pessimistic meta-induction, reductive empiricism, constructive empiricism, the natural ontological attitude, entity realism, structural realism, Kuhn and scientific revolutions. Sociological approaches to science: Social constructivism, feminism. Causation: Hume's, Mill's, Mackie's accounts of causation, counterfactual theories, probabilistic causality and manipulability accounts, transference accounts. Philosophy of a special science: Space and Time in Newton's physics.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.

This year, some or all of this teaching will take place online.

Formative coursework: Students will be expected to write four essays (two in MT and two in LT), submit a few short answers before each seminar, and participate in seminar discussion.

Indicative reading: T S Kuhn, The Structure of Scientific Revolutions; K R Popper, Conjectures and Refutations; B van Fraassen, The Scientific Image; N Cartwright, How the Laws of Physics Lie.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

PH405

Philosophy of the Social Sciences

This information is for the 2020/21 session.

Teacher responsible: Prof. J. McKenzie Alexander

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines philosophical problems of social science concerning what societies are like and how

scientists theorize about them. The first part of the course will focus on questions of scientific method about the nature of understanding and the kind of knowledge the social sciences should, or can, aim for; as well as on questions of ontology pertaining to the nature of the social world. The overarching goal is to provide an intellectual geography of the philosophy of the social sciences, to which students will refer in the second part of the course when specific philosophical issues will be closely analysed and discussed. Contents to be covered in the second term will be structured around three main themes: action, rationality and intelligibility; institutions, culture, and the relationship between mind and society; and the moral aims of the social sciences, as well as their role in just social change.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. This year, some or all of this teaching will take place online.

Formative coursework: Students will be expected to write four formative essays, two in Michaelmas term and two in Lent term. The two summative essays then correspond to the two formative essays which received the highest marks. Class presentations or weekly activities may also be required, depending on the pedagogical approach of the class teacher.

Indicative reading: A detailed reading list will be provided at the beginning of the course. Indicative readings include: Nancy Cartwright and Eleanor Montuschi (eds.), *Philosophy of the Social Sciences: a new introduction*; Harold Kincard, John Dupré, and Alison Wylie (eds.), *Value-Free Science: Ideals and Illusions*; Jon Elster, *Explaining Social Behaviour*; John H. Miller and Scott Page, *Complex Adaptive Systems*; Dawn Langan Teele, *Field Experiments and Their Critics: Essays on the Uses and Abuses of Experimentation in the Social Sciences*; Alex Rosenberg, *Philosophy of Social Science* (Fifth edition); Harold Kincaid, *Philosophical Foundations of the Social Sciences*; Daniel Steel and Francesco Guala (eds.), *The Philosophy of Social Science Reader*; Michael Martin and Lee McIntyre (eds.), *Readings in the Philosophy of Social Science*.

Assessment: Essay (25%, 2000 words) in the LT.

Essay (25%, 2000 words) in the MT and LT.

Take-home assessment (50%) in the ST.

Summative assessment for PH405 will consist of two essays and a take-home exam. Of the four essays assigned over the course (two in Michaelmas term, two in Lent term), the two essays which received the highest marks will be selected to count towards 50% of the final grade (i.e., 25% for each essay). In Summer term, a take-home exam, to be completed over the course of a week, will also be set.

PH413

Philosophy of Economics

This information is for the 2020/21 session.

Teacher responsible: Dr Johanna Thoma

Dr Campbell Brown
Prof Richard Bradley
Dr Kate Vredenburg

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed a university-level introductory course in economics, such as EC100 or EC102.

Course content: This course provides a philosophical discussion of (1) the methods and (2) the normative commitments of contemporary economics.

(1) Here the course will focus on economic methodology and

the foundations of utility theory, with an eye to important current debates in economics. We will discuss questions such as: What is utility, and how do economists measure it? Does evidence of widespread 'irrationality' from behavioural economics undermine standard microeconomic theory? Can idealised models teach us anything about real-world phenomena? If yes, how? How should we measure important economic variables, such as inflation? How do we best find out what interventions work in development? Does macroeconomics need microfoundations? Is the economics profession to blame for its failure to predict the financial crisis? (2) The second area of focus is on welfare economics, and the ethical assumptions and implications of economics. We will cover questions such as: Is getting what you want always good for you? Can you be harmed by something if you never know about it? Does it make sense to say that eating pizza gives me more happiness than going to the movies gives you? Is it possible to combine the preferences of individuals into an overall 'social' preference? Does it matter if the well-being of some people is less than that of others? When and why are markets desirable? Is paternalism always bad, and does welfare economics really avoid it? How should we resolve collective action problems? What is a fair way to distribute the tax burden?

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT.

This course is delivered through a combination of seminars and lectures totalling a minimum of 60 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered virtually. This course includes a reading week in Week 6 of both Michaelmas Term and Lent Term.

Formative coursework: Students will be expected to produce 2 essays in the MT and 1 presentation in the LT.

Students will be expected to produce two formative essays of 1,500 words each in MT. Note that at least one of these must be submitted since a reworked version is an essential part of the summative work for the course. There will also be a formative group debate in LT.

Indicative reading: D. Hausman, *The Philosophy of Economics: An Anthology*; J. L. Bermudez, *Decision Theory and Rationality*; J. Cohen and W. Easterly, *What Works in Development: Thinking Big and Thinking Small*; D. Hausman and M. McPherson, *Economic Analysis, Moral Philosophy, and Public Policy*; M. D. Adler, *Measuring Social Welfare: An Introduction*; D. Satz, *Why Some Things Should Not Be for Sale*.

Assessment: Exam (30%, duration: 2 hours) in the summer exam period.

Essay (30%, 2500 words) and presentation (10%) in the LT.

Essay (30%, 2000 words) in the ST.

Summative Essay 1 (2,000 words, +500 words reflective commentary, 30%, due in LT) is a rewritten version of one of the formative essays on the MT material.

Summative Essay 2 (2,000 words, 30%, due in ST) covers the LT material.

The 2-hour ST exam (30%) consists of short-answer questions covering material from both MT and LT. This year, if necessary, the exam may be converted to a take-home exam.

The presentation (10%) is a group presentation, followed by discussion, and will take place in LT.

PH415

Philosophy and Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Campbell Brown LAK 2.04

This course will be taught by Campbell Brown, Jonathan Parry, Johanna Thoma, and Michael Otsuka.

Availability: This course is compulsory on the MSc in Philosophy and Public Policy. This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social

Policy, MPA in Social Impact, MSc in Economics and Philosophy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as the following.

- What is a correct public measure of well-being?
- Should people be left to bear the consequences of their free choices?
- May the government force you to buy health insurance?
- Is torture ever justified?
- Do prosperous countries have a right to close their borders to immigrants from poor countries?
- Should hate speech be protected by freedom of speech?
- Should the development of new drugs be left to private companies rewarded by patent protection?
- What is the optimal population size and what policies may the state pursue in order to achieve it?
- Should higher education be financed by student loans or general taxation?
- Should we be free to act as we choose so long as we do not harm others?
- How should we distribute the burdens of military service?
- Should children be given the vote?

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. This course has a reading week in Week 6 of both MT and LT. Some lectures and/or seminars may be delivered in an online format.

Formative coursework: Students will be expected to produce 2 essays in the MT and 1 essay in the LT.

Indicative reading: A detailed list of readings will be available on moodle. The following is an indicative sample of readings that may be discussed in the course.

- Greg Bognar and Iwao Hirose (2014). *The Ethics of Health Care Rationing*.
- A. Voorhoeve (2018) 'May a Government Mandate More Comprehensive Insurance than People Want for Themselves?' *Oxford Studies in Political Philosophy*.
- Michael Rustin (2016), 'The neoliberal university and its alternatives', *Soundings*
- Ronald Dworkin et al (1997) 'Assisted Suicide: The Philosophers' Brief'
- Carol Kates (2004). 'Reproductive Liberty and Overpopulation' *Environmental Ethic*
- Jonathan Wolff (2011), *Ethics and Public Policy: A Philosophical Inquiry*
- Joseph Carens (1987), 'Aliens and Citizens: The Case for Open Borders', *The Review of Politics*
- Jeff McMahan (2008), 'Torture in Theory and Practice', *Public Affairs Quarterly*
- Michael J. Robillard and Bradley J. Strawser (2016), 'The Moral Exploitation of Soldiers', *Public Affairs Quarterly*
- Annabelle Lever (2014), 'When the Philosopher Enters the Room', *Philosophy and Public Issues*

Additional readings will be available on Moodle.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (30%, 2000 words) in the ST.

Class participation (10%).

PH416

Philosophy, Morals and Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Jonathan Parry

The course is taught by Dr. Jonathan Parry, Dr. Lewis Ross, Dr. Campbell Brown, and Prof. Michael Otsuka.

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of the Social Sciences and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course will cover key topics in **moral and political philosophy**.

In weeks 1-5 of Michaelmas Terms, Jonathan Parry will discuss a range of topics in normative ethics, which is a branch of ethics that aims to identify the factors that determine the moral status of actions. Questions covered will include some of the following: (i) What sacrifices are we required to make for the sake of others? (ii) Does it make a moral difference that a person is less well off than she could have been? ('the non-identity problem') (iii) Is it permissible to cause harm to others in order to prevent greater harm? If so, are some ways of bringing about harm harder to justify than others? (iv) What are the moral limits on harming others in self-defence? (v) To what extent is the morality of self-defence different from the morality of defending other people? In weeks 7-11 of Michaelmas Terms, Lewis Ross will bridge the moral and political components of the course, considering a number of classic questions at the intersection between moral theory and political philosophy (which may include questions such as: when and why is it legitimate for a state to inflict harm upon its subjects? when can we disobey the state? can the moral status of our actions and the punishment we deserve be determined by factors outwith our control? is evolutionary theory a threat to our views about morality? can the cultural circumstances in which we grow up absolve us of blame for bad beliefs?).

In weeks 1-5 of Lent Term, Michael Otsuka will discuss the following topics in political philosophy: What is the nature and justification of rights? Is redistributive taxation of earnings from labour on a par with forced labour? Is private property in land justified? Should laws lapse every twenty years, in order to prevent the dead from ruling the living? Are people entitled to compensation for injustices committed against their ancestors? In weeks 7-11 of Lent Term, Campbell Brown will discuss topics in metaethics. This branch of philosophy explores the fundamental nature of morality. When we contemplate 'first-order' moral questions – e.g., 'Is torture always morally wrong?' – we are often led to 'second-order', or metaethical, questions. Do first-order questions have objectively correct answers? If one person believes torture is always wrong, while another person denies this, must one of these people be mistaken? Can such disagreements be resolved by rational argument and scientific investigation? Or are these merely 'matters of opinion', where one person's belief is no more or less 'true' than any other's? Can the members of one culture legitimately criticise the moral norms of another culture? If morality is not objective, does it follow that public policy should not be based on morality?

Some topics in other areas of moral and political philosophy may also be covered.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 3 essays in the MT and LT.

Indicative reading: Thomson, J.J. 'Self-Defense', *Philosophy and Public Affairs* 20 (1991). Otsuka, M. 'Killing the Innocent in Self-Defense', *Philosophy and Public Affairs* 23 (1994). Quinn, W. 'Actions, Intentions and Consequences: The Doctrine of Doing and Allowing', *The Philosophical Review* 98 (1989). Øverland, G. 'Moral Obstacles: An Alternative to the Doctrine of Double Effect', *Ethics* 124 (2014). Parry, J. 'Defensive Harm, Consent, and Intervention', *Philosophy and Public Affairs* 43 (2017). Geoff Sayre-McCord, 'Metaethics', *The Stanford Encyclopedia of Philosophy* <<http://plato>

stanford.edu/archives/sum2014/entries/metaethics/>. Matthew Chrisman, What is this thing called Metaethics?. Michael Smith, The Moral Problem; J.L. Mackie, Ethics: Inventing Right and Wrong. Nozick, R. Anarchy, State and Utopia. Locke, J. Second Treatise of Government

Cohen, G. A., 'Nozick on Appropriation', New Left Review, no. 150 (1985). Jefferson, T., Letter to James Madison (1789). Boxill, B., 'Black Reparations', Stanford Encyclopedia of Philosophy(2015)
Assessment: Essay (30%, 2000 words) and class participation (10%).

Take-home assessment (60%) in the ST.

The exam for the course will be a take-home assessment.

Students will have one week to complete, but the expectation is that the assessment requires the equivalent amount of work as a two-hour sat exam.

PH418

Dissertation Seminar - Economics and Philosophy

This information is for the 2020/21 session.

Teacher responsible: Prof Richard Bradley

Availability: This course is compulsory on the MSc in Economics and Philosophy. This course is not available as an outside option.

Course content: The course is intended to develop the ability to make philosophical arguments, to write good philosophical essays, and to present ideas effectively. It covers topics in the philosophy of economics and will serve to prepare students for research and for writing their dissertation.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT.

This course has a reading week in Week 6 of both MT and LT.

Formative coursework: Students will be expected to produce 1 presentation in the MT and 1 presentation in the LT.

Indicative reading: Readings will be chosen by the seminar participants.

Assessment: This course is not assessed.

PH419

Set Theory and Further Logic

This information is for the 2020/21 session.

Teacher responsible: Professor Miklos Redei, LAK 4.03

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students taking this course should already have taken a year-long introductory course in logic in a Philosophy Department, or a mathematical course that covers the basics of set theory and logic. If in doubt whether you satisfy this prerequisite, consult the instructor.

Course content: The aim of the course is to familiarize students of philosophy with the essentials of naive set theory and formal logic. From set theory, the course covers (i) what is needed for use in formal reasoning, and (ii) what is of philosophical interest (Russell Paradox, elementary theory of cardinals and ordinals, transfinite induction, Axiom of Choice, Continuum Hypothesis). From logic, it covers the basic metatheory of sentential and first-order predicate logic (up to the completeness theorems), continues with Gödel's famous incompleteness theorems concerning the limitations of mathematical provability and ends with exploring extensions of classical logic.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 20 hours of lectures and 15 hours of seminars in the LT. Lectures will be delivered online.

Formative coursework: In each term, students are required to

submit solutions to two problem-sets, and write one 1,500 word essay on a topic from a list or proposed by the student and approved by the instructor.

Indicative reading: Textbooks: Cameron, Peter: Sets, Logic and Categories (Springer, 1999); Sider, Theodore: Logic for Philosophy (Oxford University Press, 2010). Specific sections of these texts that are relevant to weekly topics will be indicated in the detailed course description and in the Moodle page of the course.

Additional reading: Halmos, Paul: Naive Set Theory (Springer reprint 2011); Crossley, John: What is Mathematical Logic? (Dover reprint 1991); Goble, Lou ed.: The Blackwell Guide to Philosophical Logic (Blackwell, 2001); Boolos, G., Burgess, J., & Jeffrey, R.: Computability and Logic (Cambridge University Press, 2007). Additional material on special topics will be made available on Moodle.

Assessment: Take-home assessment (100%) in the ST. Examination will be a 48 hour take home exam, to be submitted electronically.

PH421

Dissertation Seminar - Philosophy and Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Jonathan Parry

Availability: This course is compulsory on the MSc in Philosophy and Public Policy. This course is not available as an outside option.

Course content: Aim: This course helps students on the MSc in Philosophy and Public Policy develop their philosophical research and writing skills. It clarifies expectations surrounding the MSc dissertation, which is an extended piece of writing that students are expected to complete over the summer. One of the course's main aims is to help student settle for a relevant dissertation topic that they feel comfortable with.

Teaching: 10 hours of seminars in the MT. 20 hours of seminars in the LT.

The course starts with a five hour module on argumentative writing in philosophy (weeks 1-5 of MT). This is followed by discussions of past MSc dissertations, and short student presentations on possible research ideas (weeks 7-11 of MT). During Lent Term, students are required to present their MSc dissertations as work in progress. This course has reading weeks in weeks 6 of MT and LT. This year, some or all of this teaching will take place online.

Formative coursework: Presentation of own dissertation as work in progress

Optional draft of up to 6000 words due at the end of June

Indicative reading: None.

Assessment: This course is not assessed.

PH422

Dissertation Seminar - Philosophy of Social Science

This information is for the 2020/21 session.

Teacher responsible: Prof. J. McKenzie Alexander, LAK 5.01

Availability: This course is compulsory on the MSc in Philosophy of the Social Sciences. This course is not available as an outside option.

Course content: The course is intended to develop the ability to make philosophical arguments and to write structured philosophical essays. It will serve to prepare students for research and writing their dissertation. In Michaelmas term, the first few meetings will cover philosophical and argumentative writing, with a number of in-class exercises. Then we will discuss the structure and content of an MSc dissertation in Philosophy and the grading rubric used for marking dissertations. The remainder of Michaelmas term will cover possible thesis topics in the

philosophy of social science, with group presentations. In Lent term, seminars will cover topics that are chosen by MSc students for their theses.

Teaching: 10 hours of seminars in the MT. 20 hours of seminars in the LT.

This year, some or all of this teaching will take place online.

Formative coursework: A number of assignments whose completion will aid the writing of the dissertation will be set over the course of MT and LT.

Assessment:

This course is not assessed.

PH425 Half Unit

Business and Organisational Ethics

This information is for the 2020/21 session.

Teacher responsible: Mr Thomas Ferretti

Availability: This course is available on the CEMS Exchange, MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Economics and Philosophy, MSc in Management of Information Systems and Digital Innovation, MSc in Philosophy and Public Policy, MSc in Philosophy of Science, MSc in Philosophy of the Social Sciences and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is about philosophical and ethical issues related to the conduct of business. Some tough-minded people believe that business is like a game where winning means making as much money as possible. They believe that "business ethics" does not exist, that it is a contradiction in terms, and that whoever thinks otherwise – whoever thinks that business is also about treating others respectfully – is either naive, or deluded, or both. What these tough-minded people do not realise is that they are, in fact, making an ethical claim. They claim that, while we generally have ethical obligations towards others in society, when it comes to the game of business everyone is permitted to pay attention only to their personal gain. This statement may be correct, or it may be false. But it is definitely an ethical statement, simply because it makes claims about how people may permissibly behave. So, inadvertently, they are doing business ethics.

In this introductory course to business ethics, we look at different types of ethical theories, and we apply them to problems that tend to arise in business contexts. The primary aim of the course is not to present you with ethical solutions or dogmatic responses, but to practice ethical reasoning, analytical skills, and critical thinking, so that towards the end of the course, you will no longer be satisfied with simple answers to difficult problems. You will also practice argumentative and writing skills that will help you express your thoughts clearly and concisely.

Topics discussed in the context of this course include:

- What are the moral responsibilities of managers?
- Is Milton Friedman correct that the main purpose of business is to increase profits?
- Do managers have instead moral responsibilities that are specific to their role as market actors, such as avoiding deception, fraud, or environmental degradation?
- What, if anything, is wrong with exploitation? If sweatshop workers voluntarily choose to work under exploitative conditions because they want a job, are such working conditions acceptable then?
- Should firms have an obligation to protect the privacy of their workers or customers?
- Why and how should firms tackle gender discrimination in the workplace?
- To what extent are the large pay packages that CEOs receive justified? What makes wages fair or unfair?

Required readings amount to about two to three papers per week.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. This course has a reading week in Week 6 of LT.

This year, some or all of this teaching will take place online.

Formative coursework: One essay of 2000 words.

Indicative reading: Carr, Albert Z. (1968): "Is Business Bluffing Ethical?", in *Harvard Business Review*, 46 (1): 143-153. Friedman, Milton (1970): "The Social Responsibility of Business is to Increase its Profits", *New York Times Magazine*, Sept. 13. Heath, Joseph (2014): "A Market Failure Approach to Business Ethics", in *Morality, Competition, and the Firm: The Market Failures Approach to Business Ethics*, pp. 25-41. Oxford: Oxford University Press. Moriarty, Jeffrey (2009): "How Much Compensation Can CEOs Permissibly Accept?", in *Business Ethics Quarterly*, 19 (2): 235-250. Zwolinski, Matt (2007): "Sweatshops, Choice, and Exploitation", *Business Ethics Quarterly* 17 (4): 689-727.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 2000 words) in the ST.

PH427 Half Unit

Genes, Brains and Society

This information is for the 2020/21 session.

Teacher responsible: Dr Ella Whiteley and Dr Michael Diamond-Hunter

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course examines, from a philosophical perspective, the ways in which recent developments in genetics and neuroscience challenge our conceptions of what we are – and what we could become.

Topics covered include:

Human nature: Does the concept of 'human nature' have any biological basis? Can we distinguish between those traits which are part of 'human nature' and those which are not? Should we attempt to improve human nature by means of technologies such as gene editing?

Gender and the brain: Are 'sex' and 'gender' the same thing? Are gender categories natural or social? Are there robust psychological differences between men and women? If so, are these 'hardwired' into the brain or the product of socialization? Are our brains either 'male' or 'female', or are they 'intersex'?

Race and the genome: Do races exist? Is there any objective biological basis for racial categorization, or are races socially constructed? Does the concept of 'race' have a legitimate role in medicine?

Animals and people: What is the evidence for animal sentience? What are the ethical issues surrounding the use of animals in biomedical research? If we could reduce animal suffering through gene editing, should we? Do some non-human animals have 'personhood'?

Right and wrong: Has neuroscience shown that morality is more a matter of emotion than reason? Can we use neuroscience to help us choose between ethical theories? Should neuroscience inform the decision-making of our legal system? Can it be used to help us improve our own moral behaviour?

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Lectures: Weeks 1-5 and 7-11

Seminars: Weeks 1-5 and 7-11

Formative coursework: A critical analysis exercise (1000 words)

Indicative reading: Suggested introductory readings:

- Glover, J. (2008) *Choosing Children*.
- Jordan-Young, R. (2010) *Brain Storm*.
- James, M. (2011) "Race", in the *Stanford Encyclopedia of*

Philosophy [online]

• Greene, J. D. (2013) Moral Tribes.

Assessment: Essay (50%, 2000 words) in the MT.

Essay (50%, 2000 words) in the LT.

There is no exam for this half-unit. There will be two summative essays, each worth 50% of the final mark.

PH430 Half Unit

Einstein for Everyone: From time travel to the edge of the universe

This information is for the 2020/21 session.

Teacher responsible: Dr Bryan Roberts LAK 1.01

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: Does the universe have an edge? Is time travel possible? What is a black hole, and in what sense are space, time and gravity a matter of "geometry"? The modern theory of spacetime introduced by Einstein provides a precise framework in which to ask these questions. This course makes their analysis accessible to everyone.

Students will have the opportunity to engage with Einstein's theories of relativity, to use them to analyse philosophical problems, and to examine their philosophical and practical implications. Students will learn to apply these conceptual tools to the analysis of space, time and gravity, as well as to formulate and argue for their own perspectives on the philosophical implications of relativity theory.

One is often faced with unsubstantiated declarations about the implications of Einstein's theories, by both scientists and non-scientists. This course will equip non-scientists with the conceptual tools needed to critically analyse these claims for themselves. It will also provide students with the tools needed to discuss the philosophy of space and time from a modern perspective.

Einstein for Everyone requires absolutely no background in physics or maths.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students are also asked to complete a few short reading questions each week to prepare for discussion in class.

Indicative reading: All weekly readings will all be made available to students on Moodle. As an indicative reading, see Norton, John D. (2017) Einstein for Everyone.

Assessment: Essay (50%, 1500 words) in the MT.

Essay (50%, 1500 words) in January.

PH431 Half Unit

Physics and the City: From Quantum Jumps to Stock Market Crashes

This information is for the 2020/21 session.

Teacher responsible: Dr Bryan Roberts LAK 1.01

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social

Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: One of the most surprising discoveries of the 20th century is that many things can be described by tiny atoms moving randomly about. Thinking about the physical world in this way led to the invention of modern particle physics. Thinking about the financial world in this way led to modern financial modeling. This course is about some of the philosophical issues underlying the relationship between physics and finance.

Students in this course will explore some of the most important conceptual and philosophical questions underlying physics and finance, like: How are assumptions about randomness compatible with observed forms of determinism? What does it mean to be an atom? How does the quantum world differ from the everyday world? What explains why physical models have unexpected applications in finance? To what extent do such applications help to underpin how the prices of financial instruments are set? The course will proceed at a conceptual level that is suitable for students of all backgrounds.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. This year, some or all of this teaching will take place online.

Formative coursework: Students will be expected to produce 1 essay in the LT.

In addition to the formative essay due mid-term, students must complete 2-4 short weekly reading questions to prepare for discussion in class.

Indicative reading: Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles. Some indicative readings include:

- Malkin, Burton G. A random walk down Wallstreet, excerpts.
- Norton, John D. Einstein for Everyone, Chapters 34-37 on Brownian motion and the origins of quantum theory.
- Weatherall, James O. The Physics of Wallstreet.
- Derman, E. My Life as a Quant. Excerpts.

Assessment: Essay (50%, 1500 words) in the LT.

Essay (50%, 1500 words) in the ST.

PH433 Half Unit

Philosophy of Gender and Race

This information is for the 2020/21 session.

Teacher responsible: Dr. Ella Whiteley and Dr. Michael Diamond-Hunter

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This half-unit examines, from a philosophical perspective, the nature of gender and race and the role these categories play in shaping the social world and structuring human lives.

Topics covered will include:

Gender and Biology: How does "gender" relate to "sex"? Is our concept of biological "sex" objective, and free from gender stereotypes and norms? Is our sex fixed or changeable?

Gender and Society: Does society oppress certain genders, and if so, how? How does sexism intersect with other oppressions, like racism and transphobia?

Race and Society: How does the social meaning of "race" vary around the world? Should we try to reconcile "ordinary" conceptions of "race" with technical conceptions of "race"? How should we understand the directionality and limits of racial classification?

The Future of Gender and Race: Will race and gender still exist in the future? Should we try to work for a race-free and gender-free world, or should these ways of classifying people be preserved?

We will focus on approaches to these questions from “analytic” philosophy, including feminist and race-critical approaches and approaches from the philosophy of science. The aim is to confront the big questions of gender and race by analysing and constructing careful and precise philosophical arguments.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. Students on this course will have a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 exercise in the LT.

Indicative reading: Suggested introductory reading:

- Fausto-Sterling, 2000 [2020 New Edition]. Sexing the Body: Gender Politics and the Construction of Sexuality.
- Crenshaw, K., 1989. Demarginalizing the Intersection of Race and Sex: A Black Feminist Critique of Antidiscrimination Doctrine, Feminist Theory and Antiracist Politics.
- Bettcher, Talia, 2020. Feminist Perspectives on Trans Issues, The Stanford Encyclopedia of Philosophy.
- Appiah, Kwame Anthony, 2005. The Ethics of Identity.
- Lee, Sandra Soo-Jin, Koenig, Barbara K., and Richardson, Sarah S., (eds.) 2011. Revisiting Race in a Genomic Age
- Glasgow, J., Haslanger, S., Jeffers, C. and Spencer, Q., 2019. What is Race?
- Zack, Naomi, 1993. Race and Mixed-Race.

Assessment: Essay (45%, 1500 words) and class participation (10%) in the LT.

Essay (45%, 1500 words) in the ST.

There is no exam for this half-unit. There will be two summative essays, each worth 45% of the final mark. 10% of the final mark will be awarded for seminar participation.

PH445

Dissertation Seminar - Philosophy of Science

This information is for the 2020/21 session.

Teacher responsible: Prof Roman Frigg

Availability: This course is compulsory on the MSc in Philosophy of Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course is intended to develop the ability to construct sharp analytic philosophical arguments and to write structured philosophical essays. It will help students to choose the topic of their dissertation, help with how to go about researching the topic and how to write the dissertation (by presentation and criticism of preliminary drafts). The course starts with reviewing the structure and content of an MSc dissertation in Philosophy, and the grading scheme used for marking dissertations. This is followed by presentations by students on topics intended as possible topics of their dissertations. The presentations will be extensively discussed in the seminar by fellow students and in subsequent private meetings with the seminar leader. In Lent Term each student will read two former MSc dissertations with topics close to the interest of the student, and each student will report in the seminar on the merits and weaknesses of the selected works, trying to understand why the chosen dissertations received the marks they did. In the final part of the seminar students will again give presentations on the progress of their research.

Teaching: 10 hours of seminars in the MT. 20 hours of seminars in the LT.

This year, some or all of this teaching will take place online.

Formative coursework: A number of assignments - at least one per term - whose completion will aid the research into and writing of the dissertation will be set.

Assessment: The course is not assessed.

PH456

Rationality and Choice

This information is for the 2020/21 session.

Teacher responsible: Prof Richard Bradley

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course examines the theory of rationality and rational decision making. It is in two parts (i) Probability and Decision: Probabilistic thinking, different interpretations of probability, decision making under risk, ignorance and uncertainty, the measurement of belief and desire, paradoxes of expected utility theory. (ii) Game Theory and Social Choice: Non-cooperative game theory; Solution concepts; evolutionary game theory; May's theorem and arguments for majority rule; Arrow's Theorem; the Gibbard-Satterthwaite theorem; interpersonal comparability and Utilitarianism; the theory of judgement aggregation.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will submit a piece of written work each term and/or complete a number of exercises.

Indicative reading: Richard Jeffrey, The Logic of Decision, Michael Resnik, Choices: an introduction to decision theory, Martin Peterson An Introduction to Decision Theory, Amartya Sen Collective Choice and Social Welfare, Duncan Luce and Howard Raiffa Games and Decisions, Wulf Gaertner A Primer in Social Choice Theory, K. Binmore, Game Theory: A Very Short Introduction

Assessment: Exam (50%, duration: 3 hours) in the summer exam period.

Coursework (20%) in the MT.

Coursework (20%) in the LT.

Class participation (10%) in the MT and LT.

PH458 Half Unit

Evidence and Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Liam Kofi Bright

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available with permission as an outside option to students on other programmes where regulations permit.

Although the emphasis throughout will be on ideas rather than formal techniques and although all the ideas will be explained simply and intuitively, some of the evidence relevant for policy is evidence about probabilities and so the course will involve issues about the correct interpretation of probability and statistics. Although no detailed formal manipulations will be required, students will need to feel happy thinking about the intuitive ideas underlying probability and statistics.

Course content: Good policy decisions - whether concerning climate, conservation, international development, poverty, education, medicine, or health - require rational deliberation over whether the proposed policy will (or is likely to) bring about the intended outcome. For instance, we might wonder if lowering CO2 emissions will reduce global warming? Or whether smaller class sizes enhance scholastic achievement? The obvious suggestion is that answers to such questions are the result of rational deliberation just in case they are based on good evidence and appropriate reasoning. But what counts as good evidence and appropriate reasoning? And what happens when different kinds of evidence pull in opposite directions? Are certain types of evidence more telling than others? And if so, why? Does evidence that the policy works in one country mean that we should have confidence that it will work in another country? Can the requirements of

democracy conflict with respect for expertise? Do the competing value judgements that are at stake in our political or social decisions make a difference to the forms of reasoning that is appropriate? These are some of the central issues addressed in the course. In this course, you can learn how to be 'evidence-savvy', how to ask the right questions about evidence and reasoning as well as how to think about risk-assessment and its relation to policy.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

This year, some or all of this teaching will take place online.

Formative coursework: Students will be expected to produce 1 essay in the LT.

In addition to the essay, I will also give students the opportunity to do regular shorter writing exercises as a means of building up to the final formative essay. I will give feedback on these. Such short writing exercises will largely be short summaries of the readings as well as answering questions about the readings that I will ask at the end of class.

Indicative reading: A detailed reading list will be provided at the beginning of the course. Useful initial readings are: Gigerenzer, G. (2002) *Reckoning with Risk: Learning to Live with Uncertainty*; Cartwright, N. and Hardie, J. (2012) *Evidence-Based Policy: A Practical Guide to Doing it Better*; Worrall, J. (2007) 'Evidence in Medicine and Evidence-Based Medicine', *Philosophy Compass*.

Assessment: Essay (33%, 2000 words) in January.

Take-home assessment (67%) in the MT.

PH499

Dissertation

This information is for the 2020/21 session.

Teacher responsible: Prof Jason Alexander, Prof Miklos Rede, Prof Richard Bradley, Dr Jonathan Parry and Prof Roman Frigg

Availability: This course is compulsory on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is not available as an outside option.

Course content: Students are required to write a 10,000-word dissertation (7,000 for MSc Economics and Philosophy) on a topic within the field covered by their course of study and approved by the Department of Philosophy, Logic and Scientific Method.

Assessment: Dissertation (100%, 10000 words) post-summer term.

The course is assessed 100% by Dissertation. Dissertations must be submitted on a specified date in August in the academic year registered. (Part-time students are required to submit their dissertations in the August of their second year of part-time registration). All details are given in the Departmental Programme Handbook.

PP401 Half Unit

Political Science for Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Joachim Wehner
Dr Mathilde Emeriau

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Pre-requisites: This course has no pre-requisites.

Course content: The course will introduce students to how to understand the political context of policymaking, using the latest theoretical and empirical knowledge in modern political science. The course will cover, among other things, political behaviour (such as voting behaviour, elections and lobbying), political institutions (such as electoral systems, parliamentary and presidential government, and central banks) and political outcomes (such as

economic policies and public services). The course will combine a review of the main empirical regularities across time and across country in each of these areas, with an introduction to key theoretical arguments about how actors interact and how institutions shape strategic behaviour, and an introduction to the latest empirical (and causal) estimation techniques for testing theoretical propositions.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours in the MT. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and classes, and office hours. This course includes a reading week in week 6 of MT.

Formative coursework: Students will be expected to produce one formative assignment in the MT.

Indicative reading: 'Analysing Politics: Rationality, Behavior and Institutions' by Shepsle (W.W. Norton, 2010, 2nd edition) provides an excellent starting point and can be used as the main reference for many topics. A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) in the LT.
Presentation (50%).

Part 1. Group exercises (50%)

There will be two application exercises, which will be carried out in groups and assessed on the basis of group presentations.

Each seminar will be divided into groups several weeks prior to a presentation. Each group will have an opportunity to receive feedback on their proposed plan for a presentation. Assessment will be as a group but there may be an individual component within the mark.

Part 2. Essay (50%)

There will be an essay of 2000 words. The word count for the essay will include footnotes and appendices but exclude the references/bibliography. Students will be able to choose their own question.

PP402 Half Unit

Quantitative Methods for Public Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Mark Schankerman

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Course content: The course introduces several econometric approaches that are widely used for quantitative and empirical evaluation which can be applied to policy-making. We will develop the basic methodology and assumptions underlying each approach, which is essential to understand in order to know when each tool can be applied, and when not. The emphasis is on the practical application of these skills and tools to real-life situations and policy-making interventions. Topics covered include randomised control experiments, difference-in-differences regressions, regression discontinuity design and matching. In the final weeks the course also gives students an overview of the key principles of cost-benefit analysis and how to apply it to real-world scenarios.

Teaching: Teaching in this module consists of a minimum of 20 hours of lectures and 13.5 hours of seminars and 9 hours of help sessions in the MT. This year some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: There will be weekly formative course work to give students the opportunity to develop fluency with the tools covered in the course.

Indicative reading: Joshua D. Angrist and Jörn-Steffen Pischke, "Mastering Metrics";

James Stock & Mark Watson, "Introduction to Econometrics"

Jeffrey Wooldridge, "Introductory Econometrics".

The given texts are preparatory reading only. A full reading list will be provided at the start of the course.

Assessment: Coursework (30%) in the MT.

Online assessment (70%) in the LT.

For the online assessment students will have a fixed window to access the assignment questions and to respond to them. No outside research will be required. Questions will be based on topics covered in lectures and seminars.

PP403 Half Unit Public Management

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Lodge

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Pre-requisites: This course has no pre-requisites.

Course content: This course will offer an intensive introduction into key literatures and themes in the study of public management. The emphasis will be on the trans-disciplinary literature dealing with public management in the context of developed and lesser developed world contexts. The course will cover, among other things, questions such as public sector reform, coordination and collaboration, control over bureaucracy, professionalism and public service motivation, performance management, crisis management, leadership, institutional capacity building, cutback management and organizational learning. The course will emphasise the key theoretical contributions and relate these to empirical contexts.

Teaching: This course will be delivered through a combination of seminars and lectures, amounting to a minimum of 30h across the Michaelmas term. This year, some or all of this teaching will be delivered through a combination of online lectures and on-campus and online seminars. This course includes a reading week in week 6 of MT.

Formative coursework: Students will be expected to produce one exercise in Week 3 and one essay in Week 7.

The first piece is a short document offering a view on 'what is public management' (week 3). Feedback will be provided by week 5. This gives students an early opportunity to start writing and to consider the broader field of public management.

The other piece is a short essay (1500 words) to be completed by the end of week 7. Feedback will be provided by week 9. The essay will be based on a choice of questions. This will give students the opportunity to practice for their assessed essay and the online exam.

Indicative reading: Barber, M (2015) *How to Run a Government*, London, Penguin. Emerson, K and Nabatchi, T (2015) *Collaborative Governance Regimes*, Georgetown University Press. Hood, C (1998) *Art of the State*, Oxford, Oxford University Press. Perrow, C (1984) *Normal Accidents: Living with High Risk Technology*, (New York, Basic Books). Simon, H (1947/2013) *Administrative Behavior*, Simon & Schuster. The given texts are preparatory reading only. A full reading list will be provided at the start of the course.

Assessment: Essay (50%, 3000 words) in the MT.

Online assessment (50%) in the LT.

The online assessment will be administered via Moodle on a day of week 0 of Lent Term to be co-ordinated each year with other courses of the MPP degree with assessments at this time of year. Students will have a fixed window (e.g. 12-hour or 24-hours) within which to access the assignment questions and to respond to them. Once they have logged into Moodle and downloaded the questions students will have 2 hours to prepare and upload their answers. No outside research will be required. Questions will be based on topics covered in lectures and seminars.

PP404 Half Unit Economics for Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Ethan Ilzetzki

Availability: This course is compulsory on the Master of Public

Policy. This course is not available as an outside option.

Course content: This is graduate level course for mid-career policy-makers to develop their knowledge and understanding of key principles of economics as applicable to policy-making. The emphasis is on developing an understanding of analytical frameworks and models that can be applied to a wide variety of contexts. Both micro- and macro-economics will be covered, including price theory, understanding markets, externalities, public goods, principal-agent problems, economic growth, inflation business cycles, unemployment, and fiscal and monetary policies.

Teaching: This course is delivered through a combination of a minimum of 13.5 hours of classes, 20 hours of lectures and 10 help sessions across the Lent Term, plus 1.5 hours of classes in the ST. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

There will be weekly formative course work to give students the opportunity to develop fluency with the tools covered in the course.

Indicative reading: Mankiw, N. Gregory and Mark Taylor (2017) *Economics*, 4th Edition, Cengage Learning EMEA. Moss, David A. *A Concise Guide to Macroeconomics*. Reinventing the Bazaar: A Natural History of Markets - McMillan, John 2002. *Intermediate microeconomics: a modern approach* - Hal R. Varian 2014. *Participation and the provision of discrete public goods: a strategic analysis* - Thomas R. Palfrey, Howard Rosenthal 1984-7. *The undercover economist strikes back: how to run or ruin an economy* - Tim Harford 2013. The given texts are preparatory reading only. A full reading list will be provided at the start of the course.

Assessment: Exam (70%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Coursework (30%) in the LT.

PP405 Half Unit Public Policy Applications

This information is for the 2020/21 session.

Teacher responsible: Dr Sara Hagemann and Prof Nicholas Barr

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Pre-requisites: This course has no pre-requisites.

Course content: This course will introduce students to the application of social science literatures to concrete policy issues. The course will be organised around topics which are both being actively discussed in the policy world and researched in the academic world. The emphasis will be on illustrating how different theoretical and disciplinary approaches analyse a particular policy topic and problem. The precise policy topics will be decided each year, depending on academic and practitioner availability, but we would aim to attract speakers at the highest levels either at the cutting edge or research of particular research topic or who are working directly in a topic area.

Teaching: This course is delivered through a combination of lectures and interactive seminars and group work, totalling a minimum of 20 hours in Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. Online office hours will run every Monday for students who would like to discuss the content of the course or their student projects in more detail. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: The policy project will be coordinated by the lead academic, who will meet with each student individually to discuss and approve (a) the proposed focus of the project, (b) the proposed research method and approach, (c) the identification of relevant existing research and literature, and (d) an outline of the structure of the project. Each student will get personalised feedback on their proposed project.

Indicative reading: This will depend on the topics chosen, and the policy experts that are invited, each year.

A full reading list will be provided at the start of the course.

Assessment: Coursework (100%, 3000 words) in the ST.

There will be a Policy Project of 3,000 words for submission in the Summer Term.

PP406 Half Unit

Philosophy for Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Johanna Thoma and Prof Michael Otsuka

Availability: This course is compulsory on the Master of Public Policy. This course is available on the Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority for this course is given to students on the Master of Public Policy. Second priority is given to students of the Master of Public Administration. Any remaining places may be taken by students outside of the School of Public Policy.

Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as the following.

- What is a good public measure of well-being?
- Should we distribute resources in health care to produce the most well-being overall or should we also aim to limit inequalities?
- Should people be left to bear the consequences of their free choices?
- May the government force you to buy health insurance?
- Is torture ever justified?
- Do prosperous countries have a right to close their borders to immigrants from poor countries?
- Should hate speech be protected by freedom of speech?
- Should the development of new drugs be left to private companies rewarded by patent protection?
- What is the optimal population size and what policies may the state pursue in order to achieve it?
- Should higher education be financed by student loans or general taxation?
- Should we be free to act as we choose so long as we do not harm others?
- Is killing morally worse than letting die?

Teaching: This is a half-unit course delivered in Lent Term through a combination of seminars and lectures, totalling a minimum of 20 hours. This course includes a reading week in Week 6 of Lent Term. At least one week of this course includes a student debate on the course material. This year, where necessary, some of this teaching will be delivered through a combination of virtual classes, flipped-lectures, and online exercises.

Formative coursework: Students will be expected to produce 2 essays in the LT.

Formative assessment will consist of two short essays, of 1500 words each. Note that at least one of these must be submitted since a reworked version (with a response to the feedback received) is an essential part of the summative work for the course. In this sense, completing at least one formative essay is a threshold for completing the course.

Indicative reading:

- D. Hausman, M. McPherson and D. Satz (2017), *Economic Analysis, Moral Philosophy, and Public Policy* 3rd Edition. Cambridge: Cambridge University Press.
- M. Sandel (2009) "Justice: What is the right thing to do?" New York: Farrar, Strauss and Giroux.
- G. Bognar and I. Hirose (2014). *The Ethics of Health Care Rationing*. London Routledge

- A. Voorhoeve (2018) 'Why Health-Related Inequalities Matter and Which Ones Do'. In Ole Frithjof Norheim, Ezekiel Emanuel, and Joseph Millum (eds.) *Global Health Priority-Setting: Beyond Cost-Effectiveness*. Oxford University Press (2019): 145-161.
- C. Kates (2004). 'Reproductive Liberty and Overpopulation' *Environmental Ethics*.
- M. Nussbaum (2013), "Creating Capabilities: The Human Development Approach". Cambridge: Belknap Press.
- A. Sen (2009), "The Idea of Justice". Cambridge: Belknap Press.
- Elizabeth Anderson (1999) "What is the Point of Equality?," *Ethics* 109 (1999): 287-337

Assessment: Essay (33%, 1500 words) and essay (67%, 2500 words) in the ST.

Summative essay 1 (33% of final grade), which is a 1,500 word essay on other material from the course due early in ST.

Summative essay 2 (67% of final grade) which is a 2,000 word rewritten version of one of the two formative essays, plus a 500 word response explaining how the essay has been revised in light of the criticism, due the middle of ST.

PP408

Introduction to Quantitative Methods for the MPA Programme

This information is for the 2020/21 session.

Teacher responsible: The teacher will be announced at the start of the course.

Availability: This course is compulsory on the Master of Public Administration. This course is not available as an outside option. Also available to other MPhil/PhD students with the agreement of the course tutor.

Course content: An introduction to basic mathematical and statistical concepts for use in MPA courses in economics and quantitative approaches. The course covers the following topics: Statistics: Discrete and continuous random variables, jointly distributed random variables, the Normal distribution, sampling and the Central Limit Theorem, properties of estimators, introduction to hypothesis testing. Mathematics: Linear functions, quadratic, logarithmic and exponential functions, the derivative of a function and rules of differentiation, unconstrained optimization with one variable, functions of several variables and their differentiation, unconstrained optimization with several variables, constrained optimization.

Teaching: The course runs over 8 days, during the two weeks prior to the start of the Michaelmas Term. This year, teaching will be delivered virtually with recorded and interactive sessions.

Indicative reading: Notes covering the course material will be made available at the beginning of the course. Students are strongly encouraged to read Charles Whelan's 'Naked Statistics' prior to the start of the course. It provides a readable and accessible background to the statistics portion of the course. Two widely used introductory statistics books that can be used as background reading for the statistics part are Newbold, Carlson and Thorne 'Statistics for Business and Economics' (6th edition) and Wonnacott and Wonnacott 'Introductory Statistics for Business and Economics' (4th edition). However, there are also many other introductory statistics textbooks that cover the same material.

Two widely used introductory mathematics books that can be used as a background reading for the mathematics part are Ian Jacques' 'Mathematics for Economics and Business' (5th edition) and Wisniewski's 'Introductory Mathematical Methods in Economics' (2nd edition). Also in this case there are a large number of excellent alternative textbooks that cover the same material. Those who want a more advanced treatment of the same material can use Simon and Blume's 'Mathematics for Economists', but this treatment is more formal than what we require for this course. We do not recommend buying a new textbook for this course, if you already own a textbook that covers similar material.

Assessment: In-class assessment (100%) in September.

The course will be assessed with a one hour in-class assessment at the end of the second week of teaching. The assessment result does not count towards the MPA final degree, but can be used by students to identify their key areas for future learning. All students are expected to take the assessment.

PP410 Half Unit

Public Economics for Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Daniel Reck and Dr Johannes Spinnewijn
Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have taken PP440 Macro and Microeconomics (for Public Policy) or an equivalent course.

Course content: This is a course in theoretical and applied public economics using intermediate economic theory. Topics include issues of equity and efficiency and alternative theories of the role of the state. Models of public goods and externalities, including environmental policy. Who really pays taxes: issues of tax incidence and tax evasion. Income inequality, poverty alleviation and the role of welfare programmes in theory and in practice. Health and education policy. The effects of taxes and transfers on labour supply and migration; The optimal taxation of commodities and incomes. Current topics in public finance. The main institutional references will be to the UK and the US, but some attention will also be given to broader international experience.

Teaching: This course is delivered through a combination of classes and lectures totaling a minimum of 29 hours in the Lent Term, and a 1 hour of review class in the summer term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will complete and be given feedback on two sets of practice questions, which are similar in style and format to the final examination.

Indicative reading: J Gruber (2011) *Public Finance and Public Policy*, 3rd edition, Worth Publishers. [CC HJ141 G88] or Gruber (2007), 2nd edition]. N Barr (2012), *The Economics of the Welfare State*, 5th ed., OUP [CC HB99.3 B26]. Institute for Fiscal Studies (2010-2011), *Mirrlees Review: Reforming the Tax System for the 21st Century*, Volume 1 (2010): *Dimensions of Tax Design*, Volume 2 (2011): *Tax by Design*. Oxford University Press, Oxford. Available online at: <http://www.ifs.org.uk/mirrleesReview>. On developments in public spending in the UK, see H Glennerster (2003), *Understanding the finance of welfare* (Policy Press); or H Glennerster and J Hills (eds) (1998), *The State of Welfare: The economics of social spending* (Oxford) [CC HV245 S79]. Students wishing to review their microeconomic theory should consult a textbook on intermediate microeconomic theory, such as Morgan, Katz and Rosen (2006) *Microeconomics*, McGraw Hill (CC HB172 M84) or J Perloff (2008) *Microeconomics: Theory & applications with calculus*, Pearson (CC HB172 P45). On the structure of taxation in the UK, see IFS (2011) *A Survey of the UK Tax System*, Briefing Note no. 9 (<http://www.ifs.org.uk/bns/bn09.pdf>) and the HM Revenue and Customs website, (<http://www.hmrc.gov.uk>). The Institute for Fiscal Studies is an independent policy research institute and its website (<http://www.ifs.org.uk>) has a wide range of useful publications. The HMRC website includes information on the tax structure and statistics on tax payments (by income group, by type of tax, etc.) and overall revenues raised. The UK Treasury website (<http://www.hm-treasury.gov.uk/>) provides a range of

documents on economic policies and the public finances, including the annual publication, *Financial Statement and Budget Report* (the 'Red Book'), published each year on Budget Day. For comparative international fiscal data, information and analysis, useful sources include the International Monetary Fund, IMF (<http://www.imf.org/>), the World Bank (<http://www.worldbank.org/>) and the Organisation for Economic Cooperation and Development, OECD (<http://www.oecd.org>).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

PP411L Half Unit

Developments in International Conflict Resolution and Transformation

This information is for the 2020/21 session.

Teacher responsible: Professor Erik Berglof
 Visiting Professor in Practice, Mark Muller-Stuart

Availability: This course is available on the Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Course content: This course explores the international community's management and resolution of conflict in countries experiencing violent political transition. It provides an historical overview of how the international system has handled political transition from the post-war period into the 21st conflict environment. Students will learn how the current international system seeks to prevent, manage, and resolve conflict on the geopolitical, regional, and state level through a variety of tools including multilateral political forums and missions, mediation, conflict analysis, normative instruments, and the careful process design of peace processes. It will look at how the UN and the international community has handled the issue of conflict and political and economic transformation through the prism of four critical case studies involving Afghanistan, Libya, Syria and Yemen. During the course students will come to understand how economic reform, natural resource allocation, climate change, gender, migration, the responsibility to protect and prosecute and new forms of information and communication can all affect the 21st conflict environment in which the UN, international community and conflict parties operate. Course essays will focus on critical areas of research of practical use to mediators and policymakers. The module will seek to identify the most effective forms of mediation and conflict resolution and identify best practice and emerging trends. Leading practitioners and experts in the field will provide you with insights based on first-hand experience of these processes and transitions and critical thinking on the latest theoretical developments, research and best policy practices. In summary, the course aims to provide a multi-disciplinary perspective on the study of conflict resolution processes, including in relation to economic and political transition, which will be a valuable learning experience for those who wish to develop careers in the policy world in governments and public service, international organisations, security agencies, the media, NGOs or finance, as well as providing an excellent foundation if you wish to progress to a PhD programme.

The goal is less to teach you how to think about conflict normatively, though this is an element in parts of the course, but more how to develop your skills to research, analyse and help develop tools to manage, resolve and ultimately transform conflict. The programme also offers an array of extracurricular activities each academic year, including guest speakers, public lectures, colloquia/ workshops, and film screenings.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT. Students will submit a 1500 word formative essay in week 4. Feedback on this work will be used to inform the writing of the summative assignments.

Students will be required to present cases and key readings on rotation in the seminars throughout the term. These presentations are not summatively assessed, but will provide useful formative feedback on students' learning.

Indicative reading: A detailed reading guide will be given out at the first seminar. Students will be expected to engage in independent study, employing the reading lists provided.
