On this course, students will apply the analytical tools that are introduced in core courses of the School of Public Policy (e.g. PP440, PP455, PP478, PP401, PP402 and PP404) with a view to enhancing and deepening their understanding of policy implications. Teaching is based on case studies and other practitioner examples and country experiences, underpinned by theoretical and conceptual models. The course is taught by specialist practitioners in policy-making drawing on the insights from economic and political science research.

Teaching: 20 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the MT. Students will submit a 1500 word formative essay in week 4. Feedback on this work will be used to inform the writing of the summative assignments. Students will be required to present cases and key readings on rotation in the seminars throughout the term. These presentations

are not summatively assessed, but will provide useful formative feedback on students' learning.

Further readings will be provided at the start of the course.

Assessment: Essay (50%, 2000 words) in the MT Week 7.

Essay (50%, 2000 words) in the MT Week 10.

PP412 Half Unit Global Social Protection Design and Delivery

This information is for the 2020/21 session.

Teacher responsible: Dr Babken Babajanian

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit. The course is capped at 30.

Course content: The course will focus on conceptual, theoretical and practical issues involved in the development of social protection programmes in the global context. It will enable students to (i) recognise the objectives and role of social protection programmes in supporting human well-being, and (ii) analyse and critically assess the design, implementation, and evaluation of social protection programmes. The course will consider the design and performance of social protection within the specific economic, social, political economy and institutional context of their operation.

Social protection refers to policies and programmes designed to reduce poverty and vulnerability and improve people's ability to manage economic, social, governance, environmental, and lifecycle risks. Social protection includes three major policy instruments: social insurance (contributory pension, health, disability benefits); social assistance (direct cash and in-kind transfers); and active labour market programmes (skills training and public works).

In recent years, social protection has become a key instrument of public policy in the global south and it is no longer seen as an exclusive feature of the western welfare state. Building responsive social protection systems is a priority for many governments in Asia, Sub-Saharan Africa and Latin America and international development organisations are heavily involved in supporting national efforts.

These developments have generated a strong demand for policy experts who can analyse, interpret, design and evaluate social

protection programmes. The course will help students acquire in-depth knowledge and skills for analytical work and practical engagement in programme development. It will enable them to critically appraise how government agencies, international organisations and other actors design and implement social protection programmes.

The course will discuss major social protection programmes, including Bolsa Familia in Brazil, Juntos in Peru, Dibao in China, Pantawid Pamilyang in the Philippines, LEAP in Ghana, and PSNP in Ethiopia.

The course draws on academic literature and research studies and analytical reports commissioned by government agencies and international organisations (e.g. World Bank, Inter-American Development Bank). The chosen sources reflect the most recent developments in social protection worldwide. The course utilises the course leader's extensive hands-on experience in the analysis and evaluation of social protection programmes.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual interactive seminars and lectures delivered as online recordings.

Formative coursework: 1. Seminar presentations on assigned topics and contribution to seminar discussions. Each student is expected to do at least one presentation.

2. A short essay answering a pre-assigned question (500 words)

3. A short individually authored critique of a policy report (max 1,000 words)

Indicative reading:

- Devereux, S et al (2017) The Targeting Effectiveness of Social Transfers, *Journal of Development Effectiveness*, 9:2, 162-211. .
- Holmes, R. and N. Jones (2013) *Gender and Social Protection in the Developing World: Beyond Mothers and Safety Nets*. London and New York: Zed Books.
- Robalino, D. A., Rawlings, L. and I. Walker (2012) *Building Social Protection and Labor Systems. Concepts and Operational Implications*. Washington, DC: World Bank.
- Standing, G (2007) *Social Protection, Development in Practice*, Vol. 17, No. 4/5, pp. 511-522

Assessment: Essay (30%) in the LT.

Critical evaluation (70%) in the ST.

- A three-part individually authored essay (30%), in which students answer pre-assigned questions (max 500 words for each answer; 1,500 words in total).
- An individually authored critique of a policy report (70%) (max 3,000 words).

PP418 Half Unit

Globalisation and Economic Policy

This information is for the 2020/21 session.

Teacher responsible: Professor Andres Velasco

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: The expectation is that students will have previously taken PP440 and PP455 or other equivalent courses. Students that have not taken PP440 and PP455 will require permission from the course lecturer to attend the course.

Course content: Over the past two centuries, the global economy has become increasingly interconnected. This course studies the policy implications of this globalization. It considers the causes and consequences of increasing international economic integration, focusing particularly on the challenges and opportunities that globalization creates for policy makers. Key

areas covered include: international trade, innovation and growth, migration and wages, international capital flows, borrowing and adjustment in the world economy, monetary and exchange rate policy, and financial crises. The course builds on the knowledge developed in PP440 and PP455.

Teaching: This course is delivered through a combination of classes and lectures totalling 30 hours in the Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual lectures, a mix of online and in-classroom seminars, and interactive support sessions.

Formative coursework: The formative coursework will comprise two graded problem sets. The formative coursework will take place throughout the term.

Indicative reading: There is no single textbook that includes all the material covered in this course. Lectures and readings will primarily focus on journal articles. Three books that will be used during the course are:

Krugman, P.R., Obstfeld, M and Melitz, M.J. *International economics: theory and policy* 11th edition (Boston: Pearson, 2018)
 Rodrik, D., *The globalization paradox: why global markets, states and democracy can't coexist* (Oxford: Oxford University Press, 2011).
 Irwin, D., *Free Trade Under Fire* (Princeton: Princeton University Press, 2015)

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Coursework (50%).

The 50% coursework will consist of two graded problem sets worth 25% each.

PP419 Half Unit

Advanced Empirical Methods for Policy Analysis

This information is for the 2020/21 session.

Teacher responsible: Professor Daniel Sturm

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: The expectation is that students will have previously taken PP440 and PP455 or other equivalent courses. Students that have not taken PP440 and PP455 will require permission from the course lecturer to attend the course.

Course content: This course provides an advanced treatment of the empirical methods that are used to evaluate the effectiveness of public policies. The course builds closely on the course *Quantitative Approaches and Policy Analysis* (PP455) and also *Micro and Macroeconomics for Public Policy* (PP440). Topics covered include the problem of causality, the theory and practice of randomised experiments, difference-in-differences, synthetic controls, regression discontinuity, robust and clustered standard errors, and calibration.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 29 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: The formative coursework will comprise a graded problem set.

Indicative reading: There is no single textbook for the course and many of the key readings are journal articles. James Stock and Mark Watson "Introduction to Econometrics" remains a useful reference particularly for the material at the beginning of the course. A very good source for background reading is Joshua Angrist and Jörn-Steffen Pischke "Mastering 'Metrics: The Path

from Cause to Effect". A full reading list will be distributed at the beginning of the course.

Assessment: Exam (75%, duration: 2 hours) in the January exam period.

Project (25%, 2000 words) in the LT.

Project (25%, 2000 words) due at the beginning of the LT

PP440

Micro and Macro Economics (for Public Policy)

This information is for the 2020/21 session.

Teacher responsible: Dr Ethan Ilzetzki and Professor Daniel Sturm

Availability: This course is compulsory on the Master of Public Administration. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo) and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is an introductory graduate course providing an economics background suitable for high-level public policy-making. The emphasis is on acquiring sound models and methods suitable for appraising policy-making issues in a wide variety of contexts. The first term (MT) covers microeconomics and the second term (LT) covers macroeconomics.

MT (Microeconomics): competitive markets and economic efficiency; consumer optimisation and the demand for goods; firm optimisation and the supply of goods; market power; externalities in consumption and production; optimal provision of public goods; asymmetric information and market failure

LT (Macroeconomics): understanding macroeconomic data; long-run economic growth; business cycles; aggregate demand; money, inflation and monetary policy; stabilization policy; fiscal policy and government debt; the labour market and unemployment; exchange rates and international economic policy; the financial system and the macroeconomy.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Michaelmas Term and Lent Term and a revision session at the beginning of the Summer Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos. This course includes a reading week in Week 6 of Michaelmas & Lent Terms.

Formative coursework: Students will complete weekly problem sets. Some of these will be marked to provide indicative assessment.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Exam (70%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Policy memo (10%) in the MT.

Policy memo (10%) in the LT.

Continuous assessment (10%) in the MT and LT.

PP448 Half Unit

International Political Economy and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Lloyd Gruber CON.6.03

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Development Studies, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to

students on other programmes where regulations permit.

Course content: This half-unit MT course explores why governments and organisations pursue the development policies they do. Whenever experts get together to debate development policy, attention usually focuses on what all the relevant actors should be doing: Which policies should the leaders of developing countries be adopting (or discarding) to stimulate growth and reduce poverty? What new trade or aid strategies should policymakers in the industrialised world be implementing to help poorer countries develop? What should world leaders be doing to address climate change? In practice, however, people in positions of power do not always pursue the policy agendas that well-intentioned development experts say they should. Rather than let this be a source of frustration, students who take this course will come away with a deeper understanding of the political incentives that drive development forward, or sometimes backwards, in the real world. Attention will focus on the political pressures that motivate and constrain development policymakers at all levels of government - local, national and global - and across all sectors of the economy - public, private and non-profit. Students will be exposed to a wide variety of political economy concepts along the way. There will also be opportunities for students to apply these concepts to concrete cases of development management and mis-management, e.g. do international organisations such as the World Bank, the United Nations and the World Trade Organization really benefit all countries, or just wealthy ones? Why have inclusive democratic institutions taken root in some developing countries but not in others? Are the world's poorer nations stuck with a global balance of power that favours wealthier nations, or is China's rise a global game-changer? If you are curious about the larger political forces driving some developing countries ahead while others stagnate or decline - and you want more experience putting cutting-edge political economy theories to work in solving current development problems - this course is for you.

Teaching: This course is delivered through a combination of classes and lectures totalling 22 hours of lectures and 16.5 hours of seminars in the Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual lectures, a mix of online and in-classroom seminars, and interactive support sessions. This course includes a reading week in Week 6 of Michaelmas Term.

There will be a revision session before the take-home timed assessment.

Formative coursework: Every student will deliver one practice presentation during the first few weeks of the course. Students can expect detailed feedback on the substance of these presentations as well as their delivery (presentations will be videoed where possible). Each student will also be invited to submit an individually-authored policy memo on one of two different questions distributed in week 2. These memos will be handed back - with comments - shortly thereafter.

Indicative reading: 1 Paul Collier, *The Bottom Billion: Why the Poorest Countries are Failing and What Can be Done About It* (Oxford, 2007). 2 Laurie Garrett, 'Ebola's Lessons: How the WHO Mishandled the Crisis', *Foreign Affairs*, vol 94, no. 5 (2015), pp. 80-107. 3 Lloyd Gruber, *Ruling the World: Power Politics and the Rise of Supranational Institutions* (Princeton, 2000). 4 Daron Acemoglu and James A. Robinson, *Why Nations Fail: The Origins of Power, Prosperity, and Poverty* (New York: Crown Publishers, 2012). 5 Robert Wade, *Governing the Market: Economic Theory and the Role of Government in East Asian Industrialization* (Princeton, 2003). 6 Martha Finnemore and Judith Goldstein, eds., *Back to Basics: State Power in a Contemporary World* (Oxford, 2013). 7 Lloyd Gruber and Stephen Kosack, "The Tertiary Tilt: Education and Inequality in the Developing World", *World Development* 54 (2014) pp 253-272

Assessment: Presentation (20%) and policy memo (20%) in the MT.

Take-home assessment (60%) in the LT.

All students will be required to take part in a Development Policy Application (DPA) project stretching over several weeks of the course. A specific – and current – issue of major importance to

developing countries will be introduced in the first week of this exercise. Each student will then be asked to prepare an individually-authored policy memo on the topic. This memo will be worth 20% of the overall course mark.

In the second part of the exercise, students will be randomly assigned into small groups and begin preparing a jointly-delivered oral presentation outlining and defending their group's preferred policy. These presentations will take place towards the end of the term and will count for a further 20% of the overall course mark. The take-home timed assessment is administered via Moodle on a nominated day during week 0 of Lent Term. Students will have a 12-hour window (from 09.00-21.00 GMT) within which to access the assessment questions and complete the assessment. Once they have logged into Moodle and downloaded the assessment questions, students will have 2 hours and 30 minutes to prepare and upload their answers. The exercise will encourage students to think creatively about the ideas and arguments presented in the course and will include at least one short essay question. No outside research will be required. This last component of the assessment will count for 60% of the student's overall course mark.

PP449 Half Unit

Comparative Political Economy and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Tasha Fairfield

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Development Studies, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines key issues in comparative political economy, with an emphasis on developing countries and the politics of policymaking. Who get the policies they want, when, and how? Throughout, we will pay close attention to actors, interests, institutions, and power. Understanding the politics of policymaking is critical for development specialists and policy practitioners. Policies recommended by technical experts are not always politically feasible, and progress may require implementing second-best solutions. Moreover, approaches that work in one case may not work in another. Drawing on real-world examples from a range of policy domains including taxation and social spending, we will discuss strategies for enacting pro-development reforms that might otherwise be politically infeasible. The course will also introduce students to key issues in conceptualization and measurement by examining indices and indicators of governance and democracy that are widely used by development practitioners. Note: the subject matter complements material covered in PP448 and can be taken either in conjunction with, or separately from that course.

Upon completing the course, students can expect to (1) be able to critically engage with the key debates in comparative politics and development, (2) be able to identify political constraints that may impede implementation of pro-development policies, (3) apply political economy theories to explain 'real world' cases of development policy successes and failures, and (4) design strategies that can help make pro-development policies more politically feasible in a given country context.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 38 hours across Lent Term. This year, some or all of this teaching will be delivered through virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will receive feedback on

formative assignments in seminars that will prepare them for the assessed DPA at the end of the term.

The revision session in LT will prepare students for the assessed exam.

Indicative reading:

1 Jeffrey Winters, 2013, 'Oligarchy and Democracy in Indonesia', *Indonesia* 96, pp.11-33

2 Thachil, Tariq, 2011, 'Embedded Mobilization: Non-State Service Provision as Electoral Strategy in India', *World Politics* 62 (3): 434-469

3 Andrei Shleifer and Daniel Treisman, 2000, 'Without a Map: Political Tactics and Economic Reform in Russia', Cambridge: MIT Press

4 Tasha Fairfield, 2013, 'Going Where the Money Is: Strategies for Taxing Economic Elites in Unequal Democracies', *World Development* 47 (July), pp.42-57

Assessment: Project (40%) in the LT.

Take-home assessment (60%) in the ST.

All students will be required to take part in a Development Policy Application (DPA) project stretching over several weeks of the course. An issue of major importance to developing countries will be introduced early in the term. Students will be assigned into small groups, and each group will pick a country of its choice for the project. The DPA will count for 40% of the course mark.

A take-home assessment will be given in the Summer Term. This will count for 60% of the course mark.

PP450 Half Unit

Public Organisations: Theory and Practice

This information is for the 2020/21 session.

Teacher responsible: Prof Adnan Khan and Prof Timothy Besley

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some understanding of economics and quantitative methods is desirable.

Course content: The course will offer students the analytical frameworks and practitioners' knowhow for understanding and transforming public organisations and for understanding the challenges of design and implementation of public policies. Public organisations are key determinants of state capacity and this course will draw primarily on economics, particularly principal-agent theory and political economy to understand these. The lectures will take different views of public organisations: a micro, personnel-economics view; a system-level perspective; and a heterodox approach drawing on the recent literature from several disciplines on identity, values and norms.

The seminars will have an applied focus dealing with intractable public policy problems that states and public organizations often face and reasons why it is so difficult to deliver transformative and sustainable change on the ground. The group work during seminars will use a systematic and structured framework to identify pressing policy problems, diagnose the underlying causes of these problems using evidence, and design, test, implement and refine policy innovations. There will be a lot of emphasis on learning-centric approaches to transforming public organizations and to diagnosing and dealing with the challenges of policy implementation and political authorisation and the skill sets needed to address these challenges.

Teaching: This course is delivered through a combination of lectures and seminars totalling 20 hours of lectures and 15 hours of seminars during the Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and online videos.

Formative coursework: Students will be provided regular and weekly feedback on their group work during LT.

Indicative reading: Key readings:

- Timothy Besley, Robin Burgess, Adnan Khan and Guo Xu. (2020). Bureaucracy and Development. Annual Review of Economics. Forthcoming.
- Finan, Frederico, Benjamin Olken, and Rohini Pande. 2015. "The Personnel Economics of the State", The Handbook of Field Experiments.
- IGC Evidence Paper. 2019. "State Effectiveness"
- Cristina Corduneanu-Huc, Alexander Hamilton and Issel Masses Ferrer. 2012. "Understanding Policy Change: How to Apply Political Economy Concepts in Practice." Washington D.C.: World Bank Publications.
- Andrews, M., L. Pritchett & M Woolcock. (2017). Building State Capability: Evidence, Analysis, Action. Oxford University Press.
- Parkhurst, Justin. 2017. "The politics of evidence: from evidence-based policy to the good governance of evidence". Routledge Studies in Governance and Public Policy.

Assessment: Essay (50%) in the period between LT and ST. Policy memo (20%) and group presentation (30%) in the LT.

PP452 Half Unit

Applying Behavioural Economics for Social Impact: Design, Delivery, Evaluation and Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Nava Ashraf

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo) and Master of Public Administration. This course is not available as an outside option. This course is only available to students in the second year of the MPA programme.

Pre-requisites: A rigorous understanding of statistics, economics and econometrics is important for this course, in order to be able to absorb the economics journal articles and methods covered. Students will be required to have achieved marks of 55 or higher in PP440 and PP455 to be eligible for the course. Students with marks of 50-54 in PP440 and PP455 will be considered on a case by case basis.

Course content: This course delivers insights from cutting edge research in psychology and economics, and asks students to use these insights to design solutions to significant social challenges. Students learn how to diagnose, design, deliver, and rigorously test products and services using the principles of behavioural economics and the methods of field experimentation. The course begins by describing the principle of coproduction: outcomes in health, education and similar fields are not simply given to end-users, but are produced by end-users themselves, interacting with supply-side factors. Drawing on the insights from behavioural economics and using qualitative methods, students learn how to diagnose end-user needs, preferences and behaviour. The course then explores how the psychological aspects of behaviour can be combined with the tools and structure of economics to induce behaviour change and improve outcomes, including the challenge of setting prices and designing incentives. Throughout the course there is emphasis upon the critical importance of effective measurement in the context of the social sector, where traditional market feedback mechanisms are typically absent and where mission-driven leaders' evaluation of organisational impact can itself be subject to cognitive bias and distortion. Appropriate measurement in turn informs improvements in diagnosis and design. The course concludes by exploring policy impact and how research can be translated into policy action. Real world case studies are used at every stage of the course.

This course is relevant to all those who wish to improve the

effectiveness of social interventions and programmes across a range of diverse fields, whether such interventions are administered through the state or, increasingly, through private philanthropy and social entrepreneurship. The course tutor will be Professor of Economics and Director of Research at the LSE Marshall Institute.

Teaching: Teaching sessions will include both a Harvard Business School-style case study session and a lecture on the related research articles behind the case and discussion, delivered in a minimum of 30 hours in Lent Term. There will also be a drop-in weekly technical support session. This year, some or all of this teaching will be delivered as virtual sessions, in an online and interactive format.

Formative coursework: Additional exercises which will include preparation of an essay of the discussion questions for HBS-style case discussion.

Indicative reading: There is no single textbook for the course. For an introduction to the field of behavioural economics, students should consult Nudge: Improving Decisions About Health, Wealth, and Happiness, by Richard Thaler and Cass Sunstein (2009, Penguin) and Thinking, Fast and Slow, by Daniel Kahneman (2012, Penguin). We will also be reading several scientific articles from top-tier economics journals. A full reading list with the readings for each topic will be made available at the beginning of the course, and a draft course syllabus is available.

Assessment: Project (40%) in the LT.

Take-home assessment (60%) in the ST.

The project (worth 40%) will consist of a group exercise addressing a real world problem using tools from the course.

The other 60% will be a take-home timed assessment of two hours' duration early in Summer Term.

PP454

Development Economics

This information is for the 2020/21 session.

Teacher responsible: Prof Robin Burgess 32L.3.03 and Dr Gharad Bryan 32L.3.10

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Students may not take both this course and EC428 Development and Growth.

Pre-requisites: The expectation is that students will have previously taken PP440 and PP455 or other equivalent courses. Students who have not taken PP440 and PP455 will require permission from the course lecturer to attend the course.

Course content: In this course, students will apply their understanding of economics and econometrics to the task of policy making in developing countries. The focus is on acquiring the necessary theoretical and empirical skills to engage in the rigorous analysis of public policies in developing countries. Topics at the forefront of development economics will be covered. These include political economy, trade liberalization, growth, access to finance, technology adoption, education, health, infrastructure, property rights, land reform, gender, environment, mass media and political accountability. The emphasis will be on combining theory and data to evaluate the effectiveness of policies in these different areas.

Teaching: This course is delivered through a combination of classes and lectures totalling 40 hours of lectures and 20 hours of seminars in the Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual lectures, a mix of online and in-classroom seminars, and office hours. This course includes a reading week in Week 6 of Michaelmas Term and Lent Term.

Formative coursework: Students to complete weekly exercises based on course readings with one of these exercises being marked in a given term.

Indicative reading: A reading list will be distributed at the start of the course.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

PP455

Quantitative Approaches and Policy Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Jeremiah Dittmar and Prof Mark Schankerman

Availability: This course is compulsory on the Master of Public Administration. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po) and MPA Dual Degree (LSE and Tokyo). This course is not available as an outside option.

Course content: The course introduces students to regression-based methods and cost-benefits analysis used for the quantitative evaluation of public policies. The course introduces students to basic multiple regression analysis including hypothesis testing, modelling of non-linear relationships, and dummy variables. From there, the course covers a number of regression based evaluation methods to assess the causal effectiveness of policy interventions. These include the use of randomized experiments, natural or quasi-experiments, panel data, difference-in-differences estimation, instrumental variables, matching and regression discontinuity design. The final part of the course provides an overview of cost-benefit valuation methods for public policy.

Teaching: Teaching in this module consists of: 20 hours of lectures and 10 hours of seminars in the MT; and 20 hours of lectures and 10 hours of seminars in the LT. This year at least for MT, some or all of this teaching may have to be delivered through a combination of virtual webinars, online videos, and virtual classes.

Formative coursework: Students will complete weekly problem sets. Some of these will be marked to provide indicative assessment.

Indicative reading: Particularly useful textbooks are Joshua D. Angrist and Jörn-Steffen Pischke, "Mastering Metrics"; James Stock & Mark Watson, "Introduction to Econometrics"; and Jeffrey Wooldridge, "Introductory Econometrics". The material in the textbooks will be complemented with recent research papers and chapters from other books. A full reading list will be distributed at the beginning of the course.

Assessment: Exam (60%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Presentation (10%)

Policy memo (10%) in the MT.

Policy memo (10%) in the LT.

Continuous assessment (10%) in the MT and LT.

PP478

Political Science for Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Mathilde Emeriau
Dr Joachim Wehner

Availability: This course is compulsory on the Master of Public Administration. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po) and MPA Dual Degree (LSE and Tokyo). This course is available with permission as an outside option to students on other

programmes where regulations permit.

Course content: This course will introduce students to how to understand the political context of policymaking, using the latest theoretical and empirical knowledge in modern political science. The course will cover, among other things, political behaviour (such as voting behaviour, elections and lobbying), political institutions (such as electoral systems, parliamentary and presidential government and central banks) and political outcomes (such as economic policies and public services). The course combines a review of the main empirical regularities across time and across country in each of these areas, with an introduction to key theoretical arguments about how actors interact and how institutions shape strategic behaviour, and an introduction to the latest empirical (and causal) estimation techniques for testing the key theoretical ideas. The course also surveys a selection of current policy challenges and examines the importance of political variables in understanding and addressing these.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and classes and office hours. This course includes reading weeks in week 6 of each term.

Formative coursework: Students are expected to produce one formative assignment in Michaelmas Term and a second in the Lent Term.

Indicative reading: "Analysing Politics: Rationality, Behavior and Institutions" by Shepsle (W.W. Norton, 2010, 2nd edition) provides an excellent starting point and can be used as the main reference for many topics. A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2500 words) in the LT.

Presentation (50%) in the MT and LT.

Application exercises will be carried out in groups and assessed on the basis of four group presentations, two each in Michaelmas Term and Lent Term

PP4B3

MPA Capstone Project

This information is for the 2020/21 session.

Teacher responsible: Dr Babken Babajanian

Availability: This course is compulsory on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo) and Master of Public Administration. This course is not available as an outside option.

Course content: Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, private sector companies, international organisations, think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem. The Capstone will enable students to develop and strengthen organisational, analytical report writing, and group working skills.

Teaching: This course is delivered through help sessions totalling a minimum of 4 hours and 30 minutes across Michaelmas Term. This year, some or all of this teaching will be delivered through virtual interactive seminars complemented with short lectures delivered as online recordings.

These sessions provide guidance and advice on planning and managing the Capstone process and maintaining effective and fair group work. Each Capstone group will be allocated a supervisor, who will provide guidance on the project's development and assistance with client liaison. Other members of staff may also advise as required.

Formative coursework: Feedback will be provided on presentations of work-in-progress during MT and LT.

Indicative reading: Policy analysis: William N. Dunn, Public Policy

Analysis: An Integrated Approach (Routledge, 2018); Eugene Bardach and Eric M. Patashnik, A Practical Guide for Policy Analysis (Sage Publications, 2016); David L. Weimer and Aidan R. Vining, Policy Analysis: Concepts and Practice (Routledge, 6th edition, 2017); Sue C. Funnell and Patricia J. Rogers, Purposeful Program Theory (Jossey-Bass, 2011); Philip H. Pollock, The Essentials of Political Analysis (CQ Press, 2016)

Report writing: John Bowden, Writing a Report 9th edition (How to Books, 2011); Stella Cottrell, Dissertations and Project Reports: A Step by Step Guide (Palgrave Study Skills, 2014).

Group working: Laura Lipton, Groups at Work: Strategies and Structures for Professional Learning (Miravia, 2011); Brian A. Griffith and Ethan B. Dunham, Working in Teams: Moving from High Potential to High Performance (Sage, 1st edition, 2015).

Assessment: Project (100%, 15000 words) in the LT.

The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.

The group mark has three components:

- 1) 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project report.
 - 2) 50% of the overall mark is given by two academic readers upon submission of the project report; and
 - 3) the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group's performance in terms of (i) scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item).
- Additionally, each group member must complete the Capstone evaluation and feedback exercise. This will be submitted individually and separately from the report.

PP4B4

MPA Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Babken Babajanian and LSE LIFE

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo) and Master of Public Administration. This course is not available as an outside option. Students may not take this course and PP4V8 Policy Paper. This course is only available to MPA students in Year 2 of their programme.

Course content: The aim of this course is to enable students to plan, design and conduct independent substantial research in an area of public policy. MPA students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their Academic Mentor. The dissertation involves an evidence-based assessment of a concrete policy issue or problem in a specific setting. It must be concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge-building. The main body of the dissertation should include literature review, methodology, results of the analysis, discussion of findings, conclusions and implications for knowledge. Dissertations can utilise quantitative and/or qualitative data and information and draw on primary and/or secondary sources.

Teaching: This course is delivered through help sessions totalling a minimum of 4 hours and 30 minutes in Michaelmas Term and 1 hour and 30 minutes in Lent Term. This year, some or all of this teaching will be delivered through virtual participatory seminars complemented with short lectures delivered as online recordings. These sessions provide academic and practical guidance on planning and writing the dissertation and offer an opportunity to ask questions. The student's Academic Mentor will provide advice and guidance on this piece of work.

Indicative reading: Writing guidance:

- Inger Furseth, Eurus Everett and Larry Everett, Doing Your Master's Dissertation: From Start to Finish (Sage Study Skills Series, 2013);
- Stella Cottrell, Dissertations and Project Reports: A Step by Step Guide (Palgrave Study Skills, 2014);
- Diana Ridley, The Literature Review: A Step-by-Step Guide for Students (SAGE Study Skills Series, 2008);
- Christopher Hart, Doing a Literature Review (SAGE Study Skills Series, 2018);
- Sharon M. Ravitch and J. Matthew Riggan, Reason and Rigor: How Conceptual Frameworks Guide Research (2nd edition, Sage Publications, 2016).

Research methods:

- Catherine Hakim, Research Design: Successful Designs for Social Economics Research, 2nd ed. (Routledge, 2000);
- Joseph A. Maxwell, Qualitative Research Design (3rd edition, Sage, 2013);
- Alan Bryman, Social Research Methods, 5th ed. (Oxford University Press, 2015);
- David Partington, Essential Skills for Management Research (Sage Publications, 2002).

Assessment: Dissertation (90%, 10000 words) in the ST.

Dissertation proposal (10%) in the MT.

- A 1,500 word dissertation proposal consisting of the title, abstract, research question, research justification, feasibility of the dissertation topic, choice of literature and an explanation of sources, proposed research design and methods, and provisional structure will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their Academic Mentor. Students will be given feedback on their proposal.
- The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

PP4E4 Half Unit Not available in 2020/21

Analytic frameworks for policy evaluation

This information is for the 2020/21 session.

Teacher responsible: Dr Christine Cote and Prof Richard Bevan

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students from the Department of Management's MSc programmes for any outside option spaces.

Pre-requisites: Students must have previously studied microeconomics.

Course content: The course will focus on concepts and cases relevant to understanding how to assess costs and benefits of policy options to enable governments to make hard choices. This entails accounting for: costs and benefits across different criteria and at different times, risk and uncertainty, and distributional effects; and designing evaluation to relate to the political process of making decisions.

The course examines three methods of evaluation: cost benefit analysis (CBA), cost effectiveness analysis (CEA), multicriteria decision analysis (MCDA). It explains the principles of each method and examines case studies to show their strengths and weaknesses. The aim is for students to learn that, for policy analysis, that the concepts of micro-economics are necessary but not sufficient by relating the issues that emerge from the case studies to major intellectual arguments of the 20th Century.

These are arguments over the nature of science, positivism, power, efficiency, equity, and justice. The objective is for students to learn what characterises policy analysis that is likely to succeed or fail in enabling governments to make hard choices.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 2 pieces of coursework in the MT.

A presentation as a member of a seminar group in the second week of term.

A detailed essay plan on two pages with introduction, one key paragraph and conclusion written in full on the principle of using markets to assess costs and benefits and problems with this approach.

Indicative reading: The course text is D M Hausman and M S McPherson, *Economic Analysis, Moral Philosophy and Public Policy*, Cambridge University Press, 2006.

Extracts from standard texts on methods of economic appraisal:

- HM Treasury, *The Green Book. Appraisal and Evaluation in Central Government*, TSO, 2011

- A Boardman, D Greenberg, A Vining, D Weimer, *Cost-Benefit Analysis: concepts and practice*, (4th Edition) Harlow: Pearson Education, 2014

- P Goodwin, G Wright, *Decision Analysis for Management Judgment* (5th edition) Chichester: John Wiley and Sons, 2014

Material on cases studies including:

- N Stern, *Why are we waiting?: The logic, urgency, and promise of tackling climate change*, MIT Press, 2015.

Extracts from classic works of leading scholars including:

- J Rawls, *A Theory of Justice*, Oxford University Press, 1971

- T S Kuhn, *The Structure of Scientific Revolutions* (2nd edn), University of Chicago Press, 1972

- IMD Little, *A Critique of Welfare Economics*, Oxford University Press, 1973

- T C Schelling, *The Strategy of Conflict*, Oxford University Press, 1973

- KR Popper, *Conjectures and Refutations*, Routledge and Kegan Paul (fourth edition), 1973

- R Nozick, *Anarchy, State and Utopia*, Blackwell, 1974

- N Daniels, *Just health care*. Cambridge: Cambridge University Press, 1990

- D W Hands, *Reflection without Rules*, Cambridge: Cambridge University Press, 2001

- S Lukes, *Power: A Radical View*, 2nd edn, Palgrave, 2005.

Extracts from official reports and published papers.

Assessment: Essay (50%, 3000 words) in the LT.

Group presentation (20%) and policy brief (30%) in the MT.

The essay will be a critique of the methods used in a case study relevant to an issue in the student's country.

There will be four group presentations as a member of a seminar group in the weekly seminars.

There will be a policy brief for a minister on a hard choice.

permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines innovations in different models of governance (defined broadly as the overarching mechanisms) that organise the delivery of public services. We look at variations across three key governance models in particular, namely hierarchy, markets and networks in recent decades, and assess their strengths and limitations. We look at their application in both developed and developing countries, to a wide range of core public services, including healthcare, education, criminal justice, and public utilities.

Many public services have seen a broad global shift from traditional hierarchical bureaucracies towards markets and networks. Many countries have experienced, and will continue to experience, extensive marketisation of public services and we cover key innovations and their impacts. Markets, in particular privatisation, create high-powered incentives to challenge inertia that can beset the public sector, however marketisation is no panacea: indeed the characteristics of some public services mean that this brings new risks and problems and governments have often struggled in recent decades with managing the consequent market failure. We look at the use of 'quasi-markets', voucher systems, full-scale privatisations, Private Finance Initiatives (PFIs) and Public-Private Partnerships (PPPs), Payment by Results (PBR) and Social Impact Bonds (SIBs), and assess their impact on public services. We also look at innovations in networked, mutual or collaborative forms of governance, particularly the relevance of new developments, such as the 'sharing economy', the 'digital economy' and social media.

A central theme of the course is the relationship between institutions and innovative mechanisms for change. Markets and networks offer a wide range of innovative mechanisms, but their success or failure is often determined by the institutional context in which they are implemented. Looking across different models of governance, the course will consider issues around optimisation of design and integration of models, and the impact of institutional path dependence on success and failure. We explore how to align new mechanisms for change with existing institutions in complementary ways.

The course draws on a range of disciplines and analytical approaches, including transaction cost economics, political science, institutional economics, and developments in behavioural economics beyond 'nudges'. These include the economics of identity, reciprocal altruism and the power of reputational mechanisms of 'naming and shaming' and 'naming and faming'. The lectures and seminars are organised to enable you to understand key theory/concepts through illustrative cases and discussion. The seminars are organised around group-based presentations.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 35 hours in the Lent Term. This year, some or all of this teaching will be delivered through a combination of flipped lectures and pre-recorded online material, a mix of online and in-classroom seminars, and tutorial office-hours. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A detailed essay plan of two pages with introduction, one key paragraph and conclusion written in full in preparation for the summative essay.

Indicative reading: Students will be directed to key texts throughout the term. Course literature draws from public policy and governance, the economics of transaction costs and behavioural economics among other disciplines. Some indicative readings throughout the course include:

- C. Wolf (1993) *Markets or Governments* (Cambridge: MIT Press)

- AO Hirschman (1970), *Exit, voice, and loyalty: Responses to decline in firms, organizations, and states*, (London: Harvard university press)

- J. Le Grand (2007), *The Other Invisible Hand: Delivering Public Services Through Choice and Competition* (Princeton University Press)

PP4E5 Half Unit

Innovations in the governance of public services delivery

This information is for the 2020/21 session.

Teacher responsible: Dr Simon Bastow and Professor Gwyn Bevan

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Management (1 Year Programme), MSc in Social Innovation and Entrepreneurship, Master of Public Administration and Master of Public Policy. This course is available with

- M. Barber (2015), How to run a government so that citizens benefit and taxpayers don't go crazy (Allen Lane)

- OE Williamson (1985), The Economic Institutions of Capitalism: Firms, Markets and Relational Contracting (New York, The Free Press)

- S. Bowles (2016), The Moral Economy: Why Good Incentives Are No Substitute For Good Citizens (Yale University Press)

- G A Akerlof, RE Kranton (2010), Identity Economics: How Identities Shape Our Work Wages and Well Being (Woodstock: Princeton University Press)

- A. Oliver (2019) Reciprocity and the Art of Behavioural Public Policy (Cambridge, Cambridge University Press)

Assessment: Essay (50%, 3000 words) in the ST. Presentation (20%) and policy brief (30%) in the LT. Presentations as a member of a seminar group in the weekly seminars (20%).

A policy brief about a proposed innovation in government, directed at the head of an organisation able to implement or influence government policy. (30%).

A research essay of 3,000 words critically examining governance and innovation in delivery of public services (50%).

PP4G3 Half Unit

Designing and Managing Change in the Public Sector

This information is for the 2020/21 session.

Teacher responsible: Dr Simon Bastow

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Social Innovation and Entrepreneurship, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines important challenges for governments and public sector organisations in being able to design and manage transformative change in public services. Two key aspects of change are fundamental:

- the **instrumental** capacity of government to design and implement policy and programme change in coherent, sustainable and successful ways, and
- the **adaptive** capacity of government to respond effectively to change in their external environment - perhaps crisis, digitisation, demographic or public health issues - and avoid problems of obsolescence or 'out-of-touch' policies.

We look at this dual challenge across developed and developing country contexts, and across core areas of government policy and public services. The course is primarily about government and public sector, however an important element is looking at the capacity of governments to coordinate with private and third sectors in designing and managing transformative change. From the outset we discuss how governments can develop

coherent responses to so-called 'wicked' public policy and management (PPM) problems. These tend to be complex, multi-faceted and intractable problems that require well-designed and complementary measures. We look at the interplay of different governance factors such as the impact of politics, bureaucracy, culture, incentives and motivations, administrative capacity, amongst others, and explore the potential for and limitations on transformative change. The course works through key aspects of holistic design: including strategy, culture, motivation and coordination, leadership, social-technical systems, resilience, and policy and organizational learning. There is strong emphasis on transformation through digital change.

The course aims to provide students with practical theory and concepts for designing coherent action in public services and the public sector. We look at these challenges primarily from the perspective of the senior government or public sector official, working at the interface of high politics, policy making, and operational delivery. The course will be useful for students who are interested in working **in** government, or for those who work in other 'social impact' roles that involve working closely **with** government and public authorities.

The syllabus draws on concepts from public policy, political science, institutional economics, and organizational and system design, and organizational behaviour. We cover a wide range of sectors and policy areas, particularly core areas of public sector services such as criminal justice, health, welfare, education and defence. The course emphasises dialogue between concepts and cases, and offers strong applied and practical relevance with experienced public sector practitioners involved in lecture slots.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 35 hours in the Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of flipped lectures and pre-recorded online material, a mix of online and in-classroom seminars, and tutorial office-hours. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will receive feedback on group presentations in seminars in the MT.

Students will have the option to submit formative plans for both elements of the written summative assignments during the MT.

Indicative reading: There is no one set text for this course.

Students will be directed to key readings throughout the term.

Some indicative readings include:

- Bason, Christian (2017), Leading Public Design: Discovering Human-centred Governance, (Policy Press: Bristol) Forthcoming in LSE Library
- H. Simon (1996), Sciences of the Artificial, 3rd ed. (Cambridge, MA: MIT Press)
- J. Roberts (2004), The Modern Firm (Oxford, Oxford University Press)
- P. Dunleavy, H. Margetts, S. Bastow and J. Tinkler (2006) New Public Management is Dead: Long live digital-era governance, *Journal of Public Administration Research and Theory*, 16, pp 467-494
- H. Mintzberg (1994), The Fall and Rise of Strategic Planning, *Harvard Business Review*, 72(1), Jan-Feb 1994 pp107-114
- Hood, Christopher (1998), The Art of the State: Culture, Rhetoric and Public Management (Oxford, Oxford University Press)
- Schein, Edgar H. (2010), Organizational culture and leadership (San Francisco, John Wiley & Sons Inc.)
- Brehm, J. and S. Gates (1999), Working, Shirking and Sabotage: Bureaucratic Response to a Democratic Public (Michigan, The University of Michigan Press)
- Heath, C. and N. Staudenmayer (2000), Coordination Neglect: How Lay Theories of Organizing Complicate Coordination in Organizations, *Research in Organizational Behaviour* 22: 155-193
- Hood, C. and Margetts, H. (2007), The Tools of Government in the Digital Age (Basingstoke, Palgrave MacMillan)
- G. Morgan (2006), Images of Organization (Sage)
- Weick, Karl. E. (1995) Sensemaking in Organizations (London, Sage)

Assessment: Project (40%) in the LT.

Presentation (20%) and case analysis (40%) in the MT.

- Case analysis of 3,000 words by week 11 in the MT (40%).
- Transformation design project (TDP) in response to a current policy or public sector problem – to be submitted by Week 3 in the Lent Term (40%).
- Group presentation in seminars and discussion role throughout the MT (20%).

PP4J2 Half Unit

New Institutions of Public Policy: Strategic Philanthropy, Impact Investment and Social Enterprise

This information is for the 2020/21 session.

Teacher responsible: Dr Jonathan Roberts Marshall Institute, 5 Lincoln's Inn Fields

Other teachers: Professor Julian Le Grand and Professor Stephan Chambers, Marshall Institute

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo) and Master of Public Administration. This course is not available as an outside option. This course is only available to MPA students in Year 2 of their programme. The course is a collaboration between the Marshall Institute and the School of Public Policy.

Course content: Private actions for public benefit - whether called philanthropy, charity, associationalism, social entrepreneurship or social business - have long been significant within societies. This arena of private action is currently experiencing both resurgence and disruption. This course takes a policy-oriented approach towards these new dynamics of private social action. It explores innovative mechanisms of financing, organisation and delivery, including impact investing, new coalitions for social impact (for instance, social impact bonds), venture philanthropy and social enterprise. A central focus is the opportunity created by bringing together market and business mechanisms and the social – but also the consequent challenge and complexity of achieving social impact through hybrid organisations, hybrid funding streams and hybrid mechanisms of coordination. Cross-cutting themes are how to design incentive structures which respond to the complex web of motivations of actors in this field, and the organisational tension inherent in responding to double or triple bottom lines. Using analytical frameworks drawn from economics, sociology and political economy, the course will critically evaluate the challenges and advantages of these emerging institutions and mechanisms. Examples of the types of question that we will investigate include: what is social enterprise? How can social enterprises support social innovation and impact? Can we combine financial return, social impact and environmental sustainability? Why should an organisation be a non-profit, for-profit or other ownership form? How can the state, market and private altruistic action combine to achieve social impact? How can we design organisations and structures which nurture and capitalise on values and altruism? What are the differences between the culture, practice and motivations of state, commercial and charitable organisations, and what are the consequent challenges of implementation and management in hybrid organisations? The answers to these questions are contested and the course seeks to give participants the critical skills to make their own determination.

Teaching: This course is delivered through a combination of lectures, classes and workshops totalling a minimum of 34 hours across the Lent Term. This year some or all of this teaching may be delivered through a combination of remote live classes and workshops, and various remote asynchronous activities, including flipped-lectures delivered as short online videos and recorded videos with expert practitioners. This course includes a reading week in Week 6 of the Lent Term.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.

Formative assessment will consist of one 2,000 word essay, submitted in the middle of the LT. Students will also receive formative feedback on seminar presentations.

Assessment: Coursework (30%, 2000 words) and essay (70%, 3000 words) in April.

PP4J4 Half Unit

Designing and Implementing Evidence-Informed Policies and Programmes

This information is for the 2020/21 session.

Teacher responsible: Dr Babken Babajanian

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students.

Course content: The aim of this half-unit course is to help students develop knowledge, critical analysis and skills necessary for evidence-informed policy making. It will enable students to assess, analyse, interpret and use evidence to design relevant and effective interventions. The course particularly emphasises the need to recognise the complexity of economic, social, institutional and political context and incorporate contextual analysis of social relations, gender inequalities, interests and incentives of societal actors in policy design and implementation arrangements. The course will equip students with the knowledge and skills to critically appraise how government agencies, international organisations and other actors generate and utilise evidence to design and implement policies and programmes. The course covers evidence generation and use during three main stages of the policy cycle: policy design, implementation, and monitoring and evaluation. It introduces theory-based approaches and examines the use of social, gender, governance and political-economy analysis to inform policy design and implementation. It discusses the role of monitoring and evaluation in producing nuanced policy-relevant evidence.

The course draws on policies and programmes in the field of social policy and social development in a global context. In seminars, students will review and critically assess policy reports and research studies of actual policies and programmes. They will scrutinise different assessment tools developed and used by government agencies and international organisations (e.g. World Bank, ADB, Inter-American Development Bank) for gathering policy relevant evidence.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of virtual interactive seminars and lectures delivered as online recordings.

Formative coursework: 1. Seminar presentations on assigned topics and contribution to seminar discussions. Each student is expected to do at least one presentation.

2. A short essay answering a pre-assigned question (500 words)
3. A short individually authored policy report (1,000 words)

Indicative reading: Parkhurst, J. (2017) *The Politics of Evidence, From Evidence-based Policy to the Good Governance of Evidence*, Routledge: London and New York. Funnell, S. and P. Rogers (2011) *Purposeful Program Theory: Effective Use of Theories of Change and Logic Models*, Wiley & Sons: San Francisco. Bacchi, C. (2009) *Analyzing Policy: What's the Problem Represented to Be?* Pearson Australia: Frenchs Forest, N. S. W. Cartwright, N. and J. Hardie (2012) *Evidence-Based Policy: A Practical Guide to Doing It Better*, Oxford University Press. Ravallion, M. (2009) *Should the Randomistas Rule?* *Economists' Voice*, The Berkeley Electronic Press. Holmes, R. and N. Jones (2013) *Gender and Social Protection in the Developing World: Beyond Mothers and Safety Nets*, Zed Books: London and New York. Fritz, V., Levy, B. and R. Ort (2014) *Problem-driven Political Economy Analysis: The World Bank's Experience, Directions in Development - Public Sector Governance*, World Bank: Washington, DC.

Assessment: Essay (30%, 1500 words) in the MT.
Policy report (70%) in the LT.

Students will be required to complete two assignments designed to support the main learning outcomes of the course:

1 A three-part individually authored essay (30%), in which students answer pre-assigned questions, drawing on literature and course material (500 words for each answer, maximum 1,500 words in total). This assessment will support student learning of the main debates, issues and critiques and will help consolidate their disciplinary and methodological knowledge.

2 An individually-authored policy report (70%) drawing on relevant literature and course material (maximum 3,000 words).

This assessment will support students' ability to appraise policies and programmes; evaluate, analyse, interpret and use evidence; design analytical frameworks; prepare and present written critiques; and write policy reports.

PP4J5 Half Unit

Fiscal Governance and Budgeting

This information is for the 2020/21 session.

Teacher responsible: Dr Joachim Wehner

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Political Science and Political Economy, MSc in Public Policy and Administration, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines contemporary issues in fiscal governance and public budgeting in OECD countries and elsewhere. The focus is on executive and legislative actors and the institutional structures within which they make budgetary choices. Following an introduction to theoretical approaches to the study

of budgeting, topics include medium-term frameworks, top-down budgeting, fiscal rules and fiscal councils, performance budgeting, legislative budgeting, fiscal decentralisation, budget transparency, audit and accountability.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in the MT. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and classes. This course includes a reading week in week 6 of MT.

Formative coursework: Students are expected to produce one formative essay in Michaelmas Term as practice for the take-home assessment.

Indicative reading: Alesina, A, C Favero and F Giavazzi (2019). *Austerity: When It Works and When It Does Not* (Princeton, NJ, Princeton University Press). Blyth, M (2013). *Austerity: The History of a Dangerous Idea* (Oxford, Oxford University Press). Hallerberg, M, R Strauch, and J von Hagen, (2009). *Fiscal Governance in Europe* (Cambridge, Cambridge University Press). Allen, R, R Hemming, and B Potter, eds (2013). *The International Handbook of Public Financial Management* (New York, NY, Palgrave Macmillan). Cangiano, M, T Curristine, and M Lazare, eds (2013). *Public Financial Management and Its Emerging Architecture* (Washington DC, International Monetary Fund).

Assessment: Coursework (25%) in the MT.

Take-home assessment (75%) in the LT.

The coursework (worth 25%) will consist of a Policy Exercise which will be carried out in groups. Students will prepare a presentation and produce a 2-3 page policy memo.

The take-home timed assessment (75%) will be held shortly before the start of Lent Term.

PP4V8 Half Unit

Policy Paper

This information is for the 2020/21 session.

Teacher responsible: Dr Babken Babajanian and LSE LIFE

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

MPA students may not take both this course and an MPA Dissertation. This course is only available to MPA students during the second year of their programme.

Course content: The aim of the course is to enable students to plan, design and conduct independent research in an area of public policy. Students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with their Academic Mentor. The paper will carry out an evidence-based assessment of a concrete policy issue or problem in a specific setting and provide a practical contribution to policy and practice. The main body of the paper should include methodology, results of the analysis, discussion of findings, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and information and draw on secondary and/or primary sources.

Teaching: This course is delivered through help sessions totalling a minimum of 4 hours and 30 minutes in Michaelmas Term and 1 hour and 30 minutes in Lent Term. This year, some or all of this teaching will be delivered through virtual participatory seminars complemented with short lectures delivered as online recordings. These sessions provide academic and practical guidance on planning and writing the policy paper and offer an opportunity to ask questions. The student's Academic Mentor will provide advice and guidance on this piece of work.

Formative coursework: A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research

question, research justification, feasibility of the topic, an explanation of sources, proposed research design and methods, and provisional structure must be submitted in the MT. Students may only change their topic thereafter with the agreement of their Academic Mentor. Students will be given feedback on their proposal.

Indicative reading: Writing guidance:

- Stella Cottrell, *Dissertations and Project Reports: A Step by Step Guide* (Palgrave Study Skills, 2014);
- Diana Ridley, *The Literature Review: A Step-by-Step Guide for Students* (SAGE Study Skills Series, 2008);
- Christopher Hart, *Doing a Literature Review* (SAGE Study Skills Series, 2018);
- Sharon M. Ravitch and J. Matthew Riggan, *Reason and Rigor: How Conceptual Frameworks Guide Research*, 2nd edition (Sage Publications, 2016)

Research methods:

- Catherine Hakim, *Research Design; Successful Designs for Social Economics Research*, 2nd ed. (Routledge, 2000);
- Joseph A. Maxwell, *Qualitative Research Design* (3rd edition, Sage, 2013);
- Alan Bryman, *Social Research Methods*, 5th ed. (Oxford University Press, 2015);
- David Partington, *Essential Skills for Management Research* (Sage Publications, 2002).

Assessment: Policy paper (100%) in the ST.

- 6,000 word policy paper.

PP4X6

Welfare Analysis and Measurement

This information is for the 2020/21 session.

Teacher responsible: Prof Stephen Jenkins

Dr Berkay Ozcan (OLD.2.32)

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research), Master of Public Administration and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit. This course has no formal pre-requisites. Because the course is quantitative in nature, a familiarity with basic statistical concepts and basic calculus is useful but not essential.

Course content: This course provides an introduction to the analysis and measurement of the welfare of individuals and societies, examining concepts, measurement and data, as well as providing illustrations. The aims are to provide an understanding of the main tools used to measure and monitor individuals and social welfare, and to develop skills for assessing academic research and official statistics (as produced by national or international agencies) and for undertaking one's own analysis. The first half of the course focuses on univariate monetary measures of economic wellbeing notably 'income', and on the experience of OECD countries (especially the UK, EU, and USA), but the aim is also to place these in the context of developments based on other approaches and in other countries including middle- and low-income nations. The topics covered include measurement of inequality, poverty, and mobility; setting poverty thresholds and equivalence scales; data sources and their quality; empirical illustrations considering assessments of trends within countries, cross-national differences, and global poverty and inequality. The second half of the course broadens the perspective to consider a range of non-monetary, multidimensional, and subjective measures

of welfare for individuals and societies. Examples include occupational and socio-economic status (SES), anthropometric measures, the Human Development Index and related indices of development, and measures of happiness and life satisfaction. The second half of the course draws on the measurement approaches and data issues covered in the first half of the course, developing them as appropriate to the new settings.

Teaching: This course is delivered through a combination of lectures and classes in each of the Michaelmas Term and Lent Term, plus a revision session in the Summer Term, totalling a minimum of 60 hours. All teaching – lectures and classes – is undertaken by the course lecturers. This year, some or all of this teaching will be delivered through a combination of online classes and 'flipped' lectures delivered as short online videos. This course includes reading weeks (without formal teaching) in Week 6 of Michaelmas Term and of Lent Term.

Indicative reading: Most of the reading for the course is in journal articles. Books providing overviews include:

- Salverda W, Nolan B, Smeeding TM (eds) *The Oxford Handbook on Economic Inequality* (2009);
- Foster, J, Seth, S, Lokshin M and Saiara, Z, *A Unified Approach to Measuring Poverty and Inequality* (2013; free e-book available) and;
- Atkinson A and Bourguignon F (eds) *Handbook of Income Distribution Volume 2* (2015) and the earlier Volume 1 (2000).

A full reading list is distributed at the beginning of the course.

Assessment: Exam (75%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Essay (25%, 2000 words) in the LT.

SO407

Politics and Society

This information is for the 2020/21 session.

Teacher responsible: Dr Robin Archer STC.S114a

Availability: This course is compulsory on the MSc in Political Sociology. This course is available on the MSc in Social Research Methods and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course aims to explore some of the great debates about the relationship between politics and society. It will examine the interaction between political institutions, economic interests and cultural ideas, especially in societies that are both democratic and capitalist. The course will explore some of the classic empirical and historical controversies that have animated political sociologists. Each week, we will discuss questions like: What gave rise to states and nations? Why are some social movements more successful than others? How does social change shape parties and elections? Do repressive states give rise to radicalism? Why are welfare states more developed in some countries than others? Why is there no Labor Party in the United States? Under what conditions does democracy develop? What explains the growth of populism? And has neo-liberalism become hegemonic? The course will also look at the canonical writings of authors like Marx, Weber and Tocqueville, as well as critically explore the use of some political concepts. In addition, it will enable you to build up your knowledge of a number of countries and to assess the strengths and weaknesses of some of the main theories and approaches that have dominated the study of political sociology. These include functionalist, rational choice, and institutionalist theories, as well as historical and comparative approaches.

Teaching: This course is delivered through seminars totalling a minimum of 40 hours across MT and LT, with 6 hours of seminars in the ST. Teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Seminars: Papers will be presented by participants and, on occasion, by guest speakers. If possible, students should attend the lecture course S0203 Political Sociology when available.

Formative coursework: Members of the seminar will be required to present a number of papers during the course of the seminar. There will also be a written assignment in MT and LT.

Indicative reading: B. Anderson, *Imagined Communities*; R. Archer, *Why is There No Labour Party in the United States?*; M. McQuarrie et al, *Democratizing Inequalities*; P Evans et al, *Bringing the State Back In*; S M Lipset, 'The Social Requisites of Democracy Revisited', *American Sociological Review*, vol 59; S Lukes, *Power: A Radical View*; D McAdam, *Comparative Perspectives on Social Movements*; M Mann, *The Sources of Social Power*; M Olson, *The Logic of Collective Action*; T Skocpol, *Protecting Soldiers and Mothers*; C. Tilly, *Coercion, Capital and European States*; L. Weiss, *The Myth of the Powerless State*.

Assessment: Exam (70%, duration: 3 hours) in the summer exam period.

Essay (30%, 3000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Thursday of Summer Term.

Attendance at all seminars and submission of all set coursework is required.

S0424

Approaches to Human Rights

This information is for the 2020/21 session.

Teacher responsible: Dr Monika Krause STC S207

Availability: This course is compulsory on the MSc in Human Rights. This course is available on the LLM (extended part-time), LLM (full-time), MSc in Gender, Peace and Security, MSc in International Migration and Public Policy and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped but a limited number of places are usually available to students from outside the MSc in Human Rights who wish to take this as an option. Priority is given to postgraduate students in the Sociology Department and those registered on the LLM. The course is also available as an outside option for other MSc degrees where regulations and numbers permit. Students from other programmes who wish to apply for a place on S0424 must complete the online application form on LSEforYou stating reasons for wishing to take the course.

Course content: This is a multi-disciplinary course that provides students with a rigorous and focused engagement with different disciplinary perspectives on the subject of human rights including philosophy, sociology and international law. It provides students with contending interpretations of human rights as an idea and practice from the different standpoints that the disciplines present and investigates the particular knowledge claims and modes of reasoning that the respective disciplines engage. The course applies the insights of international law, philosophy and sociology to understand key human rights issues such as universality, the right to life, free speech, humanitarian intervention, war, genocide, human rights activism, globalization, and states of emergency.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 40 hours across MT and LT, with 2 hours in ST.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Active participation in the workshops is expected and students will be asked to make a presentation to their group.

Indicative reading: Indicative reading: No one book covers the entire syllabus and students are expected to read widely from more

general texts on human rights, to more specific texts outlining the debates on human rights from a particular disciplinary perspective. Introductory reading: Jack Donnelly, *Universal Human Rights in Theory and Practice*; Michael Freeman, *Human Rights*; Philip Alston and Ryan Goodman, *International Human Rights* (2013). Philosophy: P. Jones, *Rights*, (1994); A. Swift, *Political Philosophy: A Beginners' Guide for Students and Politicians*, (2006). International Law: A. Cassese, *International Law*, 2nd ed. (2005), chapter 19; P. Sieghart, *The Lawful Rights of Mankind* (1985), S. Greer, *The European Convention on Human Rights - Achievements, Problems and Prospects*, Cambridge University Press, 2007. Sociology: L. Morris, *Rights: Sociological Perspectives* (2006); B. Turner, *Vulnerability and Human Rights* (2006); A. Woodiwiss, *Human Rights* (2005).

Assessment: Exam (70%, duration: 3 hours) in the summer exam period.

Essay (30%, 3000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Tuesday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

S0425

Regulation, Risk and Economic Life

This information is for the 2020/21 session.

Teacher responsible: Dr Rebecca Elliott STC S211

Availability: This course is compulsory on the MSc in Economy, Risk and Society. This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Environmental Policy and Regulation, MSc in Regulation and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course introduces students to sociological perspectives on economic and societal risks in advanced industrial societies. Topics include the social theory of risk and uncertainty, disaster, regulation and governance, organizational risk management, financialization, technology and material infrastructures, expertise and knowledge production, and transnational and systemic environmental, health, and economic risks. The course will draw upon a broad international literature in economic sociology and the sociology of risk, as well as case studies from the environmental, financial and public health domains.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 40 hours across MT and LT, with 2 hours in ST.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Indicative reading: Aspers, P & Dodd, N (eds) (2015) *Re-Imagining Economic Sociology* (Oxford University Press); Beck, U. (1999) *World Risk Society* (Cambridge: Polity); Baker, T & Simon, J (eds) (2002) *Embracing Risk: The Changing Culture of Insurance and Responsibility* (University of Chicago Press); Bernstein, P L (1996) *Against the Gods: The Remarkable Story of Risk* (Princeton University Press); Hutter, B.M. (ed) (2010) *Anticipating Risks and Organizing Risk Regulation*, Cambridge University Press; Smesler, N. & Swedberg, R. (eds) (2005) *The Handbook of Economic Sociology*; Bulkeley, H (2014) *Transnational Climate Governance* (Cambridge University Press); Klinenberg, E (2002) *Heat Wave: A Social Autopsy of Disaster in Chicago* (University of Chicago Press); Ericson, RV, Doyle, A & Barry, D (2003) *Insurance as Governance* (University of Toronto Press); Hacker, J & O'Leary, A (eds) (2012) *Shared Responsibility, Shared Risk: Government, Markets and Social Policy in the Twenty-First Century* (Oxford University Press); Krippner, G (2011) *Capitalizing on Crisis: The*

Political Origins of the Rise of Finance (Harvard University Press); Pardo-Guerra, J.P. (2019) Automating Finance: Infrastructures, Engineers, and the Making of Electronic Markets (Oxford University Press); Beckert, J. (2016) Imagined Futures: Fictional Expectations and Capitalist Dynamics (Harvard University Press); MacKenzie, D. (2006) An Engine, Not a Camera: How Financial Models Shape Markets (MIT Press).160

Assessment: Essay (30%, 3000 words) in the LT.

Essay (70%, 4000 words) in the ST.

An electronic copy of the LT assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Lent Term.

An electronic copy of the ST assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Summer Term.

Attendance at all seminars and submission of all set coursework is required.

SO426 Half Unit Not available in 2020/21 Classical Social Thought

This information is for the 2020/21 session.

Teacher responsible: Professor Nigel Dodd Room STC S106 & Dr Sara Salem Room TBD

Availability: This course is available on the MSc in Culture and Society, MSc in Political Sociology and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: A critical review of classical social theory. The origins and development of classical sociological theory; exploring the work of Marx, Weber, Simmel, Durkheim and De Bois through a close reading and interpretation of primary texts. This course will also explore subsequent developments within these theoretical traditions, including their elaboration into alternative 'canons' of social theory. It is not assumed that students have a basic grounding in classical social theory, although it is expected that students who register for this course will be prepared to develop their understanding through primary readings, and not rely on textbooks.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Reading week: week 6 (MT)

Formative coursework: 1000-word formative memo, due in Week 6 of MT.

Indicative reading: Relevant books that provide an overview include:

- A Callinicos, Social Theory;
- N Dodd, Social Theory and Modernity;
- A Giddens, Capitalism and Modern Social Theory;
- G Ritzer, Sociological Theory.

The reading list for each seminar will be divided up into essential and additional reading. Students will be asked to read between 50 and 100 pages of primary text per week.

The following is a sample list of readings:

- Marx, K: The Communist Manifesto & Grundrisse & Capital (sections of vols 1 & 3);
- Weber, M: The Protestant Ethic and the Spirit of Capitalism & 'Science as a Vocation';
- Simmel, G: The Philosophy of Money (various sections)

And various essays such as:

- 'The Metropolis and Mental Life', 'The Stranger', etc.;
- Durkheim, E: The Division of Labour in Society & The Elementary Forms of the Religious Life (various sections from each).
- Du Bois: 160Souls of Black Folk & Black Reconstruction in America & The Philadelphia Negro (various sections).

Assessment: Essay (90%, 3000 words) in the LT.

Group exercise (10%).

The group exercise will be a summative seminar plan and presentation, in pairs, due throughout MT.

Two hard copies of the assessed essay, with submission sheets

attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day. Attendance at all seminars and submission of all set coursework is required.

SO427 Half Unit Not available in 2020/21 Modern Social Thought

This information is for the 2020/21 session.

Teacher responsible: Prof Nigel Dodd STC S106

Availability: This course is available on the MSc in Political Sociology, MSc in Political Theory and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Contemporary social theory. An introduction to the historical background, context and output of Walter Benjamin, Theodor Adorno, Michel Foucault, and Jean Baudrillard, and a close reading and study of some of their most significant texts.

Teaching: 30 hours of seminars in the LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: One formative essay in LT

Indicative reading: The following is merely a sample list of some of the texts to be covered: Benjamin, W: 'Theses on the philosophy of history' & The Arcades Project (Section N); Adorno, T: 'Theses against Occultism' & Negative Dialectics (various sections); Foucault, M: The History of Madness & The Order of Things (various sections); Baudrillard, J: Symbolic Exchange and Death (mainly chapter 5) & The Spirit of Terrorism. A number of secondary readings will be recommended, but students will be strongly discouraged from relying on these.

Assessment: Essay (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Tuesday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

SO430 Half Unit Economic Sociology

This information is for the 2020/21 session.

Teacher responsible: Dr Rebecca Elliott STC 211

Availability: This course is available on the MSc in Economy, Risk and Society, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Are we really rational utility-maximisers? What is 'the economy' and what is its relationship to society? How does economic life reflect and enact moral categories? How can we understand the production of economic 'winners' and 'losers'? This course offers a general introduction to the theoretical foundations of economic sociology, providing an opportunity to engage questions like these through both sociologically grounded accounts of economic phenomena and sociological critiques of the analytical assumptions and research procedures common in mainstream economics.

Topics covered in the course include: critical approaches to economy and society; economic rationality; the sociology of economics; morals and markets; valuation and worth; sociology of consumption; credit and debt; class and inequality.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the LT.

Reading Weeks: Students on this course will have a reading week

in LT Week 6, in line with departmental policy.

Formative coursework: A project overview due in week 7 of LT. Individual feedback sessions in office hours provided to check student project development.

Indicative reading: Recommended general texts: M Granovetter & R Swedberg (Eds), *The Sociology of Economic Life*; D Slater & F Tonkiss, *Market Society: Markets and Modern Social Theory*; N Smelser & R Swedberg (Eds), *The Handbook of Economic Sociology*; V Nee & R Swedberg (Eds), *The Economic Sociology of Capitalism*. A detailed reading list will be provided at the beginning of the course.

Assessment: Project (100%, 4000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Wednesday of Summer Term.

Attendance at all seminars and submission of all set coursework is required.

S0434

Cultural Theory and Cultural Forms

This information is for the 2020/21 session.

Teacher responsible: Dr Donald Slater STC S310

Availability: This course is compulsory on the MSc in Culture and Society. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Cultural Theory and Cultural Forms is the core course for the MSc Culture and Society. The aim is to introduce you to a wide range of approaches, debates and issues that loom large in the study of cultural processes. By the end of this course you should have a reasonable map of different aspects and approaches to researching cultural processes; and you should feel able to formulate your own research questions and strategies within the diverse traditions of culture theory and cultural research. In Term 1 we introduce the diverse approaches to cultural theory and the central debates that have structured the field, with particular attention to the ways in which these link to central sociological themes. The second focuses on approaching these theoretical debates from the vantage of empirical research and a concern with methodologies for studying cultural processes.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 40 hours across MT and LT.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: All students are expected to submit one piece of non-assessed written work per term and prepare seminar presentations.

Indicative reading: Ahmed, S. 2004. "Affective economies", *Social text*, 22: 117-139. Bourdieu, P. 1984. *Distinction: A Social Critique of the Judgment of Taste*. London: Routledge. Hall, S. (1992) 'New Ethnicities' in Donald, J and Rattansi, A (eds.) (1992) "Race", *Culture, Difference*, London: Routledge. Latour, B. (2004) *Why Has Critique Run out of Steam?: From Matters of Fact to Matters of Concern*. *Critical Inquiry* 30 (Winter 2004), 225–248. McGuigan, J. (2010) *Cultural Analysis*. London: Sage. McRobbie, A. (2005) *The Uses of Cultural Studies*. London: Sage. Miller, D. (2008) *The comfort of things*. Polity, Cambridge. Oswell, D. (2006) *Culture and Society*. London: Sage.

Assessment: Essay (50%, 5000 words) in the LT.

Essay (50%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the submission day.

The first essay is due by the second Thursday of Lent Term and the second essay is due by the second Thursday of Summer Term.

Attendance at all seminars and submission of all set coursework is required.

S0448

City Design: Research Studio

This information is for the 2020/21 session.

Teacher responsible: Dr Suzanne Hall STC.S212 and Dr David Madden STC.S209

Availability: This course is compulsory on the MSc in City Design and Social Science. This course is not available as an outside option.

Course content: The City Design Research Studio is the central unit of the MSc programme, linking the critical issues raised in the core and optional lecture courses, including questions of power and social justice, with the practical analysis of issues of city design and proposals for urban intervention. This course promotes a practical understanding of the city as a social and built environment. Through a mixed-methods engagement with site-based issues, the research studio explores the different ways city design relates to policy formation, planning processes, legal frameworks, financing mechanisms, local forms of organisation and the emerging needs of complex urban societies. It will provide students with an appreciation of the complexities of urban design and development processes, and with interdisciplinary tools for addressing specific urban challenges. The course addresses design as both informed and imaginative modes of research and practice that shapes urban environments, responds to urban problems, and connects visual, social and material dimensions of the city. It aims to integrate the physical, economic, social and political aspects of urban contexts, and develop ways to analyse these visually, textually and verbally. The studio-based approach to learning is an immersion in site-based research and experimental, strategic and pragmatic forms of design intervention. The course comprises of group based fieldwork in a London site, followed by an international fieldtrip.

Teaching: The Studio course runs for one full day each teaching week in MT and LT through lectures, workshops, small-group tutorials and independent groupwork; additional specialist seminars and workshops are scheduled throughout the Studio course. Studio groups are expected to work together during the scheduled Studio hours, and prepare collectively for regular workshops and tutorials.

Teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Group presentations for faculty and guest critics. 1 x research presentation and site analysis. (MT)

Assessment: Group exercise (50%), group exercise (25%) and assignment (25%).

The assessment consists of:

- One Studio group submission (6000 words, 50%)
- Individual tutor assessment based on contribution to Studio group work (25%)
- Film-based assignment (either a presentation or a critical essay) (25%)

One electronic copy of the Studio group submission, with submission sheets attached to each, to be uploaded to Moodle, no later than 4.00pm on the seventh Thursday of Lent Term.

An electronic copy of the assessed film-based assignment, to be uploaded to Moodle, no later than 4.00pm on the eleventh Monday of Lent Term

Attendance at all classes and submission of all set coursework is required.

S0449

Independent Project

This information is for the 2020/21 session.

Teacher responsible: Dr Suzanne Hall STC.S212

Availability: This course is compulsory on the MSc in City Design

and Social Science. This course is not available as an outside option.

Course content: The independent project enables students to develop an original and extended piece of work on any approved topic within the field of the MSc programme - students are encouraged, but not required, to develop work on themes or sites introduced in their Studio or core courses. The project may focus on a small-scale urban research study or on a practical proposal for urban intervention. Approval for the topic must be obtained from your academic advisor.

Teaching: In LT students attend project workshops and submit a provisional project abstract; academic advisors for the independent project are assigned on the basis of the abstract. In ST, each student has regular supervisory meetings with their academic mentor, a workshop and final reviews with members of faculty. Students are also encouraged to consult with other members of faculty during regular office hours. There will be three sessions during MT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method. Teaching arrangements may be adjusted if online teaching is required at any point.

Formative coursework: Students are required to submit a project outline in Lent Term.

Assessment: Project (100%, 10000 words) post-summer term. Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC S116, no later than 4.00pm on Thursday 19th of August 2021. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day. Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties. Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system. Attendance at all classes and submission of all set coursework is required.

SO451 Half Unit Cities by Design

This information is for the 2020/21 session.

Teacher responsible: Dr Suzanne Hall STC.S212

Availability: This course is available on the MSc in City Design and Social Science and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

SO451 is a capped course and we can only accept 34 students. If you are not registered on the MSc City Design and Social Design please submit an e-mail to Suzanne Hall motivating your inclusion on the course, ONCE you have attended the first introductory lecture where we will be available to respond to individual questions.

Course content: 'Cities by Design' examines the relationship between built form and practices of city design, and the political, cultural and social dimensions to which they connect. By introducing students to key concepts and practices in spatial analysis and city-making, the course investigates the production of urban space and how the design of our complex urban environments affects the people who live in them. Drawing on architecture and the designed world as key reference points, we engage in the spatial shaping of gender, 'race' and class to understand the material and experienced conditions of power. We explore interconnections between urban theory and practices of design, and draw on examples of different cities and varied way of knowing the urban from across the world. We analyse processes of regeneration, inequality

and marginalisation, alongside design practices of observation, visualisation, evidencing and resistance. Our weekly seminars incorporate both the analysis of case studies and readings.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Written feedback is given within two weeks of the essay submission, and in addition a writing seminar is incorporated in the course in preparation for the summative assessed essay.

Indicative reading: A detailed reading list will be distributed at the beginning of the course. We simultaneously engage with literatures by architects (as a broadly defined practice) and a range of social scientists. These include architects and planners exploring new modes of practice and research, for example: Bhan, Bremner, Chattopadhyay, Davis, Easterling, Hall, Katz, Lokko, King, Kurgan, Mehrotra, Tayob and Weizmann, as well as social scientists exploring design and city space, for example: Bavisar, Caldeira, Datta, Hayden, Holston, Jacobs, Jazeel, Madden, Massey, Mc Kittrick, Roy, Robinson, Scott, Simone, Wilson-Gilmore, Tonkiss, Yiftachel.

Assessment: Essay (75%, 5000 words) in the LT. Presentation (25%) in the MT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Tuesday of LT.

Attendance at seminars and submission of all set coursework is required.

SO454 Half Unit Not available in 2020/21 Families and Inequalities

This information is for the 2020/21 session.

Teacher responsible: Dr Ursula Henz STC S100B

Availability: This course is available on the MSc in International Migration and Public Policy and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course provides an introduction into selected issues of family sociology, focusing on families in contemporary Western societies. It explores inequalities within and between families and the role of families in reproducing social inequality. Major themes include: childhood; adolescence, partnership formation and dissolution, parenthood; gender roles and the division of paid and unpaid work; intergenerational transfers.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Reading week: week 6.

Formative coursework: Essay (1,500 words) in the LT.

Indicative reading: A detailed reading list will be provided at the beginning of the course. General reading: J Treas, J Scott, M Richards (eds.) (2014) *The Wiley Blackwell Companion to The Sociology of Families*, Chichester, West Sussex: Wiley Blackwell. Selected recommended books: S Arber & C Attias-Donfut (2000) *The Myth of Generational Conflict. The Family and State in Ageing Societies*. London and New York: Routledge; B Fox (2009) *When Couples Become Parents. The Creation of Gender in the Transition to Parenthood*. Toronto: University of Toronto Press; A Hochschild, Arlie (2012) *The Second Shift. Working Parents and the Revolution at Home*. New York: Penguin; A Lareau (2011) *Unequal Childhoods. Class, Race and Family Life*. University of California Press: Berkeley, Los Angeles, London.

Assessment: Essay (100%, 5000 words) in the LT.

Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Attendance at all seminars and submission of all set coursework is required.

SO457 Half Unit Political Reconciliation

This information is for the 2020/21 session.

Teacher responsible: Dr Claire Moon STC S109

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students on MSc in Human Rights, MSc in Political Sociology, MSc in Sociology and MSc in Human Rights and Politics.

This course is capped.

Course content: The course introduces students to current issues in the field of transitional justice and historical injustice, and draws upon a range of examples from Africa, Latin America, post-communist Europe, Australia and the US. Topics include transitional justice as a field of practice and a field of knowledge; historical injustice - apologies and reparations; state crimes; retributive and restorative justice; perpetration; theology and therapy in reconciliation; memory and atrocity. The course explores the politics of reconciliation by identifying and examining its key themes, the practices and institutions in which it is embedded and the political subjects of reconciliation discourse. It is an interdisciplinary course that draws upon literature from sociology, law, political theory, anthropology and philosophy amongst others, in order to understand and interpret the wide social and political reach of reconciliation, as well as its limitations.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: 1 x formative essay of 1500 words.

Indicative reading: Hannah Arendt, Eichmann in Jerusalem: A Report on the Banality of Evil (Penguin Books, 1977); Penny Green and Tony Ward, State Crime: Governments, Violence and Corruption (London: Pluto Press, 2004); Priscilla Hayner, Unspeakable Truths: Confronting State Terror and Atrocity (Routledge, 2001); Michael Humphrey, The Politics of Atrocity and Reconciliation: From Terror to Trauma (Routledge, 2002); Karl Jaspers, The Question of German Guilt (Capricorn Books, 1961); Neil Kritz, Transitional Justice: How Emerging Democracies Reckon with Former Regimes (US Institute of Peace, 1995); Claire Moon, Narrating Political Reconciliation: South Africa's Truth and Reconciliation Commission (Lexington, 2008); Judith Shklar, Legalism: Law, Morals, and Political Trials (Harvard University Press, 1986); Nicholas Tavuchis & Mea Culpa, A Sociology of Apology and Reconciliation (Stanford University Press, 1991); Richard Wilson, The Politics of Truth and Reconciliation in South Africa: Legitimizing the Post-Apartheid State (Cambridge University Press, 2001).

Assessment: Essay (100%, 4000 words) in the LT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Lent Term. Attendance at all seminars, completion of set readings and submission of set coursework is required.

SO458 Half Unit Not available in 2020/21 Gender and Societies

This information is for the 2020/21 session.

Teacher responsible: Dr Suki Ali STC S102

Availability: This course is available on the MSc in Gender (Sexuality), MSc in Gender, Policy and Inequalities, MSc in Political Sociology and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course introduces theoretical debates and contemporary issues in the sociological study of gender. Topics include femininities/masculinities; sexualities; nation and family; work; education; violence; transnational feminism; politics, representation. NB topics may change slightly from year to year.

Teaching: 30 hours of seminars in the MT.

Reading week: week 6

Indicative reading: Narayan, U and Harding, S Decentering the centre: philosophy for a multicultural, postcolonial and feminist world Bloomington: Indiana University Press 2000; Butler, J Gender Trouble London and New York: Routledge 1992 and Bodies that Matter London and New York: Routledge 1993 Marshall, B and Witz, A (eds) Engendering the Social: Feminist Encounters with Sociological Theory. Buckingham: Open University Press. 2004; Ahmed, S Differences That Matter: Feminist Theory and Postmodernism. Cambridge: Cambridge University Press 1999; Nicholason, L (ed.) The Second Wave: A Reader in Feminist Theory. London and New York: Routledge 1997; Abelove, et al, The Lesbian and Gay Studies Reader, Routledge, 1993; J Alexander & C T Mohanty, Feminist Genealogies, Colonial Legacies, Democratic Futures, New York, Routledge, 1997; Edwards and Wajcman The Politics of Working Life, Oxford: Oxford University Press 2005. A more detailed reading list will be provided at the beginning of the course.

Assessment: Essay (100%, 5000 words) in the LT.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Attendance at all seminars and submission of all set coursework is required.

SO465 Half Unit City-Making: the Politics of Urban Form

This information is for the 2020/21 session.

Teacher responsible: Dr Philipp Rode FAW 8.01K and Dr Savvas Verdis FAW.8.01.D

Availability: This course is available on the MSc in City Design and Social Science, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This case study-led course provides a critical understanding of major urban development initiatives and programmes in international city contexts. It is designed for students with a particular interest in urban development practices and how these connect with broader political debates. It will introduce students to the following knowledge and skills

- general understanding of political theories underlying urban development models
- ability to situate major urban development initiatives within different development cultures and socio-economic policy agendas
- understanding the role of public, private and third party actors and formal and informal urban development processes
- perspectives on decision making at the strategic, pre-design stage for urban development initiatives and ability to relate urban

- policy to spatial outcomes, operating at different scales
- knowledge of key evaluation approaches and analytic frameworks used in the analysis of proposed and existing urban developments
- understanding of how urban development objectives, phases and processes can be integrated and how policy making, economic development, urban planning, city design, architecture, and engineering are related.

The course content is based on contemporary projects and urban trends examined in the context of cities throughout the world. These range from policies such as congestion charging (London) and Progressive City Development (Medellin) to urban development trends such as extreme urbanism in Mumbai and privatist planning (Canary Wharf, London and Santa Fe, Mexico City). Such projects will be examined through critical frameworks that include utilitarianism, cost benefit analysis, social and environmental justice, citizenship theory and the capabilities approach. The course will focus on negotiation, politics, financing, appraisals and decision-making for cities by inviting practitioners, experts and policy makers to join individual sessions for presentations and debate. Seminars and assessed project work for the course will be based on the analysis of Development Strategies and City Design briefs.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: 1 x contribution to student debate OR 1 x critical statement following a guest lecture AND submission of a 1,000 word position statement.

Indicative reading: Fainstein, Susan S. (1999). Can we make Cities we want? In *The Urban Moment*, ed. Sophie Body-Gendrot and Robert Beauregard. Thousand Oaks: Sage. Kymlicka, Will. (2002). *Contemporary Political Philosophy: An Introduction*. 2nd ed. OUP Oxford. (Introduction). Assessment: Project (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

SO468 Half Unit

International Migration and Migrant Integration

This information is for the 2020/21 session.

Teacher responsible: Dr Patrick McGovern STC.S110

Availability: This course is available on the MSc in International Migration and Public Policy, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Coverage of contemporary sociological perspectives on migrant integration including admissions, policy, labour market incorporation; welfare and social rights; 'assimilation' and social integration; national models of integration; multiculturalism; religion and ethnicity; and the second generation.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in LT, with a revision session in ST.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: All students are expected to write two non-assessed pieces of work during the term.

Indicative reading: There is no recommended textbook. Books of a general nature that cover substantial parts of the syllabus are: S. Castles and M. J. Miller (2013) *The Age of Migration* (5th edn); P. Kvisto and T. Faist (2010) *Beyond A Border* and A. Portes (2014) *Immigrant America* (4th edn). A more comprehensive bibliography will be available to students taking this course.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Presentation (10%) and class participation (10%) in the LT.

SO470 Half Unit

The Sociology of Markets

This information is for the 2020/21 session.

Teacher responsible: Dr David Pinzur STC.S217a

Availability: This course is available on the MRes/PhD in Management (Organisational Behaviour), MSc in Economy, Risk and Society, MSc in Political Sociology and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course studies the cultural, social, and technological elements underlying and influencing market behaviour. We will touch upon several key topics, including the production of calculability, valuation and pricing, measurement, classification, application of economic theory, and expectation-setting. Our concern throughout the course will be first, to identify the distinct challenges facing market action, and second, to reveal how these challenges are met, the relation of solutions to existing power structures, and the consequences, both inside and outside the market, that result. By the end of the course, students will have developed a distinctly sociological understanding of economic markets, and applied this perspective to an original case study.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: A 1500 word essay is required.

Indicative reading: Recommended texts:

- Callon, Michel. 1998. *The laws of the markets*. Blackwell Publishers: Oxford;
- Fligstein, Neil. 2001. *The Architecture of Markets. An Economic Sociology of Twenty-First-Century Capitalist Societies*. Princeton, NJ a.o.: Princeton University Press;
- Granovetter, Mark. 1995[1974]. *Getting a Job: a Study of Contacts and Careers*. Chicago; London: Chicago University Press;
- Krippner, Greta R. 2002. "The elusive market: Embeddedness and the paradigm of economic sociology." *Theory and Society* 30:775-

810;

- Swedberg, Richard. 2003. *Principles of Economic Sociology*. Princeton, N.J.: Princeton University Press.

Assessment: Case analysis (100%) in the LT.

The course is assessed by a 5000 word case analysis due in LT week 2. Assessment will consist of a report on ONE case study. An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Wednesday of Lent Term.

Attendance at all workshop sessions and submission of all set coursework is required.

S0471 Half Unit Technology, Power and Culture

This information is for the 2020/21 session.

Teacher responsible: Prof Judy Wajcman STC S203

Availability: This course is available on the MSc in Culture and Society, MSc in Media and Communications (Data and Society), MSc in Political Sociology and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course aims to give students a detailed understanding of sociologically informed approaches to the social studies of science and technology. It will consider how macro theories of post-industrial society (from Bell to Castells) have conceptualised the role of technology in social change. It will then look at the development of STS as a field that highlights the constitutive role of objects and artefacts in social relations. In other words, it will reflect upon sociology's traditional neglect of the social life of things or materiality. These broad themes will then be elaborated substantively. First, by considering the role of technology in reconfiguring time, space and mobility. Second, by considering power relations and social inequalities embedded in digital technologies, such as the Internet and mobile phones. Third, by treating technology as a culture that shapes gender identities, such as those that find expression in the virtuality of cyberspace. The course will draw on examples from a variety of domains including the environment, the internet, robotics, sex, and weapons.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Hackett, E. et al (2008) *The Handbook of Science and Technology Studies* (MIT Press). MacKenzie, D. and Wajcman J. (1999) *The Social Shaping of Technology* (MIT Press). Suchman, L. (2007) *Human-Machine Configurations* (CUP). Turkle, S. (2011) *Alone Together* (Basic Books). Wajcman, J. (2004) *TechnoFeminism* (Polity Press). Morozov, E. (2013) *To Save Everything, Click Here: Technology, Solutionism and the Urge to Fix Problems That Don't Exist* (Allen Lane)

Assessment: Take-home assessment (100%) in January.

S0473 Half Unit Not available in 2020/21 Crime, Control and the City

This information is for the 2020/21 session.

Teacher responsible: Dr Janet Foster

Availability: This course is available on the MSc in City Design and Social Science, MSc in Criminal Justice Policy, MSc in Regional And Urban Planning Studies and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This half unit course examines crime and disorder in city landscapes, the relationship between crime, space and place, and the complex mix of informal and formal social controls that influence different types and levels of crime. Drawing on a range of comparative literature from different cities, and using a mixture of classic and contemporary texts, we examine the importance of informal social control in maintaining social order in cities, the role of policing, and what happens when formal and informal social controls fail. We also explore the principles of crime prevention – both physical and social, critically examining the relationship between crime and design.

Teaching: 30 hours – workshops in the LT

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Indicative reading: Body-Gendrot (2012) *Globalization, Fear and Insecurity* (Palgrave Macmillan); Bottoms, A (2012) 'Developing socio-spatial criminology' in Maguire M et al (eds.) *The Oxford Handbook of Criminology* (5th edn.); Cochrane, A and Talbot, D (eds.) (2008) *Security: Welfare, Crime and Society* (Open University Press); Evans, K (2011) *Crime Prevention: a critical introduction* (Sage); Felson, M and Eckert, M (2016) *Crime and Everyday Life* (Sage); Graham, P. & Clarke, J. (2001) 'Dangerous Places: Crime and the City' in Muncie, J. & McLaughlin, E. (eds.) *The Problem of Crime* 2nd ed. (Sage); Le Gates R & Stout F (2015) *The City Reader* (Routledge); Monti et al (2014) *Urban People and Urban Places*; Mooney, G and Neal, S (eds.) (2009) *Community: Welfare, Crime and Society* (Open University Press); Pile, S. et al. (eds.) (1999) *Unruly Cities* (Routledge); Pitts, J (2008) *Reluctant Gangsters: the changing face of youth crime* (Willan); Wacquant, L (2008) *Urban Outcasts: A Comparative Sociology of Advanced Marginality* (Polity Press); Zukin, S (2010) *Naked City: The Death and Life of Authentic Urban Places* (Oxford University Press)

Assessment: Essay (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

S0475 Half Unit Material Culture and Design

This information is for the 2020/21 session.

Teacher responsible: Dr Donald Slater STC S310

Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Economy, Risk and Society and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on designed entities in everyday life, looking at the ways in which materials are configured into things, practices, spaces and forms, and at the assemblage of objects across production, design, consumption and use. Though aiming to produce expertise in specifically social science research, the course will bring together literatures and debates that cross the social sciences, humanities and science/technology, drawing particularly on actor-network theory, material culture studies, sociology of consumption, practice theory, urban and architectural studies, cultural theory and design studies. There will also be a strong emphasis on methodology: what tools are available to social scientists to investigate the emergent properties and impacts of designed objects. Case studies will be central to the teaching, developing theoretical and methodological strategies through a (changing) set of empirical cases that are likely to include: digital objects (software, games); media objects; lights and lighting; fashion; domestic interiors.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: One 2,500 essay applying a theoretical approach to a specific case study.

Indicative reading: Bijker, W. E. and J. Law (eds.) (1992) *Shaping technology/building society: Studies in Sociotechnical change*. Cambridge, MA: MIT Press. Frayling, C., E. King and H. Atkinson (2009) *Design and popular entertainment*. Manchester ; New York. Lash, S. and C. Lury (2007) *Global Culture Industry: the mediation of things*. Cambridge: Polity Press. Latour, B. (2005) *Reassembling the Social: An Introduction to Actor-Network-Theory*. Oxford: Oxford University Press. Manovich, L. (2002) *The language of new media*. Cambridge, Mass. London: MIT. Miller, D. (2008) *The Comfort of Things*. Cambridge: Polity. Molotch, H. (2003) *Where Stuff Comes From: How Toasters, Toilets, Cars, Computers and Many Other Things Come to Be as They Are*. New York and London: Routledge. Shove, E., M. Hand, J. Ingram and M. Watson (eds.) (2007) *The Design of Everyday Life*. Oxford: Berg. Yaneva, A. (2009) *The Making of a Building: A Pragmatist Approach to Architecture*. Bern: Peter Lang.

Assessment: Essay (100%, 5000 words) in the LT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Lent Term.

Attendance at all classes and submission of all set coursework is required.

SO476

Researching Migration: research questions and research methods

This information is for the 2020/21 session.

Teacher responsible: Dr Patrick McGovern STC.S110

Availability: This course is compulsory on the MSc in International Migration and Public Policy. This course is not available as an outside option.

Course content: Having introduced the students to a range of possible research strategies, the students will be asked to prepare informal seminar presentations on their proposed research in the MT and LT. In addition, they will submit a one hundred word topic summary towards the end of the MT and a 400 word research proposal before the end of the LT. They will also prepare and deliver a formal presentation on their research for a workshop early in the ST. At each stage, participants will be encouraged to use feedback from the course convenors and fellow students to revise their research plans. A final proposal will be submitted after the ST workshop.

Teaching: Lectures 3 x 1 hour (3); Seminars 2 x 2 hours (4); Workshop 5 hours (5). Total 12 hours

Teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 3 presentations in the MT, LT and ST.

Indicative reading: Bryman, A. (2008) *Social Research Methods*, H62 B91; Gilbert, N. (ed.) (2008) *Researching Social Life* H62 R 43; Hancke, R. (2009) *Intelligent Research Design: A Guide for Beginning Students in the Social Sciences*, H62 H23; Landman, T. (2007) *Issues and Methods in Comparative Politics*, JF51 L25; Silverman, D. (2002) *Doing Qualitative Research: A Practical Handbook* H62 S58.

Assessment:

This course is not assessed.

SO477 Half Unit

Urban Social Theory

This information is for the 2020/21 session.

Teacher responsible: Dr David Madden STC S209

Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in International Migration and Public Policy and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course is a comprehensive introduction to urban social theory. The class will focus on major concepts, paradigms, texts and thinkers in order to critically assess different ways of theorising the urban. It will analyse various forms of urban theory including political economy, human ecology, phenomenology, feminism and postcolonialism, which are used as lenses through which to understand a variety of topics, such as socio-spatial restructuring, neoliberalisation, public space, globalisation, technocracy, infrastructural politics, multiculture, cosmopolitanism, the right to the city and planetary urbanisation.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours in the MT; teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Engels, Friedrich. 1887 [1872]. *The Housing Question*. London: Cooperative Publishing Society of Foreign Workers. Park, Robert E., Ernest W. Burgess and Roderick D. McKenzie. 1967 (1925). *The City*. Chicago: University of Chicago Press. Castells, Manuel. 1977. *The Urban Question*. Cambridge, MA: MIT Press. Lefebvre, Henri. 1991 [1974]. *The Production of Space*. Donald Nicholson-Smith, trans. Oxford: Blackwell. Butler, Judith. 2015. "Bodies in Alliance and the Politics of the Street." Assessment: Essay (80%, 5000 words) in the LT.

Memo (10%) and class participation (10%) in the MT.

There will be weekly memos submitted via Moodle the evening before each class session during the MT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Lent Term.

Attendance at all classes and submission of all set coursework is required.

SO478

Social Scientific Analysis of Inequalities

This information is for the 2020/21 session.

Teacher responsible: Dr Sam Friedman STC S216

Availability: This course is compulsory on the MSc in Inequalities and Social Science. This course is not available as an outside option.

Course content: The course will consider interdisciplinary approaches to inequality, focusing on (a) how inequality can be conceptualised and explained, (b) how it can be measured and (c)

ethical and political issues. Topics to be covered include patterns and trends in economic inequalities; gender, ethnicity, class and age; cultural aspects of inequality; social and intergenerational mobility; global and comparative perspectives; geographical and neighbourhood polarisation; health and educational inequalities; media representation of inequalities; ethical and philosophical approaches; the impact of government, law and social policy.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 40 hours across MT and LT, with a class in ST.

It is divided into blocks of related lectures and linked seminars. The ST class is a revision class.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 mock exam in the LT.

Indicative reading: Branko Milanovic, *Global Inequality: A New Approach for the Age of Globalization* (Harvard University Press, 2016). Piketty, T. *Capital in the 21st Century* (Harvard University Press, 2013). Hartley Dean and Lucinda Platt, *Social Advantage and Disadvantage* (Oxford, 2016). Graeber, D. *Debt: The First 5000 Years*. New York: Melville Publishing. O'Neil, C. 2016 *Weapons of Math Destruction*. London: Allen Lane. Hickel, J. (2017) *The Divide: A Brief Guide to Global Inequality and its Solutions*. William Heinemann. London. Federici, S. (2004) *Caliban and the Witch: Women: The Body and Primitive Accumulation*. New York: Autonomedia.

Assessment: Essay (30%, 3000 words) and presentation (20%) in the LT.

Take-home assessment (50%) in the ST.

The presentation will be from a group exercise in the LT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the submission day. The essay is due by the first day of LT.

Attendance at all classes and submission of all set coursework is required.

SO479 Half Unit

Human Rights and Postcolonial Theory

This information is for the 2020/21 session.

Teacher responsible: Dr Ayca Cubukcu STC.S113

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Culture and Society, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Drawing on postcolonial theory and critique, this course explores how human rights and international law came to be institutionalized in the context of European colonialism, and what the contemporary implications of this historical fact may be today. Engaging with the fields of socio-legal studies, intellectual history and social theory, the course also asks why, and with what consequences, human rights tend to monopolize the political language through which many social movements throughout the world articulate their desires for social and global justice.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours in the LT; teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: Antony Anghie, *Imperialism, Sovereignty, and the Making of International Law* (Cambridge: Cambridge University Press, 2005). Hannah Arendt, *Eichmann in Jerusalem: A Report on the Banality of Evil* (New York: Penguin Books Edition). Talal

Asad, *On Suicide Bombing* (New York: Columbia University Press, 2007). Brett Bowden, *The Empire of Civilization: The Evolution of an Imperial Idea* (Chicago: University of Chicago Press, 2009). Partha Chatterjee, *The Black Hole Of Empire: History of a Global Practice of Power* (Princeton UP, 2012). David Harvey, *Cosmopolitanism and the Geographies of Freedom* (New York: Columbia University Press, 2009). David Kennedy, *The Dark Sides of Virtue: Reassessing International Humanitarianism* (Princeton: Princeton University Press, 2005). Sven Lindqvist, *"Exterminate All the Brutes": One Man's Odyssey into the Heart of Darkness and the Origins of European Genocide* (New York: The New Press, 1996). Karuna Mantena, *Alibis of Empire: Henry Maine and the Ends of Liberal Imperialism* (Princeton: Princeton University Press, 2010). Joseph Massad, *Desiring Arabs* (Chicago: University of Chicago Press, 2007). Mark Mazower, *No Enchanted Palace: The End of Empire and the Ideological Origins of the United Nations* (Princeton: Princeton University Press, 2009). Uday Mehta, *Liberalism and Empire: A Study in Nineteenth Century British Liberal Thought* (Chicago: University of Chicago Press, 1999).

Assessment: Essay (90%, 5000 words) in the ST.

Class participation (10%) in the LT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

SO480 Half Unit

Urban Inequalities

This information is for the 2020/21 session.

Teacher responsible: Prof Fran Tonkiss STC.S205

Availability: This course is available on the MSc in City Design and Social Science, MSc in Inequalities and Social Science, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course offers a critical introduction to key issues and processes in the study of contemporary urban inequalities. This course puts contemporary processes of urban growth in the context of another major urban trend: deepening patterns of inequality in many cities across the world. It examines the continuing role of 'older' bases of urban inequality - access to land and property, gender inequity, ethnic and racial discrimination, legal exclusion and informality – as well as significant emerging patterns, including extreme concentrations of wealth at the top, middle-class stagnation, privatisation and spatial secession, forced migration and insecurity. It also examines the complex of ways in which urban inequality is experienced, not only in terms of income or property wealth, but also in consumption inequalities, inequities in access to housing, transport, urban services and legal protections, spatial disparities and environmental risks and injustices. The course considers the range of social, economic, environmental and political factors that shape, and also might help to address, urban inequality in these different contexts.

The course will:

- provide a critical introduction to current and emerging patterns of urban inequality
- consider the production of urban inequalities through social, economic, political and spatial processes
- explore common themes and critical differences across cities in developed and developing economies
- address key debates in a range of urban disciplines, and situate these in specific urban contexts and examples

Key themes

- Urban growth and the growth of inequality
- Wealth, income and inequality
- Spatial injustice: segregation and access
- Environment and inequities

- Informality and insecurity
- Social inequality in the city: gender, race and legal exclusions
- Governing inequality

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

1 x 2000-word essay

Indicative reading:

Assessment: Essay (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

SO481 Half Unit

Class, Politics and Culture

This information is for the 2020/21 session.

Teacher responsible: Dr Sam Friedman STC216

Availability: This course is available on the MSc in Culture and Society, MSc in Inequalities and Social Science, MSc in Political Sociology and MSc in Sociology. This course is not available as an outside option.

Course content: The course will begin by introducing traditional theories of social class and stratification before going on to examine the history and political significance of class in Britain, and how this compares with other countries throughout the world. It will then look at the place of class in a contemporary political context, critically examining the claim made by some 'postmodern' writers, and prominent politicians, that class boundaries have been irrevocably eroded. The course will then move on to look at the seminal work of French sociologist Pierre Bourdieu and his supposition that class boundaries are most clearly discernible from examining people's cultural taste, with the privileged using their preferences for 'highbrow' culture as a means of expressing their superiority over the working classes, who tend to prefer more 'lowbrow' culture. We interrogate how these arguments relate today, where the lines between high and low culture are increasingly blurred, where strong cross-cultural differences persist between Europe and the U.S, and where new

taste distinctions exist even in traditionally lowbrow art forms, such as comedy and pop music. We then take a more detailed look at class-based boundaries in taste and lifestyle. In particular, we focus on the way in which the middle classes demonise sections of the working class based on what they consider to be 'pathological' consumption choices – focusing in particular on the 'Chav' phenomenon in Britain. We go on to explore both the meaning and consequences of such overt class prejudice, both in Britain but also using research from the U.S, the Netherlands and other international contexts. Finally, the module will ask to what extent class boundaries are malleable? How easy is it for people to escape their backgrounds and move upward or downward in social space? This final section of the course thus looks at contemporary patterns of social mobility, examining the social benefits and challenges that mobility implies, increasing closure within global elites, and the rise of the middle classes in developing countries like China, Brazil and South Africa.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in LT, with 2 hours in ST.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Alexander, P. (2013) *Class in Soweto*.

Johannesburg: KZE Press. Bourdieu, P. (1984) *Distinction: A Social Critique of the Judgment of Taste*, Routledge: London. Crompton, R. (2008) *Class and Stratification (Third Issue)* Polity Press: Cambridge. Bennett, T., Savage, M., Silva, E., Warde, A., Gayo-Cal, M., Wright, D. (2009). *Class, Culture, Distinction*. David Grusky (ed), *Social Stratification: Class, Race and Gender in Sociological Perspective*. Boulder, CO. Westview Press.

Assessment: Essay (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

SO482 Half Unit Not available in 2020/21

Topics in Race, Ethnicity and Postcolonial Studies

This information is for the 2020/21 session.

Teacher responsible: Dr Suki Ali STC S307

Availability: This course is available on the MSc in Culture and Society, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in International Migration and Public Policy and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course offers students a broad exposure to theorisations and debates about race, racism and ethnicity as well as an opportunity to consider a range of contemporary instances in which the social and political problems arising from these ideas have been manifested. It will offer a preliminary genealogy of 'modern' race thinking connecting historical and theoretical work with new scholarly debates over a number of contemporary

issues. NB Topics change yearly but have engaged the politics of migration and multicultural, nationalism, the politics of terror, state violence, bio/necro/politics, genomics, health inequalities, representation.

Teaching: This course is delivered through a combination of lectures/online material and seminars totalling a minimum of 20 hours in LT. The course may run as an extended interactive seminar where student numbers and teaching arrangements permit.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Students have the option of writing a 1500 word paper in preparation for the assessed essay.

Indicative reading: Appiah, Anthony (1996) *Color conscious: the political morality of race*, Princeton University Press; Ballhatchet, Kenneth (1980) *Sex, Race and Class under the Raj*, Weidenfeld and Nicolson; Butler, Judith P (2004) *Precarious life: the powers of mourning and violence*, Verso; Cabral, Amílcar (2000) *Return To The Source*, Monthly Review; Chiang, H. ed. (2018) *Histories of Sex in China*, Washington University Press; Eze, Emanuel Chukwudi (2001) *Achieving our humanity: the idea of the postracial future*, Routledge; Fanon, Frantz (1967) *Toward The African Revolution*, Grove; Fredrickson, George M (2002) *Racism: a short history*, Princeton University Press; Jones, Greta (1980) *Social Darwinism and English Thought*, Harvester, Hannaford, Ivan (1996) *Race: the history of an idea in the West*, Woodrow Wilson Center Press; Haraway, Donna (1997) *ModestŹWitness@SecondŹMillennium*, FemaleManŹMeetsŹOncoMouse: feminism and technoscience Routledge; Kuhl, Stefan (1994) *The Nazi connection: eugenics, American racism and German national socialism*, Oxford University Press; Mamdani, Mahmood (2004) *Good Muslim, bad Muslim: America, the Cold War, and the roots of terror*, Pantheon Books; Mbembe, A (2019) *Necropolitics*, Duke University Press; Morana, M et al (2008) *Coloniality at Large: Latin America and the Postcolonial Debate*, Duke University Press; Nelson, A (2016) *The Social life of DNA*. Omeje, K (ed) (2015) *The Crisis of Postcoloniality in Africa*, CODESIRA Schiebinger, Londa (1994) *Nature's body: sexual politics and the making of modern science*, London, Pandora; Tapper, Melbourne (1999) *In the blood: sickle cell anaemia and the politics of race*. Philadelphia, University of Pennsylvania Press

Assessment: Essay (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the submission day.

Attendance at all seminars and submission of all set coursework is required.

S0489 Half Unit Family and Migration

This information is for the 2020/21 session.

Teacher responsible: Dr Ursula Henz STC.S100B

Availability: This course is available on the MSc in International Migration and Public Policy and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course examines the family life, family patterns and family relationships of contemporary migrant families in Great Britain and other societies. It applies three perspectives to migrant families: diversity, integration and transnationality. It examines variations in family life, patterns and relationships in migrant families; particular challenges that are associated with the migration of a family to a new country as well as transformations of family roles and intimacy in transnational families. After an overview over family forms in different cultures, the course explores selected substantive topics. Indicative topics are: migrant children and children left behind; marriage migration, transnational marriages, and intermarriage; the roles of mother and father in immigrant and transnational families; migrant families and family care.

Teaching: This course is delivered through a combination of

lectures, online materials and seminars totalling a minimum of 20 hours in the LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Kraller, Kofman, Kohli & Schmoll (eds.) (2011) *Gender, Generations and the Family in International Migration*; Baldassar & Baldock (2007) *Families Caring Across Borders: Migration, Ageing and Transnational Caregiving*; Beck & Beck-Gernsheim (2014) *Distant Love*; Ehrenreich & Hochschild (2004): *Global Woman: Nannies, Maids, and Sex Workers in the New Economy*; Dreby (2010) *Divided by Borders. Mexican Migrants and Their Children*; Foner (2009) *Across Generations: Immigrant Families in America*; Madianou & Miller (2011): *Migration and New Media: Transnational Families and Polymedia*; Parreñas (2005): *Children of Global Migration*; Portes & Rumbaut (2001) *Legacies: The Story of the Immigrant Second Generation*.

Assessment: Take-home assessment (90%) and class participation (10%) in the ST.

Take home exam (2 questions, 90%) in the ST.

Class participation (10%).

S0490 Half Unit Contemporary Social Thought

This information is for the 2020/21 session.

Teacher responsible: Prof Chetan Bhatt STC.S107

Availability: This course is available on the MSc in Culture and Society, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Contemporary Social Thought considers new and critical issues in contemporary social theory to expose students to current and emerging concerns. Indicative topics include global sociology; humanism; secularism; politics and violence; wars and technology; post-colonialism; the politics of gender identity; violent religious movements; the new far-right.

Aims:

To enable students to:

- Demonstrate understanding and application of contemporary social theory from a range of perspectives
- Demonstrate understanding of a range of methodological approaches to sociological analysis
- Develop a critical appreciation of different forms of theorising and researching the social
- Critically engage with key texts and thinkers in the field
- Demonstrate knowledge and understanding of current debates in contemporary social thought

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: One essay of 1,500 words to be submitted in Lent Term.

Indicative reading: A. Loomba (2015), *Colonialism/Postcolonialism* [Third Edition], Routledge. A. Elliott (2014), *Contemporary Social Theory: an introduction* [Second Edition], Routledge. J. Wolff (2015), *An Introduction to Political Philosophy* [Third Edition], Oxford University Press.

Assessment: Essay (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on Wednesday week one of ST.

Attendance at all classes and submission of all set coursework is required.

SO491 Half Unit

Quantitative Social Research Methods

This information is for the 2020/21 session.

Teacher responsible: Dr Burak Sonmez STC.S206

Availability: This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Sociology, MSc in Economy, Risk and Society, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course has two main goals. It first introduces students to a range of quantitative methodologies used in contemporary social research. Some of these are widespread, others less so, and the class will be keen to explore a wide variety of them, from experimental and survey methods to linear regression and structural equation modelling. The course's second goal is to reflect on specific topics of the design of quantitative social research and the analysis of quantitative research data. The specific topics involve the articulation of research interest or question, the choice of appropriate quantitative methods to address research questions, and the key strategies for the analysis of quantitative data. This process is most critical when it comes to crafting powerful sociological arguments and theories that are supported by empirical evidence. Our interest in the design of quantitative research and the analysis of quantitative data will allow students to discuss problems of measurement and sampling, conceptualization, inference, and causality. It will also expose students to important debates and divides in quantitative sociology, such as the one between approaches aiming at the establishment of causality on the one hand, and approaches interested in the analysis of probabilities on the other. To achieve these two goals, we will use a case study approach. For every method we cover, we will read a selection of articles taken from the major generalist journals in the discipline. By analyzing and criticizing the operationalization of quantitative methods in these articles, we will cover issues of research design and get a sense of what each method does (and does not do), of the vision of the social world it conveys, and of the type of questions it can be applied to.

Teaching: This course is delivered through a combination of lectures, online materials and workshops totalling a minimum of 20 hours in the MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students must write memos based on course readings and class activities.

Indicative reading: Abbott, A. (2004). "Ideas and Puzzles", Chapter 7 in *Methods of Discovery: Heuristics for Social Sciences*. New York: Norton, pp. 211-248. Fox, C. (2004). "The Changing Color of Welfare? How Whites' Attitudes toward Latinos Influence their Support for Welfare", *American Journal of Sociology* 110, 580-625. Legewie, J. (2013). Terrorist Events and Attitudes toward Immigrants: A Natural Experiment. *American Journal of Sociology*, 118(5), 1199-1245. Piketty, T., & Saez, E. (2003). Income Inequality in the United States, 1913-1998. *The Quarterly Journal of Economics*, 118(1), 1-39. Lim, H., & Duan, H. (2015). Should we blame the graduates for their unemployment? A happiness approach. *Hitotsubashi Journal of Economics*, 56(2), 243-258. Salganik, Matthew J., Peter S. Dodds, and Duncan J. Watts. 2006. "Experimental Study of Inequality and Unpredictability in an Artificial Cultural Market", *Science* 311: 854-856. Savage, M., Devine, F., Cunningham, N., Taylor, M., Li, Y., Hjellbrekke, J., . . . Miles, A. (2013). A New Model of Social Class? Findings from the BBC's Great British Class Survey Experiment. *Sociology: The Journal of the British Sociological Association*, 47(2), 219.

Assessment: Memo (40%) in the MT.

Take-home assessment (60%) in January.

The course is assessed by one 2,500-word memo due in the week following the end of MT (40%) and a take-home exam (60%) in the January exam period.

An electronic copy of the first assessed memo to be uploaded to Moodle, no later than 4.00pm on the Tuesday following the end of

Michaelmas Term.

Attendance at all classes and submission of all set coursework is required.

SO492 Half Unit

Qualitative Social Research Methods

This information is for the 2020/21 session.

Teacher responsible: Dr Rebecca Elliott STC S211

Availability: This course is compulsory on the MSc in Culture and Society. This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Sociology, MSc in City Design and Social Science, MSc in Economy, Risk and Society, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course introduces students to the theory and practice of qualitative research methods in sociology. The seminars address issues of research design, data collection and analysis in relation to qualitative research methods, including ethnography, in-depth interviewing, and textual analysis. Taking these methods together, we will build toward an understanding of best practice in qualitative inquiry. Based on the principle that doing is one of the best means of learning, this course is highly interactive and requires 'hands-on' participation in a series of practical exercises and project work throughout the term. A syllabus detailing course objectives, course style, readings, teaching arrangements and student assessment will be distributed at the beginning of the term.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students must write a 1,000 word book review of a qualitative research study.

Indicative reading:

- Luker, K. 2008. *Salsa Dancing into the Social Sciences: Research in an Age of Info-Glut*. Cambridge, MA: Harvard University Press.
- Small, M. 2009. 'How Many Cases Do I Need? On the Science and Logic of Case Selection in Field-Based Research.' *Ethnography* 10: 5-38.
- Lamont, M. and A. Swidler. 2014. 'Methodological Pluralism and the Possibilities and Limits of Interviewing.' *Qualitative Sociology* 37(2): 153-171.
- Jerolmack, C. and S. Khan. 2014. 'Talk is Cheap: Ethnography and the Attitudinal Fallacy.' *Sociological Methods & Research* 43(2): 178-209.
- Weiss, R.S. 1994. *Learning from Strangers: The Art and Method of Qualitative Interview Studies*.
- Emerson, R.M., R.I. Fretz, and L.L. Shaw. 2011. *Writing Ethnographic Fieldnotes* (2nd edition). Chicago: University of Chicago Press.
- Stanley, L. 2017. *The Archive Project: Archival Research in the Social Sciences*, edited by Niamh Moore, Andrea Salter, Liz Stanley, and Maria Tamboukou.
- Seale, C. 1999. *The Quality of Qualitative Research*. Chapter 11, 'Reflexivity and Writing,' pp. 159-177.
- Burawoy, M. 1998. 'The Extended Case Method.' *Sociological Theory* 16:4-33.
- Snow, D.A., C. Morrill, and L. Anderson. 2003. 'Elaborating Analytic Ethnography: Linking Fieldwork and Theoretical Development.' *Ethnography* 4: 271-290.

Assessment: Research report (90%) in the LT.

Class participation (10%) in the MT.

The assessment consists of class participation in MT and an individual qualitative research report in the LT.

An electronic copy of the assessed report, to be uploaded to Moodle, no later than 4.00pm on Wednesday Week 5 of LT.

Participation will be assessed based on students' engagement with course activities, including for example in-class discussions, class assignments, and contributions to online discussion boards. Attendance at all classes and submission of all set coursework is required.

S0493

MSc in Culture and Society Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Donald Slater STC S310

Availability: This course is compulsory on the MSc in Culture and Society. This course is not available as an outside option.

Course content: This workshop will guide students through the process of conducting an independent dissertation project in the MSc Culture & Society.

Teaching: 6 hours of seminars in the LT.

There will be three sessions during MT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.

Teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Students are required to submit a research proposal in LT.

Indicative reading: This is a workshop and has no specific reading list.

Assessment: Dissertation (100%, 10000 words) in August.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC. S116, no later than 4.00pm on Thursday 19th of August 2021. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S0494

MSc in Political Sociology Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Robin Archer STC.S114a

Availability: This course is compulsory on the MSc in Political Sociology. This course is not available as an outside option. These seminars are for students on the MSc Political Sociology only.

Course content: These seminars aim to help you to begin the process of writing your dissertation. At the end of MT we will have a few seminars that aim to get students thinking at a meta-level about research in political sociology. The seminars can, of course, only address a small selection of approaches. Examples might include rational choice and institutionalist theories, or comparative and case study methods. But please note that the MSc in Political Sociology takes a pluralist approach and does not seek to prescribe these or any other particular theories or methods. In LT we will hold dissertation workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods. Every student is required to make

a formal presentation once during the term.

Teaching: 8 x 1.5 hour seminars and workshops over the course of MT and LT.

There will be three sessions during MT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.

Teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students are expected to participate in seminars beginning in MT and produce a research statement and presentation in the LT.

Students will: (1) assess the strengths and weakness of selected theories and methods; (2) formulate a clearly specified research question and set out the rationale for researching this question and a proposed approach; and (3) give a presentation which develops one or two of the main arguments they anticipate will be important to their project.

Indicative reading: Donatella Della Porta and Michael Keating (2008), *Approaches and Methods in the Social Sciences: A Pluralist Approach*, Thomas Janoski et al, (2005), *The Handbook of Political Sociology*, James Mahoney and Dietrich Rueschmeyer (2003), *Comparative Historical Analysis in the Social Sciences*.

Assessment: Dissertation (100%, 10000 words) in August.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC.

S116, no later than 4.00pm on Thursday 19th of August 2021. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S0495

MSc in Economy, Risk and Society Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Rebecca Elliott STC S211

Availability: This course is compulsory on the MSc in Economy, Risk and Society. This course is not available as an outside option.

Pre-requisites: Students must have completed Regulation, Risk and Economic Life (S0425).

Course content: The dissertation is an extended piece of written work that is your own independent research investigation of a social issue or problem, undertaken with the guidance of your dissertation supervisor. These workshops are meant to prepare you to produce an original piece of research. We will cover the expectations for the dissertation, as well as provide general guidance for deriving a research question that is appropriately situated in the themes of the programme; for developing an empirical strategy to study topics relevant to the programme; and for writing up conclusions that can speak to enduring questions in our area. In addition to consultation with faculty, in these sessions students will work in smaller groups to peer review their work-in-progress.

Teaching: 2 hours of seminars in the MT. 2 hours of seminars in the LT. 2 hours of seminars in the ST.

Note also that there will be three sessions during MT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and aim to provide some basic guidance about planning your dissertation, such as

selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.

Teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students are required to submit a project outline in LT.

Indicative reading:

- Alan Bryman, *Social Research Methods* (Oxford: Oxford University Press, 2004)
- Clive Seale, *The Quality of Qualitative Research* (London: Sage, 1999)
- Clive Seale (ed), *Researching Society and Culture* (London: Sage, 2012)
- Howard Becker, *Writing for Social Scientists* (Chicago: University of Chicago, 1986)

Assessment: Dissertation (100%, 10000 words) in August.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC.

S116, no later than 4.00pm on Thursday 19th of August 2021. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S0496

MSc in Human Rights Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Monika Krause STC S207

The Programme Convenor is responsible for overseeing the Dissertation.

Availability: This course is compulsory on the MSc in Human Rights. This course is not available as an outside option.

This course is only available to MSc Human Rights students, and is a compulsory course for students on the programme.

Course content: The dissertation is an extended piece of written work that is your own independent research investigation of a human rights issue or problem, undertaken with the guidance of your dissertation supervisor. In the dissertation, you will critically appraise evidence, arguments and debates to reach a conclusion your research question. The key requirement is that the dissertation should demonstrate a high level of independent critical ability. You must show your ability to organise your material clearly and logically and to sustain a reasoned and cogent argument from beginning to end. Where appropriate you should explain clearly the research method(s) that you have applied and the reasons for your choice of approach. You should show awareness of any shortcomings of your study in relation to methods employed and where relevant, quality or quantity of the data, and disciplinary approach.

Teaching: 2 hours of lectures in the MT. 3 hours of seminars in the LT. 2 hour of seminars in the ST

There will be one Introductory lecture in MT for all MSc Human Rights students, on the challenges and requirements of doing independent research for dissertation purposes, and different methodologies available for an inter-disciplinary programme. The Introductory session will also cover fieldwork and research ethics. This will be followed by 5 seminars/workshops in smaller groups, in which students present and discuss possible research questions and strategies, along with preparing dissertation proposal and timeline. There will be three sessions during MT for ALL MSc students based in the Sociology department. These will be offered in

conjunction with LSE Life and LSE Library and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.

Teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students are required to submit an annotated bibliography in LT.

Indicative reading: Alan Bryman, *Social Research Methods* (Oxford: Oxford University Press, 2004). Clive Seale, *The Quality of Qualitative Research* (London: Sage, 1999). Clive Seale (ed), *Researching Society and Culture* (London: Sage, 2012). Howard Becker, *Writing for Social Scientists* (Chicago: University of Chicago, 1986)

Assessment: Dissertation (100%, 10000 words) in August.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC. S116, no later than 4.00pm on Thursday 19th of August 2021. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S0497

MSc in Inequalities and Social Science Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Sam Friedman STC S216

Availability: This course is compulsory on the MSc in Inequalities and Social Science. This course is not available as an outside option.

These seminars are for students on the MSc in Inequalities and Social Science only.

Course content: These seminars aim to help you to begin the process of writing your dissertation. At the end of MT we will have seminars that aim to get students thinking at a meta-level about research on inequalities and how to identify a good topic, including issues of theory, measurement and methods. Please note that the MSc in Inequalities and Social Science takes a pluralist approach and does not seek to prescribe these or any other particular theories or methods. In LT we will hold dissertation workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods.

Teaching: 2 hours of seminars in the MT. 4 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be three sessions during MT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.

Teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: A title, research proposal and annotated bibliography by the end of MT plus a presentation during the ST.

Indicative reading: Anand, S. (Ed) (2010) *Debates on the Measurement of Global Poverty*, Oxford: Oxford University Press. Atkinson, A. (2015), *Inequality: what can be done?*, Harvard

UP. Back, Les and Solomos, John (2000), *Theories of Race and Racism: A Reader*, Routledge. Bourguignon, F. (2017) *The Globalization of Inequality*, Second Edition Princeton: Princeton University Press. Butler, Judith. [1990]2006. *Gender Trouble: Feminism and the Subversion of Identity*. (2015) *Getting By*, Bristol: Policy Press. Piketty, Thomas (2014), *Capital in the 21st century*, Harvard UP. Wright, Erik O. (2005) *Approaches to Class Analysis*, Cambridge UP

Assessment: Dissertation (100%, 10000 words) in August.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC. S116, no later than 4.00pm on Thursday 19th of August 2021. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S0499

MSc in Sociology Dissertation

This information is for the 2020/21 session.

Availability: This course is compulsory on the MSc in Sociology. This course is not available as an outside option.

Course content: These workshops will guide students through the process of conducting an independent dissertation project on the MSc Sociology.

Dissertation Particulars

The dissertation must be a report of a research project, whether it comprises primary empirical material, secondary empirical material or theoretical/exegetical work on a body of social thought: i.e. there must be an identifiable and clear research question governing the research project; there must be critical reflection on the methods used (including their limits and the reasons why they warrant the kinds of claims made); and substantive analysis of empirical or analytical material. Even where the topic is substantively a documentary or policy-review exercise, candidates are expected to offer original reasoned argument and interpretation and to show evidence of a competence in research methods. Guidance on topic selection and methods will normally be provided by the candidate's Academic Mentor and students are also encouraged to use the office hour system to consult more broadly with academic experts in their research area within the Department or across the LSE.

Teaching: There will be 4 hours of seminars in the LT, 2 hours of seminars in the ST.

There will be three sessions during MT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method. Teaching arrangements may be adjusted if online teaching is required at any point.

Formative coursework: Students are required to submit one project abstract, and one piece of formative coursework; students are also required to submit a Research Ethics Review before undertaking empirical research.

1 x abstract

1 x project outline

Assessment: Dissertation (100%, 10000 words) in August.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC. S116, no later than 4.00pm on Thursday 19th of August 2021. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S04A8 Half Unit

Leadership and Social Change

This information is for the 2020/21 session.

Teacher responsible: Dr Sara Camacho Felix CBG 4.07

Availability: This course is available on the MSc in Inequalities and Social Science. This course is not available as an outside option. This course is available only to Atlantic Fellows for Social and Economic Equity MSc students. This is a compulsory course for these students and non-AFSEE Fellows will not be permitted to take this course.

Course content: The course responds to the needs of the AFSEE Fellows to develop critical skills and understandings of leadership within various contexts and themes indexed to transforming global inequality. This approach marries a structural analysis of global inequality and its manifestations with critical analysis, reflexive thinking, as well as practical skills that will provide students with the tools to bring systemic change into being. Crucially, the course is heavily rooted in theories of practice, in which Fellows are introduced to and demonstrate a sound knowledge and critical appreciation of their field and its associated practice and research techniques, and show that these techniques can be successfully applied in revealing or challenging injustice and inequality. The course will consist of lectures, presentations, seminars and workshops. Lectures will introduce Fellows to key concepts, approaches and techniques for understanding and challenging inequality. Workshops and seminars will help Fellows clarify and deepen their understanding of points and issues raised in the lectures, through practical work carried out individually and in groups.

Teaching: 6 hours of lectures and 10 hours of workshops in both teaching weeks.

Week 1 – 2 November - 6 November 2020 - Leadership and Social Change

Week 2 – 26 April - 30 April 2021 - Leadership and Social Change
Teaching arrangements may be adjusted if online teaching is required at any point.

Formative coursework: There will be one piece of formative coursework, a 1500 word essay in response to a set question. The formative essay will be due in week 10 of Michaelmas Term. Fellows will receive written feedback on the essay and will have the opportunity to discuss the written feedback with the Course Convenor. This formative coursework is directly related to the summative essay which will be due in LT.

70% Essay 2500 words in LT

30% Presentation in ST

An electronic copy of the assessed essay, to be uploaded to Moodle, in Week 7 of Lent Term.

SO4B1

Contemporary Politics of Human Rights

This information is for the 2020/21 session.

Teacher responsible: Prof Chetan Bhatt STC.S107

Availability: This course is compulsory on the MSc in Human Rights and Politics. This course is available with permission as an outside option to students on other programmes where regulations permit. The course is capped but a limited number of places are usually available to students from outside the MSc in Human Rights and Politics who wish to take this as an option.

Priority is usually given to postgraduate students in the Sociology Department. The course is also available as an outside option for other MSc degrees where regulations and numbers permit. Students from other programmes who wish to apply for a place on the course must complete the online application form on LSEforYou stating reasons for wishing to take the course.

Course content: During a period of unprecedented change in social, political, technological and cultural spheres, key human rights institutions and ideas have come under sustained criticism or attack. After the Second World War, an international consensus emerged in which the legitimacy of a framework of universal rights and related institutions was generally accepted. This consensus can no longer be assumed, whether within or outside formally liberal-democratic states. Human rights, as a powerful exemplar of political liberalism, have been criticised for their institutionalised, procedural and legalistic nature. They have come under sustained attack from authoritarian and populist states and movements. This interdisciplinary course examines many of the sharp tensions and contradictions in the contemporary politics of human rights. This includes the relevance of humanist foundations today, tensions in the practice of human rights, the populist right-wing and left-wing attacks on human rights, the rise of new identity politics and its human rights consequences, and the impact of social media on human rights. The course aims to critically examine the problems of - as well as the problems facing - contemporary human rights. Key topics that are often considered settled within much human rights thinking and practice, including the politics of identity, sameness and difference, cultural and religion, gender and sex, humanitarianism and war, will be examined and debated critically. The course considers how we might rethink human rights and humanism for a new period of political change.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 40 hours across MT and LT.

There will be a Reading Week in Week 6 of both Michaelmas Term

and Lent Term.

Formative coursework: Students should submit two formative essays, 1500 words each, one in Week 10 of Michaelmas Term and one in Week 10 of Lent Term.

Indicative reading: Javier Auyero and Débora Swistun. 2009. *Flammable. Environmental Suffering in an Argentine Shantytown*. Oxford: Oxford University Press. Markus Gunneflo. 2016. *Targeted Killing: A Legal and Political History*. New York. Cambridge University Press. Elizabeth Holzer. 2015. *The Concerned Women of Buduburam: Refugee Activists and Humanitarian Dilemmas*. Cornell University Press. Monika Krause. 2014. *The Good Project. Humanitarian Relief NGOs and the Fragmentation of Reason*. Chicago University Press. Sally Engle Merry. 2016. *The Seductions of Quantification: Measuring Human Rights, Gender Violence, and Sex Trafficking*. University of Chicago Press.

Assessment: Essay (50%, 3500 words) in the LT Week 1.

Essay (50%, 3500 words) in the ST Week 1.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the submission day.

Attendance at all classes and submission of all set coursework is required.

SO4B2

MSc in Human Rights and Politics Dissertation

This information is for the 2020/21 session.

Teacher responsible: Prof Chetan Bhatt STC.S107

Availability: This course is compulsory on the MSc in Human Rights and Politics. This course is not available as an outside option.

Course content: These seminars aim to help you to begin the process of writing your dissertation. At the end of MT we will have seminars that aim to get students thinking at a meta-level about research on Human Rights and Politics and how to identify a good topic, including issues of theory, measurement and methods. Please note that the MSc in Human Rights and Politics takes a pluralist approach and does not seek to prescribe any particular theories or methods. In LT we will hold dissertation workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods.

Teaching: 2 hours of seminars in the MT. 3 hours of seminars in the LT. 2 hours of seminars in the ST.

Assessment: Dissertation (100%, 10000 words) in August. Two hard copies of the dissertation, with submission sheets

attached to each, to be handed in to the Sociology Hub, STC.S116, no later than 4.00pm on Thursday 19th August 2021. An additional copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S04B3 Half Unit

The Sociology of Human Rights Practice

This information is for the 2020/21 session.

Teacher responsible: Dr Monika Krause STC.S207

Availability: This course is available on the MSc in Human Rights and MSc in Human Rights and Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Preference will be given to students MSc in Human Rights and MSc in Human Rights and Politics. This course may be available as an outside option where spaces are available.

Course content: This module invites students to examine practices in human rights NGOs as a case for the sociology of knowledge and expertise. The course will familiarise students with theoretical and analytical tools, which sociologists use to understand expert practices and practices in organizations, as well as with current sociological research on international NGOs. Students will be asked to participate in two simulation activities as part of this module: In one session, students will work in teams to develop advocacy projects. In a separate, day-long activity, we will study professional standards in human rights and related fields and then meet to review evidence on a specific setting – the ongoing crisis in the fictional context of Ruritania. Working in different teams, students will develop proposals for concrete interventions that might further human rights in Ruritania. We will reflect on the simulation in terms of the assumptions and knowledge-claims we have made and encountered and their implications for broader sociological questions. We will discuss conclusions in three areas: First, we can discuss conclusions in terms of questions in the sociology of expert practice; second, we will discuss conclusions in terms of skills students have used, and might need to develop; thirdly, we will discuss what our observations mean for how we can best pursue practical goals relating to social change and human rights.

Teaching: 21 hours of seminars and 9 hours of seminars in the LT. The class will be taught in a non-traditional extended seminar form, bringing 30 students together for 3 hours for a mixture of discussion and focused small-group activities. This course includes a day-long session on the second Saturday of week 7. Please make sure to check your calendar before enrolling on this course.

These teaching arrangements may change if online teaching is required at any point during the Lent Term.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Students have the option of handing in a formative essay of 1,500 words addressing knowledge practice in a field other than human rights in week 6. If completed by the deadline, students will receive feedback within two weeks.

Indicative reading:

Assessment: Essay (100%, 5000 words) in the ST.

For their assessment students will complete an essay that does not exceed 5000 words in length. The essay will respond to an analytical provocation by drawing on observations from the simulation activities.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the submission day.

S04B4 Half Unit Not available in 2020/21

The New Reproductive Sociology

This information is for the 2020/21 session.

Teacher responsible: Prof Charis Thompson STC.S102

Availability: This course is available on the MSc in Culture and Society, MSc in Economy, Risk and Society and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students on the MSc Sociology, MSc Economy, Risk and Society and MSc Culture and Society.

Course content: The field of Reproductive Sociology is opening up new areas to empirical sociological research and spurring exciting new directions in sociological theory. The study of social reproduction, of assisted reproductive and selecting technologies, and of gendered bodily and emotional labor reveals patterns of globalization and domestic intersectional stratification, new definitions of the family, thriving markets in bodily and intimate labour, and new migratory pathways. Theoretically, reproductive sociology lends new understanding to debates about the future of work, new forms of the division of labour, expansion of markets and limits to markets, migration, platform capitalism, and inequality. Reproductive sociology makes evident fungibilities among economic, moral, bodily, aesthetic, social, and cultural capital and takes these interfaces as a lens through which to interrogate the very foundations of social order and change.

Teaching: 25 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

An annotated bibliography for the summative essay.

Indicative reading: Recommended texts:

Viviana Zelizer, *The Purchase of Intimacy*, 2010. Ashley Mears, *Pricing Beauty*, 2011. Sarah Franklin, *Biological Relatives*, 2014. Evelyn Nakano Glenn, *Forced to Care*, 2010. Charis Thompson, 2014. *Three Times a Woman: Voting, Egg Donation, Cosmetics, and the Punctuated Gendering of Stem Cell Innovation in California*. Alondra Nelson, *The Social Life of DNA*, 2016. Osagie Obasogie and Marcy Darnovsky, eds., *Beyond Bioethics, Toward a New Biopolitics*, 2018. Katherine Dow, *Making a Good Life*, 2016

Assessment: Essay (80%, 4000 words) in the ST.

In-class assessment (20%) in the LT.

20% will be assessed for seminar participation, split equally between leading student discussion once during the term, and participating actively in discussion and listening throughout the term. Students will be asked to submit a one-paragraph description of something they contributed and something they learned from their peers, and a one-paragraph description of their participation at the end of the course.

SO4B5 Half Unit

The Anticolonial Archive: The Sociology of Empire and its Afterlives

This information is for the 2020/21 session.

Teacher responsible: Dr Sara Salem STC.S218

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Sociology.

Course content: This course focuses on a selection of 20th century anti-colonial movements in order to explore the postcolonial moment that emerged after the end of European empire. It addresses debates within global sociology, postcolonial studies and political sociology, looking at the legacies and afterlives of empire and what these mean for sociological analysis. We trace conversations anti-colonial movements had around nationalism and post-nationalism; capitalism and geopolitics; resistance, subjectivity and modernity; and global patterns of inequality. The course investigates these topics through various "anticolonial archives," including theoretical texts by major anticolonial and postcolonial theorists, literature, archival data, posters, images, speeches, films, memoirs and private correspondence.

The first part of the course explores anticolonial movements through some of the major theoretical texts that emerged during this moment by thinkers such as Frantz Fanon, B.R. Ambedkar, Kwame Nkrumah, Claudia Jones, Aimé Césaire, Chandra Mohanty, and Edward Said, among others, in order to sketch out the theoretical stakes of decolonisation and in particular the multiple alternative postcolonial projects that were proposed. The second part of the course focuses on two particular features of anticolonial movements and the postcolonial states they produced: their internationalism on the one hand and their focus on nationalism on the other. We look at internationalist and third worldist movements such as pan-Africanism, pan-Arabism, transnational feminism and Third World Marxism—particularly through the lens of international spaces such as the Marxist 'internationals,' the Afro-Asian Conference at Bandung and the Pan-African Congresses—before delving more deeply into particular national contexts (cases include South Africa, Algeria, Egypt, India and Cuba). The course ends by addressing the afterlives of empire, assessing the emergence of postcolonial states; global migration and the end of empire; the effects of the global neoliberal project

on the postcolonial world; and contemporary debates around postcolonial/decolonial theory

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the LT.

A 1,500 word reflective essay to be handed in during Week 7 of LT that takes a particular object or material from an "anticolonial archive" and discusses it in relation to the course themes, readings, and questions. This may be used to build an online "anticolonial archive" based on the course as a whole, on the LSE Sociology website. This should lay the basis for a topic or set of questions which you will explore in your summative essay. The formative is intended as an opportunity to begin to explore the various anticolonial archives and how to approach materials within them in relation to theoretical questions.

Indicative reading: Indicative readings:

Chatterjee, P., 2012. *The black hole of empire: History of a global practice of power*. Princeton University Press. Fanon, F., 1963. *The wretched of the earth*. New York: Grove Press. Gordon, A.F., 2008. *Ghostly matters: Haunting and the sociological imagination*. University of Minnesota Press. Kelley, R.D., 2002. *Freedom dreams: The black radical imagination*. Beacon Press. Krug, Jessica. 2019. *Fugitive Modernities: Kisama and the Politics of Freedom*. Duke University Press. Mahler, A.G., 2018. *From the Tricontinental to the global South: race, radicalism, and transnational solidarity*. Duke University Press. Said, E.W., 1983. *The world, the text, and the critic*. Harvard University Press. Scott, D., 2004. *Conscripts of modernity*. Duke University Press. Singh, J., 2017. *Unthinking mastery: Dehumanism and decolonial entanglements*. Duke University Press. Steinmetz, G. ed., 2013. *Sociology and empire: the imperial entanglements of a discipline*. Duke University Press.

Assessment: Essay (85%, 4000 words) in the ST.

In-class assessment (15%) in the LT.

15% of the final mark will be given for a presentation during one seminar and participation throughout.

The in-class presentation is a way to ensure participation and a deeper engagement with the material. It also allows students to respond to material in creative ways. This presentation will be collaborative and will explore a particular knowledge object.

We will complete a reading round at the start of each class, during which students will spend a few minutes reflecting on the readings and pointing to any questions they may have raised. Students are expected to participate in this every week, and this is what counts towards participation throughout, which together with an in-class presentation adds to the 15%.

SO4B6 Half Unit Not available in 2020/21

Nature and Technology: More than Human Sociology

This information is for the 2020/21 session.

Teacher responsible: Dr Carrie Friese STC.S213

Availability: This course is available on the MSc in Culture and Society, MSc in Economy, Risk and Society and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The premise of this course is that, to understand social life, we need to go beyond human subjects to also consider our relations with other living species and inanimate things. In this course we will explore how the more than human social world can be theorised, thus providing an alternative to the twin modernist notions of nature as the grounds for society as well as technology as the human construction of the material world. The theorists we will read in this course are largely located

within Science and Technology Studies, and may include: Karen Barad, Vinciane Despret, Donna Haraway, Bruno Latour, Maria Puig de la Bellacasa and/or Isabelle Stengers. Drawing on these theorists, we will ask how entities like cells and microbes or plants and animals or digital and mechanical technologies shape human social life. Examples may be in the fields of: (re) production, infectious diseases, weather and climate, health care provision and/or commodity supply chains. We will explore how more than human perspectives on these processes reshapes sociological understandings of capitalism/post-capitalism, power and biopolitics, humanitarianism and rights, and/or inequalities. Through these theories and empirical case studies, across the course we will ask what it means to be human today, and we will probe the ethics involved in living together in power laden, affective relations with other species and things in remaking the planet.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Essay plan of 1,500 words due in Week 9 of Lent Term. This should include: a provisional thesis statement, an essay outline and an annotated bibliography.

Indicative reading:

- Barad, Karen. (2007) *Meeting the Universe Halfway: Quantum Physics and the Entanglement of Matter and Meaning*. Durham: Duke University Press.
- Chakrabarti, Pratik. (2012) *Bacteriology in British India: Laboratory Medicine and the Tropics*. Rochester: University of Rochester Press.
- Elias, Ann. (2019) *Coral Empire: Underwater Oceans, Colonial Tropics, Visual Modernity*. Durham: Duke University Press.
- Haraway, Donna J. (2016) *Staying with the Trouble: Making Kin in the Chthulucene*. Minneapolis: University of Minneapolis Press.
- Kohn, Eduardo. (2013) *How Forests Think: Toward an Anthropology Beyond the Human*. Berkeley: UC Press.
- Latour, Bruno. (2018) *Down to Earth: Politics in the New Climatic Regime*. Cambridge: Polity.
- Oudshoorn, Nelly. (2016) *Telecare Technologies at the Transformation of Healthcare*. London: Palgrave.
- Puig de la Bellacasa. (2017) *Matters of Care: Speculative Ethics in the More than Human Worlds*. Minneapolis: University of Minneapolis Press.
- Tsing, Anna. (2017) *The Mushroom at the End of the World: On the Possibility of Life in Capitalist Ruins*. Princeton: Princeton University Press.
- Vora, Kalindi and Neda Atanasoski. (2019) *Surrogate Humanity: Race, Robots, and the Politics of Technological Futures*. Durham: Duke University Press.

Assessment: Essay (90%, 4000 words) in the ST.

Class participation (10%) in the LT.

Each student will sign up to lead the seminar discussion on two different weeks. This will be done in groups of 2-3 students. The group is to submit a 500 word plan for the seminar discussion, including introductory comments and discussion question. The best mark from the two will be taken as the summative class participation mark.

S04B7 Half Unit

Lawful Violence: Policing, Militaries and Security

This information is for the 2020/21 session.

Teacher responsible: Dr Mahvish Ahmad, STC.S108

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students on the MSc in Human Rights, MSc Human Rights and Politics and MSc in Political Sociology programmes.

Course content: This course critically investigates lawful violence deployed by police, militaries, and organisations like security

firms and paramilitary outfits. We begin by conceptualizing the relationship between state, law, and violence, paying particular attention to a classical definition of the state as a human community with the legitimate monopoly over violence in a given territory. The course will explore how violence forged state power through wars and colonial conquest, and the relationship between state violence and racial, class, and gendered power. We trace the historical and sociological roots of state-sanctioned, violence-making institutions including state militaries and the police, or paramilitary outfits and private contractors. We also chart the shifting technologies of violence through time and around the world, by looking at regular warfare, drone policing, and surveillance. We learn critiques and responses from communities and movements at the receiving end of state violence, including demands to abolish or defund police, prisons, and militaries. Through this course, students will gain a solid understanding of state violence—and alternative imaginations of political community and justice that fundamentally refigure the place of violence and its relationship to collective life.

Teaching: This course is delivered through a combination of lectures, online materials and seminars, totalling a minimum of 20 hours across LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

The formative assessment will consist of one 800-word research abstract which will form the basis for their summative essay.

Indicative reading:

- Du Bois, WEB. *The African Roots of War*. Atlantic Monthly, May, 1915.

- Scahill, Jeremy. 2007. *Blackwater: The Rise of the World's Most*

Powerful Mercenary Army. Nation Books.

Assessment: Essay (80%, 4000 words) in the ST. Group presentation (10%) and class participation (10%) in the LT. 10% of the final mark will be given for class participation, i.e. for coming to class having read and ready to engage. 10% will be given for a student presentation. Students will present on a chosen, original research topic that will also form a final, summative essay. This encourages students to take active part in the seminar throughout the Lent Term, discuss their ideas intensely with their presentation group, and gain feedback on original research and ideas from the rest of the class. 80% of the final mark will be given for a 4000-word essay on an original research topic to be prepared in Summer Term. The original research topic will draw from the student presentations and will be based on a formative abstract submitted in Lent Term. This mark ensures that students will develop independent intellectual work in relation to the topics covered in class.

SP400 Half Unit

International Social and Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Sunil Kumar OLD.2.55

The course will be taught by a team of faculty members with complementary areas of expertise.

Availability: This course is compulsory on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration) and MSc in International Social and Public Policy (Non-Governmental Organisations). This course is available on the MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses160>

Course content: This course engages with the social and public policy challenges facing states and citizens across the world. It introduces students to core issues, concepts, actors and debates shaping our understanding of social and public policy, its drivers and impacts. It outlines the questions raised by efforts to ensure a healthy, educated and productive population, to protect those without other means of support, and to reduce inequalities of e.g. gender, class, and ethnicity. It discusses diverse policy approaches to these issues, their ideological underpinnings, and the varying configurations of actors involved in the policy process - the state, the market, civil society, the family, and international organisations. The course explores applications to a range of policy domains, such as education, urbanisation, health, family, social care, migration, inequality and redistribution, and to varied country contexts. The course is informed by an international and comparative approach that considers both rich and poor country contexts and international dimensions and locates these within a historical understanding of both national and global processes.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading:

- Beland, D., Shoyama, J., Mahon, R. 2016. Advanced Introduction to Social Policy. Edward Elgar.
- Deacon, B. 2007. Global Social Policy and Governance. Sage.
- Ferguson, J. 2016. Give a Man a Fish: Reflections on the New Politics of Distribution. Duke University Press.
- Fraser, N. 2008. Scales of Justice: Reframing Political Space in a Globalizing World. Polity.
- Gonzalez-Ricoy, I. and Gosseries, A. (eds.) 2016. Institutions for

Future Generations. Oxford University Press.

- Hoppe, R. 2011. The Governance of Problems: Puzzling, Powering and Participation. The Policy Press.
- Hudson, J.R. and Lowe, S.G. 2009. Understanding the Policy Process: Analysing Welfare Policy & Practice. Second Edition. The Policy Press.
- Yeates, N. (ed.) 2014. Understanding Global Social Policy. Second Edition. The Policy Press.

Assessment: Online assessment (100%) in the ST.

SP401 Half Unit

Understanding Policy Research

This information is for the 2020/21 session.

Teacher responsible: Dr Berkay Ozcan OLD.2.33

Availability: This course is compulsory on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is not available as an outside option.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: No Prerequisites.

Course content: This course aims to provide an understanding of issues associated with the research process, in the context of the MSc in International Social & Public Policy. The course includes an examination of philosophical issues underpinning research methods in social policy; the place of different research methods (qualitative and quantitative) in international social & public policy; the use of research; and the role of evidence in informing social & public policy.

This is not a 'how to' methods course. Instead, students will be equipped to become critical readers and users of research. Students will gain an understanding of the role of research in the policy process, and of the philosophical underpinnings of different approaches to ISPP research, both quantitative and qualitative; they will scrutinise which research designs are appropriate for different kinds of policy investigation; and learn to critique the validity of the implications for policy drawn by researchers, given the methods they have used.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to answer a set of broad questions every week, which will be similar to the exam questions and related to the lecture and seminar material covered in that week.

Indicative reading:

- Alan Bryman (2012) Social Research Methods, 4th edition Oxford University Press;
- C Robson & K McCartan (2015) Real world research: A resource for social scientists and practitioner-researchers, 4th edition. Oxford University Press;
- Justin Parkhurst (2016) The Politics of Evidence: From Evidence-Based Policy to the Good Governance of Evidence, Routledge.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the January exam period.

The course is intended to inform the student's dissertation in terms of underpinning issues, concepts, methodological choices and the role of research in social and public policy implementation. Assessment is a final exam comprising questions requiring relatively shorter answers which aims to test the skills outlined above and reflects the breadth of issues covered throughout the

course (100%).

SP403

Academic & Professional Skills Development

This information is for the 2020/21 session.

Teacher responsible: Dr Kitty Stewart OLD 2.36

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is not available as an outside option. Available only to students on Social Policy Programmes.

Course content: The course will consist of 8 workshops in the MT focusing on the development of academic skills (to include effective reading; academic writing; presentation skills; networking skills; time management; and resilience); and 4 workshops in the LT focusing on the development of professional skills, and working in the Social Policy sector.

The course will complement students' academic studies and support them to get the most out of their courses and Programme; while also helping them to make the link between the skills and knowledge they develop during their time at LSE and the opportunities and requirements of a range of careers in Social Policy.

Teaching: 14 hours of lectures in the MT. 6 hours of lectures in the LT.

The course will be delivered through a series of workshops, with associated tasks assigned to students' peer groups (assigned at the start of the academic year).

Assessment:

This course is non-credit bearing, and there is no formal assessment.

SP410 Half Unit

Migration: Current Research, Critical Approaches

This information is for the 2020/21 session.

Teacher responsible: Prof Lucinda Platt (OLD.2.25)

Availability: This course is compulsory on the MSc in International Social and Public Policy (Migration). This course is available on the MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process. <https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: This interdisciplinary course addresses contemporary global migration issues with reference to both developing and developed country contexts, and to different patterns and forms of migration. The course examines the relationship between migration and social and public policies, including the implications for how migrants and migration are conceptualised, for inequalities in the movement of people, for welfare systems, and for the impacts of migration in countries of origin and destination. Teaching across the course integrates critical theoretical approaches to migration with applications using

different migration-related research methods.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students are expected to participate actively in seminars and course activities, to prepare a group presentation, and to write a formative essay linked to their written summative assignment.

Indicative reading:

- Castles, de Haas & Miller (2013) *The Age of Migration*;
- Shachar (2009) *The Birthright Lottery: Citizenship and Global Inequality*;
- Luthra, Platt & Salamonska (2016) "Types of Migration: The Motivations, Composition and Early Integration Patterns of 'New Migrants' in Europe", *International Migration Review*;

- De Genova (2002) "Migrant 'Illegality' and Deportability in Everyday Life", *Annual Review of Anthropology*, 31, 419-47.

Assessment: Coursework (100%) in the LT.

SP411 Half Unit

Social Policy and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Timothy Hildebrandt OLD.2.56, Dr Sunil Kumar OLD.2.55 and Dr Muzafferettin Seckinelgin OLD.2.27

Availability: This course is compulsory on the MSc in International Social and Public Policy (Development). This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process. <https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses> <http://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: No prerequisites.

Course content: This course provides the analytical tools needed to understand and critically evaluate the key practical challenges of social development. A wide range of development contexts will be discussed using empirical research and case studies. Key themes include: linking social policy theory, implementation and practice; making social protection effective; managing sector reform processes; projects and programmes, including design and evaluation; participation and community development; gender analysis; the impact of corporate social responsibility and social enterprises on poverty reduction.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: The formative work on this course is a mock exam. Students will receive feedback on their mock exam from their academic Mentor.

Indicative reading:

- Barrientos, A. and D. Hulme, eds. (2008) *Social Protection for the Poor and the Poorest: Concepts, Policies and Politics*. London: Palgrave Macmillan;
- Dale, R (2004) *Development Planning: Concepts and Tools for Planners, Managers and Facilitators*, Zed Books;

- Thin, N. (2002) *Social progress and sustainable development*. London: ITDG;
- Willis, K. (2005) *Theories and Practices of Development*. London: Routledge.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

SP412 Half Unit

Non-Governmental Organisations, Social Policy and Development

This information is for the 2020/21 session.

Teacher responsible: Prof David Lewis OLD 2.40

Availability: This course is compulsory on the MSc in International Social and Public Policy (Non-Governmental Organisations). This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Students will benefit from having some experience of work within NGOs and/or relevant government departments or donor agencies working with NGOs.

Course content: The course focuses on the specialised field of non-governmental organisations (NGOs) within the field of social policy and development, and considers theoretical and policy issues.

Main topics include the history and theory of NGOs; the changing policy contexts in which NGOs operate; NGO service delivery and advocacy roles in policy; NGO relationships with other institutional actors including government, donors and private sector; challenges of NGO effectiveness and accountability; NGO organisational growth and change; and conceptual debates around civil society, social capital, social movements and globalisation.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will sit a mock exam as their formative work and will receive feedback from their academic Mentor.

Weekly student led seminars which involve discussion of the assigned readings will also help to develop students' critical thinking, reading, and analytical skills

Indicative reading:

- Bebbington, A., Hickey, S. and Mitlin, D. (2008) *Can NGOs Make a Difference?* London: Zed Books;
- Beck, E. (2017) *How Development Projects Persist: Everyday Negotiations With Guatemalan NGOs*. London: Duke.

- Lewis, D. and Kanji, N. (2009) *Non-Governmental Organisations and Development*. London: Routledge;
- Lewis, D. (2014) *NGOs, Management and Development*. London: Routledge.

Assessment: Online assessment (100%) in the ST.

SP413 Half Unit

Understanding Social (Dis)advantage

This information is for the 2020/21 session.

Teacher responsible: Dr. Amanda Sheely OLD 2.52

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Inequalities and Social Science, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Amongst non Social Policy students, priority for places is given to students on the MSc Inequalities and Social Science.

Course content: This course addresses the emergence, maintenance and dynamics of social advantage and disadvantage in different areas of life across different social groups. It explores inequalities in income, poverty & wealth, labour market position, family resources, education, crime, and life chances, with reference to social groups defined according to their gender, ethnicity, as well as citizenship and migration status. It pays specific attention to intersectional, cumulative and relational processes in the reproduction of inequalities.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be required to undertake a formative essay.

Indicative reading: The core text for the course is:

- H Dean & L Platt (eds) 2016. *Social Advantage and Disadvantage*. Oxford University Press.
- Other indicative background reading:
- Milanovic, B. 2016. *Global Inequality*, The Belknap Press.
- McCall, L. (2005). 'The Complexity of Intersectionality'. *Signs: Journal of Women in Culture and Society*, 30(3): 1771–800.160
- Atkinson, A.B. (2015). *Inequality: What can be done?* Harvard University Press.
- Faist, T. (2016) 'Cross-Border Migration and Social Inequalities'. *Annual Review of Sociology*, 42: 323-346.
- Payne, G. (ed.) 2013. *Social Divisions*. Third Edition. Palgrave Macmillan.

Assessment: Essay (100%, 2400 words) in the ST.

The summative assessment for this course comprises an essay in ST. Students must answer two out of seven questions that will be given a week in advance of the due date. The maximum word limit for each question is 1,200 words.

SP414 Half Unit

Ethnicity, Race and Social Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Coretta Phillips OLD.2.28

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Gender, Policy and Inequalities, MSc in International Migration and Public Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Amongst non-SP students, preference will be given first to students on MSc International Migration and Public Policy and MSc Gender, Policy and Inequalities.

Course content: Course looks at: Understanding Key Concepts; Disciplinary Frameworks; Migration and Citizenship, Theorising Multiculturalism; Ethnic Settlement and Housing Inequalities; Education; Employment, Poverty and Underclass; Criminalisation and Incarceration; Discrimination and the Role of the State I: Positive and Affirmative Action; Discrimination and the Role of the State II: Legislative Frameworks, Diversity, and Service Delivery.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Essay 1: 2000 word essay based on course coverage from Weeks 1-5.

Essay 2: 2000 word essay based on course coverage from Weeks 7-11.

Indicative reading:

- Sangeeta, C., Flynn, R. (2019) Understanding 'Race' and Ethnicity: Theory, History, Policy, Practice. Bristol: Policy Press.
- Murji, K. (2017) Racism, Policy and Politics. Bristol: Policy Press.
- Jivraj, S. and Simpson, L. (eds) (2015) Ethnic Identity and Inequalities in Britain: the Dynamics of Diversity. Bristol: Policy Press.
- Goldberg DT (2015) Are We All Postracial Yet?, Cambridge: Polity.
- Bulmer, M. and Solomos, J. (ed.) (1999) Racism. Oxford: Oxford University Press.
- Back, L. and Solomos, J. (eds.) (2000) Theories of Race and Racism: A Reader. London: Routledge.
- Bloch, A., Neal, S. and Solomos, J. (eds) (2013) Race, Multiculture and Social Policy. Basingstoke: Palgrave.
- Bhattacharyya, G, Gabriel, J. and Small, S. (2002) Race and Power: Global Racism in the Twenty-First Century. London: Routledge.

Assessment: Essay (100%, 2000 words) in the LT.

The summative assessment mark (100%) will be the BEST of the two 2000 word formative essays.

SP415 Half Unit

Urbanisation and Social Policy in the Global South

This information is for the 2020/21 session.

Teacher responsible: Dr Sunil Kumar OLD.2.55

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission

as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Some knowledge of or experience of dealing with urban issues is desirable. To apply for a **place** on this course, prospective students will have to **write a 250-word statement** (information will be available on the Moodle page for the course) as to: (i) why they would like to take this course - 50 words; (ii) what they can bring to the course - 125 words, and (iii) how they intend to use the knowledge gained (for example, for their dissertation or future employment or research) - 75 words.

Pre-requisites: Some experience of urban issues in the Global South or North is desirable.

Course content: The course critically explores the challenges and opportunities that urbanisation and urban transformations pose in the social, spatial, economic, institutional and political realms in the urban Global South. A plurality of theoretical and conceptual perspectives informing contemporary policies and planning practices are explored each week.

Some of the themes explored in the course are, urbanisation, urbanism and social change, theories of urbanisation and urban change, internal migration and the rural-urban interface, urban poverty and livelihoods, urban labour markets and livelihoods, urban housing and tenure, urban basic services, urban governance, and urban social movements and collective action. Cross-cutting themes such as gender and the role of civil society are also explored.

Prospective students must be willing to commit themselves to full participation in all aspects of the course, including an element of art. They will be required to read and discuss the essential readings for both the lectures and seminars each week. They are also expected to read more widely and actively participate in the seminars. This course seeks a weekly commitment from students to undertake a non-assessed activity: (i) My_City – a short 500-750-word desk-based piece of research and writing that links key issues emerging from the lecture to a city of their choice with the view to meeting one of the pedagogical aims of this course, namely, linking theory with policy and practice. In addition to Moodle, the course will use other online tools such as Padlet.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

1 In addition to the subject/topic based 160 lectures, there will be two additional lectures on: (i) Dr. Kumar's research (as the course is research led) in week 1 or 2 of LT, and; (ii) on the task for the summative essay (around week 5).

2 Students are required to attend all lectures.

Formative coursework: Students taking this course will have the opportunity to write a 1,000-word formative essay (excluding an abstract and references at the end of the essay) as a draft of the summative essay. The learning pedagogy and learning outcome is to receive feedback on what may become the summative essay. Since the formative is intended to lead to a summative essay, students will not receive a grade but will receive written feedback. The formative essay will have to be submitted in weeks 7-9 of the term in which the course is taught so that timely feedback can be provided. In thinking of the subject matter for the their summative essay, students are required to read widely and will find that undertaking the My_City weekly activities (as set out in the course content) - useful.

Indicative reading: A detailed reading list is provided for each lecture and seminar via the LSE library's electronic reading list. The following is an introductory list of texts in alphabetical order (a number of them are available as e-books via the LSE library).

- Chant, S. (2010) The International Handbook of Gender and Poverty: Concepts, Research, Policy. London: Edward Elgar.
- Hansen, K. T. and A. L. Dalsgaard (2008) Youth and the City in the Global South. Bloomington, Indiana: Indiana University Press.

Assessment: Project (20%, 1000 words) in the LT.

Essay (80%, 5000 words) in the ST.

There are **two summative** assignments for the course; (i) a "**Just Neighbourhood project (JNp)**" - **20%**; and (ii) a **Summative Essay** - **80%**. The following is a short description of the two assignments.

Just Neighbourhood (JNp): This will take the form of a schematic drawing of a JN to incorporate the topics discussed in the course - for instance, migration, poverty, livelihoods, housing and basic services - and a supporting statement of 750-1000 words (20% of the overall grade). This is an in-course piece of work and will be submitted late in the term in which the course is taught. Guidance notes for the JNp and a dedicated marking frame will be available on Moodle.

The Summative Essay: The summative essay for the course must: (i) address an urban issue in the global South or apply a southern perspective to an urban issue in the Global North; and (ii) have relevance for marginalised groups. The grading will reflect: (i) innovation of thought; (ii) application of cultural perspectives as appropriate; and (iii) dovetail theory, policy and practice. The summative essay will be between 4,000-5,000 words long (80% of the overall grade) and is submitted early in the ST.

There are three potential entry points for identifying the subject matter for the essay: (1) an academic critique of an urban policy

(existing or proposed); (2) the identification of an urban issue that does not have a policy but requires one; (3) a critique of a conceptual framework that has been used to address an urban challenge. Students should note that entry points 1-3 are intended as prompts to help them approach the summative essay; thus, any number of starting points could be combined. Those students approaching the essay from starting points 1 and 2 are required to propose broad policy solutions and address key barriers to the adoption of the proposed policy. Those who would like to approach their essay from the perspective of point 3, will have to propose improvements to the conceptual framework being critiqued namely, how the critique changes the 'framing of the problem' and its associated policy implications. Students can also critique urban policy and conceptual frameworks in the global North as long as they use concepts from the global South. In doing so, they are required to suggest policy and conceptual improvements to urban challenges in the global North. This is designed to overcome the North-South divide and foster the transfer of ideas. Students who chose this option will have to demonstrate that the transfer of policy ideas or conceptual critiques, using literature from the urban South to the urban North, are feasible in terms of context, institutions and politics, for instance.

Extensive guidance notes for the summative essay will be available on Moodle.

SP416 Half Unit Not available in 2020/21 International Planning and Children's Rights

This information is for the 2020/21 session.

Teacher responsible: Prof Eileen Munro OLD2.33 and Dr Armine Ishkanian OLD1.13

Availability: This course is available on the MSc in Human Rights, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration) and MSc in International Social and Public Policy (Non-Governmental Organisations). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This is an interdisciplinary course that explores the links between child rights and child poverty at all levels of development in rich and poor countries. The social and economic as well as the civil and political rights of children, as defined in recent international laws, charters and Conventions, are examined in relation to the conditions, especially poverty and multiple deprivation, experienced by many children. Human rights theories as a basis for international and social policies will be a focus of attention. There has to be universal planning and not only specific proposals to deal with serious violations of rights. Issues of child labour, the violations of war, cultural discrimination against girl children and the right to a minimally adequate family income will be discussed in relation to the roles played by international agencies, Trans National Corporations, governments and NGOs.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: H J Steiner & P Alston, International Human Rights in Context, Oxford University Press, 2000; P Townsend & D Gordon (Eds), World Poverty: New Policies to Defeat an Old Enemy, Policy Press, 2002; D Gordon, et al, Child Poverty in the Developing World, Policy Press, 2003; K Watkins, Rigged Rules and Double Standards: Trade, Globalisation and the Fight Against Poverty, London, World Development Movement, 2002; C Chinkin, 'The United Nation Decade for the Elimination of Poverty: What Role for International Law?', Current Legal Problems 2001, Oxford University Press, 2002; M Flekkoy & N Kaufman, The participation rights of the child. Redmond G, 2008, Children's Perspectives on Economic Adversity: A Review of the Literature, Unicef Innocenti Centre, Florence, Discussion Paper.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

SP417 Half Unit Not available in 2020/21 Sexuality, Everyday Lives and Social Policy in Developing Countries

This information is for the 2020/21 session.

Teacher responsible: Dr Timothy Hildebrandt OLD.2.55 and Dr Muzafferettin Seckinelgin OLD 2.27

Availability: This course is available on the MSc in Gender (Sexuality), MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: None

Course content: This course aims to analyse and understand the way social policies deploy sexuality categories in regulating everyday life in developing countries, both in its public and private manifestations. It aims to consider social policy and particular interventions in their historical contexts, as a way of unpacking the construction of sexuality in the intersection of colonialism, gender, race, class and international policy frameworks in developing countries. The course also aims to interrogate the relationship between particular social policy prescriptions developed in most industrialized welfare societies and the way some of these are transferred to developing countries. The major concern of the analysis is to bring out the perceptions of sexuality that underwrite these policies and how these interact with existing perceptions of sexualities and their performances (identities, desires and bodily practices) in multiple developing country contexts. These policy areas include, among others, discussions of rights, entitlements, citizenship, same-sex marriage, sexually transmitted disease, HIV/AIDS, family policies, migration/border controls, criminality and employment-related policies.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be expected to submit a formative essay (2,000 words).

Indicative reading: Aggleton, P., Boyce, P. and Moore, H. (2012) Understanding Global Sexualities: New Frontiers. London: Routledge; Butler, J. (1990) Gender Trouble: Feminism and the Subversion of Identity. New York: Routledge; Canaday, M. (2009) The Straight State: Sexuality and Citizenship. Princeton university

Press; Cornwall, A., Corrêa, S. and Jolly, S. (2008) Development with a Body: Sexuality, Human Rights and Development. London: Zed Book; Correa, S., Petchesky, R. and Parker, R. (2008) Sexuality, Health and Human Rights. London: Routledge; De La Dehesa, R. (2012) Queering the Public Sphere in Mexico and Brazil: Sexual Rights Movements in Emerging Democracies. Duke University Press; Reid, G. and Walker, L. (2005) Men Behaving Differently: South African Men since 1994. Doubleday books; Richey, L. A. (2008) Population Politics and Development: From the policies to the Clinics. London: Palgrave; Stoler, A. L. (2002) Carnal Knowledge and Imperial Power: Race and the Intimate in Colonial Rule. University of California Press; Tamale, S. (2011) African Sexualities: A Reader. Pambazuka Press.

Assessment: Essay (100%, 3000 words) in the LT.

SP418 Half Unit Not available in 2020/21 Global Social Policy and International Organizations

This information is for the 2020/21 session.

Teacher responsible: Dr Hakan Seckinelgin, OLD.2.27

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Global Health Policy, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: What do the, the Catholic Church, Bill and Melissa Gates, UNICEF and the World Bank have in common? They are in one way or another involved in social policy that goes beyond the nation state. Policy could be seen as the exercise of political power and this political power has often been concentrated within the nation state. Far from the traditional study of policy this includes the effect of globalization on a variety of actors in social policy. This course examines how globalization has changed the way we perceive areas such as health, education, social care and other areas that concern social citizenship. The course examines the international policy environment, particularly intergovernmental organisations; bilateral and multilateral aid agencies and non-governmental organizations (NGOs), which influence the social policy environment in developing countries. The impact of the inter-governmental policy process on policy outcomes is examined. The same goes for religious groups, social movements and corporations that all play a role in global social policy. The main goal of the course is not only to open up the understanding of social policy and globalization but also to show the complexity of goals and actors of social policy. It is expected that the students will devote considerable time to reading and preparing for the seminars.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will write a long essay as their formative work for this course.

Indicative reading: A detailed reading list will be presented at the beginning of the term. Some introductory texts include:

B Deacon Global Social Policy and Governance. Sage (2007); R. Baldwin The Great Convergence: Information Technology and The New Globalization. Belnap (2017); H. Seckinelgin The politics of Global AIDS: Institutionalization of Solidarity, Exclusion of Context. Springer (2017); I. Gonzalez-Ricoy and A. Gossies, Institutions for Future Generations. OUP (2016); R Mishra, Globalisation and

the Welfare State, Edward Elgar (1999); D Nayyar, *Governing Globalization: Issues and Institutions*, OUP (2002); V S Peterson & A S Runyan, *Global Gender Issues*, Westview Press (1993). M. Callon, P. Lascoumes, and Y. Barthe, *Acting in an Uncertain World*. The MIT Press (2009). D. Carpenter, *Reputation and Power: Organizational Image and Pharmaceutical Regulation at the FDA*. Princeton (2010).

Assessment: Take-home assessment (100%) in the MT.

SP419 Half Unit

Social Movements, Activism, and Social Policy

This information is for the 2020/21 session.

Teacher responsible: Ms Vanessa Hughes OLD 2.38 and Dr Muzafferettin Seckinelgin OLD 2.27

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The course begins by examining theories of social movements, collective action, and contentious politics. It then moves on to examine how social movements engage with the policy process and the ways in which social movement activism informs social policy formulation and implementation. It examines the nature, past and present roles of social movements and their potential capacity in shaping social policy in developed and developing countries, and in democratic, hybrid, or authoritarian regimes. The course covers theoretical arguments and examines empirical examples and case studies.

The course examines the following topics: the role and impact of social movement activism in identifying and meeting needs; the role of grassroots mobilizations and solidarity; how movements are affected by regulatory frameworks; how and when movements achieve their objectives; movements relations with other actors (including, NGOs, trade unions, political parties, etc.); populism. The course considers the development, transformation, autonomy, interdependence, and probity of social movements. It draws on examples of social movements in different periods, countries, and areas of activity to examine and analyse how change happens and the obstacles to change.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Formative coursework: Students will be expected to participate actively in seminars and to complete one piece of written formative coursework

Indicative reading:

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

SP420 Half Unit

Understanding Policy Research (Advanced)

This information is for the 2020/21 session.

Teacher responsible: Dr Tania Burchardt 32L 3.30

Availability: This course is compulsory on the MPhil/PhD in Social Policy and MSc in International Social and Public Policy (Research). This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration) and MSc in International Social and Public Policy (Non-Governmental Organisations). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: None

Course content: The course equips you with transferable quantitative and qualitative research design skills, including the design of policy evaluations, and an in-depth understanding of the role of different types of research in the social and public policy-making process. It is an advanced course and students are expected to already have a grasp of basic research design principles and their application to social and public policy, for example as covered in MY400 Fundamentals of Research Design or SP401 Understanding Policy Research, both of which run in the MT, although these courses are not a formal pre-requisite. Lectures are given by leading academics engaged in research using the methods under consideration, many of whom have achieved substantial policy impact. Students are encouraged to critically assess applications of complex research methods to contemporary national and international social and public policy questions. Topics may include uses of: mixed methods, policy evaluation; participatory research; researching organisations (including organisational anthropology); longitudinal and life history analysis; micro-simulation techniques; systematic reviews, meta-analysis and meta-ethnographies; and small area, geographical and internationally comparative research. The relationship between research and policymaking is a theme that runs throughout the course.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures and 15 minutes of help sessions in the ST.

The lectures will be given by a member of staff or external expert in that particular method or topic and are followed by a seminar examining research exemplifying the approach and the issues raised. The help sessions are one-to-one tutorial sessions with the seminar leader to discuss feedback on essays and progress on the course.

Formative coursework: There will be one compulsory formative coursework essay, which will follow from a seminar presentation. This formative assignment is designed to prepare students for the summative coursework. Written and/or verbal feedback will be provided.

Indicative reading:

- A Bryman (2016), *Social Research Methods*, 5th edn
- J Parkhurst (2016), *The Politics of Evidence*
- P Alcock et al (eds) (2012), *The Student's Companion to Social Policy*, 4th edn
- K Hendren et al (2018), 'The State of Mixed Methods Research in Public Administration and Public Policy', *Public Admin Rev*, 78: 904-916. doi:10.1111/puar.12981 <https://doi-org.gate3.library.lse.ac.uk/10.1111/puar.12981>

Additional references will be supplied at the start of the course and in lectures.

Assessment: Essay (100%, 2000 words) in the ST.

The summative assessment focuses on assessing students' abilities to devise and justify a research design to address a specified social policy research question. It will consist of two essays of 1000 words each. Students will be given a choice of questions.

SP430 Half Unit Social Security Policies

This information is for the 2020/21 session.

Teacher responsible: Dr Kitty Stewart OLD2.36

Availability: This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The course analyses the purposes, design and impact of social security policies, meaning policies that protect and support household income at times when income from the labour market does not suffice. The need for social security arises both from demographic factors that affect nearly everyone during their life course – childhood, parenthood, old age – and from risk factors that will end up affecting only some – unemployment, sickness and disability.

The course takes a comparative approach, examining differences in the design of social security policies across welfare regimes and drawing on examples from different countries. Students will develop an understanding of the challenges and trade-offs that arise in designing social security policies to meet multiple goals, will further their knowledge about the ways systems function in practice, and will develop the tools for assessing the structure and effectiveness of social security in any given country.

The course will also consider how successfully social security systems are adapting to meeting the challenges of the twenty-first century, including an ageing population, migration, and the changing nature of employment brought about by rapid technological change.

Most of the examples in the lectures and readings relate to higher- and middle-income countries, but the course aims to be of interest and relevance to students from all countries. Students will be encouraged to further their understanding of social security in their country of origin, or another country of their choice, and to draw on this knowledge in classes.

Teaching: 12 hours and 30 minutes of lectures and 15 hours of

seminars in the LT.

Weekly lectures will set the agenda for the week and provide students with an overview of the key issues at stake. Seminars will be made up of two main components. All students will be expected to give a short presentation during the course of the term on an aspect of social security or a recent social security reform in a country they are interested in (perhaps their country of origin). In the remainder of the class, students will debate propositions related to the week's required readings, which will often offer differing perspectives on the topic.

Formative coursework: Students will be required to write one formative essay during the course of the term, which will enable them to deepen their understanding of the course material and practice critical thinking skills in preparation for the summative essay assignment. Written feedback will be given.

Indicative reading:

- R Walker, *Social Security and Welfare: Concepts and Comparisons*, Oxford University Press, 2005;
- J Millar and R Sainsbury (eds), *Understanding Social Security*, 3rd ed. The Policy Press, 2018;
- M Frolich et al, *Social Insurance, Informality and Labor Markets*, Oxford University Press, 2014;
- J Hanlon, A Barrientos and D Hulme, *Just Give Money to the Poor*, Lynne Rienner Publishers, 2010;
- J Hills, *Good Times, Bad Times: The Welfare Myth of Them and Us*, Policy Press, 2014;
- ILO, *World Social Protection Report 2014/15: Building Economic Recovery, Inclusive Development and Social Justice*.

Assessment: Essay (100%, 2500 words) in the LT.

SP431 Half Unit Population Analysis: Methods and Models

This information is for the 2020/21 session.

Teacher responsible: Prof. Michael Murphy, OLD.2.61

Dr Arjan Gjonca

Availability: This course is compulsory on the MSc in Social Research Methods. This course is available on the MSc in Development Studies, MSc in Health and International Development, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research), MSc in Statistics, MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Students should have basic numeracy, but the course does not require advanced mathematical knowledge. Some practical sessions will involve use of the spreadsheet EXCEL. IT Training provides numerous self-paced student supervised workshops on EXCEL and downloadable course guides. Students with no prior experience of EXCEL are advised to attend one of these workshops before the course.

Course content: This course provides an introduction to the key concepts and methods required for population analysis. The course will explain the dynamics of population change and enable students to learn basic methods for measuring population structure and the determinants of population size and change (fertility, mortality and migration). The course will also provide an introduction to population projections and describe and evaluate how demographic data are collected and used. Emphasis is placed on the understanding and interpretation of demographic data, as

well as methods of population analysis.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to complete exercises, write one essay and complete one multiple choice questionnaires during the term.

Indicative reading:

- Demography: Measuring and Modeling Population Processes by S H Preston, P Heuveline and M Guillot, 2001.

This will be used as a reference text in the course. Students may also find it helpful to consult some of the other standard texts available including:

- Essential Demographic Methods by Kenneth W. Wachter, 2014 (recommended);
- Demographic Methods by Andrew Hinde, 1998;
- Demographic Methods and Concepts by Donald Rowland, 2003 (less advanced);
- Methods and Models in Demography by C Newell, 1988 (less advanced).

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

SP432 Half Unit

Education Policy, Reform and Financing

This information is for the 2020/21 session.

Teacher responsible: Dr Amelia Peterson (OLD.2.38) and Prof Anne West (OLD.2.30)

Availability: This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process:

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: This course considers education policy, reform and financing across a range of countries. It uses concepts and tools from a number of academic disciplines – social policy, sociology, economics, politics and philosophy – to scrutinise education. Throughout the course, there is particular focus on equity, social justice and the distribution of resources. Issues to be addressed include: the impact of social characteristics on educational outcomes (class, gender and race and ethnicity, with a cross-cutting focus on special educational needs and ideas of 'inclusion') and related policy reforms; accountability and market-oriented reforms in education; privatisation and the changing role of the state; power and the politics of educational policy making; global policy transfer in education; early years education; school-based education and post-compulsory education; education systems in comparative perspective. Not all of these issues are covered as separate weekly topics.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 3 hours of seminars in the ST.

Formative coursework: One formative essay in LT.

Indicative reading: Specialist lists for each topic will be provided. The following introductory books are recommended:

- Apple, M.W., Ball, S.J., Gandin, L.A. (eds) (2010) The Routledge International Handbook of the Sociology of Education. London: Routledge.
- Arthur, J., Peterson, A. (eds) (2011) The Routledge Companion to Education. London: Routledge.
- Lauder, H., Brown, P., Dillabough, J., Halsey, A.H. (eds) (2006) Education, Globalization and Social Change. Oxford: Oxford

University Press.

- McGrath, S. Gu, Q. (eds) (2015) Routledge Handbook of International Education and Development. London: Routledge.
- Mundy, K., Green, A., Lingard, B., Verger, A. (eds) (2016) The Handbook of Global Education Policy. Oxford: Wiley Blackwell.
- Halsey, A.H., Lauder, H., Brown, P., Wells, A.S. (eds) (1997) Education: Culture, Economy, Society. Oxford: Oxford University Press.

Assessment: Online assessment (100%) in the ST.

SP433 Half Unit

Rural Livelihoods, Development and Social Transformation

This information is for the 2020/21 session.

Teacher responsible: Prof David Lewis OLD.2.40

Availability: This course is available on the MSc in Development Studies, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Knowledge of rural areas and relevant work experience is desirable but not essential. Knowledge of sociological and anthropological approaches to studying rural development also desirable.

Course content: This Course considers: Theories of rural development and transformation, history of rural development policy, changing rural livelihoods, land and agrarian reform, agricultural research and extension, the roles of private and non-governmental actors, natural resource management, food security, climate change and rural-urban linkages.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures and 1 hour and 30 minutes of seminars in the ST.

Formative coursework: A formative 1500 word essay is required, and feedback will be provided.

Indicative reading: A detailed reading list is included in the seminar programme. The following is an introductory reading list:

- J Boltvinik & SA Mann (eds.) Peasant poverty and persistence in the 21st century: theories, debates, realities and policies (2016);
- T M Li, Land's End: Capitalist Relations on an Indigenous Frontier (2014);
- I Scoones & J Thompson, Farmer First Revisited (2009);160
- R McAreavey, Rural Development Theory and Practice (2009);160
- A Shepherd, Sustainable Rural Development (1998);
- B Crow & H Bernstein (Eds), Rural Lives: Crises and Responses (1992);
- N Long, Development Sociology: Actor Perspectives (2001).

Assessment: Essay (100%, 3500 words) in the ST.

Students are required to write an assessed essay of 3,500 words.

SP434 Half Unit

Behavioural Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Adam Oliver OLD.2.33

Availability: This course is available on the MPA Dual Degree

(LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Environmental Economics and Climate Change, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research), MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration, MSc in Regulation, MSc in Social Research Methods and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process. <https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The application of behavioural economics and behavioural science to public policy issues has been, and continues to be, a major theme in the policy discourse internationally. This course offers students a thorough grounding in the theory and findings that define behavioural economics, from the major violations of standard rational choice theory to prospect theory and the theories of human motivation. The course goes on to consider the conceptual policy frameworks that have been informed by behavioural economics, with examples - so-called nudge, shove and budge policies - illustrated so as to highlight how these frameworks are applied in practice. Students will also be exposed to the different behavioural-informed schools of thought that have prescribed divergent paths for public sector governance.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: All students will be required to present work in progress on their summative assignments during seminar class time. In addition, students will be required to present to the course convener a one page plan for their summative assessment, on which they will receive feedback.

Indicative reading:

- J. Le Grand (2006) *Motivation, Agency and Public Policy: of Knights and Knaves, Pawns and Queens*. Revised paperback edition. Oxford: Oxford University Press.
- J. Le Grand (2007) *The Other Invisible Hand: Delivering Public Services through Choice and Competition*. Oxford: Princeton University Press
- R. Thaler and C. Sunstein (2008) *Nudge: Improving Decision about Health, Wealth and Happiness* New Haven: Yale University Press
- Ariely, D. (2008). *Predictably irrational : the hidden forces that shape our decisions*. London, HarperCollins.
- Kahneman, D. (2011) *Thinking, Fast and Slow* London, Allen Lane
- P. Dolan et al (2010) *MindSpace: Influencing Behaviour through Public Policy*. London: Cabinet Office and the Institute for Government.

Assessment: Project (100%).

The summative assessment is a project write-up of 3,000 words, where students design their own behavioural public policies.

SP435 Half Unit Not available in 2020/21 Housing, Neighbourhoods and Communities

This information is for the 2020/21 session.

Teacher responsible: Prof John Hills OLD 2.62

Availability: This course is available on the MSc in City Design and Social Science, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development),

MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: There are no prerequisites to take this course.

Course content: This course introduces MSc students to the links between housing, neighbourhoods and social and public policies, in the context of housing systems in the UK, Europe and North America. It examines: how housing and neighbourhoods have evolved in UK and Europe, and contrasts in the USA; the rise of mass housing estates, the role of government and housing management; housing markets – supply, demand, need and affordability; owner-occupation and taxation; sustaining neighbourhoods through upgrading, and dangers of segregation and gentrification; housing wealth and assets, inheritance and polarisation; private renting, housing benefits and regulation; social housing, subsidies, rents and affordability; community-led and community-based housing; sustainable housing solutions, retrofit, fuel poverty and energy saving. The course uses live case studies to illustrate the main themes.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 3 hours of lectures and 3 hours of seminars in the ST.

There are also organised site/project visits. The course provides many case study examples for students to draw on.

Formative coursework: Students participate actively in seminars, make two class presentations and complete one formative essay, drawing on case study evidence.

Students are invited to join site visits which illustrate key housing themes.

Indicative reading:

- A. Power *Fromhovels to High Rise*, 1993; *Estates on the Edge*, 1999.
- L. Hanley *Estates: a personal history*, 2004.
- J. Hills *Ends And Means: The Future Roles Of Social Housing In England*, 2007.
- A. Power et al. *Jigsaw Cities 2007; Cities for a Small Continent*, 2016.
- R. Lupton et al *Social Policy in a Cold Climate*, 2016.
- H. Glennerster *Understanding the Cost of Welfare* 2017.
- A. Power and B. Provan, *Overcoming the stigma of social housing*, 2018.

Assessment: Exam (66.7%, duration: 2 hours) in the summer exam period.

Essay (33.3%, 2000 words) in the LT.

Essay based on a housing case study or policy initiative

SP436 Half Unit Not available in 2020/21 Basic Education for Social Development

This information is for the 2020/21 session.

Teacher responsible: Prof Anthony Hall OLD2.28

Availability: This course is available on the MSc in Development Management and MSc in Development Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped at 30 students

Pre-requisites: Work experience in a developing country is highly desirable but not essential.

Course content: The course is designed to examine the role of basic education in developing countries as it relates to social development and social policy. Content of the course includes: the history of education and current problems in developing countries, links between basic education and socio-economic development,

primary schooling, decentralization policies, non-formal and vocational education, adult literacy, popular education for grassroots development, environmental education, ICT, and foreign aid in supporting basic education.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: In addition to seminar presentations and the assessed essay, students are required to write an unassessed (formative) essay for the course.

Indicative reading: A Hall & J Midgley, *Social Policy for Development*, 2004, chapter 5; K Watkins, *The Oxfam Education Report*, 2000; UNICEF, *The State of the World's Children: Education*, 2006; UNESCO, *Education For All Global Monitoring Report*, 2010; K Tomasevski, *Education Denied*, 2003; L Kane, *Popular Education and Social Change in Latin America*, 2001; A Banerjee & E Duflo, *Poor Economics*, 2011 (chapter 5); S Graham-Brown, *Education in the Developing World: Conflict and Crisis*, 1991; M Todaro, *Economics for a Developing World*, 2000, chapter 9; H Patrinos & D Ariasingam, *Decentralisation of Education: Demand-Side Funding*, 1997; J Huckle & S Sterling (Eds), *Education for Sustainability*, 1996; L Pritchett *The Rebirth of Education*, 2013; N Selwyn, *Education in a Digital World*, 2013

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2500 words) in the ST.

Students are required to choose a topic of their own interest for the essay.

SP437 Half Unit Not available in 2020/21 International Housing and Human Settlements; Conflicts and Communities

This information is for the 2020/21 session.

Teacher responsible: Prof Anne Power OLD.2.57

Availability: This course is available on the MSc in City Design and Social Science and MSc in Regional And Urban Planning Studies. This course is available as an outside option to students on other programmes where regulations permit.

This is a capped course. If it is oversubscribed places will be allocated by random ballot, first amongst Social Policy students then amongst other students for any remaining places. The first ballot will be held on Tuesday of MT week 1.

Course content: The course is an introduction to the global housing challenges of a fast urbanising world in the context of rapidly growing cities worldwide. There are 5 key themes: the push and pull factors in urban growth; the key actors in housing provision; slums and self-help; the environmental impact of low income settlements; the problems of poverty and exclusion in low income and informal settlements. The course includes 10 lectures in LT and one in ST. The main topics of the lectures are: housing needs and demand; contrasting patterns of housing development; owner occupation, renting and self-help; government intervention and finance; planning and renewal; international agencies, aid and NGOs; bottom-up shelter models and community-led initiatives; social exclusion and urban pressures; basic services and public infrastructure; participation and women's roles in low income settlements; environment of cities; urban and housing design; theories and practice in upgrading urban settlements. Case studies are used to illustrate arguments, policies and practical responses.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures and 3 hours of seminars in the ST.

Additional activity: occasional informal discussion sessions are organised at students' request.

Formative coursework: Students will be expected to participate actively in seminars and to complete one formative essay using case studies to illustrate their arguments. Students are also expected to prepare case studies for the seminar.

Indicative reading: UN (1996), *An Urbanising World*; A Power

(1999), *Estates on the Edge*; Badshah (2006), *Our Urban Future*; D Satterthwaite (1999), *Sustainable Cities*; UNCHS 2001-2014, *The State of the World's Cities*; Doug Saunders, *Arrival City* (2010) Ed Glaeser, *Triumph of the City* (2012) D Satterthwaite and D Mitlin (2013) *Reducing Urban Poverty in the Global South*, D Satterthwaite and D Mitlin (2013) *Urban Poverty in the Global South*.

Environment and Urbanism Journal, 1997-2017

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2000 words) in the ST.

SP439 Half Unit Not available in 2020/21 Social Rights and Human Welfare

This information is for the 2020/21 session.

Teacher responsible: Prof Hartley Dean OLD.2.59

Availability: This course is available on the MSc in Human Rights and MSc in Human Rights and Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is currently capped at 30 places. Offers of places will be made on the basis of applicants' statements. Initial priority for places is given to students on Social Policy MSc programmes and students on the MSc Human Rights. Other students may be accepted onto a waiting list. Places remaining available three days before the start of the course will not be held back for late applicants from the Department of Social Policy or the Human Rights programmes but offered to students from the waiting list.

Pre-requisites: none

Course content: The course will examine the basis of social or welfare rights as a component of human rights. It will situate social/welfare rights in an historical and comparative context and explore a range of debates concerning the relevance and effectiveness of a rights based approach to poverty alleviation and social welfare provision, both in the developed and the developing world. It will address the practical limitations of and the constraints upon social/welfare rights. Specifically, it will address: concepts of social rights and welfare citizenship; human needs and human rights; social/welfare rights in global context; critiques of social/welfare rights as human rights; the scope and substance of social/welfare rights; social/welfare rights and mechanisms of redress; rights based approaches to poverty alleviation; social development and social/welfare rights; constitutional instruments and social/welfare rights; human rights and the ethics of welfare.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the LT. 1 hour of lectures in the ST.

Formative coursework: Students have the option of submitting a formative essay.

Indicative reading: H Dean, *Social Rights and Human Welfare*, Routledge, 2015. Other relevant readings include: H Dean, *Understanding Human Need*, The Policy Press, 2010; A Eide, et al (Eds), *Economic, Cultural and Social Rights: A textbook*, Martinus Nijhoff, 2001; B Turner, *Vulnerability and Human Rights*, Pennsylvania State University Press, 2006; T Pogge (Ed), *Freedom from Poverty as a Human Right*, Oxford University Press, 2007 A Neville (Ed.), *Human Rights and Social Policy*, Edward Elgar, 2010; C Gearty & V Mantouvalou, *Debating Social Rights*, Hart Publishing, 2011.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 1500 words) in the LT.

SP440 Half Unit Not available in 2020/21

Wellbeing and Public Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Paul Frijters 32 LF 2.14 and Dr Christian Krekel 32L 2.24

Availability: This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: None

Course content: The course is structured as follows:

Lecture 1 What is wellbeing and how is it measured?

This lecture will give an overview of the philosophical idea of wellbeing and the current ways to measure it at the individual, organisational, national, and international level.

Lecture 2 The frontiers of wellbeing measurement?

This lecture will go beyond the dominant current approaches to measurement (which are based on subjective responses) and will delve into core aspect of both response theory and biometrics, with an eye on what social policy needs from a measurement.

Seminar 1: Lecture 2: will be complemented with a linked seminar focusing on the basic statistics available to students and researchers in the UK about wellbeing measurement. This includes the Understanding Society databases run by the Office of National Statistics, the British Household Panel, the Birth Cohorts (1946, 1958, 1970, and 2000), and particular databases (Gallup, psychiatric cross-sections).

Lecture 3: What do we know about wellbeing and how it can be changed? We will discuss some of the basic findings of wellbeing research in this lecture, so that students have a reasonable understanding of how wellbeing is affected at the individual level and national level.

Seminar 2: Lecture 3: will be complemented with a linked seminar where particular attention will be paid to:

- 1) The measurement of each of the important individual drivers of wellbeing.
- 2) The measurement of each of the important national drivers of wellbeing.
- 3) Basic statistical manipulations of these measures.

Lecture 4: Wellbeing interventions at the individual level.

In this lecture we take students more in depth through the main results of the wellbeing literature, taking an intervention lens.

Seminar 3: in this seminar we take students through the basics and extended forms of cognitive behavioural therapy, the Incredible Years program, and the methodology of the rat-race.

Lecture 5: Wellbeing interventions in firms and organisations.

In this lecture we take students more in depth through the main results of the wellbeing literature in organisations, taking an intervention lens.

Seminar 4: in this seminar we take students through the main datasets and methodology used to analyse wellbeing inside firms and organisations, drawing heavily on compulsory wellbeing measurements inside the UK civil service (all departments need to measure worker satisfaction and publish this!).

Lecture 6: Wellbeing at the regional level.

Seminar 5: in this seminar we take students through the What Works Centre for Wellbeing website.

Lecture 7: Wellbeing at the national level.

Seminar 6: in this seminar we take students through the key sources of national wellbeing data: the world value survey, the Gallup data sets, and the main national panels.

Lecture 8: The basics of wellbeing cost-effectiveness? Principles and some examples.

This lecture will introduce students to the basic calculus and logic of cost-effectiveness analysis.

Seminar 7: in this seminar we will go much more in depth into each of the 2 simple examples given of cost-effectiveness analysis in the UK and Germany.

Lecture 9: Advanced wellbeing Cost-Effectiveness analysis.

Seminar 8: Lecture 5 will have a linked seminar which goes much more in-depth into the methodology prescribed and used by NICE.

Lecture 10: Wellbeing inside the policy process: UK frontiers.

Seminar 9-10: Students present their current work (10 minutes each) and get feedback (10 minutes each: 5 on presentation, 5 on the preliminary essays) to help them finalise their essays.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Students will be expected to produce a plan for their Summative assessment as their formative work, upon which they will receive feedback.

Assessment: Coursework (100%, 6000 words) in the ST.

Assessment detail:

A report on the changes in wellbeing in a particular (student-specific) area of the UK, using available data (such as aggregated Understanding Society data) from 2010-2017. Students who want to look at a country rather than a UK region can do so, subject to data availability. The students will be required to master basic data such that they can show how wellbeing has changed in the chosen region of the UK, how that change relates to other areas in the UK, and how changes to key inputs into wellbeing have changed in the chosen area and the UK as a whole, using Understanding Society data and (possibly) other sources. It will be open to students to write their assessed report about a non-UK country if they wish, subject to prior agreement with the course convenor that it is feasible to do so (e.g. because of data availability considerations). Students need to show they have understood the course material by analysing and discussing the likely contributors to the changes in wellbeing in their chosen region (or non-UK country), culminating in the provisions of conclusions about the sustainability and likely trajectory of the changes, as well as about potential optimal policy reactions.

This summative essay will be due in the ST.

SP441 Half Unit**Politics of Social Policy: Welfare and Work in Comparative Perspective****This information is for the 2020/21 session.****Teacher responsible:** Dr Timo Fleckenstein OLD.2.60

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Comparative Politics, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Sociology, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The course explores the politics of social policy in advanced political economies. In the first part of the course, the main analytical approaches for the cross-national analysis of welfare states are introduced (such as the industrialism thesis, the power resources model, new institutionalism, feminist theory and the globalisation thesis). These will be examined in the context of the rise of modern welfare states and their transformations since the end of the 'Golden Age' in the mid-1970s. These analyses and the theoretical approaches to cross-national study of welfare states will be harnessed in the second part of the course when the focus shifts towards more recent policy developments since the 1990s. The empirical focus is on the welfare-and-work nexus. The course analyses the development of labour market and family policies in Nordic countries, Continental Europe, Anglo-phone countries and East Asia.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Seminar members will be expected to make presentations to the seminar, and submit a formative essay of 1,500 words.

Indicative reading:

- Bonoli, Giuliano, and Natali, David, eds. (2012) *The Politics of the New Welfare State*, Oxford: OUP.
- Castles, Frances G. et al., eds. (2010) *The Oxford Handbook of the Welfare State*, Oxford: OUP.
- Clasen, Jochen, and Clegg, Daniel, eds. (2013) *Regulating the Risk of Unemployment: National Adaptations to Post-Industrial Labour Markets in Europe*, Oxford: OUP.
- Kersbergen, Kees van and Vis, Barbara (2013) *Comparative Welfare State Politics: Development, Opportunities, and Reform*, Cambridge: CUP.
- Lewis, Jane (2009) *Work-Family Balance, Gender and Policy*, Cheltenham: Edward Elgar

Assessment: Essay (100%, 3000 words).

SP470**Criminal Justice Policy****This information is for the 2020/21 session.****Teacher responsible:** Professor Coretta Phillips OLD 2.28

Availability: This course is compulsory on the MSc in Criminal Justice Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process:

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Amongst non-Social Policy students, if there are places available, priority will be given to those on the Master of Laws and Master of Laws (extended part-time study).

Course content: The course provides a detailed and critical introduction to the study of criminal justice institutions, practices and participants.

It begins with an introduction to the nature of crime and contemporary criminal justice policy. It then examines the main elements of modern criminal justice systems (police, courts, prisons, probation, the media, and private security).

Special emphasis is given to current issues such as restorative justice and increasing rates of incarceration. The course combines up-to-date empirical work with theoretical perspectives and also emphasises the role of historical and comparative perspectives in understanding current trends.

Teaching: 15 hours of lectures and 4 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a reading week in Weeks 6 of MT and LT.

Formative coursework: MT - 2000 word formative essay and one-to-one feedback.

ST - Mock exam (one question).

Indicative reading: Liebling, A., Maruna, S. and McAra, L. (eds.) (2017) *The Oxford Handbook of Criminology*. Sixth Edition. Oxford: Oxford University Press. Newburn, T. (2017) *Criminology*. Third Edition. London: Routledge. McLaughlin, E. and Newburn, T. (eds.) (2010) *The Sage Handbook of Criminological Theory*. London: Sage. Downes, D., Rock, P., and McLaughlin, E. (2016) *Understanding Deviance: A Guide to the Sociology of Crime and Rule-Breaking*. 7th Edition. Oxford: Oxford University Press. Newburn, T. (ed.) (2009) *Key Readings in Criminology*. Cullompton: Willan Publishing.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2000 words) in the ST.

SP471 Half Unit Not available in 2020/21**Issues in Contemporary Policing****This information is for the 2020/21 session.****Teacher responsible:** Prof Tim Newburn OLD 2.40a

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

While not specifically counting towards a specialism on the LLM, this course would complement the following specialisms:

Criminology and Criminal Justice, Legal Theory and Public Law.

Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction to the subject in: Newburn, T. (2017) *Criminology*, London: Routledge, 3rd Edition

Course content: The flourishing sub-discipline of 'police studies' reflects the increasing centrality of policing in political debate and popular culture, and as a major concern of government policy. This course aims to familiarise students with the formidable volume of research knowledge that has now been built up. The course will enable students to understand the development and functioning of police organisations as well as providing them with an understanding of some of the key issues and debates affecting contemporary policing. The topics covered will include: the role and purposes of policing; the media and policing; governance and legitimacy; integrity and corruption; and policing and (in)equality.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be required to write and submit two pieces of formative coursework. The first will be an essay outline - in effect an outline of an answer to a potential examination question, including a full introductory paragraph. The second will be a written assessment of a published book review - as the basis for the summative work to come.

Indicative reading: Bittner, E. (1990) *Florence Nightingale in pursuit of Willie Sutton*, in *Aspects of Police Work*, Boston: Northeastern University Press. Bowling, B., Phillips, C. and Parmar, A. (2008) 'Policing ethnic minority communities' in Newburn, T. (ed) *Handbook of Policing*, Cullompton: Willan. Dick, M., Silvestri, M. and Westmarland, L. (2013) *Women police: potential and possibilities for police*, in J. Brown (ed.) *The Future of Policing* London: Routledge. Greer, C. and R. Reiner (2012): 'Mediated Mayhem' in M. Maguire et al *The Oxford Handbook of Criminology* Oxford University Press. Newburn, T. (ed) (2008) *Handbook of Policing*, Second Edition, Cullompton: Willan. Newburn, T. (ed) (2004) *Policing: Key Readings*, Cullompton: Willan. Reiner, R. (2010) *The Politics of the Police*, Oxford: Oxford University Press. Reiner, R. (2013) *Who Governs? Criminology and Criminal Justice* 13/2: 161-180. Silver, A. (1967) 'The demand for order in civil society', in D. J. Bordua (ed) *The Police: Six Sociological Essays*, New York: Wiley. Banton, M. (1964) *The policeman in the community*, London: Tavistock. Knutson, J. and Tompson, L. (2017) *Advances in Evidence-based Policing*, London: Routledge. Lum, C. and Koper, C. (2017) *Evidence-based policing: Translating theory into practice*, New York: OUP. Monkkonen, E. (1982) *From cop history to social history: The significance of police in American history*, *Journal of Social History*, 15, 575-91. Newburn, T. (1999) *Understanding and preventing police corruption*, London: Home Office. Reuss-Ianni, E. and Reuss-Ianni, F. (1983) *Street cops and management cops: the two cultures of policing*, in Punch, M. (ed) *Control in the Police Organization*, Cambridge: MIT Press. Skolnick, J. (1994) *A Sketch of the policeman's working personality*, in *Justice Without Trial*, New York: Wiley. Styles, J. (1987) *The emergence of the police - explaining police reform in eighteenth and nineteenth century England*, *British Journal of Criminology*, 27, 1, 15-22. Zimring, F. (2017) *When Police Kill*, New York: OUP

Assessment: Essay (80%, 3000 words) in the LT.

Project (20%, 1000 words) in the MT.

The summative assessment will comprise a 3,000 essay involving a critical assessment of a minimum of two substantive issues covered in the course (80%), and a 1,000 word book review (20%).

SP472 Half Unit Not available in 2020/21 Illegal Drugs and Their Control: Theory, Policy and Practice

This information is for the 2020/21 session.

Teacher responsible: Dr Michael Shiner OLD.2.34

Availability: This course is available on the LLM (extended part-

time), LLM (full-time), MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research) and MSc in Regulation.

This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Some familiarity with criminology or sociology is preferable but not essential

Course content: This multi-disciplinary course draws on sociology, psychology, criminology and law to examine the place and meaning of illegal drug use in late modern societies and associated policy responses. It begins by considering drug use and subcultural formations; the 'normalisation' of drug use; drug tourism; the role of addiction; and the organisation of drug markets. It then goes on to consider the making of drugs policy; drugs, policing and the law; treatment and harm reduction; drugs as a development and human rights issue; decriminalisation and alternatives to prohibition.

Teaching: 15 hours of lectures, 15 hours of lectures and 1 hour and 30 minutes of workshops in the LT.

An essay writing skills workshop is run during reading week.

Formative coursework: Students will be expected to submit a formative essay (2,000 words) upon which they will receive feedback.

Indicative reading: Aldridge, J., Measham, F., and Williams, L. (2011) *Illegal Leisure Revisited: Changing Patterns of Alcohol and Drug Use in Adolescents and Young Adults*, London: Routledge. Bean, P. (2008) *Drugs and Crime*, Cullompton: Willan. R. Hughes, R. Lart., and P. Higate (2006) *Drugs: Policy and Politics*, Maidenhead: Open University press. Klein, A. (2008) *Drugs and the World*, London: Reaktion. MacCoun, R.J., and Reuter, P. (2001) *Drug War Heresies: Learning from Other Vices, Times and Places*, Cambridge: Cambridge University Press. Shiner, M. (2009) *'Drug Use and Social Change: The Distortion of History*, Basingstoke: Palgrave Macmillan. M. Simpson, T. Shildrick and R. MacDonald (2007) *Drugs in Britain: Supply, Consumption and Control*, Basingstoke: Palgrave MacMillan. Stevens, A. (2011) *Drugs Crime and Public Health: The Political Economy of Drug Policy*, London: Routledge.

Assessment: Essay (100%, 3000 words) in the LT.

SP473 Half Unit Policing, Security and Globalisation

This information is for the 2020/21 session.

Teacher responsible: Prof Tim Newburn OLD 2.40a

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

While not specifically counting towards a specialism on the LLM, this course would complement the following specialisms: Criminology and Criminal Justice, Legal Theory and Public Law.

Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction in: Newburn, T. (2017) *Criminology*, London: Routledge, 3rd Edition

Course content: The sub-discipline of police studies is now well-established and is flourishing. Whilst much traditional policing scholarship has focused on policing within particular societies, increasingly attention is being drawn to both international and comparative matters. Indeed, the social and economic changes associated with globalisation have affected policing as all else. This course will focus on transnational public and private policing, and on the issues and challenges raised by globalisation: from the policing of transitional societies and emergent democracies, the problems of drugs control and the policing of migration, to new social movements and the policing of public order.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be asked to submit one piece of formative coursework: an essay outline - in effect an outline answer to the longer summative essay, including a full introductory paragraph.

Indicative reading:

- Bowling, B. and Sheptycki (2012) *Global Policing* London: Sage
- Brodeur, J-P (2010) *The Policing Web*, New York: OUP
- Newburn, T. (ed) (2008) *Handbook of Policing*, Second Edition, Cullompton: Willan (in process of updating)
- Newburn, T. (ed) (2004) *Policing: Key Readings*, Cullompton: Willan
- Newburn, T. (ed) (forthcoming) *Policing: Critical Concepts in Criminology*, London: Routledge (4 vols)
- Reiner, R. (2010) *The Politics of the Police*, Fourth Edition, Oxford: Oxford University Press (new edition in 2017/18)

Additional Reading:

- Andreas, P. and Nadelmann, E. (2006) *Policing the Globe: Criminalization and crime control in international relations*, New York: OUP
- Johnston, L. (2006) *Transnational security governance*, in Wood, J. and Dupont, B. (eds) *Democracy, Society and the Governance of Security*, Cambridge: CUP
- Nadelmann, E. (1993) *Cops across borders: the internationalisation of US law enforcement*. Pennsylvania State University Press
- Reiner, R. (1992/2004) *Policing a postmodern society*, in Newburn, T. (ed) *Policing: Key Readings*, Cullompton: Willan
- O'Malley, P. (1997/2004) *Policing, politics and postmodernity*, in Newburn, T. (ed) *Policing: Key Readings*, Cullompton: Willan
- Sheptycki, J. (1995) 'Transnational policing and the makings of a postmodern state'. *British Journal of Criminology*, 35:613-35
- Sheptycki, J. (1998) 'Policing, postmodernism and transnationalisation'. *British Journal of Criminology*, 38: 485-503
- Sheptycki, J (ed.) (2000) *Issues in Transnational Policing*. London: Routledge

Assessment: Essay (80%, 3000 words) in the ST. Coursework (20%, 1000 words) in the LT.

The summative assessment will comprise a 3,000 word essay involving a critical assessment of two substantive issues covered in the course (80%), and a 1,000 word critique of a selected piece of policing research

SP475 Half Unit Riots, Disorder and Urban Violence

This information is for the 2020/21 session.

Teacher responsible: Tim Newburn (OLD 240a)

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public

Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction to the subject in: Newburn, T. (2017) *Criminology*, London: Routledge, 3rd Edition.

Course content: This course focuses on urban or collective violence, or what more colloquially tend to be referred to as 'riots'. The course will consider the various approaches that have been taken to this subject - via history, psychology and sociology - and, focusing on particular examples, the course will examine some of the core issues in the field including: the causes of riots; psychological versus sociological explanations; the role of race/ethnicity; the impact of traditional and new social media on the nature and organisation of rioting; the role and changing nature of the policing of urban disorder; and how riots might be understood both historically and comparatively.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be required to write and submit two pieces of formative coursework for assessment and peer feedback. The first will be an essay outline - in effect an outline of a answer to a potential examination question, including a full introductory paragraph. The second will be an outline of their intended case study. Both pieces of formative coursework will be shared via Moodle and all students will be encouraged to offer constructive feedback to each other as well, of course, as receiving feedback from the course director. Peer feedback will be utilised as a means of encouraging a degree of group work and collective endeavour among course participants.

Indicative reading:

- Baldassare, M. (1995) *The Los Angeles Riots: Lessons for the Urban Future*, Boulder: CO
- Bergenson, A. and Herman, M. (1998) *Immigration, race and riot: The 1992 Los Angeles uprising*, *American Sociological Review*, 63, 1, 39-54

- Mason, P. (2013) *Why It's Still Kicking Off Everywhere*, London: Verso
- Newburn, T., Cooper, K., Deacon, R. and Diski, R. (2015) 'Shopping for Free'? Looting, consumerism and the 2011 riots, *British Journal of Criminology*, 55 (5): 987-1004
- Reicher, S. (1996) 'The Battle of Westminster': developing the social identity model of crowd behaviour in order to explain the initiation and development of collective conflict, *European Journal of Social Psychology*, 26, 115-134
- Scarman, Lord Justice (1982) *The Brixton Disorders*, Harmondsworth: Penguin
- Waddington, D., Jones, K. and Critcher, C. (1989) *Flashpoints: Studies in Public Disorder*, London: Routledge
- Waddington, D. and King, M. (2005) The disorderly crowd: From classical psychological reductionism to socio-contextual theory – The impact on public order policing strategies, *Howard Journal*, 44, 5, 490-503

Assessment: Coursework (80%) and presentation (20%).

The coursework (80%) will comprise a single summative essay offering an analytical case study of a modern riot and the presentation (20%) will comprise a poster presentation at an end of term mini academic conference.

SP476 Half Unit Punishment and Penal Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Leonidas Cheliotis OLD 2.51

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: None.

Course content: This course runs as a half-unit option, and explores punishment and penal policy from a range of comparative perspectives. Focusing on Anglophone jurisdictions and the rest of the world in equal measure, the course considers in depth a wide variety of historical and international comparative studies of punishment and penal policy, both from the field of criminology and beyond. In so doing, the course critically examines theoretical frameworks and empirical research on such issues as:

- the forms state punishment has assumed over time and in different national and regional contexts;
- the array and relative significance of the reasons why punishment and penal policy may develop, qualitatively as well as quantitatively, in particular ways at given historical junctures and in different jurisdictions;
- the relationship between political systems and punishment, with particular reference to processes of democratisation;
- the links between penal policy and different forms of economic organisation, from preindustrial capitalism to welfare capitalism and neoliberalism; and
- the role of punishment in society as explained through psychosocial theories and research

Thanks to its substantive foci and broad comparative approach, the course enhances provision in the School in the field of penology (e.g., the course 'Explaining Punishment: Philosophy, Political Economy, Sociology' (LL4CL), taught by Professors Lacey and Ramsay in the Law Department).

Indicative course content:

- 1 The Contours of State Punishment
- 2 Continuity and Change in Punishment and Penal Policy: Historical Comparative Perspectives
- 3 Convergences and Contrasts in Punishment and Penal Policy: International Comparative Perspectives
- 4 Political Systems and Punishment, Part I: Democracy
- 5 Political Systems and Punishment, Part II: Democratisation
- 6 Reading Week
- 7 The Political Economy of Punishment: Marxist and Neo-Marxist Perspectives from the Global North and the Global South
- 8 Punishment, Politics and the Economy: Institutional Perspectives from around the World
- 9 The Cultural Uses of Punishment
- 10 The Emotional Lives of Punishment
- 11 Cultural Representations of Punishment

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will be required to submit a 1,500-word essay on one of the topics addressed in the course. Formative coursework will be designed to feed into later summative assessments, giving students an opportunity to develop critical thinking and presentational skills.

Indicative reading:

- Alexander, M. (2010) *The New Jim Crow: Mass Incarceration in the Age of Colorblindness*. New York and London: The New Press.
- Brown, M. (2009) *The Culture of Punishment: Prison, Society, and Spectacle*. New York and London: New York University Press.
- Dumm, T. L. (1987) *Democracy and Punishment: Disciplinary Origins of the United States*. Madison, WI: The University of Wisconsin Press.
- Garland, D. (1985) *Punishment and Welfare: A History of Penal Strategies*. Aldershot, UK: Gower.
- Gottschalk, M. (2014) *Caught: The Prison State and the Lockdown of American Politics*. Princeton, NJ: Princeton University Press.
- Karstedt, S. (ed.) (2009) *Legal Institutions and Collective Memories*. Oxford: Hart.
- Lacey, N. (2008) *The Prisoners' Dilemma: Political Economy and Punishment in Contemporary Democracies*. Cambridge: Cambridge University Press.
- McBride, K. (2007) *Punishment and Political Order*. Ann Arbor, MI: The University of Michigan Press.
- Reiner, R. (2007) *Law and Order: An Honest Citizen's Guide to Crime and Control*. Cambridge: Polity.
- Salvatore, R. D., Aguirre, C. and G. M. Joseph (eds) (2001) *Crime and Punishment in Latin America: Law and Society since Colonial Times*. Durham, NC: Duke University Press.

Assessment: Essay (100%, 3000 words).

A 3000 essay on one of the substantive topics covered and a presentation to demonstrate critical appreciation of a specific theoretical argument or empirical study.

SP498 Criminal Justice Policy - Long Essay

This information is for the 2020/21 session.

Teacher responsible: Prof Leo Cheliotis, OLD 2.51

Availability: This course is compulsory on the MSc in Criminal Justice Policy. This course is not available as an outside option. Those taking the course part-time must submit the dissertation in their second year.

Course content: The objective is to write an original dissertation on an approved topic in the field. The selection of the topic is a matter primarily for the student, though the approval of the supervisor is needed for topic registration.

Teaching: 4 hours of lectures in the MT. 10 hours of lectures in the LT.

The designated supervisor should discuss the selection of the

topic and its title with the student, advise about preliminary reading, methods and broad analytical approach; and comment on the draft version. At their discretion, supervisors may give additional advice and comments

Assessment: Dissertation (100%, 10000 words).

Dissertations should be no more than 10,000 words in length, excluding notes and appendices and should be typed. Formal titles should be registered with the Course Director in early December.

SP499

Dissertation - International Social & Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Isabel Shutes OLD 2.58 and Dr Sonia Exley OLD 2.46

Availability: This course is compulsory on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is not available as an outside option.

Course content: The 10,000 word dissertation enables students to analyse in greater depth an issue relevant to their international social & public policy programme.

Students on the Development, Migration or Non-Governmental Organisations ISPP streams are expected to complete dissertations on topics related to their stream, or they may not qualify for the stream Degree for which they are registered. Dissertations of students on the ISPP (Research) stream are required to be based on empirical quantitative or qualitative research, except by permission of the programme director.

Teaching: 4 hours of lectures in the MT. 10 hours of lectures in the LT.

Academic Mentors will provide regular supervision and feedback throughout the three terms (MT, LT and ST).

Formative coursework: The area of study is defined by the student, in consultation with their Academic Mentor. An Academic Mentor is appointed to supervise each student. Students will discuss an outline proposal with their Mentor and submit their outline to the Programme Support Office in the Lent Term. The Mentor will provide regular supervision and feedback.

Assessment: Dissertation (100%, 10000 words) in September. Dissertations should be no more than 10,000 words in length (100% of this unit), excluding the bibliography.

ST405 Half Unit

Multivariate Methods

This information is for the 2020/21 session.

Teacher responsible: Dr Yunxiao Chen

Availability: This course is available on the MPhil/PhD in Statistics, MSc in Data Science, MSc in Marketing, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212) and Probability, Distribution Theory and Inference (ST202).

Course content: An introduction to the theory and application of modern multivariate methods used in the Social Sciences: Multivariate normal distribution, principal components analysis,

factor analysis, latent variable models, latent class analysis and structural equations models.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 28 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Coursework assigned fortnightly and returned to students via Moodle with comments/feedback before the computer workshops.

Indicative reading: D J Bartholomew, F Steele, I Moustaki & J Galbraith, Analysis of Multivariate Social Science Data (2nd edition); D J Bartholomew, M Knott & I Moustaki, Latent Variable Models and Factor Analysis: a unified approach; C Chatfield & A J Collins, Introduction to Multivariate Analysis; B S Everitt & G Dunn, Applied Multivariate Data Analysis; K.V. Mardia, J.T. Kent and J.M. Bibby, Multivariate Analysis.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST409 Half Unit

Stochastic Processes

This information is for the 2020/21 session.

Teacher responsible: Prof Umut Cetin

Availability: This course is compulsory on the MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Operations Research & Analytics, MSc in Risk and Finance, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212).

Good undergraduate knowledge of distribution theory

Course content: A broad introduction to stochastic processes for postgraduates with an emphasis on financial and actuarial applications. The course examines Martingales, Poisson Processes, Brownian motion, stochastic differential equations and diffusion processes. Applications in Finance. Actuarial applications.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Indicative reading: T Bjork, Arbitrage Theory in Continuous Time; T Mikosch, Elementary Stochastic Calculus; S I Resnick, Adventures in Stochastic Processes; B K Oksendal, Stochastic Differential Equations: An Introduction with Applications, D Williams, Probability with Martingales.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST411 Half Unit

Generalised Linear Modelling and Survival Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Jouni Kuha COL.8.04

Availability: This course is compulsory on the MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics)

(Research). This course is available on the MPhil/PhD in Statistics, MSc in Data Science, MSc in Marketing, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Mathematics to the level of Mathematical Methods (MA100) and probability to the level of Probability, Distribution Theory and Inference (ST202). Some knowledge of linear regression.

Course content: An introduction to the theory and application of generalised linear models for the analysis of continuous, categorical and count data, and regression models for survival data. Topics include: general theory of regression and generalised linear models, linear regression, logistic regression for binary data, models for ordered and unordered (nominal) responses, log-linear models for count data and contingency tables, and models for survival (duration) data. The R software package will be used in computer workshops.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Answers to questions based on theoretical and data analysis exercises can be submitted for formative feedback.

Indicative reading: Dobson, A.J. & Barnett, A.G. (2002) *An Introduction to Generalised Linear Modelling*. 2nd edition. Chapman & Hall. McCullagh, P. & Nelder, J.A. (1989) *Generalized Linear Models*. 2nd edition. Chapman & Hall. Agresti, A. (2015) *Foundations of Linear and Generalized Linear Models*. Wiley [Available as electronic resource from LSE library]. Hosmer, D.W. & Lemeshow, S. (1999) *Applied Survival Analysis, Regression Modeling of Time-to-Event Data*. Wiley. Long, J.S. and Freese, J. (2006) *Regression Models for Categorical Dependent Variables Using Stata*. 2nd edition. Stata Press.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Continuous assessment (20%) in the MT.

ST416 Half Unit Multilevel Modelling

This information is for the 2020/21 session.

Teacher responsible: Professor Irini Moustaki

Availability: This course is available on the MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and statistical theory, including linear regression and logistic regression.

Course content: A practical introduction to multilevel modelling with applications in social research. This course deals with the analysis of data from hierarchically structured populations (e.g. student nested within classes, individuals nested within households or geographical areas) and longitudinal data (e.g. repeated measurements of individuals in a panel survey). Multilevel (random-effects) extensions of standard statistical techniques, including multiple linear regression and logistic regression, will be considered. The course will have an applied emphasis with computer sessions using appropriate software (e.g. Stata).

Teaching: This course will be delivered through a combination of

computer classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Coursework assigned fortnightly and returned to students via Moodle with comments/feedback before the computer lab sessions.

Indicative reading: T Snijders & R Bosker *Multilevel Analysis: an Introduction to Basic and Advanced Multilevel Modelling*, Sage (2011, 2nd edition); S Rabe-Hesketh & A Skrondal, *Multilevel and Longitudinal Modeling using Stata*, (Third Edition), Volume I: Continuous responses (plus Chapter 10 from Volume II, which is available free on the publisher's website). Stata Press (2012); H Goldstein, *Multilevel Statistical Models*, Arnold (2003, 3rd edition); S W Raudenbush & A S Bryk, *Hierarchical Linear Models: Applications and Data Analysis Methods*, Sage (2002).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST418 Half Unit Not available in 2020/21 Non-Linear Dynamics and the Analysis of Real Time Series

This information is for the 2020/21 session.

Teacher responsible: Prof Leonard Smith PEL.4.01C

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: It is recommended that students have completed Time Series (ST422).

Course content: An introduction to the analysis of actual time series observations of real-world processes. The course casts both modern nonlinear methods and more traditional linear methods in a geometric approach. It introduces the properties of nonlinear mathematical models, covers chaos and the dynamics of uncertainty, and demonstrates the fundamental limitations in applied analysis which arise from model inadequacy. Fundamental aspects of predictability are addressed. Decision support under uncertainty is considered, with examples of economic impacts of forecasting, including weather and climate. The student will leave with a toolkit for the analysis and modelling of real data, with insights into how to evaluate which methods to employ (linear/non-linear, deterministic/stochastic) in a given problem, how to interpret the results in context, and how to avoid over interpreting nice theorems in practical circumstances. Concrete applications in economics (price time series, electricity demand, energy futures) and environment (weather, climate) as well as analytically tractable illustration from mathematics are considered.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT. 1 hour of lectures in the ST.

Week 6 will be used as a reading week.

Indicative reading: K Beven, *Environmental Modelling: An uncertain Future?* Routledge (2009); H Kantz & T Schreiber, *Non-linear Time Series Analysis*; E Ott, T Sauer & J A Yorke (Eds), *Coping with Chaos: Analysis of Chaotic Data and The Exploitation of Chaotic Systems*; E Ott, *Chaos in Dynamical Systems*; R Tsay, *Analysis of Financial Time Series*; L.A. Smith, *Chaos: A Very Short Introduction*. Oxford University Press (2007)

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Project (30%) in the ST.

ST422 Half Unit

Time Series

This information is for the 2020/21 session.

Teacher responsible: Prof Wai-Fung Lam

Availability: This course is compulsory on the MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available on the MSc in Applicable Mathematics, MSc in Data Science, MSc in Econometrics and Mathematical Economics, MSc in Financial Mathematics, MSc in Marketing, MSc in Operations Research & Analytics, MSc in Quantitative Methods for Risk Management, MSc in Statistics and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Good undergraduate knowledge of statistics and probability.

Course content: A broad introduction to statistical time series analysis for postgraduates: what time series analysis can be useful for; autocorrelation; stationarity; causality; basic time series models: AR, MA, ARMA; ARCH and GARCH models for financial time series; trend removal and seasonal adjustment; invertibility; spectral analysis; estimation; forecasting. We will also discuss nonstationarity and multivariate time series if time permits.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 25 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas. Exercises will be given out to do at home during Week 6.

Formative coursework: Weekly exercises will be given.

Indicative reading: Brockwell & Davis, Time Series: Theory and Methods; Brockwell & Davis, Introduction to Time Series and Forecasting; Box & Jenkins, Time Series Analysis, Forecasting and Control; Shumway & Stoffer, Time Series Analysis and Its Applications.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the MT.

The course will be assessed by an examination (80%) and a coursework (20%) involving case studies which will be submitted in MT.

ST425

Statistical Inference: Principles, Methods and Computation

This information is for the 2020/21 session.

Teacher responsible: Dr Wicher Bergsma COL.6.06

Availability: This course is compulsory on the MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available on the MRes/PhD in Management (Marketing) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and statistics to the equivalent level of ST102 Elementary Statistical Theory.

Course content: The course provides a comprehensive coverage of fundamental aspects of methods and principles in probability and statistics, as well as linear regression analysis. Real data illustrations with the statistical package R forms an integral part of the course, providing a hands-on experience in simulation and data analysis.

Teaching: 38 hours of lectures, 15 hours of seminars and 10 hours

of computer workshops in the MT.

This course will be delivered through a combination of classes and lectures totalling a minimum of 60 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course does not include a reading week, instead Week 11 will be used as a revision week.

Formative coursework: Students will complete weekly assessed problem sheets. They will also complete R practice exercises following instructions from the weekly computing workshop.

Indicative reading: L. Wasserman, All of Statistics. Y. Pawitan, In All Likelihood. K. Knight, Mathematical Statistics. A. Zuor et al., A Beginner's Guide to R. (Available online from LSE Library.). N. Venables et. al., An Introduction to R (<http://cran.r-project.org/doc/manuals/R-intro.pdf>)

Assessment: Exam (85%, duration: 3 hours) in the January exam period.

Project (15%) in the MT.

ST426 Half Unit Not available in 2020/21

Applied Stochastic Processes

This information is for the 2020/21 session.

Teacher responsible: Dr Erik Baurdoux COL.6.04

Availability: This course is available on the MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course builds on material discussed in ST409 (Stochastic Processes). In particular, elements of the general theory of semi-martingales will be covered and emphasis will be given on presenting a variety of models involving processes with general dynamics, including jumps. The theory will be applied to a range of topics in mathematical finance and insurance, as well as financial economics.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

Week 6 will be used as a reading week; exercises will be given out to students to do at home.

Formative coursework: A set of coursework similar to the exercises that will appear in the exam will be assigned. Additional formative exercise will be available through Moodle.

Indicative reading: Brownian Motion and Stochastic Calculus.

Ioannis Karatzas and Steve Shreve. Numerical Solution of Stochastic Differential Equations with Jumps in Finance. Eckhard Platten, Nicola Bruti-Liberati. Essentials of Stochastic Finance: Facts, Models, Theory. Albert Shiryaev. Stochastic Integration and Differential Equations. Phillip Protter. Levy Processes in Finance: Pricing Financial Derivatives. Wim Schoutens. Fluctuations of Lévy Processes with Applications. Andreas Kyprianou. Selected papers from scientific journals.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST429 Half Unit

Statistical Methods for Risk Management

This information is for the 2020/21 session.

Teacher responsible: Daniela Escobar

Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in

Data Science, MSc in Financial Mathematics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302).

ST202, ST302, or equivalent

Course content: This course covers fundamental definitions of loss functions involving risk factors and risk factor changes. These concepts will be illustrated with examples of different value functions. For the quantitative analysis of the losses of a portfolio we introduce risk measures: General overview from variance to expected shortfall. We concentrate in highly important risk measures: Value at Risk (VaR) and Expected Shortfall (ES). Considering a portfolio we analyse the distribution and dependence between different risks. We cover multivariate models and Copula models: Sklar's Theorem, Fundamental copulas, Clayton copulas, Archimedean copulas, Dependence measures. As part of dimension reduction we also study Principal component analysis. Finally, we also look at the tail of the distributions and study extreme value theory.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 300 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: A set of exercises which are similar to problems appearing in the exam will be assigned. A set of coding exercises which are similar to examples in computer lab sessions will be assigned.

Indicative reading: A. McNeil, R. Frey, P. Embrechts, Quantitative Risk Management: Concepts, Techniques, Tools; Princeton Series in Finance

Assessment: Exam (75%, duration: 2 hours) in the January exam period.

Project (25%, 2000 words).

ST433 Half Unit

Computational Methods in Finance and Insurance

This information is for the 2020/21 session.

Teacher responsible: Dr Debora Escobar COL7.13

Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (MA400).

Course content: The purpose of this course is to (a) develop the students' computational skills, (b) introduce a range of numerical techniques of importance in actuarial and financial engineering, and (c) develop the ability of the students to apply the theory from the taught courses to practical problems, work out solutions including numerical work, and to present the results in a written report.

Binomial and trinomial trees. Random number generation, the fundamentals of Monte Carlo simulation and a number of related issues. Finite difference schemes for the solution of ordinary and partial differential equations arising in insurance and finance. Numerical solutions to stochastic differential equations and their implementation. The course ends with an introduction to

guidelines for writing a scholarly report/thesis.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 32 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

Formative coursework: Weekly exercises and practicals are set and form the basis of the classes.

Indicative reading: N. E. Steenrod, P. Halmos, M. M. Schiffer & J. A. Dieudonné, How to write mathematics (1973); D. J. Duffy, Finite Difference Methods in Financial Engineering: A Partial Differential Equation Approach, Wiley; P. Glasserman, Monte Carlo Methods in Financial Engineering, Springer; P. E. Kloeden and E. Platen, Numerical Solution of Stochastic Differential Equations, Springer. Further material will be specified during the course.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%) in the ST.

ST436 Half Unit

Financial Statistics

This information is for the 2020/21 session.

Teacher responsible: Prof Piotr Fryzlewicz COL 5.12

Availability: This course is compulsory on the MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available on the MSc in Data Science and MSc in Quantitative Methods for Risk Management. This course is not available as an outside option.

Pre-requisites: Students must have completed Statistical Inference: Principles, Methods and Computation (ST425) and Time Series (ST422).

Course content: The course covers key statistical methods and data analytic techniques most relevant to finance. Hands-on experience in analysing financial data in the "R" environment is an essential part of the course. The course includes a selection of the following topics: obtaining financial data, low- and high-frequency financial time series, ARCH-type models for low-frequency volatilities and their simple alternatives, predicting equity indices (case study), Markowitz portfolio theory and the Capital Asset Pricing Model, machine learning in financial forecasting, Value at Risk, simple trading strategies. The course ends with an extended case study involving making predictions of market movements in a virtual trading environment.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped lectures delivered as short online videos.

Formative coursework: Weekly marked problem sheets, with solutions discussed in class. Two marked case studies.

Indicative reading: Lai, T. L. and Xing H. (2008) Statistical Models and Methods for Financial Markets. Springer. Tsay, R. S. (2005) Analysis of Financial Time Series. Wiley. Ruppert, D. (2004) Statistics and Finance – an introduction. Springer. Fan, Y. (2003) Nonlinear Time Series. Hastie, Tibshirani, Friedman (2009) The Elements of Statistical Learning. Haerdle, Simar (2007) Applied Multivariate Statistical Analysis.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST439 Half Unit Not available in 2020/21

Stochastics for Derivatives Modelling

This information is for the 2020/21 session.

Teacher responsible: Dr Luciano Campi COL 5.04

Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Course content: Valuation and hedging of derivative securities: general principles of mathematical finance; asset price models; static vs dynamic option pricing; connection with PDEs; exotic options; volatility derivatives; mean-variance hedging; Dupire's formula.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 will be used as a revision week.

Formative coursework: Weekly homework will be set. Students are not expected to submit this homework but will go over the exercises in the following seminar with the lecturer.

Indicative reading: Steven Shreve, *Stochastic Calculus for Finance II: Continuous-Time Models*, Springer.

Selected papers from scientific journals.

Thorsten Rheinlander and Jenny Sexton, *Hedging Derivatives*, World Scientific.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST440 Half Unit Not available in 2020/21 Recent Developments in Finance and Insurance

This information is for the 2020/21 session.

Teacher responsible: Dr George Tzougas COL 5.11

Availability: This course is available on the MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Course content: Recent developments in the theory of stochastic processes and applications in finance and insurance and their interface. A variety of topics will be chosen from: optimal hedging with special emphasis on new products and practical applications; regression methods for risk analysis and to forecast systemic risk (based on NASDAQ data, Yahoo Finance data and macro variables); regression models in life and non-life insurance. The workshops will focus on the use of programming language R for implementations based on real data. Some selected lectures will be given by practitioners in the finance and insurance fields.

Teaching: Week 8 will be devoted to students' presentations, using material which will have been provided in week 1 or 2; as well as to discuss in groups solutions to problems that will have been set in class.

Week 6 will be used as a reading week.

Formative coursework: A set of coursework similar to the exercises that will appear in the exam will be assigned as well as a mock exam.

Indicative reading: H. Foellmer and A. Schied: *Stochastic finance*. An introduction in discrete time. (3rd ed.), de Gruyter. Selected papers from scientific journals.

Assessment: Exam (90%, duration: 2 hours) in the January exam period.

Presentation (10%) in the MT Week 9.

ST442 Half Unit Not available in 2020/21 Longitudinal Data Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Fiona Steele COL 7.12

Availability: This course is available on the MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and statistical theory, including linear regression and logistic regression.

Course content: A practical introduction to methods for the analysis of repeated measures data, including continuous and binary outcomes. Topics include: longitudinal study designs, models for two measurements, (random effects) growth curve models, marginal models, missing data, latent class models and dynamic (autoregressive) models. The course will have an applied emphasis with fortnightly computer classes using the Stata software.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Week 6 will be used as a reading week.

Formative coursework: Coursework assigned fortnightly and returned to students with comments/feedback during the computer sessions.

Indicative reading: Singer JD, Willett JB. (2003) *Applied Longitudinal Data Analysis: Modeling Change and Event Occurrence*. New York: Oxford University Press. (Part I only). Rabe-Hesketh S, Skrondal A. (2012) *Multilevel and Longitudinal Modeling Using Stata, Third Edition. Volume I: Continuous Responses*. College Station, Texas: Stata Press. Hedeker D, Gibbons RD. (2006) *Longitudinal Data Analysis*. Hoboken, New Jersey: John Wiley & Sons, Inc.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST443 Half Unit Machine Learning and Data Mining

This information is for the 2020/21 session.

Teacher responsible: Dr Xinghao Qiao

Availability: This course is compulsory on the MSc in Data Science. This course is available on the MSc in Applied Social Data Science, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: The course will be taught from a statistical perspective and students must have a very solid understanding of linear regression models

Students are not permitted to take this course alongside Algorithmic Techniques for Data Mining (MA429)

Course content: Machine learning and data mining are emerging fields between statistics and computer science which focus on the statistical objectives of prediction, classification and clustering and are particularly orientated to contexts where datasets are large, the so-called world of 'big data'. This course will start from the classical statistical methodology of linear regression and then build on this framework to provide an introduction to machine learning and data mining methods from a statistical perspective. Thus, machine learning will be conceived of as 'statistical learning', following the

titles of the books in the essential reading list. The course will aim to cover modern non-linear methods such as spline methods, generalised additive models, decision trees, random forests, bagging, boosting and support vector machines, as well as more advanced linear approaches, such as ridge regression, the lasso, linear discriminant analysis, k-means clustering, nearest neighbours.

Teaching: The first part of the course reviews regression methods and covers linear and quadratic discriminant analysis, cross-validation, variable selection, nearest neighbours, shrinkage, dimension reduction methods. The second part of the course introduces non-linear models and covers, splines, generalized additive models, tree methods, bagging, random forest, support vector machines, principal components analysis, k-means, hierarchical clustering.

This course will be delivered through a combination of classes and lectures totalling a minimum of 15 hours across Michaelmas Term / 20 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas/Lent Term.

Formative coursework: Students will be expected to produce 5 problem sets in the MT.

The problem sets will consist of some theory questions and data problems that require the implementation of different methods in class using a computer package.

Indicative reading: James, G., Witten, D., Hastie, T. and Tibshirani, R. An Introduction to Statistical Learning. Springer, 2017.

Available online at <http://www-bcf.usc.edu/~garth/ISL/>. Hastie, T., Tibshirani, R. and Friedman, J. The Elements of Statistical Learning: Data Mining, Inference and Prediction. 2nd Edition, Springer, 2009. Available online at <http://statweb.stanford.edu/~tibs/ElemStatLearn/index.html>

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Project (30%) in the MT Week 11.

ST444 Half Unit Computational Data Science

This information is for the 2020/21 session.

Teacher responsible: Dr Yining Chen COL 5.08

Availability: This course is available on the MSc in Data Science, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic knowledge in calculus and linear algebra, as well as a first course in probability and statistics.

Course content: An introduction to the use of popular algorithms in statistics and data science, including (but not limit to) numerical linear algebra, optimisation, graph data and massive data processing, as well as their applications. Examples include least squares, maximum likelihood, principle component analysis, LASSO and graphical LASSO, PageRank, etc. Throughout the course, students will gain practical experience of implementing these computational methods in a programming language. Learning support will be provided for at least one programming language, such as R, Python or C++, but the choice of language supported may vary between years, depending on judged benefits to students, whether in terms of pedagogy or resulting skills. This year, the default choice is Python.

Teaching: This course will be delivered through a combination of classes/computer workshops and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Lectures will cover:

(1) **Introduction:** overview of the topics to be discussed, how numbers are presented in memory, floating point arithmetic, stability of numerical algorithms

(2) **Basic algorithms:** overview of different types of algorithms, Big-O notation, elementary complexity analysis, and their applications in data science

(3) **Tools in optimisation:** bi-section, steepest descent, Newton's method, Quasi-Newton methods, stochastic search, stochastic gradient; convex optimization (coordinate descent, ADMM, etc).

(4) **Tools in numerical linear algebra:** Gaussian elimination, Cholesky decomposition, LU decomposition, matrix inversion and condition, computing eigenvalues and eigenvectors, and their applications

(5) **Other topics:** graph data processing and massive data processing

Formative coursework: Students will be expected to produce 4 problem sets in the MT.

Bi-weekly exercises, involving computer programming and some theory.

Indicative reading: Computational Statistics by Givens and Hoeting

Statistical computing in C++ and R by Eubank and Kupresanin

Foundations of Data Science by Blum, Hopcroft and Kannan

Introduction to Algorithms by Cormen, Leiserson, Rivest and Stein

The Art of R Programming: A Tour of Statistical Software Design by Matloff

Think Python: How to Think Like a Computer Scientist by Downey

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Coursework (30%) in the MT.

ST445 Half Unit Managing and Visualising Data

This information is for the 2020/21 session.

Teacher responsible: Dr Chengchun Shi

Availability: This course is compulsory on the MSc in Data Science. This course is available on the MSc in Applied Social Data Science, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to Applied Social Data Science students and students in the Department of Statistics, where the course is listed on their programme regulations.

Course content: The focus of the course is on the fundamental principles and best practices for data manipulation and visualisation. The course is based on using Python as the primary programming language and various software packages.

The first five weeks will focus on data manipulation which covers the basic concepts such as data types and data models. Students learn how to create data model instances, load data into them, and manipulate and query data. The course will cover data structures for scientific computing and their manipulation through the Python package NumPy, and high-level data structures and functions for working with structured or tabular data through the Python package Pandas. We will cover the basic concepts of relational data models and SQL query language for creating and querying database tables.

The last five weeks focus on data visualisation starting with the exploratory data analysis using various statistical plots. We will explain visualisations used for evaluation of binary classifiers such as receiver operating curve plots and precision recall plots. We will explain the principles of some dimensionality reduction methods used for visualisation of high-dimensional data points, starting

with classical methods such as multidimensional scaling to more recent methods such as stochastic neighbour embedding. We will discuss the basic principles of graph data visualisation methods and different graph data layouts. The data visualisations will be materialised in code using Python packages such as matplotlib, Seaborn, and various scikit-learn modules.

The course handout is available here: <https://lse-st445.github.io/>.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 35 hours in Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 6 problem sets in the MT.

Indicative reading: McKinney, W., Python for Data Analysis, 2nd Edition, O'Reilly 2017. Muller, A. C. and Guido, S., Introduction to Machine Learning with Python, O'Reilly, 2016. Geron, A., Hands-on Machine Learning with Scikit-Learn & TensorFlow, O'Reilly, 2017. Ramakrishnan, R. and Gehrke, J., Database Management Systems, 3rd Edition, McGraw Hill, 2002. Obe, R. and Hsu, L., PostgreSQL Up & Running, 3rd Edition, O'Reilly 2017. Robinson, I., Webber, J. and Eifrem, E., Graph Databases, 2nd Edition, O'Reilly 2015. Wickham, Hadley, Ggplot2: Elegant Graphics for Data Analysis, Springer, 2009. Murray, S., Interactive Data Visualisation for the Web, O'Reilly, 2013. Matplotlib, <https://matplotlib.org>. Seaborn: statistical data visualization <https://seaborn.pydata.org>. Sci-kit learn, Machine learning in Python, <http://scikit-learn.org>

Assessment: Project (60%) and continuous assessment (40%) in the MT.

Four of the problem sets submitted by students weekly will be assessed (40% in total). Each problem set will have an individual mark of 10% and submission will be required in MT Weeks 3, 5, 8 and 10. In addition, there will be a take-home exam (60%) in the form of an individual project in which they will demonstrate the ability to manage data and visualise it through effective statistical graphics using principles they have learnt on the course. This may be done by publishing the visualisation and code to a GitHub repository and GitHub pages website.

ST446 Half Unit

Distributed Computing for Big Data

This information is for the 2020/21 session.

Teacher responsible: Prof Milan Vojnovic COL 5.05

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Data Science, MSc in Operations Research & Analytics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

The MSc in Data Science students are given priority for enrollment in this course.

Pre-requisites: Basic knowledge of Python or some other programming knowledge is desirable.

Course content: The course covers basic principles of systems for distributed processing of big data including distributed file systems; distributed computation models such as Mapreduce, resilient distributed datasets, and distributed dataflow graph computations; structured querying over large datasets; graph data processing systems; stream data processing systems; scalable machine learning algorithms for classification, regression, collaborative filtering, topic modelling and other tasks. The course enables students to learn about the principles and gain hands-on experience in working with the state of the art computing

technologies such as Apache Spark, a general engine for large-scale data processing, and Apache TensorFlow, a popular software library for (distributed) learning of deep neural networks. Through weekly exercises and course project work, student can gain experience in performing data analytics tasks on their laptops and cloud computing platforms.

For more information, please see the course handout: <http://lse-st446.github.io>

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 35 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Eight of the weekly problem sets will represent formative coursework. The other two will represent summative assessment.

Indicative reading: Karau, H., Konwinski, A., Wendell, P. and Zaharia, M., Learning Spark: Lightning-fast Data Analysis, O'Reilly, 2015. Karau, H. and Warren, R., High Performance Spark: Best Practices for Scaling & Optimizing Apache Spark, O'Reilly, 2017. Drabas, T. and Lee D., Learning PySpark, Packt, 2016. White, T., Hadoop: The Definitive Guide, O'Reilly, 4th Edition, 2015. Apache Spark Documentation <https://spark.apache.org/docs/latest>. Apache TensorFlow Documentation https://www.tensorflow.org/get_started

Assessment: Project (80%) in the LT.

Continuous assessment (10%) in the LT Week 4.

Continuous assessment (10%) in the LT Week 7.

The main assessment will consist of an individual project to develop a package for fitting statistical models of the student's own choice to big data sets.

In addition, among the 10 weekly problem sets, there will be two (in weeks 4 and 7) which will contribute to summative assessment (10% each).

ST447 Half Unit

Data Analysis and Statistical Methods

This information is for the 2020/21 session.

Teacher responsible: Prof Qiwei Yao

Availability: This course is compulsory on the MSc in Data Science and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is NOT available on the following programmes: MSc in Statistics, MSc in Statistics (Research), MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Social Statistics), MSc in Statistics (Social Statistics) (Research) or LSE-Fudan Double Master's in Financial Statistics and Chinese Economy.

Pre-requisites: Basic knowledge in calculus and linear algebra, as well as a course in probability and statistics equivalent to ST102.

Students who have no previous experience in R are strongly encouraged to take on an online pre-sessional R course from the Digital Skill Lab (<https://moodle.lse.ac.uk/course/view.php?id=7022>).

Course content: This course covers most frequently used statistical methods for data analysis. In addition to the standard inference methods such as parameter estimation, hypothesis testing, linear models and logistic regression, it also covers Monte Carlo methods, bootstrap, EM-algorithm, permutation tests, regression based on local fitting, causal inference and false discovery rates. The software R constitutes an integral part of the course, providing hands-on experience of data analysis.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across in Michaelmas Term. This year, some or all of this teaching may be

delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 5 exercises in the MT.

The bi-weekly exercises enable students to learn about the different methods of statistics and data analysis. They also provide students the opportunities to implement statistical methods in R.

Indicative reading: All of Statistics, by Larry Wasserman, Springer. Data Analysis and Graphics using R: an Example-based Approach, by John Maindonald and John Braun, Cambridge University Press.

Assessment: Exam (85%, duration: 2 hours) in the January exam period.

Project (15%) in the MT.

ST448 Half Unit Not available in 2020/21 Insurance Risk

This information is for the 2020/21 session.

Teacher responsible: Daniela Escobar

Availability: This course is available on the MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is available with permission when students meet requirement on pre-requisites.

Pre-requisites: Students must have completed Stochastic Processes (ST302) and Probability, Distribution Theory and Inference (ST202).

Good undergraduate understanding of distribution theory and stochastic processes. ST202, ST302 or their equivalent.

Course content: A self-contained introduction to insurance risk analysis. Starting from classical actuarial modelling of insurance risk, utility theory with optimal forms of insurance from the insured's and from the insurer's point of view are analysed. Pareto-optimal risk exchanges are introduced. Standard schemes of reinsurance are introduced and analysed. The individual and collective model are introduced to understand the aggregated claim process and approximate it. There is an emphasis in the compound Poisson process and therefore a detailed description of the Poisson process is explained. In the second part of the course we cover Ruin theory for an insurance company and capital requirement are studied. Heavy tail distributions and the extreme value theory are introduced. We solve reinsurance problems in a scheme with aggregated claims. Finally, we study closed-form solutions of the ruin probability as we also approximate it using R.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Week 6 will be used as a reading week.

Formative coursework: Students will be expected to produce 6 problem sets in the MT.

Indicative reading: Kaas, R., Goovaerts, M., Dhaene, J., & Denuit, M. Modern actuarial risk theory: using R. Thomas Mikosch, Non-Life Insurance Mathematics. Ragnar Norberg, Non-life Insurance Mathematics (Lecture notes). Pauline Barrieu, Luca Albertini, The Handbook of Insurance-Linked Securities

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Project (30%) in the LT.

ST449 Half Unit Artificial Intelligence and Deep Learning

This information is for the 2020/21 session.

Teacher responsible: Prof Milan Vojnovic COL 5.05

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Data Science, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

The MSc in Data Science students are given priority for enrollment in this course.

Course content: The course will introduce the basic principles and algorithms used in artificial intelligence systems, with a focus on statistical and machine learning foundations, including the design and training of deep neural networks and reinforcement learning algorithms. These algorithms will be applied to classification tasks such as image recognition, speech recognition, natural language processing, as well as to agents learning to play various games. Use of Python and open source software libraries for machine intelligence such as Tensorflow and OpenAI Gym constitutes an integral part of the course, allowing students to gain hands-on experience in data analysis and use of modern computational tools.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 35 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Indicative reading:

- I. Goodfellow, Y. Bengio and A. Courville, Deep Learning, MIT Press, 2017, <http://www.deeplearningbook.org>160
- R. Sutton and A. C. Barto, Reinforcement Learning: An Introduction, Second Edition, MIT Press, 2018
- TensorFlow, An Open Source Software Library for Machine Intelligence, <http://www.tensorflow.org>
- OpenAI Gym, <https://gym.openai.com/>

Assessment: Project (80%) in the LT.

Continuous assessment (10%) in the LT Week 4.

Continuous assessment (10%) in the LT Week 7.

Two problems sets submitted by students will be assessed (20% in total). In addition, there will be a graded take-home research project (80%) which will be completed on an individual basis in which they will demonstrate the ability to apply and train an appropriate model to a specific problem and dataset using principles they have learnt in the course. This may be done by publishing the code to a GitHub repository and GitHub pages website.

ST450

Advanced Lectures on Special Topics in Statistics

This information is for the 2020/21 session.

Course content: Seminar series. Please refer to Departmental web page for details. <http://www.lse.ac.uk/statistics/home.aspx>

Teaching: 20 hours of seminars in the LT.

ST451 Half Unit Bayesian Machine Learning

This information is for the 2020/21 session.

Teacher responsible: Dr Konstantinos Kalogeropoulos

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Data Science, MSc in Quantitative

Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Priority is given to Department of Statistics students and those with the course listed in their programme regulations.

Pre-requisites: Basic knowledge in probability and first course in statistics such as ST202 or equivalent Probability Distribution Theory and Inference; basic knowledge of the principles of computer programming is sufficient (e.g. in any of Python, R, Matlab, C, Java). This is desired rather than essential.

Course content: The course sets up the foundations and covers the basic algorithms covered in probabilistic machine learning. Several techniques that are probabilistic in nature are introduced and standard topics are revisited from a Bayesian viewpoint. The module provides training in state-of-the-art methods that have been applied successfully for several tasks such as natural language processing, image recognition and fraud detection. The first part of the module covers the basic concepts of Bayesian Inference such as prior and posterior distribution, Bayesian estimation, model choice and forecasting. These concepts are also illustrated in real world applications modelled via linear models of regression and classification and compared with alternative approaches.

The second part of the module introduces and provides training in further topics of probabilistic machine learning such as Graphical models, mixtures and cluster analysis, Variational approximation, advanced Monte Carlo sampling methods, sequential data and Gaussian processes. All topics are illustrated via real-world examples and are contrasted against non-Bayesian approaches.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 35 hours across the Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course does not include a reading week and will be concluded by the end of week 10 of Lent Term.

Syllabus:

- Bayesian inference concepts: Prior and posterior distributions, Bayes estimators, credible intervals, Bayes factors, Bayesian forecasting, Posterior Predictive distribution.
- Linear models for regression: Linear basis function models, Bayesian linear regression, Bayesian model comparison.
- Linear models for classification: Probabilistic generative models, Probabilistic discriminative models, The Laplace approximation, Bayesian logistic regression.
- Variational inference, Variational linear and logistic regression.
- Graphical models: Bayesian networks, Conditional independence, Markov random fields.
- Mixture models and Clustering: Clustering, Mixtures, The EM algorithm.
- Sampling methods: Basic sampling algorithms, Markov chain Monte Carlo, Gibbs sampling
- Sequential data: Markov models, Hidden Markov models, Linear dynamical systems.
- Gaussian processes : Bayesian Non-Parametrics, Gaussian processes for regression and classification.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

10 problem sets in LT to prepare students for both summative assessment components. They will include theoretical exercises, targeting for learning outcomes a and b, as well as computer-based assignments (for learning outcome c) that will need to be presented in suitable form for the purposes of learning outcome d. Additionally, mostly related to learning outcome b, students will be encouraged to share and compare their responses in some challenging parts of the problem sets, through the use of dedicated Moodle forums.

Indicative reading:

- C. M. Bishop, Pattern Recognition and Machine Learning, Springer 2006
- K. Murphy, Machine Learning: A Probabilistic Perspective, MIT Press, 2012
- S. Rogers and M. Girolami, A First Course in Machine Learning, Second Edition, Chapman and Hall/CRC, 2016
- D. J. C. MacKay, Information Theory, Inference and Learning Algorithms, Cambridge University Press, 2003
- D. Barber, Bayesian Reasoning and Machine Learning, Cambridge University Press 2012

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%) in the ST.

ST452 Half Unit

Probability and Mathematical Statistics I

This information is for the 2020/21 session.

Teacher responsible: Prof Umut Cetin

Availability: This course is available on the MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

The availability as an outside option requires a demonstration of sufficient background in mathematics and statistics. Prior training on basic concepts of real analysis providing experience with formal proofs, sequences, continuity of functions, and calculus and is at the discretion of the instructor.

Course content: This course provides theoretical and axiomatic foundations of probability and mathematical statistics. In particular, the following topics will be covered:

1. Measure spaces; Caratheodory extension theorem; Borel-Cantelli lemmas.
2. Random variables; monotone-class theorem; different kinds of convergence.
3. Kolmogorov's 0-1 law; construction of Lebesgue integral.
4. Monotone convergence theorem; Fatou's lemmas; dominated convergence theorem.
5. Expectation; L^p spaces; uniform integrability.
6. Characteristic functions; Levy inversion formula; Levy convergence theorem; CLT.
7. Principle and basis for statistical inference: populations and samples, decision theory, basic measures for estimators.
8. Estimation: U and V statistics, unbiased estimators, MVUE, MLE.
9. Hypothesis testing: Neyman-Pearson lemma, UMP, confidence sets.
10. Product measures; conditional expectation.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 9 problem sets in the MT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading:

- 1 Williams, D. (1991). Probability with Martingales. Cambridge University Press.
- 2 Durrett, R. (2019). Probability: Theory and Examples. Cambridge Series in Statistical and Probabilistic Mathematics.
- 3 Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.
- 4 Keener, R. (2010). Theoretical Statistics. Springer Texts in Statistics.

Assessment: Exam (70%, duration: 2 hours, reading time: 10

minutes) in the January exam period.

Coursework (30%) in the MT.

Three of the homework problem sets will be submitted and marked as assessed coursework.

ST453 Half Unit

Probability and Mathematical Statistics II

This information is for the 2020/21 session.

Teacher responsible: Prof Konstantinos Kardaras

Availability: This course is available on the MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Probability and Mathematical Statistics I is a pre-requisite.

Course content: This course provides instruction in advanced topics in probability and mathematical statistics, mainly based on martingale theory. It is a continuation of Probability and Mathematical Statistics I. The following topics will in particular be covered:

- 1 Conditional expectation revisited; linear regression; martingales and first examples.
- 2 Concentration inequalities; dimension reduction; log-Sobolev inequalities.
- 3 Martingale transforms; optional sampling theorem; convergence theorems.
- 4 Sequential testing; backwards martingales; law of large numbers; de Finetti's theorem.
- 5 Markov chains; recurrence; reversibility; foundations of MCMC.
- 6 Ergodic theory.
- 7 Brownian motion; quadratic variation; stochastic integration.
- 8 Stochastic differential equations; diffusions; filtering.
- 9 Bayesian updating; Ergodic diffusions; Langevin samplers.
- 10 Brownian bridge; empirical processes; Kolmogorov-Smirnov statistic.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 9 problem sets in the LT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading:

- 1 Williams, D. (1991). Probability with Martingales. Cambridge University Press.
- 2 Durrett, R. (2019). Probability: Theory and Examples. Cambridge Series in Statistical and Probabilistic Mathematics.
- 3 Karatzas, I, Shreve S. (1991). Brownian motion and Stochastic Calculus. Springer GTM.
- 4 Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.
- 5 Keener, R. (2010). Theoretical Statistics. Springer Texts in Statistics.

Assessment: Exam (70%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.

Coursework (30%) in the LT.

Three of the homework problem sets will be submitted and marked as assessed coursework.

ST498

Capstone Project

This information is for the 2020/21 session.

Teacher responsible: A project supervisor will be identified during MT.

Availability: This course is compulsory on the MSc in Data Science. This course is not available as an outside option.

Course content: The capstone project will provide students with the opportunity to study in depth a topic of specific interest. The topic will normally relate to a specific data source or sources and will require the use of data science skills learnt on the programme. The topic for a capstone project will be similar to that for the kinds of data-based issues faced in practice by private or public sector organisations. The capstone project is typically conducted in partnership with a company partner and is jointly supervised by the LSE faculty and company partner collaborators. The capstone project partner proposes a data science research project, potentially provides access to data, and engages through participation in joint meetings that are either online or onsite.

The capstone project may require students to spend some time on company partner's premises, for example, to have access to data. The capstone project requires creative work in formulating research questions and hypotheses, identifying most suited methodology, referring to research literature, and analysing data sources using data science computing technologies.

Teaching: A topic and project supervisor will be identified during MT. Supervisors will provide advice from the end of MT until two weeks after the end of ST. The student will prepare and submit project report by a date in August.

Formative coursework: Formative assessment is via informal feedback from supervisors on the project report and contributions to the project as an individual contributor and team member. Other courses on the MSc programme will also provide a range of formative assessments of relevance to the outcomes of this project.

Assessment: Project (100%) in August.

Maximum page limit of 50 single-sided sheets of A4 (minimum font size of 11pt and line spacing 1.5).

ST499

Dissertation

This information is for the 2020/21 session.

Teacher responsible: Prof Jouni Kuha COL. 8.04, Prof Wai-Fung Lam COL. 6.09 and Dr Konstantinos Kalogeropoulos COL. 6.10

Availability: This course is compulsory on the MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research) and MSc in Statistics (Social Statistics) (Research). This course is not available as an outside option.

Course content: Independent project work on a subject chosen by the student.

Assessment: Dissertation (100%) in August. (50 page limit).

Executive Taught Master's Course Guides

EC452E Half Unit**Applying Behavioural Economics for Social Impact: Design, Delivery and Policy**

This information is for the 2020/21 session.

Teacher responsible: Prof Nava Ashraf 32L.3.18

Director of Research, Marshall Institute

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: This course delivers insights from cutting edge research in psychology and economics, and asks students to use these insights to design solutions to significant social challenges. Students learn how to diagnose, design, deliver, and rigorously test products and services using the principles of behavioural economics and the methods of field experimentation. The course begins by describing the principle of coproduction: outcomes in health, education and similar fields are not simply given to end-users, but are produced by end-users themselves, interacting with supply-side factors. Drawing on the insights from behavioural economics and using qualitative methods, students learn how to diagnose end-user needs, preferences and behaviour. The course then explores how the psychological aspects of behaviour can be combined with the tools and structure of economics to induce behaviour change and improve outcomes, including the challenge of setting prices and designing incentives. Throughout the course there is emphasis upon the critical importance of effective measurement in the context of the social sector, where traditional market feedback mechanisms are typically absent and where mission-driven leaders' evaluation of organisational impact can itself be subject to cognitive bias and distortion. Appropriate measurement in turn informs improvements in diagnosis and design. This emphasis on appropriate measurement reinforces students' learning in earlier modules of the programme, where they will be introduced to the principles and concepts of rigorous social impact evaluation. The course concludes by exploring policy impact and how research can be translated into policy action. Real world case studies are used at every stage of the course.

This course is relevant to all those who wish to improve the effectiveness of social interventions and programmes across a range of diverse fields, whether such interventions are administered through the state or, increasingly, through private philanthropy and social entrepreneurship. The course tutor is Director of Research at the Marshall Institute.

Teaching: Ten sessions of three hours each, delivered across two modules (teaching blocks).

Formative coursework: Formative assessment will be through short case commentaries written by students on the basis of lecture/seminars. These will be submitted and feedback given during the course.

Indicative reading: There is no single textbook for the course. For an introduction to the field of behavioural economics, students should consult *Nudge: Improving Decisions About Health, Wealth, and Happiness* by Richard Thaler and Cass Sunstein (2009, Penguin) and *Thinking, Fast and Slow*, by Daniel Kahneman (2012, Penguin).

Other indicative readings are:

- Ashraf, N., Bandiera, O. and Jack, B.K. 2014. "No margin, no mission? A field experiment on incentives for public service delivery." *Journal of Public Economics* 120 (December): 1-17
- Ashraf, N., Camerer, C. F. and Loewenstein, G. 2005. "Adam Smith, Behavioral Economist." *Journal of Economic Perspectives* 19(3): 131-145.
- Glennerster, R. and Takavarasha, K. 2013. *Running randomized evaluations: a practical guide*. Princeton: Princeton University Press.
- Hirschman, A 1997. *The passions and the interests: political arguments for capitalism before its triumph* (20th anniversary edition). Princeton: Princeton University Press.
- Kamenica, E. 2012. "Behavioral Economics and Psychology of Incentives." *Annual Review of Economics* 4(1): 427-452.

Further readings relevant to specific case studies will be provided during the course.

Assessment: Take-home assessment (85%) and class participation (15%).

Assessment will be through a take home exam (85%) and class participation (15%).

FM405E Half Unit**Fixed Income Securities and Credit Markets**

This information is for the 2020/21 session.

Teacher responsible: Dr Peter Kondor

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Students must have completed FM422E and FM423E.

Course content:

- Interest rate modelling and derivatives
- Credit risk
- Credit derivatives and risk management

This course provides a thorough grounding in recent developments in fixed income securities pricing, hedging and portfolio management.

By the end of the course, the students will be familiar with the fixed income state of the art business practice and a variety of topics including (i) an analysis of the main products traded in the credit markets, such as government and corporate bonds, bond options, swaps, caps, floors, swaptions, callable, puttable and convertible bonds, and an analysis of the main credit derivatives such as total-return swaps, spread options and credit default swaps; (ii) the specific tools used in the industry practice to evaluate and hedge these products, which range from no-arbitrage trees and the calibration of yield curve derivatives to the main tools used to monitor and manage credit risk; (iii) the process of securitization, with particular reference to collateralized default obligations and mortgage-based securities.

Teaching: 30 hours of lectures in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Indicative reading: The primary source for this course is a comprehensive set of Lecture Notes, tutorials and case studies and the main reference is Pietro Veronesi: *Fixed Income Securities*, (Wiley 2010).

Assessment: Continuous assessment (100%) in the MT.

FM406E Half Unit**Topics in Portfolio Management**

This information is for the 2020/21 session.

Teacher responsible: Dr Michela Verardo

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Students must have completed Corporate Finance (FM422E) and FM423E.

Course content:

- Portfolio optimization and the Black-Litterman model
- Dynamic Investment Strategies
- Selecting and Monitoring Portfolio Managers: Mutual funds and hedge funds
- Transactions Costs and Liquidity Risk

The course covers a wide range of topics in portfolio management, with a strong focus on empirical applications. The first part of the course reviews the basics of portfolio theory and develops the Black-Litterman approach to portfolio optimization. The second part of the course introduces students to the implementation

of several dynamic investment strategies and to the estimation of their performance; portfolio strategies include size, value, momentum, betting-against-beta, and quality-minus-junk. The third part of the course focuses on selecting and monitoring portfolio managers, with particular emphasis on the identification of selectivity, allocation, and timing skills for mutual funds and hedge funds. The last part of the course examines trading costs and liquidity risk, as well as their impact on the profitability of investment strategies. The course is based on recent empirical studies and applied exercises using financial data.

Teaching: 30 hours of lectures in the MT.

Formative coursework: Regular coursework will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are: Investments, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin; Modern portfolio theory and investment analysis, by E. J. Elton, M. J. Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; Modern investment management, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press.

Assessment: Continuous assessment (100%) in the MT.

FM407E Half Unit

Mergers, Buyouts and Corporate Restructurings

This information is for the 2020/21 session.

Teacher responsible: Dr Vicente Cuñat

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Students must have completed FM422E and FM423E.

Course content:

- Financial Analysis of Firms and Corporate Transactions
- Mergers, Acquisitions and Leveraged Buyouts
- Distress, Bankruptcy and Corporate Restructuring

This course covers advanced topics in Corporate Finance. It focuses on the strategy, valuation and execution of corporate deals. In particular, the first part of the course covers mergers, divestitures, partial-divestitures (e.g. equity carve outs) and leveraged buyouts. The second part of the course provides a framework of analysis for the resolution of financial distress and bankruptcy. Each of the topics introduced in this course covers both institutional details and results of relevant academic research. It is furthermore supported by case studies.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular courseworks will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: A course pack will be distributed that includes case studies as well as additional readings such as textbook chapters, and practitioner articles.

Assessment: Continuous assessment (100%) in the LT.

FM408E Half Unit Not available in 2020/21

Financial Engineering

This information is for the 2020/21 session.

Teacher responsible: Dr Jean-Pierre Zigrand

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Students must have completed FM422E and FM423E.

Students will be expected to show some familiarity with calculus (including stochastic calculus) and statistics

Course content: This course provides a thorough grounding in the theory and practice of financial engineering. The emphasis is on the application of derivatives pricing and hedging methodology to equity and volatility derivatives and to structured products.

The course aims to cover the basics in derivatives theory, and to apply them to a multitude of financial securities and structured products, with a special emphasis on recent products in the equity and volatility derivative worlds. We review selected case studies in order to gain a better understanding of their practical usage. We also implement the models numerically in R and VBA.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Indicative reading: Based on a set of extensive lecture notes.

No one book covers the material of the entire course. Books recommended include The Volatility Surface: A Practitioner's Guide, 2nd Edition, by Jim Gatheral, and The Volatility Smile by Derman, Miller and Park. Background reading can be found in Volatility: Practical Options Theory by Adam Iqbal, Derivatives Markets by Robert McDonald or Options, Futures and Other Derivatives by John Hull.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Project (30%) in the LT.

FM409E Half Unit

Risk Management in Financial Markets

This information is for the 2020/21 session.

Teacher responsible: Dr Christian Julliard

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed Corporate Finance (FM422/E) and Asset Markets (FM423/E) or Financial Economics (FM436).

Course content:

- Hedging in equity and fixed income markets
- Market Risk, Value at Risk and Expected Shortfall
- Endogenous Risk and Limits to Arbitrage
- Credit risk and structured products

The aim of this course is to offer an introduction to the analysis and management of risk within financial markets. The course develops a conceptual framework for thinking about financial risk and shows how these concepts are implemented in practice in a variety of contexts. First, the course offers an overview of risk management in the context of portfolios of fixed income securities and derivatives. Next, we discuss the implementation and the merits of Value at Risk measures. We will spend some time on endogenous risk and limits to arbitrage. In the context of credit risk we will cover ratings based and structural models, as well as credit risk on portfolios and credit derivatives. Throughout, the course spends a significant amount of time on practical applications of the theories that are introduced. Limitations of current approaches are also discussed.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is

interactive.

Formative coursework: Problem sets. In addition, students will have the opportunity to present the results of a case study to the class.

Indicative reading: Course readings will vary from year to year depending upon the topics covered. The main reference is: John C. Hull, *Risk Management and Financial Institutions*, Wiley, 2015, 4th edition.

Additional useful references are: Michel Crouhy, Dan Galai and Robert Mark, *Risk Management*, McGraw-Hill, 2001. Philippe Jorion, *Value at Risk*, McGraw-Hill, 2007, 3rd edition. Jon Danielsson, *Financial Risk Forecasting*, Wiley, 2011. John C. Hull, *Options, Futures and Other Derivatives*, Pearson, 2012, 8th edition. Darrell Duffie and Ken Singleton, *Credit Risk*, Princeton University Press, 2003.

Assessment: Continuous assessment (100%) in the LT.

FM414E Half Unit

Private Equity, Venture Capital and Entrepreneurial Finance

This information is for the 2020/21 session.

Teacher responsible: Prof Ulf Axelsson

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Students must have completed FM422E and FM423E.

Course content:

- Evaluating and executing Private Equity Deals
- Business Plans, Venture Capital, and Entrepreneurial Finance
- Private Equity as an asset class and the private equity landscape

The course provides a thorough grounding in the theory and recent developments in the field of private equity. Starting by examining how private equity funds are raised and structured, the course will examine how private equity can be used in start-ups, in scaling-up cash flow businesses, and in restructuring firms facing financial distress. The course explores the link between private and venture capital on the one hand and public securities markets on the other. The course will examine the process through which private equity investors exit their investments. The course will also give a detailed analysis of the types of finance used in private equity and an evaluation of the short and long-run performance of private equity investments. The course will include an evaluation of the performance of different types of private equity investment and a comparison with other forms of ownership will be undertaken.

Teaching: 30 hours of seminars in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Each week there will typically be a formative or summative case study assignment.

Indicative reading: Ulf Axelsson, Tim Jenkinson, Per Strömberg, and Michael S. Weisbach. *Leverage and Pricing in Buyouts: An Empirical Analysis*. August 28, 2007; Steven N. Kaplan and Per Strömberg. *Leveraged Buyouts and Private Equity*, Social Science Research Network, June 2008; Cendrowski, Harry. *Private Equity: Governance and Operations Assessment*. Hoboken: John Wiley & Sons. 2008; Lerner, Joshua. *Venture Capital and Private Equity: A Casebook*. New York: John Wiley & Sons. 2000; Acharya V V; Franks J R & Servaes H (2007) "Private Equity: Boom and Bust?" *Journal of Applied Corporate Finance*, 19(4), Fall 2007, 44-53.

Assessment: Continuous assessment (100%) in the MT.

FM422E

Corporate Finance

This information is for the 2020/21 session.

Teacher responsible: Professor Amil Dasgupta

Dr Dirk Jenter

Availability: This course is compulsory on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:

- Financing
- Valuation

This core course provides a broad introduction to the key issues in corporate finance. The first half of the course, the Financing Module, investigates how companies should finance their activities by issuing securities (debt, equity, and convertible claims) and the interaction of business policy with financial policy. The aim is to understand what factors determine optimal capital structure and how the interplay of these factors can affect financing decisions in a way that creates value. The second half of the course, the Valuation Module, covers firm and project valuation and establishes how companies should select among investable assets. The module focuses on fundamental valuation techniques based on discounting future cash flows. The course goes on to introduce further valuations methods, such as real options analysis, as well as key applications of valuation concepts to major corporate decisions such as mergers and acquisition and initial public offerings. The course interweaves key conceptual material with a series of cases.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: The recommended textbook for this course is Berk and DeMarzo, *Corporate Finance*. Other recommended readings from relevant journal articles will be included in a study pack.

Assessment: Continuous assessment (100%) in the MT and LT.

FM423E

Asset Markets

This information is for the 2020/21 session.

Teacher responsible: Dr Dong Lou and Dr Igor Makarov

Availability: This course is compulsory on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:

- Investments and Securities Valuation
- Portfolio choice and performance evaluation
- Derivatives

The aim of the course is to familiarize students with the workings of financial markets, and equip them with the fundamental tools of asset valuation. The course will focus on the three main asset classes - fixed income, stocks, and derivatives - giving a unified perspective of modern valuation methods. The starting point will be the present value formula. The course will then proceed to fixed-income securities, focusing mainly on government bonds. These will be valued off the term structure of interest rates, using the present value formula. The connection with the principle of no-arbitrage will be emphasized. The course will then move to stocks, starting with portfolio theory and then deriving the relation

between risk and return (CAPM). The CAPM will provide a risk-adjusted discount rate that will be used to discount stocks' cash flows with the present value formula. Alternative pricing models such as the APT and multi-factor models will also be covered, and the models will be applied to issues of asset allocation and portfolio selection. The last topic will be derivatives, especially futures and options. After familiarizing students with the use of derivatives, the course will cover the main valuation methods (binomial model, Black-Scholes) emphasizing again the principle of no-arbitrage.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: The organisation of topics of the course follows closely the treatment in Berk and DeMarzo, Corporate Finance, 3rd Global Edition, Pearson International, and Bodie, Kane, and Marcus, Investments, 10th Edition, McGraw Hill. Other recommended readings and case studies will be included in a study pack.

Assessment: Continuous assessment (100%) in the MT and LT.

FM475E Half Unit Financial Management (modular)

This information is for the 2020/21 session.

Teacher responsible: Prof Amil Dasgupta CON2.06

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2020-2022 cohort.

Course content: This course will provide a comprehensive overview of financial decision making in corporations. Our approach to finance will be rigorous, but both applied and practical, enabling students to address topical issues faced by modern corporations. In particular, the course will develop concepts in business strategy, valuation techniques, and capital structure theories, applying these tools in a systematic and rigorous way to real-life financial management problems. After a brief introduction to financial analysis and management, the course will focus on corporate finance and business valuation. Topics such as corporate liquidity management, financial distress, and initial public offerings will also be covered.

Teaching: The course is taught during Module 3, over ten interactive sessions of three hours each.
Module 3 (12 – 24 April 2021)

The teaching approach will intensively intermingle the following four elements:

- (i) New conceptual material. This will be taught via interactive lectures.
- (ii) Real life business cases applying and extending such conceptual material. These will be explored via interactive classroom discussion sessions.
- (iii) Group classroom exercises to reinforce concepts, and
- (iv) Discussion of ongoing or recent real-world financial events that illustrate key concepts developed in the course via reference to media articles from the Financial Times, The Economist, etc.

Formative coursework: Feedback on class participation.

Indicative reading: The recommended readings for this course consist of Higgins, Koski, and Mitton, Analysis for Financial Management, McGraw-Hill, 12th Edition and several business case studies.

Assessment: Essay (20%, 1500 words), project (65%) and class

participation (15%).

The essay is an assessed 1,500 word group essay.

The project is a take-home individual project.

FM4T4E Half Unit Private Equity, Venture Capital and Entrepreneurship - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Prof Ulf Axelsson

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Course content: See entry for FM414E.

Teaching: See entry for FM414E.

Assessment: Continuous assessment (100%) in the MT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

FM4T6E Half Unit Topics in Portfolio Management - Dissertation

This information is for the 2020/21 session.

Teacher responsible: Dr Michela Verardo

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Course content: See entry for FM406E.

Teaching: See entry for FM406E.

Assessment: Continuous assessment (100%) in the MT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

Submission deadline will be in Summer Term.

HP4A1E Half Unit

Financing Health Care

This information is for the 2020/21 session.

Teacher responsible: Prof Elias Mossialos COW 2.12

Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: This course aims to give students a thorough grounding in health financing policy. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in

European countries, but the general principles studied apply internationally.

The course provides an overview of key health financing policy issues, including the advantages and disadvantages of different ways of raising revenue for health; the role of private financing mechanisms; the importance of pooling; decisions about whom to cover, what services to cover, and how much of service cost to cover; allocating resources to purchasers, purchasing market structure and the principles of strategic purchasing; the incentives associated with different methods of paying providers; and the issue of financial sustainability.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 23 hours. Students will have access to lecture material delivered as short online videos. During the seminars, students will work in groups to present an overview of a health system in a country of their choice (having prepared in advance), providing an overview of its structure, organisation, management and financing. They will be asked to highlight particular strengths, weaknesses, opportunities and challenges faced by the health system, a summary of key policy debates, and highlight potential policy solutions to critical challenges. Each presentation will be followed by a Q+A and a plenary discussion led by the seminar leader.

Formative coursework: Group presentation giving an overview of a health system in a country of their choice, providing an overview of its structure, organisation, management and financing.

Indicative reading: WHO, World Health Report 2010 - Health systems financing: the path to universal coverage (2010); E Mossialos, A Dixon, J Figueras & J Kutzin (eds), Funding health care: options for Europe, Open University Press (2002); J Kutzin, Health financing policy: a guide for decision-makers, World Health Organization (2008); T Rice, The economics of health reconsidered, Health Administration Press (3rd edn, 2009)

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle.

They will be expected to read these prior to the first day of class.

Assessment: Take-home assessment (100%) in the ST.

HP4A2E Half Unit Not available in 2020/21

Health Administration and Management

This information is for the 2020/21 session.

Teacher responsible: Dr Irene Papanicolas COW3.04

In addition, Professor Nancy Kane and Mariam Krikorian Atkinson (Harvard Business School) will be teaching on the course.

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: This course is intended to provide the student an orientation and overview on managing organizations within health systems. The governance, execution, information management, quality of care, and sustaining human resources will be discussed, including an examination of the uses of accounting and other forms of reporting to manage health services. This is an introductory course, appropriate for students with no formal inpatient health care management experience. The course will cover the following topics: principle responsibilities of a health care system and organizations within the system; issues and strategies for enabling health care organizations to be responsive to their environment; concepts for supporting and implementing governance decisions; strategies for performance measurement and information, and analytical activities related to planning, finance, and information needs; characteristics and development of systems to assure quality of clinical services.

Teaching: 10 hours of lectures and 10 hours of seminars.

Formative coursework: In-class formative assessments.

Students will be given questions to answer to help them learn to think critically about a focal case and then asked to discuss in

discussion breakout sessions.

Indicative reading:

1. Drucker PF. 1994. "The Theory of the Business." Harvard Business Review. September- October. HBSP # 94506
2. Hammond, John S. "Learning by the Case Method." Harvard Business School. 9-376-241
3. Heskett, James. "The Job of the General Manager." 9-388-035
4. Jick, TD. 1989. "The Vision Thing." Harvard Business Review. 9-490-019
5. Porter ME. 1996. "What is Strategy?" Harvard Business Review. November-December. HBR # 96608
6. Porter, ME. "The Five Competitive Forces That Shape Strategy", Harvard Business Review, January 2008: 25-40. Reprint R0801

Assessment: Essay (75%, 3000 words) and presentation (25%) in the ST.

The presentation component is an in-class assessment of the presentation of cases prepared in small groups and attendance to all case sessions.

HP4A3E Half Unit

Resource Allocation and Cost-effectiveness Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Ranjeeta Thomas COW 2.07

Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim is to give an overview of the theory underlying economic evaluation as applied to the health care sector; to consider the different forms of economic evaluation; to give an understanding of the techniques associated with economic evaluation as applied to health care; to give an understanding of the interpretation of the results gained from economic evaluation; to provide the main practical tools necessary to undertake economic evaluation using computer-based programs. The course will cover the following topics: Conceptual rationales for economic evaluation in the health care sector (Pareto efficiency, Social Welfare, extra-welfarism and decision-making); Introduction to the methods of economic evaluation: cost-effectiveness analysis, cost-utility analysis, and Cost-benefit analysis; Cost data; Incremental cost-effectiveness analysis; Quality Adjusted Life Years gained and other outcome measures; Discounting; Uncertainty and sensitivity analysis; Economic evaluation and clinical trials; Policy decision-making using economic evaluation.

Teaching: This course will be delivered as a combination lectures and seminars. In seminars students will work on structured learning activities set by the course lead.

Formative coursework: In class group exercise: critical appraisal of published evidence

Indicative reading: M Drummond et al, Methods for the Economic Evaluation of Health Care Programmes, Oxford, OUP, 2015, fourth edition..

M Drummond & A McGuire (Eds), Economic Evaluation in Health Care: Merging Theory with Practice, Oxford, OUP, 2002.

Gray, A. Clarke, P.M, Wolstenholme, P., Wordsworth, S. Applied Methods of Cost-effectiveness Analysis in Healthcare (Handbooks in Health Economic Evaluation), Oxford, OUP, 2011.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Coursework (20%) and take-home assessment (80%) in the LT and or ST.

Students will complete coursework tasks during the teaching block (20% of the final mark) and a take home assessment of critical appraisal of a published study (80% of the final mark) in the weeks following teaching delivery.

HP4A4E Half Unit

Health Economics

This information is for the 2020/21 session.

Teacher responsible: Prof Alistair McGuire COW 2.02

Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: Distinction between health and health care. Nature of health care as an economic commodity. How markets and insurance markets work, and how they can fail for health care and health insurance. Incentive mechanisms and principal-agent relationships in health care. Yardstick competition and Diagnostic Related Group payment schemes. Labour markets in health care. Economic evaluation as a regulatory tool.

Teaching: This course will be delivered the June 2021 Executive MSc teaching block. The course will be delivered as a combination lectures (12 hours) and seminars (10 hours). In seminars students will work in small groups to complete problem sets and learning activities set by the course lead.

Formative coursework: 1,500 word essay forms the basis of formative review

Indicative reading: The following is a basic reading list for the course: S Folland, A C Goodman & M Stano, The Economics of Health and Health Care (3rd edn), Prentice Hall, 2001; B McPake, L Kumaranayake & C Normand, Health Economics - An International Perspective, Routledge, 2002.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take-home assessment (100%) in the ST.

HP4B1E Half Unit

Pharmaceutical Economics and Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Panagiotis Kanavos COW 1.05

Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim of this course is to introduce students to the economics of pharmaceutical markets and related policies that affect national and international markets broadly.

- To provide students with an understanding of basic features of pharmaceutical markets and how pharmaceutical markets work and how competition manifests itself in different parts of pharmaceutical markets.
- To illustrate to students how the pharmaceutical market is linked to the health care market, why it is often the focus of much regulation, and to help students understand the multidimensional goals of pharmaceutical policies.
- To introduce students to the economic and policy problems encountered in managing pharmaceutical markets and how to evaluate the impact of alternative policy approaches. The course will also give students some experience in critically evaluating the impact of policy on market outcomes.
- To facilitate consideration of various country-specific political, cultural and economic factors that may drive governments' approaches to pharmaceutical regulation. In this context, this course will help students consider the extent to which policies may be transferable.
- To enable students to analyse pharmaceutical markets from the perspectives of several main actors: governments, third party payers, the pharmaceutical industry, doctors, patients, pharmacists and wholesalers. Literature from Health Economics, Industrial Organisation and Health Policy will be incorporated into lectures, discussions and seminars.
- To introduce students to the economics of pricing and

reimbursing pharmaceutical products, to explore different models of pricing and reimbursing medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing, among others.

Teaching: This course will be delivered online over a period of five weeks in Lent Term as a combination lectures and seminars, totalling a minimum of 20 hours. Students will have access to lecture material delivered as short online videos. Seminars will take place online and students will work in small groups to present topics and lead discussion. Students will also take part in discussion on case studies set by the course lead.

Formative coursework: The formative assessment will be a 1,000 word outline of the summative assessment essay question.

Indicative reading: E Mossialos, M Mrazek & T Walley (eds), *Regulating Pharmaceuticals in Europe. Striving for Efficiency, Equity and Quality*, Buckingham, Open University Press (2004); S O Schweitzer, *Pharmaceutical Economics and Policy*, Oxford University Press (2006); W S Comanor, 'The Political Economy of the Pharmaceutical Industry', *Journal of Economic Literature*, XXIV (September): 1178-1217 (1986); F M Scherer 'The Pharmaceutical Industry', Chapter 25, in: A J Culyer & J P Newhouse (Eds), *Handbook of Health Economics*, Vol 1, Amsterdam, Oxford, Elsevier, 2000. Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Essay (80%, 2000 words) and continuous assessment (20%) in the LT.

HP4B2E Half Unit

Health Care Quality Management

This information is for the 2020/21 session.

Teacher responsible: Dr Irene Papanicolas COW.3.04

This course will be led by Dr. Michael Holland, Medical Director and Consultant Psychiatrist, South London and Maudsley NHS Foundation Trust.

Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: An introduction and overview of quality improvement methodology as used in healthcare settings internationally. The course will cover the following areas:

- 1) History of quality management: The course will start with an overview of key theories in quality management such as those described Taylor, Shewhart, Deming and Juran. An overview of quality assurance systems used in healthcare, such as ISO 9000, Magnet, Baldrige award and their role in quality improvement. It will also include a discussion and overview of value-based healthcare.
- 2) A critical assessment of the mainstream schools of thought of quality as part of the production process - this will include a study of the relationship between supply chain procurement management and quality as well as the requirements for good production models and the critique of evidence-based decision-making in the clinical setting
- 3) Quantitative methods in quality management - This course will examine a number of tools for quality management purposes - both how to do them as well as how they fit into the various schools of thought on quality management. It will cover statistical process control which is a method of statistical analysis of time series data that is used in quality management. This method shows whether there is variability in processes and gives the user an ability to both measure improvements and declines in performance of both processes and outcomes and to understand whether processes are performing within acceptable limits. An overview of the quality improvement methodology known as Design of Experiments will also be given. The role of case mix adjustment in quality assessment will also be discussed.

4) Process Mapping - Understanding the value and power of mapping processes both at a systems level and at the individual process level. They will also be given an example of a process map from a healthcare environment to work on optimising.

5) Theories of capacity and flow management and examples of this in both in-patient and outpatient settings will be discussed. This will also include how DRG/HRG payment has a role within organisations of capacity management.

6) A critical overview of Lean, Six Sigma and Model for Improvement. While these models can be useful in healthcare management, these are not deep philosophies of organisation and many of the things which make healthcare unique (e.g. asymmetry of information, difficulty of measuring quality, patient behaviour and societal preferences for fairness) are sometimes not accounted for in these models.

Teaching: 5 lectures (5 x 2 hours) and 5 workshops (5 x 2 hours). The 5 workshops will focus on analysing case studies with a view of giving students a practical understanding of approaches to quality management in healthcare settings.

Formative coursework: A case study will be provided for the students to analyse and write an essay answering questions relating to it. Feedback will be provided on this essay by the seminar leader.

Indicative reading: Donabedian, A. (1966). "Evaluating the quality of medical care." *The Millbank Memorial Fund Quarterly* 44(3): 166-203. Hackman, J. Lee; *Harvard Business Review*, Oct 2013; *The Strategy That Will Fix Health Care*

Assessment: Essay (50%, 2500 words) and essay (50%, 2500 words).

Two 2,500 word case study essays (50% each)

HP4B3E Half Unit

Measuring Health System Performance

This information is for the 2020/21 session.

Teacher responsible: Dr Rocco Friebe

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: This course aims to present a framework to discuss the opportunities and challenges with performance measurement in health care, examine the various dimensions and levels of health system performance, identify the measurement instruments and analytic tools needed, and examine the implications of these issues for policy makers and regulators. Lectures generally focus on measuring health system performance in high-income countries but draw on the experience of other countries where relevant.

After taking this course students are expected to:

- understand the principles of performance measurement
- appreciate the challenges, approaches, and opportunities in performance measurement in four dimensions: population health, patient outcomes, equity, quality and appropriateness of care, and

productivity

- understand the methodological issues facing performance measurement relating to risk adjustment, developing composite measures, and measuring attribution and causality
- identify key issues relevant to policy makers relating to: developing targets and reporting on progress to the public, and developing incentives to improve performance

Teaching: This course will be delivered online over a period of five weeks in Lent Term as a combination lectures and seminars, totalling a minimum of 20 hours. Students will have access to lecture material delivered as short online videos. Seminars will take place online and students will work in small groups to present topics and lead discussion.

Formative coursework: The formative assessment will be a 750 word draft of the first section of the essay

Indicative reading: Papanicolas I and Smith PC (Eds), Health System Performance Comparison: An agenda for policy, information and research. Maidenhead: Open University Press, 2013. PC Smith, E Mossialos, I Papanicolas S. Leatherman (Eds), Performance measurement for health system improvement: experiences, challenges and prospects. Cambridge University Press, 2010; Institute of Medicine, Crossing the Quality Chasm: A New Health System for the 21st Century. Washington, DC, National Academies Press, 2001; OECD, Measuring up: improving health system performance in OECD countries. Paris: OECD, 2002. World Health Organization (WHO), (2000) The world health report 2000: Health systems: Improving performance, Geneva: WHO Publications

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Essay (100%, 3000 words).

HP4B4E Half Unit

Principles of Evidence-Based Medicine and Clinical Trials

This information is for the 2020/21 session.

Teacher responsible: Dr Irene Papanicolas COW3.04

In addition, Professor Allan Hackshaw (Deputy Director, Cancer Research UK and UCL Cancer Trials Centre, UCL) will be teaching on this course.

Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: A large amount of medical research is conducted, with variable quality. Also, health claims are frequently reported in the media, and it can be difficult to determine which is based on reliable evidence and which is not. It is therefore essential to be able to interpret study results and conclusions appropriately, in order to change clinical practice or develop public health policy. This is achieved by Evidence-Based Medicine. The module will enable students to evaluate risk factors for disease or early death, and methods of disease prevention or treatment. The module will provide students with practical skills in the following key areas:

- Understanding the different types of research that can be conducted in humans and their strengths and limitations, i.e. observational studies and a focus on clinical trials.
- Interpreting research results and conclusions using aspects of epidemiology and medical statistics, and how to communicate study findings.
- Reading and understanding published journal articles or pharmaceutical company reports.
- Examining the efficacy and safety of health care interventions (an important part of a complete health economic evaluation of a clinical trial).
- Familiarity with systematic reviews (i.e. how several studies are

combined, and the importance of looking at the evidence as a whole).

Teaching: 10 interactive seminars/workshops, each 2-3 hours long.

Formative coursework: Students will be given two short exercises before the course begins, via Moodle, to help prepare for the course. The tutor will go over these during the contact week, and address any queries from the students. However, detailed written answers are provided, so the students can access these if they undertake any of the exercises after the contact week. The tutor is also available for one-to-one email contact with any student.

Indicative reading: - Hackshaw A. A concise guide to clinical trials. BMJ Books, Wiley-Blackwell, first edition 2009.

- Hackshaw A. A concise guide to observational studies in healthcare. BMJ Books, Wiley-Blackwell, first edition 2015.

- Greenhalgh T. How to Read a Paper: The Basics of Evidence-Based Medicine. BMJ Books, Wiley-Blackwell, fourth edition, 2010. Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle.

Assessment: Coursework (50%) and coursework (50%) in the LT. There will be two pieces of coursework based on a clinical trial of an intervention or a risk/causal factor, in the form of:

- a written assignment in the form of a PowerPoint slide deck (about 25 slides) and a statement of 400 words of further discussion and conclusions, based on a published paper and associated media news article of the paper (50%)
- 4-5 questions specific to a published paper with answers requiring 1-3 paragraphs each (50%).

HP4B5E Half Unit

Statistical Methods in Health Care Economic Evaluation

This information is for the 2020/21 session.

Teacher responsible: Dr Maria Raikou

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: This course develops the statistical and modelling techniques necessary to apply economic evaluation to the health care sector.

Introduction to statistical methods, linear regression analysis, logistic regression analysis, survival analysis for health outcomes, survival analysis for treatment costs, economic evaluation and clinical trials. Estimation of confidence intervals for cost-effectiveness ratios. Transformation of ratios - net benefit approach. Missing data, parametric and non-parametric approaches. Presentation of analysis, acceptability curves.

Teaching: 13 hours of lectures and 8 hours of seminars (computer based)

Formative coursework: In-class exercise during seminar time.

Students will receive feedback on it from their seminar leader after completion.

Indicative reading: The following are basic reading for the course: M Drummond & A McGuire (Eds), Economic Evaluation in Health Care: Merging Theory with Practice, OUP, 2002; M Drummond, B O'Brien, G Stoddart & T Torrance, Methods for the Economic Evaluation of Health Care Programmes, 2nd edn, OUP, 1997; M Gold, J Siegel, L Russell & M Weinstein, Cost-Effectiveness in Health and Medicine, OUP, 1996; M Johannesson, Theory and Methods of Economic Evaluation in Health Care, Kluwer, 1996; P Johannesson, Evaluating Health Risks: An Economic Approach, CUP, 1995.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take-home assessment (100%).

This is the same course as HP425 Statistical Methods in Health Care Economic Evaluation (H) but it has different teaching and assessment arrangements.

HP4B7E Half Unit

Advanced Health Economics

This information is for the 2020/21 session.

Teacher responsible: Prof Alistair Mcguire COW 2.02

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The course will cover: international comparisons of health care expenditure, health care insurance, contract theory applied to the health care sector (including principal-agent theory and incentive payment mechanisms), equity in health care, health behaviour and an introduction to econometric analysis applied to health care data.

Teaching: This course will be delivered online over a period of five weeks in Michaelmas Term as a combination lectures and student presentations, totalling a minimum of 19 hours. Students will have access to lecture material delivered as short online videos.

Formative coursework: The formative assessment will take place as an in-class quiz

Indicative reading: Culyer, A.J., and Newhouse, J.P., (eds.), 2001, Handbook of Health Economics Volumes 1A & 1B, (North-Holland, Amsterdam); Zweifel, P. and Breyer, F., 1997, Health Economics, (OUP, Oxford).

Assessment: Essay (80%, 2000 words) and continuous assessment (20%).

HP4B9E Half Unit

Dissertation in Health Economics, Policy and Management

This information is for the 2020/21 session.

Teacher responsible: Dr Irene Papanicolas COW3.04

Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim of the dissertation is for students to pursue an independent piece of research that will contribute to the field of health economics, health policy or health management. The contribution of the work to the chosen field must be made clear. The output will be a piece of work of 5000 words or less that is written in an article format that is suitable for submission to a peer reviewed journal. Students must obtain the approval of their supervisor before embarking on any research.

Arrangements for supervision

Students' tutors will act as their dissertation supervisor in the first instance. If the specific topic a student wishes to cover for his/her dissertation requires a different supervisor, a MSc programme director can arrange this change. The dissertation supervisor will advise the student, help provide information and bibliography and identify likely problems with the proposed research.

Teaching: The dissertation process is supported by three teaching sessions.

Formative coursework: Students will have an opportunity to submit a dissertation proposal for feedback in January of their second year. In addition students have the opportunity to receive feedback on a 1000 word section of their dissertation from their supervisor in the June sessions of their second year.

Assessment: Dissertation (100%, 5000 words).

The dissertation will be electronically submitted to the department by the specified deadline. The word limit for the dissertation is 5,000 words (excluding references and tables) and it must be in a

journal article format.

HP4C1E Half Unit

Economic Analysis for Health Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Andrew Street COW 1.02

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: The course will serve as an introduction to major issues in the economics of health and health care. It will provide participants with a strong understanding of the role economics can play in health policy and health system administration. It will provide a framework with which to understand the demands placed on the health care system, the changing nature of health care supply and delivery, the interactions between patients and providers of health care, and the performance and productivity of the health system. Participants will also be introduced to essential statistical concepts in the evaluation of clinical interventions. Seminar sessions will focus on current policy debates in health care drawing on the theory and evidence from the lectures.

Teaching: This will include 10 x 90 minutes of interactive lectures and 5 x 120 minutes of case-study based seminars.

Formative coursework: An 800-word "mock" blog entry for The Conversation, which covers policy-relevant issues and often has academic contributors. A series of topics will be provided to students to choose from.

Indicative reading: Course textbook

Bhattacharya, Jay, Timothy Hyde, and Peter Tu. Health economics. Palgrave Macmillan, 2013.

Useful pre-readings

Geoffard P-Y. Incentive and Selection Effects in Health Insurance. Chapter 10 Jones A (ed) Elgar Companion to Health Economics, second edition, Edward Elgar Publishing, Cheltenham 2012.

Iversen T, Luras H. Capitation and Incentives in Primary Care Chapter 26 Jones A (ed) Elgar Companion to Health Economics, second edition, Edward Elgar Publishing, Cheltenham 2012.

Nyman JA. The Value of Health Insurance. Chapter 9 Jones A (ed) Elgar Companion to Health Economics, second edition, Edward Elgar Publishing, Cheltenham 2012. Pocock SJ et al. Making Sense of Statistics in Clinical Trial Reports: Part 1 of a 4-Part Series on Statistics for Clinical Trials. J Am Coll of Cardiol. 2015;66(22):2536-49. Rice T. The Physician as the Patient's Agent. Chapter 25 Jones A (ed) Elgar Companion to Health Economics, second edition, Edward Elgar Publishing, Cheltenham 2012.

Assessment: Essay (70%) and presentation (30%).

The two assessments will be:

2. Individual-based video presentation (30%). Students will be asked to record a video on their own on a topic that will be assigned to them. This will assess the students' ability to describe, summarise, apply, critically appraise, and communicate the concepts learned in class to a particular case study.

1. Summative essay (70%) of 2500 words. This will be a written discussion of the topic covered in the presentation. This assessment will evaluate the students' ability in summarising, applying, and critically appraising the relevance of health economics concepts to a health policy issue.

HP4C2E Half Unit

Quality and Outcomes in Cardiovascular Sciences

This information is for the 2020/21 session.

Teacher responsible: Dr Rocco Friebel COW 2.09

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular

Sciences. This course is not available as an outside option.

Course content: Against a backdrop of great technological advances and delivery system innovations, healthcare systems are facing daunting challenges. Over the past half-century, research on cardiovascular diseases has manifested remarkable advances in the prevention and treatment of cardiovascular diseases. Yet, great challenges remain, primarily due to a lack of strong research evidence about how best to improve the quality, outcomes, and efficiency in health systems with a focus on cardiovascular diseases. Outcomes research aims to produce such evidence. In addition to briefly reviewing key epidemiological trends in cardiovascular diseases in Europe and globally, this course will introduce key 'evidence-practice' gaps in cardiovascular diseases. The first part of the course provides an overview of the definition of quality, its key components, and its measurement in different health care systems. The second part offers a critical perspective on the literature evaluating quality improvement interventions focused on the cardiovascular disease field. The third part focuses on the basics of study design for evaluating quality improvement interventions, programmes, and policies, distinguishing between strong and weak research designs.

The intended learning outcomes of this course are the following:

- Describe the epidemiological trends in cardiovascular disease
- Summarise the primary components of quality in health care
- Explain the main limitations of the literature evaluating quality improvement interventions
- Define the principal threats to validity in studies evaluating quality
- Design an evaluation strategy for a quality improvement policy or intervention in a group setting
- Critically evaluate empirical evaluations of quality and outcomes in health care research in oral and written form

Teaching: The course will comprise 6 x 2hour lectures and 6 x 2 hour seminars.

Students in MT will have access to lecture material delivered as short online videos. Seminars will take place online and students will work in small groups on structured learning activities set by the course lead.

Formative coursework: Formative feedback on group presentations

Indicative reading: Krumholz HM. Outcomes research: generating evidence for best practice and policies. *Circulation* 2008;118:309–18. Ellwood PM. Shattuck lecture – outcomes management: a technology of patient experience. *N Engl J Med* 1988; 318: 1549–56. Clancy CM et al. Randomized, controlled trials, observational studies, and the hierarchy of research designs. *N Engl J Med*. 2000;342:1887–92.

Assessment: Essay (100%, 3000 words) in the ST.

HP4C3E Half Unit Economic Evaluation in Health Care

This information is for the 2020/21 session.

Teacher responsible: Mr Alexander Carter COW 2.10

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: In the health sector, decision makers are regularly faced with the challenge of allocating finite resources in an optimal manner. Economic evaluation (or cost-effectiveness analysis) is used to formalise the process of decision-making by estimating the expected costs and benefits from alternative scenarios or interventions. Decision makers use evidence from economic

evaluations to make specific recommendations for coverage, reimbursement, and pricing decisions for a variety of health interventions, and to define best practice. The course introduces principles and practices for measuring the costs and effects of interventions, using measures such as Quality-Adjusted Life Years (QALYs) and Disability-Adjusted Life Years (DALYs). The course will enable candidates to understand and apply economic evaluation methods and it will provide a solid foundation for exploring more advanced approaches. With a focus on clinical decision making, candidates will learn transferable skills about the design and execution of economic evaluations.

Teaching: This course will be delivered online over a period of five weeks in the Michaelmas Term and also the Summer Term. The course will be delivered as a combination lectures and seminars, totalling a minimum of 20 hours.

Students in MT will have access to lecture material delivered as short online videos. Seminars will take place online and students will work in small groups on structured learning activities set by the course lead.

Students in ST will have teaching delivered over 1 week during the June 2021 teaching block.

Formative coursework: The formative assessment will require students to prepare a group presentation critically appraising a published study based on a few questions provided by the course leader.

Indicative reading: Drummond M et al. *Methods for the Economic Evaluation of Health Care Programmes*. Oxford, OUP, 2005.

Drummond M et al. *Economic Evaluation in Health Care: Merging Theory with Practice*, Oxford, OUP, 2002. Gray A. *Applied Methods of Cost-effectiveness Analysis in Healthcare (Handbooks in Health Economic Evaluation)*, Oxford, OUP, 2011. Weinstein MC et al. Foundations of cost-effectiveness analysis for health and medical practices. *N Eng J Med*. 1977; 296 (13):716–21. Russell LB et al. The role of cost-effectiveness analysis in health and medicine. *JAMA*. 1996; 276 (14): 1172–77.

Assessment: Critical evaluation (80%) and report (20%).

Short report, proposal for an economic evaluation of a cardiovascular intervention (20%, 700 words).

Critical appraisal of a published economic evaluation from the cardiovascular sciences (80%, 2,000 words + completion of the CHEERS checklist).

HP4C4E Half Unit Systematic Review and Meta-analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Huseyin Naci COW 3.01

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: Systematic review and meta-analysis methods are increasingly used to evaluate the relative benefits and harms of healthcare interventions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need experts equipped with the methods of reviewing and synthesizing the existing body of evidence.

This course will be focused on the principles of reviewing and synthesizing the existing body of literature. The course will first provide the rationale for adopting a systematic approach for evidence review and synthesis. It will then equip students with the methods to undertake risk of bias assessments of individual randomized controlled trials and also collections of randomized controlled trials. In addition to providing an overview of methods for quantitatively synthesizing multiple randomized controlled trials in meta-analysis, the course will present the opportunities and challenges of using evidence for decision-making in health care.

Learning outcomes:

- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual randomized controlled trials and collections of randomized controlled trials
- Critically evaluate the internal validity of randomized controlled trials
- Assess heterogeneity in a collection of randomized controlled trials
- Critically appraise a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 22 hours. As well as access to lectures, students will also work in small groups to complete weekly self-directed learning activities and meet with seminar leads for feedback on their progress. Computer workshops will be held to introduce students to systematic review and meta analysis software.

Formative coursework:

- Course convener will provide written feedback on project outlines

Indicative reading: Cochrane Handbook for Systematic Reviews of Interventions (version 5.1.0, updated March 2011).

Institute of Medicine. Finding what works in health care: standards for systematic reviews. 23 March 2011. Sutton AJ et al. Methods for Meta-analysis in Medical Research. Wiley, Chichester, UK, 2000. Cook DJ. Systematic reviews: synthesis of best evidence for clinical decisions. *Annals of internal medicine* 1997;126(5):376–80. Jansen JP et al. Is network meta-analysis as valid as standard pairwise meta-analysis? It all depends on the distribution of effect modifiers. *BMC medicine* 2013;11(1):159. Jansen JP et al. Interpreting indirect treatment comparisons and network meta-analysis for health-care decision making: report of the ISPOR Task Force on Indirect Treatment Comparisons Good Research Practices: part 1. *Value Health* 2011;14(4):417–28.

Assessment: Essay (80%, 3000 words) and continuous assessment (20%).

Students will work in small groups to design a systematic review and meta analysis protocol. The assignment will then be written up and submitted individually. The word count is 3000 words (80% of the final mark).

Students will also undertake continuous assessment during the course in the form of quizzes (20% of the final mark)

HP4C5E Half Unit

Using Health Economics to Analyse and Inform Policy and Practice

This information is for the 2020/21 session.

Teacher responsible: Prof Andrew Street COW 1.02

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: The health care sector is extremely complex, and this gives rise to concerns about how the health system should be organised, how incentives should be designed, and how performance should be evaluated. The objective of the course is to give students an introduction to how health systems are constructed, and how the various parts of the system interact; the role of regulation, resource allocation, payment arrangements, and performance measurement; the complexities of evaluating policy and performance; and the contribution that health economics can make to the evaluation and development of health policy. Participants are introduced to variety of econometric methods as the course progresses.

Teaching: This course will be delivered online over a period of five weeks in Lent Term, as a combination lectures and seminars. The course will be delivered in a minimum total of 25 hours. Students will have access to lecture material delivered as short online

videos. Seminars will take place online and students will work in small groups on structured learning activities set by the course lead.

Formative coursework: The formative assessment is an outline of the presentation.

Indicative reading: Bridgewater B, Hickey GL, Cooper G, Deanfield J, Roxburgh J. Publishing cardiac surgery mortality rates: lessons for other specialties *BMJ* 2013; 346 :f1139. Busse, R, et al (2013), Diagnosis Related Groups in Europe: Moving Towards Transparency, Efficiency, and Quality in Hospitals? *British Medical Journal*, vol 346, f3197, pp. f3197. DOI: 10.1136/bmj.f3197. Glazer J and McGuire TG. Optimal Risk Adjustment. Chapter 26 Jones A (ed) *Elgar Companion to Health Economics*, Edward Elgar Publishing, Cheltenham 2006. Mason, A., Goddard, M., Weatherly, H., & Chalkley, M. (2015). Integrating funds for health and social care: an evidence review. *Journal of Health Services Research & Policy*, 20(3), 177-188. Smith PC, Street A. Concepts and Challenges in Measuring the Performance of Health Care Organizations Chapter 30 Jones A (ed) *Elgar Companion to Health Economics*, Edward Elgar Publishing, Cheltenham 2006. Williams A. Economics of coronary artery bypass grafting. *Br Med J (Clin Res Ed)* 1985; 291 doi: <https://doi.org/10.1136/bmj.291.6491.326>

Assessment: Essay (80%, 4500 words) and continuous assessment (20%) in the LT.

The course will be assessed on the basis of a 4500 word essay on a specific topic (80% of the final mark). In writing this essay, students will be able to demonstrate and synthesise what they have learned from the lectures, reading material, group discussions and their own independent research and thinking.

Students will also undertake continuous assessment during the course (20% of final mark)

HP4D1E Half Unit

Introduction to Management in Health Care

This information is for the 2020/21 session.

Teacher responsible: Dr Brittany Jones NAB 4.04

Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: The course aims to introduce students to the main principles of management and strategy and related issues that impact on organisational change, group decision making, innovation and leadership. Key models and academic tools will be presented and their application to real world situations discussed. The course aims to give students a strong academic understanding and also enable them to apply this knowledge to their practice.

The course outline is below

1. Strategy and Managerial Work

In this session, we will explore the development of the modern practice of 'strategy' and what it means today. Along the way, we will show how organisational practices like planning and emerging ideas in academia, especially in economics, to develop new tools and ways of thinking that transformed the practice of management in the late 20th century. The development of strategic management and planning tools and the competitive environment in which they emerged will be discussed and the application of these tools will be examined in competitive markets.

2. Innovation Management

This part of the course will introduce the topic of innovation management. In particular, it introduces participants to the conceptualization of innovation as a means to affect the competitive process. Participants will be introduced to the basics of the competitive process and the effect of innovation on the competitive process. Participants will be active in analysing the competitive process surrounding their organization and the

competitive position their organization occupies within it and activities will be used to promote thinking about how innovations, small or large, can defend and/or improve their competitive position.

3. How Individuals and Groups Organise and Make Decisions and Take Risk

This part of the course will introduce issues related to working as individuals within an organisation and as a group. It will look at the "benefits" and "harms" of group decision making processes – especially with reference to health care where collaborative multi-disciplinary teams are commonplace – and also discuss how group decisions making can be undermined by systematic biases.

4. Behaviour Change and Social Marketing

This part of the course will introduce the drivers and mechanisms of behaviour change in organisations. In particular, we will discuss how different organizational-level factors may influence behaviour change, including resistance to change from various levels and sustainability of changes across time, and how organizational behaviour change can be measured. Models of organisational behaviour change will be introduced and the principles of managing and leading change in established systems will be discussed with a focus on the stages of planning and implementation of change. Alongside this appropriate tools and resources will be introduced to aid future organisational changes. The coverage of social marketing will deal with the formulation and execution of strategies designed to influence behaviour change amongst groups at risk of cardiovascular disease.

5. Culture and Leadership

This part of the course will explore the definition of culture within organisations and leaders' role in creating and supporting successful teams. Key components of leadership, like the ability to establish direction and motivate and inspire a workforce as well as handle relationships with external stakeholders, will then be introduced with a consideration of how they affect culture and working practices.

Teaching: This course will be delivered as a combination lectures and seminars, totalling a minimum of 20 hours.

Formative coursework: Students will be expected to produce 1 essay.

The formative assessment is a 500 word outline of the summative assessment essay question.

Indicative reading: Mintzberg, H., Ahlstrand, B. and Lampel, J. (2008). *Strategy Safari: The Complete Guide Through the Wilds of Strategic Management* (Second Edition). Prentice-Hall. Chapters 1 and 4. Whittington, R. (2000). What is Strategy—and Does it Matter? (Second Edition) Thomson International. Chapters 1, 2 and 4. Barney, J. 1995. Looking Inside for Competitive Advantage. *The Academy of Management Executive*. 9(4): 49-61. Christensen, C.M., Raynor, M.E., McDonald, R. 2015. What Is Disruptive Innovation? *Harvard Business Review*. December Issue (available online at <https://hbr.org/2015/12/what-is-disruptive-innovation>)

Assessment: Essay (100%, 2500 words).

The course will be assessed on the basis of a 2500 word essay on a specific topic. In writing this essay, students will be able to demonstrate and synthesise what they have learned from the lectures, reading material, group discussions and their own independent research and thinking. The content of the assessments will lead on from the simulation exercises that have been used in the seminars and students will be encouraged to use topics they have identified during reflections on their own work. Formative assessment will be based on a 500 word outline of the essay. This will give students an opportunity to develop their thoughts ahead of the summative assessment and will allow feedback from course teachers that will guide students when they work on their longer answers.

Due to the executive nature of the course and the 1 week nature of the module, this method of assessment will allow students to work away from campus alongside their professional roles.

HP4D2E Half Unit

Principles of Health Technology Assessment

This information is for the 2020/21 session.

Teacher responsible: Dr Panagiotis Kanavos COW 1.05

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: Health Technology Assessment a multidisciplinary process that summarises information about the medical, social, economic, and ethical issues related to the use of a health technology in a systematic, transparent, unbiased, and robust manner. Health Technology Assessment differs in its governance, data and evidence requirements, assessment methods, and operational arrangements across different settings and contexts. This course is aimed at introducing the key principles of Health Technology Assessment, its operational modalities, the different models of value assessment and how they link to decision-making.

Outline of the course is included below:

1. The role of Health Technology Assessment in health care decision making
2. Models of Health Technology Assessment and their application in different jurisdictions - a comparative perspective
3. Governance issues (position in health care decision-making, topic selection, assessment process, stakeholder involvement)
4. Data and evidence requirements for value assessment
5. Health Technology Assessment and value assessment: focus on clinical benefit assessment
6. Health Technology Assessment and value assessment: focus on clinical-cost-effectiveness
7. Assessment methods in Health Technology Assessment
8. Explaining similarities and differences in Health Technology Assessment recommendations – a toolkit
9. The role of multiple criteria decision analysis in value assessment
10. Beyond Health Technology Assessment: links to risk-sharing and special purchasing arrangements

Teaching: This course will be delivered as a combination lectures and seminars, totalling a minimum of 20 hours. As well as access to lectures, students will work in small groups to present topics and lead discussion in seminars. Students will also take part in discussion on case studies set by the course lead.

Formative coursework: The formative assessment will be a 1000 word outline of the essay

Indicative reading: Chalkidou, K., Tunis, S., Lopert, R., Rochoix, L., Sawicki, P. T., Nasser, M., & Xerri, B. (2009). Comparative Effectiveness Research and Evidence-Based Health Policy: Experience from Four Countries. *Milbank Quarterly*, 87(2), 339-367. Banta, H. D., & Luce, B. R. (1993). Health care technology and its assessment: an international perspective. *Drummond, M. F., Schwartz, J. S., Jönsson, B., Luce, B. R., Neumann, P. J., Siebert, U., & Sullivan, S. D. (2008). Key principles for the improved conduct of health technology assessments for resource allocation decisions. International journal of technology assessment in health care, 24(03), 244-258. Sorenson, C., Drummond, M., & Kanavos, P. (2008). Ensuring value for money in health care: the role of health technology assessment in the European Union (No. 11). WHO Regional Office Europe. Sorenson, C. (2010). Use of comparative effectiveness research in drug coverage and pricing decisions: a six-country comparison. *Issue Brief (Commonwealth Fund)*, 91, 1-14.*

Assessment: Essay (80%, 2000 words) and continuous assessment (20%).

HP4D5E Half Unit

Research Design for Evaluating Health Programs and Policies

This information is for the 2020/21 session.

Teacher responsible: Dr Elisabetta De Cao COW 3.06 and Dr Pepita Barlow

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The objective of this course is to teach students how to design and critically appraise research studies evaluating policies, programmes, and interventions.

This course will provide an overview of the principles and models of evaluation, and the role of theories, concepts, and hypotheses. In terms of research design, it will cover study design choices in light of bias, validity and other design trade-offs. The core of the course will focus on experimental and quasi-experimental designs for evaluating health interventions, programmes and policies aimed at achieving high quality care, reducing costs, and improving health outcomes. Data and measurement considerations for quantitative studies will be discussed alongside briefly touching upon qualitative methods, mixed-methods and triangulation for interpreting findings and taking a critical approach to the results of evaluation. The course will conclude with practical and ethical issues when undertaking evaluation studies.

Teaching: This course will be delivered as a combination lectures and seminars, totalling a minimum of 20 hours. As well as access to lectures, students will work in small groups to complete group exercises set by the course lead during seminars.

Formative coursework: Students will receive feedback on in-class group work and presentations

Indicative reading: Angrist, J. D. and Pischke, J-S. (2014) Mastering 'Metrics: The Path from Cause to Effect. Princeton University Press. Gertler, Paul J., Sebastian Martinez, Patrick Premand, Laura B. Rawlings, and Christel M. J. Vermeersch. (2016) Impact Evaluation in Practice, second edition. Evidence-Based Policy: A practical guide to doing it better. Oxford, UK: Oxford University Press. HM Treasury. 2011. The Magenta Book. Guidance for evaluation.

Assessment: Essay (80%, 2000 words) and continuous assessment (20%).

section then addresses the role of altruism and health, and health inequality aversion. Finally, the course discusses the role of nudge and reference points, alongside the cultural transmission and joint formation of health behaviours. A final section is devoted to study the specific behavioural mechanisms such as the role of behavioural spillovers and prevention failures, time and heuristics in health care use. Anchoring, reminders risk and preferences, risk perceptions. Hassle costs and insurance misunderstandings.

Teaching: The course will be delivered through a combination of lectures and seminars totalling a minimum of 24 hours. Students will take part in workshops which include a small group group and discussion of case studies. Groups will prepare a short presentation of a question that builds on content delivered in the lectures.

Formative coursework: It is expected students to participate in organised discussion during workshop preparations and will prepare for the workshop presentations.

Indicative reading:

• Hanoch, Y, A Barnes and T Rice (2017) Behavioural Economics and Healthy Behaviors: Key Concepts and Current Research. Routledge.

Assessment: Project (100%, 3000 words).

HP4E1E Half Unit

Global Health Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Clare Wenham COW 1.03 and Dr Justin Parkhurst COW 2.08

Availability: This course is compulsory on the Executive MSc in Health Economics and Policy (LSE and Chicago). This course is not available as an outside option.

Course content: Health policy is no longer purely a government activity, but globalisation and global organisations have impacted on the nature of global health, and the policies created to manage the health needs of the global population. This module critically examines global health policy and normative shifts in understanding global health which impact upon it. The multi-actor framework of global health actors involved in the provision and practice of health policy now includes United Nations agencies (WHO, UNICEF, UNAIDS etc), a number of NGOs, civil society organisations, private sector, foundations, public private partnerships. Each actor has their own priorities for setting the global health agenda, and this module examines the role of each and their impact on health policy at national, regional and global levels. The module will analyse a range of case studies of global health events and global health policies and the governance arrangements made by them. In doing so, this module will draw on contributions from international relations, political science, sociology and public health research

Teaching: 12 hours of lectures and 8 hours of seminars in the MT. All students will have the opportunity to participate in additional lectures undertaken by external guests. These lectures will be run twice a week from 6pm to 8pm during the teaching period at LSE. In addition, students will be given the option to participate in a three-hour webinar hosted at least 10 days before the due date of the take-home assessment. The webinar will consist of two-hours of lectures and one hour of question time.

Formative coursework: Students will be expected to produce 1 essay in the MT.

1 X 1000 word essay. Students will be asked to submit a short 1000 word essay (on the topic that they are writing on for the summative, but a different question) at the end of January. These will be graded and feedback given to students. This allows students to get valuable experience of writing at MSc level at LSE, and the expectations of the summative assessment. This then allows students to take this feedback and use it in their writing of the summative work. For example, if a student's formative work flagged particular concerns this could be addressed ahead of the

HP4D6E Half Unit

Behavioural Insights for Health Incentive Design

This information is for the 2020/21 session.

Teacher responsible: Dr Joan Costa-Font COW 1.06

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The course is structured in three sections. The first section introduces behavioural incentives, cognitive biases, behavioural market and political failure in the health and health care. Methods for behavioural incentive design. Health perceptions learning and behaviour formation. Rational learning, bounded learning, Bayesian learning, Social learning, Emotional learning. A second section discusses specific behavioural incentives. More specifically, monetary and social incentives in explaining health behaviours. It discusses the effects of personal budgets, social norms social preferences. The section covers identity models, as well as the role of envy, guilt and regret. Next, it discusses the effect of narratives, and the effect of esteem and stigma. The

summative submission.

Assessment: Essay (100%, 4000 words) in the LT.

1 x 4000 word essay due in LT (after lecture/seminar programme in December) – 100% of grade

Students will be asked to pick one essay question from a list of 8 topics. They are also given the option to choose their own essay topic (after discussion with their seminar leader) if they would prefer. The questions will be broad, allowing for student individuality to come across in their answers. For example: What role should the WHO play in the future of global health policy?

HP4E2E Half Unit Paying for Healthcare

This information is for the 2020/21 session.

Teacher responsible: Prof Elias Mossialos COW 2.12 and Prof Andrew Street COW 1.02

Availability: This course is compulsory on the Executive MSc in Health Economics and Policy (LSE and Chicago). This course is not available as an outside option.

Course content: This course aims to introduce students to a comparative approach to analysing the development of health care financing, both in theory and in practice, with an emphasis on critical assessment of current and future policy options and issues. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in developed countries, given these systems are the most advanced, have extensive readily available literature, and are based on best practice principles. However, healthcare system financing in developing countries will also be discussed, albeit to a lesser extent.

Teaching: 15 hours of lectures and 6 hours of seminars in the MT. In addition, students will be given the option to participate in a webinar hosted at least 10 days before the due date of the take-home assessment.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students will be provided with an option to complete a practise essay (up to 1,000 words), with topics provided by the lecturer. The essay will be reviewed by a faculty member and comments will be provided to students to assist them in their final essay.

Indicative reading: WHO, World Health Report 2010 - Health systems financing: the path to universal coverage (2010) E Mossialos, A Dixon, J Figueras & J Kutzin (eds), *Funding health care: options for Europe*, Open University Press (2002). T Rice, *The economics of health reconsidered*, Health Administration Press (3rd edn, 2009). JS Skinner, A Chandra, DC Goodman, ES

Fisher. The elusive connection between health care spending and quality. *Health Affairs* 2009;28(1):w119–23. PC Smith, E Mossialos, I Papanicolas, S Leatherman (eds). *Performance Measurement for Health System Improvement: Experiences, Challenges and Prospects*. Cambridge: Cambridge University Press, 2010

Assessment: Take-home assessment (100%) in the LT.

The assessment is a take-home assessment. It will outline six topics covering the course content. Students will be required to complete two of the six topics, which will need to be at least 1,500 words in length.

HP4E3E Half Unit Evidence Review and Synthesis

This information is for the 2020/21 session.

Teacher responsible: Dr Huseyin Naci COW 3.01

Availability: This course is compulsory on the Executive MSc in Health Economics and Policy (LSE and Chicago). This course is not available as an outside option.

Course content: The content for this course will closely parallel HP4C4E and HP407, which are taught by the same instructor and offered on the Executive MSc Health Economics, Outcomes and Management in Cardiovascular Sciences, and the full-time MSc programmes (Global Health, International Health Policy, and Health Policy, Planning and Financing), respectively.

Evidence review and synthesis methods (such as systematic reviews and meta-analyses) are increasingly used to evaluate the relative benefits and harms of healthcare interventions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need individuals equipped with the methods of reviewing and synthesising the existing body of evidence by performing systematic reviews and meta-analyses.

This course will be focused on the principles of reviewing and synthesising the existing body of literature. The course will have three components. The first will provide the rationale for adopting a systematic approach for evidence review and synthesis. It will equip students with the methods to undertake risk of bias assessments of randomised and non-randomised studies. The second component will focus on the quantitative synthesis of multiple studies in meta-analysis. The third component will discuss the opportunities and challenges of using evidence for decision-making.

The intended learning outcomes of this course will be the following:

- Describe the rationale for adopting a systematic approach to literature review
- Explain the principal threats to validity both in individual studies and collections of studies
- Critically evaluate the quality of randomised and non-randomised studies
- Assess heterogeneity in a collection of studies
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: 15 hours of lectures, 5 hours of seminars and 3 hours of computer workshops in the MT.

All students will have the opportunity to participate in additional lectures undertaken by external guests. These lectures will be run twice a week from 6pm to 8pm during the teaching period at LSE. In addition, students will be given the option to participate in a three-hour webinar hosted at least 10 days before the due date of the take-home assessment. The webinar will consist of two-hours of lectures and one hour of question time.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

Formative assessment:

- Students will receive feedback from the course instructor on their systematic review and meta-analysis protocol.
- The word-limit for the protocol (to be developed individually) is 1,000 words.
- This protocol is based on a non-assessed presentation delivered by a group of students at the last day of class and feedback received on this presentation by the course instructor and members of other groups. This protocol closely parallels PRISMA protocols that need to be developed and registered prior to starting a systematic review and meta-analysis focused on health care subjects.

Indicative reading:

- Petticrew, Mark, and Helen Roberts. Systematic reviews in the social sciences: A practical guide. John Wiley & Sons, 2008.

- Parkhurst, Justin. The politics of evidence: from evidence-based policy to the good governance of evidence. Routledge, 2016.

Assessment: Coursework (100%, 3000 words) in the LT.

Summative assessment:

- Systematic review and meta-analysis report resembling an original article submission to a peer-reviewed journal.

HP4E4E Half Unit

Cost-effectiveness in Health Care

This information is for the 2020/21 session.

Teacher responsible: Dr Ranjeeta Thomas COW 2.07

Availability: This course is compulsory on the Executive MSc in Health Economics and Policy (LSE and Chicago). This course is not available as an outside option.

Course content: This course will introduce students to the basic notions of economic evaluation including cost-benefit analysis, cost-utility analysis and cost-effectiveness analysis as applied to the health care sector. The course will discuss notions of welfare economics and extra-welfarism, the identification and measurement of resource costs when markets do not exist (shadow prices), the measurement of health outcomes (including life years gained and Quality Adjusted life-years gained (QALYs)), methods of discounting and the basic calculations involved in estimating the cost-effectiveness of new health care technologies, including Markov modelling. The definition of the incremental cost-effectiveness ratio (ICER) will be outlined, as will the treatment of uncertainty (including structural (model) uncertainty, sensitivity analysis, and multivariate, parameter uncertainty). The use of bootstrap elements to estimate standard errors for the ICER will be described. Presentation of results, including the use of Acceptability curves, will also be covered. Finally, the use of cost-effectiveness in pharmaceutical pricing and reimbursement will also be detailed.

Teaching: This course will be delivered online over a period of five weeks in Michaelmas Term as a combination lectures and seminars. Students will have access to lecture material delivered as short online videos. Seminars will take place online and students will work in small groups on structured learning activities set by the course lead.

Formative coursework: Students will be expected to produce 1 essay in the MT.

The formative assessment an essay (max 1000 words) critically appraising a published paper based on a few questions provided to students.

Indicative reading: Briggs, A. Claxton, K. and Schulpher, M, 2007, Decision Modelling for Economic Evaluation, Oxford, OUP. Drummond, M., Schulpher, M., Claxton, K., Stoddart, G. and Torrance, G., 2016, Methods for the Economic Evaluation of

Measuring costs for cost-effectiveness analysis in Jones, A., editor The Elgar Companion to Health Economics, Cheltenham, Edward Elgar

Assessment: Essay (80%, 3000 words) in the LT. Continuous assessment (20%) in the MT.

HP4E5E Half Unit

Economics of the Pharmaceutical Sector

This information is for the 2020/21 session.

Teacher responsible: Dr Panagiotis Kanavos COW 1.05

Availability: This course is compulsory on the Executive MSc in Health Economics and Policy (LSE and Chicago). This course is not available as an outside option.

Course content: The aim of this course is to introduce students to the economics of pharmaceutical sector and related policies and practices that affect national and international markets.

- To provide students with an understanding of basic features of pharmaceutical markets, how pharmaceutical markets work and how competition manifests itself in different parts of pharmaceutical markets.

- To illustrate to students how the pharmaceutical market is linked to the health care market, why it is often the focus of much regulation, and to help students understand the multidimensional goals of pharmaceutical policies.

- To introduce students to the economic and policy problems encountered in managing pharmaceutical markets and how to evaluate the impact of alternative policy approaches. The course will also give students some experience in critically evaluating the impact of policy on market outcomes.

- To facilitate consideration of various country-specific political, cultural and economic factors that may drive governments' approaches to pharmaceutical regulation. In this context, this course will help students consider the extent to which policies may be transferable.

- To enable students to analyse pharmaceutical markets from the perspectives of several main actors: governments, third party payers, the pharmaceutical industry, doctors, patients, pharmacists and wholesalers. Literature from Health Economics, Industrial Organisation and Health Policy will be incorporated into lectures, discussions and seminars.

- To introduce students to the economics of pricing and reimbursing pharmaceutical products, to explore different models of pricing and reimbursing medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing, among others.

- To introduce students to the principles of Health Technology Assessment (HTA), its implementation across settings, the link between HTA and decision-making as well as the similarities and differences in HTA coverage recommendations and the reasons for these, based on a methodological framework developed and applied specifically for this purpose.

Teaching: This course will be delivered online over a period of five weeks in Lent Term. The course will be delivered as a combination of lectures and seminars, totalling a minimum of 25 hours. Students will have access to lecture material delivered as short online videos. Seminars will take place online and students will work in small groups on structured learning activities set by the course lead.

Formative coursework: Formative coursework will comprise a 750 word essay outline to be submitted at the end of the course. Essay questions will mirror the type of question students will have to develop for their summative assessment.

Indicative reading:

Assessment: Essay (80%, 3000 words) and continuous assessment (20%) in the LT.

HP4E6E Half Unit

Measuring the Performance of Health Services and Systems

This information is for the 2020/21 session.

Teacher responsible: Dr Irene Papanicolas COW 3.04 and Prof Andrew Street COW 1.02

Availability: This course is compulsory on the Executive MSc in Health Economics and Policy (LSE and Chicago). This course is not available as an outside option.

Course content: Health systems are increasingly introducing more systematic ways to assess the performance of health services and health care organizations. This course considers the opportunities and challenges associated with measuring the performance of these entities and how measurement can be translated into performance improvement. In particular, the course will examine: the key dimensions of health care performance, including: health improvement, patient experience and cost of care; the measurement instruments and analytic tools used to measure the performance of the entire health system and of health care organizations within systems; and the implications of measurement on incentive and policy design for policy makers and regulators. Lectures draw on case studies from in high-income countries but the conceptual ideas are of general relevance to all countries and contexts.

Teaching: This course will be delivered online over a period of six weeks in Lent Term. The course will be delivered as a combination of lectures and seminars, totalling a minimum of 30 hours. Students will have access to lecture material delivered as short online videos. Seminars will take place online and students will work in small groups on structured learning activities set by the course lead.

Formative coursework: The formative assessment is an early draft of the first section of the essay

Indicative reading:

Assessment: Essay (100%, 3000 words) in the LT.

HP4E7E

Dissertation in Health Economics and Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Elias Mossialos COW 2.12 and Prof Andrew Street COW 1.02

Availability: This course is compulsory on the Executive MSc in Health Economics and Policy (LSE and Chicago). This course is not available as an outside option.

Course content: The dissertation could be on any topic in the field of health policy and economics. It should attempt to integrate approaches and knowledge learned across courses and present results to address a health policy, economic issue or a problem identified through the use of either primary or secondary data. It must demonstrate adequate knowledge of relevant theoretical and empirical literature in the field. In addition, careful analysis of the policy implications and formulation of policy recommendations is essential. The main body of the dissertation should, in principle, include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

Teaching: 2 hours of lectures in the ST.

In addition to the lectures, students will be given individual support by their allocated supervisor.

Two webinars, each hosted before meetings with advisors, will be made available to students. The webinars will be 80 minutes in length each, and will include a 60 minute lecture, and 20 min worth of question time. In case students are unable to attend, the webinar session will be recorded and made available to all students.

The webinars will start two months prior to the LSE Teaching period. This will also aid off campus, as with all the other Webinars, engagement and will be organised by the course leader. Given they are online, there will be no implications in regard to organising physical space within LSE.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Students will develop a dissertation proposal outlining their objectives, research questions, and planned methods. This will serve as the basis of discussions with their allocated supervisors and each student will receive individual feedback.

Indicative reading: Dunleavy, P. (1986) Studying for a Degree in the Social Sciences, Macmillan. (See Chapter 5: Writing a Dissertation). Denscombe, M. Assessment: Dissertation (100%, 5000 words) in the MT.

HP4F1E Half Unit

Introduction to Evaluation in Healthcare

This information is for the 2020/21 session.

Teacher responsible: Dr Pepita Barlow COW 2.05

Availability: This course is compulsory on the Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE. This course is not available as an outside option.

Course content: The objective of this course is to introduce students to key concepts in evaluation in healthcare. The

course will provide an overview of the principles and models of evaluation, and the role of theories, concepts, and hypotheses. In terms of research design, it will cover study design choices in light of bias, validity and other design tradeoffs. It will introduce students to experimental, quasi-experimental, non-experimental, and qualitative designs for evaluating healthcare interventions, programmes and policies aimed at achieving high quality care, reducing costs, and improving health outcomes. Data and measurement considerations for both quantitative and qualitative studies will be discussed alongside the importance of using mixed-methods and triangulation for interpreting findings and taking a critical approach to the results of evaluation. The course will conclude with practical and ethical issues when undertaking evaluation studies.

Teaching: Given the executive nature of this course, it will be offered as an intensive, accelerated, and compressed module within a 1-week duration. The course will be delivered as 10 hours of lectures and 10 hours of seminars in the ST

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

Following the group presentations delivered on the last day of the course, students will continue developing their projects individually. The formative assessment will be a more detailed written outline of their projects written individually. Students will receive detailed feedback (individually and not as a group) on their formative assessments and continue developing their project reports individually. The formative feedback is intended to help the students while developing their final project reports.

Oretveit, John. *Evaluating health interventions: an introduction to evaluation of health treatments, services, policies and organizational interventions*. McGraw-Hill International, 1998.

Assessment: Project (100%, 3000 words) post-summer term.

HP4F2E Half Unit

Quasi-Experimental Evaluation of Healthcare Programs and Policies

This information is for the 2020/21 session.

Teacher responsible: Dr Elisabetta De Cao COW 3.06

Availability: This course is compulsory on the Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE. This course is not available as an outside option.

Course content: When randomised controlled trials are not possible to conduct due to feasibility, ethical, or policy reasons, quasi-experimental study designs can be used to evaluate the causal impact of health programs and policies. The objective of this course is to teach students how to design, critically appraise, and conduct quasi-experimental studies evaluating health policies, programmes, and interventions. The main focus of the course will be on regression discontinuity designs, interrupted time-series designs, difference-in-differences designs, instrumental variable designs, and synthetic control approaches. This module will provide an overview of these study designs and outline the advantages and disadvantages of each approach with specific examples from the health care literature. Suitability of routinely available healthcare datasets for quasi-experimental evaluation studies will be discussed with seminal examples. Computer workshops will provide the students with hands-on experience in conducting quasi-experimental evaluations.

Teaching: 12 hours of lectures and 10 hours of computer workshops.

Given the executive nature of this course, it will be offered as an intensive, accelerated, and compressed module with a one-week

duration.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

Student will receive detailed feedback on their project report outlines. Feedback received on the project outline will be helpful when developing the final project report.

Indicative reading:

Assessment: Project (100%, 3000 words) post-summer term.

HP4F3E Half Unit

Randomised Evaluation of Health Programmes and Policies

This information is for the 2020/21 session.

Teacher responsible: Dr Mylene Lagarde COW.3.02

Availability: This course is compulsory on the Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE. This course is not available as an outside option.

Course content: Randomized trials have long been used in the clinical world to test the efficacy of drugs and other medical treatments. Recently, social scientists have started using the same approach, using random assignment to allocate resources or implement a policy intervention differently to different groups, in order to determine the causal effects of the policy of interest. The popularity of randomized evaluations has grown especially, but not exclusively, among researchers and policymakers in low- and middle-income settings.

Conducting a successful randomized evaluation involves many inter-related steps and a good understanding of a few statistical concepts. Randomized evaluations also usually require to design and organise the data collection of relevant and useful information, which involves a number of steps to avoid critical pitfalls. It is therefore essential to understand these different steps to design and implement randomised evaluations adequately, or to be able to critically analyse them.

This course proposes a hands-on and intuitive approach to designing and conducting a randomised evaluation. In the first half of the course, we will discuss reasons for undertaking randomised evaluations; how to design the randomised experiment to ensure it answers the question(s) of interest (including issues of statistical power and sample size calculation); how to deal with threats to randomisation (e.g. attrition, spill-overs). In the second half of the course, we will discuss practical issues raised by primary data collection, including how to best measure outcomes of interest; how to design good tools and how to conduct and manage fieldwork. We will also discuss the ethics of randomised policy evaluations.

The course will be a mix of lectures and small-group discussions and exercises in seminars.

Seminars will be designed to encourage students to critically engage with the topics and apply the technical skills taught. Each seminar will be closely aligned with the lecture content to give students the opportunity to apply the new knowledge. Seminars will be built around a group project defined at the beginning of the week: students in a group will gradually build the design of their randomised evaluation and plan the different components, working towards a final product which will form the basis of their evaluation. This will ensure that students maintain their engagement throughout the course, but also apply their skills immediately.

Teaching: 15 hours of lectures and 15 hours of seminars

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

A draft protocol. Students will be asked to submit a short 1,000 word draft protocol within 3-4 weeks after the end of the course. The draft protocol will serve as an outline of the final research protocol, which will account for 100% of the final mark.

While some aspects of their work may still be work in progress (e.g. using bullet points), students will be expected to write up one section of their protocol in a more detailed way. The outlines will be graded and feedback given to students. This allows students to get valuable experience of writing at MSc level at LSE, and they will also understand more specifically the expectations of the summative assessment. Students will be able to use this feedback in their writing of the summative work.

Indicative reading:

- Dupas, P., & Miguel, E. (2017). Impacts and Determinants of Health Levels in Low-Income Countries. In E. Duflo & A. Banerjee (Eds.), *Handbook of Field Experiments*: North Holland.

Assessment: Research project (100%) post-summer term.

1 x Research protocol (3,000 words max) to plan the randomised evaluation of a particular health programme – 100% of grade. The assessment will be due approximately 10 weeks after the end of the course.

Students will be asked to pick one programme/policy from a proposed list. They are also given the option to choose their own intervention (after discussion with their seminar leader) if they would prefer.

HP4F4E Half Unit

Dissertation in Evaluation of Healthcare Interventions and Outcomes

This information is for the 2020/21 session.

Teacher responsible: Dr Pepita Barlow COW 2.05

Availability: This course is compulsory on the Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE. This course is not available as an outside option.

Course content: The dissertation could be on any topic in the field of health services research and health policy. It should attempt to integrate approaches and knowledge learned across courses and present results to address a health policy or economic issue or a problem identified through the use of either primary or secondary data. It must demonstrate adequate knowledge of

relevant theoretical and empirical literature in the field. In addition, careful analysis of the policy implications and formulation of policy recommendations is essential. The main body of the dissertation should, in principle, include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

Teaching: 5 hours of lectures and 16 hours of seminars in the ST.

To enable students to investigate an original research question to the standards of scientific enquiry, the dissertation module will detail methodological and academic criteria when producing a piece of original work in the context of health care interventions and outcomes research. The week-long course will include taught sessions as follows:

- Departmental expectations for a dissertation;
- Developing a research question;
- Critical appraisal of the literature;
- Overview of different methodological approaches;
- Scientific writing workshop;
- Communication of dissertation findings: policy and practice implications

The taught sessions will introduce the content and provide theoretical framework for topics to be disseminated in seminars. Through teaching and learning, students will be able to develop a poster highlighting a potential dissertation research question and methodology, which they will present at the end of the course. We will use this opportunity to assign expertise-based supervision to students, who will in turn receive support and guidance on academic matters as well as the progress of their research. Students will be entitled to arrange 3 x 30-minute one-to-one meetings with their supervisors over the course of their study to receive feedback and bespoke support throughout the dissertation process.

Formative coursework: Students will be expected to produce 1 presentation in the ST.

Students will develop a poster setting out a proposed research question and methodology for presentation in the closing session of the week's teaching for comment and appraisal by faculty. The project presented in the poster will be a starting point for the student's research project; therefore, it may or may not be developed further and to form the basis for the dissertation itself.

- Rudestam, K. and Newton, R. (2001) *Surviving Your Dissertation: a comprehensive guide to content and process*. 160 London: Sage. LB2369 R91

Assessment: Dissertation (100%, 5000 words) in the MT.

Please note that teaching on this course shall commence in November 2021. The first dissertations are to be submitted by MT 2022.

HP4G1E Half Unit

Statistical Methods in Health Care Economic Evaluation

This information is for the 2020/21 session.

Teacher responsible: Dr Maria Raikou

Availability: This course is compulsory on the Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE. This course is not available as an outside option.

Course content: This course develops the statistical and modelling techniques necessary to apply economic evaluation to the health care sector.

Introduction to statistical methods, linear regression analysis, logistic regression analysis, survival analysis for health outcomes, survival analysis for treatment costs, economic evaluation and clinical trials. Estimation of confidence intervals for cost-effectiveness ratios. Transformation of ratios - net benefit approach. Missing data, parametric and non-parametric approaches. Presentation of analysis, acceptability curves.

Teaching: 13 hours of lectures and 8 hours of seminars (computer based)

Formative coursework: In-class exercise during seminar time. Students will receive feedback on it from their seminar leader after completion.

Indicative reading: The following are basic reading for the course: M Drummond & A McGuire (Eds), *Economic Evaluation in Health Care: Merging Theory with Practice*, OUP, 2002; M Drummond, B O'Brien, G Stoddart & T Torrance, *Methods for the Economic Evaluation of Health Care Programmes*, 2nd edn, OUP, 1997; M Gold, J Siegel, L Russell & M Weinstein, *Cost-Effectiveness in Health and Medicine*, OUP, 1996; M Johannesson, *Theory and Methods of Economic Evaluation in Health Care*, Kluwer, 1996; P Johansson, *Evaluating Health Risks: An Economic Approach*, CUP, 1995. Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take-home assessment (100%).

This is the same course as HP425 Statistical Methods in Health Care Economic Evaluation (H) but it has different teaching and assessment arrangements.

HP4G2E Half Unit

Principles of Health Technology Assessment

This information is for the 2020/21 session.

Teacher responsible: Dr Panagiotis Kanavos COW 1.05

Availability: This course is compulsory on the Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE. This course is not available as an outside option.

Course content: Health Technology Assessment a multidisciplinary process that summarises information about the medical, social, economic, and ethical issues related to the use of a health technology in a systematic, transparent, unbiased, and robust manner. Health Technology Assessment differs in its governance, data and evidence requirements, assessment methods, and operational arrangements across different settings and contexts. This course is aimed at introducing the key principles of Health Technology Assessment, its operational modalities, the different models of value assessment and how they link to decision-making.

Outline of the course is included below:

1. The role of Health Technology Assessment in health care decision making
2. Models of Health Technology Assessment and their application in different jurisdictions - a comparative perspective
3. Governance issues (position in health care decision-making, topic selection, assessment process, stakeholder involvement)
4. Data and evidence requirements for value assessment
5. Health Technology Assessment and value assessment: focus on clinical benefit assessment
6. Health Technology Assessment and value assessment: focus on clinical-cost-effectiveness
7. Assessment methods in Health Technology Assessment
8. Explaining similarities and differences in Health Technology Assessment recommendations – a toolkit
9. The role of multiple criteria decision analysis in value

assessment

10. Beyond Health Technology Assessment: links to risk-sharing and special purchasing arrangements

Teaching: 10 hours of lectures, 10 hours of seminars and 1 hour of help sessions.

Given the executive nature of this course, it will be offered as an intensive, accelerated, and compressed module with a 1-week duration.

Formative coursework: Students will be expected to produce 1 exercise in the MT.

A selection of multiple choice and open-ended questions to test extent of knowledge and understanding of syllabus

Indicative reading: Chalkidou, K., Tunis, S., Lopert, R., Roach, L., Sawicki, P. T., Nasser, M., & Xerri, B. (2009). Sorenson, C. (2010). Use of comparative effectiveness research in drug coverage and pricing decisions: a six-country comparison. *Issue Brief (Commonwealth Fund)*, 91, 1-14.

Assessment: Research project (100%) in the MT.

A 3,000-word (excluding references) case study on a specific topic

HP4G3E Half Unit

Economic Evaluation in Health Care

This information is for the 2020/21 session.

Teacher responsible: Mr Alexander Carter COW 2.10

Availability: This course is compulsory on the Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE. This course is not available as an outside option.

Course content: Health care decision makers are often faced with the challenges of resource allocation. Economic evaluation is used to formalize the process of decision-making on the basis of costs and benefits associated with multiple alternative scenarios or interventions. Decision makers use evidence from economic evaluation analyses to make specific recommendations for coverage, reimbursement, and pricing decisions for a variety of health care interventions, as well as define best practices. This course will enable students to understand and apply analytic methods in the economic evaluation of health interventions and provide a strong foundation in the several advanced concepts in economic evaluation, and in particular cost-effectiveness of interventions used in long-term chronic illnesses. The course will provide an overview of the principles and practices of measuring and analyzing costs; and estimating effectiveness in terms of quality-adjusted life years and disability-adjusted life years. Practical topics will include the design and implementation of economic evaluation models and the role of clinical data inputs to inform economic evaluation analyses.

Teaching: 10 hours of lectures, 10 hours of seminars and 5 hours of computer workshops in the MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

Indicative reading: Drummond M et al. *Methods for the Economic Evaluation of Health Care Programmes*. Oxford, OUP, 2005. Drummond M et al. *Economic Evaluation in Health Care: Merging Theory with Practice*, Oxford, OUP, 2002. Gray A. *Applied Methods of Cost-effectiveness Analysis in Healthcare* (Handbooks in Health

Economic Evaluation), Oxford, OUP, 2011. Weinstein MC et al. Foundations of cost-effectiveness analysis for health and medical practices. *N Eng J Med.* 1977; 296 (13):716–21. Russell LB et al. The role of cost-effectiveness analysis in health and medicine. *JAMA.* 1996; 276 (14): 1172–77.

Assessment: Research project (100%) in the MT.

HP4G4E Half Unit

Systematic Review and Meta-analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Rocco Friebe COW 2.09

Availability: This course is compulsory on the Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE. This course is not available as an outside option.

Course content: Systematic review and meta-analysis methods are increasingly used to evaluate the relative benefits and harms of healthcare interventions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need experts equipped with the methods of reviewing and synthesizing the existing body of evidence.

This course will be focused on the principles of reviewing and synthesizing the existing body of literature. The course will first provide the rationale for adopting a systematic approach for evidence review and synthesis. It will then equip students with the methods to undertake risk of bias assessments of individual randomized controlled trials and also collections of randomized controlled trials. In addition to providing an overview of methods for quantitatively synthesizing multiple randomized controlled trials in meta-analysis, the course will present the opportunities and challenges of using evidence for decision-making in health care.

Learning outcomes:

- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual randomized controlled trials and collections of randomized controlled trials
- Critically evaluate the internal validity of randomized controlled trials
- Assess heterogeneity in a collection of randomized controlled trials
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: 20 hours of seminars and 4 hours of computer workshops in the ST.

Formative coursework:

- Course convener will provide feedback on group presentations on the last day of the in-person teaching session
- Course convener will also provide written feedback on project outlines.

Indicative reading: Cochrane Handbook for Systematic Reviews of Interventions (version 5.1.0, updated March 2011). Institute of Medicine. Interpreting indirect treatment comparisons and network meta-analysis for health-care decision making: report of the ISPOR Task Force on Indirect Treatment Comparisons Good Research Practices: part 1. *Value Health* 2011;14(4):417–28.

Assessment: Research project (100%) in the ST.

IR442E

Diplomacy and Challenges

This information is for the 2020/21 session.

Teacher responsible: Prof Chris Alden

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: This course looks at six key aspects of diplomacy: the tools of diplomacy and negotiation; international security and policy challenges, such as climate change; emerging security domains such as cyber and outer space security; policy assessment on a major current international problem; simulations on crisis management and diplomatic negotiations; the future of diplomacy and international affairs.

Teaching: 30 hours of lectures, 20 hours of seminars and 20 hours of workshops in the LT.

Formative coursework: One formative policy paper (2,000 words) with a pre-arranged task. Feedback will involve a meeting with each student to discuss their formative policy paper. We will aim to ensure that students are able to: critically evaluate different kinds of evidence; assess the strengths and weaknesses of competing policy options; formulate arguments and policy recommendations in a coherent and balanced fashion.

Assessment: Project (100%, 3000 words) in the LT.

3,000 word assessed policy paper setting out a detailed strategy to implement a policy.

IR443E

Strategy in a Changing World

This information is for the 2020/21 session.

Teacher responsible: Prof Chris Alden

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: This course examines five different perspectives on strategy: new approaches to strategy in international affairs; the interplay between old and new strategic actors; global strategic and economic trends; political and security developments in the world's key regions; the nature of strategic decisions.

Teaching: 40 hours of lectures and 30 hours of seminars in the MT.

Formative coursework: One 2,000 word formative essay with a pre-arranged title due in the MT. Feedback will involve a meeting with each student to discuss their formative essay. In the process, we will aim to ensure that students are able to: critically evaluate different kinds of evidence; assess the strengths and weaknesses of competing explanatory paradigms; formulate arguments in a coherent and balanced fashion.

Assessment: Essay (100%, 4000 words).

IR444E Half Unit

Strategy in Action

This information is for the 2020/21 session.

Teacher responsible: Prof Chris Alden

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: In this course we will be examining through

lectures, seminars and workshops major foreign policy decisions, the diplomatic background to each of these and the strategic thinking behind them. We will be asking the students through group exercises to prepare a strategy and policy paper relevant to the day.

Teaching: 8 hours of seminars in the ST.

The course is taught over 48 hours. This includes 3 intense sessions - a weekend of assessing strategic decisions involving drafting and crafting papers, a second weekend of formulating strategic decisions and briefing sessions on methodology. All these will lay the foundations for the dissertation plan.

Formative coursework: Group discussion and formulation of strategy/policy papers.

Indicative reading: Readings vary each year depending on the cases, scenarios and policy issues examined during each policy session. Readings will be provided to registered students in advance.

Assessment: Dissertation (100%, 3000 words) in the LT.

The formulation of a dissertation topic which must be in the form of a 3,000 word dissertation plan (100%). This should include the title, an abstract, a problem statement which should identify the features and theoretical concepts associated with the topic, the aims and objectives (including research questions or hypotheses), a literature review and the methodology. This module is taken in conjunction with IR496 Dissertation: MSc Diplomacy and International Strategy (1.5 units).

IR496E One and Half Unit

Dissertation: MSc International Strategy and Diplomacy (1.5 units)

This information is for the 2020/21 session.

Teacher responsible: Prof Chris Alden

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: The dissertation will address a topic in the social sciences drawn broadly from the three core courses. The topic should make central use of concepts in the study of International Relations, strategy and diplomacy and should demonstrate a good understanding of these concepts and implications. The dissertation will draw on empirical topic areas but should also demonstrate a high degree of conceptual originality. Guidance on standards of presentation will be given in the handbook and conform to the standard laid down for MSc dissertations in the International Relations Department. The subject and title of the dissertation must be approved by the dissertation supervisor.

Teaching: Arrangements for supervision. Students will receive advice on how to choose a topic and how to write a dissertation from a 1.5 hour workshop and from three half hour individual supervision sessions.

Formative coursework: Students submit a 3,000 dissertation plan on which they receive written feedback (see the details of the IR444 course, taken in conjunction with IR496).

Assessment: Dissertation (100%, 15000 words) in the LT.

A 15,000 word dissertation (100%) to be submitted in September. This course is taken in conjunction with IR444 Strategy in Action (H).

Using the dissertation plan (IR444), the dissertation will include an introduction, theoretical framework, a literature review and methodology followed by chapters, conclusion and bibliography.

LL400E Half Unit

European Capital Markets Law

This information is for the 2020/21 session.

Teacher responsible: Professor Niamh Moloney

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course examines the EU's regulation of the capital markets. It considers the harmonized regulatory regime which applies to key capital market actors across the Member States and which supports the integrated market. The topics covered include: the rationale for integration and the role of law, the evolution of the integration project, and the impact of the financial crisis and subsequent reforms; the deregulation, liberalization, harmonization, and re-regulation mechanisms used to integrate and regulate the EU market and the role of the Court; market access and the passport for investment services; the Markets in Financial Instruments Directive 2014 (MiFID II) and the Markets in Financial Instruments Regulation 2014 (MiFIR) and regulation; the liberalization of order execution and the regulation of trading venues; the 'UCITS' mutual funds regime; retail investor protection and conduct regulation; the prospectus and disclosure regime; gatekeepers (credit rating agencies and investment analysts); and the institutional structure for law-making and for supervision, including the European System of Financial Supervision and the European Securities and Markets Authority. Course coverage may vary slightly from year to year.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Reading lists will be provided in advance for each seminar. Sample texts include: Moloney, EU Securities and Financial Markets Regulation Regulation (2014), Veil (ed) European Capital Markets Law (2017), and Busch, Avgouleas, and Ferrarini (eds) Capital Markets Union in Europe (2018).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL401E Half Unit

The Law of Armed Conflict

This information is for the 2020/21 session.

Teacher responsible: Dr Stephen Humphreys NAB5.12

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course covers the international law governing the conduct of hostilities (jus in bello, also known as the law of armed conflict or international humanitarian law)—as

distinct from the law on the resort to force (jus ad bellum), which is a separate course. The course will take a critical approach to the international regulation and facilitation of armed conflict. As well as the laws governing the means and methods of war ('Hague' law), the 'protected' groups hors de combat ('Geneva' law), and the distinction between international and non-international armed conflict, the course will cover 'lawfare' more generally: the recourse to law as a means of waging war. It will examine the application of the laws of war, including occupation law, in recent conflicts, including the wars in Iraq, Afghanistan and Syria, the 'war on terror', and the Palestinian Occupied Territories. Students can expect to have a thorough grasp of the principles and regulations governing the conduct of hostilities, the context and efficacy of enforcement mechanisms, and a critical understanding of the normative and political stakes of international law in this area.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: It is worthwhile acquiring the following books:

Yoram Dinstein, *The Conduct of Hostilities under the Law of International Armed Conflict* (Cambridge UP, 2nd ed., 2010, or 3rd ed., 2016), Roberts and Guelff, *Documents on the Laws of War* (Oxford UP, 2000); Michael Walzer, *Just and Unjust Wars* (Basic books, 4th ed. 2006). Other useful books include: David Kennedy, *Of Law and War* (Princeton UP, 2006); Geoffrey Best, *War and Law Since 1945* (Oxford UP, 1997). Detailed readings for each seminar will be made available on Moodle.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL402E Half Unit

Key Issues in Transnational Environmental Law

This information is for the 2020/21 session.

Teacher responsible: Prof Veerle Heyvaert NAB7.06

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course focuses on key developments in environmental law beyond the State, which includes both the European and international level. It examines the key values, legal principles and strategies that guide environmental policy and decision making. It considers the role and contribution of non-state actors, such as private green certification schemes, to environmental law. Then, the course turns the spotlight on the most important environmental challenges of our time and examines the role of transnational law in managing or resolving them. The course is structured as follows: 1. Environmental law in context: economic and alternative approaches to sustainable development. 2. Sources and principles of international environmental law. 3. Transnational environmental law: the role of non-state actors. 4. Transnational liability: responding to global catastrophes. 5. Controlling toxic substances: risk regulation and the precautionary principle. 6. Climate change: international law and policy developments. 7. Climate change litigation. 8. Protecting biodiversity: comparing treaty-based and market-based approaches. 9. Brexit and the impact on environmental law and policy. 10. Trade and the environment. 11. Revision.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A detailed reading list will be provided for each seminar. Essential reference works include Heyvaert, Transnational Environmental Regulation and Governance. Purpose, Strategies, and Principles (CUP, 2018); Sands and Peel, Principles of International Environmental Law (CUP, 2018); Bodansky, The Art and Craft of International Environmental Law (Harvard University Press, 2010); Bodansky, Brunnee & Hey, The Oxford Handbook of International Environmental Law (OUP, 2007); Kingston, Heyvaert & Caveski, European Environmental Law (CUO, 2017).

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take-home assessment (100%).

LL403E Half Unit

International Human Rights: Concepts, Law and Practice

This information is for the 2020/21 session.

Teacher responsible: Dr Margot Salomon

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course is concerned with the international protection and promotion of human rights and its relation to a range of current global problems. The course draws on the international law and practice of human rights to examine how we might best understand the contribution and limitations of human rights to addressing contemporary ills. Through the consideration of a range of topics participants will learn about, and critically analyse, human rights concepts, norms, institutions and actors. The course engages with the ideas and objectives that underpin the post-1945 human rights legal order, the United Nations and regional systems, and the standards and challenges of international human rights. We build on these foundations to examine a variety of current human rights issues and to explore how international law in these areas has developed and is deployed. Subjects may include: institutional developments; categories of human rights; human rights and water; the right to development; the rights of indigenous peoples to land; human rights and sexuality; business and human rights; human rights and resistance; human rights and poverty; and the question of fragmentation.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: O de Schutter, International Human Rights Law: Cases, Materials, Commentary; F Mégret, 'The Nature of Obligations' in D Moeckli, S Shah and S Sivakumaran (eds); Maastricht Principles on the Extraterritorial Obligations of States in the area of Economic, Social and Cultural Rights; C Clark, 'Of What Use is a Deradicalized Human Right to Water?' 17 Human Rights Law Review 2 (2017); J Kozma, M Nowak and M Scheinin, A World Court of Human Rights – Consolidated Draft Statute and Commentary; UN Special Rapporteur on Extreme Poverty and Human Rights: Mission to the UK, UN Doc A/HRC/41/39/Add.1 (2019); ME Salomon, 'Nihilists, Pragmatists and Peasants: A Dispatch on Contradiction in International Human Rights Law' in E

Christodoulidis et al (eds).

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take-home assessment (100%).

LL404E Half Unit

European and UK Human Rights Law

This information is for the 2020/21 session.

Teacher responsible: Prof Conor Gearty NAB 6:11

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course has two parts. In part one the origins, development and current standing of the European Convention on Human Rights and Fundamental Freedoms are considered. The primary focus will be on the case-law of the European Court of Human Rights, though the cases of other jurisdictions will also be referred to where appropriate. The course will analyse the Convention from the perspective of selected rights within it, but will also engage with the subject thematically, subjecting such concepts as the 'margin of appreciation', 'living instrument' and proportionality to close scrutiny. The goal of this part of the course is to give students a good critical understanding of the Convention, the case-law of the Strasbourg court and the Convention's place within the constitutional and political structure of 'Greater Europe'. The second part of the course is made up of a detailed study of the UK Human Rights Act. The origins and the political background to the Act will be explained, and the structure of the measure will be fully elaborated, relying on the text of the Act itself but also on the burgeoning case law that accompanies the measure. This part of the course will identify the principles that underpin the UK Act and explain its proper place in British law. It will also explore the wider constitutional implications of the measure, looking at its effect on the relationship between courts and Parliament. Linkages with the broader European framework discussed in the first part will be made by students through their reading and through class-engagement. The implications for human rights of the UK's intended departure from the EU will also be considered.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Jacobs and White, The European Convention on Human Rights 7th edn (OUP, 2017) and/or Harris, O'Boyle and Warbrick, Law of the European Convention on Human Rights 3rd edn (Oxford, 2014). The text on the UK is Gearty, On Fantasy Island. Britain, Strasbourg and Human Rights (Oxford University Press, 2016). Also useful is Mowbray, Cases and Materials on the European Convention on Human Rights 3rd edn (Oxford, 2012). Kavanagh, Constitutional Review under the UK Human Rights Act (Cambridge, 2009), Hickman Public Law after the Human Rights Act (Hart, 2010) and Gearty, Principles of Human Rights Adjudication (Oxford University Press, 2004).

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take-home assessment (100%).

LL405E Half Unit

Dispute Resolution and Advanced Mediation

This information is for the 2020/21 session.

Teacher responsible: Prof Linda Mulcahy NAB7.15

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The principal focus of the course is upon methods of resolving disputes other than adjudication. The course brings together theory and observation of practice and is divided into two parts. In the first section students examine what motivates people to enter into disputes and the range of outcomes they seek, the history of the "informal justice" movement and the transformation of attitudes to dispute resolution in the UK and beyond. The emphasis in this part of the course is also on looking at the two primary forms of dispute resolution, negotiation and mediation. In the second part of the course specialist practitioners work with the class in exploring the interface between theory and practice and the different dynamics of disputes and their resolution in specific subject areas such as commercial law, community disputes, international law and family law. The course is designed to complement the option on Commercial Arbitration.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Students will also find it useful to access the following books which provide important context for debate about the civil litigation system and negotiation tactics: Henry Brown and Arthur Marriot, (2012) ADR: Principles and Practice, London: Sweet and Maxwell. This is written by practitioners but also makes reference to a number of seminal academic studies. It provides a good framework within which to position the more in-depth arguments contained in the academic articles set each week. Genn, Hazel, (2009) Judging Civil Justice (The Hamlyn Lectures) Cambridge, Cambridge University Press. This book provides a really good overview of civil justice reforms across developed legal systems and will alert you to many of the academic and policy debates which have surrounded reform. Roger Fisher and William Ury (2012) Getting to Yes: Negotiating an Agreement Without Giving In, Random House. This is a classic text in the field and very simple to read. This book will also help you when we come to study mediation which is often described as a form of facilitated negotiation. Simon Roberts and Michael Palmer's 2005 (second edition) Dispute Processes: ADR and the Primary Forms of Dispute Resolution, Cambridge, Cambridge University Press. This is the most theoretical book in this list but provides extracts from many of the seminal works in the field that we will be studying. It adopts a very inter-disciplinary approach. This is useful as background reading.

Assessment: Assessment path 1
Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course (Part I and Part II) examines the regulatory structures governing financial markets and investment services. It covers the main principles of international, EU and UK financial regulation, with the aim of developing a critical understanding of the dynamics and conceptual framework of financial regulation. The course does not aim to provide a detailed comparative account of financial regulation across countries, but international comparisons may be made where these are useful. In this context, students are encouraged to draw on their knowledge of their own national systems of regulation in making comparisons, and to apply the analytical perspectives suggested to those systems. The focus will be on the regulation of national and international aspects of financial services and markets, rather than on private law and transactional aspects. No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. Indeed, the course provides a good background for further study of both financial and economic law and economic analysis of law. The course might be regarded as complimentary to a number of other courses, including Law of Corporate Finance or International Financial Law and Practice I & II.

The first part of this course will address the following topics:

Anatomy of the Financial Market and the Great Financial Crisis
Building Blocks of the Regulatory World

Rationales for its Regulation: Systemic Stability, Market Integrity,
Principle-Agent Competition

Key Elements of Financial Regulation: disclosure, resilience, risk
modelling and regulation inside firm

Global and EU Regulatory Structures

Financial Stability – Policy Issues, Principles and Global Standard
Setters

Prudential Regulation of Banks – The Basel Accords

The EU Banking Union

Deposit Guarantees

Bank Resolution and Insolvency

Teaching: 24-26 hours of contact time (for each half unit)

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students, where possible. In addition, the students will be invited to do independent reading. Good general introductions to financial markets and their regulation include: A Turner et al, The Future of Finance: The LSE Report (2010); S Valdez and P. Molyneux, Introduction to Global Financial Markets (7th edn).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL406E Half Unit

Regulation of Financial Markets I

This information is for the 2020/21 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

LL407E Half Unit

Regulation of Financial Markets II

This information is for the 2020/21 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period.

The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines the regulatory structures governing financial markets and financial services. It covers the main principles of international, EU and UK financial regulation with the aim of developing a critical understanding of the conceptual framework for financial regulation. This half unit focuses on financial stability, including macro and micro-prudential regulation, regulation of trading and market infrastructure, and on new and emerging issues in financial regulation.

The course does not aim to provide a detailed comparative account of financial regulation across countries, but international comparisons may be made where these are useful. In this context, students are encouraged to draw on their knowledge of their own national systems of regulation in making comparisons, and to apply the analytical perspectives suggested to those systems. The focus will be on the regulation of national and international aspects of financial services and markets, rather than on private law and transactional aspects.

No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. Indeed, the course provides a good background for further study of both financial and economic law and economic analysis of law. For non-lawyers, a willingness to engage in legal analysis will be necessary, although a legal background is not required. The course might be regarded as complimentary to a number of other courses, including Law of Corporate Finance or International Financial Law and Practice I & II.

Topics include:

1. Unpicking the Great Financial Crisis
2. Mapping regulation for financial stability
3. States, Banks and Global Markets: the macroeconomic Background
4. The next Financial Crisis
5. Ethics in Finance
6. Market Integrity
7. The role of Consumers
8. Consumer Protection
9. Securities markets and Conduct of Business
10. Fast, global, decentralized – the Challenges of the Future

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students, where possible. In addition, the students will be invited to do independent reading. Good general introductions to financial markets and their regulation include: A Turner et al, *The Future of Finance: The LSE Report* (2010); S Valdez and P. Molyneaux, *Introduction to Global Financial Markets* (7th edn).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL408E Half Unit

Comparative Constitutional Law

This information is for the 2020/21 session.

Teacher responsible: Dr Jo Murkens NAB7.31

Availability: This course is available on the Executive LLM. This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period.

The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: Comparative Constitutional Law is a rejuvenated discipline that attracts a broad range of interdisciplinary interest in the formation, design, and operation of constitutions. This course examines the central issues across a range of jurisdictions and from a variety of perspectives. Part I discusses various approaches to the study of CCL as well as the migration of constitutional ideas and related notions of constitutional borrowing and legal transplants. Part II deals with key constitutional concepts, such as fundamental law, constitutional change, the rule of law, as well as an introduction to the constitution of the United Kingdom, which are discussed from a historical and comparative perspective. Part III deals with constitutional design, a classic as well as topical area of comparative law. As well as offering a critique of mainstream liberal thought that idealises constitutions as normative constraints on politics, these sessions examine whether formal constitutions in divided and authoritarian societies facilitate democratisation and political change or whether they undermine democracy and entrench the rulers. The study of law, like the study of all social phenomena, is always comparative - and inevitably fragmented. This objective of the course is to study comparative constitutional law comprehensively, critically, and contextually (historical, conceptual, regional). This approach enables the student to branch out independently into related areas and topics.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: There is no set book for this course. All materials will be made available in advance on Moodle.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL409E Half Unit

Comparative Constitutional Rights

This information is for the 2020/21 session.

Teacher responsible: Dr Kai Moller NAB7.01

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines a range of controversial issues in human and constitutional rights law from a comparative perspective. These include: Abortion; 'Deviant' Sex: Sodomy, Sado-Masochistic Sex, and Incest; Same-Sex Marriage; Religion in the Public Sphere; Hate Speech and Denial of the Holocaust; Obscenity. We will approach them by comparing and contrasting judgments from courts all over the world, with an emphasis on cases from the U.S. Supreme Court, the Canadian Supreme Court, the South African Constitutional Court, the European Court of Human Rights, the U.K. Supreme Court, and the German Federal Constitutional Court. The goals of the course are, first, to introduce the students to the jurisprudence of those extremely powerful and

influential courts, and, second, to invite them to think about and critically analyse some of the most controversial, difficult, and important rights issues of our time.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: The course is mainly case-based; however, interested students may find the following book helpful: V Jackson and M Tushnet, *Comparative Constitutional Law*, 3rd edition, 2014.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL410E Half Unit

International Financial Law and Practice I

This information is for the 2020/21 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: As the recent debate on shadow banking shows, the traditional financial market sectors of commercial banking, investment banking, derivatives, capital markets and asset management are nowadays converging. However, their academic analysis is still largely sector-based. This course offers a cross-sectoral, functional analysis, permitting students to grasp the big picture of the entire financial market law. To this end, the course largely concentrates on the different activities of risk taking and risk shifting regardless of the type of financial institution involved. The course is also a novelty to the extent that it integrates both spheres of rulemaking for the financial markets, notably financial law and some fundamentals of financial regulation. Experience shows that approaching the framework for financial law without at least considering the interdependencies with risk management and capital requirements leaves us with only a fragmented picture. For non-practitioners, the market context of financial law appears sometimes confusing. Therefore, this course will first approach each subject from in a market perspective before coming to the legal framework. This is essential with a view to understanding the permanent interaction between market behaviour and the legislators' and regulators' responses to it. The legal framework will be analysed taking into account international rules and developments as well as European legislation. Since the City of London is one of the globally most important financial markets, England will be used as anchor-jurisdiction in order to develop patterns of global significance that are addressed by legislators and regulators around the world, in particular also looking at the European Union and at international rulemaking. The course also considers key trends. It is designed to be as topical as possible, and the content may change in the light of developments. While the precise topics covered will vary from year to year they typically will include the following:

- The logic and the players of the financial market. The creation and allocation of risk. The distinction between 'Law' and 'Regulation'.
- The reasoning and sources of financial law and regulation. The role of European financial law and regulation. The role of international law.
- Understanding the financial crisis.

- Banks and their nature. Assets and Liabilities. Deposit-taking and bank loans. Money market instruments. Rank of creditors in bank insolvencies.
- Raising capital. Primary market and secondary market. Issuance of debt securities (bonds). Issuance of Eurobonds. Issuance of equity (shares).
- Security interests and financial collateral.
- Reprehypothecation, repurchase agreements and securities lending. Relevant conflict-of-laws problems.
- Guarantee, indemnity, insurance.
- Derivatives. Types of derivatives. The rise of derivatives. Recharacterisation risk. Standard documentation (ISDA).
- Netting and set-off. Relation to insolvency law. Importance for derivatives, repos, securities lending. Conflict-of-laws analysis. Cross-jurisdictional problems.
- Trusts.
- Fund structures (public and alternative).
- Structured finance, securitisation and asset-backed securities. The rationale behind it. Risks.
- Transfer of financial instruments. Stock exchanges. Trading and settlement of securities. Intermediated securities. Conflict of laws and cross-jurisdictional problems. Derivatives clearing.
- Syndicated loans.
- Regulatory arbitrage in respect of financial transactions.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: -P. Wood. *Law and Practice of International Finance*, Sweet & Maxwell, 2008 (ca. £40, soft bound). This book is the first building block of the Basic Reading. Students might consider buying it.

LL411E Half Unit

International Financial Law and Practice II

This information is for the 2020/21 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the Executive LLM. This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: There are no specific prerequisites for taking this course. While this course is complimentary to LL410E prior completion of the latter is not necessary to take LL411E.

Course content: This course explores contemporary issues of the commercial law of international financial markets. These include

- the future of English law as reference law for international finance after Brexit
 - financial markets and modern trends in conflict-of-laws
 - the legal characteristics of the various types of networks used in financial markets (central, decentral, distributed)
 - the disruption of law caused by 'blockchain' technology and FinTech
 - the legal challenges flowing from the increasing use of 'big data' and artificial intelligence in financial services
 - the future role of commercial law in managing risk
 - the nature of so-called smart contracts and their role in standard documentation, risk management and due diligence
 - legal issues associated with cryptocurrencies and crypto-money
- As the course is conceived to be very topical, some of the course content may change.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: - The reading will consist of 2-3 scholarly articles per subject, such as P Paech, 'Governance of Blockchain Financial Networks', *Modern Law Review* (forthcoming), https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2875487.

- Basic knowledge on international financial law (recommended in particular to students who did not take LL410E): P. Wood. *Law and Practice of International Finance*, Sweet & Maxwell, 2008 (ca. £40, soft bound).

- Understanding the financial market: S. Valdez, Ph. Molyneux, *An Introduction to Global Financial Markets*, 8th ed., Palgrave-McMillan 2015 (soft bound, ca. £29 - this is not a legal work but very useful for those new to the financial market).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL412E Half Unit

International Economic Law I

This information is for the 2020/21 session.

Teacher responsible: Prof Andrew Lang

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The aim of the course is to introduce students to the field of international economic law: its principles, rules,

practices, and institutions, and the debates which attend each. The course focuses on the public international law rules and institutions which govern international trade. Students will be given a grounding in the jurisprudence of the WTO, but will also be introduced to interdisciplinary material on the broader political, economic, institutional and normative contexts in which international economic law operates. Key themes will include the question of 'development' and developing countries, the role of expertise in global economic governance, and institutional aspects of judicial international dispute settlement. Special attention will be paid to the current crisis around the contemporary international trading system, and US-China relations. Students will be expected to engage with the principles and practice of international economic law both at the technical level, and at the level of critical reflection.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: M.J. Trebilcock, R. Howse and A. Eliason, *The Regulation of International Trade*, 4th ed., Routledge, 2012; P. Van den Bossche and W. Zdouc, *The Law and Policy of the World Trade Organization: Text, Cases and Materials*, 4th ed., Cambridge UP, 2017; S. Lester, B. Mercurio and A. Davies, *World Trade Law: Texts, Materials and Commentary*, 3rd ed., Hart Publishing 2018.

LL413E Half Unit

International Economic Law II

This information is for the 2020/21 session.

Teacher responsible: Prof Andrew Lang

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course is a continuation of LL412E.

In International Economic Law II, topics to be covered may include: Trade Remedies (Antidumping, Countervailing duties and Safeguards); Trade and Global Value Chains; State-owned Enterprises; Advanced Issues in WTO Dispute Settlement; Digital Trade; Trade and Taxation; and others. We will set aside time to consider contemporary issues, for example around international trade in the post-Trump era, digital trade, public international regulation of global finance, regional economic integration, development and developing countries in the trading system, and environmental aspects of international trade.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: M.J. Trebilcock, R. Howse and A. Eliason, *The Regulation of International Trade*, 4th ed., Routledge, 2012; P. Van den Bossche and W. LL415E Half Unit

Fundamentals of International Commercial Arbitration

This information is for the 2020/21 session.

Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course provides an introduction to the theory and practice of international arbitration, one of the most important mechanisms for settling disputes arising from commercial cross-border transactions. The focus is mainly on English arbitration law, which is put into a comparative perspective and contrasted especially with French law, which highlights the antagonism between Paris and London as the rival centres for international arbitration. Special attention is given to the applicable international treaties, the problems of conflicts of laws, and the different types of institutional and transnational rules that may have to be taken into consideration in an international arbitration. This course prepares for 'Advanced Issues of International Commercial Arbitration'.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: M. Moses, *The Principles and Practice of International Commercial Arbitration* (3rd edn, CUP 2017); G. Born, *International Arbitration - Law and Practice* (2nd edn, Kluwer 2015); N. Blackaby & C. Partasides, Redfern and Hunter on *International Commercial Arbitration* (6th edn, OUP 2015); J.-F. Poudret & S. Besson, *Comparative Law of International Commercial Arbitration* (Sweet & Maxwell 2007); E. Gaillard & J. Savage, *Fouchard Gaillard Goldman on International Commercial Arbitration* (1999).

LL416E Half Unit

Advanced Issues of International Commercial Arbitration

This information is for the 2020/21 session.

Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Fundamentals of International Commercial

Arbitration (LL415E) or equivalent course in previous studies or relevant practical experience with international arbitration

Course content: This course aims at giving students who already are acquainted with the fundamentals of arbitration the possibility to go into depth into selected problems of international commercial arbitration. The course is designed to allow intense discussions of these problems in order to raise the sensitivity for the issues at stake and to lead to a research oriented approach. Despite its academic outset, the course is highly relevant for those wanting to specialise in arbitration practice, as the theoretical problems have a most significant impact on practical solutions. The course will treat a selection of topical contemporary issues of international commercial arbitration, such as the role of internationally mandatory rules of law, arbitration & insolvency, the scope of the competence-competence principle; arbitration and fraud and corruption, or the enforcement of awards set aside abroad. The course seeks to be as topical as possible, so that content may change in the light of developments.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: G. Born, *International Commercial Arbitration* (2nd edn, Kluwer 2015); N. Blackaby / C. Partasides, Redfern & Hunter on *International Commercial Arbitration* (6th edn, OUP 2015); J.-F. Poudret / S. Besson, *Comparative Law of International Commercial Arbitration* (Sweet & Maxwell 2007); E. Gaillard / J. Savage, *Fouchard Gaillard Goldman on International Commercial Arbitration* (Kluwer 1999). Cases and doctrinal articles for each topic.

LL417E Half Unit

International Commercial Contracts: General Principles

This information is for the 2020/21 session.

Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Firm knowledge of contract law and/or international sales law from previous studies.

Course content: The course treats what can be called the general part of transnational contract law, i.e. the general principles of law which are of relevance in any kind of international contract, be it sale, construction, shipping, financing, or joint venture. These general principles relate to contractual formation and negotiations, interpretation, transversal general principles, changed circumstances and hardship, agency, third parties, assignment, self-help and set-off, direct performance and damages and penalties. At present, such contracts are governed either by uniform rules of international conventions or by the national laws applicable by virtue of conflict of law rules. The course puts the existing national and international solutions in a comparative perspective so as to work with the sources of such generally accepted principles. Where there are divergences between existing solutions, the course focuses on the elaboration of new efficient solutions that are internationally acceptable and have the

potential of becoming general principles in the future. For these purposes, special attention is given to the UNIDROIT Principles on International Commercial Contracts and the European Principles of Contract Law. Other national laws, however, are drawn upon from time to time. Students are also encouraged, in both examination and classes, to reflect upon the similarities and differences between their own national laws and the UNIDROIT Principles.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: S. Vogenauer & J. Kleinheisterkamp, Commentary on the UNIDROIT Principles of International Commercial Contracts (1st edn, OUP 2009); H. Kötz, European Contract Law (OUP 1997); K. Zweigert & H. Kötz, An Introduction to Comparative Law (3rd edn, OUP 1998); H. Beale et al., *Ius Commune Casebook on the Common Law of Europe: Cases Materials and Text on Contract Law* (2nd edn, OUP 2010); J. Gordley & A. von Mehren, *An Introduction to the Comparative Study of Private Law: Readings, Cases, Materials* (CUP 2006).

LL418E Half Unit Comparative Corporate Governance

This information is for the 2020/21 session.

Teacher responsible: Dr Carsten Gerner Beuerle, Prof Robert Kershaw NAB7.16 and Mr Edmund-Philipp Schuster NAB6.30

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course will focus on topical issues in corporate governance, including: corporate governance codes as a regulatory technique; corporate governance reform, firm performance and financial development; the role of the board of directors in large public companies and groups of companies; the division of powers between the managers and shareholders; directors' duties and enforcement of duties; executive remuneration; stakeholder representation, in particular employee representation, in corporate decision-making; shareholder activism and corporate short-termism; the market for corporate control as a corporate governance device.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Reading will be prescribed for each seminar. Preliminary reading can be found in P. Davies, *Introduction to Company Law* (OUP, 2nd edition 2010), chapters 5-9; R. Kraakman et al, *The Anatomy of Corporate Law* (3rd edition 2017); Gordon and W.G. Ringe (eds.), *The Oxford Handbook of Corporate Law and Governance* (2018).

LL419E Half Unit Law of Corporate Finance

This information is for the 2020/21 session.

Teacher responsible: Prof Robert Kershaw NAB7.16, Dr Carsten Gerner Beuerle and Mr Edmund-Philipp Schuster NAB6.30

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course examines the private law rules governing how companies raise finance. The issues covered include e.g. capital structures, identifying and protecting shareholder rights, issuing shares, initial legal capital and alternatives, dividends, reduction of capital and share buy-backs, reform and moving to a solvency test and financial assistance. The course will focus on English Law but reference will be made to the relevant EU rules.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: David Kershaw, *Company Law in Context* (2012) chapters 1, 17 and 19.

Assessment path 2

Take-home assessment (100%).

LL420E Half Unit International Law and Climate Change

This information is for the 2020/21 session.

Teacher responsible: Dr Stephen Humphreys NAB6.15

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course covers the international law dealing with climate change with a view to assessing how risks and uncertainties caused by climate change are governed and allocated in different legal regimes. The course adopts the stance that the political and legal questions raised by climate change cannot be addressed by reference to climate change law (or indeed international environmental law) alone. Climate change gives rise to a series of profound problems touching upon a range of bodies of law (international economic law, human rights law, state responsibility, international migration law) in a complex political and ethical environment. In approaching climate change as a concrete concern relevant to these various bodies of law and practice, the course will address the normative and/or ethical bases for choosing between actions designed to prevent and/or manage climate change and its consequences, attentive to developmental imperatives and the theoretical concerns raised by the 'fragmented' nature of international law

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing

a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Paul Edwards, *A Vast Machine*, MIT Press (2013); Tim Mitchell, *Carbon Democracy*, Verso (2011); Rosemary Rayfuse and Shirley Scott (eds.), *Climate Change and International Law*, Edward Elgar (2011) Stephen Gardiner, Simon Caney, Dale Jamieson and Henry Shue (Eds.), *Climate Ethics: Essential Readings*, Oxford University Press (2010); Patricia Birnie, Alan Boyle, Catherine Redgwell, *International Law and the Environment*, Oxford University Press (2009); Nicholas Stern, *The Economics of Climate Change: The Stern Review*, Cambridge: Cambridge University Press (2007); IPCC, *Fifth Assessment Report*, Cambridge University Press (2014); Stephen Humphreys (ed.), *Climate Change and Human Rights*, Cambridge University Press (2009); Larry Lohmann, *Carbon Trading*, Dag Hammarskjöld Foundation (2006); Lavanya Rajamani, *Differential Treatment in International Environmental Law*, Oxford University Press (2006).

Assessment path 2

Take-home assessment (100%).

LL423E Half Unit

Media Law: Regulating Publication

This information is for the 2020/21 session.

Teacher responsible: Dr Andrew Scott NAB6.25

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course examines the legal and administrative regulation of mass media publication (principally the press, the broadcast media, and institutionalised Internet publication). The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media publication practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines potential restrictions on publication that are aimed at promoting or preserving specific private and/or public interests. The key private interests considered are those in reputation (defamation), privacy, and confidentiality. The key public interests considered are the integrity of the judicial process (contempt and reporting restrictions), the impartiality of political representations, the avoidance of offence (obscenity and religion), national security, and the protection of children.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Warby, Moreham and Christie (eds) *Tugendhat and Christie: The Law of Privacy and the Media*, (3rd edn, OUP, 2016), Parkes and Mullis (eds), *Gatley on Libel and Slander* (Sweet & Maxwell, 12th ed, 2013); Fenwick and Phillipson, *Media Freedom Under the Human Rights Act* (OUP, 2006); Robertson and Nicol, *Media Law* (Sweet & Maxwell, 5th ed 2007), Doley and Mullis (eds), *Carter Ruck on Libel and Privacy* (6th edn, Lexis Nexis, 2010), Barendt, *Freedom of Speech* (OUP, 2nd ed 2005), Nicol, Millar and Sharland, *Media Law and Human Rights* (OUP, 2009); Cram, *A Virtue Less Cloistered: Courts, Speech and Constitutions* (Hart Publishing, 2002).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL424E Half Unit

Media Law: Regulating Newsgathering

This information is for the 2020/21 session.

Teacher responsible: Dr Andrew Scott NAB6.25

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines the legal and administrative regulation of newsgathering and content production practices undertaken by journalists and others working in the media sector. The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media newsgathering practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines a number of newsgathering practices that are either facilitated or proscribed by law and/or other forms of regulation. These include protection of sources (in general; vis-a vis police and security interests; payment of sources); access to information held by the state (official secrets; news management; freedom of information); access to the justice system (secret justice / physical access to courts; access to court documents; technology and the courts - text-based reporting and broadcasting; access to prisoners); media-police interaction; harassment and media intrusion, and surreptitious newsgathering practices (hacking, tapping and subterfuge).

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Warby, Moreham and Christie (eds) *Tugendhat and Christie: The Law of Privacy and the Media*, (3rd edn, OUP, 2016), Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (OUP, 2016); Robertson and Nicol, *Media Law* (Sweet & Maxwell, 5th ed 2007), Warby, Moreham and Christie (eds), *Tugendhat and Christie: The Law of Privacy and the Media*, (2nd ed, OUP, 2011), Nicol, Millar and Sharland, *Media Law and Human Rights* (OUP, 2009), Davies, *Flat Earth News* (Chatto & Windus, 2008).art Publishing, 2002).

LL425E Half Unit

Competition Law

This information is for the 2020/21 session.

Teacher responsible: Dr Pablo Ibanez Colomo

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be

offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course is a comprehensive study of the main features of competition law. While the focus is on EU competition law, reference will be made to the laws of other jurisdictions (e.g. the United States and the UK) when these offer relevant points for comparison. The first part of the course examines the history and aims of competition law. It considers the role of economic analysis and its limitations in the light of non-economic considerations. The second part is a review of the major substantive fields: restrictive practices; the regulation of monopolies and dominant positions; distribution and cooperation agreements and merger control. The third part addresses the public and private enforcement of competition law.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Whish and Bailey Competition Law (7th edn, 2011); Jones & Sufrin, EC Competition Law: Cases and Materials (7th ed, 2014); Geradin, Layne-Farrar, and Petit, EU Competition Law and Economics (2011); Faull & Nikpay, The EC Law of Competition (3rd edn, 2004).

Assessment path 2
Take-home assessment (100%).

LL426E Half Unit

Theories of Human and Constitutional Rights

This information is for the 2020/21 session.

Teacher responsible: Dr Kai Moller NAB7.01

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Some knowledge of human or constitutional rights law of any jurisdiction may be helpful, but is not essential. A knowledge of philosophy is not required.

Course content: The course will provide an introduction to theories of human and constitutional rights. The emphasis is on a combination of law and theory; to this end, each session will rely on a mixture of cases from various jurisdictions and theoretical and philosophical materials. Topics to be discussed will include: Robert Alexy's Theory of Rights as Principles; Ronald Dworkin's Theory of Rights as Trumps; The Debate about Proportionality; Absolute Rights; The Debate about Judicial Review; The Culture of Justification and the Right to Justification.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: The course will rely on both cases from various jurisdictions and articles and book chapters from authors including Ronald Dworkin, Robert Alexy, Mattias Kumm, Jeremy Waldron and

Frances Kamm.

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take-home assessment (100%).

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines the role of constitutions and the nature of constitutional discourse. It considers the ways in which theorists have advanced understanding of constitutions and devised solutions to a range of constitutional questions. The course deals with the following topics: the scope of constitutional theory; the constitution of government; constitutional politics; representation; sovereignty; constituent power; constitutional rights; the rule of law; liberalism and republicanism; constitutional adjudication; cultural pluralism; theories of federalism; the cosmopolitan polity.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Much of the reading for the course consists of classic texts in political thought. Many are available online and the course is delivered through Moodle. Indicative reading includes: Hobbes, Leviathan; Rousseau, The Social Contract; Montesquieu, The Spirit of the Laws; Burke, Reflections on the Revolution in France; Tocqueville, Democracy in America; Schmitt, Constitutional Theory; Oakeshott, On Human Conduct; Hayek, The Constitution of Liberty.

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take-home assessment (100%).

LL430E Half Unit

Investment Treaty Law

This information is for the 2020/21 session.

Teacher responsible: Dr Christopher Thomas NAB 7.18

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The aim of the course is to introduce students to international investment law and dispute settlement, the latter emphasizing developments in investment treaty arbitration.

The course focuses on the public international law rules and institutions that govern investments and investment treaty disputes. The course has five main elements: (1) the historical, theoretical and policy background behind investment treaties and dispute settlement by arbitration; (2) the rules governing jurisdiction and admissibility of investor-state arbitration cases; (3) the substantive principles and standards – such as national treatment, most-favoured-nation treatment, expropriation, and the minimum standard in international law – that may apply to the investor-state relationships; (4) recognition and enforcement of investor-state arbitral awards and interaction between international tribunals and national courts; and (5) the discussion of the future of international investment law.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: CL Lim, J Ho, M Paparinskis, *International Investment Law and Arbitration* (CUP 2018); R Dolzer and C Schreuer, *Principles of International Investment Law* (2nd edn, Oxford 2012); G Van Harten, *Investment Treaty Arbitration and Public Law* (Oxford, 2006)

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL431E Half Unit

Takeover regulation in the UK and US

This information is for the 2020/21 session.

Teacher responsible: Prof Robert Kershaw NAB7.16

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course will look at the regulation of the bid process and at takeover defence regulation in the UK and the US. The course will look at: transaction structures; the function and effects of the market for corporate control; takeover process regulation; takeover defence regulation; deal protections; and regulating conflicts of interest in going private transactions.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: The course will use materials distributed through moodle and the course pack as well as D. Kershaw, *Principles of Takeover Regulation* (2016). Background material can be found in R. Kraakman et al, *The Anatomy of Corporate Law* (2004); B. Black, *The Law and Finance of Corporate Acquisitions* (1995); and W. Carney, *Mergers and Acquisitions* (2003).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL432E Half Unit

Mergers, Acquisitions and Restructurings in Europe

This information is for the 2020/21 session.

Teacher responsible: Mr Edmund-Philipp Schuster NAB6.30

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: There are no formal pre-requisites for this module.

Course content: In this module, we will explore the regulation of mergers, acquisitions and restructurings in Europe. We will focus on legal techniques for the combination and restructuring of business operations in Europe, with a particular focus on the legal issues arising in cross-border transactions in the EU.

There are a number of reasons for corporations wanting to restructure their operations or to make acquisitions. For instance, firms may want to acquire a strategically valuable firm or asset in order to improve the efficiency (and thus increase the value) of their business operations; they may want to implement a better governance structure, enabling them to manage their undertaking more effectively; or they may want to subject themselves to more favourable legal or tax rules – including choosing among different national corporate laws.

EU law offers a range of legal vehicles for achieving such aims, and it is these vehicles we will explore throughout the term. In particular, we will look at re-incorporations of EU companies based on the relevant Treaty provisions; takeovers of (listed) EU companies; domestic ("statutory") mergers; de-mergers and spin-offs; cross-border mergers in the EU; and the European Company. Content overview:

- The market for corporate control, corporate ownership structures and transaction structures for takeovers and restructurings in Europe
- European takeover regulation
- Domestic mergers
- Divisions & spin-offs
- Cross-border mergers
- Employee participation (board-level co-determination) and board structures, and their relevance for corporate transactions
- The European Company (SE)
- Brief introduction to taxation of corporate transactions and tax-related drivers and incentives for intra-group reorganisation and company migration

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A full reading list will be made available via Moodle at the beginning of the course. Sample readings: R. Romano, *A Guide to Takeovers: Theory, Evidence and Regulation* (1992) 9 *Yale Journal of Regulation* 119; RD Kershaw, *Company Law in Context* (2012), Web Chapter A [available here: http://global.oup.com/uk/orc/law/company/kershaw2e/resources/chapters/Web_Chapter_A.pdf]; S Grundmann, *European Company Law* (Intersentia, 2nd ed. 2011): Chapter 3 (Mergers & Divisions); R Kraakman et al, *The Anatomy of Corporate Law* (OUP, 2nd ed. 2009): Chapter 7 (Control Transactions); PL Davies et al, *The Takeover Directive as a Protectionist Tool?* [available here: <http://ssrn.com/paper=1554616>]; C Clerk et al, *A Legal and Economic Assessment of European Takeover Regulation* [available here: <http://www.ceps.eu/system/files/Takeover%20Bids%20Directive%20book%20-%20Final.pdf>]; E-P Schuster, *The Mandatory Bid Rule: Efficient, After All?* (2013) 76 *Modern Law Review* 529; KJ Hopt and E Wymeersch (eds), *European Takeovers: Law and*

Practice; M Pannier, The EU Cross Border Merger Directive – A New Dimension for Employee Participation and Company Restructuring (2005) 16 European Business Law Review 1424.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL433E Half Unit

State and Market in the EU

This information is for the 2020/21 session.

Teacher responsible: Prof Pablo Ibanez Colomo NAB5.16

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: Member States of the EU are not free to award subsidies to their national companies or to support them in a comparable way (by, inter alia, securing favourable supply conditions to the companies, granting loans at favourable rates or providing unlimited guarantees). In the wake of the recent financial crisis, for instance, bailout measures adopted across the EU had to be cleared by the European Commission in accordance with Articles 107 and 108 TFEU. The first part of the course explores the economic rationale underpinning the control of State aid in the European Union (the reasons why similar regimes are not implemented at the national level in federal countries facing similar issues, such as the United States, will also be explored). The second part examines (i) the notion of State aid within the meaning of Article 107(1) TFEU and (ii) the conditions under which measures falling under the scope of that provision may be deemed compatible with the internal market. The third part provides an overview of the application of the law in some sectors (including the financial and the communications sectors) or for some purposes (e.g. research and development, regional aid). The fourth part is devoted to the procedural aspects of the discipline.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Quigley, European State Aid Law and Policy (3rd Edition, 2015); Bacon (ed), European Community Law of State Aid (3rd Edition, 2017); Jones and Sufrin, EU Competition Law (online chapter) (6th Edition, 2017)

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL434E Half Unit

Regulation: Strategies, Theories and Implementation

This information is for the 2020/21 session.

Teacher responsible: Prof Gordon Baldwin

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period.

The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course provides an introduction to key topics in the study of regulation from with a comparative and generic perspective drawn from public administration, socio-legal studies and institutional economics. Topics include: What is regulation and Why do it? What is Good Regulation? Regulatory Strategies. Explaining Regulation. Enforcing Regulation. Risk Regulation. Regulatory Standard Setting. Regulatory Competition. Regulation and Cost Benefit Analysis.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: R. Baldwin, M. Cave and M. Lodge, Understanding Regulation, 2nd ed. (OUP, 2011); R. Baldwin, M. Cave and M. Lodge (ed.) Oxford Handbook on Regulation (OUP, 2010); R. Baldwin, C. Hood and C. Scott, Socio-Legal Reader on Regulation (OUP, 1998); Responsive Regulation: Transcending the Deregulation Debate by Ian Ayres and John Braithwaite (OUP, 1992); B. Morgan and K. Yeung (2007), An Introduction to Law and Regulation (Cambridge University Press, 2007); J. Jordana and D. Levi-Faur, The Politics of Regulation (Edward Elgar, 2004); A. Ogun, Regulation (OUP, 1994); R. Baldwin, Rules and Government (OUP, 1995); I. Ayres and J. Braithwaite, Responsive Regulation (OUP, 1992).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL435E Half Unit

Innovation, Technology and Patent Law

This information is for the 2020/21 session.

Teacher responsible: Dr Siva Thambisetty NAB 7.29

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: Patent rights are the link between your index finger that slides or twirls to open your smartphone, a synthetically generated living cell, the diagnostic test for breast cancer, the velcro on your gym bag and the connectivity we often take for granted on social media. Over the last two decades patents have moved from an obscure, arcane subject to being the main stay of domestic and international debates spanning issues as wide ranging as innovation policies, access to medicines, international trade and development, ethical implication of biological research and commercialisation and the sustainable use of genetic resources.

This course will critically examine core concepts of the protection of inventions in UK/European, US and International patent law often taking a comparative perspective. We examine specific industrial or technology sectors such as software, artificial intelligence, biotechnology and pharmaceuticals. The course takes a broad approach to questions of patentability, and through readings and discussion you will investigate the economic

and political dimensions of the use, control and exploitation of technology and innovation and the impact of structural inequalities. This year 2021 in particular, the devastating effects of the pandemic invites us to contemporaneously study the effort to provide vaccines and treatments for Covid-19 and analyse what it teaches us about the intersection between market incentives like patents and structural inequality.

You do not need prior exposure to intellectual property law or a science background to take the course. You will be supported throughout the course to understand technologies via their legally significant attributes.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Bently, Sherman, Gangjee and Johnson Intellectual Property Law, OUP 2018, Pila The Requirement for an Invention in Patent Law Oxford University Press 2010, Spence Intellectual Property, Clarendon Law Series 2007, Landes and Posner The Economic Structure of Intellectual Property Law Harvard University Press 2003, Robert Merges Justifying Intellectual Property Law HUP 2011, Jaffe & Lerner, Innovation and its Discontents Princeton University Press 2004.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL436E Half Unit

Rethinking EU Law

This information is for the 2020/21 session.

Teacher responsible: Dr Michael Wilkinson NAB6.28

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: EU law is a fast-moving, dynamic area of law. The course will address core aspects of EU law and develop a number of key themes in the public law and policy of the EU and its Member States. It will provide a sophisticated understanding of the legal, political and constitutional issues surrounding the central debates in the EU, from its origins to the recent crises, including the Euro-crisis and Brexit. Topics will include: - Law and Politics of European Integration - Fundamental Freedoms - Collective Autonomy and Social Justice - Authority of EU Law - Sovereignty, Identity and Pluralism - Political Economy - Future of the EU. The course will use general theoretical accounts in law and related disciplines in order to situate EU law in its economic, political and social context. It uses the LSE's unique interdisciplinary expertise in European law, constitutional theory, public law, and legal theory for a rich and varied study of the challenges facing the EU and its future development.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Chalmers et al., European Union Law (CUP, 2014); Craig and Deburca, EU Law: Text, Cases and Materials (OUP, 2015); Craig and DeBurca (eds.) The Evolution of EU Law (OUP, 2011); Maduro and Azoulai (eds.) The Past and Future of EU Law (Hart, 2010); Dickson and Eleftheriadis (eds.) Philosophical Foundations of EU Law (OUP, 2012); Tuori and Tuori, The Eurozone

crisis: A Constitutional Analysis (CUP, 2013)

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL437E Half Unit

International Criminal Law

This information is for the 2020/21 session.

Teacher responsible: Dr Stephen Humphreys NAB6.15

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Some background in public international law is helpful for this course. If an introduction or refresher is needed, a standard textbook such as Malcolm Shaw's International Law is recommended.

Course content: The course looks at the history of and background to international criminal law and at its substantive content—its origins in the early Twentieth Century, its purported objectives, and the core crimes set out in the Rome Statute over which the International Criminal Court has jurisdiction (war crimes, crimes against humanity, genocide). The course will then examine in more detail a number of areas of contemporary interest (at least two from among the following: universal jurisdiction, immunity, torture, terrorism, international tribunals). The course is mainly directed at the conceptual problems associated with the prosecution of war criminals and, more broadly, legalised retribution.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Cryer, Friman, Robinson & Wilmschurst, An Introduction to International Criminal Law and Procedure (Cambridge), 2nd edition (2009) Simpson, Law, War and Crime, Polity (2007).

Indicative reading

Gary Bass, Stay the Hand of Vengeance. The Politics of War Crimes Tribunals (Princeton, 2000); Judith Shklar, Legalism (Harvard, 1964); Mark Osiel, Mass Atrocity, Collective Memory & the Law (Transaction Publishers, 1997); T McCormack & G Simpson, The Law of War Crimes (Kluwer 1997); W Schabas, The International Criminal Court (Cambridge, 2001); H Arendt, Eichmann in Jerusalem (Penguin, 1997).

Assessment: Assessment path 1

Assessment path 2

Take-home assessment (100%).

LL438E Half Unit

Commercial Remedies

This information is for the 2020/21 session.

Teacher responsible: Dr Solene Rowan NAB 7.26, Prof Charles Webb NAB 6.26 and Dr Andrew Summers NAB 6.06

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Pre-requisites: Undergraduate contract and tort law

Course content: The objective of the course is to provide students with a detailed understanding of remedies in a commercial context. The reading addresses both case law and academic commentary. Here is an indicative list of the issues that will be considered on the course:

1. The aims of commercial remedies: What interests and other policies may be served by the law when remedying commercial disputes?
2. The function of contract damages: How do the courts assess damages for breaches of contract? Should the courts do more to protect the claimant's interest in performance? What limits are placed on the recovery or measure of damages?
3. Punishment: Is punishment of a defaulting defendant ever a legitimate aim in commercial remedies? Should punitive damages be given a greater role in English commercial law?
4. Agreed remedies: To what extent are commercial parties free to fix the remedies available to them in the event of breach? Does freedom of contract extend to the parties' secondary obligations?
5. Unjust enrichment: What is the law of unjust enrichment? What is its relationship to the law of contract? What can commercial parties recover under the law of unjust enrichment?
6. Comparative law: How do other jurisdictions deal with these questions? What might the common law learn from civil law systems?

Teaching: 24 hours

Formative coursework: All students are expected to produce one 1,500 word formative essay during the course. Formative assessment opportunities will be provided (essay or problem questions)

Indicative reading: Rowan, Remedies for Breach of Contract: A Comparative Analysis of the Protection of Performance (OUP 2012). Burrows, Remedies for Torts and Breach of Contract (4th edn OUP 2019). Virgo and Worthington (eds), Commercial Remedies: Resolving Controversies (CUP 2017) Webb, Reason and Restitution (OUP 2016)

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL439E Half Unit UK Corporate Law

This information is for the 2020/21 session.

Teacher responsible: Prof Robert Kershaw NAB7.16

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Course content: 1. The Evolution of the UK company. This session will address the evolution of the corporate form from the mid-19th century, and outline the partnership based conception of UK company. It will contrast the partnership conception with the corporate / entity conception. 2. Legal personality, formation and structure – considering the implications and function of separate legal personality and the scope to disregard the corporate veil; the process of formation; and the constitutional make-up of the company. 3. Corporate Actions – considering how the company acts in contract, tort and crime. 4. The distribution of power in a UK company – considering the location and contractual distribution of power in a UK corporation; the problem of separation of ownership and control / the agency problem; mandatory versus default rules; core mandatory rights: removal of directors and calling shareholder meetings. 5. Director's duties I: the nature of duties; who owes them; to whom; the corporate objective; the duty to promote the success of the company. 6. Directors Duties II: the duty of care (business judgments, business process, monitoring, systems and controls, risk management) 7. Directors Duties III: the duty of loyalty (self-dealing transactions, corporate opportunities, competing with the company, bribes and commissions). 8.

Company law and creditor protections – shareholder incentives to exploit creditors; the scope for unlimited liability, duties to creditors; wrongful trading. 9. Derivative Actions: the rule in *Foss v Harbottle*; the new derivative action mechanism; indemnity orders and contingency fees; reflective loss. 10. Minority shareholder protections – common law restraints on the exercise of majority shareholder power and influence; statutory constraints on the exercise of such power and influence (122(g) Insolvency Act 1986 and section 994 Companies Act 2006).

Teaching: 20 hours of seminars in the MT.

24 hours (Executive LLM)

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Core Texts: David Kershaw, Company Law in Context (2nd ed, OUP 2012). Paul Davies, Gower and Davies' The Principles of Modern Company Law (10th eds, Sweet & Maxwell, 2016). For each session in addition to the main texts other readings will include cases, statutes and journal articles. As an example:

Session 1:

Paul Davies, Gower and Davies' The Principles of Modern Company Law (6th eds, Sweet & Maxwell, 1996), Chapter 1. Extracts from N. Lindley, Treatise on the Law of Companies (as a Branch of the Law of Partnerships) (1889). F. Palmer, Company Law: A Practical Handbook for Lawyers and Business Men (5th eds, 1905). Extracts from D. Kershaw, The Path of Corporate Fiduciary Law (2012) 8 New York University Journal of Law and Business 395.

M. Lobban, Corporate Identity and Limited Liability in France and England 1825-67, 25 Anglo American Law Review. 397, 403-04 (1996). Ernst v Nichols (1857) 10 Eng. Rep. Ashbury Railways v Riche [1874-80] All ER Rep Ext.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL440E Half Unit Digital Rights, Privacy and Security

This information is for the 2020/21 session.

Teacher responsible: Dr Orla Lynskey (NAB 6.07)

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Basic knowledge of EU law is desirable but not essential for this course.

Course content: Personal data is an important factor of production in data-driven economies, and the processing of personal data can generate significant economic and social benefits. Personal data processing can also have a detrimental impact on established rights and values, such as autonomy, privacy and data protection. As a result, legal frameworks to regulate personal data processing have been enacted across the world, with the EU legal model used as a blueprint. Yet, despite the development of such legal frameworks across the globe, critical questions remain unanswered. For instance, the objectives of data protection frameworks differ with some prioritising a fundamental-rights approach to data protection regulation while other frameworks are based on an economic free-trade rationale. Disagreement also persists regarding how the balance should be struck between effective data protection and other rights (such as freedom of expression and freedom of information) and interests (such as innovation and national security).

This course will critically evaluate the legal framework applicable to personal data processing. It will be predominantly with reference to the EU framework, as this has served as a model for over 100 other jurisdictions. However we will also examine aspects of the US legal framework as it differs considerably from other global legal regimes. Participants will be introduced to techniques and technologies for monitoring and processing personal data in the information society. In order to bring key issues to life, a number of case studies will be considered, including the application of data protection and privacy rules to online behavioural advertising and to State surveillance.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Lynskey, *The Foundations of EU Data Protection Law* (OUP, 2015). Mayer-Schönberger, *Delete: The Virtue of Forgetting in the Digital Age* (Princeton UP, 2009). Kuner, *Transborder Data Flows and Data Privacy Law* (OUP, 2013). Bygrave, *Data Privacy Law: An International Perspective* (OUP, 2015)

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL441E Half Unit

Employment Law

This information is for the 2020/21 session.

Teacher responsible: Dr Astrid Sanders NAB7.19

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: Regulation of the content and the form of the employment relation. The contract of employment, including express and implied terms and the scope of employment law. Regulation of minimum wage and working time. Protection against discrimination in the workplace. Discipline and protection from dismissal and termination of employment. The approach involves theoretical perspectives, economic analysis, comparative law of employment, and examination of relevant European law.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Detailed syllabus of readings will be available and the materials can all be accessed through Moodle. Hugh Collins, *Employment Law*, 2nd edn (Oxford University Press, 2010), Chapters 1-9 or Hugh Collins, KD Ewing and Aileen McColgan, *Labour Law* (2nd edition, CUP 2019).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL442E Half Unit

Corporate Restructuring

This information is for the 2020/21 session.

Teacher responsible: Ms Sarah Paterson NAB6.06

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course is concerned with the principles and policies underlying the rescue of financially distressed companies and businesses. The course considers formal legal procedures available for dealing with companies and businesses in financial distress as well as informal approaches to rescue. Topics include: Chapter 11 as a Rescue Procedure. Corporate Rescue Procedures in the UK: Informal and Formal Procedures. Recognition of Rescue Procedures: EC and International. The Theory and Philosophy of Rescue.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A full Reading List will be distributed during the course. The recommended text is V. Finch, *Corporate Insolvency Law: Perspectives and Principles* (Cambridge University Press, 2009) (2nd edition). Wider background reading will include some comparative law reform and other material including: R. Olivares-Caminal et al, *Debt Restructuring* (Oxford University Press, 2013) and the ABI Commission to Study Reform of Chapter 11 Final Report

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL443E Half Unit

Corporate Bankruptcy

This information is for the 2020/21 session.

Teacher responsible: Ms Sarah Paterson NAB6.06

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course is concerned with the principles and policies underlying the legal treatment of corporate bankruptcy. The impact of these procedures and approaches on third parties, for example corporate groups, secured and unsecured creditors, directors and employees, is also considered. Topics include: Setting aside transactions; The pari passu principle and preferential claims; Secured creditors and security devices; Quasi-security devices for the unsecured creditor; The problem of corporate groups; Company directors in troubled times; Employees in distress and EC and international recognition in corporate bankruptcy.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A full Reading List will be distributed during the course. The recommended text is V. Finch, *Corporate Insolvency Law: Perspectives and Principles* (Cambridge University Press, 2009) (2nd edition).

Assessment: Assessment path 1

Essay (100%, 8000 words).
 Assessment path 2
 Take-home assessment (100%).

LL444E Half Unit

International Law and the Use of Force

This information is for the 2020/21 session.

Teacher responsible: Dr Devika Hovell NAB 6.32

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Executive version of an existing taught masters course (LL4A8).

Course content: This course examines the international law relating to when it is permissible to use force (*jus ad bellum*). The aim of this course is to develop an understanding of the principles of international law that regulate the use of force in international society. It concentrates on the prohibition of resort to force in Article 2(4) of the United Nations Charter and the recognized exceptions to that prohibition, namely Security Council authorization and self-defence. We will also examine in detail related concepts and doctrines, including humanitarian intervention and the responsibility to protect, pro-democratic intervention, the protection of nationals and the criminalization of aggression.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A detailed reading list will be issued in the course pack. For background reading, see Gray, *International Law and the Use of Force* (4th ed, 2018).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL445E Half Unit

Cultural Property and Heritage Law

This information is for the 2020/21 session.

Teacher responsible: Dr Tatiana Flessas NAB7.27

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course looks at cultural property and heritage law from legal, social theoretical and practice-oriented perspectives. It provides an overview of existing and emerging cultural property and heritage legislation (domestic and international). We will be looking in particular at the development of cultural property legislation in the 20th century and emerging

international cultural property and heritage initiatives under the auspices of the UN and UNESCO. Topics to be covered include the origins of cultural property law, the problems in defining cultural property and heritage, current issues and cases in repatriation and restitution of cultural objects, the National Trust and other heritage protection regimes, and intangible cultural heritage. The course also addresses the creation and management of museums and heritage sites, primarily within the UK, but also including sites in North and South America, Europe and Asia. We consider how the issues that we've identified throughout the course arise in the ongoing construction, protection, and (primarily economic) uses of heritage. Along with specialist seminars, the course includes visits to museums and contact with practising experts in the field.

Teaching: Courses are taught over 5 days (Mon-Fri) with approximately 5 hours teaching per day. There is a morning and an afternoon session, so 10 sessions in total with the overall contact time being 24-26 hours.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Neil Cookson, *Archaeological Heritage Law* (2000 Barry Rose); John Henry Merryman and Albert E. Elsen, *Law, Ethics and the Visual Arts* (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 1* (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 3* (1989 Butterworths); J.E. Tunbridge and G.J. Ashworth, *Dissonant Heritage: the management of the past as a resource in conflict* (1996 J. Wiley); Norman Palmer, *Museums and the Holocaust: law, principles and practice* (2000 Institute of Art and Law); John Henry Merryman, *Thinking about the Elgin Marbles: critical essays on cultural property, art and law* (2000 Kluwer Law International); Nick Merriman, *Beyond the Glass Case: the past, the heritage and the public in Britain* (1991); Jeanette Greenfield, *The Return of Cultural Treasures* (1989); Richard Prentice, *Tourism and Heritage Attractions* (1993); G.J. Ashworth and P.J. Larkham, eds. *Building a New Heritage: tourism, culture, and identity* (1994); Peter Mandler, *The Fall and Rise of the Stately Home* (1997); Patrick J O'Keefe, *Trade in Antiquities: reducing destruction and theft* (1997); Ismail Serageldin, Ephim Shluger, Joan Martin-Brown, eds. *Historic Cities and Sacred Sites: cultural roots for urban futures* (2001); Federico Mayor, *Memory of the Future* (1995); Peter J. Fowler, *The Past in Contemporary Society: then, now* (1992); David Brett, *The Construction of Heritage* (1996); Karl Ernest Meyer, *The Plundered Past* (1974).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL446E Half Unit

Art and Antiquities Law

This information is for the 2020/21 session.

Teacher responsible: Dr Tatiana Flessas NAB7.27

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course engages in a discussion of specific cases and issues regarding acquisition, ownership, and restitution of antiquities and works of art, and the problems that arise in regulating markets in art, antiquities and cultural artefacts. We

will look at domestic (UK and US) and international legislation regulating the art and antiquities trades. Against this legislative background, the course examines important cases in disputes regarding looting and provenance of antiquities, and questions of commodification and sale of cultural artefacts and antiquities, including the issues that arise in the operation of the art market (dealers, museums, collectors and auction houses). 'Art Law' is a specialized area of practice and an emerging area of theory and scholarship. We will look at some of the cases and theory of art and law, including the practices of dealers and auction houses in valuing (and mis-valuing) art for sale; the recent developments in addressing the restitution of art taken during the Nazi era; museum loans and the cross-border movement of art; the restoration and conservation debate(s) and then turn to a scholarly and interpretive approach to the issues that arise in considering the art market. 'Antiquity Law' is an engagement with the problems of the market(s) in antiquities and the legal and ethical burdens on the participants in this trade. We will look at the practices and constraints that arise in the context of both private purchasers/dealers and museums acquiring antiquities. We will focus on the case that the government of Italy brought against Marion True, the erstwhile Curator of Antiquities at the Getty Museum, and we will consider how that ground-breaking prosecution changed some of the practices in this area, as well as added to the toolbox for nations seeking repatriation of cultural objects. We will also return to the questions that arise in dealer, auction house and museum policies more generally. Finally, practitioners in these areas, museum and auction house professionals, archaeologists, and art experts will be contributing to the seminars on the emerging legal issues in this area.

Teaching: Courses are taught over 5 days (Mon-Fri) with approximately 5 hours teaching per day. There is a morning and an afternoon session, so 10 sessions in total with the overall contact time being 24-26 hours.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Colin Renfrew, *Loot, Legitimacy and Ownership: The Ethical Crisis in Archaeology* (2000 Duckworth); Neil Cookson, *Archaeological Heritage Law* (2000 Barry Rose); James Cuno, *Who Owns Antiquity? Museums and the Battle over our Ancient Heritage* (2010 Princeton University Press); John Henry Merryman and Albert E. Elsen, *Law, Ethics and the Visual Arts* (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 1* (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 3* (1989 Butterworths); Norman Palmer, *Museums and the Holocaust: law, principles and practice* (2000 Institute of Art and Law); Olav Velthuis, *Talking Prices: Symbolic Meanings of Prices on the Market for Contemporary Art* (2007 Princeton University Press); Jason Felch & Ralph Frammolino, *Chasing Aphrodite: The Hunt for Looted Antiquities at the World's Richest Museum* (2010 Houghton Mifflin Harcourt); Sarah Thornton, *Seven Days in the Art World* (2009 Granta Books); Jeanette Greenfield, *The Return of Cultural Treasures* (1989); Patrick J O'Keefe, *Trade in Antiquities: reducing destruction and theft* (1997); Karl Ernest Meyer, *The Plundered Past* (1974).

Assessment: Assessment path 1

Assessment path 2
Take-home assessment (100%).

LL447E Half Unit

International Law: Courts and Tribunals

This information is for the 2020/21 session.

Teacher responsible: Dr Devika Hovell NAB6.32

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course introduces students to the practice and theory of international legal dispute resolution, focusing on dispute settlement before courts and tribunals. The former Prosecutor of the Yugoslav Tribunal, Richard Goldstone, resolved that: 'it seems to me that if you don't have international tribunals, you might as well not have international law'. Given the proliferation of courts and tribunals applying and enforcing international law, certain scholars have argued we are witnessing the emergence of an 'international judicial system' (Martinez). The course involves three main elements:

1. Firstly, the course examines the structure and work of the International Court of Justice, the principal judicial organ of the United Nations, focusing on jurisdiction/admissibility, contentious cases and advisory opinions.
2. Secondly, the course introduces a variety of other international courts and tribunals, such as the International Criminal Court, domestic and regional courts dealing with international law and human rights, including the European Court of Human Rights and the European Court of Justice, the WTO Dispute Settlement Body and investment treaty arbitral tribunals. Using contemporary and controversial case studies, the course will critically analyze and contrast the institutional design and jurisdiction of these courts and tribunals.
3. Thirdly, throughout the course we explore key theoretical controversies surrounding the adjudication of international law, focusing in particular on (a) how these courts and tribunals relate to one another (hierarchy, specialization and fragmentation); (b) what criteria should be used in assessing the legitimacy and effectiveness of these courts and tribunals; and (c) whether and how these courts and tribunals create international law.

Teaching: 24-26 hours of contact time.

Formative coursework: Students are encouraged to produce one 2,000 word formative essay during the course.

Indicative reading: Indicative reading includes Karen Alter, *The New Terrain of International Law: Courts, Politics, Rights* (2014 Princeton); Gleider Hernández, *The International Court of Justice and the Judicial Function* (2014 OUP); Yuval Shany, 'No Longer a Weak Department of Power? Reflections on the Emergence of a New International Judiciary' (2009) 20(1) *European Journal of International Law* 73; Frederic Megret and Marika Giles Samson, 'Holding the Line on Complementarity in Libya: the Case for Tolerating Flawed Domestic Trials' (2013) 11 *Journal of International Criminal Justice* 571.

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take-home assessment (100%).

LL448E Half Unit

Terrorism and the Rule of Law

This information is for the 2020/21 session.

Teacher responsible: Prof Conor Gearty NAB 6:11

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that

whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course will provide a theoretical and historical introduction to the concept of terrorism. It will critically consider definitions of terrorism, and analyse the relationship between terrorism and the right to rebel, and the right to engage in civil disobedience. The historical development of the idea of 'terrorism' from the late eighteenth century through to the present will then be traced, with the emphasis on locating the practice of political terror in its political and military/quasi-military context. The role of international law generally and international human rights law in particular in the context of terrorism and anti-terrorism action will be considered in detail. The course will teach the material in context, so the subject will be analysed by reference to particular situations where necessary, eg Northern Ireland, the Palestine/Israel conflict and the post 11 September 'war on terror'. The aim of the course is to give the student a good critical understanding of this most controversial of subjects, and also to impart an understanding of the role of law in shaping the fields of terrorism and of counter-terrorism (and, latterly, the emerging field of 'extremism').

Teaching: 24-26 hours of contact time.

Formative coursework: All students are encouraged to produce one 2,000 word formative essay during the course.

Indicative reading: There are four pieces ideally to be read before we meet:

- (i) Richard English Terrorism: How to Respond (Oxford 2009; pb 2010).
- (ii) Conor Gearty, Liberty and Security (Polity, 2013). (Note both of these books are in paperback, and short!)
- (iii) Conor Gearty, 'Terrorism and Human Rights' in Gearty, Selected Essays on Human Rights and Terrorism (Cameron May 2008), ch 24 – I have a PDF available.
- (iv) Conor Gearty, 'Terrorist threats, Anti-terrorism and the Case against the Human Rights Act' in F Cowell (ed), Critically Examining the Case against the Human Rights Act (Hart 2017) I have a word version.

Please try to ensure that you have completed this reading prior to the module.

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL449E Half Unit Cyberlaw

This information is for the 2020/21 session.

Teacher responsible: Prof Andrew Murray NAB7.11

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course critically analyses the regulation of the Internet and digital devices (such as smart devices and tablets).

It begins by providing a theoretical framework for the regulation of the Internet, examining questions such as whether the internet is capable of regulation, whether such regulation should be neutral and who should assume the task of regulating the online environment. Students taking the course will be expected to develop knowledge and understanding of the different values and interests brought to bear in the regulation of information technologies and communities.

Armed with this theoretical background, students will then be asked to consider how these values are reflected in the regulatory design of the online environment. This examination will be conducted by considering a number of case studies relating to online privacy, defamation, criminal activity and market power. The course concludes by examining the topical and politically charged question of whether Internet Service Providers should be allowed to vary service conditions by types of content.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are encouraged to produce one 2,000 word formative essay during the course.

Indicative reading: Murray, Information Technology Law: The Law and Society (OUP, 4th ed, 2019). Reed & Murray, Rethinking the Jurisprudence of Cyberspace (Edward Elgar, 2018). Murray, The Regulation of Cyberspace (Routledge, 2007). Lessig, Code Ver, 2.0 (Basic Books, 2006). Zittrain, The Future of the Internet (Penguin, 2009). Reed: Making Laws for Cyberspace (OUP, 2012). Sunstein, Republic.com 2.0 (Princeton UP, 2009).

LL450E Half Unit

Banking and Finance Law: Regulating Retail, Consumer, and SME Markets

This information is for the 2020/21 session.

Teacher responsible: Dr Joseph Spooner

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Course content: As the past decade has transformed understandings of finance and the economy, it has generated

increasingly widespread recognition of the economic centrality of household finance. Responsibility for both the Global Financial Crisis and subsequent Great Recession can be attributed to failures of household credit markets. Consumer expenditure accounts for over 50% of GDP in most OECD economies, meaning that the financial markets and products powering this spending are of central policy importance. Key contemporary problems of economic stagnation, inequality, and political instability can all in some ways be linked to problems arising in consumer financial markets, which are increasingly important sites of legal and political activity. The economic significance of SME finance is similarly clear. Small and Medium Enterprises (SMEs) account for 99% of firms and approximately 70% of jobs in OECD countries, and questions of how these firms access finance raise perennial policy concerns. The political and regulatory disruption of Brexit also makes this a key time for the study of banking and finance law as it relates to consumers and SMEs. Questions arise as to the future for consumers, SMEs, and financial institutions, as regulatory regimes and capital flows are changed by the UK's departure from the EU.

The significance and expansive reach of the consumer and SME dimensions of financial law are not matched by coverage in typical law school curricula – this course aims to address this imbalance by presenting a unique offering. The course begins by discussing key principles and theoretical ideas of retail financial market regulation. It considers the nature and structure of consumer and SME financial markets, examining the institutions and sources that create the ground rules of markets, involving questions of how financial laws and regulations in these markets are made, applied, and enforced. The course applies and tests these ideas in examining discrete markets and areas of law, drawing on a combination of international norms and detailed examples from European, North American and English law. The course is structured uniquely around a thematic approach, discussing legal material through key questions of consumer/SME financial law and policy. Themes include:

- The place(s) of consumers and small enterprises in the Real Economy
- Aims and justifications of regulation in consumer and SME financial markets
- Consumers, SMEs and financial stability (including prudential regulation and its interaction with consumer/SME protection)
- Access to finance (basic banking; the cashless society; fintech)
- Complexity in financial products (including product design and the regulation of contract terms; information asymmetry and disclosure regulations; behavioural perspectives and 'nudging')
- Mis-selling scandals and legal responses (including mortgage lending crises and 'responsible lending'; SME derivatives mis-selling and investor protection rules)
- Cross subsidisation, price discrimination, and fairness in financial services pricing ('the poor pay more'; the 'loyalty penalty')
- The problem of high-cost credit and usury regulation (the Wonga saga and payday loan regulation; bank overdrafts; the role of price regulation in financial markets)
- Wall Street v Main Street (dispute resolution and enforcement; financial law-making)
- Financial failure and default (entrepreneurship and bankruptcy law; over-indebtedness and consumer bankruptcy)

Teaching: This is an intensive module, which will be delivered through interactive seminars. The module will provide between 24 and 26 hours of contact teaching time. Students will be provided with online and hard copy materials for the module well in advance of the intensive teaching. The teaching will take place in week-long sessions, running from Monday to Friday.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Formative assessments are set by teachers during the course and students will be given a submission date of approximately one month from the end of the teaching session. Feedback will be provided within two weeks following submission, either on Moodle or via email. The word limit for formative essays is 2000 words.

Indicative reading: General:

- Sir Ross Cranston, Emiliós Avgouleas, Kristin van Zwielen, Christopher Hare, and Theodor van Sante, *Principles of Banking Law* (3rd edition, OUP 2018)

AND

- Geraint Howells, Iain Ramsay, and Thomas Wilhelmsson (eds.), *Handbook of Research on International Consumer Law*, (2 edition, Elgar 2018)

OR

- Geraint Howells, Christian Twigg-Flesner and Thomas Wilhelmsson, *Rethinking EU Consumer Law* (1 edition, Routledge 2017).

Why Regulate of Consumer and SME Financial Markets?

- Iain Ramsay, 'Consumer Credit Law, Distributive Justice and the Welfare State' (1995) 15 *Oxford Journal of Legal Studies* 177.

- Luigi Zingales, 'Does Finance Benefit Society?' (2015) 70 *The Journal of Finance* 1327.
- Financial Conduct Authority, 'Fair Pricing in Financial Services' (FCA 2018) Discussion Paper DP18/9

Assessment: Assessment path 1

Take-home assessment (100%).

Assessment path 2

Essay (100%, 8000 words).

Students will be examined through a combination of an (8,000 word) assessed long essay (which may take the form of a policy paper) or take-home examination (6,000 words). The take-home examination will be uploaded and submitted electronically, and will be set two months after the completion of the intensive teaching. Video revision/question-and-answer sessions will be offered to students between the end of the teaching session and the exam.

LL4COE Half Unit**Taxation of Wealth**

This information is for the 2020/21 session.

Teacher responsible: Dr Andrew Summers NAB.6.06

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: This course is suitable for students from any disciplinary background within the social sciences. No previous study of taxation is required. Some prior familiarity with principles of tax design is advantageous but not essential.

Course content: The course examines the taxation of wealth from a variety of academic perspectives, drawing on research from political theory, economics, sociology and law. Taxes on wealth are defined broadly to include taxes on transfers of wealth, returns on wealth, and holdings of wealth. The course equips students with an interdisciplinary framework for explaining and evaluating taxes on wealth, and applies these approaches to existing tax policies and options for reform. The focus is on the UK and US contexts although comparisons are also made with other jurisdictions. Part I of the course introduces key debates from across the social sciences relevant to the taxation of wealth. Seminars 1-5 cover: (i) defining and measuring wealth; (ii) inequality and distributive justice; (iii) property rights; (iv) economic perspectives; and (v) social and political perspectives. Part II applies these debates to specific wealth tax policies. Seminars 6-10 cover: (i) taxes on transfers: inheritance/estate tax, lifetime receipts tax, comprehensive income tax; (ii) taxes on returns: capital gains tax, capital income tax and (iii) taxes on holdings: property tax, land-value tax, net wealth tax.

Teaching: 25 hours of seminars in the ST.

24-26 hours of contact time.

Formative coursework: Students will be expected to produce 2 pieces of coursework in the ST.

Students will receive formative feedback on two essay-plans (comprising 300-word abstract, outline of subheadings, and bibliography) based on past or sample summative essay titles.

Indicative reading: Atkinson, *Inequality: What can be Done?* (Harvard University Press 2015); Graetz & Shapiro, *Death by a Thousand Cuts: The Fight over Taxing Inherited Wealth* (Princeton University Press 2005); Hills et al, *Wealth in the UK: Distribution, Accumulation and Policy* (OUP 2013); Institute for Fiscal Studies, *The Structure and Reform of Direct Taxation: The Meade Report* (Allen & Unwin 1978); Institute for Fiscal Studies, *Tax by Design: The Mirrlees Review, Vols 1 & 2* (OUP 2011); Murphy and Nagel, *The Myth of Ownership: Taxes and Justice* (OUP 2002); Piketty, *Capital in the Twenty-First Century* (Harvard University Press 2014); Sandford, *Taxing Personal Wealth* (Allen & Unwin 1971); Scheve & Stasavage, *Taxing the Rich: A History of Fiscal Fairness in the United States and Europe* (Princeton University Press 2016); Waldron, *The Right to Private Property* (OUP 1991); Young, *The Myth of Millionaire Tax Flight: How Place Still Matters for the Rich* (Stanford University Press 2017)

Assessment: Assessment path 1

Take-home assessment (100%) in the ST.

Assessment path 2

Essay (100%, 8000 words) in the ST.

LL4CPE Half Unit**Tax Avoidance**

This information is for the 2020/21 session.

Teacher responsible: Dr Michael Blackwell NAB 7.21

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Course content: This course will provide a comprehensive overview of the phenomenon of tax avoidance and of the attempts by states to combat it: both unilaterally and multilaterally. Whilst using examples predominantly from the UK and USA the issues addressed by the course are general across many jurisdictions and so will be applicable to those with interests beyond the UK and USA.

The course will be multi-disciplinary, in that the course will draw on accessible social-science literature.

Taxpayers have always sought to minimise their tax burden.

However recent decades have witnessed a sharp rise in popular and governmental concern with tax shelters and other tax avoidance. Traditional strategies of tax avoidance have included postponement of taxes and tax arbitrage, in addition to attempting to exploit 'loopholes' through a formalist interpretation of legislation. In recent years the proliferation of complex financial instruments has increased the opportunities for such avoidance.

Additionally, globalisation and the development of the digital economy have facilitated tax avoidance strategies of base erosion and profit shifting (BEPS). This rise in opportunities for tax avoidance has been accompanied by an increased public concern that individuals and companies pay their 'fair share' of taxation: which states have responded to both through unilateral and multilateral actions (including the OECD's project on BEPS and the EU's Anti Tax Avoidance Package).

Particular topics covered will include (i) defining avoidance; (ii) strategies of tax avoidance; (iii) statutory interpretation and judicial approaches to tax avoidance especially with reference to the UK and USA; (iv) General Anti-Abuse and Anti-Avoidance Rules and Specific and Targeted Anti-Avoidance Rules; (v) reporting rules and other policies to deter avoidance; (vi) BEPS and the EU; and (vii) corporate social responsibility, professional ethics and public attitudes with regard tax avoidance.

Teaching: The module will provide between 24 and 26 hours of contact teaching time. Students will be provided with online and hard copy materials for the module well in advance of the intensive teaching. The teaching will take place in week-long sessions, which will typically be held in the first half of September, December and April. Where there is student demand we will also offer modules taught over two intensive weekends. For the week-long sessions, the module will run from either Monday to Friday, or Sunday until Friday with a rest day on Wednesday.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Michael Blackwell, 'The April 2019 loan charge' [2019] (3) *British Tax Review* 240-257. Michael Blackwell, 'Conduct Unbefitting: Solicitors, the SRA and Tax Avoidance' [2019] (1) *British Tax Review* 31-55. Michael Blackwell, 'Variation in the Outcomes of Tax Appeals Between Special Commissioners: An Empirical Study' [2013] *British Tax Review* 154-174. Dhammika Dharmapala, 'What Do We Know about Base Erosion and Profit Shifting? A Review of the Empirical Literature' (2014) 35(4) *Fiscal Studies* 421. J Feldman and JA Kay, 'Tax Avoidance' in Paul Burrows and Cento G Veljanovski (eds), *The Economic approach to law* (Butterworths 1981). Edward J McCaffery, *Income Tax Law: Exploring the Capital Labour Divide* (OUP 2012) 12-22; 182-202 (ie 1.6 until the end of Chapter 1 and 'Chapter 7, 'A Summary, of Sorts: Anatomy of a Tax Shelter'). Assessment: Assessment path 1

Take-home assessment (100%) in the MT.
 Assessment path 2
 Essay (100%, 8000 words) in the MT.

LL4CQE Half Unit

Legal Aspects of Private Equity and Venture Capital

This information is for the 2020/21 session.

Teacher responsible: Ms Sarah Paterson New Academic Building 6.19 and Dr Simon Witney N/A

This module is co-taught by Simon Witney, Visiting Professor in Practice and a practicing lawyer, and Sarah Paterson, Associate Professor of Law. Simon teaches Sessions 1-8 and Sarah teaches Sessions 9 and 10.

Availability: This course is available on the Executive LLM. This course is not available as an outside option. Students should note that private equity is a specialist asset class, and the basics of debt and equity are not covered in LL4CQE. The course is, therefore, recommended for students who are taking other, relevant corporate law and financial law courses, or who have relevant experience.

Course content: This module will equip students with a detailed understanding of the legal structures and issues arising in international private equity and venture capital. It is founded on deep academic analysis of pertinent theoretical and legal issues complemented by insights from relevant practitioners. It has a UK focus but includes relevant aspects of European Union law with comparative global perspectives. The module will cover:

- Private equity and venture capital fund raising and fund structuring, including the usual terms of private equity funds.
- The European regulatory framework.
- The structure and terms of venture capital investments and buyouts.
- The corporate governance of private equity-backed companies.
- The debt financing arrangements usually encountered on an LBO.

Session 1: Introduction to private equity and venture capital and some basic theory

This Session will introduce the legal structures and commercial dynamics of private equity and venture capital and the theoretical frameworks that will underpin the course.

Session 2: Fund terms

In Session 2 we examine the core economic and non-economic terms of a typical private equity or venture capital fund. We consider the theoretical basis for these terms.

Session 3: Fund structures: the limited partnership

In this Session we look at the limited partnership structure, examine why it is used and its main legal and tax characteristics. We also look at other aspects of the typical private equity fund structure.

Session 4: Private equity fund (and manager) regulation

This Session looks at UK and EU regulatory initiatives, and critically evaluates the provisions of the Alternative Investment Fund Managers Directive which affect private equity funds.

Session 5: Venture capital investments

Starting from a theoretical perspective, we will analyse the terms of a typical venture capital investment into a portfolio company by reference to example documents. We will also examine various aspects of contract and company law which have particular relevance to VC structures.

Session 6: Negotiating the VC deal: case study

In this Session, we will discuss the key points arising from a venture capital investment case study. We will focus on key points which have a legal as well as a commercial aspect, and connect these to the theoretical discussions in Session 5.

Session 7: The buyout: structure and terms

This Session will examine the structure of a buyout and how it differs from a VC investment. We will focus on pertinent company

law rules and the main commercial terms.

Session 8: The buyout: corporate governance issues

This Session will examine the ways in which private equity firms approach corporate governance. We will consider this in the context of the UK legal framework and some recent developments in corporate governance regulation that apply to large, private companies.

Session 9: LBO debt financing

This Session will examine the financing of the LBO. We will examine the relationship between the theory and practice of private equity as an asset class and certain key terms of the LBO financing agreements. We will also examine what finance theory tells us to expect about the terms of the financing agreements, and how we might explain the rise of covenant lite and covenant loose terms.

Session 10: Document review

In this Session we will apply the theory which we have studied in Sessions 8, 9 and 10 to the legal documentation used in an LBO.

Teaching: Students will receive approximately 30 hours of contact time.

Formative coursework: Students will have the option of producing a formative essay of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Core texts:

- Gilligan, J. and Wright, M., Private equity demystified: An explanatory guide, ICAEW, 2014 (freely available at <https://www.icaew.com/technical/corporate-finance/financing-change/private-equity-demystified-an-explanatory-guide-160216>).
- Hale, C. (ed.), Private Equity: A Transactional Analysis, 4th edition (Globe Law and Business, 2020).
- Witney, S., The corporate governance of private equity-backed companies, 2017, PhD thesis (freely available at: <http://etheses.lse.ac.uk/3557/>).

Further readings will be posted on Moodle.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

MG406E Half Unit

Behavioural Decision Science

This information is for the 2020/21 session.

Teacher responsible: Dr Barbara Fasolo

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: This course introduces students to Behavioural Decision Science: the science that explains and predicts how humans make decisions (the decision 'process') and how well (the decision 'outcome'). The course will focus on the process, and unveil the subtle and sometimes unconscious influences played by our mind (biases) and the context in which decisions are faced: What has been chosen in the past? Is there positive or negative affect - perhaps because of risk and uncertainty? Can AI be involved? All of these (and more) are factors that often determine how information is searched before choosing, how decisions are made, and the quality of the decision made.

In this course, you will be guided to the scientific language of decisions, judgments and biases. Each day you will work as a group and apply the steps of our proprietary tool 'Decision Canvas' to improve a real decision that you will select, applying different behavioural interventions – from 'process nudges' to 'debiasing' and 'choice architecture'.

The course is entirely seminar-based and balances theory, evidence and experience. It involves group-work throughout the course. We will alternate teaching with interactive activities designed to observe and feel the process of decision making from the 'inside', before reviewing behavioural decision theories and

evidence from lab and field studies.

The assessment is designed to give students the opportunity to work as a group and apply their new skills to support a real decision, as well as produce, individually, a rigorous and scholarly report on a specific aspect of decision making, of their interest.

Teaching: 15 hours of lectures and 8 hours of seminars in the LT.

Formative coursework: The formative assignment will take place on the final day of the course after all the lectures and seminars have been completed. The assignment will consist of a plenary presentation in which students divided into small groups will be asked to give a short presentation discussing an intervention that can be used to tackle the most important biases in a decision making problem of their choice. Student groups will develop their plenary presentations during seminars while interacting with the course teachers and other students. The formative feedback will be given at a team level, and will focus on the rigour and use of behavioural science concepts learned in the course.

Indicative reading: Bazerman, M. (2017) *Judgment in Managerial Decision Making*. New York: Wiley. 8th edition; Kahneman, D. (2011) *Thinking Fast and Slow*. London: Allen Lane; Russo, J. E. & Schoemaker, P. J. H. (2002) *Winning decisions: How to make the right decision the first time*, Piatkus Publ. Limited. Larrick, R.P. (2004). *Debiasing* (Chapter 16). In D.J. Koehler, & N. Harvey, *Blackwell Handbook of Judgement and Decision Making*. Malden: Blackwell Publishing

Assessment: Coursework (100%, 3000 words) in the LT. The summative assignment consists of two parts. In Part 1 (no more than 1,000 words), you will be asked to report on the decision, the bias and behavioural interventions recommended within the 'Decision Canvas' work that you did with your group. Part 2 (no more than 2,000 words) will be an essay where you will zoom in on a particular aspect of the decision process (e.g. decision frame, a judgement, a bias, a de-biasing or choice architecture technique) which you as a developing behavioural scientist have found intriguing and important (be it as a 'buddy' or as a 'decision maker'). This is done in a scholarly and rigorous manner. Part 1 will count for 25% of your mark while 75% will come from Part 2. You will be required to provide full essay-style referencing. Although the summative assignment will tackle the decision problems presented in groups, all students will write both parts of the summative assessment on their own and receive an individual mark.

MG440E Half Unit Managerial Economics (modular)

This information is for the 2020/21 session.

Teacher responsible: Professor Ricardo Alonso

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2020-2022 cohort.

Course content: A graduate-level introduction to the foundations of managerial economics and its application to high-level business decisions. Topics include:

1. Economics as a theory of organisation.
2. Demand, supply, and equilibrium: the determinants of consumers' and firms' market responses, the nature of non-strategic interaction, government intervention, international trade
3. Externalities and market failure
4. Strategic interaction and Game Theory
5. Choice under uncertainty: attitudes towards risk
6. Information and efficiency: adverse selection
7. Price discrimination: nonlinear pricing, social economics
8. Horizontal and Vertical Differentiation
9. Competition

Teaching: Scheduled over two modules. Nine 3.5 hour sessions plus two review sessions.

The course will run between the following dates:

24 August - 05 September 2020

14-19 December 2020

Formative coursework: Students will be expected to produce 1 problem set in the MT.

Indicative reading: Optional textbook: B. Douglas Bernheim and Michael D. Whinston, *Microeconomics*, McGraw Hill, 2008. Further readings will be provided at the beginning of the course.

Assessment: Coursework (20%) and class participation (15%). Other (65%) in the MT.

Coursework (20%), class participation (15%) and consulting project (65%).

MG441E Half Unit Foundations of Management (modular)

This information is for the 2020/21 session.

Teacher responsible: Prof Paul Willman

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

This information in this course guide pertains to the 2020-2022 cohort.

Course content: A thorough grounding in the key management disciplines. Students will be provided with an overview of the development of Management disciplines and will develop an understanding of the disciplinary anchors in Sociology, Psychology and Economics. Each field will cover Origins and disciplinary boundaries, triggers for growth, core concepts and the current state of play and debate.

Teaching: 35 hours of lectures in the MT.

Scheduled over 2 modules – 10 sessions of up to 3.5 hours each.

The course will run between the following dates:

• 24 August - 05 September 2020

• 14-19 December 2020

Lectures:

1. Course Introduction and the Origins of Management
2. Management and Firm
3. The Rise and Decline of Labour
4. Taylorism, Motivation and Performance
5. The Rise of Human Resources Management
6. Making Decisions
7. Understanding Organisational Structures
8. The Origins of Modern Strategy
9. Contemporary Strategic Management: Firms as Bundles of Resources
10. Managed by Markets?

Seminar classes:

1. Managers and Managerial Work
2. The Firm and the Manager
3. Internal Labour Market and Boundaries of Firms
4. Taylorism and Toyotaism
5. UBS Case study
6. Understanding Decision Biases
7. Understanding Organisational Structures
8. The Analysis of Competitive Forces
9. The Analysis of Competences
10. Strategy and Market oversight

Formative coursework: 2,000 word essay

Indicative reading: Paul Willman: *Understanding Management: Social Science Foundations* Oxford University Press, September 2014.

Assessment: Class participation (10%) and take-home assessment (60%) in the LT.

Case assignment (30%) in the MT.

MG443E Half Unit

Organisational Behaviour and Leadership (modular)

This information is for the 2020/21 session.

Teacher responsible: Dr Emma Soane NAB 4.02

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

This information in this course guide pertains to the 2020-2022 cohort.

Course content: Understanding how individuals and teams function within organisational contexts is fundamental to leadership effectiveness. This course reviews a range of psychological theories as they apply to organisations and demonstrates how this perspective contributes to understanding behaviour, wellbeing and performance. It brings together theory and practice by using group exercises, presentations, and course work to apply the course material to business problems. By the end of the course, you should be able to critically evaluate some of the main theories of organisational behaviour and apply those theories to problems in your organisations.

The course will also focus on developing your leadership style and skills. Drawing on relevant theories, we will consider your personal leadership style and its implications for working with others. We will discuss the leadership skills that contribute to effectiveness in a range of contexts, and consider how to apply these skills to build positive organisational environments. You will be asked to complete two in-depth evaluations, and profiles will be used to guide your leadership development.

Topics include personality and individual differences, motivation and rewards, creativity, team processes, leadership, negotiations, power and politics, and organisational culture.

Teaching: 35 hours of teaching spread over the first 3 modules. 10 sessions of 3.5 hours each. The teaching is highly participative and includes breakout discussions and exercises.

The course will run between the following dates:

24 August - 05 September 2020

14-19 December 2020

12 April - 24 April 2021

Formative coursework: A practice exam will be provided and feedback will be given on this assignment.

Indicative reading: The course relies on journal articles (for example, Journal of Applied Psychology, Journal of Organizational Behaviour).

A complete reading list will be provided at the start of the course. There is no required textbook. The following textbook is recommended for students who would like further reading:

French, R., Rayner, C., Rees, G. & Rumbles, S. (2011) Organizational Behaviour, 2nd edition. John Wiley & Sons, Ltd.

Assessment: Class participation (5%), take-home assessment (65%) and group project (30%).

Class participation will be based on group presentations.

The take-home assessment will be an individual essay.

MG445E Half Unit

Marketing Strategy (modular)

This information is for the 2020/21 session.

Teacher responsible: Prof Om Narasimhan

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2020-22 cohort.

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential to building an effective marketing strategy. Peter Drucker, the father of business consulting once famously remarked,

"Because the purpose of business is to create a customer, the business enterprise has two--and only two--basic functions: marketing and innovation". In today's highly competitive business environment these words ring even more true: a well-designed marketing strategy can make all the difference between success and failure in the marketplace. While marketing is commonly associated with consumer goods companies (e.g., Unilever) it would be myopic to restrict the relevance of marketing to such instances alone. Marketing, ultimately, is about understanding and shaping behaviour. Accordingly, banks and other financial institutions, as well as governmental, medical, and not-for-profit organisations - from those that design and sell financial products, to those that implement public policy (e.g., those dedicated to reducing drunk driving, increasing literacy, and encouraging safe contraception), have all found that a well-thought out marketing strategy can be a critical arbiter of success even in this "ideas marketplace."

By using a wide range of quantitative as well as qualitative methods, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop an analytical tool-kit that will be applicable to a wide range of industries and functions.

Teaching: Scheduled over two modules – one of which will take place overseas. Teaching will be spread across 10 sessions of up to 4 hours each.

Module 3 (12 – 24 April 2021)

Module 4 (13 - 18 June 2021)

Formative coursework: Students will complete a Marketing Simulation during module three and take part in real-life company case discussions during the overseas module. Feedback on both will set the stage for their group project and take home assignment.

Indicative reading: There is no required textbook. Further references will be provided at the commencement of the course.

Assessment: Take-home assessment (55%), class participation (15%) and group assignment (30%).

MG446E Half Unit

Strategy, Organisation and Innovation (modular)

This information is for the 2020/21 session.

Teacher responsible: Professor Connson Locke, course convenor. Dr Lourdes Sosa. Dr Mia de Kuijper

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2019-2021 cohort.

Course content: The course seeks to understand differences in profitability across (for-profit) firms with the objective of designing strategic recommendations for managers to improve (and defend) their firms' competitive positions. To do so we will first review industry-wide as well as firm-specific determinants of short-term profitability. On that foundation we will look at long-term determinants of profitability including dynamic capabilities and innovative ability. The course aims to balance exposure to general strategic principles and specific practical applications. To that purpose, we will use theoretical frameworks to analyse practical cases from a wide array of firms in varied countries.

Topics include business models, industry structure and competition, value proposition, strategic resources and inimitability, dynamic capabilities, disruptive innovation, power nodes strategy and scenario planning.

Teaching: Taught over 10 3.5-hour sessions spread over 2 modules. The teaching is highly participative and includes lectures, breakout discussion and exercises.

The course will run between the following dates:

31 August – 05 September 2020

04 – 09 January 2021

Formative coursework: In-class analysis of Lego case study.

Indicative reading: The course relies on journal articles (for example, Strategic Management Journal). A complete reading list will be provided at the start of the course. Sample texts include the following: Porter, M.E. (2008) The Five Competitive Forces that Shape Strategy (Harvard Business Review); Christensen, C., Bower J. (1996) Customer Power, Strategic Investment, and the Failure of Leading Firms (Strategic Management Journal); Teece, D., Pisano, G., Shuen, A. (1997) Dynamic Capabilities and Strategic Management (Strategic Management Journal); De Kuijper, M. (2009) Profit Power Economics.

Assessment: Presentation (25%), class participation (10%) and take-home assessment (65%).

Group presentation (25%), take home exam (65%) and participation (10%).

MG447E Half Unit

Foreign Direct Investment and Emerging Markets (modular)

This information is for the 2020/21 session.

Teacher responsible: Prof Saul Estrin

Dr Christine Cote

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2019-2021 cohort.

Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused on developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The new institutional economics has recently developed as a field to understand the impact of variation in institutions on economies performance. This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concept such as the resource based view. We will then provide an analysis of economic performance and growth in emerging markets building on the new institutional economics and working with a large variety of datasets and sources. The remainder of the course is devoted to specific topics of MNEs in emerging markets. These include the determinants and impact of FDI; entry mode choices; measures of institutional distance; outsourcing; and emerging market multinationals.

Outline of Lectures: Lectures 1 Globalization, trade and GVCs 2: Models and Strategies of the Multi-National Enterprise (MNE) Lecture 3: Growth and Institutions in Emerging Markets Lecture 4: Modes of Entry 5: Global Strategies 6: Global Strategies (2) 7: The Determinants of Foreign Direct Investment (FDI) into Emerging Markets Lecture 8: The Impact of FDI on Emerging Markets Lecture 9: Emerging Market Multinationals Lecture 10: FDI choices and firm strategies- case presentations

Teaching: Scheduled over three modules, one of which will take place overseas – 10 sessions of up to 3.5 hours. The course will run between the following dates:

31 August – 05 September 2020

01 – 07 November 2020

04 – 9 January 2021

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: R. Caves, Multinational Enterprise and Economic Analysis, 2nd Edition, Cambridge University Press 1996; P. Ghemawat, Redefining Global Strategy, Harvard Business School Press, 2007; J. Williamson, The New Institutional Economies, Journal of Economic Literature, 2000; Estrin et. al., Entry Mode in Emerging Markets, Strategic Management Journal, 2009; T. Khanna and K Palepu, The Future of Business Groups in Emerging Markets, Academy of Management Journal 2004.

Assessment: Take-home assessment (60%) in the LT.

Presentation (30%) in the MT.

Class participation (10%) in the MT and LT.

MG457E

Foundations of Management 2: Financial Control and Governance (modular)

This information is for the 2020/21 session.

Teacher responsible: Dr Yally Avrahampour NAB 4.37

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2020-2022 cohort.

Course content: This course teaches, over two modules, topics relating to financial accounting and management accounting. In so doing the course also examines the relationship between the exercise of financial control within organizations and the setting of external standards relating to governance, and the implications of this for the organization of firms. In the first module the course covers topics such as the construction of the financial statements, and then considers topics relating to measurement, for example the contrast between historical cost and fair value and the recognition of intangible assets. In the second module the course examines topics relating to the determination of the cost of a product or service, balanced performance measurement and economic value added.

Teaching: 8 sessions of 3.5 hours each, composed of lecture and case discussion spread out equally over two LSE modules.

The course will run between the following dates:

24 August - 05 September 2020

14-19 December 2020

Formative coursework: Formative assignment after module 2.

Indicative reading: Kaplan, R. & Atkinson, A. (2014) Advanced Management Accounting, Weetman, P. (2011) Financial Accounting: An Introduction

Assessment: This course will not be assessed.

MG498E Half Unit

Dissertation/Capstone Project (modular)

This information is for the 2020/21 session.

Teacher responsible: Various

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

Course content: This course consists of a project which will be undertaken throughout the second year of the degree. Students will choose between an academic dissertation or a capstone project. The academic dissertation will explore a question that is grounded in academic theory and literature. The capstone project will explore a business idea or venture. In both projects, students will collect original data relevant to their research question or

business idea and must analyse the data, discuss limitations, and draw conclusions.

Teaching: Students are required to participate in 20 hours of scheduled seminar sessions from module 3 onwards which will provide guidance and support in developing their dissertation or capstone project. Students will be allocated a faculty advisor who will support and guide them. The course will run throughout the year.

Formative coursework: Students will be required to agree their dissertation/capstone topic with a faculty advisor and provide a plan which they will receive feedback on.

Indicative reading: Relevant reading will be provided by academic advisors.

Assessment: Dissertation (100%, 6000 words).

MG4H1E Half Unit

Foundations of Social Business I

This information is for the 2020/21 session.

Teacher responsible: Mr Stephan Chambers Marshall Institute, 5 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: This course focuses on three critical aspects of social business: entrepreneurship; social finance; accounting for social return. It focuses on both existing organisations and start-ups, as vehicles for social change. It aims to support 'intrapreneurs' as well as entrepreneurs. Its purpose is to bring students' understanding of the worlds of opportunity and venture into clear organisational focus. It begins to sensitise students to the challenges of starting and running mission-based organisations, explores established vehicles for combining social and commercial purpose, and looks in detail at the various mechanisms for funding (impact finance, social finance, grant finance).

Students will be introduced to the main elements of entrepreneurial planning including opportunity identification and evaluation, rapid prototyping and resource-gathering. They will be introduced to the business model canvas and ideas of lean start-up as well as the varieties of financing available to social ventures. They will examine ways of accounting for social value as the second and third bottom-line, and a view of managerial reporting as value-laden. Critiques of over-simplified, heroic or 'solutionist' models will be explored, as well as to both market and non-market critiques of social returns on investment.

The course draws on the literature of entrepreneurship, social entrepreneurship, social finance and social accounting.

Teaching: There will be ten integrated lecture/seminars of three hours each, delivered across two modules.

Formative coursework: A practice coursework assignment midway through the course.

Indicative reading:

- Allman, Keith A. and Ximena Escobar De Nogales (2015). *Impact Investment: A Practical Guide to Investment Process and Social Impact Analysis*. Hoboken, New Jersey
- Bhidé, Amar V. (1996). "The Questions Every Entrepreneur Must Answer". *Harvard Business Review* November.
- Blank, Steve (2013). "Why Lean Start-Up Changes Everything". *Harvard Business Review* May
- Nicholls, Alex and Jed Emerson (2015). "Social Finance, Capitalizing Social Impact". In Alex Nicholls, Rob Paton and Jed Emerson (eds) *Social Finance*. Oxford: Oxford University Press
- Stevenson, Howard H. and David E. Gumpert (1985). "The Heart of Entrepreneurship". *Harvard Business Review* March

Assessment: Coursework (100%).

Assessment will be through an individual coursework assignment (100%) comprised of 2 essay questions.

MG4H2E Half Unit

Foundations of Social Business II

This information is for the 2020/21 session.

Teacher responsible: Mr Stephan Chambers Marshall Institute, 5 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: The social business, as any other firm, has to understand its environment and undertake consequent activities to enable sustainability and effectiveness; this challenge is complicated by the requirement to achieve not only profit or financial sustainability, but also environmental sustainability and mission-driven social impact. Foundations of Social Business II seeks to introduce students to the commercial opportunities that have intentional, long-term social value and to help students develop mechanisms for defining and communicating with key stakeholders beyond the usual marketing concentration on customers. It specifically introduces students to three critical aspects of this interaction between the social business and its environment; strategy, marketing and technology.

The course focuses on the opportunities for and external constraints on social business. Its purpose is to introduce students to the environment of both opportunity and threat in which pro-social business exists. It examines strategy development where the imperative is not market-capture but the reversal of market-failure. It combines overviews of strategy-making with an explicit focus on market-failure as opportunity and on marketing as scaling a theory of change.

Social businesses research, identify, and exploit opportunities just as firms do. Students will be introduced to the main techniques for planning and implementing activities to take advantage of those opportunities, including customer journeys, sources of advantage, competencies, and the resource-based view of the firm. They will be able to explain where corporate parallels apply and where they break down. The course draws on the literature of strategy and marketing.

Teaching: Ten integrated lectures / seminars of three hours each, delivered across two modules (teaching blocks)

Formative coursework: One formative assessment exercise will be offered: a practice essay.

Indicative reading:

- A.G. Lafley and Roger Martin, (2013). *Playing to Win: How Strategy Really Works*. Cambridge, MA: Harvard Business Review Press

Assessment: Coursework (100%).

Assessment will be through an individual coursework assignment (100%) comprised of 2 essay questions.

MG4H3E Half Unit

Social Impact and Its Evaluation

This information is for the 2020/21 session.

Teacher responsible: Prof Julian Le Grand Marshall Institute, 5 Lincoln's Inn Fields, Dr Jonathan Roberts Marshall Institute, 5 Lincoln's Inn Fields and Dr Eva Neitzert Marshall Institute, 5 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: Those who want to improve society face three immediate dilemmas – first, what is the public benefit? How can I define, with clarity, my moral purpose? Second, how can I decide between different courses of action in order to pursue the public benefit? And third, how can I know that what I do makes any real contribution to the public benefit? What is the evidence? This innovative course sets out to support students in coming to their own resolutions of these dilemmas. Its goal is to introduce the concepts and techniques of impact measurement from the perspective of – and through specific examples of interest to – organisational leaders and policymakers and those who intend to commission social business and social enterprise interventions. A first section challenges students to consider and discuss the nature of the public benefit. It introduces students to different philosophical conceptions of the good, including libertarianism, utilitarianism, Rawls' theory of justice and Sen's capabilities approach. It will also discuss whose conception of the good is the more important: the actor or agent, the beneficiary, the government or the wider society.

Our choices of outcomes and impact measures are in turn not neutral, but are infused with moral choices about the definition of the public good. The second (and larger section) of the course introduces students to key concepts and skills in developing and assessing evidence of social impact. It aims to equip students with the ability to be intelligent commissioners of interventions for the public good and critical assessors of evidence and published research. Concepts to which students will be introduced include the distinction between correlation and causation, the counterfactual, opportunity costs, trade-offs, spill overs and substitution effects. Students will be introduced to techniques through which the effectiveness of social interventions can be evaluated, including randomised experiments, quantitative evaluation of non-experimental data, cost-benefit and cost-effectiveness analyses and realistic evaluation approaches; the strengths and weaknesses of these methods are considered. It will also consider the politics of impact measurement and how to ensure that evaluation enables continuous improvement.

Teaching: Ten sessions of three hours each, delivered across two modules (teaching blocks).

Formative coursework: One formative assessment will be provided – a critical assessment of an evaluation report (1,500 words).

Indicative reading:

- Glennerster, R. and Takaarasha, K. (2013). *Running Randomised Evaluations: A Practical Guide*. Princeton: Princeton University Press
- Layard, R. and S. Glaister (1994). *Cost-Benefit Analysis*. Cambridge: Cambridge University Press

- Nussbaum, M. (2011). *Creating Capabilities*. Cambridge, MA: Harvard University Press
- Pawson, R. and N. Tilley (1997). *Realistic evaluation*. London: Sage.
- Rawls, J. (1971), *A Theory of Justice*. Cambridge, MA: Harvard University Press

Assessment: Coursework (100%).

Assessment will be through an individual coursework assignment.

MG4H4E

The Altruistic Entrepreneur Project

This information is for the 2020/21 session.

Teacher responsible: Mr Stephan Chambers The Marshall Institute, 5 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available

as an outside option.

Course content: This course crystallises the academic learnings from across the degree programme into an applied experience. It runs concurrently with course delivery across all modules. Students will work in groups of four or five, supported by faculty, to develop an entrepreneurial business proposal for social impact, moving through idea generation, initial design and formal proposal. The proposal may be a new organisation or an activity within an existing organisation with explicit social benefit.

The project creates a space for real world application of students' learning; development of the project concurrently with programme delivery enables substantive interaction between project work and core skills learning. The course mirrors the development of the programme overall by requiring students to address questions of context (and relation to state and private actors), questions of strategy and market development, financing, and reporting as well as personal leadership, communications and persuasion. Projects are designed in the expectation of potential real world implementation.

Working in a group is an essential component of this course. Students will be expected to reflect on how their groups form, how they establish principles for working effectively, and how they resolve conflict or disagreement. They will be asked to reflect on their own group dynamic and how it might be a function of culture, mission, and measurement. Students will be asked explicitly to reflect in their essays on the process of selecting a topic and assigning roles. Since so much of their professional life will involve impromptu and non-elective group working we consider this aspect of the course particularly important.

Teaching: Teaching will take place over the duration of the programme. There will be whole cohort teaching sessions of three hours each module, plus tutorial meetings for each project group.

Formative coursework: Formative work, through presentations and discussions in tutorial meetings, will be continual for the duration of the programme. Students will be asked to submit a draft outline of their final summative essay.

Assessment: Essay (50%), presentation (35%) and proposal (15%). Assessment will be through a group presentation (35%), group composition of a business model canvas (15%), and an extended essay of 5,000 words at the end of the project (50%).

MG4H5E Half Unit

The Altruistic Leader

This information is for the 2020/21 session.

Teacher responsible: Dr Connson Locke NAB 4.16

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: Leadership involves managing oneself and others, thus the understanding of human psychology is critical for effective leadership. Instead of studying the many constantly changing theories of leadership, this course will instead provide you with a foundation in organisational behaviour, which draws from research in psychology and sociology, to understand the behaviour and attitudes of people in organisations. The theories and research will address these topics generally, and we will place them in the context of social business by applying them to case studies and problems faced by leaders of social businesses.

The course examines topics such as: power and influence; organisational justice; motivation and rewards; leadership styles; cross-cultural management; organisational culture and change.

Teaching: Ten sessions of three hours each, delivered over one module (teaching block).

Formative coursework: Students will be given a practice case analysis to prepare them for the summative case analysis. For the group project, groups will submit their choice of presentation topic in order to receive formative feedback.

Indicative reading:

Additional readings will be available on Moodle.

Assessment: Coursework (30%), case analysis (60%) and in-class assessment (10%).

Assessment will be done through a case analysis (60%), group assessment (30%) and in-class assessment (10%).

MG4H6E Half Unit The Hybrid Economy

This information is for the 2020/21 session.

Teacher responsible: Prof Julian Le Grand Marshall Institute, 5 Lincoln's Inn Fields and Dr Jonathan Roberts Marshall Institute, 5 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: Following the failure of both states and markets to resolve persistent social problems, a hybrid economy is emerging in which new organisational forms and new multi-actor collaborations blend outcomes, behaviours and structures drawn from different sectors with the aim of achieving both social and financial returns. Examples of organisations and activities in this emerging economy include corporate firms that internalise social purpose, business-oriented philanthropists, private organisations that spin out of the state sector (public service mutuals), social impact investment, and complex collaborative financial instruments such as social impact bonds.

This course explores the economics and politics of this emerging phenomenon. It provides students with knowledge of the newly developing institutions, organisations and mechanisms, and with the critical and analytic skills through which to evaluate them. It assesses the historic and contemporary failures by the state, market and voluntary sector in developed and developing economies; and it considers the competitive advantage and disadvantage of the hybrid social business as a remedy for these failures. The course focuses specifically on motivation and incentive theory, exploring how we can design organisations and wider institutions that both nurture and capitalise upon altruism, but that also acknowledge more self-directed motivations. The course explores the scope and nature of the political relationship between hybrid organisations and the state, exploring whether the function of the social business is best conceived as a complement to state services, a replacement for state services in conditions of austerity and exponentially growing demand, or separately as an innovative laboratory for social interventions. It concludes by exploring ethical criticisms of the hybrid economy, focusing in particular on controversies about the introduction (or intrusion) of the market and business into the social or public realm.

Teaching: Ten integrated lecture/seminars of three hours each,

delivered across one module (teaching block).

Formative coursework: One formative assessment exercise will be offered: a practice essay.

Assessment: Coursework (100%).

Assessment will be through an individual coursework assignment (100%) comprised of 2 essay questions.

PB413E Half Unit Frontiers in Behavioural Science Methods

This information is for the 2020/21 session.

Teacher responsible: Dr Matteo Galizzi

Dr Dario Krpan

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: Behavioural science is the scientific study of human behaviour, and it combines research techniques from psychology and economics. The course offers an integrated training in advanced behavioural science methods by introducing students to state-of-the-art techniques that stretch across the spectrum of both disciplines. The course covers the following topics: transparency and reproducibility of behavioural science research, pre-registration, pre-analysis plan; determining evidential value of behavioural science research, p-curve analysis; advances in experimental design; measuring preferences, attitudes, beliefs, willingness-to-pay; behavioural game theory and experimental games of strategic interaction; designing behavioural priming experiments and measures that tap into implicit cognition; state-of-the-art physiological research techniques; understanding the mechanisms behind behavioural effects by employing experimental-causal-chain, measurement-of-mediation, and moderation-of-process designs.

Teaching: 9 hours of lectures, 3 hours and 45 minutes of lectures, 3 hours of seminars and 4 hours and 30 minutes of seminars in the ST.

Day 1

Lecture 1 (1h 30'): Intro. Advanced Considerations in Experimental Design. Measuring Preferences and Attitudes: the State-of-the-art [MMG, DK]

Lecture 2 (1h 30'): Determining Evidential Value of Behavioural Science Research: Undisclosed Flexibility in Data Collection, Dance of P-values, P-curve analysis, Pre-Registration, Pre-Analysis Plan, Multiple Hypothesis Testing. Introduction to Systematic Reviews of the Literature and Meta-analyses. [MMG, DK]

Seminar 1 (1h 30'): Transparent and Reproducible Research Practices in Practice Building a Simple Behavioural Science Experiment Using Qualtrics Survey Software [MMG, DK].

Day 2

Lecture 3 (1h 30'): Behavioural Priming Techniques [DK]

Lecture 4 (1h 15'): System 1 In Action: Capturing Implicit Cognition: [DK]

Seminar 2 (2h): Building a Simple Task to Measure Implicit Cognition [DK]

Day 3

Lecture 5 (1h 30'): Strategic Decision-Making: Introduction to Behavioural Game Theory [MMG]

Lecture 6 (1h 15'): Behavioural Game Theory: Applications.

Introduction to Non-Linear Regression Models [MMG].

Seminar 3 (2h): Running, Playing and Analysing Simple Games of Strategic Interaction Using Veconlab and zTree. Non-linear Regression Models Using Stata [MMG].

Day 4

Lectures 7 (1h 30'): Mechanisms, Moderators, Mediators; Mediation and Moderation in a Regression Framework; Understanding the Mechanisms Behind Behaviour Change: Experimental-causal Chain, Moderation-of-process, and Measurement-of-Mediation Designs Part 1 [DK].

Lectures 8 (1h 15'): Mechanisms, Moderators, Mediators; Mediation and Moderation in a Regression Framework; Understanding the Mechanisms Behind Behaviour Change: Experimental-causal Chain, Moderation-of-process, and Measurement-of-Mediation Designs Part 2 [DK].

Seminar 4 (2h): Moderation and Mediation Using Stata [DK].

Day 5

Lecture 9 (1h 30'): Beyond Economics and Psychology: State-of-the-art Physiological Research Techniques for the Behavioural Science. [MMG, DK]

Seminar 5 (1h 30'): State-of-the-art Physiological Research Techniques in practice.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

For the formative assignment, you will need to produce a brief research proposal plan (500 words) that will serve as the basis for the full research proposal (3,000 words) that will constitute your summative assignment. In the research proposal plan, you will propose a design and implementation of a behavioural science experiment entailing the use of (at least) two different software packages introduced in the seminars. The structure of the proposal plan should be as follows: a) Introduce a viable research question (on a topic of your choice) that will guide your experimentation; b) Describe how you would design and implement behavioural science research to answer the question; and c) Explain which statistical approaches covered in lectures and seminars you would use to analyse the data. Feedback received for the formative assignment will help you to prepare the summative assignment by identifying both strengths and weaknesses of your approach.

E., & Giner-Sorolla, R. (2016). Pre-registration in social psychology—A discussion and suggested template. *Journal of Experimental Social Psychology*, 67, 2012. Simmons, J. P., Nelson, L. D., & Simonsohn, U. (2011). False-positive psychology: Undisclosed flexibility in data collection and analysis allows presenting anything as significant. *Psychological science*, 22(11), 1359-1366.

Assessment: Proposal (100%) post-summer term.

For the summative assignment, you will be required to expand the research proposal plan submitted as part of the formative assignment into a full research proposal comprising 3,000 words. Your task will be to propose a design and implementation of a behavioural science experiment entailing the use of (at least) two different software packages introduced in the seminars. The structure of the proposal should be as follows: a) Introduce a viable research question (on a topic of your choice) that will guide your experimentation; b) Describe how you would design and implement behavioural science research to answer the question; and c) Explain which statistical approaches covered in lectures and seminars you would use to analyse the data. In the proposal, we will expect you to use in-text scholarly citations and provide a reference list at the end. The summative assignment should allow you to not only demonstrate your knowledge regarding the present course, but also to gain deeper insights into experimental analysis and design that should help you in producing a high-quality dissertation.

PB434E Half Unit

Behavioural Science in an Age of New Technology

This information is for the 2020/21 session.

Teacher responsible: Dr Dario Krpan

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: When psychology and economics got "married", the product was behavioural science. Although this discipline has elevated theoretical and practical understanding of human behaviour to previously unseen heights, recent technological developments have produced new insights in understanding and predicting people's actions that not only supplement traditional

tools of behavioural science but also go beyond them. The future of the discipline will therefore likely depend on how effectively behavioural scientists can harness new developments in technology to understand and change the way people act. The aim of this course is to a) Introduce major technological advancements that are relevant for predicting, influencing, and understanding human behaviour; b) outline how they supplement and extend commonly used tools of behavioural change; and c) examine how they can be used to propel behavioural science into the future.

The course will tackle behavioural science in relation to motion tracking, virtual environments, social robotics, social networks, and other relevant developments in information technology. Emphasis will be placed on how the technological tools covered throughout the course can be used to change behaviour in applied settings, and students will be encouraged to discuss implications for their organisations and other areas of interest.

Teaching: 12 hours of lectures, 2 hours and 30 minutes of lectures, 2 hours of lectures and 8 hours of seminars in the ST.

Day 1

Lecture 1 (2h): Course introduction. Understanding minds by reading bodies: Implications of motion tracking for behavioural science 1

Lecture 2 (2h): Understanding minds by reading bodies: Implications of motion tracking for behavioural science 2
Seminar 1 (2h)

Day 2

Lecture 3 (1.5h): Changing behaviour through gamification

Lecture 4 (1.5h): Social robots: Our new friends?

Seminar 2 (2h)

Day 3

Lecture 5 (1.5h): Behavioural science in virtual worlds

Lecture 6 (1.5h): Behavioural informatics

Seminar 3 (2h)

Day 4

Lecture 7 (1.5h): Digital footprints and human behaviour

Lecture 8 (1.5h): Psychological targeting in digital age

Seminar 4 (2h)

Day 5

Lecture 9 (1.5h): Change thyself: Using technology to influence our own behaviour

Lecture 10 (1.5h): The ethics of emerging technologies in the context of behavioural science

Formative coursework: Students will be expected to produce 1 presentation in the ST.

Formative coursework will serve as your preparation for the summative assignment. You will need to create a 5 minute presentation on the topic of the summative assignment: Propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to create behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). In the presentation, you will need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through the class material and personal literature search.

Similar to the summative assignment, the presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). The main aim of the formative assignment is for me to evaluate your approach to tackling points a), b), and c) mentioned above so I can give you relevant feedback that will help you when preparing the summative presentation, and also for you to get comfortable with producing the video presentation.

Robots, rape, and representation. *International Journal of Social Robotics*, 9(4), 465-477.

Assessment: Presentation (100%) post-summer term.

The aim of the summative assessment will be to propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to produce behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). This intervention will be conveyed in the form of a 15-20 minute presentation that will count as your summative assignment. More precisely, in the presentation, you will need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through the class material and personal literature search.

The presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). Together with the video presentation, you will need to submit an annotated bibliography that contains a) a list of scientific references you used for the presentation; and b) a short text below each reference (1-2 sentences) describing why exactly the reference is important in the context of your presentation. The main purposes of the annotated bibliography will be to demonstrate the academic background upon which your presentation was built.

PB450E Half Unit

Behavioural Science and Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Paul Dolan CON 5.19

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: This course aims to introduce students to the main concepts and tools of the growing fields of behavioural science. The course covers the following topics: What is behavioural science?; What are preferences to economists and psychologists?; Dual-process models of behaviour and the role of the unconscious mind; Dual processing into policy using the MINDSPACE checklist; the role of emotions in decision making; compensating behaviours; breaking and creating habits. Students will develop an understanding of how people make decisions across a variety of contexts and the importance of understanding decisions for designing policy in both public and private organisations. We will cover canonical texts and ideas from behavioural science such as Kahneman & Tversky and Thaler & Sunstein, and we will also introduce students to cutting-edge research within behavioural science including recent work by our own faculty.

Teaching: 14 hours of lectures and 8 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

There will also be formative exercises in the seminars.

Indicative reading: Dolan, P. (2014). Happiness by design: finding pleasure and purpose in everyday life. London: Allen Lane.

Kahneman, D. (2011). Thinking Fast and Slow. London: Penguin Books. Gneezy U, Meier S, Rey-Bell P (2011), "When and Why Incentives (Don't) Work to Modify Behavior", Journal of Economic Perspectives, 25(4):191-210. DellaVigna, S. (2007). "Psychology and Economics: Evidence from the Field". NBER Working Paper No. 13420. Dolan, P., Hallsworth, M., Halpern, D., King, D., Metcalfe, R., Vlaev, I. (2012). "Influencing Behaviour: The mindspace way". Journal of Economic Psychology, 33 (1): 264-277. Dolan, P., Galizzi, M. (2015). "Like ripples on a pond: Behavioural spillovers and their implications for research and policy". Journal of Economic Psychology, 47: 1-16.

Assessment: Coursework (100%, 4000 words) in the LT.

PB451E

Dissertation in Behavioural Science

This information is for the 2020/21 session.

Teacher responsible: Dr Matteo Galizzi QUE.3.16

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: The aim of the dissertation is for students to pursue an independent piece of research within the field of behavioural science. The dissertation can consist of: an empirical analysis of existing data; a collection and analysis of new data; a randomised controlled experiment (lab, field, online); a systematic review of the literature. Students must obtain the approval of their supervisor before embarking on any research.

Teaching: 3 hours of classes in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

Indicative reading: Relevant reading will be provided by supervisors.

Assessment: Dissertation (100%, 10000 words) in the MT.

PB452E Half Unit Not available in 2020/21

Behavioural Science for Health

This information is for the 2020/21 session.

Teacher responsible: Dr Matteo Galizzi QUE.3.16

Availability: This course is available on the Executive MSc in Behavioural Science and Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Please note that for 2019/20, this course will **only** be available to Health Policy EMSc students.

Course content: The course aims to introduce to students the main principles, methods, measures, and insights of behavioural sciences, and the key state-of-the-art applications to health economics, policy, practice, and management.

The course is designed to enhance students' abilities to apply rigorously and critically behavioural science tools to concrete challenges in the health and healthcare area.

It covers principles of behavioural science; heterogeneity and behavioural economics; behavioural health economics and policy; methods of behavioural science; behavioural experiments in health (field, lab, lab-field, online, mobile); behavioural data linking; measures of behavioural science; risk preferences and health; time preferences and health; social preferences and health; behavioural insights for information policies in health; financial and non-financial incentives in health; behaviourally supercharged incentives in health; nudging behavioural change in health; behavioural spillovers in health; behavioural insights for regulation and taxation in health, healthcare, and risky health behaviours; behavioural insights for healthy behaviours (diet and nutrition, physical exercise, alcohol abuse, tobacco and drug use, medication, screening, infectious diseases, vaccination); behavioural insights for blood and organ donations; behavioural insights for health practice, management, and policy challenges.

Teaching: 18 hours of lectures and 4 hours and 30 minutes of seminars in the ST.

6 x 3 hour lectures (18 hours)

3 x 1.5 hour seminars (4.5 hours each seminar group)

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the ST.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

PB453E Half Unit

Corporate Behaviour and Decision Making

This information is for the 2020/21 session.

Teacher responsible: Dr Grace Lordan CON 4.02

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: Lecture 1: Introduction

This lecture will give an overview of rational decision making from an economics perspective. Attention will also be paid to how students can identify credible empirical evidence from experiments (brief recap what was done in PS469E) and beyond (cover natural experiments). We will also recap on the interpretation, advantages and disadvantages of observational studies.

Lecture 2: Finding a Job

This lecture will cover the unconscious biases that are encountered by corporate firms in:

- 1) Job Search
- 2) Job Advertising
- 3) Interview panels

Seminar 1: Lecture 2 will be complemented with a linked case-based seminar.

Lecture 3: Day to Day Work

We will discuss biases in allocated bonuses, promotions, deciding who is viewed as 'great' and the allocations of prestigious projects in corporate firms. We will also cover biases in how different types of people are 'heard' and 'seen' in business, and biases in what a 'successful' person looks like. We will brainstorm, with the help of received literature in behavioural economics, viable interventions to combat blind spots in promotions and bonus allocations in the corporate setting.

Seminar 2: Lecture 3 will be complemented with a linked case-based seminar.

Lecture 4: When at Work: Trading and Investment

This behavioral finance lecture will cover psychological biases in trade and high stake investment decisions in finance. It will cover the efficient markets hypothesis and outline the behavioral biases in finance that will likely disrupt its predictions.

Seminar 3: Lecture 4 will be complemented with a linked case-based seminar.

Lecture 5: When at Work: Complying with the Rules

We will begin by discussing the decision to comply to a firm's policies and procedures within a cost benefit framework. In practice, compliance depends on a number of factors, including employee behavior which is subject to biases already covered. This lecture will cover the insights from behavioral science, which can be used to encourage compliance in the face of these biases.

Seminar 4: Lecture 5 will be complemented with a linked case-based seminar.

Seminar 5: Wrap up – bringing together of all the messages learned in the course. Student presentations based on group work on 'what was learned' each day.

Teaching: 12 hours and 30 minutes of lectures and 15 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 case study in the ST.

Case study with short questions that matches the style of the summative assessment

Indicative reading: Bertrand Marianne and Duflo Ester. Field Experiments on Discrimination. in Handbook of Economic Field Experiments. Volume 1, pages 309 - 393 2017. MLA: Gneezy, Uri, Kenneth L. preferences." *Proceedings of the National Academy of Sciences* 111.9 (2014): 3608-3613. Shiller, Robert J. *Finance and the Good Society*, Princeton: Princeton University Press, 2012. Fama, Eugene, "Market Efficiency, Long-Term Returns, and Behavioral Finance," *Journal of Financial Economics*.

Assessment: Coursework (100%, 4000 words) post-summer term. Case study with ten short questions.

PB454E Half Unit

Policy Appraisal and Ethics

This information is for the 2020/21 session.

Teacher responsible: Dr Ganga Shreedhar and Prof Liam Delaney

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

This course is one of two options.

Course content: Aims and course content

This course aims to introduce students to the main concepts and tools of policy appraisal and yield insight into key moral and political values that are essential for policy-makers when they draw on behavioural science. The course covers the following topics:

- 1) The architecture of Cost-benefit analysis for market and non-market goods;
- 2) Elicitation of monetary values through revealed and stated preference methods, and adjustments for time discounting, risk and uncertainty;
- 3) Welfare analysis of policy interventions: efficiency, equity and asymmetric paternalism;
- 4) Evaluating welfare beyond monetary choices: the subjective well-being approach to valuation;
- 5) Moral problems associated with libertarian paternalism or Nudge, and how this approach compares to other policy mechanisms, such as regulation, taxation and subsidies, and social advertisement.

The course offers practical examples and applications to key policy sectors, such as technology, health, infrastructure and the environment.

Learning outcomes

- Students will be able to articulate the key principles and analytical tools for the appraisal of projects, policies, programmes and regulations applied to key domains (e.g. health and environment), along with their underlying ethical frameworks.
- Students will be able to critically assess the core appraisal methods, the underlying theories and their assumptions, and discuss the evidence that supports or casts doubt on those methods and theories, and their relative strengths and weaknesses.
- Students will be able to perform statistical analysis to evaluate policy outcomes and critically appraise the quality of the evidence generated through these techniques.
- Students will be able to critically appraise the underlying ethical framework and moral problems associated with libertarian paternalism, its links to other policy mechanisms (like regulation, taxation, and social advertisement).

Teaching: 15 hours of lectures and 7 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

The formative assessment will be an outline proposal to undertake a policy appraisal in an area of your choice.

Indicative reading: Sunstein, Cass R. (2018). *The cost-benefit revolution*. MIT Press. USA. HM Treasury (2018) *The Green Book: Appraisal and policy evaluation in central government*. London, UK. Behavioural Public Policy. 1-20. Sunstein, C. R. (2015). The ethics of nudging. *Yale Journal on Regulation*, 32(2), 413-450.

Assessment: Coursework (100%, 4000 words) in the ST. The summative assessment will be a detailed proposal (which can be based on the formative).

PB457E Half Unit Organisational Culture

This information is for the 2020/21 session.

Teacher responsible: Dr Thomas Reader

The course will be delivered by Mark Noort in 2020/21.

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Pre-requisites: No prerequisites.

Course content: This course introduces to students to the concept of organisational culture, its relationship with success and failure in institutional settings, the factors that shape it, and methodologies for studying and changing culture. The course will draw on a mixture of seminal research, state-of-the-art literature, and work being conducted at the LSE. The course consists of three parts.

Part 1: Organisational culture: what is it, and why does it matter?

In this first phase of the course, the concept of organisational culture will be introduced, and we explore its association with organisational performance. Student will be made familiar with key models on organisational culture, the distinction between organisational culture and climate, and academic literature investigating the cultural properties of organisations that lead them to be more competitive, safer, and nicer places to work. Students will be asked to reflect on the culture of their own organisation (or another that is relevant to them), and to consider where it 'fits' within the academic models being presented.

Part 2: Measuring organisational culture.

Here we will also focus on assessing organisational culture. Specifically, we will examine traditional methodologies of culture measurement: including interviews, observations, and surveys. We will explore what makes a 'good measure', how you interpret culture data, and the limitations of using observations from 'within' an organisation to measure culture. We also explore novel and cutting-edge forms of culture measurement, and in particular, research being conducted at LSE on unobtrusively measuring culture.

Part 3: Understanding and changing organisational culture.

In the final part of the course, we focus on different aspects of organisational culture (collaborative cultures, ethical cultures), and examine how these shape people's understanding of what is 'normal', whether they can challenge institutional practices, and their links with organisational outcomes. We also consider how factors such as national culture shape organisational culture, and examine how, through constructs such as leadership, organisational culture can be changed.

Teaching: 10 hours of lectures and 12 hours of workshops in the LT.

10 hours of lectures, 12.5 hours of seminars/workshops.

Formative coursework: Formative assessment 1.

Format: In class-presentation (10 mins), delivered on the last day of the course.

Description: Students will present, in groups, a proposed programme for assessing and changing organizational culture in a company of their choice. Feedback will be provided on the ideas

presented.

Formative assessment 2.

Format: One brief essay.

Word count: 1 x 500 words max (excluding bibliography)

Description: Students will outline a measurement suite for assessing organizational culture in an organisation of their choice (500 words).

Indicative reading: Ashkanasy, N. M., Wilderom, C. P., & Peterson, M. F. (2000). *Handbook of organizational culture and climate*. Sage. Barney, J. B. (1986). The quantitative measurement of organizational culture in health care: a review of the available instruments. *Health services research*, 38(3), 923-945. Webb, E., & Weick, K. E. (1979). Unobtrusive measures in organizational theory: A reminder. *Administrative Science Quarterly*, 24(4), 650-659.

Assessment: Essay (100%, 3000 words) in the ST.

Word count: 3,000 max (excluding bibliography)

Description: Students will describe, and justify, a programme for assessing and changing the organizational culture in an organisation of their choice.

PB471E Half Unit Research Methods for Behavioural Science

This information is for the 2020/21 session.

Teacher responsible: Dr Matteo Galizzi CON 4.06

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: The course aims to introduce students to the main methodological concepts and tools in behavioural science. To achieve this objective, the course combines rigorous conceptual discussion with hands-on practical applications. The course covers: The beauty of experiments: how randomization solves the sample selection bias; randomized controlled experiments from the lab to the field: taxonomy, principles, best practices;

online and lab-field experiments, Statistical tools: distributions and their moments, the inference problem; Experimental design: between-subjects design, block/stratified randomization, matched-pair design, within-subjects design, cluster randomization, the mechanics of randomization; Introduction to econometrics: simple and multiple linear regression models, econometric analysis of experimental data; Tests of hypothesis: principles and practices, parametric and non-parametric tests in practice; Sampling: optimal sample size calculation in practice, useful rules of thumbs; Experimental best practices and challenges: ethics, recruitment, informed consent form, attrition, non-compliance, external validity, behavioural data-linking; When randomization is not possible: before and after, matching, natural experiments, difference-in-difference, regression discontinuity design; Outcomes and behavioural measures in experiments, survey design. The seminars involve hands-on practical applications using Stata, R, and Qualtrics.

Teaching: 17 hours and 30 minutes of lectures and 5 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

Indicative reading:

- Angrist, J.D., Pischke J-S. (2015). Mastering 'Metrics: the Path from Cause to Effect. Princeton: Princeton University Press.
- Gerber, A.S., Green, D.P. (2012). Field Experiments: Design, Analysis, and Interpretation. New York: Norton & Company.
- Glennerster, R., Takavarasha, K. (2013). Running Randomized Evaluations: a Practical Guide. Princeton: Princeton University Press.
- Kohler, U., Kreuter, F. (2012). Data Analysis Using Stata. College Station, TX: Stata Press.
- Mitchell, M.N. (2015). Stata for the Behavioural Sciences. College Station, TX: Stata Press.
- Burtless, G. (1995). The case for randomized field trials in economic and policy research. *Journal of Economic Perspectives*, 9(2), 63-84.
- Dolan, P., Galizzi, M.M. (2014). Getting policy-makers to listen to field experiments. *Oxford Review of Economic Policy*, 30(4), 725-752.
- Dolan, P., Galizzi, M.M. (2015). Like ripples on a pond: behavioural spillovers and their consequences for research and policy. *Journal of Economic Psychology*, 47, 1-16.
- Harrison, G.W., List, J.A. (2004). Field experiments. *Journal of Economic Literature*, XLII, 1009-1055.
- List, J.A. (2006). Field experiments: a bridge between the lab and naturally occurring data. *Advances in Economic Analysis and Policy*, 6, 8.

Assessment: Portfolio (100%) in the ST.

Students will be asked to submit a "portfolio" of hands-on practical tasks related to the main stages of a behavioural science project.

PP409E Half Unit

Public Policy in Practice Workshop III (EMPA)

This information is for the 2020/21 session.

Teacher responsible: Prof Daniel Sturm and Dr Sara Hagemann

Availability: This course is compulsory on the Executive Master of Public Administration. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.

Teaching: A three-day modular teaching block. This course is delivered as a combination of classes and lectures delivered over three days. This year, some or all of this teaching may be delivered

through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: One optional mock policy exercise will be provided.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course

Assessment: Essay (100%, 2000 words).

Assessment will consist of a 2,000 word reflective essay due 10 days after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

PP410E Half Unit

Public Economics for Public Policy

This information is for the 2020/21 session.

Teacher responsible: Professor Camille Landais

Dr Daniel Reck

Dr Xavier Jaravel

Dr Joana Naritomi

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but the course is only available by prior agreement with Executive MPA and Executive MPP Programme Directors if students haven't completed Empirical Methods for Public Policy (PP455E) and Economic Policy Analysis (PP440E) prior to this course.

Course content: This is a course in theoretical and applied public economics using intermediate economic theory. Topics include issues of equity and efficiency and alternative theories of the role of the state. Models of public goods and externalities, including environmental policy. Who really pays taxes: issues of tax incidence and tax evasion. Income inequality, poverty alleviation and the role of welfare programmes in theory and in practice. Health and education policy. The effects of taxes and transfers on labour supply and migration; The optimal taxation of commodities and incomes. Current topics in public finance. The main institutional references will be to the UK and the US, but some attention will also be given to broader international experience.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week. This year, some or all of this teaching may be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: One mock examination will be offered.

Indicative reading: A full reading list will be distributed prior to the beginning of the course.

Assessment: Project (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. The project will consist of a 2,000 word data analysis exercise. Data analysis exercises are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPP/ Executive MPA programme inductions.

PP421E Half Unit

Global Market Economics

This information is for the 2020/21 session.

Teacher responsible: Professor Andrew Bernard

Dr Emily Blanchard

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but the course is only available by prior agreement with the Executive MPA and

Executive MPP Programme Directors if students haven't completed Empirical Methods for Public Policy (PP455E) and Economic Policy Analysis (PP440E).

Course content: This course focuses on the economic interdependence between countries in a global economy. The first part of the course examines the structure and geography of world trade and examines popular hypothesis such as the "global village" or "flat earth". The second part of the course analyses macroeconomic issues such as the magnitude and effects of international capital flows, the debate over fixed versus flexible exchange rates and the economics of a common currency

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week. This year, some or all of this teaching may be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: One mock online assessment opportunity will be provided.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. Assessed essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP440E Half Unit Economic Policy Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Ethan Ilzetzki and Dr Sandra Sequeira

Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: The course is an introductory graduate course providing an economics background suitable for high-level public policy-making. The emphasis is on acquiring sound models and methods suitable for appraising policy-making issues and applicable in a wide variety of contexts. The course will cover both key microeconomic policy issues, such as externalities, public goods and principal-agent problems and macroeconomic issues such as unemployment, fiscal and monetary policies, international trade and finance and the determinants of long-run growth.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week. This year, some or all of this teaching may be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: One mock examination will be provided.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Project (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. The project will consist of a 2,000 word data analysis exercise. Data analysis exercises are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP454E Half Unit Development Economics

This information is for the 2020/21 session.

Teacher responsible: Dr Adnan Khan

Dr Joana Naritomi

Dr Sandra Sequeira

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors if students haven't completed Empirical Methods for Public Policy (PP455E) and Economic Policy Analysis (PP440E) prior to this course.

Course content: The main focus of this course is on acquiring the necessary theoretical and empirical skills to engage in the rigorous analysis of public policies in developing countries. Topics at the forefront of development economics will be covered. These include growth and poverty, governance and accountability, motivation of bureaucrats, firms and markets, determinants of productivity, jobs and labour markets, shocks and insurance, infrastructure, connectivity, education and health, trade and globalization, the value of exporting, delivering public services, incentivising teachers and health workers, environment and climate change, management of natural resources, taxation and state capacity. The emphasis will be on combining theory and data to evaluate the effectiveness of policies in these different areas.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week. This year, some or all of this teaching may be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: One mock essay opportunity will be provided.

Indicative reading: A reading list will be distributed at the start of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. Essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP455E Half Unit Empirical Methods for Public Policy

This information is for the 2020/21 session.

Teacher responsible: Prof Daniel Sturm

Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but recommended advance readings will be distributed ahead of the course. Familiarity with the material covered in the EMPA/ EMPP Introduction to Statistics module is assumed.

Course content: The course introduces students to the quantitative evaluation of public policies. The focus of the course is on practical applications of techniques to test the effectiveness of public policy interventions. The course begins with an overview over the key benefits of randomized experiments in the evaluation of public policies. Next the course covers a number of techniques that are widely used in the evaluation of public policies, including difference-in-differences regressions, regression discontinuity approaches and matching. It concludes with an introduction to cost-benefit analysis.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered

in one week. This year, some or all of this teaching may be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: One mock examination will be provided.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Project (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. The project will consist of a 2,000 word data analysis exercise due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP478E Half Unit

Political Science and Public Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Livia Schubiger

Dr Ali Cirone

Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.

Course content: This course introduces students to core concepts and problems in politics and policymaking. Among the questions we address: What determines political preferences and electoral outcomes? How are interests represented? How do political institutions shape policy outcomes? We focus on tools that students should be able to apply broadly in analyzing the political world.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week. This year, some or all of this teaching may be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: One mock examination will be provided.

Indicative reading: Analyzing Politics: Rationality, Behavior and Institutions by Kenneth Shepsle (W.W. Norton, 2nd edition, 2010) is an excellent starting point and reference for many topics. A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Sunday after the module teaching concludes. Assessed essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP488E Half Unit

Regulatory Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Lodge

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.

Course content: The course examines contemporary issues in regulation in OECD countries and elsewhere. The focus is on exploring competing approaches towards regulation in the context of different domains, ranging from utility, environmental to health and safety regulation. Particular attention will be paid to issues such as institutional design, enforcement and compliance, as well as the relationship between politicians, regulators, business and

other actors. Topics include institutional design, development and regulation, standard-setting, enforcement, 'better regulation', and accountability.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week. This year, some or all of this teaching may be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: One mock examination opportunity will be provided.

Indicative reading: Managing Regulation by Martin Lodge and Kai Wegrich (Palgrave, 2012) introduces key themes. A different introduction is Understanding Regulation by Robert Baldwin, Martin Cave and Martin Lodge (Oxford University Press, second edition, 2012)

Assessment: Essay (50%, 2000 words) and online assessment (50%).

A 2,000 word assessed essay (50%) and an online assessment (50%). Please note that online assessments take place on the third Friday after module teaching concludes. Assessed essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the EMPA/ Executive MPP programme inductions.

PP4B3E Half Unit

Executive MPP Capstone Project

This information is for the 2020/21 session.

Teacher responsible: Prof Daniel Sturm and Dr Sara Hagemann

Availability: This course is available on the Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: The Capstone project facilitates application of analytical tools developed on the programme. Students will undertake a group project (in teams usually of 3 to 5 people) relating to a public policy problem faced by the Civil Service. The group will have one week to work on an issue identified jointly by the Civil Service and LSE academics, investigating and developing a workable solution to the problem. They will then deliver a presentation, followed by a policy memo and two articles.

Teaching: A one-week modular teaching block. This year some or all of this teaching may be delivered by interactive virtual meetings with the project supervisor and expert contributors.

Formative coursework: Feedback will be provided on work-in-progress during the project duration and on the presentation on the final day of the module.

Indicative reading: Readings that are specific to project work will be distributed at the beginning of the course. Useful preliminary reading includes: Charles E. Lindblom and David K. Cohen, Social Science and Social Problem Solving (New Haven: Yale University Press, 1979); Martha S. Feldman, Order Without Design: Information Production and Policy-making (Stanford, CA: Stanford University Press, 1989); Ray Pawson, Evidence-based Policy: A Realist Perspective (London: Sage, 2006); Office for Government Commerce Common Causes of Project Failure (London: OGC, 2004); Strategy Survival Guide (London: Prime Minister's Strategy Unit, July 2004); C. R. Cook, Just Enough Project Management (McGraw-Hill, 2004); J. E. McGrath and F. Tschann, Dynamics in Groups and Teams: Groups as Complex Action Systems, chapter three in M. S. Poole and A. H. Van de Ven (eds) Handbook of Organizational Change and Innovation (Oxford University Press, 2004).

Assessment: Presentation (20%), project (50%) and coursework (30%). The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.

1. Presentation (20%) on the final day of the module.
2. Policy memo (50%), summarising the proposal for the relevant minister, which incorporates the feedback from the presentation, due three weeks after the module (1500 words).

3. Two standard-length newspaper articles (30%), due three weeks after the module.

In the two articles (500 words each), the students should consider how their policy proposal would be reported in two different media outlets.

PP4G8E Half Unit

Public Policy in Practice Workshop I (EMPA)

This information is for the 2020/21 session.

Teacher responsible: Prof Daniel Sturm 32L2.25 and Dr Sara Hagemann

Availability: This course is compulsory on the Executive Master of Public Administration. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.

Teaching: A two-day modular teaching block. This course is delivered as a combination of classes and lectures delivered over two days. This year, some or all of this teaching may be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: One optional mock policy exercise will be provided.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.

Assessment: Project (100%, 3000 words).

Assessment will consist of a 3,000 policy exercise. Policy exercises are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

PP4G9E Half Unit

Public Policy in Practice Workshop II (EMPA)

This information is for the 2020/21 session.

Teacher responsible: Prof Daniel Sturm and Dr Sara Hagemann

Availability: This course is compulsory on the Executive Master of Public Administration. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Formative coursework: One mock policy exercise will be offered.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.

Assessment: Essay (100%, 2000 words).

Assessment will consist of a 2,000 word reflective essay due 10 days after module teaching concludes. Further details will be provided at the Executive MPP programme induction.

PP4J5E Half Unit**Fiscal Governance and Budgeting**

This information is for the 2020/21 session.

Teacher responsible: Dr Joachim Wehner
Dr Paolo de Renzio

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.

Course content: The course examines contemporary issues in fiscal governance and public budgeting in OECD countries and elsewhere. The focus is on executive and legislative actors and the institutional structures within which they make budgetary choices. Following an introduction to theoretical approaches to the study of budgeting, topics include medium-term frameworks, top-down budgeting, fiscal rules and fiscal councils, performance budgeting, legislative budgeting, fiscal decentralisation, budget transparency, audit and accountability.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week. This year, some or all of this teaching may be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: One mock examination opportunity will be provided.

Indicative reading: Fiscal Governance in Europe by Mark Hallerberg, Rolf Strauch and Jürgen von Hagen (Cambridge University Press, 2009) introduces an important theoretical approach and is a good reference for several topics. The OECD Journal on Budgeting <http://www.oecd.org/gov/budget/journal> discusses current issues in applied budgeting. A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. Essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP4V8E Half Unit**Policy Paper**

This information is for the 2020/21 session.

Teacher responsible: Prof Daniel Sturm and Dr Sara Hagemann
Participating students will be assigned an academic supervisor with relevant knowledge of the topic and supervision experience.

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors.

Course content: The aim of the course is to enable students to plan, design and conduct independent analysis in an area of public policy. Executive MPA/ EMPP students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with an Academic Adviser. The paper will analyse a concrete policy problem in a specific setting and propose an evidence-based solution or course of amelioration. It must be addressed to a non-academic audience and should be clearly and directly written, suitable for consideration by policy-makers. The main body of the paper should include methodology, results of the analysis, discussion of different policy options, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and draw on secondary and/or primary research.

Teaching: The student's Academic Adviser will provide advice and guidance on this piece of work as required during the duration of the assessment.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT, LT and ST.

A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted well in advance of the assessment deadline. Students may only change their topic thereafter with the agreement of the Academic Adviser/ Programme Directors. Students will be given feedback on their proposal.

Indicative reading: A suitable programme of reading will be developed in consultation with the Academic Adviser. Useful background readings may include:

- Eugene Bardach, A Practical Guide for Policy Analysis: The Eightfold Path to More Effective Problem Solving, 4th ed. (CQ Press, 2012);
- Catherine F. Smith, Writing Public Policy: A Practical Guide to Communicating in the Policy Making Process, 3rd ed. (Oxford University Press, 2012).
- Charles Lindblom and David K. Cohen, Usable Knowledge: Social Science and Social Problem Solving (Yale University Press, 1979).
- Philip E. Tetlock, Expert Political Judgment: How Good Is It? How Can We Know? (Princeton University Press, 2006).

Assessment: Policy paper (100%) in the MT, LT and ST.

- 6,000 word policy paper

S04A1E Half Unit**Cities in an Urban Age: Challenges and Opportunities**

This information is for the 2020/21 session.

Teacher responsible: Prof Richard Burdett FAW 8.01J and Prof Antony Travers CON6.06

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.

This course is only available to students registered in the Executive MSc in Cities.

Course content: Governing Cities in an Urban Age is an intensive

introduction to global urbanisation and the state of cities. The course explores different stages of urban development in cities and regions across the world. It provides students with an understanding of the key challenges facing both mature and rapidly-developing metropolitan areas. It will locate the key challenges facing large cities, notably the persistent levels of social inequality, poverty, unsustainable resource use and constraints to economic efficiency. The course introduces the key tools for intervention such as planning, governance and management of land and infrastructure in response to critical pressures linked to economic development, globalisation, migration, social inclusion, climate change, resource efficiency, and resilience. The key purpose of the course will be to give participants a comprehensive framework for understanding the challenges which cities are facing today.

Topics include: global urbanisation, development and design, urban change, population growth, urban productivity, urban expansion, urban sprawl, densification, intensification, sociability, urban governance, urban institutions, budgets and responsibilities.

Teaching: The course will be taught over a period of one week. Live teaching will consist of a minimum of 20 hours of lectures, lecture-based discussions, seminars and workshops. Additional online blended learning materials will be provided ahead of live teaching, consisting of videos, readings and interactive activities. Live sessions will be delivered both in-person and online if students are unable to travel to London for teaching.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Submission of a 500 word non-assessed formative statement outlining the key political, environmental and socioeconomic challenges in the student's city that will shape the content of the 2,000 word assessed report.

Indicative reading: Burdett, Ricky and Rode, Philipp (eds) (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. Simone, AbdouMalik and Pieterse, Edgar (2017) *New Urban Worlds: Inhabiting Dissonant Times*. Polity Press. London. Travers, Tony, 'Taxing Power' in Burdett, Ricky and Rode, Philipp (eds) (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. Pieterse, Edgar, 'Placemaking in dissonant times', in Burdett, Ricky and Rode, Philipp (eds) (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. McQuarrie, Michael, Ferreira da Cruz, Nuno and Rode, Philipp 'Tensions of Governance' in Burdett, Ricky and Rode, Philipp (eds) (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. Angel, Shlomo (2011): *Making Room for a Planet of Cities*. Lincoln Institute of Land Policy. Glaeser, E. (2011): *Triumph of the City: How Our Greatest Invention Makes Us Richer, Smarter, Greener, Healthier, and Happier*. Penguin Press. Brenner, Neil (2004), *New State Spaces: Urban Governance and the Rescaling of Statehood*, Oxford University Press, Oxford. Pieterse, Edgar, (2018) *The politics of governing African Urban Spaces*, International Development Policy / Revue internationale de politique de développement, No. 10.

Additional readings:

Fainstein, Susan, Gordon, Ian and Harloe, Michael (2011) *Ups and downs in the global city: London and New York In the 21st century*. In: Bridge, Gary and Watson, Sophie, (eds.) *New Blackwell companion to the city*. Wiley-Blackwell, Chichester, pp. 38-47. Gordon, I., Travers, T. (2010). "London: planning the ungovernable city" in *City, culture and society*, 1(2), pp. 49-55. Travers, Tony (2004) *The Politics of London Governing an Ungovernable City*, Palgrave. Jacobs, Jane (1961): *The death and life of great American cities*. Random House.

Assessment: Essay (70%, 2000 words) and presentation (30%) in the MT.

A presentation and submission of a 2,000 word report in MT of how the student's city or organisation is dealing with some of the challenges and opportunities presented in the course.

SO4A2E Half Unit

Cities and Society: Design and Social Cohesion

This information is for the 2020/21 session.

Teacher responsible: Prof Richard Burdett 8.01J

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option. This course is only available to students registered in the Executive MSc in Cities.

Course content: Cities and Society: Design and Social Cohesion looks at some of the major drivers of urban inequality and poverty and the key actions that cities are taking to reduce urban inequalities through urban design, infrastructure and policy. This is a heavily applied course providing students with tools to analyse the socio-demographic profile of households and neighbourhoods and their relation to spatial distribution and clustering in cities of the developing and developed world. Students are introduced to traditional measures of poverty and inequality such as income and wealth as well more recent multi-dimensional poverty measures such as health and education, and provided with analytical and mapping tools to identify areas of concentration of deprivation. A particular emphasis is placed on identifying spatial strategies that can alleviate the concentration of urban poverty and inequality by optimising access to jobs, housing, education, health, public space, transport and community infrastructure.

Cities and Society will also look at the macro-economic forces that are producing uneven regional and urban development and the key planning methods to reduce levels of inequality. These include spatially blind policies such as taxation and redistribution; spatially connective policies such as infrastructure links between high and low income neighbourhoods and finally spatially targeted policies where private and public investment is targeted at the most deprived urban areas.

Topics include: inequality and GINI coefficients; from income to multi-dimensional measures of poverty; the Human Development Index and its urban relevance; affordable housing, social infrastructure; equity planning (examples include London, Barcelona, Medellin and Bogota; the London model of urban regeneration; infrastructure and equity, health and well-being, migration.

Teaching: The course will be taught over a period of one week. Live teaching will consist of a minimum of 20 hours of lectures, lecture-based discussions, seminars and workshops. Additional online blended learning materials will be provided ahead of live teaching, consisting of videos, readings and interactive activities. Live sessions will be delivered both in-person and online if students are unable to travel to London for teaching.

Formative coursework: Students will be expected to produce 1 essay in the LT.

500 word submission identifying the social research methods used in the assessment of a policy or project of your choice

Indicative reading: Burdett, Ricky, 'Flexible Urbanisms' in Burdett, Ricky and Rode, Philipp (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. Mehrotra, Rahul and Vera, Felipe, 'Ephemeral Urbanism', in Burdett, Ricky and Rode, Philipp (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. Mitlin, Diana and David Satterthwaite (2013): Urban Poverty in the Global South: Scale and Nature. Routledge.

Assessment: Essay (70%, 2000 words) in the LT.

Presentation (30%) in the MT.

Design and present a research method to assess a project or policy of your choice (30%) and submission of an essay looking critically at the social research methods used in the assessment of an existing policy or project (70%).

S04A3E Half Unit

Cities and the Economy: Urban Economic Development and Finance

This information is for the 2020/21 session.

Teacher responsible: Dr Savvas Verdis FAW 8.01E

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.

This course is only available to students registered in the Executive MSc in Cities.

Course content: Cities and the Economy forms part of the Executive MSc in Cities. This is an applied course looking at the role of city government and firms in driving inclusive local economic development. The course introduces traditional and more progressive ways to measure and analyse the city economy as well as policies and tools available to attract investment and finance as well as improve the distributional effects of economic growth.

From a global economic level, we will look at the forces shaping urban development and the capacity of national, regional and local policies to influence these drivers. From a more local economic level, we will look at the make-up and sectorial composition of a city economy; how we can measure the economic impact of policies and projects and finally how we can finance and fund complex infrastructure projects.

Topics include: inclusive growth; economic inequalities; measuring growth and competitiveness over time, comparative vs competitive advantage, key performance indicators of a city economy, the role of infrastructure and megaprojects in driving competitiveness, managing city budgets, financing your city, global city indexes, special economic zones and other incentives.

Teaching: The course will be taught over a period of one week. Live teaching will consist of a minimum of 20 hours of lectures, lecture-based discussions, seminars and workshops. Additional online blended learning materials will be provided ahead of live teaching, consisting of videos, readings and interactive activities. Live sessions will be delivered both in-person and online if students are unable to travel to London for teaching.

Formative coursework: Students will be expected to produce 1 essay in the LT.

500 word submission describing the financing strategy of a project of your choice

Assessment: Essay (70%, 2000 words) in the ST.

Presentation (30%) in the LT.

Pitch a financing strategy for a selected case study area to an expert panel (30%) and submission of a 2,000 word written report analysing the financing strategy of a project of your choice (70%).

S04A4E Half Unit

Cities and the Environment: Urban Environmental Transitions

This information is for the 2020/21 session.

Teacher responsible: Dr Philipp Rode FAW 8.01I

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.

This course is only available to students registered in the Executive MSc in Cities.

Course content: Cities and the Environment explores critical aspects of environmental sustainability in relation to both urbanisation globally and urban change in individual cities. This is an applied course giving students the relevant tools to measure, analyse and assess environmental impact. It introduces debates on different green city paradigms and focuses specifically on approaches to urban climate change mitigation and adaptation. The course further examines implications for urban planning, governance and management.

Cities and the Environment aims to provide the students with an analytical understanding of environmental challenges linked to urban development. Based on these, students are introduced to planning approaches, policy instruments and governance arrangements enabling environmental sustainability and resilience, facilitating the transition to a green economy in cities.

Topics include: environmental sustainability, green economy, environmental impact assessments, climate change adaptation and mitigation in cities, climate resilience, urban environmental transition, resource consumption, pollution, biodiversity.

Teaching: The course will be taught over a period of one week. Live teaching will consist of a minimum of 20 hours of lectures, lecture-based discussions, seminars and workshops. Additional online blended learning materials will be provided ahead of live teaching, consisting of videos, readings and interactive activities. Live sessions will be delivered both in-person and online if students are unable to travel to London for teaching.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Assessment: Coursework (80%, 5000 words) and presentation (20%) in the ST.

A group project report not exceeding 5,000 words, which will count for 80% of the final grade.

Additionally, each group member must write a personal reflection on their contribution in no more than 600 words, and should include specific details of the student's contributions to the project.

S04A6E

Urban Development and Master Planning

This information is for the 2020/21 session.

Teacher responsible: Prof Richard Burdett FAW 8.01J and Dr Savvas Verdis FAW 8.01E

Availability: This course is available on the Executive MSc in Cities. This course is not available as an outside option.

This course is only available to students registered in the Executive MSc in Cities and is offered as an option.

Course content: Urban Development and Master Planning is an applied group project based on a major regeneration site. Groups will be introduced to one of the regeneration sites project teams which will include: local planning officers, developers, planners, designers and financing teams. The groups will first immerse themselves in the host organisation as well as the site and understand some of the project challenges. The groups will then work in a collaborative environment in order to develop solutions to the challenges set by the project teams.

Using some of the key assessment and planning tools developed in courses S04A1, S04A2, S04A3 & S04A4 of the Executive MSc in Cities, this project will encourage students to apply the most appropriate analysis, planning and finance methods to an actual development site.

Topics covered: land ownership, development goals, developing the brief, urban design and master planning strategies, wider urban context, phasing, capturing value, mix of uses, public vs private space, financing projects, residual values, negotiations between developers and public agencies, planning constraints and policies, affordable housing, lifecycle assessment, built form, density and integration.

Teaching: The majority of the course will be taught over a period of a single core week, with some live online sessions taking place during the week before and the week after. Teaching will consist of a minimum of 40 hours of lectures, lecture-based discussions, seminars, workshops, briefings and supervised group work over Summer Term. Teaching is anticipated to take place in person, but students who are unable to travel due to the COVID-19 pandemic will have the option to undertake the course remotely over a two-week period. Additional online blended learning materials will be provided ahead of live teaching, consisting of videos, readings and interactive activities.

Formative coursework: Students will be expected to produce 1 essay in the ST.

Prepare a 500 word brief for your project indicating key deliverables.

Indicative reading: Indicative Reading

Assessment: Essay (80%, 5000 words) and presentation (20%) in the ST.

This project is conducted in groups, and the assessment is based on a collective group mark for the following three components.

1 A presentation to the project team and LSE Cities staff, which counts for 20% of the total mark.

2 A group project report not exceeding 5,000 words, which will count for 80% of the final grade.160160

3 Additionally, each group member must write a personal reflection on their contribution in no more than 600 words, and should include specific details of the student's contributions to the project.

S04A7E

Urban Consultancy Project

This information is for the 2020/21 session.

Teacher responsible: Dr Philipp Rode 8.01I and Dr Savvas Verdis 8.01E

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.

This course is only available to students registered in the Executive MSc in Cities.

Course content: The Consultancy Project is a six-month individual consultation undertaken by a student in the Executive MSc in Cities in their own organisation or for an external organisation. Through the consultancy project, students will apply the knowledge and skills acquired in the first six courses of the programme to craft policy or program improvements for public or private agencies and non-profit organisations.

Through in depth interviews with the organisation's leaders as well as the relevant stakeholders, students will focus on a specific project and offer advice on one or more of its design and implementation phases. These may include but are not limited to the concept, feasibility, design, assessment, delivery and/ or evaluation phases in the project cycle.

Examples of projects include design briefs, assessment of master plans or strategic plans, social, economic and environmental impact assessment of projects, project finance and greening of projects and policies.

Teaching: Each student will be allocated a supervisor, who will provide overall guidance on the project's development. Other members of staff may also advise as required. Students will be supported with face to face or web based tutorials throughout the duration of their consultancy project.

Formative coursework: Students will be expected to produce 1 essay in the ST.

A 500 word proposal brief for the consultation project that will be carried out independently by each student.

Indicative reading: Bryman, Alan. *Social Research Methods*, 2012. Oxford University Press. Cook, Curtis R. 2005. *Just enough project management the indispensable four-step process for managing any project, better, faster, cheaper*. New York: McGraw-Hill. Czerniawska, Fiona, and Paul May. 2006. *Management consulting in practice award-winning international case studies*. London: Kogan Page. Lindblom, Charles Edward, and David K. Cohen. 1979. *Usable knowledge: social science and social problem solving*. New Haven: Yale University Press. Office for Government Commerce. 2004. *Common Causes of Project Failure*. London: OGC. Prime Minister's Strategy Unit. 2004. *Strategy Survival Guide*. London.

Assessment: Project (100%, 6000 words) in the LT.

A consultancy report assessing an organisation's challenge and offering strategic advice on possible solutions at any stage of the project or policy cycle.

Important information in response to COVID-19

MRes/PhD Programme Regulations

Key to MRes/PhD Regulations**(H)** means a half-unit course**(C)** means this course is capped**(n/a 20/21)** means not available in the 2020/21 academic year**(MT)** means Michaelmas Term**(LT)** means Lent Term**(ST)** means Summer Term**MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track)**

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Programme Structure - MRes**Programme code:** TMRESAC1**Department:** Accounting

For students starting this programme of study in 2020/21

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1**Training courses****Compulsory (examined):**

- Paper 1 AC502 Foundations of Accounting, Organizations and Institutions (0.5)
- and**
- MY500 Fundamentals of Social Science Research Design (0.5)
- Paper 2 MY551 Introduction to Quantitative Analysis (0.5)
- and** one of the following 0.5 unit(s):
- MY521 Qualitative Research Methods (0.5) **or**
- MY526 Doing Ethnography (0.5) # (not available 2020/21) **or**
- MY528 Qualitative Text and Discourse Analysis (0.5) #
- Depending on previous methods training students have undertaken, they are allowed to replace one or all of the required methods courses listed under Paper 2 with more advanced methods courses. Should a student, for instance, have had previous training in quantitative methods to the level taught in MY551, the student will be asked to replace that course with a more advanced course in quantitative methods, such as MY552 (Applied Regression Analysis).
- Paper 3 Courses to the value of 1.0 unit from the following:
- AC411 Accounting, Strategy and Control (0.5)
- AC470 Accounting in the Global Economy (0.5) #
- EH428 History of Economics: Making Political Economy into a Social Science (0.5) (not available 2020/21)
- EH429 History of Economics: Ideas, Policy and Performativity (0.5)
- EH430 Monetary and Financial History (1.0) #
- EH463 The Long-Run Analysis of Firms and Industries (0.5)
- SO469 Risk and Governance: A Sociological Approach (0.5) (withdrawn 2020/21)
- SO470 The Sociology of Markets (0.5)
- Any other graduate or research-level course available in the School with permission from the lead supervisor and doctoral programme director.

Training Courses**Compulsory (not examined):**

AC500 Topics in Accounting Research (AOI) (0.0) examined in Year 2 of the MRes (as AC504)

Training Courses**Optional (not examined):**

MY591 Computing Packages for Applied Analysis (0.0) (withdrawn 2020/21)

Transferable skills**Compulsory (not examined):**

Department of Accounting Research Forums (ARF's)
Accounting, Organisations and Institutions Research
Seminars and Workshops

Year 2**Training Courses****Compulsory (examined):**

- Paper 4 AC504 Topics in Accounting Research (AOI) (1.0)
- Paper 5 AC599 Research Paper in Accounting (1.0) (not available 2020/21)
- *The AC599 Research Paper must be 6000-8000 words in length
- Paper 6 Courses to the value of 1.0 units in relevant fields, including more specialised methods training, if not taken above, such as:
- MY526 Doing Ethnography (0.5) # (not available 2020/21) **or**
- MY527 Qualitative Research with Digital and Visual Data (0.5) # (not available 2020/21) **or**
- MY528 Qualitative Text and Discourse Analysis (0.5) #
- Any other graduate or research-level course available in the School with permission from the lead supervisor and doctoral programme director.

Transferable skills**Compulsory (not examined):**

AC507 Accounting Work in Progress Seminars (0.0) (not available 2020/21)

*AC507 Presentation requirements: AOI/EoA joint seminars. Students are required to present their work in progress within AC507 (Seminar in Accounting) in the second year. A

Department of Accounting Research Forums (ARF's):
Accounting, Organisations and Institutions Research
Seminars and Workshops

Footnotes

A: Progression to the PhD if the above MRes requirements are met:

For progression to PhD registration, students are required to achieve marks of 50% or higher in Papers 1, 2, and 3, marks of 60% or higher in Paper 6 (50% or higher if Paper 6 is an MRes/PhD research course in another department, e.g. Finance or Economics) and marks of 65% or higher in Papers 4 and 5.

Students missing the progression requirement are required to pass those papers to the necessary standard before PhD registration can be permitted. Students can only re-sit each paper once. We expect students to re-sit failed papers in the same year that they failed the paper(s), so that decisions on continued/discontinued registration can be made before the next academic year commences.

means there may be prerequisites for this course. Please view the course guide for more information.

Award of the MRes

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Master's Degree.

The mark of Paper 5 (Research paper) and the highest marks to the value of 4 course units out of the remaining 5 course units taken will be used to determine the degree classification. Students are required to achieve a pass mark of 50% in Paper 5 (Research paper). A fail in one of the remaining four marks used for classification (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper, or an aggregate mark of 220 in the non-failed papers. If compensated, a fail shall result in a drop in the overall award classification

where a Distinction or Merit would otherwise have been awarded. It shall have no further impact where a Pass is to be awarded.

An award cannot be made where the student receives a bad fail in any mark, even if it is not being used for the calculation of an award. Where a student receives a bad Fail mark they must resit on one occasion only in order to be considered as eligible for award of the degree.

Programme Structure - PhD

Programme code: RPAC3

From Year 3 onwards

(if upgraded to PhD)

Training courses

Compulsory (not examined):

AC500 Topics in Accounting Research (AOI) (0.0) examined in Year 2 of the MRes (as AC504)

Transferable skills

Compulsory (not examined):

AC507 Accounting Work in Progress Seminars (0.0) (not available 2020/21)

Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

*AC507 Presentation requirements: AOI/EoA joint seminars. Students are required to present their work in progress within AC507 (Seminar in Accounting) in each of the years of their degree, starting in year 2.

MRes/PhD in Accounting (EoA) (Economics of Accounting Track)

Programme Structure - MRes

Programme code: TMRESAC2

Department: Accounting

For students starting this programme of study in 2020/21

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Introductory Course

Students are required to attend the following before commencing the MRes/PhD programme:

EC400 Introductory Course in Mathematics and Statistics (0.0) #

Training courses

Compulsory (examined):

Paper 1 EC411 Microeconomics (1.0) #

Paper 2 EC402 Econometrics (1.0) #

Paper 3 FM436 Financial Economics (1.0) #

Training courses

Compulsory (not examined):

AC506 Topics in Accounting Research (EoA) (0.0) examined in Year 2 of the MRes (as AC501)

Transferable Skills

Compulsory (not examined):

Department of Accounting Research Forums (ARFs)
Economics of Accounting Research Seminars and Workshops

Year 2

Training Courses

Compulsory (examined):

Paper 4 AC501 Topics in Accounting Research (EoA) (1.0)

Paper 5 AC599 Research Paper in Accounting (1.0) (not available 2020/21)

*The AC599 Research Paper must be 6000-8000 words in length

Paper 6 Courses to the value of 1.0 unit in relevant fields,

including:

FM502 Corporate Finance for Research Students (1.0)

Any other graduate or research-level course available in the School with permission from the lead supervisor and doctoral programme director.

Transferable Skills

Compulsory (not examined):

AC507 Accounting Work in Progress Seminars (0.0) (not available 2020/21)

Department of Accounting Research Forums (ARFs)

Economics of Accounting Research Seminars and Workshops A

*AC507 Presentation requirements: AOI/EoA joint seminars. Students are required to present their work in progress within AC507 (Seminar in Accounting) in each of the years of their degree, starting in Year 2.

Footnotes

A: Progression to the PhD if the above MRes requirements are met:

For progression to PhD registration, students are required to achieve marks of 50% or higher in Papers 1, 2, and 3, marks of 60% or higher in Paper 6 (50% or higher if Paper 6 is an MRes/PhD research course in another department, e.g. Finance or Economics) and marks of 65% or higher in Papers 4 and 5.

Students missing the progression requirement are required to pass those papers to the necessary standard before PhD registration can be permitted. Students can only re-sit each paper once. We expect students to re-sit failed papers in the same year that they failed the paper(s), so that decisions on continued/discontinued registration can be made before the next academic year commences.

means there may be prerequisites for this course.

Please view the course guide for more information.

Award of the MRes

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Master's Degree.

The mark of Paper 5 (Research paper) and the highest marks to the value of 4 course units out of the remaining 5 course units taken will be used to determine the degree classification. Students are required to achieve a pass mark of 50% in Paper 5 (Research paper). A fail in one of the remaining four marks used for classification (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper, or an aggregate mark of 220 in the non-failed papers. If compensated, a fail shall result in a drop in the overall award classification where a Distinction or Merit would otherwise have been awarded. It shall have no further impact where a Pass is to be awarded.

An award cannot be made where the student receives a bad fail in any mark, even if it is not being used for the calculation of an award. Where a student receives a bad Fail mark they must resit on one occasion only in order to be considered as eligible for award of the degree.

Programme Structure - PhD

Programme code: RPAC4

From Year 3 onwards

(if upgraded to PhD)

Training courses

Compulsory (not examined):

AC506 Topics in Accounting Research (EoA) (0.0) examined in Year 2 of the MRes (as AC501)

Transferable Skills

Compulsory (not examined):

AC507 Accounting Work in Progress Seminars (0.0) (not available 2020/21)

Department of Accounting Research Forums (ARFs)

Economics of Accounting Research Seminars and Workshops

*AC507 Presentation requirements: AOI/EoA joint seminars. Students are required to present their work in progress within AC507 (Seminar in Accounting) in each of the years of their degree, starting in Year 2.

MRes/PhD in Anthropology

Programme Structure - MRes

Programme code: TMRESAN

Department: Anthropology

For students starting this programme of study in 2020/21

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

- Paper 1 AN471 Qualitative and Quantitative Methods for Anthropologists (1.0)
- Paper 2 AN472 Evidence and Arguments in Anthropology and Other Social Sciences (1.0)
- Paper 3 AN442 Supervised Reading Course and Fieldwork Preparation (1.0)
- Paper 4 AN443 Research Proposal (1.0)
In addition students are required to complete the following courses, which are compulsory but not examined:
- Paper 5 AN500 Seminar on Anthropological Research (0.0)
- Paper 6 All MRes students are required to audit one or two of the department's main lecture courses (to the value of 1.0 unit):
- AN402 The Anthropology of Religion (1.0)
- AN405 The Anthropology of Kinship, Sex and Gender (1.0)
- AN451 Anthropology of Politics (0.5)
- AN456 Anthropology of Economy (1): Production and Exchange (0.5)
- AN457 Anthropology of Economy (2): Transformation and Globalisation (0.5)
- AN479 Anthropology of Law (0.5)

Award of the MRes in Anthropology

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree. For students entering in or before 2016/17: Classification for students with mark profiles falling under Paragraphs 3.3.2 or 3.3.4 will always be determined to the advantage of the student. From 2017/18 students with mark profiles falling under Paragraphs 3.3.2 or 3.3.4 shall be classified as follows: Distinction/Merit borderline (scheme paragraph 3.3.2): 3.3.2 (c) marks of a Distinction grade in courses to the value of 2.5 units and a mark of a Merit grade in a course of 0.5 unit value will obtain an overall classification of a Distinction;

3.3.2 (d) marks of a Distinction grade in courses to the value of 2.0 units and marks of a Merit grade of at least 65 in courses to the value of 2.0 units; OR, marks of a Distinction grade in courses to the value of 2.0 units, marks of a Merit grade in courses to the value of 2.0 units, and an overall aggregate mark of at least 275 will obtain an overall classification of a Distinction.

Merit/Pass borderline (scheme paragraph 3.3.4):

3.3.4 (h) marks of a Merit grade in courses to the value of 2.5 units will obtain an overall classification of a Merit;

3.3.4 (i) marks of a Distinction grade in courses to the value of 1.0 unit, marks of a Merit grade in courses to the value of 1.0 unit, and marks of a Pass grade of at least 55 to the value of 2.0 units will obtain an overall classification of Merit

The marks for AN471 and AN472 will count respectively as 25% of the total mark for the year. The research

proposal, worth 50% of the total mark for the MRes year, will be examined (and the examination includes a viva). In order to be upgraded to PhD registration and allowed to commence fieldwork, students (a) must earn an average of 60 or more across all units; (b) must earn a minimum mark of 60 on the research proposal.

Progression to the PhD

If the above MRes requirements are met, students will be upgraded to PhD registration and will commence the fieldwork phase of the programme. The mandatory first year progress review of PhD students will be based on written reports about the early phase of fieldwork. The mandatory third year progress review for students in Anthropology is held in the third term (or, exceptionally, in the fourth term) after their return from fieldwork; this entails a viva with both supervisors and one external examiner.

Programme Structure - PhD

Programme code: RPAN2

In the programme regulations below Years 1 and 2 are listed as "fieldwork", with Years 3 and 4 being post-fieldwork, although in practice the timing/duration of these stages may vary to some extent between students.

Year 1 - Fieldwork

Year 2 - Fieldwork

Year 3

- Paper 1 AN505 Advanced Professional Development in Anthropology (1.0)

Papers 2 & 3

Compulsory non-examined courses:

AN500 Seminar on Anthropological Research (0.0)

AN503 Thesis Writing Seminar (0.0)

Year 4

Papers 4 & 5

Compulsory non-examined courses:

AN500 Seminar on Anthropological Research (0.0)

AN503 Thesis Writing Seminar (0.0)

MRes/PhD in Economics

A PhD in Economics consists of two years of coursework, followed by a thesis which is expected to take three years. The coursework requirement involves three PhD-level core courses in microeconomics, macroeconomics and econometrics, three field courses and a supervised research paper.

A place on the MSc Economics or the MSc Econometrics and Mathematical Economics will include a conditional offer of progression to the MRes/PhD in Economics, subject to the attainment of a Distinction grade in the MSc. Those who meet the progression requirement and decide to progress are registered as MRes students and undertake the same two-year MRes course requirement as with all other MRes/PhD students.

Programme Structure - MRes

Programme code: TMRESEC

Department: Economics

For students starting this programme of study in 2020/21

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

First Year MRes

Introductory course

All students are required to attend the following introductory course in Year 1:

EC400 Introductory Course in Mathematics and Statistics (0.0) #

Students are required to take the following MRes core courses:

- Paper 1 EC441 Microeconomics for MRes students (1.0) #

- Paper 2 EC442 Macroeconomics for MRes students (1.0)

- Paper 3 EC443 Econometrics for MRes students (1.0) # **or** EC484 Econometric Analysis (1.0) #*A
Students who have completed EC484 to the required standard as part of their MSc do not have to take the course again. To substitute for EC484, students will take one course from the following Field Selection List. The EC484 mark will be carried forward to count as the Paper 3 mark for progression to PhD registration. It will not count towards the award of the MRes degree:

Field Selection List

Second year or higher MRes

Students are required to take:

- Paper 4 EC599 Research Paper in Economics (1.0) B
Papers 5 & 6 Courses to the value of 2.0 unit(s) from the following:

Field Selection List

Students are required to attend:

A. The following seminar where they must present their research:

EC501 Work in Progress Seminars (0.0)

B. The weekly departmental seminar series closest to their major field.

Field Selection List

EC518 Topics in Advanced Econometrics for Research Students (1.0)

EC532 International Economics for Research Students (1.0)

EC533 Labour Economics for Research Students (1.0)

EC534 Public Economics for Research Students (1.0)

EC535 Development Economics for Research Students (1.0)

EC536 Economics of Industry for Research Students (1.0)

EC537 Microeconomic Theory for Research Students (1.0) #

EC539 Macroeconomics for Research Students (1.0)

EC540 Political Economy for Research Students (1.0) #

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

Footnotes

A: Permission must be obtained to sit EC484: it is intended for students with a strong econometric background and an interest in pursuing a PhD with econometrics as the primary field.

B: The EC599 Research Paper must be 5,000 - 10,000 words in length.

means there may be prerequisites for this course. Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPEC2

First year PhD Programme

Students who have been upgraded to PhD are required to work on their research and write a PhD thesis. In addition they are required to take:

- Paper 7 Courses to the value of 1.0 unit(s) from the following:

Field Selection List

Students are also required to attend:

A. The following seminar where they must present their research:

EC501 Work in Progress Seminars (0.0)

B. The weekly departmental seminar series closest to their major field.

Students are required to work on their research and to write a PhD thesis.

Second and subsequent years PhD Programme

Students are required to attend:

A. The following seminar where they must present their research:

EC501 Work in Progress Seminars (0.0)

B. The weekly departmental seminar series closest to their major field.

Students are required to work on their research and to write a PhD thesis.

Field Selection List

EC518 Topics in Advanced Econometrics for Research Students (1.0)

EC532 International Economics for Research Students (1.0)

EC533 Labour Economics for Research Students (1.0)

EC534 Public Economics for Research Students (1.0)

EC535 Development Economics for Research Students (1.0)

EC536 Economics of Industry for Research Students (1.0)

EC537 Microeconomic Theory for Research Students (1.0) #

EC539 Macroeconomics for Research Students (1.0)

EC540 Political Economy for Research Students (1.0) #

means there may be prerequisites for this course.

Please view the course guide for more information.

Progression to Year 2 of MRes in Economics

In order to progress unconditionally from the first to the second year of MRes registration, students are required to achieve pass marks of 50% or higher in Papers 1, 2 and 3. With the permission of the MRes Programme Director, students missing the overall progression requirement by one paper may proceed to the second year, but will subsequently need to re-sit and pass the paper to the necessary standard for the award of the MRes degree and for progression to PhD registration at the end of year 2. Note, that students are restricted to sitting a maximum of four exams, including resits and EC599 in Year 2. Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before progression to the second year can be permitted.

Award of the MRes in Economics

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Master's Degree. Students are required to achieve a pass mark of 50% in Papers 1, 2, 3, 4 and in one of the Papers 5 or 6.

The marks for Papers 1 - 4 and the highest mark from Papers 5 or 6 will be used to determine the degree classification. A fail in one of these five classification papers (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper, or an aggregate mark of 220 in the non-failed papers. If compensated, a fail shall result in a drop in the overall award classification where a Distinction or Merit would otherwise have been awarded. It shall have no further impact where a Pass is to be awarded.

Progression to PhD registration

For PhD registration students are required to achieve four marks of 60% or higher and two marks of 50% or higher in MRes Papers 1, 2, 3, 4, 5 and 6, with at least two of the 60% marks achieved in the MRes core Papers 1, 2, and 3.

Condoning marks: A mark between 55 - 59% in one of the Papers 1, 2 or 3 can be condoned by a mark of +70% in another from Papers 1, 2 or 3. A mark between 50 - 59% in one of the Papers 1, 2 or 3 can be condoned by a mark of +70% in the EC599 research paper.

Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration.

Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted.

Students failing a paper or missing a progression mark will have to retake that paper within one year of the

original examination. In exceptional circumstances, the Graduate Studies Sub-Committee can grant permission to a candidate to resit a paper at the next available opportunity. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

A student can appeal against the Department's decision on progression to PhD according to the Appeals Regulations for Research Students.

Progression to Year 2 of PhD

In order to progress to the second year of PhD registration students are required to pass the PhD qualifying field (Paper 7) with a mark of 50% or higher.

Award of the PhD in Economics

Award of the PhD is contingent on progression requirements within the PhD and on the completion and defence of an original research thesis, in accordance with LSE regulations.

Special provisions for students who have completed an MSc degree within the Economics Department at LSE

Students who have completed EC484 to the required standard as part of their MSc do not have to take the course again. To substitute for EC484, students will take one course from the Field Selection List. The EC484 mark will be carried forward to count as the Paper 3 mark for progression to PhD registration. It will not count towards the award of the MRes degree.

With the approval of the Doctoral Programme Director, students who have completed an MSc degree within the Economics department at LSE will exceptionally be permitted to take their PhD qualifying field course (Paper 5) in the first year of the MRes and might take Paper 7 in their second year.

For students who have taken Paper 7 in their second year the progression and award regulations are adjusted as follows:

MRes award - Students are required to achieve a pass mark of 50% in Papers 1, 2, 3, 4 and at least one mark of 50% in Papers 5-7. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper.

Progression to PhD registration - For PhD registration students are required to achieve four marks of 60% or higher and two marks of 50% or higher in MRes Papers 1, 2, 3, 4, 5, 6 and 7, with at least two of the 60% marks achieved in the MRes core Papers 1, 2, and 3.

Progression to PhD to Year 2 of PhD - In order to progress to the second year of PhD students are required to pass all the PhD qualifying field (Papers 5-7) with a mark of 50% or higher.

MRes/PhD in Finance

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Programme Structure - MRes

Programme code: TMRESF1

Department: Finance

For students starting this programme of study in 2020/21

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Introductory course

Students are required to attend the following before commencing the MRes/PhD programme:

EC400 Introductory Course in Mathematics and Statistics (0.0) #

Training courses

Compulsory (examined):

Paper 1 EC441 Microeconomics for MRes students (1.0) #

Paper 2 EC442 Macroeconomics for MRes students (1.0)

Paper 3 EC443 Econometrics for MRes students (1.0) #

Transferable skills courses

Compulsory (not examined):

A. FM436 Financial Economics (1.0) #

B. Capital Markets Workshop

Optional (not examined):

C. Workshop in Information Literacy: finding, managing and organising published research and data

D. Any relevant seminars in related areas.

Year 2

Training courses

Compulsory (examined):

Paper 4 FM502 Corporate Finance for Research Students (1.0)

Paper 5 FM503 Asset Pricing for Research Students (1.0)

Paper 6 FM482 Research paper in Finance (1.0) A

Transferable skills courses

Compulsory (not examined):

A. FM505 PhD Seminar in Finance (1.0) B

B. Capital Markets Workshop

Optional (not examined):

C. Any relevant seminars in related areas.

Footnotes

A: The FM482 Research Paper must be 6,000 - 8,000 words in length.

B: Presentation requirements: Students are required to do an FM505 seminar presentation in the second year.

means there may be prerequisites for this course.

Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPF12

Year 3

(if upgraded to PhD)

Training courses

Compulsory (examined):

Paper 7 FM505 PhD Seminar in Finance (1.0) A

Transferable skills courses

Compulsory (not examined):

A. Capital Markets Workshop

Footnotes

A: Students need to pass Paper 7 with a mark of 65% or higher.

Progression and upgrade requirements

In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 50% or higher in papers 1, 2 and 3. Students who do not attain this standard may proceed to the second year with up to two resit papers, only with the permission of the MRes Programme Director, with the restriction that they can sit a maximum of four exams in year 2, which must be the two resits, either paper 4 or 5, and paper 6.

Award of the MRes in Finance

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Masters Degree. Students are required to achieve a pass mark of 50% in 5 of full-unit papers, which must include Paper 6 (Research paper) and four papers from Papers 1, 2, 3, 4, and 5. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 55% or higher in another paper.

Progression to PhD registration

For PhD registration students are required to achieve marks of 50% or higher in Papers 1, 2, and 3, marks of 60% or higher in papers 4 and 5 and a mark of 65% or higher in Paper 6.

Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted.

Throughout the coursework portion of the MRes or MRes/PhD programme, students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

MRes/PhD in International Development

Programme Structure - MRes

Programme code: TMRESDV

Department: International Development

For students starting this programme of study in 2020/21

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Compulsory courses

1. DV501 Development History, Theory and Policy for Research Students (0.5)
2. Methodology course choice to the value of one full unit (at the 400 and 500 level). Course choices must be approved by the supervisor and Doctoral Programme Director.
3. Methodology or Theory course choice to the value of 1.5 units (at the 400 and 500 level). Courses may be chosen from the list of optional courses below or an unlisted course. Course choices must be approved by the supervisor and Doctoral Programme Director.
4. DV510 Research Design and Proposal in International Development (1.0)
5. DV500 Research Seminar in Development Studies (0.0)

Optional courses

6. The following course is a prerequisite for 400 and 500 level EC courses for students planning to make use of advanced quantitative methods in their PhD research:
EC400 Introductory Course in Mathematics and Statistics (0.0) #
7. The following courses are recommended options under Paper 3 above:
DV507 Poverty (0.5)
DV513 Environmental Problems and Development Interventions (0.5)
DV515 Global Environmental Governance (0.5)
DV518 African Development (0.5)
DV520 Complex Emergencies (0.5)
DV524 International Institutions and Late Development (0.5) (not available 2020/21)
DV528 Managing Humanitarianism (0.5)
DV531 Development Management (1.0)
DV532 China in Developmental Perspective (0.5)

- DV533 The Informal Economy and Development (0.5)
DV545 Research Themes in International Development (0.5)
DV560 Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference (0.5)
DV590 Economic Development Policy I (0.5)
DV591 Economic Development Policy II (0.5)
DV592 Economic Development Policy III: Government Policy Analysis (0.5) #
GV517 Comparative Political Economy: New Approaches and Issues in CPE (0.5) #

means there may be prerequisites for this course.

Please view the course guide for more information.

Award of the MRes in International Development

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree.

Programme Structure - PhD

Programme code: RPDV2

Upgrade to PhD

Upgrade to PhD is dependent upon:

1. Pass of the MRes with an average of 65 in the coursework (except as noted above).
2. Pass of the Research Proposal with a mark equal or greater than 65.

The Research Proposal Committee will offer constructive advice and make one of four decisions:

- Unconditional approval
- Conditional approval
- Revise and resubmit
- Fail

Students who are required to Revise and Resubmit are usually expected to resubmit the proposal within three months. These students will progress to a temporary MPhil status, with the approval of the Chair of the Research Degrees Subcommittee, while they are revising their research proposal. Students who are successful will be upgraded to PhD.

The progress of each student will be reviewed at the end of each subsequent year.

MRes/PhD in Management (Employment Relations and Human Resources)

Programme Structure - MRes

Programme code: TMRESMGERH

Department: Management

For students starting this programme of study in 2020/21

Year 1

Research Practicum

Throughout the first 2 years of their programme students will be required to participate in Research Practicums where they are assigned to a member of Faculty to jointly explore research collaborations. These interactions are intended to allow students to explore in-depth research topics and shape research projects **besides** their main dissertation (MG599) in Year 2,

Research proposal

At the end of Year 1 students submit an initial "research proposal". Students will be expected to start work on developing this proposal over the summer period.

Training Course

Compulsory (not examined)

MG5A1 A Social Sciences Perspective of Academic Research in Management (0.0)

Paper 1 MG518 Employment Relations and Human Resource Management Seminar I (0.5)

- Paper 2 MY500 Fundamentals of Social Science Research Design (0.5)
If an MRes student enters the programme with a previous research design training; alternative, advanced research design courses can be taken, such as MY556 Survey Methodology (0.5) with supervisor and PhD Programme Director permission, timetable permitting.
- Paper 3 MY521 Qualitative Research Methods (0.5)
If an MRes student enters the programme with previous qualitative methods training; alternative advanced qualitative methods courses such as: MY526 Doing Ethnography (0.5); MY527 Qualitative Research with Non-Traditional Data (0.5); MY528 Qualitative Text Analysis (0.5), can be taken with Supervisor permission, timetable permitting
- Paper 4 MY551 Introduction to Quantitative Analysis (0.5) **or** MY552 Applied Regression Analysis (0.5) # **or** MY555 Multivariate Analysis and Measurement (0.5) # **or**
If an MRes student enters the programme with previous quantitative methods training; alternative, advanced quantitative methods courses can be taken, with Supervisor permission, timetable permitting. Some examples are as follows:
MY557 Causal Inference for Observational and Experimental Studies (0.5) # **or**
MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) # **or**
MY561 Social Network Analysis (0.5) **or**
ST452 Probability and Mathematical Statistics I (0.5) **or** ST501 Multilevel Modelling (0.5) #
- Paper 5 **One course to the value of 0.5 units from the following list:**
EU443 European Models of Capitalism (0.5)
EU477 Labour Markets and the Political Economy of Employment in Europe (0.5) # (not available 2020/21)
GI409 Gender, Globalisation and Development: An Introduction (0.5)
GI418 Feminist Economics and Policy: An Introduction (0.5) # (not available 2020/21)
GV517 Comparative Political Economy: New Approaches and Issues in CPE (0.5) #
LL4H8 Employment Law (0.5)
LL4H9 Human Rights in the Workplace (0.5) (not available 2020/21)
MG475 Organisational Theory (0.5)
MG476 Corporate Social Responsibility and International Labour Standards (0.5) #
MG4B7 Organisational Change (0.5) (not available 2020/21)
MG4C2 Organisational Behaviour (0.5)
MG4D2 International Employment Relations (0.5) #
MG4D3 The Dark Side of the Organisation (0.5) #
MG4D4 Cross Cultural Management (0.5) #
MG515 Social Organisation (0.5) # (not available 2020/21)
Given the ER/HR domain is multidisciplinary, the student can take an equivalent, appropriate MSc or PhD level course that is aligned with the student's dissertation and research interest from within the Department of Management or from another department, with Supervisor permission, timetable permitting.
- Year 2**
- Paper 6 MG519 Employment Relations and Human Resource Management Seminar II (0.5) (not available 2020/21)
- Paper 7 **Courses to the value of 1.0 unit(s) from the elective course list for Paper 5.**
For Paper 7, students may also take appropriate MSc or PhD level courses from within the Department of Management or from another department as agreed with

their Supervisor and Programme Director and subject to timetabling constraints. For example, the supervisor and student may determine that the student requires further, advanced methods courses to successfully analyse dissertation data. Or, the supervisor and student may determine that theoretically based courses are required for the student.

- Paper 8 MG599 Research Paper in Management (1.0)

Annual Progress Reviews

In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 60% in 2.5 units (5 classifications marks). Students that do not attain this standard may still be able to progress as follows, subject to approval by the Programme Director:

Students may fall short of this requirement by up to 1 unit of marks; which may consist of up to a maximum of 0.5 unit mark of fail and/or a 0.5 unit mark of between 50-59. Students will resit at the next available opportunity. Where a student is resitting a course they have passed in order to meet the progression requirements the new mark will not show on the transcript or be used to calculate the award of the degree.

There will be regular student progress reviews each term by the Department of Management (DOM) PhD committee. An Annual Progress review for Years 1 and 2 of the PhD programme will take place between May and July. The Panel will include the Programme Director and the Chair of the DOM PhD committee. All final progression decisions are reviewed and approved by the DOM PhD Committee.

End of Year 1:

The APR in Year 1 will review the Research Proposal outline, consider attendance in MY5A1, participation in the Research Practicums, supervision attendance, supervisor(s) progress reports and scores on the MRes papers. Re-registration for the following year will be approved by the PhD Programme Director, and on the expectation of the student will achieve the marks required in any resit exams.

End of Year 2:

The APR in Year 2 will review the successful completion of second year course work with marks meeting the required standards, the quality and contribution of MG599 paper and satisfaction with progress and participation in the programme. Recommendation for re-registration for the following year will be based on the successful completion of the previous year, and on the expectation of the student will achieve the marks required in any resit exams.

End of Year 3

Re-registration in year 4 will be based on students achieving the required grades in any resit exams, successfully upgrading and passing the PhD review process, having made satisfactory progress on research activity and approved for re-registration by the Programme Director in close consultation with Supervisors and the DOM PhD committee.

Year 4:

Re-registration in year 5 will be based on continued satisfactory progress and the approval for re-registration by the Programme Director in close consultation with supervisors and the DOM PhD committee,

Award of the MRes in Management – Employment Relations and Human Relations

The award and classification of the MRes degree will be subject to the normal application of the School's Scheme for the Award of a five-unit Taught Masters Degree.

Progression to PhD registration

In order to progress and upgrade to PhD registration students must have taken and passed all 5 units (10

classification marks) with a grade of 60% or higher by the end of the programme. Students can compensate by achieving an aggregate of 300 marks (with no failed papers) which must include a grade of 60% in their core seminar. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students missing the overall progression requirement by 0.5 paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students failing to meet this standard will have their PhD registration discontinued. The final decision to upgrade to PhD is taken by the Department's PhD committee and is based on successful completion of the MRes requirements as specified above as well as satisfactory progress in their research activities and approval of their Research Proposal by the Upgrade Panel. The panel will consist of two research area faculty and the student's two supervisors. In Year 3 students must also pass the PhD Review process. This will be reported on to the PhD committee at the end of Year 3 along with any results from resits taken in that year.

means there may be prerequisites for this course. Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPMGERHR

Years 3,5 If upgraded to PhD

Years 3-5

By the end of Year 3 students are expected to have upgraded to PhD. PhD students will meet regularly with their Supervisor(s) each term throughout Year 3-5. After Upgrade they are expected to focus on the research and writing of their thesis, the continued development of research ideas for publication, participation in relevant training courses and career development activities.

Award of the PhD

The PhD is awarded according to the rules of LSE.

MRes/PhD in Management (Marketing)

Programme Structure - MRes

Programme code: TMRESMGMK

Department: Management

For students starting this programme of study in 2020/21

Year 1

Research Practicums

Research practicums

Throughout the first 2 years of their programme students will be required to participate in Research Practicums where they are assigned to a member of Faculty to jointly explore research collaborations. These interactions are intended to allow students to explore in-depth research topics and shape research projects *besides* their main dissertation (MG599) in Year 2,

Research proposal

At the end of Year 1 students submit an initial "research proposal". Students will be expected to start work on developing this proposal over the summer period.

Training Course

Compulsory (not examined):

MG5A1 A Social Sciences Perspective of Academic Research in Management (0.0)

Paper 1 MG512 Marketing I: Consumer Behaviour and Quantitative Modelling (0.5)

Paper 2 EC411 Microeconomics (1.0) # **or** ST425 Statistical Inference: Principles, Methods and Computation (1.0) #

*EC411 includes a non credit bearing pre-session

course EC400 which must be attended as a prerequisite. EC400 applications must be made by the end of June 2020.

Paper 3 EC443 Econometrics for MRes students (1.0) #
Or courses to the value of 1.0 unit from the following:
MY552 Applied Regression Analysis (0.5) #
MY555 Multivariate Analysis and Measurement (0.5) #
MY557 Causal Inference for Observational and Experimental Studies (0.5) #

If EC443 is chosen please note the following pre-requisite: Students should have completed an undergraduate level course in econometrics and statistical theory. Linear algebra and multivariate calculus will be used frequently.

Year 2

Note

From the start of MT in Year 2 students continue to shape their research proposal and will be given ongoing feedback, and the opportunity to develop ideas.

Paper 4 MG520 Marketing II: Consumer Behaviour and Quantitative Modelling (0.5) (not available 2020/21)

Paper 5 Courses to the value of 1.0 unit from the following:
EC533 Labour Economics for Research Students (1.0)
MY552 Applied Regression Analysis (0.5) #
MY555 Multivariate Analysis and Measurement (0.5) #
MY557 Causal Inference for Observational and Experimental Studies (0.5) #

Students may also take alternative courses below if agreed with their supervisor and programme director and subject to timetabling constraints:

EC411 Microeconomics (1.0) #
EC427 The Economics of Industry (1.0) #
EC484 Econometric Analysis (1.0) #1
MY555 Multivariate Analysis and Measurement (0.5) #
PP454 Development Economics (1.0) #
ST405 Multivariate Methods (0.5) #
ST411 Generalised Linear Modelling and Survival Analysis (0.5) #
ST442 Longitudinal Data Analysis (0.5) # (not available 2020/21)

ST443 Machine Learning and Data Mining (0.5) #

*EC411 may be taken if not chosen during the first year of MRes. EC411 includes a non credit bearing pre-session course EC400 which must be attended as a prerequisite, EC400 applications must be made by the end of June 2021. Before taking EC484 you must take EC451, Introductory course. EC451 is taught in September. It consists of 45 hours of lectures and an additional 22 hours of classes, across a 3-week period.

Paper 6 MG599 Research Paper in Management (1.0)

Annual Progress Reviews

In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 60% in 2.5 units (5 classifications marks). Students that do not attain this standard may still be able to progress as follows, subject to approval by the Programme Director:

Students may fall short of this requirement by up to 1 unit of marks; which may consist of up to a maximum of 0.5 unit mark of fail and/or a 0.5 unit mark of between 50-59. Students will resit at the next available opportunity. Where a student is resitting a course they have passed in order to meet the progression requirements the new mark will not show on the transcript or be used to calculate the award of the degree. There will be regular student progress reviews each term by the Department of Management (DOM) PhD committee. An Annual Progress review for Years 1 and 2 of the PhD programme will take place between May and July. The Panel will include the Programme Director and the Chair of the DOM PhD committee. All final progression decisions are reviewed and approved by

the DOM PhD Committee.

End of Year 1:

The APR in Year 1 will review the Research Proposal outline, consider attendance in MY5A1, participation in the Research Practicums, supervision attendance, supervisor(s) progress reports and scores on the MRes papers. Re-registration for the following year will be approved by the PhD Programme Director, and on the expectation of the student will achieve the marks required in any resit exams.

End of Year 2:

The APR in Year 2 will review the successful completion of second year course work with marks meeting the required standards, the quality and contribution of MG599 paper and satisfaction with progress and participation in the programme. Recommendation for re-registration for the following year will be based on the successful completion of the previous year, and on the expectation of the student will achieve the marks required in any resit exams.

End of Year 3

Re-registration in year 4 will be based on students achieving the required grades in any resit exams, successfully upgrading and passing the PhD review process, having made satisfactory progress on research activity and approved for re-registration by the Programme Director in close consultation with Supervisors and the DOM PhD committee.

Year 4:

Re-registration in year 5 will be based on continued satisfactory progress and the approval for re-registration by the Programme Director in close consultation with supervisors and the DOM PhD committee.

Award of the MRes in Management – Marketing

The award and classification of the MRes degree will be subject to the normal application of the School's Scheme for the Award of a five-unit Taught Masters Degree.

Progression to PhD registration

In order to progress and upgrade to PhD registration students must have taken and passed all 5 units (10 classification marks) with a grade of 60% or higher by the end of the programme. Students can compensate by achieving an aggregate of 300 marks (with no failed papers) which must include a grade of 60% in their core seminar.

Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students missing the overall progression requirement by 0.5 paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students failing to meet this standard will have their PhD registration discontinued.

The final decision to upgrade to PhD is taken by the Department's PhD committee and is based on successful completion of the MRes requirements as specified above as well as satisfactory progress in their research activities and approval of their Research Proposal by the Upgrade Panel. The Upgrade Panel will consist of two research area faculty and the student's two supervisors. In Year 3 students must also pass the PhD Review process. This will be reported on to the PhD committee at the end of Year 3 along with any results from resits taken in that year.

Prerequisite Requirements and Mutually Exclusive Options

1: Before taking EC484 you must take EC451

means there may be prerequisites for this course.

Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPMGMK

Years 3,5 If upgraded to PhD

Years 3-5

By the end of Year 3 students are expected to have upgraded to PhD. PhD students will meet regularly with their Supervisor(s) each term throughout Year 3-5. After Upgrade they are expected to focus on the research and writing of their thesis, the continued development of research ideas for publication, participation in relevant training courses and career development activities.

Award of the PhD

The PhD is awarded according to the rules of LSE.

MRes/PhD in Management (Organisational Behaviour)

Programme Structure - MRes

Programme code: TMRESMGOB

Department: Management

For students starting this programme of study in 2020/21

Year 1

Research Practicum

Throughout the first 2 years of their programme students will be required to participate in Research Practicums where they are assigned to a member of Faculty to jointly explore research collaborations. These interactions are intended to allow students to explore in-depth research topics and shape research projects **besides** their main dissertation (MG599) in Year 2,

Research proposal

At the end of Year 1 students submit an initial "research proposal". Students will be expected to start work on developing this proposal over the summer period.

Training Course

Compulsory (not examined):

MG5A1 A Social Sciences Perspective of Academic Research in Management (0.0)

Paper 1 MG505 Research in Organisational Behaviour Seminar I (0.5)

Paper 2 MG4C2 Organisational Behaviour (0.5) **or**
PB431 Social Psychology of Economic Life: Advanced Topics (0.5)

or equivalent to be agreed with their supervisor and programme director.

Paper 3 MY500 Fundamentals of Social Science Research Design (0.5)

If an MRes student enters the programme with a previous research design training; alternative, advanced research design courses can be taken, such as MY556 Survey Methodology (0.5) with supervisor permission, timetable permitting

Paper 4 MY521 Qualitative Research Methods (0.5)

If an MRes student enters the programme with previous qualitative methods training; alternative advanced qualitative methods courses such as: MY526 Doing Ethnography (0.5); MY527 Qualitative Research with Non-Traditional Data (0.5); MY528 Qualitative Text Analysis (0.5), can be taken with supervisor permission, timetable permitting .

Paper 5 MY551 Introduction to Quantitative Analysis (0.5) **or**
MY552 Applied Regression Analysis (0.5) **# or**
MY555 Multivariate Analysis and Measurement (0.5) **#**
or

If an MRes student enters the programme with previous quantitative methods training; alternative, advanced quantitative methods courses can be taken, with supervisor permission, timetable permitting. Some examples are as follows:

MY557 Causal Inference for Observational and

Experimental Studies (0.5) #

MY559 Special Topics in Quantitative Analysis:
Quantitative Text Analysis (0.5) #

MY561 Social Network Analysis (0.5)

ST452 Probability and Mathematical Statistics I (0.5)

ST501 Multilevel Modelling (0.5) #

Given the Organisational Behaviour domain is multidisciplinary, the student can take an equivalent, appropriate MSc or PhD level course that is aligned with the student's dissertation and research interest from within the Department of Management or from another department, with supervisor permission, timetable permitting.

Year 2

Note: From the start of MT in Year 2 students continue to shape their research proposal and will be given ongoing feedback, and the opportunity to develop ideas.

Paper 6 MG525 Research in Organisational Behaviour Seminar II (0.5) (not available 2020/21)

Paper 7 **Courses to the value of 1.0 units from the following:**

MG475 Organisational Theory (0.5) **or**

MG476 Corporate Social Responsibility and International Labour Standards (0.5) # **or**

MG512 Marketing I: Consumer Behaviour and Quantitative Modelling (0.5) **or**

MG515 Social Organisation (0.5) # (not available 2020/21) **or**

MY528 Qualitative Text and Discourse Analysis (0.5) # **or**

MY530 Advanced Qualitative Research Workshops (0.0) # **or**

MY551 Introduction to Quantitative Analysis (0.5) **or**

MY552 Applied Regression Analysis (0.5) # **or**

MY555 Multivariate Analysis and Measurement (0.5) #

Paper 8 MG599 Research Paper in Management (1.0)

Annual Progress Review

In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 60% in 2.5 units (4 classifications marks). Students that do not attain this standard may still be able to progress as follows, subject to approval by the Programme Director:

Students may fall short of this requirement by up to 1 unit of marks; which may consist of up to a maximum of 0.5 unit mark of fail and/or a 0.5 unit mark of between 50-59. Students will resit at the next available opportunity. Where a student is resitting a course they have passed in order to meet the progression requirements the new mark will not show on the transcript or be used to calculate the award of the degree.

There will be regular student progress reviews each term by the Department of Management (DOM) PhD committee. An Annual Progress review for Years 1 and 2 of the PhD programme will take place between May and July. The Panel will include the Programme Director and the Chair of the DOM PhD committee. All final progression decisions are reviewed and approved by the DOM PhD Committee.

End of Year 1:

The APR in Year 1 will review the Research Proposal outline, consider attendance in MY5A1, participation in the Research Practicums, supervision attendance, supervisor(s) progress reports and scores on the MRes papers. Re-registration for the following year will be approved by the PhD Programme Director, and on the expectation of the student will achieve the marks required in any resit exams.

End of Year 2:

The APR in Year 2 will review the successful completion of second year course work with marks meeting the required standards, the quality and contribution of

MG599 paper and satisfaction with progress and participation in the programme. Recommendation for re-registration for the following year will be based on the successful completion of the previous year, and on the expectation of the student will achieve the marks required in any resit exams.

End of Year 3:

Re-registration in year 4 will be based on students achieving the required grades in any resit exams, successfully upgrading and passing the PhD review process, having made satisfactory progress on research activity and approved for re-registration by the Programme Director in close consultation with Supervisors and the DOM PhD committee.

Year 4:

Re-registration in year 5 will be based on continued satisfactory progress and the approval for re-registration by the Programme Director in close consultation with supervisors and the DOM PhD committee.

Award of the MRes in Management – Organisational Behaviour

The award and classification of the MRes degree will be subject to the normal application of the School's Scheme for the Award of a five-unit Taught Masters Degree.

Progression to PhD registration

In order to progress and upgrade to PhD registration students must have taken and passed all 5 units (10 classification marks) with a grade of 60% or higher by the end of the programme. Award of the PhD

The PhD is awarded according to the rules of LSE.

MRes/PhD in Political Science

Programme Structure - MRes

Programme code: TMRESPOLSC

Department: Government

For students starting this programme of study in 2020/21
Students complete and are examined in courses to the value of four full units.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Paper 1 Research Design

GV5X1 Research Design in the Social Sciences (1.0)

Paper 2 Methods courses

Students take courses under A, B or C to the value of one unit:

A) Quantitative research topics

MY552 Applied Regression Analysis (0.5) #

MY557 Causal Inference for Observational and Experimental Studies (0.5) #

GV4G1 Applied Quantitative Methods for Political Science (0.5) #

GV4J6 Game Theory for Research (0.5) # (not available 2020/21)

B) Qualitative research topics

GV513 Qualitative Methods in the Study of Politics (0.5)

MY551 Introduction to Quantitative Analysis (0.5)

C) Political theory research topics

GV504 Research Methods in Political Theory (1.0)

If these courses have already been taken, other methods courses may be substituted with the approval of the Doctoral Programme Director.

Paper 3 Field seminars

Courses to the value of 1.0 unit from the following:

GV517 Comparative Political Economy: New Approaches and Issues in CPE (0.5) #

GV5X2 Research Paper in Comparative Politics (1.0)

GV5XA Research Paper in Comparative Politics (0.5)

GV5XB Research Paper in Comparative Politics (0.5)

GV5X3 Research Paper in European Politics and Policy (1.0)

GV5XC Research Paper in European Politics and Policy (0.5)

GV5XD Research Paper in European Politics and Policy (0.5)

GV5X4 Research Paper in Global Politics (1.0)

GV5XE Research Paper in Global Politics (0.5)

GV5XF Research Paper in Global Politics (0.5)

GV5X5 Research Paper in Political Science and Political Economy (1.0)

GV5XG Research Paper in Political Science and Political Economy (0.5)

GV5XH Research Paper in Political Science and Political Economy (0.5)

GV5X6 Research Paper in Political Theory (1.0)

GV5XJ Research Paper in Political Theory (0.5)

GV5XK Research Paper in Political Theory (0.5)

GV5X7 Research Paper in Public Policy and Administration (1.0)

GV5XL Research Paper in Public Policy and Administration (0.5)

GV5XM Research Paper in Public Policy and Administration (0.5)

Any research methods course taught anywhere in the School, with the approval of the Course Convenor and the Doctoral Programme Director, or any course from the following if not already taken under Paper 2 above:

Paper 2 options list

Paper 4 Research Prospectus

GV599 Research Prospectus in Political Science (1.0)

Paper 2 options list

GV4G1 Applied Quantitative Methods for Political Science (0.5) #

GV4J6 Game Theory for Research (0.5) # (not available 2020/21)

GV504 Research Methods in Political Theory (1.0)

GV513 Qualitative Methods in the Study of Politics (0.5)

MY551 Introduction to Quantitative Analysis (0.5)

MY552 Applied Regression Analysis (0.5) #

MY557 Causal Inference for Observational and Experimental Studies (0.5) #

means there may be prerequisites for this course.

Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPPOLSCI

Years 1, 2, 3, 4

A) Research and write a dissertation

B) Participate in at least one Doctoral Workshop in the Government Department or elsewhere in the School in each year. For example:

GV501 Doctoral Workshop: Political Theory (0.0)

GV503 Political Philosophy Research Seminar (0.0)

GV514 Political Science and Political Economy Doctoral Workshop (0.0)

GV555 Political Economy and Public Policy Workshop (0.0) (withdrawn 2020/21)

C) Second year students have the option of taking the following course. Permission to attend is at the discretion of the course convenor:

EC540 Political Economy for Research Students (1.0) #

means there may be prerequisites for this course.

Please view the course guide for more information.

Award of the MRes

The award and classification of the MRes is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree

Conditions for progression to PhD

1. Award of the MRes with at least a Merit; **and** 2. Award of GV599 with at least a Merit; **and** 3. Successfully passing an oral hearing, consisting of a short presentation by the student and questions from the Research Prospectus Approval Committee.

The Research Prospectus Approval Committee will look for: a clear explanation of the research question(s) and motivation(s); an account of relevant related scholarly work; a discussion of methods, approaches, or challenges; and a plan to conduct the work within four years. The Department will publish more detailed guidance on assessment criteria.

The Research Prospectus Approval Committee normally consists of one supervisor or advisor of the student, at least one member of the Department's Doctoral Programme Committee, and an external assessor (usually the External Examiner for the MRes in Political Science). The Doctoral Programme Director chairs the Research Prospectus Approval Committee.

The Research Prospectus Approval Committee will make one of four decisions: Unconditional Approval, Conditional Approval, Revise and Resubmit, and Fail. Students with Conditional Approval have to submit a revised Research Prospectus to their Supervisor, normally within four weeks. The Doctoral Programme Director decides whether the conditions have been met, in consultation with the supervisor. Students who are required to Revise and Resubmit are usually expected to resubmit within three months. Resubmitted work is assessed by at least two members of the Research Prospectus Approval Committee. The Committee has discretion to conduct a second oral hearing if this is deemed necessary for the upgrade decision. If a second

hearing is conducted, at least two members of the committee take part. Students who fail to pass, either at the first oral hearing or after Revise and Resubmit, will not be upgraded to PhD status.

In exceptional circumstances, the Research Prospectus Approval Committee can recommend to the Research Degrees Subcommittee to upgrade students who do not meet progression condition 1 (Award of MRes degree with at least a Merit). Such a recommendation must be based on very strong performance in certain subjects that offset weaknesses in others and an exceptionally strong Research Prospectus. Personal circumstances affecting assessment performance may also be taken into account.

Award of the PhD

The PhD is awarded according to the rules of LSE.

MRes/PhD in Quantitative Economic History

Programme Structure - MRes

Programme code: TMRESQEH

Department: Economic History

For students starting this programme of study in 2020/21

MRes

Students complete and are examined in courses to the value of four full units. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Introductory course

EC400 Introductory Course in Mathematics and Statistics (0.0) #

Papers 1 & 2

Courses to the value of 2.0 unit(s) from the following:

- EH404 India and the World Economy (0.5)
- EH408 International Migration, 1500-2000: from slavery to asylum (0.5) (withdrawn 2020/21)
- EH413 African Economic Development in Historical Perspective (0.5)
- EH421 Economic History of Colonialism (0.5)
- EH423 Japan and Korea as Developing Economies (0.5) (not available 2020/21)
- EH446 Economic Development of East and Southeast Asia (1.0) #
- EH452 Latin American Development and Economic History (0.5)
- EH454 Human Health in History (1.0)
- EH463 The Long-Run Analysis of Firms and Industries (0.5)
- EH464 The Historical Context of Business (0.5) (withdrawn 2020/21)
- EH476 The Economic History of War (1.0) # (not available 2020/21)
- EH482 The Origins of the World Economy: Europe and Asia, 1000-1800 (1.0)
- EH483 The Development and Integration of the World Economy in the 19th and 20th Centuries (1.0)
- EH486 Shipping and Sea Power in Asian Waters, c 1600-1860 (0.5) (not available 2020/21)

Paper 3 One of the following: A

- EC411 Microeconomics (1.0) # **or**
- EC413 Macroeconomics (1.0) #

Paper 4 EH473 Research Paper in Quantitative Economic History (1.0)

Paper 5 EH474 Research Prospectus (0.0) B

Footnotes

A: If not already taken under Paper 3 of the MSc in Quantitative Economic History.

B: Not examined but subject to departmental approval.

means there may be prerequisites for this course.

Please view the course guide for more information.

Award of the MRes Quantitative Economic History

The award and classification of the MSc degree is consistent with the School's scheme for the award of a four-unit Taught Master's Degree. Students are required to achieve a pass mark of 50% in Papers 1, 2, 3 and 4 and submit paper 5 (EH474 Research Prospectus, not examined half unit). Where a candidate receives a Fail mark in any course, the penalty rules are set out in (see paragraph 3.2) apply. A Bad Fail (39% or lower) in any course of any unit value will result in an overall Fail for the degree.

Progression from the MRes Quantitative Economic History to the PhD

To progress from the MRes to the PhD programme, students need to achieve at least a Merit overall in the MRes and at least 65% in the (full unit) Research Paper in Quantitative Economic History (EH473). In addition, their Research Prospectus (EH474) needs to be approved by the departmental Prospectus Review Committee following a viva.

If a student fulfils all other progression requirements but his/her Research Prospectus does not meet the expectations set out in the EH474 course description, the Prospectus Review Committee will grant an extension of up to three months to submit a revised version. If this revised version fails the required standards, the candidate will not be admitted to the PhD programme.

Programme Structure - PhD

Programme code: RPQEH

Years 1-4

EH590 Thesis Workshop in Economic History (0.0)

MPhil/PhD Programme Regulations

Key to MPhil/PhD Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 20/21) means not available in the 2020/21 academic year
(MT) means Michaelmas Term
(LT) means Lent Term
(ST) means Summer Term

MPhil/PhD in Cities Programme

Programme Code: RPCP

Department: Sociology

For students starting this programme of study in 2020/21

The MPhil/PhD in Cities is an interdisciplinary degree offered through the Sociology Department. Research within this programme addresses not only works within the discipline of sociology but also other fields that comprise urban studies, such as architecture, design, urban geography, urban history, and planning. A Cities PhD thesis should assume a scholarly audience that includes sociologists as well as other urbanists. Through theory, empirical focus and/or methods, students must engage with urban space as a conceptual category, significant contextual feature, or object of analysis.

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (examined):

SO500 Aims and Methods Research Class for MPhil Students (1.0)

Students may also be asked to attend and pass the assessment for up to one further course unit (or two half units) chosen with their supervisor on the basis of an assessment of their research training needs.

Optional (examined):

MY500 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY551 Introduction to Quantitative Analysis (0.5)

MY552 Applied Regression Analysis (0.5) #

Other courses from Sociology master's programmes
 Specialist research courses:

SO491 Quantitative Social Research Methods (0.5)

SO492 Qualitative Social Research Methods (0.5)

SO511 Research Seminar in Political Sociology (0.0)

SO521 Research Seminar on Cities and Space (0.0) (not available 2020/21)

Transferable skills courses

Optional (not examined):

MY591 Computing Packages for Applied Analysis (0.0) (withdrawn 2020/21)

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2 and/or Year 3

Training courses

Compulsory (not examined):

SO501 Data Analysis Workshop (0.0) A

Footnotes

A: SO501 is required.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

In the Summer term of each year the progress of each student registered in the Department is discussed at the MPhil/PhD Board, which is a general meeting of all research student supervisors.

This Board decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register. The following benchmarks are used by the MPhil/PhD Board to determine if students are progressing appropriately:

By Summer Term Year 1 for Full Time Students: Submission of Formative Essay for SO500, including approvals from the Ethics Committee and Health and Safety

By Summer Term Year 2 for Full Time Students: Upgrade from MPhil to PhD Student

By Summer Term Year 3 for Full Time Students: Successful completion of the Third Year Progression Package

In addition, students are expected to have completed requirements as laid out by the supervisory team. The PhD is an individual project and will require research and writing tailored to that project.

Full time students are required to have submitted their Upgrade materials in Week 6 of the Michaelmas Term of Year 2, and to have successfully defended their research design in viva voce by the end of the Michaelmas Term of Year 2. Upon successful completion, the student will upgrade from MPhil to PhD student.

All full-time research students are required to have made the transition from MPhil to PhD (upgrading) student within two years of first registration and to have submitted their PhD thesis within four years. Part-time students are expected to be upgraded to PhD student by the end of their third year, and to submit their thesis within eight years.

The decision to upgrade a student from MPhil to PhD is taken by a panel consisting of two academics from the Department. For upgrade, students submit a 10,000 word research proposal that includes: 1) the research question(s); 2) a concise literature review through which the significance of the proposed research is articulated; 3) a discussion of research methodology; 4) preliminary data collection and analysis or a 'pilot' study; and 5) discussion of research ethics and risks. This material is then assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel. A written report is made by the panel on the basis of both the written upgrade submission and the viva. Students should aim to have a complete a first draft of their thesis in years three to four and allow three to six months for revision and submission. To facilitate this, students are required to submit a Third Year Progression Package no later than Week 6 of the Lent Term in the 3rd Year for full time students. The decision to progress a student from the third to the fourth year is taken by a panel consisting of two academics from the LSE with at least one being from the Sociology Department. Students are to submit: a) two draft chapters (an introduction and a substantive chapter) totalling no more than 20,000 words; b) a thesis outline; c) a timeline for completion and d) a bibliography. This material is then assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel. A written report is made by the panel on the basis of both the written submission and the viva.

MPhil/PhD in Data, Networks and Society

Programme Code: RPDNS

Department: Media & Communications

For students starting this programme of study in 2020/21 These regulations apply to students entering in or after the 2017/18 academic year.

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)**Year 1****Training courses****Compulsory (examined):**

Any two of the following:

- MC402 The Audience in Media and Communications (0.5)
 MC408 Theories and Concepts in Media and Communications (0.5)
 MC409 Media, Technology and Everyday Life (0.5)
 MC413 Information, Communication and Knowledge Systems (0.5) (not available 2020/21)
 MC418 Communication: Cultures and Approaches (0.5)
 MC424 Media and Communication Governance (0.5)
 MC425 Interpersonal Mediated Communication (0.5)
 MC430 Data in Communication and Society (0.5)
 MC433 Technology and Justice (0.5) #
 MC434 Digital Platforms and Media Infrastructures (0.5) # (not available 2020/21)

Plus:

One of the following full-unit courses:

- MC5M2 Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (1.0)

Or for students who already have a grounding in quantitative methods: A

- MC5M8 Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (1.0)

Optional (examined/not examined):

Other graduate courses relevant to research subject and agreed with supervisor.

Transferable skills courses**Compulsory (not examined):**

- MC500 Research Seminar for Media, Communications & Culture (0.0)

Optional (not examined):

- LN988 Thesis Writing (0.0) #

Modern Foreign Language courses offered by the Language Centre or other graduate seminars of relevance to research subject.

Presentation requirements:

At least one presentation annually in the following:

- MC500 Research Seminar for Media, Communications & Culture (0.0)

Year 2**Training courses****Optional (examined/not examined):**

Students can take either another qualitative or quantitative analysis course offered by the Department of Methodology. Courses must be approved by the supervisor and discussed with the MC5M2/MC5M8 convenor.

Transferable skills courses**Compulsory (not examined):**

- MC500 Research Seminar for Media, Communications & Culture (0.0)

Annual Joint PhD Symposium for Second Years and above, at Goldsmiths, Westminster and City

Optional (not examined):

Other graduate seminars of relevance to research subject.

Year 3**Transferable skills courses****Optional (not examined):**

- MC501 Advanced Doctoral Workshop in Media and Communications (0.0) #

Year 4**Transferable skills courses****Optional (not examined):**

- MC501 Advanced Doctoral Workshop in Media and Communications (0.0) #

Research Students are expected to complete their research.

Footnotes

A: Students wishing to select this option must seek approval from the Programme Director. Approval is subject to timetabling constraints.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

Students will be required to submit a full Thesis Proposal of 10,000 words to their Thesis Committee by week 5 of Summer Term in their first year (part-time students can submit their Proposal by 1 March in their second year). This paper will include a substantive statement of the aims, theories and methods proposed for the thesis, a tentative chapter outline, an indicative bibliography and a timetable for its completion. Together with any examination/s for quantitative methodological courses, the thesis proposal will form part of the evaluation process, and, together with an upgrade viva, will determine whether students are permitted to upgrade from MPhil to PhD and continue into their second year.

In the Summer term of each year the progress of each student registered in the Department is assessed and a decision made as to whether students can proceed to the next academic session. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register.

MPhil/PhD in Demography/Population Studies

Programme Code: RPDEPS

Department: Social Policy

For students starting this programme of study in 2020/21

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)**Year 1****Training courses****Optional (not examined):**

If not already taken previously:

- MY400 Fundamentals of Social Science Research Design (0.5)
 MY421 Qualitative Research Methods (0.5)
 MY451 Introduction to Quantitative Analysis (0.5)
 SP401 Understanding Policy Research (0.5) #
 SP420 Understanding Policy Research (Advanced) (0.5) #

Students will discuss with their supervisors any other methodological training that may be relevant for the successful completion of the MPhil/PhD programme.

Transferable skills courses**Compulsory (not examined):**

- SP501 Research Student Seminar (0.0)

Optional (not examined):

Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute.

Year 2**Training courses****Optional (not examined):**

- MY452 Applied Regression Analysis (0.5) #
 MY455 Multivariate Analysis and Measurement (0.5) #

Transferable skills courses**Optional (not examined):**

- SP501 Research Student Seminar (0.0)

Year 3**Transferable skills courses****Optional (not examined):**

- SP501 Research Student Seminar (0.0)

Year 4**Transferable skills courses****Optional (not examined):**

SP501 Research Student Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and Upgrade requirements:

Each student is required to undertake Major Review in the summer term of their first year (second year for part-time students). For Major Review they must submit a 10,000 word document with a detailed thesis proposal, their research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. They are interviewed on this document by senior staff who make the decision on upgrading.

Each year post-Major Review, every student is expected to submit a 1,000 to 2,000 word progress report, approved by supervisors, to the Research Students' Programme Director.

Each pre-Major Review student is expected to make a presentation on their proposed research to the SP501 seminar prior to the submission of their major review document and to address issues raised by the Research Students' Programme Director(s).

MPhil/PhD in Economic Geography**Programme Code:** RPECGY**Department:** Geography & Environment

For students starting this programme of study in 2020/21

In addition to progressing with their research, students are expected to take the courses listed below. Students may take courses other than those listed but must discuss this with their supervisor.

Paper Course number, title (unit value)**Year 1****Training courses****Compulsory (not examined):**

GY502 Staff / Research Students Seminars (0.0)

Compulsory (examined):

1. Relevant subject-specific training courses to the value of 1.0 unit:

GY400 The Economics of Urbanisation (0.5) # (not available 2020/21)

GY404 Inclusive Growth (0.5) #

GY409 Globalization and Regional Development (0.5)

GY410 Economics of Local and Regional Development (0.5) (not available 2020/21)

GY413 Regional Development and Policy (0.5) #

GY447 The Economics of Regional and Urban Planning (0.5) #

GY457 Applied Urban and Real Estate Economics (1.0) #

EC411 Microeconomics (1.0) #

Other relevant subject-specific training courses can be chosen subject to supervisor and course manager approval. Students who select EC411 are also required to take the following introductory course:

EC400 Introductory Course in Mathematics and Statistics (0.0) #

Note: Students who join the PhD programme after having completed either MSc in Local Economic Development or MSc in Real Estate Economics and Finance cannot retake the same courses or be waived the one unit of subject-specific training.

2. Relevant advanced research methods courses to the value of 1.0 unit:

GY428 Applied Quantitative Methods (0.5) #

GY460 Techniques of Spatial Economic Analysis (0.5) #

MY500 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY526 Doing Ethnography (0.5) # (not available 2020/21)

MY527 Qualitative Research with Digital and Visual Data (0.5) # (not available 2020/21)

MY556 Survey Methodology (0.5) #

MY557 Causal Inference for Observational and Experimental

Studies (0.5) #

MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #

Other relevant advanced research methods courses can be chosen subject to supervisor and course manager approval.

Transferable skills courses**Compulsory (not examined):**

GY500 Research Project Seminar (0.0)

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2**Training courses****Compulsory (not examined):**

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses**Compulsory (not examined):**

GY500 Research Project Seminar (0.0)

Year 3**Training courses****Compulsory (not examined):**

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses**Compulsory (not examined):**

GY500 Research Project Seminar (0.0)

Year 4**Training courses****Optional (not examined):**

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses**Optional (not examined):**

GY500 Research Project Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements:

Once on the MPhil/PhD programme students will go through a First Year Progress Review, taking place in the Summer Term of the first year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year.

Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year (third year of the 1+3 programme) is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration.

The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. Students are asked to discuss their research paper/thesis outline during an Upgrade Meeting in front of an Upgrading Committee normally formed by main supervisor, review supervisor and a third member of staff with relevant expertise. The material is evaluated by the Upgrading Committee, who will

recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the Director of Postgraduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in Economic History

Programme Code: RPEH

Department: Economic History

For students starting this programme of study in 2020/21 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (examined):

Unless already taken as part of the master's degree:

- EH401 Historical Analysis of Economic Change (0.5)
 - EH402 Quantitative Analysis in Economic History I (0.5)
 - EH520 Approaches to Economic and Social History (0.0)
- And, where appropriate, a pre-sessional statistics course.

Optional (not examined):

Supervisors may require students in their first or subsequent years of study to take other relevant economic history courses, methodological courses provided by the Department of Methodology or the Institute of Historical Research or skills training courses as required for their thesis topic.

Transferable skills courses

Compulsory (not examined):

- EH590 Thesis Workshop in Economic History (0.0)

Year 2

Training courses

Compulsory (not examined):

- EH590 Thesis Workshop in Economic History (0.0)

Year 3

Training courses

Compulsory (not examined):

- EH590 Thesis Workshop in Economic History (0.0)

Year 4

Training courses

Compulsory (not examined):

- EH590 Thesis Workshop in Economic History (0.0)

Progression and upgrade requirements

During the Summer Term students are required to submit at least one draft thesis chapter and a 3-5 page thesis outline to the department's Graduate Review Committee. Students taking one or more MSc examination may, with the support of their supervisor, apply to defer their submission of work to no later than the start of the 7th week of the Summer Term. The Committee will interview all students during the Summer Term, and re-registration for a second year will be conditional on the work presented being of a satisfactory standard. All students are expected to gain broad knowledge of the subject from graduate level course work in their first year and active participation in workshops, seminars and

conferences to complement the expertise gained from intense thesis research.

By the Summer Term of the second year the Graduate Review Committee will normally expect to see about half the thesis in draft. The Committee will interview students, and if the submitted work is of an acceptable standard, students will be upgraded from MPhil to PhD. Students may defer the upgrade decision until their third year for fieldwork or other reasons, but only with the support of their supervisor.

MPhil/PhD in Environmental Economics

Programme Code: RPENEC

Department: Geography & Environment

For students starting this programme of study in 2020/21 In addition to progressing with their research, students are expected to take the courses listed below to the value of 2 examined units. Students may take courses other than those listed, but must discuss this with their supervisor and seek the agreement of the Programme Director.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (not examined):

- GY502 Staff / Research Students Seminars (0.0)

Compulsory (examined):

3 units in total:

1. EC411 Microeconomics (1.0) #

Students must also take the following introductory course:

- EC400 Introductory Course in Mathematics and Statistics (0.0) #

2. GY426 Environmental and Resource Economics (1.0) #

Note: students who have graduated from the MSc in Environmental Economics and Climate Change cannot repeat courses taken as part of their master's programme and therefore cannot take GY426. These students may take an alternative course but must discuss this with their supervisor.

3. Advanced research methods courses(s) to the value of 1.0 unit.

Typical course choices include:

- GY428 Applied Quantitative Methods (0.5) #A
- GY526 Advanced Methods in Environmental and Resource Economics: Time, Risk and Environmental Policy (0.5) # (not available 2020/21)

- EC402 Econometrics (1.0) #

- EC426 Public Economics (1.0) #

- MY555 Multivariate Analysis and Measurement (0.5) #

- MY556 Survey Methodology (0.5) #

- MY557 Causal Inference for Observational and Experimental Studies (0.5) #

- MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #

Students may also audit the following course:

- GY520 Environmental Regulation: Implementing Policy (1.0)

Students may take courses other than those listed, but must discuss this with their supervisor and seek the agreement of the Programme Director.

Transferable skills courses

Compulsory (not examined):

- GY500 Research Project Seminar (0.0)

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2

Training courses

Progression and Upgrade requirements

Once on the MPhil/PhD programme, students will go through a First Year Progress Review taking place in the Summer Term of their first year. For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and justification for the research; aims and objectives/ research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a

chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrade committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's main supervisor, review supervisor and a third member of staff with relevant expertise. The committee will recommend transfer to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the Director of Post-Graduate Studies Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in European Studies

Programme Code: RPEU

Department: European Institute

For students starting this programme of study in 2020/21 In addition to progressing with their research, students are expected to take the listed research training and transferable skills courses. Students may take courses in addition to those listed and should discuss this with their supervisor. For a complete list of courses please refer to the Handbook for Research Degree Students.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (not examined):

EU550 Research Workshop in European Studies (0.0)

Optional (examined):

MY552 Applied Regression Analysis (0.5) #

Further training courses provided by the Department of Methodology and agreed with their supervisors.

Transferable skills courses

Optional (not examined):

EU455 Concepts in Political Economy (0.5)

Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute.

Year 2

Training courses

Compulsory (not examined):

EU550 Research Workshop in European Studies (0.0)

Students expected to take relevant course(s) in the Department of Methodology or in other departments as agreed with their supervisors.

Optional (not examined):

It is highly recommended that students with research interests in political economy attend and present their work in the following interdepartmental research seminar:

EU555 Political Economy and Public Policy Workshop (0.0) (not available 2020/21)

Transferable skills courses

Optional (not examined):

EU455 Concepts in Political Economy (0.5)

Year 3

Training courses

Compulsory (not examined):

EU550 Research Workshop in European Studies (0.0)

Optional (not examined):

If not taken in Year 2, the following relevant research seminar:

EU555 Political Economy and Public Policy Workshop (0.0) (not available 2020/21)

GV517 Comparative Political Economy: New Approaches and Issues in CPE (0.5) #

GV555 Political Economy and Public Policy Workshop (0.0) (withdrawn 2020/21)

IR555 International Political Economy Research Workshop (0.0)

Transferable skills courses

Optional (not examined):

EU455 Concepts in Political Economy (0.5)

Year 4

Transferable skills courses

Optional (not examined):

EU550 Research Workshop in European Studies (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Upgrading to PhD/Targets for Progress

Year 1 - For a standard thesis: a research proposal (approximately 2,500 words) and abstract of the whole thesis (one page); a sample chapter (approximately 8,000 words); a chapter synopsis, and a timetable for completion. For a thesis as a series of publishable papers: a research proposal (approximately 2,500 words) and an abstract covering the three prospective papers; a full draft of the introduction or a full draft of one of the papers (approximately 8,000 words); and a timetable for completion.

Year 2 - For a standard thesis: at least two further substantive chapters (of approximately 5,000-7,000 words each). For a thesis as a series of publishable papers: at least one fully written paper (approximately 10,000 words); and outlines of the other two papers (approximately 2,000 words).

Year 3 - For a standard thesis: a full draft of all core chapters and agreed timetable for completion. For a thesis as a series of publishable papers: full drafts of all three papers and agreed timetable for completion of the thesis.

MPhil/PhD in Gender

Programme Code: RPGE

Department: Gender Studies

For students starting this programme of study in 2020/21

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (examined):

Upgrade (first year programme)

Compulsory (not examined):

Lectures only:

GI424 Gender Theories: An Interdisciplinary Approach (0.5)

Lectures, seminars and workshops:

GI402 Gender, Knowledge and Research Practice (0.5)

Optional (not examined):

GI499 Dissertation - Independent Research Project (1.0)

Quantitative and/or qualitative training courses provided in the Department of Methodology, as agreed with supervisor.

Audit any course from the Department of Gender Studies menu:

GI403 Gender and Media Representation (0.5)

GI407 Globalisation, Gender and Development (1.0)

GI409 Gender, Globalisation and Development: An Introduction (0.5)

GI410 Screening the Present: contemporary cinema and cultural critique (0.5) # (not available 2020/21)

GI411 Gender, Post/coloniality and Development: Critical Perspectives and New Directions (0.5) #

GI413 Gender, 'Race' and Militarisation (0.5)

GI499 Dissertation - Independent Research Project (1.0)

GV4H3 Feminist Political Theory (0.5)

Audit of relevant courses on other master's programmes with agreement of the supervisor

Transferable skills courses**Compulsory (not examined):**

GI500 Doctoral Workshop: Department of Gender Studies (0.0)

Relevant courses provided by the Library, Teaching and Learning Centre and Department of Methodology.

Year 2**Training courses****Optional (students should agree with their supervisor whether the courses taken will also be examined):**

Quantitative and/or qualitative training courses provided in the Department of Methodology as agreed with supervisor.

Audit any course from the Department of Gender Studies menu as above.

Audit of relevant courses on other master's programmes with agreement of the supervisor.

Transferable skills courses**Compulsory (not examined):**

GI500 Doctoral Workshop: Department of Gender Studies (0.0)

Year 3**Training courses****Optional (students should agree with their supervisor whether the courses taken will also be examined):**

Quantitative and/or qualitative training courses provided in the Department of Methodology and/or Department of Gender Studies as agreed with supervisor.

Audit any course from the Department of Gender Studies menu as above.

Audit of relevant courses on other master's programmes with agreement of the supervisor.

Transferable skills courses**Compulsory (not examined):**

GI500 Doctoral Workshop: Department of Gender Studies (0.0)

Year 4**Training courses****Optional (examined/not examined):**

Quantitative and/or qualitative training courses provided in the Department of Methodology, as agreed with supervisor.

Audit any course from the Department of Gender Studies menu as above.

Audit of relevant courses on other master's programmes with agreement of the supervisor.

Transferable skills courses**Compulsory (not examined):**

GI500 Doctoral Workshop: Department of Gender Studies (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

In the first year students will go through their Upgrade Viva. This is held in the summer term and materials should be submitted by the given date in the handbook. Students submit a draft chapter and a research proposal for consideration by a panel of their supervisor and advisor (and one other person with appropriate expertise). The research proposal follows:

- a draft chapter of up to 10,000 words, normally a literature review which situates the research and intended contribution in the relevant literature;
- a research design document of 4-5 pages outlining the research rationale, research question and objectives, and the ethical, epistemological and methodological issues relevant to the research;
- a 2 page chapter outline of the thesis with an indication of chapter contents;
- a timeline for completion.

The nature of the chapter should be agreed with the supervisor.

Both parts of the assessment focus on the student's own research and draw on material and debates engaged in GI424 and GI402 where relevant. Students must the viva before progressing to their second year. If unsuccessful at first sit, students have the opportunity to retake once more at the end of September. Part-time student submissions are calculated pro-rata for Upgrading.

Expectations for successful Upgrading:

- GI402 participation;
- MSc core course GI424 attendance;
- GI500 training seminars participation;
- additional relevant course(s) attendance;
- regular supervision meetings participation;
- Events: Research Seminars, Public Lectures, Third Year Presentations attendance.

Having successfully Upgraded, all students will have an annual review with their supervisor and advisor to ensure satisfactory progress.

MPhil/PhD in Health Policy and Health Economics

Programme Code: RPHPHE

Department: Health Policy

For students starting this programme of study in 2020/21

In addition to progressing with their research, students are expected to take training, research methodology, and transferable skills courses.

Paper Course number, title (unit value)**Year 1****Training courses****Compulsory (examined):**

HP500 Advanced Health Policy and Health Economics (1.0)

Optional (examined):

Students are expected to take two relevant half-unit courses, as agreed with their Supervisors, within Year 1 and Year 2 of the programme. The options include those listed below:

Graduate-level courses offered by the Department of Health Policy

OR

MY405 Research Design for Policy and Programme Evaluation (0.5)

MY500 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY551 Introduction to Quantitative Analysis (0.5)

MY552 Applied Regression Analysis (0.5) #

MY565 Intermediate Quantitative Analysis (0.5) #

ST501 Multilevel Modelling (0.5) #

ST542 Longitudinal Data Analysis (0.5) # (not available 2020/21)

OR

Where regulations permit and subject to Supervisor and Doctoral Programme Director approval, students may take courses instead

of those listed above.

Year 2

Training courses

Optional (examined):

Students are expected to take two relevant half-unit courses, as agreed with their Supervisors, within Year 1 and Year 2 of the programme. The options include those listed below:

Graduate-level courses offered by the Department of Health Policy

OR

MY405 Research Design for Policy and Programme Evaluation (0.5)

MY500 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY551 Introduction to Quantitative Analysis (0.5) #

MY552 Applied Regression Analysis (0.5) #

MY565 Intermediate Quantitative Analysis (0.5) #

ST501 Multilevel Modelling (0.5) #

ST542 Longitudinal Data Analysis (0.5) # (not available 2020/21)

OR

Where regulations permit and subject to Supervisor and Doctoral Programme Director approval, students may take courses instead of those listed above.

Compulsory (not examined):

HP500 Advanced Health Policy and Health Economics (1.0)

Optional (examined / not examined):

Audit of relevant courses from those offered in the Department of Health Policy, as agreed with Supervisors.

Audit of relevant courses on other MSc programmes, where regulations permit and as agreed with Supervisors.

Year 3

Training courses

Compulsory (not examined):

HP500 Advanced Health Policy and Health Economics (1.0)

Transferable skills courses

Optional (not examined):

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Departmental and research seminar series

Training offered by the PhD Academy, Teaching and Learning Centre, and LSE LIFE.

Year 4

Training courses

Compulsory (not examined):

HP500 Advanced Health Policy and Health Economics (1.0)

Optional (examined/not examined):

Audit of relevant courses from those offered in the Department of Health Policy, as agreed with Supervisors.

Audit of relevant courses on other MSc programmes, where regulations permit and as agreed with Supervisors.

Transferable skills courses

Optional (not examined):

Departmental and research seminar series

Training offered by the PhD Academy, Teaching and Learning Centre, and LSE LIFE.

means there may be prerequisites for this course. Please view the course guide for more information.

The Department encourages students throughout their PhD programme to attend, and where appropriate, present at conferences in relation to their particular research topic.

Progression rules

Students are initially registered as MPhil, and will be able to upgrade to PhD registration following their first year of full-time enrolment, subject to successful completion of the Major Review. Progress is assessed by the student's Supervisors in consultation with the Doctoral Programme Director.

In the ST of every academic year, the progress of each student registered in the Department is discussed with the Supervisory

Panel. The Panel decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by Supervisors may be required, or a recommendation may be made that the student not be allowed to re-register.

Upgrade requirements

Each student is required to undergo Major Review (also known as Upgrade) at the end of their first year of full-time study. In order to earn the Upgrade, the candidate –

(1) Must have attended a minimum of 80% of the compulsory course in Advanced Health Policy and Health Economics (based on their time at LSE);

(2) Must have submitted a 5,000-word thesis proposal including a research question, literature review, description of methodology, plans for data collection, and a timetable through to completion.

Where relevant, there will be assessment of any ethics review required for the student's research undertaken in accordance with the School's research ethics policies.

Candidates are subject to a viva voce and marking of their thesis proposal by two non-supervisory members of the Department, where students will be required to earn a minimum grade of 60%.

Following Major Review, a decision is taken whether to upgrade the student from MPhil to the PhD programme.

Targets for progress

For students who successfully upgrade to PhD enrolment there will be another review in the second and third years of full-time study.

Progression will be conditional upon fulfilling the requirements agreed and approved by the Supervisors and the Doctoral Programme Director.

Year 2

Progression to Year 3 will be conditional upon students having achieved a pass (50%) in both the two taught courses, taken within their first two years of FT registration;

For a thesis as a monograph: submission of a thesis document, including an abstract of the whole thesis, a chapter synopsis, and a substantive first chapter (approx. 10,000 words), and an updated timetable through to completion.

For a thesis as a series of publishable papers: submission of an abstract for each of the three prospective papers, a full draft of the introduction or a full draft of one of the papers (approx. 10,000 words), and an updated timetable through to completion.

Year 3

For a thesis as a monograph: submission of full draft with all core chapters, and agreed timetable through to completion of the thesis.

For a thesis as a series of publishable papers: full drafts of all three papers and agreed timetable for the completion of the thesis.

Teaching opportunities

The Department employs Graduate Teaching Assistants (GTAs) to teach and lead seminars on a number of postgraduate courses. First-year MPhil/PhD students are normally not permitted to teach. Research students are encouraged to undertake some teaching following successful Major Review. Students who undertake teaching are offered the opportunity to pursue a Postgraduate Certificate in Higher Education.

MPhil/PhD in Human Geography and Urban Studies

Programme Code: RPHUGY

Department: Geography & Environment

For students starting this programme of study in 2020/21

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**
Year 1

Training courses**Compulsory (not examined):**

GY502 Staff / Research Students Seminars (0.0)

Compulsory (examined):

1. The following core course:

GY403 Contemporary Debates in Human Geography (0.5)

Note: Students who have graduated from MSc Human in Geography and Urban Studies cannot repeat courses taken as part of their master's programme. In order to fulfil their obligation to sit for one full unit of subject-specific training, students who have already taken GY403 must instead take courses to the value of one unit from the list of options on the relevant MSc degrees.

2. Course(s) to the value of a half unit from the list of options available on MSc in Human Geography and Urban Studies (Research).

3. Relevant advanced qualitative research methods course(s) to the value of 1.0 unit from the following:

MY500 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY526 Doing Ethnography (0.5) # (not available 2020/21)

MY527 Qualitative Research with Digital and Visual Data (0.5) # (not available 2020/21)

Transferable skills courses**Compulsory (not examined):**

GY500 Research Project Seminar (0.0)

And

Workshop in Information Literacy: finding, managing and organising published research and data

And

GY503 Writing the World (0.0)

Year 2**Training courses****Compulsory (not examined):**

GY503 Writing the World (0.0)

Year 3**Training courses****Compulsory (not examined):**

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses**Compulsory (not examined):**

GY500 Research Project Seminar (0.0)

GY503 Writing the World (0.0)

Year 4**Training courses****Optional (not examined):**

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses**Compulsory (not examined):**

GY500 Research Project Seminar (0.0)

GY503 Writing the World (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and Upgrade requirements

Once on the MPhil/PhD programme, students will go through a First Year Progress Review taking place in the Summer Term of their first research year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/ research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the

student and the supervisor(s) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress to the second year. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrading committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's supervisors and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the Director of Post-Graduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in International History**Programme Code:** RPIH**Department:** International History

For students starting this programme of study in 2020/21

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)**Year 1****Training courses****Compulsory (not examined):**

HY501 International History Research Student Workshop (0.0)

Year 2**Training courses****Optional (not examined):**

HY509 International History Research Seminar (0.0) #

HY510 Cold War History Research Seminar (0.0)

Year 3**Training courses****Optional (not examined):**

HY509 International History Research Seminar (0.0) #

HY510 Cold War History Research Seminar (0.0)

Year 4**Training courses****Optional (not examined):**

HY509 International History Research Seminar (0.0) #

HY510 Cold War History Research Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

On being admitted, all students are formally registered for an MPhil. By 13 June (Week 8 Summer Term) of their first year (1 March of their second year for part-time students) they are required to submit three hardcopies of their dossier containing (1) the provisional title of their thesis, together with the provisional titles of their chapters; (2) a bibliography, setting out as comprehensively as possible the primary published and unpublished sources they intend to use, along with the books, articles, unpublished theses and other sources they will consult; (3) an historiographical essay, evaluating the contributions of other scholars to their subject, and indicating clearly how their own thesis will contribute to it; and (4) a draft chapter of approximately 10,000 words based largely upon primary sources. The dossier will be read by three members of the Department, and students will be required to undergo a 20-30 minute viva. After the viva you will be informed of the outcome and will receive a joint report from the panel. If the Committee deems the dossier/viva satisfactory, the Department will recommend the student for transfer of registration from MPhil to PhD status. If it is less than satisfactory it will be examined by the Committee who will determine whether the student should be allowed to resubmit revised upgrade materials, which may be permitted once. The review and viva process is designed to determine whether the student is likely to meet the requirements of a PhD, and whether the chosen topic is suitable for a doctoral dissertation.

MPhil/PhD in International Relations

Programme Code: RPIR

Department: International Relations

For students starting this programme of study in 2020/21 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (not examined):

IR501 Methods in International Relations Research (0.0)

Compulsory (not examined)

Research Cluster Workshops

You are expected to attend one of the following International Relations Research Cluster Workshops:

IR502 International Relations Theory Research Workshop (0.0)

IR504 Security and Statecraft Research Workshop (0.0)

IR507 International Institutions, Law and Ethics Research Workshop (0.0)

IR555 International Political Economy Research Workshop (0.0)

Transferable skills courses

Workshop in information Literacy: finding, managing and organising published research and data (Year One)

Year 2

Training courses

Compulsory (not examined)

Research Cluster Workshops

You are expected to attend one of the following International Relations Research Cluster Workshops: A

IR502 International Relations Theory Research Workshop (0.0)

IR504 Security and Statecraft Research Workshop (0.0)

IR507 International Institutions, Law and Ethics Research Workshop (0.0)

IR555 International Political Economy Research Workshop (0.0)

Year 3

Research Cluster Workshop

Compulsory (not examined)

Research Cluster Workshops

You are expected to attend one of the following International

Relations Research Cluster Workshops:

Courses to the value of 0.0 unit(s) from the following:

IR502 International Relations Theory Research Workshop (0.0)

IR504 Security and Statecraft Research Workshop (0.0)

IR507 International Institutions, Law and Ethics Research Workshop (0.0)

IR555 International Political Economy Research Workshop (0.0)

Year 4

Research Cluster Workshop

Compulsory (not examined)

Research Cluster Workshops

You are expected to attend one of the following International Relations Research Cluster Workshops:

IR502 International Relations Theory Research Workshop (0.0)

IR504 Security and Statecraft Research Workshop (0.0)

IR507 International Institutions, Law and Ethics Research Workshop (0.0)

IR555 International Political Economy Research Workshop (0.0)

Optional (examined/not examined):

Relevant courses provided by the Library, the Eden Centre, and the Methodology Department and agreed with supervisor, which can include:

DV560 Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference (0.5)

MY500 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY530 Advanced Qualitative Research Workshops (0.0) #

MY551 Introduction to Quantitative Analysis (0.5)

MY552 Applied Regression Analysis (0.5) #

MY555 Multivariate Analysis and Measurement (0.5) #

MY591 Computing Packages for Applied Analysis (0.0) (withdrawn 2020/21)

Footnotes

A: At the end of your second year, you will need to satisfy certain requirements and if you meet these, will be retroactively upgraded to PhD status.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

All MPhil/PhD students at LSE are initially registered with MPhil status. Continued re-registration and upgrade are dependent on satisfactory progress being made.

Progress will be reviewed annually by a Research Panel made up of members of academic staff other than the supervisor. Students are normally upgraded to PhD status by the end of the second year.

By the end of your first year you will be required to submit a statement of research including a research outline and one draft chapter of no more than 10,000 words. The proposal, which should illustrate your command of the theoretical and empirical literature related to your topic, will be a clear statement of the theoretical and methodological approach you will take. This should demonstrate the coherence and feasibility of the proposed research and thesis. The submission will also include a timetable to completion, which should identify any periods of fieldwork necessary to your research.

For the second Panel, which will decide on the question of upgrading from MPhil to PhD, you will be expected to submit two additional draft chapters. The two chapters should be substantially new work, but may include revised material from year one. If you have not made sufficient progress to be converted from MPhil to PhD registration by the end of your second year, you will normally have re-registration made conditional on further progress (details to be decided by the Panel) or may, exceptionally, not be authorised to re-register.

Students in their third year of registration will be required to submit an annual progress report including a timetable to completion clearly setting out the work completed and remaining on the student's research. These will need to be approved by the supervisor and reviewed by the DPD.

MPhil/PhD in Law

Programme Code: RPLL

Department: Law

For students starting this programme of study in 2020/21
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory:

1. The following core course:
LL500 Doctoral Research Seminar series (0.0)
2. PhD seminar series:
Staff seminar series
3. One other relevant course offered by any department or other unit within the School

Year 2

Training courses

Optional (not examined):

- LL500 Doctoral Research Seminar series (0.0)
PhD Seminar Series
Staff Seminar Series

Year 3

Training courses

Optional (not examined):

- LL500 Doctoral Research Seminar series (0.0)
PhD Seminar Series (compulsory for Year three students - not examined)
Staff Seminar Series

Year 4

Transferable skills courses

Optional (not examined):

- LL500 Doctoral Research Seminar series (0.0)
PhD Seminar Series
Staff Seminar Series

Progression and upgrade requirements

Upgrade to PhD takes place at the end of the first year, progression being conditional on submission of a satisfactory statement of the research question and a satisfactory sample chapter towards the end of the Summer Term.

MPhil/PhD in Law (Socio-Legal Theory)

Programme Code: RPLL SL

Department: Law

For students starting this programme of study in 2020/21
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

(This programme is not available in 2020/21)

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory:

1. The following core course:
LL500 Doctoral Research Seminar series (0.0)
2. The following core course:
LL4L5 Socio-legal Theory and Practice (0.5) (not available 2020/21)
3. Law Department lunchtime seminar series
4. One relevant course selected from those offered by the Department for Methodology

Year 2

Training courses

Compulsory (not examined):

1. The following core course:
LL500 Doctoral Research Seminar series (0.0)
- 2.

Qualitative methods workshops

Optional (not examined):

Staff Seminar Series and PhD Seminar Series

Year 3

Training courses

Compulsory (not examined):

1. The following core course:
LL500 Doctoral Research Seminar series (0.0)

Optional (not examined):

Staff Seminar Series and PhD Seminar Series

Year 4

Transferable skills courses

Compulsory (not examined):

1. The following core course:
LL500 Doctoral Research Seminar series (0.0)

Optional (not examined):

Staff Seminar Series

Progression and upgrade requirements

Upgrade to PhD takes place at the end of the first year, progression being conditional on submission of a satisfactory statement of the research question and a satisfactory sample chapter towards the end of the Summer Term.

MPhil/PhD in Management - Information Systems and Innovation

Programme Code: RPMGIS

Department: Management

For students starting this programme of study in 2020/21

Paper Course number, title (unit value)

Year 1

Transferable skills course

Compulsory (not examined)

- MG500 Information Systems PhD Seminar Series and Workshops (0.0)

Research Practicums

Throughout the first year students will be required to participate in Research Practicums where they are assigned to a member of Faculty to jointly explore research collaborations.

Training Course

Compulsory (not examined)

- MG5A1 A Social Sciences Perspective of Academic Research in Management (0.0)
- Paper 1 MG522 Research Traditions and Paradigms in IS and Organisations (1.0)
- Paper 2 MY551 Introduction to Quantitative Analysis (0.5) **and** MY521 Qualitative Research Methods (0.5)
- Paper 3 MG509 Managing Digital Platform Innovation (0.5)
Plus courses to the value of 0.5 unit(s) from the following options:
MY526 Doing Ethnography (0.5) # (not available 2020/21)
MY527 Qualitative Research with Digital and Visual Data (0.5) # (not available 2020/21)
MY528 Qualitative Text and Discourse Analysis (0.5) #
MY530 Advanced Qualitative Research Workshops (0.0) #
MY552 Applied Regression Analysis (0.5) #
MY555 Multivariate Analysis and Measurement (0.5) #
MY561 Social Network Analysis (0.5)
- Paper 4 MG599 Research Paper in Management (1.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

All students are expected to gain broad knowledge of the subject from graduate level course work in their first year and active participation in workshops, seminars and conferences to complement the expertise gained from intense thesis research. In the Summer term of each year the progress of each student is discussed at the MPhil/PhD Board, which is a general meeting of all ISI research student supervisors, the ISI PhD Programme Director, and the ISI Faculty Group Lead. Students who are deemed not to have made satisfactory progress will either be refused permission to re-register or will be required to produce written work over the summer as a condition for re-registration in the autumn. Student supervisors will attend the MPhil/PhD Board and provide reports on progress.

End of Year 1: Re-registration for the following year if approved by the PhD programme director.

Year 2: Michaelmas Term by Week 6: Students submit their Research Proposal* for upgrade to PhD. The Research Proposal for upgrade to PhD includes: 1) the research question(s); 2) a concise literature review through which the significance of the proposed research is articulated; 3) a discussion of research methodology; 4) preliminary data collection and analysis or a 'pilot' study; and 5) discussion of research ethics and risks.

Year 2: Michaelmas Term by Week 11: The Upgrade Panel, which for each student will consist of two ISI faculty and the student's two supervisors, will interview students. If the submitted work is of an acceptable standard, students will be upgraded from MPhil to PhD. Should the submitted work fall short of an acceptable standard, then the Upgrade Panel can decide either to ask for further work to be submitted no later than at the end of the Lent Term, or that the student should not be allowed to continue the studies.

By the end of Year 2: Students must have progressed to PhD registration to continue their studies.

All progression and upgrade decisions must be approved at the next appropriate Departmental PhD Committee meeting.

Year 3: Lent Term by Week 6: Students who have upgraded to PhD must have submitted their Progression Package: a) two draft chapters (an introduction and a substantive chapter) totalling no more than 20,000 words; b) a thesis outline; c) a timeline for completion and d) a bibliography. The material is then assessed in a viva voce by the PhD panel consisting of two assessors from the ISI Faculty Group, the PhD supervisors, the PhD Programme Director, and the Faculty Group Lead.

End of Year 3: Re-registration for the final year 4 will be based on satisfactory progress reports and research activity and approved by the Programme Director in close consultation with Supervisors and with the approval of the PhD committee.

Progression to PhD registration

For PhD registration students are required to achieve marks of 60% in 4 units/papers with no failed papers. Students achieve 50-59 in half a unit (1 classification mark) can only progress if approved by the PhD Programme Director, and will be required to resit. Resits should be taken at the next available opportunity. Any exceptions to this are unlikely to be allowed and can only be approved by the PhD committee.

The final decision to recommend a student upgraded from MPhil to PhD is taken by the Department's PhD Committee at their next appropriate meeting.

Students who have not made sufficient progress to be converted from MPhil to PhD registration by the end of their second year will normally have re-registration made conditional on further progress (details to be decided by the PhD Committee) or will be prohibited from re-registering.

Programme Structure - PhD

Students should aim to have a complete first draft of their thesis in years three to four and allow three to six months for revision and submission. The submission of the Third Year Progression Package by Week 6 of the Lent Term in the 3rd Year is an important step to achieving this demanding time frame. Students

will meet regularly with their Supervisor(s) each term throughout the programme. They are expected to focus on the research and writing of their thesis, the continued development of research ideas for publication, participation in relevant training courses and career development activities.

Award of the PhD

The PhD is awarded according to the rules of LSE.

MPhil/PhD in Mathematics

Programme Code: RPMA

Department: Mathematics

For students starting this programme of study in 2020/21

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (not examined):

Courses designed for research students in Mathematics, chosen in consultation with their lead supervisor. Discrete Mathematics and Algorithms and Game Theory students will attend four courses organised by the London Taught Course Centre (www.ltcc.ac.uk), but there are separate arrangements for students in Financial Mathematics, where courses are provided by the London Graduate School in Mathematical Finance (www.londonmathfinance.org.uk). Students also have the option of attending or auditing LSE Taught Masters modules, where appropriate.

Transferable skills courses

Compulsory (not examined):

MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)

MA501 Research Student Seminar (0.0)

Optional (not examined):

MA422 Research Topics in Financial Mathematics (0.0) (not available 2020/21)

Year 2

Training courses

Optional (not examined):

Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance.

Transferable skills courses

Compulsory (not examined):

MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)

MA501 Research Student Seminar (0.0)

Optional (not examined):

MA422 Research Topics in Financial Mathematics (0.0) (not available 2020/21)

Year 3

Training courses

Optional (not examined):

Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance.

Transferable skills courses

Compulsory (not examined):

MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)

MA501 Research Student Seminar (0.0)

Optional (not examined):

MA422 Research Topics in Financial Mathematics (0.0) (not available 2020/21)

Year 4**Training courses****Optional (not examined):**

Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance.

Transferable skills courses**Compulsory (not examined):**

MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)

MA501 Research Student Seminar (0.0)

Optional (not examined):

MA422 Research Topics in Financial Mathematics (0.0) (not available 2020/21)

Teaching opportunities:

All students are offered the opportunity to teach for the department, subject to a successful interview and language requirements.

Progression and upgrade requirements

Students are initially registered for the MPhil, and will be able to upgrade to PhD registration during their second year, dependent on satisfactory progress. Progress is assessed regularly by the student's supervisors, in consultation with the Doctoral Programme Director, on the basis of the extent to which the agreed research goals have been achieved. Any upgrade is dependent on the successful completion of a Major Review, the date of which is determined by the Doctoral Programme Director in consultation with the lead supervisor.

MPhil/PhD in Media and Communications

Programme Code: RPME

Department: Media & Communications

For students starting this programme of study in 2020/21

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)**Year 1****Training courses****Compulsory (examined):**

MC408 Theories and Concepts in Media and Communications (0.5) **and** MC418 Communication: Cultures and Approaches (0.5) A

And

One of the following full-unit courses:

MC5M2 Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (1.0)

Or for students who already have a grounding in quantitative methods:

MC5M8 Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (1.0) B

Optional (examined/not examined):

Other graduate courses relevant to research subject and agreed with supervisor.

Transferable skills courses**Compulsory (not examined):**

MC500 Research Seminar for Media, Communications & Culture (0.0)

Optional (not examined):

LN988 Thesis Writing (0.0) #

Modern Foreign Language courses offered by the Language Centre.

Other graduate seminars of relevance to research subject.

Presentation requirements:

At least one presentation annually at the following:

MC500 Research Seminar for Media, Communications & Culture (0.0)

Year 2**Training courses****Optional (examined/ not examined):**

Students can take either another qualitative or quantitative analysis course offered by the Department of Methodology. Courses must be approved by the supervisor and discussed with the MC5M2/MC5M8 convenor.

Transferable skills courses**Compulsory (not examined):**

MC500 Research Seminar for Media, Communications & Culture (0.0)

Annual Joint PhD Symposium for Second Years and above, at Goldsmiths, Westminster and City.

Optional (not examined):

Other graduate seminars of relevance to research subject.

Year 3**Transferable skills courses****Optional (not examined):**

MC501 Advanced Doctoral Workshop in Media and Communications (0.0) #

Year 4**Transferable skills courses****Optional (not examined):**

MC501 Advanced Doctoral Workshop in Media and Communications (0.0) #

Research Students are expected to complete their research.

Footnotes

A: For students without the appropriate background.

B: Students wishing to select this option must seek approval from the Programme Director. Approval is subject to timetabling constraints.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

Students will be required to submit a full Thesis Proposal of 10,000 words to their Thesis Committee by week 5 of Summer Term in their first year (part-time students can submit their Proposal by 1 March in their second year). This paper will include a substantive statement of the aims, theories and methods proposed for the thesis, a tentative chapter outline, an indicative bibliography and a timetable for its completion. Together with any examination/s for quantitative methodological courses, the thesis proposal will form part of the evaluation process, and, together with an upgrade viva, will determine whether students are permitted to upgrade from MPhil to PhD and continue into their second year.

In the Summer term of each year the progress of each student registered in the Department is assessed and a decision made as to whether students can proceed to the next academic session. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register.

MPhil/PhD in Philosophy

Programme Code: RPPH

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2020/21

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor. All programmes of study should be agreed with the supervisor at the start of the year.

Paper Course number, title (unit value)**Year 1****Training courses****Compulsory (examined/ not examined):**

PH501 Philosophical Problems Seminar (0.0)

Students who have never taken a paper in formal logic at degree must take the following (examined):

PH502 Reasoning and Logic (1.0)

Students who have already taken a formal logic course should choose one further MSc course not already taken as part of an MSc degree. Students have three options regarding assessment for this course: (i) they can take the examination for the course, (ii) they can choose to write two assessed essays, one at the end of each of the first two terms, or (iii) they can (with the course teacher's approval) choose to write a single, more substantial assessed essay at the end of the second term, producing a first draft of the essay at the end of the first term.

Either

A further MSc course (again one not taken as part of the MSc course) plus one term unit of PhD level seminars. The seminars on offer are:

PH500 Research Methods in Philosophy (0.0)

PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)

PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

If students choose to take a further MSc course, they can either decide to be examined or instead choose to write two assessed essays, one at the end of each of the first two terms. PhD level seminars are not examined and assessment is solely based on essays.

Or

Three term units of PhD level seminars with associated coursework. Taking three term units means that students can either take all three terms of one of these seminars or 'mix and match' by taking different seminars in different terms. Seminars must be taken with associated course work.

Transferable skills courses**Optional (not examined):**

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Year 2**Training courses****Optional (not examined):**

PH500 Research Methods in Philosophy (0.0)

PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)

PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

Optional (examined/not examined):

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Year 3**Training courses****Optional (not examined):**

PH500 Research Methods in Philosophy (0.0)

PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)

PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

Optional (examined/not examined):

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Year 4**Training courses****Optional (not examined):**

PH500 Research Methods in Philosophy (0.0)

PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)

PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

Optional (examined/not examined):

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Progression and upgrade requirements

Successful completion of work required for each year is a necessary condition for re-registration in the following year; and for upgrading from MPhil to PhD status. During the first year students must write a first chapter of the thesis as well as an outline (research plan) of the rest of the thesis. The chapter should be around 40 pages and **needs to be submitted on 1 September**; the research plan should be around 10 pages and needs to be submitted at the end of Summer Term, the exact date to be confirmed at the start of the academic year. This upgrading will normally take place after the successful completion of Year 1 requirements in Case A, and after the successful completion of Year 2 requirements in Case B. In both cases once you are registered for the PhD that registration will be backdated to the start of your MPhil/PhD studies.

MPhil/PhD in Psychological and Behavioural Science

Programme Code: RPPB**Department:** Psychological and Behavioural Science

For students starting this programme of study in 2020/21

The MPhil/PhD programme includes taught courses on both methodology and theory. The precise courses students are required to attend varies and exemptions may apply depending on prior experience and qualifications. These matters should be discussed and agreed with the supervisor in the first formal supervision meeting.

Paper Course number, title (unit value)**Years 1-4**

Training courses Students are asked to complete 10 hours of research training in each year of study, which should be agreed with your supervisor according to your needs. Taught classes can be accessed within the Department of Psychological and Behavioural Science, as well as in departments across LSE including Methodology. Methodology courses available include Qualitative Research Methods, Survey Methodology, Applied Regression Analysis and Multivariate Analysis and Measurement. Training courses are offered through our PhD academy and with affiliate institutions. Access is subject to agreement with the relevant course convenors (e.g. according to space considerations).

Transferable skills courses**Compulsory (not examined):**

PB500 Current Research in Social Psychology (0.0)

Weekly seminars including plenary and specialist sessions in Michaelmas Term, Lent Term and Summer Term.

Progression and upgrade requirements

The first year Extended Essay and the second year Upgrade chapters (see below) are examined by a three-person thesis committee, which includes the student's supervisor, as well as two other academic colleagues.

Targets for progress

Year 1 - Extended Essay of 6,000 words, submitted on first day of Lent Term.

Year 2 - Upgrade viva. Two draft chapters of 10,000 words each (total of 20,000 words), submitted on first day of Lent Term. These chapters form the basis of an oral examination by three person thesis committee usually four to six weeks after submission. Success in this examination results in upgrade from MPhil to PhD status.

Year 3 - Completed first draft by end of three years.

Teaching experience

Graduates will usually gain some teaching experience and have had the opportunity to develop teaching skills.

MPhil/PhD in Regional and Urban Planning Studies

Programme Code: RPRP

Department: Geography & Environment

For students starting this programme of study in 2020/21

In addition to progressing with your research, you are expected to take the courses listed below. You may take courses other to those listed but must discuss this with your supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Compulsory (examined):

1. Courses to the value of one unit from the relevant MSc degrees
2. Relevant subject-specific training courses to the value of 1.0 unit:

GY428	Applied Quantitative Methods (0.5) #
GY460	Techniques of Spatial Economic Analysis (0.5) #
MY500	Fundamentals of Social Science Research Design (0.5)
MY521	Qualitative Research Methods (0.5)
MY526	Doing Ethnography (0.5) # (not available 2020/21)
MY527	Qualitative Research with Digital and Visual Data (0.5) # (not available 2020/21)
MY556	Survey Methodology (0.5) #
MY557	Causal Inference for Observational and Experimental Studies (0.5) #
MY559	Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #

Methods courses: other relevant subject-specific training courses can be chosen subject to supervisor and course manager approval

NOTE: Students who join the PhD programme after having completed an MSc Regional and Urban Planning Studies or another Department of Geography MSc cannot retake the same courses or be waived the one unit of subject-specific training.

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

Year 3

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements:

Once on the MPhil/PhD programme you will go through a First Year Progress Review, taking place in the Summer Term of your first year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/ research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and

either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year (third year of the 1+3 programme) is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. Students are asked to discuss their research paper/thesis outline during an Upgrade Meeting in front of an Upgrading Committee normally formed by main supervisor, review supervisor and a third member of staff with relevant expertise. The material is evaluated by the Upgrading Committee, who will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the the Director of Post-Graduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in Social Policy

Programme Code: RPSA

Department: Social Policy

For students starting this programme of study in 2020/21

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

SP420 Understanding Policy Research (Advanced) (0.5) #

Optional (not examined):

If not already taken previously:

MY400	Fundamentals of Social Science Research Design (0.5)
MY425	Case Studies and Comparative Methods for Qualitative Research (0.5)
MY521	Qualitative Research Methods (0.5)
MY525	Case Studies and Comparative Methods for Qualitative Research (0.5)
MY551	Introduction to Quantitative Analysis (0.5)

Students will discuss with their supervisors any other methodological training that may be relevant for the successful completion of the MPhil/PhD programme.

Transferable skills courses

Compulsory (not examined):

SP501 Research Student Seminar (0.0)

Optional (not examined):

Relevant courses provided by the Library, Teaching and Learning Centre and Department of Methodology.

Year 2**Training courses****Optional (not examined):**

MY552 Applied Regression Analysis (0.5) #

MY555 Multivariate Analysis and Measurement (0.5) #

Transferable skills courses**Optional (not examined):**

SP501 Research Student Seminar (0.0)

Year 3**Transferable skills courses****Optional (not examined):**

SP501 Research Student Seminar (0.0)

Year 4**Transferable skills courses****Optional (not examined):**

SP501 Research Student Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

Each student is required to undertake Major Review in the summer term of their first year (second year for part-time students). For Major Review they must submit a 10,000 word document with a detailed thesis proposal, their research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. They are interviewed on this document by senior staff who make the decision on upgrading.

Each year post-Major Review, every student is expected to submit a 1,000 to 2,000 word progress report, approved by supervisors, to the Doctoral Programme Director(s).

Each pre-Major Review student is expected to make a presentation on their proposed research to the SP501 seminar prior to the submission of their major review document and to address issues raised by the Doctoral Programme Director(s).

MPhil/PhD in Social Research Methods

Programme Code: RPMI

Department: Methodology

For students starting this programme of study in 2020/21 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper	Course number, title (unit value)
Year 1	
Training courses	
Optional (students should agree with their supervisor whether the courses taken will also be examined):	
A selection of:	
MY400	Fundamentals of Social Science Research Design (0.5)
MY425	Case Studies and Comparative Methods for Qualitative Research (0.5)
MY500	Fundamentals of Social Science Research Design (0.5)
MY521	Qualitative Research Methods (0.5)
MY525	Case Studies and Comparative Methods for Qualitative Research (0.5)
MY551	Introduction to Quantitative Analysis (0.5)
MY552	Applied Regression Analysis (0.5) #
MY555	Multivariate Analysis and Measurement (0.5) #
MY556	Survey Methodology (0.5) #
MY557	Causal Inference for Observational and Experimental Studies (0.5) #
MY561	Social Network Analysis (0.5)

MY570 Computer Programming (0.5)

MY572 Data for Data Scientists (0.5)

MY574 Applied Machine Learning for Social Science (0.5) #

A typical selection would be to take MY400, MY521, MY552 and MY555 in the first year, but students may be excused from some or all of them if they have previously taken graduate-level courses covering the same material.

Students who use quantitative methods in their research, are also encouraged to take the following course in their first or second year:

MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #

The courses students take may also include ones from other institutes or departments at LSE, dependent on their needs.

Transferable skills courses**Compulsory (not examined):**

MY599 Department of Methodology Seminar (0.0)

Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute.

Year 2**Transferable skills courses****Compulsory (not examined):**

MY599 Department of Methodology Seminar (0.0)

Year 3**Transferable skills courses****Compulsory (not examined):**

MY599 Department of Methodology Seminar (0.0)

Year 4**Transferable skills courses****Compulsory (not examined):**

MY599 Department of Methodology Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

In the Summer Term of their first year, candidates will produce a 10,000 word 'first year review' that outlines the aims and methods of their thesis: this means summarising the key literature(s), motivating their specific research questions, and highlighting the planned contributions of their work. A first year review document typically includes a general introduction, a comprehensive literature review (covering relevant empirical and theoretical work), a motivation of the research questions and hypotheses, and an indication of the literature(s) that the candidate is seeking to contribute to (i.e. the gaps in knowledge that will be addressed). Candidates will also give an oral presentation of their proposal at the Department of Methodology PhD day.

Written and oral work will be assessed by two academics (not on the supervisory team), normally members of Department of Methodology staff. This work has to reach an acceptable standard to enable them to progress to the second year. It is particularly important that the first year review clearly states the objectives of the doctoral research and indicate how the empirical work will be carried out. If the panel deems the first year review to be not suitably clear, they can choose not to accept the submitted document and give the candidate up to a month to clarify. This decision will be taken maximum one week after the Department of Methodology PhD Day. Examples of unclear work might include (but not be limited to):

- A first year review that does not state clear research questions;
- A first year review that does not adequately review the specific literatures that the empirical work is contributing to;
- A first year review that does not give enough methodological detail, showing how the design will produce data that allows the candidate to address the theoretical issues at stake in a systematic and rigorous way.

After the first year candidates will spend more time on independent study under the guidance of their supervisor(s). This will involve the collection, organization and analysis of data, and writing up the results. During their second year of registration, they will typically

submit three (minimum) draft chapters of their thesis plus a short introduction and a detailed plan for its completion. The three draft chapters will typically include a detailed literature review, specification of research problem(s) and two empirical chapters. If candidates are pursuing a paper-based thesis, their upgrading documents will typically include a short introduction, a literature review and at least two empirical papers. Whether a traditional or paper-based thesis, the material will be evaluated by an upgrading committee (two academics, not necessarily of the Department of Methodology or even the LSE) who will recommend transferral to PhD registration if their work is judged to be of sufficient quality and quantity.

Throughout the MPhil/PhD and PhD, candidates will attend the Institute's research seminar and other specialist workshops and seminars related to their interests. The student must present at every Department of Methodology PhD day.

MPhil/PhD in Sociology

Programme Code: RPSO

Department: Sociology

For students starting this programme of study in 2020/21 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (examined):

SO500 Aims and Methods Research Class for MPhil Students (1.0)

Students may also be asked to attend and pass the assessment for up to one further course unit (or two half units) chosen with their supervisor on the basis of an assessment of their research training needs.

Optional (examined):

MY400 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY551 Introduction to Quantitative Analysis (0.5)

MY552 Applied Regression Analysis (0.5) #

Other courses from Sociology Masters programmes
Specialist research courses:

SO491 Quantitative Social Research Methods (0.5)

SO492 Qualitative Social Research Methods (0.5)

SO511 Research Seminar in Political Sociology (0.0)

SO521 Research Seminar on Cities and Space (0.0) (not available 2020/21)

Transferable skills courses

Optional (not examined):

Methods software training workshop

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2 and/or Year 3

Training courses

Compulsory (not examined):

SO501 Data Analysis Workshop (0.0) A

Footnotes

A: SO501 is required.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements In the Summer term of each year the progress of each student registered in the Department is discussed at the MPhil/PhD Board, which is a general meeting of all research student supervisors. This Board decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is

unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register. The following benchmarks are used by the MPhil/PhD Board to determine if students are progressing appropriately:

By Summer Term Year 1 for Full Time Students: Submission of Formative Essay for SO500, including approvals from the Ethics Committee and Health and Safety

By Summer Term Year 2 for Full Time Students: Upgrade from MPhil to PhD Student

By Summer Term Year 3 for Full Time Students: Successful completion of the Third Year Progression Package

In addition, students are expected to have completed requirements as laid out by the supervisory team. The PhD is an individual project and will require research and writing tailored to that project. Full time students are required to have submitted their Upgrade materials in Week 6 of the Michaelmas Term of Year 2, and to have successfully defended their research design in viva voce by the end of the Michaelmas Term of Year 2. Upon successful completion, the student will upgrade from MPhil to PhD student. All full-time research students are required to have made the transition from MPhil to PhD (upgrading) student within two years of first registration and to have submitted their PhD thesis within four years. Part-time students are expected to be upgraded to PhD student by the end of their third year, and to submit their thesis within eight years.

The decision to upgrade a student from MPhil to PhD is taken by a panel consisting of two academics from the Department. For upgrade, students submit a 10,000 word research proposal that includes: 1) the research question(s); 2) a concise literature review through which the significance of the proposed research is articulated; 3) a discussion of research methodology; 4) preliminary data collection and analysis or a 'pilot' study; and 5) discussion of research ethics and risks. This material is then assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel. A written report is made by the panel on the basis of both the written upgrade submission and the viva.

Students should aim to have a complete a first draft of their thesis in years three to four and allow three to six months for revision and submission. To facilitate this, students are required to submit a Third Year Progression Package no later than Week 6 of the Lent Term in the 3rd Year for full time students. The decision to progress a student from the third to the fourth year is taken by a panel consisting of two academics from the LSE with at least one being from the Sociology Department. Students are to submit: a) two draft chapters (an introduction and a substantive chapter) totalling no more than 20,000 words; b) a thesis outline; c) a timeline for completion and d) a bibliography. This material is then assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel. A written report is made by the panel on the basis of both the written submission and the viva.

MPhil/PhD in Statistics

Programme Code: RPST

Department: Statistics

For students starting this programme of study in 2020/21 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (examined)

ST505 Statistical Modeling and Data Analysis (0.5) #

ST552 Probability and Mathematical Statistics I (0.5)

and one of:

ST510 Foundations of Machine Learning (0.5) #

ST553 Probability and Mathematical Statistics II (0.5) #

Students may take a different course option with the agreement of both the supervisor and PhD Programme Director.

Optional (not examined):

Courses offered by the London Graduate School in Mathematical Finance.

Courses offered by the London Taught Course Centre.

Optional (examined):

Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College.

Transferable skills courses

Compulsory (not examined):

One presentation.

Attendance of departmental seminars appropriate to the student's field of study, e.g. Statistics Seminar Series; Joint Statistics and Econometrics Seminar Series; Joint Risk and Stochastics and Financial Mathematics Seminar Series; Theory of Machine Learning Study Group; Social Statistics Meetings

Optional (not examined):

London Graduate School in Mathematical Finance Seminar Day. Poster Presentations.

The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined):

Courses provided by the Department of Methodology.

Year 2

Training courses

Optional (not examined):

Courses offered by the London Graduate School in Mathematical Finance.

Courses offered by the London Taught Course Centre.

Optional (examined):

Masters or PhD level courses relevant to research and agreed by supervisor in department, the School or University of London College.

Transferable skills courses

Compulsory (not examined)

Two presentations.

Attendance of departmental seminars appropriate to the student's field of study, e.g. Statistics Seminar Series; Joint Statistics and Econometrics Seminar Series; Joint Risk and Stochastics and Financial Mathematics Seminar Series; Theory of Machine Learning Study Group; Social Statistics Meetings

Optional (not examined):

London Graduate School in Mathematical Finance Seminar Day. Poster Presentations.

The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined):

Courses provided by the Department of Methodology.

Year 3

Training courses

Optional (not examined):

Courses offered by the London Graduate School in Mathematical Finance.

Courses offered by the London Taught Course Centre.

Optional (examined):

Masters or PhD level courses relevant to research and agreed by supervisor in department, the School or University of London College.

Transferable skills courses

Compulsory (not examined):

Two presentations.

Attendance of departmental seminars appropriate to the student's field of study, e.g. Statistics Seminar Series; Joint Statistics and Econometrics Seminar Series; Joint Risk and Stochastics

and Financial Mathematics Seminar Series; Theory of Machine Learning Study Group; Social Statistics Meetings

Optional (not examined):

London Graduate School in Mathematical Finance Seminar Day. Poster Presentations.

The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined):

Courses provided by the Department of Methodology.

Year 4

Training courses

Optional (not examined):

Courses offered by the London Graduate School in Mathematical Finance.

Courses offered by the London Taught Course Centre.

Optional (examined):

Masters or PhD level courses relevant to research and agreed by supervisor in department, the School or University of London College.

Transferable skills courses

Compulsory (not examined)

Attendance of departmental seminars appropriate to the student's field of study, e.g. Statistics Seminar Series; Joint Statistics and Econometrics Seminar Series; Joint Risk and Stochastics and Financial Mathematics Seminar Series; Theory of Machine Learning Study Group; Social Statistics Meetings

Optional (not examined):

London Graduate School in Mathematical Finance Seminar Day. Poster Presentations.

The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined):

Courses provided by the Department of Methodology.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

Formal assessment is made towards the end of each Summer Term. This assessment is based on a combination of course evaluation, the evaluation of a preliminary research project, and on statements made by the student and the supervisors in the progress report form. Performance in the compulsory taught courses will contribute to the decision on a student's progression to the next year. Students are also required to complete a supplementary report, providing in more detail an outline of their current research.

The MPhil/PhD Evaluation Committee will meet during the Summer Term in order to oversee the progress of students and to decide on whether to recommend to the School that students be permitted to proceed to the next year of study. The outcome of this progress review may be progression, progression to the next year with conditions, or de-registration from the programme.

The following benchmarks are used by the MPhil/PhD Evaluation Committee to determine if students are progressing appropriately:

- By Summer Term Year 1 (full-time students): Pass compulsory courses and present their research topic at the annual presentation events
- By Summer Term Year 2 (full-time students): Upgrade from MPhil to PhD status and present their research findings at the annual presentation events
- By Summer Term Year 3 (full-time students): Submit a plan for completion and present their research findings at the annual presentation events

In addition, students are expected to have completed requirements as directed by the supervisory team, according to the needs of their individual PhD project.

All full-time students are required to have made the transition from MPhil to PhD status within two years of first registration and to have submitted their PhD within four years.

It is expected that the student is assessed for upgrade within the

first 18 months of registration. The student is required to submit a written report of literature searches, research findings and related work, together with a written research plan. The student presents her/his work to date and findings to a panel (comprised of the first and/or second supervisor and another expert in the field of the research undertaken by the student) and answers questions from the panel. If satisfactory progress has been made, the programme director will recommend that registration be upgraded to PhD status. The department's research committee also monitors the progress of PhD students. Successful completion of all compulsory elements listed under year 1 is required for an upgrade.

Teaching opportunities

The department employs Graduate Teaching Assistants (GTAs) to teach a number of its undergraduate and postgraduate courses. In particular ST102, Elementary Statistical theory, and ST107, Quantitative Methods, are taught to a large number of students across the School and require a significant number of classes. Research students are encouraged to undertake some teaching from year two onwards. First year MPhil/PhD students are normally not permitted to teach, although some marking may be available during the year or for the external degree at the end of the year. A Postgraduate Certificate in Higher Education is offered to those who wish to pursue this.

Research Course guide

AC500

Topics in Accounting Research (AOI)

This information is for the 2020/21 session.

Teacher responsible: Dr Andrea Mennicken KSW 3.09 and Prof Michael Power KSW 3.12

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is an advanced course for doctoral and postdoctoral students focusing on the institutional and organisational context of accounting practices in their broadest sense. The seminars are generally based on key readings at the interface between accounting, organisation studies, regulation and management. Discussions will be focused on the analysis of accounting and calculative practices in context drawing on a wide range of approaches. The course provides students also with training in qualitative methods in accounting research, including document analysis; interviewing techniques and transcript analysis; ethnographic methods in accounting; and theory building from data.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

This year, some or all of this teaching may be delivered using virtual classes as an alternative to face-to-face teaching. There will be a reading week in week 6 of both MT and LT.

Indicative reading: There is no single text for this course and the seminars will be based on pre-distributed readings.

Assessment: First year MRes/PhD students in Accounting (Accounting, Organisations and Institutions Track) will not normally be formally assessed but they will receive formative feedback on written work as agreed with the Course Director.

Second year MRes/PhD students in Accounting (Accounting, Organisations and Institutions Track) are formally assessed by:

- (i) A referee report of a current working paper (25% weighting). This will normally be assigned in week 5 of Lent term to be worked on during the following week (6) when there is no class meeting.
- (ii) A take-home examination (75% weighting). This will cover a selection of key areas/papers studied in AC500 and AC504. It will be designed to be completed within a three-day (72 hour) period in the summer.

In addition, all students participating in the course are expected to present and discuss their own work in progress as well as other published works discussed in this course. Students will receive feedback on their presentations, so that they can develop and improve their presentation skills.

AC501

Topics in Accounting Research (EoA)

This information is for the 2020/21 session.

Teacher responsible: Dr Maria Manuel Correia OLD 3.30, Dr Alexander Nezlobin OLD 3.33, and Dr Aneesh Raghunandan OLD 2.17.

Availability: This course is compulsory on the MRes/PhD in Accounting (Economics of Accounting Track). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is a readings based course dealing with advanced issues in accounting research methods. Its primary focus is to study accounting and financial reporting issues from an economics perspective. While much research studied in the course will be empirical archival in nature, the course also emphasises the importance of theory and research design in developing high quality research. The course covers a wide range of accounting issues including the design of and choices between alternative accounting methods, the use of accounting numbers in economic decision making, assessment of financial reporting

quality, the economic consequences of financial reporting, and the interactions between financial reporting, legal and economic institutions, and corporate governance.

Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT.

This year, some or all of this teaching may be delivered using virtual classes as an alternative to face-to-face teaching.

There will be a reading week in week 6 of both MT and LT.

Assessment: Report (25%) and take-home assessment (75%).

Second year MRes/PhD students in Accounting (Economics of Accounting Track) are formally assessed by:

- (i) A referee report of a current working paper (25% weighting). This will normally be assigned in Week 5 of Lent term to be worked on during the following week (6) when there is no class meeting.
- (ii) A take-home examination (75% weighting). This will cover a selection of key areas/papers studied in AC501 and AC506. It will be designed to be completed within a three-day (72 hour) period in the summer.

First year MRes/PhD students in Accounting (Economics of Accounting Track) will not normally be formally assessed but they will receive feedback in the form of formative assessments. In addition, all students participating in the course are expected to present research papers being studied and will receive feedback on their presentations aimed at developing and improving their presentation skills.

AC502 Half Unit

Foundations of Accounting, Organizations and Institutions

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Power KSW 3.12 and Dr Andrea Mennicken KSW 3.09

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is also offered for students from other MPhil/PhD or MRes/PhD programmes, with the approval and written permission of the PhD in Accounting Programme Director (Accounting, Organisations and Institutions Track).

Course content: The object of the course is to provide students with exposure to advanced analyses of the accounting process within and between organisations, both public and private, and across societies more generally. Students will be required to engage with studies of accounting practices to understand how they are shaped by their institutional contexts, have behavioural consequences and can represent different values. The course will focus on how efforts to design internal and external accounting practices are both a function of specific economic and political interests, but are also shaped by social and political aspirations. The role of accountants and other agents of accounting processes will be addressed.

Overall, the course is intended to cultivate an understanding of the inter-relations between technical, organisational and institutional issues. While some technical accounting knowledge will be helpful, it is not essential and each seminar will provide the necessary technical foundations.

Indicative topics include: Foundations of Reporting, Calculation and Disclosure; Transnational Regulation and Standardisation; Accounting and the Notion of "Entity"; Audit and Assurance: The Audit Society; Organisational Boundaries, Structure and Control; Performance, Accountability Incentives; Accounting for Sustainability; Organisational Failure as a Process.

Teaching: 10, 3-hour seminars in weeks 1-10 of MT and a 2-hour essay workshop in week 11 of MT.

This year, some or all of this teaching may be delivered using virtual classes as an alternative to face-to-face teaching.

This course has a reading week in Week 6 of MT.

Formative coursework: Students will be required to produce two pieces of written work. This may take the form of either an essay, or the analysis of a case, and may also include in-class presentations and team-based work. This work will be assessed, but the grades will not count towards the overall course assessment.

Indicative reading: Chapman, Cooper & Miller (eds), *Accounting, Organizations and Institutions* (Oxford, 2009); Hopwood & Miller (eds), *Accounting as Social and Institutional Practice*, Cambridge, 1994; Power, *The Audit Society*, Oxford, 1999; Mennicken & Espeland, "What's new with numbers" *Annual Review of Sociology* (2019); Power, *Modelling the microfoundations of the audit society: Organizations and the logic of the audit trail*. *Academy of Management Review* (2019).

Assessment: Essay (100%, 6000 words) in the ST. MRes/PhD in Accounting students must pass the course assessment, normally with high Merit (at least 65%) or Distinction marks, to proceed to the next year of the programme.

AC504

Topics in Accounting Research (AOI)

This information is for the 2020/21 session.

Teacher responsible: Dr Andrea Mennicken KSW 3.09 and Prof Michael Power KSW 3.12

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is an advanced course for doctoral and postdoctoral students focusing on the institutional and organisational context of accounting practices in their broadest sense. The seminars are generally based on key readings at the interface between accounting, organisation studies, regulation and management. Discussions will be focused on the analysis of accounting and calculative practices in context drawing on a wide range of approaches. The course provides students also with training in qualitative methods in accounting research, including document analysis; interviewing techniques and transcript analysis; ethnographic methods in accounting; and theory building from data.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

This year, some or all of this teaching may be delivered using virtual classes as an alternative to face-to-face teaching.

There will be a reading week in week 6 of both MT and LT.

Indicative reading: There is no single text for this course and the seminars will be based on pre-distributed readings.

Assessment: Report (25%) and take-home assessment (75%).

Second year MRes/PhD students in Accounting (Accounting, Organisations and Institutions Track) are formally assessed by:

- (i) A referee report of a current working paper (25% weighting). This will normally be assigned in week 5 of Lent term to be worked on during the following week (6) when there is no class meeting.
- (ii) A take-home examination (75% weighting). This will cover a selection of key areas/papers studied in AC500 and AC504. It will be designed to be completed within a three-day (72 hour) period in the summer.

First year MRes/PhD students in Accounting (Accounting, Organisations and Institutions Track) will not normally be formally assessed but they will receive formative feedback on written work as agreed with the Course Director. In addition, all students participating in the course are expected to present and discuss their own work in progress as well as other published works discussed in this course. Students will receive feedback on their presentations, so that they can develop and improve their presentation skills.

AC506

Topics in Accounting Research (EoA)

This information is for the 2020/21 session.

Teacher responsible: Dr Maria Correia OLD 3.30, Dr Alexander Nezlobin OLD 3.33 and Dr Aneesh Raghunandan OLD 2.17.

Availability: This course is compulsory on the MRes/PhD in Accounting (EoA) (Economics of Accounting Track). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is a readings based course dealing with advanced issues in accounting research methods. Its primary focus is to study accounting and financial reporting issues from an economics perspective. While much research studied in the course will be empirical archival in nature, the course also emphasises the importance of theory and research design in developing high quality research. - (ii) A take-home examination (75% weighting). This will cover a selection of key areas/papers studied in AC501 and AC506. It will be designed to be completed within a three-day (72 hour) period in the summer.

In addition, all students participating in the course are expected to present research papers being studied and will receive feedback on their presentations aimed at developing and improving their presentation skills

AN500

Seminar on Anthropological Research

This information is for the 2020/21 session.

Teacher responsible: Dr Michael Scott and Dr Mukulika Banerjee Dr Yazan Doughan

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: Seminar on Anthropological Research

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 14 hours of seminars in the ST.

There is a reading week in Week 6 of the MT and LT.

Assessment: This course is not assessed.

AN503

Thesis Writing Seminar

This information is for the 2020/21 session.

Teacher responsible: Dr Fenella Cannell, Prof David Graeber and Dr Harry Walker

Availability: This course is compulsory on the MRes/PhD in

Anthropology. This course is not available as an outside option. This seminar is for 3rd and 4th year post-fieldwork students.

Course content: Students present draft dissertation chapters to their cohort.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 14 hours of seminars in the ST.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has reading week in Week 6 of the MT and LT.

Assessment: This course is not assessed.

AN505

Advanced Professional Development in Anthropology

This information is for the 2020/21 session.

Teacher responsible: Prof David Graeber OLD 6.10, Dr Gisa Weszkalnys, Prof Katherine Gardner and Dr Alpa Shah

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: This seminar course has two main aims. First, it examines key theoretical concepts and approaches in Anthropology at an advanced level that may be relevant to post-fieldwork doctoral candidates. It may focus on widely ranging thematic areas, e.g. recent developments in cognitive anthropology and/or in material culture studies and/or in anthropological studies of ontology. The aim is to enhance the ability of students to engage with such debates at an advanced level. Second, the course aims to enhance the professional development of doctoral students by providing them with advice and support in relation to their career progression.

Teaching: 14 hours of seminars in the MT. 14 hours of seminars in the LT. 12 hours of seminars in the ST.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected.

Assessment: This course is not assessed.

DV500

Research Seminar in Development Studies

This information is for the 2020/21 session.

Teacher responsible: Dr Kathleen Meagher

Availability: This course is compulsory on the MRes/PhD in International Development. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This seminar is designed as a forum for discussing theoretical and methodological issues in Development Studies research. Modules are organized around broad methodological issues (e.g. research design, case studies, causal inference) and presentations of research, with the former featuring heavily in the MT and the latter in the LT and ST. Research presentations at the seminar are made by International Development research students and also by staff, with some invited speakers from outside.

All research students are expected to attend the seminar while in residence in London. First year students are required to present a draft of their research proposal to the seminar during the LT or ST. Continuing students are invited to make presentations based on a report of their research, draft chapters or even their final draft of the dissertation. In making their presentations students are asked to provide (a) background material about the particular issue at hand, (b) a clear statement of the research questions

and/or hypotheses that are being addressed, and (c) discussion of the research methods to be employed. Students should inform their supervisor(s) of the date when they are scheduled to make a presentation.

Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT. 10 hours and 30 minutes of seminars in the ST.

Assessment: This course is not assessed.

DV501 Half Unit

Development History, Theory and Policy for Research Students

This information is for the 2020/21 session.

Teacher responsible: Prof James Putzel

Availability: This course is compulsory on the MRes/PhD in International Development. This course is available on the MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Management (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit. Available with the permission of the teacher responsible.

Course content: The course integrates the concepts and perspectives of a range of disciplines to consider: major trends of development and change in modern history and interpretations of them in the social sciences and contemporary economic and social theory and their bearing on the policy and practice of development. With reference to comparative historical experience, we explore the role of states and markets in development and/underdevelopment, colonial legacies, the political economy of growth and redistribution, and the role of politics and power in development. We examine key issues in development such as: the record of pro-market reforms; the experience of "developmental states"; and the challenges to development thinking and practice presented by feminist theory, environmental sustainability, globalisation and new patterns of global inequality.

Teaching: 20 hours of lectures and 20 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 2 presentations in the MT.

Indicative reading: Chang, HJ. *Economics: The User's Guide* (Penguin, 2014). Sen, A. *Development as Freedom* (Anchor, 1999). Polanyi, K. (2001 / 1944) *The Great Transformation: The Political and Economic Origins of Our Times* (Boston: Beacon Press), HC53 P76 [also a network e-book]. Chang, HJ. *Kicking Away the Ladder: Development Strategy in Historical Perspective* (Anthem, 2002). Kohli, A. *State-Directed Development: Political Power and Industrialization in the Global Periphery* (Cambridge, 2004). Rodrik, D. *One Economics, Many Recipes: Globalization, Institutions, and Economic Growth* (Princeton University Press, 2008). Ferguson, J. *The Anti-Politics Machine: 'Development', Depoliticisation and Bureaucratic Power in Lesotho* (Cambridge, 1990). Jerven, M. *Poor Numbers: How we are misled about African development statistics and what to do about it* (Cornell, 2013)

Assessment: Essay (100%, 5000 words) in January.

DV507 Half Unit

Poverty

This information is for the 2020/21 session.

Teacher responsible: Dr Sohini Kar

Availability: This course is available on the MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course is an interdisciplinary analysis of poverty. With attention to both the macro-level political economy of poverty and the micro-level lived experiences of the poor, we will examine how and why poverty persists in developing

countries and analyse policy interventions and their outcomes. The course is interdisciplinary in focus, drawing on a range of methodological approaches to poverty, and does not require any prior mathematical or statistical qualification. The course begins with an examination of the definition and measurement of poverty. We will then consider social mobility, followed by the spatial dimensions of poverty, including urban and rural poverty. We will then turn to issues of work and employment, social protection, and the politics of poverty, followed by weeks on environmental poverty, and private sector involvement, including the question of financial inclusion. The course will end with focus on successful cases of pro-poor development.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will give at least one class presentation, and submit one formative essay of 2000 words.

Indicative reading:

- Javier Auyero, *Patients of the State: The Politics of Waiting in Argentina* (Duke University Press 2012)
- Abhijit Banerjee and Esther Duflo, *Poor Economics: A Radical Rethinking of the Way to Fight Global Poverty* (Public Affairs/Penguin 2011)
- Anirudh Krishna, *Broken Ladder: The Paradox and Potential of India's One Billion* (Cambridge University Press 2017)
- Tania Li, *Land's End: Capitalist Relations on an Indigenous Frontier* (Duke University Press 2014)
- Rob Nixon, *Slow Violence and the Environmentalism of the Poor* (Harvard University Press Ananya Roy, 2011)
- *Poverty Capital: Microfinance and the Making of Development* (Routledge 2010)

Assessment: Essay (100%, 5000 words) in the ST.

Assessment will be 100% on final 5,000 word essay. The topic of the essay will be related to the course, but the specific question will be developed with each student prior to the end of term. The research-based essay will enable students to develop a literature review that will complement their research interests, while the course syllabus will provide a key set of resources for students to consult in developing their research topic.

DV510

Research Design and Proposal in International Development

This information is for the 2020/21 session.

Teacher responsible: Dr Kathleen Meagher

Availability: This course is compulsory on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: Students will work with their academic supervisors to structure a doctoral research proposal that has the potential to make a significant contribution to knowledge and that reflects a sophisticated mastery of advanced theoretical and methodological tools from one or more academic disciplines related to international development. They will learn how to identify good research questions that are embedded in the current academic literature, and how to apply recognisable, defensible and academically sophisticated methodologies to address those questions. The doctoral research proposal itself will identify a key research question(s) for investigation, a justification well embedded in existing academic literature for why the topic is theoretically and empirically important, and a well-developed theoretical and methodological framework for researching the question(s).

Teaching: Students will meet their supervisors three times a term during their first year of study in accordance with the LSE's regulations for Research Degrees. Their proposals will be developed over the course of these meetings. There will be one DV510 proposal workshop in the Summer Term at which students will present their draft proposals and receive feedback.

Formative coursework: Students will be expected to produce 3

pieces of coursework in the MT, LT and ST.

Students will submit drafts of their proposal to their supervisors and receive feedback.

Indicative reading: The reading list for each student will be determined by the research they propose undertaking.

Assessment: Research proposal (100%) in August.

A research proposal of 10,000 words to be submitted in August.

DV513 Half Unit

Environmental Problems and Development Interventions

This information is for the 2020/21 session.

Teacher responsible: Prof Timothy Forsyth CON.8.05

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: This course is for students who wish to study social and political aspects of environmental change and its implications for international development. The aim is to summarise the key current debates about 'environment and development' from perspectives of social and political theory with special reference to institutional theory, livelihoods, and inclusive policy interventions.

The course is structured to analyse the challenges of making well-informed environmental interventions in the face of poverty and vulnerability, and then seeking practical solutions to these dilemmas. The course first considers the nature of environmental problems within a 'development' context, and what this means for environmental science and norms as applied in developing countries. Themes include assessing environmental science and expertise in concerning adaptation to population growth, resource scarcity, deforestation, desertification, vulnerability to 'natural' disasters, and risks associated with climate change, including questions of gender and environment. As the course progresses, it considers debates about policy interventions such as common property regime theory; theories of the state and environment (including resistance and social movements); community-based natural resource management and Sustainable Livelihoods; adaptation to climate change; forests; and urban environmental policy (these latter themes involve debates on multi-level, multi-actor governance involving the connections of local development and global climate change policy).

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

There will be a reading week in Week 6

Formative coursework: Students will have the opportunity to produce 1 essay in MT

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. Students are not advised to buy a single textbook for this course but to read selectively and critically from various sources. The following books might be useful introductions:

- Adams, W.M. 2019. *Green Development: environment and sustainability in a developing world*. 4th edition. London: Routledge.
- Forsyth, T. 2003. *Critical Political Ecology: the politics of environmental science*, London, Routledge
- Jones, S. and Carswell, G. 2004. *The Earthscan reader in environment, development and rural livelihoods*. London; Sterling, VA: Earthscan.
- Kohler, P. (2019) *Science Advice and Global Environmental Governance: Expert Institutions and the Implementation of International Environmental Treaties*, London and New York: Anthem Press.
- Neumann, R. 2005. *Making Political Ecology*, London: Hodder Arnold.
- Nightingale, A. (ed) 2019. *Environment and Sustainability in a Globalizing World*, London: Routledge.

- Ostrom, E., Stern P.C., Diet, T., Dulsak, N. and Stonich, S. (eds.) 2002 *The Drama of the Commons: Understanding Common Pool Resource Management*. Washington, D.C.: National Academy Press.
- L Schipper and I Burton (eds) (2008) *The Earthscan Reader on Adaptation to Climate Change*, London: Earthscan.

Assessment: Essay (100%, 5000 words) in the LT.

DV515 Half Unit Global Environmental Governance

This information is for the 2020/21 session.

Teacher responsible: Prof Kathryn Hochstetler

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: This course is for a MRes/PhD student who wishes to study the politics of global environmental policy from the perspective of environmental governance and international development. The aim is to summarise debates about 'global' environmental problems and to review the contributions of debates about 'governance' to political solutions. The main theoretical focus of the course is on understanding the evolution of environmental policy regimes at multiple scales and with multiple actors. The guiding empirical focus is on the role of developing countries in global environmental governance and the effects of environmental policy regimes on their development strategies and outcomes. Some of this draws upon debates within International Relations, but this course also considers other literatures about environmental politics. Only part of global environmental governance takes place in formal spheres specifically devoted to environmental topics. Economic institutions like trade and financial institutions also play a key role and are covered here.

To make the course focused, it will consider primarily anthropogenic climate change, biodiversity and forests, and human movement in response to environmental change. In addition, these topics will be analysed from the perspective of the role of states and inter-state agreements; business actors and non-governmental organisations (NGOs); the regulation of trade; and the evolution of financial assistance, including from the World Bank.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST. There will be a Reading Week in week 6.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: A detailed reading list will be presented at the beginning of the term. There is no single textbook for this course, but we recommend the following as a basic background reading list:

- Betsill, M. and Corell, E. (eds). 2007. *NGO Diplomacy: The Influence of Nongovernmental Organizations in International Environmental Negotiations*, MIT Press.
- Biermann, F, Pattberg, P. and Zelli, F. (eds). 2010. *Global Climate Governance Beyond 2012: Architecture, Agency and Adaptation*, Cambridge University Press.
- Ciplet, D., J.T. Roberts, and M.R. Khan. 2015. *Power in a Warming World: The New Global Politics of Climate Change and the Remaking of Environmental Inequality*. MIT Press.
- Gallagher, K.S. 2014. *The Globalization of Clean Energy Technology: Lessons from China*. MIT Press.
- Humphreys D. 2009. *Logjam: Deforestation and the Crisis of Global Governance*, Earthscan.
- Lewis, J.I. 2014. The Rise of Renewable Energy Protectionism: Emerging Trade Conflicts and Implications for Low Carbon Development. *Global Environmental Politics* 14(4): 10-35.
- Najam, A. 2005. Developing Countries and Global Environmental Governance: From Contestation to Participation to Engagement. *International Environmental Agreements* 5: 303-321.

- Newell, P. and J.T. Roberts (eds). 2016. *The Globalization and Environment Reader*. Wiley.
- Raustiala, K. and D. Victor. 2004. The Regime Complex for Plant Genetic Resources. *International Organization* 58(2): 277-309.

Assessment: Essay (100%, 5000 words) in the ST.

DV518 Half Unit African Development

This information is for the 2020/21 session.

Teacher responsible: Mr Eyob Gebremariam

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: The major concern of the course is with the political economy of African development, to examine processes of economic, political, social and cultural change in Sub-Saharan Africa. It provides critical analysis of key development interventions and processes. It seeks to combine general theoretical overviews with country case studies illustrating the variety of experiences and trajectories. It does not aim to provide a comprehensive coverage of development issues or of regions. Course content will vary from year to year, depending on the specialities of staff.

Attention is paid to legacies of the colonial encounter; the constraints and opportunities presented by African countries' positions in the global economy; the political economy of industrialisation and agrarian transformation, resource mobilisation; trade diversification; institutional reforms and state capacity. Attention will also be paid to social policy with special focus on issues such as social protection and welfare, youth employment, education, health, horizontal inequality and conflict.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

There will be a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: A detailed weekly reading list will be provided at the first meeting. The following readings provide an introduction to the course:

1. Botchwey, K. and Stein, H., 2012. *Good growth and governance in Africa: Rethinking development strategies*. Oxford University Press.
2. Mkandawire, Thandika. (2017). *State Capacity, History, Structure, and Political Contestation in Africa*. In M. A. Centeno, A. Kohli, D. J. Yashar, & D. Mistree (Eds.), (pp. 184-216).
3. Adesina, J.O., Graham, Y. and Olukoshi, A. eds., 2006. *Africa and development challenges in the new millennium: The NEPAD debate* (No. 5). Zed Books.
4. Mkandawire, Thandika. 2014. "The Spread of Economic Doctrines and Policymaking in Postcolonial Africa." *African Studies Review* 57(01):171-98.
5. Mkandawire, Thandika. 2015. "Neopatrimonialism and the Political Economy of Economic Performance in Africa: Critical Reflections." *World Politics*:1-50.

Assessment: Essay (100%, 5000 words) in the ST.

DV520 Half Unit Complex Emergencies

This information is for the 2020/21 session.

Teacher responsible: Prof David Keen CON 6.06

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: The course examines the consequences and causes of humanitarian disasters. It looks at the changing nature of civil conflicts, at the famine process, and at the benefits that may arise for some groups from war and famine. It examines some of the roots of violence in civil wars, as well as the information systems that surround and help to shape disasters. The course is interdisciplinary and looks at political, economic and psychological functions of violence.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of lectures in the ST. There will be a reading week in week 6.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. A useful text, which is designed in large part around the course, is David Keen, *Complex Emergencies* (Polity, 2008). Other texts of interest include David Keen, *Useful Enemies: When Waging Wars is More Important than Winning Them* (Yale University Press, 2012); Stathis Kalyvas, *The Logic of Violence in Civil War* (Cambridge University Press, 2006); David Keen, *Conflict and Collusion in Sierra Leone* (James Currey, 2005); David Keen, *Endless War? Hidden Functions of the 'War on Terror'* (Pluto, 2006); Michael Mann, *The Dark Side of Democracy: Explaining Ethnic Cleansing* (Cambridge University Press, 2005); Amartya Sen, *Poverty and Famines* (Oxford University Press, 1981); Frances Stewart and Valpy FitzGerald (eds.), *War and Underdevelopment*, Volumes 1 and 2 (Oxford University Press, 2001); and Jeremy Weinstein, *Inside Violence: The Politics of Insurgent Violence* (Cambridge University Press, 2007); Tim Allen, *Trial Justice: The International Criminal Court and the Lord's Resistance Army* (Zed Press, 2006), Chris Dolan, *Social Torture: The Case of Northern Uganda, 1986-2006* (Berghahn, 2009); Zoe Marriage, *Not Breaking the Rules, Not Playing the Game: International Assistance to Countries in Conflict* (Hurst and Co., 2006); Christopher Cramer, *Civil War is Not a Stupid Thing: Accounting for Violence in Developing Countries* (Hurst and Co., 2006); Mats Berdal and David Malone, *Greed and Grievance: Economic Agendas in Civil Wars* (Lynne Rienner, 2000); Hugo Slim, *Killing Civilians: Method, Madness and Morality in War* (Hurst and Co., 2008).

Assessment: Essay (100%, 5000 words) in the ST.

DV524 Half Unit Not available in 2020/21 International Institutions and Late Development

This information is for the 2020/21 session.

Teacher responsible: Prof Kenneth Shadlen CON.6.07

Availability: This course is available on the MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Please note all students are asked to submit a brief statement of 150 words (max) on why they want to take the course.

2/3 of the spaces should go to ID and joint degree students, distributed on a random basis.

1/3 go to non-ID/joint students, distributed on a random basis.

Everyone else goes on the waitlist, and as spots open the course leader will allocate these, without regard to degree/dept, on the basis of the brief statements.

Course content: This course examines the politics of the international economy. We analyse the overarching rules and regulations that structure the international economy, and thereby provide context for development policy, and we assess the role of a range of actors (e.g. governments, firms, non-state actors) in shaping and reshaping the international economic order. We are particularly interested in understanding the ways that developing countries respond to and participate in international regimes and organisations, and how changes in global economic governance affect opportunities for economic development. The first week, which synthesises a variety of explanations of the role that international organisations play in global politics, establishes the theoretical spine for the course. We then examine governance in international sovereign debt and finance, public and private. We analyse the politics of debt relief for the poorest and most heavily-indebted countries, where most of the debt is owed to

public creditors; and we analyse the politics of debt restructuring for middle-income countries where significant shares of the debt is owed to private/commercial creditors. The course then turns to the politics of international trade, investment, and intellectual property. This cluster of five sessions is organised around a dialogue between multilateral and regional frameworks for integration into the global economy, with the World Trade Organisation (WTO) serving as our principal point of reference. We examine the emergence of the WTO, both in terms of the substance of the Uruguay Round agreements and as an inter-governmental organisation with its own set of procedures for agenda-setting, rule-making, and dispute-settlement. We then examine emerging arrangements for global governance in the areas of foreign investment and intellectual property. And, then we focus explicitly on the resurgence of new, North-South, bilateral and regional trade agreements, considering the implications of such agreements for development and the factors that contribute to their proliferation. In concluding the course, taking a step back and reviewing the term's material from a "birds-eye view," we analyse contrasting trajectories of change in two development regimes, one regarding "industrial transformation" and mobility in the international division of labour, and another regarding "humanitarianism" and poverty reduction.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 2 hours of lectures in the ST. There will be a reading week in Week 6.

Formative coursework: Students have an opportunity to submit written work for formative assessment. Details of the exercise will be announced early in the term.

Indicative reading: A detailed reading list is presented at the beginning of term.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 4000 words) in the ST.

DV528 Half Unit

Managing Humanitarianism

This information is for the 2020/21 session.

Teacher responsible: Dr Stuart Gordon, CON 8.10

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: The course looks at international, national and local responses to conflict and natural disasters. Building on an analysis of the causes, construction and consequences of humanitarian disasters, this course focuses on humanitarian actors (including aid workers, journalists, medics, government officials, soldiers, politicians and peace negotiators). It considers the principles and the politics of humanitarian action, exploring the overlaps and tensions between practices of humanitarian assistance and humanitarian intervention and how humanitarian institutions shape and are shaped by global governance and state power. It asks how humanitarianism relates to ideas about human rights and justice, and the politics of securitisation. It considers why humanitarian organisations and governments respond to some crises and not to others as well as the critique of humanitarian assistance and the ways in which the UN and NGO communities have sought to professionalise their activities. The course also looks at how recipients of humanitarian aid respond to these programmes, and in some cases subvert or transform them into quite different projects. Case studies will be drawn primarily from Africa, Central and South Asia and Latin America. However, there is also likely to be discussion of ongoing humanitarian emergencies, wherever they are located.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

This will be a formative plan for the research paper (1500 words)

on which the student will receive feedback.

Indicative reading: Stuart Gordon and Antonio Donini 'Romancing Principles and Human Rights - Are Humanitarian Principles Salvageable?' *International Review of the Red Cross* International Review of the Red Cross / Volume 97 / Issue 897-898 / June 2015, pp 77-109. Weiss (Eds.), 2008. *Humanitarianism in Question Politics Power and Ethics*, Ithaca: Cornell University Press; A. De Waal, 1997. *Famine Crimes: Politics and the Disaster Relief Industry in Africa*. London: James Currey. Loescher (2001) *The UNHCR and World Politics*, Oxford University Press. D. Rieff (2002) *A Bed for the Night: Humanitarianism in Crisis*, Vintage/Random House.

Assessment: Essay (100%, 5000 words) in the LT.

DV531

Development Management

This information is for the 2020/21 session.

Teacher responsible: Dr Mahvish Shami

Dr Jonathan Weigel

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available to students in Year 2 or above of the MRes/PhD in International Development only. It is also available to students in Year 1 of the MRes/PhD in International Development, in lieu of DV501, with permission.

Course content: Why are some countries rich and others poor? Why are some governed well and others badly? This course employs a political economy approach to examine the causes of development, identify the underlying obstacles to development, and evaluate potential solutions. It focuses on the principles governing the institutions, politics, and organisations through which policies, programmes and projects are produced and implemented. Attention is given to the different kinds of authority, incentives and accountability mechanisms that govern the relationships between leaders, managers and recipients. It reviews ongoing debates about the best ways of designing state agencies, private firms and NGOs, by showing how centralised bureaucracies, markets, participatory and solidaristic agencies operate to provide services in practice. It explores the dynamics of different forms of democratic and authoritarian states, the determinants of good and poor governance, and how social, political and economic forces interact to drive change and stability. In order to enable students to make practical judgments about institutional reform programmes in various contexts, competing approaches to development are critically and constructively analyzed in light of case studies. The course is divided into several parts: Analytical Assumptions, Government and Governance, Private Sector, and Civil Society. On completing the course students should be able to: (i) use theory to identify the causes of actual development challenges, (ii) identify and assess relevant case study material to inform development practice; and (iii) employ the insights developed throughout the course to formulate policy recommendations and plans of action for improving development.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 18 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 3 hours and 30 minutes of lectures in the ST.

There will additionally be an introductory workshop at the start of MT. Students are expected to attend all these sessions. Lectures will focus on the theoretical debates driving current policy practice in the development community, while seminars will relate these to practical problems of implementation, drawing on case studies, class exercises, and the personal experience of participants. Seminars will discuss topics covered in the lecture, and will be conducted on the basis either of a student presentation or a class exercise.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: A detailed weekly reading list is provided at the first course meeting. Background readings include: Brett, E.A. (2009) *Reconstructing Development Theory*; Faguet, JP. 2012. *Decentralization and Popular Democracy: Governance from Below in Bolivia*. Ann Arbor: University of Michigan Press; Chang, H. 2003, *Rethinking development economics*, Anthem Press; London, *Intermediate Technology*; Kohli, A. 2004 *State-directed development: political power and industrialization in the global periphery*, Cambridge, Cambridge University Press; Linz, J. & A. Stepan, *Problems of democratic transition and consolidation*, Johns Hopkins; Olson, M. 1982 *The rise and decline of nations*, Yale University Press; North, D. 1990. *Institutions, Institutional Change and Economic Performance*. Cambridge University Press. Putnam, R. D. 1993. *Making Democracy Work: Civic Traditions in Modern Italy*. Princeton: Princeton University Press; Rodrik, D. (Ed.). 2003. *In Search of Prosperity: Analytical Narratives on Economic Growth*: Princeton University Press; Sen. A., 1999 *Development as Freedom*. Oxford University Press; Stiglitz, J. 2002 *Globalization and its discontents*, Allen Lane, 2002; World Bank, *World Development Report, 2004, Making services work for poor people*, Washington, World Bank.

Assessment: Assessment path 1

Essay (100%, 10000 words) in the ST.

Assessment path 2

Exam (60%, duration: 3 hours) in the summer exam period.

Essay (40%, 5000 words) in the ST.

The research paper will be co-marked by the course convenor and the student's PhD supervisor.

DV532 Half Unit

China in Developmental Perspective

This information is for the 2020/21 session.

Teacher responsible: Prof Jude Howell CON. 8.02

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: This course looks at China from a comparative developmental perspective, locating the discussion of China within the interdisciplinary field of development studies. It examines China's developmental trajectory since 1949, explaining the fundamental shift in developmental path from late 1978 onwards. It considers China's role in low-income countries, as a model of innovation, as a voice for developing country concerns and as an important aid donor. It reflects on China's recent achievements in reducing poverty and places these in comparative context. The course considers the governance challenges posed by rapid economic reform, the attempts to reform the Party-state and to manage social tensions. It examines the social dimensions of rapid economic reform and the implications for social policies. It looks at the emergence of NGOs and other forms of civil society organising and considers changing state-society relations. Finally it considers China's role as aid donor and its emergence as a global economic and political power. The course will enable students to obtain an understanding of key developmental issues and discussions about China and to link these discussions to broader debates and theories in development studies.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. In addition, one introductory seminar session in MT, and one essay preparation session in MT.

Formative coursework: Students have the opportunity to receive feedback on a formative essay of 1,500 words. Students will also receive feedback on their seminar performance. Students are welcome to come to course convenor's office hours to discuss any issues.

Assessment: Essay (100%, 5000 words) in the LT.

DV533 Half Unit

The Informal Economy and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Kate Meagher CON 7.11

Availability: This course is available on the MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is only available to research students in other departments with permission from the course convener (space permitting).

Course content: Contrary to standard development thinking, the informal economy has expanded rather than contracted in the face of liberalisation and globalisation, and now creates more jobs than the formal economy in most developing countries. Accounting for more than 50% of non-agricultural employment across much of the developing world, the informal economy is attracting growing policy attention. Practitioners, policy makers and academics seek a clearer understanding of its impact on poverty, employment, social exclusion, and governance. In a globalising environment, are large informal economies a poverty trap or an engine of growth? Do they stimulate entrepreneurship and popular empowerment, or promote criminality and exploitation? How does a greater understanding of the size and organization of informal economies affect policy on urban service provision, social protection or taxation? What are the implications of the informal economy for social cohesion and popular politics in developing countries?

This course will explore how high levels of informality in developing countries are shaping processes of growth and governance in the global south. The effect of informality on new policy narratives of inclusive growth will be a central theme in the course. Using a comparative institutional approach, we will examine informal economies in a range of regional contexts, including Africa, the Middle East, South and East Asia, and Latin America, highlighting variations in activities, relations with the state, global integration and development outcomes. Key issues covered in the course include the impact of the informal economy on labour markets, weak states, gender empowerment, urban services, social enterprise, social policy, taxation, and popular politics. Attention

will be focused on the potential as well as risks of large informal economies in the face of contemporary development challenges, drawing on empirical evidence and comparative case studies from across the developing world.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. There will be a Reading Week in Week 6.

Formative coursework: Formative coursework will involve a 2,000 word essay during the term and at least one presentation.

Indicative reading:

DV545 Half Unit

Research Themes in International Development

This information is for the 2020/21 session.

Teacher responsible: Dr Kathleen Meagher

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled on the MRes/PhD in International Development only.

Course content: The objectives of the course are: a) to introduce students to specialized dimensions of development which will facilitate their career paths by engaging with new issues not covered in standard courses; b) to facilitate student engagement with novel dimensions of the interface between policy practice and development academe.

Students enrolled on DV545 follow an independent course of study on an approved topic. They will be matched with an adviser (any member of staff in the department who is not their primary supervisor), who will support them in producing the final research paper. There are no set lectures or seminars for this course, though

students will be encouraged to make good use of the weekly lectures on DV445 (Cutting Edge Issues in Development Thinking & Practice), which feature speakers from different development organisations and research institutes.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: Allen T (with Melissa Parker) (2012) "Will mass drug administration eliminate lymphatic filariasis? Evidence from Northern Coastal Tanzania" *Journal of Biosocial Science*. Wade, Robert Hunter (2011) "Emerging world order?: from multipolarity to multilateralism in the G20, the World Bank, and the IMF". *Politics & Society*, 39 (3).

Assessment: Essay (100%, 5000 words) in the ST.

DV560 Half Unit

Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference

This information is for the 2020/21 session.

Teacher responsible: Dr Tasha Fairfield CON 6.02

Availability: This course is available on the MPhil/PhD in International Relations and MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit. Students will be selected for DV560 based on a written statement of interest (max 150 words). Priority will be given to students on the programs listed above, if demand exceeds places.

Course content: The way we intuitively approach qualitative case research is similar to how we read detective novels. We consider various different hypotheses to explain what occurred—whether the emergence of democracy in South Africa, or the death of Samuel Ratchett on the Orient Express—drawing on the literature we have read (e.g. theories of regime change, or other Agatha Christie mysteries) and any salient previous experiences we have had. As we gather evidence and discover new clues, we continually update our beliefs about which hypothesis provides the best explanation—or we may introduce a new alternative that occurs to us along the way.

Bayesianism provides a natural framework that is both logically rigorous and grounded in common sense, that governs how we should revise our degree of belief in the truth of a hypothesis—e.g., "mobilisation from below drove democratization in South Africa by altering economic elites' regime preferences," (Wood 2001), or "a lone gangster sneaked onboard the train and killed Ratchett as revenge for being swindled"—given our relevant prior knowledge and new information that we obtain during our investigation. Bayesianism is enjoying a revival across many fields, and it offers a powerful tool for improving inference and analytic transparency in qualitative research.

This course introduces basic principles of Bayesian reasoning with the goal of helping us leverage our common-sense understandings of inference and hone our intuition when conducting causal analysis with qualitative evidence. We will examine the foundations

of Bayesian probability as well as concrete applications to single case studies, comparative case studies, comparative historical analysis, and multi-methods research. Students will practice applying Bayesian reasoning to assess the strength and quality of inferences in published studies, drawing on exemplars of qualitative research from various fields of socio-political analysis including development studies, comparative politics, international relations, and policy analysis. Students will also apply Bayesian principles to various aspects of their own dissertation research in progress—e.g., generating or revising hypotheses, selecting cases, identifying weaknesses in salient background literature, and assessing the inferential weight of available evidence. Upon completing the course, students will be equipped with a concrete set of Bayesian-inspired best practices to deploy in their own research, as well as widely-applicable analytic skills that will help them to better evaluate and critique socio-political analysis. This course has no prerequisites. Students do not need any previous exposure to either Bayesian analysis or qualitative methods literature.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. Students will attend DV460 lectures and seminars in LT. Additional teaching and learning support in writing the final project will be agreed between the instructor and the student's PhD supervisor.

Formative coursework: Students will be expected to produce 1 exercise and 1 project in the LT.

Students will receive written and oral formative assessment on in-class exercises, which will ask them to explain key Bayesian concepts (e.g., the "weight of evidence") in their own words and apply them to concrete examples (e.g. use Bayes' rule to derive an inference from several pieces of evidence).

In addition, students will receive oral feedback on the first section of their final project, which will set up rival hypotheses to be compared in light of case evidence.

Mental Models and Attention in German Pension Politics," *Comparative Political Studies* 42 (2) 2008; Tasha Fairfield and Candelaria Garay, "Redistribution under the Right in Latin America: Electoral Competition and Organized Actors in Policymaking," *Comparative Political Studies* 50 (14) 1871-1906, 2017; Kenneth Schultz, "Fashoda Revisited" (Chapter 6) in *Democracy and Coercive Diplomacy*, Cambridge, 2001; Dan Slater, "Revolutions, Crackdowns, and Quiescence: Communal Elites and Democratic Mobilization in Southeast Asia," *American Journal of Sociology* 115 (1) 203-254, 2009; Elisabeth Wood, "An Insurgent Path to Democracy: Popular Mobilization, Economic Interests, and Regime Transition in South Africa and El Salvador," *Comparative Political Studies* 34 (8) 862-888, 2001.

Assessment: Project (100%, 5000 words) in the ST.

Students can choose from two options in consultation with the course instructor and the PhD supervisor, taking into account how far along they are in the research process:

(a) Conduct a full Bayesian scrutiny of a published work relevant to their dissertation topic, preferably one that analyses more than a single case. Students will be asked to pay attention to some nuanced aspects of Bayesian inference, including logical dependence among multiple pieces of evidence, and they will provide quantified assessments of priors, weight of evidence, and their posterior degree of confidence in the author's argument

relative to rival explanations in light of the evidence.

(b) Directly apply Bayesian reasoning to their own dissertation research in progress. Students will devise at least two rival hypotheses to compare (preferably three), assess and justify priors in light of salient background literature they have read, and assess the weight of any available evidence they possess from their preliminary research and/or provide a Bayesian rationale for case selection. Students will be asked to pay attention to some nuanced aspects of Bayesian inference, including logical dependence among multiple pieces of evidence, and they will provide quantified assessments of the weight of evidence and their degree of confidence in each hypothesis relative to the rivals in light of their background information and preliminary evidence.

DV590 Half Unit

Economic Development Policy I

This information is for the 2020/21 session.

Teacher responsible: Dr Diana Weinhold CON 7.10

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled in the MRes/PhD in International Development only.

Enrolment will be controlled through the use of a pre-quizz (see DV490 Moodle page for details).

Course content: This course explores the foundations of applied macroeconomic policy analysis by combining a rigorous introduction to advanced quantitative methods with applications to the theory and empirics of long-run growth in developing countries. Throughout the course, lectures provide analytical but non-technical overviews of broad themes in long-run growth and development policy, with a strong emphasis on how the body of knowledge has evolved over time via the synthesis of theoretical advances and rigorous empirical testing. Topics including growth theory, institutions and history, economic geography, globalization, balance of payments and financial crises, environmental policy and international finance. Classes in the first half of term will focus on building analytical skills to read, interpret, and critique econometric approaches to causal identification commonly used in the academic development literature. The emphasis will be on developing rigorous intuition rather than technical details; we focus on teaching students from a broad range of backgrounds to understand and critically consume high-level applied research in a sophisticated manner. The seminars in the second half of term give students an opportunity to repeatedly practice and improve their skills by working through problem sets based on top academic journal articles addressing issues from the lectures on macroeconomic development. While some background in economics and statistics is helpful, the course is designed to be engaging and challenging for students from a broad variety of backgrounds, from those with no economics and statistics to those with more advanced skills in either one or both areas. Strong analytical skills (whether quantitative or not) and a sturdy work ethic are the best predictors of success.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Useful reference texts include "Mastering Metrics" by Angrist and Pischke, which will serve as the course text, and W Easterly, *The Quest for Growth*.

Assessment: Essay (100%, 5000 words) in the ST.

DV591 Half Unit**Economic Development Policy II**

This information is for the 2020/21 session.

Teacher responsible: Dr Sandra Sequeira CON.6.05

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled in the MRes/PhD in International Development only.

Course content: This course examines the microeconomic foundations of economic policy-making in developing countries. Classes will combine economic theory and rigorous empirical analysis to better understand the impact of economic development policy on development goals. We will focus on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future

The course is structured around three main themes:

(i) Human Development: health policy, education policy and intra-household dynamics

(ii) Institutions and Markets: labour markets, state capacity for public service delivery and private sector development

(iii) Behavioural Economics and Development Policy Design: the importance of psychology in explaining economic behaviour and how it can inform better development policy design

Through in class discussions, lectures and coursework, students will develop analytical and quantitative skills for the study and practice of international development policy. These skills will enable students to interpret and critique both conceptual arguments and the empirical evidence used in the development economics literature and discourse.

Coursework will include a combination of class discussions with guest lecturers engaged in international development, problem sets, presentations and computer-lab based sessions for students to explore programming and statistical skills.

Teaching: 20 hours of lectures, 15 hours of seminars and 9 hours of workshops in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Useful reference texts include D Ray, *Development Economics* (1998) which will serve as the course text, and W Easterly, *The Quest for Growth*.

Assessment: Essay (100%, 5000 words) in the ST.

economic development policies in the future. It begins introducing concepts from public economics to discuss the scope and impacts of government interventions. In particular, the course will cover issues related to market failures, redistribution, public goods and externalities. The course will also discuss theoretical and empirical work on the economic consequences of government interventions, with particular focus economic incidence, efficiency trade-offs and unintended consequences of policies. In the second part, it focuses on challenges in raising government revenue and delivering public service in the developing world context, where limited state and fiscal capacity impose important constraints in policymaking. Beyond these topics, the course will provide background on relevant analytical tools in quantitative research, and develop skills to interpret empirical evidence in development economics.

Coursework will include a combination of class discussions, problem sets, presentations and computer-lab based sessions for students to explore programming and statistical skills.

Students are strongly encouraged to take DV491/591, as a highly complementary course that will also apply the empirical methods taught in DV490/590 to topics in Human Development, Institutions and Markets, Social Networks, Economic History and Cultural Economics, and Behavioural Economics and Development Policy Design.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. There will be a two hour revision session in late LT or early ST.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Students will be expected to produce 1 referee report.

Assessment: Essay (100%, 5000 words) in the ST.

DV592 Half Unit**Economic Development Policy III: Government Policy Analysis**

This information is for the 2020/21 session.

Teacher responsible: Dr Joana Naritomi CON.6.12

Availability: This course is available on the MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Entry onto the course might be limited at the discretion of the instructor.

Pre-requisites: 'DV490 Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development' or equivalent.

Course content: This course explores key issues in government policies in developing countries. The course will draw on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better

EC501**Work in Progress Seminars**

This information is for the 2020/21 session.

Teacher responsible: Various.

Availability: This course is compulsory on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: Research students present their work to faculty and peers in the designated field. Outside speakers are also invited from time to time.

Teaching: Seminars EC501: seminar groups covering the major PhD field options, i.e. Capital Markets, Development and Growth, Econometric Theory, Industrial Economics, International Economics, Labour Economics, Macroeconomics/Monetary Economics, Microeconomic Theory, Political Theory, Public Economics. The frequency of meetings to be determined according to the number of students in each specialism, but generally each group will meet weekly throughout the session.

Assessment: This course is not examinable.

EC518

Topics in Advanced Econometrics for Research Students

This information is for the 2020/21 session.

Teacher responsible: Prof Francisco Hidalgo 32L.4.20 and Prof Taisuke Otsu 32L.4.25

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: See course content for EC485. Additionally, this course will examine more advanced theories and applications in Econometric Theory. Recent developments in the field will be discussed, giving students an insight into the process by which research is conducted, and suggesting fruitful areas for research.

Teaching: 20 hours of EC485 Topics in Advanced Econometrics lectures and 10 hours of EC518 lectures in each of the MT and the LT. This year, at least for Michaelmas term, some or all of the teaching for this course may have to be delivered through a combination of virtual webinars, online videos and virtual classes.

Indicative reading: See reading list for EC485. Additional readings will be recommended at the start of the course.

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Exam (50%, duration: 2 hours) in the summer exam period.

EC532

International Economics for Research Students

This information is for the 2020/21 session.

Teacher responsible: Dr Swati Dhingra 32L.2.31
Prof David Donaldson

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: This course is concerned with the latest developments in international economics. The course builds on techniques introduced in MSc International Economics (EC421) to take students to the research frontier. One term covers international trade and the other term covers international macroeconomics.

The course is based around research papers. Topics covered vary from year as the research frontier expands. A list of representative topics in international trade includes: micro-econometric studies of international trade, theories of heterogeneous firms and trade, theories of incomplete contracts and trade, and the political economy of trade policy. A list of representative topics in international macroeconomics includes international business cycles, determinants of international capital flows, portfolio choice and risk sharing, monetary and fiscal policy in open economies, theoretical and empirical work on the real exchange rate and international financial crises (e.g., currency attacks and sovereign defaults).

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This year, at least for Michaelmas term, some or all of the teaching for this course may have to be delivered through a combination of virtual webinars, online videos and virtual classes.

Indicative reading: Readings will be from journal articles; a list will be supplied at the start of term.

Assessment: Coursework (50%) in the MT.

Coursework (50%) in the LT.

Two take-home assignments, one in MT and one in LT. Each assignment will carry equal weight. Take-home assignments may require students to analyse data, empirically solve a computational exercise, solve theoretical models, or assess recent research.

EC533

Labour Economics for Research Students

This information is for the 2020/21 session.

Teacher responsible: Dr Guy Michaels 32L.2.10, Prof Yona Rubinstein NAB.5.32, Prof John Van Reenen 32L.2.27A and Prof Stephen Machin 32L.2.06A

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Management (Marketing). This course is not available as an outside option.

Course content: The aim of the course is to familiarise students with main theoretical and empirical issues in current labour economics, to provide them with the tools for carrying out independent research in the field, and to provide a perspective on areas of ongoing research. The course has a strong applied focus. For each major topic covered we will investigate the main available theories in light of their testable implications, and discuss the advantages and limitations of existing empirical work and assess policy options.

Topics include:

- Labour supply, household behaviour, and the allocation of time
- Labour demand and monopsony
- Search, matching, labour market frictions, unions, and unemployment
- Wage determination, compensating differentials, race and gender gaps, and wage inequality
- Human capital, returns to schooling, and training
- Contracts and incentives in the labour market

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This year, at least for Michaelmas term, some or all of the teaching for this course may have to be delivered through a combination of virtual webinars, online videos and virtual classes.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Take-home assessment (100%) in the ST.

EC534

Public Economics for Research Students

This information is for the 2020/21 session.

Teacher responsible: Dr Johannes Spinnewijn 32L.3.24, Dr Xavier Jaravel 32L.3.14 and Dr Daniel Reck 32L.3.16

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: The course will cover the economics of the public sector, including material on taxation, public expenditures and political economics. The course, which covers both theory and empirics, aims to give students a broad overview of this growing field and bring them to the research frontier.

The specific topics covered may vary from year to year, but the following general areas would typically be included:

- Income and wealth inequality
- Behavioural responses to taxes and transfers

- Optimal taxation
- Dynamic taxation
- Behavioural public economics
- Social insurance
- Optimal public good provision

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This year, at least for Michaelmas term, some or all of the teaching for this course may have to be delivered through a combination of virtual webinars, online videos and virtual classes.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of the term. Although the course will not be based on a textbook as such, it will make extensive use of:

- Handbook of Public Economics Vol. 1-4 (A.J. Auerbach and M. Feldstein, eds.)
- Lectures in Public Economics, A.B. Atkinson and J.E. Stiglitz, Princeton University Press, 2015.

Assessment: Problem sets (40%) and exercise (30%) in the MT and LT.

Take-home assessment (30%) in the ST.

The assessment for this course is as follows:

- 1) Four problem sets due throughout the MT and LT terms (40%)
- 2) An "extended replication exercise" (30%), consisting of:
 - a written referee report on that paper (MT)
 - a replication of a paper (empirical paper or paper based on simulations), (beginning of LT)
 - an extension of that paper (which requires developing a research design, positioning the question of the extension in the literature, etc.), (end of LT, start of ST)
- 3) A take-home exam in the ST (30%)

EC535

Development Economics for Research Students

This information is for the 2020/21 session.

Teacher responsible: Prof Maitreesh Ghatak 32L.3.08A, Prof Nava Ashraf 32L.3.17, Dr Gharad Bryan 32L.3.10 and Prof Robin Burgess 32L.3.03

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: The course will cover advanced topics in development economics where current research is active. It is intended to introduce research students in economics to the latest research in development economics and to serve as an input into the research work of these students.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This year, at least for Michaelmas term, some or all of the teaching for this course may have to be delivered through a combination of virtual webinars, online videos and virtual classes.

Formative coursework: Student will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Problem sets (100%) in the MT and LT.

There will be six take home problem sets, three in MT and three in LT. Problem set questions may include an empirical exercise analysing data, a computation exercise, solving a theoretical exercise, or evaluating a recent unpublished working paper. Each problem set will carry equal weight.

EC536

Economics of Industry for Research Students

This information is for the 2020/21 session.

Teacher responsible: Dr Pasquale Schiraldi 32L.4.22, Prof Alessandro Gavazza 32L.4.21 and Prof Martin Pesendorfer 32L.4.19

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: The main goal is to familiarize students with selected theoretical and empirical topics in industrial organization and to put students in a position to do their own research. Classical IO theory, well established empirical techniques including estimation of demand, production and models of strategic interaction and topics at the forefront of current IO research will be covered.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This year, at least for Michaelmas term, some or all of the teaching for this course may have to be delivered through a combination of virtual webinars, online videos and virtual classes

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Problem sets (100%) in the MT and LT.

8 take home problem sets (two for each part - four in MT and four in LT). Each problem set will carry equal weight. Problem set questions may include an empirical exercise analysing data, a computation exercise, solving an analytical problem or evaluating a recent unpublished working paper.

EC537

Microeconomic Theory for Research Students

This information is for the 2020/21 session.

Teacher responsible: Dr Matthew Levy 32L.3.21, Prof Balazs Szentesi 32L.4.05 and Dr Andrew Ellis 32L.3.09

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Pre-requisites: Students must have completed Microeconomics for MRes students (EC441).

Course content: The objective of this course is to provide students with a graduate level introduction to advanced topics and contemporary developments in Microeconomic Theory. Topics will include:

- Classic static and dynamic game theory
- Contract theory
- Bounded rationality
- Psychology and economics.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This year, at least for Michaelmas term, some or all of the teaching for this course may have to be delivered through a combination of virtual webinars, online videos and virtual classes.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Osborne M, and Rubinstein A, A Course in Game Theory, MIT Press, 1994. Fudenberg D, and Tirole J, Game Theory, MIT Press, 1991.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC539

Macroeconomics for Research Students

This information is for the 2020/21 session.

Teacher responsible: Dr Shengxing Zhang 32L.1.16, Prof Benjamin Moll 32L.1.19 and Prof Philippe Aghion 32L.2.30
Dr Maarten De Ridder 32L.1.24

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: Surveys the most recent development in macroeconomics, with an emphasis on technical detail and directions for further research opened up by the material. The goal is to put the students on the research path by bringing them to the research frontier.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This year, at least for Michaelmas term, some or all of the teaching for this course may have to be delivered through a combination of virtual webinars, online videos and virtual classes.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Assignment (100%) in the MT, LT and ST.

The assessment will consist of three take home assignments of equal weighting.

EC540

Political Economy for Research Students

This information is for the 2020/21 session.

Teacher responsible: Prof Torsten Persson TBA, Prof Gilat Levy 32L.4.31, Prof Valentino Larcinese CON.5.02 and Dr Ethan Ilzetzki 32L.1.11

Availability: This course is available on the MRes/PhD in Economics, MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: MRes Economics first year core courses for Economics students, EC400 and adviser's approval for Government students. EC400, EC411 (or equivalent) and course convener's approval for all other students.

Course content: The course will provide students with the economic methodology and tools for the analysis of political decision making and its effect on public policy. We will consider how political institutions shape economic policy, e.g., how do institutions such as election, legislative bargaining, political parties or non-democratic regimes shape redistributive policies, fiscal policies, and the size of government. We will also consider how in the absence of institutions, political attitudes, beliefs and norms shape policies. The course will focus on analytical models and their testable implications.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This year, at least for Michaelmas term, some or all of the teaching for this course may have to be delivered through a combination of virtual webinars, online videos and virtual classes.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Political Economics by T. Persson and G. Tabellini (MIT Press 2000); Special Interest Politics by G. Grossman and E. Helpman (MIT Press 2001); Whither Political Economy? Theories, Facts and Issues, by A. Merlo, in Blundell, Richard, Newey, Whitney and Torsten Persson (eds.), Advances in Economics and Econometrics, Vol.1, Cambridge University Press, 2005; Tim Besley and Torsten Persson, Pillars of Prosperity: The Political Economics of Development Clusters, Princeton University Press
Torsten Persson & Guido Tabellini, 2005; "The Economic Effects of Constitutions," MIT Press Books, The MIT Press; Positive Political Theory 1, Collective Preference, D. Austen-Smith and J. Banks ,

Michigan, 2000; Positive Political Theory 2, Strategy and Structure , D. Austen-Smith and J. Banks , Michigan, 2005.

Assessment: Essay (100%, duration: 2000 words) in the summer exam period.

EC599

Research Paper in Economics

This information is for the 2020/21 session.

Teacher responsible: Various.

Availability: This course is compulsory on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: A research paper, between 5,000 and 10,000 words, related to the student's designated major field, to be submitted in Summer term.

Assessment: Dissertation (100%, 10000 words) in the ST.

EH510

Seminar on Modern Economic History

This information is for the 2020/21 session.

Teacher responsible: Dr Neil Cummins, Dr Eric Schneider, Dr Leigh Gardner and Dr Natacha Postel-Vinay

Availability: This course is available on the MPhil/PhD in Economic History. This course is available as an outside option to students on other programmes where regulations permit.

For research students. Also open to other EH graduate students and attended by LSE and other faculty.

Course content: The seminar provides a context in which research students can discuss with a range of seminar presenters from inside and outside LSE presentations of different aspects of economic development during the modern period.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 8 hours of seminars in the ST.

EH518 Not available in 2020/21

The Economic History of Firms & Industries Seminar

This information is for the 2020/21 session.

Teacher responsible: Dr Gerben Bakker SAR 5.09

Availability: This course is available on the MRes/PhD in Management (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit.

For research students. Also open to other EH graduate students and attended by LSE and other faculty.

Course content: The seminar provides a context in which research students can discuss with a range of seminar presenters from inside and outside LSE presentations of different aspects of economic development. Presentations in this seminar relate particularly to economic development issues beyond the N American-European area, including aspects of global economic history.

Teaching: 6 hours of seminars in the MT. 6 hours of seminars in the LT. 6 hours of seminars in the ST.

EH520**Approaches to Economic and Social History**

This information is for the 2020/21 session.

Teacher responsible: Prof Mary Morgan SAR 609, Dr Neil Cummins SAR 513 and Prof Oliver Volckart SAR 610

Availability: This course is available on the MPhil/PhD in Economic History. This course is not available as an outside option.

This course is primarily structured for 1st year MPhil students in the Department of Economic History, for whom attendance is compulsory.

Course content: Approaches to Economic and Social History

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 8 hours of seminars in the ST.

Formative coursework: Written work and presentations as required by the Doctoral Programmes Director.

Indicative reading: There is no indicative reading list for this course as readings are updated annually to reflect student's interests.

Assessment: This course has no summative assessment.

EH590**Thesis Workshop in Economic History**

This information is for the 2020/21 session.

Teacher responsible: Dr Neil Cummins SAR 513 and Dr Anne Ruderman SAR 506

Availability: This course is compulsory on the MPhil/PhD in Economic History. This course is available on the MRes/PhD in Quantitative Economic History. This course is not available as an outside option.

Course content: Thesis workshop in Economic History.

Teaching: 26 hours of seminars in the MT. 34 hours of seminars in the LT. 8 hours of seminars in the ST.

Assessment: This course is not examined.

EU550**Research Workshop in European Studies**

This information is for the 2020/21 session.

Teacher responsible: Prof Waltraud Schelkle CBG.6.01, Prof Simon Glendinning CBG.7.01 and Prof Jonathan White CBG.7.09
Waltraud Schelkle is convenor for this course.

Availability: This course is compulsory on the MPhil/PhD in European Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is recommended for those second and third year PhD students in the Government Department whose research focuses on European topics.

Course content: Presentation and detailed discussion of PhD related research, outlines and progression. Discussion of thesis chapters and related doctoral research, with an emphasis on research design and methodology. Practice conference panel sessions. A detailed syllabus is fixed at the start of each term.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across the Michaelmas and Lent Terms. It will be delivered through online and/or in-person seminars.

Assessment: There is no examination for this course. Regular attendance and active participation is required. All students are required: to present at least one substantial chapter/paper draft; to act as a discussant on another paper; and to read papers in advance of the seminar in which they are discussed.

EU555 Not available in 2020/21**Political Economy and Public Policy Workshop**

This information is for the 2020/21 session.

Teacher responsible: Dr Sara Hagemann, Prof Mark Thatcher, Dr Stephen Woolcock and Dr James Morrison

Availability: This course is available on the MPhil/PhD in European Studies. This course is available with permission as an outside option to students on other programmes where regulations permit. This workshop is jointly organised by the European Institute, the Government Department and the International Relations Department for research students of these departments working in the general area of political economy and public policy and who have usually passed their first year. Research students from other departments wishing to attend should contact the teachers responsible. It should be noted that the course has three codes- EU555, GV555 and IR555.

Course content: Presentation and intense discussion of thesis outlines, chapters and related work. A detailed programme is fixed at the start of the year. Seminar presentations by outside speakers may be added.

Teaching: 7 hours and 30 minutes of seminars in the MT. 7 hours and 30 minutes of seminars in the LT.

Seminars take place every other week throughout MT and LT. There is also a mini-conference in the ST, organised by the students themselves.

Assessment: There is no examination for this course. Regular attendance and active participation by all students is required. Each attending student has to give at least one presentation of their thesis research.

FM502**Corporate Finance for Research Students**

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Burkart, Prof Daniel Paravisini Maggi, Dr Ashwini Agrawal and Prof Martin Oehmke

Availability: This course is compulsory on the MRes/PhD in Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. Doctoral students in the Departments of Finance and Economics, and other students with the permission of the PhD Finance Programme Director

Course content: The first half of this course focuses on the theory of corporate finance. The theory half of the course can, in turn, be subdivided into two parts. The first part reviews some of the classical concepts in corporate finance, using tools from game and contract theory to study incentive and information problems at the level of the firm, examining how financial contracts can be designed to mitigate these problems. This part of the course also considers how takeovers and ownership concentration can help to mitigate conflict of interests among insiders and investors in firms. The second part focuses on the theory of financial intermediation. This component reviews classic theories of financial intermediation and will introduce students to some recent work in this field.

The second half of the course will consider empirical research in corporate finance. Several lectures will be devoted to understanding and applying commonly used research methodologies, such as randomized control trials, instrumental variables in linear regressions, regression discontinuity designs, event studies, and structural estimation techniques. There will also be extensive discussion of subtopics within empirical corporate finance, such as firm financial policy, investment behaviour, control transactions, corporate governance, financial intermediation, household finance, consumer finance, and overlapping topics with industrial organization and labour economics. For each topic, time will be devoted to assessing current levels of active research and open questions for further work. A significant portion of time will

also be spent critically evaluating empirical papers through referee reports and discussions. Students will also have the opportunity to consider various processes that different researchers follow to generate ideas, collect data, write papers, and manage the publication process.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Indicative reading: Readings will be mainly based on books and journal articles including:

Tirole, Jean, *The Theory of Corporate Finance*, 2006, Princeton University Press. Freixas, X. and Rochet, J.C., *The Microeconomics of Banking*, 1997, MIT Press. J. Wooldridge, *Econometric Analysis of Cross-Section and Panel Data*, Cambridge: The MIT Press, 2002. M. Roberts and T. Whited: "Endogeneity in Empirical Corporate Finance," *Handbook of the Economics of Finance*, vol. 2.

Assessment: Project (25%) and in-class assessment (75%) in the LT.

FM503

Asset Pricing for Research Students

This information is for the 2020/21 session.

Teacher responsible: Dr Georgy Chabakauri CON 1.01, Dr Dong Lou CON 1.01 and Prof Dimitrios Vayanos CON 1.01

Availability: This course is compulsory on the MRes/PhD in Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course is divided into two parts relating to theoretical and empirical asset pricing. The theoretical half of the course covers dynamic models of frictionless markets, both in discrete and in continuous time, and models with frictions, such as asymmetric information, costs of search and market participation, leverage constraints and delegated asset management. The empirical half of the course is dedicated to an empirical evaluation of asset-pricing models. Representative-agent models (with power, habit and recursive preferences) and their application to the valuation of equities are covered. Next, no-arbitrage term-structure and option-pricing models are discussed. The class concludes with equilibrium and reduced-form models of currencies.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Indicative reading:

- Darrell Duffie *Asset Pricing Theory*, Princeton University Press
- David Kreps, *The Black-Scholes-Merton Model as an Idealization of Discrete-Time Economies*, Econometric Society Monograph, Cambridge University Press.
- John Campbell, 1999, Asset prices, consumption, and the business cycle, in J. B. Taylor and M. Woodford, Eds., *Handbook of Macroeconomics*, Volume 1C, Elsevier Science B.V
- John Campbell, 2017, *Financial Decisions and Markets: A Course in Asset Pricing*, Princeton University Press
- John Cochrane, 2004, *Asset Pricing*, Princeton University Press
- Kenneth Singleton, 2006, *Empirical Dynamic Asset pricing*, Princeton University Press

Assessment: Coursework (30%) and in-class assessment (70%) in the LT.

Coursework includes project and homework.

FM505

PhD Seminar in Finance

This information is for the 2020/21 session.

Availability: This course is compulsory on the MRes/PhD in Finance. This course is not available as an outside option.

Course content: This is a seminar course for PhD students in the early stages of their research to present their work in progress. Outside speakers may also be invited from time to time.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 6 hours of seminars in the ST.

Other meetings to be arranged as necessary.

Assessment: Essay (100%, 10000 words) in August.

A 10,000 word essay on a topic to be agreed with the student's supervisor. This essay is to be submitted by the end of August.

GI500

Doctoral Workshop: Department of Gender Studies

This information is for the 2020/21 session.

Teacher responsible: Prof Wendy Sigle

Availability: This course is compulsory on the MPhil/PhD in Gender. This course is not available as an outside option.

Course content: The aim of this seminar is to give students experience and practice in critically assessing and providing feedback on one another's work. The focus of the seminar is on the research process. First year students are expected to present their work in progress towards their upgrade. Second and third year students are each expected to share some part of their dissertation research at least once per year. Some sessions may be used for professional training or personal development/well-being.

Teaching: The seminar will run in MT, LT, and ST, and will involve both asynchronous and synchronous interactive components. First year students must also audit GI424 Gender Theories in the Modern World (seminars with permission) and GI402 Gender, Knowledge and Research Practice (full participation in course). All students are expected to participate in courses run by the Department of Methodology, LSE Gender or within the School as advised by their supervisors. Students are also expected to participate in research seminars and public lectures.

Indicative reading: PhD chapters and articles suggested by students relevant to their topic.

Assessment: No summative assessment, but attendance and participation is considered part of the overall formal assessment of progress, including upgrade at the end of the first year and annually thereafter. Students are normally expected to attend GI500 until the end of their third year.

Students should refer to the PhD handbook for advice on milestones.

GV501

Doctoral Workshop: Political Theory

This information is for the 2020/21 session.

Teacher responsible: Prof Kai Spiekermann

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option.

Compulsory for PhD students in the Government Department specialising in political theory.

Course content: An opportunity for students to present chapters or papers related to their current research for critical discussion.

Teaching: There are typically 5 sessions in MT and 5 sessions in LT, and a variable number of sessions in ST, totalling around 18 hours of workshops across the terms. The precise schedule will be made available at the start of each term. This year, some or all of these workshops will be delivered through a combination of online and on-campus workshops/seminars. There will be a reading week in Week 6 of both the MT and LT.

GV503

Political Philosophy Research Seminar

This information is for the 2020/21 session.

Teacher responsible: Dr Signy Gutnick Allen

Availability: This course is available on the MRes/PhD in Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit. Compulsory for all PhD students in the Government Department specialising in political theory. Other interested students are welcome to attend, if numbers permit.

Course content: Guest speakers present papers and initiate discussion at seminars.

Teaching: There are typically 5 sessions in MT and 5 sessions in LT, and a variable number of sessions in ST, totalling around 18 hours of workshops across the terms. The precise schedule will be made available at the start of each term. This year, some or all of these workshops will be delivered through a combination of online and on-campus workshops/seminars. There will be a reading week in Week 6 of both the MT and LT.

Assessment: No assessment

GV504

Research Methods in Political Theory

This information is for the 2020/21 session.

Teacher responsible: Jan Kandiyali

Availability: This course is available on the MRes/PhD in Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides an introduction to the philosophical and methodological foundations of political theory. It aims to give doctoral students a comprehensive conceptual toolbox that can be brought to bear on many different substantive problems and research questions in political theory and neighbouring fields and will prepare doctoral students for choosing and reflecting on their methodological approach. The course runs in concurrence with the Political Philosophy Research Seminar and the Doctoral Workshop in Political Theory, complemented by a reading group in the Lent Term on methodological questions in political theory.

Teaching: This course is made up of seminars totalling 10 hours in the Lent Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus meetings/seminars. There will be a reading week in Week 6. The seminars run in concurrence with GV501 and GV503, for which attendance is compulsory if students are taking GV504. These courses are made up of 18 hours of workshops/seminars each, which run throughout the Michaelmas, Lent and Summer Terms.

Formative coursework: Regular presentations in the reading group.

Indicative reading: Some possible choices for the reading group:

- Joseph Raz, *The Morality of Freedom*, Oxford University Press (1986).
- Nadia Urbinati, *Me the People: How Populism Transforms Democracy*, Harvard (2019).
- Katrina Forrester, *In the Shadow of Justice: Postwar Liberalism and the Remaking of Political Philosophy*, Princeton (2019).
- Josiah Ober, *Demopolis*, Cambridge University Press (2017).
- William Claire Roberts, *Marx's Inferno*, Princeton University Press (2016).
- Tommie Shelby, *Dark Ghetto*, Harvard University Press (2016).
- Timothy Scanlon, *Being Realistic about Reasons*, Oxford University Press (2013).
- Rahel Jaeggi, *Alienation*, Columbia University Press (2016).
- Rainer Forst, *Normativity and Power*, Oxford University Press (2017).
- Daniel Lee, *Popular Sovereignty in Early Modern Constitutional*

Thought, Oxford University Press (2016).

- Cecile Laborde, *Liberalism's Religion*, Harvard University Press (2017).
- Claire Chambers, *Against Marriage*, Oxford University Press (2017).

Assessment: Essay (50%, 4000 words) in the LT.

Essay (50%, 4000 words) in the ST.

The essay topics will be chosen in consultation with the course convenor, but typically, one will reflect on a paper given by a visiting speaker in the Doctoral Research Seminar, and the other on one or more of the books read for the Lent term Reading Group.

GV513 Half Unit

Qualitative Methods in the Study of Politics

This information is for the 2020/21 session.

Teacher responsible: Dr Steffen Hertog

Availability: This course is available on the MRes/PhD in Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit. Other PhD students must request permission from the class teacher, which is routinely granted subject to capacity.

Course content: This course introduces and critically evaluates a range of qualitative techniques and methods in political science. It builds students' capability to select, reject, and deploy them in research design and practice.

The course begins with debates over the place of qualitative methods in political science, and the question of how to match ideas to methods. The rest of the course is devoted to exploring a range of qualitative techniques, including case selection, case studies and process tracing, comparisons, interviews and field research, qualitative comparative analysis, and "mixed methods". The content of each week will be integrated as closely as possible with participants' own research projects (even if qualitative work constitutes only a small part thereof). The course is relevant for political scientists, but also students of development and international relations.

Teaching: 20 hours of seminars in the Lent Term, likely combining online and on-campus teaching, complemented by small-group work outside of the seminars. This course includes a reading week in Week 6.

Indicative reading: G. King, R. Keohane, and S. Verba, *Designing Social Inquiry: Scientific inference in qualitative research* (Princeton, 1994). Antoinette Burton ed., *Archive Stories: Facts, Fictions, and the Writing of History* (Duke University Press, 2006); David Collier and Henry Brady, *Rethinking Social Inquiry* (Rowman and Littlefield 2010); John Gerring, *Case Study Research: Principles and Practices* (Cambridge University Press 2007).

Assessment: Essay (30%, 2500 words) in the LT.

Project (70%, 3000 words) in the ST.

Students are assessed by two pieces of work:

(1) An essay answering one question from a list to be provided in Lent Term (up to 2500 words)

The deadline for this work will fall into Week 9 of Lent Term. It will be worth 30% of the final mark.

(2) A thorough critique of an article applying one or more of the methods discussed in this course, focused on its research design and execution (3000 words).

The deadline for this work will fall into the first week of Summer Term. It will be worth 70% of the final mark.

GV514**Political Science and Political Economy
Doctoral Workshop****This information is for the 2020/21 session.****Teacher responsible:** Dr Stephane Wolton**Availability:** This course is available on the MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Mainly for second and subsequent year research students and staff in Government and elsewhere in the School involved in research in political science and/or political economy. First year MRes and research students are welcome to attend.

Course content: The PSPE Doctoral Workshop/Work in Progress Seminar is intended as a setting in which Research Students from the Government Department present and receive feedback on early stage and ongoing research projects. In weeks when research students do not present, LSE PhD students, LSE staff, and visiting scholars from other departments will present. The Seminar aims to foster a strong and lively research community and as such, welcome empirical or theoretical work linked in any way to politics or political economy.**Teaching:** The workshop will meet every week, totalling a minimum of 40 hours' meeting time across the Michaelmas, Lent and Summer Terms. This year, some or all of these workshops will be delivered through a combination of online and on-campus meetings.**Assessment:** Not assessed.**GV517 Half Unit****Comparative Political Economy: New
Approaches and Issues in CPE****This information is for the 2020/21 session.****Teacher responsible:** Prof Catherine Boone and Prof David Soskice**Availability:** This course is available on the MPhil/PhD in European Studies, MRes/PhD in International Development, MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is open to research students from any of the LSE departments.

Pre-requisites: This course will be open to research students (MRes and PhD students) from any of the LSE departments.**Course content:** This half-unit reading seminar will survey a set of major topics in the Comparative Political Economy (CPE) of advanced capitalist and developing countries. We will consider different analytic strategies for conceptualizing variation in national economic structure, explaining change in economic structure, and understanding the political causes and effects thereof. The seminar is designed for MRes and PhD students (research students) across the School wanting to familiarize themselves with some of the major themes, controversies, and research frontiers in CPE. Our goal is to nurture innovation in doctoral-level CPE research at the LSE.

While situating our analyses in the context of a changing global economy, our focus will be on describing and explaining transformation at the level of nation states. Drivers of change can be found in the locus and organization of political power, in technological change, and/or in the dynamics of capital. Our seminar will explore both productive connections and tensions that emerge across these explanatory models.

Course materials are organized around three major topic areas (though like most else in CPE they are interrelated): redistribution, accumulation, and domestic regimes. A great many questions fit into these areas and our idea is that the seminars should enable students to raise issues related to their research.

Teaching: This course provides a minimum of 30 hours of

seminars in the Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus seminars. There will be a reading week in MT Week 6.

Formative coursework: For formative work, feedback will be provided on a dissertation proposal or chapter.**Indicative reading:** Pablo Beramendi, Silja Hausermann, Herbert Kitschelt, and Hanspeter Kriesi, "Introduction," in Beramendi et al, *The Politics of Advanced Capitalism* (Cambridge U. Press/CUP, 2015). Torben Iversen and David Soskice, *Democracy and Prosperity: Reinventing capitalism through a turbulent century* (CUP 2019). Bruce Achen and Larry Bartels, *Democracy for Realists: Why elections do not produce responsive government* (Princeton, 2016). Kay Schlozman, Henry Brady and Sidney Verba, *Unequal and Unrepresented: Political Inequality and the People's Voice in the New Gilded Age* (Princeton University Press, 2018). Pablo Beramendi, *The Political Economy of Inequality: Regions and Redistribution* (CUP, 2012). Jonathan Rodden, *Why Cities Lose: The Deep Roots of the Urban-Rural Divide*, (Basic, 2019). Richard Baldwin, *The Globotics Upheaval: Globalization, Robotics, and the Future of Work* (London: W&N, 2019), Chs. 4, 7. Melissa Zeigler Rogers, *The Politics of Place and the Limits to Redistribution* (Routledge 2016). Gary Gereffi, *Global Value Chains and Development: Redefining the contours of 21st century capitalism* (CUP 2018). Rina Agrawala, *Informal Labor, Formal Politics, and Dignified Discontent in India* (CUP 2014). Julia Lynch, *Regimes of Inequality: The Political Economy of Health and Wealth* (CUP 2019). L-E Cederman, K. Gleditsch, and H. Buhaug, *Inequality, Grievances and Civil War* (CUP 2013).**Assessment:** Coursework (100%, 5000 words) in the LT.

Each student will submit a 20-25 page (double spaced) research paper, dissertation proposal, or draft dissertation chapter as the basis of assessment for this course.

GV599**Research Prospectus in Political Science****This information is for the 2020/21 session.****Teacher responsible:** Prof Sara Hobolt**Availability:** This course is compulsory on the MRes/PhD in Political Science. This course is not available as an outside option. For MRes/PhD students in Political Science only.**Course content:** A research paper, not to exceed 10,000 words, related to the student's designated major field, to be submitted in August.**Assessment:** Research project (100%, 10000 words) in August.**GV5X1****Research Design in the Social Sciences****This information is for the 2020/21 session.****Teacher responsible:** Dr Daniel Berliner, Dr Steffen Hertog, Prof Sara Hobolt (Convener), Prof Kai Spiekermann and Prof Torun Dewan**Availability:** This course is compulsory on the MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.**Course content:** The aim of this course is to help PhD students develop a research design. Students will learn how to find their research questions, choose a feasible data collection or modelling strategy, and match data collection and analytic methods to the aims of the PhD project. We also consider the relation of political theory and political science. This course is therefore designed to be a primer in asking the right questions, exploring the options available to us and understanding the consequences of the design decisions that we make. Accordingly, this course is ultimately about turning good research questions into systematic projects that deliver interesting and worthwhile results. We also debate

issues in research ethics and provide advice on publication strategies. Students will have opportunities to present their own research designs and get feedback from peers and teachers.

Teaching: This course provides a combination of seminars and lectures totalling 20 hours in the Michaelmas Term and 20 hours in the Lent Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will also be a reading week in Week 6 of each term.

Formative coursework: This is a PhD level Research Design course. Students submit two summative pieces of work: a referee report as well as their research design. They will also give presentations and receive extensive feedback on their work in progress. These are part of formative rather than summative assessment and are an important part of professional development. The main learning outcomes are to help the PhD students develop professional research designs.

Indicative reading: King, G., R. Keohane & S. Verba (1994) *Designing Social Inquiry*. Princeton UP. Box-Steffensmeier, J., H. Brady & D. Collier (eds) (2008) *The Oxford Handbook of Political Methodology*. OUP. Dunning, T. (2012) *Natural Experiments in the Social Sciences: A Design-Based Approach*. CUP. Dryzek, J., B. Honig & A. Phillips (eds.) (2008) *The Oxford Handbook of Political Theory*. OUP.

Assessment: Essay (25%, 2500 words) in the MT. Research project (75%) in the ST.

GV5X2

Research Paper in Comparative Politics

This information is for the 2020/21 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the relevant MSc programme and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 10,000 word research paper to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X3

Research Paper in European Politics and Policy

This information is for the 2020/21 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the relevant MSc programme and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor.

Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option.

Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 5,000 word research paper to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5XD Half Unit

Research Paper in European Politics and Policy

This information is for the 2020/21 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the relevant MSc programme and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 5,000 word research paper to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GY500

Research Project Seminar

This information is for the 2020/21 session.

Teacher responsible: Prof Olmo Silva STC 5.06A, Prof Simon Dietz and Dr Romola Sanyal

Availability: This course is compulsory on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Human Geography and Urban Studies and MPhil/PhD in Regional and Urban Planning Studies. This course is not available as an outside option.

Attendance is compulsory for all MPhil/PhD students in the Department of Geography and Environment, unless a student is conducting approved fieldwork.

Course content: Presentations by research students of aspects of their own research, stressing problems of theory, methodology and techniques. These will either be scheduled in person, on campus; or in live online meetings.

Teaching: A series of workshops, running throughout the year, organised by each of the three research clusters in the Department of Geography & Environment (Economic Geography; Environmental Economics & Policy; Urbanisation, Planning and Development).

Formative coursework: All students attending this course will be required to present their own research once each year.

Assessment: This course is not intended as preparation for any particular examination.

GY502

Staff / Research Students Seminars

This information is for the 2020/21 session.

Teacher responsible: Dr Sefi Roth STC4.21a, Dr Ryan Centner STC 6.01c and Dr Felipe Carozzi, STC 4.16

Availability: This course is compulsory on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Human Geography and Urban Studies and MPhil/PhD in Regional and Urban Planning Studies. This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics and MPhil/PhD in Human Geography and Urban Studies. This course is available with permission as an outside option to students on other programmes where regulations permit. For all MPhil/PhD students registered in the Department of Geography and Environment and staff. Other interested students may attend.

Course content: Topical seminar series involving presentations by speakers from both inside and outside the Department on aspects of their own research.

Teaching: There are three different seminar series taking place regularly throughout the year, organised by each of the three research clusters in the Department of Geography & Environment. The Economic Geography cluster seminar series is organized in conjunction with the Spatial Economics Research Centre (SERC); the Environmental Economics & Policy cluster seminar series is organized together with the Grantham Research Institute on Climate Change and the Environment; and the Urbanisation, Planning and Development seminar series. The timing and

length of each seminar series vary across research clusters and schedules and format are subject to change depending on the availability of speakers.

Assessment: This course is not intended as preparation for any particular examination. But, students will find it useful in increasing their awareness of current research and the application of research methods across the discipline.

GY503

Writing the World

This information is for the 2020/21 session.

Teacher responsible: Dr Austin Zeiderman STC 601D and Dr Megan Ryburn LACC

Availability: This course is compulsory on the MPhil/PhD in Human Geography and Urban Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The word “geography” derives from a Greek term whose literal translation is “earth description” or “writing the world.” At a basic level, it refers to the art of producing written accounts of people and their environments based on first-hand knowledge. The institutionalization of geography in the nineteenth century paralleled the professionalization of academic disciplines in the service of empire and capital. This course provides a space for reengaging with the practice of “writing the world” as a shared intellectual pursuit.

GY503 has two main objectives, both of which are designed to support the intellectual and career development of doctoral students in human geography, planning, urban studies, and related disciplines. The first objective is to provide advanced training in research-based writing. The second objective is to foster critical engagement with classic and current texts of a geographical nature. Both objectives are to be achieved collectively by bringing together doctoral students and academic staff to meet regularly throughout the year.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a series of workshops across Michaelmas, Lent and Summer Terms.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

The core participants in GY503 are doctoral students at all stages. Academic staff and postdoctoral fellows from the Urbanisation, Planning and Development cluster of the Department of Geography & Environment are also strongly encouraged to participate.

Formative coursework: Students will be expected to produce 1 essay.

Doctoral students participating in this course will have the opportunity to workshop a draft of their written work (approximately 10,000 words) once during the year. Example of suitable submissions include working drafts of thesis chapters, journal articles, and research proposals. Participants are expected to attend all meetings and to have read the specified materials beforehand.

GY520

Environmental Regulation: Implementing Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Richard Perkins STC.S413, Dr Michael Mason, Dr Eugenie Dugoua and Dr Nora Sylvander

Availability: This course is available on the MPhil/PhD in Environmental Economics and MPhil/PhD in Environmental Policy

and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

This course cannot be taken with GY465 Concepts in Environmental Regulation or GY475 Issues in Environmental Governance or GY420 Environmental Regulation: Implementing Policy.

Course content: This course provides critical insights into the characteristics, processes and evolving dynamics of environmental policy, regulation and governance. In MT, the course considers the rationale for public policy intervention, and the factors that shape the influence of different interest groups over government policy making. It proceeds to examine the nature, design and performance of different policy instruments, together with the various influences governing policy implementation processes. In LT, the course highlights key themes in environmental regulation informed by the concept of multi-level governance. This concept suggests new alignments and forms of regulation within and across state borders: the themes chosen to explore this concept include governing technological change, international negotiations, governance beyond the state, and different rationalities of regulation (science, ethics and justice).

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across both Michaelmas Term and Lent Term. This course includes a reading week in Week 6 of Michaelmas Term and Lent Term.

Formative coursework: Students are expected to prepare one formative piece of coursework in the MT: feedback will be provided. In the LT, students are required to give one presentation on an agreed topic: feedback will be provided.

Indicative reading: While there is no one single text that covers all aspects of the course, you are strongly advised to consult the following:

Core reading, MT: D Fiorino (2006) *The New Environmental Regulation*, London: MIT Press; J Holder and M Lee (2007) *Environmental Protection Law and Policy* (2nd edition), Cambridge: Cambridge University Press; S Bell, D McGillivray, O Pedersen, E Lees and E Stokes (2017) *Environmental Law* (9th edition), Oxford: Oxford University Press. Core reading, LT: S Barrett (2005) *Environment and Statecraft: The Strategy of Environmental Treaty-Making*, Oxford: Oxford University Press; A Gupta and M Mason (eds.) (2014) *Transparency in Global Environmental Governance*, Cambridge, MA: MIT Press; S Piattoni (2010) *The Theory of Multi-level Governance*, Oxford: Oxford University Press; A Randall (2011) *Risk and Precaution*, Cambridge: Cambridge University Press.

Assessment: Essay (100%, 6000 words) in the ST.

GY526 Half Unit Not available in 2020/21

Advanced Methods in Environmental and Resource Economics: Time, Risk and Environmental Policy

This information is for the 2020/21 session.

Teacher responsible: Dr Antony Millner FAW Grantham Research Institute and Prof Benjamin Groom STC 420

Availability: This course is available on the MPhil/PhD in Environmental Economics. This course is available with permission as an outside option to students on other programmes where regulations permit.

A strong background in economics is required to take this course

for credit. A Master's degree in economics or equivalent will usually be required. Students from the MSc in Environmental Economics and Climate Change and those enrolled on GY426: Environmental and Resource Economics are allowed to audit the course.

Pre-requisites: The course will be core training for the PhD in Environmental Economics. A background in Economics is therefore required to take this course. Students taking the MSc in Environmental Economics and Climate Change or students enrolled on the GY426: Environmental and Resource Economics can audit the course.

Course content: Many of the most important environmental problems require us to choose between policy options with very uncertain, very long-run, consequences. Climate change provides an archetypal example, but this is also true of e.g. biodiversity loss and the decline in global fisheries. This half unit course will introduce you to the decision tools economists use to inform long-run, uncertain, policy choices. We will critically examine these tools, and how they are applied in environmental economics. The aim is to provide you with enough technical background to be able to read current research papers in the field, evaluate their claims for yourself, and begin to formulate your own research questions. Topics will include intertemporal choice and discounting, risk, uncertainty and learning, catastrophes, and some more advanced discussion of dynamic optimization. We will connect some of the economics literature on these topics to parallel discussions in philosophy. We will illustrate the theory we cover with applications to common-pool resource problems, climate change, and renewable and exhaustible resource management.

There will be 5 x 2 hour lectures:

- 1) Inter-temporal Decision Making;
- 2) Risk and Uncertainty;
- 3) Information and Learning;
- 4) The Economics of Catastrophes;
- 5) Elements of Dynamic Optimisation.

Teaching: 10 hours of lectures and 5 hours of seminars in the LT.

There will be 5 x 2 hour lectures:

- 1) Inter-temporal Decision Making;
- 2) Risk and Uncertainty;
- 3) Information and Learning;
- 4) The Economics of Catastrophes;
- 5) Elements of Dynamic Optimisation.

Formative coursework: Students will be expected to produce 5 problem sets in the LT.

Formative coursework will take the form of a problem set each week.

Indicative reading: Human well-being and the natural environment. Partha Dasgupta, Oxford University Press, 2004; *Valuing the Future: Economic Theory and Sustainability*. Geoffrey Heal, Columbia University Press, 2000; *Pricing the Planet's Future*. Christian Gollier, Princeton University Press, 2012; *Intergenerational Equity*. Geir Asheim, *Annual Review of Economics*. volume 2, 197-222; *On Second-Best National Saving and Game Equilibrium Growth*. E. Phelps and R. Pollak, *Review of Economic Studies*; *The Economics of Risk and Time*, Christian Gollier. MIT Press, 2004; *Theories of Decision under Uncertainty*. Itzhak Gilboa, *Econometrics Society Monograph*. 2009.

Assessment: Project (100%, 5000 words) in the ST.

The summative assessment project counts for 100% of the overall grade for the course. This project will test understanding of the theoretical methods and their application to real world problems.

GY574 Half Unit

Politics of Environment and Development

This information is for the 2020/21 session.

Teacher responsible: Dr Kasia Paprocki STC 4.21b and Dr Julia Corwin STC 4.14

Availability: This course is compulsory on the MPhil/PhD in Environmental Policy and Development. This course is not

available as an outside option.

Course content: This course explores key themes at the intersection of development and environmental politics. Specifically, the course is centred on the applications of political ecology, critical development studies, and materialist human geography to topics in environment and development. In exploring the complex relationships between historical dynamics of development, inequality, and the environment, it covers a range of important natural resource and environmental issues, such as climate change, conservation, waste, and environmental social movements.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Indicative reading:

- Li, T (2007), *The Will to Improve*, Durham: Duke University Press.
- Robbins, P (2012), *Political Ecology: A Critical Introduction*, Oxford: Wiley-Blackwell
- Scott, J (1991) *Seeing Like a State: How Certain Schemes to Improve the Human Condition Have Failed*, New Haven: Yale University Press.
- West, P (2006) *Conservation is Our Government Now: The Politics of Ecology in Papua New Guinea*. Durham: Duke University Press.
- Wolford, W (2010) *This Land Is Ours Now: Social Mobilization and the Meanings of Land in Brazil*. Durham: Duke University Press.

Assessment: Essay (100%, 6000 words) in the ST.

HP500

Advanced Health Policy and Health Economics

This information is for the 2020/21 session.

Teacher responsible: Prof Andrew Street COW 1.02, Dr Mylene Lagarde COW 3.02, Dr Justin Parkhurst COW 2.12 and Dr Huseyin Naci COW 3.01

Availability: This course is compulsory on the MPhil/PhD in Health Policy and Health Economics. This course is not available as an outside option.

Course content: The PhD programme is centred around this core course and all students registered in their 1st, 2nd or 3rd year are expected to attend.

Alongside a set of bespoke lectures, the course includes a journal club where key articles are critically appraised and a series of seminars given by faculty in the Department of Health Policy and external speakers, thereby guaranteeing exposure to different materials, research areas, and theoretical perspectives and analytical techniques.

Students will be required to participate in work-in-progress seminars where students present work relating to their theses and contribute fully to discussions on their colleagues' work. The course will provide students with insights into the breadth of work in the areas of health and social care policy and health economics, and will act as a supportive critical forum for discussion of each PhD student's work-in-progress.

Teaching: 8 hours of lectures and 8 hours of seminars in the MT. 8 hours of lectures and 8 hours of seminars in the LT. 8 hours of lectures and 8 hours of seminars in the ST.

Over the course of the academic year, 24 hours of lectures 24 hours of seminars will take place.

Students on the course will have reading weeks in Week 6 of both Michaelmas and Lent Terms.

Formative coursework: Students will be expected to produce two one-hour presentations over the course of the academic year. In one of these, the student is to contribute to the course's journal club by critically appraising an important contribution to the health policy or health economics literature. In the other

instance, students will present work-in-progress, thereby showing understanding of the concepts of the course and its application in designing their PhD thesis.

Indicative reading: Tim Bhattacharya, Timothy Hyde, and Peter Tu: *Health Economics* (Palgrave Macmillan 2014). Robert H. Blank and Viola Desidera Burau: *Comparative Health Policy*, 3rd edition (Palgrave Macmillan 2013). Peter Burnham: *Research Methods in Politics*, 2nd edition (Palgrave Macmillan 2008). Michael F Drummond et al.: *Methods for the Economic Evaluation of Health Care Programmes* (Oxford University Press 2015). Sherry Glied and Peter Smith: *The Oxford Handbook of Health Economics* (Oxford University Press 2013). Andrew M Jones ed.: *The Elgar Companion to Health Economics*, 2nd edition (Edward Elgar 2013). Stephen Morris et al.: *Economic Analysis in Health Care*, 2nd edition (Wiley 2013)

Assessment: Oral examination (100%).

Summative assessment in the first year of full-time PhD enrolment will consist of a 5,000 word thesis document detailing students' thesis proposal, including research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. Students are subject to a viva voce and marking of this document by the two non-supervisory members of the department who make the decision on upgrading. Students will be required to achieve a minimum grade of 60%.

HY501

International History Research Student Workshop

This information is for the 2020/21 session.

Teacher responsible: Dr Tanya Harmer SAR.M.11

Availability: This course is compulsory on the MPhil/PhD in International History. This course is not available as an outside option.

Course content: The workshop aims to introduce students to effective archival research, issues in the preparation of a thesis and means of launching a career in academic or related fields; and the opportunity to present research in progress.

Students yet to pass their upgrade from MPhil to PhD attend the Introductory Workshop, which meets weekly in the Michaelmas term. Meetings are devoted to research and interviewing techniques and mainly practical issues of historical research. Students due to be upgraded attend the Advanced Workshop held in the Lent and Summer terms, the frequency of meetings depending upon the number of participants. The meetings are intended primarily as a forum for reviewing research in progress, with a view to enabling students to pass their upgrade.

Teaching: Students will engage with workshop content in large and small group meetings.

Assessment: This course is not assessed.

HY509

International History Research Seminar

This information is for the 2020/21 session.

Teacher responsible: Dr Tanya Harmer SAR.M.11

Availability: This course is available on the MPhil/PhD in International History. This course is not available as an outside option.

MA/MSc students are welcome to attend.

Pre-requisites: There are no pre-requisites for attending but students wanting to present their research need to have passed their upgrades to PhD status.

Course content: This research seminar is convened by PhD students in International History and offers the opportunity for second, third and fourth year PhD students to present their research for discussion in conversation with others. Staff from

within the department as well as invited guests from beyond the LSE will participate as discussants and presenters.

Teaching: Seminars will take place either on campus or via Zoom, as circumstances permit.

Assessment: This course is not assessed.

HY510

Cold War History Research Seminar

This information is for the 2020/21 session.

Teacher responsible: Dr Svetozar Rajak SAR 3.15

Availability: This course is available on the MPhil/PhD in International History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Second and third year PhD students will present their research for discussion. There will also be seminars by staff from within and outside the department on their own research with relevance for PhD students either in terms of subject and/or methodology.

Teaching: Seminars will be held either on campus or via Zoom, as circumstances dictate.

Indicative reading: See the webpage for the course for further details.

Assessment: The course is not assessed.

IR501

Methods in International Relations Research

This information is for the 2020/21 session.

Teacher responsible: Dr Milli Lake CBG.8.03 and Prof Benjamin Dodge CBG.9.02

Availability: This course is compulsory on the MPhil/PhD in International Relations. This course is not available as an outside option.

Course content: The main objective of this course is to offer students an introduction to and route map through the principal approaches to contemporary research in the main branches of International Relations and to help students identify the appropriate methods for their own thesis. The course will investigate the relationship between theory and method in the conduct of research. It will encourage students to think about the trade-offs and tensions involved in choosing specific methods and research designs. Our aim is to facilitate student learning so that each research student can comprehend, critically interrogate and engage with scholarship employing diverse methodological toolkits. The end result aimed for is well-rounded and professional academics that are familiar and hence intellectually at ease with the plurality of methodological and theoretical approaches available to those conducting cutting edge research in International Relations.

The course therefore aims to expose students to, and generate awareness of, a variety of research methods in the discipline irrespective of the particular approach students employ in their doctoral work, and at the same time help them develop a detailed research plan for their own research. The course will aim to promote an environment of mutual support and encouragement amongst first year research students, maximising the potential for cross fertilization between different projects. The course will also develop students' presentational skills in a group setting.

Teaching: 14 hours of seminars and 9 hours of workshops in the MT. 14 hours of seminars and 9 hours of workshops in the LT.

Formative coursework: Students will be expected to draft and present sections of their research plan in the Michaelmas Term and to prepare and present a full research plan at the end of the Lent Term.

Assessment: This course is not assessed.

IR502

International Relations Theory Research Workshop

This information is for the 2020/21 session.

Teacher responsible: Dr Martin Bayly CBG.8.07 and Mr Mark Hoffman OLD.1.09

Availability: This course is open to all interested MPhil/PhD students and faculty in the Department of International Relations. It is available with permission as an outside option to students on other programmes where regulations permit.

Course content: IR502 is part of the research-training programme for all research students working in the area of international theory, broadly defined to include work in rationalist, constructivist and critical traditions. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars developing innovative theoretical approaches to better explain, understand and critique world politics. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. The papers are circulated in advance.

Teaching: A minimum of 6 hours of seminars in the MT. A minimum of 6 hours of seminars in the LT. Some of these will be delivered online.

Assessment: This course is not assessed.

IR504

Security and Statecraft Research Workshop

This information is for the 2020/21 session.

Teacher responsible: Dr Anne Getmanski CBG.8.05 and Prof Fawaz Gerges CBG.10.03

Availability: This course is available on the MPhil/PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

It is open to all interested research students and faculty with the Department and is available with permission to students on other programmes.

Course content: IR504 is part of the research-training programme for all research students working in the area of security and statecraft broadly defined. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. It provides a forum in which research students can present their work, discuss the theoretical and methodological problems involved, examine

common challenges in conducting research in this area and obtain feedback on their work. Research in this area draws on diverse theoretic and methodological approaches, and ranges across levels of analysis, regions, and eras. Specific foci of research include diplomacy, foreign and security relations, foreign policy analysis, comparative strategy, identity and security, war and society, state-building, peace-building and conflict resolution, revolutions, human security and genocide.

Teaching: A minimum of 6 hours of seminars in the MT. A minimum of 6 hours of seminars in the LT. Some of these will be delivered online.

Assessment: This course is not assessed.

IR507

International Institutions, Law and Ethics Research Workshop

This information is for the 2020/21 session.

Teacher responsible: Dr Mathias Koenig-Archibugi CBG.3.38 and Dr Theresa Squatrito CBG.8.08

Availability: This course is available on the MPhil/PhD in International Relations. This course is not available as an outside option.

It is open to all interested research students and faculty in the Department of International Relations and it is available with permission to students on other programmes.

Course content: IR507 is part of the research-training programme for all research students working on the theory, history and/or practice of international institutions, international law and ethics. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. Research in this area runs from the study of intergovernmental and nongovernmental institutions and global governance, to the politics of international law, to the ethical and normative dimensions of global politics. It includes, but is not limited to, the study of international institutions such as the European Union, North Atlantic Treaty Organisation, and the International Criminal Court and international issues such as human rights, humanitarian intervention, climate change, global health and international crime.

Teaching: A minimum of 6 hours of seminars in the MT. A minimum of 6 hours of seminars in the LT. Some of these will be delivered online.

Assessment: This course is not assessed.

IR509 Not available in 2020/21

International Relations Research Design Workshop

This information is for the 2020/21 session.

Teacher responsible: Prof Tomila Lankina

Availability: This course is compulsory on the MPhil/PhD in International Relations. This course is not available as an outside option.

This course is compulsory on the MPhil/PhD in International Relations. This course is not available as an outside option.

This workshop is compulsory for all second year International Relations Department (IRD) research students and open to other interested IRD research students.

Course content: This workshop will address issues concerning the formulation and design of the PhD research project. Its principal objective is to assist research students in designing a well-thought

out and manageable thesis. It seeks to do so by providing a forum students discuss their research topic, the particular set of questions they intend to address and the methods they wish to use with other members of the workshop. Its aim is to provide students with constructively critical observations about their research project and the problems they may confront and preparing students for their upgrade Research Panel in the summer.

Teaching: 12 hours of seminars in the MT.

Assessment: This course is not assessed.

IR555

International Political Economy Research Workshop

This information is for the 2020/21 session.

Teacher responsible: Dr Natalya Naqvi CBG.8.14 and Dr James Morrison CBG.8.06

Availability: This course is open to all interested MPhil/PhD students and faculty in the Department of International Relations. It is available with permission as an outside option to students on other programmes where regulations permit.

Course content: IR555 is part of the research-training programme for all research students working in the area of international political economy: the relationship between states and markets in a global context. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. Research in this area works at multiple levels of analysis and draws on an array of theoretic and methodological approaches from several disciplines. Both historical and contemporary questions are addressed across a range of issues including: trade, migration, global environmental politics, international economic organisations, economic diplomacy, international finance, foreign investment, exchange rates, and monetary relations.

Teaching: A minimum of 6 hours of seminars in the MT. A minimum of 6 hours of seminars in the LT. Some of these will be delivered online.

Assessment: This course is not assessed.

LL500

Doctoral Research Seminar series

This information is for the 2020/21 session.

Teacher responsible: Professor Gerry Simpson (NAB 6.13)

Availability: This course is compulsory on the MPhil/PhD in Law and MPhil/PhD in Law (Socio-Legal Theory). This course is not available as an outside option.

Course content: The course aims to equip students with the skills required to undertake advanced legal research. The focus in the MT is on methodological and theoretical issues arising in legal scholarship. The focus in the LT is on the various stages of the PhD process, and on preparation for professional life in academic law beyond the PhD. In the ST an Upgrade Conference is held at which first year research students present their work-in-progress.

Teaching: 22 hours of seminars in the MT. 22 hours of seminars in the LT.

There will be a Reading Week in week 6 of MT and LT.

Assessment: There are no examination arrangements. However, attendance is compulsory for first year research students.

Research students in other years may also attend.

MA500

Mathematics: Seminar on Combinatorics, Games and Optimisation

This information is for the 2020/21 session.

Teacher responsible: Dr Paul Duetting, Dr Ahmad Abdi and Prof Jozef Skokan

Availability: This course is compulsory on the MPhil/PhD in Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other members of the research community are welcome to attend.

Course content: The seminar ranges over many areas of pure and applied mathematics. The emphasis is on topics in discrete mathematics, operations research and game theory. The seminar is regarded as an important part of research students' formal training and they are expected to attend and contribute.

Teaching: 33 hours of seminars and 33 hours of seminars in the MT. 33 hours of seminars and 33 hours of seminars in the LT. 21 hours of seminars and 21 hours of seminars in the ST.

MA501

Research Student Seminar

This information is for the 2020/21 session.

Teacher responsible: Dr Christoph Czichowsky COL 3.11, Prof Jozef Skokan COL 3.04, Prof Julia Boettcher COL 4.03, Dr Paul Duetting COL 3.08, Dr Ahmad Abdi and Prof Johannes Ruf

Availability: This course is compulsory on the MPhil/PhD in Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other members of the research community are welcome to attend.

Course content: The seminars range across many areas of pure, applied and financial mathematics. The emphasis is on topics in discrete mathematics, algorithms, operations research, game theory, financial mathematics and control theory. The seminars are regarded as an important part of research students' formal training and they will all be expected to attend and contribute. Throughout the academic year, students are also invited to give presentations. There are additional reading groups aimed at students working in financial mathematics and discrete mathematics. These are compulsory for students working in this area but other students of the MPhil/PhD in Mathematics are welcome to attend.

Teaching: PhD Seminar on Combinatorics, Games and Optimisation (MA501.1): 11 one-and-a-half-hour seminars in the MT and LT. 7 one-and-a-half-hour seminars in the ST. LGSMF Portfolio Optimisation Seminar (MA501.2): 11 three-hour seminars in the LT. 7 three-hour seminars in the ST. Financial Mathematics Reading Group Seminar (MA501.3): 11 three-hour seminars and 11 one-hour seminars in the MT and LT. 7 three-hour seminars and 7 one-hour seminars in the ST. Discrete Mathematics Reading Group Seminar (MA501.4): 11 three-hour seminars in the MT and LT. 7 three-hour seminars in the ST.

Approximately 80-90 meetings of between 1 and 3 hours throughout the MT, LT and ST, dependent on speakers. See http://www2.lse.ac.uk/maths/Seminars/Research_Seminars.aspx for schedule and more details.

MC500

Research Seminar for Media, Communications & Culture

This information is for the 2020/21 session.

Teacher responsible: Professor Lilie Chouliaraki

Availability: This course is compulsory on the MPhil/PhD in Data, Networks and Society and MPhil/PhD in Media and Communications. This course is not available as an outside option. This course is compulsory for doctoral researchers in the first and second years of the Doctoral Programmes in the Department of Media and Communications. All doctoral researchers in the Department are welcome and encouraged to attend.

Course content: The aim of the course is to raise awareness of theoretical, conceptual and methodological issues in the interdisciplinary field of media and communications research and to develop students skills with respect to theory building, research design and implementation. The course focuses, in particular, on the key conceptual issues and analytical strategies required in media and communication research, with special reference to the study of the changing environment of media production, dissemination and consumption, under conditions of globalization and digitization of information

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

In the 2020/21 academic year, seminars will be held online.

Indicative reading:

- Silverstone R. (2006) Media and Morality. On the Rise of Mediapolis Cambridge: Polity.

Assessment: This course is based predominantly on student presentations on their work in progress.

First year doctoral researchers are expected to use MC500 seminars as a key resource towards their thesis proposal at the end of their first year of study.

MC501

Advanced Doctoral Workshop in Media and Communications

This information is for the 2020/21 session.

Teacher responsible: Prof Lilie Chouliaraki, FAW.7.01D

Availability: This course is available on the MPhil/PhD in Data, Networks and Society and MPhil/PhD in Media and Communications. This course is not available as an outside option.

Pre-requisites: Students must have completed Research Seminar for Media, Communications & Culture (MC500).

Course content: The series is intended to offer students guidance and support in the writing-up of their thesis. The approach to the series is student-centred, practice-oriented and dialogic, focusing on students' work - hence the term 'workshop'. Specifically, participants commit to submitting a draft of one of their PhD

chapters and comment on others' submissions, in the course the academic term. The curriculum consists therefore of individual students' work, each week concentrating on a single student's draft (maximum 5000 words) submitted together with a relevant academic reading. Through a system of signing-up and pairing, each ninety-minute session is set up in two parts: the first part is a twenty-minute dialogue between the writer and their discussant, who introduces and comments on the writer's work; the second part is a full hour's exchange of ideas by all - the expectation being that everyone commits to reading the submitted draft. The role of the DPD is to gently guide group interaction and, when necessary, provide input as much on the submission as on subsequent discussion points. The role of the DPD is not to substitute the supervisor but to ensure that the discussion is conducted in an informal, friendly and non-intimidating way.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

40 hours of teaching across two terms.

MC5M2

Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2020/21 session.

Teacher responsible: Professor Ellen Helsper

Availability: This course is compulsory on the MPhil/PhD in Data, Networks and Society and MPhil/PhD in Media and Communications. This course is not available as an outside option.

Course content:

i. Principles of Research in Media and Communications: A series of lectures offered by Department of Media and Communications faculty in Michaelmas Term. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, discourse analysis, social network analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

ii. Specialist research workshops: A series of 5 three-hour workshops (comprised of two x 1.5 hour sessions) offered by media and communications staff in LT. Students are required to participate in all five workshops.

iii. Principles of Social Research Analysis: Students have to take at least one quantitative analysis course offered by the Department of Methodology (MY464 is the basic option). In addition, students are recommended to take either another quantitative or a qualitative analysis course offered by the Department of Methodology. The combination of courses must be approved by the supervisor and discussed with the MC5M2 convenor.

Teaching: This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 53 hours across Michaelmas and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

This is comprised of the following:

i. Principles of Research in Media and Communications:

Lecture (one hour) x 10 Michaelmas Term; Lecture on Writing Methodological Chapters and Papers (one hour) x 1 Lent Term

ii.160

Specialist workshops: Workshops (three hours) x 5 Lent Term (each comprised of two 1.5-hour sessions)

iii.160

Principles of Social Research Analysis: Quantitative analysis course MY464 in Michaelmas Term: Lecture (two hours) x 9 Michaelmas Term; Computer class (one hour) x 9 Michaelmas Term; Recommended quantitative or Qualitative Analysis course in

Lent Term (Varies depending on the course).

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to write a 7000 word methodology chapter for their thesis and submit it to their supervisor in ST1. This will normally include a pilot study testing one method to be used in the thesis.

ii. Principles of Social Research: All students are expected to complete advance readings and submit workshop assignments.

iii. Principles of Social Research Analysis: Most quantitative analysis courses require weekly assignments. The qualitative analysis courses vary in their formative assessment.

Indicative reading:

- Rose, G. (2012). *Visual Methodologies: An Introduction to Researching with Visual Materials*. London; Thousand Oaks, Calif: SAGE Publications Ltd.
- Schroder, K., Drotner, K., Kline, S., & Murray, C. (2003). *Researching Audiences: A Practical Guide to Methods in Media Audience Analysis*. London: New York: Bloomsbury Academic.
- Silverman, D. (2013). *Doing Qualitative Research: A Practical Handbook*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

Assessment: Online assessment (100%).

One three-hour online assessment in the January exam period relating to Quantitative Analysis (e.g. MY464) and one two-hour examination in Summer Term if another quantitative analysis course is taken (see Department of Methodology course guides). Note: Summative assignments differ depending on the components of the methodological training taken by the students. Students must pass all components of MC5M2.

MC5M8

Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2020/21 session.

Teacher responsible: Professor Ellen Helsper

Availability: This course is available on the MPhil/PhD in

Data, Networks and Society and MPhil/PhD in Media and Communications. This course is not available as an outside option.

Course content:

i. Principles of Research in Media and Communications: A series of lectures offered by Department of Media and Communications faculty in Michaelmas Term. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, discourse analysis, social network analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

- Silverman, D. (2013). *Doing Qualitative Research: A Practical Handbook*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

One two-hour examination in Summer Term relating to Quantitative Analysis (e.g. MY552M) and one two-hour examination in Summer Term if another quantitative analysis course is taken (see Department of Methodology course guides).

Note: Summative assignments differ depending on the components of the methodological training taken by the students. Students must pass all components of MC5M8.

MG500

Information Systems PhD Seminar Series and Workshops

This information is for the 2020/21 session.

Teacher responsible: Dr Carsten Sorensen NAB 3.11

Contributions from Chrisanthi Avgerou, Antonio Cordella, Shirin Madon, Susan Scott, and Edgar Whitley

Availability: This course is compulsory on the MPhil/PhD in Management - Information Systems and Innovation. This course is not available as an outside option.

Course content: This seminar series provides a forum for research students in management to present work in progress. Outside speakers may be invited from time to time.

Teaching: This course is delivered through seminars totalling a minimum of 40 hours across the Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of seminars online and/or physically distanced settings.

This course includes a reading week in Week 6 of Michaelmas Term.

There will also be a PhD workshop with a guest speaker MT & LT. Details of these workshops are to be emailed to students and staff as they are arranged.

Assessment: There is no formal assessment but all students are expected to attend the workshops and must email the course teacher to explain any absences. Attendance at the weekly seminars is more flexible but students should make an effort to attend as many as possible and to be involved in the organisation of at least one per year.

MG505 Half Unit

Research in Organisational Behaviour Seminar I

This information is for the 2020/21 session.

Teacher responsible: Dr Lourdes Sosa NAB 5.19 and Dr Niranjana Janardhanan NAB 4.28

Availability: This course is compulsory on the MRes/PhD in

Management (Organisational Behaviour). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources). This course is not available as an outside option.

This course is available with permission as an outside option to students on other programmes.

Course content: This course seeks to provide PhD students with a foundational understanding of established research in Organisational Behaviour with the objective of encouraging them to design novel research that advances the field. Specifically, this course will introduce students to the evaluation of established research in micro- and macro-level Organisational Behaviour, progressing through units of analysis from psychology research to organisational theory.

Teaching: 30 hours of seminars in the LT.

This year, some or all of this teaching may be delivered through a combination of seminars online and/or physically distanced settings.

Formative coursework: Formative feedback on the individual presentation and essay will be provided throughout the course. Students will be expected to review their plan for presentation in office hours beforehand, and to informally present work in progress throughout the course for continuous feedback.

Indicative reading: Indicative readings include:

Barsade, S. G., & Gibson, D. E. (2007). Why does affect matter in organizations? *Academy of Management Perspectives*, 21(1), 36-59. Hewlin, P. F. (2009). Wearing the cloak: Antecedents and consequences of creating facades of conformity. *Journal of Applied Psychology*, 94, 727-741. Judge, T., Bono, J., Ilies, R., & Gerhardt, M. (2002). Personality and leadership: A qualitative and quantitative review. *Journal of Applied Psychology*, 87, 765-780. Mathieu, J., Maynard, M. T., Rapp, T., & Gilson, L. (2008). Team effectiveness 1997-2007: A review of recent advancements and a glimpse into the future. *Journal of Management*, 34, 410-476. Baron, J.N., Hannan, M.T., Burton, M.D. (2001). Labor Pains: Change in Organizational Models and Employee Turnover in Young, High-Tech Firms. *American Journal of Sociology*, 106, 960-1012. Uzzi, B. (1997). Social Structure and Competition in Interfirm Networks: The Paradox of Embeddedness. *Administrative Science Quarterly*, 42, 35-67. Hannan, M.T., Freeman, J. (1984). Structural Inertia and Organizational Change. *American Sociological Review*, 49, 149-164.

Assessment: Essay (100%, 4000 words) in the ST.

MG509 Half Unit

Managing Digital Platform Innovation

This information is for the 2020/21 session.

Teacher responsible: Dr Carsten Sorensen NAB 3.11

Availability: This course is compulsory on the MPhil/PhD in Management - Information Systems and Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course deals with the dynamics of large-scale digital service platforms and their associated ecosystems. It is based on the extant research into modularity, platforms, boundary resources, and digital ecosystems across the fields of management, innovation, and information technology studies. The aim to ground the students in the traditional conceptualisations of IS and use this as the base for exploring the theoretical challenges brought about by a variety of digital and layered-modular multi-sided platforms. The course further examines the components, operations and trends of digital ecosystems, for example focusing on the role of large distributed datasets applied for organisational intelligence of various forms. Social networks form a key example of such large, distributed, datasets, and of innovation platforms relying on associated service ecosystems. The course also addresses the particular challenges of business digitalisation and platformisation for the distributed provision of mobile apps

and uses this example as a basis for a broader consideration of platform innovation dynamics.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of seminars online and/or physically distanced settings.

This course includes a reading week in Week 6 of Michaelmas Term.

The seminars will include a variety of teaching formats, including presentations by faculty, presentations of papers by students, and seminar discussion on relevant topics.

Formative coursework: Students will be expected to produce 1 presentation and 1 essay in the MT.

One PowerPoint presentation on a course theme to be handed in week 2 for feedback and one 1500 word essay on the same theme to be handed in for assessment by week 6

Indicative reading: Baldwin, C. Y. & K. B. Clark (2000): *Design Rules*, Vol. 1: The Power of Modularity. Cambridge, MA: MIT Press. Benkler, Y. (2006): *The Wealth of Networks*. Yale University Press. Chandler Jr, A. D. (1977): *The Visible Hand: The Managerial Revolution in American Business*. Cambridge MA: The Belknap Press of Harvard University Press. Garud, R., A. Assessment: Take-home assessment (100%).

The course will be assessed by a 24 hour take home exam at the

end of the MT.

MG511 Half Unit Not available in 2020/21 Technology, Practice and Institutions

This information is for the 2020/21 session.

Teacher responsible: Prof Jannis Kallinikos NAB 3.24

Course content: The course will deal with the restructuring of social practices associated with the involvement of technologies of computing and communication in social and organisational life. These ideas will be explored within the context of established institutional fields such as finance, law or health care but it will consider as well the advent of new practices (social media, big data) and the organisational forms within which such practices are accommodated.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Arthur, B. W. (2009). *The Nature of Technology, What it Is and How it Evolves*. London: Allen Lane. Ciborra, C. (2006). Imbrication of representations: Risk and Digital Technologies. *Journal of Management Studies*, 43(6), 1339–1356. Greenwood, R., Diaz, A. M., Li, S. X., & Lorente, J. C. (2010). The Multiplicity of Institutional Logics and the Heterogeneity of Organizational Responses. *Journal of the American Society for Information Science*, 51(4), 1–19. Crumley (2007) "New Practice Creation: An Institutional Perspective on Innovation." *Organization Studies* 28/7: 993-1012.

Assessment: Essay (100%, 7000 words) in the MT.

MG512 Half Unit Marketing I: Consumer Behaviour and Quantitative Modelling

This information is for the 2020/21 session.

Teacher responsible: Prof Amitav Chakravarti NAB 5.13 and Prof Om Narasimhan NAB 5.06

Availability: This course is compulsory on the MRes/PhD in Management (Marketing). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course covers both consumer behaviour and quantitative modelling.

In the area of Consumer Behaviour the course objective is to familiarize students with research in cognitive psychology, social psychology, and marketing on information processing and judgment and decision making related topics to better understand and develop marketing strategies that affect consumer behavior. There are two main aims of this course: (1) to give students a strong foundation for critical thinking in the area of consumer behavior, and (2) to enable students to conceptualize, develop and operationalize research ideas. Therefore, the focus is on understanding current theoretical and methodological approaches to various aspects of consumer behavior, as well as advancing this knowledge by developing testable hypotheses and theoretical perspectives that build on the current knowledge base. This means

that students have to actively read prior research in different areas – try to understand the authors' ideas and develop the habit of constructive criticism of the research. To encourage this habit, the role of author of certain papers may be assigned to some students in the class and the role of reviewer assigned to others.

In the area of quantitative modelling the course is designed to develop the quantitative foundations for marketing decisions. Both theoretical models which help analyse marketing issues, and decision-support models will be covered. There is a requirement for students to already have some understanding of calculus, probability, statistics and matrix algebra. Features of the course include a focus on all marketing decisions: product, pricing, advertising, salesforce and distribution. All necessary analysis tools from resource allocation models to NEIO (New Empirical Industrial Organization) models will be discussed. A comprehensive set of exercises will enable students to test their knowledge of models and their understanding of the material discussed in class. The course will also incorporate recent research findings in all aspects of marketing including online marketing and social media marketing.

Teaching: 30 hours of seminars in the MT.

There will be two 1.5 hour seminars per week over 10 weeks of the MT. This year, some or all of this teaching will be delivered through a combination of seminars online and/or physically distanced settings.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading:

- Little JDC. *Models and Managers: The Concept of a Decision Calculus*. *Management Science* 1970; 16: B466-B485.

Assessment: Essay (100%, 4000 words) in the LT.

MG513 Half Unit Not available in 2020/21 Marketing: Quantitative Modelling

This information is for the 2020/21 session.

Teacher responsible: Prof Om Narasimhan NAB 5.06

Course content: Requiring some understanding of calculus, probability, statistics and matrix algebra, the course is designed to develop the quantitative foundations for marketing decisions. Both theoretical models which help analyse marketing issues, and decision-support models will be covered. Features of the course include a focus on all marketing decisions: product, pricing, advertising, salesforce and distribution. All necessary analysis tools from resource allocation models to NEIO (New Empirical Industrial Organization) models will be discussed. A comprehensive set of exercises will enable students to test their

knowledge of models and their understanding of the material discussed in class. The course will also incorporate recent research findings in all aspects of marketing including online marketing and social media marketing.

Teaching: 30 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay and 1 essay in the LT.

Indicative reading:

- Lilien GL, Kotler Ph, Moorthy KS. Marketing Models. Prentice Hall: Englewood Cliffs, 1992
- Leeflang PSH, Wittink DR, Wedel M, Naert PA. Building Models for Marketing Decisions. Kluwer Academic Publishers: Dordrecht / Boston 2000.
- Hanssens DM, Parsons LJ, Schultz RL. Market Response Models: Econometric and Time Serie Analysis. Kluwer Academic Publishers, Boston 2001.
- Lilien GL, Rangaswamy A. Marketing Engineering, 2nd edition. Prentice Hall: Upper Saddle River, NJ, 2003.
- Little JDC. Models and Managers: The Concept of a Decision Calculus. Management Science 1970; 16: B466-B485.

Assessment: Essay (40%, 2500 words), essay (40%, 2500 words), essay (5%, 1200 words), essay (5%, 1200 words), essay (5%, 1200 words) and essay (5%, 1200 words) in the LT.

Participants will be required to write 4 short 2-page critiques of a paper from the reading lists in order to demonstrate their understanding of an area/topic (these critiques might involve the analysis of a dataset as well), and (b) develop 2 new research ideas (throughout MT) that will help participants advance the current state of knowledge. An additional preliminary critique paper and research idea paper will be used as formative assessments. The latter two new research idea papers, weighted 40% and 40% respectively, will be used as the summative assessment components. The balance 20% of the grade will be based on the last 4 short, 2-page critiques of specific papers in the reading list.

MG515 Half Unit Not available in 2020/21 Social Organisation

This information is for the 2020/21 session.

Teacher responsible: Prof Harm Barkema

Availability: This course is available on the MRes/PhD in Management (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: MG506 Micro Organisational Behaviour in Organisations ('M-OB') and MG514 Macro OB: Organisation and Management Theory.

Course content: Management research – and more specifically, OB and OMT – in the 21st century, is broadening its focus at an increasing pace (as measured by the number of papers recently published in our top journals, and 'in press'), by also studying organizations with social goals. For instance, corporations with social goals (e.g., CSR programs, supply chains with social goals), social enterprises or entrepreneurship under broader social programs (e.g., to increase employment, or women empowerment), NGOs, charities, social movements, incubators with social goals, and – at a more micro-level – 'calling' of workers, moral contracting and ideological currency. The course helps PhD students to understand key theoretical and methodological aspects of this emerging research, including of non-Western contexts, and to develop the insights and skills to formulate their own research agenda in this domain.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

The formative assignment will be to develop an "outline" version of the conceptual paper to be written for the summative assignment (rather than a full write-up). The goal of this assignment is to

enable students to begin thinking through how to formulate a research agenda in this domain. We will devote our last course session to debriefing and providing peer feedback on these outlines.

Indicative reading: Each faculty presenter will select his/her own reading list, which will rely heavily on journal articles (for example, Academy of Management Journal, Academy of Management Review, Journal of Applied Psychology). An extensive reading list is provided at the start of the course.

Assessment: Coursework (100%, 5000 words) in the MT.

MG518 Half Unit Employment Relations and Human Resource Management Seminar I

This information is for the 2020/21 session.

Teacher responsible: Dr Jonathan Booth NAB 4.20

Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources). This course is available on the MRes/PhD in Management (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The micro- and macro-HRM course content will cover foundational HRM topics (e.g., recruitment/selection, job design and team work, compensation, retention, engagement, voice, learning and development, performance management, the dark side of the organization), as well as strategic HRM, the gig economy, future of work, and the intersection of artificial intelligence/advanced technologies and HRM. Additionally, comparative models of the employment relationship and unions, corporate social responsibility, international labour standards, inequality, and the plethora of discrimination will be investigated, and from perspectives across the globe. This course will provide the opportunity for students to get to know the faculty members and their research in detail. Further, the course will incorporate direct discussion of academic material to teach students how to correctly 'read' academic journals in detail for their theoretical and empirical contribution

Teaching: 30 hours of seminars in the LT.

This year, some or all of this teaching may be delivered through a combination of seminars online and/or physically distanced settings.

Indicative reading: The seminars will follow a variety of formats, including discussing recent work of academic colleagues, and so include the following indicative reading.

Anicich, E., Fast, N. J., Halevy, N., & Galinsky, A. D. (2016). When the bases of social hierarchy collide: Power without status drives interpersonal conflict. *Organization Science*, 27, 123-140.

von Krogh, G. (2018). Artificial Intelligence in Organizations: New Opportunities for Phenomenon-Based Theorizing. *Academy of Management Discoveries*, 4(4), 404-409.

Assessment: Essay (100%, 4000 words) in the ST.

MG522

Research Traditions and Paradigms in IS and Organisations

This information is for the 2020/21 session.

Teacher responsible: Prof Susan Scott NAB 3.12 and Prof Chrisanthi Avgerou NAB 3.22

Availability: This course is compulsory on the MPhil/PhD in

Management - Information Systems and Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students from related PhD programmes who are interested in epistemological paradigms may be able to join the course with the teacher's permission.

Course content: The course introduces the foundations of social research and the key issues concerning the status of knowledge and the forms by which it is acquired. The course deals with the principal paradigms/traditions in the philosophy of science and epistemology and the answers they have provided to the basic questions concerning the status of knowledge claims and the forms by which valid knowledge claims can be made. The main focus of the course concerns the ways by which these key epistemological paradigms have been applied in the fields of Information Systems and Organization Studies.

There are three parts to the course: Part one (lectures 1-5) confronts the main traditions within the philosophy of science (positivism, realism, constructivism) and relates these traditions to the development of types of knowledge claims and their relationship to reality. There are references to IS and examples of different stances adopted by major contributions in the IS field. Part two (lectures 5-10) deals with research design, with emphasis on case study research and the types of evidence such research designs (single and multiple case study designs) require. Key ideas are exemplified with reference to IS research articles. Part three (lectures 11-20) entails a more substantial encounter with the IS field through engagement by key texts in the history of the IS field and the epistemological positions, research designs and data collection methods and analysis such texts illustrate. This last part of the course involves several professors and associate professors of the ISIG Group.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

This year, some or all of this teaching will be delivered through a combination of seminars online and/or physically distanced settings

Assessment: Essay (100%, 7000 words) in the LT.

MG576 Half Unit Not available in 2020/21

Corporate Social Responsibility and International Labour Standards

This information is for the 2020/21 session.

Teacher responsible: Prof David Marsden NAB 4.22

Availability: This course is available on the MRes/PhD in Management (Employment Relations and Human Resources).

This course is not available as an outside option.

Course content: This course examines the human resource management (HRM) and employment relations (ER) strategies of global corporations, with the aim of understanding both the causes of different strategic choices and the consequences of these strategies for diverse stakeholders. It takes the perspective that HRM/ER strategies are influenced by a range of variables, including internal business strategy and resources, as well as external factors such as national legislation, business systems and culture, and regional and global institutions.

The lecture and group-work content are the same as for MG476, but with a special tutorial-style additional programme of work for the doctoral students taking this elective. Assessment will be by the summer examination for MG478 and a 3500 word extended essay.

Teaching: 10 hours of lectures, 15 hours of seminars and 7 hours of help sessions in the LT.

Lectures: 10 hours

Group work: 15 hours (Auditing MG478 classes)

Doctoral tutorials: 7 hours (two-weekly intervals)

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Vogel, D. (2005) *The Market For Virtue: The Potential and Limits of Corporate Social Responsibility*, Washington D.C.: Brookings Institution Press. Crane, A. et al. (2008) *The Oxford Handbook of Corporate Social Responsibility*, Oxford: OUP. Elliot, K.A. and Freeman, R. (2003) *Can Labor Standards Improve Under Globalization?*, Washington D.C.: Peterson Institute for International Economics. Locke, R., Qin, F. & Brause, A. (2007) 'Does monitoring improve labor standards? Lessons from Nike,' *Industrial and Labor Relations Review*, 61, 1: 3- 31.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Essay (60%, 3500 words) in the ST.

MG599

Research Paper in Management

This information is for the 2020/21 session.

Teacher responsible: Dr Niranjana Janardhanan NAB 4.28, Dr Jonathan Booth NAB 4.20, Dr Carsten Sorensen NAB 3.11 and Dr Xiaolin Li NAB 5.37

MPhil/PhD in management and MRes/PhD in management Programme Directors

Availability: This course is compulsory on the MPhil/PhD in Management - Information Systems and Innovation, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Marketing) and MRes/PhD in Management (Organisational Behaviour). This course is not available as an outside option.

Course content: Students produce a research paper, between 7,000 and 15,000 words, related to the student's designated major field, to be submitted at the end of Lent Term.

Formative coursework: Feedback on progress will be provided by the student's PhD Programme director.

Assessment: Coursework (100%, 15000 words) in the LT.

MG5A1

A Social Sciences Perspective of Academic Research in Management

This information is for the 2020/21 session.

Teacher responsible: Prof Naufel Vilcassim NAB 4.38

Head of the Doctoral Programme

Availability: This course is compulsory on the MPhil/PhD in Management - Information Systems and Innovation, MRes/PhD in Management (Employment Relations and Human Resources),

MRes/PhD in Management (Marketing) and MRes/PhD in Management (Organisational Behaviour). This course is not available as an outside option.

Course content: The Seminar runs across all Management PhD Programmes and is a compulsory course for all students in the first year of their PhD.

Using the classic text by Kuhn, you will be introduced to the nature of scientific enquiry in the social sciences.

In addition, you will be given the opportunity to engage with and appreciate research in other Management subject areas in order to understand some of the major streams of research (i.e. what is Micro OB vs. Macro OB, or Consumer Behaviour vs Modelling research in Marketing, researching formal and informal rules and their effects, etc).

The Seminar series will also develop your academic presentation skills by requiring you to present a paper from outside your direct area of expertise and apply the insights gained from the first two parts of the course.

The seminars will cover the following topics:

1. Thomas Kuhn's *The Structure of Scientific Revolutions*: 50th Anniversary Edition
2. Conducting Research in Management
 - i. data analysis and interpretation
 - ii. a) inferring causality including what we can learn from experimental data and its limitations
b) ethics of experimental research including issues applicable in conflict/contested situations
c) causal inference from non-experimental data
 - iii. quantitative and qualitative research methods and the implications of 'big data'
 - iv. measurement and survey designs
 - v. neuro/physiological approaches: EEG, fMRI, Galvanic/Skin Response, Eye-Tracking, etc.
 - vi. the important role of technology within the context of increasing sophistication of socio-technical arrangements, for example, understanding the social processes in technological disruptions, distributed innovation processes, and digital platforms.

Teaching: 20 hours of seminars in the MT.

This year, some or all of this teaching will be delivered through a combination of seminars online and/or physically distanced settings.

Indicative reading:

- Thomas S Kuhn: *The Structure of Scientific Revolutions*: 50th Anniversary Edition accompanied by
- John Preston: *Kuhn's The Structure of Scientific Revolutions: A Reader's Guide* 160

MY500 Half Unit

Fundamentals of Social Science Research Design

This information is for the 2020/21 session.

Teacher responsible: Dr Alasdair Jones COL8.12

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Information Systems and Innovation) and MRes/PhD in Management (Organisational Behaviour). This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in Human Geography and Urban Studies, MPhil/PhD in Regional and Urban Planning Studies and MPhil/PhD in Social Research Methods.

This course is available as an outside option to students on other programmes where regulations permit.

The course is available to all research students.

Course content: Research design necessitates trade-offs between

the strengths and weaknesses of different feasible options. This course aims to introduce the broad range of design options and to foster an appreciation of these alternatives for particular research objectives. Drawing on a variety of examples from the social scientific literature, this course will explore design considerations and options across quantitative, qualitative and mixed-methods research. At the end of the course, students will be able to read a wide variety of empirical social science with a critical and balanced perspective and will be better equipped to implement and make arguments defending the methods they use in their PhD theses.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching will be delivered through a combination of online seminars and lectures delivered as short recorded videos.

This course has a reading week in Week 6 of MT.

Formative coursework: For the formative coursework, students will be expected to articulate and set-up (via recourse to the literature) a research question or set of interlinked research questions that they would like to answer for a topic of their choosing. Assignments should be 1-2 pages long (including in-text citations and reference list).

Indicative reading: Robson, Colin and McCartan, Kieran (2015, 4th edition). *Real World Research*. London: John Wiley.

Assessment: Research proposal (30%) and other (10%) in the MT. Research design (60%) in the ST.

(MT: Research proposal 1500 words, 30%; seminar participation (including online seminar participation) 10%; ST: Research design: 4000 words, 60%)

MY505 Half Unit

Research Design for Policy and Programme Evaluation

This information is for the 2020/21 session.

Teacher responsible: Dr Flora Cornish COL.8.09

Availability: This course is open to any Research level student.

Pre-requisites: There are no prerequisites but some familiarity with qualitative research methods is expected. Please contact the course convenor if unsure.

Course content: This course aims to equip students with the methodological knowledge and research skills to be able to design and critically appraise evaluation research. In the context of the rise of evidence-based policy, the course is designed to extend students' abilities to use evaluative information carefully and critically. The course takes a mixed methods approach. It covers the major quantitative designs, including randomized experiments and observational (i.e. non-randomized) research designs such as selection on observables, difference-in-differences, and the regression discontinuity design. It covers qualitative and participatory research designs and their contribution to formative research, process evaluation, realist evaluations, interpreting outcomes, and assessing transferability to other settings. As well as the major design issues, the course addresses practical and ethical issues of evaluation research, how to write a study protocol, and how to draw lessons from a body of evidence through reviewing and synthesising evidence. Examples from the fields of health, international development and public policy will be used throughout the lectures and seminars.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students write a critical review (1,500 words) of a published evaluation report.

Indicative reading: Angrist, J. D. and Pischke, J-S. (2014)

Mastering Metrics: The Path from Cause to Effect. Princeton University Press. Bell, S. & Aggleton, P. (2016). *Monitoring and Evaluation in Health and Social Development: Interpretive and Ethnographic perspectives*. London: Routledge. Cartwright, N. & Hardie, J. (2012). *Evidence-Based Policy: A practical guide to doing it better*. Oxford, UK: Oxford University Press. Glennerster, R. and Takaarasha, K. (2013) *Running Randomized Evaluations: A Practical Guide*, Princeton University Press. Patton, M. Q. (2015). *Qualitative Research and Evaluation Methods*. (4th Edition). London: Sage.

Assessment: Essay (50%, 3000 words) in the ST. Research design (50%) in the LT.

MY521 Half Unit

Qualitative Research Methods

This information is for the 2020/21 session.

Teacher responsible: Dr Aliya Rao (MT) and Dr Chana Teeger (LT)

Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Information Systems and Innovation) and MRes/PhD in Management (Organisational Behaviour).

This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in Human Geography and Urban Studies, MPhil/PhD in International Relations, MPhil/PhD in Regional and Urban Planning Studies, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology and MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available as an outside option to students on other programmes where regulations permit.

The course is available to all research students.

Course content: This course presents the fundamentals of qualitative research methods. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding qualitative methods, and with practical skills to put those methods into practice. It prepares students to design, carry out, report, read and evaluate qualitative research projects. First, students learn how to collect data using methods including interviews, focus groups participant observation, and selecting documents and new media data. Second, we cover analysis, using thematic and discourse analysis. Issues of research design, quality indicators and ethics are addressed.

This is a generalist, introductory course and we invite students who have little previous experience of qualitative methods. Students with prior training in qualitative methods might be interested in more specialist alternatives offered by the Department of Methodology, such as MY525 Case Studies and Comparative Methods for Qualitative Research or MY528 Qualitative Text Analysis. Lectures introduce the main conceptual and practical issues. Seminars provide practical experience with the methods.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term and 20 hours in Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course has a reading week in Week 6 of MT and LT.

Formative coursework: Students submit a portion of their practical work, with some written commentary, for formative assessment in Week 7.

Indicative reading:

- Maria J Mayan (2009) *Essentials in qualitative enquiry*, Walnut Creek, CA: Left Coast Press.
- M Bauer; G Gaskell, (2000). *Qualitative Researching with Text, Image and Sound*, London: Sage.
- U Flick, (2009). *An Introduction to Qualitative Research*, 4th edition, London: Sage.

- C Seale, G Gobo, JF Gubrium, & D Silverman, (2004). *Qualitative Research Practice*. London: Sage.

Assessment: Project (100%, 5000 words) in the LT and ST. One final written project of 4000-5000 words, based on seminar exercises (100%). It takes the form of a research project report, with detailed appendices documenting the methods of data collection and analysis used. Students taking the course in MT submit in LT, and students taking the course in LT submit in ST.

MY525 Half Unit

Case Studies and Comparative Methods for Qualitative Research

This information is for the 2020/21 session.

Teacher responsible: Dr Eleanor Knott COL 7.08

Availability: This course is available on the MPhil/PhD in International Relations, MPhil/PhD in Social Policy and MPhil/PhD in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. This course is freely available to any MRes or PhD student interested in case study research designs. The course is most suited to students within macro- or meso-sociological traditions (e.g. political science, IR, sociology, political sociology, policy studies, development studies) than those within a micro-sociological/individualist tradition (e.g. micro-interactionist perspectives, psychology, psychiatry).

Course content: This course focuses on the approach and practice of designing and conducting case study and comparative research. Thinking outside of the areas of interest and specialisms and topics, students will be encouraged to develop the concepts and comparative frameworks that underpin these phenomena. In other words, students will begin to develop their research topics as cases of something.

The course will cover questions of design and methods of case study research, from single-n to small-n case studies including discussions of process tracing and Mill's methods. The course will address both the theoretical and methodological discussions that underpin research design as well as the practical questions of how to conduct case study research, including gathering, assessing and using evidence. Examples from the fields of comparative politics, IR, development studies, sociology and European studies will be used throughout the lectures and seminars.

Teaching: This year, some or all of this teaching may be delivered through a combination of virtual synchronous webinars and recorded asynchronous lectures delivered as short online videos. Lectures will provide students with the key concepts, ideas and approaches to case study and comparative research. Seminars will provide students with practical experience of assessing the approaches of case study and comparative research design, as well as opportunities to design and develop their own research projects.

This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the LT.

1 formative paper: literature review and project outline (1-2 pages) due in Week 8. Students will receive written feedback on this by Week 11.

1 peer marking exercise: in-class oral peer feedback session for students to exchange ideas on formative assignment (Week 9). This in-class activity may be delivered via webinar.

Indicative reading: Key texts:

- Beach, D., & Pedersen, R. B. 2019. *Process-tracing methods: Foundations and guidelines*. University of Michigan Press.
- Bennett, A. and Checkel, J.T. eds., 2014. *Process tracing: From metaphor to analytic tool*. Cambridge University Press.
- Della Porta, D. and Keating, M. eds., 2008. *Approaches and methodologies in the social sciences: A pluralist perspective*. Cambridge University Press.
- George, Alexander L. and Andrew Bennett. 2005. *Case Studies*

and Theory Development in the Social Sciences.

- Gerring, J. 2017. *Case study research: principles and practices*. Second edition. Cambridge University Press.

Example readings for discussion:

- Briggs, Ryan C. 2017. "Explaining case selection in African politics research", *Journal of Contemporary African Studies*.
- Finkel, E. (2017) *Ordinary Jews: choice and survival during the Holocaust*. Princeton University Press.
- Lund, Christian. 2014. "Of What is This a Case? Analytical Movements in Qualitative Social Science Research." *Human Organization* 73(3): 224–234.
- Simmons, E. (2016) *Meaningful resistance: market reforms and the roots of social protest in Latin America.*: Cambridge University Press.
- Simmons, E. S. and Smith, N. R. (2017) 'Comparison with an Ethnographic Sensibility', *PS: Political Science & Politics*, 50(01), pp. 126–130. doi: 10.1017/S1049096516002286.
- Slater, D. and Wong, J. (2013b) 'The Strength to Concede: Ruling Parties and Democratization in Developmental Asia', *Perspectives on Politics*, 11(03), pp. 717–733. doi: 10.1017/S1537592713002090.

Assessment: Class participation (10%) and research design (90%) in the LT.

It is recommended that students base the research design proposal (5000 words) on their dissertation topic (or a related topic, e.g. a PhD proposal). Where students also take MY500 (which has a similar summative assessment), students will be guided towards a modified version of the research proposal (e.g. a different research question) to avoid self-plagiarism between assignments.

Weekly participation grade (10%) preparation and active participation in seminars and group presentation.

MY526 Half Unit Not available in 2020/21

Doing Ethnography

This information is for the 2020/21 session.

Teacher responsible: Dr Chana Teeger COL7.06

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Human Geography and Urban Studies, MPhil/PhD in Regional and Urban Planning Studies and MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available as an outside option to students on other programmes where regulations permit.

This course is available to all research students.

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convenor if unsure.

Course content: Doing ethnography enables us to examine how social order is produced as people go about their everyday interactions. Multiple sources of naturally-occurring data are used to understand how communities, organisations and institutions work, informally as well as formally. Contemporary conditions of globalisation, individualisation, bureaucratisation and digitisation introduce new challenges for such fieldwork. This interdisciplinary course equips students with a practical understanding of how to do, and to think about, contemporary ethnography. Core conceptual, ethical and methodological debates are introduced through in-depth engagement with book-length exemplars, and through students' experience of fieldwork. Fieldwork is a key component of the course, with students collecting data in a setting closely related to their PhD topic. Data collection is followed by data analysis and presentation activities. Methodological concerns regarding case selection, establishing rigour, reflexivity, representing others, and ethical issues are addressed in detail. Practical issues addressed include access to study sites, studying elite and marginalised groups, innovative sources of data, and writing field notes. Emphasising that ethnography relies on the

researcher-as-research-instrument, the course aims to develop students' sensitivity and rigour as ethnographic researchers.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. This course has a Reading Week in Week 6 of LT.

Formative coursework: An excerpt of field-notes from the field visit undertaken as part of the course (up to 2,500 words). Field-notes should record rich details of observations (the data), researcher reflections and brief interpretations of the significance of these observations. Written feedback will be provided.

Indicative reading: De Laine, M. (2000). *Fieldwork, participation and practice: Ethics and dilemmas in qualitative research*. Sage Publications Ltd. DeWalt, K. M., ; DeWalt, B. R. (2002). *Participant observation: A guide for fieldworkers*. AltaMira Press. Emerson, R. M., Fretz, R. I.; Shaw, L. L. (1995). *Writing ethnographic fieldnotes*. University of Chicago Press. Wacquant, L. (2004) *Body and Soul: Ethnographic Notebooks of an Apprentice Boxer*. New York: Oxford University Press. Laureau, Annette. (2011). *Unequal Childhoods: Class, Race and Family Life* (2nd Edition). Berkeley: University Press

Assessment: Essay (100%, 4000 words).

MY527 Half Unit Not available in 2020/21 Qualitative Research with Digital and Visual Data

This information is for the 2020/21 session.

Teacher responsible: Dr Jennifer Tarr COL8.06

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Human Geography and Urban Studies and MPhil/PhD in Regional and Urban Planning Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is available to PhD students in departments such as Media & Communications and Sociology. Also available where regulations permit and with permission of the teacher responsible.

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is required, to the equivalent of MY421. Please contact the course convenor if unsure.

Course content: Most qualitative research is in the form of written or spoken texts, produced through interviews and field notes or collection and analysis of documents. However, new technologies now offer a range of new tools for producing, gathering and analysing new kinds of data. This course will focus primarily on digital and visual methods and how they are reshaping qualitative research. Topics will include mobile methods; social network analysis; social media; emojis, memes and gifs; photo elicitation; video; and visual analysis. Key example readings will be assigned, discussed and assessed each week. Seminars provide practical skills through hands on exercises of data collection and analysis, closely tied with the lecture content. These skills will be developed further in a final research project on a topic of the students' choosing to be submitted at the beginning of summer term. The course aims to understand how qualitative methods can be used in relation to these emerging streams of data. The course is aimed at students who are considering one or more of these elements as part of their dissertation research design and/or who are interested in gaining more advanced skills in qualitative research.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 will be a Reading Week during which students work independently on their formative assignment. An optional enrichment activity will be assigned.

Formative coursework: Seminar activities will receive in-class feedback. A brief proposal for final summative coursework (c. 1000 words) should be submitted and will receive formative feedback and guidance.

Indicative reading: Note: No one text covers the whole course. Rose, G, 2016. *Visual methodologies: An introduction to*

researching with visual materials. London: Sage. Rogers, R, 2013. *Digital methods*. Boston: MIT press. Pink, S, Horst H, Postill J, Hjorth L, Lewis T, Tacchi J. (2016) *Digital Ethnography: Principles and Practice*. London: Sage.

Assessment: Project (100%, 7000 words).

One 5500-7000 word research project related to the course material, on a topic selected by the student (100%).

MY528 Half Unit Qualitative Text and Discourse Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Audrey Alejandro COL.7.10

Availability: This course is available on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available as an outside option to students on other programmes where regulations permit.

This course is available to all research students who are permitted to take an outside option as part of their programme.

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected (including finding bibliographical resources, conducting a literature review, creating one's own research question...). Please contact the course convenor if unsure.

Course content: How can we use texts and discourses to create meaning about the social world? The goal of this course is to provide students with the skills to construct and conduct social sciences research using text and discourse as an entry point. While acquiring these skills, students also learn how to interpret textual data by exploring the concepts and case studies developed across disciplines. The course both establishes a theoretical foundation for text/discourse analysis and takes a practical and applied approach, so that students can acquire greater independence and confidence to conduct their research project autonomously. Discourse Analysis is the overarching method that structures the content of the course. The first part of the course focuses on the application of the most common methods used to analyse texts and discourses. The second part of the course places the in-depth analysis of texts in the broader context of research methods and design, to ensure students know how to critically assess their work and produce research to the highest standards. Beyond learning the skills of qualitative text/discourse analysis, this course is an invitation to produce more structured, analytical and critical research capable of grasping not only the visible but also the invisible and implicit dimensions of politics and society. Examples from across the social sciences will be used throughout the lectures and seminars.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a Reading Week in Week 6 of LT.

Formative coursework: A project proposal (c.1,000 words) focusing on the topic that the student will develop in their summative assignment. The project proposal comprises a blog post and a project outline.

Indicative reading:

- Baker, P. and Ellece, S. (2010). *Key Terms in Discourse Analysis*, London: Continuum.
- Dunn K. and Neumann I. B. (2016). *Undertaking Discourse Analysis for social research*, Ann Arbor: University of Michigan Press.
- Kuckartz U. (2014). *Qualitative text analysis: a guide to methods, practice & using software*. Los Angeles: Sage.
- Scheier, M. (2012). *Qualitative Content Analysis*. Sage, Thousand Oaks, CA.

Assessment: Research proposal (100%) in the ST.

A research proposal (100%, 4000 words) in the ST. Students can base their research proposal on a dimension/sub-question of their

dissertation topic (or a related topic, e.g. a PhD proposal) subject to the approval of their home department.

MY530

Advanced Qualitative Research Workshops

This information is for the 2020/21 session.

Availability: This course is available on the MPhil/PhD in International Relations, MPhil/PhD in Management - Information Systems and Innovation and MRes/PhD in Management (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit. This course is available to MPhil/PhD students from across the LSE who are undertaking projects using qualitative methods.

Pre-requisites: Some prior training in qualitative methods (e.g. MY421 or equivalent) is advisable. Students who have no prior training in qualitative methods should consider taking MY521M or MY521L.

Course content: MY530 is a series of workshop modules that provide hands-on, in-depth and advanced training in specific qualitative methodological approaches to research design, data collection and data analysis. The workshops cover advanced theoretical, technical and practical aspects of qualitative research methodology and the topics to be covered each term will be listed on Moodle. Workshops typically consist of two sessions lasting two hours each, with the second of these sessions tending to be more practical. These interdisciplinary sessions provide a space for students to develop advanced methodological skills and exchange ideas with peers.

Teaching: Sessions to be held in term time throughout the year. Participants are required to sign up via LSE's Training and Development System.

Research students can sign up to as many workshops as they wish (subject to availability)

Indicative reading: Each session will provide its own recommended reading list, available on Moodle.

Assessment: This course is non-examinable.

MY551 Half Unit

Introduction to Quantitative Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Jonathan Jackson COL.8.05 (LT) and Dr Indraneel Sircar COL.7.04 (MT)

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Management (Information Systems and Innovation). This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in International Relations, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology, MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

The course is available to all research students.

Course content: An intensive introduction to quantitative data analysis in the social sciences. The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students should be able to carry out univariate and bivariate data analysis and have an appreciation of multiple linear regression. The computer exercises give hands-on training in the application of statistical techniques to real social science research problems. No prior knowledge of any statistical software is necessary.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours per term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course is given twice per session, starting in the first week of each of the MT and LT.

Students must either register for MY551M which is taught in Michaelmas Term, or MY551L which is taught in Lent Term.

This course has a Reading Week in Week 6 of MT and LT.

Formative coursework: Self-guided computer exercises to be completed before weekly classes for discussion.

Indicative reading: A course pack will be available for download online. Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*. Pearson Education. Or Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*. Pearson Education (note that the second book is more advanced and is particularly useful if you are planning to take MY551 and MY552).

Assessment: Take-home assessment (80%) in the ST.

Continuous assessment (20%) in the MT and LT.

(Homework and participation will constitute 20% of the final overall mark).

MY552 Half Unit

Applied Regression Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr. Daniele Fanelli and Dr. Indraneel Sircar

Availability: This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Data, Networks and Society, MPhil/PhD in European Studies, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in Media and Communications, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Information Systems and Innovation), MRes/PhD in Management (Marketing), MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit. Research students where programme regulations allow.

Pre-requisites: Students are required to have completed MY451/ MY551 Introduction to Quantitative Analysis or an equivalent level statistics course.

Course content: The course is designed for students with a good working knowledge of elementary descriptive statistics; sampling distributions; one and two sample tests for means and proportions; correlation and the linear regression model with one or more predictor variables. The course is concerned with deepening the understanding of the generalized linear model and its application to social science data. The main topics covered are linear regression modelling and binary, multinomial and ordinal logistic regression.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours per term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY552M which is taught in Michaelmas Term, or MY552L which is taught in Lent Term.

This course has a Reading Week in Week 6 of MT and LT.

Formative coursework: Self-guided computer exercises to be completed before weekly classes for discussion.

Indicative reading: A Agresti & B Finlay, *Statistical Methods for the Social Sciences*. A course pack will be available for download

online. Additional reading will be recommended.

Assessment: Take-home assessment (80%) in the ST. Continuous assessment (20%) in the MT and LT. (Homework and participation will constitute 20% of the final overall mark).

MY555 Half Unit Multivariate Analysis and Measurement

This information is for the 2020/21 session.

Teacher responsible: Prof Jouni Kuha COL8.04

Availability: This course is available on the MPhil/PhD in Environmental Economics, MPhil/PhD in International Relations, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Marketing) and MRes/PhD in Management (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: The course will assume a knowledge of standard linear regression models, to the level covered in MY452/MY552 (Applied Regression Analysis)

Course content: An introduction to the application of modern multivariate methods used in the social sciences, with particular focus on latent variable models for continuous observed variables, and their application to questions of measurement in the social sciences. The following topics will be covered: principal components analysis, exploratory factor analysis, confirmatory factor analysis, structural equation models, latent class models and latent trait models. The R software will be used to apply and illustrate the methods in data analysis exercises.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, the lectures may be delivered live or as short online videos. The classes will be live and in person, and delivered online or in class.

This course has a Reading Week in Week 6 of LT.

Formative coursework: Answers to questions based on data analysis exercises can be submitted for formative feedback.

Indicative reading: D J Bartholomew, F Steele, I Moustaki ; J I Galbraith (2008) Analysis of Multivariate Social Science Data (Second Edition).

Assessment: Research project (100%).

Research paper of 25-30 pages, including tables and figures, or approximately 3,000-4,000 words, answering a set of questions by applying multivariate analyses to some data (100%).

MY556 Half Unit Survey Methodology

This information is for the 2020/21 session.

Teacher responsible: Prof Patrick Sturgis COL.8.10

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Regional and Urban Planning Studies and MPhil/PhD in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. This course is available to all Research students.

Pre-requisites: Knowledge of basic descriptive and inferential statistics, to the level of MY451/MY551 or equivalent. MY556 can also be taken in parallel with MY452L/MY552L. Familiarity with notions of research design in the social sciences, to the level of MY400/MY500 or equivalent.

Course content: This course provides an introduction to the methodology of the design and analysis of social surveys. It is intended both for students who plan to design and collect their own surveys, and for those who need to understand and use data

from existing large-scale surveys.

Topics covered include basic ideas of target populations, survey estimation and inference, sampling error and nonsampling error; sample design and sampling theory; methods of data collection; survey interviewing; cognitive processes in answering survey questions; design and evaluation of survey questions; nonresponse error and imputation for item nonresponse; survey weights; analysis of data from complex surveys; accessing, preparing and working with secondary data from existing social surveys. The course includes computer classes, using the statistical computer package Stata; no previous knowledge of Stata is required.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, the lectures may be delivered live or as short online videos. The classes will be live and delivered online or in person depending on access to campus in LT.

This course has a reading week in Week 6 of LT.

Formative coursework: Exercises from the seminars can be submitted for marking

Indicative reading: Groves, R M, Fowler, F J, Couper, M P, Lepkowski, J M, Singer, E, and Tourangeau, R (2009). Survey Methodology (2nd ed.). Wiley.

Assessment: Research project (100%).

Research paper of 25-30 pages, including tables and figures, or approximately 3,000-4,000 words, reporting the data analysis of a given research question and data set (100%).

MY557 Half Unit Causal Inference for Observational and Experimental Studies

This information is for the 2020/21 session.

Teacher responsible: Dr David Hendry

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Regional and Urban Planning Studies, MPhil/PhD in Social Research Methods, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Marketing), MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Knowledge of multiple linear regression and some familiarity with generalised linear models, to the level of MY452/MY552 or equivalent. Familiarity with notions of research design in the social sciences, to the level of MY400/MY500 or equivalent

Course content: This course provides an introduction to statistical methods used for causal inference in the social sciences. Using the potential outcomes framework of causality, topics covered include research designs such as randomised experiments and observational studies. We explore the impact of noncompliance in randomized experiments, as well as nonignorable treatment assignment in observational studies. To analyse these research designs, the methods covered include experiments, matching, instrumental variables, difference-in-difference, and regression discontinuity. Examples are drawn from different social sciences. The course includes computer classes, where the R software is used for computation.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, the lectures may be delivered live or as short online videos. The classes will be live and in person, and delivered online or in class. This course has a reading week in Week 6 of LT.

Formative coursework: Exercises from the computer classes can be submitted for feedback.

Indicative reading: Angrist, J. D. and Pischke, J.-S. (2009). Mostly Haemless Econometrics. Princeton University Press. Rosenbaum, P.R. (2010). Design of Observational Studies. Springer. Holland, Paul W. "Statistics and Causal Inference." Journal of the American

Statistical Association 81(396): 945-960.

Assessment: Coursework (100%, 4000 words).

MY559 Half Unit

Special Topics in Quantitative Analysis: Quantitative Text Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Blake Miller COL.7.14

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in International Relations, MPhil/PhD in Regional and Urban Planning Studies and MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: The course will assume knowledge of linear and logistic regression models, to the level covered in MY452.

Course content: The course surveys methods for systematically extracting quantitative information from text for social scientific purposes, starting with classical content analysis and dictionary-based methods, to classification methods, and state-of-the-art scaling methods and topic models for estimating quantities from text using statistical techniques. The course lays a theoretical foundation for text analysis but mainly takes a very practical and applied approach, so that students learn how to apply these methods in actual research. The common focus across all methods is that they can all be reduced to a three-step process: first, identifying texts and units of texts for analysis; second, extracting from the texts quantitatively measured features - such as coded content categories, word counts, word types, dictionary counts, or parts of speech - and converting these into a quantitative matrix; and third, using quantitative or statistical methods to analyse this matrix in order to generate inferences about the texts or their authors. The course systematically surveys these methods in a logical progression, with a practical, hands-on approach where each technique will be applied using appropriate software to real texts.

Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a reading week in Week 6 of LT.

Formative coursework: Exercises from the computer classes can be submitted for marking.

Indicative reading: quanteda: An R package for quantitative text analysis. <http://kbenoit.github.io/quanteda/>. Grimmer, Justin and Brandon M. Stewart. 2013. "Text as Data: The Promise and Pitfalls of Automatic Content Analysis Methods for Political Texts." *Political Analysis* 21(3):267–297. Loughran, Tim and Bill McDonald. 2011. "When Is a Liability Not a Liability? Textual Analysis, Dictionaries, and 10-Ks." *The Journal of Finance* 66 (1, February): 35–65. Evans, Michael, Wayne McIntosh, Jimmy Lin and Cynthia Cates. 2007. "Recounting the Courts? Applying Automated Content Analysis to Enhance Empirical Legal Research." *Journal of Empirical Legal Studies* 4 (4, December):1007–1039.

Assessment: Coursework (60%, 2000 words) in the LT. Project (40%, 5000 words) in the ST.

MY560

Workshop in Advanced Quantitative Analysis

This information is for the 2020/21 session.

Availability: This course is available to MPhil/PhD students from across the LSE who are undertaking projects using quantitative methods.

Course content: MY560 is a series of workshop modules on advanced topics in quantitative research methodology. These workshops assume a background in quantitative methods at least covering basic statistics, linear and logistic regression. Most of the workshops are for one day, and consist of a 2 hour lecture plus 2 hour computer class in the afternoon and early evening of the same day. While many of the workshops are part of a series on related topics, each workshop is self-contained, and can be attended without attending any other workshops.

Teaching: Sessions to be held in term time throughout the year; participants are required to sign up via LSE's Training and Development System.

Assessment: This course is non-examinable.

MY561 Half Unit

Social Network Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Eleanor Power COL 8.03 and Dr Milena Tsvetkova COL 8.06

Availability: This course is available on the MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available to research students only.

Course content: This course focuses on data about connections, forming structures known as networks. Networks and network data describe an increasingly vast part of the modern world, through connections on social media, communications, financial transactions, and other ties. This course covers the fundamentals of network structures, network data structures, and the analysis and presentation of network data. Students will work directly with network data and structure and analyse these data using R. Social networks have always been at the centre of human interaction, but especially with the explosive growth of the internet, network analysis has become increasingly central to all branches of the social sciences. How do people influence each other, bargain with each other, exchange information (or germs), or interact online? A diverse array of deep questions about human behaviour can only be answered by examining the social networks encompassing and shifting around us. Network analysis has emerged as a cross-disciplinary science in its own right, and has in fact proven to be of even greater generality and broader applicability than just the social, extending to ecology, physics, genetics, computer science, and other domains.

This course will examine the key papers in the development of social network analysis, and will develop the theory and methodological tools needed to model and predict social networks and use them in social sciences as diverse as sociology, political science, economics, health, psychology, history, or business. The core of the course will comprise the essential tools of network analysis, from centrality, homophily, and community detection, to random graphs, network formation, and information flow. Alongside this we will read a series of substantive and seminal papers, shaped in part by the interests of the students and their various backgrounds, with a particular focus on the difficult task of causal inference in social networks. The course will also provide an introduction to network modelling, analysis, and visualization using R.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours across Lent Term. This year, some or all of this teaching may be delivered

through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 2 problem sets in the LT.

Type: Structured formative problem sets in two of the weeks will build on what was covered in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.

Indicative reading: Newman, M.E.J. (2010). *Networks: An introduction*. Oxford, UK: Oxford University Press. Scott, J. (2017). *Social Network Analysis*. Los Angeles: SAGE. 4th edition. Easley, D., & Kleinberg, J. (2010). *Networks, Crowds, and Markets: Reasoning About a Highly Connected World*. New York: Cambridge University Press.

Assessment: Take-home assessment (50%) and problem sets (50%) in the LT.

Student problem sets will be marked in five of the weeks. These will constitute 50% of the final overall mark.

MY565 Half Unit Intermediate Quantitative Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Jonathan Jackson COL8.05

Availability: This course is available on the MPhil/PhD in Health Policy and Health Economics. This course is available as an outside option to students on other programmes where regulations permit.

This course is available to all research students where regulations permit.

Pre-requisites: Participants should have studied introductory statistics or quantitative methods before, up to an introduction to descriptive statistics and basic statistical inference. Students with no previous studies in quantitative analysis should take instead Introduction to Quantitative Analysis (MY451).

Because of the overlaps between these courses, it is not possible to take both this course and either of Introduction to Quantitative Analysis (MY451) or Applied Regression Analysis (MY452) as assessed courses.

Course content: The course is intended for students with some (even if limited) previous experience of quantitative methods or statistics. Using examples from psychological research, it covers first a review of the foundations of descriptive statistics and statistical inference, in the context of the analysis of two-way contingency tables and comparisons of means between two groups. The main topic of the course is linear regression modelling and related methods, including scatterplots, correlation, simple and multiple linear regression, and analysis of variance and covariance. An introduction to binary logistic regression modelling is also included. The computer classes give hands-on training in the application of these statistical techniques.

Teaching: This course is delivered through a combination of classes and lectures in Michaelmas Term. This year, this teaching will be delivered through a combination of short online recorded films for the lectures and live classes, which will be delivered face-to-face where feasible, or online where not. Combined hours across lectures and classes will be equivalent to a minimum of 30 hours face-to-face teaching.

This course has a Reading Week in Week 6 of MT.

Formative coursework: Self-guided computer exercises implementing statistics covered in the lectures with weekly online homework on the material covered in the lectures and exercises.

Indicative reading: A course pack will be available for download online.

Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*, and Alan Agresti and Barbara Finlay (2009, 4th

edition) *Statistical Methods for the Social Sciences*.

Assessment: Continuous assessment (20%) in the MT. Online assessment (80%).

Three-hour online assessment (80%) in the January exam period.

Continuous assessment (20%) in the MT.

Homework and participation will constitute 20% of the final overall mark.

MY570 Half Unit Computer Programming

This information is for the 2020/21 session.

Teacher responsible: Dr Milena Tsvetkova COL8.06

Availability: This course is available on the MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course introduces students to the fundamentals of computer programming as students design, write, and debug computer programs using the programming language Python and R. The course will also cover the foundations of computer languages, algorithms, functions, variables, object-orientation, scoping, and assignment. The course will rely on practical examples from computational social science and social data science.

Students will learn how to design algorithms to solve problems and how to translate these algorithms into working computer programs. Students acquire skills and experience as they learn Python and R, through programming assignments with an approach that integrates project-based learning. This course is an introduction to the fundamental concepts of programming for students who lack a formal background in the field, but will include more advanced problem-solving skills in the later stages of the course. Topics include algorithm design and program development; data types; control structures; functions and parameter passing; recursion; data structures; searching and sorting; and an introduction to the principles of object-oriented programming. The primary programming languages used in the course will be Python and R.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 10 problem sets in the MT.

Students will work on weekly, structured problem sets in the staff-led class sessions. Example solutions will be provided at the end of each week.

Indicative reading:

- Gutttag, John V. *Introduction to Computation and Programming Using Python: With Application to Understanding Data*. MIT Press, 2016.
- Lutz, Mark *Learning Python*. 5th Edition. O'Reilly, 2013. Intermediate and Advanced documentation at <https://www.python.org/doc/>.

- Python, 160 *Intermediate and advanced documentation*. Available online at <https://www.python.org/3doc/>.
- Venables, William N., David M. Smith, and the R Core Team. *An Introduction to R*. Available online at <https://cran.r-project.org/doc/manuals/r-release/R-intro.pdf>.
- Zuur, Alain, Elena N. Ieno, and Erik Meesters. *A Beginner's Guide to R*. Springer Science & Business Media, 2009.

Assessment: Project (50%) and problem sets (50%) in the MT.

For the individual project, students will be required to develop Python software that addresses a sufficiently complex computational social science task. Examples of possible projects include a software package that collects and analyses online data, an experimental game, or an agent-based model. Marking of this assessment will be at a level appropriate for PhD students.

MY572 Half Unit

Data for Data Scientists

This information is for the 2020/21 session.

Teacher responsible: Friedrich Geiecke

Availability: This course is available on the MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course will cover the principles of digital methods for storing and structuring data, including data types, relational and nonrelational database design, and query languages. Students will learn to build, populate, manipulate and query databases based on datasets relevant to their fields of interest. The course will also cover workflow management for typical data transformation and cleaning projects, frequently the starting point and most timeconsuming part of any data science project. This course uses a project-based learning approach towards the study of online publishing and group-based collaboration, essential ingredients of modern data science projects. The coverage of data sharing will include key skills in on-line publishing, including the elements of web design, the technical elements of web technologies and web programming, as well as the use of revision-control and group collaboration tools such as GitHub. Each student will build one or more interactive website based on content relevant to his/her domain-related interests, and will use GitHub for accessing and submitting course materials and assignments. In this course, we introduce principles and applications of the electronic storage, structuring, manipulation, transformation, extraction, and dissemination of data. This includes data types, database design, data base implementation, and data analysis through structured queries. Through joining operations, we will also cover the challenges of data linkage and how to combine datasets from different sources. We begin by discussing concepts in fundamental data types, and how data is stored and recorded electronically. We will cover database design, especially relational databases, using substantive examples across a variety of fields. Students are introduced to SQL through MySQL, and programming assignments in this unit of the course will be designed to insure that students learn to create, populate and query an SQL database. We will introduce NoSQL using MongoDB and the JSON data format for comparison. For both types of database, students will be encouraged to work with data relevant to their own interests as they learn to create, populate and query data. In the final section of the data section of the course, we will step through a complete workflow including data cleaning and transformation, illustrating many of the practical challenges faced at the outset of any data analysis or data science project.

Online publishing and collaboration tools forms the second part of this course, along with the tools and technologies that underlie them. Students will develop interactive, secure and powerful projects for the World Wide Web using both client and server side technologies. Collaboration and the dissemination and submission of course assignments will use GitHub, the popular code repository and version control system. The course begins with an indepth look at the markup languages that form the foundations of building web sites with a study of HTML and CSS. Students next study basic programming in JavaScript, to provide client and server side tools including the customization of web content using Bootstrap and Jekyll to publish web pages, which will provide the basis for a class project.

Teaching: This course is delivered through a combination of

classes and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 10 problem sets in the MT.

Students will work on weekly, structured problem sets in the staff-led class sessions. Example solutions will be provided at the end of each week.

Assessment: Take-home assessment (50%) and problem sets (50%) in the MT.

Marking of these assessments will be at a level appropriate for PhD students.

MY574 Half Unit

Applied Machine Learning for Social Science

This information is for the 2020/21 session.

Teacher responsible: Dr Blake Miller COL.7.14

Availability: This course is available on the MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available to research students only.

Pre-requisites: Applied Regression Analysis (MY452) or equivalent is required.

Course content: Machine learning uses algorithms to find patterns in large datasets and make predictions based on them. This course will use prominent examples from social science research to cover major machine learning tasks including regression, classification, clustering, and dimensionality reduction. A particular emphasis will be placed on the ethical issues surrounding machine learning applications, including privacy, algorithmic bias, and informed consent. Lectures will use case studies to introduce specific machine learning algorithms including LASSO, ridge regression, logistic regression, k-nearest neighbour classification, decision

trees, support vector machines, k-means clustering, hierarchical clustering, principal component analysis, and linear discriminant analysis. Students will learn to apply these algorithms to data and validate and evaluate models. Students will work directly with social data and analyse these data using Python or R.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 problem set in the LT.

One structured problem set will be provided in the first weeks of the course. Students will start the problem set in the first computer workshop session and complete it outside of class.

Indicative reading:

- Wang, Y., & Kosinski, M. (2018). Deep neural networks are more accurate than humans at detecting sexual orientation from facial images. *Journal of Personality and Social Psychology*, 114(2), 246-257.

Assessment: Problem sets (40%) and quiz (30%) in the LT. Take-home assessment (30%) in the ST.

For the final project, students will be expected to submit a 3000-word paper in which they identify and contextualise a relevant social data science problem related to their dissertation research, find suitable data to address it, plan and conduct extensive machine learning analysis on the data, and present the findings. Marking of these assessments will be at a level appropriate for PhD students.

MY599

Department of Methodology Seminar

This information is for the 2020/21 session.

Teacher responsible: Dr Eleanor Power and Dr Chana Teeger

Availability: This course is compulsory on the MPhil/PhD in Social Research Methods. This course is available on the MPhil/PhD in International Relations. This course is available as an outside option to students on other programmes where regulations permit. Open to all.

Course content: Papers on topics of methodological interest will be presented by staff and visitors.

Teaching: Meetings typically take place during term time and

will be held in COL8.13 unless otherwise stated. Please regularly consult the Department of Methodology webpages for full details about seminar dates, times, topics and speakers.

Assessment: This course is non-examinable.

PB500

Current Research in Social Psychology

This information is for the 2020/21 session.

Teacher responsible: Prof Martin Bauer

Availability: This course is compulsory on the MPhil/PhD in Psychological and Behavioural Science. This course is not available as an outside option.

This course is available to academic staff and research students only.

Course content: Weekly seminars where PhD students present their work, and learn research skills (e.g. writing, grant preparation). The course runs through Michaelmas Term, Lent Term and Summer Term.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 7 hours of seminars in the ST.

Assessment: Non-examinable.

PH500

Research Methods in Philosophy

This information is for the 2020/21 session.

Teacher responsible: Prof Richard Bradley

Availability: This course is available on the MPhil/PhD in Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Topics in contemporary philosophy.

Teaching: Seminars PH500 15 x two-hour (MT, LT, ST). Different members of the department will lead the seminar in each of the three terms.

A more detailed syllabus will be posted at the beginning of each term.

Assessment: This course is non-examinable.

PH501

Philosophical Problems Seminar

This information is for the 2020/21 session.

Teacher responsible: Dr Anna Mahtani and Prof Christian List

Availability: This course is compulsory on the MPhil/PhD in Philosophy. This course is not available as an outside option.

Course content: In this course, we will read and carefully discuss together a range of classic papers in contemporary analytic philosophy that might not otherwise be covered in LSE Philosophy Department courses. Topics are selected from metaphysics, the philosophy of mind and action, epistemology, and the philosophy of language. This list is illustrative.

Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT.

Indicative reading: Specific readings will be announced in a detailed syllabus at the start of the term.

Assessment: Two essays of 5000 words each over the course of the two terms. Either or both of these essays may be replaced by two shorter essays each of 2500 words.

PH502

Reasoning and Logic

This information is for the 2020/21 session.

Teacher responsible: Dr Laurenz Hudetz

Availability: This course is available on the MPhil/PhD in Philosophy. This course is not available as an outside option. The course is, in general, only aimed at those students who have never taken a course in formal logic before. For such students the course is compulsory.

Course content: This course covers the following topics.

1. Introduction to classical logic

Logic is the study of arguments and inferences. Its main task is to give an explicit characterisation of those arguments and inferences that are logically valid. Logic tells you exactly when some conclusion follows from some premises and when it does not. The skill of devising logically valid arguments is very important for philosophers. We train this and related skills based on classical theories of logical consequence. The course covers sentential or propositional logic as well as (first-order) predicate logic.

2. Model theory

Scientists often use mathematical structures to model real-world systems and to predict or explain their behaviour. Model theory is the study of mathematical structures from a logical point of view. Students will be introduced to core concepts of model theory. We address questions such as the following: What exactly is a structure or model? What is a theory? What does it mean that a structure satisfies a formula or theory? When are two models structurally the same (isomorphic)? Rigorous answers to these questions yield a proper semantics for classical predicate logic, shed light on the notion of truth and help to better understand the formal structure of scientific theories and models.

3. The theory of definitions

The modern theory of definitions offers a precise definition of 'definition' as well as rigorous criteria for checking whether a definition is formally correct. The skill of defining in a correct way can hardly be overestimated in philosophy. It prevents misunderstandings and can drastically improve the clarity of concepts, claims and arguments. It is particularly important for philosophers because many philosophical questions require definitions as answers (e.g., 'What is knowledge?', 'What is truth?', 'What is justice?', 'Under which conditions is an act morally wrong?').

4. Extensions of classical logic

Classical logic only deals with truth-functional sentential connectives (e.g., 'not', 'and', 'or'). However, there are also non-truth-functional connectives which play a central role in philosophical and scientific reasoning. Prime examples are counterfactual conditionals ('if A were the case, then B would be the case'), causal notions ('A causes B') and modal notions (such as 'it is possible that A' and 'it is necessary that A'). But what exactly is the meaning of these notions? In other words: how could a semantics for such non-truth-functional connectives look like? This course introduces students to the basic ideas of possible world semantics.

5. Inductive logic and probability

In the case of a deductively valid inference, it is utterly impossible that the conclusion is false when the premises are true. However, many inferences we draw in practice do not satisfy this ideal of validity. In many cases, the premises support the conclusion to some degree, but their truth would not guarantee the truth of the conclusion. For example, it does not follow logically from the premise that someone smokes 40 cigarettes a day (together with background medical theories and data) that they will die early from smoking-related illness -- but it is much more probable that they will than if they did not smoke. Inductive logic is the systematic study of inferences of that type. Students will be introduced to the fundamentals of inductive logic and probabilistic reasoning.

Teaching: 15 hours of lectures in the MT. 15 hours of lectures in the LT.

This year, lectures will be delivered online. Appropriate back-up teaching will be arranged with individual students.

This course includes a reading week in Week 6 of both MT and LT.

Formative coursework: Formative coursework will take the form of problem sets. These will be set on the basis of the material covered in lectures. Students are required to complete problem sets before the associated class and to be ready to present and discuss their answers in class.

Indicative reading: There will be comprehensive lecture slides and materials covering the entire course content. Indicative background readings include:

Assessment: Take-home assessment (90%) in the ST. Quiz (10%) in the MT and LT.

PH551

Research Seminar in the Philosophy of Natural Sciences

This information is for the 2020/21 session.

Teacher responsible: Prof Roman Frigg

Availability: This course is available on the MPhil/PhD in Philosophy. This course is not available as an outside option.

Course content: This is a special topics course on the philosophy of the natural sciences. The course is integrated with the meetings of the Sigma Club. Approximately 3 sessions per term are Sigma Club meeting; the remaining sessions are the research seminar. The topic will be announced at the beginning of the term.

Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT.

As this is a reading group, each participant is invited to take the lead on at least one meeting, choosing a topic and readings in consultation with the instructor, and leading the discussion during at least one of the Monday seminars.

Formative coursework: Students will be expected to write one essay per term and to give a seminar presentation.

PH555

Research Seminar in the Philosophy of Economics and Social Sciences

This information is for the 2020/21 session.

Teacher responsible: Dr Johanna Thoma and Prof Richard Bradley

Availability: This course is available on the MPhil/PhD in Philosophy. This course is not available as an outside option.

Course content: Philosophical issues in economics and the social sciences.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 10 hours of seminars in the ST.

Formative coursework: Students will be expected to write one essay per term and to give seminar presentations.

SO500

Aims and Methods Research Class for MPhil Students

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Savage STC S210

Availability: This course is compulsory on the MPhil/PhD in Cities Programme and MPhil/PhD in Sociology. This course is not available as an outside option.

Course content: The research seminar aims to provide students with a conceptual and practical framework within which to think through planning their research. This includes devising research questions, how to do a literature review, selecting appropriate methods for research, linking theory and practices, ethical issues and writing. The course will comprise workshops and student presentations. By the end of the course students should be able to formulate clear aims and methods for their own research. All first year MPhil students must attend.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: A 5,000 word formative paper is due by the first Friday in May of Year 1, to be submitted to the Course Convenor and Supervisors.

Assessment: Paper (100%) in the ST.

10,000 word Upgrade paper on the 'aims and methods' of the thesis including preliminary data collection and analysis, and a viva voce examination. For full-time students, this Upgrade paper is submitted through Moodle by Friday of Week 6 of the MT in Year 2. The viva voce examination will be conducted by the end of the MT in Year 2. Satisfactory completion of the Upgrade paper and the viva voce examination are necessary in order to Upgrade from MPhil to PhD student. Part-time students may elect to be evaluated in Year 2 or Year 3.

SO501

Data Analysis Workshop

This information is for the 2020/21 session.

Teacher responsible: Prof Michael Savage

Availability: This course is compulsory on the MPhil/PhD in Cities Programme and MPhil/PhD in Sociology. This course is not available as an outside option.

Only available to sociology research students in the second and subsequent years of their MPhil/PhD.

Course content: Seminars will focus on doing data analysis using materials made and collected as part of PhD research. Each student will present data to the group. Students may submit the following types of data: (part of) a qualitative interview to code OR a collection of interview sections coded as 'X' to be analysed according to a specified method (e.g., narrative analysis, grounded theory); fieldnotes for coding or for reflections on what is needed for 'thick description'; an image or text to code or analyse according to a specified method (e.g., discourse analysis); a map of the research situation (e.g., situational analysis, network analysis); a regression analysis that requires interpretation, etc. All students will be asked to read the data before the workshop. The workshop will start with the student briefly presenting their data and contextualizing it within their research question, data set and methodological approach. As a group, that piece of data will be closely analysed using the method specified by the student.

Teaching: 10 hours of seminars in the LT.

Assessment: There is no formal assessment, but participants are asked to present research materials, read other students' research materials, and contribute to discussion.

SO505 Not available in 2020/21

Becoming a Professional Sociologist

This information is for the 2020/21 session.

Teacher responsible: Dr Carrie Friese STC.S213

Availability: This course is compulsory on the MPhil/PhD in Cities Programme and MPhil/PhD in Sociology. This course is not available as an outside option.

This course will be available for Year 3 and 4 students as an optional training course for 2018/19. It is not available to PhD students outside the department.

Pre-requisites: Students must have completed Aims and Methods Research Class for MPhil Students (SO500).

Students will have completed SO500 and passed Aims and Methods. Ideally they will have completed SO501. However, exceptions will be made for students who were outside of London in Year 2 for fieldwork and intend to complete their PhD in three years. In that instance students can take SO501 and SO502 simultaneously.

Course content: This half-unit course will provide a workshop environment to discuss key aspects of developing a career as a Sociologist. These may include:

1. Writing, submitting and revising journal articles;
2. Writing a book proposal;
3. Applying for research funding/jobs;
4. Using social media;
5. Developing CVs.

Students will:

- Gain an understanding of the different aspects involved in developing a career in academic Sociology
- Gain practical understanding of how to pursue the different elements of a sociological career in order to be in a good position in the job market and for postdoctoral funding
- Provide support for students as they are finishing their PhD and move into the next stage of their career as sociologists

Teaching: 15 hours of workshops in the MT.

Formative coursework: There is no formative assessment for this course.

Indicative reading: There is no reading list for this course.

Assessment: There is no summative assessment for this course.

The course is a pass/fail and is dependent on attendance.

SO511

Research Seminar in Political Sociology

This information is for the 2020/21 session.

Teacher responsible: Dr Robin Archer STC.S114a

Availability: This course is available on the MPhil/PhD in Cities Programme and MPhil/PhD in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

MPhil/PhD students whose research is in the field of political sociology. Students from all departments are welcome.

Course content: Political sociologists seek to understand fundamental political phenomenon by studying them in their social context. This seminar seeks to provide a small, friendly forum in which research students can discuss important recent publications and debates in this field. It often spends a number of weeks reading recent prize-winning books and articles in the field, and sometimes examines a topical theme for part of a term. There are also occasional guest lectures. In recent years, for example, there were lectures by Michael Mann (UCLA) on the rise and fall of

neo-liberalism. Theda Skocpol (Harvard) on the future of American politics, and Andreas Wimmer (Princeton) on ethnic conflict and state formation. The seminar also provides an opportunity to develop individual research projects. In each seminar, a twenty or thirty minute presentation is followed by discussion.

Teaching: 5 seminars in the LT.

Indicative reading: A short list of some important recent books and articles that could be discussed in the seminar will be suggested at the beginning of the year, and the seminar is always open to suggestions from participants. Readings continually change, but, for the purposes of illustration, recent seminars have discussed global anti-capitalism, suicide missions and the new imperialism, Christianity and American democracy, the welfare state, the politics of free markets, labour protest in China, street politics in Egypt, boycotts, and the crisis of capitalism.

Assessment: There is no formal assessment but participants are asked to present papers, contribute to discussion and read the work of selected scholars in the course of the session.

SO521 Not available in 2020/21 Research Seminar on Cities and Space

This information is for the 2020/21 session.

Teacher responsible: Dr Suzanne Hall STC S212 and Dr David Madden STC S209

Availability: This course is available on the MPhil/PhD in Cities Programme and MPhil/PhD in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

For MPhil/PhD students doing research on urban and spatial issues in the Cities Programme/Department of Sociology. If space is available, other graduate students may apply.

Course content: The PhD seminar in cities and space is a graduate seminar is based on discussion of key readings in the fields of urban social theory and spatial analysis. It also provides a forum for discussion of research issues relating to the study of cities and space. In the Michaelmas term we introduce a selection of writings that engage with perspectives in urban studies and critical theory, linking these to corresponding discussions in social theory. In the Lent term we explore methodological orientations to working on, in and for the urban, ranging from approaches to methods and fieldwork to policy interventions.

Teaching: 7 hours and 30 minutes of seminars in the MT. 7 hours and 30 minutes of seminars in the LT.

One 1.5 hour seminar every two weeks in the MT and LT.

Assessment: This course is not assessed

SP501 Research Student Seminar

This information is for the 2020/21 session.

Teacher responsible: Dr Berkay Ozcan OLD 2.32 and Dr Timothy Hildebrandt OLD 2.56

Availability: This course is compulsory on the MPhil/PhD in Demography/Population Studies and MPhil/PhD in Social Policy. This course is available on the MPhil/PhD in Demography/Population Studies and MPhil/PhD in Social Policy. This course is not available as an outside option.

For all MPhil/PhD students in the Department of Social Policy.

Course content: The course for first year students provides structured sessions for MPhil students (e.g. the MPhil/PhD process, ethics, risk). It also provides the forum in which first year full-time and second year part-time MPhil students must present their work to fellow students and staff in advance of submitting their major review (upgrade) document.

The course for second and third year students provides the forum where third year full-time (or equivalent) PhD students must

present their work to fellow students and staff in advance of submitting their third year review document.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

First year: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Second and third year: Workshops arranged through the year, plus for third years, pre-third year review presentation.

ST501 Half Unit Multilevel Modelling

This information is for the 2020/21 session.

Teacher responsible: Prof Irini Moustaki COL 6.05

Availability: This course is available on the MPhil/PhD in Health Policy and Health Economics and MPhil/PhD in Statistics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and basic statistical theory, including linear regression and logistic regression.

Course content: A practical introduction to multilevel modelling with applications in social research. This course deals with the analysis of data from hierarchically structured populations (e.g., students nested within schools, individuals nested within households or geographical areas) and longitudinal data (eg repeated measurements of individuals in a panel survey). Multilevel (random-effects) extensions of standard statistical techniques, including multiple linear regression and logistic regression, will be considered. The course will have an applied emphasis with computer sessions using appropriate software (e.g., Stata).

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 5 exercises in the LT.

Formative coursework is assigned fortnightly and returned to students with comments/feedback via Moodle before the lab sessions

Indicative reading: T. Snijders & R Bosker Multilevel Analysis: an Introduction to Basic and Advanced Multilevel Modelling, Sage (2011, 2nd edition). S Rabe-Hesketh & A Skrondal, Multilevel and Longitudinal Modeling using Stata, (Third Edition), Volume I: Continuous responses (plus Chapter 10 from Volume II, which is available free on the publisher's website). Stata Press (2012).

Also recommended are:

A Skrondal & S Rabe-Hesketh, Generalized Latent Variable Modeling: Multilevel, Longitudinal and Structural Equation Models, Chapman & Hall (2004); H Goldstein, Multilevel Statistical Models, Arnold (2003); S W Raudenbush & A S Bryk, Hierarchical Linear Models: Applications and Data Analysis Methods, Sage (2002); G Verbeke & G Molenberghs, Linear Mixed Models for Longitudinal Data, Springer (2000); E Demidenko, Mixed Models, Wiley (2004).

Assessment: Coursework (100%, 4000 words).

Assessment is by 100% coursework given to students in week 8 of the course.

ST505 Half Unit Statistical Modeling and Data Analysis

This information is for the 2020/21 session.

Teacher responsible: Dr Yunxiao Chen

Availability: This course is available on the MPhil/PhD in Statistics. This course is not available as an outside option.

In the first year, this course will be open only to MPhil/PhD in

Statistics. In the future, it may be made available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and statistical theory to the level of ST102 and ST206, and linear regression to the level of ST211. Some experience with R or other statistical software or programming languages (e.g., Python, Matlab) will be assumed.

Course content: This course provides an overview of modern applied statistics. It will cover an introduction to quantitative research design, exploratory data analysis and data visualisation, generalised linear models, and generalised latent variable models (including mixed effects or multilevel models, longitudinal data analysis, and structural equation models). The course will have an applied emphasis with students gaining hands-on experience in data analysis using R and practice in the interpretation of results.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 1 project in the MT.

Students will be given a real dataset and asked to analyse the data to answer scientific questions and then write a report. Students' reports will be marked and feedback will be given.

Indicative reading: Maïndonald, J., & Braun, J. (2006). Data analysis and graphics using R: an example-based approach. Cambridge University Press. Gelman, A., & Hill, J. (2006). Data analysis using regression and multilevel/hierarchical models. Cambridge University Press. Skrondal, A. and Rabe-Hesketh (2004) Generalized latent variable modeling : multilevel, longitudinal, and structural equation models. Chapman & Hall/CRC. Imbens, G. W. and Rubin, D. B. (2015). Causal Inference for Statistics, Social, and Biomedical Sciences : An Introduction Cambridge University Press

Assessment: Project (30%, 1000 words) in the MT.

Take-home assessment (70%) in the LT.

The summative assessment will be based on one piece of coursework (30%) and one take-home exam (70%). For the coursework, students will be given a dataset in week 6 and asked to analyse the data to answer several scientific questions and submit a report in week 10. The take-home exam will be in January. The take-home exam should be no fewer than 3000 words and students will be asked to submit this within three days.

ST510 Half Unit Foundations of Machine Learning

This information is for the 2020/21 session.

Teacher responsible: Dr Chengchun Shi, COL.5.11

Availability: This course is available on the MPhil/PhD in Statistics. This course is available with permission as an outside option to students on other programmes where regulations permit.

The availability as an outside option requires a demonstration of sufficient background in mathematics and statistics and is at the discretion of the instructor.

Pre-requisites: A knowledge of probability and statistical theory to the level of ST102 and ST206 and some parts of ST505 (e.g. linear models and generalized linear models). Some experience with computer programming will be assumed (e.g., Python, R).

Course content: The goal of this course is to provide students with a training in foundations of machine learning with a focus on statistical and algorithmic aspects. Students will learn fundamental statistical principles, algorithms, and how to implement and apply machine learning algorithms using the state-of-the-art Python packages such as scikit-learn, TensorFlow, and OpenAI Gym. The course will cover the following topics:

1 Foundations of supervised learning: empirical risk minimisation, empirical minimisation with inductive bias, PAC learning, learning via uniform convergence

2 Convex optimisation: convexity, Newton-Raphson, gradient descent, stochastic gradient descent (SGD), acceleration by momentum, smoothness, strong convexity, convergence rates, alternating direction method of multipliers

3 Non-convex optimisation: EM algorithm, MCMC, variational Bayesian inference, optimisation landscape, local minima and saddle points

4 Support vector machines: margin and hard-SVM, soft-SVM and norm regularization, optimality conditions and support vectors, implementing soft-SVM using SGD

5 Decision trees and random forests: sample complexity, decision tree algorithms, random forests

6 Neural networks: feedforward neural networks, expressive power of neural networks, stochastic gradient descent and backpropagation

7 Unsupervised learning - clustering: linkage-based clustering algorithms, k-means and other cost minimisation clustering, spectral clustering, information bottleneck

8 Unsupervised learning - dimension reduction: PCA, matrix completion, autoencoder

9 Online learning and optimisation: online learnability, online classification, weighted majority, online convex optimization, regret minimisation

10 Reinforcement learning: multi-armed bandit processes, reinforcement learning problem, Markov Decision Problem, reinforcement learning solution methods

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 9 problem sets in the LT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

8 Richard S. Sutton and Andrew G. Barto, Reinforcement Learning: An Introduction, Second Edition, MIT Press, Cambridge, MA, 2018; text here <http://www.incompleteideas.net/book/the-book-2nd.html>

Assessment: Exam (40%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.

Project (40%, 3000 words) and take-home assessment (20%) in the LT.

The summative assessment will be based on four pieces of take-home assessment assignments (20% in total; 5% each), one project assignment (40%), and one written exam (40%).

For the take-home assessments, students will be given homework problem sets and computer programming exercises in weeks 2, 4, 7, and 9.

The project assessment will be in April. The project report should be no fewer than 3000 words and students will be asked to submit their project reports within one week.

ST542 Half Unit Not available in 2020/21 Longitudinal Data Analysis

This information is for the 2020/21 session.

Teacher responsible: Prof Fiona Steele COL 7.12

Availability: This course is available on the MPhil/PhD in Health Policy and Health Economics and MPhil/PhD in Statistics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and basic statistical theory, including linear regression and logistic regression.

Course content: A practical introduction to methods for the analysis of repeated measures data, including continuous and binary outcomes. Topics include: longitudinal study designs, models for two measurements, (random effects) growth curve models, marginal models, missing data, latent class models and dynamic (autoregressive) models. The course will have an applied emphasis with fortnightly computer classes using the Stata software.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Week 6 will be a reading week.

Formative coursework: Students will be expected to produce 4 exercises in the LT.

Formative assessment is based on data analysis problems that require the use of the statistical software to apply the statistical techniques taught in the lectures and computer classes. Coursework is given out to students every two weeks and returned with feedback and comments.

Indicative reading: Hedeker D, Gibbons RD. Longitudinal Data Analysis. Hoboken, New Jersey: John Wiley & Sons, Inc. (2006). Rabe-Hesketh S, Skrondal A. (2012) Multilevel and Longitudinal Modeling Using Stata, Third Edition. Volume I: Continuous Responses. College Station, Texas: Stata Press. Singer JD, Willett JB. Applied Longitudinal Data Analysis: Modeling Change and Event Occurrence. New York: Oxford University Press (2003). (Part I only).

Assessment: Coursework (100%, 4000 words) in the ST. Assessment is by 100% coursework which is given to students in week 8

ST552 Half Unit Probability and Mathematical Statistics I

This information is for the 2020/21 session.

Teacher responsible: Prof Umut Cetin

Availability: This course is available on the MPhil/PhD in Statistics. This course is available with permission as an outside option to students on other programmes where regulations permit. The availability as an outside option requires a demonstration of sufficient background in mathematics and statistics and is at the discretion of the instructor.

Course content: This course provides theoretical and axiomatic foundations of probability and mathematical statistics, and is intended for PhD students in the Statistics department. In particular, the following topics will be covered:

1. Measure spaces; Caratheodory extension theorem; Borel-Cantelli lemmas.
2. Random variables; monotone-class theorem; different kinds of convergence.
3. Kolmogorov's 0-1 law; construction of Lebesgue integral.
4. Monotone convergence theorem; Fatou's lemmas; dominated convergence theorem.
5. Expectation; L^p spaces; uniform integrability.
6. Characteristic functions; Levy inversion formula; Levy convergence theorem; CLT.
7. Principle and basis for statistical inference: populations and samples, decision theory, basic measures for estimators.
8. Estimation: U and V statistics, unbiased estimators, MVUE, MLE.

9. Hypothesis testing: Neyman-Pearson lemma, UMP, confidence sets.

10. Product measures; conditional expectation.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 9 problem sets in the MT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading:

- 1 Williams, D. (1991). Probability with Martingales. Cambridge University Press.
- 2 Durrett, R. (2019). Probability: Theory and Examples. Cambridge Series in Statistical and Probabilistic Mathematics.
- 3 Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.
- 4 Keener, R. (2010). Theoretical Statistics. Springer Texts in Statistics.

Assessment: Exam (70%, duration: 3 hours, reading time: 10 minutes) in the January exam period.

Coursework (30%).

Three of the homework problem sets will be submitted and marked as assessed coursework.

ST553 Half Unit Probability and Mathematical Statistics II

This information is for the 2020/21 session.

Teacher responsible: Prof Konstantinos Kardaras

Availability: This course is available on the MPhil/PhD in Statistics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Probability and Mathematical Statistics I is a pre-requisite.

Course content: This course provides instruction in advanced topics in probability and mathematical statistics, mainly based on martingale theory. It is a continuation of Probability and Mathematical Statistics I. The following topics will in particular be covered:

- 1 Conditional expectation revisited; linear regression; martingales and first examples.
- 2 Concentration inequalities; dimension reduction; log-Sobolev inequalities.
- 3 Martingale transforms; optional sampling theorem; convergence theorems.
- 4 160Sequential testing; backwards martingales; law of large numbers; de Finetti's theorem.
- 5 Markov chains; recurrence; reversibility; foundations of MCMC.
- 6 Ergodic theory.
- 7 Brownian motion; quadratic variation; stochastic integration.
- 8 Stochastic differential equations; diffusions; filtering.
- 9 Bayesian updating; Ergodic diffusions; Langevin samplers.
- 10 Brownian bridge; empirical processes; Kolmogorov-Smirnov statistic.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching may be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce 9 problem sets in the LT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will

be chosen from a subset of these problems.

Indicative reading:

1 Williams, D. (1991). Probability with Martingales. Cambridge University Press.

2 Durrett, R. (2019). Probability: Theory and Examples. Cambridge Series in Statistical and Probabilistic Mathematics.

3 Karatzas, I, Shreve S. (1991). Brownian motion and Stochastic Calculus. Springer GTM.

4 Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.

5 Keener, R. (2010). Theoretical Statistics. Springer Texts in Statistics.

Assessment: Exam (70%, duration: 3 hours, reading time: 10 minutes) in the summer exam period.

Coursework (30%).

Three of the homework problem sets will be submitted and marked as assessed coursework.

Important information in response to COVID-19

Language Centre Courses

Modern Foreign Language Certificate Courses

LN701

Arabic: Level One (Standard)

This information is for the 2020/21 session.

Teacher responsible: Mr Nadim Ben Mohamed Mahjoub PEL.6.01

Pre-requisites:

- No previous knowledge of Arabic.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.

Course content:

Course aims

- To develop the use of Arabic at survival level.
- To raise awareness about the two Arabic varieties (formal and colloquial).
- To learn the Arabic writing system.
- To introduce students to a major dialect of Arabic.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A1- of Common European Framework.

Communicative content

- Greetings
- Asking for and giving personal information
- Talking about your immediate family
- Talking about studies and jobs
- Say where you live
- Talking about your city and country
- Talking about present actions

Structural content

- Alphabet
- Joining letters
- Pronunciation
- Feminine and masculine words
- Roots
- Present tense
- The definitive article
- Independent pronouns and pronoun suffixes
- Nouns-adjective phrases
- Numbers
- Plural
- Dual
- Word order
- Demonstrative: this (masc./fem.)
- Possessive pronouns
- Interrogatives (where, when, what, in which, etc.)
- Prepositions: in, between, etc
- Nisba (nationality)
- Idafa (genitive construction)
- Introduction to Past Tense
- Use of "also, where, in the same, etc."

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

• This is a 40 hour-course.

• Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Students will be provided with a study pack.

Other useful materials

- Alif Baa: Introduction to Arabic, Letters and Sounds by Brustad et al. Georgetown Univ. Press, Second or Third Editions
- Al-Kitaab fii Ta'llum al-'Arabiyya Al-Kitaab Fii Ta Allum Al-Arabiyya: Pt. 1: A Textbook for Beginning Arabic by Brustad et al, Georgetown Univ.Press, 2011
- Arabiyyat al-Naas (Part 1). An introductory course in Arabic by

Munther Younes, Routledge, 2014

- Mastering Arabic Grammar, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan, 2005
- Arabic as one language, Mahmoud Al-Batal (ed.), Georgetown University Press, 2018

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN702

Arabic: Level One (Fast Track for Learners Familiar with Arabic Script)

This information is for the 2020/21 session.

Teacher responsible: Mr Luay Hasan PEL.6.01

Pre-requisites:

- Students must have **familiarity with Arabic script**. Admission into the course upon tutor's approval during the information sessions.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.

Course content:

Course aims

- To develop the use of Arabic at survival level.
- To raise awareness about the two Arabic varieties (formal and colloquial).
- To further develop students' ability to use the Arabic writing system.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A1 of the Common European Framework.

Communicative content

- Greetings
- Asking for and giving personal information, directions and opinions
- Talking about family
- Talking about your country
- Describing people, places and objects
- Talking about past events and experiences
- Using the dictionary (basic)
- Asking and giving the time
- Talking about present events
- Talking about future events (basic)
- Ordering in a restaurant
- Asking for and giving directions

Structural content

- Roots
- The definitive article
- Independent pronouns and pronoun suffixes.
- Nouns-adjective phrases
- Numbers
- Feminine and masculine words
- Adjective-noun agreements
- Word order
- Verb-subject agreement
- Demonstratives (singular)
- Possessive pronouns
- Interrogatives (where, when, what, how many, etc)
- Prepositions: in, between
- Nisba (nationality)

1132 Language Centre Courses

- Idafa (genitive construction)
- Past tense
- Linking words (Firstly, after, lately, etc.)
- Present tense
- Future tense (basic)
- Plural (sound, masc./fem.)
- Negative phrases (past, present, future)
- Prepositions with pronoun suffixes
- Persons of the verb (sing./pl.)

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

The materials provided by the teacher in Moodle.

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN814

Mandarin: Level Five (Current Issues)

This information is for the 2020/21 session.

Teacher responsible: Dr Hua Xiang 601B Pethick-Lawrence House
Dr Lijing Shi 601H Pethick-Lawrence House

Pre-requisites: Students must have completed Mandarin: Level 5 (Fast-track) (LN808) or equivalent.

Course content: This course aims to develop students' linguistic skills at an advanced level with a clear focus on current issues. The students will be given opportunities to learn the key vocabulary of global events as well as current affairs. The topics include e-Commerce, wealth inequality, gender discrimination, migrant workers, environment protection, political movement and so on.

The course is communicative and interactive. The students are required to read authentic materials in the target language and learn to discuss, summarise and debate about current issues in China as well as the rest of the world.

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students will be expected to produce 1 project in the LT.

Indicative reading: Authentic and purposely made study pack will be provided.

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN821 Not available in 2020/21 Mandarin: Level 5 (Legal Issues)

This information is for the 2020/21 session.

Teacher responsible: Dr Lijing Shi PEL.6.01H

Ms Hongyi Xin, PEL.6.01G

Pre-requisites: Students must have completed Mandarin: Level 5 (Standard) (LN719).

Student should have successfully completed LSE Level 5 or have reached high proficiency level of Chinese. They are expected to be able to communicate on rather complicated non-routine topics and recognise around 3000 characters.

Course content:

Course aims

The linguistic focus will continue to advance the four language skills: listening, speaking, reading and writing, meanwhile helping the students to gain substantial knowledge into vocabulary, syntactic structures and pragmatic usages widely used in legal discourse. It features the general introduction into China's legal system and its legal professions, with particular emphasis on Chinese civil and commercial laws. Authentic legal documents will be introduced extensively.

The course will enhance the students' Chinese skills in legal contexts so as to prepare them for successful participation in their future professional communication.

Communicative content

The course is focused on the following communicative functions:

- Participating in discussion
- Logical argument
- Interaction/Exchange specific information in legal context
- Communication in legal context
- Reading and summarizing complex legal texts
- Writing letters, report and documents with legal elements
- Using language strategies to cope with specialized topics: i.e. law, business, politics and current issues.

Structural content

This course will focus on the following grammatical areas:

- Mandarin pronunciation: Pinyin and tones
- Simplified characters
- Chinese advanced grammar review
- Specific grammatical aspects of topical texts
- Relevant grammatical issues for advanced and specialized communication
- Attributives
- Adverbials
- Appositives
- Regular group or individual translation of legal works
- Reading and summarizing complex legal texts
- Advanced language tasks with reference to case studies
- Advanced language tasks with reference to Contemporary Chinese laws
- Reading comprehension
- Oral presentation

The course will introduce 350 words used in legal discourse. It will bring students to level C2 of CEFR.

Teaching: 8 hours of workshops in the MT. 11 hours of workshops in the LT. 1 hour of workshops in the ST.

Formative coursework: Students will be expected to produce 6 pieces of coursework in the MT and LT.

Indicative reading: William C Jones "Basic Principles of Civil Law In China" published by ME Sharpe. Inc.

- This level is suitable for students from the Courtauld Institute of Art who learnt French for some time (a few years) a long time ago (secondary school).
- A good foundation but find it difficult to express themselves mostly orally.
- This level can also be taken by GCSE students from LSE.

Speaking

- Use simple phrases and sentences to describe where they live and people they know.
- Speak about what they study (history of art, arts), and be able to function within a range of basic activities relating to work, study or time spent in the country.

Writing

- Write short, simple greetings.
- Fill in forms with personal details, basic communication in e-mails, or short descriptions or paragraphs relating to an area of interest in arts.

Listening

- Recognise familiar words and very basic phrases concerning self, family and immediate concrete surroundings when people speak slowly and clearly.
- Understand short excerpts from current affairs, programmes or news items on TV and Radio.

Reading

- Understand the gist of and some details of original text extracts, for example on notices, posters, in newspapers, adverts and on the web, and in simple articles relating to the Social Sciences.
- Admission to the course upon completion of online level test and tutor's approval during needs analysis.
- For students who are able to interact in a variety of familiar contexts without major difficulties but who do need to review and consolidate their French.

Course content:

Course aims

Speaking and spoken interaction:

- Use a series of phrases and sentences to describe in simple

terms family and other people, living conditions, educational background and present or most recent work.

- Produce talks on simple topics relating to Art.
- Communicate in simple and routine tasks requiring a simple and direct exchange of information on familiar topics and express opinions in discussion of familiar topics.

Writing

- Write short simple notes, messages and e-mails relating to matters in areas of immediate need or paragraphs or short essays in areas of interest relating to Art.

Listening

- Understand phrases and the highest frequency vocabulary related not only to areas of most immediate personal relevance (e.g. personal and familiar information, shopping, local geography, and employment), but also to topic areas relating to the world of Culture and Art.

Reading:

- Read short and simple texts related to news and current issues, find specific, predictable information in simple everyday material such as advertisements, prospectuses, menus and timetables, and understand items of both personal and professional written communication e.g. Email and web-based material + art related articles.

To bring students to level B1 of CEFR.

Communicative content

- Introduce oneself, talk about opinions, beliefs, political views.
- Talk about daily activities. Make an appointment, reschedule, accept, refuse.
- Give your opinion and justify it. Talk about a past event, past experiences...
- Take/ give advice and make/respond to suggestions.
- Future plans and projects. Express a wish, a will. Express doubt, certainty, possibility.
- Express cause, consequence, obligation, aim.

Structural content

- Consolidation of major grammatical points (direct, indirect pronouns y & en...).
- Perfect, past tenses, conditional. Present tense irregular verbs consolidation.
- Question formation with a wide range of tenses.
- Adjectives, place, agreement. Express duration (depuis, pendant, pour).
- Use of relative pronouns (qui/que, ce qui/ce que).

Teaching: 20 hours of classes in the MT. 20 hours of classes in the LT. 2 hours of classes in the ST.

This is a 46 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Formative coursework: The students will be required to complete weekly language exercises.

Indicative reading:

- A study pack, provided by LSE.
- A dictionary and a grammar book as recommended by your teacher

Assessment: Continuous assessment (70%) in the MT, LT and ST. Oral examination (30%) in the LT and ST.

LN727

French: Level Three (Standard)

This information is for the 2020/21 session.

Teacher responsible: Miss Florence Niclot PEL.6.01L and Mr Francois Simon PEL.6.01K

Pre-requisites: Students should have successfully completed LSE Level 2 course or have learned equivalent content, see the description of "Communicative content" and "Structural Content" of Level 2 course (LN723 or LN724). Students should: Demonstrate full commitment to regular attendance, completion of homework, and all pieces of continuous assessment. Dedicate at least two hours per week for coursework, in addition to classes. Admission into the course after completion of the online test and

upon tutor's approval during the Needs Analysis Interview.

For students who are able to interact in a variety of familiar contexts without major difficulties but who do need to review and consolidate their French. This level can also be taken by GCSE students.

- All three forms of the imperative.
- Introduction to subordinate clauses.

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading:

- DaF kompakt neu A1, Kursbuch und Arbeitsbuch & 2 CDs (Ernst Klett Publishers) 2016, ISBN: 978-3-12-676313-4.

Assessment: Continuous assessment (70%) in the MT and LT.
Oral examination (30%) in the LT.

LN746

German: Level Two (Standard)

This information is for the 2020/21 session.

Teacher responsible: Mrs Doris Hermann-Ostrowski

Pre-requisites: Some previous knowledge of German at the A1 level CEFR is required, e.g. completion of the LSE Language Centre courses LN742 or LN744. This course is also suitable for re-starters, i.e. learners with some limited experience of learning German who have not studied or used the language for a number of years.

Students are not expected to be very experienced language learners, but they should:

- demonstrate commitment to regular attendance, completion of homework and all assessments;
- dedicate at least two hours per week for coursework in addition to classes.

Admission onto the course upon completion of an online level test and tutor's approval.

Course content:

Course aims

- To develop the ability to use German effectively for purposes of practical communication in familiar work and social contexts
- To establish the skills, language and attitudes required to promote and facilitate further study of German.
- To improve pronunciation and sentence intonation.
- To improve basic knowledge of grammatical gender, word-formation and word-order.
- To deal with a range of predictable simple language tasks using a limited range of language to meet the needs of differing but familiar situations and topics.
- To bring students to level A2 CEFR.

Communicative content

- Asking for and giving personal information, directions and opinions;
- Talking about actions, describing people, objects and places;
- Talking about likes, dislikes, expressing preferences and making comparisons.
- Expressing intentions, ignorance and proposing alternatives
- Expressing frequency
- Describing feelings, events and objects in the past
- Talking about habitual actions in the past
- Talking about festive events, invitations, plans
- Asking for and giving advice.

Structural content

Introducing the basics of German grammar in the following areas:

- Grammatical gender and plural of nouns
- Adjectives and adjectival endings
- Present tense of regular, modal and some irregular/strong verbs
- Direct and indirect objects; complements
- Personal and possessive pronouns
- Prepositions taking the dative and/or accusative case
- Present perfect of regular and irregular/strong verbs
- Frequency adverbs; numbers
- Combining Perfect and Präteritum/Imperfekt;
- Expressions of time
- All three forms of the imperative;
- Word order in main and subordinate clauses.

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading:

- Niebisch, Daniela, Schritte International 2 - Kursbuch + Arbeitsbuch (Hueber, 2006) – ISBN 978-3190018529.
- Niebisch, Daniela, Schritte International: Intensivtrainer mit Audio-CD 1 & 2160 (Hueber, 2009) - ISBN 978-3190118519.
- Niebisch, Daniela, Schritte International 2 - Glossar Deutsch-Englisch, Englisch-Deutsch (Hueber, 2008) – ISBN 978-3194518520

Assessment: Continuous assessment (70%) in the MT and LT.
Oral examination (30%) in the LT.

LN748

German: Level Two (Fast Track)

This information is for the 2020/21 session.

Teacher responsible: Mr Florian Fischer PEL.6.01

Pre-requisites: Some previous knowledge of German at the A1 level CEFR is required, e.g. completion of the LSE Language Centre courses LN742 or LN744. Students should also:

- demonstrate commitment to regular attendance, completion of homework and all assessments;
- dedicate at least two hours per week for coursework in addition to classes.

Admission into the course upon tutor's approval. All students must take the online aptitude test and gain permission of the tutor in their Needs Analysis Interview to take this course. Students are expected to be experienced language learners with a basic knowledge of English / German grammar terms.

Course content:

Course aims

- To develop the ability to use German effectively for purposes of practical communication in familiar work and social contexts
- To establish the skills, language and attitudes required to promote and facilitate further study of German.
- To improve pronunciation and sentence intonation.
- To improve basic knowledge of grammatical gender, word-formation and word-order.

Assessment: Continuous assessment (70%) in the MT, LT and ST. Oral examination (30%) in the LT and ST.

LN776

Russian: Level Four (Standard)

This information is for the 2020/21 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01a and Mrs Elena Dearden

Pre-requisites: For all students who aim to reach proficiency in Russian.

Language skills and knowledge of Russian at the B1 level of the Common European Reference Framework for Languages; 250 hours of language learning (including self-study).

All students must gain permission of the tutor in the Needs Analysis Interview to take this course.

Course content:

Course aims

- To bring the students to level B2 of CEFR. Students will be ready to take exams (at the end of the Lent Term) and obtain the International TORFL Certificate (Test of Russian as a Foreign Language).
- To consolidate students' command of written and spoken Russian.
- To gain an insight into aspects of social, political and cultural life in Russia and other Russian speaking countries.
- To establish linguistic skills and attitudes required for promoting and facilitating further study of Russian.

Communicative content

At the end of the programme students will be able to demonstrate competence in the use of communicative functions in the four skills (oral, aural, reading, writing) by:

- showing competence in the use of complex and technical language in a variety of contexts and with a substantial requirement to select and adapt appropriate language strategies;
- being able to respond to a wide range of spontaneous foreign language interventions;
- being able to use a variety of sources (print, audio, video, IT based);
- handling factual knowledge within specific perspective;
- being able to produce, in a coherent and structured way, an oral presentation and a written work within the framework of studied topics;
- being able to grasp the main ideas of a document in a target language and produce a coherent summary in English.

Structural content

- This course is focused on discussion, gist translation and essay work, based on extracts from newspaper articles, recorded materials and topical texts.
- All major grammatical areas are revised and covered in depth; particular attention is paid to syntax. In written work the emphasis is on structure and register of the language.
- The language command in these areas is expected to be appropriate to the level and task with the emphasis on active usage.

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: The course is based on the current Russian press and media materials.

Optional:

- Terence Wade, A Comprehensive Russian Grammar, Blackwell, 2010 ISBN: 978-1405136396
- Nicholas Rzhevsky, Cambridge Companion to Modern Russian Culture, Cambridge University Press, 2012, ISBN: 978-0521175586

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN778

Spanish: Level One (Standard)

This information is for the 2020/21 session.

Teacher responsible: Miss Inmaculada Sillero Viloita PEL. 6.01

Pre-requisites: No previous knowledge required. All students welcome but they should: Demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments. Dedicate at least one hour per week for coursework in addition to classes. Student profile: For students whose first language is English but are not fluent (B1 CEFR) in any other Indo European language.

- Countries, nationalities, international organizations and its acronyms and languages
- The city
- The family
- The weather
- Studies and professions
- Daily activities and free time
- Daily objects: Food, Clothes
- Hours, dates, days of the week and months of the year
- Adjectives to describe all the above

Teaching: 24 hours of classes in the MT. 33 hours of classes in the LT. 3 hours of classes in the ST.

The course will have two separate sessions.

- session one: 120 minutes (regular language class)
- session two: 60 minutes (improvisation work)

Formative coursework:

Weekly exercises, assessed by the teacher, featuring: interactive work and oral practice; grammar exercises; reading and listening comprehension and writing.

Indicative reading: Study pack provided at the beginning of the course.

Online grammar pack available via Moodle.

Assessment: Oral examination (30%) in the LT.

Continuous assessment (70%) in the MT and LT.

English for Academic Purposes Courses

LN951 Not available in 2020/21 Argumentation and Style

This information is for the 2020/21 session.

Teacher responsible: Ms Alison Standring PEL.6.01e

Pre-requisites: This course is for students who speak English as a foreign language.

Course content: This course will focus on argumentation and style in written and oral communication. Students will analyse written and oral texts to improve their discourse management, language accuracy and language range.

Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT. This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN952 Not available in 2020/21 Discussion

This information is for the 2020/21 session.

Teacher responsible: Ms Alison Standring PEL.6.01e

Pre-requisites: This course is for students who speak English as a foreign language.

Course content: This course will enable students to improve their fluency, accuracy and confidence when discussing academic and non-academic topics. Students will acquire useful grammar, vocabulary and strategies, and will receive feedback on language and style.

Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT. This is a 4-hour course (1 hour per week). It will be repeated at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10.

LN954 Not available in 2020/21 Informal Vocabulary

This information is for the 2020/21 session.

Teacher responsible: Ms Alison Standring PEL.6.01e

Pre-requisites: This course is for students who speak English as a foreign language.

Course content: Students will improve their knowledge and understanding of informal English vocabulary including use of puns, metaphors, idioms and collocations.

Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT. This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN955 Not available in 2020/21 Academic Vocabulary

This information is for the 2020/21 session.

Teacher responsible: Ms Alison Standring PEL.6.01e

Pre-requisites: This course is for students who speak English as a foreign language.

Course content: Students will improve their knowledge and understanding of academic English vocabulary including: stylistic choices, noun-phrases, verb-phrases, collocations and metaphor.

Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT. This course will be offered at four different times during the

academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN956 Not available in 2020/21 Grammar for Academic Purposes

This information is for the 2020/21 session.

Teacher responsible: Ms Alison Standring PEL.6.01e

Pre-requisites: This course is for students who speak English as a foreign language.

Course content: Students will enhance their knowledge of English grammar in academic contexts and will improve their grammatical range and accuracy through a combination of text analysis and oral/written tasks.

Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT. This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10.

LN957 Not available in 2020/21 Pronunciation and Voice

This information is for the 2020/21 session.

Teacher responsible: Ms Alison Standring PEL.6.01e

Pre-requisites: This course is for students who speak English as a foreign language

Course content: This course will focus on pronunciation and voice. Students will work on individual sounds, word and sentence stress, intonation and pausing.

Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT. This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN959 Not available in 2020/21 Presentation Skills

This information is for the 2020/21 session.

Teacher responsible: Ms Alison Standring PEL.6.01e

Pre-requisites: This course is for students who speak English as a foreign language.

Course content: By the end of this course student will have: a) developed strategies to enhance voice and pronunciation while giving presentations; b) worked on improving language accuracy and extending language fluency; c) received feedback on practice presentations.

Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT. This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN960 Not available in 2020/21 Grammar for Academic Purposes II

This information is for the 2020/21 session.

Teacher responsible: Ms Alison Standing PEL.6.01e

Course content: Students will enhance their knowledge of English grammar in academic contexts and will improve their grammatical range and accuracy through a combination of text analysis and oral/written tasks. Student do not need to have taken LN956 Grammar for Academic Purposes in order to sign up for this course.

Teaching: This course will be offered at four different times during the academic year namely: MT Wks 2-5; Mt Wks 7-10; LT Wks 2-5 and LT Wks 7-10.

LN988 Thesis Writing

This information is for the 2020/21 session.

Teacher responsible: Dr Angus Wrenn PEL.6.0.1a

Pre-requisites: For PhD students who are embarking on writing their thesis and who are writing in a second or third language

Course content: Course aims to develop an appropriate written style for thesis writing. By the end of this course, students will have (a) explored and clarified style in academic texts (b) developed their own written fluency, accuracy and style

Teaching: 9 hours of classes in the MT. 9 hours of classes in the LT.

LN991 Academic Writing Skills

This information is for the 2020/21 session.

Teacher responsible: Mr Michael Beaney PEL.6.01g

Pre-requisites: For students from the departments of Economic History, European Institute, Government, International History, International Relations, School of Public Policy and Marshall Institute who speak English as a foreign language and require support when writing essays, exams and dissertations.

Course content: By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical and grammatical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.

Teaching: 10 hours of classes in the MT. 10 hours of classes in the LT. 2 hours of classes in the ST.

Classes will be in Weeks 1-5 and Weeks 7-11 of MT and LT. 1-2-1 tutorials will be available in the Week 6 reading week of MT and LT. In ST, classes will be in Weeks 1-2.

LN992 Academic Writing

This information is for the 2020/21 session.

Teacher responsible: Mr Michael McGarvey PEL.6.0.1c

Pre-requisites: For students from the department of Law who speak English as a foreign language and require support when writing coursework essays, exam essays or dissertations.

Course content: By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical and grammatical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.

Teaching: 10 hours of classes in the MT. 10 hours of classes in the LT. 2 hours of classes in the ST.

Classes will be in Weeks 1-5 and Weeks 7-11 of MT and LT. 1-2-1 tutorials will be available in the Week 6 reading week of MT and LT. In ST, classes will be in Weeks 1-2.

LN993 Academic Writing Skills

This information is for the 2020/21 session.

Teacher responsible: Mr James Pavitt PEL.6.01j

Pre-requisites: For students from the departments of Accounting, Economics, Finance, Mathematics and Statistics who speak English as a foreign language and require support with academic writing including coursework, exams and dissertations.

Course content: By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.

Teaching: 10 hours of classes in the MT. 10 hours of classes in the LT. 3 hours of classes in the ST.

LN994 Academic Writing Skills

This information is for the 2020/21 session.

Teacher responsible: Mr James Pavitt PEL.6.0.1j

Pre-requisites: For students from Media & Communications, Philosophy, Logic and Scientific Method, and Psychological and Behavioural Science who speak English as a foreign language and require support with academic writing including coursework essays, exams and dissertations.

Course content: By the end of the course, students will: (a) be familiar with the conventions of academic writing in English (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical and grammatical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.

Teaching: 10 hours of classes in the MT. 10 hours of classes in the LT. 2 hours of classes in the ST.

Classes will be in Weeks 1-5 and Weeks 7-11 of MT and LT. 1-2-1 tutorials will be available in the Week 6 reading week of MT and LT. In ST, classes will be in Weeks 1-2.

LN995 Academic Writing Skills

This information is for the 2020/21 session.

Teacher responsible: Mr Simon Roberts PEL.6.0.1j

Pre-requisites: For students from the departments of Geography & Environment and International Development who speak English as a foreign language and require support with academic writing including coursework, exams and dissertations.

Course content: By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical and grammatical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.

Teaching: 10 hours of classes in the MT. 10 hours of classes in the LT. 2 hours of classes in the ST.

Classes will be in Weeks 1-5 and Weeks 7-11 of MT and LT. 1-2-1 tutorials will be available in the Week 6 reading week of MT and LT. In ST, classes will be in Weeks 1-2.

LN996

Academic Writing Skills

This information is for the 2020/21 session.

Teacher responsible: Mr James Pavitt PEL.6.0.1j

Pre-requisites: For students from the departments of Anthropology, Gender Studies, Social Policy, Health Policy and Sociology who speak English as a foreign language and require support with academic writing including coursework, exams and dissertations.

Course content: The course aims to develop the ability to write more effectively for academic purposes. By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.

Teaching: 10 hours of classes in the MT. 10 hours of classes in the LT. 2 hours of classes in the ST.

Classes will be in Weeks 1-5 and Weeks 7-11 of MT and LT. 1-2-1 tutorials will be available in the Week 6 reading week of MT and LT. In ST, classes will be in Weeks 1-2.

LN997

Academic Writing Skills

This information is for the 2020/21 session.

Teacher responsible: Mr Simon Mathews PEL.6.01e

Pre-requisites: For students from Management and Methodology who speak English as a foreign language and require support with academic writing including coursework, exams and dissertations.

Course content: The course aims to develop the ability to write more effectively for academic purposes. By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.

Teaching: 10 hours of classes in the MT. 10 hours of classes in the LT. 2 hours of classes in the ST.

Classes will be in Weeks 1-5 and Weeks 7-11 of MT and LT. 1-2-1 tutorials will be available in the Week 6 reading week of MT and LT. In ST, classes will be in Weeks 1-2..

Eden Centre Courses

Eden Centre Courses

Key to Eden Centre Courses

(H) means a half-unit course

(C) means this course is capped

(n/a 20/21) means not available in the 2020/21 academic year

(MT) means Michaelmas Term

(LT) means Lent Term

(ST) means Summer Term

Academic Development Programme - Atlas

This information is for the 2021/22 session.

Teacher responsible: Lee-Ann Sequeira.

Availability: All LSE staff – academic, research, and professional services – are welcome, especially those engaged in student-facing education activities. All events are free of charge, but booking for each event is required.

Pre-requisites: There are no prerequisites for attendance at Atlas sessions.

Course content: This year-long series of workshops and events is designed for staff engaged in student-facing education activities who are keen to pursue professional development and enhance the impact of their teaching and the student experience. Most sessions are applicable to the range of issues encountered in a social sciences education context, with a few sessions that are discipline-specific. The sessions are clustered around themes that include:

- Assessment diversification and feedback
- Inclusive education
- Learning engagement and learning communities – online and offline
- Online learning environments
- Critical thinking and critical education
- Voice coaching to develop teaching and communication skills.

Teaching: The sessions are offered in a range of modes – on campus, online synchronous, online asynchronous, and blended (online and on-campus, sync and async). They are designed to be stand-alone, so staff can dip in and dip out depending on their schedule and needs. All events follow the dates of the LSE teaching year. Further details, and links to booking pages, can be found on the Atlas page.

Assessment: There is no formal assessment for this course.

TC501 2.0 Units

Principles of Teaching in Higher Education: Associate Fellowship Programme

This information is for the 2020/21 session.

Teacher responsible: Dr Colleen McKenna

Pre-requisites: Participants are required to be teaching for a minimum of 20 hours during the academic year in which they are enrolled.

Course content: The TC501 'Principles of Teaching in HE' represents the first phase of the LSE PG Cert HE and completion of this programme results in Associate Fellowship of the Higher Education Academy, which is part of AdvanceHE. In this programme, you will;

- Develop an Opening Year Statement (OYS) in which you reflect on your approach to teaching and student learning
- Participate in workshops in Module 1: 'Teaching in our disciplines'
- Prepare a written assignment for Module 1
- Have 2 teaching observations – one from a member of LSE Eden Centre and one from a peer

- Develop an End of Year Statement (EYS) in which you reflect on how the teaching year has gone and your intentions for future development.

These materials are drawn together, along with feedback on your teaching from both TQARO and formative surveys, into a portfolio that is submitted in Summer Term or the following Michaelmas Term. Once the portfolio is deemed complete it is submitted to a Board of Examiners.

Teaching: 12 hours of workshops in the MT. 3 hours of workshops in the ST.

Teaching for this course will take the form of interactive workshops and digital interaction. Moodle will be used as the learning environment.

Formative coursework: Formative feedback is available for every aspect of the summative portfolio.

Participants receive both spoken and written feedback on their teaching practice and opening pedagogic reflection. They also receive formative feedback on drafts of the main essay before it is assessed as part of the final portfolio. The writing assignments and feedback exchanges are designed to encourage a reflexive approach to academic practice.

Indicative reading: Ashwin, P. (2015) Reflective teaching in higher education. London: Bloomsbury. Berk, R. (2005) Survey of 12 strategies to measure teaching effectiveness. International journal of teaching and learning in higher education. 17 (1) 48-62. Biggs, J. & Tang, C. (2011) Teaching for quality learning at university. Maidenhead: McGraw Hill Open University Press. Carless, D. (2015) Excellence in university assessment. London: Routledge. Carlisle, O. & Jordan, A. (2009) Redisciplining generic attributes: the disciplinary context in focus. Studies in higher education. 34 (1) 85-100. Macfarlane, B. (2004) Teaching with integrity: the ethics of higher education practice. London: Routledge

Assessment: Essay (34%, 500 words) in the MT.

Essay (33%, 2500 words) in the LT.

Essay (33%, 500 words) in the ST.

This course is assessed entirely by coursework - formative and summative. There are no exams. The assessed portfolio comprises a practice-based written assignment (or poster) and reflective pieces. All assignments are assessed on a Complete/Not Yet Complete basis, and all assessments are viewed as developmental opportunities. Participants are offered detailed feedback for assignments and, where appropriate, they have the option of developing assignments further based on feedback from the teaching team.

TC503 2.0 Units

Postgraduate Certificate in Higher Education

This information is for the 2021/22 session.

Teacher responsible: Dr Jenni Carr

Availability: The PG Cert HE is practice-based programme and is aimed at early career academics, including assistant professors,

LSE fellows, assistant professorial lecturers and graduate teaching assistants who have completed the Introduction to Teaching: Associate Fellowship Programme (TC501) as well as other colleagues who have substantive responsibilities for student learning.

The PGCertHE is a requirement for newly appointed career-track colleagues with fewer than 3 years of teaching experience. Additionally, colleagues who are experienced academics but relatively new to UK higher education are encouraged to join the programme.

Pre-requisites: This is a practice-based programme. You need to be on a 0.5 fte contract or higher OR teach at least 40 hours across the year in a context in which you can be observed – once by a member of LSE Eden Centre and once by a peer. The observations can occur either in Michaelmas or Lent terms.

You are eligible to join the programme if you:

- can attend at least 20 hours of PGCertHE sessions. Please note: the completion of the 'Introduction to Teaching' (TC501) counts for 10 hours towards this total*.
- can be observed teaching at LSE, and
- have at least 40 hours of scheduled teaching during the year of enrolment (not including preparation time or office hours).

*For career-track participants, completion of the New Academic Induction Programme fulfils your attendance requirement.

Course content: In this programme, you will work on 3 modules:

- Module 1: Teaching in our Disciplines (required) *
- Module 2: Course Design (required)

plus one module from the following list:

- Module 3: Student learning
- Module 4: Assessment and feedback
- Module 5: Contemporary issues in HE
- Module 6: Independent enquiry
- Module 7: Creative pedagogies in social sciences

*If you have previously completed the TC501 'Introduction to Teaching' pathway, this module will be carried over and does not need to be repeated.

To complete the programme, you will:

- Develop an opening year statement (OYS) in which you reflect on your approach to teaching and student learning
- Participate in workshops
- Prepare written assignments (or equivalent) for the 3 modules
- Have 2 teaching observations – one from a member of LSE Eden Centre and one from a peer
- Develop an end of year statement (EYS) in which you reflect on how the teaching year has gone and your intentions for future development.

These materials are drawn together, along with feedback on your teaching from both TQARO and formative surveys, into a portfolio that is submitted in Summer Term or the following Michaelmas Term. Once the portfolio is deemed complete it is submitted to a Board of Examiners.

Teaching: Modules 1 and 2 are compulsory and your final number of teaching hours will depend on which optional module you choose. For the 2020-21 academic year, the modules will be delivered mainly online using a mix of synchronous and asynchronous engagement. The hours below are indicative.

- Module 1, 12hrs, MT
- Module 2, 8hrs, MT or LT or ST
- Module 3, 6hrs, MT or LT
- Module 4, 6hrs, MT or LT
- Module 5, 6hrs LT
- Module 6, 4-8hrs, MT, LT and ST
- Module 7, 6 hours, MT or LT
- Reviewing your teaching year, 3hrs, ST

Teaching for this course will take the form of interactive workshops and asynchronous engagement. Moodle will be the primary learning environment.

Formative coursework: There are formative feedback points for each of the summative assignments.

Additionally, there are formative reflections at both the start and finish of the programme. These formative reflections, combined with the coversheets on the summative essays, make up the

learning log element of the course and contribute to the final portfolio submission. Finally, participants present their course design work and receive formative feedback from both members of the PGCertHE teaching team and peers.

Throughout, the formative pieces are designed to encourage a reflexive approach to academic practice.

Indicative reading: Ashwin, P. (2015) Reflective teaching in higher education. London: Bloomsbury. Berk, R. (2005) Survey of 12 strategies to measure teaching effectiveness. International journal of teaching and learning in higher education. 17 (1) 48-62. Biggs, J. (1996) Enhancing teaching through constructive alignment. Higher education 32 (3) 347-364. Towards a scholarship of assessment. Assessment & evaluation in higher education, 32 (2) 229-237. Wilson, M. & Scalise, K. (2006) Higher education. 52: 635 - 663.

Assessment: Summative assignments for Module 1, Module 2 and for the optional module are set out as follows:

- A practical written assignment for module 1 (34%, 2300 words) in January.
- Project for module 2 (33%, 2000 words) in the MT, LT or ST*.
- Essay, project or blog posts depending on the module (33%, 2000 words) in MT, LT or ST*.

*Participants have flexibility as to when they undertake this project. The assignments include both essay-style written texts and reflective pieces. Additionally, there are some opportunities for choice within the assessment diet. Depending on module selection, participants may opt to prepare a poster, blog posts or podcasts.

This course is assessed entirely by coursework - formative and summative. There are no exams.

All assignments are marked on a Complete/Not Yet Complete basis and all assessment are viewed as developmental opportunities. Participants are offered detailed feedback on all work and, where appropriate, they have the option of developing assignments further based on feedback from the teaching team and peers (Course design module).

Course selection videos: Some departments have produced short videos to introduce their courses. Please refer to the course selection videos index page for further information.
