**Course content:** Debates about the effects of European colonial rule on the non-European world animated economic history scholarship since the 1850s when Karl Marx published essays on British rule in India in the *New York Daily Tribune*. The relationship between colonialism and economic development has an important place in a number of distinct literatures in economic history, including work on globalization, divergence, migration, global finance, environmental change, and the shaping of development policy after colonialism. The aim of the course is to introduce the key readings in these themes, build connections between the discourses, and lead students to an informed view of colonialism as a force in shaping the modern world.

The broad topics include, (a) trade and the origins of colonialism (b) institutions and governance; (c) connections forged through trade, investment, migration, and the transfer of knowledge of institutions and technologies, including informal empire; (d) growth of corporate enterprise such as companies, factories, and plantation complexes, and the connection between state power and private enterprise, (e) decolonization, proximity between indigenous business and nationalist politics, the changing power of expatriate capital, and the appeal of new developmental ideology in the interwar period, (f) environmental change, studying a scholarship that sees European empires, alternatively, as catastrophic in their impacts on the environment and as forerunners of governmental regulation of the commons. Seminars compare and contrast the experiences of Asia and Africa.

**Teaching:** 20 hours of seminars in the LT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students will be expected to complete an essay and an equivalent assignment during term.

**Indicative reading:** The primary reading for the course will be: Leigh Gardner and Tirthankar Roy, *Economic History of*

*Colonialism* (Bristol, 2020)

Other indicative readings include:

Acemoglu, D., Johnson, S. and Robinson, J. A. (2001), 'The Colonial Origins of Comparative Development: An Empirical Investigation', *American Economic Review*, 91(5), pp. 1369-1401.

C.A. Bayly (2008), *Indigenous and Colonial Origins of Comparative Economic Development*, World Bank Policy Working Paper #4474. <http://ideas.repec.org/p/wbk/wbrwps/4474.html>.

Stanley L. Engerman, Kenneth L. Sokoloff, 'Colonialism, Inequality, and Long-Run Paths of Development,' NBER Working Paper No. 11057, 2005. <http://www.nber.org/papers/w11057.pdf>

**Assessment:** Essay (100%, 5000 words) in the ST.

## EH426L Half Unit

### Quantitative Analysis in Economic History II

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Melanie Meng Xue

**Availability:** This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students enrolled for this course are expected to have completed at least introductory undergraduate courses in statistics and/or econometrics and economic theory. The course will begin with a revision of the main quantitative approaches but will not provide a comprehensive training in econometric methods or computer applications.

Please note: EH426L cannot be taken with EH426M.

**Course content:** The course will provide an overview of quantitative approaches in economic history mainly using cross-section and panel data. The course will examine the use of quantitative techniques through a critical discussion of their application in recent literature. Techniques discussed will include multiple regression analysis, regression diagnostics, instrumental variables, fixed and random effects, difference-in-difference analysis, regression discontinuity design, and more. The course is organised on a topic basis, with subjects chosen to illustrate particular theoretical, quantitative and methodological issues.

**Teaching:** 20 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy

**Formative coursework:** Students are expected to write one essay or equivalent pieces of written work.

**Indicative reading:** There is no mandatory textbook for this course, but the brief overview of quantitative methods during the first four weeks will follow:

• Angrist, Joshua D., and Jörn-Steffen Pischke. "Mostly harmless econometrics." In *Mostly Harmless Econometrics* (Princeton University Press), 2008.

**Assessment:** Essay (100%, 5000 words).

## EH426M Half Unit Not available in 2022/23

### Quantitative Analysis in Economic History II

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Stefania Galli SAR 615

**Availability:** This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for

all students that apply, but that may not continue to be the case.

**Pre-requisites:** Students enrolled for this course are expected to have completed at least introductory undergraduate courses in statistics and/or econometrics and economic theory. The course will begin with a revision of the main quantitative approaches but will not provide a comprehensive training in econometric methods or computer applications.

Please note: EH426M cannot be taken with EH426L.

**Course content:** The course will provide an overview of quantitative approaches in economic history mainly using cross-section and panel data. The course will examine the use of quantitative techniques through critical discussion of their application in recent literature. Techniques discussed will include multiple regression analysis, regression diagnostics, instrumental variables, fixed and random effects, difference-in-difference analysis, regression discontinuity design, discrete choice models and limited dependent variables. The course is organised on a topic basis, with subjects chosen to illustrate particular theoretical, quantitative and methodological issues.

**Teaching:** 20 hours of seminars in the MT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, while we are planning for most classes and seminars to be delivered in-person, it is possible that some or all of this teaching may have to be delivered virtually. Lectures will either be recorded or given in the form of live webinars.

This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students are expected to write one essay or equivalent pieces of written work.

**Indicative reading:** There is no mandatory textbook for this course, but the brief overview of quantitative methods during the first four weeks will follow:

- Wooldridge, J.M. (2009), *Introductory Econometrics: A Modern Approach*, International Student Edition.

Useful background readings include:

- J.L. Van Zanden, *The Long Road to the Industrial Revolution: The European Economy in a Global Perspective, 1000-1800* (Leiden, 2009);
- K.H. O'Rourke and J.G. Williamson, *Globalization and History: The Evolution of a Nineteenth-Century Atlantic Economy* (Cambridge MA, 1998);
- C. Goldin and L.F. Katz, *The race between education and technology* (Cambridge, MA, 2008);
- D. Greasley and L. Oxley (eds.), *Economics and History: Surveys in Cliometrics* (Oxford, 2011), 6).

**Assessment:** Essay (100%, 5000 words).

---

## EH427 Half Unit

### Topics in Quantitative Analysis in Economic History

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jason Lennard SAR 608

**Availability:** This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is not available as an outside option.

**Pre-requisites:** Students enrolled for this course are expected to have completed EH426 or the equivalent of undergraduate courses in econometrics and intermediate economic theory.

**Course content:** The course will provide an overview of quantitative approaches in economic history with a focus on time series data. The course will examine the use of quantitative methods through practical exercises and critical discussion of their application in recent literature. Techniques discussed will include filters, local projections, vector autoregressions, narrative identification, instrumental variables, textual analysis and principal

components analysis.

**Teaching:** 20 hours of seminars in the LT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students are expected to prepare a group presentation and an individual essay.

**Indicative reading:**

- Stock and Watson, *Introduction to Econometrics* (2020)
- Wooldridge, *Introductory Econometrics: A Modern Approach* (2009)

**Assessment:** Essay (100%, 5000 words) in the ST.

---

## EH428 Half Unit Not available in 2022/23

### History of Economics: Making Political Economy into a Social Science

**This information is for the 2022/23 session.**

**Teacher responsible:** Mr Patrick Wells

**Availability:** This course is available on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Economic History, MSc in Economic History (Research), MSc in Economics and Philosophy, MSc in Global Economic History (Erasmus Mundus), MSc in International and World History (LSE & Columbia), MSc in Philosophy of the Social Sciences and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course aim is to understand how the nature of economics changed from the verbally argued accounts of political economy and moral philosophy in the 18th century to become a technical social science by the end of the 20th century. The course will explore the long-term changes over two hundred years in how economists came to know things about the economy by examining the history of their notion of the laws of economics, their analytical practices, and the evidence they used. Primary texts, chosen from a variety of European and American authors, will provide material for the study of these changes. Secondary literature will provide theoretical resources from history and philosophy of science to help analyse, understand and assess these changes in the nature of economics as a science.

**Teaching:** 20 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to write two essays or equivalent pieces of written work.

**Indicative reading:** The main domain of the course material is explained in "Economics" in T.M.Porter and D.Ross *The Cambridge History of Science, Vol 7, The Modern Social Sciences*, pp 275-305 (Cambridge University Press), while a key secondary text is Mary Morgan's "The world in the model: how economists work and think" (Cambridge University Press 2012).

A very readable introduction to the history of economics is Robert Heilbroner's "The Worldly Philosophers" (various editions, Penguin); a more detailed background text is Henry Spiegel's "The Growth of Economic Thought" (various editions, Duke University Press).

Full reading lists will be given out at the beginning of the course.

**Assessment:** Essay (100%, 5000 words) in the LT.

---

## EH429 Half Unit

### History of Economics: Ideas, Policy and Performativity

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Mary S. Morgan SAR 609

**Availability:** This course is available on the MA in Modern History, MRes/PhD in Accounting (AOI) (Accounting, Organisations and

Institutions Track), MSc in Economic History, MSc in Economic History (Research), MSc in Economics and Philosophy, MSc in Financial History, MSc in Global Economic History (Erasmus Mundus), MSc in International and World History (LSE & Columbia), MSc in Philosophy of the Social Sciences and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

**Course content:** The course aim is to understand how economics has been used to change the world. It brings together the long tradition of analysis of economics as a policy science with more recent ideas about the performativity of economics. It draws on the literatures of economic history, history of economics, political economy and sociology of accounting and finance to explore the aims and methods used by economists to influence, shape and direct the economy. The focus of study will be on particular episodes from 20th century history in which economics features as a technical art that translates ideas through policy into action (e.g. the transition from colonial to independent economies; the Soviet and Cuban revolutions; and the reconstruction of depressed and damaged economies).

**Teaching:** 22 hours of lectures and seminars in the Lent Term. This course is delivered through a combination of classes, lectures, and, if possible, archival visits, totalling a minimum of 22 hours across Lent Term.

This course includes an archive visit in Week 6 of Lent Term.

**Formative coursework:** Students will be expected to write two essays or equivalent pieces of written work, and contribute reading notes to shared Moodle resources.

**Indicative reading:** Reading lists will be given out at the beginning of the course. Henry Spiegel's *The Growth of Economic Thought* (various editions, Duke University Press) provides a general background text to history of economics. T.M. Porter's *Trust in Numbers* (1995, Duke University Press) is an important item on the reading list that can be usefully read ahead of the course.

**Assessment:** Take-home assessment (100%) in the ST.

---

## EH430

### Monetary and Financial History

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Natacha Postel-Vinay

**Availability:** This course is available on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you are not able to get a place on this course.

**Pre-requisites:** There are no specific pre-requisites for this course. Nevertheless, some preliminary background in introductory macroeconomics and introductory statistics could be useful.

**Course content:** Where does money come from? How did financial markets first develop and integrate? What has been the impact of financial markets on economic development, growth, and business cycle fluctuations? When did financial crises first arise, and how did they develop in the twentieth century, up to the subprime and Euro crises of 2008-2015 and the Covid-19 pandemic? This course offers an opportunity to delve into these questions and analyse the evolution of the role of money in Western economies over centuries, from the Middle Ages to the 2000s.

The first part of the course will allow students to acquire a broad overview of the origins of financial markets from 800 to the eve of World War 1. It will explore the creation of mints and central banks,

the role of finance in processes of long-run growth such as the Industrial Revolution, how financial bubbles and banking panics first arose, and how financial markets integrated in the 19C with the Gold Standard.

The second part of the course will start with a focus on the financial turmoil of the Great Depression, looking at the mechanisms leading to hyperinflation, bank failures, debt crises and capital flight on both sides of the Atlantic. It will then move on to analysing the evolution of financial institutions under Bretton Woods, sovereign debt crises, the 1990s bubbles, bank bailouts during the Great Recession in the US and in the Euro area, and demand management in high-debt worlds such as one affected by Covid-19. In the end, students will have a firm grasp of the evolution of financial markets over centuries up until now.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of Michaelmas Term and week 6 of Lent Term.

**Formative coursework:** Students are expected to write two essays or equivalent pieces of written work.

**Indicative reading:**

- Aliber, R., & Kindleberger, Charles P. (2015). *Manias, panics and crashes : A history of financial crises* (Seventh ed.). Palgrave.
- Eichengreen, B. (2015). *Hall of mirrors: The Great Depression, the great recession, and the uses-and misuses-of history*. New York: Oxford University Press.
- Ferguson, N. (2009). *The ascent of money : A financial history of the world*. London: Penguin.
- Rajan, R. (2011). *Fault lines : How hidden fractures still threaten the world economy* (1st pbk. ed.). Princeton, N.J.: Princeton University Press.
- Gorton, G. (2012). *Misunderstanding financial crises : Why we don't see them coming*. New York: Oxford University Press.

**Assessment:** Essay (50%, 5000 words) in the MT.

Essay (50%, 5000 words) in the LT.

---

## EH431 Half Unit

### Women in Economic History

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Anne Ruderman

**Availability:** This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is expected to be high. This may mean that you are unable to get a place on this course.

**Course content:** This course will explore the role of women in economic history, as economic actors, labor market participants and early founders of the discipline. As such, it will take a broad look at the economic activity of women, as well as the structures and institutions that have governed socioeconomic aspects of women's lives, from employment to marriage to savings and retirement. This course will consider the economic history of women from the Renaissance to the recent past, looking at differences and similarities between Europe, the Americas, Africa and Asia. It will look at themes such as women and work, invisible labor, women as productive and reproductive entities under slavery, female slave owners, medicine and women, the gendering of professions, and property rights. It will examine, for example, the dowry bond market in Renaissance Florence, female land-ownership in pre-colonial Gambia and the so-called "mental load" that professional women face in household management in the twenty-first century United States.

**Teaching:** 20 hours of seminars in the LT.

This course will be taught over 10 two-hour seminars in the Lent Term.

**Formative coursework:** Students will be expected to produce 1 annotated bibliography, 1 outline and 1 analysis of sources in the Lent Term.

**Indicative reading:**

- Hughes, Diane Owen. (1978) "From Brideprice to Dowry in Mediterranean Europe." *Journal of Family History* 3, no. 3: 262-96

- Daminger, Allison (2019) "The Cognitive Dimension of Household Labor," *American Sociological Review* 84, no.4: 609-633.

**Assessment:** Essay (100%, 5000 words) in the ST Week 1.

---

## EH432 Half Unit

### Economic History and Geography: Advanced Topics and Methods

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Joan R Roses (SAR 5.15)

**Availability:** This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students should have completed courses in intermediate level econometrics.

Knowledge of spatial econometric packages like GIS is not necessary. The course will not provide a comprehensive training in econometric methods or computer applications.

**Course content:** The course aims to introduce the student to topics at the frontier of Historical Economic Geography research of importance both at a theoretical and empirical level. Historical Economic Geography explores how and why the location of economic activities changes across time and space. To do so, it combines methodologies from several social sciences including Economic History, Economic Geography, Human Geography, Economics and Econometrics.

The focus is on acquiring the necessary skills to engage in advanced analysis of historical economic geography evidence and understand how History and Geography can shape economic development. The course consists of nine two-hours seminars on specialised topics in historical economic geography and one preparatory research workshop. This course contents change from year to year following the recent developments in the discipline. The topics considered in this edition of the course are the following. 1) general problems of research with historical and spatial data; 2) the construction of historical-spatial data; 3) historical analysis of market integration: time-series and dynamic panels; 4) historical analysis of the spatial concentration of

economic activities: measurement and determinants; 5) historical and spatial analysis of factor markets; 6) historical analysis of the local labour markets; 7) natural experiments in Historical Economic Geography: policies and shocks; 8) the evolution and measurement of regional inequality; 9) historical analysis of the urban space.

**Teaching:** 20 hours of computer workshops in the LT.

**Formative coursework:** Students will produce several short reviews of research papers and participate in the research workshop with an original project. The reviews' objective is to familiarize the students with the different methodologies and prepare them for their research projects. The research workshop will help them design the project and discuss its methodology. All formative coursework will receive written or oral feedback.

**Indicative reading:**

## EH436 Half Unit Not available in 2022/23

### Economic History of the Early Modern New World (The Americas)

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Alejandra Irigoin, SAR 6.11

**Availability:** This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Financial History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). We hope to be able to provide places for all students that apply, but this may not be possible.

**Course content:** This course surveys the economic history of the expansion and interaction of Europeans in the Americas in the early modern period (1500-1820). It focuses on the role of the New World in the origin and development of the World Economy, modern Europe and Asia before modern economic growth. The course mirrors mainstream interpretations of economic development centred on European and Old World trajectories on the New World's, to explain the global Smithian growth of the region in the period. It also poses a reciprocal comparison for particular developments in North and South America, as an empirical test for theories of long run development based on institutional legacies of colonialism, culture and factor endowments.

Combining a thematic approach with a loose chronological

sequence, the course discusses topics such as: 1) the New World in Eurasia's Great Divergence, 2) Demographics and Living standards, 3) Factor Endowments and Agriculture, 4) The production of global commodities, 5) Labour institutions and markets in mining and agricultural commodities, 6) The world demand for sugar and silver; consumption and markets; 7) Trade, finance and commercial institutions over the Atlantic and the Pacific oceans, 8) Colonialism and European mercantilism overseas, 9) governance, war and state capacity in the sovereign states 10) The legacy of colonialism in the long run: the divergence within the New World by 1820s and the Great Divergence revisited. More specific topics are: the interaction with aboriginal societies and the establishment of market relations; the Columbian exchange and the transfer of knowledge to and from Europe; the slave trade; the scope for domestic and overseas markets, the colonial trade.

**Teaching:** 20 hours of seminars in the LT.

This year, while we are planning for most classes and seminars to be delivered in person, it is possible that some or all of this teaching may have to be delivered virtually. Lectures will either be recorded or given in the form of live webinars.

**Formative coursework:** Students are expected to write two essays or equivalent pieces of written work.

**Indicative reading:**

## EH437

### History of Global Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Olivier Accominotti

**Availability:** This course is compulsory on the MSc in Financial History. This course is not available as an outside option.

**Course content:** This course introduces students to the history of the global monetary and financial system. It examines the main changes in the architecture of global finance and in the governance of international monetary affairs from the very early times to the twenty-first century. The course explores the rise of international finance, the origins of financial globalization and de-globalization, and the causes and consequences of global financial instability for both advanced and emerging market economies. The course provides the necessary long-run, historical perspective to understand the most recent developments in the international monetary and financial system and the related policy debate. As part of this course, students will also design and conduct one research project in financial history drawing upon archival sources or historical data. The project will prepare students for their research dissertation.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** Students will be expected to produce 2 essays in the MT and LT.

**Indicative reading:**

- Eichengreen, B. (2008). *Globalizing Capital: A History of the International Monetary System*. Princeton University Press.
- Eichengreen, B., Mehl, A., & Chitu, L. (2018). *How Global Currencies Work. Past, Present and Future*. Princeton University Press.

- Reinhart C. & Rogoff K. (2009). *This Time is Different. Eight Centuries of Financial Folly*. Princeton University Press.
- Tooze, A. (2018). *Crashed: how a decade of financial crises changed the world*. Allen Lane.

**Assessment:** Exam (70%, duration: 2 hours) in the summer exam period.

Project (30%, 3500 words) in the LT.

## EH438 Half Unit History of Financial Markets

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Albrecht Ritschl

**Availability:** This course is available on the MSc in Financial History. This course is not available as an outside option.

**Pre-requisites:** Some knowledge of statistics is useful but not strictly required.

**Course content:** This course explores the historical evolution of financial markets from the early times to the present. It covers the origins of securitisation and the gradual spread of financial asset tradability in different parts of the world. We analyse the gradual deepening of financial markets with the emergence of major stock exchanges in the Early Modern period. We study the rise of stock markets and the emergence of secondary markets for sovereign debt from the 18th to the 20th century. With these financial innovations came financial bubbles, crises, and crashes. We delve into the ongoing debates about their causes and origins. The course provides a long run perspective on important questions about the efficiency of financial markets, their international integration as well as their regulation and de-regulation. It also presents a historical comparison of the emerging market crises of the late 20th century, as well as the financial crisis of 2008.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** Students will be expected to produce 1 presentation and 1 essay in the LT.

Students will be encouraged to form and work in groups, and to briefly present joint slide sets on the reading and the class question every week so as to continually obtain feedback. The formative essay topic will typically be chosen from one of the presentations and deepen one aspect further.

**Indicative reading:**

- Aliber, R., & Kindleberger, C. P. (2015). *Manias, panics and crashes: A history of financial crises*. Palgrave.

**Assessment:** Exam (100%, duration: 2 hours).

## EH439 Half Unit History of Banking Systems

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Natacha Postel-Vinay

**Availability:** This course is available on the MSc in Financial History. This course is not available as an outside option.

**Course content:** This course introduces students to problematics around the history of banking. It explores the rise of financial intermediaries over the centuries and how their role evolved from simple money changers to money creators via lending. Banks can sometimes fail; historical causes of these failures as well as macroeconomic consequences will be explored, going from the 19C through the Great Depression to the 21C. Countries have historically been aware of the central tension between the necessity to save a financial system from collapse and the imperative of no moral hazard created in the process. By looking at the evolution of crisis resolution and aspects of preventive regulation students will gain a deep understanding of the history of banking in the developed world.

**Teaching:** 20 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 1 essay and 1 presentation in the LT.

**Indicative reading:**

- Tooze, A. (2018). *Crashed: How a Decade of Financial Crises Changed the World*. London: Penguin Books.
- Aliber, R., & Kindleberger, Charles P. (2015). *Manias, panics and crashes: A history of financial crises* (Seventh ed.). Palgrave.

**Assessment:** Essay (100%, 5000 words) in the LT Week 10.

## EH446 Economic Development of East and Southeast Asia

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Kent Deng SAR 517

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MRes/PhD in Quantitative Economic History, MSc in China in Comparative Perspective, MSc in Development Studies, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus), MSc in Global Politics, MSc in International and Asian History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

**Pre-requisites:** Knowledge of Asian history of the relevant period and region would be an advantage.

**Course content:** EH446 is, in nature, a guided reading course. Students will obtain in-depth knowledge of conditions and paths of economic growth and development in East Asia and Southeast Asia in past centuries, and become engaged in the ongoing scholarly debate.

The first part of the course looks at premodern/traditional economic performance, including resource endowments, institutions, technology and economic structures that evolved independently in Asia over time to support a large population with reasonable standards of living. The second part of the course examines early modern East Asia and Southeast Asia in the context of 'product-rich economies', and easy access to international trade, and Western colonisation of the region. The third part examines modern growth in East Asia and Southeast Asia, including the conditions and transformations in post-Opium War China, Meiji Japan, post-WWII 'Asian Tigers', ASEAN, China under post-Mao reforms, and 'new Asia' in the global economy today.

Main debates in scholarship are included as the course moves on.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures in the ST.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

**Formative coursework:** Students are expected to write two essays or equivalent pieces of written work.

**Indicative reading:**

- A G Frank, *ReOrient: Global Economy in the Asian Age* (1998);
- K Pomeranz, *The Great Divergence* (2000);

- J M Hobson *Multicultural Origins of the Global Economy* (2021);
- World Bank, *The East Asian Miracle* (1993);
- I Brown, *Economic Change in Southeast Asia* (1997).
- Rui H and P. Nolan, *Globalisation, Transition and Development in China* (2004).

**Assessment:** Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 3500 words).

## **EH452 Half Unit Not available in 2022/23** **Latin American Development and Economic History**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Alejandra Irigoin, SAR 611

**Availability:** This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus), MSc in History of International Relations, MSc in International and World History (LSE & Columbia), MSc in Political Economy of Late Development and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

**Course content:** The course will consider some of the major topics in the development and economic history of Latin America.

The topics to be explored will be the role of geography, the environment and factor endowments, the role of institutions and policies, problems of taxation, spending and representation in the capacities of the state and constitutional and political developments in the 19th and 20th century, the protracted character of Latin America's inequality, the 'curse' from natural resources dependence, the macroeconomics of industrialization and the political economic nature of Latin American populism. Using reciprocal comparisons with the US, South East Asia, between Latin American countries, and across time the course will revisit the current interpretations of Latin American development in the long run and will frame the analysis of particular issues of policy-making of the present into the economic historical context.

**Teaching:** 20 hours of seminars in the MT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. This year, while we are planning for most classes and seminars to be delivered in-person, it is possible that some or all of this teaching may have to be delivered virtually. Lectures will either be recorded or given in the form of live webinars.

This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students are required to write one essay or equivalent pieces of written work.

**Indicative reading:** V. Bulmer-Thomas, V (2014) *The economic history of Latin America since independence* 2nd ed Cambridge, Cambridge University Press. S. Edwards, 2010. *Left behind: Latin America and the false promise of populism*. Chicago: The University of Chicago Press. P. Franko, 2007. *The puzzle of Latin American economic development*. Lanham & Littlefield. J.L. Gallup, (2003) *Is geography destiny?: lessons from Latin America* Latin American development forum. Washington, DC, World Bank. Stein, Ernesto, Mariano Tommasi, Carlos G. Scartascini, and Pablo T. Spiller. 2008. *Policymaking in Latin America: how politics shapes policies*. Washington, D.C.: Inter-American Development Bank. Ocampo, JA & Ross, J (2011), *The Oxford Handbook of Latin American economics* (Oxford, Oxford University Press). Bertola, L & Ocampo, JA (2012), *The Economic Development of Latin America since Independence* (Oxford, Oxford University Press); Scartascini, Stein, GC & Tommasi, M (2010), *How*

*democracy Works: political institutions, actors and arenas in Latin American policy making* (Washington DC IADB); CH Blake, (2007) *Politics in Latin America* 2nd edition (Houghton Mifflin Company). V. Bulmer-Thomas, JH, Coatsworth, and R. Cortes Conde, (2006) *The Cambridge economic history of Latin America* Cambridge, Cambridge University Press. Vol. I & I; AA.VV (2003) *Inequality in Latin America and the Caribbean. Breaking with history?* (Washington IRDB); Edwards, Esquivel, G & Marquez, G (2007) *The Decline of Latin American Economics: growth, institutions and crises* (Chicago University of Chicago)

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

While we hope to be in a position to be able to offer in-person assessment, it remains possible that examination for this module will be online.

## **EH454 Not available in 2022/23** **Human Health in History**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Eric Schneider SAR.5.18 and Prof Patrick Wallis SAR.5.11

**Availability:** This course is available on the MRes/PhD in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course explores how human health has changed over time and tracks how the environment, society, public health infrastructure, medical practice and health systems have influenced health. The course begins with a survey of how health has changed from the Neolithic era onwards. Subsequent thematic sets of seminars study the following topics in more detail:

- Health in the pre-Industrial world including discussion of the Black Death and American slavery.
- The epidemiological and health transition with weekly topics on the germ theory of disease, medical innovations, sanitation and the developmental origins of health.
- The development of health systems from the early modern period to the present.
- Combating epidemic disease with particular reference to smallpox, plague and AIDS.
- The influence of health on society and the economy including topics on health and economic growth, gender disparities in health and morbidity.

One of the focuses of the course will be critical engagement with the sources and methods that historians have used to reconstruct health history. Students will also complete a 5,000 word research paper based on primary sources or data on a health history topic as part of the summative assessment.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 1 hour of seminars in the ST.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

**Formative coursework:** Students will be expected to produce four essays or equivalent pieces of work. In MT this includes a group research project to prepare students for the individual research paper that forms part of the summative assessment.

**Indicative reading:** Floud, Roderick, Robert W. Fogel, Bernard Harris and Sok Chul Hong, *The Changing Body: Health, Nutrition, and Human Development in the Western World since 1700* (Cambridge, 2011).

Harrison, Mark, *Disease and the Modern World: 1500 to the*

Present (Cambridge, 2004).

Costa, Dora, 'Health and the Economy in the United States, from 1750 to the Present', NBER Working Paper, no. 19685 (2013).

Hays, J. N., *The Burdens of Disease: Epidemics and Human Response in Western History* (New Brunswick NJ, 1998).

Steckel, Richard H., 'Stature and the Standard of Living', *Journal of Economic Literature*, 33, no. 4 (1995), pp. 1903-1940.

Wallis, Patrick, 'Introduction: The Growth of the Early Modern Medical Economy', *Journal of Social History*, 49, no. 3 (2016), pp. 477-483.

**Assessment:** Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%, 5000 words) in the LT.

The 5,000-word summative research project is an opportunity for students to conduct their own primary-source research into the history of health. Students can either use a primary source available as a dataset, or they can venture out to the archives to collect additional information as a basis for their project. The project must be historical (pre-1990) and cannot directly replicate studies in the literature using the same data. However, it can test another author's result using new sources or use the same sources to test a different question. The project can use quantitative or qualitative methods (or both) based on each student's preference.

## EH457 Half Unit

### Living Standards since the Industrial Revolution: The British experience c.1750-2000

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Ian Gazeley SAR 6.05

**Availability:** This course is available on the MA in Modern History, MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

**Course content:** This course examines living standards from roughly the industrial revolution until the millenium through the prism of the British experience. The gradual move from subsistence agriculture to advanced industrial production was accompanied by a move towards urban living and radical demographic and social change, which transformed the lives of the population within a few generations. The population of Western economies experienced an exponential increase in average real incomes, which was driven by technical progress. This transformed the living standards of the majority of the population from bare subsistence to plenty, and was accompanied by a growing role for the state in providing for those excluded from the benefits of economic progress. Over the course of these three hundred years, the path of average incomes in Western countries also diverged from those in Asia, creating profound global imbalances in income and wealth.

The course is organised roughly chronologically, but within this, it concentrates on particular aspects of living standards that have proved most controversial within the existing literature; either because of an imperfect historical record, differences in method or approach, or sometimes because of ideological differences. This course will explore topics relating to: the transformation of work; the progress of average incomes; the distribution of income and wealth; changes in food consumption and nutrition; the

relationship between demographic change and living standards; the transformation of the role of the state and the reasons for divergence in living standards across time and place. It will also explore the reasons why historians disagree about these topics.

**Teaching:** 20 hours of seminars in the LT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. This year, while we are planning for most classes and seminars to be delivered in-person, it is possible that some or all of this teaching may have to be delivered virtually. Lectures will either be recorded or given in the form of live webinars.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students will be expected to complete two essays or equivalent pieces of work.

**Indicative reading:** Allen, Robert., *The British Industrial Revolution in Global Perspective* (Cambridge 2009)

Atkinson, A.B. and Piketty, Thomas., *Top Incomes: A Global Perspective* (Oxford, 2014)

Williamson, Jefferey, G., *Did British Capitalism Breed Inequality?* (1985)

**Assessment:** Take-home assessment (90%) in the ST.

Class participation (10%) in the LT.

The online assessment for this course will be a Take Home Exam administered via Moodle. A review session will take place in Week 1 of the ST in preparation for this assessment. Assessment questions will be administered via Moodle in Week 2 of the ST. Students will choose 2 of 8 questions. Answers to questions will be submitted in Week 5 of the ST.

---

## EH463 Half Unit

### The Long-Run Analysis of Firms and Industries

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Gerben Bakker SAR 509

**Availability:** This course is available on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Accounting, Organisations and Institutions, MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you are not able to get a place on this course.

**Course content:** This course comparatively explores the history of strategies, business organisations and industries since the nineteenth century. Different approaches to analyse this evolution are discussed, as well as the history of thinking about management and organisational structure and how this affected history itself. Introductory lecture(s) set the scene, discuss key concepts and various economic approaches to analyse the evolution of organisations. Subsequently the course looks at the origins of legal forms of organisation - such as the corporation,

the private limited liability company and the cooperative - at the development of organisational structures, at the history of thinking about them, and at evolution of the industries.

**Teaching:** 20 hours of seminars in the LT.

This course is delivered through a series of seminars totalling 20 hours across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students are expected to write two essays or equivalent pieces of written work.

**Indicative reading:**

- G. Boyce and S. Ville, *The Development of Modern Business* (2002);

**Assessment:** Take-home assessment (100%) in the ST.

---

## **EH476 Not available in 2022/23**

### **The Economic History of War**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Max-Stephan Schulze SAR 614

**Availability:** This course is available on the MRes/PhD in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research) and MSc in Global Economic History (Erasmus Mundus). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students enrolled on this course are expected to have completed the equivalent of undergraduate survey courses on European history. Knowledge of introductory undergraduate level economics is a distinct advantage.

**Course content:** This course explores the economic history of war(s) from the late Middle Ages to the 20th century within a comparative framework. Key themes examined include: long-term preparation for war - from bullionism to autarchy; state formation and deformation; organising warfare - from Renaissance condottiere to security firms; resource mobilisation - finance, material inputs, human capital; resource allocation - production and consumption; human and economic consequences of war; post-war reconstructions. The historical cases studied include the Hundred Years War, the Thirty Years War, the European wars of the 18th century, the Napoleonic Wars, the American Civil War, the First and Second World Wars.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There are no lectures on this course. Teaching will consist of 20

seminars of two-hours each in MT and LT; one revision session in LT. There will be pre-circulated papers for the seminars.

Students on this course will have a reading week in Week 6 of both MT and LT, in line with departmental policy.

**Formative coursework:** Three 2,000 word essays and one class presentation

**Indicative reading:** R. Bartlett, *The Making of Europe. Conquest, Colonization and Cultural Change, 950-1350* (1993).

## **EH482**

### **The Origins of the World Economy: Europe and Asia, 1000-1800**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Anne Ruderman SAR 506 and Prof Patrick Wallis SAR 511

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in China in Comparative Perspective, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus), MSc in International and Asian History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

**Course content:** This course surveys long-term processes of growth and development in pre-modern Europe and the wider world. Its central question is how and why economic performance differed between differently structured societies and across societies at the same point in time. The course raises fundamental questions about the nature of pre-industrial societies and economies and it critically examines the numerous theories put forward to explain long-run economic change.

First, it asks if stagnation and poverty were normal conditions in pre-industrial societies and growth an aberration. Were societies 'Malthusian', and what kind of growth and development did they experience? Second, it addresses debates over the timing

and causes of Western economic growth and its connections with the region's expanding political and military power. Was British or European success from the 17th century the result of unique social, institutional, or cultural features? It focuses on the developments of markets and their integration, on the development of technology and on the extension of manufactory in a fundamentally agrarian world. Third, it explores the range of alternative development paths within Europe and in other regions of the world, such as premodern China and India, considering both regions' internal economic dynamics and the impact of interactions with European powers as contact grew over the course of the early modern period.

The course is not chronologically arranged but rather along core topics relevant in economic history. These are presented and discussed in an explicitly comparative way. Themes include: population, agriculture, technology, manufacturing, labour regimes, economic effects of legal, political, and constitutional structures; political economy; trade and market integration, money, finances and commercial institutions, and the causes and effects of the European expansion overseas.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

**Formative coursework:** Students are expected to write three essays or equivalent pieces of written work.

**Indicative reading:**

**Assessment:** Take-home assessment (100%) in the ST.

## EH483

### The Development and Integration of the World Economy in the 19th and 20th Centuries

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Albrecht Ritschl SAR 606 and Prof Juan Roses Vendoiro SAR 515

**Availability:** This course is available on the MA in Modern History, MSc in Accounting, Organisations and Institutions, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic

History (Erasmus Mundus), MSc in Global Politics and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

**Course content:** This course aims to provide an overview of the development and integration of the world economy from 1800 to the present, giving an understanding of the origins of the challenges we face in the 21st century. The course raises fundamental questions about the sources of the unprecedented levels of economic growth in the last two centuries and the past and present challenges to economic development that have led to sharp divergences in income between countries and regions. The course explores the economic history at a global level, exploring developments in the western world as well as in Latin America, East and Southeast Asia, and Africa. Topics discussed will include fundamental transformations in economic experience, such as income and inequality, environmental change and the rise of population; sources of progress, such as technology, science, fiscal development; and explanations for divergent outcomes, for example human capital, economic policy, and management.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

**Formative coursework:** Students are expected to write two essays or equivalent pieces of work.

**Indicative reading:** Broadberry, S. and O'Rourke, K.H. (eds.) (2010), *The Cambridge Economic History of Modern Europe*; Acemoglu, D., and Robinson, J.A. (2006), *Economic origins of dictatorship and democracy*; Livi-Bacci, M. (2001), *A Concise History of World Population*; Broadberry, S.N. **Assessment:** Take-home assessment (100%) in the ST.

## EH486 Half Unit Not available in 2022/23

### Shipping and Sea Power in Asian Waters, c 1600-1860

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Kent Deng SAR.5.17

**Availability:** This course is available on the MRes/PhD in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History (Erasmus Mundus), MSc in International and World History (LSE & Columbia) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course examines the development of shipping, sea power and maritime-related industries in East and Southeast Asia, c1600-1860.

Topics include: Introduction to theories and models. Sailing conditions and sea routes in Asian waters. Strategic importance of Asian waters in the global sense. Development of shipping technology. Emergence of naval capacity. Function and pattern of long-distance trade; formation of regional markets and networks; linkages to the home economy. Migration. Investments and returns. Role of governments. Impact of modern capitalism. Regional hegemony. The context of the process and impact of globalisation in Asia.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

Taught during the LT. 10 weekly one hour lecture followed by one hour seminar in which student papers will be presented and discussed.

**Formative coursework:** Students are expected to write two essays or equivalent pieces of written work.

**Indicative reading:** K Bjork, 'The link that kept the Philippines Spanish: Mexican merchant interests and the Manila trade, 1571-1815' in *Journal of World History*, 1 (1998), 25B50; K N Chaudhuri, *The Trading World of Asia and the English East India Company* (1978); Gang Deng, *Chinese Maritime Activities and Socioeconomic Development c2100 b.c.1900 a.d.* (1997); Gang Deng, *Maritime Sector, Institutions and Sea Power of Premodern China* (1999); D Flynn & A Giraldez, 'Born with a "Silver Spoon": World Trade's Origins in 1571' in *Journal of World History*, Vol6, No 2 (1995); Yen-P'ing Hao, *The Commercial Revolution in Nineteenth-Century China: The Rise of Sino-Western Mercantile Capitalism* (1986); Yen-P'ing Hao, *The Compradore in Nineteenth-Century China: Bridge between East and West* (1970); L Levathes, *When China Ruled the Seas: The Treasure Fleet of the Dragon Throne, 1405-1433* (1994); W Schurz, *The Manila Galleon* (1985: originally 1938); A So, *The South China Silk District: Local Transformation and World-System Theory* (1986); M Tampoe, *Maritime Trade between China and the West* (1989).

**Assessment:** Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2500 words).

## EH496

### Research Dissertation A: Contextualisation, Theory and Research Design

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Olivier Accominotti SAR 514

**Availability:** This course is compulsory on the MSc in Economic History (Research). This course is not available as an outside option.

This course is taken in combination with EH497.

**Course content:** The dissertation must draw upon the research training provided through the core courses for the MSc (Research) and the generic courses taken by the student, and present the results of an original enquiry into a carefully defined problem. Students are expected to show an ability to draw on relevant social scientific concepts, an understanding of the advanced literature in one or more areas of economic history, and of the nature of historical explanation and analysis. Where appropriate, students are also expected to show the ability to use relevant quantitative techniques for data collection and analysis. The dissertation is intended as preparation for a research degree. Students expecting to continue on the MPhil/PhD programme within the Department may write their MSc dissertation on a different topic from that on which they plan to research at MPhil/PhD level.

**Teaching:** Co-taught with EH497.

Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department and, individually, from their supervisors. There will be several taught

sessions in Michaelmas Term for all students on the programme in addition to meetings with supervisors during the course of the year.

**Formative coursework:** Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Lent Term (3) a presentation at a dissertation workshop; (4) a one-page project summary and an extended draft by the end of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

**Assessment:** Dissertation (100%, 15000 words) post-summer term.

The final dissertation, is equivalent to two full modules (EH496 and EH497), and will be awarded two separate percentage marks. The first of these marks (EH496) will be based on the formulation of the dissertation topic, its historical and historiographical context (including critical literature survey), its creativity and originality, and overall presentation. The second mark (EH497) will relate to the student's research design and discussion of methods, their collection and evaluation of primary and secondary sources, and the quality of analysis of evidence and interpretation. The dissertation should not exceed 15,000 words, excluding tables, references and bibliography. Presentation must be in accordance with appropriate academic conventions as laid down in the MSc Handbook. Work that fails to meet appropriate academic standards of presentation, including English language, will be subject to a maximum deduction of 15% from the first percentage mark. Marks will be deducted for late submission in accordance with the guidelines laid down in the MSc student handbook.

## EH497

### Research Dissertation B: Implementation, Analysis and Contribution

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Olivier Accominotti SAR 514

**Availability:** This course is compulsory on the MSc in Economic History (Research). This course is not available as an outside option.

This course is taken in conjunction with EH496.

**Course content:** The dissertation must draw upon the research training provided through the core courses for the MSc (Research) and the generic courses taken by the student, and present the results of an original enquiry into a carefully defined problem. Students are expected to show an ability to draw on relevant social scientific concepts, an understanding of the advanced literature in one or more areas of economic history, and of the nature of historical explanation and analysis. Where appropriate, students are also expected to show the ability to use relevant quantitative techniques for data collection and analysis. The dissertation is intended as preparation for a research degree. Students expecting to continue on the MPhil/PhD programme within the Department may write their MSc dissertation on a different topic from that on which they plan to research at MPhil/PhD level.

**Teaching:** Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department and, individually, from their supervisors. There will be several taught sessions in Michaelmas Term for all students on the programme in addition to meetings with supervisors during the course of the year.

**Formative coursework:** Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Lent Term (3) a presentation at a dissertation workshop; (4) a one-page project summary and an extended draft by the end of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

**Assessment:** Dissertation (100%, 15000 words) post-summer term.

The final dissertation, is equivalent to two full modules (EH496 and EH497), and will be awarded two separate percentage marks. The first of these marks (EH496) will be based on the formulation of the dissertation topic, its historical and historiographical context (including critical literature survey), its creativity and originality, and overall presentation. Work that fails to meet appropriate academic standards of presentation, including English language, will be subject to a maximum deduction of 15% from the first percentage mark. Marks will be deducted for late submission in accordance with the guidelines laid down in the MSc student handbook.

---

## EH498 Half Unit Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Olivier Accominotti SAR 514

**Availability:** This course is available on the MSc in Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is not available as an outside option.

**Course content:** The subject of the dissertation should relate broadly to one of the economic history taught courses taken by the student. It should be either a critical survey of a well-defined problem in the literature, or a small self-contained research project using primary evidence. It must demonstrate adequate knowledge of appropriate literature in Economic History and an ability to handle problems of evidence and explanation.

Students on the MSc in Political Economy of Late Development are encouraged to consider topics that relate to themes in development, but are still required to develop a clear historical perspective within their analysis.

Students on the MSc in Global Economic History are encouraged to consider topics that relate to themes in global economic history, broadly conceived.

**Teaching:** Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department and, individually, from their supervisors. There will be several taught sessions in Michaelmas Term for all students on the programme in addition to meetings with supervisors during the course of the year.

**Formative coursework:** Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Lent Term (3) a one-page project summary and an extended draft by the end of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

**Assessment:** Dissertation (100%, 6000 words) post-summer term. The dissertation should be no longer than 6,000 words, excluding tables, references and bibliography. Marks will be deducted for late submission or excessive length.

---

## EH499 Research Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Olivier Accominotti SAR 514

**Availability:** This course is compulsory on the MSc in Financial History. This course is available on the MSc in Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc

in Political Economy of Late Development. This course is not available as an outside option.

**Course content:** The dissertation should be an empirical study using primary source material to write on a topic of economic history. The topic should relate broadly to one of the economic history courses taken.

Students on the MSc in Political Economy of Late Development are encouraged to consider topics that relate to themes in development, but are still required to develop a clear historical perspective within their analysis.

Students on the MSc in Global Economic History (Erasmus Mundus) are encouraged to consider topics that relate to themes in global economic history, broadly conceived.

Students on the MSc in Financial History are encouraged to consider topics that relate to monetary and financial problems in an historical context.

**Teaching:** Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department and, individually, from their supervisors. There will be several taught sessions in Michaelmas Term for all students on the programme in addition to meetings with supervisors during the course of the year.

**Formative coursework:** Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Lent Term (3) a one-page project summary and an extended draft by the end of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

The dissertation should not exceed 10,000 words, excluding tables, references, and bibliography. The title must be approved in advance by the student's supervisor. Marks will be deducted for late submission or excessive length.

---

## EU409

### Basic Economic Concepts for European Political Economy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Vassilis Monastiriotis

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

This course is for students with little economic background. Although this course is intended primarily for students studying on the MSc in Political Economy of Europe (including the double degrees with Sciences Po and Fudan), students from other programmes within the European Institute may also choose to follow this course.

**Course content:** This is a Moodle-based course offering a series of reading material and study guides on some basic economics concepts and theory that are relevant to discussions concerning the political economy of Europe that students will come across in their other courses during their MSc degree. The course is not assessed and there is no formal instruction. Students are encouraged to work in teams and to develop discussions on Moodle- which will be partially moderated by the Course Convenor. The material is designed so as to be accessible to students with no previous knowledge of economics but students with some

basic economics knowledge will also benefit from it. Example topics include: current account and budget deficits ("twin deficits"), inflation and unemployment ("Phillips Curve"), trade liberalisation and tariffs ("gains from trade"), competitiveness and unit labour costs ("internal devaluation"), and others.

**Teaching:** This is a Moodle-based course with no formal teaching. Students can arrange one-to-one sessions with the Course Convenor during Feedback Sessions/Office Hours. Depending on student demand, a limited number of 'EU409 Surgeries' can be arranged.

**Indicative reading:** J Stiglitz & J Driffill, *Economics*, Norton, 2000 (or later editions); P Krugman & M Obstfeld, *International Economics*, Addison Wesley, 2003.

**Assessment:** There is no examination for this course.

## EU410

### Interdisciplinary Research Methods and Design

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Jonathan White CBG.7.09

**Availability:** This course is compulsory on the MSc in Culture and Conflict in a Global Europe and MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po). This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** This series of lectures and workshops offers an introduction to research methods and design for students on the MSc Culture and Conflict in a Global Europe programmes within the European Institute. Themes discussed include: methods in the social sciences and in the humanities; common problems of research design; advice on writing dissertations; advice on critical reading and interpretation of texts; an overview of comparative method and case-study research; an introduction to visual analysis, and an introduction to discourse analysis and qualitative coding. Each session will consist of short lecture elements followed by group work in which students with their different backgrounds will work together to solve specific problems of research design and complete exercises aimed to demonstrate application of different methods.

**Teaching:** This course is delivered via online and/or in-person teaching totalling a minimum of 10 hours spread across the Michaelmas Term. This course includes a reading week in Week 6 of the Michaelmas Term.

**Indicative reading:** Bob Hancké, *Intelligent Research Design: A guide for beginning researchers in the social sciences*, Oxford UP 2009.

**Assessment:** There is no examination for this course.

## EU421 Half Unit

### Policy-Making in the European Union

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Niina Vuolajarvi

**Availability:** This course is available on the MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po),

MSc in Media and Communications (Media and Communications Governance), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A solid knowledge of the role and functions of EU institutions is required.

**Course content:** This course offers the theoretically informed study of the EU policy-making across a selection of key issue areas. The principal aim of the course is to provide a detailed knowledge of how national and EU institutions interact in European policy making. To achieve this, the course starts with a short summary of the actors and institutions governing the process of EU policy-making. The main part of the course analyses the evolving role of the EU and its policy-making dynamics in key policy areas such as the single market, regional policies, agricultural and environmental policies, immigration and asylum policies, social and employment policies, economic and monetary policies.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Students will be expected to submit two formative essays.

**Indicative reading:** H Wallace, M Pollack, & A Young, *Policy-Making in the European Union*; S Hix & B. Hoyland, *The Political System of the European Union*; M Pollack, *The Engines of Integration: Delegation, Agency and Agenda Setting in the European Union*; J J Richardson & S Mazey, *European Union: Power and Policy-making*.

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU430 Half Unit

### Europeanization: The Comparative Politics of Domestic Change

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Yaprak Gursoy CBG 7.04

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course examines the effect of European Union membership on member states' policies, institutions and societies. The consequences of EU membership, as well as how and why we experience membership differently across our national political systems are increasingly important elements of the debate about the future of Europe. Crises of legitimacy, capability, and impact have been identified. Following this lead, this course evaluates the influence of European integration on member states, highlighting differences between policy mechanisms and sectors; institutional capacities and settings; and political (party and electoral) behaviour. The discussion and analysis is framed by the notion of 'Europeanization', to consider the linkages between the

European and national levels.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be expected to produce one formative essay (2000 words) and a presentation in the MT.

**Indicative reading:**

- Graziano, P. and Vink, M.P. (eds) (2006) *Europeanization: New Research Agendas*, Palgrave Macmillan;
- Exadaktylos, Claudio M. Radaelli (2012) *Research Design in European Studies: Establishing Causality in Europeanization* Palgrave;
- Bulmer, S. and Lesquesne, C. (eds) (2013) *The Member States of the European Union*, Oxford: Oxford University Press;
- Sanders, D (2012) *The Europeanization of National Politics?* Oxford University Press;
- K Featherstone & C Radaelli (Eds), *The Politics of Europeanization*; Oxford University Press, (2003);
- K Goetz & S Hix (Eds), *Europeanised Politics? European Integration and National Political Systems*, Frank Cass, (2001);
- M Green Cowles, J Caporaso & T Risse (Eds), *Transforming Europe: Europeanization and Domestic Change*, Ithaca, Cornell UP;
- F. Schimmelfennig and U. Sedelmeier (eds) (2005) *The Europeanization of Central and Eastern Europe*, Ithaca: Cornell University Press.

**Assessment:** Essay (100%, 5000 words) in the LT.

---

## EU432 Half Unit

### The Philosophy of Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Simon Glendinning CBG 7.01

**Availability:** This course is available on the CEMS Exchange, MA in Modern History, MBA Exchange, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** In this course we will read and discuss texts that draw the history of Europe into relation with philosophy. In its most classical form the assertion of this relation belongs to an understanding of Europe's history as inseparable from the project of a life predicated on reason. Europe, insofar as its cultural identity is caught up with the Greek ideal of scientific rationality, is not simply the place where philosophy was first elaborated and developed. On the contrary, Europe first arises as a place only in and through the elaboration and development of philosophy. Of course, philosophy is, in that name, a European phenomenon - although one which concerns above all the question, in principle open to anyone, of what it means to be a human being as such. Equally, however, Europe is itself a philosophical phenomenon - its identity inseparable from the idea of a project that concerns rational animality as such, and hence humanity as a whole. The idea that Europe has a world-wide significance in virtue of its relation to philosophical thought is strikingly expressed in Kant's prediction of "a great political body of the future" emerging in Europe, a kind of league of nations, that will probably "legislate" - that is, at least serve as a guiding example - for all humanity. Indeed, the global "cosmopolitan existence" posited by Kant as the final end of world history is not just a philosopher's idea of humanity's collective political destiny: the very idea of a universal human community is essentially philosophical. On this view, the (particular) history of the peoples of "our continent" has a relation to the (universal) destiny - the liberation or emancipation - of humanity world-wide. This is not simply because of the hegemonic political and economic ambitions of imperialist Europeans, but the

world-wide movement of a cosmopolitan and humanist culture. Starting with Kant's classic essay on "Idea for a Universal History with a Cosmopolitan Purpose" we will turn to the way in which Europe is understood and elaborated within the post-Kantian tradition: in Hegel, Marx, Husserl, Valéry, Berlin, Fukuyama, and Derrida.

Although this course focuses on carefully selected philosophical texts, there is no expectation that students taking the course will have a background in philosophy.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Two essays of 2,000 words each

**Indicative reading:** Immanuel Kant 'Idea of Universal History with a Cosmopolitan Purpose', in *Political Writings*; Edmund Husserl 'The Vienna Lecture', in *The Crisis of European Sciences and Transcendental Phenomenology*; Paul Valéry, in *History and Politics*; Jacques Derrida, 'Of the Humanities and the Philosophical Discipline. The right to philosophy from the cosmopolitical point of view (the example of an international institution)' (online).

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

---

## EU437 Half Unit

### Europe Beyond Modernity

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Simon Glendinning CBG 7.01

**Availability:** This course is available on the CEMS Exchange, MBA Exchange, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in International Relations (Research), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course engages with the deepest roots and fundamental trajectory of the contemporary European world as identified by three major thinkers of the nineteenth and twentieth centuries: Nietzsche, Heidegger and Derrida. Taking up and problematising the claim made by Emmanuel Levinas that "Europe is the Bible and the Greeks", the course explores the idea that Europe today is a cultural and political movement in deconstruction, a movement beyond its own modern self-understanding which might be summarised by Nietzsche's madman's pronouncement of the death of God. As Derrida, a leading theorist of this conception puts it, "one should, more prudently, say "Greek, Christian and beyond" to conceive the formation of the contemporary European heritage. This suggestion not only makes it possible to acknowledge many other important cultural sources in this heritage (Judaic and Islamic at the very least) but also, and above all, directs us towards what, in Nietzsche's wake, can be identified as "the passage beyond" - the movement in which the European tradition "tends of itself to break with itself". There is no suggestion that the heritage and future of Europe are disconnected in this "passage beyond", and none of the authors explored in this course seek to reject the European heritage or want simply to destroy it. On the contrary, and always in its name, the attempt is made in their writings to effect a renewal of the European world which could propel it in a new direction beyond Enlightenment modernity. The key themes in this renewal will be explored in relation to a "beyond modernity" condition becoming visible in philosophy, politics, technology and religion.

Although this course focuses on carefully selected philosophical texts, there is no expectation that students taking the course will have a background in philosophy.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Two 2,000 word essays; seminar presentation.

**Indicative reading:**

- Friedrich Nietzsche, *Beyond Good and Evil*
- Martin Heidegger, *The Question Concerning Technology*
- Jacques Derrida, "Faith and Knowledge" in *Religion* (eds Derrida and Vattimo)
- Robert Pippin, *Modernism as a Philosophical Problem*.

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU440 Half Unit

### The Balkans in Europe: Transition, Democratisation, Integration

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Vassilis Monastiriotsis CBG 5.05

**Availability:** This course is available on the MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** An examination of South East Europe from a political economy and international relations perspective, with particular emphasis on post-1989 developments. Topics include: The Balkans in Europe and Historical Legacies; the Dissolution of Yugoslavia; The Western Balkans and economic transition; the EU and the Balkans: regionalism and economic integration; Democratisation, state-building and Europeanisation in the Western Balkans; Conditionality and the mechanics of accession; the SEE2020 strategy and the structural reforms agenda; the Balkans and other external actors.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** One 1,500 word essay.

**Indicative reading:**

- M. Todorova, *Imagining the Balkans*, Oxford University Press, 1997;
- M. Glenny, *Balkans 1804-1999. Nationalism, War and the Great Powers*, Granta Publishers, 1999;
- S Woodward, *Balkan Tragedy*, Brookings Institute, 1995;

- *Stuck in Transition?*, Transition Report 2013, European Bank for Reconstruction and Development, London.

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU443 Half Unit

### European Models of Capitalism

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Robert Hancke CBG.6.09

**Availability:** This course is available on the MSc in China in Comparative Perspective, MSc in Global Politics, MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course consists of three parts. In the first part we will discuss the basic arguments and methodological considerations of the Varieties of Capitalism literature and conduct a comparative analysis of the core issue areas in the political economy of contemporary capitalism: how capital, labour and product markets are structured. The second part will build on these thematic treatments to discuss the structure and dynamics of the main Western, Southern and Central European models of capitalism. In the final part of the course we will use comparative capitalism perspectives to discuss current political-economic problems such as climate change, automation, and themes proposed by students.

**Teaching:** This course will be delivered through a lecture followed by combined lecture/seminars totalling a minimum of 21 hours during Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will write a short, 500 word essay every week on a key concept as part of a small group. Students will also develop their summative essay plan with the teacher late in Michaelmas term and early in Lent term.

**Indicative reading:**

- Peter A Hall & David Soskice (Eds), *Varieties of Capitalism: The Institutional Foundations of Competitiveness*. Oxford University Press, 2001;
- Hancké, Bob, Martin Rhodes and Mark Thatcher (eds.) 2007. *Beyond Varieties of Capitalism: Conflict, contradiction and complementarities in the European Economy*. (Oxford UP 2007) (henceforth HRT);

- Colin Hay, *Does Capitalism Still Come in Varieties?* Review of

International Political Economy, Volume 27, 2020. Benjamin Braun, Asset Management Capitalism as Corporate Governance Regime, pre-print, available online 2021

**Assessment:** Essay (100%, 5000 words) in the LT.

## EU446 Half Unit The Political Economy of European Monetary Integration

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Paul De Grauwe CBG 6.12

**Availability:** This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A basic understanding of macroeconomics is essential, which is why the auditing of the EU409 Moodle course is highly recommended.

**Course content:** The purpose of this course is to analyse the process of European monetary integration and its implications for the institutions of economic governance in the EU. There will be a strong emphasis on using the experience of the financial and economic crises since 2008 and the COVID-19 pandemic as sources of evidence to assess both the performance of EMU and the theories about monetary integration. We consider the political and economic rationale for the establishment of EMU. We study the theory of optimal currency areas and its relevance today. In particular, we study the incomplete nature of the Eurozone and how this incompleteness is a source of instability. Indicative questions addressed in this course include: how and why did the EU develop the EMU project? Did economic theories prepare us for the Euro area crisis of 2010-12? What are the challenges for member states in adjusting to the discipline of the 'Euro-zone'? How does the Euro affect the ability of member states to adjust to periods of crisis and to external shocks, in particular to a shock such as the COVID-19 pandemic? Is the sovereign debt crisis of 2010 indicative of imbalances within the EU and basic flaws in its institutional design? What are the collective action problems that explain the incompleteness of the monetary union? What is the role of the ECB in this process? Is a fiscal union necessary to make a monetary union sustainable in the long run?

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** One 2,000-word essay and one group essay of up to 3,000 words.

**Indicative reading:**

- Paul De Grauwe (2022) *The Economics of Monetary Union* (Oxford University Press, 14th ed.);
- Kenneth Dyson and Kevin Featherstone (1999) *The Road to Maastricht*, OUP;
- Waltraud Schelkle (2017) *The Political Economy of Monetary Solidarity, Understanding the Euro Experiment*, Oxford University Press;
- Special issue (2006): 'Economic Governance in EMU Revisited', *Journal of Common Market Studies* vol.44, No.4 (November);
- Jean Pisani-Ferry (2014) *The Euro Crisis and Its Aftermath*, Oxford University Press.

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time

and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU447 Half Unit Democracy, Ideology and the European State

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Marta Lorimer

**Availability:** This course is available on the MA in Modern History, MSc in Comparative Politics, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course investigates various ways in which the State's authority to act has been underpinned in Europe, both ideologically and institutionally, in the modern period. It looks at how the State has been used to give expression to the democratic principle, and the ways this has been undermined or rejected.

The module aims to provide students with a deep analytical understanding of the changing role of the State in European society. There will be three parts: A) Theorising the political; B) Democracy in post-War Europe; and C) Contemporary European trends. The course will conclude with an overview on possible trajectories to come, under the heading 'post-ideological, post-democratic and post-statal? - Europe today and beyond'.

**Teaching:** 20 hours of seminars in Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

A 2-hour review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** One 2,000 word unassessed essay  
One 10-12 minute class presentation

**Indicative reading:**

- Quentin Skinner (1989) 'The State', in Ball and Hanson (eds.) *Political Innovation and Conceptual Change*;
- Peter Wagner (2008) *Modernity as Experience and Interpretation*;
- James Tully (2002) 'The Unfreedom of the Moderns', *Modern Law Review* 63;
- Margaret Canovan (2005) *The People*;
- Michael Freedon (1996) *Ideologies and Political Theory*;
- Claus Offe (1996) *Modernity and the State: East and West*;
- Chantal Mouffe (2005) *On the Political*;
- Frank Furedi (2005) *Politics of Fear: Beyond Left and Right*;
- Nina Eliasoph (1998) *Avoiding Politics*;
- Peter Mair (2006), 'Ruling the Void? The Hollowing of Western Democracy', *New Left Review* 42;
- Jonathan White (2019), *Politics of Last Resort: Governing by Emergency in the European Union* (Oxford UP).

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU449 Half Unit Not available in 2022/23 Emerging Markets, Political Transition and Economic Development in Central and Eastern Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Abigail Innes CBG 6.03

**Availability:** This course is available on the MSc in European and

International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science and Political Economy and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is not available as an outside option.

**Pre-requisites:** EU409 Basic Economic Concepts for European Political Economy or equivalent.

**Course content:** This course applies concepts of political economy, economics and political science to its investigation of Central and Eastern Europe's development from post-communist transition, through EU accession to their condition as highly open, FDI-dependent markets within the European Single Market. Placing the region in the comparative context of both the EU15 and comparable emerging markets, the course investigates the ongoing challenges of political and institutional consolidation and the developmental consequences of the liberalization and the consumption and FDI-led growth model of the 1990s/2000s. The course examines the emerging strengths and persistent weaknesses of these political economies and considers their implications for the region's emerging varieties of capitalism, relative international competitiveness and political stability. It also considers the comparative political economy of the 'middle income trap', corruption and nationalist populism. The lectures aim to provide analytical frameworks and an overview of the major research findings and debates about systemic transformation, the influence of EU accession and the difficulties of consolidating democratic capitalism in open emerging markets in a globalised world. The seminars link key concepts with the empirical evidence arising from comparable cases.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** One 1500 word essay

**Indicative reading:**

- Hilary Appell and Mitchell Orenstein, (2018) *From Triumph to Crisis: Neoliberal economic Reform in Postcommunist Countries*, Cambridge University Press;
- Jan Drahoukoupil and Martin Myant (eds.) (2015) *Transition Economies after 2008: Responses to the Crisis in Russia and Eastern Europe*, Routledge.
- Rachel Epstein (2017) *Banking on Markets: The Transformation of Bank-State Ties in Europe and Beyond*, Oxford University Press;
- Nick Barr (ed.) (2005) *Labor Markets and Social Policy in Central and Eastern Europe: The Accession and Beyond*, Washington DC: The World Bank;
- Dorothee Bohle and Bela Greskovits (2012) *Capitalist Diversity on Europe's Periphery*, Ithaca: Cornell University Press;
- Hilary Appel (2011) *Tax Politics in Eastern Europe: Globalisation, Regional Integration and the Democratic Compromise*, Ann Arbor: The University of Michigan Press;
- H. Grabbe (2006); Alfred Stepan and Juan Linz (1996) *Problems of Democratic Transition and Consolidation: Southern Europe, South America and Post-Communist Europe*, London: Johns Hopkins University Press;
- Anna Grzymala-Busse (2007) *Rebuilding Leviathan: Party Competition and State Exploitation in Post-Communist Democracies*, Cambridge, New York: Cambridge University Press;
- Stephen Haggard and Robert R. Kaufmann, (2008) *Development, Democracy and Welfare States: Latin America, East Asia and Eastern Europe*, Princeton: Princeton University Press.
- Michael Ellman (2015) *Socialist Planning*, Cambridge University Press;
- J Kornai (1992) *The Socialist System: The Political Economy of Communism*, Princeton University Press. Journals often cited: *East European Politics and Society*, *Journal of Democracy*, *Economics of Transition and Europe-Asia Studies*.

The reading list above is intended to encourage students to explore a few texts that they feel will inspire them, rather than to feel obliged to somehow complete all of them before arrival (too

much!). These are relevant texts for the whole course and we will visit individual chapters in many of them as the course proceeds. The most useful background/preparatory reading that interested students can undertake for this course is to familiarise yourselves with the diverse historical political and economic developments of individual countries in the region from the communist era to the present day. This preparation will deepen the empirical knowledge you can deploy to critically judge the comparative theory with which the course then engages. In this respect Tony Judt's 'Postwar' is a particularly engaging text and Judt was unusual for writing with a deep knowledge of both Western and Central Europe alike.

**Assessment:** Essay (25%, 2000 words) in the LT.

Online assessment (75%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

---

## EU450

### Engaging with Europe: Professional Skills

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mareike Kleine CBG 6.07

**Availability:** This course is compulsory on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available on the MSc in International Migration and Public Policy (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** This innovative programme introduces European Institute students to professional skills for a successful career that engages with Europe. The course consists of a number of workshops, seminar series and interactive simulations from which students can choose. The aim of the course is that European Institute students leave LSE with a competitive CV and connections with alumni and professionals.

**Teaching:** EU450 sessions are offered in both the Michaelmas and Lent Terms. The teaching format and hours for each session will vary across the different workshops and seminars on offer. Details about how to sign up for a place on sessions of interest will be sent to students' LSE email accounts on a rolling basis throughout the Michaelmas and Lent Terms.

**PLEASE NOTE:** Students are **not** required to attend all workshops and seminars on offer and listed on the timetable. Students only need to attend those sessions for which they have signed up to attend and for which they have received a confirmed place.

**Formative coursework:** Formative work will vary based on the workshops attended.

**Assessment:** There is no examination for this course. Students will qualify for a certificate of participation for some workshops upon completion of formative work.

---

## EU453 Half Unit

### The Political Economy of European Welfare States

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Jonathan Hopkin

**Availability:** This course is available on the MSc in European and International Public Policy, MSc in European and International

Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The aim of the course is to apply concepts of economics and political economy to social policies in European welfare states. The lectures establish the theoretical context, summarise the findings of quantitative case studies and discuss European experiences in the context of broader international experience. The seminars will further develop political-economic concepts, such as market and government failure, and apply them to qualitative case studies of welfare state arrangements in member states, considering in particular the role of social policy legislation and coordination at the EU level. The course will provide students with the conceptual and empirical background to enable them to answer questions such as: What does economic theory and political economy tell us about the design of welfare states? How do social policies in European welfare states reconcile equity and efficiency? What drives or stalls reform dynamics in member states? Is the EU gradually developing into a social union, through international mobility and the portability of social entitlements?

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** One individual formative essay of 2,000 words.

**Indicative reading:**

- Barr, N. (2020) *The Economics of the Welfare State*, 6th ed., Oxford: Oxford UP;
- Pierson P. (ed) (2001) *The New Politics of the Welfare State*, Oxford: Oxford University Press

**Assessment:** Essay (25%, 2000 words) in the LT.

Online assessment (75%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

---

## EU455 Half Unit

### Concepts in Political Economy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Robert Hancke CBG.6.02

**Availability:** This course is available on the MPhil/PhD in European Studies, MSc in Global Economic History (Erasmus Mundus), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The aim of the course is to engage students with relevant concepts in political economy and their main applications in European studies. The course will anchor the degree in historical and current debates about the nature of political economy, the role of institutions and the pros and cons of different methodological approaches taken by political economists. The aim of the lectures is to outline key political economy concepts and their theoretical background while the seminars explore the uses and limits of the respective concepts through the systematic analysis of relevant research papers.

This course is particularly recommended for students who wish to pursue a research path in political economy, but also for those who have no background in political science and therefore not familiar

with conceptual debate. EU455 is also one of the three core course options for the MSc Political Economy of Europe, two of which must be chosen.

Among the topics covered are: concepts and theories in political economy; the role of ideas, interests and institutions; the tension between democracy and capitalism; rational choice versus behavioural political economy; two-level games; delegation to independent agents; accountability and legitimacy in policy-making; veto players and joint-decision traps; representation and partisanship.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** One formative essay of 1,200 words on any seminar question. Another essay of 1,500 words will consist of the analysis of the research paper that is presented in class.

**Indicative reading:** Caporaso, J and Levine, D (1992) *Theories of Political Economy*, Cambridge; Olson, M (2000) *The Rise and Decline of Nations*, London: Yale University Press.

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

---

## EU457 Half Unit

### Culture and Security in Global Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jennifer Jackson Preece CBG 7.05

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Global Politics, MSc in Human Rights and MSc in Human Rights and Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course will explore the relationship between culture and (in)security with a particular focus on the (in)security dilemmas of minorities and migrants within a world of nation-states. In so doing, our discussion will draw upon a variety of theoretical perspectives within security studies.

**Teaching:** This course is delivered through a combination of seminars and workshops totalling a minimum of 28 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Essay (2000 words) due in MT

**Indicative reading:**

- Z. Bauman, *Wasted Lives: Modernity and Its Outcasts*, 2003;
- B. Buzan, O. Weaver and J. de Wilde, *Security: A New Framework For Analysis*, 1998;
- J. Jackson-Preece, *Minority Rights: Between Diversity and Community*, 2005;
- W. Kymlicka, *Multicultural Odysseys: Navigating the New International Politics of Diversity*, 2009;
- J Mayall, *Nationalism and International Society*, 1990.

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

---

## EU458 Half Unit

### Public Policy and Cultural Narratives in a Global Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jennifer Jackson Preece CBG 7.05

**Availability:** This course is available on the MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy and MSc in International Migration and Public Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course is concerned with cultural and identity politics in contemporary states. Taking a narrative approach, this course will examine competing representations of minorities and migrants. Europe will be a major focus. Nevertheless, students with interests and expertise outside of Europe should feel free to include this wider perspective in their seminar discussions and assignments.

**Teaching:** This course is delivered through a combination of seminars and workshops totalling a minimum of 21 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Students are required to submit an essay (2000 words) in the LT.

**Indicative reading:**

- Z. Bauman, *Wasted Lives: Modernity and Its Outcasts*, 2003;
- B. Buzan, O. Weaver and J. de Wilde, *Security: A New Framework For Analysis*, 1998;
- J. Jackson-Preece, *Minority Rights: Between Diversity and Community*, 2005;
- W. Kymlicka, *Multicultural Citizenship*, 1995;
- C. K. Riessman, *Narrative Methods for the Human Sciences*, 2008;
- G. Rose, *Visual Methodologies: An Introduction to Researching With Visual Materials*, 2012.

A more detailed reading list is available from Dr Jackson-Preece.

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

---

## EU464 Half Unit

### International Migration: EU Policies and Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Eiko Thielemann CBG 7.02

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A good knowledge of EU institutions and EU policy-making is required.

**Course content:** This course examines the management of 'unwanted migration' to Europe. In particular, it deals with the European Union's governance of migratory flows such as asylum seekers and irregular migrants whose immigration states often seek to prevent or discourage. As the willingness of sovereign states to advance global governance in the area of immigration policy remains very low and unilateral national policy-responses are limited in their effectiveness, interest in regional governance has grown. The European Union is without any doubt the front-runner in developing such regional governance initiatives.

The course provides an in-depth treatment of the origins, evolution and major policy issues within this policy field which has been the fastest growing EU policy area since the 1990s. The course will normally focus on the following three policy areas: (1) the emerging EU asylum and refugee determination system; (2) border management, detention and deportation; and (3) responsibility allocation (the 'Dublin system'), burden-sharing and solidarity.

Those taking the course will learn how to systematically examine the origins and impact of EU policy instruments and judgments by the European Courts. After completion, students will be able to answer questions such as: Why have Member States intensified cooperating on asylum and immigration issues? What is the relationship between international human rights law and EU law? Given the influence of the EU's supranational institutions, do the Member States still effectively control policies on asylum and immigration? Has EU policy-making lead to a convergence of "lowest common denominator" policies or to higher human rights standards in the Member States?

For their assessment, students will have the opportunity to conduct a policy case-study, allowing them to apply the analytical skills developed in this course to analyse a specific EU immigration policy of their choice.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** A prospectus for the assessed research project (policy case study).

**Indicative reading:**

- Zaun N. (2019) *EU Asylum Policies: The Power of Strong Regulating States*, Palgrave;
- Chetail V. and P. De Bruycker (2016) (eds.), *Reforming the Common European Asylum System: The New European Refugee Law*, Brill;
- Peers, S (2016) *EU Justice and Home Affairs Law*, Oxford University Press;
- Geddes A and Boswell C (2010) *Migration and Mobility in the European Union*, Palgrave/Macmillan;
- Geddes A. (2008) *Immigration and European integration: Towards fortress Europe*, Manchester University Press;
- Thielemann E R (ed.) (2003) "European Burden-Sharing and Forced Migration", special issue of the *Journal of Refugee Studies*, Vol.16, No.3.

**Assessment:** Project (100%, 5000 words) in the ST.

The summative assessment takes the form of a research project (policy case study).

---

## EU467 Half Unit Not available in 2022/23

### The Political Economy of the Neoliberal State

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Abigail Innes CBG 6.03

**Availability:** This course is available on the MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course offers critical analysis of the neoliberal revolution of the last forty years: the tendency towards

the strong marketization of the state and the reformulation of the state's role in the wider political economy. The course focuses on the UK as the critical case: that which went furthest and longest with this reform process. The course begins by exploring the 'critical realist' perspective in the philosophy of science and how this highlights a shared quality between Soviet and neoliberal economics, namely their dependence on a closed-system ontology and epistemology of the political economy. As Pareto observed in the late 1890s the idealised market and the idealised social planner are formally identical. As these ideas moved from ideals to practical ideologies it turns out these affinities will come to the fore. To establish perspective the course compares the 'open-system ontologies' of the political economic orthodoxies that dominated policy-making in Europe in the post-war 'Golden Age' of growth, e.g. Keynesianism, Rehn Meidner, Ordoliberalism and Dirigisme, with the closed system ontologies of Stalinist and neoclassical economics.

As we move to explore the wider philosophical foundations of the neoliberal revolution we explore the public choice critique of the state and its adoption by parties of the New Right. Public choice theory is contrasted to the Leninist critique of 'bureaucracy' in a bourgeois state. We also consider the idealised constitution in both systems of thought: the ideal that the state will 'wither away' to produce a system of automatic economic efficiency free of conflict. On reflection we can see how strong the affinities between the materialist utopias are: they range from the shared assumptions of universal rationality (socialist or utilitarian), the impulse to erase political conflict and sociological complexity to create a blueprint that is good for all time to the asserted 'automaticity' of the political economy in the post-revolutionary world. The reforms of the last forty years are thus placed in their deeper philosophical context.

The second half of the course offers a theoretical and practical evaluation of neoliberal reforms within the UK. This evaluates the logic of reform in the state's main functions in the political economy: welfare, regulation and the management of future public risk. The course offers a consistent methodology for this analysis: it contrasts the 'first best world' neoclassical economics of the neoliberal agenda with the relatively critical, but still closed-system dependent reasoning of 'second-best world' neoclassical theory and we also apply the critical political economy of Soviet Communism for more systemic lessons. One of the historical ironies that emerges is that not only does neoliberalism share conceptual and ideological affinities with Marxism Leninism at the ontological and epistemological level, but in practical terms it also replicates a remarkable number of the pathologies of the Soviet planning system, from the central planning of private enterprises (via public sector outsourcing) to the dependence on quantification, metrics, target-setting and performance measurement and a rejection of relational, pluralist, tacit-knowledge based systems of government and organisation. The course closes by considering the political-system consequences of state transformation and indeed, policy and state failure. The findings of the course hold clear implications for emerging markets and less developed economies, where these reforms are also increasingly on the agenda, and where they pose particular risks.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. The teaching will be delivered this year through a combination of online and on-campus formats (or if required, online only). This course includes a reading week in Week 6 of Lent Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Students will be expected to produce 1 essay and 1 presentation in the LT. Students write a short (1500 word) formative essay during the term, submitted within two weeks of their class presentation, and this is purely to enable the student to receive feedback on their understanding of the subject matter but also on their essay writing technique more generally. This means that students receive due preparatory help for the later summative work, which is also essay

based.

**Assessment:** Online assessment (100%) in the ST.

Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU468 Half Unit

### The Political Economy of Migration in Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Angelo Martelli, CBG.6.04

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A basic understanding of economics and economic terms is highly recommended. Students who never had any teaching in economics should take the online Moodle Course EU409, and speak to the course convener.

**Course content:** This course on the Political Economy of Migration and Spatial Inequality is divided into three main sections. In the first part we rely on the main models used to explain the migration decision and explore what are the main economic effects of migration and its welfare state nexus. Subsequently we investigate the role played by public opinion and attitudes in the configuration of migration policies and support for redistribution. In the last part, we take up topical debates in the political economy of spatial inequality. From the rural-urban gap and the patterns of social mobility to the role of informality and insecurity. A G20 Simulation and the final two lectures on the need for a global migration response and climate-induced displacement will conclude the course. The course would deepen students' understanding of the role played by migration and spatial inequality in different phases of European integration and policy-making.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 23.5 hours across Michaelmas Term. This course includes a reading week in Week 6 of the Michaelmas Term. In addition to standard lectures and

seminars, there will be a simulation of G-20 negotiations on migration near the end of Michaelmas Term, played over 2.5 hours. The simulation will see students working in teams to represent the interests of particular nations and international organisations involved in global migration governance. A review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Students will be expected to produce 1 presentation and 1 short formative essay (1500 words).

**Indicative reading:**

**Assessment:** Essay (25%, 2000 words) in the period between MT and LT.

Online assessment (75%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU469 Half Unit

### The Political Economy of Finance in Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Angelo Martelli

**Availability:** This course is available on the MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A basic understanding of economics and economic terms is highly recommended. Students who never had any teaching in economics should consult the online course EU409 and talk to the course convener.

**Course content:** In the first half, the course gives students insights into the post-war evolution of finance, its regulation and its relationship to the other sectors of the economy. The historical evolution, continuities and innovations, will be explored in a comparative perspective. In the second half, we take up topical debates in the political economy of finance literature. Two questions run through the course: first, how does the international experience differ from or resonate with discernible trends in European countries and the experience of European integration? And how do non-financial actors (governments, transnational firms, middle-class households) support the rise of finance even though the risks involved are not well understood and hard to manage? The course would deepen students' understanding of the core courses in the Political Economy of Europe by making them aware of the role that finance played in different phases of post-

war history and in European integration.

**Teaching:**

- This course is delivered through a combination of lectures, seminars, and a simulation totalling a minimum of 26 hours across Lent Term.
- This course includes a reading week in Week 6 of Lent Term.
- We do a simulation of G-20 negotiations on financial regulation in week 10, which has been successfully tried and tested before with MPA students. Using the report of the G20 Eminent Persons Group report on Global Financial Governance – Making the Global Financial Systems Work for All – the simulation will see students working in teams to represent the interests of particular nations and international organisations involved in global financial governance.
- A review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:**

- Students will be expected to produce one (1200 word) essay in the LT.
- Students must write up a short report in preparation of the simulation game.

**Indicative reading:**

- Abdelal, Ravi (2007). *Capital rules. The construction of global finance.* Cambridge, MA and London, England: Harvard University Press
- Epstein, Rachel A. (2017). *Banking on markets: the transformation of bank-state ties in Europe and beyond* Oxford: Oxford University Press

- Woll, Cornelia (2014). *The power of inaction: bank bailouts in comparison.* Ithaca: Cornell University Press (selected case studies)

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU470

### How do we know? An introduction to research design and methods in political economy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Johann Basedow CBG 6.11 and Dr Angelo Martelli CBG 6.04

**Availability:** This course is compulsory on the MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available on the MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is not available as an outside option.

Available for other students in the European Institute with permission of the course convener. This course is not available as an outside option for other departments.

**Course content:** The course introduces students to research design and core methods in political economy. It raises awareness for ontological and epistemological challenges in political

economy and offers guidance on how to develop research questions. It further introduces students to the logic of case study research, most similar and most dissimilar research designs and offers an introduction into the logic of quantitative methods and notably regression analysis. The course takes the format of an interactive active lecture with theoretical and applied parts and group exercises. It is compulsory and unassessed for all students on MSc Political Economy of Europe and MSc Double Degree in the Political Economy of Europe (LSE & Sciences Po). The course is optional for students on the MSc Double Degree in the Global Political Economy of China and Europe (LSE & Fudan).

**Teaching:** 9 hours of lectures in the MT.

**Formative coursework:** This course is unassessed.

**Indicative reading:**

- George, Alexander, and Andrew Bennett. *Case Studies and Theory Development in the Social Sciences*. BCSIA Studies in International Security. Cambridge: MIT Press, 2005.

**Assessment:** This course is unassessed.

---

## EU475 Half Unit

### Racial Diversity and Conflict in Europe: Identities, Religion, and Culture

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Eray Cayli

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Empires, Colonialism and Globalisation, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in History of International Relations, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Social Anthropology (Religion in the Contemporary World) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The question of racialisation figures prominently in contemporary notions and experiences of diversity and conflict in Europe. What might it mean to consider racialisation as a force that bears upon the very conceptual categories employed in imagining and practising diversity and conflict rather than only as a problem addressed through them? In this course, we will explore this question in relation to a series of key concepts including religiosity/secularism, minority/majority, native/migrant, nature/culture, and sex/gender (among others), which frame debates on identarian, religious, and cultural diversity and conflict in Europe today. Through weekly readings discussed collectively in class, we will unpack how such conceptual categories significant to diversity and conflict have been shaped by histories of racialisation through

(and at the interface of) colonialism, imperialism, nationalism, and nation-state formation. We will read journal articles and/or book chapters (a minimum of two per week) by scholars operating across and between the fields of anthropology, cultural studies, geography, political science, and history, and occasionally will also draw on filmic works. Each weekly reading/viewing will be briefly introduced by a student to facilitate discussion.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** There are two pieces of formative coursework designed to help students prepare for their summative essays:

1. Research question & long (500-word) abstract; submitted in reading week
2. Revised research question & essay draft (c. 1000 words long); presented orally in the final week of term

**Indicative reading:**

- Balibar, Etienne and Immanuel Wallerstein. 1992. *Race, Nation, Class*
- Brown, Wendy. 2008. *Regulating Aversion*
- Chidester, David. 2014. *Empire of Religion*
- Hage, Ghassan. 2017. *Is Racism an Environmental Threat?*
- Hall, Stuart. 2018. *Essential Essays, Volume 2: Identity and Diaspora*
- Hurd, Elizabeth Shakman. 2017. *Beyond Religious Freedom*
- Mamdani, Mahmoud. 2020. *Neither Settler Nor Native*
- Mignolo, Walter. 2011. *The Darker Side of Western Modernity*
- Sanchez, Melissa. 2019. *Queer Faith*
- Sharma, Nandita. 2020. *Home Rule*
- Stoler, Ann Laura. 2002. *Carnal Knowledge and Imperial Power*
- Wade, Peter. 2002. *160Race, Nature and Culture*

**Assessment:** Essay (100%, 5000 words) in the ST. Students will write a 5000-word essay based on a research question they will formulate in consultation with the instructor.

---

## EU476 Half Unit

### Emotions and Memory in European Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Yaprak Gürsoy

**Availability:** This course is available on the MA in Modern History, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in History of International Relations, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Political and social actors frequently mobilize the memory of glorifying or traumatic events to make claims about the present. All socio-political groups have memories. Some of these memories make them proud while others they remember as humiliating or shameful. What are the different registers in which memory is considered to operate (e.g., personal, collective, social, cultural, top-down, bottom-up)? What is the relationship between memories and collective emotions? How do these collective emotions impact world politics? This course seeks answers to these questions and discusses the linkages between collective identities, emotions and memories by examining the memorialisation of traumatic events, such as wars, ethnic conflict and terrorist attacks in Europe and beyond.

The cases the course will consider include (but not limited to) the following:

- 1 The memorialisation of the World Wars, in particular, the First

World War in the UK and Turkey, as well as the Holocaust and the Second World War in Germany and wider Europe,  
 2 Memories and emotions surrounding ethnic tensions in Europe's regional conflicts, in particular the violent breakup of Yugoslavia and hostilities in the Eastern Mediterranean, involving Greece, Turkey and Cyprus,  
 3 Emotional responses to and memorialisation of the September 11 attacks in the USA and its European allies, and in comparison to reactions in the aftermath of the Madrid bombings in 2004.  
 Through an overview of these cases, the course will demonstrate the theoretical significance of memories and emotions in constituting collective identities and how they impact international relations and European foreign policy. The cases will also shed light on methodological questions and alternative approaches to the study of emotions and memory in politics. Students will be given the opportunity to investigate these or other cases from Europe in more depth through their formative and summative coursework.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:**

- Oral presentation in MT (15-20 minutes).
- Short essay (2000 words)

Students will receive guidance and feedback on their formative coursework in preparation for their summative submission.

**Indicative reading:** In addition to weekly readings, the following sources are likely to enhance the benefits derived from the course:

- Sara Ahmed, *Cultural Politics of Emotion*, 2004;
- Jenny Edkins, *Trauma and the Memory of Politics*, 2003;
- Paul Gilroy, *Postcolonial Melancholia*, 2006;
- Emma Hutchison, *Affective Communities in World Politics: Collective Emotions after Trauma*, 2016;
- Andrew A. G. Ross, *Mixed Emotions: Beyond Fear and Hatred in International Conflict*, 2014;
- Michael Rothberg, *Multidirectional Memory: Remembering the Holocaust in the Age of Decolonization*, 2009.

**Assessment:** Essay (100%, 5000 words) in the period between MT and LT.

Students will conduct independent research and write an essay on a topic they choose in consultation with the instructor.

## EU477 Half Unit

### Labour Markets and the Political Economy of Employment in Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Vassilis Monastiriotis CBG 5.05

**Availability:** This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations/ CIPD), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science and Political Economy and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A solid background in economics and knowledge of some basic calculus is required. Attendance of EU409 'Basic Economic Concepts for Political Economy' is highly recommended irrespective of background.

**Course content:** The course offers an analytical treatment of key labour market issues, from unemployment and wage determination to skill formation and labour market regulation,

within the context of processes of integration and governance in Europe. To do so, it combines a Labour Economics perspective on imperfect labour markets with a Political Economy perspective on EU institutions and policies. In the lectures, we address analytically policy-making questions on topics such as minimum wages, unions and collective bargaining, unemployment benefits, employment protection legislation, regulation of working hours, work-time subsidies (furlough), migration, and others. These topics are then linked in the seminars to the European policy-making context. Examples include: EMU, optimum currency area theory, wage flexibility and internal devaluation; structural unemployment, labour market reforms, the European Employment Strategy and flexicurity; skills shortages, activation policies, European education policy and labour mobility; crises (COVID), short-time work schemes and activation policies; and others.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term. A Help Session focusing on the student's summative essay will also be offered in the form of extended office hours in the second part of the Michaelmas Term.

**Formative coursework:** Students will be expected to produce 5 problem sets, 2 other pieces of coursework and 1 other piece of coursework in the MT.

Formative assessment comprises a weekly set of problem sets / exercises; brief oral presentations on pre-allocated readings in the seminars; submission of a draft / extended outline of the summative project, which students will develop with the teacher late in Michaelmas term.

**Indicative reading:**

- Boeri, Tito, and Jan Van Ours. *The economics of imperfect labor markets*. Princeton University Press, 2013.
- Ashiagbor, 160Diamond. 160The European Employment Strategy: Labour Market Regulation and New Governance, 160Oxford University Press, 2005.

- Layard, Richard, Stephen Nickell, and Richard Jackman. *Unemployment: macroeconomic performance and the labour market*. Oxford University Press, 2005.

**Assessment:** Project (100%, 5000 words) in the LT.

## EU478 Half Unit

### The Culture of European Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Simon Glendinning CBG.7.01

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political

Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Over the last three hundred years European societies have undergone a fundamental changeover from a traditional form, with a largely self-sufficient agrarian economy, into a modern, industrial and technological form based on international trade and telecommunication. This revolution developed in the seventeenth century first and only in Europe, but today, through processes of globalization that are, in some parts of the world, inseparable from colonialism, it has spread worldwide and increasingly dominates the entire planet. This course explores one of the basic dimensions of this unprecedented globalization: the culture of European politics.

We are used to speaking about globalization as a political-economic phenomenon, but its European origin makes it also an unavoidably cultural one. Europe's predominant cultural form – its double form, both Christian and secular – is not a neutral set-up, and other world cultures can find themselves alienated from and in revolt against everything that belongs to what might be called the Christianizing of the world, whether the forces in play are colonial, commercial, or ideological. International migrations and projects of European integration sharpen these concerns and add new ones. This is the background to our study of the culture of European politics, its history and heritage from ancient European empires, to the European Union and beyond.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** 2 essays of 2000 words

**Indicative reading:**

- Norman Davies, 'Introduction' to *Europe: A History*
- Anthony Pagden (ed) *The Idea of Europe*
- Roger Scruton, *The West and the Rest*.

**Assessment:** Online assessment (100%) in the ST. The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

---

## EU481 Half Unit

### The Future: Political Responses to a Challenge

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Marta Lorimer

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Global Politics, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Sociology and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The future is unknowable, but it can be made intelligible. It raises practical and conceptual problems, as well as reasons for conflict, but also promises to resolve contradictions. This course examines how the future is conceptualised in salient domains of contemporary politics, the implications arising for theory and practice, and the contestable assumptions on which perspectives rely. It investigates the methods by which the future is ordered, anticipated, and factored into the practice of government. The course begins historically, looking at the future as an emerging theme in eighteenth-century European Enlightenment thought, the socio-cultural developments that prompted this, and some of

the key features of its thematisation in the high-modern period. It goes on to examine future-oriented ideas, ideologies and practices as they arise in contemporary settings. Sessions move through the following themes: The Birth of the Future: Utopias in place and time; Sovereignty of the Living? Constitutional and political horizons; Socialism and the Future; Capitalism and the Future; In the Shadow of War; Debt, Accounting and other Practices of Quantification; Globalising and Privatising the Future: Climate change and generationalism; Planning for Emergency: Anticipation, pre-emption and preparation; In the Age of Algorithms and Tech; Democratising the Future. The course should provide students with a cross-disciplinary grasp of how present-day public affairs are shaped by the ways the future is conceived and acted upon.

**Teaching:** 20 hours of seminars in the Lent Term. This course includes a reading week in Week 6 of Lent Term.

A 2-hour review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:**

- One 1,500 word unassessed essay.
- A 10-12 minute class presentation.

**Indicative reading:**

- Nowotny, H. (2016), *The Cunning of Uncertainty* (Cambridge: Polity).
- Adam, B. & C. Groves (2007), *Future Matters: Action, Knowledge, Ethics* (Leiden: Brill).

- Koselleck, R. (2004), *Futures Past: On the Semantics of Historical Time* (NY: Columbia).
- Forrester, K. and S. Smith (eds) (2018), *Nature, Action and the Future: Political Thought and the Environment* (Cambridge: CUP).
- Thompson, D. (2010), 'Representing future generations: political presentism and democratic trusteeship', *Critical Review of International Social & Political Philosophy* 13 (1).
- Andersson, J. (2012), 'The Great Future Debate and the Struggle for the World', *American Historical Review* 117 (5).
- Urry, J. (2016), *What is the Future?* (Polity).
- White, J. (2017), 'Climate Change and the Generational Timescape', *Sociological Review* 65 (4).

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

---

## EU482 Half Unit

### Europe in World Trade

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Johann Basedow CBG 6.11

**Availability:** This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** After decades of globalisation and trade liberalisation, the world economy faces significant protectionist challenges. The Ukraine War, Covid pandemic, the spread of populism and the US-China trade war all put considerable pressure on global value chains, the international trade regime and global governance. The purpose of this course is to provide students with the necessary knowledge to understand and analyse the EU's role in the global economy and evolving international trade

regime. It familiarises students with the workings of EU trade and foreign economic policy and the World Trade Organisation. It further introduces students to different substantive trade domains including goods and services trade, trade defence instruments and sanctions, the diffusion of free trade agreements, investment regulation and investor-to-state dispute settlement as well as sources of regulatory power in world markets known as 'Bursells effect'. It also dwells on the implications of the rise of new economic powers such as China and India for EU trade and foreign economic policy and the World Trade Organisation.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Students will be expected to produce 1 presentation and 1 essay in the LT.

**Indicative reading:**

- Gsthöhl, Sieglinde, De Bièvre, The Trade Policy of the European Union. Macmillan, Basingstoke, 2018.
- Hoekman, Bernard, and Michael Kosteci. The Political Economy of the World Trading System. 3rd ed. Oxford: Oxford University Press, 2009.
- Martin, Lisa, ed. The Oxford Handbook of the Political Economy of International Trade. Oxford University Press, 2015.
- Woolcock, Stephen. European Union Economic Diplomacy: The Role of the EU in External Economic Relations. Global Finance Series. Burlington: Ashgate, 2011.

**Assessment:** Online assessment (100%) in the ST. The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU484 Half Unit

### Europe's Role in Global Migration Governance

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Natascha Zaun CBG 6.08

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course provides an overview of Europe's role in global migration governance. The course will address different aspects in this regard, including the externalisation of EU and European Member States' migration policies, bilateral and multilateral agreements with third countries, the perception and response of partner countries and regions as well as regional/international courts and Europe's cooperation with international organisations such as the International Organization for Migration (IOM) and the United Nations High Commissioner for Refugees (UNHCR). Students will be equipped with a variety of theories to analytically assess these areas of European activity, including theoretical frameworks such as venue-shopping, diffusion and securitisation.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Formative coursework consists in regular (i.e. weekly) participation in the Moodle debate, the preparation of a 10-minute presentation and the submission of one mock exam (answering two out of eight questions) in the MT.

**Indicative reading:**

**Assessment:** Online assessment (100%) in the ST. The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU485 Half Unit

### Post-Conflict Justice and Reconciliation in Europe and Beyond

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Vesna Popovski

**Availability:** This course is available on the MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender, Peace and Security, MSc in International Migration and Public Policy and MSc in International Migration and Public Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The pursuit of justice in the aftermath of mass atrocity and gross human rights violations has become a norm in a globalised post-Cold War world. It rests on the premise that states and societies ought to engage with the difficult past in order to transition from conflict to peace. Provisions including redress for human rights violations have now become the staple of peace-agreements, whether through retributive instruments such as war crimes trials or restorative instruments such as truth commissions and reparations. However, scholars and practitioners have simultaneously been confronted with the limitations of transitional justice. Instead of promoting peace and reconciliation, it has often had the opposite impact: it has further divided ethnic communities, distorted the truth about suffering, and traumatised rather than

dignified the victims. With a focus on Europe's contribution to global transitional justice norm and policy, this course examines how the pursuit of post-conflict justice is theorised and tackles the puzzle of its unintended effects on peace-building in post-conflict societies.

The course starts out by introducing transitional justice as a field study and practice, with a focus on the nature of contemporary violence to contextualise human rights violations for which justice is sought. The first part of the course relates the emergence of a global norm of transitional justice to the lessons from Europe's history, such as the legacies of the Nuremberg Trials and Germany's coming to terms with the Holocaust. The second part of the course is a comparative assessment of key mechanisms of transitional justice: international trials, truth and reconciliation commissions, and lustrations. It also engages with the role of art and social media in reckoning with past wrongs. These are illustrated with empirical examples from Europe and beyond. The third part addresses transitional justice as public policy with a focus on the European Union. In conclusion, the course addresses the question how we know and study the effects of transitional justice, and reflects critically on theorising, methods and data in transitional justice research.

The course engages with multi-disciplinary literature and approaches to transitional justice which have defined the emergence of this new field of study. The course provides a critical evaluation of theories of transitional justice and reconciliation, and draws implications for policy making.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term. The course will provide or mediate additional learning opportunities, such as research seminars on topics directly linked to the theme(s) covered in the course. These will serve to reinforce learning objectives by creating an opportunity for students to engage with core issues outside regular classes.

**Formative coursework:** Students will be expected to produce 1 presentation and 1 essay in the LT.

**Indicative reading:**

**Assessment:** Essay (100%, 5000 words) in the ST.

## EU486 Half Unit

### Imaging Violence, Imagining Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Eray Cayli CBG 7.11

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe and MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Since the late 18th century, a growing body of European cultural production has focused on raising awareness about suffering by aestheticizing it. How has this production shaped customary understandings of the relationship between violence and culture and, in so doing, imagined Europe and Europeanness? Specifically, how has it informed widespread understandings of violence and culture being mutually antithetical, and imaginations of Europe and Europeanness premised upon this antithesis? What are the critical responses with which these understandings and imaginaries have been met, and how might they be entangled in the very object of their criticism due to their approach to the relations between power, ethics, and aesthetics? This course explores these questions through contemporary artistic practice, focusing especially on its responses to colonialism, racism, imperialism, patriarchy, and Anthropocene(s). The teaching format comprises seminars, requiring everyone to show up having read the weekly texts, having reflected on them and having prepared to discuss them at length during the seminar. As and when relevant and logistically possible, seminars may involve visits to museums and galleries in London.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** The formative component of coursework comprises the following:

- a research question and long abstract in preparation for essays, submitted at the end of reading week;
- a new and improved research question and long abstract in preparation for essays, presented orally and in person the final week of term.

In addition to the above, students are required to come to class every week having read the weekly texts and prepared to discuss them at length.

**Indicative reading:**

**Assessment:** Essay (100%, 5000 words) in the LT.

**EU487 Half Unit****European Integration from a Global Governance Perspective**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mareike Kleine CBG 6.07

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students who have little or no background in political science, international relations, public policy or related disciplines are strongly advised to take the EU4V9 Moodle course.

**Course content:** Distances on a world scale are shrinking through the emergence and thickening of networks of connection – a process commonly referred to as globalization. The process is far from complete, with Europe being highly integrated and other regions lagging behind. This course engages recent positive and normative scholarship in various disciplines on governance in and beyond Europe. Putting European integration in this global and comparative perspective promises to illuminate current public and scholarly debates about nature and future of European integration. We study these questions by posing four issues: the nature of globalization; its actors, institutions and processes; the form and scope of governance; and its normative implications. For each of these themes, European integration will serve as the principal case study to be discussed in light of developments in the rest of the world. The course will give students a conceptual and thematic overview of European integration as a phenomenon of global governance. There will be no descriptive introduction to specific global governance institutions or policy fields. Instead, the course revolves around current public and academic debates about European integration and global governance that are discussed from a political science and political economy vantage point, while also engaging recent positive and normative scholarship in Comparative Politics and Political Theory.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students are required to submit a draft and a final non-assessed research paper outline in the LT.

**Indicative reading:**

- Weiss, Thomas G., and Rorden Wilkinson (eds.). 2018. *International Organization and Global Governance* (2nd edition). Oxon and New York: Routledge.
- Schneider, Christina J. 2017. The political economy of regional integration. *Annual Review of Political Science* 20: 229-248.
- Slaughter, Anne-Marie. 2004. *A New World Order*. Princeton: Princeton University Press, pp. 1-23.
- Rodrik, Dani. 2000. How Far Will International Economic Integration Go? *The Journal of Economic Perspectives* 14 (1): 177-186.
- Keohane, Robert O., Andrew Moravcsik, and Anne-Marie Slaughter. 2000. Legalized Dispute Resolution: Interstate and Transnational. *International Organization* 54 (3): 457-488.

**Assessment:** Essay (85%, 4000 words) in the ST. Critical evaluation (15%) in the LT.

The summative assessment consists of one 500-word critical summary of one session's required readings in light of a current news item. In addition, students submit by the beginning of the following term a 4,000 words research essay. Deadlines to be confirmed in class.

**EU488 Half Unit****European Policy-Making and International Cooperation**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mareike Kleine CBG 6.07

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students who have little or no background in political science, international relations, public policy or related disciplines are strongly advised to take the EU4V9 Moodle course.

**Course content:** This course is an introduction to the causes and nature of regional integration in Europe and the EU's governance system. The topic is presented from a historical, social scientific and normative perspective. We critically examine various theories and current debates about the European Union by studying the process of regional integration through different decades and crises, its effects on its members and third states, and its constitutional character. The first part of this course analyzes different stages in the integration process and asks under what conditions states have delegated (or not) authority to EU institutions and other regional integration bodies. The second part discusses a number of big public policy questions that this transfer of authority raises. What are the consequences of the single market and currency on national institutions? What is their impact on other markets and currencies? How does the EU enforce its laws and how does its legal system compare with the legalization of world politics? What is the EU's role and power in world politics? We conclude by reflecting on current and future challenges to the EU, notably questions of its legitimacy, democratic quality and the populist challenge. At the end of this course students will have gained an overview of the process of European integration, political science theories of regional integration, the EU's governance system as a political order beyond the nation-state, as well as public and scholarly debates about the reality and ideal of European regional integration.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students are required to submit a draft and a final non-assessed research paper outline in the MT. Deadline to be confirmed in class.

**Indicative reading:**

- Kleine, Mareike and Mark Pollack (2018). Liberal Intergovernmentalism and Its Critics. In *Journal of Common Market Studies* 56(7), pp. 1493-1509.

**Assessment:** Essay (85%, 4000 words) in the LT. Critical evaluation (15%) in the MT.

The summative assessment consists of one 500-word critical summary of one session's required readings in light of a current news item. In addition, students submit by the beginning of the following term a 4,000 words research essay. Deadlines to be confirmed in class.

## EU489 Half Unit Analytical Politics and Policymaking in Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Christopher Anderson CBG 6.05

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course introduces students to governance in Europe at the national and European Union levels. This course has two objectives, one substantive and one methodological. First, students learn about politics and policymaking in European democracies and the European Union. Topics include the demand for and supply of policy options: e.g., public policy preferences, government formation and duration, direct democracy and accountability, and supranational policy coordination. Second, this course is intended to introduce students to a set of analytical and empirical tools and concepts for understanding how political institutions and political agents jointly generate public policy, and to apply these tools in examining political and policy outcomes in European states. Lessons about political decision making, institutions, and the policy making process will be understood from the perspective of decision makers – that is, an individual or organisation that develops strategy in order to advance policy change.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Students will be expected to produce 1 presentation in the LT.

- De Vries, C. (2018). *Euroscepticism and the Future of European Integration*. Oxford: OUP.

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU490 Half Unit Evidence and Analysis in Policy-Making

**This information is for the 2022/23 session.**

**Teacher responsible:** Mr Andrew Hunter

**Availability:** This course is compulsory on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course aims to provide students with the knowledge and skills to collect, analyse, and communicate evidence in order to evaluate policies and interventions by international organisations, the European Union or national and local governments, as well as to explore and analyse voters' responses to such interventions. Students become familiar with research methods that will allow them to critically appraise policy interventions from the decision-making to the implementation stage as well as with the practical skills to communicate their findings professionally and effectively. The course starts by familiarising students with the principles of social science research methods and causal inference. It then covers applied policy analysis, drawing on observational and experimental approaches to evidence and discussing a policy's effectiveness. For the final project, students are expected to demonstrate conceptual understanding and practical knowledge of the methods covered in the course.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** One formative assessment (1,000 words or equivalent worksheet/ problem set) to demonstrate conceptual understanding and practical application of a method of analysis.

- Versluis, E, Van Keulen, M. and Stephenson, P. (2011). *Analyzing the European Policy Process*. London: Palgrave.

**Assessment:** Project (100%, 5000 words) in the LT.

The summative assessment requires students to engage critically with the conceptual framework introduced in the course and demonstrate a good practical knowledge of the statistical software studied.

---

## EU491 Half Unit

### Political Economy in Theory and History

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Johann Basedow CBG 6.11

**Availability:** This course is available on the MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** This course aims to provide a comprehensive coverage and analytical understanding of the evolution of the political economies of Europe within the context of the process of European integration. The course tries to understand how the relation between state and economy in both Western Europe and Central and Eastern Europe has evolved over the post-war period. We look at how capitalism and democracy were reconciled in different European socio-economic models and what role European integration played in their evolution.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:**

- Blyth M. (2013) *Austerity: the History of a Dangerous Idea*, Oxford: OUP [esp. ch's 1-3, an engaging and controversial book on a big question of our times]
- Dinan, D. (2014): *Europe Recast: A History of the European Union*, Houndmills: Palgrave Macmillan, 2nd ed. [JN30 D58 Course Coll.]. [a historical account of the beginnings that makes for a really good read]

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

---

## EU492 Half Unit

### Political Economy of Integration and Fragmentation in Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Vassilis Monastiriotis

**Availability:** This course is available on the MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** The course examines the politics and economics of policy formation in the EU, looking at two types of management issues: the management of crises (Eurozone, migration, Brexit, COVID-19) and the management of globalisation (new social risks, entrepreneurial discovery, trade relations, international investment, EU neighbourhood). It discusses key contemporary questions for the political economy of Europe, based on the concepts and empirical knowledge acquired in either EU455 or EU491; and brings students up to date with the key policy challenges facing the European (political) economy today.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Students will be expected to produce 1 essay and 1 other piece of coursework in the LT.

**Indicative reading:**

- Alesina A. and Giavazzi F. (2006) *The Future of Europe: Reform or Decline?*, Cambridge Mass.: MIT Press
- Bickerton, C. (2012) *European Integration: From Nation States to Member States*, Oxford: OUP
- Blyth M. (2013) *Austerity: the History of a Dangerous Idea*, Oxford: OUP
- De Grauwe P. (2014), *The Economics of Monetary Union*, Oxford University Press (10th edition)
- Dinan, D. (2004): *Europe Recast: A History of the European Union*, Houndmills: Palgrave Macmillan.
- Dinan D. (2010), *Ever Closer Union: an introduction to European integration*, Palgrave MacMillan (4th edition)
- Dyson K. and Featherstone K. (1999): *The Road to Maastricht, Introduction*, Oxford University Press.
- Eichengreen B. (2007), *The European Economy Since 1945: coordinated capitalism and beyond*, Princeton University Press
- Majone, G. (2014) *Rethinking the Union of Europe Post-Crisis: Has Integration gone too far?*, Cambridge: CUP

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

---

## EU495

### Applied Policy Project

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Christopher Anderson CBG 6.05

**Availability:** This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is not available as an outside option.

**Pre-requisites:** Students must have completed Evidence and Analysis in Policy-Making (EU490).

The Applied Policy Project is available to students on the MSc European and International Public Policy who wish to research a current policy issue instead of submitting a dissertation.

**Course content:** Student will work on an applied policy project related to a public policy problem in lieu of a dissertation. This policy problem can be situated at the international, European, national, or sub-national level. Thematically, it can be related to a wide range of policy fields (e.g., international trade, social policy, environmental policy, or justice and home affairs and migration). The workshops will cover theories and the practice of policy-making as well as overviews of different styles and types of policy analysis writings and dissemination. Students will have regular meetings with their supervisors. While working on the Applied Policy Project, students will be able to draw on the methodological skills they acquire in EU490 (Evidence and Analysis in Policy-Making) and on the practical writing and communication skills taught in EU450 (Europe: Professional Skills). Students will produce a set of two applied policy papers: see below for details.

**Teaching:** This course is delivered through workshops totalling a minimum of 5 hours across both the Michaelmas and Lent Terms. Some of this teaching will be delivered through a combination of in-person and/or virtual help sessions with an assigned Supervisor, as well as student presentations. This course includes a reading week in Week 6 of the Michaelmas and Lent Terms

**Formative coursework:** Students will be expected to produce 1 condensed summary of the policy brief and 1 presentation in the LT.

**Indicative reading:** Useful preliminary reading:

Charles E. Lindblom and David K. Cohen, *Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979);  
Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989);  
Ray Pawson, *Evidence-based Policy: A Realist Perspective* (London: Sage, 2006);  
Howard White, *Theory-based Impact Evaluation: Principles and Practice* (3ie, 2011);

**Assessment:** Policy brief (30%) in the ST.

Policy paper (70%) post-summer term.

The assessment consists of two parts:

1. A 3,000 word policy brief; policy advocacy for the solution to a specific policy problem in/for the real world (not a theoretical or empirical question suitable for a conventional academic dissertation)
2. A 7,000 word policy study; exploring policy options and engaging in policy analysis

## EU499

### Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** All teachers of taught courses within the European Institute.

**Availability:** This course is compulsory on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe and MSc in

Political Economy of Europe (LSE and Sciences Po). This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** Students are required to write a 10,000-word dissertation on a topic within the field of their chosen programme. Those seeking further guidance on topic selection should approach their Academic Mentor in the first instance. A Dissertation Supervisor will be assigned later in the academic year after students have submitted a preliminary topic proposal and we endeavour to team students with Supervisors with a close area of interest. Students also retain the right to discuss their project with other faculty both within the EI and beyond in the LSE (through mentoring hours). The dissertation should be an account of original research, but can rely on secondary sources.

In preparation for the dissertation, students must submit a Preliminary Dissertation Topic Proposal, a Dissertation Prospectus and a Final Dissertation Topic Proposal, along with a research ethics review checklist. Students must submit all required documents to be able to submit the Dissertation. Students must also receive approval of their Final Dissertation Topic Approval Form before they are allowed to submit.

Students must attend the relevant methodology course for their programme, which will cover topics on how to conduct research and write a dissertation. Detailed information on timing, deadlines and presentation can be found in the EU499 Moodle page. Students are required to read any additional information relevant to their particular programme. Following this support in developing a well-thought out proposal and plan of action the student compiles the dissertation as an independent project over the summer.

**Teaching:**

- Students taking MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po) are expected to attend EU470 How do we know? An Introduction to Research Design and Methods in Political Economy.
- Students taking MSc in Culture and Conflict in a Global Europe, MSc Culture and Conflict in a Global Europe (LSE and Sciences Po) are expected to attend EU410 Interdisciplinary Research Methods and Design.
- Students taking MSc in International Migration and Public Policy and MSc International Migration and Public Policy (LSE and Sciences Po) are expected to attend SO476 Researching Migration: Research Questions and Research Methods.
- Students taking MSc in European and International Public Policy, MSc in European and International Public Policy (Sciences Po) and MSc in European and International Public Policy (LSE and Bocconi) are required to take EU490 Evidence and Analysis in Policy-Making (or, with permission, MY452).

**Formative coursework:** A written essay (prospectus) of 2,000 words is required as part of the approval process.

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

## EU4A1 Half Unit Not available in 2022/23

### The Politics and Policies of 'Brexit': The UK's changing relationship with the European Union

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Kevin Featherstone CBG 5.04 and Prof Antony Travers CBG.5.28

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and

Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course examines the United Kingdom's departure from the European Union as an agenda of ongoing significance for both the UK and the EU27. With many issues under continuing review, it is an important focus for the UK and for the EU. To reflect the complexity of BREXIT, the course examines its politics and its policy implications as an episode and in the longer term.

The course begins with consideration of how BREXIT occurred: the history of a troubled relationship; the issue of EU membership in domestic party and electoral politics; and the course of the BREXIT negotiations themselves. BREXIT requires much adjustment in terms of governance and policies. The course examines these across a set of major policy agendas and discusses the implications for both the UK and for the EU27. With unresolved issues even after the UK's final departure from transitional arrangements, the discussion highlights the continuing significance of the BREXIT agenda for London and Brussels. The following is an indicative outline of topics covered.

- 'Europe' in Post-War British Politics: why the reluctant partner?
- The EU Issue in Party Politics
- The Brexit Divide in Electoral Politics
- Getting to a Deal/ No Deal: the two sides in the BREXIT negotiations
- Managing BREXIT and Beyond: the impact on Whitehall
- BREXIT and foreign and security policies
- BREXIT and migration
- BREXIT and The City
- BREXIT and the UK economy
- The US: 'BREXIT' and Europe.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. The teaching will be delivered this year through a combination of online and on-campus formats (or if required, online only). This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** An early formative essay will address a challenging interpretive question of a historical nature or of current political behaviour. Thereafter, group work/presentations will be part of the learning process for the the origination of an individual, extended policy paper (summative). The group work will have explored the issues and implications of a particular policy area; tutor support will be provided for the subsequent individual papers (design; coverage; sources; analytical frame).

**Indicative reading:**

- D. Dinan et al, eds. (2017) *The European Union in Crisis*; London: Palgrave.
- A. Geddes (2013) *Britain and the European Union*; London: Palgrave.
- B. Simms (2016) *Britain's Europe: A Thousand Years of Conflict and Cooperation*. London: Allen Lane.
- S. Wall (2008) *A Stranger in Europe: Britain and the EU from Thatcher to Blair*. Oxford: OUP.
- H. Young (1998) *This Blessed Polot: Britain and Europe from Churchill to Blair*. London: Macmillan.
- K. Armstrong (2017) *BREXIT Time: Leaving the EU -why, how and when?* Cambridge: Cambridge University Press.
- H. Clarke, M. Goodwin and P. Whiteley (2017) *BREXIT: Why Britain voted to leave the European Union*. Cambridge: Cambridge University Press.
- E. O. Eriksen and J. E. Fossum (2015) *The European Union's Non-Members: independence under hegemony?* London: Routledge.
- S. Hobolt (2016) 'The BREXIT vote: a divided nation, a divided continent', *Journal of European Public Policy*, 23, 9. And 'Debate Section': 'British exit from the EU - legal and political implications', in the same issue.
- L. Halligan and G. Lyons (2017), *Clean BREXIT: Why leaving the EU still makes sense*; London: Biteback Publishing.
- The LSE project: 'Generation BREXIT'.

**Assessment:** Project (100%, 5000 words) in the LT. The summative assessment for this course is a Policy Project

which requires students to prepare an extended analysis of a specific policy issue that has arisen from the 'BREXIT' process.

## EU4A2 Half Unit

### Globalisation, Conflict and Post-Conflict Reconstruction

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Vesna Popovski

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender, Peace and Security, MSc in Global Politics, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Development and Humanitarian Emergencies, MSc in International Migration and Public Policy and MSc in International Migration and Public Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE and SciencesPo), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and SciencesPo), MSc in European and International Public Policy & Politics (LSE and Bocconi) and MSc in Conflict Studies. This course has limited availability (is capped), and requires that students (regardless of Department or MSc programme) apply for access via the Graduate Course Choice process.

**Course content:** The course offers a theoretically informed account of the challenges faced by countries transitioning from conflict to peace in the era of globalisation, and examines them empirically in reference to examples from the Balkans, the Caucasus and the Middle East. The regions chosen are those which have experienced particular difficulties with a peaceful transition to democracy, market economy and integration in a multilateral system. The course will start with an introduction to theories of globalisation, a comparative analysis of the legacy of totalitarianism and authoritarianism and an overview of conflict analysis. The course is structured around three issue areas: political ideologies and state breakdown; transition economy and organised crime; post-totalitarian society. It looks at nationalism linked to global diasporas and fundamentalist networks, contemporary conflicts in the context of international intervention and externally-led state-building. The discussion of transition economy includes an introduction to transition strategies (privatisation, liberalisation and macro-economic stabilisation) and to perverse effects of illegal economic networks and organised crime stemming from the totalitarian past, the legacy of war economies and the impact of globalisation. The last block of questions investigates post-conflict reconstruction from the perspective of transitional justice, (un)civil societies and new minorities. While analysing these issues accompanied with relevant regional illustrations particular attention is made to grasp unique aspects of simultaneous transitions from war to peace and from totalitarianism to democracy in the context of globalisation. The course concludes by examining the European Union state-building policies in relation to critical approaches to post-conflict reconstruction.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** All students are expected to produce one written essay and one short presentation on topics assigned to them.

**Indicative reading:**

- Mary Kaldor, *New and Old Wars: Organised Violence in a Global Era*, Polity, 1999;
- Vesna Bojicic-Dzelilovic, James Ker-Lindsay and Denisa Kostovicova (eds) *Civil Society and Transitions in the Western Balkans*, Palgrave Macmillan, 2013;

- Susan L. Woodward, *The Ideology of Failed States: Why Intervention Fails*, Cambridge University Press, 2017;
- Sarah Chayes, *Thieves of States: Why Corruption Threatens Global Security*, W.W. Norton & Company, 2015.

**Assessment:** Essay (100%, 5000 words) in the LT.

## EU4A3 Half Unit

### The Americas and Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Cristobal Garibay-Petersen (CBG 7.06) and Prof Simon Glendinning (CBG 7.01)

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Culture and Society, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in History of International Relations, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course examines the role played by the idea of the Americas in the European imaginary and examines 'Europe', in turn, from the American context. By looking into processes of colonisation, modernisation, globalisation, and decolonisation, the course investigates the assumptions upon which different conceptions of the Americas have been construed, and seeks to understand the political, socio-cultural, and philosophical implications of those conceptions both for Europe and for the Americas. The course adopts a hybrid approach by making use of both European and American perspectives, and critically engages dichotomies such as settler/settled, coloniser/colonised, domination/subjugation, and self/other, to better understand the Americas and Europe.

The course follows a chronological order by looking, first, at the way in which early European explorers incorporated the so-called New World into their predominantly Christian worldview. It then maps the subsequent transformations of what the Americas signified through the European Enlightenment, through the 19th and 20th centuries of modern industrial states, and into the time of geopolitics, all the while remaining attentive to the changing role of the American conception of Europe. In doing so, the course shows the significance of different ideas of the Americas for what Europe understands as its own history, i.e. world-history: from an idea generated by complex mechanisms of othering that placed

the Americas outside of European time and history to an idea that construes the Americas, with Europe at its side in notions such as 'the West', as the epicentre of hypermodern capitalism. The course borrows concepts and methodologies from a range of disciplines, including philosophy, cultural studies, history, geography, decolonial/postcolonial studies, politics, and anthropology. This course is not primarily concerned with any one specific nation (e.g. United States of America). Instead, it understands the Americas in a broad sense.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. The teaching will be delivered this year through a combination of online and on-campus formats (or if required, online only). This course includes a reading week in Week 6 of Michaelmas Term, and a review session will be held at the start of the Summer Term to prepare for the online assessment.

**Formative coursework:** Students will be expected to produce 1 essay and 1 critical literature review in the MT.

Questions for the formative assessments will be provided by the course convenor.

Chosen literature for the critical review should be cleared with the course convenor.

**Indicative reading:**

**Assessment:** Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

## EU4A4 Half Unit

### The Politics of Inequality and Redistribution

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Jonathan Hopkin

**Availability:** This course is available on the MSc in Comparative Politics, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences

Po), MSc in Global Politics, MSc in Inequalities and Social Science, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course provides an overview of the politics of inequality in the rich democracies. The objective is to explain why the distribution of wealth, income and opportunities differs so much between democratic countries with similar levels of economic development, particularly in Europe. The course draws largely on political science, although perspectives from other disciplines - such as economics and social policy - are brought in as appropriate. The focus is on understanding how institutions and policies redistribute resources in different ways across countries and over time. The course explains why welfare states emerged in the twentieth century and how welfare policies differ in different countries, the impact of labour market institutions, the redistributive implications of age, gender and ethnic differences, the role of competing economic and political ideologies, and the way inequality has been affected by structural changes to the global economy. The aim is to understand the striking differences in social cohesion and human development amongst the world's rich democracies.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** All students are expected to submit one non-assessed essay.

**Indicative reading:**

- Esping-Andersen, Gosta (1990), *The Three Worlds of Welfare Capitalism*. Cambridge: Polity Press
- Piketty, Thomas (2014), *Capital in the Twenty-First Century*. Cambridge: Belknap
- Savage, Mike (2021). *The Return of Inequality*. Cambridge: Harvard.

**Assessment:** Essay (100%, 5000 words) in the LT.

## EU4A5 Half Unit

### People and Politics in Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Christopher Anderson CBG 6.05

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** In this course, we will discuss how people engage with politics – what and how do Europeans think about politics (political attitudes and public opinion) and how and why do they participate in the political process (political behavior)? In addition, we will explore how a person's political opinions influence their political behavior. That is, we will explore how and why people participate in democratic politics, and how conventional and unconventional citizen participation influences the political process. We will concentrate primarily on the politics of Europe and will pay attention to older and newer democracies as well as the European Union.

**Teaching:** This course is delivered through a combination of

lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be expected to produce 1 presentation, 1 other piece of coursework and 1 other piece of coursework in the MT.

The formative coursework will take the form of a research design outline (500 words), a brief oral presentation, and a reaction paper (500 words).

**Indicative reading:**

**Assessment:** Essay (100%, 5000 words) in the period between MT and LT.

## EU4A6 Half Unit

### Reconciliation and Crisis: Politics in Southern Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Yaprak Gursoy CBG 7.04

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available with permission as an outside option to students on other programmes where regulations permit. The course will be capped and admission is not guaranteed.

**Course content:** When compared with their Northern counterparts, countries that lie on the Southern flank of Europe share different historical, political and socioeconomic trajectories. The interwar period that witnessed civil wars, authoritarianism and coups d'état transitioned into a more stable period through democratisation and EU membership in the 1970s-1990s. During this period, Portugal, Spain, Italy, Greece and Turkey (to varying extents) reconciled their long-lasting clashes between left and right politics, resettled debates over unitary versus federal structures and accommodated religious identities within politics. This phase of political resolution occurred decades later than other European countries that were also a part of the Western alliance during the Cold War. Yet, the domestic arrangements that brought about relative stability to domestic politics in Southern Europe faced a series of new crises in the past 15 years. The financial crisis of

2008 separated Southern European members from other EU countries, once again. As party systems changed and populist parties asserted new demands, local differences and calls for regional independence heightened. The arrival of refugees through the Mediterranean and land borders, as well as growing Euroscepticism, compounded these problems while the pandemic has added extra pressure to these crisis-ridden systems.

Taking into consideration the past and the present, this course investigates whether and to what extent Southern European countries are moving toward a new settlement. What lessons can be drawn from the period of reconciliation in the 1970s-90s? In what ways are the continuing problems the legacies of past conflicts? This course will seek answers to these questions by examining five Southern European countries through a comparative lens. While considering the unique dynamics of each country, common elements in their historical trajectories will be brought out by specifically examining the following issues: 1. the collapse of military regimes, and the process of democratisation and Europeanisation 2. economic crises and their political impact 3. rise of populist parties and party system change 4. regional governance, separatism and independence movements.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the LT. This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students will be expected to produce 1 presentation and 1 essay in the LT. Students will lead the class discussion by presenting a topic and discussing the presentations of their classmates. In this way students will take active part in two weeks during the term and will work in pairs and teams. Additionally, students will write a short essay of 2000 words, answering one of the discussion questions listed in the course syllabus on one Southern European country. Both types of formative assessment will give the students an opportunity to explore at length topics that were discussed in class, citing the relevant literature and engaging in discussions in oral and written form.

Students will receive guidance and feedback on their formative coursework in preparation for their summative submission.

**Indicative reading:**

- Yaprak Gürsoy, *Between Military Rule and Democracy: Regime Consolidation in Greece, Turkey and Beyond*, 2017
- Leonardo Morlino and Francesco Raniolo, *The Impact of the Economic Crisis on Southern European Democracies*, 2017
- Donatella della Porta, Massimiliano Andretta, Tiago Fernandes, Eduardo Romanos, and Markos Vogiatzoglou, *Legacies and Memories in Movements: Justice and Democracy in Southern Europe*, 2018
- Robert M. Fishman, *Democratic Practice: Origins of the Iberian Divide in Political Inclusion*, 2019
- Anna Bosco and Susannah Verney (eds.), *The Politics of Polarisation in Southern Europe*, 2020
- Daniele Albertazzi and Davide Vampa, *Populism in Europe: Lessons from Umberto Bossi's Northern League*, 2021
- Caroline Gray, *Territorial Politics and the Party System in Spain: Continuity and Change Since the Financial Crisis*, 2021

**Assessment:** Essay (100%, 5000 words) in the period between LT and ST.

Students will conduct independent research through a comparative analysis of two countries in Southern Europe and write an essay on a topic relevant to the politics of these countries. Students will choose their topics in consultation with the instructor.

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available with permission as an outside option to students on other programmes where regulations permit. The course will be capped and admission is not guaranteed.

**Course content:** This course will explore mobility and borders as sites of contestation and focus on perspectives rising from the (everyday) practices of migration in Europe and beyond. Migration is part of human condition, however, in the contemporary media and political debates it is often approached through a framework of crises or a problem to be solved. Unlike this static approach to societies, this course takes distance from the normative lens of the nation-state and its control apparatus to the movement of people. It will introduce critiques of methodological nationalism, address issues of decolonisation and postcolonial condition in migration studies and examine mobility and rights as differentially accessed resources defined by global hierarchies.

The course is divided into two parts. The first part provides a historical and conceptual overview of the questions related to border regimes, modern state formation, and rights. We will examine the historical development of border regimes in Europe and in the USA, their relation to colonial legacies and control of labour force, and how these formations inform contemporary understandings of the movement of people. Then we move to explore the core concepts, such as race, ethnicity, and nation, examine critically the categories of migration, and acquire an understanding of the international legal agreements concerning the movement of people. After orientating in concepts and providing a framework for discussion, we will move to more empirical accounts of the contemporary movement of people discussing themes such as lived experiences of border crossings, citizenship and illegality, diasporic and borderland identities, boundaries of belonging across race, class, gender, sexuality and indigeneity, detention and deportations, and experiences of labour migration. Along the way, we will also discuss the ethical and political implications of researching (im)mobilities.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the MT.

**Formative coursework:** Students will be expected to produce one essay of 1500 words in Week 8 of MT.

**Assessment:** Essay (50%, 1500 words) and essay (50%, 1500 words) in the LT.

## EU4C9

### Policy Incubator

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Angelo Martelli, CBG.6.04

**Availability:** This course is compulsory on the MSc in Political Economy of Europe (LSE and Fudan). This course is not available as an outside option.

**Course content:** Students will undertake a group project (in teams usually of 3 to 5 people) relating to a policy problem faced by an external organisation. Such organisations might be public sector bodies, companies operating in the public management or public policy sector, international organisations, think tanks and NGOs.

**Teaching:** This course is delivered through a combination of workshops and help sessions totalling a minimum of 5 hours across both the Michaelmas and Lent Terms. Some or all of this teaching will be delivered through a combination of in-person and/or group virtual help sessions with an assigned Policy Incubator Supervisor, and student group presentations. This course includes a reading week in Week 6 of the Michaelmas and Lent Terms.

**Formative coursework:** During the LT, students will present their project and policy proposals in a group presentation to a jury of policy incubator supervisors and institutions' representatives. Relevant alumni, members of faculty and/or visiting fellows will also be invited to attend for the purposes of providing feedback. Each group presentation will last 20 minutes with 20 minutes for questions and comments from the jury.

**Indicative reading:** Useful preliminary reading:

- Charles E. Lindblom and David K. Cohen, *Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979);
- Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989);

- chapter three in M. S. Poole and A. H. Van de Ven (eds) *Handbook of Organizational Change and Innovation* (Oxford University Press, 2004).

**Assessment:** Policy brief (30%) in the LT.

Policy paper (70%) post-summer term.

Students are asked to present a group report in the form of a policy advocacy brief (3000 words, 30%). They will then, individually, submit a full policy report in which they discuss alternative policy options and evaluate their suggested policy solutions (7000 words, 70%).

## EU4V9

### Concepts in Political Science and Public Policy

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Christopher Anderson CBG 6.05

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global

Europe (LSE & Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

Students from any MSc programme within the European Institute can follow the course. This course is for students with little background in European Politics and Policy-making.

**Course content:** This course, run online via Moodle, offers an informal introduction to basic concept of political science, public policy and adjacent fields by providing links to a number of resources such as introductory readings, background texts, news websites, academic journals, and external media sources such as podcasts. Students will also find material that will allow them to familiarize themselves with research design and the basic methodologies in political science and public policy. The main aim of this course is twofold: First, to provide some basic conceptual knowledge for European Institute students who have little or no background in political science, international relations, public policy or related disciplines. Second, to provide a resource to which students can return throughout their year at LSE, should they want to revise some concepts or look for data sources, for example when working on their dissertation or the applied policy project. Additional resources will be added to the Moodle page throughout the academic year. Students may also enrol on course sister Moodle course EU409 (Basic Concepts for Political Economy) if they are interested in learning more about specific concepts in economics.

**Teaching:** This is a Moodle-based course with no formal teaching. Students can arrange one-to-one sessions with the Course Convenor during Feedback Sessions/Office Hours. Depending on student demand, a limited number of 'EU4V9 Surgeries' may be arranged with the Course Convenor.

**Indicative reading:**

**Assessment:** There is no assessment for this course.

## FM402 Half Unit

### Financial Risk Analysis

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Kathy Yuan

**Availability:** This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Risk and Finance, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

Please note, Global MSc in Management (Accounting and Finance concentration only)

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit.

**Pre-requisites:** The course assumes a basic knowledge of finance theory, statistics and mathematics (calculus, linear algebra).

**Course content:** This course aims to provide an overview of the main theoretical concepts underlying the analysis of financial risk and to show how these concepts can be implemented in practice in a variety of contexts. This course shares some topics with FM442 Quantitative Methods in Finance and Risk Analysis. The course will include a selection of:

- 1 Conceptual foundations: diversification, hedging and their limits
- 2 Fixed income securities
- 3 Options and dynamic replication
- 4 Value at Risk
- 5 Endogenous risk
- 6 Ideas from Behavioural Finance
- 7 Credit risk (ratings based models, structural models, reduced form models)
- 8 Credit derivatives

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT.

**Formative coursework:** Students will be expected to produce 8 problem sets in the MT.

**Indicative reading:** Course readings will vary from year to year depending upon the topics covered. Useful references are M Crouhy, D Galai and R Mark, *Risk Management*, McGraw-Hill, 2001; P Jorion, *Value at Risk*, McGraw-Hill, 2007; J Hull, *Risk Management and Financial Institutions*, Prentice-Hall, 2015; J Hull, *Options, Futures and Other Derivatives*, Prentice-Hall, 2014 and D Duffie and K Singleton, *Credit Risk*, Princeton University Press, 2003.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

## FM403

### Management and Regulation of Risk

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jon Danielsson and Professor Kathy Yuan

**Availability:** This course is compulsory on the MSc in Risk and Finance. This course is not available as an outside option.

**Course content:** This course is designed to expose students to the breadth of risk management thinking and approaches across different areas. The course is in two sections – Part 1 is taught by Dr Danielsson and Part 2 by Professor Yuan. These sections run concurrently and cover the following topics:

Dr Danielsson's part of the course covers important quantitative and statistical tools in applied finance. It studies financial market risk, with a particular focus on models for measuring, assessing, and managing financial risk. Students will be introduced to the application of these tools and the key properties of financial data through a set of computer-based homework assignments and classes.

The course aims to introduce quantitative concepts and techniques in many areas of finance. Sample topics include risk measures (e.g., Value-at-Risk and Expected Shortfall, including implementation and backtesting), univariate and multivariate volatility models, Monte Carlo Simulations, and associated topics in Econometrics. This list is meant to be representative, but topics may be added or removed. Recent stress events, such as the global crisis in 2008, Covid-19 in 2020 and Russia's invasion of Ukraine are used to illustrate the various methodologies presented in the course.

Implementing the models and tools in R is an essential part of the course. The weekly homework assignments are designed to guide

the students to all stages of the analytical process, from locating, downloading, and processing financial data to the implementation of the tools and interpretation of results. Students will have the opportunity to explore the databases available at the LSE and to become comfortable working with real data.

In Professor Yuan's part of the course, lectures are on the nature and the fragility of financial intermediation. It serves as a framework to understand the sources of risks in running of a financial institution. It covers the purpose of the risk management, institutional details of financial institutions and their special functions, models of financial institutions: H-T model of leverage and D-D model of liquidity transformation, models of liquidity and (inside/private) money creation by financial intermediations. In this part of the course, we cover also regulations of financial institutions.

**Teaching:** 60 hours of seminars in the MT.

**Formative coursework:** Students will be given weekly problem set assignments.

**Indicative reading:** For Dr Danielsson's section, no single text covers the course material. The relevant sections of the following readings would be appropriate for individual topics: Jon Danielsson (2011), *Financial Risk Forecasting*, as well as slides from [www.financialriskforecasting.com/slides/](http://www.financialriskforecasting.com/slides/).

J. Hull, *Risk Management and Financial Institutions*. 2nd Edition.; S Dawson, *Analysing Organisations* (Macmillan, 1996); S French, *Readings in Decision Analysis* (Chapman and Hall, 1989); C Hood & D K Jones, *Accident and Design* (UCL Press, 1996); Jorion *Value At Risk to 3rd Edition 2007* (McGraw Hill); M.Power. *Organized Uncertainty: Designing a World of Risk Management* (Oxford University Press, 2007); M.Fenton-O'Creevy, N.Nicholson, E.Soane and P. Willman, *Traders: Risks, Decisions, and Management in Financial Markets* (Oxford University Press, 2005); B A Turner & N F Pidgeon, *Man-made Disasters* (Butterworth-Heinemann, 1997). *The Economics of Climate Change: The Stern Review* (Cambridge University Press, 2007).

Lecture Notes

**Assessment:** Continuous assessment (100%).

One homework, group presentation, thesis and exam.

A substantial (10,000 word) thesis, due in August, is an integral part of the course and represents 50% of the assessment.

---

## FM404 Half Unit

### Advanced Financial Economics

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Péter Kondor

**Availability:** This course is available on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** Students must have completed Financial Economics (FM436).

**Course content:** Advanced Financial Economics provides an introduction to the academic side of Finance. The course touches upon various topics of active research ranging from frictions in asset markets derived from asymmetric information, illiquidity, decentralized trading or speculative bubbles to the interaction of corporate finance and the macroeconomy. The course is targeted to students who are interested in how abstract models can be used to understand better the causes and consequences of existing and potential problems in financial markets. Additional information can be found on Moodle (for current students).

**Teaching:** 30 hours of seminars in the LT.

There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Formative coursework:** Regular problem sets.

**Indicative reading:** Lecture notes will be provided, and journal articles will be required to be read.

**Assessment:** Continuous assessment (100%).

## FM405 Half Unit Fixed Income Securities and Credit Markets

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Peter Kondor

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** Students must have completed either Asset Markets (FM423) and Corporate Finance (FM422) or Financial Economics (FM436)

**Course content:**

- Interest rate modelling and derivatives
- Credit risk
- Credit derivatives and risk management

This course provides a thorough grounding in recent developments in fixed income securities pricing, hedging and portfolio management.

By the end of the course, the students will be familiar with the fixed income state of the art business practice and a variety of topics including (i) an analysis of the main products traded in the credit markets, such as government and corporate bonds, bond options, swaps, caps, floors, swaptions, callable, puttable and convertible bonds, and an analysis of the main credit derivatives such as total-return swaps, spread options and credit default swaps; (ii) the specific tools used in the industry practice to evaluate and hedge these products, which range from no-arbitrage trees and the calibration of yield curve derivatives to the main tools used to monitor and manage credit risk; (iii) the process of securitization, with particular reference to collateralized default obligations and mortgage-based securities.

**Teaching:** 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Indicative reading:** The primary source for this course is a comprehensive set of Lecture Notes, tutorials and case studies and the main reference is Pietro Veronesi: *Fixed Income Securities*, (Wiley 2010).

**Assessment:** Continuous assessment (100%).

## FM406 Half Unit Topics in Portfolio Management

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Michela Verardo

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** Students must have completed either Asset Markets (FM423) and Corporate Finance (FM422) or Financial Economics (FM436)

**Course content:**

- Portfolio optimization and the Black-Litterman model
- Dynamic Investment Strategies
- Selecting and Monitoring Portfolio Managers: Mutual funds and hedge funds
- Transactions Costs and Liquidity Risk

The course covers a wide range of topics in portfolio management, with a strong focus on empirical applications. The first part of the course reviews the basics of portfolio theory and develops the Black-Litterman approach to portfolio optimization. The second

part of the course introduces students to the implementation of several dynamic investment strategies and to the estimation of their performance; portfolio strategies include size, value, momentum, betting-against-beta, and quality-minus-junk. The third part of the course focuses on selecting and monitoring portfolio managers, with particular emphasis on the identification of selectivity, allocation, and timing skills for mutual funds and hedge funds. The last part of the course examines trading costs and liquidity risk, as well as their impact on the profitability of investment strategies. The course is based on recent empirical studies and applied exercises using financial data.

**Teaching:** 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Formative coursework:** Regular coursework will be completed, handed in and marked as part of formative assessment for this course.

**Indicative reading:** A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are: *Investments*, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin; *Modern portfolio theory and investment analysis*, by E. J. Elton, M. J. Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; *Modern investment management*, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press.

**Assessment:** Continuous assessment (100%) in the LT.

## FM407 Half Unit Mergers, Buyouts and Corporate Restructurings

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Vicente Cuñat

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).

**Course content:**

- Financial Analysis of Firms and Corporate Transactions
- Mergers, Acquisitions and Leveraged Buyouts
- Distress, Bankruptcy and Corporate Restructuring

This course covers advanced topics in Corporate Finance. It focuses on the strategy, valuation and execution of corporate deals. In particular, the first part of the course covers mergers, divestitures, partial-divestitures (e.g. equity carve outs) and leveraged buyouts. The second part of the course provides a framework of analysis for the resolution of financial distress and bankruptcy. Each of the topics introduced in this course covers both institutional details and results of relevant academic research. It is furthermore supported by case studies.

**Teaching:** 30 hours of seminars in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Formative coursework:** Regular coursework will be completed, handed in and marked as part of formative assessment for this course.

**Indicative reading:** A course pack will be distributed that includes case studies as well as additional readings such as textbook chapters, and practitioner articles.

**Assessment:** Continuous assessment (100%) in the LT.

## FM408 Half Unit Not available in 2022/23 Financial Engineering

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jean-Pierre Zigrand

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** Students must have completed either Asset Markets (FM423 or FM423E) and Corporate Finance (FM422 or FM422E) or Financial Economics (FM436)

Students will be expected to show some familiarity with calculus (including stochastic calculus) and statistics

**Course content:** This course provides a thorough grounding in the theory and practice of financial engineering. The emphasis is on the application of derivatives pricing and hedging methodology to equity and volatility derivatives and to structured products.

The course aims to cover the basics in derivatives theory, and to apply them to a multitude of financial securities and structured products, with a special emphasis on recent products in the equity and volatility derivative worlds. We review selected case studies in order to gain a better understanding of their practical usage. We also implement the models numerically in R and VBA.

**Teaching:** 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Indicative reading:** Based on a set of extensive lecture notes. No one book covers the material of the entire course. Books recommended include *The Volatility Surface: A Practitioner's Guide*, 2nd Edition, by Jim Gatheral, and *The Volatility Smile* by Derman, Miller and Park. Background reading can be found in *Volatility: Practical Options Theory* by Adam Iqbal, *Derivatives Markets* by Robert McDonald or *Options, Futures and Other Derivatives* by John Hull.

**Assessment:** Continuous assessment (100%) in the LT.

## FM409 Half Unit Not available in 2022/23 Risk Management in Financial Markets

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christian Julliard

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** Students must have completed either Asset Markets (FM423) and Corporate Finance (FM422) or Financial Economics (FM436)

**Course content:**

- Hedging in equity and fixed income markets
- Market Risk, Value at Risk and Expected Shortfall
- Endogenous Risk and Limits to Arbitrage
- Credit risk and structured products

The aim of this course is to offer an introduction to the analysis and management of risk within financial markets. The course develops a conceptual framework for thinking about financial risk and shows how these concepts are implemented in practice in a variety of contexts. First, the course offers an overview of risk management in the context of portfolios of fixed income securities and derivatives. Next, we discuss the implementation and the merits of Value at Risk measures. We will spend some time on

endogenous risk and limits to arbitrage. In the context of credit risk we will cover ratings based and structural models, as well as credit risk on portfolios and credit derivatives. A final topic covers regulation and the recent credit crisis. Throughout, the course spends a significant amount of time on practical applications of the theories that are introduced. Some limitations of current approaches are also discussed.

**Teaching:** 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Formative coursework:** Problem sets. In addition, students will have the opportunity to present the results of a case study to the class.

**Indicative reading:** Course readings will vary from year to year depending upon the topics covered. The main reference is: John C. Hull, *Risk Management and Financial Institutions*, Wiley, 2015, 4th edition.

Additional useful references are: Michel Crouhy, Dan Galai and Robert Mark, *Risk Management*, McGraw-Hill, 2001. Philippe Jorion, *Value at Risk*, McGraw-Hill, 2007, 3rd edition. Jon Danielsson, *Financial Risk Forecasting*, Wiley, 2011. John C. Hull, *Options, Futures and Other Derivatives*, Pearson, 2012, 8th edition. Darrell Duffie and Ken Singleton, *Credit Risk*, Princeton University Press, 2003.

**Assessment:** Continuous assessment (100%) in the LT.

## FM410 Half Unit Private Equity

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Ulf Axelson

**Availability:** This course is compulsory on the MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

**Course content:**

- Evaluating and executing Private Equity Deals
- Business Plans, Venture Capital, and Entrepreneurial Finance
- Private Equity as an asset class and the private equity landscape

This course provides a thorough grounding in the theory and recent developments in the field of private equity.

Starting by examining how private equity funds are raised and structured the course will examine how private equity can be used in start-ups, in scaling-up cash flow businesses, and in restructuring firms facing financial distress. The course explores the link between private and venture capital on the one hand and public securities markets on the other. The course will examine the process through which private equity investors exit their investments. The course will also give a detailed analysis of the types of finance used in private equity and an evaluation of the short and long-run performance of private equity investments. The course will include an evaluation of the performance of different types of private equity investment and a comparison with other forms of ownership will be undertaken.

This course takes a rigorous theoretical examination of private equity. It also employs some case study teaching and is taught in conjunction with a range of practitioners in the field.

**Teaching:** 30 hours of lectures and 30 hours of seminars in the LT. This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Formative coursework:** Each week there will typically be a formative case study assignments (similar to summative cases). Students will also be given formative feedback on their class participation.

**Indicative reading:** Ulf Axelson, Tim Jenkinson, Per Strömberg, and Michael S. Weisbach. *Leverage and Pricing in Buyouts: An Empirical Analysis*. August 28, 2007; Steven N. Kaplan and Per

Strömberg. Leveraged Buyouts and Private Equity, Social Science Research Network, June 2008; Cendrowski, Harry. Private Equity: Governance and Operations Assessment. **Assessment:** Continuous assessment (100%) in the LT.

## FM411

### Finance Work Placement and Assessment

**This information is for the 2022/23 session.**

**Teacher responsible:** MSc Academic Programme Director

**Availability:** This course is compulsory on the MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics (Work Placement Pathway) and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course must be taken in addition to the full 4 units of courses prescribed by the programme regulations. Completion of the work placement and assessment is a requirement for students to be eligible for graduation from the Work Placement Pathway.

**Pre-requisites:** The Finance Work Placement and Assessment is only available to students who are registered on the Work Placement Pathway for the following programmes: MSc in Finance (full-time), MSc in Finance and Private Equity or MSc in Finance and Economics. Students must complete the work placement and assessment in addition to four full units of courses, as described in the programme regulations.

**Course content:** There are no classes for this course. Students instead undertake a work placement during which they will be employed by an external company or institution. However, the work placement should be relevant to the topics studied during the student's academic modules, and be likely to build on and enhance topics studied during the year. Academic modules studied during the programme should also have a direct bearing on the role that a student will undertake on their placement. Students must hold a formal offer in writing of an appropriate work placement before approval will be granted to join the work placement pathway, and the aspects outlined above will be considered by the Department before approval to undertake a placement is granted. The student will be an employee of the relevant company or institution for the duration of the placement; they will be expected to undertake tasks as appropriate and all management of the placement will be undertaken by the employing institution or company. The course will be assessed by an essay which students are required to submit to the Department of Finance at the end of the placement.

**Teaching:** There will be no direct teaching for this course. Students will participate on a work placement which will be entirely delivered and managed by the company or institution with which they are employed. Students' learning and experience will be gained through participation in the placement as an employee of that company and they will be required to submit an assessed essay to the Department of Finance upon completion of the placement.

**Formative coursework:** There is no formative coursework for this course. Students will participate on a work placement which will be entirely delivered and managed by the company or institution with which they are employed. Students' learning and experience will be gained through participation in the placement as an employee of that company and they will be required to submit an assessed essay to the Department of Finance upon completion of the placement.

**Assessment:** Essay (100%, 2000 words) post-summer term. The assessment of the work placement will be on the basis of submission of a written piece of work following completion of the work placement. Students will be required to submit their work to the Department following completion of the placement. The essay will be required to be in the region of 2,000 words in which the student should describe:

- How the work placement built on or shed further light on the topics covered during the programme's academic modules, and/or how the elements of theory learned were applied in practice;
  - How topics covered in the academic modules were relevant to the student's role on the work placement;
  - How/whether the academic and pastoral aspects of the programme prepared students for their experiences in the workplace;
  - What the student feels they have learned from the placement.
- The essay submission will be marked on a Pass/Fail basis. Students will need to demonstrate that they have fully addressed the topics described above, evidenced with examples from their placement, to be eligible for a pass mark. Students enrolled on the work placement pathway must satisfactorily complete the work placement and assessment in order to be eligible for graduation from the work placement pathway.

## FM412 Half Unit

### Quantitative Security Analysis

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jean-Pierre Zigrand

**Availability:** This course is available on the Global MSc in Management, MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway) and MSc in Risk and Finance. This course is not available as an outside option. Global MSc in Management (Accounting and Finance concentration only).

This course is not available as an outside option

**Pre-requisites:** Some familiarity with finance and accounting.

**Course content:** This applied course uses theoretically well-founded quantitative analysis tools to uncover value in equity, debt, property, credit and volatility markets.

A simple fundamental valuation concept guides the student along a consistent, unified and logical thread in search of finding value in all of those markets.

Determining whether an asset class is of good or poor value also relies on an awareness of the macroeconomic and macrofinancial environment. Macroassets, such as fixed income and global equities markets, reflect this macro environment and are in turn required inputs into the valuation of both macro- and microassets. In this manner, we get by design a view that is coherent across markets.

For instance, the state of the macroeconomy (such as the phase of expansion and recession, the real estate cycle, the inflationary environment, the central bank rate setting policy, or the level of financial stability and risk) is shown to be mirrored in the nominal and real yield curves as well as in the macro risk-premia of the debt and equities markets that in turn trickle down to influence the value considerations of all of the micro-assets, including individual equities or credit.

Armed with these tools, we can then study how, in real life, style investors such as value, growth, quality or momentum approach the question of finding value from their own vantage points in the given macro environment. We cover colourful case studies, some of which possibly live, that include the detailed modelling of real-life corporate events via Excel spreadsheets based on the careful study of financial statements, balance sheets and analyst reports. Does management create or destroy value? Does growth create value, and how does one value growth? Is there a case for an activist restructuring of P&G? Is Amazon overpriced compared to other bricks and mortar retailers? Should Amazon be priced as a cloud provider? Is property overvalued? How would a value investor approach Intel, and would they buy Intel? Is value dead? How can value be complemented by quality? Is volatility overpriced?

Part I. Introduction. The challenge of active investing. The importance of NPV.

Part II. Valuation methodology.  
 Part III. Valuing macroassets: Global Yield Curves.  
 Part IV. Valuing macroassets: Diversified Equity Portfolios.  
 Part V. Methodology: RADR, DDM.  
 Part VI. Valuing macroassets: Property.  
 Part VII. Valuing microassets: Equities Valuation.  
 Part VIII. Valuing microassets: Case Studies in Value and Growth.  
 Part IX. Different Styles for Identifying Value in Individual Equities.  
 Part X. Valuing macroassets: Volatility

**Teaching:** 30 hours of seminars in the LT.

**Formative coursework:** Students will be expected to complete 2 group projects. In the first project, students study the historical performance of a chosen publicly traded company and analyse and value the equity on a forward-looking basis, evaluate its risks and make an investment recommendation. The second project requires the students to study and critically examine the investment decisions and style of a well-known value investor.

**Indicative reading: Books.**

- Greenwald, B, Kahn, J., P. Sonkin, M. van Biema, Value Investing: From Graham to Buffett and Beyond, Wiley Finance, 2004.

**Background reading:**

- Koller, T., M. Goedhard, and D. Wessels (McKinsey and Company), Valuation: Measuring and Managing the Value of Companies, Wiley, 2015.

**Numerous articles written by well-known practitioners and policy makers**

**Assessment:** Continuous assessment (100%) in the LT.

## FM413 Half Unit Fixed Income Markets

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christian Julliard

**Availability:** This course is compulsory on the MSc in Financial Mathematics. This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Risk and Finance, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit.

**Pre-requisites:** Students taking this course are expected to be familiar with the theory of asset evaluation at the level of FM429 Asset Markets A.

**Course content:** This advanced course is designed for students seeking an understanding of fixed income valuation and hedging methods, and a basic familiarity with the major fixed income markets and instruments.

By the end of the course, the students will be familiar with a variety of topics, including (i) the basic concepts of fixed-income instruments, such as yield, duration, convexity; (ii) the basic techniques to analyse and hedge fixed income products, such as "curve fitting", "bootstrapping", duration-based hedging and asset-liability management; (iii) the forces, or "factors", driving the variation in the entire spectrum of interest rates at different maturities; (iv) the main evaluation tools, which can be applied to evaluate a wide range of products (trees, no arbitrage trees, calibration and some continuous time models); (v) the main fixed income products such as government bonds, corporate bonds (convertible, callable, puttable), and their evaluation; (vi) plain vanilla interest derivatives (caps, floors and collars, swaps, swaptions, etc.) and their evaluation; (vii) mortgage backed securities and credit risk transfers; (viii) the analysis of the "destabilizing" effects related to the use of certain derivatives

written on fixed income instruments.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 10 problem sets in the LT.

**Indicative reading:** The primary source for this course is a comprehensive set of Lecture Notes, tutorials and case studies, and a reading pack containing chapters from the following books: Sundaresan, S. (2001), Fixed Income Markets and Their Derivatives, South Western College Publishing. Duffie, D and Singleton, K (2003), Credit Risk: Pricing, Management, and Measurement, Princeton: Princeton University Press (Princeton Series in Finance). Tuckman B. and A. Serrat (2011), Fixed Income Securities: Tools for Today's Markets, 3rd Edition, John Wiley & Sons. Veronesi, P. (2010), Fixed Income Securities: Valuation, Risk, and Risk Management, John Wiley & Sons.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## FM414 Half Unit Corporate Investment and Financial Policy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ashwini Agrawal

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).

**Course content:** This is a case-based course that is geared towards applying corporate finance and investment valuation tools in a variety of real-world settings. Particular emphasis will be placed upon understanding the strengths and limitations of academic approaches to solving real-world problems. We will also discuss when and how these tools are used in various professional settings such as private equity/investment banking, buy-side research, and consulting. Some of the topics that we will cover include:

- Valuation of venture-capital based startups
- Risk management and hedging international currency exposures
- Valuation techniques for private vs. public firms
- IPO pricing
- Determining optimal capital structure
- Working capital management

Weekly case studies will be assigned and discussed in class.

**Teaching:** 30 hours of seminars in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Assessment:** Continuous assessment (100%) in the LT.

## FM421 Half Unit Applied Corporate Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Cynthia Balloch

**Availability:** This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics, MSc in Economics and Management, MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway) and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. Students on the Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only), MSc in Econometrics

and Mathematics Economics, MSc Economics, MSc Economics (Two Year Programme), and MSc in Economics and Management may take this course only if they have fulfilled the compulsory prerequisites:

Students may only take this course if they have taken at least one of the following courses in **Michaelmas Term**: FM473M Financial Markets, FM474M Managerial Finance or FM431M Corporate Finance A. There will be no exceptions to this rule.

**Pre-requisites:** This is an advanced applied course and a thorough understanding of the major theoretical issues and concepts is required.

Students on the MSc in Econometrics and Mathematics Economics, MSc in Economics and Management, MSc in Management and Strategy may take this course if they have fulfilled the compulsory prerequisites. These students may only take this course if they have taken at least one of the following courses in Michaelmas Term: FM473M Finance I, FM474M Managerial Finance or FM431M Corporate Finance A.

**Course content:** The course will provide a thorough treatment of various topics within corporate finance, such as capital budgeting, financing decisions, and corporate valuation.

**Teaching:** 30 hours of seminars in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

This course will be taught in two or three separate groups. Each group will meet for a single block of three hours once a week. Each student will be assigned to one group. Students will **not** be allowed to choose their groups or to switch groups.

The course requires weekly in-class activities and discussions. Students must prepare for class activities in advance. Attendance is required.

**Formative coursework:** Weekly assignments based on case studies will be assigned to students. They will receive feedback on their performance, and will also be provided suggested solutions.

**Indicative reading:** Course materials (lecture notes and case studies) will be provided to the students at the start of the course.

**Assessment:** Exam (90%, duration: 2 hours and 30 minutes) in the summer exam period.

Coursework (10%) in the LT.

## FM422

### Corporate Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Dirk Jenter, Dr Kostas Zachariadis

**Availability:** This course is compulsory on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

**Course content:** • Financing  
• Valuation

This core course provides a broad introduction to the key issues in corporate finance. The first half of the course, the Financing Module, investigates how companies should finance their activities by issuing securities (debt, equity and convertible claims) and the interaction of business policy with financial policy. The aim is to understand what factors determine optimal capital structure and how the interplay of these factors can affect financing decisions in a way that creates value. The second half of the course, the Valuation Module, covers firm and project valuation and establishes how companies should select among investable assets. The module focuses on fundamental valuation techniques based on discounting future cash flows. The course goes on to introduce further valuations methods, such as real options analysis, as well as key applications of valuation concepts to major

corporate decisions such as mergers and acquisitions and initial public offerings. The course interweaves key conceptual material with a series of cases.

**Teaching:** 60 hours of lectures in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Formative coursework:** Regular homework will be completed, handed in and marked as part of formative assessment for this course.

**Indicative reading:** The recommended textbook for this course is Berk and DeMarzo, Corporate Finance. Other recommended readings from relevant journal articles will be included in a study pack.

**Assessment:** Continuous assessment (100%) in the MT.

## FM423

### Asset Markets

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Igor Makarov and TBC

**Availability:** This course is compulsory on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

**Course content:** • Investments and Securities Valuation

• Portfolio choice and performance evaluation  
• Derivatives

The aim of the course is to familiarize students with the workings of financial markets, and equip them with the fundamental tools of asset valuation. The course will focus on the three main asset classes - fixed income, stocks, and derivatives - giving a unified perspective of modern valuation methods. The starting point will be the present value formula. The course will then proceed to fixed-income securities, focusing mainly on government bonds.

These will be valued off the term structure of interest rates, using the present value formula. The connection with the principle of no-arbitrage will be emphasized. The course will then move to stocks, starting with portfolio theory and then deriving the relation between risk and return (CAPM). The CAPM will provide a risk-adjusted discount rate that will be used to discount stocks' cash flows with the present value formula. Alternative pricing models such as the APT and multi-factor models will also be covered, and the models will be applied to issues of asset allocation and portfolio selection. The last topic will be derivatives, especially futures and options. After familiarizing students with the use of derivatives, the course will cover the main valuation methods (binomial model, Black-Scholes) emphasizing again the principle of no-arbitrage.

**Teaching:** 60 hours of lectures in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Formative coursework:** Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

**Indicative reading:** The organisation of topics of the course follows closely the treatment in Berk and DeMarzo, Corporate Finance, 5th Edition, Pearson International, and Bodie, Kane and Marcus, Investments, 12th Edition, McGraw Hill. Other recommended readings and case studies will be included in a study pack.

**Assessment:** Continuous assessment (100%) in the MT.

**FM429 Half Unit****Asset Markets A**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Georgy Chabakauri

**Availability:** This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Financial Mathematics, MSc in Real Estate Economics and Finance, MSc in Risk and Finance, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

Global MSc in Management (Accounting and Finance Concentration only)

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is available to other students from the Departments of Mathematics and Statistics where regulations permit.

This course cannot be combined with FM473 Financial Markets or FM474 Managerial Finance.

Outside students should consider the alternative option of FM473 Financial Markets or FM474 Managerial Finance.

**Pre-requisites:** Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised.

**Course content:** This course aims to equip students with the fundamental concepts and tools underlying the asset markets side of modern finance. The course covers asset markets and valuation. The valuation of fixed-income securities is covered first, followed by the valuation of stocks, and derivatives such as futures and options. Concepts emphasized include the present-value formula, valuation by arbitrage, portfolio theory, the CAPM, market efficiency, and binomial and Black-Scholes models.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the MT.

**Formative coursework:** Weekly problem sets covered in classes.

**Indicative reading:** J. Berk and P. DeMarzo, *Corporate Finance*, Pearson International Edition.

Z. Bodie, A. Kane and A. Marcus, *Investments*, 8th edition, McGraw Hill. ISBN:0-07-338237-X

Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

**Assessment:** Exam (100%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the summer exam period.

**FM430 Not available in 2022/23****Corporate Finance and Asset Markets**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Georgy Chabakauri

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Financial Mathematics, MSc in Real Estate Economics and Finance and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised.

This course is a combination of two half-unit courses: FM429 Asset Markets A and FM431L Corporate Finance A.

This course cannot be combined with FM429 Asset Markets A, FM431 Corporate Finance A, FM473 Financial Markets or FM474 Managerial Finance.

**Course content:** This course aims to equip students with the fundamental concepts and tools underlying modern finance, both in the asset markets and the corporate finance side. Provides a

foundation for subsequent courses offered by the Department. In the Michaelmas Term, the course covers asset markets and valuation. The valuation of fixed-income securities is covered first, followed by the valuation of stocks, and derivatives such as futures and options. Concepts emphasized include the present-value formula, valuation by arbitrage, portfolio theory, the CAPM, market efficiency, and binomial and Black-Scholes models. In the Lent Term, the course covers corporate finance. This part starts with capital budgeting techniques, in relation to CAPM and other valuation instruments. The course then proceeds identifying the driving forces behind capital structure decisions and choices over debt and equity finance. Special consideration is given to the tax implications of those choices, the possible costs of financial distress, the incentive implications of financial decisions and the signalling impact of those for financial market participants. A final part of the course covers some specific topics in corporate finance: decision to go public, mergers and acquisitions and possibly (time permitting), dividend policy, corporate governance issues.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the MT. 20 hours of lectures and 9 hours of seminars in the LT.

**Formative coursework:** Weekly problem sets covered in classes.

**Indicative reading:** J. Berk and P. DeMarzo, *Corporate Finance*, Pearson International Edition.

Z. Bodie, A. Kane and A. Marcus, *Investments*, 8th edition, McGraw Hill. ISBN:0-07-338237-X

Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

**Assessment:** Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Please note this examination is the full unit version of the exams taken on FM429 Asset Markets A (H) and FM431 Corporate Finance A (H).

**FM431L Half Unit****Corporate Finance A**

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Ulf Axelson

**Availability:** This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics and MSc in Risk and Finance. This course is not available as an outside option. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only)

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is not available as an outside option.

Outside students should consider taking FM474L Managerial Finance as an alternative option.

This course cannot be combined with FM430 Corporate Finance and Asset Markets or FM474 Managerial Finance.

**Pre-requisites:** Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised.

**Course content:** The course covers range of topics in corporate finance starting with capital budgeting techniques, in relation to CAPM and other valuation instruments. The course then proceeds identifying the driving forces behind capital structure decisions and choices over debt and equity finance. Special consideration is given to the tax implications of those choices, the possible costs of financial distress, the incentive implications of financial decisions and the signalling impact of those for financial market participants. A final part of the course covers some specific topics in corporate finance: decision to go public, mergers and acquisitions and start-up finance (time permitting).

**Teaching:** 20 hours of lectures and 9 hours of seminars in the LT.

**Formative coursework:** Students will be set weekly problem set assignments. Solutions and guidance will be provided during the

weekly seminar classes. The final seminar class, students will solve a formative mock exam. Students will receive individual feedback on the mock exam prior to the final exam.

**Indicative reading:** J. Berk and P. DeMarzo, *Corporate Finance*, Pearson International Edition. Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

**Assessment:** Exam (100%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the summer exam period.

Please note this exam is the half unit version of the examination taken on FM430 Corporate Finance and Asset Markets. Any student who takes both FM429 and FM431 will be re-registered to sit the FM430 full-unit exam paper in Summer Term.

## FM431M Half Unit Corporate Finance A

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Angie Andrikogiannopoulou

**Availability:** This course is compulsory on the MSc in Economics and Management. This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Risk and Finance. This course is not available as an outside option. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director. This course is not available as an outside option. Outside students should consider taking FM474 Managerial Finance as an alternative option.

This course cannot be combined with FM430 Corporate Finance and Asset Markets or FM474 Managerial Finance.

**Pre-requisites:** Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised.

**Course content:** The course covers range of topics in corporate finance starting with capital budgeting techniques, in relation to CAPM and other valuation instruments. The course then proceeds identifying the driving forces behind capital structure decisions and choices over debt and equity finance. Special consideration is given to the tax implications of those choices, the possible costs of financial distress, the incentive implications of financial decisions and the signalling impact of those for financial market participants. A final part of the course covers some specific topics in corporate finance: decision to go public, mergers and acquisitions and start-up finance (time permitting).

**Teaching:** 20 hours of lectures and 9 hours of seminars in the MT.

**Formative coursework:** Students will be set weekly problem set assignments. Solutions and guidance will be provided during the weekly seminar classes. The final seminar class, students will solve a formative mock exam. Students will receive individual feedback on the mock exam prior to the final exam.

**Indicative reading:** J. Berk and P. DeMarzo, *Corporate Finance*, Pearson International Edition. Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

**Assessment:** Exam (100%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the summer exam period.

Please note this exam is the half unit version of the examination taken on FM430 Corporate Finance and Asset Markets. Any student who takes both FM429 and FM431 will be re-registered to sit the FM430 full-unit exam paper in Summer Term.

## FM436 Financial Economics

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Ian Martin and Prof Mike Burkart

**Availability:** This course is compulsory on the MRes/PhD in Accounting (EoA) (Economics of Accounting Track), MRes/PhD in Finance, MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** Mathematical background at the level of the September Courses in Mathematics and Financial Economics Preparatory Course is assumed.

**Course content:** Financial Economics provides students with an in-depth introduction to the theories of asset pricing and corporate finance. The course analyses investors' behaviour, market equilibrium, the pricing of securities, the valuation of real assets, and capital structure choice. Topics in asset pricing will encompass portfolio choice, complete and incomplete markets, mean-variance portfolio theory and equilibrium asset pricing, pricing with no arbitrage, Black-Scholes and other contingent claims pricing models, and the behaviour of financial markets during crises. Topics in corporate finance will encompass valuation methods and financing decisions in the presence of taxation, agency frictions, and asymmetric information.

**Teaching:** 60 hours of lectures in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Formative coursework:** Problem sets, covered in classes.

**Indicative reading:** Readings will be based on teaching notes and journal articles.

**Assessment:** Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

## FM437 Financial Econometrics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Linyan Zhu (Michaelmas Term)

Dr Christian Julliard (Lent Term)

**Availability:** This course is compulsory on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** Mathematical background to the level of the course taught in September in the Economics Department (EC400) is assumed.

**Course content:** This course covers the techniques of empirical investigation in economics and finance. Students are introduced to recent empirical findings based on asset pricing and corporate finance models. The course includes a selection of the following topics: multivariate regression; maximum likelihood and methods of moments estimation; hypothesis testing; omitted variables and misspecification; asymptotic theory; measurement error and instrumental variables; time-series modelling; predictability of asset returns; event study analysis; econometric tests of the CAPM and multifactor models; volatility modelling; generalised method of moments estimation.

**Teaching:** 30 hours of lectures in the MT. 33 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Formative coursework:** Exercises are provided each week and they are discussed in class.

**Indicative reading:** The textbook for the Michaelmas Term is *Econometrics* by Bruce E. Hansen, available online. A complete

reading list is available at the beginning of session. Will be based on Greene, *Econometric Analysis*, Prentice-Hall; Campbell, Lo & MacKinlay, *The Econometrics of Financial Markets*, Princeton University Press; *Econometric Analysis of Cross Section and Panel Data*, J. Wooldridge; selected published articles.

**Assessment:** Exam (45%, duration: 2 hours) in the January exam period.

Exam (45%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.

Coursework (10%) in the MT and LT.

## FM441 Half Unit Derivatives

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Rohit Rahi

**Availability:** This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Risk and Finance, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

**Pre-requisites:** This is an advanced course. Students will be expected to have a good grasp of probability theory and multivariate calculus. Prior knowledge of stochastic calculus is not required; the necessary tools will be introduced as part of the course.

**Course content:** The course provides a thorough grounding in the theory of derivatives pricing and hedging. Both discrete-time and continuous-time models will be covered, including a comprehensive treatment of the Black-Scholes model. A special feature of the course is its emphasis on the modern theory of no-arbitrage pricing using martingale methods. These methods will be applied to the pricing of equity options, forwards, futures and interest rate derivatives. The uses of derivatives in hedging and risk-management will be discussed as well.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Weekly problem sets in classes (10).

**Indicative reading:** Teaching notes will be distributed. No one book covers the entire course, but the following is an excellent reference: John C Hull, *Options, Futures and Other Derivatives*.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## FM442 Half Unit Quantitative Methods for Finance and Risk Analysis

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jon Danielsson

**Availability:** This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit.

**Pre-requisites:** A strong background in statistics and quantitative methods at the undergraduate level is required. Prior programming experience is helpful.

**Course content:** This graduate-level course covers important quantitative and statistical tools in applied finance. It studies financial markets risk, with a particular focus on models for measuring, assessing and managing financial risk. Students will be introduced to the application of these tools and the key properties of financial data through a set of computer-based homework assignments and classes.

The course aims to introduce quantitative concepts and techniques in many areas of finance. Sample topics include risk measures (e.g., Value-at-Risk and Expected Shortfall, including implementation and backtesting), univariate and multivariate volatility models, Monte Carlo Simulations, and associated topics in Econometrics. This list is meant to be representative, but topics may be added or removed. Recent stress events, such as the global crisis in 2008, Covid-19 in 2020 and Russia's invasion of Ukraine are used to illustrate the various methodologies presented in the course.

Implementing the models and tools in R is an essential part of the course. The homework assignments are designed to guide the students to all stages of the analytical process, from locating, downloading and processing financial data to the implementation of the tools and interpretation of results. Students will have the opportunity to explore the databases available at the LSE and to become comfortable working with real data.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT.

**Indicative reading:** No single text covers the course material. The relevant sections of the following readings would be appropriate for individual topics: Jon Danielsson (2011), *Financial Risk Forecasting*, as well as slides from [www.financialriskforecasting.com/slides](http://www.financialriskforecasting.com/slides).

**Assessment:** Two homeworks, each 5 marks. Group presentation, 10 marks. Individual project, 50 marks. Exam 30 marks.

## FM445 Half Unit Portfolio Management

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Walker Ray

**Availability:** This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics, MSc in Economics and Management, MSc in Financial Mathematics and MSc in Risk and Finance. This course is not available as an outside option. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit. This course is not available as an outside option.

**Course content:** This course aims to cover the main topics in equity portfolio management. Some of the topics covered in the course include: Portfolio optimization techniques; Multi-factor models and their applications; Trading strategies; International portfolio management and currency hedging; Trading costs; Portfolio performance measurement and attribution; Style analysis; Mutual funds; Hedge funds. The course is based on a number of empirical applications and case studies, so that students can gain a better understanding of implementation issues related to managing an equity portfolio.

**Teaching:** 30 hours of seminars in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

**Formative coursework:** Regular classworks will be completed, handed in and marked as part of formative assessment for this course. For the most part, the classwork is based on Excel

applications of the models and empirical studies covered in lectures.

**Indicative reading:** A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are *Modern portfolio theory and investment analysis*, by E. J. Elton, M. J. Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; *Modern investment management*, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press; *Investments*, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin.

**Assessment:** Exam (80%, duration: 2 hours, reading time: 10 minutes) in the summer exam period. Coursework (20%).

## FM447 Half Unit Global Financial Systems

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jon Danielsson

**Availability:** This course is available on the MSc in Accounting and Finance and MSc in Financial History. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is not open to students on the MSc Economics and Managements and students from the following departments: Economics, Finance, Mathematics, and Statistics

**Pre-requisites:** Students should have some background in economics, and be comfortable with formal arguments

**Course content:** This course examines the academic and policy debates on the operation of the global financial system. The course will aim to be topical, where the analysis of the issues will be based on economic arguments. The course begins with analysis of systemic risk, followed by an overview of important financial crises and key institutions. The role of cryptocurrencies, central bank digital currencies, fintec and artificial intelligence on the financial system will be discussed. Several theories of financial crises are then developed in some detail, and are assessed by reference to historical experience. The course concludes by analysis of the latest policy and regulatory developments (including Basel III and macroprudential regulations), monetary policy and interest rate normalization and their relationship with inequality, inflation, the current situation in the European Union, the role of China and the United States, and finally the impact of Covid-19 and Russia's invasion of Ukraine on the financial system.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT.

**Formative coursework:** Students are expected to attempt the problem sets and essay questions set in the classes.

**Indicative reading:** Most material will be provided by the book *Global Financial Systems* ([www.globalfinancialsystems.org](http://www.globalfinancialsystems.org)), by Jon Danielsson, published by Pearson

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## FM457 Not available in 2022/23 Applied Computational Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Mr Alberto Pelliccioli

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway) and MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where

regulations permit.

FM457A is intended for students taking FM442 Quantitative Methods for Finance and Risk Analysis and FM404 Forecasting Financial Time Series.

FM457B is available to students on the MSc Finance (Full-time), MSc Finance and Private Equity, MSc Finance and Economics and MSc Risk and Finance programmes.

**Course content:** Applied Computational Finance is a non-assessed, optional course intended to provide a solid foundation in the R numerical programming package. It does not assume students have any prior programming knowledge. It is based on the R/RStudio environment and basic programming concepts, moving on to libraries, functions, plotting, source code management, how to import data locally and via internet APIs, basic analysis and big data techniques. The course uses practical problems in finance for illustration, like risk analysis, price forecasting and derivative pricing.

**Teaching:** FM457A: 10 hours of seminars in the MT.

FM457B: 10 hours of seminars in the MT.

**Indicative reading:** Teaching notes will be distributed.

**Assessment:** This is an additional, non-assessed computer course to supplement MSc level courses in the Department of Finance.

## FM458 Not available in 2022/23 Financial Economics Preparatory Course

**This information is for the 2022/23 session.**

**Teacher responsible:** Mr Karamfil Todorov

**Availability:** This course is compulsory on the MSc in Finance and Economics. This course is not available as an outside option.

**Course content:** The aim of this course is to supplement the Economics pre-session course and provide students with the essential quantitative methods for the core Finance course FM436. The course will introduce foundational material essential to the study of both asset pricing in continuous time and corporate finance theory.

**Teaching:** 30 hours of lectures in the MT.

**Indicative reading:** Mikosch, *Elementary Stochastic Calculus* (1998), World Scientific; Shreve, *Stochastic Calculus for Finance I, II*

**Assessment:** No formal assessment. Students will sit a mock exam based upon the material to aid learning.

## FM471 Half Unit Sustainable Finance and Impact Investing

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Christopher Polk

**Availability:** This course is available on the CEMS Exchange, Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Accounting and Finance, MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway), MSc in Management (1 Year Programme), MSc in Risk and Finance, MSc in Social Innovation and Entrepreneurship, Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

**Pre-requisites:** Students must take one of the following: FM423/FM423E Asset Markets, or FM436 Financial Economics, or FM429

Asset Markets A, or FM431M/FM431L Corporate Finance A, or FM473M/FM473L Financial Markets, or FM474M/FM474L Managerial Finance.

Students who can demonstrate comparable background in a graduate-level course may be granted an exemption from this requirement at the discretion of the course leader.

**Course content:** This course provides a conceptual foundation in sustainable finance and impact investing along with a clear understanding of the empirical facts associated with how sustainable finance and impact investing affect firm and fund performance. Using a blend of readings, lectures, cases, and discussions, participants will learn to critically assess the actions of investors and firms with regards to sustainable finance and impact investing, including both motivation and resulting consequences.

Topics addressed will include corporate ESG (Environmental, Social, and Governance) investing, climate finance, and various impact investing topics. Participants will take away from the course a solid understanding of 1) the evolution of sustainable finance and impact investing from niche field to mainstream; 2) the variety of ways in which sustainable finance and impact investing are implemented in practice, and 3) the tools, models and frameworks behind sustainable finance and impact investing.

**Teaching:** 30 hours of seminars in the LT.

**Formative coursework:** Case studies and homework assignments will help communicate and develop understanding of course concepts.

**Indicative reading:**

- Freeman, Ed, 1997, "Stakeholder Theory of the Modern Corporation", *Business Ethics*, 5th Edition, 38-48.
- Friedman, Milton, 1970, "A Friedman doctrine: The social responsibility of business is to increase its profits," *The New York Times Magazine*, September 13, 1970.
- Giglio, Stefano, Bryan Kelly and Johannes Stroebe, 2021, "Climate Finance", *Annual Review of Financial Economics* 13, 15-36.
- Pastor, Lubos, Robert F. Stambaugh, and Lucian Taylor, 2021, "Sustainable Investing in Equilibrium," *Journal of Financial Economics* 160:142-550-571.
- Pedersen, Shaun Fitzgibbons, and Lukasz Pomorski, 2021, "Responsible Investing: The ESG-efficient Frontier," *Journal of Financial Economics* 142:572-597.

**Assessment:** Continuous assessment (100%).

---

## FM472 Half Unit International Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Elisabetta Bertero

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting and Finance, MSc in Financial History and MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on the International Political Economy MSc, on the Master in Public Administration and on other MSc programmes are also welcome to choose this course provided they meet the pre-requisites below. These students need to sign up for the course on LfY first and then email the course leader with information on their economics and/or finance background and their motivation for choosing the course. The course leader will then approve their application on LSE for You. In the past students on the IPE MSc, MPA, MSc in Economic History, European Institute, Master of Science in Development Management, Master of Science in Economy, Risk and Society, Master of Science in Law and Accounting have enjoyed this course.

This course is not open to students from the following departments: Economics, Finance, Mathematics, and Statistics.

**Pre-requisites:** Some background in economics and / or finance.

Essential information for the compulsory research project and an overview of the course are provided during the first lecture and the first class in January 2023. Students interested in this course, whether already enrolled or exploring the course as a possible option, are required to attend both lecture and class during the first week of term.

**Course content:** The objective of the course is to equip students with the relevant academic research, techniques and analytical skills to interpret current developments in the fast-changing area of international finance, from the shifts in capital flows to the elektronification of forex trading, from the persisting dominance of the US dollar in the international monetary order to China's alleged exchange rate manipulations, from the development of cryptocurrencies to the turbulence in the oil market, from the rise in global imbalances to the Eurozone response to COVID-19.

This course approaches such key issues and topics in international finance using foreign exchange and exchange rates as a unifying theme. The foreign exchange market is the largest financial market, turning over every couple of weeks the equivalent of the yearly value of pre-C19 global GDP. It is also a unique market where prices are determined not only by the fundamentals of this asset class but also by government and central bank interventions.

Exchange rates are an open economy's most important price as they can affect the relative value of an entire economy.

This course provides a 360-degree perspective on exchange rates divided into four parts: theory, government policy, global risk and markets.

First, the course considers what finance and economic theory identify as the determinants of the relative price of two currencies. Macroeconomic, market microstructure and behavioural finance approaches are examined. Second, the course analyses governments' available policy choices to influence the level and volatility of the relative price of its currency and how these choices differ for higher income and lower income economies. Third, the course examines exchange rates as a source and conduit of global financial instability. Fourth, the course focuses on the risk and exposure for investors and firms arising from exchange rate market volatility. It examines the valuation of currency instruments and their use in strategies to hedge that exposure. It also analyses the structure, trading and organisation of the forex market and its central role in international finance.

The course incorporates theoretical, empirical, policy and institutional dimensions. The teaching approach emphasises the intuitions at the core of the quantitative aspects. It also discusses how the historical evolution of research in this area has resulted in the currently used theoretical frameworks.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students are required to undertake a group research project on a given topic in international finance.

**Indicative reading:** A selection of journal articles; background reading from a textbook such as Keith Pilbeam *International Finance* (Palgrave, 2013, 4th edition)

**Assessment:** Exam (80%, duration: 2 hours) in the summer exam period.

Research project (10%) and continuous assessment (10%) in the LT.

Continuous assessment takes the form of class preparation throughout the teaching term and is worth 10%.

---

## FM473L Half Unit Financial Markets

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr James Clark

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Financial History, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Real Estate Economics and Finance, MSc in

Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

Students on the MSc in Accounting, Organisations and Institutions need permission from the Programme Director to enrol in this course.

Students on the Diploma in Accounting and Finance need permission from the Programme Director to enrol in this course.

This course is not open to students in the MSc Accounting and Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.

This course cannot be combined with FM429 Asset Markets A or FM430 Corporate Finance and Asset Markets.

**Pre-requisites:** The course assumes no previous knowledge of finance, economics, and statistics, and requires only basic knowledge of mathematics. However, the course is quantitative and students must be willing to learn and work with new concepts in mathematics and statistics. Course work will involve a significant amount of algebra and numerical exercises. Students should be comfortable with 'High School' level Mathematics and simple algebra, e.g., the ability to solve linear systems of two equations and two unknowns.

**Course content:** This course is a self-contained introduction to finance and it covers roughly the same topics as FM429. The course explores the way that firms and the capital market function to channel savings toward productive investments. From the investor's perspective it considers characteristics of the major financial contracts and the principles used in their valuation. It considers how investors should select their portfolios and the implications of this behaviour for pricing assets in stock and bond markets. It explores the question of whether stock markets are efficient in reflecting investors' information. It applies these insights to the firm's financial management decision of whether or not to invest in a risky project and how to select among alternative investments. In addition, the course also covers some core corporate finance questions, such as capital structure choices. The course is also related to FM474 (Managerial Finance): both are introductory courses in Finance. FM473 focuses mostly on understanding the workings of financial markets, the determination of asset prices, and the decisions made by financial investors. FM474 studies financial decisions from the perspective of firms (i.e., "Corporate Finance"). Although there is some small amount of overlap between FM473 and FM474, both courses can be taken simultaneously or sequentially, in any order.

**Teaching:** 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

There will be 10 three-hour sessions. Attendance is required.

This course is taught twice, in both Michaelmas and Lent Term. Students must either register for FM473M which is taught in Michaelmas Term, or FM473L which is taught in Lent Term.

**Indicative reading:** Brealey, Myers and Allen, Principles of Corporate Finance.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## FM473M Half Unit Financial Markets

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Mike Burkart

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Financial History, MSc in Management and Strategy, MSc in Real Estate Economics and Finance, MSc in Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

Students on the MSc in Accounting, Organisations and Institutions need permission from the Programme Director to enrol in this course.

Students on the Diploma in Accounting and Finance need permission from the Programme Director to enrol in this course.

This course is not open to students in the MSc Accounting and Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.

This course cannot be combined with FM429 Asset Markets A or FM430 Corporate Finance and Asset Markets.

**Pre-requisites:** The course assumes no previous knowledge of finance, economics, and statistics, and requires only basic knowledge of mathematics. However, the course is quantitative and students must be willing to learn and work with new concepts in mathematics and statistics. Course work will involve a significant amount of algebra and numerical exercises. Students should be comfortable with 'High School' level Mathematics and simple algebra, e.g., the ability to solve linear systems of two equations and two unknowns.

**Course content:** This course is a self-contained introduction to finance and it covers roughly the same topics as FM429. The course explores the way that firms and the capital market function to channel savings toward productive investments. From the investor's perspective it considers characteristics of the major financial contracts and the principles used in their valuation. It considers how investors should select their portfolios and the implications of this behaviour for pricing assets in stock and bond markets. It explores the question of whether stock markets are efficient in reflecting investors' information. It applies these insights to the firm's financial management decision of whether or not to invest in a risky project and how to select among alternative investments. In addition, the course also covers some core corporate finance questions, such as capital structure choices. The course is also related to FM474 (Managerial Finance): both are introductory courses in Finance. FM473 focuses mostly on understanding the workings of financial markets, the determination of asset prices, and the decisions made by financial investors. FM474 studies financial decisions from the perspective of firms (i.e., "Corporate Finance"). Although there is some small amount of overlap between FM473 and FM474, both courses can be taken simultaneously or sequentially, in any order.

**Teaching:** 30 hours of lectures in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive. There will be ten three-hour sessions. Attendance is required.

This course is taught twice, in both Michaelmas and Lent Term. Students must either register for FM473M which is taught in Michaelmas Term, or FM473L which is taught in Lent Term.

**Indicative reading:** Brealey, Myers and Allen, Principles of Corporate Finance.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## FM474L Half Unit Managerial Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Angie Andrikogiannopoulou

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting, Organisations and Institutions, MSc in Financial History, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

This course is not open to students in the MSc Accounting and

Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.

Students on the Diploma in Accounting and Finance need permission from the Programme Director to enrol in this course. This course cannot be combined with FM430 Corporate Finance and Asset Markets or FM431 Corporate Finance A.

**Course content:** This course is a self-contained introduction to finance and it covers roughly the same topics as FM431. The aim of the course is to provide a comprehensive overview of firms' financial decision making. The course is designed to provide an applied and practical approach to finance, enabling the students to address topical issues that modern corporations face. In particular, the course builds on concepts such as valuation and capital structure theories, and applies those tools in a systematic and rigorous way to real-life financial management problems. After a brief introduction to financial markets, the course focuses on corporate finance and business valuation. Topics such as mergers and acquisitions and initial public offerings will also be covered. The course is also related to FM473 (Financial Markets): both are introductory courses in Finance. FM473 focuses mostly on understanding the workings of financial markets, the determination of asset prices, and the decisions made by financial investors. FM474 studies financial decisions from the perspective of firms (i.e., "Corporate Finance"). Although there is some small amount of overlap between FM473 and FM474, both courses can be taken simultaneously or sequentially, in any order.

**Teaching:** 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

This course will be taught in two or three separate groups. Each group will meet for a single block of three hours once a week. Each student will be assigned to one group. Students will not be allowed to choose their groups or to switch groups.

The course requires weekly in-class activities and discussions. Students must prepare for class activities in advance. Attendance is required.

**Formative coursework:** Weekly homeworks.

**Indicative reading:** Brealey, Myers and Allen, Principles of Corporate Finance.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

## FM474M Half Unit Managerial Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Huan Tang and TBC

**Availability:** This course is compulsory on the MSc in Management (1 Year Programme). This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting, Organisations and Institutions, MSc in Financial History, MSc in Management and Strategy, MSc in Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

This course is not open to students in the MSc Accounting and Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.

Students on the Diploma in Accounting and Finance need permission from the Programme Director to enrol in this course. This course cannot be combined with FM430 Corporate Finance and Asset Markets or FM431 Corporate Finance A.

**Course content:** This course is a self-contained introduction to finance and it covers roughly the same topics as FM431. The aim of the course is to provide a comprehensive overview of firms' financial decision making. The course is designed to provide an applied and practical approach to finance, enabling the students

to address topical issues that modern corporations face. In particular, the course builds on concepts such as valuation and capital structure theories, and applies those tools in a systematic and rigorous way to real-life financial management problems. After a brief introduction to financial markets, the course focuses on corporate finance and business valuation. Topics such as mergers and acquisitions and initial public offerings will also be covered. The course is also related to FM473 (Financial Markets): both are introductory courses in Finance. FM473 focuses mostly on understanding the workings of financial markets, the determination of asset prices, and the decisions made by financial investors. FM474 studies financial decisions from the perspective of firms (i.e., "Corporate Finance"). Although there is some small amount of overlap between FM473 and FM474, both courses can be taken simultaneously or sequentially, in any order.

The course requires weekly in-class activities and discussions.

Students must prepare for class activities in advance. Attendance is required.

**Formative coursework:** Weekly homeworks.

**Indicative reading:** Brealey, Myers and Allen, Principles of Corporate Finance.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

## FM476 Half Unit Entrepreneurial Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Juanita Gonzalez-Urbe

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting and Finance, MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway), MSc in Management (1 Year Programme), MSc in Risk and Finance and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This half unit is capped with a capacity limit to the number of students registered on the course. A lottery process is undertaken to allocate places on units which are oversubscribed. Students are recommended to have clear alternatives in mind should they not be successful with an application for this capped half unit.

**Pre-requisites:** Basic Mathematics and Statistics knowledge.

N.B. - It is **mandatory** to attend the first week's classes in Lent Term in order to register for FM476 Entrepreneurial Finance.

Students who did not attend these classes will **not** be permitted to then join the course.

**Course content:** After introducing students to methods to assess business plans as well as methods to identify and value business ventures and growth opportunities in the opening part of the course, the bulk of the first half of the course concentrates on obtaining financial resources. It covers a broad set of instruments (venture capital, angel finance, crowdsourcing, venture debt) used by entrepreneurial firms and aims to help the student understand how the staged financing process of a new venture works, and to be able to assess when to raise financing and how to structure it. The second half of the course focuses on practical applications

in negotiation, development of a business plan, and evaluation of real-life ventures raising funding.

**Teaching:** 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

This course will be taught in three separate groups. There will be a joint one-hour session with all groups once a week and each group will have a separate additional two-hour session each week. Each student will be assigned a group at the beginning of the course and will continue with the same group for the rest of the term.

The course requires weekly in-class and out-of-class activities and discussions. Students must prepare for class activities in advance. There is a significant amount of in-term individual work, group work, and other activities. Attendance is required.

**Formative coursework:** All the work done in an out of the classroom will be assessed.

**Indicative reading:** Detailed course programmes and reading lists are distributed at the start of the course. The course pack include lecture notes and case studies for summative and formative assessments.

**Assessment:** Continuous assessment (100%).

Summative assessment will take the form of individual reports, group reports, business plan exercises and peer evaluations.

## FM477 Half Unit International Finance A

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr. Liliana Varela

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway) and MSc in Risk and Finance. This course is not available as an outside option.

**Pre-requisites:** Students must have completed either: Asset Markets (FM423 or FM423E) and Corporate Finance (FM422 or FM422E); or Financial Economics (FM436); or Management and Regulation of Risk (FM403).

**Course content:** Following an introduction to the exchange rate market, the course will focus on key elements of international financial management, international risk exposure, hedging via FX derivatives (forwards, futures, options, and swap contracts), managing transaction and economic exposure, international portfolio investment. The course will next focus on exchange rate determination and forecasting, the international monetary system, balance of payments, crises in open economies and current issues of the global economy. Relevant concepts will be illustrated throughout via topical business and country cases.

**Teaching:** 30 hours of seminars in the LT.

The course will be taught in an interactive Harvard-style three-hour lecture block integrating lectures and classes.

**Formative coursework:** Weekly problem sets covering both theoretical methods and practical applications.

**Indicative reading:** Detailed course readings, cases, and slides will be distributed at the start of the course. Illustrative texts include: International Financial Management by C. S. Eun and B. G. Resnick, McGraw-Hill Education; 8th edition (2018), International Financial Management by G. Bekaert and R. Hodrick, Cambridge University Press; 3rd edition (2017) and Maurice Obstfeld and Kenneth Rogoff, Foundations of International Macroeconomics, The MIT Press (1996).

**Assessment:** Continuous assessment (100%) in the LT.

## FM478 Half Unit Not available in 2022/23 International Finance for MSc Finance and Economics, MSc Finance and MSc Finance & Private Equity - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Liliana Varela

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

**Pre-requisites:** This is the dissertation course for FM477.

Students must have completed either Asset Markets (FM423 or FM423E) and Corporate Finance (FM422 or FM422E), or Financial Economics (FM436).

**Course content:** See entry for FM477

**Teaching:** 30 hours of seminars in the LT.

**Indicative reading:** Detailed course readings, cases, and slides will be distributed at the start of the course. Illustrative texts include: International Financial Management by C. S. Eun and B. G. Resnick, McGraw-Hill Education; 8th edition (2018), International Financial Management by G. Bekaert and R. Hodrick, Cambridge University Press; 3rd edition (2017) and Maurice Obstfeld and Kenneth Rogoff, Foundations of International Macroeconomics, The MIT Press (1996).

**Assessment:** Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

## FM481 Not available in 2022/23 Financial Econometrics for Research Students

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christian Julliard  
Prof Alexey Onatskiy

**Availability:** This course is compulsory on the MRes/PhD in Finance. This course is available as an outside option to students on other programmes where regulations permit. Optional on MRes/PhD Economics.

**Pre-requisites:** Strong background in statistics and mathematics; some knowledge of Economics and Finance.

**Course content:** The Lent Term of FM481 is shared with FM404 Forecasting Financial Time Series.

Part 1 – Probability, Mathematical Statistics, and Asymptotic Theory, provides students with an understanding of basic concepts in probability and statistics with a view of eventual use for econometric analysis of financial data. Including Basic Probability Concepts, Random Variables, Selected Probability Distributions, Modes of Convergence, Properties of Estimators, Frequentist Hypothesis Testing and Bayesian Inference.

Part 2 - Theory and application of regression analysis, covers estimation and inference theory for regression models. The topics covered are least squares estimation, maximum likelihood estimation, instrumental variable estimation, and generalized method of moments estimation, with applications to linear models, many and weak instrument problems, limited dependent variable models, and panel data models.

Part 3 - The course provides a survey of the theory and application of time series methods in econometrics. The main objective of this course is to develop the skills needed to do empirical research in fields operating with time series data sets. The topics covered are: Hilbert spaces, projections, Wold theorems, ARMA models, Z-transform, convolution theorem, W-K prediction, Spectral

analysis; Structural VAR Models; State Space Representations; Models with time-varying coefficients and stochastic volatility; Nonlinear filtering (particle filters); Unit Roots, Spurious Regressions and Cointegration; Predictability.

**Teaching:** 22 hours of lectures in the MT. 22 hours of lectures in the LT.

**Formative coursework:** Weekly classwork and problem sets.

**Indicative reading:**

- Cameron and Trivedi: Microeconometrics. Methods and Applications.
- Campbell, Lo and MacKinlay: The Econometrics of Financial Markets
- Geweke: Contemporary Bayesian Econometrics and Statistics
- Gourieroux and Jasiak: Financial Econometrics: Problems, Models and Methods.
- Greene: Econometric Analysis.
- Johannes and Polson: Computational Methods for Bayesian Inference.
- Hamilton: Time-Series Analysis.
- Hayashi: Econometrics
- Roberts and Whited: "Endogeneity in Empirical Corporate Finance," Handbook of the Economics of Finance, vol. 2.
- Sargent, T., (1987), Macroeconomic Theory, chapters IX-XI.
- Wooldridge: Econometric Analysis of Cross-Section and Panel Data.

**Assessment:** Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

## FM482

### Research paper in Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** PhD Programme Director

**Availability:** This course is compulsory on the MRes/PhD in Finance. This course is not available as an outside option.

**Course content:** Students produce a research paper, between 6,000 and 8,000 words, related to the student's designated major field, to be submitted at the end of August.

**Teaching:** There are no direct teaching hours.

**Formative coursework:** Feedback on progress will be provided by the student's PhD Supervisor.

**Assessment:** Research paper (100%).

The research paper will be 6-8,000 words in length.

## FM4T1 Half Unit Not available in 2022/23

### Forecasting Financial Time Series - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christian Julliard

**Availability:** This course is available on the MSc in Economics, MSc in Economics (2 Year Programme), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

**Course content:** See entry for FM404

**Teaching:** See entry for FM404

**Assessment:** Dissertation (90%, 6000 words) in the ST. Coursework (10%).

6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline is towards the end of Summer Term.

## FM4T2 Half Unit

### Applied Corporate Finance - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Cynthia Balloch

**Availability:** This course is available on the MSc in Economics, MSc in Economics (2 Year Programme), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

**Course content:** See entry for FM421

**Teaching:** See entry for FM421

**Assessment:** Dissertation (90%, 6000 words) in the ST. Coursework (10%) in the LT.

The submission is a 6,000 word structured empirical project (90%), on a topic within the guidelines set out in the course. The dissertation option is to be chosen in only one half unit module and must be completed in line with the guidance issued by the course leader. The submission deadline for the project is in Summer Term, with a deadline to be set by the Department.

## FM4T4 Half Unit Not available in 2022/23

### Corporate Investment and Financial Policy - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Daniel Ferreira

**Availability:** This course is available on the MSc in Finance (full-time) and MSc in Finance (full-time) (Work Placement Pathway). This course is not available as an outside option.

**Course content:** See entry for FM414.

**Teaching:** See entry for FM414.

**Assessment:** Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

## FM4T5 Half Unit

### Portfolio Management - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Walker Ray

**Availability:** This course is available on the MSc in Economics and MSc in Economics (2 Year Programme). This course is not available as an outside option.

**Course content:** See entry for FM445

**Teaching:** See entry for FM445

**Assessment:** Dissertation (80%, 6000 words) in the ST.

Coursework (20%) in the LT.

6,000 word dissertation (80%) on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. The submission deadline for the project is in Summer Term, with a deadline to be set by the Department.

## FM4T6 Half Unit Not available in 2022/23

### Topics in Portfolio Management - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Michela Verardo

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc

in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

**Course content:** See entry for FM406

**Teaching:** See entry for FM406

**Assessment:** Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

### FM4T8 Half Unit Not available in 2022/23 Financial Engineering - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jean-Pierre Zigrand

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

**Course content:** See entry for FM408

**Teaching:** See entry for FM408

**Assessment:** Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

### FM4U1 Half Unit Fixed Income Markets - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christian Julliard

**Availability:** This course is available on the MSc in Economics and MSc in Economics (2 Year Programme). This course is not available as an outside option.

**Course content:** See entry for FM413

**Teaching:** See entry for FM413

**Assessment:** Dissertation (100%, 6000 words) in the ST.

6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. The submission deadline for the project is in Summer Term, with a deadline to be set by the Department.

### FM4U2 Half Unit Not available in 2022/23 Quantitative Methods for Finance and Risk Analysis (Dissertation)

**This information is for the 2022/23 session.**

**Teacher responsible:** See FM442 Course Guide

**Availability:** This course is available on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

**Course content:** See entry for FM442

**Teaching:** See entry for FM442

**Assessment:** Dissertation (80%, 6000 words) in the ST. Coursework (20%) in the MT.

6,000 word dissertation (80%) on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only

one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline is towards the end of Summer Term.

### FM4U4 Half Unit Not available in 2022/23 Quantitative Security Analysis - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jean-Pierre Zigrand

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

**Course content:** See entry for FM412

**Teaching:** See entry for FM412

**Assessment:** Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

### FM4U5 Half Unit Not available in 2022/23 Fixed Income Securities and Credit Markets - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Peter Kondor

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

**Course content:** See entry for FM405

**Teaching:** See entry for FM405

**Assessment:** Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

### FM4U7 Half Unit Not available in 2022/23 Mergers, Buyouts and Corporate Restructurings - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Vicente Cufiñat

**Availability:** This course is available on the MSc in Finance (full-time) and MSc in Finance (full-time) (Work Placement Pathway). This course is not available as an outside option.

**Course content:** See entry for FM407

**Teaching:** See entry for FM407

**Assessment:** Continuous assessment (100%) in the LT.

Assessment will include a 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be in Summer Term.

## FM4U9 Half Unit Not available in 2022/23

### Risk Management in Financial Markets - Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christian Julliard

**Availability:** This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

**Course content:** See entry for FM409

**Teaching:** See entry for FM409

**Assessment:** Dissertation (90%, 6000 words) and coursework (5%) in the ST.

Presentation (5%).

6,000 word dissertation in lieu of examination (90%) on a topic to be agreed with the course teacher, and coursework (10%). The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission deadline will be towards the end of Summer Term.

## GI402 Half Unit

### Gender, Knowledge and Research Practice

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Marsha Henry

**Availability:** This course is compulsory on the MPhil/PhD in Gender, MSc in Gender and MSc in Gender (Research). This course is available on the MSc in Culture and Society, MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Please note the course may be limited to those taking GI402 as a core course depending on numbers.

**Course content:** This course introduces students to critical epistemological and methodological scholarship relevant for embarking on gender research at graduate and postgraduate level and beyond. The course provides a critique of 'mainstream knowledge' through an exploration of Black, queer, postcolonial and other intersectional feminist theories. In addition, the course offers an engagement with some of the practical, ethical and methodological challenges of conducting gender research and producing feminist knowledge through drawing on a variety of 'disciplinary' experiences and reflections. Finally, the course engages with decolonising and decentring initiatives and questions the place of Gender Studies as an interdisciplinary field. The course asks: what are the implications of producing research within, beyond and without the epistemic centres of global north feminism?

**Teaching:** This course runs in Michaelmas term. It contains both asynchronous and interactive teaching and learning elements. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Proposal Essay (1500 words) in the MT.

**Indicative reading:** Patricia Hill Collins (2000) *Black Feminist Thought: Knowledge, Consciousness and the Politics of Empowerment*. New York: Routledge.

Sara Ahmed (2016) *Living a feminist life*. Duke University Press.  
Uma Narayan and Sandra Harding, eds (2000) *Decentering the Center: Philosophy for a Multicultural, Postcolonial and Feminist World*. Bloomington: Indiana University Press.

**Assessment:** Project (100%, 3000 words) in the LT.

The project includes one part research proposal and one part reflective essay.

## GI403 Half Unit

### Gender and Media Representation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Milo Bettocchi

**Availability:** This course is compulsory on the MSc in Gender, Media and Culture. This course is available on the CEMS Exchange, MBA Exchange, MPhil/PhD in Gender, MSc in Culture and Society, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Policy and Inequalities and MSc in Organisational and Social Psychology. This course is available as an outside option to students on other programmes where regulations permit.

This course will be capped at 40 students.

**Course content:** This course aims to enable students: to think critically about representations of gender in a range of different media; to apply a range of theoretical and methodological approaches to the study of the media and culture; to examine changing representations of gender in the context of wider social changes and to explore questions concerning the interpretation and use of different media formats and content. The course focuses on examples largely drawn from Anglo-American media and usually includes topics such as news media and gender; gendered approaches to contemporary cinema; celebrity culture; online environments and gender; and contemporary cultural representations of feminism. It critically explores the recent history of gender studies and feminist scholarship in relation to media content and considers questions of media representations of gender in relation to dimensions such as sexuality, class, race, age and (dis)ability.

Students will be expected to maintain familiarity with contemporary UK media, although there is opportunity to research and write on other national contexts.

**Teaching:** The course runs across the MT.

There will be a reading week in week 6 in line with department policy.

**Formative coursework:** A short essay to be submitted during MT.

**Indicative reading:**

- Carter C and Steiner L (eds) (2004) *Critical Readings: Media and Gender*
- Dyer, R. (2002) *The Matter of Images: Essays on Representation*.
- Gill, R. (2007) *Gender and the Media*
- Hall, S. (1997) *Representation: Cultural Representations and Signifying Practices*.
- Tasker, Y. and Negra, D. (eds) (2007) *Interrogating Postfeminism: Gender and the Politics of Popular Culture (Console-ing Passions)*.
- van Zoonen, L, (1994) *Feminist Media Studies*.
- Waters ,M (ed) (2011) *Women on Screen*.

**Assessment:** Essay (100%, 3000 words) in the LT.

## GI407 Not available in 2022/23

### Globalisation, Gender and Development

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nazanin Shahrokni

**Availability:** This course is compulsory on the MSc in Gender, Development and Globalisation. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MA in Modern History, MPhil/PhD in Gender, MSc in Development Management, MSc in Development Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Policy and Inequalities, MSc in Human Rights and MSc in Human Rights and Politics. This course is available as an outside option to students on other programmes where regulations permit.

This course cannot be taken alongside GI409 Gender, Globalisation and Development: An Introduction, or GI420 Globalisation, Gender and Development: Theorising Policy and Practice.

This course will be capped at 30 students.

**Course content:** This course will provide students with a thorough knowledge of two key interconnected and intersecting literatures: gender and development and gender and globalisation. We begin by defining and theorising gender, development and globalisation and their operation in material spaces, policy and practice.

The first part of the course considers contemporary theories of globalisation and development and the differences that a gender perspective makes. A particular focus is on how globalisation is associated with widening social, spatial and gender inequalities. Specific reference is made to household inequalities, state policies, global care chain and migrant labourers, the emergence of the "global city," and "natural" disasters and pandemics, and their implications for social and gender inequalities. The final session brings the issues raised in the first part of the course to a conclusion by addressing some alternative visions of social change in the context of a globalised world.

The second half of the course is concerned with theorising policies and practice in the field of gender and international development. The course outlines key contributions to the analysis of power within public policy making processes and examines feminist visions of social change which draw on ideas about capabilities, empowerment, citizenship and gender justice to engage with these policy processes. This is explored in greater detail through case studies of feminist struggles over recognition, redistribution and representation as they play out in relation to particular policy issues, namely violence against women, microfinance, social protection, gender quotas and collective action.

**Teaching:** This course runs across both MT and LT. It contains both asynchronous and interactive teaching and learning elements. There will be a reading week in both terms in week 6 in line with departmental policy.

**Formative coursework:** Essay (1500 words) in the MT.

**Indicative reading:**

- Agarwal, B. (2016) *Gender Challenges* (Vol 1, 2 and 3). India: Oxford University Press.

## GI409 Half Unit

### Gender, Globalisation and Development: An Introduction

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Sharmila Parmanand

**Availability:** This course is compulsory on the MSc in Gender, Development and Globalisation. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPhil/PhD in Gender, MSc in Development Management, MSc in Development Studies, MSc in Empires, Colonialism and Globalisation, MSc in Environment and Development, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Human Geography and Urban Studies (Research), MSc in

Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit. This course will be limited in space availability outside MSc Gender, Development and Globalisation.

**Course content:** This course will provide students with a knowledge of two key interconnected and intersecting literatures: gender and development and gender and globalisation. We begin by defining and theorising gender, development and globalisation and their operation in material spaces, policy and practice. The course considers gender approaches to development such as Women in Development (WID), Women and Development (WAD), and Gender and Development (GAD). A particular focus is on how global development is associated with widening social, spatial and gender inequalities, illustrated by case studies of global integration and uneven development. Specific reference is made to household inequalities, social protection programmes, and microfinance schemes. The final session brings the course to a conclusion by addressing some alternative visions of development and social change in the context of a globalised world.

**Teaching:** This course runs in the Michaelmas Term. It contains both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6, in line with departmental policy.

**Formative coursework:** Essay (1500 words)

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the LT.

## GI410 Half Unit

### Screening the 21st Century: Cinema and Cultural Critique

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Sadie Wearing, Pankhurst House.11.01C

**Availability:** This course is available on the MPhil/PhD in Gender, MSc in Culture and Society, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality) and MSc in Gender, Development and Globalisation. This course is available as an outside option to students on other programmes where regulations permit.

This course will be limited to 30 places.

**Pre-requisites:** Students need to have an awareness of and interest in contemporary cultural theory and film.

**Course content:** The aims of the course are to offer students the opportunity to critically explore contemporary international cinema as a site for the interrogation of contested contemporary social and political processes. The course links cinematic representations to the preoccupations of contemporary cultural theory in relation to themes such as, colonial/postcolonial memory, neo liberalism and cultural dislocations, ethics and subjectivity, gendered migration and gendered violence, environmental degradation and protest, sexuality and representation. The course introduces students to a range of international film and will develop the critical tools for the analysis of both mainstream and marginal (or marginalised) cultural productions. It explores a range of critical and theoretical writing on film considering questions such as cinema as oppositional practice, the emergence of transnational cinema, questions of representation, global spectatorship and 'witnessing' and the affective dimensions of cinema. Indicative films are: *Black Skin White Mask* (dir. Isaac Julien), *Waltz with Bashir* (dir. Ari Folman), *Cache* (dir. Michael Haneke), *The Road to Guantanamo* (dir. Michael Winterbottom), *Parasite* (dir. Bong Joon-Ho), *Portrait of a Lady on Fire* (dir. Céline Sciamma), *Dark Waters* (dir. Todd Haynes).

**Teaching:** This course runs in LT. It will be delivered using both asynchronous and interactive teaching and learning elements. There is a compulsory weekly film screening.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Essay (1500 words) including an element of film analysis in the LT.

**Indicative reading:**

- Downing, L. and Saxton, L. (2010) *Film and Ethics: foreclosed encounters*.

**Assessment:** Essay (100%, 3000 words) in the ST.

## GI411 Half Unit Not available in 2022/23

### Gender, Post/coloniality and Development: Critical Perspectives and New Directions

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Sumi Madhok Pankhurst House, 11.01G

**Availability:** This course is available on the MPhil/PhD in Gender, MSc in Development Management, MSc in Empires, Colonialism and Globalisation, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is limited to 30 places.

**Pre-requisites:** While there are no specific requirements, it is preferred that students have a background in social science or the humanities.

**Course content:** The aim of this course is to introduce students to the growing body of scholarship that critically interrogates coloniality, gender and developmentalism at various postcolonial sites. It provides an opportunity for students to encounter and critically engage with canonical works within postcolonial and decolonial theories alongside those of gender and feminist theory in order to examine the historical and contemporary policy and practices in relation to gender and development. As such, the course combines a study of the historical/textual/cultural/political and philosophical in relation to and alongside the political-economic in order to explore questions of developmentalism, critical race theories, coloniality, decoloniality, subalternity, orientalism, representation, agency, neoliberalism, globalisation, human rights and humanitarianism. Finally, the course also introduces students to new directions in contemporary theoretical thinking that are either explicit critiques of postcolonial scholarship, i.e. texts such as 'Empire' and 'Ethics' or are critical engagements and even critical extensions of postcolonial thinking into new directions e.g. Transnationalism.

**Teaching:** This course runs in Michaelmas Term. It contains both asynchronous and interactive teaching and learning elements. In line with departmental policy, there is a reading week in week 6.

**Formative coursework:** A formative essay (1500 words).

**Indicative reading:** Fanon, Frantz. (1963) *The Wretched of the Earth*. New York: Grove Inc..

Mahmood, S. (2005) *The Politics of Piety*, Princeton University Press.

**Assessment:** Essay (100%, 3000 words) in the LT.

## GI413 Half Unit

### Gender, Race and Militarisation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Marsha Henry

**Availability:** This course is available on the MPhil/PhD in Gender, MSc in Comparative Politics, MSc in Conflict Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Development and Humanitarian Emergencies and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will only have limited places available.

**Course content:** This course will provide students with a critical introduction to militarisation and its gendered and racialised basis and effects. Students will be introduced to theories of militarisation and martial politics; militarised masculinities and femininities; different geopolitical experiences of violence and war; 'diversity' issues within a variety of national militaries; racialised representations of gender and terror; the global colour -line and gendered division of labour in peacekeeping; and the global politics of peace and anti-militarism activities.

**Teaching:** This course runs in the Lent term. It contains both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6 in line with departmental policy.

**Formative coursework:** Blog post (250-500 words) in the LT

**Indicative reading:**

- Cockburn, C. (2012) *Anti-militarism: political and gender dynamics of peace movements*, Palgrave.
- Sjoberg, L., and S. Via, eds. (2010) *Gender, war, and militarism: Feminist perspectives*. New York: Praeger Security International.

- Robin Riley and Naeem Inayatullah. (2006). *Interrogating Imperialism: Conversations on Gender, Race, and War*. New York, NY: Palgrave Macmillan.

**Assessment:** Project (100%, 3000 words) in the ST. This will be an essay-diary.

**GI414 Half Unit****Theorising Gender and Social Policy**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Wendy Sigle PAN 11.01J

**Availability:** This course is compulsory on the MSc in Gender, Policy and Inequalities. This course is available as an outside option to students on other programmes where regulations permit. The course will be limited to 30 places.

**Course content:** This course aims to equip students with an understanding of how feminist scholars use theoretical and analytic concepts to engage with social policy issues and debates. The course provides an overview of mainstream theoretical explanations for the structure and evolution of welfare states, and feminist critiques and modifications of that literature. Students will develop an understanding of how key concepts like citizenship, work, and well-being have been conceptualized and applied in the academic literature to document and explain gendered inequalities. The use of gender as a category of analysis is examined and attention is paid to the potentially modifying effects of other social hierarchies such as race and class.

**Teaching:** This course runs in MT. It will be delivered using both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6, in line with departmental policy.

**Formative coursework:** Group work: Each week, students work with a study group to discuss papers and to complete assignments (presentations, assessments of papers, answers to questions) in preparation for seminars. . Students are expected to submit a 1,500 formative exercise and a self-assessment (attached as a coversheet) during MT.

Waylen, G. (2017). Gendering Institutional Change. In *Oxford Research Encyclopedia of Politics*.

**Assessment:** Project (100%, 3000 words) in the ST.

The production of a final 3000 word report (due in ST: 90% of the final mark) with milestones including a progress report (due the last week of MT), a first draft (due in LT), and 500-1000 word peer review report (due in LT). Participation (completion of all milestones) contributes 5% of the final mark and the peer review, which is assessed, contributes 5%.

**GI415 Half Unit****Gender and European Welfare States**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ania Plomien

**Availability:** This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Sexuality), MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Inequalities and Social Science and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. It is capped at 30 students.

**Course content:** The course investigates the ways in which gender is incorporated into national welfare states and the impact of national structures on the patterns and prevalence of gender inequalities. The course covers the theory and methodology of comparative studies and considers their applicability to the analysis of gender. It also considers feminist critiques of mainstream methodological approaches to the comparative study of social policies. The role of the European Union in the development of gendered policies and outcomes in EU countries provides the point of focus and interrogation. A number of key patterns of inequality and policy areas are studied, including: the organisation of caring services; migration; family policy; provisions for lone parents; the labour market and labour market policies; the practices and roles of men, especially regarding fatherhood; and fertility and aging. In looking at these areas students will be encouraged to compare and contrast different welfare systems and consider the particularism of national approaches.

**Teaching:** This course runs in LT. It will be delivered using both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6 in line with departmental policy.

**Formative coursework:** Students will be asked to prepare seminar facilitation activities in group work and submit a formative piece of work (1500 words) during the LT.

**Indicative reading:** K.M. Anderson (2015) *Social Policy in the European Union*.

D. Béland and R. Mahon (2016) *Advanced Introduction to Social Policy*.

**Assessment:** Essay (100%, 3000 words) in the ST.

**GI417 Half Unit****Feminist Population Politics**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Wendy Sigle PAN 11.01J

**Availability:** This course is available on the MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Population Health and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course considers both the politics of knowledge production in population studies and the politics surrounding international and national population policies. Although population change cannot be described, understood, or responded to without taking into account the wider -- and profoundly gendered -- social, political and economic context,

feminist theory and gender theory have had relatively limited impact on population scholarship. This course explores the implications both theoretically and practically. Students will explore and evaluate the ways that feminist demographers and policy activists have sought to redress social and gender injustices. Moreover, they will be asked to consider how the integration of a feminist and gendered perspective might change the way research is carried out and used to inform policy.

**Teaching:** This course runs in LT. It will be delivered using both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6, in line with departmental policy.

**Formative coursework:** Students will meet weekly with a study group to discuss papers and to complete assignments (presentations, assessments of papers, answers to questions) in preparation for seminars. .

Students are expected to submit a 1,500 formative exercise and a self-assessment (attached as a coversheet).

**Indicative reading:** Eberhardt, P., & Schwenk, H. (2010). Gender Knowledge in Migration Studies and in Practice. *Gender Knowledge and Knowledge Networks in International Political Economy*, 94.

Watkins, S.C. (1993) If all we knew about women was what we read in *Demography*, what would we know? *Demography* 30(4): 551-577.

**Assessment:** Project (100%) in the ST.

The production of a final 3000 word report (due in ST: 90% of the final mark) with milestones including a progress report, a first draft, and an assessed 1000 word peer review report (5% of the final mark). Full participation (completion of all of the milestones) contributes 5% of the final mark.

## GI418 Half Unit

### Feminist Economics and Policy: An Introduction

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ania Plomien

**Availability:** This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities and MSc in Human Resources and Organisations (International Employment Relations/CIPD). This course is available as an outside option to students on other programmes where regulations permit.

There will be 45 places available on this course.

**Pre-requisites:** The course is run by the Department of Gender Studies – an interdisciplinary department. One of the key objectives of the course is to bring a multi-perspectival approach to the understanding of economic processes and the role of policy in attaining economic equality and well-being. As economic processes have a profound influence on social life, gender relations and gender (in)equality, and vice versa, this course seeks to expose students interested in gender and economic issues to the work of Feminist Economists.

An interest in gender issues is essential and undergraduate level course in economics would be an advantage.

**Course content:** Recent decades have seen the emergence of gender equality as a key policy concern and Feminist Economics as a sub discipline. The purpose of the course is to engage with the theoretical foundations and intellectual contributions of Feminist Economics and to develop an analytical understandings

of gender issues with respect to economic processes and policies operating at macro and micro levels. At the macro level, the course explores the implications of contemporary economic and financial governance from a gender perspective, the gender bias in macroeconomic analyses, and the gendered impact of austerity policies and the Covid-19 pandemic. At the micro level, the course analyses the gender dynamics of household and labour market inequalities, engages with the economic foundations and explanations of gender inequality within employment and within the household, focusing on wage and productivity differences and the gender division between 'productive' and 'reproductive' work. Gender as economically significant marker of inequality is contextualised, where possible, in relation to race, social class, sexuality and migrant status. Attention is also paid to the way in which individual well-being is influenced by the level of development and transnational trade relations. Accordingly, the course seeks to bridge the macro-micro divide by drawing together the gendered critique of existing biases in economic thinking and to provide an analytical foundation for alternative approaches to policies that aim to contribute towards securing sustainable development and gender equal well-being.

**Teaching:** This course runs in LT. It will be delivered using both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6 in line with departmental policy.

**Formative coursework:** Essay (1500 words) in the LT.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the ST.

## GI420 Half Unit

### Global Development and Its Discontents: Feminist Perspectives

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nazanin Shahrokni

**Availability:** This course is compulsory on the MSc in Gender, Development and Globalisation. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Development Management, MSc in Development Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Human Geography and Urban Studies (Research), MSc in Human Rights, MSc in Human Rights and Politics, MSc in Regional and Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is

available as an outside option to students on other programmes where regulations permit.

There will be 30 places available on this course, including for those students for whom it is compulsory.

**Course content:** This course engages with the relevant literature on globalisation and its discontents with a particular focus on feminist perspectives. Students will be provided with a thorough knowledge of the different modalities through which gender and other, related, axes of inequalities intersect with the complex processes of globalisation. Globalisation has simultaneously opened and closed spaces and possibilities, it has brought about both enabling and disabling effects, and it has worked through, built on, undermined and underlined various forms of inequality. To capture this complexity, this course focuses on global actors (i.e. networks, elites, and institutions) and sheds light on the three interconnected dimensions and processes of globalisation (economic, political, and cultural), paying particular attention to flows of capital, flows of people, and flows of ideas.

Specific reference is made to state policies and political institutions, migration and migrant labourers, the emergence of the "global city," and "natural" disasters and pandemics, and their implications for social and gender inequalities. Towards the end, we explore, in greater detail, counter-hegemonic movements and feminist struggles over recognition, redistribution and representation.

**Teaching:** This course runs in Lent Term. It contains both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6 in line with departmental policy.

**Formative coursework:** One essay of 1500 words to be handed in midway through the LT.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the ST.

---

## GI421 Half Unit Not available in 2022/23 Sexuality, Gender and Culture

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jacob Breslow and Professor Clare Hemmings

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Culture and Society, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Human Rights and Politics and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 40 students.

**Pre-requisites:** Students wanting to take GI421 should provide a statement about their reasons for wanting to follow the course. This should include background in sexuality or gender studies, areas of related interest and experience, or other conceptual or theoretical grounding that might be relevant. GI421 is an interdisciplinary course with a high theory content, and students who do not provide evidence - e.g. prior courses in gender and/or sexuality, professional or political experience in related areas - of being at the appropriate level in this regard will not be admitted to the course.

**Course content:** 'Sexuality, Gender and Culture' introduces students to historical and theoretical components of the field, and explores case studies of the development of sexual cultures, identities and social movements from the late 19th century to the present. The course provides theoretical foundations in sexuality studies, incorporating intersectional, black feminist, postcolonial, queer, crip, trans, and critical race perspectives.

**Indicative topics include:** colonialism and sexuality, sexualisation of culture; transformation of intimacy; abortion and migration; transgender studies and bisexuality; queer theory and social movements. The course is interdisciplinary and demands a high level of student participation, but does not require a background in the field. It is also available as a first half of a full unit 'Transnational Sexual Politics'.

**Teaching:** This course runs during MT. It contains both asynchronous and interactive teaching and learning elements each week. It is taught alongside students from GI422.

There will be a reading week in week 6 in line with department policy.

**Formative coursework:** One 1500 word critical analysis to be submitted at the end of week 5.

**Indicative reading:**

- Jacqui Alexander (1994) 'Not Just (Any) Body Can Be a Citizen: The Politics of Law, Sexuality and Postcoloniality in Trinidad and Tobago and the Bahamas', *160Feminist Review* 16048: 5-23.160
- Susanne YP Choi and Ming Luo (2016) 'Performative Family: Homosexuality, Marriage and Intergenerational Dynamics in China', *British Journal of Sociology* 67(2): 260-280.
- Michel Foucault (1978) *The History of Sexuality: Vol 1* (New York: Pantheon)
- Clare Hemmings, ed. (2014) 'Sexuality Section', Mary Evans et al, eds, *Handbook of Feminist Theory* (London: Sage).
- Audre Lorde (1978 in 1993) 'The uses of the erotic: the erotic as power' in *The Lesbian and Gay Studies Reader* (London: Routledge)
- Ishita Pande (2012) 'Coming of Age: Law, Sex and Childhood in Late Colonial India', *Gender and History* 24(1): 205-230.

- Gayle Rubin (1984 in 1993) 'Thinking Sex: Notes for a Radical Theory of the Politics of Sexuality', *The Lesbian and Gay Studies Reader* (London: Routledge).
- Laura Ann Stoler (1995) *Race and the Education of Desire* (Durham: Duke University Press).
- Susan Stryker and Talia M. Bettcher (eds.), (2016) "Trans/ Feminisms" [Special Issue] *Transgender Studies Quarterly* 3(1-2).
- H. Sharif 'Herukhuti' Williams (2016) 'Introduction to Afrocentric Decolonizing Kweer Theory and Epistemology of the Erotic', *Journal of Black Sexuality and Relationships* 2(4): 1-31.

**Assessment:** Essay (100%, 3000 words) in the LT.  
Assessment is due at the beginning of LT.

---

## GI422

### Transnational Sexual Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jacob Breslow and Prof Clare Hemmings

**Availability:** This course is compulsory on the MSc in Gender (Sexuality). This course is available on the LLM (extended part-time), LLM (full-time), MA in Modern History, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Global Politics, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit. This course is capped at 30 students.

**Course content:** 'Transnational Sexual Politics' takes a case-study approach to questions of sexuality, gender and culture (in the first term) and to sexuality in the contexts of globalization (in the second). The full unit considers a variety of ways in which sexuality is central to any understanding of the social world, and it explores queer methods for interrogating the world. It is an interdisciplinary course within which intersectional, black feminist, postcolonial, queer, crip, trans, and critical race perspectives are used to interpret particular sexual phenomena and contexts – rights, citizenship, fertility, representation, kinship, asylum and technology, for example. The course will allow a thorough grounding in sexuality and gender studies. Although it is interdisciplinary, it does not have a pre-requisite.

**Teaching:** This course runs across both MT and LT. It contains both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6 in line with departmental policy.

**Formative coursework:** One 1500 word critical analysis to be submitted at the beginning of week 5 (MT); submission of draft abstract for conference presentation by the Friday of week 5 (LT).

**Indicative reading:**

- Jacqui Alexander (2006) *Gay Tourism: Culture and Context* (Binghamton, NY: Haworth Press).
- Clare Hemmings, ed. (2014) 'Sexuality Section', Mary Evans et al, eds, *Handbook of Feminist Theory* (London: Sage).
- Kamala Kempadoo (2004) *Sexing the Caribbean: Gender, Race and Sexual Labour* (New York: Routledge).
- Susanne YP Choi and Ming Luo (2016) 'Performative Family: Homosexuality, Marriage and Intergenerational Dynamics in China', *British Journal of Sociology* 16067(2): 260-280. 160
- Jasbir Puar (2007) *Terrorist Assemblages: Homonationalism in Queer Times* (Durham: Duke UP).
- Mitra Rastegar (2013) 'Emotional Attachments and Secular Imaginings: Western LGBTQ Activism on Iran', *GLQ* 19(1): 1-29.
- Diane Richardson (2000) 'Constructing Sexual Citizenship,

*Theorising Sexual Rights*', *Critical Social Policy* 20(1): 105-135.

- Laura Ann Stoler (1995) *Race and the Education of Desire* (Durham: Duke University Press).
- Susan Stryker and Talia M. Bettcher (eds.), (2016) "Trans/ Feminisms" [Special Issue] *Transgender Studies Quarterly* 3(1-2).
- H. Sharif 'Herukhuti' Williams (2016) 'Introduction to Afrocentric Decolonizing Kweer Theory and Epistemology of the Erotic', *Journal of Black Sexuality and Relationships* 2(4): 1-31.

**Assessment:** Essay (50%, 3000 words) in the ST.

Paper (30%) in the LT.

Critical evaluation (20%) in the MT.

The paper will be submitted for an online student conference at the end of LT, and will include the previous submission of a 300 word abstract.

The critical evaluation will be of a cultural event (virtual lecture; exhibition; performance; conference), and submitted at the end of MT (2000 words).

---

## GI423 Half Unit Not available in 2022/23

### Globalisation and Sexuality

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jacob Breslow

**Availability:** This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Human Rights and MSc in Human Rights and Politics. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students wanting to take GI423 but who are not part of a listed degree programme should provide a statement about their reasons for wanting to follow the course. This should include background in sexuality or gender studies, areas of related interest and experience, or other conceptual or theoretical grounding that might be relevant. GI423 is an interdisciplinary course with a high theory content, and students who do not provide evidence - e.g. prior courses in gender and/or sexuality, professional or political experience in related areas - of being at the appropriate level in this regard will not be admitted to the course.

**Course content:** 'Globalisation and Sexuality' explores the importance of sexuality for global politics and society. Starting from the assumption that 'sexuality matters' in today's globalised world, the course considers histories, theories and contexts within which the role of sexuality is pivotal. Since sexual identities, rights and health are central to citizenship and to how nations and states relate to one another contemporarily, this course combines theory and case study to think through how as well as why sexuality has become so important. Students will be introduced to theories of sexual citizenship and rights, homonationalism and homophobia, affect and fantasy, sexuality and labour, and use these to explore topics such as sex tourism, reproductive technologies, lesbian and gay asylum, abortion, sexual violence and sexual cultures globally. The course is interdisciplinary and takes a transnational approach to sexuality and globalisation. Students will join existing students taking the full unit GI422 for lectures, but may have separate seminars.

**Teaching:** 15 hours of lectures and 10 hours of classes in the LT. Seminars precede lectures on the same day.

**Formative coursework:** An abstract of the student essay (up to 300 words) submitted on Friday of week 5, with written feedback; a detailed outline (up to 2000 words) of the essay to be submitted by Monday of week 9, with written and in person feedback in office hours before the end of term.

**Indicative reading:** Jacqui Alexander (2006) *Gay Tourism: Culture and Context* (Binghamton, NY: Haworth Press)  
Rutvica Andrijašević (2014) 'The Figure of the Trafficked Victim: Gender, Rights and Representation', *The Handbook of Feminist Theory* (London: Sage), pp. 359-373.

Sonia Corrêa et al (2008) *Sexuality, Health and Human Rights* (New

York: Routledge).

Paisley Currah, Richard Juang and Shannon Minter (2006) *Transgender Rights* (University of Minnesota Press).

Angela Davis (1981) 'Racism, Birth Control and Reproductive Rights', *Women, Race and Class* (New York: Vintage Books), pp. 202-221.

Fatima El-Tayeb (2012) "'Gays Who Cannot Properly be Gay": Queer Muslims in the Neoliberal European City', *European Journal of Women's Studies* 19.2: 79-95.

Clare Hemmings, ed. (2014) 'Sexuality Section', Mary Evans et al, eds, *Handbook of Feminist Theory* (London: Sage).

Jasbir Puar (2007) *Terrorist Assemblages: Homonationalism in Queer Times* (Durham: Duke UP);

Laura Ann Stoler (1995) *Race and the Education of Desire* (Durham: Duke University Press);

Susan Stryker and Talia M. Bettcher (eds.), (2016) "Trans/Feminisms" [Special Issue] *TSQ* 3(1-2).

Omise'eke Tinsley (2018) *Ezili's Mirrors: Imagining Black Queer Genders* (Durham: Duke UP).

**Assessment:** Essay (100%, 4000 words) in the ST. Final essay due Monday week 1 of summer term

## GI424 Half Unit

### Gender Theories: An Interdisciplinary Approach

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Sadie Wearing

**Availability:** This course is compulsory on the MPhil/PhD in Gender, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available on the MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The course aims to enable students to: become familiar with the fullest range of gender theories with particular attention to the intersections of gender, sexuality and race; develop a critical appreciation of these different theories of gender; use gender theories to inform their appreciation of existing work in their own disciplines and in an interdisciplinary context; use the analysis of gender as a basis for case study evaluation and research.

It is a half unit course which runs for 15 weeks. It begins with a review of the formative influences on the development of gender theory, including the sex/gender distinction, race and intersectionality, production/reproduction and social structures of gender, theories of power and the relations between the psyche and the social. Building on these foundations it enables students to consider the implications for analysis of a variety of sites and topics including post/coloniality, representation, affect, queer theory, nation, nationalism, and rights. The course considers the impact of gender analysis on key areas of social science investigation, and develops these with particular attention to location, ethics and the importance of global and transnational dimensions. Our expectation is that this course provides a thorough grounding for work across all other courses and for the dissertation module.

**Teaching:** This half-unit foundational course runs across all of MT and the first half of LT. It contains both asynchronous and interactive teaching and learning elements. In LT, the teaching ends just prior to Reading Week. The take-home assessment for the course happens during Reading Week of LT.

**Formative coursework:** Timed assessment to be written during the first term.

**Indicative reading:**

- Valerie Amos and Pratibha Parmar (1984) *Challenging Imperial Feminism*. *Feminist Review* 17: 3-19.
- Sedef Arat-Koç (2018) *Migrant and domestic care workers: Unfree labour, crises of social reproduction and the unsustainability of*

life under 'vagabond capitalism'. In Juanita Elias and Adrienne Roberts, eds. *Handbook on the International Political Economy of Gender*. Cheltenham: Edward Elgar Publishing.

- Judith Butler (1990) *Gender Trouble: Feminism and the Subversion of Identity*. New York: Routledge.
- Kimberle Crenshaw (1989) *Demarginalizing the Intersection of Race and Sex: A Black Feminist Critique of Antidiscrimination Doctrine, Feminist Theory and Antiracist Politics*. *University of Chicago Legal Forum* 139-168.

- Santa Cruz Feminist of Color Collective (2014) *Building on "the Edge of Each Other's Battles": A Feminist of Color Multidimensional Lens*. *Hypatia* 29(1): 23-40

**Assessment:** Exercise (100%) in the LT.

The exercise will be a fixed period timed assessment.

## GI425 Half Unit

### Introduction to Gender, Peace and Security

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Aiko Holvikivi

**Availability:** This course is compulsory on the MSc in Gender, Peace and Security. This course is available on the MSc in Conflict Studies, MSc in Gender, MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in International Development and Humanitarian Emergencies and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be limited to 30 places, including students registered on MSc Gender, Peace and Security.

**Course content:** This course provides a critical examination of gender, peace and security issues in conflict and post-conflict contexts. Specifically, the course focuses on the international Women, Peace and Security (WPS) agenda, which originated in UN Security Council Resolution 1325 (2000), followed by a series of subsequent resolutions to date. The course covers the main pillars of the WPS agenda, namely participation; protection from gendered violence; the prevention of conflict and violence; and gendered approaches to relief and recovery in conflict and post-conflict settings. The course examines a range of issues through a gender and feminist lens.

Topics include: gendered perspectives on war and peace; the socio-legal context of the Women, Peace and Security agenda; the history of Women, Peace and Security laws and policies; definitions and scope of gender-based and sexual violence in conflict; peace processes, peacekeeping and humanitarian assistance; and evaluation of a range of different critiques of the Women, Peace and Security agenda.

**Teaching:** This course runs in the Michaelmas Term. It contains both asynchronous and interactive teaching and learning elements. Students will have a reading week in Week 6 in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:**

- Basu, S., Kirby, P. & Shepherd, L.J. (eds) (2020) *New Directions in Women, Peace and Security*, Bristol University Press
- Cohn, C. (ed.) (2013) *Women and Wars*, Polity Press 160

- Coomaraswamy, R. (ed.) (2015) *Preventing Conflict, Transforming Justice, Securing the Peace: Global Study on the Implementation of United Nations Security Council Resolution 1325*, UN Women
- Davies, S.E. & True, J. (eds) (2018) *The Oxford Handbook of Women Peace and Security*, Oxford University Press
- Enloe, C. (2010), *Nimo's War, Emma's War: Making Feminist Sense of the Iraq War*, University of California Press
- Olonisakin, F., Barnes, K., & 160Ikpe, E. (eds) (2010) *Women, Peace and Security: Translating Policy into Practice*, Routledge
- Otto, D. and 160Heathcote, G. (eds) (2014) *Rethinking Peacekeeping, Gender Equality and Collective Security*, Palgrave

**Assessment:** Essay (100%, 3000 words) in the LT.  
Summative assessment to be submitted in the first week of LT.

## GI426 Half Unit Gender and Human Rights

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr SM Rodriguez and Professor Sumi Madhok

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Relations (Research) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. The course is likely to have restricted space availability.

**Pre-requisites:** A background in the Humanities and/or the Social Sciences with a basic familiarity with human rights and/or gender studies.

**Course content:** This course will provide the students with a transnational and intersectional gender perspective on contemporary theories and practices of rights/human rights and humanitarianism. It brings together different sets of scholarship: gender theories, decolonial, queer and postcolonial scholarship, theoretical perspectives on human rights alongside with legal and policy perspectives - and will be of interest to students wanting to study the question of human rights in an interdisciplinary manner but also one that is crucially sutured to the question of gender. Consequently, the course will introduce students to key scholars: CLR James, Sylvia Wynter, Gayatri Spivak, Michel Rolph Trouillot, Ratna Kapur, Hannah Arendt, Audra Simpson, Walter Dignolo, Giorgio Agamben, Jacques Rancière, Judith Butler, Lila Abu Lughod, Wendy Brown among others while drawing attention to the evolution and working of international legal frameworks for securing women's rights and other marginal groups. The course will pay special attention to the struggles over 'humanity', 'civilisation' and 'indigeneity', as well as to tensions between citizenship rights and human rights, and the transformation of the former in the light of the latter. It will also focus on feminist demands and struggles over sexuality, sexual rights, bodily rights, culture, development and citizenship; over entitlements to material resources; to gendered protections in conflict; and on vulnerability and precarity under neoliberal economic and political regimes. The course is focused on encouraging critical thinking on human rights together with introducing students to alternative, decolonial and anti colonial perspectives on rights and human rights.

**Teaching:** This course runs in Lent Term. It contains both asynchronous and interactive teaching and learning elements. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Formative essay assignment.

### Indicative reading:

- Trouillot, M.R., 1995. *Silencing the past: Power and the production of history*. Beacon Press.

**Assessment:** Essay (100%, 3000 words) in the ST.

## GI427 Half Unit Advanced Issues in Gender, Peace and Security

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Marsha Henry

**Availability:** This course is available on the MSc in Gender, Peace and Security. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have completed Introduction to Gender, Peace and Security (GI425).

**Course content:** Advanced Issues in Gender, Peace and Security provides an in-depth examination of peace and security issues from a gender perspective. The course further explores issues emerging from, and beyond, the Women Peace and Security agenda (WPS) and specifically considers areas not covered in as much depth as in the prerequisite (GI425) course, including: 1) critical approaches to peace and security: feminist foreign policy; queer perspectives on conflict and post-conflict spaces; GPS in cultural perspective 2) understanding implementation: perspectives on national action plans; institutional gender work; and peace and security case studies 3) violence, masculinities and accountability: conflict-related gender-based violence; men, peace and security; and resistance and backlash. The course ends with a workshop.

**Teaching:** This course runs in Lent Term. It contains both asynchronous and interactive teaching and learning elements. Students will have a reading week in week 6 in line with departmental policy.

**Formative coursework:** Essay title and essay abstract for written feedback and to present at workshop. Students can present this work at a workshop at the end of term for verbal feedback. Students will be organised into panels and present to the full group and provide peer feedback to each other's work.

- Indicative reading:** Amiry, Suad (2007) *Sharon and My Mother in Law: Ramallah Diaries*, Knopf Doubleday.
- Cockburn, C, (2004) 'The Continuum of Violence: A Gender Perspective on War and Peace', in Wenona Giles and Jennifer Hyndman (eds), *Sites of Violence: Gender and Conflict Zones* (Los Angeles: University of California Press).

- Väyrynen, Tarja, Parashar, Swati, Féron, Elise, Confortini, Catia

Cecilia (eds). (2021) Routledge Handbook of Feminist Peace Research (Routledge).

**Assessment:** Essay (100%, 3000 words) in the ST.

## GI428 Half Unit Bodies, Culture and Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Leticia Sabsay

**Availability:** This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation and MSc in Gender, Policy and Inequalities. This course is available as an outside option to students on other programmes where regulations permit. This course is limited to 30 students.

**Course content:** 'Bodies, Culture and Politics' explores different constructions and understandings of gendered, racialised and sexualised bodies, with a focus on how these have been mobilised by transnational artistic and cultural practices and politics of resistance. Bodies have been at the centre of renewed debates in the light of the emergence of new critical approaches within the social sciences and the humanities and the developments of the natural sciences. Parallel to these debates, increasing attention has been paid to the significance of bodies in contemporary democratic politics. In the last decades, the uses of bodies and the arts in popular mobilisations and political activism have acquired renewed relevance, hand in hand with transnational dialogues and exchanges. Focusing on these trends, the course considers different theoretical approaches to bodies and embodiment (i.e. phenomenological, deconstructivist, materialist, psychoanalytic), and a set of related areas of inquiry, including the materiality of bodies, the differential value socially assigned to bodies, the affective dimension of embodiment, intersectional processes of racialisation, gendering and sexualisation, vulnerability, beauty ideals, and (dis)ability. These questions will inform our exploration of the imaginaries of the body mobilised by feminist and queer political art, activism, and cultural practices, as well as popular mobilisations and anti-racist and anti-austerity social movements, among others.

**Teaching:** The course runs across the LT.

In line with department policy, this course will have a reading week in week 6.

**Formative coursework:** Students will be expected to produce 1 project and 1 presentation in the LT.

**Indicative reading:**

- Ahmed, Sara (2006) *Queer Phenomenology*
- Braidotti, Rosi (1994) *Nomadic Subjects: Embodiment and Sexual Difference in Contemporary Feminist Theory*

**Assessment:** Essay (100%, 3000 words) in the ST.

## GI429 Half Unit

### Archival Interventions: Feminist, Queer and Decolonial Approaches

**This information is for the 2022/23 session.**

**Teacher responsible:** Clare Hemmings PAN

**Availability:** This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** The course is available for any MSc student at LSE, but students from outside the Dept of Gender Studies will need to seek permission to register. They will need provide a statement that shows a strong background in feminist, queer or post/decolonial theories, or a background in archives or library studies. These statements will be reviewed and entry cannot be guaranteed.

**Course content:** The course will foreground an interdisciplinary approach to the archive that provides students with skills to approach archival work for their own research, and embed them in the critical work on archives that characterises much of the secondary and theoretical literature in the field. The course introduces students to archives both close to home – the Hall Carpenter Archive and the Women's Library, both at LSE – and further afield – within London, the UK and transnationally, and online. It highlights the importance of archives for research in gender studies, and teaches some key methods for archival data management and engagement. It explores the importance of archives generated through social movements as well as or as a critique of e.g. national archives and asks students to think about how to generate their own archives. The course's critical perspective assumes that the prioritisation of sources and the gaps within archives are fundamental to the generation of knowledge: what is lost is as important as what is visible or what remains. Students will be introduced to work that highlights the colonial, racist, homophobic and sexist nature of some archiving practices (and dominant archives) and will be asked to think about the kinds of critiques that transform our archival legacy. Finally, the course will encourage students to experiment with archives, in order to expand what we think of as an archive and to intervene to transform 'archival space'. Drawing on work on 'the sensed archive', on memoir, fiction and visual art practice, the course considers ways of bringing archives to life.

The course will be divided into three parts. The first '**archival fabrications**' asks what an archive is, how feminist, queer and critical race theorists have generated them, and will explore some fundamental techniques and issues that archiving presents to students. This will allow for the development of some methodological training and will engage students on the question of sources and how to gather or interpret them. Students will be introduced to oral history, online and social movement archives as well as the curation and form of more institutionalised archives. The second, '**archival readings**' highlights the different world-views archives generate from a critical perspective, foregrounding issues of nationalism, memorialisation, sexism and heteronormativity within archives and their curation. It also encourages students to think about alternative ways of understanding and reading archives, focused on 'exploring the gaps' that are inevitably part of any archival project. What kinds of reading tactics have feminist, queer and/or postcolonial critics developed for intervening in archives and to what effect? How might these tactics be harnessed for students' own research? The final part, '**archival experiments**' introduces students to a range of creative, interdisciplinary methods that generate new archives from a critical perspective (and moving beyond critique). Students will be introduced to experiments that foreground alternative sources, orderings, collections and imaginings as a way of extending archival knowledge. For example, black feminist work on 'critical

fabulation' as a storytelling technique has been key to providing fuller archival knowledge of everyday lives; queer work on the sensed archive has extended the disciplinary range of archival sources; and feminist artists and activists have played with sources (and made others) in order to transform what we think of as past, present and future. Students will be asked to consider their own archival practice through all three parts of the course.

**Teaching:** This course runs in LT. There will be a reading week in week 6 in line with departmental policy.

**Formative coursework:** Students will visit an archive of their choice (online or in person) and narrate their experience of the archive. What work does the archive do? How is the archive organised? What happened when they visited? Based on their visit, they will identify a research question they will use as the basis of further exploration for the summative. The formative is a 1500 word piece (due by the beginning of week 7), and should include a detailed account of the archive itself, the encounter with the space and its organisation, the research that drew you to the archive, and what you are hoping to learn.

NB. Students will be given lots of support for this process - LSE archivists will come to the workshops to introduce students to the range of materials/sources at the School; students will be given a list of possible archives to visit in person or online; and they will have at least one workshop devoted to the needs of the formative, including the importance of identifying a research question going forward.

- Tanya Tagaq (2018) *Split Tooth* (Viking)

**Assessment:** Project (100%, 3000 words) in the LT.

Based on the formative, students will present and critically engage the archive they have visited as their course project. The assessment will include an extended account of the archive, any visit(s) made, encounters with the materials and people in the archive and methods used to access materials. Students will be supported to identify a key research question for exploring the

archive (as part of their formative) and will be asked to critically assess the archive space from the perspective of that question. In line with the material and approaches covered in the course, students will also be encouraged (with close supervision) to integrate interdisciplinary and experiment approaches to the field. 3000 words split into background and archival encounter (part 1) and analysis (part 2) [1st Monday of ST, or Tuesday if a bank holiday]

## GI430 Half Unit Not available in 2022/23 Intersectional Inequalities in the Agro-Food System

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Anouk Patel-Campillo PAN11.01.M

**Availability:** This course is available on the MSc in Gender, MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** In the past decades, there has been unprecedented change in the ways in which food is produced, distributed, and consumed. Scholars have grappled to understand the nature of systemic change and capture the processes and mechanisms that characterize it to shed light on the impact that agro-food system restructuring has on people and places. This course takes an intersectional and interdisciplinary approach to the analysis of agro-food system restructuring across scale (world region, national and transnational), space (flows, circulation, (in)mobility), and place (household, farm/food processing factory, community) to highlight the ways in which transformations in/of the agro-food system reflect struggles over claims and governance mechanisms by economic actors, states, and civil society. In the first part of the course, the students will be introduced to (macro-level) causes and effects of agro-food system restructuring. The themes covered in this part of the course include trade and the corporate food regime to illustrate the ways in which globalization, neoliberalism and institutional architectures influence the geopolitics of the agro-food system while creating or maintaining macro-level and intersectional inequalities. The second part of the course advances a granular understanding of the lived experiences of individuals, households and communities whose re/productive activities are central to the agro-food system and whose lives and environs are most affected by these transformations. Some of the themes covered in this part of the course include household gender inequality, land grabbing, and extractivism, among others. The course will end by examining some alternative paradigms for a more just and equitable agro-food system.

**Teaching:** This course runs in LT. It will be delivered using both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6 in line with departmental policy.

**Formative coursework:** Students will be expected to produce one 1500 word essay in the LT.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the ST Week 1.

## GI499

### Dissertation - Independent Research Project

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nazanin Shahrokni and faculty of Department of Gender Studies.

**Availability:** This course is compulsory on the MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available on the MPhil/PhD in Gender. This course is not available as an outside option.

**Course content:** The Independent Research Project is a student-led module facilitating learning on how to conduct original research independently, with support to develop research ideas and to achieve research 'milestones' during development stages. The completion of the Independent Research Project module entails the following:

- Achievement of all 'milestones'/ development stages of your project throughout the academic year.
- Completion of GI499 Methodologies Series - attendance at all compulsory (varies between six to eight) and a minimum of three optional classes.
- Submission of a dissertation/independent study project, meeting departmental standards and requirements.

The Independent Research Project and resulting dissertation may be on any approved topic within the field of the MSc programme studied.

The 'methodologies series' provides introductory compulsory and optional workshops in the Michaelmas, Lent and Summer Terms designed to provide support for the conception, development and completion of the Independent Research Project. Students will be introduced to dissertation guidelines, common difficulties, ethical issues, basics in research practice, managing sources, the process of research and writing, and ways of creating research impact.

The sessions will consider challenges raised by quantitative and qualitative methods, and include examples from and approaches to policy research, interviewing, discourse analysis, oral histories, archival studies, and visual and media analysis. The workshops may vary and are taught within the Department of Gender Studies according to expertise, and will involve student participation.

**Teaching:** The 'methodologies series' involves a combination of compulsory and optional dissertation workshops spread across

the MT, LT and ST. It will be delivered using both asynchronous and interactive teaching and learning elements.

Students are provided supervision for the Independent Research Project during the LT and ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

- Weiss, Robert S. (1995) *Learning From Strangers: The Art and Method of Qualitative Interview Studies*. NY: The Free Press.

**Assessment:** Dissertation (100%, 10000 words) in August.

Additionally, in the LT students will submit milestone documents:

- (a) title or topic of research;
- (b) summary proposal including research question, methodological and analytical / theoretical approach;
- (c) and an annotated bibliography at the beginning of Summer Term.

## GV408 Half Unit Not available in 2022/23

### Contemporary Disputes about Justice

**This information is for the 2022/23 session.**

**Teacher responsible:** Bruno Leipold

**Availability:** This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Theory.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access and is capped at two groups) and demand is typically very high. Priority is given to students on the MSc in Political Theory; students from outside this programme may not get a place.

**Pre-requisites:** None, though some previous exposure to normative political theory may be an advantage.

**Course content:** The course offers a critical analysis of key debates about justice which have followed the publication of John Rawls's *A Theory of Justice* in 1971. The first part of the course focuses on Rawls's own theory of justice as fairness and critiques of that theory by liberals, feminists, socialists and critical race theorists. The second part of the course explores a number of alternative accounts of justice, such as Iris Marion Young's focus on injustice and oppression, and some of the egalitarian alternatives to Rawls's difference principle, such as Ronald Dworkin's equality of resources and Elizabeth Anderson's democratic equality. The final third of the course delves into various ways in which discussions of justice have been extended and applied. This includes discussion of whether principles of domestic justice apply globally; how we should understand historical injustice and what remedies and reparations are justified in light of those injustices; and what sort of economic systems could realise the demands of justice, such as a property-owning democracy and liberal socialism, as well as discussion of specific

economic institutions, such as workplace democracy and universal basic income.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 15 hours in the Lent Term. Some or all of this teaching may be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in week 6 of the LT for private study and formative/summative assessment preparation.

**Formative coursework:** All students are expected to submit one formative (non-assessed) essay.

**Indicative reading:** J. Rawls, *A Theory of Justice*; Susan Moller Okin, *Justice, Gender and the Family*; Iris Marion Young, *Justice and the Politics of Difference*; Elizabeth Anderson 'What is the Point of Equality?' *Ethics*; Ronald Dworkin 'What is Equality? Part 2: Equality of Resources', *Philosophy and Public Affairs*; Charles Beitz, *Political Theory and International Relations*; Lea Ypi, *Global Justice & The Political Avant-Garde*; David Miller, *National Responsibility & Global Justice*; Laura Valentini, *Justice in a Globalized World*.

**Assessment:** Essay (100%, 4000 words).

## **GV432 Half Unit Government and Politics in China**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Chun Lin

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in Global Politics, MSc in International and Asian History and MSc in Political Economy of Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. Priority will be given to students enrolled on the MSc in Comparative Politics and MSc in Global Politics.

**Course content:** Contemporary experiences and contradictions of socioeconomic and political transformations of China since 1949 and especially 1978; their rival explanations and interpretations: Often in comparison with other postcommunist transitions, other Asian states and other postcolonial and post-cold war national trajectories, our discussions cover the evolving historical, sociological, international and geopolitical contexts of Chinese development. We focus on changes: (re)configuration of the Chinese nation through revolutions and reforms, and the country's changing position in the world – social and political geography and demography; state power at all levels of governance, central-local interactions and semi-federalism; bureaucracy as tradition and as invention; political economy, market transition and global integration; social structure and organisation; class, ethnic, and gender relations; ideology, cultural politics, and issues concerning democracy and legitimacy; competing nationalisms; "one country, two systems" and the Taiwan question; national security and defence, the military, foreign policy involvement and global repositioning. Students are expected to gain extensive historical and empirical knowledge about the PRC, as well as an ability to tackle related social science conceptual and theoretical questions.

**Teaching:** This course will be delivered through a combination of seminars and lectures amounting to a minimum of 25 hours in the Michaelmas term. Week 6 is a reading week and dedicated to essay support.

**Formative coursework:** Students are required to give one seminar presentation, and to write one 1,500 word essay.

**Indicative reading:**

- J Gray, *Rebellions and Revolutions* (2003)
- M Meisner, *The Deng Xiaoping Era* (1996)
- C Bramall, *Chinese Economic Development* (2008)
- P Nolan, *Finance and the Real Economy* (2020)
- CK Lee, *Against the Law* (2007)
- S Helmann and E Perry, *Mao's Invisible Hand* (2011)
- V Shue and P Thornton, *To Govern China* (2017)

• T Saich, *From Rebel to Ruler* (2021)

• W Tang, *Populist Authoritarianism* (2016)

• K Brown, *China's Dream* (2018)

**Assessment:** Essay (100%, 4000 words).

## **GV439 Half Unit Government and Politics in Central and Eastern Europe**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Vesselin Dimitrov

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students on the listed programmes and students on other programmes may not get a place.

**Course content:** The course provides an analytical assessment of the transition from communism to liberal democracy in Central and Eastern Europe and integration with the European Union, including the Eurozone. The course offers an in-depth analysis of institutions, party systems, government and public administration, nationalism, and EU integration, including the Eurozone. Topics covered include: The Communist system. Constitution-making and the development of democratic party systems. Reform of executive institutions and public administration. (Mis)management of ethnic conflict: the case of Yugoslavia. Integration with the European Union, including the Eurozone.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 32 hours in the Lent Term and Summer Term.

There will be a reading week in Week 6 of the LT for private study and formative/summative assessment preparation.

**Formative coursework:** Students are required to produce two essays in the Lent Term.

**Indicative reading:** V Dimitrov, K H Goetz and H Wollmann, *Governing after Communism: Institutions and Policymaking*; A Przeworski, *Democracy and the Market*; H Grabbe, *The EU's Transformative Power: Europeanization through Conditionality in Central and Eastern Europe*; J Elster et al, *Institutional Design in Post-Communist Societies*; R Taras (Ed), *Postcommunist Presidents*; R Crampton, *Eastern Europe in the Twentieth Century*, 2nd edn; S White, P G Lewis and J Batt (Eds), *Developments in Central and East European Politics* 5.

**Assessment:** Online assessment (100%) in the ST. Online assessment duration: 7 days in the ST.

## **GV441 Half Unit States and Markets**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr David Woodruff

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Development Studies, MSc in Global Politics, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 3 groups. Priority will be given to MSc Comparative Politics students.

**Course content:** To introduce politics students to basic economic

theorising; to discuss the nature of markets; review contemporary discussions regarding the role of the state in the economy; provide a comparison of the relationship of states and markets in different political settings and historical contexts. Indicative topics: The state and the institutional foundations of markets; states and markets in the Great Depression; domestic and international monetary institutions; varieties of capitalism and change in varieties of capitalism; economics and politics of market bubbles; politics and policy in the financial crisis of 2007-2009; the Eurozone crisis.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 28 and a half hours in the Michaelmas Term.

There will be a reading week in Week 6 of the MT.

**Formative coursework:** All students are expected to submit one non-assessed essay.

**Indicative reading:** Block, Fred. "The Roles of the State in the Economy." *The Handbook of Economic Sociology*, edited by Neil J Smelser and Richard Swedberg, Princeton University Press, 1994, pp. 691–710.

Keynes, John Maynard. "The Means to Prosperity." *The Collected Writings of John Maynard Keynes*, edited by Elizabeth Johnson and Donald Moggridge, vol. VI, Cambridge University Press, 1978, pp. 335–66, doi:10.1017/UPO9781139524162.

Fourcade Gourinchas, Marion, and Sarah L. Babb. "The Rebirth of the Liberal Creed: Paths to Neoliberalism in Four Countries." *American Journal of Sociology*, vol. 108, no. 3, 2002, pp. 533–79, doi:10.1086/367922.

**Assessment:** Online assessment (100%) in January.

---

## GV444 Half Unit Not available in 2022/23 Democracy and Development in Latin America

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Francisco Panizza

**Availability:** This course is available on the MSc in Comparative Politics and MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other postgraduate students may follow the course with permission. This course is capped at 2 groups. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

**Course content:** The course studies the relations between democracy, political institutions and economic development in contemporary Latin America. It aims at providing information and developing skills for independent analysis of the advances and setbacks of democracy and development in the region. Although due attention is given to country differences, the course approaches the study of democracy and development in the region thematically rather than on a country by country basis. The first five weeks focus on the study of democracy and political institutions. Topics to be covered include the condition of democracy, the nature of the state, presidentialism, parties and party systems, civil society and social movements and informal institutions. The second half of the course studies the economic development of the region since transition to democracy in the 1980s. It looks at the economic context of democratisation, the politics of neoliberal reform in the 1990s, attempts at alternative models of development in the early 21st century and the social and economic transformations of the region over the past decade.

**Teaching:** This course provides a combination of seminars and lectures totalling 20 hours in the Lent term and 2 hours in the Summer term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in Week 6 of the LT.

**Formative coursework:** All students are expected to submit one non-assessed essay and to make at least one seminar presentation, as well as contribute to group discussions.

**Indicative reading:** ECLAC, Preliminary Overview of the Economies of Latin America and the Caribbean 2020 ([www.cepal.org](http://www.cepal.org)); ECLAC Social Panorama of Latin America 2020 ([www.cepal.org](http://www.cepal.org)); Forewarker J and D. Treviso (eds) (2016) *Democracy and its Discontents in Latin America*. Grugel, J. and P. Ruggiero (2009) *Governance After Neoliberalism in Latin America* Helmen, G. and S. Levitsky (eds.) *Informal Institutions and Democracy. Lessons from Latin America*. Mainwaring S. (2018) *Party Systems in Latin America*; Mainwaring, S. and A. Perez Linan (2015) *Cross Currents in Latin America*, *Journal of Democracy* 26 (1); Panizza, F. (2009) *Contemporary Latin America: Development and Democracy Beyond the Washington Consensus*, Philip, G. and F. Panizza (2011) *The Triumph of Politics. The Return of the Left in Venezuela, Bolivia and Ecuador*; O'Donnell, G. (1994) 'Delegative Democracy' *Journal of Democracy* 5, 1; Schneider, B. R. (2013) *Hierarchical Capitalism in Latin America*.

**Assessment:** Exam (60%, duration: 2 hours) in the summer exam period.

Essay (30%) and class participation (10%) in the LT.

---

## GV450 Half Unit Not available in 2022/23 European Politics: Comparative Analysis

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Vesselin Dimitrov, Prof Michael Bruter, Dr Eiko Thielemann, Dr Florian Foos

**Availability:** This course is available on the MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

**Course content:** The course is intended to provide students with a systematic introduction to central conceptual and theoretical debates in the comparative analysis of politics and government in Europe. The core syllabus focuses on both traditional fields of comparative enquiry, such as the study of party competition and voting behaviour, and emerging fields of interest, such as national and European identities, and immigration. The course takes a thematic approach and places particular emphasis on the diverse experiences of liberal democracy in individual European countries. The main themes addressed include: Transformation of European politics; electoral behaviour and party systems; government formation and coalitions; regionalism and federalism; national and European identities; immigration.

**Teaching:** 15 hours of lectures and 18 hours of seminars in the MT.

There will be a reading week in Week 6 of the MT for private study and assessment preparation.

**Formative coursework:** All students are expected to submit one formative essay and make one seminar presentation.

**Indicative reading:** Readings include: T Bale, *European Politics: A Comparative Introduction*, 4th ed; M Gallagher et al, *Representative Government in Modern Europe*, 5th ed; P Heywood et al (Eds), *Developments in European Politics*; M Bruter, *Citizens of Europe*; S Hix and B Hoyland, *The Political System of the European Union*, 3rd edition; J Hayward & A Menon (Eds), *Governing Europe*; A Lijphart, *Patterns of Democracy*, 2nd ed; Y Deloye & M Bruter (Eds) *Encyclopaedia of European Elections*; K Shepsle & P Bonchek, *Analysing Politics*; G Cox, *Making Votes Count*; G Tsebelis, *Veto Players*.

**Assessment:** Essay (100%, 3000 words).

---

## GV454 Half Unit Parties, Elections and Governments

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Torun Dewan

**Availability:** This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po) and MSc in Political Science and Political Economy. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The course focuses on key topics in political science concerning voting and representation. Topics covered include:

- Party and Candidate Strategy
- The Role and Origins of Parties
- Government Formation and Termination
- Electoral Systems: Franchise, Ballot, and Allocation formulas
- Leadership
- Political Careers
- Government Accountability

Examples will be drawn from a wide range of democracies.

**Teaching:** This course is delivered through seminars totalling 20 hours across the Lent Term. There is a reading week in Week 6 of the LT.

**Formative coursework:** All students are expected to submit one non-assessed essay.

**Indicative reading:** The course is focussed mainly on journal articles. However the following books are relevant to some of the topics covered:

Gary Cox, *Making Votes Count* (1995); Gary Cox & Mathew McCubbins, *Setting the Agenda* (2005); George Tsebelis, *Veto Players* (2002); Kenneth Shepsle and Mark Bonchuck, *Analysing Politics* (1997); Tim Besley, *Principled Agents* (2005); John Aldrich, *Why Parties* (1995); Bruce Bueno de Mesquita, Alastair Smith, Randolph Siverson and James Morrow, *The Logic of Political Survival* (2003); Giovanni Sartori, *Comparative Constitutional Engineering* (1997); Michael Laver & Norman Schofield, *MultiParty Government: The Politics of Coalition in Europe* (1990).

**Assessment:** Essay (100%).

## GV467 Half Unit Introduction to Comparative Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mathias Poertner

**Availability:** This course is compulsory on the MSc in Comparative Politics. This course is available on the MSc in China in Comparative Perspective. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students from the MSc in China in Comparative Perspective will be accepted onto the course if space permits.

**Course content:** This course serves as the 'core', compulsory course for the MSc in Comparative Politics and is intended to provide an overarching theoretical and methodological backdrop for all of the diverse course offerings available to students on this programme. The course introduces students to the field of Comparative Politics as represented in contemporary journals like *World Politics*, *Comparative Political Studies*, and *Comparative Studies in Society and History*, and among the various members of Faculty with Comparative Politics interests in the Government Department here at the LSE. Students examine the theoretical and methodological underpinnings of Comparative Politics, important critiques of these underpinnings, and diverse examples of 'best practice' in research and writing in this sub-field of the discipline of Political Science.

Lectures and seminar discussions focus both on important areas of research in comparative politics and methodological challenges

involved. Readings treat such variegated topics of inquiry and debate in comparative politics as democracy, ethnic conflict, civil society, and revolutions.

The course does not follow a 'great books' approach nor does it rely on a textbook. Instead, the course treats examples of real existing Comparative Politics as practiced - and published - by leading scholars in the field in recent years. These examples are chosen to cover diverse forms of comparison, diverse modes of analysis, diverse topic areas, and diverse countries and regions of the world.

Cutting across these forms of diversity are a set of questions that will be addressed throughout the course concerning the possibilities and limitations of various methods of comparative analysis for explaining observable patterns in politics.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours in the Michaelmas Term. This course also includes a reading week in MT Week 6.

**Formative coursework:** One unassessed essay of roughly 1,500 words.

**Indicative reading:** Theda Skocpol, *States and Social Revolutions*. Hall, Peter A. 'Adapting Methodology to Ontology in Comparative Politics'. Doner, Richard F., Bryan K. Ritchie, and Dan Slater 'Systemic Vulnerability and the Origins of Developmental States: Northeast and Southeast Asia in Comparative Perspective'. David Collier and Henry Brady, *Rethinking Social Inquiry*.

**Assessment:** Essay (100%) in the LT.

## GV477 Half Unit Comparative Public Policy Change

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Michael Lerner

**Availability:** This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped at 2 groups.

**Pre-requisites:** Students should normally be taking GV4E9 Approaches and Issues in Public Policy and Administration or already have a good knowledge of comparative public policy. Waiving of these requirements will be at the discretion of the course teacher.

**Course content:** The course examines explanations of policy change using comparative methods.

The course will focus on cases in key policy domains (chosen according to the literature available and interest for wider analytical questions, as well as the expertise available), but any pair of two jurisdictions can be used as examples in the assessed essay. Key topics include social policy, education reform, and environmental policy.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across the Lent Term. This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students will write one unassessed essay during the term.

**Indicative reading:** There is no single textbook but the following are particularly useful introductions:

A Dodds, *Comparative Public Policy* (Basingstoke, Palgrave, 2018); Various authors, Special Issue: Twenty years of the Journal of Comparative Policy Analysis: Research and Practice, *Journal of Comparative Policy Analysis: Research and Practice*, Volume 20, Issue 1 (2018); and M Moran, M Rein, and RE Goodin (eds) *The Oxford Handbook of Public Policy* (2008).

**Assessment:** Essay (80%, 3000 words) in the ST.  
Class participation (20%) in the LT.

---

## GV481 Half Unit

### Quantitative Analysis for Political Science

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mathilde Emeriau

**Availability:** This course is compulsory on the MSc in Political Science and Political Economy. This course is available on the MRes/PhD in Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

MSc Political Science and Political Economy students will be granted priority access as this is a compulsory course for their programme. Other postgraduates wanting to take the course (space permitting) require the permission of the teachers responsible.

**Course content:** The course provides an introduction to quantitative thinking in the field of political science. Its goal is to give students the tools to ask the right questions, be skeptical when appropriate, and distinguish between useful and misleading evidence. Students will be introduced to the basic toolkit of quantitative analysis, which includes hypothesis testing, regression, experiments, differences in differences, and regression discontinuity. Students will also learn how to use a statistical software program to organize and analyze data.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours in the Michaelmas Term, with an additional 2 hours for a revision lecture in the Summer Term. There will be a reading week in Michaelmas Term Week 6.

**Formative coursework:** Two problem sets.

**Indicative reading:** Imai, K., & Bougher, L. D. (2021). *Quantitative Social Science: An Introduction in Stata*. Princeton University Press.

**Assessment:** Coursework (50%) in the LT.

Online assessment (50%) in the ST.

Online assessment duration: 7 days in the ST.

The coursework will consist of a data analysis exercise using Stata.

---

## GV482 Half Unit

### Political Science and Political Economy: Current Issues

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Stephane Wolton

**Availability:** This course is compulsory on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

MSc Political Science and Political Economy students will be granted priority access as this is a compulsory course on this programme. Other postgraduates wanting to take the course (space permitting) require the permission of the teachers responsible.

**Pre-requisites:** Students should either have attended GV4C8 and GV481 or equivalent courses. Knowledge of game theory at the level of GV4C8 and empirical method to the level of GV481 is required.

**Course content:** The course will cover four topics in political science and political economy. Each topic will be covered over two to three weeks. During these weeks, students will learn how game theory and empirical methods can be used to understand and think critically about pressing political issues. For the academic year 2022-23, the topics covered will be: 1) The critiques of democracy, 2) Populism, 3) Discrimination, 4) Autocracy or democracy?. During the lecture, students will be taught important papers on the

topics covered. Seminars will be of two sorts. Some seminars will consist of replication exercises (Weeks 1, 5, 8, 9, and 11). Others will be problem set based (Weeks 2, 3, 5, 7, and 10). All seminars will be related to topics viewed during the lectures.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Lent Term (20 hours of lectures and 20 hours of seminars). There will also be a take-home mock exam and a two-hour revision lecture in the Summer Term.

There will be a reading week in LT Week 6.

**Formative coursework:** Students will hand in one problem set and one replication exercise before the reading week. There will also be a take-home mock exam in the Summer Term.

**Indicative reading:** Mostly journal articles. The reading list varies each year.

**Assessment:** Coursework (50%).

Online assessment (50%) in the ST.

The coursework will consist of a research project on a political science issue picked by the course convenor. Students will be provided with a dataset and will be asked to empirically investigate the question at hand. The online exam will consist of a problem question using game theory and an essay question (estimated amount of effort required for the online exam: 3 hours in a 24 hour-period, though there is no limit on how much time the student spends on the exam during the 24-hour period).

---

## GV483 Half Unit

### Public Management Theory and Doctrine

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Martin Lodge

**Availability:** This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Development Management, MSc in Development Studies, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration, MSc in Regulation and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and access cannot be guaranteed. Priority will be given to students on the programmes listed above.

**Course content:** The course offers an intensive introduction into key areas of public management with reference to both developed and lesser developed world contexts. Topics include administrative doctrine, implementation, organizational change and inertia, capacity building, performance-management, leadership, institution creation, transparency and risk management. Public management is treated as an interdisciplinary field of study, with a particular emphasis on the administrative practices and change as well as the critical analysis of practical arguments about Public Management.

**Teaching:** This course will be delivered through a combination of seminars and lectures, amounting to a minimum of 23 and a half hours across the Michaelmas term. This course includes a reading week in Week 6 of term.

**Formative coursework:** Students are expected to complete two formative essays.

**Indicative reading:** M Barzelay, *Public Management as a design-oriented profession discipline*, 2019; C Hood, *The Art of the State*, 1998; C Hood and M Lodge, *Politics of Public Service Bargains*, 2006; E. Ferlie, L. Lynn and C. Pollitt, *Oxford Handbook of Public Management*, 2005; C Hood and H Margetts, *Tools of Government in the Digital Age*, 2007; C Hood, *The Blame Game* (2010).

**Assessment:** Essay (60%, 2500 words) in the LT.

Blog post (40%) in the MT.

The blog would have a word limit of 1000 words, and would be due for submission at the end of Week 11 of MT.

**GV488****Law and Politics of Regulation**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Martin Lodge

**Availability:** This course is compulsory on the MSc in Regulation. This course is not available as an outside option.

**Course content:** The course aims to give students an essential grounding in theories of regulation encountered in the legal, political science and law and economics literatures. It examines competing explanations of the origins, development and reform of regulation; the styles and processes of regulation; issues surrounding enforcement; the inter-organisational and international aspects of regulation; and questions of evaluation and accountability. Some specific cases will be explored through the medium of an additional practitioner seminar series, which will be led by experienced practitioners invited on a one-off basis.

**Teaching:** This course will be delivered through a combination of seminars and lectures, amounting to a minimum of 38 hours across the Michaelmas and Lent terms. This course includes a reading week in Week 6 of both terms.

**Formative coursework:** All students are expected to produce three written essays.

**Indicative reading:** R Baldwin, M Cave and M Lodge *Understanding Regulation* (2012); M Moran, *The British Regulatory State* (2003); K Yeung and M Lodge, *Algorithmic Regulation* (2019); C Hood, H Rothstein & R Baldwin, *The Government of Risk* (2001); J Black, M Lodge and M Thatcher, *Regulatory Innovation*, (2005); C Sunstein, *Risk and Reason* (2002); R. Baldwin, M. Cave and M. Lodge, *Oxford Handbook of Regulation* (2010); M Lodge and K Wegrich, *Managing Regulation* (2012); D. Carpenter and D. Moss, *Preventing Regulatory Capture* (2013).

**Assessment:** Essay (25%, 2500 words) and online assessment (75%) in the ST.

The summative assessment is composed of:

- Online assessment (75%, duration: 7 days) in ST.
- Individual research paper (25%, 2500 words), to be submitted in Week 1 of ST.

---

**GV498 Half Unit**  
**Multiculturalism**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Paul Apostolidis

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at two groups.

**Course content:** This seminar explores diverse theoretical perspectives on political and ethical responses to contemporary multiculturalism and the many different forms of cultural politics. In part, we confront normative-philosophical issues concerning how to justify special rights for particular cultural groups with reference to certain principles of freedom, justice or the human need for 'recognition.' We consider immigrants' and other groups' demands for cultural preservation in light of European cosmopolitan ideals, and explore how those ideals may not only embrace cultural openness but also carry legacies of colonialism. The course also takes up questions regarding the meaning and effects of cultural politics in relation to political struggles for socioeconomic justice and against racial, gender and sexual domination. Through what practices of communication can different cultural groups approach mutual understanding in the aftermath of empire and colonisation? Does engaging in sexual and gender identity politics clash with or strengthen political

action against capitalist and racial power? Texts in the course's later phase combine political theory with empirical studies of indigenous, racial/ethnic minority, youth-subcultural and religious politics. These readings give us concrete grounds for addressing the course's key questions as well as examples of innovative methodological approaches to writing political theory.

**Teaching:** This course is delivered through a minimum of 20 hours of seminars in the Lent Term. There will be a reading week in Week 6 of the Lent Term.

**Formative coursework:** Students are invited to write one 1500 word formative essay, due no later than week 8.

**Indicative reading:** Charles Taylor, "The Politics of Recognition"; Will Kymlicka, "Multicultural Citizenship"; Iris Marion Young, "Polity and Group Difference"; Cristina Beltrán, "The Trouble with Unity: Latino Politics and the Creation of Identity"; Saba Mahmood, "Religious Reason and Secular Affect"; Glenn Coulthard, "Red Skin, White Masks"; Charles W. Mills, "Multiculturalism as/and/or Anti-Racism?"

**Assessment:** Essay (100%, 4000 words) in the ST.

---

**GV499****Dissertation**

**This information is for the 2022/23 session.**

**Availability:** This course is compulsory on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Global Politics, MSc in Political Science and Political Economy, MSc in Political Theory, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is not available as an outside option.

**Course content:** A compulsory 10,000 word dissertation is required to be submitted as part of the assessment for each Government MSc programme. The dissertation is due by 5:00 pm on Tuesday 22 August 2023.

**Assessment:** Dissertation (100%, 10000 words) in August.

---

**GV4A2 Half Unit Not available in 2022/23**  
**Citizens' Political Behaviour in Europe: Elections**  
**Public Opinion and Identities**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Michael Bruter

**Availability:** This course is available on the MSc in Comparative Politics, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 1 group. The deadline for applications is 12:00 noon on Friday 5 October 2018. You will be informed of the outcome by 12:00 noon on Monday 8 October.

Note that students from Masters or Doctoral programmes not listed above may still take the course subject to approval by the course convener.

**Pre-requisites:** In order to be accepted on the course, all students must submit a research project idea by the end of MT Week 2. The document should be around 1-2 pages in length and should at least do two things: first, indicating a course-related research topic and a specific research question and explain what makes it interesting, and second suggesting the methodology the student intends to use to answer this question empirically. You may, but are not obliged to include references from existing literature (which would be a good thing to do); please also include a mini-bibliography.

**Course content:** This course intends to familiarise students with the study of electoral psychology and political behaviour in Europe in a broad sense. The three main objects of study in political science are institutions, policies, and citizens, and the study of political behaviour and political psychology is the field that centres on the third. A very important part of political behaviour is electoral participation and vote choice. We will explore general models of voting behaviour, electoral psychology, and participation, as well as specific aspects such as extremist politics. We will look closely at public opinion, how it is formed and how it can be studied. In the final part of the course, special consideration is given to political identities and how they are related to political behaviour.

**Teaching:** 20 hours of seminars in the LT. 4 hours of seminars in the ST.

**Indicative reading:** Bruter, M. 2005 *Citizens of Europe?* Basingstoke: Palgrave.

LeDuc, L, Niemi, R, and Norris, P. 2010. *Comparing Democracies 3: Elections and Voting in the 21st Century*. London: Sage.

Van der Eijk, C, and Franklin, M. 2009. *Elections and Voters*. Basingstoke: Palgrave Macmillan.

Franklin, Mackie, et al. 1992. *Electoral Change*. Cambridge: Cambridge UP.

Bruter, M. and Harrison, S. 2009. *The Future of our Democracies?* Basingstoke: Palgrave.

Zaller, J. 1992. *The Nature and Origins of Mass Opinion*.

Cambridge: Cambridge University Press.

Harrison, S. and Bruter, M. *Mapping Extreme Right Ideology*. Basingstoke: Palgrave.

**Assessment:** Project (80%, 5000 words) in the ST.

Class participation (20%) in the LT.

One empirical research project on a topic relevant to the course and approved by the course co-ordinator with a word limit of 5,000 words (80%).

---

## GV4A5 Half Unit

### International Migration and Immigration Management

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Eiko Thielemann

**Availability:** This course is available on the MSc in Comparative Politics, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Global Politics, MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is not available as an outside option.

This course has limited availability and requires that students (regardless of Department or MSc programme) obtain permission from the teacher responsible via the 'LSE For You' capped course management system. This is a core course on the MSc International Migration and Public Policy. Priority will be given to students on that programme. Last year, very few students from other programmes could be accommodated on this course.

**Course content:** This course offers a theoretically informed account of the challenges posed by international migration and resulting policy responses. The focus is on the comparative analysis of immigration control policies in OECD countries. The course is structured in three parts. The first introduces a number of theoretical models that seek to explain the dynamics of international migration and migration control policies, addressing questions such as: Why do people migrate? Why do states accept migration? How effective are policies that aim to manage

migration? The second, comparative part deals with national public policy responses to the issue of asylum & refugees, 'illegal' migration & human trafficking and (legal) immigration. The final part focuses on the analysis of multilateral policy initiatives on migration management at the global, regional and bi-lateral level.

**Teaching:** This course is delivered through seminars and lectures totalling 25 hours in the Michaelmas Term, and 1 hour for a revision lecture in the Summer Term. There is a reading week in Week 6 of the Michaelmas Term.

**Formative coursework:** All students are expected to submit one non-assessed essay.

**Indicative reading:** There is no single textbook but the following texts are useful introductions:

- S Castle & M J Miller, *The Age of Migration*, 2019;
- A Betts and P Collier, *Refuge: Transforming a Broken Refugee System* 2018;
- A. Betts, *Global Migration Governance*, 2010;
- C Boswell, *European Migration Policies in Flux: Changing Patterns of Inclusion and Exclusion*, 2003;
- C Brettell, *Migration Theory: Talking Across the Disciplines*, 2000;
- M Baldwin-Edwards & M Schain, *The Politics of Immigration in Western Europe*, 1994;
- P Collier, *Exodus: How Migration is Changing our World*, 2015;
- W A Cornelius et al, *Controlling Immigration: A Global Perspective*, 2004;
- A Geddes, *The Politics of Migration and Immigration in Europe*, 2003;
- A Geddes, *Immigration and European Integration*, 2000;
- V Guiraudon & C Joppke, *Controlling a new migration world*, 2001;
- J F Hollifield, *Immigrants, Markets, and States: The Political Economy of Postwar Europe*, 1992;
- C Joppke, *Challenges to the Nation-State: Immigration in Western Europe and the United States*, 1998;
- G Loescher, *Beyond Charity: International Cooperation and the Global Refugee Crisis*, 1996;
- J Money, *Fences and Neighbours: The Political Geography of Immigration Control*, 1999;
- S Sassen, *Guests and Aliens*, 2000;
- D Thranhardt, *Europe, a New Immigration Continent*, 1994;
- A R Zolberg et al, *Escape from Violence: Conflict and the Refugee Crisis in the Developing World*, 1997.

**Assessment:** Online assessment (100%) in the ST.

Online assessment duration: 7 days in the ST.

---

## GV4A8 Half Unit

### Political Violence and Terrorism

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof James Hughes

**Availability:** This course is available on the MSc in Conflict Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Availability to students outside the MSc Conflict Studies is subject to space. This course is capped at two groups.

**Course content:** How can we distinguish legitimate resistance and political violence from terrorism? What is the relationship between war and terror? What distinguishes a combatant from non-combatant? Should we erode civil liberties and democratic values to fight terrorism? How do social scientists theorise about political violence and terrorism? This course attempts to answer these and similar questions by a comparative examination of the theories and ethics of political violence and the root causes, nature and types, and dynamics of violence. This course also evaluates different political and security policies and methods of conflict resolution as change agents. A number of case studies of historical and contemporary conflicts are examined to illustrate the theoretical and policy dilemmas. The course has two parts. Firstly, it examines definitions and concepts, the principles and efficacy of the laws and norms of armed conflict and ethical dilemmas in their application. We explore the causes and motivations for

engaging and not engaging in political violence. We examine the historical evolution of policies of counterinsurgency and counterterrorism from the colonial era to the present day. The effects of dealing with resistance, from coercive to cooperative approaches, is analysed, and the impact on the balance between security and liberty in democracies is mapped. Secondly, the course explores the key issues and debates through a number of case studies that analyse political violence and terrorism in democracies and non-democracies, including the insurgency and counterinsurgencies in Northern Ireland, Iraq, and Afghanistan, the transnational challenges posed by Islamist violence and forms of White Supremacist violence, and the relationship between war and genocide. Throughout the course comparisons will be made and lessons drawn from the performance of different regime types (colonial, democratic, and authoritarian) in managing political violence. This is a Moodle course.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling 31 hours per group in the Michaelmas Term, including a one hour Q&A on the summative essay preparation. There will be a reading week in week 6 of the MT for private study and assessment preparation.

**Formative coursework:** One essay of 1,500 words, to be on a topic that differs from the summative essay. Students must also contribute to a team presentation.

**Indicative reading:** Tore Bjorgo ed. *Root Causes of Terrorism*, Routledge (2005); Andrew Silke ed. *Terrorists, Victims and Society, Psychological Perspectives on Terrorism and its Consequences*, Wiley (2003); David Whittaker, *The Terrorism Reader*, Routledge (3rd edn, 2007); Michael Walzer, *Just and Unjust Wars: A Moral Argument with Historical Illustrations*, Basic Books (1992); *Arguing about War*, Yale University Press (2004); Michael Ignatieff *The Lesser Evil. Political Ethics in an Age of Terror*, Edinburgh University Press (2005); James Hughes, *Chechnya from Nationalism to Jihad*, University of Pennsylvania Press (2008); Marc Sageman, *Understanding Terror Networks*, University of Pennsylvania Press (2004) and *Leaderless Jihad, Terror Networks in the Twenty-First Century*, University of Pennsylvania Press (2007), and *Misunderstanding Terrorism*, University of Pennsylvania Press (2016); Jeff Victoroff and Arie W. Kruglanski eds, *Psychology of Terrorism. Classic and Contemporary Insights*, Psychology Press (2009); Cas Mudde, *The Populist Radical Right: A Reader*, Routledge (2017).

**Assessment:** Essay (100%, 5000 words) in the LT.

---

## GV4B6 Half Unit

### Kant's Political Philosophy

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Katrin Flikschuh

**Availability:** This course is available on the MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit. Optional for MSc Political Theory; open to others as an outside option on request.

This course is capped at 2 groups.

**Pre-requisites:** Some familiarity with either the history of political thought or with philosophy may be an advantage but is not strictly necessary. The course does not assume any prior exposure to Kant's political or philosophical writings. That said, Kant's writings are intellectually demanding; students should have an interest in engaging with political concepts at a fairly high level of abstraction.

**Course content:** This course offers an introduction to and critical appraisal of Immanuel Kant's political philosophy. Despite the enormous influence which Kant's moral philosophy has exerted on debates in contemporary liberal thinking, his political philosophy has until recently been largely ignored. This is beginning to change: Kant's political philosophy is beginning to be studied in its own right. Such study shows that his political thinking diverges in many of its central aspects from contemporary liberal thinking: the impact of Kant's thought upon the latter must, therefore, be re-

assessed. Through close reading and analysis of the primary texts, this course introduces students to Kant's distinctive approach to political thinking. Core texts will include selected passages from the Doctrine of Right (Part 1 of the *Metaphysics of Morals*); Kant's celebrated essay, 'On Perpetual Peace'; and his less well known, but no less important essay 'On the Common Saying: "This may be true in theory, but does it work in Practice"'. The analytic and substantive focus will be on three interrelated themes: Kant's idea of freedom as an idea of reason; his account and justification of individual property rights and related conception of state authority; and his cosmopolitan conception of justice. Although the analytic and philosophical focus will be on Kant's own political thinking, we shall compare and contrast Kant's position with contemporary Kantian liberalism wherever appropriate.

**Teaching:** This course provides a combination of seminars and lectures totalling 22 hours across the Lent and Summer terms. There will be a reading week in Week 6 of Lent term.

**Formative coursework:** Students are expected to come well prepared and take an active role in seminar discussion. Doing the weekly readings in advance of the seminars is essential for this course. Students are expected to write one formative essay (of up to 2500 words). The formative essay will be marked and commented on, but does not count towards formal assessment for this course.

**Indicative reading:** Kant, *The Metaphysics of Morals*, Part 1; Kant, *Groundwork of the Metaphysics of Morals*; M Timmons (ed.), *Kant's Metaphysical of Morals. Interpretative Essays*; Katrin Flikschuh, *Kant and Modern Political Philosophy*; Arthur Ripstein, *Force and Freedom*; Onora O'Neill, *Constructions of Reason*; Pauline Kleingeld, *Kant and Cosmopolitanism*; Stephen Darwall, *The Second-Person Standpoint*.

**Assessment:** Essay (100%, 5000 words).

---

## GV4B7 Half Unit

### The Idea of Freedom

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Zeynep Pamuk

**Availability:** This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Theory. This course is not available as an outside option.

This course has a limited number of places (it is controlled access and is capped at two groups) and demand is typically very high. Priority is given to students on the MSc in Political Theory; students from outside this programme may not get a place.

**Pre-requisites:** Basic familiarity with concepts and methods in normative political theory.

**Course content:** The concept of freedom is often invoked in political life. Many policies and broader political agendas are justified in its name. Nearly all modern ideologies from liberalism to socialism and conservatism claim liberty as a central value. But what, exactly, does freedom mean? Is freedom best understood in terms of absence of interference or in terms of non-domination? Is one made unfree only when one's rights are violated? Does poverty constitute a constraint on freedom? Does wage-labour make workers unfree? And could citizens of an authoritarian regime be described as free? These are some of the questions addressed in this module. Depending on the particular year in which the module is taught, the approach taken may be either historical or contemporary-analytic or a combination of the two. Consequently, authors discussed may include key historical thinkers such as Hobbes, Locke, Rousseau, and Kant, as well as contemporary scholars such as Isaiah Berlin, Hannah Arendt, Charles Taylor, Philip Pettit, Nancy Hirschmann, Quentin Skinner, Amartya Sen, Martha Nussbaum and others. The overall aim of the course is to enable students to assess the quality and strength of different theorists' conceptions of freedom and to deploy those conceptions in the analysis and justification of some core institutions within the modern state.

**Teaching:** This course is delivered through 20 hours of seminars

in the Michaelmas Term. There will be a reading week in week 6 of the MT.

**Formative coursework:** All students are expected to submit one formative (non-assessed) essay.

**Indicative reading:** Isaiah Berlin, 'Two Concepts of Liberty' in Berlin, *Liberty* (edited by Henry Hardy); Hannah Arendt, 'Freedom and Politics', in Miller (ed.), *The Liberty Reader*; Gerald MacCallum, 'Negative and Positive Freedom', in *Philosophical Review*, 76 (1967); Nancy Hirschmann, *The Subject of Liberty*; Phillip Pettit, *A Theory of Freedom*; Robert Nozick, *Anarchy, State, and Utopia*; G. A. Cohen, 'Capitalism, Freedom and the Proletariat' in Miller (ed.) *The Liberty Reader*; John Stuart Mill, *On Liberty*; Jean-Jacques Rousseau, *The Social Contract*; Thomas Hobbes, *Leviathan*; John Locke, *Second Treatise of Government*.

**Assessment:** Essay (100%, 4000 words).

## GV4B8 Half Unit

### Civil Wars: Concepts and Cases

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr William Kissane

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po) and MSc in Gender, Peace and Security. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course examines social science explanations of the origins, intractability and outcomes of civil wars. It does this through the comparative analysis of various cases. These cases may vary from year to year. Particular stress is on: Civil war and civilization. The concept of civil war. Patterns of civil war since 1945. Large N approaches. Decolonisation and democratisation as causes of civil war. The emergence of security dilemmas. Partition and civil war. The idea of global civil war.

**Teaching:** This course provides a combination of seminars and lectures totalling a minimum of 30 hours in the Lent Term. There will be a reading week in week 6 of the LT for private study and assessment preparation.

**Formative coursework:** All students are expected to submit one non-assessed essay of 1500 words.

**Indicative reading:** Bill Kissane, *Nations Torn Asunder*; *The Challenge of Civil War*, OUP 2016.

**Assessment:** Essay (100%, 3000 words) in the ST.

## GV4B9 Half Unit

### The Second Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Vesselin Dimitrov

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European Studies (Research), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students on the listed programmes and students on other programmes may not get a place.

**Course content:** The course explores the problems of delayed modernisation, problematic democratisation, conflictual nation-building and geopolitical insecurity in the European semi-periphery, including countries such as Russia, Poland, Spain, Italy,

Austria-Hungary, and Sweden. It analyses the socio-economic structures, political issues and problems shared by the European semi-periphery from the first wave of liberal globalisation and the emergence of mass politics in the late 19th century to European integration in the early 21st century. It analyses the strategies adopted by political elites and social classes in the face of modernisation, imperial decline, nationalism, and European integration.

Course topics include: The emergence of core and semi-periphery in Europe; Problems of economic modernisation; Political parties and ideologies; State nationalism, sub-state nationalism and problems of nation-state building; Religion: the socio-political power of the church; Ruling elites and structures of power; Fascism and varieties of right-wing authoritarianism in the 1920s and 1930s; Communism; Empire and EU integration.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 32 hours in the Lent Term and Summer Term.

There will be a reading week in Week 6 of the LT for private study and assessment preparation.

**Formative coursework:** Students are required to submit one formative essay of 2000 words in the Lent Term.

**Indicative reading:** K Polanyi, *The Great Transformation: The Political and Economic Origins of Our Time* (Boston, 2001); M Mann, *The Sources of Social Power: Vol. 2, The Rise of Classes and Nation States, 1760-1914, Vol. 3, Global Empires and Revolution, 1890-1945, and Vol. 4, Globalizations, 1945-2011* (Cambridge, 2012-13); B Moore, *Social Origins of Dictatorship and Democracy* (Boston, 1967); E Hobsbawm, *The Age of Capital, 1848-1875* (London, 1975), *The Age of Empire, 1875-1914* (London, 1989), *Age of Extremes: The Short Twentieth Century, 1914-1991* (London, 1994), and *Nations and Nationalism since 1780* (Cambridge, 1992); D Lieven, *Empire* (London, 2000); N Stone, *Europe Transformed 1878-1919* (Oxford, 1999); J Zielonka, *Europe as Empire: The Nature of the Enlarged European Union* (Oxford, 2007).

**Assessment:** Essay (25%, 2500 words) and online assessment (75%) in the ST.

Online assessment duration: 7 days in the ST.

## GV4C8 Half Unit

### Game Theory for Political Science

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Rafael Hortala-Vallve

**Availability:** This course is compulsory on the MSc in Political Science and Political Economy. This course is available on the MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

MSc Political Science and Political Economy students will be granted priority access as this is a compulsory course on the programme. Other postgraduates wanting to take the course (space permitting) require the permission of the teachers responsible.

**Course content:** Game theory provides a scientific approach to the study of social interactions which focusses on the strategic aspects of decision-making between two or more individuals or groups. This course will cover the basic elements of game theory and how they have been applied in the area of political science and political economy. The aim of the course is to provide a deeper understanding of game theoretic tools and to help you understand how these ideas have been developed and applied in the political science literature. The course will be divided into looking at static games where all players move simultaneously and the dynamic games where players move in sequence. We will also analyse simple settings where all information is known to all players (complete information) and then move to more complex settings where some information is not known to all players (incomplete information).

**Teaching:** This course provides a combination of seminars and lectures totalling 40 hours in the Michaelmas Term and 2 hours in the Summer Term. There will be a reading week in Week 6 of the MT.

**Formative coursework:** Weekly problem sets to be completed and discussed in class and a two hour mock exam in week 11 of MT.

**Indicative reading:** The core text for the course is M J Osborne, *An Introduction to Game Theory*, Oxford University Press 2004

**Assessment:** Exam (50%, duration: 2 hours) in the summer exam period.

Problem sets (50%) in the LT Week 1.

## GV4C9 Half Unit

### Globalization and Democratization in Southeast Asia

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof John Sidel

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Development Management, MSc in Development Studies, MSc in Global Politics and MSc in Social Anthropology (Religion in the Contemporary World). This course is not available as an outside option.

This course is capped at 1 group.

**Course content:** This course focuses on the diverse processes of globalization and democratization observed in Southeast Asia over the past few decades. Special attention is paid to democracy in Indonesia and the Philippines, regression from democracy to military rule in Thailand and Myanmar, and 'creeping pluralism' and 'creeping constitutionalism' in Vietnam. The course examines important trends and developments accompanying globalization and democratization in the region - in government-business relations, in local politics, in civil society, in religious practices, in inter-communal relations, and in the organization and use of violence in politics. Throughout the course, the countries examined are treated as cases suitable for analysis and comparison in the light of the broader Comparative Politics and Global Politics literatures on globalization and democratization.

The course begins by situating globalization and democratization in Southeast Asia against a comparative historical and sociological backdrop, paying close attention to the variegated patterns of class, state, and religious formation in the region. The course compares patterns of globalization and democratization across the Philippines, Thailand, Indonesia, Myanmar, and Vietnam. Lectures, readings, and seminar discussions then turn to key trends accompanying globalization and democratization in Southeast Asia. The trends examined include populist challenges to established power structures; campaigns against 'corruption' and in support of 'the rule of law' and 'good governance'; social movements and struggles for popular empowerment; the democratization of religious practices and institutions; religious violence, and separatist mobilization. These trends are treated through comparative analysis of different cases within Southeast Asia and in the light of relevant theoretical literatures drawn from Comparative Politics and Global Politics.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours in the Michaelmas Term.

There will be a reading week in Week 6 of the MT.

**Formative coursework:** One non-assessed 1500-word essay.

**Indicative reading:** Teri L. Caraway and Michele Ford, *Labor and Politics in Indonesia* (Cambridge: Cambridge University Press, 2020); Nicole Curato (ed.), *A Duterte Reader: Critical Essays on Rodrigo Duterte's Early Presidency* (Ithaca, NY: Cornell University Southeast Asia Program, 2017); Renaud Egreteau, *Caretaking Democratization: The Military and Political Change in Myanmar* (Oxford: Oxford University Press, 2016); Federico Ferrara, *The Political Development of Modern Thailand* (Cambridge: Cambridge University Press, 2015); Michele Ford and Thomas B. Pepinsky

(eds.), *Beyond Oligarchy: Wealth, Power, and Contemporary Indonesian Politics* (Ithaca, NY: Cornell University Southeast Asia Program 2014); Benedict J. Tria Kervliet, *Speaking Out in Vietnam: Public Political Criticism in a Communist Party-Ruled Nation* (Ithaca, NY: Cornell University Press, 2019); Wataru Kusaka, *Moral Politics in the Philippines: Inequality, Democracy, and the Urban Poor* (Singapore: NUS Press, 2017); Michael J. Montesano, Terence Chong, and Mark Heng (eds.), *After the Coup: The National Council for Peace and Order Era and the Future of Thailand* (Singapore: Institute of Southeast Asian Studies, 2018); Thomas Power and Eve Warburton (eds.), *Democracy in Indonesia: From Stagnation to Regression?* (Singapore: Institute of Southeast Asian Studies, 2020); Francis Wade, *Myanmar's Enemy Within: Buddhist Violence and the Making of a Muslim 'Other'* (London: Zed Books, 2017).

**Assessment:** Essay (50%, 3000 words).

Online assessment (50%) in January.

Online assessment duration: 7 days in the January exam period (estimated amount of effort: 2 hours).

## GV4D3 Half Unit

### Local Power in an Era of Globalization, Democratization, and Decentralization

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof John Sidel

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Development Studies and MSc in Global Politics. This course is not available as an outside option.

This course has limited availability, and it is necessary for students (regardless of Department or MSc programme) to obtain permission from the teacher responsible. The course is capped at 1 group.

**Course content:** Over the course of the past three decades, the inter-related processes of globalization, democratization, and decentralization are said to have generated new social forces and political freedoms in localities around the world. Market reforms and village elections in China, the end of Communist Party rule in Russia and Eastern Europe, and trends of (re)democratization in Asia, Africa, and Latin America have all offered new opportunities for local people to effect change in local politics around the world. Yet academic, journalistic, and policy accounts have highlighted the rise and resilience of 'local despotisms' – "authoritarian enclaves," "bosses", "caciques", "chiefs", "clans", "local strongmen", "mafias", "warlords" – in the midst of this reworking of market, electoral, and administrative circuitries. This course focuses on this phenomenon of what scholars have come to call 'subnational authoritarianism', and competing explanations for its emergence and entrenchment, the diversity of its manifestations, and various challenges mounted against its perpetuation.

The goals of the course are twofold. First, the course offers a critical examination of competing accounts of and explanations for the phenomenon of 'subnational authoritarianism' in the developing world. Second, the course helps students to think more carefully, critically, and creatively about local politics more broadly, and to do so with an eye towards the comparative analysis of local power structures rooted in local economies and societies.

The course begins with an examination of an emerging new political-science literature on 'subnational authoritarianism' and a more established body of scholarship on clientelism and machine politics. The course then turns to case studies in diverse settings, ranging from southern Italy to China, India, Indonesia, Nigeria, and Russia, and extending to cases of 'warlordism' in contexts such as contemporary Afghanistan, Iraq, Libya, and Somalia.

The readings allow students to examine and evaluate competing explanations for the rise and entrenchment of local bosses, chiefs, clans, and mafias, diverging descriptions of their modes of domination, and alternative accounts of their disappearance, evolution, or transformation in the face of economic, social, and

political change. Successive weeks also explore the links between constellations in local politics on the one hand, and patterns of economic development, ethnic conflict, and religious mobilization on the other. The final weeks of the course shift attention to the efforts to challenge entrenched local power structures and to create "countervailing power" through popular mobilization, political participation, and social empowerment in localities in diverse settings across the world.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 24 hours across the Lent and Summer Terms.

There will be a reading week in Week 6 of the LT.

**Formative coursework:** One non-assessed 1,500-word essay.

**Indicative reading:** Jacqueline Behrend and Laurence Whitehead (eds.), *Illiberal Practices: Territorial Variance within Large Federal Democracies* (Baltimore, MD: Johns Hopkins University Press, 2016); Ward Berenschot, *Riot Politics: Hindu-Muslim Violence and the Indian State* (London: C. Hurst, 2012); Judith Chubb, *Patronage, Power, and Poverty in Southern Italy: A Tale of Two Cities* (Cambridge: Cambridge University Press, 1982); Edward L. Gibson, *Boundary Control: Subnational Authoritarianism in Federal Democracies* (Cambridge: Cambridge University Press, 2013); Ben Hillman, *Patronage and Power: Local State Networks and Party-State Resilience in Rural China* (Stanford, CA: Stanford University Press, 2014); Kimberly Marten, *Warlords: Strong-Arm Brokers in Weak States* (Ithaca, NY: Cornell University Press, 2012); Wolfram Lacher, *Libya's Fragmentation: Structure and Process in Violent Conflict* (London: I.B. Tauris, 2020); Kelly McMann, *Economic Autonomy and Democracy: Hybrid Regimes in Russia and Kyrgyzstan* (Cambridge: Cambridge University Press, 2006); Gulnaz Sharafutdinova, *Political Consequences of Crony Capitalism inside Russia* (Notre Dame: Notre Dame University Press, 2010); Jane C. Schneider and Peter T. Schneider, *Reversible Destiny: Mafia, Antimafia, and the Struggle for Palermo* (Berkeley: University of California Press, 2003).

**Assessment:** Essay (50%, 3000 words).

Online assessment (50%) in the ST.

Online assessment duration: 7 days in the ST.

## GV4D7 Half Unit Dilemmas of Equality

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Sarah Goff

**Availability:** This course is available on the MSc in Gender, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically high. Priority is given to students in the MSc Political Theory programme, and students from outside this programme may not get a place.

This course is capped at 2 groups.

**Course content:** The course starts with the general questions of why equality matters and what is to be equalized. It then introduces some of the major debates in the contemporary egalitarian literature: equality of opportunity versus equality of outcome; luck egalitarianism versus relational equality; and equality versus sufficiency. Throughout the course, and particularly in the latter half, we consider concrete social problems and dilemmas faced by those who are committed to the ideal of equality. Topics covered this year include discrimination and policies that aim to reduce inequalities between social groups.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours in the Michaelmas Term.

There will be a reading week in Week 6 of the MT for private study and assessment preparation.

**Formative coursework:** Students will submit a short formative essay (up to 1500 words) and will be given feedback on this before submitting their assessed coursework.

**Indicative reading:** Samantha Brennan, 'Feminist Ethics and Everyday Inequalities' *Hypatia* 24, 2009; Derek Parfit, 'Equality and Priority' *Ratio* 10, 1997; Ronald Dworkin, *Sovereign Virtue: The Theory and Practice of Equality* (Harvard University Press, 2000); Amartya Sen, *Development as Freedom* (Oxford University Press, 1999); Elizabeth Anderson, 'What is the Point of Equality?' *Ethics* 109, 1999; Harry Frankfurt, 'The Moral Irrelevance of Equality' *Public Affairs Quarterly* (2000); and Deborah Hellman, *When is Discrimination Wrong?* (Harvard University Press, 2011).

**Assessment:** Essay (100%, 4500 words).

---

## GV4E1 Half Unit Comparative Democratization in a Global Age

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr William Kissane

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies and MSc in Global Politics.

This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** To introduce students to the fundamental political science debates about the phenomenon of democratization, to explore the explanatory strength of key paradigms, and to compare distinct modes of democratization. Specific topics are: Definitions of democratization and democratic consolidation; waves of democratization; capitalist development and democratization; elite transitions; post-civil war democracy; hybrid regimes; democratic backsliding; the current crisis of democracy.

**Teaching:** This course provides a combination of seminars and lectures totalling a minimum of 30 hours in the Michaelmas Term. There will be a reading week in Week 6 of the MT for private study and assessment preparation.

**Formative coursework:** All students are expected to submit one non-assessed essay of 1500 words.

**Indicative reading:** D Potter et al, *Democratization*; J. Grugel, *Democratization*; Rueschmeyer, Stephens and Stephens, *Capitalist Development and Democracy*; J Linz and A S Stepan, *Problems of Democratic Transition and Consolidation*.

**Assessment:** Essay (100%, 3000 words) in the LT.

---

## GV4E2 Half Unit Capitalism and Democracy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr David Woodruff and Prof Jonathan Hopkin

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Global Politics, MSc in Political Science and Political Economy and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

Available as an outside option for students on other programmes with the teachers' consent. This course is capped at 3 groups.

**Course content:** Compatibility and incompatibility of capitalism and democracy; Constitutional restraints on economic policymaking in central banking and property rights; Democracy and economic inequality; World context and the compatibility of democracy and capitalism; Democracy and economic crisis. This course examines the uneasy interaction between the two dominant concepts underpinning political and economic institutions in advanced industrial societies. It addresses in particular questions about the relationship of capitalism to democracy, both conceptually and empirically. We consider whether democracy undermines or supports capitalism, focusing on policies relating

to central banking, redistribution, and property rights. We also examine how capitalism may undermine or sustain democracy and whether contemporary international circumstances heighten the tension between democracy and capitalism.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours in the Lent Term.

There will be a reading week in Week 6 of the LT.

**Formative coursework:** All students are expected to submit one non-assessed essay.

**Indicative reading:** Schumpeter, *Capitalism, Socialism, and Democracy*. Holmes, 'Precommitment and the Paradox of Democracy'. Mill, *Considerations on Representative Government*. Kalecki, 'Political Aspects of Full Employment'. Lohmann, 'An Information Rationale for the Power of Special Interests'. McNamara, 'Rational Fictions: Central Bank Independence and the Social Logic of Delegation'. Beard, *An Economic Interpretation of the Constitution of the United States*. Kenworthy and Pontusson, 'Rising Inequality and the Politics of Redistribution in Affluent Countries'.

**Assessment:** Online assessment (100%) in the ST.

## GV4E3 Half Unit

### Statebuilding and Self-Determination in Eastern Europe and Eurasia

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof James Hughes

**Availability:** This course is available on the MSc in Conflict Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. The course is available with permission as an outside option subject to space (and where regulations permit).

**Course content:** This course provides a theoretically informed assessment and critique of the current debates on the concepts of state-building and self-determination, focusing on a range of conflict cases in Eastern Europe and Eurasia. It seeks to explain why some state-building projects and claims to self-determination and secession have succeeded while others are failing or have failed to achieve international recognition, or are otherwise seen as problematical cases. The concepts lie at the intersection of politics and law, and the focus in this course is on the politics and policies. The first two weeks deal with the conceptual debates and theories and practices in state-building and self-determination, examining the collapse of the Soviet Union and Yugoslavia and the associated violent conflicts. The concepts are located in a context of historical development during and after the Cold War, their relationship to democracy and nationalism, and the changes after the collapse of communism. The rest of the course explores the diverse applications of the concepts in weekly case studies drawn from the former Soviet space and former Yugoslavia. The cases include violent conflicts over self-determination and secession, the management of multiethnicity in statebuilding, and the role of international institutions and external intervention in statebuilding and self-determination. The cases considered include many of the so-called "frozen conflicts" and several of the wars in the region: Chechnya, Kosovo, Bosnia-Herzegovina, Crimea and Eastern Ukraine, Georgia, Nagorno-Karabagh, Estonia and Latvia. As an LSE Moodle course, most of the weekly essential readings are available online.

**Teaching:** This course provides a combination of seminars and lectures totalling 31 hours per group in the Lent Term (including a 1 hour session for a Q&A on preparation of the summative essay). There will be a reading week in LT Week 6.

**Formative coursework:** One essay of 1,500 words, to be on a topic that differs from the summative essay. Students must also contribute to a team presentation.

**Indicative reading:** Hurst Hannum, *Autonomy, Sovereignty, and*

*Self-Determination: The Accommodation of Conflicting Rights*. Rev. ed. University of Pennsylvania Press, 1996; Jörg Fisch, *The Right of Self-Determination of Peoples: The Domestication of an Illusion*. Cambridge University Press, 2015; Fernando R. Teson, *The Theory of Self-Determination*. Cambridge University Press, 2017; Philip G. Roeder and Donald Rothchild eds, *Sustainable Peace. Power and Democracy after Civil Wars*, Cornell University Press, 2005; Timothy D. Sisk, *Statebuilding: Consolidating Peace after Civil War*. Polity, 2013; Roland Paris, and Timothy D. Sisk, *The Dilemmas of Statebuilding: Confronting the Contradictions of Postwar Peace Operations*. Routledge, 2009; James Hughes, Chechnya. *From Nationalism to Jihad*, University of Pennsylvania Press, 2007; James Hughes & Gwendolyn Sasse (Eds), *Ethnicity and Territory in the Former Soviet Union*, Routledge, 2001; Christoph Zurcher, *The Post-Soviet Wars: Rebellion, Ethnic Conflict, and Nationhood in the Caucasus*, New York University Press, 2007; David Chandler, *Empire in Denial. The Politics of State-Building*, Pluto, 2006; Roberto Belloni, *State building and international intervention in Bosnia*, Routledge, 2007; Marc Weller, *Contested Statehood: Kosovo's Struggle for Independence*. Oxford University Press, 2009; Marc Weller, *Settling Self-Determination Disputes: Complex Power-Sharing in Theory and Practice*. Nijhoff, 2008; Gwendolyn Sasse, *The Crimea Question. Identity, Transition and Conflict*, Harvard University Press, 2007.

**Assessment:** Essay (100%, 5000 words).

to be submitted early in the Summer Term.

## GV4E8 Half Unit

### Power Sharing and Institutional Design in Divided Societies

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Paul Mitchell CBG 3.30

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Global Politics and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students on the MSc in Conflict Studies. This course is capped at 1 group.

**Course content:** The internal resolution of serious ethnic and national conflicts almost inevitably involves some form of power sharing and/or power division (autonomy and federation). While power sharing is often invoked in normative and comparative accounts of conflict resolution, it is less frequently systematically examined. Conflict and Institutional Design (CID) is a comparative analysis of the making, maintenance and too often breaking of power sharing agreements. When and how are peace agreements negotiated? What type of power-sharing and federal designs are available? Under what conditions is power sharing likely to help contain conflict, and when does it fail? The course will pay particular attention to what happens after a power-sharing agreement is reached. The institutional focus will include analysis of electoral system design for divided societies, the dynamics of electoral and party competition within ethnic segmentation and consociational governance (power-sharing constitutions, executives, legislatures and federations). Why do some power-sharing regimes succeed while others fail?

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 35 hours in Lent Term. There will be a reading week in Week 6 of the LT.

**Formative coursework:** Two briefing papers on pre-selected key concepts/cases.

**Indicative reading:** Lijphart, Arend (2008). *Thinking about Democracy: Power Sharing and Majority Rule in Theory and Practice*. London: Routledge.

Casperson, Nina (2017). *Peace Agreements*. London: Polity.

Cederman, Lars-Erik et al. (2013) *Inequality, Grievances and Civil War*. Cambridge: Cambridge UP.

Norris, Pippa (2008). *Driving Democracy: Do Power-Sharing Institutions Work?* Cambridge University Press.

Gallagher, Michael and Paul Mitchell (2008, eds), *The Politics of Electoral Systems*. Oxford: Oxford University Press.

Reilly, Benjamin (2001). *Democracy in Divided Societies: Electoral Engineering for Conflict Management*. Oxford UP.

Birbir, Johanna Kristin (2007). *Ethnicity and Electoral Politics*. Cambridge University Press.

**Assessment:** Essay (100%, 5000 words) in the ST.

The research essay will be on a topic of your choice. Having said that the topic will be discussed between each of you and myself and I must approve the topic. The research paper should ideally examine a research question using relevant concepts and theories, and must have an empirical dimension that is relevant to the themes of the course. 'Empirical' is understood in the broadest sense: your material could be a case study set in an appropriate theoretical framework, it could examine a theme with comparative case studies, it could be quantitative or qualitative. Whatever is deemed appropriate to the research question at hand. Bear in mind though that broad surveys are generally not a good idea. After all 5000 words is about half the standard size of a journal article. Much more advice about the essay will be given as the course progresses both collectively and in individual meetings with each of you. One of the aims in asking participants to write a paper is to help you to think about research questions and appropriate research design. Thus we are aiming at more than a traditional essay (which largely summarizes what significant others have said), and to begin to make the transition towards 'postgraduate research' in which you help develop new insights and/or new empirical knowledge. This should also help you when approaching the planning and writing of your MSc dissertation. Since you will be working on something that really interests you I hope that this will be an enjoyable experience.

## GV4E9

### Approaches and Issues in Public Policy and Administration

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Daniel Berliner

**Availability:** This course is compulsory on the MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is not available as an outside option.

**Course content:** The course is designed to introduce MSc students to major issues in understanding public administration and policy. Students will be divided into two to four classes, depending on the number of students taking the course. 18 of the lectures will reflect the topics to be covered in the weekly classes (18 plus 1 revision class) addressing key themes in Public Policy and Public Administration. Some of the lectures may be given by other colleagues teaching on the MSc degree as well as by outside speakers. 2 lectures and classes will cover dissertation writing (for GV499) in the field of public policy and administration.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across the Michaelmas, Lent and Summer Terms. This course includes reading weeks in Week 6 of both the MT and LT terms.

**Formative coursework:** Two formative essays, one in the Michaelmas Term and one in the Lent Term.

**Indicative reading:** Christoph Knill and Jale Tosun (2020) *Public Policy*; Paul Cairney (2019) *Understanding Public Policy*; Merilee Grindle (2012) *Jobs for the Boys*; B Guy Peters (2018) *Politics of Bureaucracy* (7th edn); David L Weimer and Aidan R Vining (2016) *Policy analysis: Concepts and practice*; Steve Balla, Martin Lodge and Edward C Page (eds) (2015) *Oxford Handbook on the Classics of Public Policy*.

**Assessment:** Essay (25%, 3000 words) in the LT.

Online assessment (75%) in the ST.

Online assessment duration: 7 days in the ST.

## GV4F2 Half Unit

### Popular Politics in the Middle East

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof John Chalcraft

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies and MSc in Global Politics.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 3 groups.

**Course content:** The course explores the role of popular politics in the making of the contemporary Middle East and North Africa. The primary focus is on the Arab world but reference is also made to Iran, Israel and Turkey. We study the origins, course and consequences of popular protest, social and political movements, uprisings and revolutions in the region. We ask how a wide variety of subaltern social groups have challenged subordination and brought about new social relations. Our cases are drawn from the early twentieth century to the present. Common topics include the Iranian revolution of 1979, everyday forms of resistance, the first intifada in the Occupied Palestinian Territories (1987-1991), social justice and labour movements, Islamic activism, the Arab uprisings of 2011 and the Rojava Revolution. The course draws on critical, historically-minded and Gramscian approaches, aims to grasp the role of active subjectivity and leadership in context, and evaluates the ways in which a wide variety of movements have aimed to bring about change, and how they have succeeded and/or failed to do so.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours in Lent Term. Week 6 of the LT is a reading week.

**Formative coursework:** In order to develop essay skills and obtain feedback outside of formal assessment, students will complete a 2,000 word formative essay on which they will receive feedback as to overall standard, argument, evidence, structure and style. Students will choose one essay from a list of titles. To prepare for the 5,000 word essay, students will submit for approval a proposed title and a two-page handout summarising the question or puzzle that their essay will address. A seminar will also be held as a workshop to assist students prior to the final submission of their 5,000 word essay.

**Indicative reading:** Abrahamian, Ervand. *Iran between Two Revolutions* (Princeton University Press, 1982); Achcar, Gilbert. *The People Want*. (Saqi Books 2012); Bayat, Asef. *Street Politics: Poor People's Movements in Iran* (Columbia University Press, 1997); Beinlin, Chalcraft, John. *Popular Politics in the Making of the Modern Middle East* (Cambridge University Press, 2016); Cronin, Stephanie. *Subalterns and Social Protest* (Routledge, 2007); Kurzman, Charles. *The Unthinkable Revolution in Iran* (Harvard University Press, 2004); Swedenburg, Ted. *Memories of Revolt: The 1936-1939 Rebellion and the Palestinian National Past* (Fayetteville: University of Arkansas Press, 2003); Tripp, Charles, *The Power and the People* (Cambridge: CUP, 2013).

**Assessment:** Essay (100%, 5000 words).

## GV4F4 Half Unit

### Policy Advice in Theory and Practice

**This information is for the 2022/23 session.**

**Teacher responsible:** Rehan Jamil

**Availability:** This course is available on the MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 3 groups.

**Course content:** Many masters graduates in public policy and administration go on to work in organizations that produce or consume policy advice. With this in mind, this course will look at how policy advice is produced and used. It has three objectives: to introduce students to a range of theoretical and empirical scholarship on the issues involved in producing and using policy advice; to develop practical policy analysis and communication skills required of policy advisors; and to expose students to practitioners who produce and use policy advice. Students will develop their policy analysis and communication skills by critically analysing the theoretical scholarship on policy advice, the science-policy link, and research impact. Moreover, we will apply this analysis to real-world cases during the seminars, in group presentations and exercises, and in the formative and assessed coursework.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** One formative essay (2,000 words), one group presentation, and a mock examination.

**Indicative reading:** Bardach, Eugene (2009) *A Practical Guide for Policy Analysis*, Third Edition. Washington, DC: CQ Press.

Stone, D.A., (2002). *Policy paradox: The art of political decision making*, New York: Norton.

Scott, C. and Baehler, K. (2010) *Adding Value to Policy Analysis and Advice*, Sydney: University of New South Wales Press

Weimer, David L. and Vining, Aidan R. (2005) *Policy Analysis: Concepts and Practice*, Fourth Edition. Upper Saddle River, NJ: Pearson.

**Assessment:** Project (50%, 2500 words).

Online assessment (50%) in the ST.

Online assessment duration: 7 days in the ST.

## GV4F5 Half Unit

### Advanced Study of Key Political Thinkers

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Lea Ypi

**Availability:** This course is available on the MA in Modern History and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit. This course is capped at 1 group.

**Pre-requisites:** An advanced undergraduate course in the History of Political Thought or Political Philosophy, or following consultation with the course teacher.

**Course content:** This course provides an opportunity to study the works of Machiavelli in-depth. It will focus on themes in his political theory: human nature, morality and politics, the role of the prince, the analysis of *virtu* and *gloria*, the conception of the state and the idea of Machiavellian democracy. We will situate Machiavelli's arguments in their political and theoretical context, as well as exploring both how subsequent theorists understood and employed his ideas, and the major contemporary critical debates in Machiavelli's scholarship. The seminar will therefore blend intellectual history and political theory.

**Teaching:** This course is delivered through seminars totalling

a minimum of 20 hours in the Michaelmas Term. There will be a reading week in Week 6 of the MT for private study and assessment preparation.

**Formative coursework:** Students will be encouraged to submit one formative extended essay plan of no more than 1500 words. This will form the basis of the final summative assessment. The course leader will provide written feedback on this plan, and provide the opportunity for a one-to-one meeting to discuss the plan, but will not provide a numerical grade or classification for it.

**Indicative reading:** Machiavelli, *The Prince*, ed. Q. Skinner, trans. R. Price (Cambridge, 1988).

Machiavelli, *Discourses on Livy*, ed. J.C. and P. Bondanella (Oxford, 2003) or ed. B. Crick (Penguin, 1970).

John McCormick, *Machiavellian Democracy*, (Princeton: Princeton University Press), Introduction, Ch 1 and Ch. 3

John M. Najemi (ed.) *The Cambridge Companion to Machiavelli* (Cambridge: Cambridge University Press, 2010).

Skinner, Q., *Visions of Politics, Volume II: Renaissance Virtues* (Cambridge: Cambridge University Press, 2002). Ch. 6 and 7.

**Assessment:** Essay (80%, 4000 words) and continuous assessment (20%).

## GV4F8 Half Unit

### Institutions and Global Trade

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Stephanie Rickard

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Political Science and Political Economy and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is open to all students enrolled on MSc programmes in the Department of Government, with permission, as well as to students enrolled on the Master of Public Policy.

**Course content:** This course examines the role institutions play in global trade. Theories from both economics and political science are used to understand how formal institutions shape states' trade policies. Both domestic and international institutions influence countries' trade policies. Therefore, this course examines domestic political institutions, such as electoral systems, as well as international institutions, such as the World Trade Organization.

**Teaching:** This course provides a minimum of 30 hours of lectures and seminars in the Lent Term. There will be a reading week in LT Week 6 for private study and assessment preparation.

**Formative coursework:** Students will be asked to complete weekly writing assignments.

**Indicative reading:** Rose, Andrew K. (2004) Do We Really Know That the WTO Increases Trade? *American Economic Review* 94(1): 98-114; Rickard, Stephanie (2010) Democratic Differences: Electoral Institutions and Compliance with GATT/WTO Agreements. *European Journal of International Relations*; Baldwin, Robert (1989) *The Political Economy of Trade Policy*. *Journal of Economic Perspectives*.

**Assessment:** Essay (100%, 4000 words) in the ST.

## GV4F9 Half Unit Not available in 2022/23

### The Challenges of Governance in sub-Saharan Africa

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr George Ofosu

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Gender, Peace and Security and MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at one group.

**Course content:** This course introduces students to some of the major arguments, hypotheses and debates in the literature on politics in Sub-Saharan Africa (SSA). The material will cover the period between the end of the colonial period to the contemporary era. The course will help students develop the skills to be more intelligent consumers of the extant literature on politics in SSA. The primary questions that motivate the course are: (a) to what extent are political outcomes in contemporary Africa a consequence of its history, society, and geography? (b) Why are state structures and institutions weak in Africa compared to most other regions? (c) Why did (do?) African leaders choose growth-killing policies, (d) What is the role of ethnicity in Africa's economic and political development? (e) (Under what conditions) Are multiparty elections better for good governance in sub-Saharan Africa?

To this end, the course is structured into four parts. In the first part, we take a tour of Africa's recent political history, examining pre-colonial structures, the impact of the slave trade and colonialism on the politics, societies, and economies of post-colonial states. We then consider the social and political forces that shape African countries' forms of government and the structure and capacity of their states. In the third part, we briefly survey the determinants of Africa's economic development, focusing specifically on policy choices, legal systems, natural resources and the ambivalent role of foreign aid. The fourth part is devoted to Africa's democratic experiment focusing on the issues of political parties, election fraud and violence, transparency initiatives, and political representation in Africa.

Political scientists have sought to address these and other research questions using varied methodological approaches. Accordingly, the scholarly literature we will review draws on quantitative, historical, and qualitative methods—though students will not need any prior specialized training to understand the debates and questions raised in them. Also, because many developments in African politics cannot be understood in isolation from African societies or their historical context, this course augments political science research with work by journalists, historians, economists, and anthropologists.

**Teaching:** For 2021-22, some or all of this course will be delivered through a combination of online and on-campus lectures and seminars. Students should expect a minimum of 20 hours teaching in the Lent Term. Students will also be encouraged to participate in smaller, peer group-only meetings in advance of the seminars to discuss and prepare the week's topic. There will be a reading week in week 6 of the LT for private study and assessment preparation.

**Formative coursework:** Students will be required to complete one formative essay (1,500 words).

**Indicative reading:** Rodney, W. (1981). *How Europe underdeveloped Africa*. Washington, D.C., Howard University Press, Hyden, Goran. *African Politics in Comparative Perspective*, Cambridge: Cambridge University Press, 2006; Bratton, M. & Van de Walle N., *Democratic Experiments in Africa*, New York, Cambridge University Press, 1997; Jackson, R. and Rosberg C., *Personal Rule: Theory and Practice in Africa*, *Comparative Politics* 16:4, 1984. Posner D., *Institutions and Ethnic Politics in Africa*, New York: Cambridge University Press, 2005; Clapham C., *Africa and the International System*, New York, Cambridge University Press, 1996; Englebert P., *State Legitimacy and Development in Africa* Boulder: Lynne Rienner, 2000; Rotberg R, and Gisselquist R., *The Index of African Governance*, Cambridge, World Peace Foundation, 2009; Herbst J., *States and Power in Africa: Comparative Lessons in Authority and Control*, Princeton: Princeton University Press, 2000; Bates R., *Markets and States in Tropical Africa*, Berkeley: University of California Press, 1981.

**Assessment:** Essay (80%, 4000 words) in May. Class participation (20%).

## GV4G1 Half Unit

### Applied Quantitative Methods for Public Policy and Political Science

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Valentino Larcinese

**Availability:** This course is available on the MRes/PhD in Political Science, MSc in Comparative Politics, MSc in Conflict Studies, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Please note: this course is **available to all MSc and MRes students from the Government department**. Students from other departments are also welcome but should request permission from the teacher.

**Pre-requisites:** A good knowledge of statistics and of the generalized linear model at the level of MY452.

**Course content:** This course provides an introduction to current empirical research in political science with a focus on methods for causal inference. The weekly meetings consist of a mix of lectures and tutorials. The lectures will present the techniques and illustrate their applications by making extensive use of the most up-to-date empirical literature. The tutorials will give feedback on formative work and will provide an opportunity to learn how to apply the methods with the statistical software Stata. After reviewing the rationale for simple OLS estimation, particularly focussing on the conditions for a causal interpretation of the coefficients, the course will cover instrumental variables, panel data, differences-in-differences, regression discontinuity and several applications to political science. Students will be stimulated to think in experimental terms and the main theme will be how to replicate or get close to the experimental ideal of natural sciences by using non-experimental observational data.

**Teaching:** This course is delivered through a minimum of 30 hours of lectures and tutorials in the Lent Term. There will be a reading week in Week 6 of Lent Term.

**Formative coursework:** There will be two pieces of formative work to be submitted to the lecturer.

**Indicative reading:** Most readings will be journal articles. The main references for the methods will be:

- Thad Dunning: *Natural experiments in the social sciences*, Cambridge University Press 2012.
- Angrist & Pischke: *Mostly Harmless Econometrics*, Princeton University Press 2009.
- Stock & Watson: *Introduction to Econometrics*, Pearson 2007 (Second edition).

**Assessment:** Project (60%, 5000 words) in the LT and ST.

Online assessment (40%) in the ST.

The project includes a presentation element.

Online assessment duration: 7 days in the ST.

## GV4G4 Half Unit

### Comparative Conflict Analysis

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof James Hughes, Dr William Kissane and Dr Paul Mitchell

**Availability:** This course is compulsory on the MSc in Conflict Studies. This course is not available as an outside option. Compulsory core course for, and entry restricted to, MSc Conflict Studies students only. It is capped at 4 groups.

**Course content:** What is intra-state conflict? How should we investigate and measure political violence? What causes national and ethnic conflict and other forms of political violence and why does it take particular forms? What are the most effective means of conflict resolution? This course will introduce students to the core theoretical debates on intra-state conflict and political

violence by analysing the major research in the field. The course is structured around three categories of analysis and explanation: causation, dynamics and outcomes. Central themes include: the nature of ethnic conflict, the role of legitimacy in political violence, contentious politics and control regimes; the causes, dynamics and consequences of civil war; self-determination and secession; top-down and bottom-up methods for conflict management and reconciliation, including external intervention, the role of civil society, and institutional designs. The course offers students the opportunity to engage with the main methodological approaches to the study of conflict, including critical case studies, process tracing, small n and large n research, which will enhance their skills for the dissertation. In the weekly lectures and seminars the themes will be explored through a mix of theory-based readings and works which provide in-depth case studies.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours in the Michaelmas Term. There will be a reading week in MT Week 6.

**Formative coursework:** Students are required to complete one formative essay of 2,000 words.

**Indicative reading:** Charles Tilly (2003) *The Politics of Collective Violence*, Cambridge: CUP;  
Paul Collier and Nicholas Sambanis eds (2005), *Understanding Civil War*, The World Bank, Vols 1-2;

James Hughes and Denisa Kostovicova eds (2018). *Rethinking Reconciliation and Transitional Justice after Conflict*. Abingdon: Routledge.

**Assessment:** Online assessment (100%) in January.  
Online assessment duration: 7 days in the January exam period (estimated amount of effort: 2 hours).

## GV4G7 Half Unit Marx and Marxism

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Lea Ypi

**Availability:** This course is available on the MA in Modern History and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit. This course is capped at 2 groups.

**Course content:** This course will try to develop an analysis of what we might call 'moral socialism' by engaging with authors who have developed the links between the thought of Kant and Marx and with one of the lesser known developments of Marxism in the 20th century: the Austro-Marxist school of thought. Together the group of thinkers associated to the Austro-Marxist movement provided one of the most original developments of Marx's theory by trying to combine aspects of Kant's moral philosophy with Karl Marx's critique of society. We will start with introductory sessions on the relationship between Kant and Marx and the historical context of Austro-Marxism. We will then each week explore different themes relevant to Austro-Marxist thought: from Max Adler's analysis of the social a priori to Otto Bauer's discussion of the nationalities problem, from Karl Renner's analysis of legal institutions to Rudolf Hilferding's analysis of finance capital. We will also cover the thought of Friedrich Adler and Otto Neurath and engage with criticisms of their theories by contrasting them with alternative Marxist analyses developed at the same time such as those of Lukacs, Lenin or Rosa Luxemburg. The focus throughout will be on understanding and assessing the Austro-Marxist's complex arguments. The course should be of interest to MSc students taking existing courses on liberalism and justice but also to students in Law, IR, Sociology, and International History.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours in the Michaelmas Term. This course includes a reading week in MT Week 6.

**Formative coursework:** One formative essay of around 2,000 words.

**Indicative reading:** Bottomore, Tom, and Patrick Goode. *Austro-Marxism*. Oxford: Clarendon Press, 1978.

Rabinbach, Anson. *The Austrian Socialist Experiment: Social Democracy and Austromarxism, 1918-1934*. Boulder: Westview Press, 1985.

Blum, Mark E., and Smaldone, William (eds.) *Austro-Marxism: The Ideology of Unity*. Leiden: Brill, 2016.

**Assessment:** Essay (100%, 4000 words).

## GV4H1 Half Unit Chinese Political Thought

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Leigh Jenco

**Availability:** This course is available on the MSc in China in Comparative Perspective and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at one group. **Priority will be given to students enrolled on the MSc in Political Theory.**

**Pre-requisites:** A specialist background in political theory is strongly recommended.

**Course content:** This course will introduce students to recurring debates and concepts within Chinese political thought. We focus on the germinal texts of the Warring States period (circa 400 BCE), such as the *Analects of Confucius* and the *Dao De Jing* of Laozi. Reading texts in translation, we will critically examine the variety of normative frameworks that have structured political thinking in early China, with a particular focus on the relationship between personal agency and political outcomes. This is NOT a history course; its broader goal is to help students use Chinese thought

to think critically and creatively about political and social life in general and not just in "Chinese" contexts. This course is suitable for students interested in political theory, philosophical approaches to politics, Chinese studies, and/or the history of political thought. Readings are entirely in English and NO prior knowledge of Chinese language or history is required.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours in the Michaelmas Term. This course includes a reading week in Week 6 of the MT.

**Formative coursework:** One formative essay of 1500 words maximum, excluding footnotes and bibliography, on an assigned topic.

**Indicative reading:** Ivanhoe, Philip J. *Readings in Classical Chinese Philosophy*. Edited by Philip J. Ivanhoe and Bryan W. Van Norden. 2nd ed. Hackett Pub Co, 2006.

Selections from De Bary, Wm. Theodore, and Richard John Lufrano. *Sources of Chinese Tradition*. Vol. 2, From 1600 Through The Twentieth Century. New York: Columbia University Press, 2000.

**Assessment:** Essay (80%, 3000 words) in the LT. Class participation (20%) in the MT.

The class participation element will be assessed via one group project and quality of contribution to seminar discussion.

### GV4H3 Half Unit

#### Feminist Political Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Sarah Goff

**Availability:** This course is available on the MPhil/PhD in Gender, MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. Priority is given to students in the MSc Political Theory programme.

**Course content:** This course covers some of the central debates in contemporary feminist political theory, with a particular emphasis on the legacy and usefulness of liberalism. The course focuses on debates and differences within feminist political theory, rather than justifications for, or defences of, feminist political theory. Among the problems raised are conceptions of the individual and individual autonomy; the relative invisibility of gender issues in mainstream literature on justice and equality; the tendency to conceive of equality in sex-blind terms; the tendency to presume a universally applicable set of norms. We consider the theoretical debates in relation to a number of contemporary political issues. Topics likely to be addressed include: feminism and contract, individualism and autonomy, equality and the politics of difference, marriage and feminist perspectives on trans issues.

**Teaching:** This course provides a combination of seminars and lectures totalling 20 hours in the LT. There will be a reading week in LT Week 6.

**Formative coursework:** Students will submit a short formative essay (up to 1500 words) and will be given feedback on this before submitting their assessed coursework.

**Indicative reading:** Simone de Beauvoir (1949) *The Second Sex*; Susan Moller Okin 'Forty Acres and a Mule for Women' *Politics, Philosophy & Economics* (2005); Carole Pateman (1988) *The Sexual Contract*; Iris M Young (1990) *Justice and the Politics of Difference*; Anne Phillips (1995) *The Politics of Presence*; Clare Chambers (2017) *Against Marriage: An Egalitarian Defence of the Marriage-Free State*; Serene Khader (2018) *Decolonizing Universalism: Towards a Transnational Feminist Ethic*; Talia Mae Bettcher 'Evil deceivers and make-believers: Transphobic violence and the politics of illusion' *Hypatia* (2007).

**Assessment:** Essay (100%, 4000 words).

### GV4H4 Half Unit

#### Foundations of Political Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Kai Spiekermann and Dr Zeynep Pamuk

**Availability:** This course is compulsory on the MSc in Political Theory. This course is not available as an outside option.

**Course content:** This course provides an introduction to the philosophical and methodological foundations of political theory. It aims to give participants a conceptual toolbox that can be brought to bear on many different substantive problems and research questions in political theory and neighbouring fields. The course introduces some central methodological debates in contemporary political theory, explores the links between political theory and related disciplines, and familiarises students with different approaches to political theorising.

**Teaching:** This course provides a combination of lectures, seminars, and other activities totalling 25 hours in Michaelmas Term.

There will be a reading week in MT Week 6.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:** David Leopold and Marc Stears (eds.) (2008) *Political Theory: Methods and Approaches* (Oxford: Oxford University Press); Adrian Blau (ed.) (2017) *Methods in Analytical Political Theory* (Cambridge: Cambridge University Press); John S. Dryzek, Bonnie Honig and Anne Phillips (eds.) (2008) *The Oxford Handbook of Political Theory* (Oxford: Oxford University Press); Robert E. Goodin and Philip Pettit (eds.) (1993) *A Companion to Contemporary Political Philosophy* (Oxford: Blackwell); Keith Dowding (2015) *The Philosophy and Methods of Political Science* (Palgrave).

**Assessment:** Essay (100%, 3000 words) in the LT.

### GV4H5 Half Unit

#### The Political Philosophy of Environmental Change

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Kai Spiekermann

**Availability:** This course is available on the MSc in Environment and Development, MSc in Environmental Policy and Regulation and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course analyses political and philosophical questions arising in the context of environmental change, especially climate change. The approach will be interdisciplinary. While the focus is on normative-philosophical issues, we will also make use of positive-analytical and empirical literature, potentially considering issues such as overpopulation, food and water scarcity, deforestation, desertification and the loss of biodiversity. Some of the questions to be discussed are: How should we balance the interests of current and future generations? How does climate change affect our obligations towards the global poor? How do we make policy decisions if the effects are uncertain but potentially severe? Are we individually or collectively responsible for causing climate change, and what follows from this? How do we relate to the environment and what precisely is valuable about preserving it?

**Teaching:** This course is delivered through a combination of lectures and seminars totalling 30 hours in the Lent Term. There will be a reading week in LT Week 6.

**Formative coursework:** Students will submit a short formative essay (up to 1500 words) and will be given feedback on this before submitting their assessed coursework.

**Indicative reading:** John Broome (2012) *Climate Matters: Ethics in a Warming World*, New York (W.W. Norton);

Stephen Gardiner, Simon Caney, Dale Jamieson and Henry Shue, eds. (2010) *Climate Ethics: Essential Readings*, Oxford (Oxford University Press);

Denis G. Arnold, ed. (2011) *The ethics of global climate change*, Cambridge (Cambridge University Press);

Stephen M. Gardiner (2011) *A Perfect Moral Storm: The Ethical Tragedy of Climate Change*, Oxford (OUP);

Intergovernmental Panel on Climate Change (2021-2) Sixth Assessment Report, Available at [www.ipcc.ch](http://www.ipcc.ch).

**Assessment:** Essay (100%, 4000 words).

## **GV4H6 Half Unit**

### **Behavioural Political Economy**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Rafael Hortala-Vallve

**Availability:** This course is available on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** It is required that students have some familiarity with formal models (game theory) and basic statistical concepts.

**Course content:** In this course we will introduce behavioural concepts and use them at explaining decisions of politicians, candidates for political office, voters, lobbyists, and other actors in the political and policymaking arena. The focus of the course will be academic but we will also visit the recent development by public policy practitioners – both the UK and the US have behavioural insights teams working closely with the executive branch.

We will analyse different political phenomena that do not perfectly fit our rational choice models. We will cover issues such as turnout in large elections, populist policies, framing of public policies to influence public opinion, attribution of blame to politicians, opt-in/opt-out policies and paternalism in policy recommendations, etc. By introducing insights from psychology to our classical political economy models we will study the effects of social, cognitive, and emotional factors on political decisions. Parallel to this formal analysis we will also introduce experimental methods.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 24 hours in the Lent Term. There will be a reading week in LT Week 6.

**Formative coursework:** A presentation on the topic of your summative essay to be delivered in an extra session in LT Week 9.

**Indicative reading:** Berggren, N (2011), "Time for behavioural political economy? An analysis of articles in behavioural economics", mimeo

De Rooij, E (2009), "Field Experiments on Political Behavior and Collective Action", *Annual Review of Political Science*

Druckman, J (2006), "The growth and Development of Experimental Research in Political Science", *American Political Science Review*

**Assessment:** Essay (50%, 3000 words) and take-home assessment (50%) in the ST.

Each student is required to submit an essay (3000 words including

footnotes and appendix) in Week 1 of Summer Term composed of two parts: the analysis of a behavioural aspect in a political economy situation and a novel experimental design proposal related to it. This essay will count for 50% of the final mark. The remaining 50% will be assessed by means of a take home exam.

## **GV4J4 Half Unit Not available in 2022/23**

### **Citizen Representation and Democracy in the European Union**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Sara Hobolt

**Availability:** This course is available on the MSc in Comparative Politics, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Global Politics, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 1 group.

**Course content:** This course offers the theoretically and empirically informed study of citizen representation in the European Union. The principal aim of the course is to develop a better understanding of the functioning of democracy in the European Union and provide the analytical tools to evaluate proposals for reform to alleviate the Union's so-called 'democratic deficit'. This course will examine both how citizens are represented in the European Union and how the EU shapes democratic politics in the member states. The first part of the course assesses pathways of representation and accountability in the European Union, focusing on representation of citizens' interests in the Council, Commission and the European Parliament as well other avenues for citizen influence, such as referendums and the Citizens' Initiative. The second part of the course examines political conflict over European integration at the domestic level, focusing on the role of European integration in national politics and public opinion, including the study of Euroscepticism and Brexit. The final part of the course evaluates different proposals for reform with the aim of strengthening democracy and representation in the EU, and students will have the opportunity to develop their own reform proposal.

**Teaching:** This course is delivered through seminars (20 hours in Michaelmas and 2 hours in Summer Terms). This course includes a reading week in Week 6 of MT. This year, some or all of this teaching may be delivered through a combination of online and on-campus seminars.

**Formative coursework:** One formative essay (1,750 words)

**Indicative reading:** C De Vries (2018) *Euroscepticism and the Future of European Integration* (Oxford University Press); C De Vries, D Hobolt, S-O Proksch and J Slapin (2021) *Foundations of European Politics* (Oxford University Press); S Hix, A Noury and G Roland (2007) *Democratic Politics in the European Parliament* (Cambridge University Press); S Hobolt and J Tilley (2014) *Blaming Europe: Responsibility Without Accountability in the European Union* (Oxford University Press); L McLaren (2006) *Identity, interests and attitudes to European integration* (Palgrave Macmillan); G Marks and M Steenbergen, (2004) *European Integration and Political Conflict* (Cambridge University Press); F Scharpf (1999) *Governing in Europe: Effective and Democratic?* (Oxford University Press).

**Assessment:** Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2500 words) in the LT.

## GV4J6 Half Unit Not available in 2022/23 Game Theory for Research

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Stephane Wolton

**Availability:** This course is available on the MRes/PhD in Political Science and MSc in Political Science and Political Economy.

This course is available with permission as an outside option to students on other programmes where regulations permit.

The deadline for applications is 17:00 on Tuesday 1 October 2019.

You will be informed of the outcome by 17:00 on Wednesday 2 October 2019.

**Pre-requisites:** Knowledge of game theory at the level of GV4C8 is required.

**Course content:** This course will help students think about the way game theory is applied to research in political science and political economy. Each week, students will study one working paper using game theory. Each lecture will have a substantive and a technical part. There will be an in-depth discussion of the paper (substantive part) and the lecturer will cover the main proofs of the paper on the board (technical part).

**Teaching:** 21 hours of lectures and 1 hour of lectures in the MT. There will be 1 introductory 1 hour lecture in Week 1, and then 6 lectures of three hours, each covering a different paper, in weeks 2-5 and weeks 7 and 8. In week 11, there will be a three-hour lecture where students will present a research project using game theory.

**Formative coursework:** Students will meet with the instructor to discuss their research project twice during the MT.

**Indicative reading:** Two useful (but advanced) game theory textbooks are:

- Game Theory. Drew Fudenberg and Jean Tirole. MIT Press (1991).
- Game Theory. Michael Maschler, Eilon Solan, and Shmuel Zamir. Cambridge University Press (2013).

A reading list of the papers reviewed in the first six lectures will be provided at the beginning of the term.

**Assessment:** Presentation (50%) and essay (50%) in the MT Week 11.

Students will be assessed on a class presentation on a research project of their choosing which involves game theory (weight 50%) and on writing a referee report on one of the papers covered in the lectures (weight 50%).

## GV4J7 Introduction to Political Science and Political Economy

**This information is for the 2022/23 session.**

**Teacher responsible:** Emiel Awad

**Availability:** This course is available on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is strongly recommended for MSc Political Economy and Political Science students. It is available for students from other programmes with permission of the instructor.

**Course content:** The aim of this pre-session course is to provide students with the essential background for the study of political economy in political science. It is specially tailored to prepare students for the core courses in the MSc PSPE programme, but can be of use for any student interested in the field.

One part of the course will focus on the mathematical concepts used in the rest of the MSc. PSPE. This part of the course will cover key concepts in algebra (definition of function, derivation, limits), maximization problems (constrained and unconstrained), and some notions of probability (Bayes' rule, random variables). In parallel, five sessions will be dedicated to introducing Stata to MSc. students. This part of the course will cover basic commands

and some more advanced ones, which will be used in the rest of the MSc. PSPE.

**Teaching:** This course provides 20 hours of introductory sessions at the beginning of the Michaelmas Term. Ten hours are devoted to mathematical foundations. The remaining hours will be devoted to an introduction to Stata.

Please note that all the teaching for this course will take place in Michaelmas Term Week 0 (19-23 September 2022).

**Indicative reading:** There is no required reading for this course.

## GV4J8 Half Unit Middle East Politics in Transnational Perspective

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof John Chalcraft

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Global Politics and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course offers an advanced introduction to the politics of the Middle East and North Africa in transnational perspective. It takes a critical, sociological, historically-informed, and qualitative approach. It focuses on cross-border forms of resistance and subaltern activism. We study such topics as transnational revolutionary movements, Third World national liberation, popular movements on the Arabian peninsula, feminism, Salafi-Wahhabism, human rights advocacy, and transnational Palestinian activism. Students will develop an advanced introductory understanding of the transnational politics of the region.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours in the Michaelmas Term. There will be a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:** Abdelrahman, Maha. 2007. 'The Nationalization of the Human Rights Debate in Egypt', *Nations and Nationalism*, 13(2), pp. 285–300; Abu-Lughod, Lila. 2013. *Do Muslim Women Need Saving?* Cambridge MA: Harvard University Press; Chalcraft, John. 2016. *Popular Politics in the Making of the Modern Middle East*. 'Transnational Politics: Contention and Institutions in International Politics' *Annual Review of Political Science* 2001 4:1, 1-20.

**Assessment:** Essay (100%, 5000 words) in the LT.

**GV4J9 Half Unit Not available in 2022/23****Populism**

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Francisco Panizza

**Availability:** This course is available on the MSc in Comparative Politics. This course is available with permission as an outside option to students on other programmes where regulations permit. The course is capped at two groups. It will be made available as an outside option to students in the MSc programme in Conflict Studies and the MSc programme in Global Politics. The deadline for applications is 17:00 on Tuesday 29 September 2020. You will be informed of the outcome by 17:00 on Wednesday 30 September 2020.

**Course content:** The course studies populism from a conceptual and comparative perspective. Given the highly contested nature of populism, the first weeks will look in depth to different theories of populism, including ideational, strategic and performative understandings of populism. It will then move to explore the cultural and socio-economic conditions of emergence of populism, the relation between populism and democracy and the relations between populism, political systems and popular movements. The last three lectures will seek to apply the conceptual tools presented in the first part of the course to regional and country case studies. Among the topics to be explored are: what do we talk about when we talk about populism? Populism as a "thin ideology" and as a political strategy; populism as a mode of political identification; the cultural and socio-economic causes of populism; populism and democracy; populism and political systems; populism and grassroots movements; and varieties of populism across different regions of the world.

**Teaching:** This course provides a combination of seminars and lectures totalling 25 hours in the Lent Term. This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and seminars. There will be a reading week in LT Week 6.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

One essay to be submitted in LT. The formative essay will offer an outline of the final essay - including key indicative reading. The feedback will be used in two ways: 1) to guide students' critical thinking in line with course learning outcomes; 2) to guide students on the key aspect of formatting an academic argument using literature and critical debate. Students will also be encouraged to reflect upon their learning from the presentation and use this to refine their summative essay.

**Indicative reading: Priority Readings**

- Yannis Stavrakakis and Giorgios Katsambekis (2014) "Left-wing Populism in the European Periphery- The Case of Syriza" Journal of Political Ideologies 19 (2) 2014.

**Assessment:** Essay (90%, 4000 words) in the ST. In-class assessment (10%) in the LT.

The in-class assessment (10%) consists of a student-led seminar based on a presentation of 15-20 minutes, followed by a structured discussion of the issues raised by the lecture and the presentation.

**GV4K1 Half Unit****Opening Government: Transparency, Accountability, and Participation**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Daniel Berliner

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Development Management, MSc in Development Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Global Politics, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high.

This course is capped at 2 groups.

**Course content:** Is "sunlight the best disinfectant"? Can information empower citizens to hold their government accountable? Can greater public participation and deliberation improve policymaking? How have information technologies been used to enable civic engagement? What are the relationships between transparency, participation, accountability, and corruption?

This course will familiarise students with the theory and practice of transparency, accountability, and public participation in government; enabling them to critically address these questions and engage meaningfully in fast-moving contemporary policy debates. Policy innovations based on transparency, participation, and deliberation are increasingly suggested as potential solutions to contemporary crises of government legitimacy and performance, making such critical understanding more crucial than ever.

The course will offer a grounding in theories of democracy, representation, and accountability, as well as debates over the merits of different types of policy innovations that are often called "open government" or "democratic innovations." The course will also enable students to evaluate the role played by different forms of information in political systems, as well as to critically assess the theories of change, assumptions, and evidence bases behind these initiatives.

The course has a global scope, focusing on applications in both developed and developing countries as well as at a global level; and on policy types including freedom of information, disclosure-based regulation, participatory budgeting, citizens' assemblies, crowdsourced policymaking, "civic tech," open data, campaign finance and asset disclosures, and applications of transparency and participation to sectors like extractive industries, the environment, and public health.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours in the Lent Term. There will be a Reading Week in Week 6 of LT.

**Formative coursework:** Students will be expected to produce one formative essay of 1,000 words in the LT.

**Indicative reading:**

  - Hale, Thomas. 2008. "Transparency, accountability, and global governance." *Global Governance* 14: 73.
- Assessment:** Essay (100%, 4000 words) in the ST.  
The essay component will be a research essay of 4000 words, due in the ST.

## GV4K2 Half Unit Postcolonial and Comparative Political Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Leigh Jenco

**Availability:** This course is available on the MSc in Global Politics and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. **Priority will be given to students enrolled on the MSc in Political Theory programme.**

**Course content:** This course will examine the consequences of, and responses to, the historic domination of Euro-American forms of knowledge in the field of political theory. Situating political theory as one of many disciplines that reinforce the cultural imperialism of colonial orders, the course will consider how postcolonial theorists have diagnosed this form of epistemic imperialism. We will go on to discuss how recent attempts at forging a "comparative political theory" might (or might not) productively engage more diverse forms of thinking for the purpose of making our conversations about political life more truly global, rather than parochially "Western." The course will provide students with the vocabulary and conceptual tools to navigate this difficult theoretical terrain, through a focus on a close reading of key texts. We focus in particular on how historical narratives and uses of the past complicate the attempt to overcome Eurocentrism. This course will be of interest to students of political theory, intellectual history, and the history of political and social thought.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours in the Lent Term. There will be a reading week in LT Week 6.

**Formative coursework:** Students will be expected to produce 1 essay (1500 words maximum excluding footnotes and bibliography) in the LT.

**Indicative reading:**

- Nandy, Ashis. 1988. *The Intimate Enemy: Loss and Recovery of Self Under Colonialism*. New Delhi: Oxford University Press.

- Dallmayr, Fred. 2004. "Beyond Monologue: For a Comparative Political Theory." *Perspectives on Politics* 2 (2): 124-44.

**Assessment:** Essay (80%, 3500 words) in the ST.

Class participation (20%) in the LT.

## GV4K4 Half Unit The Politics of Globalization

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mathias Koenig-Archibugi

**Availability:** This course is compulsory on the MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit. Students on the MSc Global Politics are guaranteed access; compatibly with this provision, the course is capped at two groups. **Course content:** This is the core course of the MSc Global Politics. It aims at enabling students to assess the extent of continuity and transformation in key areas of global politics.

The course will analyse how globalization shapes and in turn is shaped by, politics within countries, between countries and beyond countries. It will introduce the main approaches to the study of globalization and examine how it affects patterns of conflict, cooperation and competition between a range of politically relevant actors, including governments, political parties and citizens: great powers: intergovernmental and nongovernmental organisations: global companies and other non-state groups. These patterns of patterns of conflict, cooperation and competition will be illustrated with examples drawn from a variety of policy domains, such as security, economy, environment, health, and migration. The course will also assess the challenges to and opportunities for democracy in a global age.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours in the Michaelmas Term. There will be a reading week in week 6 of the MT for private study and assessment preparation.

**Formative coursework:** All students are expected to produce one written essay plus one short presentation in the MT on topics assigned to them.

**Indicative reading:** Held, David, Anthony McGrew, David Goldblatt and Jonathan Perraton (1999), *Global Transformations*, Cambridge: Polity Press.

A reading list with further readings will be provided at the beginning of the teaching term.

**Assessment:** Essay (100%, 4000 words) in the LT.

## **GV4K5 Half Unit Not available in 2022/23** **Being Truly Human - Personality Justice and Being**

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Paul Kelly CRB 4.18

**Availability:** This course is available on the MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course is designed to offer a detailed and critical reading of a series of important texts in the development of political theory in the early and mid Twentieth Century - the period prior to the post World War II triumph of Political Liberalism. These texts have an increasing importance in light of the challenge to the hegemony of Liberal political ideas associated with but not exclusively exemplified by John Rawls. Each of the texts and thinkers will be read in their own right as opposed to being seen as part of a 'tradition' or School. However, they overlap in that they each address the idea of the person, subject or individual that has come to dominate both Post World War II Human Rights Discourse and the ethical or moral individualism that is supposed to underpin liberal political theory. Each thinker attempts to address the importance of the person from a different ideological, political theological and philosophical perspective in order to salvage the significance of the human subject from the dominance of bureaucratic modernity and its political structures. By reading these texts we will uncover the resources of traditions of political and ethical discourse that have been obscured by the dominance of an 'ethically thin' liberal discourse. We will look at thinkers who have offered radical challenges to Marxism, Phenomenology and Existentialism, but at the same time not obscuring their distinctive voices by casting their thought under the shadow of some familiar and received debates. The course will consider the claims of the person including the 'separateness of persons' the ideas of Personalism and Humanism which feature in some debates about human rights. The course will also address how these concepts of personality and subjectivity connect with political concepts of the person and the status of political outsiders, especially migrants, immigrants, refugees and the dispossessed and the fundamental ethical political challenge of why we should care about the oppressed?

**Teaching:** 4 hours of seminars in the MT.

The course will be taught as a seminar with structured reading and summary presentations that all should prepare weekly on the basis of the teaching. Each session will begin with a 15-20 min mini lecture/talk to introduce the text and context and then to summarise student raised issues that form the basis of the class

discussion.

**Formative coursework:** Students are required to submit one report outline as preparation for their Assessment Essay. It is on the basis of this work that the title and scope of Summative Assessment Essays will be approved.

**Indicative reading:**

- Rosa Luxemburg Reform or Revolution and other Writings
- Edith Stein On the Problem of Empathy
- Edith Stein Philosophy of Psychology and the Humanities
- Simone De Beauvoir Philosophical Writings
- Simone De Beauvoir The Second Sex
- Simone Weil Oppression and Liberty
- Simone Weil The Need for Roots
- Simone Weil Selected Writings
- Hannah Arendt The Origins of Totalitarianism
- Hannah Arendt On Revolution
- Hannah Arendt Thinking Without a Banister

**Assessment:** Essay (100%, 5000 words) in the LT Week 1.

## **GV4K6 Half Unit Not available in 2022/23** **The Challenge of Political Theology in some Twentieth Century Political Theory**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Paul Kelly CRB 4.18

**Availability:** This course is available on the MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course will address what has come to be known as the problem of Political Theology. Although the idea has gone in and out of fashion throughout the twentieth century it remains a major and underlying challenge to political theory as exemplified most recently in thinkers like Martin Haggelund (2019). Although the course does not explore a single historical tradition of debate we will explore the ways the Political-Theological challenge has shaped the way in which political philosophy and theory has developed. The fundamental issue at the heart of the political theological challenge is the relationship between the claims of politics and the claims of higher authority to determine the scope of the claims of the political. This can take the form of the ways in which fundamental political concepts are shaped by theological ideas or the way in which a higher claim of the good (philosophical, ethical as well as theological) shapes the scope of political thinking and agency. We will explore a number of major texts which can be seen as a response to this challenge in seeking to represent modernist political theory as a passage through contested claims about value, belonging and the nature, purpose and meaning of history. The texts discussed provide different perspectives on the challenge of political theology and different pathways that have been obscured by the dominant voice of liberal political theory as the political discourse of modernity. The course will also offer a chance to consider some of the most important books in twentieth century European political theory at a time when the self-confidence of anglo-american political theory is in decline but where no new candidate discourse appears to be making a claim for hegemony. The course will require students to read across the required texts but will also allow specialisation on an individual thinker of issue in their assessment. The thinkers covered in the course include Schmitt, Heidegger, Popper, Hayek, Rawls, MacIntyre, Cavell and Shklar.

**Teaching:** 20 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 1 exercise in the LT.

**Indicative reading:**

- Carl Schmitt Political Theology
- Carl Schmitt The Concept of the Political
- Martin Heidegger Being and Time
- Martin Heidegger Basic Writings - selections
- Karl Popper The Open Society and its Enemies

- F.A. Hayek *The Constitution of Liberty*
- John Rawls *Political Liberalism*
- Alasdair MacIntyre *After Virtue*
- Stanley Cavell *The Claim of Reason*
- Judith Shklar *The Faces of Injustice*

**Assessment:** Essay (100%, 5000 words) in the ST.

---

## GV4K7 Half Unit

### Conflict and Cooperation: Key Debates

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Omar McDoom

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Global Politics and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at two groups. Priority will first be given to students enrolled on the programmes listed above in the Department of Government, then other masters programmes in the Department of Government, then the programmes listed above in other Departments, and finally other masters programmes by other Departments.

**Course content:** This course is structured around a series of distinct debates that broadly relate to the theme of conflict and cooperation. The debates may be normative or empirical in nature and the course scope is purposely broad to allow the choice of debates to evolve over time and to reflect the evolution in the scholarly literature of salient issues relating to conflict and cooperation.

Debates envisaged for the course may be considered either foundational (more likely to persist over time) and topical (more likely to change over time).

Foundational debates may include:

- Should governments be permitted to restrict civil liberties in the name of security?
- What role, if any, does inequality play in the onset of political violence?
- Should multiculturalism be preserved and promoted in plural societies?
- How may we distinguish between terrorist organizations and liberation movements?

Topical debates may include:

- How effective has non-violent resistance been in achieving political change?
- What are the forces driving the resurgence of nationalism and populism in the world today?
- What role can Big Data play in preventing and predicting violent conflict?
- What institutional solutions have worked to keep the peace in post-conflict societies?
- When is it permissible to kill civilians for a political cause?
- What is the relationship between ethnic diversity and social cohesion in plural societies?

**Teaching:** This course provides a minimum of 20 hours of seminars in the Michaelmas Term. There will also be a reading week in MT Week 6.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the MT.

Formative assessment involves an annotated bibliography (of 1000 words) evaluating 3-6 sources, which will then be used in the summative long essay.

**Indicative reading:**

- Conor Gearty: *Liberty and Security*
- Chandran Kukathas: *Are There Any Cultural Rights?* 160
- Al Qaeda: A statement from Al Qaeda regarding the mandates of the heroes and the legality of the 160 operations in New York and Washington
- Robert Putnam: *E Pluribus Unum: Diversity and Community in the*

*Twenty-first Century*

- Robert Pape: *Dying to win: the strategic logic of suicide terrorism*
- Joseph Carens: *Aliens and Citizens: The Case for Open Borders*
- Donald Horowitz: *Ethnic groups in conflict*, Chapter 4
- Daniel Byman: *Why Drones Work: The Case for Washington's Weapon of Choice*
- Roland Paris: *The 'Responsibility to Protect' and the Structural Problems of Preventive Humanitarian Intervention*

**Assessment:** Essay (80%, 3000 words).

Class participation (20%) in the MT.

The summative long essay will address one of the course debates. The question will be set by the instructor. The classroom participation will include contributions to an online discussion forum.

---

## GV4K8 Half Unit

### Global Public Policy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mathias Koenig-Archibugi

**Availability:** This course is available on the MSc in Global Politics.

This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. The course is capped at one seminar group and admission is not guaranteed.

**Course content:** The course examines the process and outcomes of policy-making at the global level. Students can choose an area of specialization from a range of global policy issues, with a focus on those addressed by the Sustainable Development Goals (SDGs) set by the United Nations. Examples of policy areas covered in the course are environmental governance, with a focus on the protection of forests; global health governance, with a focus on tackling communicable diseases; the promotion of workers' rights in the global economy; the elimination of gender-based discrimination and violence; and the fight against tax avoidance and illicit financial flows. The course considers a range of modes of policy-making, from classic intergovernmental cooperation to novel forms of governance beyond the state such as transgovernmental networks, multistakeholder initiatives, and regulation by non-state actors. The sessions cover the following topics: 1. What are "global", "public" and "policy"? Does global public policy exist? 2. Who are the targets of global public policy and what are their interests? 3. How to assess the performance of global public policy: output criteria. 4. How to assess the performance of global public policy: input and throughput criteria. 5. Which types and combinations of actors develop global public policies and how does it matter? 6. How are global "problems" framed and interpreted, and how does this affect their solution? 7. Do the delegation of authority and the legalization of global public policy affect its outcomes? 8. What role does deliberation and experimentation play in global policy initiatives? 9. What are the consequences of fragmentation and competition in the overall architecture of global public policy? 10. What are the prospects for building a global polity?

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours in the Lent Term. There will be a reading week in week 6 of the LT for private study and assessment preparation.

**Formative coursework:** Students will be expected to produce 1 essay and 1 presentation in the LT.

- Indicative reading:** Koenig-Archibugi, M. (2002) 'Mapping Global Governance', in D. Held and A. McGrew (eds) *Governing Globalisation*. Cambridge: Polity Press.
- Koenig-Archibugi, M. (2010) *Understanding the Global Dimensions of Policy*, *Global Policy*, Vol. 1(1): 16-28.
- Stone D. (2020) *Making Global Policy*, Cambridge University Press.
- Peinhardt, C. and Sandler, T. (2015) *Transnational Cooperation: An*

Issue-Based Approach. Oxford University Press.  
 Hale, T. and D. Held, eds (2017) *Beyond Gridlock*. Cambridge: Polity.

 Carpenter, R. C. "Women, children and other vulnerable groups": gender, strategic frames and the protection of civilians as a transnational issue." *International Studies Quarterly* 49, no. 2 (2005): 295-334.

**Assessment:** Essay (100%, 4000 words) in the ST.

## GV4L1 Half Unit

### Analytical Approaches to British Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Torun Dewan

**Availability:** This course is available on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is designed primarily for students on the MSc PSPE with the relevant training in quantitative methods and some game theory. It will also be available to students from other programmes with the relevant skill, space permitting.

**Pre-requisites:** The course is primarily for students on the MSc Political Science and Political Economy; students fulfilling the core requirements of the programme (completion of GV4C8 and GV481) will be eligible. Other students can be accepted if they have similar quantitative skills to students who have completed the first term of the PSPE programme, space permitting.

**Course content:** Strøm (2000) argues that the conceptual essence of Parliamentary government is a "historical evolution" – an accident of 19th century Britain that spread to other parts of the world. Recent analytical political science has shed light on Britain's political development and how its institutions function, using game theoretic modelling, rational choice narratives, and quantitative data. The course covers this literature and takes an analytical approach to topics such as: the historical development of British institutions and Imperial governance; the emergence and impact of Government-vs-Opposition; the historical development of the British party system; the causes and consequence of franchise extension; the Cabinet and its conventions; and the composition of the Executive and Parliament over time.

**Teaching:** 15 hours of lectures and 20 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a reading week in LT Week 6.

**Formative coursework:** One formative piece of work of 1500 words to be handed in at the end of reading week.

**Indicative reading:**

- Cox, G. (1987) *The Efficient Secret*, Cambridge University Press
- Berlinski, S., Dewan, T, and Dowding K. (2012) *Accounting for Ministers: Scandal and Survival in British Government 1945-2007*, Cambridge University Press
- Mclean, I (2002) *Rational Choice and British Politics: An Analysis of Rhetoric from and Manipulation from Peel to Blair*, Oxford University Press
- Schonhardt-Bailey, C (2006) *From the Corn Laws to Free Trade: Interests, Ideas and Institutions in Historical Perspective*, MIT Press

**Assessment:** Online assessment (100%) in the ST.  
 Online assessment duration: 7 days in the ST.

## GV4L2 Half Unit

### The Politics and Policy of Climate Change and Sustainability

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Michael Lerner CBG 4.21

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is not available as an outside option. This course has a limited number of places (it is controlled access) and demand is typically very high. This course is capped at 1 group.

**Pre-requisites:** A basic understanding of the physical science of climate change would be advantageous.

**Course content:** This course introduces students to the political dynamics underlying environmental governance and investigates the ways in which politics and policy shape the pace of sustainable transitions, attempts to mitigate climate change, and the struggle to adapt to a more uncertain climate.

The course provides a survey of core and emerging topics in environmental politics and policy, such as climate obstruction, environmental authoritarianism, and the governance of geoengineering. A unifying theme of the course will be its frequent attention to the political economy of climate (in)action. The course will also offer foundational instruction in the use of the comparative method to describe and explain variation in environmental politics. This course focuses primarily, but not exclusively, on domestic environmental politics in advanced industrialized democracies.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the LT. There will also be two supplementary recorded lectures on 1) the comparative method and 2) concepts and measurement in political science.

There will be a reading week in Week 6 of the Lent Term.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

**Indicative reading:**

- Bernstein, Steven, and Matthew Hoffmann. "Climate politics, metaphors and the fractal carbon trap." *Nature Climate Change* 9.12 (2019): 919-925.
- Seto, Karen C., et al. "Carbon lock-in: Types, causes, and policy implications." *Annual Review of Environment and Resources* 41 (2016): 425-452.
- Parris, Thomas M., and Robert W. Kates. "Characterizing a sustainability transition: Goals, targets, trends, and driving forces." *Proceedings of the National Academy of Sciences* 100.14 (2003): 8068-8073.
- Meckling, Jonas. "Oppose, Support, or Hedge? Distributional Effects, Regulatory Pressure, and Business Strategy in Environmental Politics." *Global Environmental Politics* 15.2 (2015): 19-37.
- Stroup, Sarah S., and Wendy H. Wong. *The Authority Trap*. Cornell University Press (2017). Chapter 1.
- Finnegan, Jared J. "Institutions, climate change, and the foundations of long-term policymaking." *Comparative Political Studies* (2022).
- Baldwin, Elizabeth, Sanya Carley, and Sean Nicholson-Crotty. "Why do countries emulate each other's policies? A global study of renewable energy policy diffusion." *World Development* 120 (2019): 29-45.
- Stokes, Leah C. *Short Circuiting Policy: Interest Groups and the Battle over Clean Energy and Climate Policy in the American States*. Oxford University Press (2020). Chapter 1.

**Assessment:** Blog post (20%) in the ST.

Policy report (80%) in the ST.

Students will write two blog posts (one in the first five weeks of the term, one in the last five weeks of the term, 9 opportunities total), of which one will be submitted for assessment (750 words). The assessed policy report will have a word limit of 3000 words.

**GV4L3 Half Unit****Data Science Applications in Politics Research**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Melissa Sands

**Availability:** This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is not available as an outside option.

This course is capped at 1 group. Priority will be given to students enrolled on programmes in the Department of Government.

**Pre-requisites:** Quantitative Analysis for Political Science (GV481), Introduction to Quantitative Analysis (MY451), or equivalent.

**Course content:** This course introduces students to the latest empirical research and covers different applications of novel and "big" data in political science. Themes include causality and credibility, administrative and open data, media, social media, and search data, and text and image data. Students will be introduced to the set of questions that each type of data can help answer. The course situates the "big data" revolution within the broader context of political science and policy research and discusses some of the promises and pitfalls of digital innovations and new data science methods, with an emphasis on the importance of ensuring the integrity of the research process from start to finish.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT. There will be a reading week in Week 6 of the Lent Term.

**Formative coursework:** Students will be expected to produce 1 presentation and 1 problem sets in the LT.

Presentation is a brief (10-15) overview and critique of one published research paper of the student's choice, selected from a menu of options.

**Indicative reading:**

- Brady, Henry E. "The challenge of big data and data science." *Annual Review of Political Science* 22 (2019): 297-323.
- Titiunik, Rocío. "Can big data solve the fundamental problem of causal inference?." *PS: Political Science & Politics* 48, no. 1 (2015): 75-79.
- Carlitz, Ruth D., and Rachael McLellan. "Open Data from Authoritarian Regimes: New Opportunities, New Challenges." *Perspectives on Politics* 19, no. 1 (2021): 160-170.
- King, Gary, Jennifer Pan, and Margaret E. Roberts. "How the Chinese government fabricates social media posts for strategic distraction, not engaged argument." *American political science review* 111.3 (2017): 484-501.
- Chen, M. Keith, and Ryne Rohla. "The effect of partisanship and political advertising on close family ties." *Science* 360, no. 6392 (2018): 1020-1024.
- Nickerson DW, Rogers T. 2014. Political campaigns and big data. *Journal of Economic Perspectives* 28(2):51-73
- Lerman, Amy E., and Vesla Weaver. "Staying out of sight? Concentrated policing and local political action." *The ANNALS of the American Academy of Political and Social Science* 651, no. 1 (2014): 202-219.
- Vomfell, L., Stewart, N. Officer bias, over-patrolling and ethnic disparities in stop and search. *Nat Hum Behav* 5, 566-575 (2021)
- Law, Tina, and Joscha Legewie. "Urban data science." *Emerging Trends in the Social and Behavioral Sciences: An Interdisciplinary, Searchable, and Linkable Resource* (2015): 1-12.

**Assessment:** Coursework (80%, 3000 words) in the ST.

Problem sets (20%) in the LT.

The coursework would comprise a replication exercise, where students replicate and extend the analysis of one published research paper.

**GV4L5 Half Unit****Politics, Gender, and Development**

**This information is for the 2022/23 session.**

**Teacher responsible:** Nirvikar Jassal

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Global Politics, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students on the programmes listed above.

**Pre-requisites:** Familiarity with basic research design and statistics is necessary.

**Course content:** While political science scholarship on gender may often focus on disparities between men and women in terms of political participation, the way inequalities in other domains such as (a) health, (b) education, (c) criminal justice, and (d) the bureaucracy intersect with politics may sometimes be overlooked. This course provides a survey of empirical social science research on gender over the past 20-years primarily from development economics and political science from a range of countries, including those in the Global South. Some of the topics that the course will cover include: how does the representation of women in political institutions affect development? Why do women remain underrepresented in state bureaucracies? Are there any state policies that can serve to reduce gender-based violence or improve women's access to property rights? Broadly, the class explores research related to why and where disparities persist between men and women, as well as what kind of interventions – adopted by governments, NGOs, and other agencies – mitigate these gaps, as well as make public institutions more equitable and inclusive.

**Teaching:** 20 hours of seminars in the LT.

There will be a reading week in Week 6 of the Lent Term.

**Formative coursework:** Students will be expected to produce 1 essay at the end of the term on an original research question related to politics, gender and development.

**Indicative reading:**

- Chattopadhyay, Raghavendra, and Esther Duflo. 2004. "Women as Policy Makers: Evidence from a Randomized Policy Experiment in India." *Econometrica* 72 (5): 1409-43. <https://doi.org/10.1111/j.1468-0262.2004.00539.x>.
- Iversen, Torben, and Frances Rosenbluth. 2006. "The Political Economy of Gender: Explaining Cross-National Variation in the Gender Division of Labor and the Gender Voting Gap." *American Journal of Political Science* 50 (1): 1-19. <https://doi.org/10.1111/j.1540-5907.2006.00166.x>.
- Alesina, Alberto, Paola Giuliano, and Nathan Nunn. 2013. "On the Origins of Gender Roles: Women and the Plough \*." *The Quarterly Journal of Economics* 128 (2): 469-530. <https://doi.org/10.1093/qje/qjt005>.
- Mendelberg, Tali, Christopher F. Karpowitz, and Nicholas Goedert. 2014. "Does Descriptive Representation Facilitate Women's Distinctive Voice? How Gender Composition and Decision Rules Affect Deliberation." *American Journal of Political Science* 58 (2): 291-306.
- Schwindt-Bayer, Leslie A. 2006. "Still Supermadres? Gender and the Policy Priorities of Latin American Legislators." *American Journal of Political Science* 50 (3): 570-85.
- Carrell, Scott E., Marianne E. Page, and James E. West. 2010. "Sex and Science: How Professor Gender Perpetuates the Gender Gap." *The Quarterly Journal of Economics* 125 (3): 1101-44.

**Assessment:** Essay (100%, 4000 words) in the ST.

The summative assessment comprises one final take-home essay on an original research question.

Students will be able to answer their original research question using any social science methodology discussed in class, qualitative research, or any other technique discussed with the convener.

## GV4L6 Half Unit

### Political Economy of Inequality

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Pavithra Suryanarayan

**Availability:** This course is available on the MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** At the heart of the study of politics is a question about who gets what and when. Consequently, inequality features as a central theme in the discipline. Scholars have studied how inequality shapes democratization, redistribution, voting behaviour, and how the institutions of welfare and taxation in turn shape inequality. More recently, scholars have started to pay attention to how inequality across and within ethnicities, races, and gender may matter to political outcomes. The centrality of inequality is reflected in the significant increase in quantity and quality of research on this subject over the past two decades. In this course we will cover the following topics:

- Normative foundations and conceptual complexities involved in the study of inequality
- Measures of inequality
- Inequality in a comparative perspective: evolution over time and across countries
- Economic explanations for the changing patterns of inequality over the past two centuries globalization, technological change
- Historical institutions and the persistence of Inequality
- The political economy of redistribution Taxation, redistribution and the growth of welfare state
- Identity politics and redistribution – class, status, ethnicity/race and gender
- Beyond economic inequality: inequality in welfare, happiness and health
- Educational inequality, mobility and politics
- The constraints to addressing inequality: global market integration, state capacity and Robinhood Paradox.

**Teaching:** 25 hours of seminars in the MT.

There will be a reading week in MT Week 6.

Weekly classes will last 2.5 hours with a lecture component that will vary each week. Earlier in the term as we engage with definitions, concepts and measurement the lectures will comprise around 30-45 mins of class time. Later in the term, the lectures will provide a broad overview of the topic and set the terms of the seminar discussion and will likely run for around 15-20 mins of class time. The professor will tape the lecture component of the class for students.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

The formative coursework comprises a 1000-word response essay written for the week that the student serves as a discussant in class. The lecturer will assign which week the student will write about.

**Indicative reading:**

- Ansell, B.W., 2010. *From the Ballot to the Blackboard: The Redistributive Political Economy of Education*, Cambridge: Cambridge University Press.
- Roemer, J.E. et al., 2009. *The Oxford Handbook of Economic Inequality*. 1st ed., Oxford: Oxford University Press.
- Atkinson, Anthony B, and François Bourguignon, 2000. *Handbook of Income Distribution*. Vol. 1, Oxford: Elsevier Science & Technology.

**Assessment:** Essay (80%, 4000 words) in the period between MT and LT.

Proposal (20%) in the MT.

The summative assessment comprises:

1 a 250-word proposal for the final essay and the in class presentation will be folded into the formative assessment and will be used as a way to provide feedback on the final project. It is to ensure that students are on track to complete their final essay on

time.

2 a 4000-word final essay at the end of the MT, based on a topic on inequality.

## GV4L7 Half Unit

### Political Participation and Representation in Latin America

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mathias Poertner CBG 3.34

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students on the programmes listed above.

**Course content:** Latin America has long been the center of dynamic political, social, and economic change. The region has suffered some of the most repressive political regimes, highest degrees of economic inequality, and worst organized crime. Yet Latin America has also been the focus of some of the most innovative experiments in democratic participation and social mobilization.

This course surveys key topics related to political representation and participation in the region. The first five weeks focus on key moments of political representation and participation in twentieth and twenty-first century Latin America, going from the emergence of mass politics in the 1930s and 1940s to the collapse of democracies in the 1960s and 1970s, the return to democracy in the 1980s, and more recent processes of democratic consolidation and economic liberalization. The second half of the course then explores specific topics of political participation and representation in more detail. Here, the course will focus on the role of social movement organizations (e.g., labour unions and indigenous movements) and political parties for representation, the formation of political attitudes and voting behaviour, the emergence and demise of partisanship, the inclusion and representation of crucial social identities (such as ethnicity, gender, and class), specific party-voter linkages, and participatory institutions in the context of the recent inclusionary turn in the region.

This course will offer a grounding in underlying institutional and behavioural theories behind political representation and participation, as well the broader political and economic context in twentieth and twenty-first century Latin America. Students will gain empirical knowledge on the region's politics, a deeper theoretical understanding of issues of political representation and participation, as well as crucial analytical skills.

**Tentative outline of weekly topics:**

- 1 Overview & Introduction
- 2 The Emergence of Mass Politics
- 3 Democratic Breakdown
- 4 Democratization
- 5 Neoliberalism under Democratic Rule
- 6 Popular Interests: Labour, the Rural Sector, and Indigenous Movements
- 7 Political Parties and Partisanship
- 8 Party-Voter Linkages: Ethnicity, Gender, and Class
- 9 Party-Voter Linkages: Clientelism
- 10 The Inclusionary Turn and Participatory Institutions

**Teaching:** 20 hours of seminars in the LT.

This course is delivered through seminars totalling a minimum of 20 hours in the Lent Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

An annotated bibliography (1000 words) evaluating 3-6 sources which will be used in the summative long essay.

**Indicative reading:**

- Collier, Ruth Berins and David Collier. 1991. *Shaping the Political Arena: Critical Junctures, the Labor Movement, and Regime Dynamics in Latin America*. Princeton: Princeton University Press, excerpts.

Stanford: Stanford University Press, pp. 257-294.

**Assessment:** Essay (80%, 2500 words) in the period between LT and ST.

Presentation (20%) in the LT.

- **Classroom participation & country reporting (20%):** In addition to active participation in class, students are responsible for ongoing reporting about politics in one Latin American country, assigned in Week 1, throughout the course of the semester. Students will be responsible for following the news on "their" country every week. Once during the semester, each student will give a current event report on "their" country. This brief (5 minutes) presentation should describe one of the major political events that have affected "their" country within the last six months.

- **A summative essay (80%):** 160a critical research essay addressing one of the course topics (2500 words)

## GV4M6 Half Unit

### Modern African Political Philosophy

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Katrin Flikschuh

**Availability:** This course is available on the MSc in Political Theory. This course is not available as an outside option.

This course is capped at one group.

**Pre-requisites:** This course assumes no particular pre-requisites aside from intellectual curiosity about non-Western traditions of thought. Some prior exposure to either political theory or philosophy will be an advantage.

**Course content:** This course introduces students to post-independent African philosophical and political thinking. The

chief objective of the course is to get students to engage with the intellectual heritage of the African continent and critically to re-think historically ingrained misperceptions about its peoples and cultures. Please note that this course focuses on modern African philosophy and political theory. The orientation is not anthropological or developmental; nor is this a course in 'post-colonial studies' more broadly conceived. There will be three broad blocks:

1. Methodology: 'What is African Philosophy?' We will examine the development from an oral to a written tradition and the particular methodological challenges involved. We will assess the prefix 'African': is such a geographical and/or cultural scope restriction consistent with the very idea of 'philosophy'? If there is a distinctly 'African' philosophy, does this in turn challenge the universalising assumption of 'Western' philosophy? If there is 'African' philosophy as well as there being 'Western' philosophy, then what is 'philosophy'?

2. Substantive Issues: 'Personhood, Agency, and Community'. We will discuss African thinkers' claims to the distinctiveness of African cultures' metaphysical and moral conceptions of self and society, and how these in turn impact conceptions of moral and political agency. We will compare and contrast Western individualist conceptions of the person with communal African conceptions; we will consider the idea of ancestral existence as a form of moral life after death; we will compare and contrast conceptions of individual freedom, destiny, and communal responsibility. Throughout, we will ask whether divergent conceptions of moral personhood are coherently possible or whether we should seek to strive for convergence towards a universal norm.

3. Implications: We shall ask how African thinkers conceive their social and political contexts and how their views do or do not cohere with Western thinking about African developmental challenges. Given their colonial origins, are current state structures in Africa morally and politically viable? Are human rights discourses truly universal, or are they excessively individualistic and insufficiently cognisant of the value of community? Are current aid and development premised on adequate background assumptions about modern African politics, or do they need to be revised?

**Teaching:** This course provides a combination of seminars and lectures totalling 20 hours in the Michaelmas term. There will be a reading week in Week 6 of Michaelmas term.

**Formative coursework:** Students will be expected to produce 1 formative essay in the MT.

Formative assessment will consist of an essay of maximally 2500 words in length. A list of essay questions will be made available by Week 3 of MT. Students may design their own essay questions, if they prefer to do so. However, they must clear their proposed essay question with the course convener beforehand. Course work must be submitted by the end of Week 7. The essay will be read and commented on. It will be assigned a guide-mark but will not form part of the summative assessment. Essays substantially above 2500 words will not be read.

**Indicative reading:** Anthony Kwame Appiah, *In My Father's House. Africa in the Philosophy of Culture* (OUP 1992).

Kwame Gyekye, *Tradition and Modernity. Philosophical Reflections on the Africa Experience* (OUP 1997).

Barry Hallen, *A Short History of African Philosophy* (Indiana University Press 2002).

Paulin Hountondji, *African Philosophy: Myth and Reality* (Indiana University Press, 1996).

Teodros Kiros (ed.) *Explorations in Africa Political Thought* (Routledge 2001).

V.Y. Mudimbe, *The Invention of Africa. Gnosis, Philosophy, and the Order of Knowledge* (Indiana University Press 1988).

Kwasi Wiredu, *Philosophy and an African Culture* (CUP 1980).

Kwasi Wiredu (ed.), *A Companion to African Philosophy* (Blackwell 2006).

Lee Brown (ed.) *African Philosophy* (OUP 2006).

Placide Temples, *Bantu Philosophy*, 1945.

Paulin Hountondji, *The Struggle for Meaning* (Ohio State University

Press 2002)

Kwasi Wiredu, *Cultural Universals and Particulars* (CUP 1996).  
Odera Oruka, *Sage Philosophy*, 1990.

Emmanuel Chukwudi Eze, *On Reason. Rationality in a World of Cultural Conflict and Racism* (Duke University Press 2008).

**Assessment:** Essay (100%, 5000 words).

The assessed work for this course consists of one extended essay of 5000 words due at the beginning of Lent term, on a course topic either chosen from the list of essay questions or designed by the student him or herself in consultation with the course convener.

Students are permitted to use their formative essay as a basis for their assessed essay. However, the assessed essay must advance substantially beyond the argument made in the formative essay; students must not submit the same work twice. The assessed essay must be submitted electronically to the Departmental Office. The submitted essay will undergo a plagiarism check, including self-plagiarism. Plagiarism is a serious academic offence which, if proven, will likely incur the penalty of official course failure. Late submissions will incur penalties in the form of mark deduction.

## GY400 Half Unit

### The Economics of Urbanisation

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof John Henderson Stc.506b

**Availability:** This course is available on the MPhil/PhD in Economic Geography, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Geographic Data Science, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development.

This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** No specific LSE course requirements. At a minimum, students should have an analytical course in micro-economics (or equivalent) and a basic statistics or econometrics course.

**Course content:** This MSc course will offer students the opportunity to learn some of the conceptual foundations and empirical regularities involved in studying why countries urbanise, the nature of structural and spatial transformation involved in the urbanisation process and the development of systems of cities. Complementing this will be a study of the internal spatial transformation of cities, the evolution of the location of production activities, the formation and role of slums, and the evolution of land market regulations and property right assignments. Critical to understanding these processes will be learning about the role of regulation and political processes, as well as policy initiatives, in shaping outcomes. The course will also examine the current process of urbanisation in Asia and Africa in the various special contexts of different regions and countries, drawing from lessons of the past as experienced in Latin America and parts of the developed world.

**Teaching:** 20 hours of lectures and 20 hours of seminars in the LT. The first three weeks of seminars will involve a review of basic statistical methods to help prepare students for class and lecture material.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

**Indicative reading:** Duranton G. (2008), 'Viewpoint: From cities to productivity and growth in developing countries', *Canadian Journal of Economics*, Vol. 41, No. 3, 689-736

Ghani E, S. O'Connell and E. Rossi-Hansberg (2014) 'The Spatial Development of India,' *Journal of Regional Science*, forthcoming  
Henderson, J.V. T. Regan, and A. J. Venables (2017) "Building the city: urban transition and institutional frictions," SERC and CERP

working paper

Bertaud A and J Brueckner (2005) 'Analyzing building height restrictions: predicted impacts and welfare costs' *Regional Science and Urban Economics*, 35, 109-125

Donaldson D, (2017) 'Railroads of the Raj' *American Economic Review*, forthcoming

Galiani S. and E. Scharrodsky (2011), 'The dynamics of land titling regularization and market development', *United Nations University – World Institute for Development Economic Research*, Working Paper No. 2011/88.

**Assessment:** Presentation (30%) in the LT.

Take-home assessment (70%) in the ST.

## GY403 Half Unit

### Contemporary Debates in Human Geography

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Murray Low STC S512

**Availability:** This course is compulsory on the MPhil/PhD in Human Geography and Urban Studies and MSc in Human Geography and Urban Studies (Research). This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

Compulsary for MPhil/PhD Human Geography and Urban students without MSc Human Geography and Urban Studies.

**Course content:** This is a reading seminar course, organised around key works pertinent to cities, development and human geography. While by no means comprehensive, the syllabus provided in the first week of the course will detail some key debates in geography, urban studies and development studies, which we explore in some detail over the term. The readings will reflect a range of approaches to the disciplines of human geography, urban studies and development studies, in order to convey the dynamic interplay between these three areas of scholarship. Discussions with colleagues in these areas of research, alongside readings of foundational texts, will be aimed at exploring how theory and evidence connect in critical geographical research.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of interactive lectures across Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of Michaelmas Term and Lent Term.

**Formative coursework:** A 2,500 word essay

**Indicative reading:** Readings focused on in this course will vary from session to session. A detailed syllabus will be provided at the beginning of the course, but would include works such as T Cresswell (2013) *Geographic Thought*; D Gregory et al, *The Dictionary of Human Geography* (5th edn), 2009; D Harvey, *Social Justice and the City*, 2009; D Harvey, *The Enigma of Capital*, 2010; N Smith, *Uneven Development*, 2008; D Massey, *Space, Place and Gender*, 1994; E Soja, *Seeking Spatial Justice*, 2010; R Peet and M Watts, *Liberation Ecologies*, 2004; J Ferguson, *The Antipolitics Machine*, 1994; T Mitchell, *Rule of Experts*, 2002; A Roy, *Poverty Capital*, 2010; and D Gregory and Allan Pred, *Violent Geographies*, 2006.

**Assessment:** Essay (100%, 5000 words) in the ST.

**GY404 Half Unit****Inclusive Growth**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Neil Lee

**Availability:** This course is available on the MPhil/PhD in Economic Geography, MSc in Geographic Data Science, MSc in Local Economic Development and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A good background in economic geography, economics, public policy, social policy or regional and urban studies.

**Course content:** Economic change is reshaping local economies. Trade and new technologies are changing labour markets, raising concerns about the future of work. New, disruptive tech industries concentrate in a small number of tech hubs, leading to spatial inequality. And these tech hubs themselves are often marked by inequality and exclusion of many groups. These issues raise important challenges for policymakers. How can they balance the tension between innovation and inequality? Is it possible to grow the economy in a way which benefits workers? Is Inclusive Growth possible in the modern economy?

This course focuses on the intersection between local economic development, technological change, and labour markets. The aim is to take academic work and apply it to policy: each week we cover academic theory and evidence and then relate this to a current policy challenge. Topics include the geography of poverty, spatial labour markets, labour market change, the challenge of high- and low-skills policy, and the geography of social mobility. The second half of the term focuses on the critical analysis of policy agendas. Topics include the impact of tech-led development on low-wage workers, spatial targeting of anti-poverty efforts, microfinance and entrepreneurship, and inclusive innovation policy.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered via a series of seminars in Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students are expected to present, debate, and participate actively in seminars.

**Indicative reading:** Lee, N. 2018. Inclusive Growth in Cities: A Sympathetic Critique, *Regional Studies*, 53(9), 424-434. OECD. 2014. All on board: Making inclusive growth happen. Paris: OECD; E Moretti, 2013, *The New Geography of Jobs*.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

**Course content:** The economic geography of globalization, and examination of some of the principal effects of globalization on economic development of cities, regions and nations. Theories of regional economic development, location, and trade are applied to the contemporary process known as "globalization", and used to decipher this phenomenon and its effects on development, employment, and political institutions. A number of major issues for regional and industrial policy are considered, including trade, convergence/divergence, corporate power, knowledge and technology, governance, and inter-place competition.

**Teaching:** In Michaelmas Term 2021, GY 409 teaching will be delivered through a combination of live classes/seminars, live classroom lectures, complemented by live lecture recordings available for consultation.

This course is delivered through a combination of lectures and workshops across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas.

**Formative coursework:** Students will be expected to participate in group work in the workshop sessions that take place every two weeks, using a combination of written presentations with written presentation slides, interactive games, and other methods used.

**Indicative reading:** P Aghion; J G Williamson, *Growth, Inequality and Globalization*, Cambridge University Press, 1998; S Brakman, H Garretsen; C van Marrewijk, *The New Introduction to Geographical Economics*, Cambridge University Press, 2009; G Clark, M Gertler; M Feldman (Eds), *The Oxford Handbook of Economic Geography*, Oxford University Press, 2000; C Crouch, P Le Galès, C Trigilia; H Voelzkow (Ed), *Local Production Systems in Europe: Rise or Demise?*

Oxford University Press, 2001;

J H Dunning (Ed), *Regions, Globalization and the Knowledge-Based Economy*, Oxford University Press, 2000;

P Krugman; M Obstfeld, *International Economics: Theory and Policy*, Harper-Collins, 1991; A Scott (Ed), *Global City Regions*, Oxford University Press, 2000;

M Storper, *The Regional World: Territorial Development in a Global Economy*, Guilford Press, 1997.

A number of more specialised texts will be recommended at the beginning of the course.

**Assessment:** Take-home assessment (100%) in the ST.

The exam is organised as a set of essay questions that reflect the content of lectures and readings in the course. Students are offered a choice of questions from which to select. The questions are generally offered in two or three groups, where students will select one question from each group of offered questions.

**GY409 Half Unit****Globalisation and territorial development: Theory, Evidence and Policy**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Michael Storper

**Availability:** This course is available on the MPhil/PhD in Economic Geography, MSc in City Design and Social Science, MSc in Development Management, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**GY410 Half Unit****Economics of Local and Regional Development**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Riccardo Crescenzi STC S417

**Availability:** This course is available on the MPhil/PhD in Economic Geography, MSc in Development Management, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

**Course content:** Why do some regions and territories perform systematically better than others in terms of economic development and wealth? What are the key drivers of local and regional economic performance? How can local and regional economic development policies boost economic activity and improve socio-economic conditions in disadvantaged areas? Globalisation and technological change have challenged the 'traditional' answers to these questions and call for new analytical and policy tools. This course provides students with an in-depth understanding of the macro and meso-level determinants of regional and local economic development and of the policies influencing these drivers. After examining the existing disparities in regional economic performance between and within a number of advanced, emerging and developing countries, the course illustrates the scope and justification for government intervention in this area. Various theories and approaches to local and regional economic development, leading to different policy prescriptions, are analysed in order to identify different macro and meso determinants of economic performance (from innovation and human capital to knowledge spillovers and global networks). In particular, the course dwells on the regional policy of the European Union (EU) - one of the most important large-scale regional policy experiences - in order to discuss the pros and cons of existing policy tools and illustrate the benefits of a 'balanced' approach to the analysis, design, management and implementation of regional and local economic development policies in a globalising world. In this context, special attention will also be devoted to the cases of the United States, China and India in a comparative perspective.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the MT.

**Indicative reading:** H W Armstrong & J Taylor, *Regional Economics and Policy*, Macmillan, 2000; R Capello, *Regional Economics* 2nd Edition, Routledge, 2016; R Crescenzi & M Percoco *Geography, Institutions and Regional Economic Performance*, Springer, 2013; R Crescenzi & A Rodríguez-Pose *Innovation and Regional Growth in the European Union*, Springer, 2011; C Jones *Introduction to Economic Growth* 2nd edition, Norton 2001; P McCann *Urban and Regional Economics*, OUP 2001; A Pike, A Rodríguez-Pose & J Tomaney, *Local and regional development* 2nd Edition, Routledge, 2017.

A number of more specialized texts will be recommended at the beginning of the course.

**Assessment:** Take-home assessment (100%) in the LT.

---

## GY413 Half Unit Regional Development and Policy

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Andres Rodríguez-Pose STC S4.07

**Availability:** This course is available on the MPhil/PhD in Economic Geography, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Inequalities and Social Science, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit. The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

**Pre-requisites:** A good background is required in one of the fields of management, economics, economic geography, regional and urban studies.

**Course content:** This course deals with the management and institutions of local and regional economic development. It dwells on the socio-economic implications of the emergence of local and regional governments and institutions as key actors in the design and implementation of economic development strategies across the world. In particular, the first section of the course analyses the consequences for economic efficiency and equality of the gradual but relentless shift of development responsibilities from the national and the supranational to the local and regional scale, linked of political and fiscal decentralisation. The second section of the course focuses, from a theoretical and empirical perspective, on the strategies being implemented by subnational governments across the world in order to cope and redress development problems. Strategies based on the building of infrastructure, the attraction of foreign direct investment, the support to local production and the promotion of local human resources are analysed in different institutional and governance contexts. The course draws on examples from Europe, the US, Latin America, and Asia.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students will be expected to participate in group debates throughout the course, with written presentation slides required. Feedback is provided in the sessions.

**Indicative reading:** N Brenner, *New state spaces: Urban governance and the rescaling of statehood*, Oxford University Press, 2004; P Dicken, *Global Shift: Mapping the Changing Contours of the World Economy* (7th edition), Sage, 2021; J D Donahue, *Disunited States*, Harper Collins, 1997; R Kanbur and A J Venables, *Spatial inequality and development*, Oxford University Press, 2005; P. McCann, *The UK regional-national economic problem: Geography, globalisation and governance*, Routledge, 2016; A Pike, A Rodríguez-Pose and J Tomaney, *Local and regional development* (2nd edition), Routledge, 2017; A Pike, A Rodríguez-Pose & J Tomaney, *Handbook of Local and Regional Development*, Routledge, 2011; R J Putnam, *Bowling alone: The collapse and revival of American community*, Simon & Schuster, 2000; A J Scott, ed., *Global city-regions*, Oxford University Press, 2001; J Rodden, *Why Cities Lose: The Deep Roots of the Urban-Rural Political Divide*, Basic Books, 2019; M Storper, *The Regional World: Territorial Development in a Global Economy*, Guilford Press, 1997. A number of more specialised texts will be recommended at the beginning of the course; M Storper, *Keys to the city: How economics, institutions, social interaction, and politics shape development*, Princeton University Press, 2013.

**Assessment:** Take-home assessment (100%) in the ST.

---

## GY415 Half Unit Not available in 2022/23 Local Capacity and Economic Development Policy

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Simona Iammarino STC S410

**Availability:** This course is available on the MSc in Geographic Data Science, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** This course is aimed at understanding the micro foundations of local economic development, that is the determinants and effects of the behaviour, strategies and

choices of key economic actors: local firms, both small and large, multinational enterprises, universities and other education and research organisations, government bodies, NGOs, and local communities. The study of different theoretical approaches, empirical evidence and implications of the behaviour of such actors, and their interactions and linkages, will help building up the analytical framework to interpret the genesis of localised economic systems, their dynamics and evolution over time and the policy options available, particularly, but not exclusively, from a bottom-up perspective. We will make use of an extended array of empirical examples and case studies across regions and industries, both in advanced and emerging economies, and consider the transferability of lessons and insights over space and time. The course is particularly concerned with place-sensitive approaches and locally initiated and managed processes which may involve a wide range of actors in shaping and implementing local economic development initiatives.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of workshops and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Policy Brief outline to be submitted by week 5 and group presentations on case studies in different weeks of MT: written feedback will be provided on all formative coursework in order to help prepare for the assessed Policy Brief.

**Indicative reading:** The course is mainly based on academic articles and papers, all available through @reading list. Some chapters will also be used from books such as: A. Pike, A. Rodriguez-Pose & J. Tomaney, *Local and Regional Development*, 2006; B-A. Lundvall, KJ Joseph, C. Chaminade & J. Vang (eds.), *Handbook of Innovation Systems and Developing Countries*, 2009; J Cantwell & E Amann (eds.), *Innovative Firms in Emerging Market Countries*, 2012; S Iammarino & P McCann *Multinationals and Economic Geography. Location, Technology and Innovation*, 2013. In general, all readings are electronically available from the LSE Library unless otherwise indicated.

**Assessment:** Policy brief (100%) in the MT.

A 2,500 word Policy Brief is due in the week after the end of MT.

---

## GY420

### Environmental Regulation: Implementing Policy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Richard Perkins, Dr Eugenie Dugoua, Dr Michael Mason and Dr Meredith Whitten

**Availability:** This course is compulsory on the MSc in Environmental Policy and Regulation and MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University). This course is available on the MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Local Economic Development, MSc in Regulation, MSc in Risk and Finance and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

This course cannot be taken with GY465 Concepts in Environmental Regulation or GY475 Issues in Environmental

Governance.

**Course content:** This course provides critical insights into the characteristics, processes and evolving dynamics of environmental policy, regulation and governance. In MT, the course considers the rationale for public policy intervention, and the factors that shape the influence of different interest groups over government policy making. It proceeds to examine the nature, design and performance of different policy instruments, together with the various influences governing policy implementation processes. In LT, the course highlights key themes in environmental regulation informed by the concept of multi-level governance. This concept suggests new alignments and forms of regulation within and across state borders: the themes chosen to explore this concept include governing technological change, international negotiations, governance beyond the state, and different rationalities of regulation (science, ethics and justice).

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across both Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of Michaelmas Term and Lent Term.

**Formative coursework:** Students are expected to prepare one formative piece of coursework in the MT: feedback will be provided. In the LT, students are required to give one presentation on an agreed topic: feedback will be provided.

**Indicative reading:** While there is no one single text that covers all aspects of the course, you are encouraged to consult the following: MT:

- J Holder and M Lee (2007) *Environmental Protection Law and Policy* (2nd edition), Cambridge: Cambridge University Press;
- N Carter (2018) *The Politics of the Environment: Ideas, Activism, Policy* (3rd edition), Cambridge: Cambridge University Press;
- S Bell, D McGillivray, O Pedersen, E Lees and E Stokes (2017) *Environmental Law* (9th edition), Oxford: Oxford University Press.

LT:

- A Gupta and M Mason (eds.) (2014) *Transparency in Global Environmental Governance*, Cambridge, MA: MIT Press;
- A Randall (2011) *Risk and Precaution*, Cambridge: Cambridge University Press;
- S Barrett (2005) *Environment and Statecraft: The Strategy of Environmental Treaty-Making*, Oxford: Oxford University Press;
- S Piattoni (2010) *The Theory of Multi-level Governance*, Oxford: Oxford University Press.

**Assessment:** Coursework (50%, 3500 words) in the LT.

Take-home assessment (50%) in the ST.

The LT summative coursework will be a policy brief with critical reflection, based on the material taught in the MT.

---

## GY426

### Environmental and Resource Economics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Sefi Roth. Prof. Hendrik Wolff. Dr Eugenie Dugoua. Dr Frank Venmans

**Availability:** This course is compulsory on the MSc in Environmental Economics and Climate Change and MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University). This course is available on the MPhil/PhD in Environmental Economics, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Geographic Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator.

**Pre-requisites:** A background in economics and calculus is highly desirable.

**Course content:** Environmental and resource economics is at the forefront of the response to local, national and global environmental problems. As such, it has become an essential part of the thinking and actions of national and regional governments, as well as international agencies and organizations. This course seeks to develop a rigorous treatment of the theory of environmental and natural resource economics, and to show how formal economic thinking can assist real world policymaking in areas such as climate change, ecosystem & biodiversity conservation and water resource management.

The course consists of four components which cluster together the principal areas of interest and research in environmental and natural resource economics:

PART I: Environmental Economics and Pollution Control

PART II: Behavioural Economics, Evaluation and the Environment

PART III: The Economics of Natural Resources: Efficiency, Optimality and Sustainability

PART IV: Economics of Climate Change and Low-Carbon Transitions

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

**Formative coursework:** Students will complete one written formative assignment of 1,500 words in Michaelmas Term, on which they will receive written feedback.

**Indicative reading:** Detailed reading lists will be provided to support each course component. The following texts will be particularly useful:

**Michaelmas Term:**

- Kolstad, C., *Environmental Economics*, Oxford: Oxford University Press, (2000).
- L. Perman, R., Y. Ma, J. McGilvray and M. Common, *Natural Resource and Environmental Economics*, Pearson Addison Wesley, Fourth Edition (2011), and Third Edition (2003)
- Bondy M, Roth S, and Sager, L. (2020) Crime Is in the Air: The Contemporaneous Relationship between Air Pollution and Crime, *Journal of the Association of Environmental and Resource Economists* 7:3, 555-585
- Dugoua E (2019) *International Environmental Agreements and Directed Technological Change: Evidence from the Ozone Regime*. Working Paper available at [http://eugeniedugoua.com/papers/Dugoua2018\\_Montreal\\_Innovation.pdf](http://eugeniedugoua.com/papers/Dugoua2018_Montreal_Innovation.pdf)

**Lent Term:**

- Conrad, J., *Resource Economics*, Cambridge: Cambridge University Press, (2005);
- L Perman, et al., *Natural Resource and Environmental Economics*, Pearson Addison Wesley, Fourth Edition (2011), and Third Edition (2003);

**Assessment:** Assessment path 1

Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2500 words).

Assessment path 2

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Essay (50%, 6000 words) in the ST.

Assessment Pathway 1: For all students NOT enrolled on MSc Economics or MSc Econometrics and Mathematical Economics

Assessment Pathway 2: For MSc Economics and MSc Econometrics and Mathematical Economics students only.

## GY427 Half Unit

### Climate Change: Science, Economics and Policy

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Simon Dietz

**Availability:** This course is compulsory on the MSc in Environmental Economics and Climate Change and MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University). This course is available on the MSc in Environment and Development, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University) and MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. Priority will be given to students on the MSc in Environmental Economics and Climate Change followed by students on the MSc in Environment and Development and MSc in Environmental Policy and Regulation. Students on the MPA will only be offered a place if spaces are available. For further details, please contact your relevant Programme Coordinator.

**Course content:** A comprehensive guide to the issue of climate change, from fundamental concepts in climate science, through estimating the future impacts of climate change on economies and societies, to cutting greenhouse gas emissions by using economic instruments such as carbon trading. Interdisciplinary, but with an emphasis on economic analysis, albeit taught in a non-technical style.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through interactive lectures across the Lent Term.

This course includes a reading week in Week 6 of the Lent term.

**Formative coursework:** Students will carry out regular assignments.

**Indicative reading:** Detailed reading lists will be provided to support each course component.

**Assessment:** Take-home assessment (100%) in the ST.

## GY428 Half Unit

### Applied Quantitative Methods

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Stephen Jarvis. Dr Juan Ruiz-Tagle. Prof. Hendrik Wolff

**Availability:** This course is compulsory on the MSc in Environmental Economics and Climate Change and MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University). This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Regional and Urban Planning Studies, MSc in Geographic Data Science, MSc in Local Economic Development and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

**Pre-requisites:** A background in undergraduate statistics or,

preferably, econometrics is required

**Course content:** This course will provide an introduction to quantitative methods in use in modern environmental and resource economics. Emphasis will be placed on the practical use of empirical tools. This applied focus will be complemented by the investigation of assumptions and proofs that can improve the understanding of empirical results. Students will apply the methods taught using statistical/econometric software and data documenting some topical public policy questions. These applications will take place in ten seminars of one hour each. During the seminars the students will gain understanding of the statistical programming language R. Throughout the course, examples from relevant and topical empirical papers published in the area of applied econometrics and environmental economics will be critically discussed. The module will focus on linear regression methods, with an emphasis on their use for causal inference. The first part of the course will cover the standard linear regression model, its assumptions, violations and testing procedures. Functional forms and non-linear models will also be discussed. The latter part of the course will cover a range of important estimation approaches, including fixed effects with panel data, difference-in-differences, instrumental variables and regression discontinuity designs. The course will conclude with a more general discussion of how these tools can be used in research and policy analysis.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** There will be an opportunity to get feedback on one or more of the problem sets assigned during the MT.

**Indicative reading:** Detailed reading lists will be provided to support each course component, but the following texts will be particularly useful:

- a) Stock J.H. and M.W. Watson (2019). Introduction to Econometrics. Fourth Edition Pearson International Edition;
- b) J. Wooldridge (2006), Introductory Econometrics: A Modern Approach, Thomson;
- c) Angrist J and Pischke J.S. (2014) Mastering 'Metrics, Princeton.
- d) Angrist J and Pischke J.S. (2009) Mostly Harmless Econometrics, Princeton.
- e) Cunningham S. (2021) Causal Inference The Mixtape, Yale.

**Assessment:** Exam (70%, duration: 2 hours) in the January exam period.

Coursework (30%) in the MT.

The coursework assessment will take the form of problem sets or exercises that recap on some of the most important topics.

---

## GY431 Half Unit

### Cities, People and Poverty in the South

**This information is for the 2022/23 session.**

**Teacher responsible:** Laura Antona

**Availability:** This course is available on the MSc in African Development, MSc in City Design and Social Science, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Health and International Development, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Experience and/or knowledge of development and/or urbanisation in the South would be a distinct advantage

**Course content:** The course examines the patterns, processes and implications of urbanisation in developing societies (with an emphasis on the Middle East region), and with particular reference to the survival and well-being of low-income groups. The conceptual and empirical focus of the course revolves around strategies adopted at individual household and community levels to ensure sustainable livelihoods, and the interrelations of grassroots processes with policy interventions on the part of governments, international development agencies and NGOs. Specific themes include: trends in urban development in the 20th and 21st centuries; the conceptualisation and measurement of poverty and the urban; the 'urbanisation' of poverty; poverty reduction strategies by international organisations; intersectionality; urban informality; urbanisation of violence and conflict; and urban social movements.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas.

**Formative coursework:** Students will be expected to produce one formative essay during the course, as well as to prepare seminar presentations (usually in pairs), and to be actively involved in seminar discussions, including as discussants and rapporteurs.

**Indicative reading:** Detailed reading lists will be provided during the course. No one book covers the entire course. However, recommended essential reading is as follows: N. Brenner (ed), Implosions/Explosions: Towards a Study of Planetary Urbanization, Oxford, 2009 (1845); S.Parnell and S.Oldfield (Eds), The Routledge Handbook on Cities of the Global South, 2014; S Graham, Cities Under Siege: The New Military Urbanism, 2011; A Mbembe, Essays on Decolonization: Out of the Dark Night, 2021; T Mitchell, The Rule of Experts: Egypt, Techno-Politics, Modernity, 2002; Marx and Kelling, Knowing urban informalities, Urban Studies, 2019, 56, 3; United Nations Sustainable Development Goals: Knowledge Platform.

**Assessment:** Essay (50%, 2500 words) in the MT.

Essay (50%, 2500 words) in the LT.

---

## GY432 Half Unit Not available in 2022/23

### Urban Ethnography

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Gareth Jones S506

**Availability:** This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course considers the role of ethnography to how we understand cities. We will look in detail at different types of ethnography and compare with other means of representing the city such as the novel and film. Specific themes will cover walking the city, the flaneur and ethnographer; neighbourhoods, intimacy and hustle; the 'ghetto' and abandonment; street ethnography; time, waiting and hope; bodies and sex; infrastructure and labour; gates and the middle class; the gang, drugs and violence. The course considers the role of ethnography in the global south and north. The course offers an opportunity to reflect on everyday life in cities in ways which do not reduce them to arenas for technical, policy-

driven interventions, and so as to consider the urban experience more broadly. The course will raise issues of methodology and writing, and most weeks involve seminar discussion based on suggested readings.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a series of seminars across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** A 1,500 word essay or review of readings on a chosen topic from class list.

**Indicative reading:** There are some useful Readers on urban ethnography such as:

- M. Duneier et al., *The Urban Ethnography Reader*, 2014;
- S. Low, *Spatializing Culture: The Ethnography of Space and Place*, 2016;
- The course is based on key ethnographies for each week supplemented by articles.
- J.A. Alves, *The Anti-Black City: Police Terror and Black Urban Life in Brazil*, 2018;
- J. Auyero, *The Patients of the State: the politics of waiting in Argentina*, 2012;
- J. Auyero & D. Swiston, *Flammable: environmental suffering in an Argentine Shantytown*, 2009;
- T. Belmonte, *The Broken Fountain*; 2005;
- P. Bourgois. *In Search of respect: selling crack in El Barrio*, 2003;
- P. Bourgois and J. Schonberg, *Righteous Dopefiend*, 2009;
- M. Di Nunzio, *The Act of Living: Street Life, Marginality, and Development in Urban Ethiopia*, 2019;
- G. Feltran, *The entangled city: crime as urban fabric in Sao Paulo*, 2020;
- L. Fernandes, *India's New Middle Class: Democratic Politics in an Era of Economic Reform*, 2006;
- A. Goffman, *1600 on the Run: Fugitive Life in an American City*, 2012;
- D. Goldstein, *Laughter out of Place: race, class, violence and sexuality in a Rio Shantytown*, 2003;
- E. Harms, *Luxury and Rubble: Civility and Dispossession in the New Saigon*, 2016;
- C. Jeffrey, *Timepass: youth, class the politics of waiting in India*, 2010 ;
- P. Kelly, *Lydia's Open Door: inside Mexico's most modern brothel*, 2008;
- D. Mains, *Hope Is Cut: Youth, Unemployment, and the Future in Urban Ethiopia*, 2011;
- D. Mains, *Under Construction: Technologies of Development in Urban Ethiopia*, 2019;
- B. O'Neill, *The Space of Boredom: Homelessness in the Slowing Global Order*, 2017;
- L. Ralph, *Renegade dreams: Living through injury in gangland Chicago*, 2014;
- L.A. Ring, *Zenana: everyday peace in a Karachi apartment building*, 2006;
- E. Tarlo, *Unsettling Memories: Narratives of India's 'Emergency' in Delhi*, 2003;
- S. Venkatesh, *Gang Leader for a Day*, 2008;
- L. Wacquant, *Urban Outcasts*, 2008;
- J. Wolseth, *Jesus and the Gang: Youth Violence and Christianity in Urban Honduras*, 2011;
- L. Zhang, *In Search of Paradise: Middle-class Living in a Chinese Metropolis*, 2010;
- T. Zheng, *Red lights: The lives of sex workers in postsocialist China*, 2009.

**Assessment:** Essay (100%, 5000 words) in the ST.

## GY438 Half Unit

### Urban Asia: Cities and Social Change

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Hyun Shin

**Availability:** This course is available on the CEMS Exchange, MA in Asian and International History (LSE and NUS), MBA Exchange, MSc in China in Comparative Perspective, MSc in City Design and Social Science, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in International and Asian History, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

The number of students able to be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator

**Course content:** This is an interdisciplinary urban course that encourages students to develop a critical understanding of how urban space is transformed in diverse social, economic and political settings, and what social implications are made upon the powerless and the poor. Examining the process of socio-spatial transformation in times of condensed urbanisation and economic development, this course makes use of Asia as an empirical site to unsettle Western notions of urban development. Various examples of urban policies and practices will be drawn from cities across East and Southeast Asia, with emphasis on newly industrialised capitalist economies as well as transitional economies such as mainland China.

Focusing on urban questions in particular, the course comprises of lectures and seminars on the following themes:

- the political economy of urbanisation;
- the politics of land;
- global gentrifications;
- displacement and dispossession;
- cities of spectacle and mega-events;
- urban social movements

Students will also have opportunities to view and discuss various sources of audiovisual materials and documentaries related to these themes.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars, workshops and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students are expected to complete one essay plan for their assessed essay and blog.

**Indicative reading:** Chen, Y.-L. and Shin, H.B. (eds.) *Neoliberal Urbanism, Contested Cities and Housing in Asia*. Palgrave Macmillan;

**Assessment:** Coursework (30%, 1500 words) and essay (60%, 3000 words) in the ST.

Class participation (10%) in the LT.

Coursework (30%) refers to a blog piece. Students are to submit regular reading responses via Moodle as part of class participation. Further details will be included in the course guide.

## GY439 Half Unit Cities, Politics and Citizenship

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Murray Low STC.S.512

**Availability:** This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Perspectives on contemporary urban politics. The course will equip students interested in urban change and development to understand and critically assess the variety of ways in which urban politics and policies are imagined and discussed in universities as well as in the world of policy. It will also develop their understandings of key debates and themes in contemporary urban political life.

Topics covered will include: imagining urban politics; theories of urban politics, 'globalisation' and urban political life; urban governance; civil society and urban social movements; urban dimensions of citizenship and migration; policing, violence and urban politics; urban politics and 'neoliberalism.'

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through interactive seminars across Lent Term

This course includes a reading week in Week 6 of Lent Term

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

**Indicative reading:** J Borja and M Castell, Local and Global, 1997; J Davies and D Imbroscio, eds., Theories of Urban Politics (2nd Edition), 2009; M Douglass and J Friedmann, eds., Cities for Citizens, 1998; D Judge, G Stoker and H Wolman, eds, Theories of Urban Politics, 1995; P Le Galegraves, European Cities, 2002; L Sandercock, Towards Cosmopolis, 1998; S. Sassen Territory, Authority, Rights, 2006; M P Smith, Translocal Urbanism, 2001.

**Assessment:** Take-home assessment (100%) in the ST.

## GY441 Half Unit Not available in 2022/23 The Politics of Housing

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Romola Sanyal

**Availability:** This course is available on the MSc in City Design and Social Science, MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The aim of this course is to examine the politics of housing from a transnational and comparative perspective. The course will link the empirical analyses on housing to theoretical discussions on class, community, gender, ethnicity and design. It will analyse housing issues ranging from informality, homelessness and gated communities to housing tenure, architectural design and housing as a humanitarian tool. This is an interdisciplinary course, drawing upon debates in fields such as Architecture, Urban Planning, Geography, Sociology, Anthropology and Development Studies. The course will help students develop a broad knowledge of the politics of housing in different countries and how they intersect with issues such as urban development, housing finance and public policy. It will also encourage students to think about housing issues relationally and globally.

Themes

Some of the themes covered in this course include: Traditional Housing, Communities, Gender and Housing, Race and Ethnicity and Housing, Homelessness, Housing and Emergencies etc.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

One 1500 word essay and 4 one page reading responses

**Indicative reading:**

- Grewal, I. (1996) Home and Harem: Nation, Gender, Empire and the Cultures of Travel. Durham: Duke University Press
- Caldeira, Teresa. (2001) City of Walls: Crime, Segregation and Citizenship in Sao Paulo. Berkeley: University of California Press.
- Gowan, T. (2010) Hobos, Hustlers, and Backsliders: Homeless in San Francisco. Minneapolis: University of Minnesota Press.
- Gottesdiener, L (2013) A Dream Foreclosed: Black America and the Fight for a Place to Call Home. Westfield: Zuccotti Park Press
- Jackson, K. (1985) Crabgrass Frontier: The Suburbanization of the United States. New York: Oxford University Press.
- King, A. (1995) The Bungalow: The Production of a Global Culture, New York: Oxford University Press.
- Smart, A. (2006) The Shek Kip Mei Myth: Squatters, Fires and Colonial Rule in Hong Kong, 1950-1963. Hong Kong University Press.

**Assessment:** Essay (80%, 5000 words) in the ST.

Presentation (20%) in the LT.

**GY446 Half Unit****Planning for Sustainable Cities****This information is for the 2022/23 session.****Teacher responsible:** Dr Nancy Holman STC318a, Dr Erica Pani - STC305**Availability:** This course is available on the MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.**Course content:** A critical examination of the issues involved in planning for sustainable development at the urban level together with a review of policies and practice; the course focus largely on the problems facing developed countries. The course comprises ten lectures covering issues of physical, economic and social measures to promote sustainability alongside understandings of how this may be measured in an urban context.**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students are expected to submit a formative assignment in the LT.**Indicative reading:** Detailed reading on specific policy areas will be provided.: J Agyeman & B Evans (Eds), Local Environmental Policies and Strategies, 1994; S. Wheeler. Planning for Sustainability: Creating livable, equitable, and ecological communities, 2004; Y. Rydin, Governing for Sustainable Urban Development, 2010; S. Davoudi, J. Crawford and A. Mehmood (Eds), Planning for Climate Change: Strategies for Mitigation and Adaptation for Spatial Planners, 2009.**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.**GY447 Half Unit****The Economics of Regional and Urban Planning****This information is for the 2022/23 session.****Teacher responsible:** Dr Felipe Carozzi S416**Availability:** This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available on the CEMS Exchange, MBA Exchange, MPhil/PhD in Economic Geography, MSc in Development Management, MSc in Development Studies, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator

**Pre-requisites:** Students should normally have completed an introductory course in economics. Students without this background may wish to attend the micro-economic section of EC100 Economics A together with the Pre-sessionals GY447 and GY447.1 workshops.**Course content:** The course aims to provide an economic framework in which to analyse the structure of economic activity within the urban and regional context; the impact of this structure on urban form; the role of government at the local level and local economic policy applications. Topics include: The determinants of industrial, commercial and residential location. The interaction between activities within a spatial context. The economics of land markets and of the development process. The determinants of rents and densities. Economic models of urban structure. Sources of market failure in the urban economy. The rationale of government intervention. Techniques of intervention in the urban and environmental context. The role of the public sector: pricing, allocation, production and investment decisions. Urban and regional economic policy issues.**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term only.

The course will also feature a pre-sessional element in week 0 of Michaelmas Term and a reading week in Week 6 of Michaelmas Term.

160160160160160160160

**Formative coursework:** A take home formative exam will be carried out during Lent Term.**Indicative reading:**

- 1) A O'Sullivan Urban Economics;
  - 2) J F McDonald and Daniel P. McMillen, Urban Economics and Real Estate;
  - 3) J Stiglitz, Economics of the Public Sector;
  - 4) Pindyck & Rubinfeld Microeconomics, Suslow & Hamilton Study Guide.
  - 5) J Brueckner, Lectures in Urban Economics
  - 5) D DiPasquale & W C Wheaton, Urban Economics and Real Estate Markets;
  - 6) R W Vickerman, Urban Economics;
  - 8) H Dunkerley (Ed), Urban Land Policy: Issues and Opportunities;
- More detailed readings will be provided during the course.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.**GY448 Half Unit****Social and Political Aspects of Planning****This information is for the 2022/23 session.****Teacher responsible:** Dr Alan Mace STC315a**Availability:** This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available on the MSc in City Design and Social Science, MSc in Geographic Data Science and MSc in Human Geography and Urban Studies (Research). This course is available as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

**Course content:** The course seeks to bring into conversation with one another the theory and practice of urban planning. Planning is understood as a discursive practice where issues are framed and policy is generated through multiple parties employing both data and lived experience. We therefore focus on how planning processes are deeply embedded in the social. Rather than offering training in particular planning tools such as impact assessments, which vary from setting to setting, the course provides you with skills to critique planning practices. You will look at key planning ideas such as the neighbourhood, community and participation. We consider the implications for practice of the increasing

complexity of planning both within and across jurisdictions including sub-regions and regions. In the latter weeks we bring various aspects of the course together through case studies of different planning practices in various national settings. The course is primarily focused on planning in the global north as it draws on our practice and research experience, but examples are included from the global south.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will submit a 1,500 word assignment.

**Indicative reading:**

- Friedmann, J., 2011. *Insurgencies: Essays in Planning Theory*, Routledge.
- Joss, S. 2015. *Sustainable Cities; Governing for Urban Innovation*. Palgrave.
- Sanyal, B., Lawrence, J.V and Rosan C.D.R. 2012. *Planning Ideas That Matter*. MIT Press.

Once on the course, all key readings are available online being either journal articles or electronic book chapters.

**Assessment:** Essay (100%, 4000 words) in the LT.

## GY449 Half Unit Urban Futures

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Austin Zeiderman

**Availability:** This course is available on the MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is strictly capped at 50. Students are required to apply through Graduate Course Choice on LSE for You by providing a short written statement of why they are interested in taking the course (this includes students on Geography and Environment MSc programmes). If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. Priority will be given to students on the MSc programmes listed above. For further details, please contact your relevant Programme Coordinator.

**Pre-requisites:** This course assumes that students already have a background in the social sciences and/or humanities as well as in urban studies. Exceptions will be made for students who can show that they are suitably qualified.

**Course content:** By now we are accustomed to hearing that, for the first time in history, the majority of the world's population lives in cities. We may also be aware that more than one billion people now live in the urban slums and shantytowns of the global South, and that this is where the majority of world population growth will take place. But what sort of futures are being imagined for the cities of the twenty-first century? In response to this question, GY449 Urban Futures will critically analyze how the future of cities, and the cities of the future, have been thought about and acted upon in different times and places. Students will learn to adopt a geographical and historical approach to urban futures by exploring how ways of envisioning the future of cities differ across time and space. Treating the future as a social, cultural, and political reality with a profound influence on the present, the course will examine how urban areas are planned, built, governed, and inhabited in anticipation of the city yet to come. Each week will be organised around a particular model for the future of the city: the ideal city, the dystopian city, the modernist city, the colonial

city, the capitalist city, the socialist city, the organic city, the global city, and the secure city. These models will be examined through concrete examples and will enable the discussion of broader theoretical perspectives in urban studies, with a specific focus on the critical analysis of urban futures. Though grounded in urban geography, this course will draw upon texts and other materials from anthropology, sociology, history, cultural studies, literature, film, philosophy, social theory, architecture, art, and city planning. Its primary objective is to equip students with sophisticated, critical ways of thinking about the future of cities, since doing so has real significance for the kind of city we want to, and eventually will, ourselves inhabit.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through weekly interactive seminars across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be expected to participate actively in seminar discussions throughout the course, with occasional presentations and discussion leadership roles required. Feedback will be provided in the sessions.

**Indicative reading:** This is a reading-intensive course and each session will be dedicated to in-depth discussions of book-length studies. A detailed reading list will be provided at the beginning of the course, but will include works such as: Jaime Amparo Alves, *The Anti-Black City: Police Terror and Black Urban Life in Brazil* (2018); Filip De Boeck and Sammy Baloji, *Suturing the City: Living Together in Congo's Urban Worlds* (2016); Hiba Bou Akar, *For the War Yet to Come: Planning Beirut's Frontiers* (2018); Gökçe Günel, *Spaceship in the Desert: Energy, Climate Change, and Urban Design in Abu Dhabi* (2019); Erik Harms, *Luxury and Rubble: Civility and Dispossession in the New Saigon* (2016); Danny Hoffman, *Monrovia Modern: Urban Form and Political Imagination in Liberia* (2017); Natalie Oswin, *Global City Futures: Desire and Development in Singapore* (2019); Christina Schwenkel, *Building Socialism: The Afterlife of East German Architecture in Urban Vietnam* (2020); Keeanga-Yamattha Taylor, *Race for Profit: How Banks and the Real Estate Industry Undermined Black Homeownership* (2019).

**Assessment:** Essay (100%, 5000 words) in the LT.

The assessed essay will be a critical and creative exercise in the analysis of urban futures. Students will be given a choice: 1) Identify and research one vision of the urban future that exists in the present; or 2) Take a particular city and research the ways its future has been envisioned in the past, and how it is currently being envisioned in the present. Essays must contain no more than 5,000 words of text although they may also include images, as well as any other media that pertains to the argument.

## GY450 Planning Practice and Research

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nancy Holman STC315b and Dr Alan Mace STC315a

**Availability:** This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The aim of this course is to provide students with an understanding of the current planning issues faced by practitioners and their policy responses. This will begin with an introduction to the planning context of London and an overview of the British planning system. This will be followed by weekly sessions with invited speakers involved in planning practice and research. They will be engaged in relevant current research or be practicing planners or policy-makers from central or local government, research agencies or consultancy. The content will

consist of a series of guided walks, lectures and seminars covering issues of current concern and debate within urban and regional policy and planning.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is normally delivered through a combination of events, field trips and walks across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Assessment:** There is no Assessment in this course but the content will be relevant to the assessed courses in the MSc Regional and Urban Planning Studies Programme.

## GY452 Half Unit Urban Research Methods

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Hyun Shin S601F  
Additional teacher(s): Professor Neil Lee; Dr Alicia Lazzarini; Professor Claire Mercer; Dr Romola Sanyal; Dr Jessie Speer; Dr Austin Zeiderman

**Availability:** This course is compulsory on the MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is not available as an outside option.

This course is available on the MSc in Urban Policy (LSE and Sciences Po) for those students who choose the MSc in Urbanisation and Development track for their Year 2 studies.

**Course content:** The course aims to introduce students to the key methods that are frequently mobilised to carry out research on urbanising societies around the world. Additionally, the course is to help students think more systematically about methodological considerations in order to execute a successful dissertation research. Below is an indicative list of themes that are normally covered in the course:

- Designing an urban research project and ethics
- Comparative (case) studies
- Visual methods
- Working with archives
- Interviews and focus groups
- Conducting ethnography
- Quantitative data and questionnaires
- Analysis and write-up

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:** Flyvbjerg, B. (2001) *Making social science matter: Why social inquiry fails and how it can succeed again*. Cambridge: Cambridge University Press

Hay, I. (ed.) (2010) *Qualitative Research Methods in Human Geography*. 3rd edition. Oxford: Oxford University Press

Heimer, M. and Thogersen, S. (eds.) (2006) *Doing fieldwork in China*. Copenhagen: NIAS Press

Hennink, M. et al (2011) *Qualitative Research Methods*. London; Thousand Oaks, CA: SAGE

Sayer, A. (1992) *Method in social science: A realist approach*. London: Routledge

Ward, K. (ed.) (2012) *Researching the city: a guide for students*. London: Sage

**Assessment:** Essay (70%, 2500 words) and research proposal (30%) in the ST.

## GY454 Half Unit Urban Policy and Planning

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nancy Holman

**Availability:** This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available on the MSc in Geographic Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

**Pre-requisites:** Students must have completed Social and Political Aspects of Planning (GY448).

**Course content:** The course provides a synthesised approach to the analysis of urban policy-making and plan formulation. It will explore the way in which economic, political and social forces interact to effect policy approaches in different spatial settings. We will cover urban regeneration policy and community development as they relate to neighbourhood planning. The aim is also to gain an understanding of the causes of similarity and difference in policy approaches. Students will undertake a group research project based on a London neighbourhood including an assessment of local planning policy.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:** Urban Task Force, *Urban Renaissance*; DETR, *Our Towns and Cities: The future*; R Atkinson ; G Moon, *Urban Policy in Britain*; P Hall ; C Ward, *Sociable Cities*; E Blakely ; M Snyder, *Fortress America*; D Judd ; S Fainstein, *The Tourist City*; J Mannigan, *Fantasy City*; T Hall ; P Hubbard, *The Entrepreneurial City*.

**Assessment:** Essay (80%, 3000 words).

Presentation (20%) in the LT.

A 3,000 word essay linked to the London neighbourhood planning project.

A group presentation and short film based on the London neighbourhood planning project.

## GY455 Half Unit Economic Appraisal and Valuation

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Giles Atkinson and Dr Stephen Jarvis

**Availability:** This course is available on the MSc in City Design and Social Science, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in Geographic Data Science, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Risk and Finance, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to

students on other programmes where regulations permit. The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator

**Course content:** This course is concerned with the foundations and practical use of applied economics in the context of project appraisal and policy evaluation. Course content will be drawn from the following. Introduction to economic aspects of project appraisal and cost-benefit analysis. Efficiency, equity and distributional concerns. Measurement of costs and benefits with a specific emphasis on practical methods to value non-market goods and services. The use of appraisal and evaluation in policy processes. The application of project appraisal and policy evaluation methods to policy sectors such as transport, health and the environment. Seminars and lectures will focus on applied case studies and the tools involved in the appraisal of projects. Examples particularly from environmental, health, development and transport policy in the developed and developing world.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course will be delivered through a combination of seminars and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Indicative reading:** Detailed reading lists will be provided to support each course component. Emphasis will be placed on texts, case study material and state-of-the-art contributions to, for example, the literature on non-market valuation. For an overview and introduction to the main issues covered by the course, students may wish to consult the following: G Atkinson and S Mourato, "Cost-Benefit Analysis and the Environment", OECD Environment Working Paper No. 97; G Atkinson et al. (2018) Cost-Benefit Analysis and the Environment: Further Developments and Uses, 2018; AE Boardman et al, Cost-Benefit Analysis: Concepts and Practice, 2018 (chapters 1 and 2).

**Assessment:** Essay (100%, 4000 words) in the LT. A 4000 word essay linked to real-life examples of economic appraisal and valuation

## GY457

### Applied Urban and Real Estate Economics

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Christian Hilber and Prof Gabriel Ahlfeldt

**Availability:** This course is compulsory on the MSc in Real Estate Economics and Finance. This course is available on the MPhil/PhD in Economic Geography and MSc in Geographic Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit. The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

**Pre-requisites:** The course assumes that students already have knowledge of economics equivalent to a good first degree in the subject. It is available as an option to students who can show that they are suitably qualified.

**Course content:** This course aims to provide students with a theoretical and empirical understanding of urban economic processes and price determination in land and real property markets within an institutional context. Examples of topics covered include: the functioning of cities and the urban system; the determinants of urban structure; patterns of urban land use; the determinants of urban growth - theory and evidence; land and real property markets; the impact of land market regulation including

the economic impact of land use planning; local public finance and house price capitalisation; real estate cycles; homeownership; housing policies.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across the Michaelmas and Lent Term

This course includes a reading week in Week 6 of Michaelmas Term and in week 6 of Lent Term.

**Formative coursework:** Students can submit up to two essays of up to 1500 words (one per teacher/teaching term). Essay topics are exam questions from the previous year. Submission is voluntary. Upon request, teachers are happy to provide feedback on seminar presentations.

**Indicative reading:** Detailed reading list will be given out at the beginning of the course. Much of the reading will be journal articles. However, some important items are: J. Brueckner, Lectures on Urban Economics, 2011; P.C. Cheshire, M. Nathan & H. Overman, Urban Economics and Urban Policy: Challenging Conventional Policy Wisdom, 2014; D. DiPasquale & W. Wheaton, Urban Economics and Real Estate Markets, 1996; G. Duranton, V. Henderson & W. Strange, Handbook of Regional and Urban Economics, Vol. V, North Holland, 2015; M. Fujita, Urban Economic Theory: Land Use and City Size, 1989; E.L. Glaeser, Triumph of the City, 2011; Henderson, J.V. and J.F. Thisse, Handbook of Regional and Urban Economics Vol. IV, North Holland, 2004; J.F. McDonald & D.P. McMillen, Urban Economics and Real Estate, Theory and Policy, 2011; B. O'Flaherty, City Economics, 2005; A. O'Sullivan, Urban Economics (9th edn.), 2018.

**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.

## GY458 Half Unit

### Real Property Market Practice

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Paul Cheshire STC402 and Dr Felipe Carozzi STC416

**Availability:** This course is compulsory on the MSc in Real Estate Economics and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

It is available by arrangement with the teacher responsible as an option to other students on other programmes who have an appropriate academic background and an interest in real estate markets.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator

**Course content:** An examination of how real property markets operate in practice and of the analytical techniques and data available for analysts and practitioners. Specific areas of study include: the availability and structure of data sets in the context of property; problems of: price measurement; user/investment categories; professional methods of valuation (appraisal) and possible impact on price formation: creating and manipulating datasets; measuring property performance; analysis to guide portfolio selection; anticipating and evaluating investment opportunities. Specific sector case studies: industrial, retail, commercial, and residential: investment portfolio choice and management. Briefing on course project/essay. Defining research objectives and methodology in practice.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars, workshops and lectures across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

**Indicative reading:** There is no course text. CSO guides to Government Statistics; publications from Investment Property Databank and other research departments and organisations in the real property markets; Journal of Property Research, Estates Gazette.

**Assessment:** Essay (100%, 3000 words).

A 3,000 word project or essay identifying a research problem in real estate markets on a specific issue (e.g., 'The Impact of the 2008 Financial Crisis on Office Rents in Hong Kong', 'Impact of Incomes on House Prices in the UK', 'Which Side of Beijing-Tianjin High-Speed Railway Benefits Most in terms of Housing Prices?' or 'The Economic Implications of Use-Class Designations in England') which will require the student to investigate data sources, suggest techniques of data analysis and provide conclusions on the problem set. Topics must be agreed with the teachers responsible.

## GY459 Half Unit

### Urban Theory and Policy in the Global South

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ryan Centner

**Availability:** This course is compulsory on the MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research) and MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

**Course content:** This course aims to provide a grounding in key debates in urban studies and policy with reference to the Global South. It highlights the interconnections between evolving urban ideas and research and policy. Anticipated topics include The City and Comparative Urbanism; Critical Urban Theory, Covid-19 and Urbanism; Urban Political Economy, Social Life of Cities; Infrastructures and Environment; Elites and Inequalities; Global Protest; Violence, Conflict and Security. Lectures will draw from staff research, with particular emphasis on Brazil, Colombia, India, Lebanon, Mexico, and South Africa.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** One essay of 1,500 words (formative).

**Indicative reading:** A comprehensive reading list mostly focussing on articles will be provided. Useful books include:

- A. Amin & N. Thrift *Seeing like a City* (2016);
- S. Chant & C. McIlwaine, *Cities, Slums and Gender in the Global South* (2016);
- M. Dikec, *Urban Rage: the revolt of the excluded* (2017);
- R. de Satge & V. Watson, *Urban Planning in the Global South: conflicting rationalities in contested space* (2019);
- S. Fox & T. Goodfellow, *Cities and Development* (2016);
- E. Glaeser, *Triumph of the City* (2012);
- S. Graham, *Cities under Siege: the new military urbanism* (2010);

- C. Lemanski & C. Marx (eds) *The City and Urban Poverty*, (2015);
- F. Mirafteb & N. Kudva (eds.) *Cities of the Global South Reader*, (2015);
- M. Murray, *The Urbanism of Exception: the dynamics of global-city building in the twenty-first century* (2017);
- S. Parnell & E. Pieterse, *Africa's Urban Revolution*, (2014);
- R. Rolnik, *Urban Warfare: Housing under the Empire of Finance* (2019);
- A. Roy & A. Ong (eds.) *Worlding Cities: Asian experiments and the art of being global* (2011);
- P. Sendra & R. Sennett, *Designing Disorder: experiments and disruptions in the city* (2020);
- A. Simone, *City Life from Jakarta to Dakar*, (2010);

**Assessment:** Essay (100%, 5000 words) in the LT.

## GY460 Half Unit

### Techniques of Spatial Economic Analysis

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Steve Gibbons STC.4.20

**Availability:** This course is compulsory on the MSc in Geographic Data Science. This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Regional and Urban Planning Studies, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Statistics (Social Statistics), MSc in Statistics (Social Statistics) (Research) and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. Students requesting this course should provide information on their prior econometrics and statistics training and their motivation for study. If the course is over-subscribed, places will be allocated at the Department's discretion based on this information and a waiting list may be created. For further details, please contact your relevant Programme Coordinator

**Pre-requisites:** Students must have a good understanding of statistics and applied micro-econometrics at an undergraduate level or, for example, have studied Applied Quantitative Methods (GY428) in Michaelmas term or another course which introduces topics such as instrumental variables and panel data methods. It is advisable to look at the first two key readings listed below before signing up for this course. Students who are comfortable working with computers, data and already have basic familiarity with STATA, R or other statistics/econometrics software will get the most out of this course.

**Course content:** The aim of the course is to develop the technical tools necessary to understand and analyse spatial economic and social phenomena and to apply quantitative techniques to analyse economic and social problems, processes and policies at the urban and regional scale. The course also uses Geographical Information Systems and other spatial computer applications for research purposes, but you should not expect to get a training in GIS from this course (GY476 provides a complementary GIS course).

Topics include: spatial weights, aggregation and smoothing methods; spatial econometric models and neighbourhood effects; answering causal questions in the spatial context; spatial interaction and discrete choice models; spatial cluster and point pattern analysis; inequality, competition and diversity; structural spatial economic models, applications of machine learning. Not all topics will be covered every year.

Much of the content will be covered by studying and replicating the results of research papers.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person

lectures and other supplementary interactive live activities. This course is delivered through a combination of computer practical classes/seminars and lectures across the Lent Term. There are surgeries and opportunities for support for projects in the ST.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Throughout the term, progress and understanding will be assessed by short in-class assessments.

**Indicative reading:** A reading list and outline is available on Moodle. Important readings are

Gibbons, S., H.G Overman and E. Patacchini (2015) Spatial Methods, Ch. 3 in Duranton, G, J.V. Henderson and W. Strange (eds) Handbook of Urban and Regional Economics Vol 5a, Elsevier  
Baum-Snow, N. and F. Ferreira (2015) Causal Inference in Urban Economics, Ch. 1 in Duranton, G, J.V. Henderson and W. Strange (eds) Handbook of Urban and Regional Economics Vol 5a, Elsevier  
An overview of some topics is provided by: A Fotheringham, C Brunsdon; M Charlton, Quantitative Geography: Perspectives on Spatial Data Analysis. Sage Publications, 2000.

**Assessment:** Project (85%, 4250 words) in the ST. Coursework (15%, 750 words) in the LT.

The primary outcome of this course is a quantitative research project of not more than 4250 words to be handed in at a specified date late in the ST (85%). This project is carried out independently, but with guidance and support from teaching staff. The project can be based on your own proposal and data, but some ideas and links to data will be provided.

An additional assessment towards the end of the LT (15%) is short (750 word) assignment testing some of the key learning outcomes, typically a report in the style of a journal referee report providing a critical evaluation of a journal article.

## GY462 Half Unit Real Estate Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Olmo Silva S506A

**Availability:** This course is compulsory on the MSc in Real Estate Economics and Finance. This course is available on the MSc in Accounting and Finance, MSc in Risk and Finance and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

**Course content:** This course aims to provide students with concepts and techniques for analysing financial decisions in real estate development and investment. Topics include: basic real estate investment analysis and financial leverage; real options approach applied to real estate; real estate investment performance and portfolio considerations; private equity in real estate, structured investment deals and waterfall analysis; fixed and flexible rate mortgage loans and mortgage payment issues; tax transparent real estate investment vehicles (REITs); and current and international trends in real estate (time permitting).

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes/seminars and lectures across the Lent Term (plus one revision session in Summer Term).

External interventions by real estate practitioners will be scheduled when feasible.

This course includes a reading week in Week 6 of Lent Term. Some enrichment (non-compulsory) activities related to the course might be scheduled during this period (e.g. sessions on cash-flow modelling in excel).

**Formative coursework:** Students will be expected to complete in-class exercises and up to two take-home case-studies.

**Indicative reading:** Key texts are:

Brueggeman, W. B. and J. D. Fisher (2005) Real Estate Finance & Investments (13th edition or newer), New York City, NY: McGraw-Hill/Irwin;

Linneman, Peter (2004) Real Estate Finance & Investments: Risks and Opportunities, (2nd edition or newer). Philadelphia: Linneman Associates.

A more detailed reading list will be handed out at the beginning of the course.

**Assessment:** Exam (70%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.

Presentation (30%) in the LT.

The presentation will involve both individual as well as group work.

## GY465 Half Unit Concepts in Environmental Regulation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Richard Perkins and Dr Meredith Whitten

**Availability:** This course is available on the MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Regulation, MSc in Risk and Finance and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator.

This course cannot be taken with GY420 Environmental Regulation: Implementing Policy or GY475 Issues in Environmental Governance.

**Course content:** This course provides critical insights into the nature, dynamics and practice of environmental regulation. It considers the rationale for policy intervention and the influence of different interest groups on environmental policy making. The course proceeds to examine the characteristics, design and performance of different policy instruments, together with the various influences governing policy implementation processes.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students are expected to prepare one piece of formative coursework in the Michaelmas Term: feedback will be provided.

**Indicative reading:** While there is no one single text that covers all aspects of the course, you are welcome to consult the following:

- J Holder and M Lee (2007) Environmental Protection Law and Policy (2nd edition), Cambridge: Cambridge University Press;
- N Carter (2018) The Politics of the Environment: Ideas, Activism, Policy (3rd edition), Cambridge: Cambridge University Press;
- S Bell, D McGillivray, O Pedersen, E Lees and E Stokes (2017) Environmental Law (9th edition), Oxford: Oxford University Press.

**Assessment:** Coursework (100%, 3500 words) in the LT.

The summative assignment will be a policy brief with critical reflection (3500 words).

## GY470 Half Unit Urban Africa

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Claire Mercer STC.418

**Availability:** This course is available on the MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to students in other departments and on other programmes where their regulations allow, and if there is space on the course.

**Course content:** The course begins with an overview of the ideas and debates on urban Africa in theory and policy. The rest of the course looks at key issues currently facing African cities drawing on contemporary policy debates and research in human geography, African studies, development studies, urban studies, anthropology, sociology and planning studies. These include: histories, economies, livelihoods, mobilities, planning, land, housing, infrastructure and risk.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of classes and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term

**Formative coursework:** Students will be expected to produce 1 draft essay plan for the assessed essay in MT.

**Indicative reading:** de Boeck F and S Baloji (2016) *Suturing the city: living together in Congo's urban worlds*, Autograph ABP, London

Diouf M and R Fredericks (eds) (2014) *The arts of citizenship in African cities: infrastructures and spaces of belonging*, Palgrave Macmillan, Basingstoke

Keith, Michael and Andreza Aruska de Souza Santos (eds) (2021)

*African cities and collaborative futures: urban platforms and metropolitan logistics*, Manchester University Press, Manchester

Obeng-Odoom F (2016) *Reconstructing urban economies: towards a political economy of the built environment*, Zed, London

Myers, Garth A (2016) *Urban environments in Africa: a critical analysis of environmental politics*, Policy Press, Bristol

Myers G (2011) *African cities: alternative visions of urban theory and practice*, Zed, London

Parnell S and E Pieterse (eds) (2014) *Africa's urban revolution*, Zed, London

Pieterse E and AM Simone (eds) (2013) *Rogue urbanism: emergent African cities*, Jacana Media with African Centre for Cities, University of Cape Town

Quayson A (2014) *Oxford Street, Accra: city life and the itineraries of transnationalism*, Duke University Press, Durham and London

Robinson J (2006) *Ordinary cities: between modernity and development*, Routledge, Abingdon

Simone AM (2004) *For the city yet to come: changing African life in four cities*, Duke University Press, Durham and London

**Assessment:** Essay (100%, 4000 words) in the LT.

Students will submit an extended essay addressing an issue of urban development in depth in one or two African cities of their choice.

## GY472 Half Unit Real Estate Investment

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Rodolfo Sejas-Portillo, STC3.06

**Availability:** This course is available on the MSc in Real Estate Economics and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Entry into the MSc Real Estate Economics and Finance or by request from other qualified MSc students. Those qualified will already have knowledge of economics equivalent to a good first degree in the subject.

**Course content:** The objective of this course is to educate students in the tools for evaluating real estate investment decisions and in incorporating the insights from urban economics to improve the profitability of their investments. The course will begin with a brief introduction to standard methods in evaluating risk and return in real estate investment and development. We will then discuss empirical techniques for identifying the impact of a shift in the demand or supply of space on the risk and return of an investment. From there, we will examine the theory and evidence for variation in risk and return within and across cities, as well as the institutional factors that create cross-country variation in investment outcomes. We will then discuss the construction of REITS, their ability to diversify across geography, and their performance. The remainder of the course will dive deeper into evaluating the impact of major emerging trends in urban economics on investment valuations that outperform spatially blind evaluations. Assessment for the course will center on valuation of a mixed-use retail property in London. A field trip to tour the property and surrounding urban environment may occur during the term.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of lectures, seminars and workshops across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** Students will be expected to produce 2 essays in the LT.

In their first essay, students will work in their groups to conduct the quantitative analysis for a case study using the standard tools in real estate investment. Each student will prepare a 1000 word essay based on this quantitative work, analyzing the assumptions and methods used and the results. The second essay will also be 1000 words and center on assessing the students ability to incorporate urban economic theory and empirical research into their valuation. These formative exercises closely match the style and structure of the summative coursework.

**Indicative reading:**

Real Estate Finance and Economics 48.4 (2014): 611-659.

- Plazzi, Alberto, Walter Torous, and Rossen Valkanov. "Expected returns and expected growth in rents of commercial real estate." *The Review of Financial Studies* 23.9 (2010): 3469-3519.
- Sivitanidou, Rena. "Urban spatial variations in office-commercial rents: the role of spatial amenities and commercial zoning." *Journal of Urban Economics* 38.1 (1995): 23-49.
- Daníelsson, Jón. *Financial risk forecasting: the theory and practice of forecasting market risk with implementation in R and Matlab*. Vol. 588. John Wiley & Sons, 2011.

**Assessment:** Essay (100%, 3500 words) in the ST Week 1.

The summative essay will be 3500 words and count for 100% of the student's final grade. It will center on assessing the students' ability to produce empirical estimates of the impact of shifts in demand and supply for commercial real estate using data and rigorous methods that they incorporate into their evaluation of an investment proposal's risk and return. The valuation should also contain other relevant estimates from the literature and justification for assumptions based on empirical evidence.

---

## GY473 Half Unit

### Economic Development and the Environment

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Giles Atkinson STC.3.02 and Dr Juan Ruiz-Tagle STC.3.19b

**Availability:** This course is compulsory on the MPhil/PhD in Environmental Policy and Development, MSc in Environment and Development and MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University). This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University) and MSc in Geographic Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator.

**Pre-requisites:** Students who have not completed a course in first year undergraduate level Economics might find it useful to audit EC1A5 Microeconomics I

**Course content:** With a focus on individuals and countries in the global south, the starting point for this course is recognition of the importance of resource use and the environment as building blocks for economic development. Using concepts and tools of environmental and development economics, the course aims to impart knowledge and develop critical thinking about a number of selected topics concerned with the interface between environment and development, at both the macro- and micro-scale. Central to this is an examination of the trade-offs and complementarities between environment and development.

Structured over 10 weeks, the course is divided into two distinct parts.

- After introducing the course (week 1), Part I concentrates on the sustainability of the national and global economy, focusing on the role of managing wealth in shaping development prospects, whether green growth can deliver sustainability and the role of global trade in explaining resource use and environmental degradation, at the macro-scale. It concludes by emphasizing the overarching role of institutions in governing development paths and the way in which resources are managed.
- What then follows in Part II is a consideration of a number of topics that explore different resources and areas of sustainability

policy at the micro-scale. Specifically, the demand for and supply of key ecosystem services - energy, food, and water - have important implications for resource use and the environment. They also serve as building blocks for economic development in poorer countries. The impacts of current development trends on natural and man-made ecosystems, in particular, forest and urban ecosystems, are examined at the end of course along with their implications for public policy.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures in Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

There will be a piece of formative work – a 'mock' exam question – during MT to help students prepare for the take-home exam.

**Indicative reading:**

- G Atkinson et al. (eds.), *Handbook of Sustainable Development*, Edward Elgar, 2014.
- R Lopez and M Toman (eds.), *Economic Development and Environmental Sustainability*. Columbia University Press, 2006.
- E Barbier, *Economics for a fragile planet*, Cambridge University Press, 2022.
- W Adams, *Green development: environment and sustainability in a developing world*, 2009
- A Banerjee and E Duflo, *Poor economics: a radical rethinking of the way to fight global poverty*, Public Affairs, 2011

**Assessment:** Take-home assessment (100%).

There will be an online assessment ('exam'). Timing TBC.

---

## GY474 Half Unit

### Politics of Environment and Development

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Julia Corwin and Dr Kasia Paprocki

**Availability:** This course is compulsory on the MSc in Environment and Development and MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University). This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator.

**Course content:** This course explores key themes at the intersection of development and environmental politics.

Specifically, the course is centred on the applications of political ecology, critical development studies, and materialist human geography to topics in environment and development. In exploring the complex relationships between historical dynamics of development, inequality, and the environment, it covers a range of important natural resource and environmental issues, such as climate change, conservation, waste, and environmental social movements.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/ seminars, pre-recorded lectures, live online lectures, in-person

lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:**

- Robbins, P (2012), *Political Ecology: A Critical Introduction*, Oxford: Wiley-Blackwell
- West, P (2006) *Conservation is Our Government Now: The Politics of Ecology in Papua New Guinea*. Durham: Duke University Press.
- Sasser, JS (2018) *On Infertile Ground: Population Control and Women's Rights in the Era of Climate Change*. New York: NYU Press.
- Curley, A (2021) "Resources is just another word for colonialism." In M. Himley, E. Havice, & G. Valdivia (Eds.), *The Routledge Handbook of Critical Resource Geography* (pp. 79-89). London: Routledge.
- Sealey-Huggins, L (2018) "The Climate Crisis is a Racist Crisis": Structural Racism, Inequality and Climate Change." In A. Johnson, R. Joseph-Salisbury, & B. Kamunge (Eds.), *The Fire Now: Anti-Racist Scholarship in Times of Explicit Racial Violence* (pp. 99-113). London: Zed Books.

**Assessment:** Assessment path 1

Essay (100%, 6000 words) post-summer term.

Assessment path 2

Essay (100%, 4000 words) in the LT.

- Assessment Pathway one is for MSc Environment and Development students NOT registered on GY489: Dissertation.
- Assessment Pathway two is for all other students.160

## GY475 Half Unit

### Issues in Environmental Governance

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Richard Perkins, Dr Eugenie Dugoua and Dr Michael Mason

**Availability:** This course is available on the MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Local Economic Development, MSc in Regulation, MSc in Risk and Finance and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

This course cannot be taken with GY465 Concepts in Environmental Regulation or GY420 Environmental Regulation: Implementing Policy.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

**Course content:** This Lent Term course is designed to highlight key themes impacting on environmental regulation across different scales of governance. While the emphasis is on global and transnational policy processes, attention is also paid to the implications of these processes at regional and local scales. The organising framework of 'multi-level governance' suggests new alignments and forms of regulation which require us to consider environmental decision-making within and beyond the territorial authority of a single state. The indicative themes chosen explore distinctive challenges for multi-level governance - governing technological change, international negotiations, governance beyond the state, and different rationalities of regulation (science, ethics and justice). These themes, which will be explored in

student-led seminars, run explicitly or implicitly through many environmental policy debates.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across the Lent Term.

This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** All students are required to make one presentation on an agreed topic: feedback will be provided.

**Indicative reading:** While there is no one single text that covers all aspects of the course, students are advised to consult the following:

- Barrett, S. (2005) *Environment and Statecraft: The Strategy of Environmental Treaty-Making*, Oxford: Oxford University Press.
- Gupta, A. and M Mason (eds.) (2014) *Transparency in Global Environmental Governance*, Cambridge, MA: MIT Press.
- Li, T. (2007) *The Will to Improve: Governmentality, Development and the Practice of Politics*. Durham, NC: Duke University Press.
- Piattoni, S. (2010) *The Theory of Multi-level Governance*, Oxford: Oxford University Press.
- Randall, A. (2011) *Risk and Precaution*, Cambridge: Cambridge University Press.

**Assessment:** Take-home assessment (100%) in the ST.

## GY476 Half Unit

### Applied Geographical Information Systems

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Elisabetta Pietrostefani

**Availability:** This course is compulsory on the MSc in Geographic Data Science. This course is available on the MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Subject to approval by course organiser.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator.

**Course content:** Geographical Information Systems (GIS) offer the social scientist an array of tools for generating, manipulating and visualising spatial data. This course covers practical GIS techniques for the social scientist and leads on to show how these tools can be combined with more advanced analysis to augment and enhance social science research. The course covers the techniques and methods of GIS, with a focus on practical skills and will make use of desktop software. The course will introduce the use of GIS tools in R and in QGIS. The course will also introduce data extraction from online geographical services such as google maps. Attention will be given to a critical reflection upon the nature of the data used, encouraging students to go beyond traditional data use, and think about the role of the spatial data scientist in selecting and developing evidence to support policymaking and practice. Examples of literature with applications in economic geography, environment, planning and other spatial social science will be provided for self-study. Readings are intended to develop a sound understanding of how real-world (geo)data are produced, their potential insights and biases, as well as opportunities and limitations.

Topics covered include:

- Introduction to GIS and GIS data
- Digitising, geographic coordinate systems, georeferencing and

editing

- Data query and transformation
- Remote sensed data and processing
- Geostatistical tools
- Network Analysis
- Working with online mapping resources
- Machine Learning, APIs, Web Scraping and spatial data

**Teaching:** 20 hours of computer workshops in the MT.

MSc in Geographic Data Science students will have an additional two session (4 hours) to cover more advanced material

**Formative coursework:** Students will be expected to produce a number of practical exercises in the MT.

Formative work will be ongoing, with students submitting the answers to some of their weekly class exercises. Feedback will be provided on at least two of these exercises.

**Indicative reading:**

- Arribas-Bel, D., & Reades, J. (2018). Geography and computers: Past, present, and future. *Geography Compass*, 12, 1–10.
- Singleton, A., & Arribas-Bel, D., (2019). Geographic Data Science, *Geographical Analysis*. 53:1, 61-75
- Overman, H.G. (2010) GIS a Job, What Use Geographical Information Systems in Spatial Economics?, *Journal of Regional Science*, 50(1) 165-180UR
- Brunsdon, C. and L. Comber, An Introduction to R for Spatial Analysis and Mapping, Sage Publications
- Henderson, J. Vernon, Adam Storeygard, and David N. Weil. 2012. Measuring Economic Growth from Outer Space. *American Economic Review*, 102 (2): 994-1028.
- Zook, Matthew, et al. "Volunteered geographic information and crowdsourcing disaster relief: a case study of the Haitian earthquake." *World Medical & Health Policy* 2.2 (2010): 7-33.

**Assessment:** Assignment (100%) in the MT.

Summative assessment will comprise a practical GIS analysis task. The task might involve, for example, developing measures of the constraints to growth city, due to availability of developable space, and ruggedness of neighbouring terrain.

There will be two versions of the assignment, one for Geographic Data Science students and one for students from other programmes.

---

## GY477 Half Unit

### Race and Capitalism in North America

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jessie Speer

**Availability:** This course is available on the MSc in City Design and Social Science, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

Please note that the course is capped at 30 students.

**Course content:** This course examines how capitalist development manifests in uneven and racialised ways in the United States and across the broader North American region. It begins with an overview of ideas and debates on race and capitalism, including discussions of:

- Indigeneity
- Migration
- Urban disinvestment
- Environmental racism
- Prisons and policing

The remainder of the course looks at key regions of the United States, with a focus on internal peripheries and broader regional connections that reveal the intertwined relationship between race, class and uneven development. Regions examined will include:

- Gulf Coast
- Mississippi Delta

- Rust Belt
- US-Mexico borderlands
- Island territories
- Indigenous lands

By examining US politics in the larger context of North America, this course will untangle the complexities of region-making and the blurred boundaries of the nation state. Using contemporary case studies combined with geographic and decolonial theory, students will examine how the region's internal peripheries are embedded with a web of colonial and capitalist relations that have broad impacts outside of the US. The course will take place through a weekly seminar-style discussion, during which students will be encouraged to bring their own ideas and interests into the classroom. Assessment will be based on a portfolio of weekly written reading responses as well as a final essay.

**Teaching:** 20 hours of seminars in the MT.

**Formative coursework:** Students will receive feedback on their first three weekly reading responses.

**Indicative reading:**

- Barra, M. P. (2021). Good sediment: Race and restoration in coastal Louisiana. *Annals of the American Association of Geographers*, 111(1), 266-282.
- Cahuas, M. C. (2020). The struggle and (im)possibilities of decolonizing Latin American citizenship practices and politics in Toronto. *Environment and Planning D: Society and Space*, 38(2), 209-228.
- Curley, A., & Smith, S. (2020). Against colonial grounds: Geography on Indigenous lands. *Dialogues in Human Geography*, 10(1), 37-40.
- Davis, A. (2011). Women, race, and class. *Vintage*.
- Domosh, M. (2015). Practising development at home: Race, gender, and the "development" of the American South. *Antipode*, 47(4), 915-941.
- Gilmore, R. W. (2007). *Golden gulag: Prisons, surplus, crisis and opposition in globalizing California*. University of California Press.
- Gorman, C. S., & Culcasi, K. (2021). Invasion and colonization: Islamophobia and anti-refugee sentiment in West Virginia. *Environment and Planning C: Politics and Space*, 39(1), 168-183.
- McKittrick, K. (2011). On plantations, prisons, and a black sense of place. *Social & Cultural Geography*, 12(8), 947-963.
- Pulido, L. (2016). Flint, environmental racism and racial capitalism. *Capitalism Nature Socialism*, 27(3): 1-16.
- Woods, C. A. (1998). *Development arrested: The blues and plantation power in the Mississippi Delta*. Verso.

**Assessment:** Essay (50%, 2000 words) and portfolio (50%) in the MT.

Students will submit short reading responses each week. The final portfolio due at the end of the term will include all weekly reading responses. Students will also submit a 2,000 word reflective essay after completing the course.

In submitting their weekly responses as part of their final portfolio, students must demonstrate that they have revised their essays in response to feedback.

---

## GY479 Half Unit Not available in 2022/23

### Urban Transformations

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ryan Center

**Availability:** This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course introduces students to key theories

and debates about societies undergoing rapid urban change. Course lectures examine large urban transformations in three ways. The first pertains to 'urbanisation' as a historical process by which social life, even outside of cities, becomes 'urban'. This means addressing the relationship between the country and the city, the idea of the urban in historical perspective, and the relationship between urban life in the global North and South. The second approach considers the city as a site for radical political change, as well as social experimentation in planning and development. This means studying cities as spaces of movement, resistance, and innovation, with an emphasis on urban experiments (especially in 'Southern' cities). Thirdly, urban transformation is analysed in terms of the explosion of theorisations about the nature of the urban, how to study it, and how to make a difference in 'the urban', both intellectually and materially, within a global economy. Through these three overlapping lenses – history, politics/planning, and theory – the course aims to equip students with a conceptual and empirical foundation for analysing city transformations and globalised urbanisation, with particular attention to emerging urbanisms in the global South.

Topics covered may include the following: industrialisation and immigration; processes of suburbanisation, ghettoisation, and gentrification; global cities; the colonial and postcolonial city; urban citizenship and the right to the city; urban uprisings; the geopolitics of urban theory; urban nostalgia; urban innovation and the politics of urban self-regard/self-representation.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

An optional short essay of 2000 words (maximum). Critically explore the applicability of one week's readings from the first 5 weeks of the course to an empirical case outside the course reading. This will be due in Week 7 of MT.

**Indicative reading:** R. Beauregard. *When America Became Suburban*, 2006;

J. Brown-Saracino (ed). *The Gentrification Debates*, 2010;

T. Caldeira, *City of Walls: Crime, Segregation, and Citizenship in Sao Paulo*, 2000;

M. Davis, *Planet of Slums*, 2006;

D. Harvey, *Rebel Cities: From the Right to the City to the Urban Revolution*, 2012;

J.M. Jacobs, *Edge of Empire: Postcolonialism and the City*, 1996;

G. Moussawi, *Disruptive Situations: Fractal Orientalism and Queer Strategies in Beirut*, 2020;

J. Robinson, *Ordinary Cities: Between Modernity and Development*, 2006;

A. Roy and A. Ong (eds), *Worlding Cities: Asian Experiments and the Art of Being Global*, 2011;

T. Samara, S. He, and G. Chen (eds), *Locating Right to the City in the Global South*, 2013;

The reading list is intended only to be indicative of literatures broached in the course. Actual readings will consist of particular articles and chapters on a weekly basis, as well as a wider range of inclusions.

**Assessment:** Essay (90%, 5000 words) in the LT.

Class participation (10%) in the MT.

Due in the first half of LT, the essay (5000 words, maximum) will be based on a range of questions provided by the instructor during MT. Some options will be very specific about certain issues and/or regions, whereas others will be more conceptual and open for student exploration. Across all these options, there will be wide enough scope for students with different academic backgrounds and thematic or geographical interests to be accommodated, while still hewing to the organising topics of the course.

Attendance and active participation in seminar is also essential, and assessed. Students will be required to co-lead discussion with a peer and the instructor for one (out of ten) seminars.

---

## GY480 Half Unit Not available in 2022/23

### Remaking China: Geographical aspects of Development and Disparity

**This information is for the 2022/23 session.**

**Availability:** This course is available on the MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in International and Asian History, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** N/A

**Course content:** The recent decades have seen China emerging as one of the most important global economic and political players. The course aims to offer opportunities to gain comprehensive and yet critical insights into China's development in urban, regional and global dimensions by reflecting upon the significance of China's role in the world economy as well as the challenges emerging within China. Tentative topics are as follows:

China's rise in the global capitalism; Uneven development and regional disparities; Governing China and the role of the state; Speculative urbanisation; Mega-city regions; Gender and China; Factory of the World and work inequalities; Migration, hukou and local citizenship; Public participation and rights activism.

**Teaching:** 15 hours of lectures and 9 hours of seminars in the MT.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:** Campanella, T.J. (2008) *The concrete revolution: China's urban revolution and what it means for the world*. Princeton Architectural Press

Hsing, Y-T (2010) *The great urban transformation*. Oxford University Press

Hsing, Y.T and Lee C. K (eds) (2009) *Reclaiming Chinese Society, The New Social Activism*. Routledge

Jacques, M. (2009) *When China rules the world: The rise of the Middle Kingdom and the end of the Western world*. Allen Lane

Lee, C.K. (2007) *Against the law: Labor protests in China's rustbelt and sunbelt*. University of California Press

Ngai, P (2005) *Made in China: Women Factory Workers in a Global Workplace*. Duke Univ. Press

Shao, Q. (2013) *Shanghai Gone: Domicide and defiance in a Chinese megacity*. Rowman & Littlefield Publishers

Zhang, L and Ong, A (2008) (eds) *Privatizing China*. Cornell University Press

Wu, F. (2015) *Planning for Growth: Urban and Regional Planning in China*. Routledge

**Assessment:** Essay (100%, 4000 words) in the LT.

---

## GY484

### Dissertation - MSc Regional and Urban Planning Studies

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Erica Pani

**Availability:** This course is compulsory on the MSc in Regional And Urban Planning Studies. This course is available on the MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a series of lectures across Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of both Michaelmas and Lent Term.

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

## GY485

### Dissertation - MSc Geographic Data Science and MSc Real Estate Economics and Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Programme Director

**Availability:** This course is compulsory on the MSc in Geographic Data Science and MSc in Real Estate Economics and Finance. This course is not available as an outside option.

**Course content:** The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of workshops and one to one supervision across Michaelmas, Lent and Summer Term.

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

## GY486

### Dissertation - MSc Local Economic Development

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Erica Pani

**Availability:** This course is compulsory on the MSc in Local Economic Development. This course is available on the MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a series of lectures across Michaelmas Term and Lent Term.

The course includes a reading week in Week 6 of both Michaelmas and Lent Term.

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

## GY487

### Dissertation - MSc in Human Geography and Urban Studies (Research)

**This information is for the 2022/23 session.**

**Teacher responsible:** Programme Director - Dr Ryan Centner

**Availability:** This course is compulsory on the MSc in Human

Geography and Urban Studies (Research). This course is not available as an outside option.

**Course content:** The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

## GY488

### Dissertation - MSc Urbanisation and Development

**This information is for the 2022/23 session.**

**Teacher responsible:** Programme Director

**Availability:** This course is compulsory on the MSc in Urbanisation and Development. This course is available on the MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of workshops as well as one to one supervision meetings across Michaelmas, Lent and Summer Terms.

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

## GY489

### Dissertation - Environment Programme - MSc Environmental Economics and Climate Change, MSc Environmental Policy and Regulation and MSc Environment and Development

**This information is for the 2022/23 session.**

**Teacher responsible:** Programme Director of relevant MSc programme.

**Availability:** This course is compulsory on the MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University) and MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University). This course is available on the MSc in Environment and Development and MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University). This course is not available as an outside option.

**Course content:** The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through combined workshops and lectures.

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

## HP400 Half Unit Financing Health Care

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Elias Mossialos and Mr George Wharton

**Availability:** This course is compulsory on the MSc in Health Policy, Planning and Financing and MSc in International Health Policy. This course is available on the MSc in Global Health Policy and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically high. Places are allocated first to students in the Department of Health Policy and then on a first come first served basis.

**Course content:** This course aims to give students a thorough grounding in health financing policy. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in European countries, but the general principles studied apply internationally.

The course provides an overview of key health financing policy issues, including the advantages and disadvantages of different ways of raising revenue for health; the role of private financing mechanisms; the importance of pooling; decisions about whom to cover, what services to cover, and how much of service cost to cover; allocating resources to purchasers, purchasing market structure and the principles of strategic purchasing; the incentives associated with different methods of paying providers; and the issue of financial sustainability.

**Teaching:** This course will be delivered through a combination of lectures and seminars totalling a minimum 23 hours during Michaelmas Term. Students will work together in small groups on structured learning activities set by the course leads, ahead of the seminars.

There will be a departmental reading week in week 6 of term.

There will be a 2 hour revision session held in the ST ahead of the final exams.

**Formative coursework:** Students will receive feedback on formative activities of in-class group work and presentations.

**Indicative reading:** WHO, World Health Report 2010 - Health systems financing: the path to universal coverage (2010); E Mossialos, A Dixon, J Figueras & J Kutzin (eds), Funding health care: options for Europe, Open University Press (2002); J Kutzin, Health financing policy: a guide for decision-makers, World Health Organization (2008); T Rice, The economics of health reconsidered, Health Administration Press (3rd edn, 2009).

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## HP401 Half Unit Introduction to Health Policy and Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Justin Parkhurst COW 2.08

**Availability:** This course is compulsory on the MSc in Global Health Policy and MSc in International Health Policy. This course is available on the MSc in Global Population Health, MSc in Health Policy, Planning and Financing and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** A comparative approach to the development of health and healthcare policies in high, middle, and low income country settings, emphasising the goals of health policymaking, public health approaches, the political nature of health policy issues, and core concepts from policy studies that can be used to

conceptualise policy change dynamics in health.

The course will introduce concept of risk and risk reducing strategies, theories of planning, and priority setting techniques in health care. In addition, the course will examine the processes and forces shaping the development and implementation of health policy. The course will examine core concepts such as power, the role of the state and other policy stakeholders (e.g. NGOs, international organisations, etc.), institutions, and evidence, in shaping health policy agendas or choices.

**Teaching:** This course will be delivered through a combination of lectures and seminars totalling a minimum 23 hours during Michaelmas Term. Seminars will take place in small groups where students will work together in small groups on structured learning activities set by the course leads. .

There will be a departmental reading week in week 6 of term.

**Formative coursework:** Students will sit a mock written exam in the last week of term.

**Indicative reading:** Green, A., An Introduction to Health Planning for Developing Health Systems, new edn, OUP, 2007.

Walt, Gill. 1994. Health policy: an introduction to process and power. London: Zed Books.

Hill, M. The Policy Process, a reader, second ed. Harlow: Prentice Hall 1997

D Leon & G Walt (eds), Poverty, Inequality and Health: An international perspective, OUP (2001)

Parkhurst, J. The politics of evidence: from evidence based policy to the good governance of evidence. London Routledge 2016.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## HP402 Half Unit Measuring Health System Performance

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Andrew Street COW 1.02

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically high. Places are allocated first to students in the Department of Health Policy and then on a first come first served basis to students outside the department.

**Course content:** This course aims to present a framework to discuss the opportunities and challenges with performance measurement in health care, examine the various dimensions and levels of health system performance, identify the measurement instruments and analytic tools needed, and examine the implications of these issues for policy makers and regulators. Lectures generally focus on measuring health system performance in high-income countries but draw on the experience of other countries where relevant.

After taking this course students are expected to:

- understand the principles of performance measurement
- appreciate the challenges, approaches, and opportunities in performance measurement in four dimensions: population health, patient outcomes, equity, quality and appropriateness of care, and productivity
- understand the methodological issues facing performance measurement relating to risk adjustment, developing composite measures, and measuring attribution and causality
  - identify key issues relevant to policy makers relating to: developing targets and reporting on progress to the public, and developing incentives to improve performance

**Teaching:** Teaching will be delivered in no less than 29 hours and includes lectures, seminars and workshops

**Formative coursework:** Students will be expected to produce 1

piece of coursework in the LT.

**Indicative reading:** Papanicolas I, Smith P (Eds) Health System Performance Comparison: An Agenda for Policy, Information and Research. Maidenhead: Open University Press, 2013; P Smith, E Mossialos, I Papanicolas S. Leatherman (Eds), Performance measurement for health system improvement: experiences, challenges and prospects. Cambridge University Press, 2010.

Institute of Medicine, Crossing the Quality Chasm: A New Health System for the 21st Century. Washington, DC, National Academies Press, 2001;

OECD, Measuring up: improving health system performance in OECD countries. Paris: OECD, 2002. World Health Organization (WHO), (2000)

The world health report 2000:Health systems: Improving performance, Geneva: WHO Publications

**Assessment:** Presentation (25%) in the LT.

Essay (75%, 3000 words) in the ST.

### HP403 Half Unit Not available in 2022/23

#### Health Systems and Policies in Developing Countries

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mrigesh Bhatia COW 1.04

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** In recent years, debates in health policy have moved to consider a system-wide approach to understanding the demands and challenges of health in low and middle income settings. Importantly, systemic barriers remain to health care, centred around institutions, organisations and resources. In particular, a system-wide approach focuses on the importance of developing and strengthening broader healthcare infrastructure, rather than a focus on disease specific interventions. This course will be based around three key areas of the health system in low income settings; the physical, financial and human. The physical will consider the delivery of health in developing countries - examining the role of the public, for profit and non profit sectors, decentralisation (and recentralisation) and physical access to primary healthcare. The financing arm will consider options for financing healthcare in low income settings, including the role of user fees, results based financing and community financing schemes. The human element will analyse the acute shortages of health workers, brain drain and capacity building in the workforce. As part of this three pronged approach, this course will consider a range of health policies and health sector reforms which have been implemented to overcome challenges in resource poor settings. It will examine the assumptions upon which health system reforms are based, and an assessment of their success. Finally, the course will consider some case studies for health systems and policy analysis in developing countries, including maternal health and system resilience to health crises

**Teaching:** This course will be delivered in no less than 30 hours and included lectures and seminars.

**Formative coursework:** An essay of not more than 2,000 words.

**Indicative reading:** Mills, A (2014) Health Care Systems in Low and Middle Income Countries, New England Journal of Medicine, 370 (6), 552-557; Crisp, N & Chen, L, (2014) Global Supply of Health Professionals, New England Journal of Medicine, 370 (10), 950-957; Hafner, T., & Shiffman, J (2013) The emergence of global attention to health systems strengthening, Health Policy and Planning, 28 (1), 41-50; Shakariskvili, G, Atun, R., Hsiao, W., Burgess, C., & Lansang, M (2010) Converging health system frameworks: towards a concepts-to-actions roadmap for health systems

strengthening in low and middle income countries, Global Health Governance, 3(2); Ottersen, T, Evans, D., Mossialos, E., Rottingen J-A, (2017) Global Health Financing towards 2030 and beyond, Health Economics, Policy & Law, 12 (2); Balabanova, D., McKee, M., Mills, A., Walt, G., & Haines, A., (2010) What can global health institutions do to help strengthen health systems in low income countries? Health Research Policy and Systems, 8,(1), 22, Kiemy, M., Evans, D., Schemts, G & Kadandale, S, (2014) Health system resilience: reflections on the Ebola crisis in West Africa, Bulletin of the World Health Organisation, 92(12) 850, de Savigny, D., & Adam T, (2009) System Thinking for Health Systems Strengthening, Geneva Alliance for Health Policy and Systems Research; Buse; K & Hawkes, S., (2015) Health in the Sustainable Development Goals: ready for a paradigm shift? Globalisation and Health, 11(1), 13. Pratt B & Hyder A (2015) Global Justice and Health Systems Research in Low and Middle Income Countries, Journal of Law, Medicine & Ethics, 43 (1), 143-161

**Assessment:** Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2000 words) in the LT.

### HP404 Half Unit

#### Global Health Policy: Institutions, Actors and Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Clare Wenham COW 1.03

**Availability:** This course is compulsory on the MSc in Global Health Policy. This course is available on the MSc in Global Population Health, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically high. Places are allocated first to students in the Department of Health Policy and then on a first come first served basis.

**Course content:** Globalization has not only impacted on the nature of emerging global health but the policy responses to these challenges. This module critically examines the transnational institutions and actors involved in global health policy and the interplay between them. The governance of global health issues has traditionally been carried out by states and various United Nations agencies (namely, the World Health Organisation), but given the transboundary nature of many global health issues, a diverse range of actors, including the private sector, civil society organizations and national governments, are now integrally involved. The funding of global health programmes and policies, for example, has shifted from primarily bi-/multilateral donors to include private and public sectors and philanthropists in a global health governance mosaic. The module will use a number of case studies to examine the organisation and role of global health institutions, the challenges and opportunities presented by these governance arrangements, and their (intended and unintended) impacts on global health policy and practice. In doing so, the module will draw on contributions from a range of social sciences including sociology, political science and health services research.

**Teaching:** This course will be delivered through a combination of lectures and seminars totalling a minimum 25 hours during Michaelmas Term. Seminars will be discussion-based and take place in small groups each week. .

There will be a departmental reading week in week 6 of term.

**Formative coursework:** One essay (1000 words) focusing on different approaches to framing global health

**Indicative reading:** Frenk, J., & Moon, S. (2013). Governance challenges in global health. New England Journal of Medicine, 368(10), 936-942.

Taylor, S. (2018). 'Global health': meaning what?. BMJ Global

Health, 3(2) e000843.

Davies, S. (2010). Global politics of health. Polity.

McInnes, C., & Lee, K. (2012). Global health and international relations. Polity.

**Assessment:** Essay (100%, 4000 words) in the MT.

One extended essay (4000 words) will be due at the end of MT.

Essay questions will be provided at the start of the course, or students are welcome to select an essay topic of their choice, with approval from the course convener.

## HP405 Half Unit

### Social Determinants of Health

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Justin Parkhurst COW.2.08

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

This course is a listed option on MSc's in the department of Health Policy and for the MSc in Health and International Development. The course will be capped and priority may be given to students in the Department of Health Policy or related MSc degrees as needed.

**Course content:** The course introduces the social determinants of health from a global perspective. Content will draw on low, middle, and high income country examples, (although a majority of material will come from middle and high income cases). The course begins by exploring the shift in focus from individual to population health, the link to social determinants, and methodological challenges. It then goes into specific social determinants and issues such as poverty, education, gender and the built environment. Specific health and intersectional issues are then introduced, before final lectures that consider the politics of policy responses dealing with social determinants. A set of 6 seminars compliment the lectures with the final seminar linked to assessment.

**Teaching:** The course will be delivered in no less than 27 hours and includes lectures and seminars

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

An outline or early draft of the term essay will be submitted in week 8 to allow feedback and guidance from teaching staff before final submission.

**Indicative reading:** Rose, Geoffrey. 2001. "Sick individuals and sick populations." *International journal of epidemiology* 30 (3):427-432. WHO Commission on the Social Determinants of Health. 2008.

Closing the gap in a generation: health equity through action on the social determinants of health. Final report of the Commission on Social Determinants of Health. Geneva: World Health Organization. Birn, Anne-Emanuelle, Yogan Phillay, and Timothy H. Holtz. 2009. *Textbook of international health: global health in a dynamic world*. New York: Oxford University Press.

Sallis, James F, Neville Owen, and Edwin B Fisher. 2008. "Ecological models of health behavior." In *Health behavior and health education: Theory, research, and practice*, edited by Karen Glanz, Barbara K. Rimmer and K. Viswanath, 465-486. San Francisco: John Wiley & Sons.

Subramanian, S. V., Paolo Belli, and Ichiro Kawachi. "The macroeconomic determinants of health." *Annual review of public health* 23.1 (2002): 287-302.

**Assessment:** Essay (75%, 3000 words) in the ST.

In-class assessment (25%) in the LT.

25% of the grade will be based on small group presentations in the final seminars.

75% of the grade will be based on a term essay (3000 words) that requires them to address a key health concern facing a population in a specific country of interest from a social and

political perspective. They will need to write a policy brief that reviews literature, considers policy responses in relation to critical conceptual approaches covered, and proposes potential approaches to the problem.

## HP407 Half Unit

### Evidence Review and Synthesis for Decision Making

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Huseyin Naci COW 3.01

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

This course is relevant to all students with an interest in health and social care interventions.

**Course content:** Evidence review and synthesis methods (such as systematic reviews and meta-analyses) are increasingly used to evaluate the effectiveness of healthcare interventions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need individuals equipped with the methods of reviewing and synthesising the existing body of evidence by performing systematic reviews and meta-analyses.

This course will be focused on the principles of reviewing and synthesising the existing body of literature. The course will have three components. The first will provide the rationale for adopting a systematic approach for evidence review and synthesis. It will equip students with the methods to undertake risk of bias assessments of randomised controlled trials. The second component will focus on the quantitative synthesis of multiple randomised controlled trials in meta-analysis. The third component will discuss the opportunities and challenges of using evidence for decision-making.

The intended learning outcomes of this course will be the following:

- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual randomised trials and collections of randomised trials
- Critically evaluate the quality of randomised controlled trials in oral and written form
- Assess heterogeneity in a collection of studies
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

**Teaching:** This course will be delivered through a combination of lectures and seminars totalling a minimum 33 hours during Michaelmas Term. Students will work in small groups to complete weekly self-directed learning activities and meet with seminar leads for weekly feedback on their progress. A computer workshop will be held to introduce students to systematic review and meta analysis software.

There will be a departmental reading week in week 6 of term.

**Formative coursework:** Feedback given on a completed meta analysis

**Indicative reading:**

- Cochrane Handbook for Systematic Reviews of Interventions (version 5.1.0, updated March 2011).
- Institute of Medicine. *Finding what works in health care: standards for systematic reviews*. 23 March 2011.
- Sutton AJ et al. *Methods for Meta-analysis in Medical Research*. Wiley, Chichester, UK, 2000.
- Cook DJ. Systematic reviews: synthesis of best evidence for clinical decisions. *Annals of internal medicine* 1997;126(5):376-80.

- Higgins, Julian PT, et al. The Cochrane Collaboration's tool for assessing risk of bias in randomised trials. *Bmj* 343 (2011): d5928.

**Assessment:** Project (100%, 3000 words) in the LT. Systematic review and meta-analysis report resembling an original article submission to a peer-reviewed journal (100%). Students will develop their meta-analysis project in a group and individually write up as their summative assessment.

## HP409

### Dissertation for MSc Health Policy, Planning and Financing

**This information is for the 2022/23 session.**

**Teacher responsible:** Currently Dr. J Parkhurst and Dr. M Bhatia (LSE) and Dr T CHantler (LSHTM) as Programme Directors though the Programme Directorship sometimes varies from year to year.

**Availability:** This course is compulsory on the MSc in Health Policy, Planning and Financing. This course is not available as an outside option.

**Course content:** The aim of the course is to provide core information to students on dissertation-writing as well as to address queries students may have in relation to their dissertation topic, the methodology used, the likelihood of ethical approval, and data acquisition, among others.

The dissertation could be on any topic in the field of health policy, planning and/or financing. The main body of the dissertation should include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

**Teaching:** Teaching comprises two 2-hour seminars. It may be merged with other MSc students in the Department when covering overlapping issues.

Finally, there is individual supervision for students on the dissertation.

**Formative coursework:** Students will be required to write a summary of the proposed dissertation, outlining the title, background to the topic, methods to be employed, and likely expected results.

**Assessment:** Dissertation (100%, 10000 words).

## HP412 Half Unit

### Global Health Security

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Clare Wenham COW 1.03

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Global Politics, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in International Health Policy, MSc in International Health Policy (Health Economics) and MSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** Global health security has become a dominant paradigm in global health. Recent outbreaks of COVID-19, Ebola, Zika and pandemic influenza have heightened the global sense of vulnerability to the spread of infectious disease, and as a consequence global health policy is now complete with references to such health emergencies. These threats are even listed on national security strategies of many governments, and as such we see the ever increasing link between security and health across policy areas and levels. As we have all witnessed, COVID-19 has affected every part of the world, and every part of socio-economic life as we know it. Thus, we must understand how this has happened, and what we can do to prevent the next outbreak, and mitigate against future downstream effects of pandemics.

This course interrogates this health-security nexus. It considers different conceptual understandings of security including global health security, national security, biosecurity and human security and considers these in multiple health contexts. These empirical explorations include COVID-19, Ebola, Zika, Anti-microbial resistance (AMR) and conflict and health. Yet, this course also asks students to consider the assumptions inherent to the security discourse, and the challenges these has on global health policymaking. Should the global health community be championing global health security, or has the terminology run its course.

To examine these concepts, empirics and broader political questions, this module will draw on contributions from international relations, political science, law, epidemiology and public health research.

**Teaching:** This course will be delivered through a combination of lectures and seminars totalling a minimum 20 hours during MT. Seminars will be led by a small group of students who will present the key discussion points to their colleagues. Small group work will be undertaken in the seminars to allow for more in-depth discussion and class debate. Additional seminar activities will provide students will real-life scenarios of global health security crises. Activities will aim to bring to life the theories, challenges and politics discussed during the course.

There will be a departmental reading week in week 6 of term.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

Students will submit a short 1000 word essay (on the topic that they are writing on for the summative) during the teaching term. These will be graded and feedback given to students. This allows students to get valuable experience of writing critical essays have they not before in previous modules or degrees, and the expectations of the summative assessment. For example, if a student's formative work flagged particular concerns this could be addressed ahead of the summative submission.

**Indicative reading:**

**Assessment:** Essay (75%, 3500 words) and blog post (25%) in the MT.

1 x 3500 word essay – 75% of grade.

Students will be asked to pick one essay question. They will be given the option to choose their own essay topic (after discussion with their seminar leader) or to select from a provided list of questions. The questions will be broad, allowing for student individuality to come across in their answers.

1 x Blog post – 25% of grade.

Students will be assessed on their reflections of the course and any role play activity undertaken.

---

## HP420 Half Unit Health Economics

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Andrew Street COW 1.02

**Availability:** This course is available on the MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

In allocating places in this course, students enrolled in the MSc in International Health Policy and MSc in International Health Policy (Health Economics) have priority.

**Course content:** This course develops basic economic concepts as they are applied to the health sector. We shall discuss economics issues at system-level, including options for financing health care, predicting future expenditure, and assessing the degree of health equity and equality. We shall consider demand for health care and for health insurance, discussing matters such as moral hazard, adverse selection and risky health behaviours. Then we shall turn to the supply-side of health care provision, considering the agency relationship between patients and physicians, the competitiveness of health care markets, the geographical configuration of health care services, and methods for paying health care providers. The course is designed to provide an intuitive understanding of a wide range of economic concepts, illustrated by practical examples.

**Teaching:** This course will be delivered through a combination of lectures and seminars totalling a minimum 33 hours during Michaelmas Term. Workshops will be held throughout the term to enable students to work through key problem sets. Students will also take part in small group seminars.

There will be a departmental reading week in week 6 of term.

**Formative coursework:** Mock exam in the MT.

**Indicative reading:** The course draws from a variety of textbooks and articles, with a thorough reading list provided prior to the lectures. The course makes repeated use of the following textbook:

- J Bhattacharya, T Hyde & P Tu, *Health Economics*, Palgrave Macmillan, 2014.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

## HP421 Half Unit Economic Analysis for Health Policy in Low- and Middle-Income Countries

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Miqdad Asaria COW 3.07

**Availability:** This course is compulsory on the MSc in Global Health Policy. This course is available on the MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. Places are allocated first to students in the Department of Health Policy and then on a first come first served basis to students outside the department.

**Course content:** The aim of the course is to provide students with some key analytical methods and concepts used by economists to study health care policies in low- and middle-income countries. The course takes a micro-economic perspective, in that it will study how individuals involved in health care systems (patients, providers, insurers) make decisions which affect the utilisation and

delivery of health care services.

The course will present key theoretical concepts and use empirical evidence particularly relevant for policy questions in low- and middle-income settings. The course will be applied in nature, as students will learn through case studies which will expose to different types of data and evidence to analyse decisions made by individuals and then articulate recommendations for health policy. By the end of this course, students will be able to:

- define fundamental principles and concepts of health economics relevant to health policy challenges in low- and middle-income countries.
- understand the economic models of decisions made by individuals on the demand- and supply-side of health care markets in low and middle-income countries;
- apply economic reasoning and models to identify problems and to recommend relevant health care policies;
- refer to seminal literature and evidence in the health economics and health policy fields in low- and middle-income countries;
- be able to interpret simple results from empirical economic studies, and formulate policy recommendations.

**Teaching:** The course will be delivered in no less than 28 hours and consists lectures and seminars. A revision session will be held early in the summer term ahead of the exam.

**Formative coursework:** Coursework assessed throughout the LT

**Indicative reading:** The course draws from a variety of textbooks and articles, providing essential references to understand the theoretical concepts and read key empirical studies. A complete reading list is provided at the start of the term.

The following papers are a selection of readings used in the course:

- Dupas P (2011) "Health Behavior in Developing Countries" Annual Review of Economics, Vol. 3
- Lepine, A., M. Lagarde and A. Le Nestour (2018). "How effective and fair is user fee removal? Evidence from Zambia using a pooled synthetic control." *Health Economics* 27(3): 493-508.
- Dupas, P., V. Hoffmann, M. Kremer and A. P. Zwane (2016). "Targeting health subsidies through a nonprice mechanism: A randomized controlled trial in Kenya." *Science* 353(6302): 889-895.
- Capuno, J. J., A. D. Kraft, S. Quimbo, C. R. Tan and A. Wagstaff (2016). "Effects of Price, Information, and Transactions Cost Interventions to Raise Voluntary Enrollment in a Social Health Insurance", *Health Economics* 25(6) p650-662
- Baicker, K., W. J. Congdon and S. Mullainathan (2012). "Health Insurance Coverage and Take-Up: Lessons from Behavioral Economics." *Milbank Quarterly* 90(1): 107-134.
- R. M. Scheffler, C. H. Herbst, C. Lemiere and J. Campbell. (2016). *Health Labor Market Analyses in Low- and Middle-Income Countries: An Evidence-Based Approach*.
- McPake, B, A Scott, and I Edoka. (2014). *Analyzing Markets for Health Workers: Insights from Labor and Health Economics*. Directions in Development. Washington, DC: World Bank.
- Lagarde, M. and D. Blaauw (2014). "Pro-social preferences and self-selection into jobs: Evidence from South African nurses." *Journal of Economic Behavior & Organization* 107, Part A: 136-152.
- Banerjee, A. V., E. Duflo and R. Glennerster (2008). "Putting a Band-Aid on a Corpse: Incentives for Nurses in the Indian Public Health Care System." *Journal of the European Economic Association* 6(2-3): 487-500.
- Björkman, M. and J. Svensson (2009). "Power to the People: Evidence from a Randomized Field Experiment on Community-Based Monitoring in Uganda." *The Quarterly Journal of Economics* 124(2): 735-769.
- Currie, J., W. Lin and W. Zhang (2011). "Patient knowledge and antibiotic abuse: Evidence from an audit study in China." *J Health Econ* 30(5): 933-949.
- Björkman Nyqvist, M. and S. Jayachandran (2017). "Mothers Care More, but Fathers Decide: Educating Parents about Child Health in Uganda." *American Economic Review* 107(5): 496-500.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## HP422 Half Unit Health Care Economic Evaluation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ranjeeta Thomas COW 2.07

**Availability:** This course is compulsory on the MSc in International Health Policy (Health Economics). This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing and MSc in International Health Policy. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** Resource allocation is at the heart of decision-making in the health care sector. Economic evaluation is an approach used to support decision-makers in allocating resources by providing tools to compare the costs and benefits associated with multiple alternative scenarios or interventions.

This course will enable students to understand and apply the analytic methods used in the economic evaluation of health interventions. By the end of the course, students are expected to:

- Explain the welfare economic principles underlying health-care economic evaluations
- Identify the different approaches to economic evaluations (cost-effectiveness, cost-benefit, cost-utility etc)
- Measure and analyse costs and effects of health care interventions
- Construct a decision-analytic model to compare the costs and benefits of different interventions
- Apply statistical methods to deal with uncertainty in economic evaluations
- Evaluate how to make decisions under-uncertainty in health-care economic evaluations

It is recommended students taking this course have some knowledge of probability and statistics (similar to ST102).

As Microsoft Excel will be used for practical sessions, some experience of using Excel would be helpful.

**Teaching:** This course will be delivered through a combination of lectures and seminars totalling a minimum 26 hours during Michaelmas Term. The lectures provide conceptual foundations, theory and statistical methods. Students will attend seminars where they will work together in small groups on structured learning activities set by the course leads.

There will be a departmental reading week in week 6 of term.

**Formative coursework:** A piece of formative coursework will be set in the middle of the term, and feedback provided to students.

**Indicative reading:** The following are basic readings for the course:

- Drummond MF, Sculpher MJ, Claxton K, Stoddart GL, Torrance GW (2015). *Methods for the Economic Evaluation of Health Care Programmes*. Fourth edition: Oxford University Press, Oxford.
- Gray A, Clarke P, Wolstenholme J, Wordsworth S (2011) *Applied Methods of Cost-Effectiveness Analysis in Health Care*, Oxford University Press, Oxford.
- More technical and advanced textbooks, especially for statistical analysis.
- Briggs A, Sculpher M, Claxton K (2006). *Decision Modelling for Health Economic Evaluation*. Oxford University Press, Oxford.

### Supplementary Reading List

This is made available on Moodle along with all other course materials, and includes references to specialised texts and articles on each subject covered within the course.

**Assessment:** Project (100%, 3000 words) in the LT.

Assessment is through a project that students will undertake in small groups and write up individually (3,000 word paper), to be submitted at the end of the course.

## HP423 Half Unit Advanced Health Economics

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Alistair Mcguire COW 2.02

**Availability:** This course is compulsory on the MSc in International Health Policy (Health Economics). This course is available on the MSc in Health Policy, Planning and Financing and MSc in International Health Policy. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have completed Health Economics (HP420).

Alternative introductory economics courses are acceptable.

**Course content:** The course will cover: international comparisons of health care expenditure, individual health-seeking behaviour, health care insurance, contract theory applied to the health care sector (including principal-agent theory and incentive payment mechanisms), and equity in health care.

Students may find material from the half unit HP426 Applied Health Econometrics, to be beneficial to studying this course. See the HP426 course guide for further detail.

**Teaching:** This course will be delivered through a combination of lectures and seminars totalling a minimum 25 hours during Lent Term. Seminars will take place in small groups with students presenting assigned topics each week.

There will be a departmental reading week in week 6 of term.

**Formative coursework:** Students will give a presentation in seminars and receive feedback from seminar leads

**Indicative reading:** Culyer, A.J., and Newhouse, J.P., (eds.), 2001, *Handbook of Health Economics Volumes 1A & 1B*, (North-Holland, Amsterdam); Zweifel, P. and Breyer, F., 1997, *Health Economics*, (OUP, Oxford).

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## HP424 Half Unit Pharmaceutical Economics and Policy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Panagiotis Kanavos

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The aim of this course is to introduce students to the economics of pharmaceutical markets and related policies that affect national and international markets broadly. The course will

- Provide students with an understanding of basic features of pharmaceutical markets, how pharmaceutical markets work and how competition manifests itself in different parts of pharmaceutical markets.
- Illustrate to students how the pharmaceutical market is linked to the health care market, why it is often the focus of much regulation, and to help students understand the multidimensional goals of pharmaceutical policies.
- Introduce students to the economic and policy problems encountered in managing pharmaceutical markets and how to evaluate the impact of alternative policy approaches. The course will also give students some experience in critically evaluating the impact of policy on market outcomes.
- Facilitate consideration of various country-specific political, cultural and economic factors that may drive governments' approaches to pharmaceutical regulation. In this context, this course will help students consider the extent to which policies may be transferable.
- Enable students to analyse pharmaceutical markets from the perspectives of several main actors: governments, third party payers, the pharmaceutical industry, doctors, patients,

pharmacists and wholesalers. Literature from Health Economics, Industrial Organisation and Health Policy will be incorporated into lectures, discussions and seminars.

- Introduce students to the economics of pricing and reimbursing pharmaceutical products, to explore different models of pricing and reimbursing medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing, among others.

**Teaching:** This course will be delivered through a combination of lectures and seminars totalling a minimum of 24 hours during Lent Term.

There will be a departmental reading week in week 6 of term.

**Formative coursework:** A formative essay under exam conditions (1 question in 1 hour) will be a requirement and is to be submitted immediately after the revision session.

**Indicative reading:**

1. E Mossialos, M Mrazek & T Walley (eds), *Regulating Pharmaceuticals in Europe. Striving for Efficiency, Equity and Quality*, Buckingham, Open University Press (2004)
2. S O Schweitzer, *Pharmaceutical Economics and Policy*, Oxford University Press (2006)

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

## HP425 Half Unit

### Statistical Methods in Health Care Economic Evaluation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ranjeeta Thomas

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** This course assumes knowledge of elementary mathematics and statistics. Students who wish to take HP425, but who have not taken an introductory university course in statistics or econometrics, may wish to consider auditing MY451 (Introduction to Quantitative Analysis) in Michaelmas Term in order to prepare themselves for this course. Students who are unsure whether they have the requisite background are encouraged to approach the Lecturer before the start of Lent Term.

This course is envisaged to be complementary to HP422 (Cost-Effectiveness Analysis in Health Care), which is offered in Michaelmas Term.

**Course content:** This course develops the statistical and modelling techniques necessary to apply economic evaluation to the health

care sector. Introduction to random variables and probability distribution, linear regression analysis, logistic regression analysis, survival analysis for health outcomes, survival analysis for treatment costs, parametric and non-parametric approaches for missing data, economic evaluation and clinical trials. Estimation of confidence intervals for cost-effectiveness ratios. Transformation of ratios - net benefit approach. Presentation of results, acceptability curves.

**Teaching:** This course will be delivered through a combination of lectures and workshops totalling a minimum 30 hours during Lent Term. Students will also take part in computer workshops to complete problem datasets and practice key skills from the course.

**Formative coursework:** 1000 word essay

**Indicative reading:** A full reading list is provided at the start of the course. The course makes use of selected parts of the following texts:

- M Drummond & A McGuire (eds), *Economic Evaluation in Health Care: Merging Theory with Practice*, OUP, 2001.
- D Machin, YB Cheung & MKB Parmar, *Survival analysis: a practical approach*, 2nd edn, Wiley, 2006.
- J Klein & M Moeschberger, *Survival Analysis: Techniques for Censored and Truncated Data*, 2nd edn, Springer, 2005.
- M Cleves, W Gould, R Gutierrez & Y Marchenko, *An Introduction to Survival Analysis Using Stata*, 3rd edn, Stata, 2010.
- M Drummond, M Schulpher, K Claxton, G Stoddart & G Torrance, *Methods for the Economic Evaluation of Health Care Programmes*, 4th edn, OUP, 2015.
- M Gold, J Siegel, L Russell & M Weinstein, *Cost-Effectiveness in Health and Medicine*, OUP, 1996.
- M Johannesson, *Theory and Methods of Economic Evaluation of Health Care*, Kluwer, 1996.
- P Johansson, *Evaluating Health Risks: An Economic Approach*, CUP, 1995.

**Assessment:** Project (100%, 4000 words) in the ST.

---

## HP426 Half Unit

### Applied Health Econometrics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ilias Ioannis Kyriopoulos

**Availability:** This course is compulsory on the MSc in Health Data Science and MSc in International Health Policy (Health Economics). This course is available on the MSc in International Health Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Most research questions, in health economics require students to apply econometric techniques. This course will introduce these techniques and students exiting the course can expect to have acquired a competency in econometrics as it is applied to health economics. The seminars- which are lab based- will allow students to apply these methods to practical problems using Stata and interpret the results.

This content of this course may be useful to those considering the half unit HP423 Advanced Health Economics.

**Teaching:** This course will be delivered through a combination of lectures and workshops totalling a minimum 25 hours. Students will take part in computer workshops to complete problem datasets and practice key skills from the course.

There will be a departmental reading week in week 6 of term.

**Formative coursework:** One formative assessment will require the analysis of some data in STATA and the description of the results.

**Indicative reading:**

- Joshua David Angrist, Jorn-Steffen Pischke (2015) *Mastering 'Metrics: The Path from Cause to Effect*. (most relevant to the course)
- Jeffrey M. Wooldridge, (2009) *Introductory econometrics: a modern approach*, 4th edition.

- Galiani, S., Gertler, P., & Schargrodsky, E. (2005). Water for life: The impact of the privatization of water services on child mortality. *Journal of political economy*, 113(1), 83-120.
- Powell-Jackson, T., Mazumdar, S., & Mills, A. (2015). Financial incentives in health: New evidence from India's Janani Suraksha Yojana. *Journal of health economics*, 43, 154-169.

**Assessment:** Project (100%, 3500 words) in the LT.  
100% One Research project (data analysis with STATA and write-up of 3,500 words)

## HP428 Half Unit

### Randomised evaluations of health programmes: from design to implementation

**This information is for the 2022/23 session.**

**Teacher responsible:** Mr Ilias Ioannis Kyriopoulos

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. Places are allocated first to students in the Department of Health Policy and then on a first come first served basis.

**Course content:** Randomized trials have long been used in the clinical world to test the efficacy of medical treatments. Increasingly, social scientists have used the same approach, randomly assigning groups to different interventions, in order to determine which policies are most likely to address the key behavioural problems faced by health systems, from inadequate provider performance to low adherence to treatment or risky health behaviours.

This course proposes a hands-on and intuitive approach to designing and conducting a randomised evaluation of a behavioural health programme. The aim of the course is to provide students with the skills required to design and implement

a successful randomised evaluation. By the end of the course, students should be able to:

- Explain the reasons for undertaking randomised evaluations;
- Design and plan a randomised experiment to ensure it answers relevant questions, informed by a conceptual framework;
- Understand the technical aspects of the randomised evaluation, including be able to perform and understand simple sample size calculation;
- Explore potential threats to randomisation, and implement strategies to mitigate them;
- Determine how to best measure the outcomes of interest, including reflecting on the accuracy of survey instruments;
- Understand the best practices in how to conduct and manage fieldwork, and follow ethical principles to conducting research.
- Understand the best practices to analyse data from different types of randomised evaluations.

Seminars will be designed to encourage students to critically engage with the topics and apply the technical skills taught in lectures. Each seminar will be closely aligned with the lecture content to give students the opportunity to apply the new knowledge. Case studies will be chosen from various cultural backgrounds, to allow the presentation of a diverse range of settings and issues. Throughout the courses, but more extensively in the second half of the term, seminars will be dedicated to discussing issues and problems raised in lectures in relation to the project chosen by students in their group for the research protocol.

**Teaching:** This course will be delivered through a combination of lectures and seminars totalling a minimum of 20 hours during Lent Term. Seminars will take place in small groups and consist of a mix of case studies and discussions/presentations of the students' own work. Ahead of the seminars students will work in small groups on structured learning activities set by the course lead. Each seminar will also be a forum for discussing, presenting and receiving feedback on students' research protocols.

There will be a departmental reading week in week 6 of term.

**Formative coursework:** A draft protocol. Students will be asked to submit a short 1,500 word draft protocol by week 5. While some aspects of their work may still be work in progress (e.g. using bullet points), students will be expected to write up the start of their protocol in a detailed way. Detailed feedback will be given to each student.

**Indicative reading:** The main textbook that will be used throughout the course is:

- Glennerster, R., & Takavarasha, K. (2013). *Running Randomized Evaluations: a Practical Guide*. Princeton University Press.

Other useful resources include:

- Gerber, A. S., & Green, D. P. (2012). *Field Experiments: Design, Analysis and Interpretation*. New York, NY: Norton.
- Duflo, Esther, et al. (2006) *Using Randomization in Development Economics Research: A Toolkit*.
- White, Howard (2009) 'Theory-based impact evaluation: principles and practice', *Journal of Development Effectiveness* 1(3)
- Drost, E.A. (2011) *Validity and Reliability in Social Science Research*. *Education Research and Perspectives*, 38, 105- 123
- Olken, B. A. (2015). "Promises and Perils of Pre-analysis Plans." *Journal of Economic Perspectives* 29(3): 61--80.
- Rachel Glennerster and Shawn Powers *Balancing Risk and Benefit: Ethical Tradeoffs in Running Randomized Evaluations*
- Dupas, P., & Miguel, E. (2017). *Impacts and Determinants of Health Levels in Low-Income Countries*. In E. Duflo & A. Banerjee (Eds.), *Handbook of Field Experiments*: North Holland.

Other general interest books that discuss randomised evaluations (applications, challenges) include:

- Halpern, D. (2016). *Inside the Nudge Unit*. London, Penguin Press.
- Leigh, A. (2018). *Randomistas: How Radical Researchers Are Changing Our World*, Yale University Press.

**Assessment:** Research proposal (100%) in the LT.

The objective of the research protocol (4,000 words max) will be to plan the randomised evaluation of a particular health programme. Students will be asked to choose an intervention to address a particular behavioural problem from a proposed list (e.g. increasing health insurance uptake, improving doctor performance or quality

of care; reducing risky health behaviours; increasing patient adherence to treatment etc.). Students will also be given the option to choose their own topic (pending agreement by their seminar leader).

---

## HP429 Half Unit

### Behavioural Incentive Design in Health and Health Care

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Joan Costa-Font COW 1.06

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

Access to the course will be given in priority to students from the Department of Health Policy.

**Course content:** The course covers the role of social and monetary incentives in modifying related health behaviour, and especially prevention and health care use. It will primarily draw on theoretical frameworks from several social sciences including applied microeconomics and behavioural economics, psychology, and sociology to provide an integrated framework about how to think about incentives in health and health care. The course will extend health economics teaching to cover quasi-rational behaviour and behavioural economics issues, and it will primarily focus on non-experimental evidence, although it will sometimes draw from policy and quasi-experiments. Its main purpose will be to discuss key theoretical and empirical background to guide the design of health and health care policies.

The course will focus on the following issues: Quasi-rational actor and motivation. Risk-benefit decision-making framework. Monetary and non monetary incentives. Esteem, Stigma. Obesity and payments. Monetary Incentives, co-payment design, Social Incentives. Reference Points. Risk preferences and perceptions. Locus of Control and Health and Health Care Behaviour. Anchoring and social cues. Taxes and Health: the role of Sin Taxes. Subsidies and Health: the role of conditional cash transfers. Myopia and Insurance Purchase: the case of long-term care insurance. Defaults and Presumed Consent. Motivation Crowding-Out and organ Donation. Information provision: risk information campaigns on food labelling, GM food. Stigma and Esteem: Smoking, Obesity. Cultural economics of health and health care: the role of traditional medicines. Body Self-Identity and Anorexia. Sleep and working time trade-off. Media, narratives and health-related behaviour. Culture, social norms: use of traditional medicine. Identity and blood donation, Food disorders. Health Inequality Aversion and Attitudes to Health Care. Behavioural incentives private and public health insurance design.

**Teaching:** This course will be delivered through a combination of lectures, seminars and workshops totalling a minimum 25 hours during Lent Term. Students will take part in seminars presenting key readings and leading discussion. Students will work in small groups in workshops to develop skills in specific health policy problems and prepare their project to be presented to the entire class and submitted as a course assessment.

**Formative coursework:** Students will submit slides of a presentation based on their group project and complete in-class quizzes

**Indicative reading:** Hanoch, Y. A. Barnes and T Rice (2017) Behavioral Economics and Healthy Behaviors: Key Concepts and Current Research. Routledge.

**Assessment:** Essay (100%, 3000 words) in the ST. The assessment will be an individual essay based on group project work.

---

## HP431 Half Unit

### Dissertation in Health Policy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Pepita Barlow, Dr Mylene Lagarde, Dr Olivier Wouters, Dr Ranjeeta Thomas and Prof Joan Costa-Font

**Availability:** This course is compulsory on the MSc in Global Health Policy, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is not available as an outside option.

**Course content:** The dissertation could be on any topic relevant to topics studied in the student MSc. It should attempt to integrate approaches and knowledge learned across courses and present results to address a health policy issue or a problem identified through the use of either primary or secondary data. It must demonstrate adequate knowledge of relevant theoretical and empirical literature in the field. In addition, careful analysis of the policy implications and formulation of policy recommendations is essential. The main body of the dissertation should, in principle, include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

**Teaching:** 6 hours of workshops.

These will be complemented by sessions of individual supervision. The course comprising a total of 3 2-hour lectures that will focus on issues pertaining to the dissertation (topic selection, structure, methods, result reporting, ethics approval), as well as general guidance on potential methodological approaches. The course will serve as a means to assist students with the preparation and finalisation of their dissertation proposals. In this context, students will also receive feedback and assistance from their supervisors, with whom they will need to meet separately.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT and ST.

**Indicative reading:** Dunleavy, P. (1986) Studying for a Degree in the Social Sciences, Macmillan.

(See Chapter 5: Writing a Dissertation).

Denscombe, M. (2007) The Good Research Guide: for small-scale social research projects.

Maidenhead: Open University Press. H61 D41.

## HP432 Half Unit

### Mental health policy

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Martin Knapp

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

The proposed course should appeal to students interested in the challenges of, and policy responses to mental illness across a wide range of societies and economies.

Priority will be given to students from the Health Policy Department.

**Pre-requisites:** Students are required to have some knowledge of health systems or mental health issues.

**Course content:** The aim of this course is to consider how public policy can be shaped to address the many personal, social and economic challenges posed by mental illnesses, across the full life-course (indeed, some mental illnesses start earlier, with origins in the womb). Mental health will be considered in a range of contexts: high-, medium- and low-income settings. An important emphasis will be on the global nature of the challenges, and the need to find responses that have relevance across different societies.

The strong associations with disadvantage will also be a core theme running through the course, linked to social and other determinants of (mental) health. Other key areas of policy-making will be covered, including how decision-making balances the roles of different stakeholders, particularly individuals with lived experience of mental illness, families and communities. We will look at whether and how policy decisions are based on considerations of (and evidence about) the effectiveness, cost-effectiveness and viability of treatments, and the social impact of prevention and interventions in different cultural contexts and at different life-stages.

Students will discuss issues and strategies on how public policy – not just in the health sector but more widely – can play crucial roles in prevention (or at least risk-reduction), access to and funding of treatments, recovery and re-integration, social and economic inclusion, and so on. Some of the material in the course will be based on research recently or currently undertaken at LSE. Course outline (by week)

1. What is mental illness?
2. Responses? What are the societal and policy responses to mental illness?
3. Stigma and discrimination
4. Perinatal mental health
5. Child and adolescent mental wellbeing
6. User / survivor movements
7. Adult mental health
8. Old age mental health
9. Global mental health, poverty and socio-economic disadvantage
10. Enduring lessons for mental health policy

**Teaching:** The course will be delivered in no less than 22 hours and consists of lectures and seminars.

**Formative coursework:** Students will be expected to produce 1 essay in the LT (of up to 1500 words) during the course, which could be linked to the topic of their group-based project.

## HP433 Half Unit Health care regulation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Rocco Friebe COW 2.09

**Availability:** This course is compulsory on the MSc in International Health Policy. This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** Health care systems are complex organisational structures governed by an ambition to provide high-quality health care services to its population. In this context, governance describes a framework through which individual stakeholders are being held accountable to improving the quality of services and safe-guarding high standards of care. In turn, this framework ensures a consistent evaluation and regulation of care processes and is crucial for the efficient functioning of health care systems around the world.

This course provides a detailed perspective on the complexities surrounding the interplay between different stakeholders in the regulation of health care markets and the problems facing the management of health care services. The course builds on theoretical concepts and on principles of sound economic analysis and exposes students to learning from regulatory experiences beyond the health sector, including from data sciences, and medical research environments.

Following completion of this course, students will have an advanced understanding of the theoretical underpinnings of regulation and governance and they will be familiar with key topics of current concern, including the problems associated with health care management, planning, purchasing and commissioning, and quality of care. Knowledge drawn from this course will equip students with the necessary skills required to understand the complexities of health care regulation and governance and to critically assess policy decisions in their respective health systems.

**Teaching:** This course will be taught in no less than 25 hours and will consist of lectures and seminars

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

1 X 1000 word essay. Students will be able to submit a short 1000 word essay (on any topic of their choice, but taken from the list of debates covered in the seminars). Students are expected to submit their formative assignment within one week of participating in the seminar debate that is linked to the topic of their choice. Therefore, submission of formative essays will be in waves, and not all at once. These will be graded and feedback given to students. This allows students to get valuable experience of writing at MSc level, and the expectations of the summative assessment. For example, if a student's formative work flagged particular concerns this could be addressed ahead of the summative submission.

## HP434 Half Unit

### Methods and Data for Health Systems Performance Assessment

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Andrew Street

**Availability:** This course is compulsory on the MSc in Health Data Science. This course is available as an outside option to students on other programmes where regulations permit.

Students will not be permitted to take both HP402 *Measuring Health Systems and Methods and Data for Health Systems Performance Assessment* courses.

**Course content:** This course aims to present a framework to discuss the opportunities and challenges with performance measurement in health care, examine the various dimensions and levels of health system performance, identify and apply the measurement instruments and analytic tools needed, and examine the implications of these issues for policy makers and regulators. Lectures generally focus on measuring health system performance in high-income countries but draw on the experience of other countries where relevant.

After taking this course student will be able to:

1. understand the complexity of different health systems
2. appreciate the challenges, approached and opportunities in performance measurement in four dimensions; population health, patient outcomes, equity, quality and appropriateness of care, and productivity
3. be familiar with the construction of key indicators used by health systems and providers to measure population health, patient outcomes, equity, quality of care and productivity
4. apply different methodologies used for risk adjustment, to develop composite measures, and to measure attribution and causality
5. identify key issues relevant to policy makers relating to policy evaluation using measures of performance

**Teaching:** Teaching will be delivered in no less than 29 hours and includes lectures, seminars and workshops

**Formative coursework:** Students will be expected to produce 1 project in the LT.

1x 1500 word group research project. Student will be able to submit a short 1500-word individual report based on analysis conducted in class during one of the seminars and in collaboration with other students. This will be graded and feedback given to students to inform their summative submission. This allows students to learn from their peers and work on data analysis in a group.

**Indicative reading:**

- OECD, *Measuring up: improving health system performance in OECD countries*. Paris: OECD, 2002. World Health Organization (WHO), (2000)
- The world health report 2000: *Health systems: Improving performance*, Geneva: WHO Publications

**Assessment:** Project (100%, 3500 words) in the ST.

Students will be asked to pick one research project among two.

The project will involve data analysis using specialist software used in class seminars.

---

## HP435 Half Unit

### Global Access to Medicines

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Olivier Wouters COW 2.06

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students from the Department of Health Policy in the first instance.

**Course content:** An estimated 1 in 4 people worldwide lack access to essential medicines, with prescription drugs often unaffordable or unavailable. The United Nations' Sustainable Development Goals call for member states to guarantee "access to safe, effective, quality and affordable essential medicines and vaccines for all" by 2030. Yet precisely how this will be achieved remains highly contested among global health stakeholders.

This course asks students to explore the complex and contentious world of drug development and regulation across the globe. It will touch on topics such as incentives for research and development in the drug industry, intellectual property rights and medicines, and pricing and financing of essential medicines. The course lies at the intersection of health and public policy, economics, public health, and development studies.

The lectures and seminars will draw on real-world case studies to explore key policy and economic issues affecting pharmaceutical markets in a range of countries, with an emphasis on the affordability, availability, and accessibility of medicines and vaccines. The course will investigate these issues from the perspectives of different stakeholders, including health ministries and other government bodies, drug companies, non-governmental organizations, physicians, pharmacists, and patients.

By the end of this course, students should be able to:

- 1 Describe key features of pharmaceutical markets.
- 2 Identify policy and economic issues affecting access to

medicines globally.

3 Assess national drug policies using an access to medicines framework.

4 Compare and contrast pharmaceutical policies regionally or internationally.

5 Evaluate pharmaceutical policy options given a set of aims and assumptions.

6 Critically appraise the quality of theoretical and empirical studies of pharmaceutical policies.

**Teaching:** This course will be taught in no less than 25 hours and will consist of lectures and seminars

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:**

**Assessment:** Essay (100%, 4000 words) in the LT.

## HP436 Half Unit

### Evidence Appraisal for Health Policy Analysis

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Pepita Barlow COW 2.05

**Availability:** This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students in the Department of Health Policy.

**Course content:** This course aims to introduce students to different ways in which evidence is generated and can be used to inform health policy. Taking a case-based approach, students will be introduced to a selection of key health issues and approaches to intervention in order to appreciate how different types of quantitative and qualitative evidence can inform analyses of complex policy problems. Students will also learn to interpret and critique health policy research and formulate policy-relevant conclusions from study results. Examples will be drawn from low-, middle-, and high-income countries, and will focus on forms of evidence and interventions that regularly feature in health policy analysis. Students will also be encouraged to draw on examples from their own countries and to relate the course content to their professional experience. Students will gain practical skills and learn to apply the concepts covered during the course to develop an evidence-informed policy brief.

Following the completion of this course, students will have an advanced understanding of the role of research in policy analysis and the role of theory in health policy research. Students will also be able to interpret the results of research concerning

contemporary health issues and interventions, formulate policy conclusions, and develop an evidence-informed policy brief. Furthermore, students will be able to critically discuss evidentiary hierarchies in health policy and describe the respective roles of different approaches to evidence generation and their use in informing specific health policy questions.

**Teaching:** The course will be delivered in no less than 28 hours during Michaelmas Term, and consist of lectures and seminars

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the MT.

• 1 x 1,500 word policy brief

**Indicative reading:**

- Craig, P., Dieppe, P., Macintyre, S., Michie, S., Nazareth, I. and Petticrew, M., 2008. Developing and evaluating complex interventions: the new Medical Research Council guidance. *BMJ*, 337, a1655.
- World Health Organization, 2012. Health policy and systems research: a methodology reader. Geneva: World Health Organization.

**Assessment:** Policy brief (100%) in the LT.

**Additional information:**

## HY400

### Crisis Decision-Making in War and Peace 1914-2003

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Svetozar Rajak SAR 3.15

**Availability:** This course is compulsory on the MSc in International Affairs (LSE and Peking University). This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in History of International Relations, MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** The course is intended for students with or without a detailed knowledge of the international relations of the twentieth century. Students without a detailed knowledge are advised to undertake preliminary background reading.

**Course content:** The history of international relations from the First World War to the Iraq War. Particular stress is placed upon key turning points and on crisis decision-making. Topics examined in this course include German decision-making in 1914; peacemaking, 1919; the Ruhr occupation crisis; Manchuria, Abyssinia and the crises of collective security; the Munich agreement; the Nazi-Soviet Pact and the outbreak of war in 1939; Hitler's decision to invade the Soviet Union; the outbreak of the Pacific War; the creation of the state of Israel, 1948-49; the Berlin Blockade; the outbreak and escalation of the Korean War; the Suez Crisis; the Cuban Missile Crisis; the US and Vietnam, 1961-65; the Arab-Israeli Wars of 1967 and 1973; German reunification and the collapse of the Soviet bloc; the origins of the Gulf War, 1990-91; the road to the 2003 Iraq War.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There is a reading week in week 6 of the MT and the LT. Students will be expected to read widely in documentary and other primary sources, and to participate actively in the seminars, which will address the historiographical debates raised in the secondary literature on the topics covered.

This course has no designated lectures; it is taught through two-hour seminars.

Students wishing for a survey of the period and topics covered by the course are welcome to attend or listen to the lectures for the undergraduate course HY116 International Politics since 1914.

**Formative coursework:** Students will write three essays, each of up to 3,000 words in length, drawing upon primary sources.

**Indicative reading:** Full bibliographies are provided on the HY400 Moodle. Students may consult the following introductory accounts: W. R. Keylor, *The Twentieth-Century World and Beyond: an International History*; A. Best, J. M. Hanhimäki, J. A. Maiolo, and K. E. Schulze, *International History of the Twentieth Century and Beyond*; S. Marks, *The Ebbing of European Ascendancy: an International History of the World, 1914-1945*; Z. Steiner, *The Lights that Failed: European International History, 1919-1933*; Z. Steiner, *The Triumph of the Dark: European International History, 1919-1939*; R.W. Boyce and J. A. Maiolo (eds.), *The Origins of World War Two: The Debate Continues*; O. A. Westad, *Reviewing the Cold War: Approaches, Interpretation, Theory*; D. J. Reynolds, *One World Divisible: a Global History since 1945*; M. P. Leffler and O. A. Westad, eds, *The Cambridge History of the Cold War*.

**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.

---

## HY411

### European Integration in the Twentieth Century

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Nicholas Ludlow SAR 2.16

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Comparative Politics, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A prior knowledge of 20th century European history will be an advantage. Students unfamiliar with the subject should do some preliminary reading. A reading knowledge of French and/or German will be useful but in no sense essential.

**Course content:** The antecedents and development of Western European integration from the First World War to the 1990s. European integration before 1914; German and Allied projects during the First World War; inter-war developments and the Briand Plan; the Nazi New 'Order'; Resistance and Allied planning during the Second World War; the impact of the Marshall Plan; Federalism and Christian Democracy; the Schuman Plan and the Coal and Steel Community; the European Defence Community project; the Treaties of Rome; the Common Agricultural Policy; the integration policies of the Six and Britain; de Gaulle and the Communities; enlargement; monetary integration; developments in the 1970s and 1980s; Treaty of Maastricht.

**Teaching:** 7 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 3 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST. There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

**Formative coursework:** Three essays will be required in the course of the year. The essay in the LT will be an assessed piece of work counting towards the final assessment.

**Indicative reading:** Full bibliographies are provided. As introductory reading, students should consult: P M Stirk, *A History of European Integration since 1914* (London, 1996); D. Dinan, ed, *Origins and Evolution of the European Union* (Oxford, 2006); M. Gilbert, *European Integration: a Concise History* (Lanham, Md, 2012); J Gillingham, *Coal, Steel, and the Rebirth of Europe, 1945-55* (Cambridge, 1991); A S Milward, *The Reconstruction of Western Europe, 1945-51* (London, 1984); A S Milward, *The European Rescue of the Nation State* (London, 1992); N P Ludlow, *Dealing with Britain: the Six and the First UK Application to the EEC* (Cambridge, 1997); W I Hitchcock, *France Restored: Cold War Diplomacy and the Quest for Leadership in Europe, 1944-1954*

(Chapel Hill, 1998); A Moravcsik, *The Choice for Europe: Social Purpose and State Power from Messina to Maastricht* (Cornell, 1998); N P Ludlow, *The European Community and the Crises of the 1960s* (London, 2006); W. Kaiser, *Christian Democracy and the Origins of the European Union* (London, 2008); W. Kaiser, B. Leucht and M. Rasmussen, . *The History of the European Union: Origins of a Trans- and Supranational Polity 1950-72* (London, 2009); A C Knudsen, *Farmers on Welfare: The Making of Europe's Common Agricultural Policy* (Cornell, 2009).

**Assessment:** Exam (75%, duration: 3 hours) in the summer exam period.  
Essay (25%) in the LT.

---

## HY422

### Presidents, Public Opinion, and Foreign Policy, from Roosevelt to Reagan, 1933-89

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Steven Casey SAR 2.10

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Using a range of secondary sources, the course explores the dynamic interaction between presidents, public opinion, and foreign policymaking in order to test a range of common assumptions about the determinants of American foreign policy in the period from 1933 to 1989. The course explores the interaction between opinion and policy in three periods: First, the Roosevelt era, with emphasis on FDR's response to American isolationism, the media and public attitudes towards Nazi Germany and the Second World War, and the influence of public pressures upon US policy. Second, the period of consensus on the Cold War, examining how Americans viewed the Communist world before, during and after the Korean War, the influence of the atomic bomb upon popular thinking, the limits of dissent in the period of McCarthyism, and the impact of public opinion upon policy-making during the Berlin and Cuban crises. Third, the period when the Cold War consensus broke down, focusing not just on the opposition to the Vietnam war and the new cleavages that emerged within US society but also on the changing nature of the American media and the very different attempts made by Nixon, Carter and Reagan to respond to this new environment.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST. There will be a reading week in the Michaelmas and the Lent terms.

**Formative coursework:** Students are required to produce two 3,000 word essays during the year. There will also be a mock exam (a one-hour timed essay).

**Indicative reading:** A full bibliography accompanies the course and the teacher will advise on reading. M Small, *Democracy and Diplomacy* (1996); S Casey, *When Soldiers Fall* (2014); S Casey, *Cautious Crusade* (2001); S Casey, *Selling the Korean War* (2008); D Foyle, *Counting the Public In* (1999); R Sobel, *The Impact of Public Opinion on US Foreign Policy since Vietnam* (2001) O R Holsti, *Public Opinion and American Foreign Policy* (1996).

**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.

---

**HY424 Not available in 2022/23****The Napoleonic Empire: The Making of Modern Europe****This information is for the 2022/23 session.****Teacher responsible:** Dr Paul Keenan SAR.2.13**Availability:** This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International and Asian History and MSc in International and World History (LSE & Columbia). This course is available as an outside option to students on other programmes where regulations permit.**Course content:** The Napoleonic Empire was crucial in the formation of modern Europe. Much of Europe was dominated by the Napoleonic Empire and its impact was felt across the continent and in parts of the non-European world. Through an analysis of both those areas directly incorporated into the Napoleonic empire and of those that lay beyond it, this course will examine the extent of the direct and indirect influence of this era on the development of what we understand by a modern European society and a modern state system. The course analyses how this empire was created, as well as the states and societies that it forged. The varied and sometimes contradictory elements of this era will be analysed - from the impact of the growth of secularisation, constitutionalism and the codification of laws to the beginnings of Romanticism, manifestations of early nationalism and monarchical reaction after 1815. The course will also assess the significance of both the reality and the 'myth' of empire, in the assessment of contemporary observers and also in the later nineteenth and twentieth centuries. The course will cover the following topics: the origins of the Empire; changes in armies and warfare; analysis of the changing nature of the Napoleonic Empire from the core to the periphery; the impact of the Empire on countries that remained beyond it; Europe's relationship with the non-European world during this period; the diplomacy of war and the 'system' that emerged after 1815; the impact of the Napoleonic era on the modernisation of society, the economy, law and the state; early manifestations of nationalism in the Italian and German lands, Spain and Russia; reaction against the Napoleonic 'system' after 1815. The course will also assess the significance of both the reality and the 'myth' of Napoleon and his empire, for contemporary commentators and also in the later nineteenth and twentieth centuries.**Teaching:** Learning engagement activities will include preparatory small group work, presentations, and live discussion. There will be a reading week in the MT and the LT.**Formative coursework:** Students will be expected to produce 1 essay in the MT, 1 essay in the LT and 1 essay in the ST. The third essay will be a mock exam answer, which can be completed by students over the Easter break. It will be graded and students given written feedback in the first week of Summer Term.**Indicative reading:** A detailed Reading List will be issued at the beginning of the course.Useful introductory works include: G. Ellis, *Napoleon*; G. Ellis, *The Napoleonic Empire*; M. Broers, *Europe under Napoleon 1799-1815*; S. J. Woolf, *Napoleon's Integration of Europe*; P. Dwyer (ed), *Napoleon and Europe*; C. Esdaile, *Napoleon's Wars: An International History*; O. Connelly, *Napoleon's Satellite Kingdoms*; P. Geyl, *Napoleon, For and Against*.**Assessment:** Essay (35%, 3500 words) in the LT. Presentation (15%) in the MT and LT.

Take-home assessment (50%) in the ST.

International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE &amp; Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course analyses the changing nature of the Anglo-American "special" relationship from its creation against the backdrop of the Second World War in Europe through to the end of the Cold War. It will illuminate the foundations of the relationship in terms of culture and ideology, and also the threat posed by common enemies in the Second World War and Cold War. The competitive dimension of the Anglo-American relationship will also be highlighted as a means of explaining instances of discord such as the Suez Crisis of 1956.

The topics covered include: Anglo-American relations in historical perspective; the creation of the Anglo-American alliance, 1939-41; competitive co-operation in war strategy and politics, 1941-45; the American "Occupation" of Britain during the Second World War; the emergence of the Cold War in Europe, 1945-49; the Cold War in Asia, 1945-54; the Palestine question; the Suez Crisis, 1956; nuclear relations and the Skybolt Crisis; Kennedy, Macmillan and the Cuban Missile Crisis; Anglo-American relations and European integration, decolonisation and Anglo-American relations since 1945; the impact of the Vietnam War; the Cultural Cold War; intelligence co-operation; Anglo-American relations in the 1970s; Thatcher, Reagan and the Cold War in the 1980s; the Falklands War; the significance of personal relations at the top; retrospect and prospects for Anglo-American relations.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

**Formative coursework:** Three pieces of written work must be submitted by students taking this course. These consist of two essays of up to 3,000 words in length and one timed class essay.**Indicative reading:** For an introduction to Anglo-American relations, students should consult the following texts: K. Burk, *Old World, New World: the Story of Britain and America* (2007); D Reynolds & D Dimbleby, *An Ocean Apart: the Relationship between Britain and America in the Twentieth Century* (1988); J Dumbrell, 'A Special Relationship': *Anglo-American Relations from the Cold War to Iraq* (2006); C Bartlett, *The Special Relationship: A Political History of Anglo-American Relations Since 1945* (1992); W R Louis & H Bull (Eds), *The Special Relationship: Anglo-American Relations since 1945* (1984); D C Watt, *Succeeding John Bull: America in Britain's Place, 1900-75* (1984). A detailed reading list will be issued at the start of the course.**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.**HY432****From Cold Warriors to Peacemakers: the End of the Cold War Era, 1979-1999****This information is for the 2022/23 session.****Teacher responsible:** Professor Kristina Spohr, SAR 2.17**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.**Course content:** International relations from the early 1980s to the**HY429****Anglo-American Relations from World War to Cold War, 1939-91****This information is for the 2022/23 session.****Teacher responsible:** Prof Nigel Ashton SAR M.07**Availability:** This course is available on the MA in Asian and

late 1990s examining tensions, rivalries and linkages not merely between the Western and Communist blocs, but also within them, as well as studying the events reflecting the shift from the era of bipolarity to the post-Cold War world. The aim is to address from a historical perspective the diplomacy of the end of the East-West conflict, China's exit from the Cold War, German reunification, Soviet disintegration, Yugoslavia's bloody implosion, European integration, and NATO enlargement. The domestic bases of as well as the political relations between the leading figures (Gorbachev, Yeltsin, Reagan, Bush, Deng, Thatcher, Major, Mitterrand, Delors and Kohl) and respective government machineries will be covered. Major topics include Thatcherism; Reaganomics; Gorbachev's new thinking; the reunification of Germany; the collapse of the Soviet Union and its wider empire; the Kuwait crisis and Yugoslavian Wars; America's unipolar moment; from the EC to the EU; the security arrangements of Russia and NATO after 1991.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 20 hours of seminars in the ST.

There will be a reading week in the MT and the LT.

**Formative coursework:** Students will be required to present one short class paper during the MT or the LT as well as to submit a practice essay (1,500 words) during the MT.

**Indicative reading:** A detailed course outline and reading list, subdivided by weekly topics, as well as selected documents will be available at the beginning of the course on Moodle. Key books include:

- Kristina Spohr, *Post Wall, Post Square* (2019);
- Philip Zelikow & Condoleezza Rice, *To Build a Better World* (2019);
- Hal Brands, *The Unipolar Moment* (2016);
- Vladislav Zubok, *Collapse* (2021);
- Kristina Spohr and David Reynolds, eds, *Transcending the Cold War* (2016)
- Margaret Thatcher, *The Downing Street Years* (1993);
- EHH Green, *Thatcher* (2006);
- Julius W Friend, *The Long Presidency, France in the Mitterrand Years* (1998);
- George Bush & Brent Scowcroft, *A World Transformed* (1999);
- William Taubman, *Gorbachev* (2018);
- Misha Glenny, *The Balkans 1804-1999* (2012);
- Saki Dockrill, *The End of the Cold War Era* (2005);
- Kenneth Dyson and Kevin Featherstone, *The Road to Maastricht* (1999);
- Sean Kay, *NATO and the Future of European Security* (1998);
- Daniel S. Hamilton and Kristina Spohr, eds, *Open Door: NATO and Euro-Atlantic Security After the Cold War* (2019).

**Assessment:** Essay (40%, 3000 words) in the LT.

Essay (60%, 3500 words) in the ST.

## HY434

### The Rise and Fall of Communism in Europe 1917-1990

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Anita Prazmowska SAR.M.09

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course will examine the rise, survival and collapse of the Soviet Communist ideology and Communist regimes based in Russia and Eastern Europe during the period 1917-1990. The course will also deal with the struggle for Communist influence in Western Europe during the same period. The course will start with the study of the Russian revolution and

the civil war to the establishment of the Stalinist regime in the Soviet Union. This will be followed by the study of the history of Soviet involvement in the Second World War and the extension of Soviet influence into Eastern Europe after the Second World War. An examination of the installation of Soviet style regimes in that region will be followed by the analysis of Soviet post-war objectives and Soviet objectives towards Germany. The death of Stalin and the Soviet responses to the Polish and Hungarian events in 1956 is linked to the study of Khrushchev and the Brezhnev eras. Additionally the course analyses the extension of Communist influence into Western Europe through the Comintern and the Cominform. The role of the Communist parties in French and Italian political life will be analysed. The course concludes with a consideration of détente, the Gorbachev period, and the collapse by the end of 1990 of the Soviet Union and other Communist regimes in Europe.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

**Formative coursework:** Students will be required to write one 3000 word essay in the MT.

**Indicative reading:** A full bibliography will be provided at the beginning of the academic year. For an introduction, the following may be of assistance:

- F Claudin, *The Communist Movement from Comintern to Cominform*;
- R C Tucker (Ed), *Stalinism: Essays in Historical Interpretation*;
- C Kennedy-Pipe, *Russia and the World, 1917-1990*;
- P Kenz, *A History of the Soviet Union from the Beginning to the End*;
- C Read, *The Making and Breaking of the Soviet System*;
- V Mastny, *Russia's Road to the Cold War. Diplomacy, Warfare and the Politics of Communism 1941-1945*;
- F A Fejtó, *A History of the People's Democracies: Eastern Europe since Stalin*;
- A Heller & F Feher, *From Yalta to Glasnost. The Dismantling of Stalin's Empire*;
- G Stokes, *The Walls Came Tumbling Down*;
- Ronald Grigor Suny, *The Soviet Experiment*;
- Raymond Pearson, *The Rise and Fall of Soviet Europe*;
- Archie Brown, *The rise and fall of Communism*

**Assessment:** Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 3000 words) in the LT.

## HY435

### Political Islam: From Ibn Taymiyya to ISIS

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Kirsten E. Schulze SAR 2.12

**Availability:** This course is available on the MA in Modern History, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia), MSc in Social Anthropology (Religion in the Contemporary World) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course has five objectives: i. To examine the evolution of political Islam as a set of ideas. ii. To compare and contrast different models of Islamic State. iii. To explore the strategies used by Islamist movements to Islamise a state as well as state strategies to prevent this. iv. To explore the phenomena of transnational Islamism and international jihadism. v. To familiarise the student with some of the primary sources (in translation) and the historiographical controversies. This course looks at the evolution of Islamist philosophy and movements, focusing on ideas as well as intellectual, religious and political leaders. The key areas covered are: Islamist thinkers - Ibn Taymiyya, Wahab, Rida,

al-Banna, Qutb, Maududi, Khomeini, Faraj, Azzam and Zawaheri; Models of Islamic State - Iran, Pakistan, Afghanistan, and Malaysia; Islamist Movements – the Muslim Brotherhood, Islamic Jihad, Hizb'allah, Hamas, the Islamic Salvation Front, and Boko Haram; transnational Islam and international jihadism: Al-Qaeda, Jamaah Islamiyah, and ISIS.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT.

There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

**Formative coursework:** One formative essay (3,500 words) in Michaelmas Term.

**Assessment:** Essay (35%, 3500 words) in the LT.

Essay (35%, 3500 words) in the ST.

Presentation (15%) and class participation (15%) in the MT and LT.

## HY436 Not available in 2022/23

### Race, Violence and Colonial Rule in Africa

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Joanna Lewis SAR G.02

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Conflict Studies, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course examines and debates the nature of colonial rule in Africa, its impact and its legacy. It is focused upon the violence inherent in this encounter, its different forms and origins. Fundamentally It seeks to provide an explanation of the conflicts which erupted in Africa after 1989 by developing a historical perspective from the pre-colonial period to the end of the Cold War. It is essentially a political history but includes cultural, social and economic aspects. It often uses case studies from the British Empire in Africa and the Belgian Empire but 'other empires are available' as the saying goes. Topics covered include pre-colonial African kingdoms, the 'Scramble for Africa'; white settler culture and the colonial state; the origins of apartheid South Africa; the Mau Mau uprising in Kenya; the Congo crisis and the assassination of Patrice Lumumba; the rise and fall of 'white' Rhodesia; the genocide in Rwanda; the civil war in Sierra Leone; Mugabe and Zimbabwe; Somali warlordism and the 'collapsed state'. And last but by no means least Africa's so called first World War in the DRC. Histories of survival, trauma and healing are often present.

**Teaching:** The School aims to run in-person seminars, subject to circumstances, with some online provision if and where necessary. There will be a reading week in the Michaelmas and the Lent Terms.

**Formative coursework:** Each student is required to write one formative essay of 4000 words in the Michaelmas Term.

**Indicative reading:** John Iliffe, *Africans: The History of a Continent* (CUP, 2017 edn); Cheikh Anta Diop, *Precolonial. Black Africa: A Comparative Study of the Political and Social Systems of Europe and Black Africa, from Antiquity to the Formation of Modern States* (1988); E Akyeampong et al, *Africa's Development in Historical Perspective* (CUP, 2014); Mary Kingsley, *Travels in West Africa* (Penguin Classic, 2015); Petina Gappah, *Out of the Darkness, Shining Light* (2020); Thomas Pakenham, *The Scramble for Africa* (Abacus, 1992); Sylviane A. Diouf, *Dreams of Africa in Alabama: The Slave Ship Clotilda and the Story of the Last Africans Brought to America* (OUP, 2009); B.P Bower & A Charles-Nicholas, *The Psychological Legacy of Slavery: Essays on Trauma, Healing and the Living Past*, (McFarland, North Carolina, 2021); Adam Hirsch, *King Leopold's Ghost* (Pan Books, 2012 edn); F Furedi, *The Silent War: Imperialism and the Changing Perception of Race* (Pluto Press, 1998); M R Dowden, *Africa: Altered States. **Assessment:** Essay (40%, 4000 words) in the LT. Essay (60%, 5000 words) in the ST.

## HY440 Not available in 2022/23

### The Iranian Revolution

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Roham Alvandi SAR M.12

**Availability:** This course is available on the MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit. Please note that students taking this course cannot take GV4E7 Islamic Republic of Iran: Society, Politics, the Greater Middle East (H).

**Course content:** This course examines the origins of the 1978-79 Iranian Revolution in the cultural, diplomatic, intellectual, political, and social history of Pahlavi Iran. The course begins with the emergence of the modern Iran during the Constitutional Revolution in the Qajar era, before turning to the Iranian encounter with decolonisation and the Cold War under the Pahlavi monarchy. We discuss Iran's experience of American modernisation and the crisis of legitimacy that engulfed the last Shah of Iran, Mohammad Reza Pahlavi, following the 1953 coup in Iran. The course locates the origins of the Iranian Revolution in the global contest between the Shah and the Iranian opposition throughout the 1960s and 1970s, as both the state and its opponents contested notions of modernity, Shi'a Islam, universal human rights, and Third Worldism. Students are asked to look in depth at the politics and ideology of the Pahlavi state and the opposition forces arrayed against the Shah, both in a national and global context. A particular emphasis of the course is on the international relations of Pahlavi Iran, particularly Iran's relations with the United States, and the transnational connections between the Iranian opposition and the anti-imperialist movements of the global 1960s and 1970s. The course culminates with the fall of the Pahlavi monarchy in 1979 and the subsequent creation of the Islamic Republic.

**Teaching:** The School aims to run in-person seminars, subject to circumstances, with some online provision if and where necessary. There will be a reading week in the Michaelmas and the Lent Terms.

**Formative coursework:** A 2,000-word essay in the Michaelmas Term.

**Indicative reading:**

- Abrahamian, Ervand, *The Iranian Mojahedin* (New Haven: Yale University Press, 1989).
- Janet Afary and Kevin B. Anderson, *Foucault and the Iranian Revolution: Gender and the Seductions of Islamism* (Chicago: The

University Press of Chicago, 2005).

**Assessment:** Essay (35%, 3500 words) in the LT.

Essay (35%, 3500 words) in the ST.

Presentation (15%) and class participation (15%) in the MT and LT.

## **HY441 Not available in 2022/23** **Islam, State and Conflict in Southeast Asia**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Kirsten Schulze SAR 2.12

**Availability:** This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course looks at Indonesia, Malaysia, and the Philippines from the colonial period to the present day. It focuses on Islam, state and conflict, starting with a broader discussion on the Islamisation of Southeast Asia and the entry of the European colonial powers. This is followed by a closer analysis of the relationship between Islam and the colonial state with seminars on the Dutch East Indies, 'British' Malaya, and the 'Spanish' Philippines. The course then looks at the rise of nationalism and the interplay between Islam and nationalism in the Muslim-majority states of Indonesia and Malaysia as well as the Muslim-minority state of the Philippines. In the second term this course studies the dynamics of Islam, the state, and local society in the Darul Islam rebellions (Indonesia), the Aceh conflict (Indonesia), the Mindanao conflict (the Philippines), the Poso and Ambon conflicts (Indonesia). It also looks at Islam and social conflict in Malaysia as well as the rise of regional and international jihadism with Jemaah Islamiyah and the Southeast Asian affiliates of ISIS.

**Teaching:** 20 two-hour seminars in the Michaelmas and the Lent Terms. This course will be taught online in 2020-21.

**Formative coursework:** One formative essay (3,500 words) in Michaelmas Term.

**Assessment:** Essay (35%, 3500 words) in the LT.

Essay (35%, 3500 words) in the ST.

Presentation (15%) and class participation (15%).

## **HY444 Not available in 2022/23** **The Cold War in Latin America**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Tanya Harmer SAR M.11

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This seminar is designed to introduce students to new historical approaches to the Cold War in Latin America. It responds to new research and debates that have arisen in recent years regarding the meaning of the Cold War in a Latin American context. Students will examine the conflict's origins, who its protagonists were, the extent to which the superpowers were involved in it and its significance at a local, regional, and global level. The course places particular emphasis on the role of ideas and ideological struggles; the intersection between these ideas and the challenges of modernity and economic development; the causes of revolutionary and counter-revolutionary upheaval; the manifestations of violence and its effects; and the cultural Cold War. Students will be encouraged to explore the intra-regional and transnational dynamics of the Cold War in Latin America. They will study how events in one part of Latin America (for example, the overthrow of Jacobo Arbenz in Guatemala, the Cuban Revolution, the Brazilian and Chilean coups or the Central American crises in the 1980s) impacted upon other areas of region. The seminar will also devote time to looking at Latin America's experience of the Cold War from a global comparative perspective, particularly in contrast to other parts of the Third World. Although the seminar will mostly involve intensive reading and discussion of secondary sources, students will also be encouraged to reflect on new online archival material, published writings of principal thinkers and oral histories as a means of understanding key concepts and ideas.

**Teaching:** The School aims to run in-person seminars, subject to circumstances, with some online provision if and where necessary. There will be a reading week in the Michaelmas and Lent terms.

**Formative coursework:** Students are required to write one 3,000 word formative essay in the Michaelmas Term and weekly discussion posts on Moodle.

**Indicative reading:** · Gilbert Joseph and Daniela Spenser (eds.), *In From the Cold: Latin America's New Encounter with the Cold War* (2007);

· Greg Grandin and Gilbert Joseph (eds.), *A Century of Revolution: Insurgent and Counterinsurgent Violence During Latin America's Long Cold War* (2011);

· Renata Keller, *Mexico's Cold War: Cuba, the United States, and the Legacy of the Mexican Revolution* (2015)

· Cindy Forster, *The Time of Freedom: Campesino Workers in Guatemala's October Revolution* (2001)

**Assessment:** Essay (50%, 6000 words) in the ST.

Essay (35%, 3500 words) in the LT.  
Class participation (15%) in the MT and LT.

## HY458

### LSE-Columbia University Double Degree Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** 1. TBC and 2. Professor Constantin Goschler

**Availability:** This course is compulsory on the MSc in International and World History (LSE & Columbia). This course is not available as an outside option.

**Pre-requisites:** During their first year at Columbia University, students will identify a topic for the dissertation and will submit a detailed dissertation proposal form to their LSE supervisor. They will also have undertaken substantial research over the course of the summer, have written a Dissertation Research Report before arriving at LSE and be in a position to talk in a detailed manner with regards to their dissertation. These and the completion of other formal requirements for year one of the Double Degree will be needed before students can proceed to the second year of the programme at LSE.

**Course content:** The individual dissertation will be supervised and assessed at LSE in accordance with the Department's MSc regulations. It will be in the form of a thesis of no more than 15,000 words. The dissertation workshop will complement this by offering sessions on methodological topics, and 7 sessions in which the students will each present updates on their research over the summer (MT) and a 3,000 word extract from their dissertations for group discussion, evaluation and analysis (LT).

**Teaching:** 10 hours of seminars in the MT. 10 hours of seminars in the LT. The School aims to run in-person seminars, subject to circumstances, with some online provision if and where necessary.

**Formative coursework:** Students will be requested to submit a Dissertation Research Report for discussion in the MT. Students are also required to circulate a 3000-word extract of their dissertation for discussion in the LT.

**Indicative reading:** A reading list will be provided at the start of the course but will include the following introductory surveys: Berger, Feldner and Passmore, *Writing History*; D Cannadine (Ed), *What is History now?*; L Jordanova, *History in Practice*; R Evans, *In Defence of History*; J Tosh, *The Pursuit of the Past*; M Bloch, *The Historian's Craft*; R G Collingwood, *The Idea of History*.

**Assessment:** Dissertation (100%, 15000 words) in the ST.

## HY459 Not available in 2022/23

### The Ottoman Empire and its Legacy, 1299-1950

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Marc Baer SAR 3.17

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The Ottoman Empire (1299-1923) was one of the longest lasting and most territorially extensive of all empires in history. Yet today few know about its nature, whether in Turkey or abroad. Who were the Ottomans? How did they run their empire? How did they manage diversity? How did their understanding and practice of Islam change over time? What was the secret of their success, and what ultimately caused the empire's fall? How do the Ottomans compare to other contemporary empires? What is the Ottoman legacy, especially in Turkey and Greece? What is the

significance of the Ottoman Empire for world history?

In order to answer these questions we will study the following topics: three pillars of Ottoman inheritance: Byzantium, Islam, Mongols; the origins and rise of the Ottoman Empire; the conquest of Constantinople and its significance for world history; Ottoman state institutions in the "classic age;" gendering Ottoman History; the Ottomans and the Renaissance; the Ottomans and the Age of Exploration; the Ottoman-Safavid-Habsburg struggle for supremacy; Ottoman Jews: model minority?; sixteenth- and seventeenth-century transformations; pietism, conversion, and interreligious relations; reform and repression, 1839-1908; Orientalism and the Ottomans; the Young Turks and the revolution of 1908; World War I and the Armenian genocide; Atatürk: the "Father" of Modern Turkey and the new Turkish Republic; the Kurdish issue; the legacy of the Ottoman Empire in comparative perspective; and the Ottoman past in Turkish historical fiction.

**Teaching:** The School aims to run in-person seminars, subject to circumstances, with some online provision if and where necessary. There will be a reading week in Week 6 of the Michaelmas Term and Week 6 of the Lent Term.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

Weekly written and oral reading reports in the MT and the LT. Completion of these is mandatory, in order to facilitate good seminar discussions.

**Indicative reading:** The course textbook will be Marc David Baer, *The Ottomans: Khans, Caesars, and Caliphs* (Basic Books 2021). Other readings will include Karen Barkey, *Empire of Difference: The Ottomans in Comparative Perspective* (Cambridge, 2008); Jane Burbank and Frederick Cooper, *Empires in World History: Power and the Politics of Difference* (Princeton 2010); Ahmet Karamustafa, *God's Unruly Friends: Dervish Groups in the Islamic Middle Period, 1200-1550* (New York 2006); Franklin Lewis, *Rumi - Past and Present, East and West: The Life, Teachings, and Poetry of Jalal al-Din Rumi* (New York 2007); Cemal Kafadar, *Between Two Worlds: The Construction of the Ottoman State* (California 1995); Rudi Paul Lindner, *Nomads and Ottomans in Medieval Anatolia* (Bloomington: Indiana University, 1983); Giancarlo Casale, *The Ottoman Age of Exploration* (Oxford 2011); Walter Andrews and Mehmet Kalpakli, *The Age of Beloveds: Love and the Beloved in Early-Modern Ottoman and European Culture and Society* (Duke 2005); Leslie Peirce, *The Imperial Harem: Women and Sovereignty in the Ottoman Empire* (Oxford 1993); Baki Tezcan, *The Second Ottoman Empire: Political and Social Transformation in the Early Modern World* (Cambridge 2012); Ali Yaycioglu, *Partners of the Empire: The Crisis of the Ottoman Empire in the Age of Revolutions* (Stanford 2016); Erik Zürcher, *The Young Turk Legacy and Nation Building: From the Ottoman Empire to Atatürk's Turkey* (I.B. Tauris, 2010); and Ron Suny, "They Can Live in the Desert But Nowhere Else": A History of the Armenian Genocide (Princeton 2015).

**Assessment:** Essay (50%, 4000 words) in the LT.

Essay (50%, 4000 words) in the ST.

## HY461

### East Asia in the Age of Imperialism, 1839-1945

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Antony Best, SAR 3.14

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in China in Comparative Perspective, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** There are no formal pre-requisites for this course,

but some knowledge of the international history of East Asia would be useful.

**Course content:** The course looks at the origins and the political, strategic, economic and cultural consequences of the arrival of Western imperialism in East Asia. Subjects covered by the course include the clash between the Westphalian and Sinocentric international orders; the opium wars; the fall of the Tokugawa shogunate; the Japanese, Korean and Chinese responses to the arrival of the West; the history of Western imperialism in China and the rise of Chinese nationalism; the rise of Japanese imperialism; the Russo-Japanese War and its consequences; pan-Asianism, race and immigration; the Chinese revolution of 1911-12; the rise of intra-Asian trade; the effect of Wilsonian and communist internationalism; Japan's move towards aggressive expansion in the 1930s; the outbreak of the Pacific War.

**Teaching:** 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

There will be a reading week in the Michaelmas and the Lent Terms.

**Formative coursework:** Students will be required to write three essays over the academic year. The second essay will be a mock examination and the third essay will be assessed.

**Indicative reading:** A detailed reading list will be issued at the start of the course, but the following provide a useful introduction to the themes, events and historiography:

- Shigeru Akita (ed.), *Gentlemanly Capitalism, Imperialism and Global History* (Basingstoke, 2002);
- Warren Cohen, (ed), *Pacific Passage: The Study of American-East Asian Relations on the Eve of the Twenty-First Century* (New York, 1996);
- Merle Goldman & Andrew Gordon, (ed.), *Historical Perspectives on Contemporary East Asia* (Cambridge, Mass. 2000);
- Akira Iriye, *Japan and the Wider World: From the Mid-Nineteenth Century to the Present* (London, 1997);
- Jonathan Spence, *The Search for Modern China* (1999);
- Chushichi Tsuzuki, *The Pursuit of Power in Modern Japan 1825-1995* (Oxford, 2000).

**Assessment:** Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 3000 words) in the LT.

## HY463

### The Origins of the Cold War, 1917-1962

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Vladislav Zubok SAR 3.13

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course examines the origins of the Cold War and the dynamics of its rise during the period from World War II to the Cuban Missile Crisis in 1962. It looks at long-term trends as well as specific events in order to elucidate how the Cold War originated and evolved. It deals with the Cold War as international history, covering the period from a wide variety of geographical and national angles: while some seminars necessarily centre on an individual state or a bilateral relationship, there will be others that deal with a wider region or with global trends. Intellectually, therefore, the course stresses the transformation of the field from the study of (primarily American) national foreign policy to a broader international approach and great attention to the Soviet and Chinese participation in the conflict.

There are seminars on the following topics: Introduction. The

Origins of the Origins, 1917-1943; The Breakdown of the Grand Alliance, 1943-1946; The Division of Germany, 1945-1952; The Sovietisation of Eastern Europe and the Yugoslav Exception; The Marshall Plan and the Foundation of NATO; Nuclear Weapons, Science, and Technology at the Start of the Cold War, 1945-1952; The Communist Victory in China and the Origins of the Korean War; The Korean War; Grand Strategy I: The Soviet Union and the Post-War World, 1945-1953; Grand Strategy II: The United States and the Post-War World, 1945-1953; Cold War Liberalism and McCarthyism: Anti-Communism and the Cold War in American Politics and Culture, 1947-1954; The Sino-Soviet Alliance, 1954-1962; Indochina Wars: From the French Indochina War to the Eve of American Intervention; Eastern Europe from 1953 to the Aftermath of the 1956 Revolutions; The Berlin Crisis, 1958-1962; From the Cuban Revolution to the Cuban Missile Crisis, 1958-1962; Grand Strategy III: Soviet Foreign Policy from Stalin's Death to the Cuban Missile Crisis; Grand Strategy IV: US National Security Policy from Eisenhower to Kennedy; World Economy, Technology, and the Cold War; The Ideologies, Identities, and the Cold War.

In addition to seminars, students attend lectures delivered within HY206 and covering the following topics: The Breakdown of the Grand Alliance, 1943-1946; The Division of Germany; The Iron Curtain; The Marshall Plan and the Foundation of NATO; The United States and Japan, 1945-1965; The Outbreak of the Korean War; The Sino-Soviet Alliance; The 1956 Hungarian Revolution; Technologies, Weapons, and the Arms Race; The Cuban Revolution and the 1962 Missile Crisis; Culture and Mindsets.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

The twofold emphasis of the seminars is on working with the historiography and with the primary sources, in order to understand how historians have interpreted (and re-interpreted) the origins of the Cold War in light of their access to new sources.

Recorded lectures from HY206 The International History of the Cold War will also be available to HY463 students.

There will be a reading week in the Michaelmas and the Lent terms.

**Formative coursework:** Students are required to give two oral presentations during the year and to submit one 3000-word formative essay in the Michaelmas Term (the second essay is assessed, see below).

**Indicative reading:** M.P. Leffler/O.A. Westad (eds), *The Cambridge History of the Cold War*; J.M. Hanhimäki/O.A. Westad (eds), *The Cold War: A History in Documents and Eyewitness Accounts*; J.L. Gaddis, *The Cold War: A New History*; V. Zubok, *A Failed Empire*.

**Assessment:** Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 3000 words) in the LT.

## HY465 Not available in 2022/23

### The International History of the Balkans since 1939: State Projects, Wars, and Social Conflict

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Svetozar Rajak SAR.3.15

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course examines the history of the Balkans in the second half of the Twentieth century and on the threshold of the Twenty First century. The course aims to integrate broader themes and interpretations of the Cold War and its legacy, and of deeper civilizational undercurrents of the second half of the Twentieth Century, with the study of the region and its only

federation, Yugoslavia. It invokes three main themes that will also facilitate insight into the interaction between the global, regional, and country specific. Firstly, the course will explore the regional and inter-bloc dynamics within the structured Cold War system by looking at the impact the Cold War had on the region, and, at the influence the Balkans, in particular the Greek Civil War and Yugoslavia's conflict with the USSR exercised on the institutionalization and the dynamics of the early Cold War. Secondly, the course will look into the unique role Yugoslavia played in the creation of the alternatives and challenges to the bipolar structure and rigidity of the Cold War world, namely the Non-aligned Movement and the so called "Yugoslav road to Socialism" that created a schism within the global Communism. Thirdly, the course will offer insight into the dramatic impact the end of the Cold War on the developments in the region, namely the collapse of the Yugoslav federation and the transition of the Communist regimes. Moreover, it will assess the role that the disintegration of Yugoslavia and the subsequent wars of secession had in inaugurating the concepts that would define the post-Cold War international system, such as nation-building, humanitarian intervention, international community, conflict-resolution, limited sovereignty, decreasing role of the UN, the US hegemony, etc.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

**Formative coursework:** Students are required to write one 3,000-word essay in the Michaelmas term. There will also be a mock exam (a one-hour essay, in class) in the end of the Lent term.

**Indicative reading:** Crampton, Richard J., *The Balkans Since the Second World War*, (New York: Longman, 2002).

Glenny, Misha, *The Balkans 1804 - 1999: Nationalism, War and the Great Powers*, (London, Granta Books, 1999).

**Assessment:** Exam (50%, duration: 2 hours) in the summer exam period.

Essay (25%, 3000 words) in the LT.

Class participation (15%) and presentation (10%) in the MT and LT.

## HY469

### Maps, History and Power: The Spaces and Cultures of the Past

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Paul Stock SAR 2.15

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** How did past societies and cultures understand the world around them? How did those societies use maps to represent physical, social and imaginative spaces? Do maps merely reflect particular mentalities and social practices, or do they actively shape the experience and perception of the world? *Maps, History and Power* addresses these and other questions by exploring mapping practices and spatial thought in several European and non-European contexts from the medieval to the modern periods. The course explores how past societies have used maps to serve a number of practical and ideological purposes: to express religious belief, to aid navigation and commerce, to assert cultural superiority, and to enable state formation or imperial control. Alongside readings in history and cartography, the course will make extensive and innovative use of the latest digital resources, allowing students to view and discuss historical maps from the world's great research libraries and collections.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6 of the MT and the LT.

**Formative coursework:** Students will be required to submit two formative essays (one per term). They will also have the opportunity to sit a mock exam.

**Indicative reading:**

- Jeremy Black, *Maps and History: Constructing Images of the Past* (New Haven: Yale University Press, 1997)
- Jerry Brotton, *A History of the World in Twelve Maps* (London: Allen Lane 2012)

- Mark Monmonier, *How to Lie with Maps* (Chicago: Chicago University Press, second ed. 1996)
- David Turnbull, *Maps are Territories, Science is an Atlas* (Chicago: Chicago University Press, 1993)
- Denis Wood, *The Power of Maps* (London: Routledge, 1993)

**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.

## HY471 Not available in 2022/23

### European Empires and Global Conflict, 1935-1948

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr David Motadel SAR 3.16

**Availability:** This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and

World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course examines the history of the European empires in the Second World War. It covers the history of the war fought in the imperial world and its impact on the lives of millions of colonial civilians; the political, military, and social history of colonial soldiers who fought in Europe's multi-ethnic and multi-religious armies; the history of anti-colonial movements during the war, from Ho Chi Minh's Viet Minh to Gandhi's Quit India movement; and the history of the war's impact on decolonisation and the twentieth century world order. Overall, the course explores the non-European experience of the Second World War, examining the ways in which the conflict shaped societies and political orders in Africa, Asia, and beyond. Drawing on key secondary texts, primary sources, and visual material, the course provides a broad introduction to the most destructive and cataclysmic conflict in modern global history.

**Teaching:** Seminars will be taught on campus, with online teaching via Zoom as a back-up if required.

There will be reading weeks in the MT and the LT.

**Formative coursework:** Students will be expected to produce one essay (2,500 to 3,000 words) in MT; one presentation in MT; and one presentation in LT. Students will also be required to prepare short summaries of the readings (bullet points) for the weekly meetings.

**Indicative reading:** C. A. Bayly and Tim Harper, *Forgotten Armies: Britain's Asian Empire and the War with Japan* (London, 2004).

**Assessment:** Essay (50%, 5000 words) in the LT.

Essay (50%, 5000 words) in the ST.

International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course provides a critical overview of the history of Qing China from the early eighteenth to the mid-nineteenth centuries, tracing political, institutional, cultural, and social continuities and changes, particularly in China's land and maritime frontiers. Beginning in the Qianlong period, the Qing Empire became involved in an ever-growing network of commerce and cultural exchange, extending from Manchuria to Inner Asia, and from the East Sea to the Indian Ocean. Following the bloody suppression of the Lhasa riots in 1750, a series of events further connected China to the external world: the infamous Dzungar genocide, European encroachment in Asian seas, the rise of port cities in Southeast Asia that were dominated by Chinese entrepreneurs, and increasing tension between China and Western powers over sea lanes and maritime boundaries. This course will use China's shifting frontiers as a fulcrum to re-examine Chinese history in the modern era, factoring in the movement of people, commodities, ideas, cultural meanings, and imaginaries, which clearly indicate "China's outwardness." This challenges the common perception of China as isolated and inward-looking.

**Teaching:** Students will engage with class content in large and small group meetings. Learning engagement will include live sessions, small group meetings, asynchronous moodle posts, video clips, and short presentations.

There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

**Formative coursework:** One formative essay in the Michaelmas Term.

**Indicative reading:** Mark C. Elliot, *Emperor Qianlong: Son of Heaven, Man of the World* (New York: Longman, 2009).

### **Genesis of the Modern World: Europe, China & India, 1550-1840**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Gagandeep S. Sood SAR 2.07

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History

of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course is about the developments which led to the emergence of our modern world. A variety of conditions have been highlighted by historians as responsible for this, including government reform, agricultural practices, empirical rationality, consumption patterns, military conflict, property rights, family arrangements, territorial conquest, revenue administration, and sheer accident. Although scholarly consensus on the leading-edge conditions still eludes us, there is broad agreement that the politics of northwestern Europe, eastern China and northern India played critical roles, and that the fateful changes occurred between the late sixteenth and early nineteenth centuries.

We examine these politics and the relations between them from two distinct but complementary perspectives. These perspectives define the two terms of the course. One is historiographical and centres on received interpretive frameworks, the other is historical and builds on our best current knowledge of the period. In Michaelmas Term, we study the most influential paradigms and narratives elaborated by historians to make sense of the early modern step change that transformed the capacities of human endeavour. Each crystallises a specific set of structures and gives primacy to different polities of Eurasia, with a particular stress on Early Modern England and the English Atlantic, Late Ming and High Qing China, and Mughal and post-Mughal India. In studying these frameworks, we gain familiarity with the most significant attributes of these polities, and how they have been interpreted by scholars. In Lent Term, we study the ways in which the individual polities of the three regions addressed the near-universal problems faced by all complex states and societies. The solutions to these problems - grouped under the rubric of 'centralised institutions & sovereign ideology', 'indirect rule & political economy', and 'plurality, them & us' - powerfully shaped their future trajectories, and had a direct bearing on relations between Europe, China and India. By recovering the most consequential structures and solutions over the two terms of this course, we thereby seek to apprehend the genesis of the modern world.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT.

There will be a reading week in week 6 of the MT and the LT. As no prior knowledge of the course's subject is either assumed or required, it is essential for students to do the set readings and assignments, attend the seminars and engage actively in discussion. It is also strongly recommended that students meet informally outside the class setting to compare notes and learn from each other.

**Formative coursework:** A 3000-word essay will be due towards the end of MT on a historiographical topic decided in consultation with the instructor. Each week, students will work through one or more core readings which provide important background information, as well as selected further readings in line with their developing interests. These tasks will be supplemented with short reading responses/memos to be posted on Moodle before the weekly seminars and unassessed debates and oral presentations during the seminars themselves.

**Indicative reading:** For general surveys, students may consult:

- David B. Abernethy, *The Dynamics of Global Dominance: European Overseas Empires, 1415-1980* (New Haven, CT, 2000).
- Christopher A. Bayly, *The Birth of the Modern World, 1780-1914: Global Connections and Comparisons* (Oxford, 2004).
- John Darwin, *After Tamerlane: The Global History of Empire* (London, 2007)

Signal contributions to the subject include:

- Fernand Braudel, *Civilization and Capitalism, 15th-18th Century*, 3 vols (New York, 1981-1984).

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Victoria Phillips

**Availability:** This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** The course is intended for students with or without a detailed knowledge of public diplomacy. However, students without a detailed knowledge of Cold War history are advised to undertake preliminary background reading.

**Course content:** Because the Cold War was a series of ideological battles for the "hearts and minds of mankind," culture became a weapon. This seminar examines the United States' export of its ideals to counter communism abroad. Although the course focuses on American-led projects, soft power, and psychological warfare, the reach was global and thus offers the opportunity to examine nations world-wide. The class opens with an examination of American political power from the 19th-century's claims about the frontier through the American Century and Cold War conceptions of "truth," "propaganda," and "informational" practices. The intersection of American governmental branches and clandestine operations with international private foundations, the press, advertising agencies, universities, corporations, and private individuals unpack the complexity of export operations. The course continues to explore cultural diplomacy through radio, music, modernist art, dance, literature, books, magazines, film, television, architecture, and sports. It examines the power of race, gender, and religion. The concept of soft power is challenged by its intersection with military operations, hot wars, or the threat of nuclear attacks in case studies of Korea, Berlin, Cuba, and Vietnam. Cultural exports are examined in the context of secondary source readings and primary sources including conventional archival documents as well as examples of art, film, and performances.

**Teaching:** Seminars will either be on campus or via Zoom, as circumstances dictate.

There will be a reading week in the Michaelmas and the Lent Terms.

**Formative coursework:** Students will be expected to produce 1 essay and 1 other piece of coursework in the MT.

Students are required to produce one formative essay (3,000 words maximum) by the conclusion of the reading week in the MT. A formative primary source analysis exercise will be due at the conclusion of the MT.

- Odd Arne Westad, *The Cold War: A World History*.

**Assessment:** Essay (55%, 5000 words) in the ST. Presentation (10%), class participation (10%) and online assessment (25%) in the MT and LT.

On alternate weeks, students will post a brief essay on the syllabus topic (500 word-maximum – 25%) and participate in the seminar discussions (10%). During either the MT or LT, each student will give an in-class presentation relating to the week's agenda (maximum fifteen minutes, 10%). In lieu of a final exam, students will write one maximum 5,000 word essay (including footnotes) based on a primary and secondary source analysis due in the ST (55%).

## HY483

### Land and Conflict in Latin America since 1750

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Anna Cant SAR 3.12

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Extending from the late Spanish colonial era, through the wars of independence and up to present-day social conflicts, this course will focus on land. How has land been conceptualised and fought over? How have different social groups developed relationships with land? In what ways have conflicts over land shaped Latin American politics? Students will be encouraged to take an interdisciplinary approach to these questions, drawing on new research in geography, anthropology and political science, as well as various strands of history. Despite the great diversity of the Latin American continent,

land is a constant reference point and one that lends itself to rich comparative study. Topics will include the global and local politics of the colonial hacienda system, anti-colonial indigenous rebellions, scientific exploration and population displacement, peasant movements, land reform, Cold War development policies and ongoing social protests over land and resource extraction.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT.

There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

**Formative coursework:** Students are required to write one 3000-word formative essay in the Michaelmas Term and post weekly reflections to the Moodle discussion board in the Michaelmas and Lent Terms. They must also give one 15-minute presentation in the Michaelmas and the Lent Terms.

**Indicative reading:**

**Assessment:** Essay (50%, 5000 words) in the ST.

Essay (30%, 3000 words) in the LT.

Class participation (20%) in the MT and LT.

---

## HY484L Half Unit

### Empire, Colonialism and Globalisation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nailya Shamgunova SAR M.13

**Availability:** This course is compulsory on the MSc in Empires, Colonialism and Globalisation. This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Global Economic History (Erasmus Mundus), MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History and MSc in International and World History (LSE & Columbia). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course covers the comparative history of empires from the fifteenth century to the present day. Students will study the Ottoman, Mughal, Qing, Spanish, and British empires in depth. Students explore the ways in which these empires encountered, understood and governed difference. The course also

explores the ways in which the imperial past has helped shape the processes of globalisation.

A number of themes are addressed: exploration and trade; empiricism, science, race and the natural world; encountering and governing indigenous peoples; gender and imperial power; translation, conversion and coexistence in the management of religious relations; slavery, indenture and other forms of unfree labour; race, science and empire; art, artefacts and collecting; museums after empire. Developing with a decolonised approach to knowledge, history and material culture, students are encouraged to think across time and space to make creative connections and comparisons.

**Teaching:** 20 hours of seminars in the LT.

There will be a reading week in week 6.

**Formative coursework:** Students are expected to submit 1 draft essay (1200 words), and one formative essay (3000 words) in the LT.

**Indicative reading:** A full reading list will be provided. For general surveys of the subject, students may consult:

- Jane Burbank & Frederick Cooper, *Empires in World History: Power and the Politics of Difference* (Princeton, NJ, 2010);
- Frederick Cooper, *Colonialism in Question: Theory, Knowledge and History* (Berkeley, 2005);
- Christopher A. Bayly, *The Birth of the Modern World, 1780-1914: Global Connections and Comparisons* (Oxford, 2004);
- Alejandro Colás, *Empire* (Cambridge, 2007);
- John Darwin, *After Tamerlane: The Global History of Empire* (London, 2007);
- Michael W. Doyle, *Empires* (Ithaca, NY, 1986);
- Michael Hardt & Antonio Negri, *Empire* (Cambridge, MA, 2001);
- Stephen R. Howe, *Empire: A Very Short Introduction* (Oxford, 2002);
- Herfried Münkler, *Empires: The Logic of World Domination from Ancient Rome to the United States* (Cambridge, 2007).

**Assessment:** Essay (50%, 5000 words) in the ST.

Class participation (25%) and group project (25%) in the LT.

## HY486

### The Anti-Slave-Trade Atlantic World, c. 1807-1870

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jake Subryan Richards MT; TBC LT and ST

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Britain's parliamentary act to abolish the transatlantic trade in enslaved African people in 1807 is a standard reference point in histories of slavery and abolition. But much less is known about the consequences of enforcing that act in West Africa, Latin America, and the Caribbean. Enforcement required huge investment in colonial and naval forces to try to stop slaving ships from crossing the Atlantic; it caused a build-up of captives on the African coast because some traders could no longer sell them overseas; it prompted other traders to develop a huge illegal slave trade to Brazil and Cuba; and it generated new forms of bonded labour (such as indenture) in the Americas to replace the diminishing supply of enslaved people. These changes altered Britain's political and commercial relationships with polities in Africa and the Americas. This module investigates anti-slave-trade practices between British agents and the rulers, traders, enslaved, and free(d) peoples of different Atlantic societies. How did Britain's colonial empire adapt to accommodate the influx of African captives from captured slave ships? How did political authorities in Africa and Latin America respond to British demands for abolition? And what did enslaved people make of the transformations wrought by abolition? We will explore these questions using sources such as slave narratives, legal cases, political pamphlets, travel literature, and diplomatic correspondence. Through this course, students will examine how abolishing the transatlantic slave trade produced new modes of encounter, empire, and labour in the Atlantic world.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT.

There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:**

**Assessment:** Essay (40%, 4000 words) in the LT. Essay (60%, 6000 words) in the ST.

## HY487 Half Unit

### Islam, State and Conflict in Southeast Asia

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Kirsten E. Schulze SAR 2.12

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course looks at Islam, state and conflict in Southeast Asia in the twentieth century. Following a historical introduction on the Islamisation of Southeast Asia and the entry of the European colonial powers, this course examines the Darul Islam rebellions (Indonesia), the Aceh conflict (Indonesia), the Mindanao conflict (the Philippines), the southern Thailand conflict, and the Rohingya conflict (Myanmar). It also explores the role of Islam in social conflict in Malaysia as well as the rise of regional and international jihadism with Jemaah Islamiyah and the Southeast Asian affiliates of ISIS.

**Teaching:** 10 two-hour seminars in the LT.

**Formative coursework:** One formative essay (3000 words) in the LT.

**Assessment:** Essay (60%, 4000 words) in the ST. Presentation (20%) and class participation (20%).

## HY488 Half Unit

### European Empires and Global Conflict, 1935-1948

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Diva Gujral

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History,

MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course examines the history of the European empires in the Second World War. It covers the history of the war fought in the imperial world and its impact on the lives of millions of colonial civilians; the political, military, and social history of colonial soldiers who fought in Europe's multi-ethnic and multi-religious armies; the history of anti-colonial movements during the war, from Ho Chi Minh's Viet Minh to Gandhi's Quit India movement; and the history of the war's impact on decolonisation and the twentieth century world order. Overall, the course explores the non-European experience of the Second World War, examining the ways in which the conflict shaped societies and political orders in Africa, Asia, and beyond. Drawing on key secondary texts, primary sources, and visual material, the course provides a broad introduction to the most destructive and cataclysmic conflict in modern global history.

**Teaching:** 20 hours of seminars in the LT.

There will be a reading week in the LT.

The School aims to run in-person seminars, subject to circumstances, with some online provision as and where necessary.

**Formative coursework:** Students will be expected to produce one essay (2,000 to 2,500 words) and one presentation in the LT. Students will also be required to prepare short summaries of the readings (bullet points) for the weekly meetings.

**Indicative reading:**

- C. A. Bayly and Tim Harper, *Forgotten Armies: Britain's Asian Empire and the War with Japan* (London, 2004).
- Judith A. Byfield, Carolyn A. Brown, Timothy Parsons, and Ahmad Alawad Sikainga (eds.), *Africa and World War II* (Cambridge, 2015).

- Gerhard L. Weinberg, *A World at Arms: A Global History of World War II* (Cambridge, 2005).

**Assessment:** Essay (100%, 5000 words) in the ST.

Assessment will be via one 5,000 word essay. The essay will be submitted in week 1 of ST. Essay titles will be drawn from an approved list supplied at the start of the course.

**HY489 Half Unit****China and the External World, 1644-1839**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ronald Chung Yam Po, SAR 2.18

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in China in Comparative Perspective, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course provides a critical overview of the history of Qing China from the late seventeenth to the mid-nineteenth centuries, tracing political, institutional, cultural, and social continuities and changes, particularly in China's land and maritime frontiers. Beginning in the Kangxi period, the Qing Empire became involved in an ever-growing network of commerce and cultural exchange, extending from Manchuria to Inner Asia, and from the East Sea to the Indian Ocean. Following the annexation of Taiwan in 1683, a series of events further connected China to the external world: the bloody suppression of the Lhasa riots in 1750, the infamous Dzungar genocide, European encroachment in Asian seas, the rise of port cities in Southeast Asia that were dominated by Chinese entrepreneurs, and increasing tension between China and Western powers over sea lanes and maritime boundaries. This course will use China's shifting frontiers as a fulcrum to re-examine Chinese history in the modern era, factoring in the movement of people, commodities, ideas, cultural meanings, and imaginaries, which clearly indicate "China's outwardness" and challenge the common perception of China as isolated and always inward-looking.

**Teaching:** Ten weekly two-hour seminar meetings in the Michaelmas Term, with a reading week in week 6.

**Formative coursework:** One formative essay in the Michaelmas Term.

**Indicative reading:**

- Mark C. Elliot, *Emperor Qianlong: Son of Heaven, Man of the World* (New York: Longman, 2009).
- Peter C. Perdue, *China Marches West: The Qing Conquest of Central Eurasia* (Cambridge, Mass.: Harvard University Press, 2009).
- John. E. Wills, *China and Maritime Europe, 1500-1800: Trade, Settlement, Diplomacy, and Missions* (Cambridge; New York: Cambridge University Press, 2011).
- Robert Antony, *Unruly People: Crime, Community, and State in Late Imperial South China* (Hong Kong: Hong Kong University Press, 2016).
- Kenneth Pomeranz, *The Great Divergence: China, Europe, and the Making of the Modern World Economy* (Princeton, N.J.: Princeton University Press, 2000).

- Timothy Brook, *Great State: China and the World* (London: Profile Books, 2019).
- William Rowe, *China's Last Empire: The Great Qing* (Cambridge, MA.: Harvard University Press, 2009).

**Assessment:** Essay (70%, 4500 words) in January. Presentation (15%) and class participation (15%) in the MT.

**HY490****MA in Modern History Dissertation**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Gagan Sood, SAR 2.07

**Availability:** This course is compulsory on the MA in Modern History. This course is not available as an outside option.

**Course content:** The dissertation is an exercise in using primary sources to write on a precise topic in Modern History. Students will be required to write a 10,000-word dissertation based on their own research. This can be on any topic decided in consultation with a supervisor in the Department of International History, and include topics which are international, domestic, theoretical and historiographical. Candidates should aim to include an element of originality in the argument and/or the treatment of the evidence.

**Teaching:** 4 hours of workshops in the MT.

Teaching is provided through dissertation workshop sessions and through the individual supervision of dissertation projects by supervisors in the Department of International History. Students should use the Michaelmas Term to find, decide on, and develop a suitable dissertation topic and consider possible dissertation supervisors. Help with this process is available from the students' personal advisers. Students are then required to complete the Dissertation Proposal Form and to seek approval for their project from their dissertation supervisor. It is the students' responsibility to locate a supervisor. They should meet with the potential supervisor in late Michaelmas term (every member of staff has weekly office hours) to discuss their dissertation proposal, and then ask the supervisor to sign the Dissertation Proposal Form before the published deadline. It is the students' responsibility to contact their supervisor to arrange at least one but no more than three meetings in the Summer Term to discuss their dissertation. At this stage the supervisor will be prepared to read and give feedback on a draft table of contents and a draft chapter, or a section or a detailed plan of the dissertation of no more than 1,000 words. Students should note that if they submit a dissertation proposal after the deadline the Teacher Responsible for the course may need to allocate them to a non-subject-specialist supervisor, if no specialists are available.

**Assessment:** Dissertation (100%, 10000 words) in September.

**HY491 Half Unit Not available in 2022/23****Race, Gender and Reproduction in the Caribbean, 1860s-1930s**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Imaobong Umoren SAR G.04

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** In the wake of slavery, debates about the intersecting politics of race, gender, and reproduction arose in the Francophone, Anglophone, and Hispanic Caribbean. This module explores the ways in which formerly enslaved Africans as well as former planters, imperial officials, newly indentured labourers from South Asia, philanthropists, medical professionals, and welfare workers contributed to and shaped colonial social welfare, health policies, and ideas surrounding racial uplift colonialism, race consciousness and equality. Students will engage in comparative intellectual and social history by drawing on primary and secondary sources to consider the influence of European and American imperialism in the Caribbean. A range of topics will be explored including post-emancipation population decline; infant

mortality; illegitimacy; venereal disease; birth control; inter- and extra regional migration; and eugenics.

**Teaching:** 20 hours of seminars in the MT.

There will be a reading week in week 6 of the MT.

**Formative coursework:** Students will be expected to produce one essay (1,500 to 2,000 words) in MT.

**Indicative reading:** Bourbonnais, Nicole, *Birth Control in the Decolonizing Caribbean: Reproductive Politics and Practice on Four Islands, 1930-1970* (Cambridge: Cambridge University Press, 2016)

Briggs, Laura, *Reproducing Empire: Race, Sex, Science and US Imperialism in Puerto Rico* (Berkeley: University of California Press, 2002).

**Assessment:** Essay (85%, 5000 words) in January.  
Class participation (15%) in the MT.

## HY498

### Dissertation: LSE-PKU Double Degree MSc in International Affairs; MSc Theory and History of International Relations

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Gagan Sood, SAR 2.07

**Availability:** This course is compulsory on the MSc in International Affairs (LSE and Peking University) and MSc in Theory and History of International Relations. This course is not available as an outside option.

**Course content:** The dissertation is an exercise in using primary source material to write on a precise topic in the history of international affairs. Although candidates may engage with relevant theories and concepts, the dissertation should be largely devoted to utilising such theories and concepts in the analysis of one or more specific historical events and should be based largely upon primary sources. Candidates should aim to include an element of originality in the conceptualising of the thesis or the treatment of evidence. The subject must fall within the syllabus of the degree and must be supervised by a member of staff in the Department of International History

**Teaching:** Four one-hour sessions in the Michaelmas Term. HY498 teaching is provided through HY498 Dissertation workshop sessions and through the individual supervision of dissertation projects by supervisors in the Department of International History. Students should use the Michaelmas Term to find, decide on, and develop a suitable dissertation topic and consider possible dissertation supervisors. Help with this process is available from the students' personal advisers. Students are then required to complete the HY498 Dissertation Proposal Form and to seek approval for their project from their dissertation supervisor. It is

the students' responsibility to locate a supervisor. They should meet with the potential supervisor in late Michaelmas term (every member of staff has weekly office hours) to discuss their dissertation proposal, and then ask the supervisor to sign the HY498 Dissertation Proposal Form before the published deadline. It is the student's responsibility to contact their supervisor to arrange at least one but no more than three meetings in the Summer Term to discuss their dissertation. At this stage the supervisor will be prepared to read and give feedback on a draft table of contents and a draft chapter, or a section or a detailed plan of the dissertation of no more than 1,000 words. Students should note that if they submit a dissertation proposal after the deadline the Teacher Responsible for the course may need to allocate them to a non-subject-specialist supervisor, if no specialists are available.

**Assessment:** Dissertation (100%, 10000 words) in September. The dissertation must not exceed 10,000 words (100% of course mark), including text and footnotes but excluding the cover page, the table of contents, the list of abbreviations, the bibliography and appendices. A Fail cannot be compensated, and a degree cannot be awarded unless HY498 has been passed. The dissertation must be submitted by the published deadline.

## HY499

### Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Gagan Sood, SAR 2.07

**Availability:** This course is compulsory on the MSc in Empires, Colonialism and Globalisation and MSc in History of International Relations. This course is not available as an outside option.

**Course content:** The HY499 dissertation is an exercise in using primary sources to write on a precise topic in International History. The only formal limit on the choice of subject is that it must fall within the syllabus - i.e. it has to be a topic in International History, and the dissertation has to be a study in the discipline of history. Dissertations that represent contributions to disciplines outside history, such as International Relations or Politics, will not be approved or accepted. Dissertations must therefore be based substantially on a critical analysis of primary sources, and candidates should aim to include an element of originality in the argument and/or the treatment of the evidence. The subject must involve an element of engagement with the analysis of relations between states and/or societies; alternatively it may involve the study of the history of attitudes and/or policies in one society towards others or comparative studies involving at least two states and/or societies. The topic must not be confined purely to the domestic affairs of one society or state. The dissertation supervisor is the final judge of whether a particular topic falls within the syllabus.

**Teaching:** Four one-hour sessions in the Michaelmas Term. HY499 teaching is provided through HY499 Dissertation workshop sessions and through the individual supervision of dissertation projects by supervisors in the Department of International History. Students should use the Michaelmas Term to find, decide on, and develop a suitable dissertation topic and consider possible dissertation supervisors. Help with this process is available from the students' personal advisers. Students are then required to complete the HY499 Dissertation Proposal Form and to seek approval for their project from their dissertation supervisor. It is the students' responsibility to locate a supervisor. They should meet with the potential supervisor in late Michaelmas term (every member of staff has weekly office hours) to discuss their dissertation proposal, and then ask the supervisor to sign the HY499 Dissertation Proposal Form before the published deadline. It is the students' responsibility to contact their supervisor to arrange at least one but no more than three meetings in the Summer Term to discuss their dissertation. At this stage the supervisor will be prepared to read and give feedback on a draft table of contents and a draft chapter, or a section or a detailed plan

of the dissertation of no more than 1,000 words. Students should note that if they submit a dissertation proposal after the deadline the Teacher Responsible for the course may need to allocate them to a non-subject-specialist supervisor, if no specialists are available.

**Assessment:** Dissertation (100%, 10000 words) in September. 100% by dissertation. A Fail cannot be compensated, and a degree cannot be awarded unless HY499 has been passed. Dissertations must not exceed 10,000 words, including text and footnotes but excluding the cover page, the table of contents, the list of abbreviations, the bibliography and appendices. The dissertation must be submitted by the published deadline.

---

## HY4A4

### Dissertation with an Asian focus

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Kirsten Schulze SAR 2.12

**Availability:** This course is compulsory on the MA in Asian and International History (LSE and NUS) and MSc in International and Asian History. This course is not available as an outside option.

**Course content:** The dissertation is an exercise in using primary sources to write on a precise topic in International and Asian History. The only formal limit on the choice of subject is that it must fall within the syllabus - i.e. it has to be a topic in International History with an Asian angle, and the dissertation has to be a study in the discipline of history. Dissertations that represent contributions to disciplines outside history, such as International Relations or Politics, will not be approved or accepted. Dissertations must therefore be based substantially on a critical analysis of primary sources, and candidates should aim to include an element of originality in the argument and/or the treatment of the evidence. The subject must involve an element of engagement with the analysis of relations between states and/or societies; alternatively it may involve the study of the history of attitudes and/or policies in one society towards others or comparative studies involving at least two states and/or societies. The topic must not be confined purely to the domestic affairs of one society or state. The dissertation supervisor is the final judge of whether a particular topic falls within the syllabus.

**Teaching:** Four one-hour sessions in the Michaelmas Term.

**Assessment:** Dissertation (100%, 10000 words) in September.

---

## HY4A5 Half Unit Not available in 2022/23

### Women as Weapons: The Conservative Political Tradition in the Cold War

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Lucy Phillips

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Cold War ideological campaigns for the "hearts and minds" abutted "hot war" confrontations between 1945 and 1991, and conservative women engaged with both. This course has four purposes: (i) to examine the role of women first in the United States, and then internationally, as a reflection and enactment of Cold War conservative politics; (ii) to provide an understanding of cultural forces in building conservative ideas and its shifting ideologies surrounding motherhood, family, the kitchen, race, the workplace; (iii) to understand the traditional Cold War

historiography of conservative women's groups; (iv) reframe an understanding of women and gender with an examination of global conservatives, and unrecognized, influential "Big Women" in history be it the wives of diplomats, diplomats themselves, or cultural actors in the church, foundations, or Hollywood.

To this end, the class will open with a history and examination of the conservative tradition adding women and their writings to the study, basic readings in gender and republican motherhood, and the literature of women in "wars," hot and cold. We will continue to explore the post-World War II power of women, diplomacy, on the home front, in the workplace, as activists, feminists, anti-feminists, and include case studies of conservative international leaders. By the conclusion of the semester, students will have a firm understanding of women in the conservative tradition in the global context of the Cold War through secondary literature of the field. Each week students will also engage with primary resources, and they will become adept at parsing primary materials in the context of secondary readings. The source analysis and on-line assessment will prepare the student to write a final paper on a topic approved by the instructor that builds on class materials. Each student will do one class presentation, which will prepare them for a larger student conference. Analysis, writing and presentation skills will be honed through instruction, feedback, and practice.

The requirements include significant weekly readings of either one book or 400-500 pages, attendance at seminar discussions, a class presentation, a source analysis (750-1000 words), on-line assessment of secondary literature, a final paper of 2,500-3,000 words, and participation in the class conference at the conclusion of the semester. If a physical meeting is not possible for the final conference, students will present their papers and receive feedback from students and participating professors via the Zoom platform.

**Teaching:** 20 hours of seminars in the LT.

Students on this course will have a reading week in Week 6 of the LT during which they will meet with the professor to discuss their source analysis, on-line assessment, and the final paper strategy.

#### Weekly topics

- 1 Introduction and Women's Spheres
  - 2 Reading Conservatism: Where are the Women?
  - 3 Gendering the Political Rhetoric: Mothers, Wives, Children, Transnational Women's Groups, and Red-Hot Peace in the Cold War
  - 4 Is it Only Black and White? Race, Equal Rights, and Left Goes Right in the Cold War
  - 5 The Private-Public Partnership: Global Missionaries, the Church, and Women as Philanthropists
  - 6 The Science of Women, the Economics of Homes, Population Control and Goodwill as a Weapon
  - 7 Women and the Empire: Margaret Thatcher and Indira Gandhi - Conservatives in Question
  - 8 Decolonizing Women - Eugenia Charles, Prime Minister of Dominica
  - 9 Latin America and the Right: Women's Movements
  - 10 Cinematic Export of Women and by Women
- The School aims to run in-person seminars, subject to circumstances, with some online provision as and where necessary.

**Formative coursework:** Students will be expected to produce 5 pieces of coursework in the LT.

Five online assessed critical reading essays (max 750 words) will offer students the opportunity to engage with the professor and receive detailed written feedback and will provide discussion points for optional office hour meetings.

One on-line assessment will include a primary source analysis. Due at the conclusion of Reading Week, students will submit a Formative Essay (2,500 words) to prepare for the final paper. This work will be marked as a formative assignment and then returned and reviewed during office hours the following week.

#### Further information:

- 50% Essay (Late Lent term, maximum 5,000 words)
- 20% Critical Reading Assignment
- 15% Participation
- 15% Presentation (10-minutes duration in class)

## HY4A7 Half Unit Not available in 2022/23 Islam, Power and Culture in Mughal India

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Zahra Shah

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** From 1526 to 1857, the Mughal empire was a powerful political and cultural presence in India, whose image has been shaped and deployed in diverse ways by colonial and nationalist projects in modern times. Through a focus on themes of sovereignty and space, and the cultural and political brokerage of power, this course situates understandings of Islam in South Asia in historical context. Each week, students will choose a primary source to interpret alongside secondary literature, in order to better understand the complexity of the South Asian experience

of Mughal rule.

**Teaching:** 20 hours of seminars in the MT.

There will be a reading week in week 6 of the Michaelmas Term.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

#### Indicative reading:

**Assessment:** Essay (70%, 5000 words) in January.

Presentation (15%) and class participation (15%) in the MT.

## HY4A8 Half Unit Asian Borderlands

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Qingfei Yin SAR M.06

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This seminar takes a borderland perspective to Modern Asian History, challenging the practice of treating national territories as the building blocks of academic enquiry. Through a wide range of readings, the participants examine the transformation of modern Asia by centring on the historically marginal societies and come to better understand a borderlands approach to the studies of history. The first part of the course follows a chronological scheme, tracing the changing political, social, and cultural landscapes of Asian borderlands in the eras of imperial encounters, decolonization, and the Cold War. The second part of the seminar focuses on a series of analytical lenses commonly applied in the study of borderlands history, such as state power, state resistance, identity, ethnicity, and environment. Through the course of the seminar, students will critically analyse "space," "frontiers," "geo-body," "Zomia," and other important concepts that have informed the historiography of Asian borderlands. Through the assigned readings, discussion, and written assignments, students will also learn about how historians synthesize contributions originating from different regional historiographical literatures.

**Teaching:** 20 hours of seminars in the MT.

There will be a reading week in week 6 of the Michaelmas Term.

**Formative coursework:** One essay (2000-2500 words) in the Michaelmas Term.

**Indicative reading:**

**Assessment:** Essay (85%, 5000 words) in January. Class participation (15%) in the MT.

**HY4A9L Half Unit****China and the United States Since 1949**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Elizabeth Ingleson SAR 2.06

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and

Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Trade wars. The end of engagement. Racial violence against Asian American and Pacific Islander communities. A new Cold War? This course addresses some of the major questions and issues facing the United States and China today through a deep historical analysis of their shared past. It explores the decisions of a range of people in both countries—including policymakers, immigrants, businesspeople, and workers—as they navigated and helped shape the bilateral relationship since 1949. Throughout the course, we focus on three core themes: globalisation, geopolitics, and race. Together we will ask, how did both countries shape, and become shaped by, the post-World War Two era of globalisation? How have both nations' understanding of their roles in Asia affected the geopolitical architecture of the region? And how have the relationships between foreign policy and race affected the lives of ordinary people in both nations? We will explore topics including how Mao used the history of American imperialism to support his political agenda in the Third World; how African Americans understood their own history of oppression in relation to Mao Zedong Thought; how Chinese Americans navigated and influenced the changing social and political terrain within the United States; and how trade ties have been shaped, and limited by, the two nations' diplomatic relationship.

**Teaching:** 20 hours of seminars in the LT.

Students on this course will have a reading week in Week 6 of the LT.

**Formative coursework:** One source analysis and one essay (2000-2500 words) in the Lent Term.

**Indicative reading:**

## HY4B1

### The Vietnam Wars, 1930-75: Regional and International Perspectives

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Matthew Jones SAR 309

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The purpose of this course is to place the wars in

Vietnam in a fuller regional and international perspective in order to understand their course, outcomes and consequences. Hence, this will involve not just studying the internal dynamic of conflict within Vietnam, as first French colonialism was met with nationalist and Communist resistance, and then from c. 1959 when insurgency in the southern part of Vietnam eventually triggered wholesale US intervention, but the involvement and interests of other major powers, including the Soviet Union and China. There will also be a need to examine the relationship between developments in Vietnam and the rest of South East Asia (such as in Laos, Thailand and Indonesia), the connections between the wider Cold War and events in Vietnam, and decision-making on the part of the Vietnamese Communists. Although it will necessarily be important to look at US policies and attitudes, the general aim of the course is to encourage students to depart from a 'Washington-focused' perspective and consider the wars in Vietnam as multifaceted, where the interaction of different actors, ideologies, and agendas produced either conflict or moves toward negotiated settlements (as in 1954 and 1970-73).

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Students will be expected to read essential primary and secondary material for each weekly two hour class, to deliver presentations, and to participate in seminar discussions. Reading weeks will take place in week 6 of MT and LT.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

One formative essay of 2,000 words maximum is required in week 6 of the MT.

**Indicative reading:**

- Pierre Asselin, *Vietnam's American War: A History* (2018).

## HY4B2 Half Unit Not available in 2022/23

### The Afterlives of Empires in the Neo-Colonial Caribbean

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Imaobong Umoren SAR G.04

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** One of the first regions in the world to be colonised by western powers the contemporary Caribbean is shaped indelibly by this historical legacy that is inextricably linked to neo-colonialism and neo-liberalism. This course introduces students to the twentieth century origins and diverse range of neo-colonialism in the Hispanic, Anglophone, and Francophone Caribbean and its ties to hierarchies of race, class, gender, and geography. It aims to expand students' knowledge of wide range of neo-colonial practices and policies in the context of the Caribbean from an economic, political, social, and cultural standpoint. Students unfamiliar with Caribbean history will at the start of the course learn about the origins of conquest, colonialism, and racial slavery in the region from the seventeenth to nineteenth century. Next students will engage with the twinned rise of US imperialism and neo-colonialism in the Caribbean through an examination of both political economy and the US occupations of Cuba, Haiti, and the Dominican Republic and their control of Puerto Rico. The post-war period was critical to the reformed relationship that French Caribbean territories had with France and students will critically engage with the 1946 vote for departmentalisation and its legacies. Other topics the course will explore include Cold war conflicts in British Guiana and Cuba, constitutional decolonisation and Black Power, the debt crisis and role of the International Monetary Fund in Jamaica; the 1979 Grenadian Revolution and the 1983 US invasion of Grenada; the rise of offshore financial centres with a focus on the Bahamas, the Cayman Islands and Bermuda; tourism, development, and public health and climate change and reparations. Students will explore these themes through a combination of primary and secondary source material. By the end of the course students will be able to identify the origins of neo-colonialism in the Hispanic, Anglophone and Francophone Caribbean and will be able to critically evaluate the ways in which its practices and policies shapes hierarchies of race, class, gender and geography.

**Teaching:** 20 hours of seminars in the LT.

There will be a reading week in week 6 of the Lent Term.

**Formative coursework:** One 2000-word annotated bibliography in the Lent Term.

**Indicative reading:**

## HY4B3 Half Unit

### Citizenship in 20th century political thought: intellectual history in case studies

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Dina Gusejnova SAR M.14

**Availability:** This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The history of citizenship has often been linked both to the western Canon and to the rise of liberal democratic states, a connection which is itself the product of a particular lineage of teaching political philosophy and theory. This course will challenge students to re-examine this association in a critical light by revisiting changing conceptions of citizenship in twentieth-century European and global history. We will begin with two prominent critiques of the European tradition of political thought, which were launched in the wake of the First World War. From there, we will look back at the chief characteristics which had turned modern European and North American universities into global centres of the institutionalised study of citizenship and political obligation. In subsequent case studies, we will investigate alternative conceptions of civic consciousness, including competing ideas of rural self-government at the time of the Russian revolutions and in the early USSR, ideas of municipal self-government and the revival of cities in American and German political thought, the conceptualisation of denationalization and naturalisation entailed in the Nazi understanding of the Volk, postimperial forms of citizenship in the Anglophone and Francophone worlds, and competing conceptions of citizenship in the Cold War.

**Teaching:** 20 hours of seminars in the LT.

Students on this course will have a reading week in Week 6 of the LT.

**Formative coursework:** At the end of Reading week, students will be expected to produce a 1,500 word literature review, in which they should discuss the twentieth-century reception of a premodern author on citizenship. This can be done by examining 20th century editions, translations, commentary, or discussion of a particular author in a specific linguistic or national setting.

**Indicative reading:** There is now a vast set of readings on the

subject. The list below contains a selection of surveys and edited collections ranging from older approaches in liberal political theory of citizenship, to more recent and historically specific studies of citizenship in particular national contexts.

- Alexander Aleinikoff and Douglas Klusmeyer, eds., *Citizenship Today: Global Perspectives and Practices* (Washington: Brookings Institution Press, 2010).

- Bryan Turner, 'Outline of a Theory of Citizenship,' in Chantal Mouffe, *Dimensions of Radical Democracy* (London: Verso, 1992).

**Assessment:** Essay (60%, 4000 words), presentation (20%) and source analysis (20%) in the LT.

## HY4B4 Half Unit

### Maritime Asia in Transition, 1405-1839

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr. Ronald Chung Yam Po, SAR.2.18

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The subject of this course is the history of maritime Asia, particularly East and Southeast Asia, from the fifteenth to the early nineteenth centuries. If there is something we could refer to as a transition, would it be one related to a shift from being a not-so-maritime Asia to a relatively more-maritime Asia, or vice versa? Or perhaps the question should be one regarding a transition from one kind of Asia to another; for instance, from being secluded to embracing openness on its way to progress, or from being fairly continental to more maritime. Are there any fundamental differences between the conception of a maritime Asia and of a maritime Europe? These questions sound teleological in that the people of the time would hardly have made these enquiries. In the present century, however, it is imperative that we ask these questions in order to better situate Asia, especially during the early modern era, within a broader global context. In this seminar we will focus on a variety of themes so as to identify whether there were transitions and/or transformations in the history of maritime Asia that helped formulate the geopolitical order, cultural landscape/seascape, and trading networks of the Asian Pacific region and beyond. Throughout the course we will regard the ocean itself as an important segment of the world, whose fate is entwined with that of the human race.

Using both textual and non-textual historical materials, we will critically examine various topics ranging from stories of an admiral, policy makers, and pirates, to the histories of a port city, an island, and a vast swath of sea space.

**Teaching:** 20 hours of seminars in the LT.

There will be a reading week in week 6 of the Lent Term.

**Formative coursework:** One essay (2000 words) in the Lent Term.

**Indicative reading:**

- David Armitage, Alison Bashford, and Sujit Sivasundaram, *Oceanic Histories* (Cambridge: Cambridge University Press, 2017).

**Assessment:** Essay (70%, 5000 words) in the ST.

Class participation (15%) and presentation (15%) in the LT.

## HY4B5 Half Unit

### Queer Early Modernities

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nailya Shamgunova SAR M.13

**Availability:** This course is available on the MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This paper introduces Masters students to the meanings of queerness in the early modern period. They will meet lesbian nuns, gender nonconforming soldiers, samurai besotted with their male beloveds, powerful eunuchs, and famous castrati. They will learn how different cultures understood gender and sexuality, and what happened when those cultures encountered each other. The course engages with a wide range of textual and visual sources, including autobiographies, illustrated satirical pamphlets, sermons, conduct books, legal and medical texts, illustrated poetry volumes and objects relevant to gender and sexuality. The course will prepare students to navigate the theoretical frameworks of queer history and understand empirical knowledge of specific cultures and the development of research and source interpretation skills in this exciting and innovative field of historical research. All sources will be available in English

translation.

**Teaching:** 20 hours of seminars in the LT.

There will be a reading week in week 6 of the Lent Term.

**Formative coursework:** One essay (2500 words) in the Lent Term.

**Indicative reading:**

- Jonathan Goldberg, *Queering the Renaissance*, 1994
- Valerie Traub, *The Renaissance of Lesbianism in Early Modern England*, 2002.

- Sherry Velasco, *The Lieutenant Nun: Transgenderism, Lesbian Desire, and Catalina De Erauso* (2001).

**Assessment:** Essay (50%, 5000 words) in the ST.

Class participation (15%) and video (35%) in the LT.

Further details:

A museum trail video project - in groups, the students will be asked to create their own museum queer trails based on a London museum collection, consisting of 5 objects - a 10 minute film/online presentation for assessment, to be submitted by week 11. 35%

A summative essay, 5000 words. The students will be expected to engage with primary sources. 50%

Class participation grade. 15%

## HY4B6 Half Unit

### German Transformations since 1990

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Constantin Goschler

**Availability:** This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Following German reunification in 1990, both Germany and its role in Europe have undergone substantial changes in the past 30 years. The course will bring together political, economic and social history in a transnational perspective and thus place the neoliberal and human rights agendas of the first decade of the post-cold-war era within a common interpretative framework. On the one hand, the transformation of

East Germany must be viewed against the backdrop of the parallel transformation processes in Eastern and Western Europe. On the other hand, it is also a question of the extent to which German reunification also changed West Germany in the context of a retroactive "co-transformation" (Philip Ther). Combining the often separately discussed issues of societal changes and transitional justice following the collapse of communism can provide a better understanding of both internal developments in Germany and its changing role in Europe. For that purpose, the course will focus on the following questions: How did political, economic and social transformation develop in Germany since 1990 and how were these processes interrelated? And how did these developments shape the perception of Germany in Europe and other parts of the world?

**Teaching:** 20 hours of seminars in the MT.

Students on this course will have a reading week in Week 6 of the MT.

**Formative coursework:** One essay (2000 words) in the Michaelmas Term.

**Indicative reading:**

- Böick, Marcus. "From the socialist 'cold,' but burned by the capitalist 'heat'? The dynamics of political revolution and economic transformation in Eastern Germany after 1990." *Sustainability: Science, Practice and Policy* 16,1, 2020: 143-154

- Zatlin, Jonathan R. "Unifying without Integrating: The East German Collapse and German Unity." *Central European History* 43,3, 2010: 484-507.

**Assessment:** Essay (85%, 5000 words) in January.

Presentation (15%) in the MT.

## IR411

### Foreign Policy Analysis III

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Federica Bicchì CBG.9.11

**Availability:** This course is available on the MSc in Comparative Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply, but that may not continue to be the case.

**Pre-requisites:** Students need not have studied Foreign Policy Analysis before, but some familiarity with 1) theories of International Relations and 2) contemporary international history is essential.

**Course content:** Foreign Policy Analysis (FPA) looks at the way in which policies affecting external relations are made and shaped by state actors, as well as by actors below and above the state level. This makes it distinct from approaches to International Relations

that take the structure of the international system as a starting point for analysis. By understanding how policies are shaped by domestic and international politics and structures, it is possible to arrive at new understandings of the foreign policies of individual states and to critique and enrich scholarship in the mainstream of International Relations. This course prepares students for such tasks by introducing them to the major theoretical concepts and approaches of FPA, and applying them to a range of case studies selected from a wide variety of states and international organisations.

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas and Lent Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce two 1,500 word essays for their seminar leader (1 essay in the MT and 1 essay in the LT). Students will also be expected to present one seminar topic.

**Indicative reading:**

- Alden, Chris and Aran, Amnon, *Foreign policy analysis: new approaches: understanding the diplomacy of war, profit and justice*, (Abingdon: Routledge, 2016).
- Morin, Jean-Frédéric, and Jonathan Paquin, *Foreign Policy Analysis: A Toolbox*, (Springer, 2018).
- Smith, Steve, Hadfield, Amelia and Dunne, Tim, (eds.), *Foreign policy; theory, actors, cases*, (Oxford: Oxford University Press, 2016).

**Assessment:** Take-home assessment (100%) in the ST.

## IR412

### International Institutions

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mathias Koenig-Archibugi CBG.3.38

**Availability:** This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply, but that may not continue to be the case

**Course content:** The first part of the course introduces the main theoretical approaches that provide alternative explanations for key questions about international institutions: their creation, institutional design, decision-making processes, their impact and their interactions with other international institutions. The second part analyses these key questions with regard to specific international institutions, including the United Nations, the European Union, the North Atlantic Treaty Organisation, the World Trade Organisation, the International Monetary Fund and the World Bank, as well as international institutions in the areas of human rights, environmental protection, and health policy.

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas and Lent Term.

Students on this course will have a reading week in Week 6 of each term, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 formative essay in the MT and 1 formative assessment in the LT. Each seminar participant is required to give presentations on seminar topics.

**Indicative reading:** Volker Rittberger, Bernhard Zangl, Andreas Kruck and Hylke Dijkstra. 2019. *International Organization: Polity, Politics and Policies*, Third Edition, London: Red Globe Press  
Ian Hurd. 2018. *International Organizations: Politics, Law, Practice*,

Third Edition. Cambridge: Cambridge University Press  
Aggarwal, V. K. and Dupont, C. (2014) *Cooperation and conflict in the global political economy*. In: Ravenhill, John, *Global political economy*. 4th edition. Oxford: Oxford University Press  
Fehl, C. (2004) 'Explaining the International Criminal Court: A 'Practice Test' for Rationalist and Constructivist Approaches', *European Journal of International Relations* 10(3): 357-94  
Niemann, A. (2006) 'Beyond Problem-Solving and Bargaining: Genuine Debate in EU External Trade Negotiations', *International Negotiation* 11: 467-97

**Assessment:** Essay (100%, 4000 words) in the LT.

## IR416 Not available in 2022/23

### The EU in the World

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Karen Smith CBG.10.04

**Availability:** This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in The Global Political Economy of China and Europe (LSE and Fudan) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply but that may not continue to be the case.

**Pre-requisites:** Some basic knowledge of International Relations as an academic discipline is desirable, together with some acquaintance with the general evolution of world politics over the last one hundred years.

**Course content:** The development of the external activities of the European Communities, now the European Union, since 1957, including the development of European Political Cooperation and the Common Foreign and Security Policy, and trade and development policy. The relationship between the member states and these external activities, in particular the impact of the evolution of EU institutions and policies on national foreign policies. Relations between the EU and non-EU states and regions, including the United States, Russia, the Middle East, Asia and Africa.

Watch a short introductory video on this course:

<http://www.lse.ac.uk/internationalRelations/video/IR416-EUW-video.aspx>

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Michaelmas and Lent Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students are expected to submit two 2,000-word essays during the course, to be marked by seminar leaders. Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

**Indicative reading:** Sieglinde Gstöhl and Simon Schunz, eds, *The External Action of the European Union*, Macmillan, 2021  
Amelia Hadfield, Ian Manners, and Richard Whitman, eds, *Foreign Policies of EU Member States*, Routledge 2017  
Christopher Hill and Michael Smith (eds), *International Relations and the European Union*, 3rd edition, OUP, 2017

**Availability:** This course is available on the MSc in Development Studies, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** The course looks at how states in the Asia-Pacific region develop policies and strategies to manage international crises and build stability through regionalization. The first term develops knowledge of the policies and strategies of the states in Northeast Asia and uses scenario building to explore the management of the challenges posed by the rise of China and the role of the US, disputes over territory in the East China Sea between China and Japan, the status and security of Taiwan, and the nuclear crisis on the Korean Peninsula. The second term focuses on Southeast Asia's international relations. Topics covered include the region's state-formation processes; Southeast Asia's inter-state relations, ASEAN's search for regional order, the development and potential of economic regionalism, the Southeast Asia strategies and policies pursued by the United States and China, the foreign policy ambitions and roles of Indonesia as the largest state in the sub-region, the multi-faceted (e.g. hedging) strategies adopted by maritime and continental Southeast Asian states vis-à-vis great powers and China in particular, and the case of Myanmar to explore the prospects for peace and stability, democracy, and human rights against the backdrop of geopolitical change.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Michaelmas, Lent and Summer Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce one 2,000-word policy paper in the MT and one 2,000-word essay in the LT on dates stipulated by the teacher responsible.

**Indicative reading:**

- Michael Yahuda, *The International Politics of the Asia-Pacific, 1945-1995* (Routledge Curzon, 4th edn, 2019);
- Alagappa (Ed), *Asian Security Order* (Stanford University Press 2003);
- Amitav Acharya, *The Making of Southeast Asia* (Cornell University Press, 2013);
- Christopher Dent, *East Asian Regionalism* (Routledge, 2nd ed., 2016);
- Evelyn Goh *The Struggle for Order: Hegemony, Hierarchy, and Transition in Post-Cold War East Asia* (Oxford, 2015);
- Leszek Buszynski, *Geopolitics and the Western Pacific: China, Japan and the US* (Routledge, 201)
- Maung Aung Myoe, *In the Name of Pauk-Phaw: Myanmar's China Policy Since 1948* (ISEAS, 2011)

**Assessment:** Exam (50%, duration: 2 hours) in the summer exam period.

Coursework (50%, 2000 words) in the LT.

The 50% coursework will be a policy memo. The exam will cover LT material.

**IR419****International Relations of the Middle East**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Fawaz Gerges CBG.10.03

**Availability:** This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is intended primarily for students on programmes run by the Department of International Relations (IR). Students on the MSc in Comparative Politics and MSc in Global Politics may take the course, but this is subject to students demonstrating that they have a grasp of International Relations theory, or have made efforts to cover this ground before starting the course.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Students external to the IR department must clearly outline the extent to which they are familiar with IR theory / efforts they will make to familiarise themselves with this area before the course begins.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply, but that may not continue to be the case.

**Pre-requisites:** A knowledge of the international political system, of the major issues in its contemporary development, and at least a basic understanding of core International Relations theory, is required. Background in IR and/or political science and/or history is a prerequisite.

**Course content:** The course is intended to provide an analysis of the regional politics of the Middle East since 1918, and of their interaction with problems of international security, global resources and great power/super power/hyperpower politics.

Topics covered include: The emergence of the state system in the Middle East during the inter-war period; the interplay of domestic politics, regional conflicts and international rivalries; the Cold War and post-Cold War significance of the Middle East in global politics; the importance of oil and other economic factors and interests; conflict in the Gulf and the Arab-Israeli conflict; the foreign policies of major Middle Eastern states and the Lebanese civil war; the role of ideologies and social movements: Arab nationalism, militarism, political Islam and global jihadism; state and non-state actors; democracy and human rights issues, the Arab Spring uprisings; and international relations theory and its significance for the study of Middle East politics.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Michaelmas, Lent and Summer Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 2 essays and 2 presentations in the MT and LT.

Seminar attendees will be expected to submit two 2,500-word essays, based on past examination papers, to be marked by their seminar teacher, and to give presentations in both the MT and LT.

**Indicative reading: Students are strongly advised to read before the beginning of the course:**

- Fawaz A. Gerges, *Making the Arab World: Nasser, Qutb, and the Clash That Shaped the Middle East*
  - F. Halliday, *The Middle East in International Relations: Power, Politics and Ideology*
  - Madawi al-Rasheed, *A Most Masculine State: Gender, Politics and Religion in Saudi Arabia*
  - Fawaz A. Gerges, *The Superpowers and the Middle East: Regional and International Politics*
  - Louise Fawcett, *International relations of the Middle East*
- In addition they are recommended to consult:**
- Nazih Ayubi, *Over-stating the Arab State: politics and society in the Middle East*
  - Lisa Anderson, 'The State in the Middle East and North Africa'

- Comparative Politics, October 1987
- R Hinnebusch & A Ehteshami (Eds), *The Foreign Policies of Middle East States*
  - B Korany & A Dessouki (Eds), *The Foreign Policies of Arab States*
  - John Chalcraft, *Popular Politics in the Making of the Middle East*
  - Madawi al-Rasheed, *Demystifying the Caliphate*
  - Fanar Haddad, *Sectarianism in Iraq: Antagonistic Visions of Unity*
  - Fawaz A. Gerges (ed.), *The New Middle East: Protest and Revolution in the Arab World*
  - Z. Lockman, *Contending Visions of the Middle East: The History and Politics of Orientalism*

**Assessment:** Take-home assessment (100%) in the ST.

## IR422

### Conflict and Peacebuilding

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr David Rampton

**Availability:** This course is available on the MSc in Conflict Studies, MSc in Gender, Peace and Security, MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Pre-requisites:** A basic background knowledge of the subject would be an advantage.

**Course content:** This course is intended for those interested in theoretical and practical approaches to the question of peace, the problems of war, conflict and violence, and responses to them particularly in the form of liberal peacebuilding and statebuilding. The course is divided into three unequal but interconnected parts. The first part examines ideas and debates about the concepts, causes, contexts, dynamics and representations of conflict, violence and war. The second explores and problematises the concept of peace and the nature, meanings and goals of peace and peacebuilding. This leads into the third section which is concerned with a critical engagement with the range of international responses to conflict associated with the discourses and practices of liberal peacebuilding and statebuilding. The seminars explore the nexus between theory and practice. Although the course and its readings are mainly theoretical and conceptual rather than empirical, students are encouraged to apply the ideas to actual cases, past and present. The course reading list has been selected in order to explore the contentions between mainstream and critical (e.g. feminist, postcolonial and poststructural) perspectives.

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas and Lent Term. Students on this course will have a reading week in Week 6, in line with departmental policy. The course teaching includes film showings linked to some of the lecture themes, followed by a discussion session. These are normally delivered in-person but may occasionally involve online screening and discussion sessions.

**Formative coursework:** Students will be expected to produce 1 essay in the MT and 1 piece of coursework in the LT. The MT formative essay up to 2,000 words. The LT essay outline up to 1,500 words.

**Indicative reading:** Mark Duffield *Global Governance and the New Wars* (Zed Books 2014).

Sinisa Malesevic *The Sociology of War and Violence* (Cambridge University Press 2010).

Gezim Visoka *Peace Figuration after International Intervention:*

*Intentions, Events and Consequences of Liberal Peacebuilding* (Routledge 2018)

Edward Newman and Karl DeRouen (eds.) *Routledge Handbook of Civil Wars* (Routledge, 2016).

Jacob Bercovitch, Victor Kremenyuk and William Zartman (eds.) *The Sage Handbook of Conflict Resolution* (Sage Publications, 2009)

Oliver Richmond (ed.) *Palgrave Advances in Peacebuilding: Critical Developments and Approaches* (Palgrave MacMillan UK 2010).

Hugh Miall, Oliver Ramsbotham, and Tom Woodhouse, *Contemporary Conflict Resolution: The Prevention, Management and Transformation of Deadly Conflicts*, 3rd ed (Polity, 2011).

**Assessment:** Essay (40%, 2500 words) in the LT.

Essay (60%, 4000 words) in the ST.

## IR433 Half Unit Not available in 2022/23

### The International Politics of EU Enlargement

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Karen Smith CLM.4.09

**Availability:** This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

**All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE4You.**

**Admission is not guaranteed.**

**Course content:** This course examines EU enlargement from the point of view of International Relations. The principal aim is to understand the interplay between enlargement, EU (foreign) policy and wider geopolitics. With this in mind enlargement is considered both as an act of European foreign policy and as a phenomenon impacting on the (foreign) policies of other states and actors. The course begins with a discussion of the theoretical issues of the international dimension of EU enlargement, including: size; diversity; pace of change; reach; external reactions; and the widening v. deepening dilemma within the EU. It moves on to a broadly chronological discussion of the various phases of enlargement from 1973 to the present, examining the inputs from key Member States as well as from the EU institutions, and analysing the extent to which strategic policy-making characterised each round. In the last part of the course attention switches to more thematic concerns: the impact of EU enlargement on the self-excluded states (Norway, Switzerland, Iceland, and the UK); security, NATO and the post-Cold War European order; the geopolitical issue of Europe's final border; and the view from outsiders, such as the United States and Russia.

Watch a short introductory video on this course: <http://www.lse.ac.uk/internationalRelations/video/IR433-EUE-video.aspx>

**Teaching:** 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Two 2,000-word essays.

**Indicative reading:** Marise Cremona, ed, *The Enlargement of the European Union* (Oxford University Press, 2003); Heather Grabbe, *The EU's Transformative Power: Europeanization Through Conditionality in Central and Eastern Europe* (Palgrave, 2006); IDEAS, *Special Report, The Crisis of EU Enlargement*, 2014; Neill Nugent, ed., *European Union Enlargement* (Palgrave, 2004); Frank Schimmelfennig and Ulrich Sedelmeier, eds., *The Politics of European Union Enlargement: Theoretical Approaches* (Routledge, 2005); Christina J. Schneider, *Conflict, Negotiation and European Union Enlargement* (Cambridge University Press, 2009); Helene Sjursen, ed., *Questioning EU Enlargement: Europe in Search of Identity* (Routledge, 2006); Karen E. Smith, *The Making of EU*

Foreign Policy: The Case of Eastern Europe, 2nd edition (Palgrave, 2004)

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

## IR434 Half Unit

### European Defence and Security

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Irene Morlino

**Availability:** This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students who apply but that may not continue to be the case.

**Course content:** This course examines the role of defence and security issues in European integration. It traces the evolution and nature of decision-making with respect to European defence initiatives, and examines the structures and institutions of EU defence and security. It also seeks to understand the relationship between foreign policy and security/defence policy in the EU especially in the context of transatlantic relations, and NATO, and the EU's wider international role. The course examines defence and security issues in European integration, as well as addressing the question of defence and European identity, the relationship between European defence and the national objectives of Member States, the link between collective defence and collective security, and the role of defence in the EU's evolution as a civilian, normative and global actor in international relations. The course also examines the relationship between NATO and European security concerns, and more contemporary developments with regard to provisions for crisis management and conflict prevention.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

The essay word limit will be 2,000 words.

**Indicative reading:** Anne Deighton (Ed), Western European Union: Defence Security Integration; Andrew Cottey, Security in the New Europe; Jolyon Howorth, Security and Defence Policy in the European Union; Simon Duke, The Elusive Quest for European Security; From EDC to CFSP; Paul Gebhard, The United States and European Security; Heather Grabbe, The Sharp Edges of Europe; Francois Heisbourg et al, European Defence: Making it Work; Sean Kay, Nato and the Future of European Security; G Rees Wyn, The Western European Union at the Crossroads; Stanley Sloan, The United States and European Defence; Panos Tsakaloyannis, The European Union as a Security Community (1996).

**Assessment:** Take-home assessment (100%) in the ST.

---

## IR445

### Global Politics of China

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof William A. Callahan CBG.9.05

**Availability:** This course is available on the MSc in China in Comparative Perspective, MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** China has long been of interest to students of International Relations due to its historical role as the major power of East Asia, and its current status as a great power with influence in geopolitics, world trade, and global governance. The course lectures examine the development of China's relations with the world in terms of history, culture, and policy-making, and consider how power works in various ways: economic power, military power, soft power, United Front Work, race and gender, and normative power. The remainder of the course analyses case studies on China's relations with the United States, Russia, Japan, Hong Kong and Taiwan, Southeast Asia, and on the topical issues of Chinese IR theory, grand strategy, the Belt and Road Initiative, the environment, global cyber-politics, and Chinese world orders (including analysing science fiction for China's futuristic 'galactic politics').

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas, Lent and Summer Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will complete two 2,000 word essays during the course and will make two presentations to the seminar. It is permissible for the presentations to be on the same topics as the essays.

**Indicative reading:** Economy, Elizabeth C., The World According to China, Oxford University Press, 2022.

Breslin, Shaun. China Risen? Studying Chinese Global Power, Bristol University Press, 2021.

Yahuda, Michael, The International Politics of the Asia-Pacific, 4 edn. London: Routledge, 2019.

Zhao, Suisheng, China's Big Power Ambition under Xi Jinping: Narratives and Driving Forces, Routledge, 2021.

**Assessment:** Take-home assessment (100%) in the ST.

---

## IR448 Half Unit

### American Grand Strategy

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Peter Trubowitz CBG 10.16

**Availability:** This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply but that may not continue to be the case.

**Course content:** This course will explore American foreign policy at the broadest level of analysis – the level known as grand strategy. The course will showcase the main theoretical

perspectives that inform the study of US grand strategy and apply them to historical and contemporary cases of American statecraft. In this connection, we will assess the relevance of the US experience for theorizing about power politics and the implications of alternative theories for thinking critically about American behaviour. Students will gain an appreciation of the debates and controversies that animate the study of US foreign policy, as well as of the unique challenges posed by making foreign policy in the American political, economic, and cultural context.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term (LT). Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will write short weekly blog posts on Moodle and provide an 800-word outline of their assessed essay by the end of Week 8. This will be returned by the end of LT.

**Indicative reading:**

- John Lewis Gaddis, *Strategies of Containment* (2005)
- Peter Trubowitz, *Politics and Strategy* (Princeton 2011)
- Linda Weiss, *America Inc.?* (Cornell 2014)
- Rebecca Thorpe, *The American Warfare State* (Chicago 2014)
- Fareed Zakaria, *From Wealth to Power* (Princeton 1998)
- Robert Kagan, *The Jungle Grows Back* (Knopf, 2018)
- Joan Hoff, *A Faustian Foreign Policy* (Cambridge 2008)

**Assessment:** Essay (100%, 4000 words) in the ST.

Students will write a 4,000-word assessed essay selecting from a list of topics and questions provided by the course coordinator. The essay will be due at the end of Week 1 of the ST.

## IR452 Half Unit Not available in 2022/23 Empire and Conflict in World Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Tarak Barkawi CBG.9.03

**Availability:** This course is available on the CEMS Exchange, MBA Exchange, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Gender, Peace and Security, MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** This is a course about war and empire. Many peoples and places in the world have been shaped by imperialism. This course explores some of the violent dimensions of the imperial past and present. It imagines world politics as a space of co-constitution and war or violent conflict as a form of social interconnection. The course considers armed conflict in imperial context from colonial "small war" through to the War on Terror. It looks at how warfare shapes (and is shaped by) the societies, cultures and politics that populate world politics. The course considers also some of the intellectual traditions that have arisen out of the experience of, and inquiry into, colonial violence, from the thought of resistance leaders to subaltern and postcolonial studies. The premise of the course is that imperial warfare and violence have been generative forces in shaping world politics, well beyond the times and places of specific battles and killings. This course familiarises students with some themes from scholarship on empire and conflict in the social sciences and humanities. This involves, first, understanding the limitations of the sovereign nation-state as the basic unit of world politics. For most people in most times and places, international relations have taken imperial form of one kind or another. What would it mean to take empire seriously in international thought and inquiry? The course approaches this question by looking at the relations between

empire and globalisation in historical and theoretical context. Second, although much scholarship on empire concerns economy and culture, the history of empire is a history of continual warfare and armed resistance. Such "small wars" have shaped society and politics in both the core and periphery of the international system, and often continue to do so long after the guns fall silent (as for example in the case of the US and the Vietnam War). The course will cover the histories, strategies and theories associated with such wars and their effects. Third and finally, the course will explore the intersection between empire and knowledge in political theory and social inquiry. Not only did anti-colonial resistance produce its own theorists, such as Frantz Fanon and Mao Zedong, but in recent decades empire has been the site of new turns in social and political theory and inquiry, as for example in subaltern studies and post-colonialism. The course will introduce students to this work and its applications to understanding world politics.

**MSc Seminars.**

The seminars will develop students' abilities to read, digest, and critique monograph length texts. Each will be based upon a single book. Students will be expected to read the assigned book in its entirety before each seminar. Every student will be expected to come to seminar prepared to participate. There will be no individual seminar presentations. Every student is expected to speak in every seminar. Students should be prepared to comment on the main argument of each book; to place each text in a wider intellectual context, concerning for example the debates and audiences the book is speaking to; and to offer a critical assessment of the book's contributions.

Note: The required texts for this course change every year.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/ classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:**

- Tzvetan Todorov, *The Conquest of America: The Question of the Other* (Norman: University of Oklahoma Press, 1999 [1984]).
- Peter Linebaugh and Marcus Rediker, *The Many-Headed Hydra: The Hidden History of the Revolutionary Atlantic* (London: Verso, 2000).
- Ranajit Guha, *Elementary Aspects of Peasant Insurgency in Colonial India* (Durham and London: Duke University Press, 1999).
- Edward Said, *Culture and Imperialism* (New York: Vintage, 1994 [1993]).
- Frantz Fanon, *The Wretched of the Earth* (Harmondsworth: Penguin Books, 1967 [1961]).
- Lisa Yoneyama, *Cold War Ruins: Transpacific Critique of American Justice and Japanese War Crimes* (Durham: Duke University Press, 2016)
- Gary Wilder, *Freedom Time: Negritude, Decolonization and the Future of the World* (Durham: Duke University Press, 2015)
- Greg Grandin, *Empire's Workshop: Latin America, the United States, and the Rise of the New Imperialism* (New York: Owl Books, 2007 [2006]).
- Faisal Devji, *The Terrorist in Search of Humanity: Militant Islam and Global Politics* (London: Hurst, 2008).

**Assessment:** Essay (100%, 5000 words) in the ST.

## IR453 Half Unit Global Business in International Relations

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ellen Holtmaat

**Availability:** This course is available on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is available with permission as an outside

option to students on other programmes where regulations permit. All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** This course examines the role of global business as an actor in international relations. It reviews the political and economic theories that seek to explain the rise of global business, paying attention in particular to International Relations and International Political Economy theories (realism, liberalism, Marxism), but also covering the main economic explanations of MNCs. Thereafter, the course examines the interaction between global business and states in international relations. This involves the study of corporate power and how to conceptualise it in IPE, the study of state-firm bargaining over investment decisions, and the regulation of global business by states and international governance institutions. The final part of the course considers the role that global business plays in selected global policy areas: economic development, environmental protection and human rights.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Michaelmas Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

10 lectures and 10 seminars on the following topics:

1. Introduction: global business in international relations
2. Globalisation and the rise of MNCs
3. Economic theories of the global firm
4. The political economy of MNC-state relations
5. International rules for MNCs I: trade and investment
6. International rules for MNCs II: taxation and offshore finance
7. The UN and global business regulation
8. MNCs, FDI and developing countries
9. MNCs and environmental protection
10. MNCs, corporate social responsibility and human rights

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

Formative essay of 2,000 words.

**Indicative reading:**

- Bonnitcha, J., Poulsen, L. N. S., & Waibel, M. (2017). *The political economy of the investment treaty regime*: Oxford University Press.
- Dashwood, H. S. (2012). *The Rise of Global Corporate Social Responsibility: Mining and the Spread of Global Norms*. Cambridge, Cambridge University Press.
- Falkner, R. (2008). *Business Power and Conflict in International Environmental Politics*. Basingstoke, Palgrave Macmillan.
- Hughes, O. E. and D. O'Neill (2008). *Business, Government and Globalization*. Basingstoke, Palgrave Macmillan.
- Knudsen, J.S. and J. Moon (2017). *Visible Hands. Government Regulation and International Business Responsibility*. Cambridge, Cambridge University Press.
- Manger, M. (2009). *Investing in Protection*. Cambridge, Cambridge University Press.

- Rugman, A. M. (2014). *Multinationals and development*: Yale University Press.
- Woll, C. (2008). *Firm Interests: How Governments Shape Business Lobbying on Global Trade*. Ithaca, Cornell University Press.

**Assessment:** Take-home assessment (100%) in January.

## IR454 Half Unit

### Governing International Political Economy: Lessons from the Past for the Future

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr James Morrison CBG.8.06

**Availability:** This course is available on the MSc in Financial History, MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** History has always been central to the study and practice of international political economy. The field's most influential scholars and practitioners have repeatedly turned to history both to explain, and to offer a fresh perspective on, the great challenges of their times. This course is designed to help students cultivate that invaluable skill and habit of mind. Tracing the evolution of the global political-economic order across the last several centuries, this course examines:

- canonical theorists' particular treatments of international political economy.
- the on-going, timeless debate between these theorists.
- the major shifts in the global political-economic order.
- the interaction between theories and policy shifts.

A number of important questions will be considered, including:

- What role do ideas play in international relations?
- To what extent can individual actors shape the global political-economic order?
- Do circumstances determine which ideas and which leaders come to the fore? Or do men and women make their own history?
- What does this history reveal that might help us to shape international politics today and in the future?

This course considers international order from the standpoint of both international security and international political economy. It will appeal to students who want to delve deeper into the history and evolution of the international system.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Michaelmas Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce an essay and deliver an in-class presentation.

**Indicative reading:** Keynes, JM. *The Economic Consequences of the Peace*.

Marx, Karl. *The Eighteenth Brumaire of Louis Napoleon*.

Angell, Norman. *The Great Illusion*.

Arendt, Hannah. *The Origins of Totalitarianism*.

**Assessment:** Essay (100%, 2000 words) in the LT.

## IR461

### Islam in World Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof John Sidel

**Availability:** This course is available on the MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Global Politics, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where

regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** The course focuses on the role of Islam in world politics, posing two inter-related questions: First, how can we explain the varying nature and strength of Islam as a discursive and mobilizational force in world politics? Second, how should we understand the impact of changes in world politics on the institutions, authority structures, and identities associated with Islam? In this course, the approach to these questions is comparative. The course begins with an examination of the distinctive transnational structures of Islam as compared with another major world religion: Christianity. The trajectory of Islam as a force in international relations since the late 19th century is examined across successive periods in world history. The course covers the expanding instrumentalization of Islam by state leaders and the rise of transnational Islamist networks from the late Ottoman era through the tumultuous years of mass mobilisation in the interwar era, demobilisation with the formation of new nation-states in the early Cold War era, and the revival of Islam in world politics by the 1970s with the Iranian Revolution and developments elsewhere in the Muslim world. But most of the course covers the contemporary post-Cold War era, examining the varying role of Islam in diverse regional settings - Asia, Africa, the Middle East, and Europe - and in the contexts of globalization and democratization, mass migration, separatist struggles and regional conflicts. Close attention is paid to the role of Saudi Arabia and Iran and the rise of sectarian conflict between Sunnis and Shi'a. The course also focuses on important cases like Al Qa'ida and the Taliban in Afghanistan and Pakistan, civil wars in settings as varied as Chechnya and Somalia, the rise of the so-called 'Islamic State' in Iraq and Syria, as well as important trends in the UK and across Europe, with close attention to the rise of Islamophobia in these countries and elsewhere.

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas, Lent and Summer terms. Professor Sidel will be solely responsible for the lectures and the seminars. Students will be divided into seminar discussion groups at the beginning of the course.

**Formative coursework:** Students are expected to submit two essays of roughly 2,000 words in length over the Michaelmas and Lent terms. These essays should address questions drawn from the course outline and reading list or agreed with the course instructor, who will also provide guidance on structure, substance, and sources, and extensive feedback.

**Indicative reading:** Akbar Ahmed, *The Thistle and the Drone: How America's War on Terror Became a Global War on Tribal Islam* (Washington, DC: Brookings Institution Press, 2013); Seema Alavi, *Muslim Cosmopolitanism in the Age of Empire* (Cambridge, MA: Harvard University Press, 2015); Mayanthi L. Fernando, *The Republic Unsettled: Muslim French and the Contradictions of Secularism* (Durham, NC: Duke University Press, 2014); Fawaz A. Gerges, *ISIS: A History* (Princeton, NJ: Princeton University Press, 2016); Antonio Giustozzi, *The Taliban at War: 2001-2018* (London: C. Hurst, 2019); Fanar Haddad, *Understanding 'Sectarianism': Sunni-Shi'a Relations in the Modern Arab World* (London: C. Hurst, 2020); Darryl Li, *The Universal Enemy: Jihad, Empire, and the Challenge of Solidarity* (Stanford, CA: Stanford University Press, 2019); Laurence Louer, *Shiism and Politics in the Middle East* (London: C. Hurst, 2013); Carrie Rosefsky Wickham, *The Muslim Brotherhood: Evolution of an Islamist Movement* (Princeton, NJ: Princeton University Press, 2013); Mohammad Ayatollahi Tabar, *Religious Statecraft: Politics and Islam in Iran* (New York: Columbia University Press, 2017).

**Assessment:** Take-home assessment (100%) in the ST.

## IR462 Half Unit Not available in 2022/23 International Political Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Henry Radice

**Availability:** This course is available on the MSc in China in Comparative Perspective, MSc in Global Politics, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory, MSc in Political Theory and MSc in Theory and History of International Relations. This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

**Course content:** Introduction to International Political Theory; the ethics of statehood; the politics of humanity; human rights and their critiques; humanitarianism; the ethics of war and violence; global justice; borders, migration, and refugees; climate ethics.

**Teaching:** 18 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 x 2,000 word essay and a 2-page outline of the summative essay.

**Indicative reading:** Appiah, K.A. *Cosmopolitanism: Ethics in a World of Strangers* (Allen Lane, 2006); Benhabib, S. *Another Cosmopolitanism* (Oxford, 2006); Brown C. and Eckersley R. *The Oxford Handbook of International Political Theory* (Oxford, 2018); Brown C. *International Society, Global Polity* (Sage, 2015); Crawford, N. *Argument and Change in World Politics* (Cambridge, 2002); Erskine, T. *Embedded Cosmopolitanism* (Oxford, 2008); Griffin, J. *On Human Rights* (Oxford, 2009); Hutchings, K. *Global Ethics: An Introduction* (Polity, 2010); Walzer M. *Just and Unjust Wars* (Basic Books, 2006).

**Assessment:** Essay (100%, 4000 words) in the LT.

## IR464 Half Unit Not available in 2022/23 The Politics of International Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Kirsten Ainley

**Availability:** This course is available on the MSc in China in Comparative Perspective, MSc in Global Politics, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is not available as an outside option.

**Course content:** An introduction to the politics of the creation and implementation of international law, intended for non-lawyers. The course focuses on the areas of international law most relevant to International Political Theory: human rights, the use of force and international crime, and examines the increasing legalization of international politics, the tensions between international politics and international law, alternatives to international law and international law post 9/11.

Watch a short introductory video on this course: <http://www2.lse.ac.uk/internationalRelations/video/IR464-PIL-video.aspx>

**Teaching:** 20 hours of seminars in the LT. 4 hours of seminars in the ST.

There are no lectures on the course, but there are a number of voluntary workshops as well as a voluntary class trip to international courts in The Hague. Students on this course will have a reading week in Week 6, in line with departmental policy

**Formative coursework:** A 2000-2500 word essay.

**Indicative reading:** Alter, K. *The New Terrain of International Law* (Princeton, 2014); Armstrong, D. *International Law & International Relations* (Cambridge, 2007); Bass, G. *Stay the Hand of Vengeance: The Politics of War Crimes Tribunals* (Princeton UP, 2000); Charlesworth, H. & Chinkin, C. *The Boundaries of International Law* (Manchester UP, 2000); Koskeniemi, M. *The Politics of International Law* (Hart, 2011); Maogoto, J. *War Crimes and Realpolitik: International Justice from World War I to the 21st Century* (Lynn Rienner, 2004); McGoldrick, D. *From 9-11 to the Iraq War 2003: International Law in an Age of Complexity* (Hart Publishing, 2004); Orford, A. *Reading Humanitarian Intervention* (Cambridge, 2003); Reus-Smit, C. ed. *The Politics of International Law* (Cambridge, 2004); Simpson, G. *Law, War & Crime* (Polity, 2007).

**Assessment:** Essay (100%, 4000 words) in the ST.

## IR465 Not available in 2022/23

### The International Politics of Culture and Religion

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Katerina Dalacoura CBG.9.14

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Human Rights, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

**All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed.**

**Pre-requisites:** Background in International Relations or a related discipline.

**Course content:** The overall objective of the course will be to explore the role of culture and religion in the discipline of IR from both a theoretical and an empirical perspective, using Islam as a major case study. The first part of the course will place culture and religion within the broader context of global history, global modernity and social science. In its second part, the course will concentrate on the role of culture and religion in a number of international relations theories, such as constructivism, the English School, cosmopolitanism and communitarianism, historical sociology, post-colonialism and feminism. The third part of the course will examine the role that cultural and religious issues play in the practice of international relations and in particular their influence on international norms, foreign policy, conflict and war and theories of the state.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** Students will be expected to produce 1 essay in the MT and 2 essays in the LT.

Formative essays 2,000 words.

**Indicative reading:** A detailed reading list will be available online and in printed form well before the first lecture/seminar.

W.C. Smith (1991) *The Meaning and End of Religion* (Fortress Press).

Monica Toft (2013) 'Religion and International Relations Theory', in: Risse, Thomas, Walter

Carlsnaes, and Beth A Simmons. *Handbook of International Relations*, edited by Thomas Risse, et al. (SAGE Publications)

Christian Reus-Smit (2018) *On Cultural Diversity* (Cambridge University Press)

Brenda Shaffer, ed. (2006) *The Limits of Culture: Islam and Foreign Policy* (MIT Press)

Ashis Nandy (1988) *The Intimate Enemy: Loss and Recovery of*

*Self under Colonialism* (Oxford University Press)

**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.

## IR466 Half Unit Genocide

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Jens Meierhenrich CBG.10.01

**Availability:** This course is available on the MSc in Conflict Studies, MSc in Gender, Peace and Security, MSc in Global Politics, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Theory and History of International Relations and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** This seminar course provides an introduction to the study of genocide. The course's disciplinary ambit ranges from anthropology to economics, from history to law, and from political science to sociology. Against the background of diverse disciplinary approaches, it explores major theoretical and empirical aspects of the role(s) of genocidal campaigns in international politics, inter alia, their origins, development, and termination; the manner of their perpetration, progression, and diffusion; their impact on the maintenance of international peace and security; their consequences for the reconstruction and development of states and the building of nations; and their adjudication in domestic and international courts and tribunals. Empirical cases to be discussed include Australia, Cambodia, China, the Democratic Republic of Congo, East Timor, Nazi Germany, Guatemala, Iraq, Northern Ireland, the Ottoman Empire, Rwanda, Uganda, the Soviet Union, Sudan, and the former Yugoslavia, among others. The course is designed to equip students with the analytic tools necessary for making sense of the evolution of the international system from the nineteenth century to the present and for critically assessing the promise and limits of responding to collective violence.

**Teaching:** This course is delivered through ten 2-hour seminars, totalling a minimum of 20 hours in Michaelmas Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students are required to research and write one formative essay (2,000 words) due in Week 7 of Michaelmas Term. Essays must be fully - and carefully - referenced using one of the major conventions consistently.

**Indicative reading:** Lee Ann Fujii, *Show Time: The Logic and Power of Violent Display* (Ithaca: Cornell University Press, 2021).

Christian Gerlach, *The Extermination of the European Jews* (Cambridge: Cambridge University Press, 2016).

Jens Meierhenrich, *Genocide: A Reader* (Oxford: Oxford University Press, 2014).

A. Dirk Moses, *The Problems of Genocide: Permanent Security and the Language of Transgression* (Cambridge: Cambridge University Press, 2021).

Diane M. Nelson, *Who Counts? The Mathematics of Death and Life after Genocide* (Durham and London: Duke University Press, 2015).

Gérard Prunier, *Africa's World War: Congo, the Rwandan Genocide, and the Making of a Continental Catastrophe* (Oxford: Oxford University Press, 2009)

Sean R. Roberts, *The War on the Uyghurs: China's Internal Campaign against a Muslim Minority* (Princeton: Princeton University Press, 2020)

William A. Schabas, *Genocide in International Law: The Crimes of Crimes*, Second edition (Cambridge: Cambridge University Press, 2009).

**Assessment:** Essay (100%, 5000 words) in the LT.

Essays must be fully - and carefully - referenced using one of the major conventions consistently.

## IR467 Half Unit Global Environmental Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Joanna Flavell CBG 10.08

**Availability:** This course is available on the MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in Political Science and Political Economy and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** An introduction to concepts and issues in the study of global environmental politics, with special emphasis on the political economy of environmental protection. The course will explore environmentalism and the greening of society through different theoretical and ideological perspectives. Throughout the course, students will interrogate what it means to demonstrate 'environmental leadership' and examine different environmental actors from non-state actors (NGOs and business), environmental movements and traditional political environmental leaders. Students will expand their knowledge on different aspects of global environmental politics, engaging with concepts such as Sustainable Development; private environmental governance; trade and environment; climate change; biodiversity; deforestation.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Indicative List of Topics:

- Introduction: The rise of global environmentalism in international politics.
- Environmental Theories and Perspectives.
- Global Environmental Governance.
- Environmental Movements.
- Environmental NGOs and non-state actors.
- Global Finance, aid and Sustainable Development.
- Multinational corporations and private environmental governance

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:** Betsill, M. M., K. Hochstetler and D. Stevis, Eds. (2014). *Advances in International Environmental Politics*. Basingstoke, Palgrave.

Biermann, F., & Kim, R. E. (2020). *Architectures of Earth System Governance: Institutional Complexity and Structural Transformation*. Cambridge: Cambridge University Press.

Jordan, A., Huitema, D., van Asselt, H., & Forster, J. (Eds.). (2018). *Governing Climate Change: Polycentricity in Action?* Cambridge, Cambridge University Press

**Assessment:** Take-home assessment (100%) in the ST.

## IR468 Half Unit The Political Economy of Trade

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr. Marta Soprana

**Availability:** This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research) and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** The course explores the economic and political factors shaping international trade policy and the role of international institutional arrangements underpinning world trade, with a focus on the World Trade Organization (WTO). It covers the nature of the global trading system, the ideational factors that have shaped and continue to shape trade policy, some of the core analytical models that help with our understanding of the political economy of trade, the nature of trade and investment in the 21st century, including the impact of the growth of global supply chains on the political economy of trade and investment, and the domestic and international institutional frameworks within which trade and investment policy are conducted. The course also focuses on discussing key topics in current international trade negotiations, investigating the links between trade and development, and addressing issues related to sustainable trade and fair trade. Attention is also dedicated to examining growing trends towards the use of preferential and plurilateral trade agreements rather than multilateral approaches to trade negotiations, and discussing the current crisis in the world trading system and the sources of international trade frictions.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

The formative essay is 2,000 words.

**Indicative reading:**

- Heydon, K and Woolcock, S (eds) (2012) *The Ashgate Research Companion to International Trade Policy*, HF 1379 A 82: e-book and hard copies available.
- Hoekman, B and Kosteki. (2009) *The Political Economy of the World Trading System* HF 1359 H69 e-book available but

reasonably price in paperback so something to purchase.

- Martin, L (ed) (2014) Oxford Handbook of The Political Economy of International Trade, available as an e-book.

**Assessment:** Take-home assessment (100%) in the ST.

## IR469 Half Unit Politics of Money in the World Economy

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Jeffrey Chwieroth CBG.10.12

**Availability:** This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in Political Science and Political Economy and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access) and demand is typically high.

**Pre-requisites:** Students intending to take the course should have a strong background in monetary economics.

**Course content:** This course is designed as a component of the study of a global system in which the management and mismanagement of money and finance are matters of fundamental consequence for international relations. It is intended to be of particular relevance to students specialising in international political economy. This is a course in applied international political economy theory. It deals with the basic concepts regarding the creation, use and management of money and finance in the global system. Students are then introduced to the political foundations of international monetary governance. Issues covered include the use of national currencies as international money, the politics of exchange rate adjustment, the operations of banks and other institutions in international money and capital markets, the evolution of global financial markets, the relationship between states and markets in the arena of global finance, international monetary cooperation, and the choices of monetary and financial policies open to developed and developing countries. The course emphasises that contemporary issues, such as international financial crises, international financial regulation and the politics of IMF conditionality, are best understood in a broader theoretical and analytical context.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Michaelmas Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

Students are expected to make presentations on topics of their choice and to write one 1,500 word essay, to be marked by the seminar teacher.

**Indicative reading:** No one book covers the entire syllabus, but the following general works provide a useful introduction:

- B Eichengreen, *Globalizing Capital* (2019);
- T Porter, *Globalization and Finance* (2005);
- D Andrews (ed), *International Monetary Power* 2006);
- J Frieden, *Currency politics: the political economy of exchange rate policy* (2015);
- E Helleiner, *The status quo crisis: global financial governance after the 2008 meltdown* (2014);
- C. Norloff, *America's global advantage: US hegemony and*

*international cooperation* (2010);

- B Cohen, *Currency power: understanding monetary rivalry* (2015);
- J Chwieroth and A Walter, *The Wealth Effect* (2019)

**Assessment:** Take-home assessment (100%) in January.

## IR470 Half Unit International Political Economy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr James Morrison CBG.8.06

**Availability:** This course is compulsory on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is not available as an outside option.

This course has a limited number of places (it is controlled access). Students who have this course as a compulsory course are guaranteed a place

**Course content:** This is the core course for the International Political Economy MSc degrees. It principally aims to introduce students to the wide array of approaches taken to the study of international political economy (IPE), broadly construed. This is undertaken so as to: (1) acquaint students with the diversity of approaches in the field; (2) help students identify the strengths and weaknesses of each set of approaches; and (3) enable students to employ—and, as necessary, advance—these approaches in the context of their own academic pursuits. Put more prosaically, the course aims to help students: (1) build a robust "tool kit" for understanding IPE; (2) deepen their understanding of where, when, and how to employ these "tools"; and (3) set students to task utilising these "tools" on their own projects. This should prove particularly helpful in the context of students' dissertation research; but the "core" learned here should complement students' study in all of their other IPE courses as well.

Substantively, the course will grapple with the contending theoretical, analytical, and methodological challenges and opportunities in the field of IPE. The course will also use empirical material from the past and present to both illustrate and probe these approaches. Thus, the course does speak to timeless and contemporary issues in international economic relations; although it is expected that students will develop proper specialist knowledge in their optional courses.

The first part of the course introduces students to the traditional, "mainstream" approaches to IPE. The course then considers the more "modern," "non-mainstream" approaches. The course, however, goes beyond a mere "survey" of the field or a simple "tour" of the "menu" of approaches on offer. Instead, it emphasises the connections—often, the interactions—between the various approaches. For instance, it considers how domestic-level approaches evolved as a response to the perceived failings of system-level approaches (such as Hegemonic Stability Theory). Similarly, it explores the development of feminist approaches from—but also against—other "critical" perspectives.

Yet, the course is also neither a history of the global political economy nor an intellectual history of the field of IPE. Such history will indeed be considered throughout the course; but that will be done toward the end of helping students understand the approaches themselves. Instead, students will be encouraged—and challenged—to discover the insights that each approach can offer, particularly by applying each approach to their own substantive concerns.

This course design ensures that it will be accessible to students who have limited (or no) prior study in the field of International Political Economy. Those who do have such training will have the opportunity to broaden and advance their skills. Thus, previous training in International Political Economy is helpful, but it is not required. The same is true with the cognate fields of international relations (more generally), international economics, comparative politics, sociology, and history. Background in these fields is helpful, but it is not a requirement. The same is true of practical, working experience. It is quite valuable but not required.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Michaelmas Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will submit regular reaction and application papers throughout the term.

Students will also deliver an in-class presentation.

**Indicative reading:** It is advisable to begin reading before the lectures start, particularly for students with no prior training in International Political Economy. The following texts are a good starting point. A more complete source list is provided in the course outline.

Oatley, 'International Political Economy' (2017)

Ravenhill, 'Global Political Economy' (2020)

Walter and Sen, 'Analyzing the Global Political Economy' (2009)

J Frieden, D Lake and JL Broz (eds), 'International Political Economy' (2017)

**Assessment:** Essay (100%, 2500 words) in the LT.

## IR471 Half Unit

### Critical International Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Jens Meierhenrich CBG.10.01

**Availability:** This course is available on the MSc in Gender, Peace and Security, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Theory and History of International Relations and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** This taught graduate seminar introduces students to the theory and history of international accountability. Focusing on justice mechanisms from the Nuremberg, Tokyo, and Eichmann trials to the Waitangi Tribunal and international commissions of inquiry, and from the UN ad hoc tribunals to—especially—the International Criminal Court, the course inquires deeply into the violence of international law. Bringing critical international theory to bear, it blends methodological approaches from law, the social sciences and the humanities. By thinking critically about international law, the seminar raises—and answers—pertinent theoretical and empirical questions about the power—and pathologies—of international organizations. Paying special attention to the ICC's ongoing investigations and prosecutions—its so-called Situations—the course exemplifies the politics of international law in the context of one of the most embattled international organizations in the international system.

**Teaching:** This course is delivered through ten 2-hour seminars totalling a minimum of 20 hours across Lent Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students are required to research and write one formative essay (1,000 words) due in Week 7 of Lent Term. Essays must be fully - and carefully - referenced using one of the major conventions consistently.

**Indicative reading:** Andrea Bianchi, *International Law Theories: An Inquiry into Different Ways of Thinking* (2016).

Prabbakar Singh and Benoit Mayer, eds., *Critical International Law: Postrealism, Postcolonialism, and Transnationalism* (Delhi: Oxford University Press, 2014).

**Assessment:** Essay (100%, 5000 words) in the ST.

Essays must be fully - and carefully - referenced using one of the major conventions consistently.

## IR472 Half Unit

### Diplomacy in the 21st Century

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Thierry Balzacq (Susan Strange Visiting Professor during 2022/2023)

**Availability:** This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the online application linked to the course selection on LSE for You. Admission to the course is not guaranteed.

**Course content:** Diplomacy is one of the oldest institutions of world politics. Its study is on the rise, but the contours of diplomacy has considerably expanded which raises questions about its meaning if not its utility. This course investigates the discourses, theories and practices associated with diplomacy across time, types, and spaces. It equips you with the basic vocabulary of diplomacy and provides you with clear applications of its concepts to a wide range of subjects. Questions of central interest to the course are: What is diplomacy and where does it come from? What difference (if any) is there between state and non-state diplomacies? How is state diplomacy produced? What instruments actors employ to achieve their diplomatic objectives? Why International Organizations recruit "ambassadorial celebrities"? How do new technologies of information and communication influence classical tools of diplomacy? What are the characteristics of diplomacy in different areas (e.g., defense, culture, humanitarian and economics)?

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Indicative topics include:**

1. Introduction.
2. The origins of diplomacy: Western and non-Western lineages.
3. Diplomatic articulations: Ministry of foreign affairs and beyond.
4. Relational social theories and diplomacy.
5. Performing diplomacy: rituals and protocols.
6. Enacting diplomacy: mediation and negotiation.
7. Emotion and rationality: the case of humanitarian diplomacy.
8. The character of diplomatic language.
9. Diplomacies of entertainment.
10. The rise of anti-diplomacies

**Formative coursework:** Students will be expected to produce 1 essay (1,500 words) in the MT.

**Indicative reading:** Balzacq, Thierry, Frédéric Charillon and Frédéric

Ramel (eds.), *Global Diplomacy: An Introduction to Theory and Practice* (Basingstoke: Palgrave Macmillan, 2020).

Berridge, G. R., Maurice Keens-Soper and T. G. Otte, *Diplomatic Theory from Machiavelli to Kissinger* (Basingstoke: Palgrave Macmillan, 2001).

Kerr, Pauline and Geoffrey Wiseman, *Diplomacy in a Globalizing World: Theories and Practices* (New York: Oxford University Press, 2017).

Nicolson, Harold G., *Diplomacy* (Washington: Georgetown University Press, 1998).

**Assessment:** Essay (100%, 4000 words) in the LT.

---

## IR473 Half Unit

### China and the Global South

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Chris Alden 9th Floor IDEAS, PAN

**Availability:** This course is available on the MSc in China in Comparative Perspective, MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply but that may not continue to be the case.

**Course content:** This course focuses on the substantive role that China plays in the Global South where its preponderance of material power and putative developing country status confers upon it a dominant position in bilateral and regional political economies. China's economic position, coupled to an astute use of finances flowing from its mercantilist policies, has enabled it to become the leading trading partner and a significant investor in the developing world. Moreover, the Global South is increasingly figuring in Beijing's expanding security interests and soft power provisions. Interpretations embedded in prevailing academic discussions like socialisation, threat and peaceful rise take on new meaning when studied through the lens of ties with developing countries. Understanding how dynamics in this relationship are impacting upon a host of global and contemporary issues (BRICs, multilateralism, peacekeeping, the environment) is crucial to the shape of the 21st century. Students will acquire a deeper appreciation of the concept of agency linked to the varied response of countries and regional organisations in the Global South, from policy elites to local communities, to China's growing structural power, as well as placing Chinese engagement within the context of other 'traditional' and emerging powers. This will offer a deeper analysis of the way in which the dynamics of China's economic and political model impact on its relationship with the Global South.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Michaelmas Term. Students on this course will have a reading week in Week 6, in line with departmental policy. The course is delivered in cooperation with Dr. Alvaro Mendez (PAN 9.01C).

**Formative coursework:** There are two possible formative coursework options.

The first option is a book review of one of the publications on the reading list (weeks 1 through 4). Students will be expected to produce 1 book review in the MT. Essay length for book review 1000 words.

The second option is to produce a 2 minute video based on course materials (reading lists, lectures and seminar discussions) in

week 1 through 4. The video should be accompanied by a short annotated bibliography.

**Indicative reading:** Ariel Ahram, 'Theory and Method of Qualitative Area Studies', *Qualitative Research* (11:1 2011), pp. 69-90.

**Assessment:** Essay (75%, 4000 words) in the LT.

Presentation (25%) in the MT.

During the course of the seminars students will participate in a group presentation (25%) and submit a 4,000 word essay (75%) at the start of the LT.

---

## IR475 Half Unit

### Gender/ed/ing International Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Katharine Millar CBG.8.13

**Availability:** This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply, but that may not continue to be the case.

**Course content:** This course foregrounds gender - as noun, verb and structure - in understanding the practices/events studies as global politics and the discipline/study of international relations. The course is grounded in feminist theory and provides students with an introduction to feminist epistemologies and methods. It proceeds in two sections, moving from theoretical foundations to an examination of gender and the macro, transnational and historical processes of global politics. Each 'macro' examination of the gendering of international politics is followed by a corresponding examination of several substantive areas of international politics, including security, development, NGOs and transnational social movements and international law/organisations. These overarching topics are balanced with issue-

specific case studies (eg sexual/sexualised violence in conflict; gendering of the informal economy), derived from current events, to be discussed in seminars. Particular thematic attention will be paid to the on-going construction (and transmission) of global/transnational hierarchies that are gendered and gendering.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students must submit formative essay questions and outlines in LT in order to support success in the summative.

**Indicative reading:** B Ackerly, J True and M Stern (eds), *Feminist Methodologies for International Relations* (CUP: 2006)

C Enloe, *Bananas, beaches and bases: making feminist sense of international relations*, rev'd 2nd ed (University of California Press: 2014)

C Mohanty, *Feminism without Borders: Decolonising Theory; Practising Solidarity* (Duke University Press: 2003)

L Sjobeg, *Gender, War and Conflict* (Polity: 2014)

C Weber, *Queer International Relations: sovereignty, sexuality and the will to knowledge* (OUP:2016)

**Assessment:** Coursework (25%) in the LT.

Essay (75%, 4000 words) in the ST.

Coursework (25%) in the LT and essay (75%, 4000 words) in the ST. The coursework is comprised of:

- One (500 word max) blog posts, to a Moodle forum on a week assigned by the instructor (marked with grade, 15%).
- Two (250 word max) response to colleagues' blog posts (completion/participation grade, 10%, 5% each)

Marks are docked for late submission

Summative assessment:

A 4000-word essay delivered in ST (75%)

## IR476 Half Unit Not available in 2022/23 Gender and Political Violence

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Katharine Millar CBG.8.13

**Availability:** This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is not available as an outside option. All students are required to obtain permission of the Teacher Responsible by completing the online application linked to LSE for You. Admission to the course is not guaranteed.

**Course content:** This course foregrounds gender as an analytic lens to highlight and question received wisdom regarding the interrelations of various practices of violence and manifestations of conflict. It moves away from the concept of 'security' to examine assemblages of threats and vulnerabilities that connect and problematise traditional international relations concepts of scale (eg local, national, international) as well as the public and private. Taking gender seriously allows us to trace the 'systems level' war into the everyday, and to follow everyday practices of violence into the global. The course encourages students to consider not only the ways different practices of violence are masculinised/feminised, but also how these gendering violences are implicated in social power relations, sexualised/sexual hierarchies, and the production of order/normality. Geographically, this approach brings the Global North and South into the same analytical frame. Particular thematic emphasis is placed on the questions of what constitutes violence, and how this key conceptualisation relates to our ways of analysing, interpreting and making sense, both academically and experientially, of the phenomenon.

**Teaching:** 20 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 2 essays in the LT.

**Indicative reading:** M Zalweski, *Feminist International Relations: Exquisite Corpse* (2013)

C Sylvester, *War as Experience* (2012)

M Erikson Baaz and M Stern, *Sexual Violence as a Weapon of war?* (2013)

V Hudson, *Sex and World Peace* (2012)

C Nordstrum, *Shadows of War* (2004)

M Jackman, 'Violence in Social Life', *ARS* (Vol.28, 2002)

T N Coates, *Between the World and Me* (2015)

**Assessment:** Essay (100%, 4000 words) in the ST.

## IR477 Half Unit

### The Politics of Peace & Security in Sub-Saharan Africa

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Stephanie Schwartz

**Availability:** This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission of the Teacher Responsible by completing the online application linked to LSE for You. Admission to the course is not guaranteed.

**Course content:** This course explores the politics of peace, civil wars, and security in sub-Saharan Africa as it relates to the broader global context. Using post-independence sub-Saharan Africa as the background, we will explore the causes of civil war and determinants of peace, as well as the different political responses embraced by African leaders and politicians to other security challenges characteristic of the post-colonial period. We will study with a range of cases, including Rwanda, Burundi, Sudan and South Sudan, through which we will engage topics such as the relationship between identity and conflict, the origins of insurgency, conflict prevention, and post-conflict justice and reconciliation.

**Teaching:** This course is delivered through seminars totalling a minimum of 20 hours across Lent Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Each student will be assigned one week to be the discussion leader. Each student must produce 2 reading memos over the course of the semester that draw bullet point links between readings / identify core debates. Students will submit 3 discussion questions each week via moodle.

**Indicative reading:**

**Assessment:** Essay (80%, 4000 words) in the ST.

Class participation (20%).

Students will submit a 4,000 word essay (80%) due in week 1 of the ST.

---

## IR478 Half Unit Not available in 2022/23 Critical War Studies

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Tarak Barkawi CBG.9.03

Tarak Barkawi is Professor in the Department of International Relations at the London School of Economics and Political Science. He studies warfare between the West and the non-European world, past and present. He writes on the pivotal place of armed force in globalization, imperialism, and modernization, and on the neglected significance of war in social and political theory. He is author of *Soldiers of Empire, Globalization and War* and many scholarly articles.

**Availability:** This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed

**Course content:** War transforms the social and political orders in which we live, just as it obliterates our precious certainties. Nowhere is this more obvious than in the fate of truths offered about war itself. War regularly undermines expectations, strategies and theories, and along with them the credibility of those in public life and the academy presumed to speak with authority about it. This course begins with the recognition that the unsettling character of war has been a profound opportunity for scholarship. For it is precisely in war's disordering and unsettling of politics and identities that the socially and historically generative powers of war are exposed. In bending, stretching and even breaking institutions and societies, war reveals them to us anew and offers perspectives obscured in times of peace. At the same time, these disruptions shape and inform the course and character of war. This violent but fecund juncture between war, society and politics is what this course seeks to understand.

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across

Michaelmas Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

This course consists of ten lectures, nine seminars and eight film evenings. It is primarily a book-based graduate seminar.

The lecture series provides concepts, ideas and histories - intellectual scaffolding - against which to read the course books. Each of the nine seminars for this course will be based upon a single book. The seminars will develop students' abilities to read, digest, and critique monograph length texts. Students will be expected to read the assigned book in its entirety before each seminar. Every student will be expected to come to seminar prepared to participate. There will be no individual seminar presentations. Every student is expected to speak in every seminar. Students should be prepared to comment on the main argument of each book; to place each text in a wider intellectual context, concerning for example the debates and audiences the book is speaking to; and to offer a critical assessment of the book's contributions.

The optional film series provides an opportunity for sociability and the exploration of course themes in popular cultures. Films are an important way in which war has shaped modern culture. The course coordinator will briefly introduce each film and a short discussion will follow the screening.

**Formative coursework:** To help them prepare for their summative essay, students will write two 2000 word book reviews of seminar books of their choosing.

**Indicative reading:** Note: required texts change every year

1. Hew Strachan, *Clausewitz's On War* (New York: Grove Press, 2007).
2. Michel Foucault, *Society Must be Defended* (London: Penguin, 2004).
3. Anders Engberg-Pedersen, *Empire of Chance: The Napoleonic Wars and the Disorder of Things* (Cambridge, MA: Harvard University Press, 2015).
4. Helen M. Kinsella, *The Image Before the Weapon: A Critical History of the Distinction between Combatant and Civilian* (Ithaca: Cornell University Press, 2011).
5. Paul Fussell, *The Great War and Modern Memory* (New York: Oxford University Press, 1975).
6. Adam Tooze, *The Deluge: The Great War and Remaking of Global Order* (London: Allen Lane, 2014).
7. Debbie Lisle, *Holidays in the Danger Zone: Entanglements of War and Tourism* (Minneapolis: University of Minnesota Press, 2016).
8. Hugh Gusterson, *Nuclear Rites: A Weapons Laboratory at the End of the Cold War* (Berkeley: University of California Press, 1998).
9. Banu Bargu, *Starve and Immolate: The Politics of Human Weapons* (New York: Columbia University Press, 2014)

**Assessment:** Essay (100%, 5000 words) in the LT.

The course will be 100% assessed by essay due after the end of term and based on a topic of the student's choice.

---

## IR479 Half Unit Russia in World Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Tomila Lankina CBG.10.13

**Availability:** This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is not available as an outside option.

The course offers an analysis of key issues in the development of Russian domestic politics and foreign and security policies and the role that it plays in global politics. It is primarily intended for the courses listed above and is available as an outside option on the MSc in Comparative Politics to students with permission.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access) and demand is typically high.

**Pre-requisites:** There are no formal prerequisites but some knowledge of social science methods and an interest in Russian politics will be taken for granted.

**Course content:** The course covers the various factors shaping Russian domestic politics and political regime, foreign and security policy. It will explore the domestic politics, economy and society changes in political regime over time; and both the traditional foreign policy and security issues, such as Russia's military build-up, economic power projection, the geopolitics of oil and gas, as well as soft power and soft security aspects of Russia's foreign policy, including the role of the media and propaganda; hybrid warfare; the role of ideas and norms; we will also explore the historical legacies influencing how Russia sees the world and its neighbours. There will be separate sessions exploring in detail Russia's war in Ukraine. Each of the ten topics covered will speak to the major theoretical debates on the factors shaping security and foreign policy and students will be encouraged to evaluate the merits of the various theories based on available evidence. The background seminar focuses on the domestic and international context preceding Russia's emergence as a successor to the Soviet Union. The subsequent sessions analyse post-communist Russian domestic politics and foreign policy with a special focus on domestic politics and foreign policy under President Putin, including the consolidation of autocratic rule, the wars against Georgia and Ukraine, the securitisation of Russia's media and Russia's attempts to influence politics in the EU and beyond.

Some of the questions to be addressed in the course of the ten seminars are: How have domestic institutions and political regime changed following the collapse of the USSR? What are the impacts on Russian society and economy? How have these developments impacted on foreign policy making and thinking? How has Russia sought to use traditional security mechanisms, hard power and soft power to influence the "near abroad"? What are the key mechanisms of Western influence on Russia? Are sanctions against Russia effective? What kind of a relationship has Russia forged with China and what are the factors shaping this relationship? What drives the nuances of Russia's policy in the Middle East? What role do energy politics play in Russia's relations with its neighbours and in Russia's foreign policy globally? The final section will address the question of the other longer-term historical influences shaping Russian politics.

**Teaching:** This course is delivered through seminars totalling a minimum of 20 hours across Michaelmas Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Students who are new to international politics are advised to attend the lectures for IR202, Foreign Policy Analysis.

**Formative coursework:** Students will be expected to produce 1 presentation and 1 other piece of coursework in the MT. Each student will write a review of one of the required readings in no more than 500 words.

In the course of the academic term, each student will be also expected to make one presentation on a given topic. Presenters will be expected to distribute a 1 paragraph summary of the main points of their presentations to Professor Lankina and students in advance of the seminar.

Students will also produce a 2-3 page outline of their assessed essay by Week 6 of the MT.

**Indicative reading:** Tomila V. Lankina, *The Estate Origins of Democracy in Russia: From Imperial Bourgeoisie to Post-Communist Middle Class* (Cambridge University Press 2022). Catherine Belton, *Putin's People: How the KGB Took Back Russia and then Took on the West* (William Collins 2021). Kathryn E. Stoner, *Russia Resurrected: Its Power and Purpose in a New Global Order* (Oxford University Press 2021). Timothy Frye, *Weak Strongman: The Limits of Power in Putin's Russia* (Princeton University Press 2021). Andrei Tsygankov, ed. *Routledge Handbook of Russian Foreign Policy* (Routledge 2020).

Gulnaz Sharafutdinova, *The Red Mirror: Putin's Leadership and Russia's Insecure Identity* (Oxford University Press 2020).

Alexander Sergunin, *Explaining Russian Foreign Policy Behavior - Theory and Practice: 147* (Soviet and Post-Soviet Politics and Society), Stuttgart, Ibidem, 2016

**Assessment:** Essay (80%, 5000 words) in the LT. Class participation (20%) in the MT.

## IR480 Half Unit

### The Politics of Inequality and Development

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Victoria Paniagua

**Availability:** This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** This course examines the interaction between markets and states to understand the causes and consequences of development and economic inequality in the developing world and beyond. We will explore these topics in light of contemporary theoretical, substantive, and methodological debates within the fields of international and comparative political economy.

The course will examine the various forces that affect development, as well as exploring economic inequality as a consequence of economic development (or lack thereof). Forces we consider include the state, political institutions, socio-economic actors' preferences and power, and social structure. We will further interrogate the political and economic foundations of inequality, its political implications, and, finally, the main policy tools available to curb economic inequality in the developing world and beyond.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 2 pieces of coursework in the LT.

The 2 pieces of coursework will be reading response memos.

**Indicative reading:** Piketty, Thomas (2014). *Capital in the 21st Century*. Harvard University Press.

Boix, Carles (2015). *Political order and inequality*. Cambridge University Press.

Milanovic, Branko (2016). *Global Inequality: A New Approach for the Age of Globalization*. Harvard University Press.

Atkinson, Anthony (2015). *Inequality: What Can be Done?* Harvard University Press.

Frieden, Jeffrey (1992). *Debt, Development, and Democracy*. Princeton University Press.

Gerschenkron, Alexander (1962). *Economic Backwardness in Historical Perspective*. Harvard University Press.

Evans, Peter (1995). *Embedded Autonomy: States and Industrial Transformation*. Princeton University Press.

**Assessment:** Presentation (10%) in the LT. Take-home assessment (90%) in the ST.

## IR481 Half Unit Not available in 2022/23 Europe, the US and Arab-Israeli Relations

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Federica Bicchi CLM. 4.13

**Availability:** This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Global Politics, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed.

**Pre-requisites:** A knowledge of post-1945 world history of the European Union governance system and of Middle East politics is required.

**Course content:** The course focuses on the foreign policy of the EU and of EU member states towards Arab-Israeli relations (with a special emphasis on Palestinian-Israeli relations), in comparison with the US foreign policy. The main focus will be on the European perspective, but it would be impossible to analyse this subject without taking into account the US position and, to some extent, Transatlantic relations. After an overview of Palestine during the British mandate, the course will cover the period from 1948 to nowadays with a particular emphasis on contemporary issues. The British mandate on Palestine. The partition of Israel and the birth of Israel. Early support for Israel. The Suez crisis. The evolution of European and US policy towards Israel. The birth of the "special relationship" between the US and Israel. The 1973 war, the energy crisis and the Euro-Arab Dialogue. The Venice Declaration. The US and European contribution to the Arab-Israeli peace process in the 1990s. The Euro-Mediterranean Partnership and the European Neighborhood Policy. Western democracy promotion and trade. Western aid to the Palestinians. The legalisation of relations with Israel. The collapse of the peace process and attempts at reviving it.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** One 2,000-word essay during the course and one presentation (or alternatively two 2000-word essays), to be marked by seminar teachers. These do not count towards the final mark.

**Indicative reading:** Students will be expected to read widely in appropriate books and journals. A detailed reading list will be provided at the beginning of the course. The following provide a general background to the topic: Bicchi, Federica, *European Foreign Policy Making toward the Mediterranean*, New York: Palgrave (2007); Fawcett, L. (2013) *International Relations of the Middle East*, 3rd ed., Oxford: Oxford University Press; Lesch, David, ed. *The Middle East and the United States*. Boulder: Westview (2012), 5th ed.; Pardo, S. and J. Peters (2009), *Uneasy Neighbours: Israel and the European Union*, Lexington Books; Quandt, W.B. (1993) *Peace Process. American Diplomacy and the Arab-Israeli Conflict Since 1967*, Washington /Berkeley/Los Angeles: The Brookings Institution/University of California Press; Roberson, B.A. (1998) *The Middle East and Europe. The Power Deficit*, London/New York: Routledge; Spiegel, Steven, *The Other Arab-Israeli Conflict: Making America's Middle East Policy from Truman to Reagan*, Chicago, (1985); Youngs, Robert, *Europe and the Middle East. In the Shadow of September 11*. Boulder/London: Lynne Rienner, (2006).

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

The normal length of the examination paper is eight questions, of which candidates are invited to answer any two.

## IR485

### Dissertation in International Political Economy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nikhil Kalyanpur

**Availability:** This course is compulsory on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is not available as an outside option.

**Course content:** MSc students are required to write a 10,000 word dissertation on a topic within the field of IPE approved by the student's dissertation lead. The dissertation need not be an account of original research and may rely on secondary sources.

**Teaching:** All MSc IPE students will be assigned dissertation supervisors before the end of the Michaelmas Term. The Department will allocate dissertation supervisors on the basis of the relevant expertise and availability of members of academic staff, with student preferences taken into consideration. Dissertation supervisors will be available to provide guidance in one-on-one meetings and through other forms of communication over the late Michaelmas, Lent, and Summer terms. Thereafter students are expected to work independently on their dissertations without further supervision.

In addition, the Department will provide support by offering a number of lectures and workshops throughout the academic year. An introductory lecture in the Michaelmas Term will provide an overview of the MSc Dissertation and the processes involved in terms of requirements, oversight and supervision, research and writing, submission and assessment. Bespoke workshops will be offered in the Michaelmas, Lent, and Summer terms in collaboration with LSE Life to guide students in choosing a topic and research question, designing and implementing a dissertation project. The MSc IPE programme director will also offer a question-and-answer session in the Summer Term in conjunction with the LSE Life workshop. Over the summer period the Department will also offer 'drop-in' sessions for students with individual queries.

**Indicative reading:** George, A., & Bennett, Andrew. (2005). *Case studies and theory development in the social sciences (BCSIA studies in international security)*. Cambridge, Mass.: MIT Press. Gerring, J. (2006). *Case study research: Principles and practices (Second ed., Strategies for social inquiry)*.

King, G., Keohane, Robert O., & Verba, Sidney. (1994). *Designing social inquiry: Scientific inference in qualitative research (Princeton paperbacks)*.

Seawright, J., & Gerring, J. (2008). *Case Selection Techniques in Case*.

*Study Research: A Menu of Qualitative and Quantitative Options. Political Research Quarterly*, 61(2), 294-308.

**Assessment:** Dissertation (100%, 10000 words) in August.

## IR486

### Dissertation in International Relations Theory and International Relations (Research)

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof John Sidel CBG.3.35

**Availability:** This course is compulsory on the MSc in International Relations (Research). This course is not available as an outside option.

**Course content:** MSc students are required to write a 10,000-word dissertation on a topic within the field of IR to be determined in consultation with their academic mentors and dissertation supervisors. The dissertation should be understood as a work of independent analysis and research, but empirical research based on primary sources is not required.

**Teaching:** All MSc IR (Research) students will be assigned dissertation supervisors before the end of the Michaelmas Term. The Department will allocate dissertation supervisors on the basis of the relevant expertise and availability of members of

academic staff, with student preferences taken into consideration. Dissertation supervisors will be available to provide guidance in one-on-one meetings and through other forms of communication over the late Michaelmas, Lent, and Summer terms. Thereafter students are expected to work independently on their dissertations without further supervision.

In addition, the Department will provide support by offering a number of lectures and workshops throughout the academic year. An introductory lecture in the Michaelmas Term will provide an overview of the MSc Dissertation and the processes involved in terms of requirements, oversight and supervision, research and writing, submission and assessment. The MSc IR Program Director will also hold further sessions to answer questions from students in the Michaelmas and Lent terms. Bespoke workshops will be offered in the Lent and Summer terms to guide students in crafting their research questions, designing their dissertation projects, and bringing them to fruition.

Over the summer period the Department will also offer 'drop-in' sessions for students with individual queries.

**Assessment:** Dissertation (100%, 10000 words) in August.

## IR487 Half Unit

### International Relations: Critical Perspectives

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Katharine Millar CBG.8.13

**Availability:** This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

**Course content:** This course examines the ways that critical theories conceive, analyse and critique the character of international relations. The purpose of the course is to provide a thorough interrogation of these theories, exploring debates both within and between them. Theoretical approaches to be considered include: classical critical theory; post-colonialism and decolonialism; post-structuralism; and feminism and queer theory. The course also interrogates issues relating to the philosophy of science.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours in Michaelmas Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

Students are required to submit one formative coursework (2,000-word essay). All students are expected to prepare for and participate in seminar discussions.

**Indicative reading:**

- Chris Brown and Kirsten Ainley (2010) *Understanding International Relations*, 4th Ed. (Palgrave Macmillan);
- Patrick Jackson (2010), *The Conduct of Inquiry in International Relations*, (London: Routledge);
- Christian Reus-Smit and Duncan Snidal (eds, 2010), *The Oxford Handbook of International Relations*, (Oxford: Oxford University Press);
- Scott Burchill et al (eds, 2009), *Theories of International Relations*, 4th ed. (London: Palgrave).

**Assessment:** Blog post (15%).

Take-home assessment (85%) in the MT.

**Blog component (15%):** Students will, via sign up, compose one blog post of up to 500 words applying the concepts (and readings) of the week to analyse and understand a contemporary event or phenomenon in international politics. This component is worth 10%. Students will also comment upon and engage with one (via sign up) of their peers' posts, for a completion grade of 5%.

**Take-home assessment (85%):** due in Lent term: Students will compose two (2) 2000 word answers to a pre-given set of questions provided at the end of MT.

## IR488 Half Unit

### International Politics of Southeast Asia

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jürgen Haacke CBG.9.01

**Availability:** This course is available on the MSc in Development Studies, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

**Course content:** This half-unit course examines the contemporary international politics of Southeast Asia. It is particularly concerned with the construction and maintenance of regional order against the backdrop of Southeast Asia's complex and changing politics and intra-regional relations as well as the wider geopolitical shifts associated with the rise of China and the often-competitive policies of external powers towards the region. The course will thus focus both on the different contexts in which Southeast Asian governments operate and the strategies they pursue to manage the multiple challenges they confront, not least vis-à-vis the great powers. Topics covered include ASEAN's institutional design and the nature of intra-regional political-security cooperation; the characteristics of economic regionalism; the US role in and policies toward Southeast Asia; China's relations with and influence in Southeast Asia; Indonesia's foreign policy; as well as the alignment and risk-management (hedging) strategies adopted by maritime and continental Southeast Asian states. The course also explores the case of political conflict and violence in Myanmar with reference to the responsibility to protect, ASEAN involvement, and wider geopolitical competition.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent and Summer Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce one 2,000-word essay in the LT on a date stipulated by the teacher responsible.

**Indicative reading:**

- Michael Yahuda, *The International Politics of the Asia-Pacific, 1945-1995* (Routledge Curzon, 4th edn, 2019).
- Amitav Acharya, *The Making of Southeast Asia* (Cornell University Press, 2013).

- Weatherbee, Donald E., *ASEAN's Half Century: A Political History of the Association of Southeast Asian Nations* (Rowman & Littlefield, 2019)

**Assessment:** Take-home assessment (100%) in the ST.

## IR489 Half Unit Economic Diplomacy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Boram Lee, CBG.8.09

**Availability:** This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students will be required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for you. Admission to the course is not guaranteed, due to limited space. The course is primarily for students on the IPE Masters and LSE-Sciences-Po Double Degree masters.

**Course content:** The course introduces students to the theories and analytical frameworks relating to decision-making and negotiation in international economic relations and enables them to develop the skills needed to apply these to cases. It discusses the roles of the main actors, institutional settings and processes involved in domestic decision-making and international economic negotiations, and their interaction. The aim of the course is to provide participants with the ability to understand and analyse the factors shaping international negotiations in a range of policy issues from trade and investment, to the environment, economic summits and finance.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours during Lent Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

The course is composed of two modules. The first module (Week 1-3) discusses analytical toolkits for understanding economic diplomacy. During these initial weeks, students will learn about four approaches to economic diplomacy: a) balance of power and coercive bargaining, b) negotiations within international institutions, c) the effect of domestic politics, and d) the role of ideas and issue framing.

The second module (Week 4-10) features specific negotiation tactics frequently adopted by policymakers and important challenges that negotiators face in policy processes.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:**

- Bayne, Nicholas and Woolcock, S. *The new economic diplomacy: decision-making and negotiation in international economic relations*, Third edition, Ashgate, Stephen 2013.
- Koremenos, Barbara. *The continent of international law: Explaining agreement design*. Cambridge University Press, 2016.
- Davis, Christina L. "Food fights over free trade." *Food Fights over Free Trade*. Princeton University Press, 2011.
- Oye, Kenneth A. *Economic discrimination and political exchange: World political economy in the 1930s and 1980s*. Princeton University Press, 1993.

**Assessment:** Take-home assessment (100%) in the ST.

## IR490 Half Unit The Strategy of Conflict in International Relations

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr. Anna Getmansky CBG 8.05

**Availability:** This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is not available as an

outside option.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

**Course content:** This course provides students with an opportunity to apply their theoretical knowledge and simulate decision-making based on a case study of an actual conflict. The first part of the course serves as an introduction and a refresher on several theories and models of conflict, and provides a background to one conflict. In the second part of the course, students will split into several teams, each representing a player in the conflict. They will receive scenarios and will re-enact specific events. The main goal of the course is to experience how IR theories and concepts can be applied to decision-making in somewhat realistic scenarios.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will write short weekly blog posts on Moodle and provide an 800-word outline of their assessed essay by the end of Week 8. This will be returned by the end of LT.

**Indicative reading:**

- Thomas Schelling. *Arms and Influence* (Yale University Press 2008)
- Sara McLaughlin Mitchell and John A. Vasquez (eds.), *What Do We Know About War?* (Rowman & Littlefield 2021)
- Bruce Bueno de Mesquita, Alastair Smith, Randolph Siverson, and James Morrow, *The Logic of Political Survival* (MIT 2003)
- Joshua Kertzer, *Resolve in International Politics* (Princeton University Press 2016)
- Laia Balcells, *Rivalry and Revenge* (Cambridge University Press 2017)
- Aila Matanock, *Electing Peace* (Cambridge University Press 2017)
- Agnia Grigas, *Beyond Crimea* (Yale University Press 2016)

**Assessment:** Essay (100%, 4000 words) in the ST Week 1. Students will write a 4,000-word assessed essay selecting from a list of topics and questions provided by the course coordinator.

## IR495 Half Unit The Politics of Displacement and Refuge

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Stephanie Schwartz

**Availability:** This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students on the MSc in International Relations, MSc in International Relations (Research), and MSc in International Relations (LSE and Sciences Po) programmes.

**Course content:** The number of forcibly displaced people has nearly doubled in the last decade. Amid this rise in forced migration, how are states, international organizations, and local communities responding? What is causing this increase in displacement and what are the political consequences - both in the Global North and the Global South? What are the everyday realities of being forcibly displaced? This course takes on these questions as we examine the politics of displacement and the evolution of the global asylum and refugee protection regime.

The course begins with an overview of the historical and legal origins of the asylum and refugee protection regime, including who qualifies as a refugee and asylum-seeker under international law and why. We then explore the disconnect between this foundation and the realities of displacement and mobility today. The course continues with an analysis of the causes and consequences of displacement, followed by an examination of the evolution of state, international and local responses to asylum-seeking. Throughout the course we pay particular attention to the politics of refugee and

IDP hosting in the Global South, where the majority of displaced persons live, as well as refugees' and migrants' own perspectives on the experience and politics of displacement.

By the end of the course students will be able to articulate complex issues related to forced migration and global asylum governance; synthesize and critique scholarly work from a variety of disciplines - including political science, sociology, and anthropology; and analyze the causes of displacement and state responses to asylum-seeking.

**Teaching:** 10 hours of lectures in the MT.

16 hours of seminars (5x90 mins and 4x120 mins) in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 case study and 1 presentation in the MT.

Students will complete a 1-page case study proposal for feedback from the instructor by Week 4, and will also conduct a class presentation on the same topic. Both of these assessments will elicit feedback to aid the student in the preparation of the summative case study submission.

**Case Study Proposal Memo:** Students will submit a 1-page written case study proposal memo in Week 4 of the course, outlining their proposed case, the rationale for case selection, and a plan for its analysis, that aligns with course themes.

**Seminar Presentations:** students will do a seminar presentation on the topic of their case study. Students will present for a maximum of 8-10 minutes. This builds skills in summarising complex arguments, prioritising what is most important, and building oral and written arguments and presentation skills.

The rest of the class are required to engage critically with the presentation, and pose questions and offer feedback. They build skills in active listening to the oral presentation and responding to complex arguments in real-time. Students are provided with oral feedback on their presentations, so that other students can learn from this experience.

## IR499

### Dissertation in International Relations

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof John Sidel CBG.3.35

**Availability:** This course is compulsory on the MSc in International Relations and MSc in International Relations (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** All MSc IR student are required to write a 10,000-word dissertation on a topic within the field of IR, to be determined in consultation with their academic mentors and dissertation supervisors. The dissertation should be understood as a work of independent analysis. Original empirical research based on primary sources is not required.

**Teaching:** All MSc IR students will be assigned dissertation supervisors before the end of the Michaelmas Term. The Department will allocate dissertation supervisors on the basis of the relevant expertise and availability of members of academic staff, with student preferences taken into consideration. Dissertation supervisors will be available to provide guidance in one-on-one meetings and through other forms of communication over the late Michaelmas, Lent, and Summer terms. Thereafter students are expected to work independently on their dissertations without further supervision.

In addition, the Department will provide support by offering a

number of lectures and workshops throughout the academic year. An introductory lecture in the Michaelmas Term will provide an overview of the MSc Dissertation and the processes involved in terms of requirements, oversight and supervision, research and writing, submission and assessment. The MSc IR Program Director will also hold further sessions to answer questions from students in the Michaelmas and Lent terms. Bespoke workshops will be offered in the Lent and Summer terms to guide students in crafting their research questions, designing their dissertation projects, and bringing them to fruition.

Over the summer period the Department will also offer 'drop in' sessions for students with individual queries.

**Assessment:** Dissertation (100%, 10000 words) in August.

## IR4A1 Half Unit

### International Relations: Core Theories and Debates

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr. Rohan Mukherjee

**Availability:** This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

**Course content:** This course is a graduate-level introduction to the study of international relations. It has 5 objectives: (i) to enquire into the nature of international politics and the role of theory in advancing our understanding of it; (ii) to introduce students to the main contributions and debates in theories of international politics; (iii) to provide students with a range of concepts, ideas, and perspectives to enable them to widen and deepen their understanding and analysis of international politics; and (iv) to encourage critical, independent thought. At the end of the course students should be able to think, talk and write in an informed, precise and analytical manner about developments within the field of International Relations, past and present.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours in Michaelmas Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will write one 2,000-word essay for their seminar teachers

**Indicative reading:**

- Joshua Shiffrin. *Rising Titans, Falling Giants: How Great Powers Exploit Power Shifts*. 2018
- Helen V. Milner. *Interests, Institutions, and Information: Domestic Politics and International Relations*. 1998

**Assessment:** Essay (100%) in the LT.

## IR4A2 Half Unit

### International Relations: Global Applications

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jennifer Jackson Preece CBG.7.05

**Availability:** This course is available on the MSc in International

Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

**Course content:** This course is a graduate-level introduction to global applications of international relations. It provides an opportunity to gain an analytically deeper understanding of the issues that shape the development of the contemporary international order, and reflect critically on the practical applications of the discipline. The course encourages students to engage in debating the nature of, and possible responses to, contemporary challenges in international politics, while emphasizing the need for critical analytical depth when reflecting on the implications of global policy. The course complements IR4A1 with a more applied policy focus. Students will develop an awareness of the relationship between the discipline of International Relations as a field of knowledge and the practices of world politics.

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in the MT. A 3-hour online simulation exercise will replace the lecture and classes in Week 11.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students deliver one seminar presentation and write one 2,000-word essay proposal for their seminar teachers.

**Indicative reading:**

- John Baylis, Steve Smith and Patricia Owen (eds), *The Globalization of World Politics* 8th ed (OUP: 2020)
- Chris Brown, *Understanding International Relations* 5th ed (Palgrave: 2019)
- Jenny Edkins and Maja Zehfuss (eds), *Global Politics: A New Introduction* (Routledge: 2019)
- Mary Kaldor and Iavor Rangelov (eds), *The Handbook of Global Security Policy* (Wiley-Blackwell: 2014).

**Assessment:** Essay (100%) in the LT.

## LL468 Half Unit

### European Human Rights Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Kai Möller

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course will offer a theoretically informed introduction to the law of the European Convention on Human Rights. It will focus on both the doctrinal framework that the European Court of Human Rights has developed – in particular: proportionality, the margin of appreciation, negative and positive obligations, the living instrument doctrine, and the emerging consensus doctrine – and the substantive questions of what the values underlying human rights are and what these values require in specific contexts. With regard to the latter, more philosophical, aspect, we will pay special attention to the idea of human dignity, exploring in some depth the Court's view that respect for human dignity [and human freedom] is the 'very essence' of the Convention.

Topics include: An introduction to the European Convention. Basic concepts of European Convention law: proportionality, the margin of appreciation, living instrument, emerging consensus. Human dignity - 'the very essence' of the Convention? Freedom from

torture and inhuman or degrading treatment or punishment and the role of religious arguments in human rights law. The right to freedom of expression and the protection of offensive expression. Militant democracy and democratic backsliding in Europe. The right to private life and the enforcement of morality. The right to freedom of religion and religious pluralism in Europe.

**Teaching:** There will be 20 hours of teaching in Michaelmas Term and two hours in Summer Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** There will be a formative assessment; its format will be confirmed at the start of the course.

**Indicative reading:** There is no single text covering the course and required readings will be uploaded to Moodle before the seminars. The readings will consist of a mixture of cases and theoretical materials. The following are useful textbooks:

- Jacobs, White and Ovey, *The European Convention on Human Rights*, 8th edn (OUP 2020).
- Harris, O'Boyle and Warbrick, *Law of the European Convention on Human Rights*, 4th edn (OUP 2018).

A strong European perspective is to be found in:

- van Dijk, van Hoof, van Rijn and Zwaak (eds), *Theory and Practice of the European Convention on Human Rights* 5th edn (Intersentia, 2018).

Very good edited books include:

- Brems and Gerards (eds), *Shaping Rights in the ECHR* (CUP 2013).
- Follesdal, Peters and Ulfstein (eds), *Constituting Europe* (CUP 2013)

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL469 Half Unit

### UK Human Rights Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Conor Gearty

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Those seeking to take it will need to discuss this first with the course teacher: the course is quite legal in focus.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course will be made up of a detailed study of the UK Human Rights Act. The origins and the political background to the Act will be explained, and the structure of the measure will be fully elaborated, relying on the text of the Act itself but also on the burgeoning case law that accompanies the measure. The course will identify the principles that underpin the Act and explain its proper place in English law. It will also explore the wider constitutional implications of the measure, looking at its effect on the relationship between courts and Parliament. The political context in which the measure has had to operate will be considered, and the relationship with the change to human rights protection following the UK's departure from the EU will be considered. The recent official review of the Act (and the further government consultation that has followed its publication) will be discussed.

**Teaching:** There will be two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** The key text is C A Gearty, *On Fantasy Island. Britain, Strasbourg and Human Rights* (OUP, 2016). See also R Costigan and R Stone, *Civil Liberties and Human Rights* (11th edn, OUP, 2017); Kavanagh, *Constitutional Review under the UK Human Rights Act*

(Cambridge, 2009);

Hickman, *Public Law After the Human Rights Act* (Hart, 2010); Gearty, *Principles of Human Rights Adjudication* (Oxford University Press, 2004).

While these books will be referred to, students will also be expected to read cases: they will receive a detailed Reading list for each topic.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL475 Half Unit

### Terrorism and the Rule of Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Conor Gearty

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Conflict Studies, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course will provide a theoretical and historical introduction to the concept of terrorism. It will critically consider definitions of terrorism, and analyse the relationship between terrorism and the right to rebel, and the right to engage in civil disobedience. The historical development of the idea of 'terrorism' from the late eighteenth century through to the present will then be traced, with the emphasis on locating the practice of political terror in its political and military/quasi-military context. The role of international law generally and international human rights law in particular in the context of terrorism and anti-terrorism action will be considered in detail. The course will teach the material in context, so the subject will be analysed by reference to particular situations where necessary, e.g. Northern Ireland, the Palestine/Israel conflict and the post 11 September 'war on terror'. The recent extension of state controls from terrorism to 'extremism' will be analysed. The aim of the course is to give the student a good critical understanding of this most controversial of subjects, and also to impart an understanding of the role of law in shaping the fields of terrorism and of counter-terrorism.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6. Teaching will be mainly by Professor Gearty with input from Dr Richard Martin and Ms Michelle Hughes.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** There is no set text though reliance is made on the work of authors such as Richard English, Adrian Guelke, Lawrence Freedman, Igor Primoratz, Paul Wilkinson and the course teacher Conor Gearty. Students will receive a detailed Reading list for each topic, which will include legal cases from time to time. Two recommended texts are Gearty, *Liberty and Security* (Polity Press, February 2013) and English, *Terrorism How to respond* (Oxford 2009).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4A6 Half Unit

### Climate Change and International Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Stephen Humphreys

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University),

MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course covers international law in relation to climate change with a view to assessing how the harms and burdens associated with climate change are governed and allocated in different legal regimes. The course adopts the stance that the political and ethical questions raised by climate change cannot be addressed by reference to climate change law or international environmental law alone. Climate change gives rise to a series of profound problems touching upon a range of bodies of law (trade, human rights, migration, state responsibility) in a complex political and ethical environment. In approaching climate change as a concrete concern relevant to these various bodies of law and practice, the course will address the normative bases for choosing between actions designed to prevent and/or manage climate change and its consequences, given developmental imperatives and the concerns raised by the 'fragmented' nature of international law. Projected seminars include: climate change science, politics and ethics; the theory of international law; international environmental law; trade law; human rights law; migration law. The course includes two case studies, from among the following: technology transfer; carbon markets; food security.

**Teaching:** This course will have two hours of teaching content each week in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 1,800 word essay to be submitted by the end of Week 6.

**Indicative reading:** IPCC, Fifth Assessment Report, Cambridge UP (2013-14); IPCC, Special Report on Global Warming of 1.5 Degree C (2018); Rosemary Rayfuse and Shirley Scott (eds), *International Law in the Era of Climate Change*, Edward Elgar (2011); Stephen Gardiner, Simon Caney, Dale Jamieson and Henry Shue (eds), *Climate Ethics: Essential Readings*, Oxford UP (2010); Stephen Humphreys (ed.), *Climate Change and Human Rights*, Cambridge UP (2010); Larry Lohmann, *Carbon Trading*, Dag Hammarskjöld Foundation (2006); Margaret Young (ed.), *Regime Interaction in International Law: Facing Fragmentation*, Cambridge UP (2012).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4A8 Half Unit

### International Law and the Use of Force

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Devika Hovell

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Conflict Studies, MSc in Gender, Peace and Security, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Some prior knowledge of international law is useful but not essential.

**Course content:** This half unit course examines the law relating to when it is permissible to use force (*jus ad bellum*). The aim of this course is to develop an understanding of the principles of international law that regulate the use of force in international society. It concentrates on the prohibition of resort to force in Article 2(4) of the United Nations Charter and the exceptions to that prohibition, examining in detail the various elements and controversies impacting on the right to self-defence and Security Council authorisation. We also examine 'creeping' exceptions

to the prohibition on the use of force, including humanitarian intervention, pro-democratic intervention and the protection of nationals. The criminalisation of aggression is also considered.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** A detailed reading list will be issued on Moodle. For a comprehensive textbook, see Christine Gray, *International Law and the Use of Force* (4th ed., 2018).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4A9 Half Unit

### Law in War

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Stephen Humphreys

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Some prior knowledge of international law is useful but not essential. LL4A8 is useful but not essential.

**Course content:** This course covers the international law governing the conduct of hostilities (*jus in bello*, also known as the law of armed conflict (LOAC) or international humanitarian law (IHL))--as distinct from the law on the resort to force (*jus ad bellum*), which is covered in a separate course (LL4A8). The course will take a critical and historical approach to the international regulation and facilitation of armed conflict. As well as the laws governing the means and methods of war ('Hague' law), the 'protected' groups hors de combat ('Geneva' law), and the distinction between international and non-international armed conflict, the course will cover 'lawfare' more generally: the recourse to law as a means of waging war. It will examine the application of the laws of war, including occupation law, in historical, actual, and ongoing conflicts, including recent wars in Iraq, Afghanistan, and Syria, the 'war on terror', and the Occupied Palestinian Territories. Students can expect to have a thorough grasp of the principles and regulations governing the conduct of hostilities, the context and efficacy of enforcement mechanisms, and a critical understanding of the normative and political stakes of international law in this area.

**Teaching:** This course will have two hours of teaching content each week in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** Students have the option of submitting a 1,800 word essay to be submitted at the end of Week 6.

**Indicative reading:** It is worthwhile acquiring the following book: Yoram Dinstein, *The Conduct of Hostilities Under the Law of International Armed Conflict* (Cambridge UP, 3rd ed., 2016). The following book of primary texts may be taken into an exam (unannotated) and may be worth acquiring: Roberts and Guelff, *Documents on the Laws of War* (Oxford UP, 2000); Michael Walzer, *Just and Unjust Wars* (Basic books, 4th ed. 2006); David Kennedy, *Of Law and War* (Princeton UP, 2006); Geoffrey Best, *War and Law Since 1945* (Oxford UP, 1997). Current debates in this field are very lively on blogs such as *Opinio Juris*, *EJILTalk!* and *Lawfare*. Detailed readings for each seminar will be made available on Moodle.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4AD Half Unit Not available in 2022/23

### Rethinking International Law: International Law and Contemporary Problems

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Susan Marks

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is part of the following LLM specialism: Public International Law.

This course has a limited number of places and we cannot guarantee all students will get a place.

**Pre-requisites:** There are no formal prerequisites.

**Course content:** This course is primarily designed for students who have already had some exposure to public international law and wish to deepen their understanding of the international legal dimensions of contemporary problems. Each week the relation will be explored between international law and a different global issue or theme, such as war, poverty, terrorism, humanity, and territory. Course readings will encompass both legal scholarship and relevant writing by scholars from other disciplines (geography, anthropology, philosophy, literary studies, etc.).

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6 of Michaelmas Term.

Students are expected to have done the set reading and be willing to participate in discussion.

**Formative coursework:** Class exercises will be set.

**Indicative reading:** Reading lists will be provided for each seminar on Moodle. Relevant readings are likely to include: David Kennedy, *Of War and Law*; Sundhya Pahuja, *Decolonising International Law: Development, Economic Growth and the Politics of Universality*; and Balakrishnan Rajagopal, *International Law from Below: Development, Social Movements and Third World Resistance*.

**Assessment:** Assessment will be based on submission of an 8,000 word essay.

---

## LL4AE Half Unit

### The Politics of International Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Gerry Simpson

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** In this course, we study international law as a literary, historical and political project – and a diplomatic language – through which different arrangements of global power and well-being are advanced and defended. And we do this in relation to three moments in global history: the post WW1 period, the Cold War and the war in Ukraine. We begin with three classes on Ukraine in which we think about the "relevant" legal rules, the politics behind the deployment of legal categories in the conflict (war crimes, sanctions, sovereignty) and the way in which international law might open up, or close down, the possibilities of some sort of resolution. We then reverse back to one of the origins of sovereignty, self-determination and institutionalism in 1919 with the apparent revitalisation of international law (and the re-colonisation of The Levant) at Versailles and in Geneva (Weeks 4 and 5). In Weeks 6 to 7, we turn to the Cold War as a lawful

moment and international law as a Cold War project by re-thinking the nuclear threat as a juridical category (Week 6) and, by looking at the Cold War in - and of - the Global South (through a study of neutrality or non-alignment as a world-making effort and a Cold War ideal) (Week 7). The course ends with three thematic classes - based around my recently published book, *The Sentimental Life of International Law* (Oxford University Press: 2022) - on international law as lived experience, international law as comic gesture, and international law as utopian bet, respectively.

**Teaching:** There will be 20 hours of teaching in Michaelmas Term. There will be a Reading Week in Week 6.

This is a conversational course. The usual practice is that I introduce the topics for 45 minutes and then we engage in a discussion of the readings. These are often relatively short but there is an expectation that everyone will have done the reading and be willing to participate in seminar discussion.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Reading lists will be provided for each seminar on Moodle. Readings likely to be set include a selection of international legal texts (including work-in-progress and "new authors") and readings from the fields of intellectual history, 18th century literature and political theory.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4AF Half Unit

### Principles of Global Competition Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Niamh Dunne

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This module provides an overview of the major features of contemporary competition (antitrust) law. Competition law comprises a set of legal rules which aim to control the socially-harmful exercise of private market power, whether through hardcore cartels, single firm monopoly behaviour, or mergers that reduce structural competition. This is a discipline that has undergone a remarkable process of expansion in recent decades, and competition laws are now actively enforced in around 130 jurisdictions worldwide. Instead of focusing on a particular regime, the module puts an emphasis on the fundamental debates underlying the adoption and evolution of this field, addressed in comparative perspective. Examples drawn primarily from EU and US competition law will be generally used by way of illustration. The course assumes no prior knowledge of competition law or economics, but aims to equip students to understand and analyse the key substantive elements found within most competition regimes. These include:

- Competition policy and basic concepts of antitrust economics;
- Anti-competitive agreements, including cartels and vertical restraints;
- Unilateral conduct rules, including refusal to deal and exclusionary practices; and
- Merger control, including horizontal and vertical mergers.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** All students are expected to produce one 1,500 word formative essay during the course.

**Indicative reading:**

- Whish & Bailey, *Competition Law* (10th ed., 2021);
- Jones & Sufrin, *EU Competition Law: Cases and Materials* (7th ed., 2019);

- Roger van den Bergh, *Comparative Competition Law and Economics* (2017); and
- Hovenkamp, *The Antitrust Enterprise* (2005).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4AG Half Unit

### Competition Law, Technology and Intellectual Property

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Pablo Ibanez Colomo

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Prior knowledge of Competition Law is desirable, but not essential.

**Course content:** This module addresses some of the most topical and intellectually challenging aspects of contemporary Competition Law. The emphasis will be put on US antitrust and EU Competition Law, but developments from other jurisdictions are discussed where relevant. The module examines, inter alia, the application of competition law in high-technology and digital markets as well as its intersection with intellectual property (in particular patents and copyright).

Topics may include the following:

- Competition Law, Intellectual Property and Innovation
- Competition Law in High-Technology Markets (including investigations involving the Big Tech giants like Google and Amazon)
- Online distribution and brand protection over the Internet
- Competition Law and the pharmaceutical industry
- Standard-setting and technology licensing

**Teaching:** There will be 20 hours of seminars in the Lent Term and two hours of seminars in the Summer Term. Regular teaching may be complemented with visits from officials and practitioners from the UK and the EU. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** Whish, *Competition Law* (10th edn, 2020-21); Jones & Sufrin, *EU Competition Law: Cases and Materials* (7th edn, 2019).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4AH Half Unit

### Corporate Governance

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Eva Micheler

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Students should have some knowledge of corporate law.

**Course content:** This course will focus on the corporate

governance of companies. The course will be taught largely on a comparative basis, focussing on English and German law. We will also cover the relevant EU materials. Topics such as the following will be discussed:

- 1- Corporate governance: law, codes and theory.
- 2- Allocation of decision making within the company.
- 3- Board structure (one tier boards/two tier boards/board committees) and board remuneration.
- 4- Directors' duties – proper purpose.
- 5- Directors' duties – duty of care/business judgement.
- 6- Directors' duties – related party transactions and corporate opportunities.
- 7- Auditors.
- 8- Stakeholders.
- 9- Extended reporting and employee interests.
- 10- Shareholder activism/stewardship.

These topics may slightly change from year to year reflecting current developments.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. Please be aware that in 2022/23 topic 5 of the course will be taught during Week 6 (Reading Week).

**Formative coursework:** All students are expected to produce one 1,500 word formative essay during the course.

**Indicative reading:** Micheler, *Company Law - A Real Entity Theory* (OUP 2021); Gordon and Ringe, *The Oxford Handbook of Corporate Law and Governance* (OUP 2018); M Moore and M Petrin, *Corporate Governance: Law, Regulation and Theory* (Palgrave 2017)

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4AJ Half Unit

### Corporate Rescue and Reorganisation

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Sarah Paterson

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course focuses on the rescue of companies and the rescue of businesses in financial distress. We use Chapter 11 in the US as our jumping off point, before moving on to analyse the procedures which are available in England. We then consider the European Restructuring Directive, and we finish by setting everything we have studied against academic theories of the role of law in promoting rescue.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 1,500 word essay.

**Indicative reading:** A full Reading List will be distributed during the course. For introductory purposes, students are referred to V. Finch and D. Milman, *Corporate Insolvency Law: Perspectives and Principles* (Cambridge University Press, 2017) (3rd edition).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4AK Half Unit

### Principles of Corporate Insolvency Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Sarah Paterson

**Availability:** This course is available on the LLM (extended part-

time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Many students find that the course complements Corporate Rescue and Reorganisation (LL4AJ), although this is not a prerequisite.

**Course content:** This course is concerned with the principles and policies underlying the realisation and distribution of a company's assets in an insolvency. The impact of these principles on third parties such as corporate groups, secured and unsecured creditors, directors, and employees, is also considered. Topics include: secured credit; the distributional order of priority in insolvency; setting aside transactions; protecting unsecured creditors and consumers; the problem of corporate groups; company directors in troubled times; employees in distress; and European and international recognition of insolvency proceedings.

**Teaching:** This course will have 20 hours of teaching in the Lent Term and two hours in the Summer Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 1,500 word essay.

**Indicative reading:** A full Reading List will be distributed during the course. For introductory purposes students are directed to V. Finch and D. Milman, *Corporate Insolvency Law: Perspectives and Principles* (Cambridge University Press, 2017) (3rd edition).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4AL Half Unit

### International Business Transactions: Commercial Litigation

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Trevor Hartley

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Knowledge of conflict of laws (private international law) would be useful but is not essential. A general understanding of contract, tort, and commercial law is essential.

**Course content:** This course deals with jurisdictional problems arising in litigation resulting from international business transactions. We consider relevant rules in English law and European Union law, and take a comparative look at developments in the United States. The following issues are included in the syllabus: (a) General jurisdiction over companies and individuals; (b) Specific jurisdiction in relation to contract and tort claims; (c) Jurisdiction over branches and agents; (d) Parallel litigation ('lis pendens', 'forum non conveniens', anti-suit injunctions); and (e) Constitutional limitations on jurisdiction in the United States.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** All students are expected to produce one 1,500 word formative essay during the course.

**Indicative reading:** Core textbook: Trevor C Hartley, *International Commercial Litigation* (Cambridge University Press, 3rd edn, 2020, (selected chapters). Further reading: Born (Gary B) and Rutledge (Peter B), *International Civil Litigation in United States Courts: Commentary and Materials* (Wolters Kluwer, Austin, Boston,

Chicago, New York, the Netherlands, 6th edn, 2018); Fentiman (Richard), *International Commercial Litigation* (Oxford University Press, Oxford, 2nd edn, 2015).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4AM Half Unit

### International Business Transactions: Advanced Procedure and Tactics

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Trevor Hartley

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Students should preferably have taken LL4AL International Business Transactions: Commercial Litigation or obtained equivalent knowledge elsewhere. Knowledge of conflict of laws (private international law) would be useful but is not essential. Non-LLM students must have a full law degree (a degree which fulfils the degree requirement for becoming a lawyer in your country).

A good general understanding of commercial law is essential.

**Course content:** Litigation resulting from international business transactions. The following topics will be studied from the point of view of European Union law, English law and US law: choice-of-court agreements; forum non conveniens and lis pendens; antisuit injunctions; freezing orders; arbitration and the Brussels Regulation; obtaining evidence abroad; recognition and enforcement of foreign judgments.

**Teaching:** This course will have two hours of teaching content each week in the Lent Term and two hours in the Summer Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** Core textbook: Trevor C Hartley, *International Commercial Litigation* (Cambridge University Press, 3rd edn, 2020) (specified chapters only). For reference: Trevor C Hartley, *Civil Jurisdiction and Judgments in Europe* (Oxford University Press, 2017). Further reading: Born (Gary B) and Rutledge (Peter B), *International Civil Litigation in United States Courts: Commentary and Materials* (Wolters Kluwer, Austin, Boston, Chicago, New York, the Netherlands, 6th edn, 2018); Fentiman (Richard), *International Commercial Litigation* (Oxford University Press, Oxford, 2nd edn, 2015); Hartley, "Jurisdiction in Conflict of Laws – Disclosure, Third-Party Debt and Freezing Orders" (2010) 126 LQR 194

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4AN Half Unit Not available in 2022/23

### International Business Transactions: Conflict of Laws, Extraterritoriality, and Global Governance

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jacco Bomhoff NAB 6.09

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Pre-requisites:** Knowledge of conflict of laws (private international law) would be useful but is not essential.

**Course content:** States often aim to regulate activities that transcend their own borders. When such measures are challenged or enforced through litigation, domestic courts become important sites of global governance. This course brings together perspectives from tort & company law, private international law (conflict of laws), public law, and regulation theory, to study such forms of extraterritorial and transnational regulation. Questions for discussion include: What law should a court in England apply to a case involving environmental damage allegedly caused abroad by a multinational mining company? Should companies operating in China ever be bound by US competition law rules or other US regulations? Should the UK Human Rights Act apply to actions by British soldiers in a foreign country? Topics to be studied throughout the course are: (1) Choice of law in tort law and in company law (especially in Europe and the US); (2) Extraterritorial application of statutes (incl. competition law, securities law, and environmental regulations); (3) extraterritorial application of constitutional- and human rights law; (4) theories of transnational regulation (e.g. institutional roles of courts, regulatory arbitration).

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** Core textbook: Trevor C Hartley, *International Commercial Litigation* (Cambridge University Press, 2nd edn, 2015, or newer) (specified chapters only). Further reading: Christopher Whytock, *Domestic Courts and Global Governance*, 84 *Tulane Law Review* (2009); Campbell McLachlan, *Foreign Relations Law* (Cambridge University Press, 2016); Brillmayer, Goldsmith & O'Hara O'Connor, *Conflict of Laws: Cases and Materials* (7th edn., 2015).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4AP Half Unit Not available in 2022/23

### International Business Transactions: Contracts and Property

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Trevor Hartley

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and we cannot guarantee all students will get a place.

**Pre-requisites:** Knowledge of conflict of laws (private international law) would be useful but is not essential. Good general understanding of commercial law is essential. Non-LLM students must have a full law degree (a degree which fulfils the degree requirement for becoming a lawyer in your country).

**Course content:** The following topics will be studied from the point of view of European Union law, English (common and statute) law, Canadian law and US law: 1) Principles and theories of choice of law; 2) Proof and application of foreign law; 3) Contracts: applicable law; 4) The international reach of legislation for the regulation of business and the protection of consumers and employees; 5) The private international law aspects of boycotts and embargoes; 6) Exchange controls; 7) Currency problems in international contracts; 8) The international aspects of property transactions; 9) The recognition of foreign expropriations and other governmental acts affecting property (including financial assets).

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** Core textbook: Trevor C Hartley, *International Commercial Litigation* (Cambridge University Press, 3rd edn, 2020) (selected chapters). Further reading: Dicey, Morris & Collins, *The Conflict of Laws* (Sweet and Maxwell, London, 15th edn, 2012 by Sir Lawrence Collins with specialist editors); Plender (Richard) and Wilderspin (Michael), *The European Private International Law of Obligations* (Sweet & Maxwell, London, 4th edn, 2015)

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4AQ Half Unit

### Constitutional Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Martin Loughlin

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course takes its cue from the fact that today, more than ever, the constitution plays a major role in regulating the political and social life of the nation. How has this come about? With what political and social consequences? And what have been the implications for contemporary jurisprudence? This course seeks answers to these questions. It pursues this task by examining the emergence in the modern era the constitution as a document of higher-order law and considering the ways in which this understanding has acquired a heightened significance in recent decades. Course topics include: the invention of the documentary constitution, the ideology of constitutionalism, emergency powers, constitutional rights, constitutional democracy, constitutional adjudication, constitutional recognition, and cosmopolitan constitutionalism.

**Teaching:** This course will have 20 hours of teaching in the Michaelmas Term and two hours in the Summer Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** Most of the reading for the course consists of texts available online and delivered through Moodle. Students will find it useful to have regular access to Martin Loughlin, *Against Constitutionalism* (Harvard University Press, 2022).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4AR Half Unit

### International Criminal Law: Core Crimes and Concepts

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Gerry Simpson

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course looks at considers the rules, concepts, principles, history, institutional architecture, and enforcement of

what we call international criminal law or international criminal justice, or, sometimes, the law of war crimes. The focus of the course teaching is the area of international criminal law concerned with traditional "war crimes" and, in particular, four three of the core crimes set out in the Rome Statute (war crimes, torture as a crimes against humanity, genocide and aggression). It adopts a historical, philosophical and practical focus throughout, though the course is mainly directed at the conceptual problems associated with the prosecution of war criminals and, more broadly, legalised retribution. Attention, in this respect, will be directed towards the moral and jurisprudential dilemmas associated with bureaucratic criminality and individual culpability during international criminal law's iconic events at Versailles in 1919, at "Tokyoberg" between 1945 and 1948, in The Hague, and in Jerusalem in 1961. Topics might include Pre-History (Vitoria, Grotius, Gentili, Cicero), Versailles, Nuremberg and Tokyo, the Trial of Adolf Eichmann, Crimes Against Humanity, the Crime of Aggression, Anti-Anti-Impunity, International Criminal Law's Historical Method.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Gerry Simpson, *Law, War and Crime*, (2007). Gerry Simpson "Unprecedents" in *Retrials* (eds. Immi Tallgren and Thomas Skouteris, Cambridge: 2020)

Gerry Simpson "Epilogue: The Next Hundred Years" in *The Oxford Handbook of International Criminal Law*. (eds. Kevin Heller, Jens Ohlin, Sarah Nouwen, Fred Megret, Darryl Robinson, Oxford: 2019. Philippe Sands, *East-West Street*, (2017).

Georg Schwarzenberger, *International Law and Totalitarian Lawlessness*, (1943)

Judith Shklar, *Legalism*, (1964)

Maurice Hankey, *Politics, Trials, Errors* (1950)

Christine Schwobel, *Critical Approaches to International Criminal Law: An Introduction* (2015).

Mark Lewis, *The Birth of the New Justice: The Internationalization of Crime and Punishment, 1919-1950* (2014).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4AS Half Unit

### International Criminal Law: Prosecution and Practice

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Devika Hovell

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course examines the practice and procedure of international criminal law. Rather than examining the history and core crimes, the course focuses on the law, theory and politics impacting the process of legalised retribution entailed in the prosecution of international crimes. The course aims to provide opportunity for critical thought and analysis of the concept of international criminal responsibility and the various fora developed for the prosecution of international crimes, including the ad hoc tribunals for Rwanda and the former Yugoslavia, 'hybrid' tribunals such as the Special Tribunal for Lebanon, the Special Court for Sierra Leone and the Extraordinary Chambers in the Courts of Yugoslavia and domestic prosecution using the concept of universal jurisdiction. Over half the course will centre on the International Criminal Court, focusing in particular on questions, theory and case law surrounding modes of liability, immunities,

defences and state cooperation. While we will take historical, theoretical and critical approaches to such questions, the aim is also to provide the opportunity to examine current contemporary challenges and controversies affecting the practice and procedure of international criminal law.

**Teaching:** This course will have two hours of teaching content each week in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Reading lists will be provided for each week's seminar on Moodle. Indicative reading includes Jose Alvarez, 'Crimes of States/Crimes of Hate: Lessons from Rwanda' (1999) 24 *Yale Journal of International Law* 365; Henry Kissinger, 'The Pitfalls of Universal Jurisdiction', *Foreign Affairs* (July 2001); Darryl Robinson, 'Inescapable Dyads: Why the International Criminal Court Cannot Win' (2015) 28 *Leiden Journal of International Law* 323; Sara Kendall and Sarah Nouwen, 'Representational Practices: The Gap Between Juridified and Abstract Victimhood' (2013) 76(3) *Law and Contemporary Problems* 235. Students may wish to refer to Robert Cryer et al., *An Introduction to International Criminal Law and Procedure* (Cambridge, 2019), 4th edition.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4AT Half Unit Not available in 2022/23

### Regulation: Strategies and Enforcement

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Veerle Heyvaert

Also taught by: Professor Nicola Lacey

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is NOT available for students of the MSc Regulation programme.

This course will be relevant to the following LLM specialisms: Banking Law and Financial Regulation; Corporate and/or Commercial Law; Criminology and Criminal Justice; Information Technology, Media and Communications Law; Intellectual Property Law; Legal Theory; and Public Law.

This course has a limited number of places and we cannot guarantee all students will get a place.

**Course content:** The course provides an introduction to key topics relating to regulatory strategies and their implementation. It deals with issues from a systemic and comparative perspective and draws on approaches encountered in public administration, socio-legal studies and institutional economics. Topics include:

- Introduction: What is Regulation and why regulate?
- Regulation Strategies: Command-and-control; regulating through rules, standards and principles; alternative approaches including emissions trading; and self-regulation
- Risk regulation as a regulatory paradigm
- Enforcement: tools, strategies and principles
- Regulatory Policy: Cost/benefit Assessment, Regulatory Impact Assessment and Better Regulation;
- Regulatory competition; and
- Transnational Regulation

**Teaching:** This course will have two hours of teaching content each week in Lent Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 1,000 - 1,500 (upper limit) word essay. Students will also have the opportunity to sit a mock exam.

**Indicative reading:** R Baldwin, M Cave and M. Lodge *Understanding Regulation* 2nd ed.(OUP, 2012); R. Baldwin, M. Cave and M. Lodge (ed.) *Oxford Handbook on Regulation* (OUP,

2010) Ian Ayres and John Braithwaite, *Responsive Regulation: Transcending the Deregulation Debate* by (OUP, 1992); V. Heyvaert, *Transnational Environmental Regulation and Governance* (CUP, 2019) B. Morgan and K. Yeung, *An Introduction to Law and Regulation* (CUP, 2007).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4AU Half Unit Not available in 2022/23 Regulation: Legal and Political Aspects

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Veerle Heyvaert

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is NOT available for students of the MSc Regulation programme.

This course will be relevant to the following LLM specialisms: Banking Law and Financial Regulation; Corporate and/or Commercial Law; Criminology and Criminal Justice; Information Technology, Media and Communications Law; Intellectual Property Law; Legal Theory; and Public Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

**Pre-requisites:** Students must have taken Regulation: Strategies and Enforcement (LL4AT).

**Course content:** The course aims to give students an essential grounding in theories of regulation as these relate to the evaluation of regulatory regimes and the challenges of accounting for regulatory practice. Different ways of understanding regulatory developments will be discussed as will the set of challenges that arise when regulation is carried out by numbers of regulators at different levels of government. Topics dealt with will include:

- What is Good Regulation?
- Accountability & Regulation
- Regulation and Cost Benefit Analysis
- The Better Regulation Movement
- Self-Regulation
- Rules, Standards and Principles
- Regulatory Competition
- Regulatory Networks
- Lenses for Viewing Regulation
- The Future of Regulation

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** R Baldwin, M Cave and M. Lodge, *Understanding Regulation* 2nd ed.(OUP, 2012); R. Baldwin, M. Cave and M. Lodge (ed.) *Oxford Handbook on Regulation* (OUP, 2010) R Baldwin, C Hood & C Scott, *Socio-Legal Reader on Regulation* (OUP, 1998); *Responsive Regulation: Transcending the Deregulation Debate* by Ian Ayres and John Braithwaite (OUP, 1992). B. Morgan and K. Yeung (2007,) *An Introduction to Law and Regulation* (Cambridge University Press, 2007); J. Jordana and D. Levi-Faur (2004/eds), *The Politics of Regulation* (Edward Elgar, 2004) A Ogus, *Regulation* (OUP, 1994); R Baldwin, *Rules and Government* (OUP, 1995); I Ayres & J Braithwaite, *Responsive Regulation* (OUP, 1992).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4AV Half Unit

### International Economic Law and Development

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mona Paulsen

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** There are no prerequisites for this course, and it is intended to be both an introduction and a complement to other course offerings at LSE Law. Students with no previous background in public international law may find it helpful to consider consulting G. Hernandez, *International Law* (2019).

**Course content:** This course focuses on how international trade, investment, and financial rules and institutions (collectively, the international economic order) impact states' development, and vice versa – that is, what political and economic forces shape the practices of development and how this, in turn, constitutes the international economic order.

We will situate our discussion of state's development strategies against live debates about the resiliency of economic globalisation in the face of several international economic disruptions. A range of readings are assigned to enhance participatory learning, particularly country case studies, primary source materials, and scholarly work. This is an interactive course that engages with both theory and practice; it is dependent on class participation.

We begin by exploring various conceptions of development, with thoughtful attention as to how different theories of development have progressed over time. Thereafter, we will analyse the linkages between law and development, including discussion on the World Bank's institutional account of the rule of law. This includes introduction into the different international economic institutions that enable states to integrate into the global economy. We close the first half of the seminar by examining the role of the State in economic development, setting up our study of China's approach to law and development later in the course.

In the second half of the course, we utilise our theory work to appraise the role of international institutions in the process of economic development in practice. What are the challenges that states face by adhering to the principles and rules driving a law-centred, liberal, multilateral economic order? We will consider the advantages and disadvantages of global engagement by thinking through the relationships between politics, economics, and law in the work of the IMF and World Bank, the role of developing countries at the World Trade Organisation, and why and how developing countries conclude investment treaties. Finally, we analyse emerging issues in the international economic order, such as injecting international rights in trade agreements, the expansion of national security policy preferences, climate change, and the future of the data-driven economy.

**Teaching:** This course will have two hours of teaching content each week in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 2,000 word formative essay during the course.

**Indicative reading:** Reading lists will be provided for each seminar on Moodle. Where possible, readings will include relevant videos and podcasts to enhance student learning.

Readings will draw from materials authored by international institutions covered in the course, including the World Bank's Development Reports and the World Trade Organization's documents. Indicative scholarly readings include: A. Anghie, *Imperialism, Sovereignty and the Making of International Law* (2005); A. Roberts and N. Lamp, *Six Faces of Globalization* (2021); M.J. Trebilcock and M. Moto Prado, *What Makes Poor Countries Poor? Institutional Determinants of Development* (2011); J. Bonnitcha et al., *The Political Economy of the Investment Treaty*

Regime (2017); L. Eslava, *Local Space, Global Life: The Everyday Operation of International Law and Development* (2015); A. Narlikar, *Power Narratives and Power Paradoxes in International Trade Negotiations and Beyond* (2020); A. Santos et al., *World Trade and Investment Law Reimagined: A Progressive Agenda for an Inclusive Globalization* (2019); A. Sen, *Development as Freedom* (1999); N. Woods, *The Globalizers: The IMF, the World Bank, and their Borrowers* (2012); H. Wang, "The Belt and Road Initiative Agreements: Characteristics, Rationale and Challenges," *World Trade Review* (2021); M. Erie, "Chinese Law and Development" 61(1) *Harvard International Law Journal* (2021); G. Shaffer, *Emerging Powers and the World Trading System* (2021); and, S. Pahuja, *Decolonising International Law; Development, Economic Growth and the Politics of Universality* (2011).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4AW Half Unit Not available in 2022/23 Foundations of International Human Rights Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Susan Marks

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is part of the following LLM specialisms: Public International Law, Human Rights Law.

This course has a limited number of places and we cannot guarantee all students will get a place.

**Pre-requisites:** None

**Course content:** The course provides an introduction to key developments, issues and ideas that have given shape to the regime of international human rights law. We consider enduring debates around the foundations and universality of human rights, and look at a range of controversies relating to the interpretation and application of human rights treaties. Through the study of relevant concepts, norms, processes and debates, students are encouraged to develop an informed and critical assessment of the significance of international human rights law as a force for emancipatory change.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6 of Michaelmas Term.

Students are expected to have done the set reading and be willing to participate in discussion.

**Formative coursework:** Class exercises will be set.

**Indicative reading:** Reading lists will be provided for each seminar on Moodle. Relevant readings may include: Charles Beitz, *The Idea of Human Rights* (2009); Conor Gearty and Costas Douzinas (eds.), *The Cambridge Companion to Human Rights Law* (2012); and Philip Alston and Frédéric Mégret, *The United Nations and Human Rights: A Critical Appraisal* (2017).

**Assessment:** Assessment will be based on submission of an 8,000 word essay.

## LL4AX Half Unit Selected Topics in International Human Rights Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Margot Salomon

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting

Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course explores international human rights law through a range of contemporary topics. We consider international human rights law and issues such as water, property, sexuality, and indigenous rights to land and resources. This course also investigates overarching issues that help us situate human rights in wider socio-economic and political context. Here we tend to investigate human rights and resistance, the fragmentation of international law, and current developments at international human rights institutions. Through the study of relevant concepts, norms, processes and debates, students are encouraged to develop an informed and critical assessment of the significance of international human rights law as a force for emancipatory change.

**Teaching:** 20 hours of seminars in the LT.

There will be a reading week in Week 6.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** O de Schutter, *International Human Rights Law: Cases, Material and Commentary* (CUP); P Mecklem, 'Human Rights in International Law: Three Generations or One?' 3 *London Review of International Law* 1 (2015); C Clark, 'Of What Use is a Deradicalized Human Right to Water?' 17 *Human Rights Law Review* 2 (2017); W Schabas, 'The Omission of the Right to Property in the International Covenants' 4 *Hague Yearbook of International Law* (1991); J Kozma, M Nowak and M Scheinin, *A World Court of Human Rights - Consolidated Draft Statute and Commentary* (Neuer Wissenschaftlicher Verlag, 2010)

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4AY Half Unit International Tax Systems

**This information is for the 2022/23 session.**

**Teacher responsible:** Eduardo Baistrocchi

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** There are no formal pre-requisites for this module.

**Course content:** The course offers a comprehensive introduction to international taxation. It examines how taxation applies to transactions in the international context. The focus is on rules that operate at a global level, particularly the OECD Model Tax Convention on Income and on Capital, which is the basis of over 3,000 bilateral tax treaties worldwide. The course will look at a series of cross-border transactions, starting with the basic example of an export and import of goods and culminating with the treatment of some complex and artificial structures. The features of tax systems will be studied through these transactions, particularly those found in double tax conventions and the law of the European Union. This approach will be supplemented with the analysis of some foundation concepts needed to study international taxation. Throughout the course examples will be drawn from the tax systems of a range of jurisdictions, including G20 countries and non-G20 tax hubs.

**Teaching:** This course will have 20 hours of teaching content in Michaelmas Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will have the option of producing a formative essay of 2,000 words.

**Indicative reading:** Detailed reading lists will be provided during the course via Moodle.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4AZ Half Unit

### Taxation of Multinational Enterprises: Transfer Pricing

**This information is for the 2022/23 session.**

**Teacher responsible:** Eduardo Baistrocchi

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** There are no formal pre-requisites for this module.

**Course content:** The course offers a comprehensive analysis of the taxation of multinationals, focusing on transfer pricing. It offers both theoretical and practical understanding of the fundamentals of this fascinating topic. The course will begin with an overview of the transfer pricing issue, including its history, current importance and global trends. General concepts, special rules and the different types of transfer pricing transactions will be discussed, as well as the specific rules and methods for tangible goods, intangibles, services and loans. Finally, the course will provide a review of transfer pricing controversy in a number of jurisdictions, including G20 countries and non-G20 global tax hubs.

**Teaching:** This course will have 20 hours of teaching content in Lent Term and two additional hours of teaching in the Summer Term. There will be a Reading Week in Week 6.

**Formative coursework:** Students will have the option of producing a formative essay of 2,000 words.

**Indicative reading:** Detailed reading lists will be provided during the course via Moodle.

Sample readings include:

Báez, Andrés and Brauner, Yariv, Taxing the Digital Economy Post BEPS ... Seriously (March 1, 2019). University of Florida Levin College of Law Research Paper No. 19-16, Available at SSRN: <https://ssrn.com/abstract=3347503> or <http://dx.doi.org/10.2139/ssrn.3347503>

E. Baistrocchi, Article 9: Associated Enterprises – Global Tax Treaty Commentaries, *Global Tax Treaty Commentaries*, International Bureau of Fiscal Documentation, 2022. Available at: <https://www.ibfd.org/news/global-tax-treaty-commentaries-gttc>

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4B1 Half Unit

### International Trade Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mona Paulsen

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** None. Students with no previous background in public international law may find it helpful to consider consulting a standard textbook such as M. Evans (ed.), *International Law* (5th ed., 2018) or G. Hernandez, *International Law* (2019).

**Course content:** This course offers an introduction to the basic legal principles of the World Trade Organization (WTO), as well as the most salient challenges confronting the organisation today.

The course begins by introducing students to the economic and political theories of international trade and global economic integration. The course proceeds with a history of the multilateral trading system, beginning with the stillborn International Trade Organization, the slow legalisation of trade pursuant to the General Agreement on Tariffs and Trade, and the eventual creation of the WTO. Against this history, students will study the political economy of trade, and evaluate the debates about economic globalisation.

By the end of the course, students will understand the basic system of WTO rules and exceptions. In addition, students will evaluate WTO institutional functions, including trade negotiations and dispute settlement. We will critically assess current challenges to the functioning of the WTO disputes settlement system, which operates without a functioning appeals mechanism since 2019.

This course aims for students to gain a solid theoretical understanding of WTO principles and practices, to gain the skills to evaluate WTO rules, and to debate future WTO reforms. Every effort is made to contextualise current trade conflicts in the political economy of international trade. Seminar readings will include interdisciplinary authorities to help students dissect various economic, political, and social questions about the international economic order. The course closes with discussion on the future of the multilateral trading system, considering member states interests in novel areas, such as electronic commerce, the rising securitisation of trade, climate change, and future coordination for pandemics.

Students with deeper interests in development issues and/or the political economy of trade may complement this course with LL4AV: *International Economic Law and Development*.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term and two additional hours in the Summer Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 2,000 word formative essay during the course.

**Indicative reading:** Each week includes a detailed reading guide of essential and further readings. Essential readings are often extracted textbook chapters, relevant WTO rules, and extracts from WTO dispute settlement reports. Some weeks may require students to read academic work or other primary materials. Where possible, readings will include relevant videos and podcasts to enhance student learning.

There is no set textbook for the course, but textbooks are all found online. Indicative textbooks include P. Van den Bossche & W. Zdouc, *The Law and Policy of the World Trade Organization: Text, Cases and Materials* (CUP, 5th ed., 2021); S. Lester et al., *World Trade Law, Texts Materials, and Commentary* (3rd ed. 2018); and R.

Howse et al *The Regulation of International Trade* (4th ed., 2013). Primary WTO source materials are available for download from the WTO's website.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4BA Half Unit Not available in 2022/23 International Law and the Movement of Persons within States

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Chaloka Beyani

Associate Professor of Law and former UN Special Rapporteur on the Human Rights of Internally Displaced Persons 2010-2016. Member of the UN Secretary General's Human Rights Up Front 2014 and continuing.

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Public International Law and Human Rights Law.

This course has a limited number of places and we cannot guarantee all students will get a place.

**Course content:** The course provides a detailed study of the international legal framework in which the causes, problems, policies, standards, techniques and institutions concerning the movement of persons within States and protection of internally displaced persons are situated. The course explores the overlap between International Human Rights Law, International Humanitarian Law and Humanitarian Assistance with respect to internally displaced persons. It covers: the definition of internally displaced persons; individual criminal responsibility for forcible displacement before ad hoc Tribunals with criminal jurisdiction and the International Criminal Court; standards applicable in international law to the protection of internally displaced persons, the regime of humanitarian assistance to displaced persons; and finally the institutional protection of internally displaced persons by the United Nations Special Rapporteur on the Human Rights of Internally Displaced Persons, the United Nations High Commissioner for Human Rights, and the United Nations High Commissioner for Human Refugees. Topics include:

- Regulation of movement within States in International Law
- Territorialism, movement, and displacement
- Internally displaced persons and the role of the UN Special Rapporteur on the Human Rights of Internally Displaced Persons
- Protection of Internally Displaced Persons in International Human Rights Law
- Protection of Internally Displaced Persons in International Humanitarian Law
- The Regime of Climate Change induced Displacement
- Individual Criminal Responsibility for Forcible Displacement
- Institutional Protection and Humanitarian Assistance
- Internally Displaced Persons in Post-Conflict Situations
- Remedies and 'durable' solutions for Internally Displaced Persons.

**Teaching:** This course will have two hours of teaching content each week in Lent Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** G.S. Goodwin-Gill and Jane MacAdam, *The Refugee in International Law*, 3rd ed., (Oxford, 2007). Allehone Abebe, *The Emerging Law of Forced Displacement in Africa: Development and Implementation of the Kampala Convention on Internally Displaced Persons* (Routledge, 2017).

C.Phuong, *International Protection of Internally Displaced Persons* (Cambridge, 2009). J. McAdam, *Climate Change, Forced Migration, and International Law* (OUP, 2012)

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4BB Half Unit Not available in 2022/23 International Law and the Movement of Persons Between States

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Chaloka Beyani

Associate Professor of Law and former UN Special Rapporteur on the Human Rights of Internally Displaced Persons 2010-2016. Member of the UN Secretary General's Human Rights Up Front 2014 and continuing.

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Public International Law and Human Rights Law.

This course has a limited number of places and we cannot guarantee all students will get a place.

**Course content:** The course provides a detailed study of the international legal framework in which the causes, problems, policies, standards, techniques and institutions concerning the protection of asylum seekers, refugees and refugee women, and migrants are situated. The course explores the overlap between International Refugee Law, International Human Rights Law, International Criminal Law, the phenomenon of Migration, including Human Trafficking in the context of refugees, legal and illegal migrants. It covers: the definition of refugees, legal and illegal migrants, including trafficking in human beings; the concepts of 'well-founded fear' of persecution and group eligibility to refugee protection; procedures for determining refugee status on an individual and group basis, in Africa, Asia, Australia, the European Union, North America, and Latin America; temporary protection; the process of exclusion from refugee protection; the role, in refugee law and human rights, of the principle of non-refoulement in refugee protection; the cessation of refugee status, voluntary repatriation, and safe return; standards applicable in international law to the protection of refugees, migrants, and evolving standards against human trafficking; the regulation of migration in regional economic and political unions, namely the European Union, East African Community, the Union of West African States, the Caribbean Community and the Southern African Development Community; and finally the institutional protection of refugees, and migrants by the United Nations High Commissioner for Refugees and the, the International Organisation for Migration. Topics include:

- International Law and the Movement of Persons Between States
- Definition of Refugees
- The Right to Seek and Obtain Asylum and Determination of Refugee Status
- Exclusion from Refugee Protection
- Protection of asylum seekers and refugees from Refoulement
- Standards of Protection and cessation of refugee status
- Definition of Migrants
- Protection of Migrants in International Human Rights Law
- Regional Integration and Migration
- Trafficking in Human Beings and Human Smuggling

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** G.S. Goodwin-Gill and Jane MacAdam, *The Refugee in International Law*, 3rd ed., (Oxford, 2007) J. Hathaway, *The Rights of Refugees under International Law* (Cambridge, 2005) E. Feller, V. Turk and F. Nicholson, *Refugee Protection in International Law: UNHCR's Global Consultations on International Protection* (Cambridge University Press 2003) I. Brownlie and G. Goodwin-Gill, *Basic Documents on Human Rights* latest edition, Oxford: Clarendon Press, OR Ghandi, *International Human Rights Documents*, latest edition, Oxford: Clarendon Press

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4BF Half Unit

### International Financial Regulation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Philipp Paech

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Accounting, Organisations and Institutions, MSc in Regulation, MSc in Risk and Finance and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course focuses on the micro- and macro-prudential regulation of financial institutions and the financial system. It examines the prudential regulation of banks, bank resolution schemes, the regulation of shadow banking and other regulatory attempts to ensure financial stability, including with regard to novel, technology-induced types of financial services ('FinTech'). The focus will be on the regulation of national and international aspects of financial institutions and the financial system, rather than on private law and transactional aspects. No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. For non-lawyers, a willingness to engage in legal analysis will be necessary, although a legal background is not required.

The syllabus may include the following topics:

The Rational of International, EU and UK Regulatory Structures  
Core concepts of Financial Regulation, pre- and post-Crisis  
Financial Stability – Policy Issues, Principles and Global Standard  
Setters

Prudential Regulation of Banks – The Basel Accords

National and Cross-border Resolution of Failing Banks

Regulating Shadow Banks

Regulating Credit Rating Agencies

Regulating FinTech

**Teaching:** This course will have two hours of teaching content each week in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course. The course offers also a voluntary mock exam.

**Indicative reading:** A full reading list will be distributed during the course and essential materials will be made available to the students electronically where possible. In addition, the students will be invited to do independent reading. A good general introduction is J. Armour et al, *Principles of Financial Regulation*, OPU 2016

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4BG Half Unit

### Rethinking EU Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jan Zgliniski

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course examines the theoretical underpinnings of the EU and European Union law: it explores issues such as the nature and evolution of the EU and its legal order, its democratic and constitutional credentials, the place of fundamental rights and their relationship to market freedoms, the idea of a European economic constitution, and the impact of the Euro-crisis, the rule of law crisis, populism and Brexit on the trajectory of integration. It offers students a deeper understanding of the structures that constitute the EU but also an opportunity to think about how European integration informs our ideas of law and the modern state.

**Teaching:** This course will have two hours of teaching content each week in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** Michael A. Wilkinson, *Authoritarian Liberalism and the Transformation of Modern Europe* (OUP, 2021); K. Tuori and K. Tuori, *The Eurozone Crisis: A Constitutional Analysis* (Cambridge University Press, 2014); J Habermas, *The Crisis of the European Union: A Response* (Polity 2012); C Bickerton, *European Integration: From Nation-States to Member States* (Oxford University Press, 2012); P Lindseth, *Power and Legitimacy: Reconciling Europe and the Nation-State* (OUP 2010); L van Middelaar, *The Passage to Europe: How a Continent Became a Union* (Yale University Press, 2013); F Scharpf, *Governing in Europe* (OUP 1999); A Stone Sweet, *The Judicial Construction of Europe* (OUP 2004); JHH Weiler, *The Constitution of Europe: "Do the New Clothes Have an Emperor?" And Other Essays on European Integration* (CUP 1999); A Wiener and T Diez (eds), *European Integration Theory* 2nd ed (OUP 2009)

**Assessment:** Essay (100%) in the ST.

## LL4BH Half Unit

### Law and Government of the European Union

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Floris De Witte

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Basic knowledge (at an undergraduate level) of EU law is required.

**Course content:** How is the European Union governed? This course will discuss this question in both a descriptive and a

normative fashion. In descriptive terms, the course looks at the way in which the EU institutions are structured, how they function internally, and the powers that they have. It looks at the power of the European Court of Justice, at the role of fundamental rights, and the way in which the Treaty can be amended. This descriptive discussion forms the backdrop for the (more central) normative discussion: how should Europe be governed? Is the EU democratic? Should it be? Should Member States have more or less power to challenge EU measures? What will the future of the EU look like? And what should it look like?

Students will be challenged to think about the EU as an institutional structure in which both law and politics play a crucial role.

Really understanding the EU requires knowledge of both areas as well as knowledge of their interaction. At no other time in the development of the EU has the interaction between law and politics so fundamentally affected the direction of the integration process. The coming years will see fundamental changes to the EU's structure; which are informed as much by political dynamics as by legal mechanisms. This course prepares you to fully understand those changes - and allow you to analyse critically both their normative content and institutional structure. We will of course discuss these questions with a focus on the contemporary challenges of the EU: ranging from Russia's invasion of Ukraine and Brexit to the rule of law crisis and the climate change challenge.

**Teaching:** This course will have 20 hours of teaching content in Michaelmas Term. There will be a Reading Week in Week 6.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course. The formative essay serves as a basis for the assessed essay.

**Indicative reading:** Dawson & De Witte, 'EU Law and Government' (CUP 2022).

**Assessment:** Essay (100%, 8000 words) in the ST.

## LL4BK Half Unit Corporate Crime

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Jeremy Horder

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Accounting and Finance, MSc in Regulation, MSc in Risk and Finance and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course focuses on crime committed within the commercial and business environment. The course considers the principles of corporate criminal liability and different models of corporate criminal liability. The exercise of prosecutorial discretion in corporate crime cases, with a consideration of deferred prosecution agreements, is examined. The course addresses the challenges in the international fight against corruption. As well as exploring the nature, extent and consequences of corruption, the course examines the law of fraud and false accounting, as well as international responses to corporate crime and their implementation into domestic law. The increasing emphasis placed by the law on a company's obligation to prevent the occurrence of corporate crime is also examined, in relation to fraud, environmental crime and the abuse of human rights. There is no overlap between this course and the course on Financial Crime in the Lent (second) Term.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Reading is prescribed for each lecture and seminar. There are no core textbooks available for the course, although Ashworth's Principles of Criminal Law (10th edition)

has a chapter on Financial Crime that may be of assistance. All the reading material is available from resources easily accessible through LSE Moodle, LSE Electronic Library and the internet.

Preliminary reading is not required but for an understanding of the areas covered in the course students may read Wells: Corporations and Criminal Responsibility, 2nd edition, 2001, Oxford University Press; Gobert & Punch: Rethinking Corporate Crime, 2003, Butterworths LexisNexis; Green: Lying, Cheating and Stealing: A Moral Theory of White Collar Crime, 2007, Oxford University Press.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4BL Half Unit Financial Crime

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jonathan Fisher

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Accounting and Finance, MSc in Regulation, MSc in Risk and Finance and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course focuses on financial crime committed within the commercial and business environment and explores current perspectives in the detection, investigation and prosecution of these cases.

The first part of the course considers the emergence of anti-money laundering regimes, through criminal offences and regulatory compliance, as the primary response to financial crime. In addition, the course examines models for confiscation of criminally obtained property following conviction and frameworks for non-conviction-based confiscation and taxation in the civil courts. The case for illicit enrichment offences and use of special investigation tools such as unexplained wealth orders and compulsory interrogation powers in the detection of financial crime is explored. The course addresses the compatibility of these initiatives with protections on due process and the rights to privacy and property set out in the European Convention on Human Rights and other international instruments.

The second part of the course examines the engagement between financial crime and the global financial markets, with a close focus on offences such as insider dealing, misleading the financial markets and false accounting. The challenges of detection and enforcement are discussed, and the contribution of financial crime to the global financial crisis in 2008 is studied. In addition, the course explores the potential criminality of other market malpractices such as manipulating the financial markets, short selling and reckless risk taking.

The course is bracketed by introductory and concluding sessions. The first session explores the nature and extent of financial crime, the relationship between organised crime groups and financial crime, and the social and economic impact of financial crime. The session also addresses the perceived ambivalence to the prosecution of financial crime cases, the limitations on public authorities to fight financial crime, the role of public/private partnerships and the rise of private prosecutions.

The course concludes with a session on the principles of sentencing in financial crime cases and an examination of alternatives to the imposition of lengthy custodial sentences.

There is no overlap between this course and the course on Corporate Crime in the Michaelmas (first) Term. Corporate Crime is not a pre-requisite for this course.

**Teaching:** This course will have two hours of teaching content each week in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Reading is prescribed for each lecture and seminar. There are no core textbooks available for the course; however, all the reading material is available from resources easily accessible through LSE Moodle, LSE Electronic Library and the internet. Preliminary reading is not required but for an understanding of the areas covered in the course students may read Green: Lying, Cheating and Stealing: A Moral Theory of White Collar Crime, 2007, Oxford University Press; Alldridge: Money Laundering Law: Forfeiture, Confiscation, Civil Recovery, Criminal Laundering and Taxation of the Proceeds of Crime, 2003, Hart Publishing; Ryder: Financial Crime in the 21st Century, Law and Policy, 2011, Edward Elgar.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4BM Half Unit Not available in 2022/23

### The Legal Protection of Inventions

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Siva Thambisetty

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Information Technology, Media and Communications Law, Intellectual Property Law, Corporate and Commercial Law, International Business Law, and Competition, Innovation and Trade Law.

This course has a limited number of places and we cannot guarantee all students will get a place.

**Pre-requisites:** Students interested in this subject are encouraged to consider enrolling onto Innovation, Technology and Patent Law (LL4BN) in the Lent Term.

**Course content:** This course provides an advanced and comprehensive introduction to the legal protection of invention through patents. Legally defined inventions are everywhere - in the velcro used to fasten a gym bag, in the tap or touch of a smartphone, in the food we eat, the medicines we take, the clothes we wear and in the buildings we live in.. Patent rights increasingly intersect with diverse issues such as competitive innovation, inequitable access to technologies, global public health, regulation of risky technologies and the pursuit of science. This course addresses the basics of patent prosecution as well as the theoretical and actual relationship between patents and innovation, both in law and in economics. We will study patentability criteria as well as patent eligibility for inventions that incorporate software, medical innovations, biotechnology or morally controversial technologies. A comparative approach based on UK, EU and US patent law will be adopted where relevant.

An aim of this course is to gain familiarity with widely different contexts of innovation and a sound critical approach to the general principles of the legal protection of inventions. Recent developments such as Covid-19 treatments and vaccine innovation will be addressed and students will be equipped to engage in current legal and policy issues in some depth. Students do not need a scientific background and will be supported in understanding technical aspects.

Topics covered include: Novelty, inventive step, person skilled in the art, industrial applicability, sufficiency of disclosure, computer implemented inventions and business methods, biotechnology, exclusions (such as animal varieties, diagnostic methods, on grounds of morality) and the fundamentals of claim construction and infringement.

**Teaching:** This course will have two hours of teaching content each week in Lent Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** Weekly reading will include core chapters from

books, cases and articles from law reviews.

**Assessment:** Essay (100%, 8000 words) in the LT.

---

## LL4BN Half Unit Not available in 2022/23

### Innovation, Technology and Patent Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Siva Thambisetty NAB 7.29

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms:

Information Technology, Media and Communications Law, Intellectual Property Law, Corporate and Commercial Law, International Business Law and Competition, Innovation and Trade Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Pre-requisites:** Students must have completed The Legal Protection of Inventions (LL4BM).

**Course content:** This course will build on the comprehensive introduction to patent law provided in LL4BM to address sophisticated issues of law and public policy through multiple perspectives. Indicative list of weekly seminar topics include biotechnology and biodiversity, synthetic biology, artificial intelligence, pharmaceuticals and access to medicines, research use exception, competition law and policy with respect to the patent rights in particular sectors, patent offices and patent litigation, and the Unitary Patent Convention. The course will allow students to bring a wide variety of interests to the table and will address questions of reform of law and institutions. Course content complements several areas of national and international law and policy including competition law, access and benefit sharing issues around genetic resources, transnational rules that impact domestic innovation policy, institutional theory, affordability of patented medicines, human rights and bioethics.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

This is a Lent term course, and consists of 10 weekly two-hour seminars in variable format including lecture-discussions, student-led seminars and guest lecturers where appropriate. Students are expected to participate in class discussions and critically explore further implications of the reading covered each week.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** Weekly readings will include book chapters, law review articles, reports and studies as well as cases.

A Pottage and B Sherman Figures of Invention: A History of Modern Patent Law OUP 2011

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

**LL4BP Half Unit****Current Issues in Intellectual and Cultural Property Law**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Luke McDonagh

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The aim of the module is to introduce key themes in critical debates about intellectual and cultural property. This course takes a historical, theoretical and contextual approach to current debates and controversies over patents, copyright, trademarks and art restitution. The module focuses on a set of topical questions that illuminate concepts, institutional models, and socio-economic formations that cut across the diversity of intellectual and cultural property regimes. Questions are posed on a range of topics including the following: on the nature of property in patented inventions during a global pandemic; on the implications of the transnational expansion of intellectual property forms and institutions such as the WTO/TRIPS and the corresponding effect on global political economy; and on how regimes forged in the era of industrialization have adapted to new modes of production and distribution in a global market for knowledge. These expansive questions are not asked in abstraction. Seminars will focus on specific case studies of institutions, transactional forms and social effects. Many of these studies are chosen for their topicality, so the contents of the course will evolve from year to year, but seminar topics might include: the nature of the link between legal-economic incentives and technological innovation; the importance of knowledge sharing and the optimal use of intellectual property in an emergency; the use and circulation of genetic resources under the Convention on Biological Diversity; the contested ideas of ownership, property and heritage in the market for tangible objects and intangible culture; the disputes over the meaning of authorship in collaborative fields such as music, film and theatre; the relevance (or not) of intellectual property in the context of 'negative spaces' (the fashion industry, fan fiction, magicians, and stand-up comedy); the use and misuse of the public domain in intellectual property discourses; the evolution of non-conventional trade marks such as scents, shapes and over-arching brands; and the linked questions of (i) whether intellectual property is a human right, and if so, (ii) whether companies are 'legal persons' capable of asserting this human right.

**Teaching:** This course will have 20 hours of teaching content in Lent Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:**

- Biagioli, Jaszi & Woodmansee, Making and Unmaking Intellectual Property (2011).
- Boyle, The Public Domain. Enclosing the Commons of the Mind (2009).
- Miles, Art as Plunder. The Ancient Origins of Debate About Cultural Property (2008).
- McDonagh, Performing Copyright: Law, Theatre and Authorship (2021).

**Assessment:** Essay (100%, 8000 words) in the ST.

**LL4BQ Half Unit****Trade Mark Law**

**This information is for the 2022/23 session.**

**Teacher responsible:** Luke McDonagh

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course offers in depth analysis of legislation and case law concerning trade marks in the UK and EU. In so doing the module considers relevant developments in international and comparative law. Topics covered include: national, regional and international trade mark registration systems; absolute grounds and relative grounds of refusal; the scope of trade mark rights; trade mark infringement; exceptions and defences; and the ownership of brand image in the context of the interaction between consumers and corporate brands.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Core Textbook - S Karapapa and L McDonagh, Intellectual Property Law 1st edition (OUP, Oxford 2019). Students will be expected to read widely in designated journals and books. All of the recommended cases and journal articles are available in electronic form and additional materials will be made available on the Moodle website which supports this course. A detailed reading list will be provided for the course, but the following are indicative (and available in the LSE Library): L Bently, J Davis, J Ginsburg (eds) Trade Marks & Brands: An Interdisciplinary Critique (CUP, Cambridge 2008); A Arvidsson, Brands. Meaning and Value in Media Culture (Routledge, London 2006); C Lury, Brands. The Logos of the Global Economy (Routledge, London 2004); G Dinwoodie & M Janis (eds) Trade Mark Law and Theory: A Handbook of Contemporary Research (Edward Elgar, Cheltenham 2008); S Maniatis & D Botis, Trade Marks in Europe: A Practical Jurisprudence 2nd ed (Sweet & Maxwell, London 2010).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

**LL4BT Half Unit Not available in 2022/23****Cultural Property and Heritage Law**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Tatiana Flessas

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course looks at cultural property and heritage law from legal, social theoretical and practice-oriented perspectives. It provides an overview of existing and emerging cultural property and heritage legislation (domestic and international). We will be looking in particular at the development of cultural property legislation in the 20th century and emerging international cultural property and heritage initiatives under the auspices of the UN and UNESCO. Topics to be covered include the origins of cultural property law, the problems in defining cultural property and heritage, current issues and cases in repatriation and restitution of cultural objects, the National Trust and other

heritage protection regimes, and intangible cultural heritage. The course also addresses the creation and management of museums and heritage sites, primarily within the UK, but also including sites in North and South America, Europe and Asia. We consider how the issues that we've identified throughout the course arise in the ongoing construction, protection, and (primarily economic) uses of heritage. Along with specialist seminars, the course includes visits to museums and contact with practising experts in the field.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 2,000 word essay or other type of formative assessment.

**Indicative reading:** Neil Cookson, *Archaeological Heritage Law* (2000 Barry Rose); John Henry Merryman and Albert E. Elsen, *Law, Ethics and the Visual Arts* (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 1* (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 3* (1989 Butterworths); J.E. Tunbridge and G.J. Ashworth, *Dissonant Heritage: the management of the past as a resource in conflict* (1996 J. Wiley); Norman Palmer, *Museums and the Holocaust: law, principles and practice* (2000 Institute of Art and Law); John Henry Merryman, *Thinking about the Elgin Marbles: critical essays on cultural property, art and law* (2000 Kluwer Law International); Nick Merriman, *Beyond the Glass Case: the past, the heritage and the public in Britain* (1991); Jeanette Greenfield, *The Return of Cultural Treasures* (1989); Richard Prentice, *Tourism and Heritage Attractions* (1993); G.J. Ashworth and P.J. Larkham, eds. *Building a New Heritage: tourism, culture, and identity* (1994); Peter Mandler, *The Fall and Rise of the Stately Home* (1997); Patrick J O'Keefe, *Trade in Antiquities: reducing destruction and theft* (1997); Ismail Serageldin, Ephim Shluger, Joan Martin-Brown, eds. *Historic Cities and Sacred Sites: cultural roots for urban futures* (2001); Federico Mayor, *Memory of the Future* (1995); Peter J. Fowler, *The Past in Contemporary Society: then, now* (1992); David Brett, *The Construction of Heritage* (1996); Karl Ernest Meyer, *The Plundered Past* (1974).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4BU Half Unit

### Art Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Tatiana Flessas

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course engages in a discussion of specific cases and issues regarding acquisition, ownership, and restitution of works of art, and the problems that arise in regulating markets in art and cultural artefacts. We will look at domestic (UK and US) and international legislation regulating the art trade. Against this legislative background, the course examines important cases in disputes regarding commodification and sale of cultural goods, including the issues that arise in the operation of the art market (dealers, museums, collectors and auction houses). 'Art Law' is a specialised area of practice and an emerging area of theory and scholarship. We will look at some of the cases and theory of art and law, including the practices of dealers and auction houses in valuing (and mis-valuing) art for sale; the recent developments in addressing the restitution of art taken during the Nazi era; museum loans and the cross-border movement of art; the restoration and conservation debate(s) and then turn to a scholarly and interpretive approach to the issues that arise in considering the art market. We

will also return to the questions that arise in dealer, auction house and museum policies more generally. Finally, practitioners in these areas, museum and auction house professionals, archaeologists, and art experts will be contributing to the seminars on the emerging legal issues in this area.

**Teaching:** This course has 20 hours of teaching content in Lent Term and an additional two hours of teaching in the Summer Term. There is a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Colin Renfrew, *Loot, Legitimacy and Ownership: The Ethical Crisis in Archaeology* (2000 Duckworth); Neil Cookson, *Archaeological Heritage Law* (2000 Barry Rose); James Cuno, *Who Owns Antiquity? Museums and the Battle over our Ancient Heritage* (2010 Princeton University Press); John Henry Merryman and Albert E. Elsen, *Law, Ethics and the Visual Arts* (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 1* (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 3* (1989 Butterworths); Norman Palmer, *Museums and the Holocaust: law, principles and practice* (2000 Institute of Art and Law); Olav Velthuis, *Talking Prices: Symbolic Meanings of Prices on the Market for Contemporary Art* (2007 Princeton University Press); Jason Felch & Ralph Frammolino, *Chasing Aphrodite: The Hunt for Looted Antiquities at the World's Richest Museum* (2010 Houghton Mifflin Harcourt); Sarah Thornton, *Seven Days in the Art World* (2009 Granta Books); Jeanette Greenfield, *The Return of Cultural Treasures* (1989); Patrick J O'Keefe, *Trade in Antiquities: reducing destruction and theft* (1997); Karl Ernest Meyer, *The Plundered Past* (1974).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4BV Half Unit

### Transnational Environmental Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Veerle Heyvaert

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course instructs students on key issues in environmental law and governance beyond the state. Through the study of recent developments in international environmental law, regional law (including EU law) and private environmental regulation, the course investigates how new transnational environmental laws are made, what the role is of science and of indigenous knowledge in environmental decision-making and dispute resolution, how transnational environmental law is implemented and enforced, and whether transnational corporations can be held accountable for environmental damage. The questions are illustrated through case studies relating to, among others, climate change and biodiversity protection.

**Teaching:** This course will have 20 hours of teaching content in Lent Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 1,000 - 1,500 (upper limit) word essay. The students are given an opportunity to sit a mock exam in Week 9 of Lent Term.

**Indicative reading:** A detailed reading list will be provided for each seminar. The overwhelming majority of readings are electronically available as e-books or in journals. Essential reference works include the journal *Transnational Environmental Law*; Heyvaert,

Transnational Environmental Regulation and Governance (CUP, 2019); Heyvaert & Duvic-Paoli, *Research Handbook on Transnational Environmental Law* (Edward Elgar, 2020); Kingston, Heyvaert & Cavoški, *European Environmental Law* (CUP, 2017); Sands & Peel, *Principles of International Environmental Law* (4th ed, CUP, 2018); Bodansky, *The Art and Craft of International Environmental Law* (2010, Harvard University Press); Bodansky, Brunnee & Hey, *The Oxford Handbook of International Environmental Law* (OUP, 2007); and the Stern Review Executive Summary (online).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4BW Half Unit

### Law and Political Thought

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Thomas Poole

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Political Theory and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course examines the relationship between law and political theory. It does so through the study of classic texts of political thought: typically Hobbes, *Leviathan*, Rousseau, *Social Contract*; Burke, *Reflections on the Revolution in France*; Schmitt, *Constitutional Theory*; Arendt, *On Revolution*; Hayek, *Law, Legislation and Liberty*. In this way, the course deals with major topics of theoretical and juridical interest, such as the rule of law, law and government, theories of authority and legitimacy, revolution and the state, nationalism and cosmopolitanism.

**Teaching:** This course will have 20 hours of teaching content in Lent Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** The reading for the course consists of classic texts in political thought. Many are available online and the course is delivered through Moodle.

**Assessment:** Essay (100%, 8000 words) in the ST.

## LL4C2 Half Unit

### World Poverty and Human Rights

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Margot Salomon

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies, MSc in Global Politics, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** None but some knowledge of public international law is helpful.

**Course content:** This course examines world poverty and inequality considering the regime of international law aimed at the protection of human rights. It unpacks the duties of states and non-state actors and the ways in which they may be implicated in the deprivation that has 2.7 billion people concentrated in the South, and many in the North, unable to exercise even their

minimum essential levels of human rights. The course is interested in studying conceptual, normative, and critical approaches to human rights and will draw on literature that situates human rights and development in broader interdisciplinary and structural contexts. It will explore the role of international actors and institutions that impact positively or negatively on human rights today, as well as examine global developments and the application of legal standards to some areas of outstanding concern. Topics to be covered may include: Poverty as a human rights issue

- Human rights and development
- The right to development and claims against the public international order
- The scope, content and limits of the obligation of international cooperation
- Human rights, the World Bank and IMF
- Human rights and international trade, investment, and finance
- Interrogating the Sustainable Development Goals
- Pandemic and international law

**Teaching:** This course will have two hours of teaching content each week in Lent Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** G. Abi-Saab, 'The Legal Formulation of the Right to Development', in R-J Dupuy (ed), *The Right to Development at the International Level*, Hague Academy of International Law (1980).

B.S. Chimni, 'International Institutions Today: An Imperial Global State in the Making' *European Journal of International Law* (2004).

C. Chinkin, 'The United Nations Decade for the Elimination of Poverty: What Role for International Law?' *54 Current Legal Problems* (2001).

A. Eide, 'Human Rights-Based Development in the Age of Economic Globalization' in B.A. Andreassen and S.P. Marks (eds), *Development as a Human Right: Legal, Political and Economic Dimensions* (2010).

M.E. Salomon, *Global Responsibility for Human Rights: World Poverty and the Development of International Law* (2007).

R. Danino, 'The Legal Aspects of the World Bank's Work on Human Rights' in P. Alston and M. Robinson (eds), *Human Rights and Development* (2005).

*Maastricht Principles on Extraterritorial Obligations of States in the area of Economic, Social and Cultural Rights* (2011).

M.E. Salomon, 'Of Austerity, Human Rights and International Institutions' *European Law Journal* (2015).

Report of the UN Independent Expert on the effects of foreign debt and other related international financial obligations of states on the full enjoyment of all human rights, particularly economic, social, and cultural rights: *Mission to Greece* UN Doc A/HRC/31/60/Add2 (29 Feb 2016).

O.C. Okafor, 'The Bandung Ethic and International Human Rights Praxis: Yesterday, Today and Tomorrow' in L. Eslava, M. Fakhri and V. Nesiha (eds) *Bandung, Global History, and International Law* (2017).

J. Linarelli, M.E. Salomon and M. Sornarajah, *The Misery of International Law: Confrontations with Injustice in the Global Economy* (2018).

A detailed reading list will be issued at the first seminar.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4C5 Half Unit

### International Commercial Arbitration

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Paul MacMahon

**Availability:** This course is available on the LLM (extended part-

time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** Arbitration – binding adjudication outside the courts deriving its authority from party consent – is a standard form of dispute resolution for international commercial disputes. Supporters of arbitration cite its neutrality, its confidentiality, its flexibility, the greater expertise of arbitrators, and the global enforceability of arbitral awards. To detractors, however, international arbitration is often expensive and slow; other critics contend, more fundamentally, that arbitration infringes the spheres appropriately occupied by national courts and national law. Regardless, the complex relationship between arbitrators and courts, especially when combined with transnational elements, raises a host of fascinating theoretical and practical problems. London is one of the world's main centres for international commercial arbitration and, accordingly, this course focuses on English arbitration law. English law, however, is consistently placed in comparative perspective, especially with UNCITRAL's Model Law and with the laws of some of London's most significant competitors: France, Switzerland, Hong Kong, Singapore, and the United States. Coverage includes:

- Forms of international commercial arbitration.
- Validity and interpretation of arbitration agreements.
- Challenges to arbitral jurisdiction.
- Appointment of arbitrators.
- Arbitral procedure.
- The role of courts in assisting arbitral proceedings.
- Law applicable to the merits of the dispute.
- Challenges to arbitral awards.
- Recognition and enforcement of arbitral awards.
- Public policy limitations on international commercial arbitration.
- International commercial arbitration 'English-style'.

This course concentrates on arbitration resulting from agreements between private parties and may particularly appeal to students with interests in contracts and private international law.

Considerations specific to states and state-owned enterprises as parties to arbitration are left to LL4C6 International Arbitration, which complements this course and offers a perspective on all forms of international arbitration.

**Teaching:** This course will have 20 hours of teaching content in Michaelmas Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Nigel Blackaby & Constantine Partasides, Redfern and Hunter on International Commercial Arbitration (6th edn, OUP 2015); Margaret Moses, *The Principles and Practice of International Commercial Arbitration* (3rd edn, CUP 2017); Gary Born, *International Arbitration: Law and Practice* (3rd edn, Kluwer 2015); Emmanuel Gaillard & John Savage, *Fouchard Gaillard Goldman on International Commercial Arbitration* (1999); George Bermann, 'The "Gateway" Problem in International Commercial Arbitration' (2012) 37 *Yale Journal of International Law* 1; Jan Kleinheisterkamp, 'Overriding Mandatory Laws in International Arbitration' (2018) 67 *ICLQ* 903-930

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4C6 Half Unit International Arbitration

This information is for the 2022/23 session.

**Teacher responsible:** Oliver Hailles

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School

LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** None, but students may benefit from enrolling in LL4E6 International Dispute Resolution, LL4E7 Investment Treaty Law, or LL4C5 International Commercial Arbitration. Commercial lawyers with no background in international law should refer to chapters 2, 25, 28 and 32 in J Crawford, *Brownlie's Principles of Public International Law* (9th edn, OUP 2019). Students may also find it helpful to consult one of the recent introductory manuals: CL Lim (ed), *The Cambridge Companion to International Arbitration* (CUP 2021); or T Schultz & F Ortino (eds), *The Oxford Handbook of International Arbitration* (OUP 2020).

**Course content:** From the Alabama Claims to climate change, international arbitration has emerged as the preeminent procedure for disciplining sovereign conduct, protecting foreign property, and resolving commercial disputes. In substance, these matters may be determined by public international law, the parties' choice of domestic law, or questions of law and fact from several systems. Practitioners of inter-State, investor-State, and commercial arbitration must be able to codeswitch between these applicable laws and legal traditions when representing businesses or governments. Differences among forms of arbitration are equally important for scholars and policymakers who study their interaction with economic regulation or the role of domestic or international courts.

The main forms are introduced in LL4E6 International Dispute Resolution, LL4E7 Investment Treaty Law, and LL4C5 International Commercial Arbitration. Through a programme of wide reading and group discussion, this course connects these specialised forms to develop a generalist perspective on international arbitration as a unified but diverse field of transnational practice. Problem questions will call for strategic choices in making or facing claims involving, for example, breach of contract by a State, allegations of corruption, or environmental protection.

To compare the three forms of contemporary practice and their possible futures, this course addresses the following topics:

- Theoretical, historical, and sociological perspectives.
- Key institutions and instruments, such as the Permanent Court of Arbitration, New York Convention, ICSID Convention and Rules, UNCITRAL Arbitration Rules and Model Law on International Commercial Arbitration, and ICC Rules of Arbitration.
- Consent to jurisdiction and choice of applicable law.
- Sources and interpretation of domestic and international law.
- Parallel proceedings, anti-suit injunctions, and *res judicata*.
- Remedies, enforcement, and annulment.
- Third-party participation and reform proposals.
- Contract-based investor-State arbitration.
- Umbrella clauses in investment treaty arbitration.
- Energy, natural resource, and territorial disputes with environmental dimensions.
- Allegations of fraud, corruption, or illegality.
- State-owned enterprises as claimants, respondents, or attributable entities

**Teaching:** There will be 20 hours of teaching content in Lent Term and an additional two hours of teaching in the Summer-Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Alongside excerpts from arbitral awards and other primary materials, students will engage with foundational and current secondary literature: eg A Stone Sweet & F Grisel, *The Evolution of International Arbitration: Judicialization, Governance, Legitimacy* (OUP 2017); C McLachlan, 'Lis Pendens in International Litigation' (2008) 336 *Recueil des Cours* 199; C Gray & B Kingsbury, 'Developments in Dispute Settlement: Inter-State Arbitration Since 1945' (1992) 63 *British Yearbook of International Law* 97; E Gaillard, *Legal Theory of International Arbitration* (Brill 2010); GB Born, *International Arbitration: Cases and Materials* (2nd edn, Wolters Kluwer 2015); I de la Rasilla & JE Viñuales (eds),

Experiments in International Adjudication: Historical Accounts (CUP 2019); J Crawford, 'Treaty and Contract in Investment Arbitration' (2008) 24 *Arbitration International* 351; J Paulsson, 'Arbitration Without Privity' (1995) 10 *ICSID Review* 181; J Ho, *State Responsibility for Breaches of Investment Contracts* (CUP 2018); M Scherer (ed), *International Arbitration in the Energy Sector* (OUP 2018); M Schinazi, *The Three Ages of International Commercial Arbitration* (CUP 2021); R Radovic, *Beyond Consent: Rethinking Jurisdiction in Investment Treaty Arbitration* (Brill 2021); S Rosenne, *The Hague Peace Conferences of 1899 and 1907 and International Arbitration: Reports and Documents* (Asser 2001); T St John, *The Rise of Investor-State Arbitration: Politics, Law, and Unintended Consequences* (OUP 2018); Y Dezalay & BG Garth, *Dealing in Virtue: International Commercial Arbitration and the Construction of a Transnational Legal Order* (Chicago 1996).  
**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

### LL4CB Half Unit Not available in 2022/23

#### Modern Legal History: Private Law and the Economy 1750-1950

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Michael Lobban

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Economic History, MSc in Economic History (Research), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

LLM Specialisms: This course will be relevant to the following LLM specialisms: Legal Theory; Corporate and/or Commercial Law. This course has a limited number of places and we cannot guarantee all students will get a place.

**Course content:** This course will examine how the common law aided or hindered economic growth in the era between 1750 and 1950, by focusing in particular on the development of doctrines of private law. The course will concentrate on a number of themes and topics. It will begin with a discussion of the nature of the common law, and the modes of common law reasoning, to establish what kind of legal system economic actors were dealing with. It will then look at the developing law of contract, to explore how far the ideology of 'freedom of contract' assisted growth. It will further explore the law relating to civil wrongs (including the law relating to compensation for accidents and pollution) and unjust enrichment (particularly in the context of business failures). It will also explore some specific topics, including the law relating to corporate enterprise, bankruptcy and insurance.

**Teaching:** This course will have two hours of teaching content each week in Lent Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** J. Oldham, *English Common Law in the Age of Mansfield* (Chapel Hill, 2005).

W.R. Cornish et al, *The Oxford History of the Law of England* vols. 11-13 (Oxford, 2010).

W.R. Cornish and et al, *Law and Society in England 1750-1950* (London, 2019).

P.S. Atiyah, *The Rise and Fall of Freedom of Contract* (Oxford, 1979).

R. Harris, *Industrializing English Law: Entrepreneurship and Business Organization, 1720-1844* (Cambridge, 2000).

Rob McQueen, *A Social History of Company Law: Great Britain and the Australian Colonies 1854-1920* (Ashgate, 2009).

J. Taylor, *Creating Capitalism: Joint Stock Enterprise in British Politics and Culture 1800-1870* (Boydell, 2006).

M. Finn, *The Character of Credit: Personal Debt in English Culture,*

1740-1914 (Cambridge 2003).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

### LL4CC Half Unit

#### Commercial Remedies

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Charlie Webb

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Undergraduate contract law

**Course content:** The module will examine a range of remedial issues in a commercial context. The reading addresses both case law and academic commentary.

Here is an indicative list of the sorts of issues to be considered on the module:

1. The aims of commercial remedies: What interests and other policies may be served by the law when remedying commercial disputes?
2. The function of contract damages: How do the courts assess damages for breaches of contract? Should the courts do more to protect the claimant's interest in performance? What limits are placed on the recovery or measure of damages?
3. Gain-based remedies: When does the law allow claimants to recover a defendant's wrongful gains? On what basis are gain-based remedies awarded?
4. Agreed remedies: To what extent are commercial parties free to fix the remedies available to them in the event of breach? Does freedom of contract extend to the parties' secondary obligations?
5. Unjust enrichment: What is the law of unjust enrichment? What is its relationship to the law of contract? What can commercial parties recover under the law of unjust enrichment?

**Teaching:** This course has 20 hours of teaching content in Lent Term. There will be a Reading Week in Week 6.

**Formative coursework:** All students are expected to produce one 1,500 word formative essay during the course.

**Indicative reading:** Burrows, *Remedies for Torts and Breach of Contract* (4th edn OUP 2019).

Virgo and Worthington (eds), *Commercial Remedies: Resolving Controversies* (CUP 2017)

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

### LL4CE Half Unit

#### Security and Criminal Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Peter Ramsay

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Undergraduate study of criminal law (or equivalent).

**Course content:** This is a course in advanced criminal law theory. The central concern of contemporary criminal justice policy is public protection. The course examines the different security

interests that are protected by the different categories of criminal offence and the issues at stake in the expansion of the scope of the substantive criminal law. Examples will be drawn mainly from the criminal law of England and Wales, but also from other jurisdictions. An introduction to the structure of the criminal law in the common law world will be included. The theoretical issues are universal.

This course will cover:

the concept of security;  
the concept of criminal law;  
the presumption of innocence;  
'true crimes';  
public welfare offences;  
inchoate offences;  
pre-emptive offences;  
fear, harassment and speech offences;  
the right to security.

Each class will consist of a student presentation on a key question, class discussion and a teacher presentation.

**Teaching:** This course has 20 hours of teaching content in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** A Ashworth and L Zedner Preventive Justice (OUP 2014); I Dennis and GR Sullivan (eds), Seeking Security: Pre-empting the Commission of Criminal Harms (Hart, 2012); A Brudner, Punishment and Freedom (OUP, 2009); RA Duff, Answering for Crime (Hart, 2007); P Ramsay The Insecurity State: Vulnerable Autonomy and the Right to Security In the Criminal Law (OUP, 2012); A Ashworth (et al), Prevention and the Limits of Criminal Law (OUP, 2013).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4CF Half Unit UK Corporate Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Elizabeth Howell

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** 1. The conception of the UK company - the nature and evolution of the company; the sole-trader and partnership organisational forms will be contrasted with the corporate/ entity conception. 2. Legal personality, formation and structure – considering the implications and function of separate legal personality and the scope to disregard the corporate veil. 3. The distribution of power in a UK company – considering the location and contractual distribution of power in a UK corporation; the problem of separation of ownership and control/the agency problem; mandatory versus default rules; core mandatory rights: removal of directors and calling shareholder meetings. 4. Director's duties I: the nature of duties; who owes them; to whom; the loyalty dimension. 5. Directors Duties II: the duty to act within powers; the duty to promote the success of the company and the particular question of creditors; the duty to exercise independent judgement; the duty of care. 6. Directors Duties III: the conflict rules (self-dealing transactions, corporate opportunities, competing with the company, bribes and commissions). 7. Protecting shareholder rights and derivative actions: personal actions and reflective loss; the derivative action mechanism. 8. Minority shareholder protections I – common law restraints on the exercise of majority shareholder power and influence; statutory constraints on the exercise of such power and influence - section 994 Companies Act

2006. 9. Minority shareholder protections II – remedies under s994 Companies Act 2006 for unfairly prejudicial conduct. 10. Just and equitable winding up under section 122(1)(g) Insolvency Act 1986; arbitration.

**Teaching:** There will be 20 hours of teaching content in Michaelmas Term, however please note the final class may take place in the first week of Lent Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 1,500 word essay.

**Indicative reading:** B Hannigan, Company Law (6th ed OUP 2021); or

P Davies and Sarah Worthington, Gower: Principles of Modern Company Law (11th ed 2021 Sweet & Maxwell)

For detailed reading lists please see the Moodle website.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 30 minutes) in the summer exam period.

## LL4CG Half Unit Tax Policy and Design

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Andy Summers

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** This course is suitable for students from any social science background, including but not only Law. No previous study of taxation is required. Some prior familiarity with tax concepts is advantageous but not essential.

**Course content:** This course provides an introduction to the evaluation and design of tax policies using a variety of disciplinary perspectives including economics, philosophy, and political science, as well as law. It addresses questions such as: What is a 'fair' tax? What makes a tax efficient or inefficient? How do people respond to taxes? What can be done to improve tax compliance? What are the political influences on the tax policymaking process?. The aim of the course is to develop a 'toolkit' for thinking about taxes that enables students to critically assess existing tax policies and develop proposals for reform. We will use a range of examples from across the tax system including taxes on individuals and companies. Most examples will be drawn from the UK context but the principles are of wide application to other developed tax systems.

The seminar topics are: (1) Approaches to tax policy; (2) Fairness and taxation; (3) Tax and property rights; (4) Tax, public provision, and market failure; (5) Key economic concepts; (6) Behavioural responses to tax; (7) Choices of tax base; (8) Setting tax rates; (9) Tax administration and compliance; (10) Tax and the political process.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will receive formative feedback on one 1500 word essay.

**Indicative reading:** Devereux, M. et al (2021), Taxing Profit in a Global Economy. Oxford University Press.

Kay, J., & King, M. (1990), The British tax system. Oxford University Press.

Kleven, H. et al (2019), Taxation and Migration: Evidence and Policy Implications' The Journal of Economic Perspectives.

Meade, J. et al (1978), The Structure and Reform of Direct Taxation: The Meade Report.

Adam, S. & Miller, H. (2020), 'Principles and practice of taxing small business' in The Dynamics of Taxation. Hart Publishing.

Mirrlees, J. et al (2011), Tax by design: the Mirrlees review. Oxford

University Press.

Murphy, L. & Nagel, T. (2002), *The Myth of Ownership: Taxes and Justice*. Oxford University Press.

Slemrod, J., (2013), *Buenas notches: lines and notches in tax system design*.

Stanford Encyclopaedia of Philosophy, *Distributive Justice*

**Assessment:** Essay (100%, 8000 words).

## LL4CH Half Unit

### VAT and VAT Litigation: UK, EU and Global Perspectives

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Michael Blackwell

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** This course is suitable for all LLM students with no prior knowledge of tax or litigation required.

**Course content:** How do you present a successful legal argument? How do judges choose between plausible but alternative legal arguments put by counsel? How strategic is the state when litigating? Why does the state win so frequently in tax cases? How useful are data science/artificial intelligence approaches, including text mining previous decisions, in informing litigation? This course will address these and similar questions in the context of VAT/GST litigation in the UK, EU and Australia.

Students will thus develop both an understanding of the social science literature on litigation, along with an understanding of VAT law: not merely learning the rules but developing a critical understanding of their application.

The substantive VAT law content of this course will vary year-to-year, as it will aim to draw on disputes presently before the courts and tribunals to give students the opportunity to observe and consider litigated cases. Topics covered are likely to include the scope of VAT and the charge to tax, the taxable person, supply and consideration, valuation, VAT registration, tax points, the right to deduct, place of transactions, reliefs and exemptions and accounting for and administration of VAT.

**Teaching:** This course will have two hours of teaching content each week in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** Students are expected to submit one 2,000 word formative essay or an equivalent assignment.

**Indicative reading:** Detailed reading lists will be provided during the course via Moodle.

Recommended preliminary reading:

Hartley Foster, "VAT – The Foundations" (Chapter 50) in Anne Fairpo and David Salter (eds), *Revenue Law: Principles and Practice* (Bloomsbury Professional, 2019).

Daniel Kessler, Thomas Meites, and Geoffrey Miller. "Explaining deviations from the fifty-percent rule: A multimodal approach to the selection of cases for litigation." *The Journal of Legal Studies* 25.1 (1996): 233-259.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4CL Half Unit

### Explaining Punishment: Philosophy, Political Economy, Sociology

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Nicola Lacey (Course Convener) and Professor Peter Ramsay

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course aims to provide students with a comprehensive overview of the theories that explain the practice of punishment, a practice that defines the criminal law. It will do this by introducing students to philosophical, sociological, political economy and comparative approaches to punishment. It will involve the discussion of all the major philosophical justifications and critiques of state punishment, and sociological and political economy explanations and critiques of punishment.

After an introduction discussing the different approaches to punishment, three seminars will discuss the classical philosophical justifications of punishment and a fourth the contemporary critiques of those classical approaches. Seminars 5 and 6 will discuss punishment from the perspective of sociology and political economy. Seminar 7 will consider comparative approaches to punishment. Seminars 8 and 9 will look at two key aspects of the sociology of punishment, punishment as a cultural phenomenon and punishment as an exercise of power and authority. The final seminar considers the relation between these different perspectives.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be expected to produce one essay in Michaelmas Term and give one brief presentation in class during the term.

**Indicative reading:**

- A von Hirsch, A Ashworth and J Roberts, *Principled Sentencing: Readings on Theory and Policy* (Hart, 2009).
- B Hudson, *Understanding Justice* (Open University Press 2003).
- N Lacey, *The Prisoners' Dilemma: Political Economy and Punishment in Contemporary Democracies*, (Cambridge University Press 2008).
- J Simon and R Sparks (eds), *The Sage Handbook of Punishment and Society* (Sage 2013).
- D Garland, *Punishment and Modern Society: A Study in Social Theory* (Oxford University Press 1990)

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4CO Half Unit

### Taxation of Wealth

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Andrew Summers

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Inequalities and Social Science and University of Pennsylvania Law School LLM Visiting Students.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Students are strongly recommended to take LL4CG Tax Policy and Design together with (or prior to) this course. Alternatively, students must demonstrate that they have some

familiarity with key principles of tax design via previous academic or professional experience. The course is suitable for students from any social science background and non-Law students are also welcome.

**Course content:** The course examines how the UK taxes wealth (and the wealthy) and evaluates options for reform. It addresses questions such as: Should inheritance tax be paid on lifetime gifts? Should capital gains be taxed at lower rates than regular income? What are the arguments for and against an annual wealth tax? How does the UK's 'non-dom' tax regime work and how should it be reformed? What is the extent of offshore evasion and what steps can be taken to improve compliance?

We will draw on the latest research from multiple disciplines including economics, philosophy and political science, as well as law. The primary focus is on the UK context, although comparisons will also be made with other jurisdictions. For each topic, students will learn (in outline) how the existing tax system operates and then consider how it could be reformed.

The seminar topics are: (1) Introduction to UK taxes on wealth; (2) Inheritance Tax; (3) Reforming taxes on transfers of wealth; (4) Capital Gains Tax and Income Tax; (5) Reforming taxes on returns on wealth; (6) Property taxes; (7) Net wealth taxes; (8) International dimensions; (9) Enforcement; (10) Redesigning taxes on wealth.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6.

**Formative coursework:** Students will receive formative feedback on two essay-plans (comprising 300-word abstract, outline of sub-headings, and bibliography) based on past or sample summative essay titles.

**Indicative reading:** Advani, A., and Summers, A. (2020), 'How Much Tax Do the Rich Really Pay? New Evidence from Tax Microdata in the UK', CAGE Policy Briefing 27

Summers, A. (2021), 'Ways of Taxing Wealth: Alternatives and Interactions', *Fiscal Studies*, 42, 485–507

**Assessment:** Essay (100%, 6000 words) in the ST. Students must answer two essay questions (3,000 words each) from a set of essay titles.

## LL4CP Half Unit Tax Avoidance

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Michael Blackwell

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on

this course.

**Course content:** This course will provide a comprehensive overview of the phenomenon of tax avoidance and of the attempts by states to combat it: both unilaterally and multilaterally. Whilst using examples predominantly from the UK, Australia and USA the issues addressed by the course are general across many jurisdictions and so will be applicable to those with interests beyond the UK, Australia and USA.

The course will be multi-disciplinary, in that the course will draw on accessible social-science literature.

Taxpayers have always sought to minimise their tax burden. However recent decades have witnessed a sharp rise in popular and governmental concern with tax shelters and other tax avoidance. Traditional strategies of tax avoidance have included postponement of taxes and tax arbitrage, in addition to attempting to exploit 'loopholes' through a formalist interpretation of legislation. In recent years the proliferation of complex financial instruments has increased the opportunities for such avoidance.

Additionally, globalisation and the development of the digital economy have facilitated tax avoidance strategies of base erosion and profit shifting (BEPS). This rise in opportunities for tax avoidance has been accompanied by an increased public concern that individuals and companies pay their 'fair share' of taxation: which states have responded to both through unilateral and multilateral actions (including the OECD's project on BEPS and the EU's Anti Tax Avoidance Package).

Particular topics covered will include (i) defining avoidance; (ii) strategies of tax avoidance; (iii) statutory interpretation and judicial approaches to tax avoidance especially with reference to the UK and USA; (iv) General Anti-Abuse and Anti-Avoidance Rules and Specific and Targeted Anti-Avoidance Rules; (v) reporting rules and other policies to deter avoidance; (vi) BEPS and the EU; and (vii) corporate social responsibility, professional ethics and public attitudes with regard tax avoidance.

**Teaching:** This course will have two hours of teaching content each week in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** Students should submit a detailed essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises and act as either a presenter or discussant during seminars.

**Indicative reading:** Michael Blackwell, 'The April 2019 loan charge' [2019] (3) *British Tax Review* 240-257.

**Assessment:** Essay (100%, 6000 words) in the ST.

**LL4CQ Half Unit****Legal Aspects of Private Equity and Venture Capital**

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Sarah Paterson and Dr Simon Witney (Visiting Professor in Practice), assisted by guest teachers David Dowling and Sean Pierce.

Simon Witney and David Dowling teach weeks 1-5, and 7-9. Sarah Paterson and Sean Pierce teach weeks 10 and 11. Week 6 is Reading Week.

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students should note that private equity is a specialist asset class, and the basics of debt and equity are not covered in LL4CQ. The course is, therefore, recommended for students who are taking other, relevant corporate law and financial law courses, or who have relevant experience.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course will equip students with a detailed understanding of the legal structures and issues arising in international private equity and venture capital. It is founded on deep academic analysis of pertinent theoretical and legal issues complemented by insights from relevant practitioners. It will have a UK focus but will include relevant aspects of European Union law with comparative global perspectives.

**Class 1:** Introduction to private equity and venture capital and some basic theory

This class will introduce the legal structures and commercial dynamics of private equity and venture capital and the theoretical frameworks that will underpin the course. We will also review some pertinent academic literature.

**Class 2:** Fund terms

In this class we examine the core economic and non-economic terms of a typical private equity or venture capital fund. We consider the theoretical basis for these terms.

**Class 3:** Fund structures: the limited partnership

In this class we look at the limited partnership structure, examine why it is used and its main legal and tax characteristics. We focus on the UK limited partnership, but also consider other equivalent structures. We also look at other aspects of the typical private equity fund structure.

**Class 4:** Private equity fund (and manager) regulation

This session looks at UK and EU regulatory initiatives, and critically evaluates the provisions of the Alternative Investment Fund Managers Directive which affect private equity funds.

**Class 5:** Venture capital investments

Starting from a theoretical perspective, we will analyse the terms of a typical venture capital investment into a portfolio company by reference to example documents. We will also examine various aspects of contract and company law which have particular relevance to VC structures.

**Class 6:** The VC deal: feedback from a practitioner.

This week the students will discuss the key points arising from a venture capital investment case study with a leading VC lawyer. We will focus on key points which have a legal as well as a commercial aspect, and connect these to the theoretical discussions in Class 5.

**Class 7:** The buyout: structure and terms.

In this class we will examine the structure of a buyout and how it differs from a VC investment. We will focus on pertinent company law rule and the main commercial terms.

**Class 8:** The buyout: corporate governance issues.

In this class we will examine the ways in which private equity firms approach corporate governance. We will consider this in the context of the UK legal framework and some recent developments in corporate governance regulation that apply to large, private companies.

**Class 9:** LBO debt financing.

This week we will analyse and evaluate the structure of the LBO financing transaction; the relationship between the theory and practice of private equity and the legal terms found in the leveraged loan agreement; and the relationship between the theory and practice of private equity and the negotiating points which arise for the lenders and the PE sponsor on these legal terms.

In class, students will be provided with the Loan Market Association leveraged loan agreement and asked to apply the theory covered in the lecture and readings to the deal documentation.

**Class 10:** LBO debt financing (cont'd).

This week we will analyse agency theory and maintenance financial covenants; the rise of covenant-lite and covenant-loose financing for PE LBOs; and the implications of these developments. In class, students will work in peer study groups to discuss certain readings on the implications of the leveraged model and the loosening of terms in PE LBOs.

**Teaching:** This course will have 20 hours of teaching content in Lent Term. Students will usually have two additional hours in the Summer Term. This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** A formative essay will be due in Week 7 and detailed feedback will be provided shortly after. The essay will have a word limit of 1,500 and will provide invaluable preparation for the summative assessment.

**Indicative reading:** Example core readings:

Gilligan, J. and Wright, M., *Private equity demystified: An explanatory guide* (2020, 4th edition, Oxford University Press), selected chapters.

Hale, C. (ed), *Private Equity: A Transactional Analysis* (2020, 4th edition, Globe Law and Business), selected chapters.

Gullifer, L. and Payne J., *Corporate Finance Law: Principles and Policy* (2020, 3rd edition, Hart Publishing), Chapter 16 (Private Equity).

Jensen, M.C. & Meckling, W.H., "Theory of the firm: Managerial behavior, agency costs and ownership structure", 1976, *Journal of Financial Economics*, 3(4), pp.305–360.

Talmor, E. & Vasvari, F., *International Private Equity* (2011, John Wiley & Sons), selected chapters.

Witney, S., *Corporate Governance and Responsible Investment in Private Equity* (2020, Cambridge University Press)

Additional weekly readings will be provided to the students at the beginning of the course.

**Assessment:** Take-home assessment (100%) in the ST.

Students will be given a period of time in which to complete and return a take home exam, with penalties for late submission.

Students will be asked to complete 2 questions from a possible 6 (with a requirement to choose one question from Part 1 and one question from Part 2) and each answer will be limited to 1,500 words, with penalties for exceeding the word limits. The length of time set for this assessment already takes into account that students may also have one or more other exams during this period.

For more information regarding penalties, please refer to the LLM Handbook.

**LL4CS Half Unit****Law and Economics of Network Industries**

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Pablo Ibáñez Colomo

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

This course has a limited number of places and demand is

typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course provides an overview of the regulation of network industries. It encompasses not only sector-specific regimes but also the ways in which competition law contributes to shaping those industries.

Instead of focusing on a particular system, it revolves around the main underlying issues. The EU-UK system provides the basis for class discussions. Examples from the US will be used where relevant.

The module is divided into three parts: one that discusses generalities about the law and economics of network industries; a second that focuses on the sector-specific regimes applying to three sectors (telecommunications, energy and transport); and a third that covers the application of competition law and examines how this area of the law is transformed and adapted when it engages with sectoral regulation.

Part I: Generalities.

Session 1: The Economics of Network Industries.

This session addresses the features of network industries, in particular the concepts of natural monopoly, network effects and two-sided markets. It discusses the implications of the tendency of these industries towards monopoly.

Session 2: Regulatory approaches to network industries.

The second session discusses the various regulatory techniques that have been used to deal with network industries. These techniques are also put in perspective: it covers the days of exclusive rights, the liberalisation efforts in the 1980s and 1990s (in the US, the EU and beyond) as well as the modern regimes.

Part II: Specific issues.

Session 3: Telecommunications and electronic communications (I).

This session provides an overview of the regulation of telecommunications (or electronic communications in the EU system). After a brief overview of the basic technology-related concepts (access, interconnection) and of the evolution of regulation, it will cover the EU Regulatory Framework for electronic communications.

Session 4: Telecommunications and electronic communications (II).

This session covers some specific issues at length, in particular access to the incumbent network by new entrants and network neutrality.

Session 5: Energy (I).

The first session covers the basic concepts (TSO, DSO) as well as the regulatory models that have been put in place in the EU and the US.

Session 6: Energy (II).

The second session would deal in detail with some contemporary challenges, namely the decarbonisation of the economy and energy prices.

Session 7: Transport.

The regulation of railways gives rise to major challenges and has been controversial, in the UK and beyond. This session covers the UK model and the various liberalisation steps taken in the EU.

Part III: Competition law and network industries.

Session 8: The relationship between competition law and regulation.

Competition law overlaps to some extent with regulation. The question is whether the former takes precedence, or vice versa. This session covers the EU and US responses.

Session 9: Competition law and network industries (I).

Competition law is transformed when it applies to network industries. This session explores the reasons for this transformation with some concrete examples.

Session 10: Competition law and network industries (II).

See above. It builds and expands on the preceding session.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term and may include visits from experts based at regulatory authorities in the UK and the EU. Students will usually have two additional hours in the Summer Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:**

- Christopher Decker, *Modern Economic Regulation* (Cambridge University Press 2014)
- Niamh Dunne, *Competition Law and Economic Regulation: Making and Managing Markets* (Cambridge University Press 2015)
- Christopher Jones (ed), *EU Energy Law* (Claeys & Casteels 2020)

- Ian Walden, *Telecommunications Law and Regulation* (5th edn, Oxford University Press 2018)

**Additional reading:**

- Robert Baldwin, Martin Cave and Margin Lode, *Understanding Regulation* (2nd edn, Oxford University Press 2012)
- Leigh Hancker, 'Community, State and Market' dans Paul Craig and Grainne de Burca (eds), *The Evolution of EU Law* (Oxford University Press 1999), pp. 721-743
- Stuart Minor Benjamin et James Speta, *Telecommunications Law and Policy* (4ème édition, Carolina Academic Press 2015), pp. 187-216
- Stephen Breyer, *Regulation and Its Reform* (Harvard University Press 1984)
- Pierre Larouche, *Competition and Regulation in European Telecommunications* (Hart Publishing 2000)
- Christopher Jones (ed), *EU Energy Law, Volume I - The Internal Market* (Claeys & Casteels 2020)

**Assessment:** Essay (100%, 8000 words) in the ST.

Students will be free to choose a topic concerning the regulation of network industries, whether or not covered in class (for instance, postal services, or broadcasting). The essay can relate both to sector-specific regulation and to the application of competition law to network industries.

---

## LL4E6 Half Unit

### International Dispute Resolution: Courts and Tribunals

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Devika Hovell

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Some prior knowledge of international law is useful but not essential.

**Course content:** Increasingly, international law is developed, applied and amended through litigation in international, regional and domestic courts. In this course, we examine key courts and tribunals operating on the world stage, including the International Court of Justice, the International Criminal Court, the European Court of Human Rights and the WTO Dispute Settlement Body. We look at the theory, politics and practical difficulties of international dispute resolution in these courts. The theoretical dimension of the course involves three main elements:

1. First, the course examines the structure and work of the International Court of Justice, the principal judicial organ of the United Nations, focusing on jurisdiction/admissibility, contentious cases and advisory opinions.
2. Secondly, the course introduces a variety of other international courts and tribunals, such as the International Criminal Court, domestic and regional courts dealing with international law and

human rights, including the European Court of Human Rights and the European Court of Justice, the WTO Dispute Settlement Body and investment treaty arbitral tribunals. Using contemporary and controversial case studies, the course will critically analyse and contrast the institutional design and jurisdiction of these courts and tribunals.

3. Thirdly, throughout the course we explore key theoretical controversies surrounding the adjudication of international law, focusing in particular on (a) how these courts and tribunals relate to one another (hierarchy, specialization and fragmentation); (b) what criteria should be used in assessing the legitimacy and effectiveness of these courts and tribunals; and (c) whether and how these courts and tribunals create international law.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** 2,000 word formative essay.

**Indicative reading:** Reading lists will be provided for each week's seminar on Moodle.

Indicative reading includes Karen Alter, *The New Terrain of International Law: Courts, Politics, Rights* (2014 Princeton); Gleider Hernández, *The International Court of Justice and the Judicial Function* (2014 OUP); Yuval Shany, 'No Longer a Weak Department of Power? Reflections on the Emergence of a New International Judiciary' (2009) 20(1) *European Journal of International Law* 73; Frederic Megret and Marika Giles Samson, 'Holding the Line on Complementarity in Libya: the Case for Tolerating Flawed Domestic Trials' (2013) 11 *Journal of International Criminal Justice* 571.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4E7 Half Unit Investment Treaty Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Mona Paulsen

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** None. Students with no previous background in public international law may find it helpful to consider consulting a standard textbook such as M. Evans (ed.), *International Law* (OUP, 5th ed., 2018) or J. Crawford, *Brownlie's Principles of Public International Law* (OUP, 9th ed., 2019).

**Course content:** Investment treaties are complex, decentralised instruments of global economic governance. After the Second World War, states designed international rules to protect foreign direct investment in-flows deemed necessary prerequisites for facilitating economic development and to secure prosperity for investors of capital-exporting states. Investment treaties seek to protect foreign investors from uncompensated expropriation, arbitrary regulatory treatment, and other adverse actions taken by "host" states. Most modern investment treaties are negotiated on a bilateral basis, with some covering a specific sector or region. A key feature of investment treaties is the means for settling international investment disputes. Investment treaties often permit foreign investors to sue host states directly before international arbitral tribunals. Access to investor-state arbitration provides covered foreign investors an enforceable remedy that is, importantly, unavailable to equivalent domestic investors. Beginning in the late 1990s, public attention over investor-state arbitration grew due to the explosion of challenges to states regulatory, administrative, and judicial decisions. Today, the network of investment treaties and arbitration practices are the

primary sources for multifaceted disputes that balance investment protection and sensitive policy judgments.

This course advances students' knowledge as to how international investment treaties and investment treaty arbitration protect foreign investment in-flows, impact states' regulatory autonomy, and support or impair states' development goals. We begin the course by discussing what political and economic forces drive states to conclude investment treaties with a standing offer to investor-state arbitration. We consider the historical context of investment protection and the critiques of these treaties as entrenching economic exploitation and foreign political control. Next, we will discuss the settlement of disputes, specifically the breach of treatment standards and uncompensated takings of property. We will further examine defences to liability and engage in class discussion as to what deference investment treaty tribunals show host states' policy judgments. Finally, we will critically assess proposed reforms to investment treaties and the mechanisms for resolving international investment disputes.

**Teaching:** This course will have two hours of teaching content each week in Lent Term and two additional hours in the Summer Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 2,000 word formative essay during the course.

**Indicative reading:** Reading lists will be provided for each seminar on Moodle. Essential readings combine primary source materials along with introductory, secondary source materials to help students navigate the topics. The course will assign select political economy and history readings to supplement select topics. Where possible, readings will include relevant videos and podcasts to enhance student learning.

Indicative textbooks include: C.L. Lim, et al., *International Investment Law and Arbitration* (2021); J. Bonnitcha et al., *The Political Economy of the Investment Treaty Regime* (2017); M. Sornarajah, *The International Law on Foreign Investment* (2021).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4F2 Half Unit The Law and Practice of International Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Jo Braithwaite

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** LL4F2 examines legal issues which arise in the international financial markets based in London. This course looks at the legal aspects of financial contracts, transactions and structures which are widely used in the financial markets, such as 'over the counter' (OTC) derivatives and syndicated loans. We make close reference to certain sets of trade association drafted terms throughout the course, subject to obtaining the necessary licences from the trade associations in question. With an emphasis on private law, the course considers the relevant legal, commercial and regulatory background, and the risks and protections available to participants in the global financial markets. For example, we look in detail at contractual credit risk mitigation and default management processes including close-out, and we consider disputes that arise from financial contracts, in particular in periods of widespread market stress. The course is based upon an analysis of the relevant issues under English law with some reference to other systems for comparative purposes. The course will be underpinned by in-depth discussion of the legal principles involved in international finance, but the case studies referenced will be topical. In this sense, the content of the

course will be adapted to the fast-moving developments affecting international markets in capital and in risk (for example, in recent sessions the course has examined mis-selling litigation in the international derivatives markets, the ongoing regulatory reform of the OTC derivatives markets, CCP clearing, the debate about recovery and resolution of CCPs and CCP location policy, and the worldwide project of benchmark transition away from LIBOR to so-called 'risk-free rates').

**Teaching:** This course will have two hours of teaching content each week in Lent Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** Students will be asked to submit one essay, which may be completed in exam conditions. The course also involves individual and group presentations and other classwork.

**Indicative reading:** Examples of texts which will be referenced on the course: J. Braithwaite, *The Financial Courts: Adjudicating Disputes in Derivatives Markets* (CUP, 2020); and L Gullifer and J Payne, *Corporate Finance Law: Principles and Policy* (Hart, 3rd edition, 2020). A full reading list will be distributed via Moodle.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Assessment is by closed book written examination.

### LL4F3 Half Unit

## Mergers, Acquisitions and Restructurings in Europe

**This information is for the 2022/23 session.**

**Teacher responsible:** Mr Edmund-Philipp Schuster

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** In this course, we will explore the corporate law aspects of company mergers, acquisitions and restructurings in Europe. The course will examine the available legal techniques for the combination and restructuring of business operations in Europe, with a particular focus on cross-border transactions. Areas covered will include corporate mobility in Europe, an introduction to transaction structures, domestic and cross-border mergers, de-mergers, spin-offs, and public takeovers. Particular attention will be paid to the interaction between the relevant legal concepts and the economic and financial environment firms operate in.

Content overview.

- The market for corporate control, corporate ownership structures and transaction structures for public and private acquisitions, and corporate restructurings in Europe.
- European takeover regulation.
- Domestic mergers.
- Divisions & spin-offs.
- Cross-border mergers in Europe.
- Employee participation and its relevance for corporate transactions

**Teaching:** This course will have two hours of teaching content each week in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 1,500 word essay due in Week 7 of Lent Term.

**Indicative reading:** A full reading list will be made available via Moodle at the beginning of the course. Sample readings: R. Romano, *A Guide to Takeovers: Theory, Evidence and Regulation* (1992) 9 *Yale Journal of Regulation* 119; RD Kershaw, *Principles of Takeover Regulation* (OUP 2016); RD Kershaw, *Company*

*Law in Context* (2012), Web Chapter A [available here: [http://global.oup.com/uk/orc/law/company/kershaw2e/resources/chapters/Web\\_Chapter\\_A.pdf](http://global.oup.com/uk/orc/law/company/kershaw2e/resources/chapters/Web_Chapter_A.pdf)]; S Grundmann, *European Company Law* (Intersentia, 2nd ed. 2011); PL Davies et al, *The Takeover Directive as a Protectionist Tool?* [available here: <http://ssrn.com/paper=1554616>]; C Clerk et al, *A Legal and Economic Assessment of European Takeover Regulation*; E-P Schuster, *The Mandatory Bid Rule: Efficient, After All?* (2013) 76 *Modern Law Review* 529; KJ Hopt and E Wymeersch (eds), *European Takeovers: Law and Practice*.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

### LL4F4 Half Unit Not available in 2022/23

## Takeover Regulation in the UK and the US

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof. David Kershaw

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 90 students. Students must apply through Graduate Course Choice on LSEforYou.

**Course content:** This course will look at the regulation of the market for corporate control in the United Kingdom and the United States. The course focuses in particular on the regulation of the bid process and takeover defence regulation in the UK and the US. For a full topic and reading list, see the Moodle web site.

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6 of MT.

**Formative coursework:** 1,500 word essay.

**Indicative reading:** A full reading list will be made available via Moodle at the beginning of the course. Background material can be found in D. Kershaw, *Principles of Takeover Regulation* (OUP, 2016), R. Kraakman et al, *The Anatomy of Corporate Law* (2004).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

### LL4F9 Half Unit

## Legal Research and Writing Skills

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Devika Hovell

**Availability:** This course is compulsory on the LLM (extended part-time) and LLM (full-time). This course is not available as an outside option.

**Course content:** This course on Legal Research and Writing has a taught component focusing on research and writing skills and a stand-alone dissertation (details about which may be found in the LLM Handbook), to be written in a substantive law area of the student's choice.

The taught part of the course is designed to enable students to gain a better understanding of:

- the nature of research in general and of legal research in particular, and the range of questions and research methodologies to be found within legal scholarship;
- the processes involved in legal research, including research design, refining a research question, resource identification, and searching for relevant materials;
- legal writing skills, including issues of style, process, the use of sources and the presentation of findings and arguments.

**Teaching:** This course is typically delivered through a combination of classes and lectures throughout Lent Term. Students will usually have additional hours in the Summer Term.

**Formative coursework:** Students will be invited to prepare short writing samples and dissertation plans.

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

See the LLM handbook for full details and regulations about the dissertation.

## LL4G8 Half Unit

### Law of Corporate Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Eva Micheler and Mr Edmund-Philipp Schuster

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course examines the private law rules governing how companies raise finance. The issues covered include e.g. capital structures, an introduction to basic finance concepts relevant to understanding the legal rules covered, the rules on raising equity capital, initial legal capital and alternatives, dividends, reduction of capital and share buy-backs, property rights in shares, the settlement and holding of securities including through distributed ledger (blockchain) technology.

**Teaching:** This course will have 20 hours of teaching content in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will have the opportunity to write a formative essay. All students are strongly encouraged to write at least one essay.

**Indicative reading:** Gower, *Principles of Modern Company Law*, 11th edn, 2021; Eilis Ferran and Look Chan Ho, *Principles of Corporate Finance Law*, 2014, Eva Micheler, *Interests in Securities*, 2007.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4H2 Half Unit

### Freedom of Speech, Media and the Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Andrew Scott

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Media and Communications (Media and Communications Governance) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course examines freedom of speech and the legal and administrative regulation of mass media publication that bears upon it (principally the press, the broadcast media, and institutionalised Internet publication). The course also considered content-related dimensions of social media regulation. The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media publication practise, theories of free speech and rights jurisprudence (in particular, the freedom of expression

and freedom of the press in national and international law).

The course then examines potential restrictions on speech and publication that are aimed at promoting or preserving specific private and/or public interests. The key private interests considered are those in reputation (defamation), privacy, data protection, intellectual property, and confidentiality. The key public interests considered are the integrity of the judicial process (contempt and reporting restrictions), the impartiality and diversity of political representations, the deterrence of disinformation, fabrication and 'fake news', the avoidance of offence (based on obscenity, social difference and religion), and national security. The course concludes with brief consideration of 'positive' aspects of free speech (including access to information and the valorisation of newsgathering).

**Teaching:** This course will have 20 hours of teaching content in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

The course is also supported by a number of specialist seminars with outside speakers, and by a reading group allowing for deeper and more focused consideration of theories of free speech.

**Formative coursework:** Students must submit an essay plan and working bibliography for the assessed essay.

**Indicative reading:** Supporting texts for the course include Greenawalt, 'Free Speech Justifications' (1989) 89 *Columbia Law Review* 119; Parkes and Busutill (eds), *Gatley on Libel and Slander* 13th edn, Thoson Reuters, 2022; Waldron, *The Harm in Hate Speech* (Harvard University Press, 2012); Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (OUP, 2016), Kenyon and Scott (eds), *Positive Free Speech: Rationales, Methods and Implications* (Hart Publishing, 2020), and Barendt et al, *Media Law: Texts, Cases and Materials* (Pearson, 2013). Most materials relevant to the course are made available via the BLPES electronic resources or online.

**Assessment:** Essay (100%, 8000 words).

## LL4H3 Half Unit

### Media Law: Regulating Newsgathering

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Andrew Scott

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Media and Communications (Media and Communications Governance) and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course focuses on the legal and normative frameworks regarding the obtaining of information by journalists and others. It examines in particular the legal and administrative regulation of newsgathering and content production practices undertaken by professionals working in the media sector, but extends to citizen-journalism, academia, and the activities of others across society. The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media newsgathering practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines a number of news- and information-gathering practices that are either facilitated or proscribed by law and/or other forms of regulation. These include the protection of sources and journalistic materials; the technological circumvention of source protections; legal risks to sources and whistleblowers; 'cheque-book journalism' (including payments to witnesses and to criminals); access to information held by the state (freedom of information); access to courts, court documents and other criminal justice contexts

(prisons); the safety of journalists and newsgatherers; reporting from conflict-zones; media-police interaction; harassment and media intrusion, and the regulation of surreptitious newsgathering practices (hacking, tapping and subterfuge).

**Teaching:** 20 hours of seminars in the LT.

This course will have 20 hours of teaching content in Lent Term.

There is a Reading Week in Week 6 of Lent Term.

The course is also supported by a series of specialist seminars with outside speakers, and by an online discussion forum.

**Formative coursework:** Students must submit a formative essay plan and working bibliography during the development of the assessed essay.

**Indicative reading:** Supporting texts for the course include Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (Oxford University Press, 2016); Leveson, *An Inquiry Into the Culture, Practices and Ethics of the Press: Report*, HC 780, 2012, Warby, Moreham and Christie (eds), *Tugendhat and Christie: The Law of Privacy and the Media*, (3rd ed, OUP, 2015), *Flat Earth News* (Chatto & Windus, 2008); de Burgh, *Investigative Journalism* (Routledge, 2nd ed, 2008). Many of these and other materials relevant to the course are made available via the BLPES electronic resources or online.

**Assessment:** Essay (100%, 8000 words) in the ST.

## LL4H4 Half Unit

### International Financial Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Philipp Paech

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The law of the traditional financial market sectors of insurance, commercial banking, derivatives, capital markets and asset management are converging in practice, but their academic analysis is still largely sector-based. The main goal of this course is to offer a cross-sectoral, functional understanding of the commercial, property and insolvency law of finance, permitting students to grasp the big picture and apply acquired understanding to very diverse legal constellations in finance. The course also highlights certain anomalies in differing legal treatment of the respective sectors or certain types of transactions that induce regulatory arbitrage. Further, students will acquire the ability to identify and put into context key trends in finance.

The course provides an overview of the substantive law aspects (UK, EU and international) of international financial and business transactions. The focus is mainly on broad principles and policy issues rather than a detailed examination of statute, case law and drafting. However, where appropriate, legal concepts and market practice will be explained by reference to case law and other legal sources. The course is designed to be as topical as possible, and the content may change in the light of developments. While the precise topics covered will vary from year to year they typically will include the following:

- Introduction:

Logic and players of the financial market.

Overview of types of financial transactions.

Reasoning and sources of financial law and regulation.

The different types of risk and the role of financial law.

European and global legal and regulatory architecture

- Raising capital:

Taking risk through funded positions.

The nature of banks, deposit taking, loans, syndicated loans.

Issuance of debt securities, eurobonds and equity.

Investment funds.

Cross-comparison of funded positions, common patterns and differences

- Mitigating risk:

Simple financial positions (guarantee, insurance, derivatives and credit default swaps).

Close out netting, clearing.

Financial collateral

- Insolvency policy:

Preferential treatment of financial firms

- Cross-jurisdictional analysis:

Private international law analysis in financial law.

International bank insolvencies

- Specific constellations:

Intermediated securities and cross-border collateral.

Securitisation.

Crypto assets, blockchain and other FinTech-related issues

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be asked to submit a 2,000 word essay during Michaelmas Term. A voluntary mock exam is also offered.

**Indicative reading:** A detailed reading list will be made available on Moodle prior to teaching.

Recommended general reading: (a) Joanna Benjamin, *Financial Law*, Oxford University Press, 2007; (b) Colin Bamford, *Principles of International Financial Law*, Oxford University Press, 2011; (c) Philip Wood, *Law and Practice of International Finance* (University Edition) 2007, Sweet&Maxwell; (d) S. Valdez, Ph. Molyneux, *An Introduction to Global Financial Markets*, 6th ed., Palgrave-McMillan, 2010 (this last one is not a legal work but ideal for understanding market practice).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4H8 Half Unit

### Employment Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Astrid Sanders

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Inequalities and Social Science and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** Regulation of the content and the form of the employment relation. The contract of employment, including express and implied terms and the scope of employment law. Regulation of minimum wage and working time. Protection against discrimination in the workplace. Discipline and protection from dismissal and termination of employment. Business reorganisation and economic dismissals. Freedom of association and the right to strike. The approach involves theoretical perspectives, economic analysis, comparative law of employment, and examination of relevant European law.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:** Detailed syllabus of weekly readings will be available and the materials can all be accessed through Moodle. Hugh Collins, *Employment Law*, 2nd edn (Oxford University Press,

2010), Chapters 1-9.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Candidates are allowed to take an unannotated copy of a collection of statutory materials into the examination.

## LL4H9 Half Unit

### Human Rights in the Workplace

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Astrid Sanders

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The sources and application of human rights in the workplace, including international and European laws and conventions. Civil liberties of employees. Social and economic rights of workers. Protection from discrimination in the labour market and employment. As well as detailed examination of legal materials, the approach involves discussion of theories of human rights and comparisons between legal systems.

**Teaching:** This course will have 20 hours of teaching content in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** A detailed syllabus of weekly readings will be available and the materials can all be accessed through Moodle Preliminary reading: Hugh Collins, *Employment Law*, 2nd edn (Oxford University Press, 2010), Chapters 9-10.

**Assessment:** Essay (100%, 8000 words) in the ST.

## LL4K4 Half Unit

### The International Law of Self-Determination

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr James Irving

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Some prior knowledge of international law is useful but not essential.

**Course content:** This course will provide a general introduction to the doctrine of self-determination in international law. Self-determination will be historically contextualised from its intellectual progenitors in the Enlightenment through to its political birth at the 1919 Paris Peace Conference and its formal induction into international law by virtue of the 1945 UN Charter. Both the detail of the doctrine's content and the dynamic governing its development will be explored. The relationship between self-determination and state formation (including decolonisation and secession), minority rights, aboriginal rights, women's rights and the nascent right to democratic governance will be central topics. Reference will also be made to the interplay between self-determination and economic rights, including permanent

sovereignty over natural resources, the right to development and the "third generation rights" movement more generally. Self-determination's influence upon the international rules governing the use of force will be discussed, but these rules will not be a primary focus. Upon completion of the course students will be in a position to legally analyse contemporary fact patterns and to identify both strengths and weaknesses in the existing legal framework. Students will have considered new and novel approaches to self-determination and will be able to situate the doctrine in relation to international law and human rights. Those taking the course will gain an appreciation for self-determination's particular contribution to political and economic liberty.

**Teaching:** This course will have 20 hours of teaching content in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be asked to submit one 2,000 word essay.

**Indicative reading:** Introductory reading: James Crawford, "The Right of Self-Determination in International Law: Its Development and Future" in Philip Alston, ed., *Peoples' Rights* (Oxford: Oxford University Press, 2001) 7. Additional sources: Philip Alston, ed., *Peoples' Rights* (Oxford: Oxford University Press, 2001); S. James Anaya, , *Indigenous Peoples in International Law*, 2nd ed. (Oxford: Oxford University Press, 2004); Allen Buchanan, *Justice, Legitimacy, and Self-Determination: Moral Foundations for International Law* (Oxford: Oxford University Press, 2004); Cassese, Antonio, *Self-Determination of Peoples: A Legal Reappraisal* (New York: Cambridge University Press, 1995); Hillary Charlesworth, & Christine Chinkin, *The Boundaries of International Law* (Manchester: Manchester University Press, 2000); James Crawford, ed., *The Rights of Peoples* (Oxford: Clarendon Press, 1988); Hurst Hannum, *Autonomy, Sovereignty, and Self-Determination: the Accommodation of Conflicting Rights*, rev. ed. (Philadelphia: University of Philadelphia Press, 1996); James Irving, "Self-Determination and Colonial Enclaves: The Success of Singapore and the Failure of Theory" (2008) 12 *S.Y.B.I.L.* 97-122.; Christian Walter, Antje von Ungern-Sternberg & Kavus Abushov, eds., *Self-Determination and Secession in International Law* (New York: Oxford University Press, 2014).

**Assessment:** Essay (100%, 8000 words).

## LL4K5 Half Unit Not available in 2022/23

### International Commercial Contracts - General Principles

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jan Kleinheistercamp, NAB 7.09

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Pre-requisites:** Firm knowledge in contract law and/or international sale of goods from previous studies.

**Course content:** The course treats what can be called the general part of transnational contract law, i.e. the general principles of law which are of relevance in any kind of international contract, be it sale, construction, shipping, financing, or joint venture. These general principles relate to contractual formation and negotiations, interpretation, transversal general principles, changed circumstances and hardship, agency, third parties, assignment, self-help and set-off, direct performance and damages and penalties. At present, such contracts are governed either by uniform rules of international conventions or by the national laws applicable by virtue of conflict of law rules. The course puts the existing national and international solutions in a comparative perspective so as to work with the sources of such generally

accepted principles. Where there are divergences between existing solutions, the course focuses on the elaboration of new efficient solutions that are internationally acceptable and have the potential of becoming general principles in the future. For these purposes, special attention is given to the UNIDROIT Principles on International Commercial Contracts. Other national laws, however, are drawn upon from time to time. Students are also encouraged, in both classes and examination, to reflect upon the similarities and differences between their own national laws and the UNIDROIT Principles.

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

**Formative coursework:** One 2,500 word essay after week 6 on previous exam questions (choice of 1 out of 3).

**Indicative reading:** S. Vogenauer & J. Kleinheisterkamp, Commentary on the UNIDROIT Principles of International Commercial Contracts (1st edn, OUP 2009); H. Kötz, European Contract Law (OUP 1997); K. Zweigert & H. Kötz, An Introduction to Comparative Law (3rd edn, OUP 1998); H. Beale et al., *Ius Commune Casebook on the Common Law of Europe: Cases Materials and Text on Contract Law* (2nd edition, OUP 2010); T. Kadner Graziano, *Comparative Contract Law* (Palgrave 2009).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4K7 Half Unit Not available in 2022/23 Mental Health Law: The Criminal Context

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Jill Peay

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and we cannot guarantee all students will get a place.

**Course content:** This course aims to integrate a practical and theoretical understanding of mental health law, as it relates to mentally disordered offenders. It is not intended to provide a comprehensive understanding of the detail of the relevant law in England and Wales, but rather aims at broader conceptual understanding of the problem areas that are likely to bedevil any law relating to those with mental disabilities who have offended. The course makes reference to both the Mental Health Act 1983 and the Criminal Justice Act 2003.

**Teaching:** This course will have two hours of teaching content each week in Lent Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** J. Peay (2011) *Mental Health and Crime*, Routledge. B. Hale (2017) *Mental Health Law*, Sweet and Maxwell

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4K8 Half Unit Law of Corporate Finance: Securities Regulation

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Niamh Moloney

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course examines the legal issues arising out of the operation of the capital markets as intermediaries between investors and issuers; it focuses on the regulation of capital-raising through the markets. The topics covered include: disclosure theory; the role of trading markets in finance-raising and their regulation; prospectus disclosure; ongoing disclosure; gatekeepers; market abuse; and the internationalization of capital-raising and harmonization. The course will focus primarily on English law but will consider the impact of the UK's withdrawal from the EU. Course coverage may vary slightly from year to year.

**Teaching:** This course will have 20 hours of teaching content in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** A mock examination will be held at a time to be advised during Lent Term.

**Indicative reading:** Reading lists will be provided in advance for each session. Sample texts include Payne and Gullifer, *Corporate Finance Law*, 3 ed 2020.

Preliminary reading.

Payne and Gullifer, *Corporate Finance Law*, 3 ed 2020, chs 1 and 2.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4K9 Half Unit European Capital Markets Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Niamh Moloney

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course examines the EU's regulation of the capital markets. It considers the harmonised regulatory regime which applies to capital market actors across the Member States and which supports the integrated market. The topics which may be covered include: the rationale for integration and the role of law and the evolution of the integration project, including the impact of the financial crisis, Capital Market Union, and the UK's withdrawal from the EU; the deregulation, liberalisation, harmonisation, and re-regulation mechanisms used to integrate and regulate the EU market; market access and the passport for investment services; the liberalisation of order execution and the regulation of trading markets; retail investor protection; the prospectus and disclosure regime; the regulation of gatekeepers; and the institutional structure supporting regulation and supervision, including the role of the European Securities and Markets Authority. Course coverage may vary slightly from year to year.

**Teaching:** This course has 20 hours of teaching content in Michaelmas Term. This course includes a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** A mandatory in-class formative assessment (in the form of a timed exam question) will be held in Week 6.

**Indicative reading:** Reading lists will be provided in advance for each seminar and will include chapters from books, articles, and relevant legislative and policy materials. Sample texts include: Moloney, *EU Securities and Financial Markets Regulation*, 3rd edition (2014) and Veil (ed), *European Capital Markets Law*, 3rd

edition (2022).

Preliminary reading

Moloney, EU Securities and Financial Markets Regulation (2014), chapter 1

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4L1 Half Unit Not available in 2022/23

### The Theory and Practice of Alternative Commercial Dispute Resolution

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jan Kleinheisterkamp (Convener) NAB 7.09. Dr Philipp Paech NAB 7.21

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Commercial Law; International Business Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

**Pre-requisites:** None.

**Course content:** Given the high cost and risk of litigation and arbitration, parties to commercial transactions have an interest in managing, and hedging against, the risk of future disputes with their business partners and others. This course introduces and explores the different methods of alternative dispute resolution (ADR), i.e. those methods for settling commercial disputes out of courts, both from a theoretical and a practical perspective. The first half of the course lays the foundations of alternative resolution of commercial disputes, exploring its history, socio-legal context and its embedding in procedural law and reform. The second half will then focus on the particularities of disputes in commodities trade, including shipping, maritime and insurance; construction; IP; financial markets; regulatory and inter-agency / interstate disputes and international tax disputes.

The course prepares for LL4L7 – Advanced Negotiation and Mediation. It complements LL4C5 – Fundamentals of International Commercial Arbitration and LL4E7 – Investment Treaty Law.

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a Reading Week in week 6 of MT.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** H Brown / A Marriott, ADR Practice and Principles (Sweet & Maxwell 2011); S Roberts / M Palmer, Dispute Processes: ADR and the Primary Forms of Dispute Resolution (2nd edn, CUP 2005); R Fisher / W Ury, Getting to Yes: Negotiating an Agreement Without Giving In (2011)

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4L6 Half Unit

### Theory of Constitutional Rights

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Kai Möller

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Some knowledge of human or constitutional

rights law of any jurisdiction may be helpful, but is not essential. A knowledge of philosophy is not required.

**Course content:** The course will provide an introduction to the theory of constitutional rights. The emphasis is on a combination of law and theory; to this end, each seminar will rely on a mixture of cases from various jurisdictions and theoretical and philosophical materials. Topics to be discussed will include: Robert Alexy's Theory of Rights as Principles; Ronald Dworkin's Theory of Rights as Trumps; The Debate about Proportionality; Absolute Rights; The Justifiability of Judicial Review; The Culture of Justification and the Right to Justification.

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** The course will rely on both cases from various jurisdictions and articles and book chapters from authors including Ronald Dworkin, Robert Alexy, Matthias Kumm, Jeremy Waldron and Frances Kamm.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4L7 Half Unit Not available in 2022/23

### Advanced Mediation and Negotiation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Philipp Paech (Convener) NAB 7.21. Dr Jan Kleinheisterkamp NAB 7.09

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Commercial Law; International Business Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

**Pre-requisites:** Students wishing to take Advanced Negotiation and Mediation are recommended to have taken LL4L1 - The Theory and Practice of Alternative Commercial Dispute Resolution, or have equivalent prior experience.

**Course content:** This course explores the dynamics of disputes and the use of negotiation and mediation to assist in their resolution. These techniques can allow parties to overcome antagonistic positions or disputes, refocus on their actual needs and to come to an agreement over how to align their interests and to allocate risk for the future – and to draw a line under tensions of the past. The course pays particular attention to understanding the dynamics of disputes; obstacles to their resolution arising from cultural differences and the role of language, including techniques such as non-violent communication; different theories and models of negotiation and mediation and their practical applications, such as facilitative, evaluative, narrative / transformative and transactional approaches; the sometimes/often problematic role of lawyers; the nature of settlement and its potential dangers for weaker parties or public interests.

In sum, the course aims to facilitate not only an advanced theoretical but also practical understanding of the processes and techniques involved in negotiation and mediation. For that purpose, case studies will illustrate some specific challenges, such as in negotiations of international transactions, family mediation, mediation in international crisis situations or policy negotiations in the context of public institutions. Experienced practitioners will be invited to share their insights from experiences in the field.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** R Fisher / W Ury / B Patton, Getting to Yes: Negotiating Agreement Without Giving In (revised edn, 2011); W

Ury, *Getting Past No: Negotiating with Difficult People* (1992); M Rosenberg, *Non-Violent Communication* (2015); O Fiss, 'Against Settlement' (1983/84) 93 Yale LJ 1073-1090; S Roberts / M Palmer, *Dispute Processes: ADR and the Primary Forms of Dispute Resolution* (2nd edn, CUP 2005).

**Assessment:** Essay (100%, 8000 words) in the ST.

## LL4N6 Half Unit Principles of Copyright Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Martin Husovec.

Other Staff Involved: Dr Luke McDonagh

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course explains the foundations and structure of copyright law. It is aimed at those who have not studied the subject in detail before but also those wishing to deepen their understanding of copyright law in the comparative context. Topics to be covered will include the history and evolution of copyright, protected subject matter, the scope of the economic and moral rights, and the principles underlying copyright enforcement. The course looks primarily at the European system, mostly as implemented in the UK.

**Teaching:** This course will have 20 hours of teaching content in Michaelmas Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Reading lists will be issued on a weekly basis. The legislation, cases and soft law instruments will make up additional required reading for this course. All of this material is available in electronic form via the Moodle site which supports the course. Useful texts include Lionel Bently and Brad Sherman, *Intellectual Property Law* 4th ed. (OUP, Oxford 2018) and Thomas Dreier and P. Bernt Hugenholtz (eds.) *Concise European Copyright Law* (Kluwer, 2016).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4S1 Half Unit Cyberlaw

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Orla Lynskey. Other Staff Involved: Dr Giulia Gentile

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** This course does not require an in-depth understanding of contemporary computer technology.

**Course content:** This course examines and discusses topical issues in relation to law and technology systems. We begin by addressing issues relating to network regulation or control including questions such as "can internet-enabled communications be regulated?" and "who is competent to police online content

and activity?". We discuss whether the internet can and should be neutral and politically charged questions regarding regulation of platforms and regulation by platforms. In the second half of the term, we will delve further into these issues through topical examples such as AI and justice, tackling online "harms" and regulating advertising online including influencers.

Students taking the course will be expected to develop knowledge and understanding of the different values brought to bear in the regulation of new media technologies and communities formed through such technologies and the factors leading towards choices of particular values, regulatory institutions and process.

Such knowledge and understanding will operate both at the theoretical level and the level of particular examples of regulatory regimes. Students will be expected to apply organisational and analytical skills to the investigation of evidence and problems and show effective communication through written work and seminar discussion. Students shall research an assessed extended essay.

**Teaching:** This course will have 20 hours of teaching content in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** Students should submit an essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises, and to submit one 2,000 word formative essay.

**Indicative reading:**

- Murray, *Information Technology Law: The Law and Society* (OUP, 4th ed, 2019)
- Edwards (ed), *Law, Policy and the Internet* (Hart, 2018)
- Reed & Murray, *Rethinking the Jurisprudence of Cyberspace* (Edward Elgar, 2020)
- Frank Pasquale, *New Laws of Robotics: Defending Human Expertise in the Age of AI* (Belknap, 2020)
- Murray, *The Regulation of Cyberspace* (Routledge, 2007)
- Reed, *Making Laws for Cyberspace* (OUP, 2012)
- Lessig, *Code Ver, 2.0* (Basic Books, 2006)

**Assessment:** Essay (100%, 8000 words) in the ST.

## LL4S2 Half Unit E-Commerce Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Martin Husovec

Other staff involved: Dr Edmund Schuster

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course is to introduce students from a legal background to the specialised legal structure which surrounds e-commerce. The course looks at the specific problems an e-commerce start-up must overcome in order to begin trading, including arranging cloud hosting agreements, designing terms and conditions of service and delivery, and arranging distribution agreements. Also examined will be smart contracts and distributed ledger technology. From here the course will develop to examine the problems of more mature e-commerce businesses including jurisdiction, payment systems (including cryptocurrency) and access to, and ownership of, data. Classes on Online Dispute Resolution and the regulation of platform and sharing economies will complete the analysis. The course is designed to act as an interface between ICT law and commercial law and practice in that it examines in detail the close sub-set of online transactions which are clearly commercial in nature.

**Teaching:** This course will have 20 hours of teaching content in Lent Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** Students should submit an essay plan and working bibliography for the assessed essay. All students are

expected to contribute to a series of class and online exercises, and to submit one 2,000 word formative essay.

**Indicative reading:** Murray: Information Technology Law: The Law and Society 4ed (OUP, 2019).

Lodder & Andrew Murray (eds) EU Regulation of E-Commerce: A Commentary (Edward Elgar, 2017).

Millard: Cloud Computing Law (OUP, 2013).

Fox & Green: Cryptocurrencies in Public and Private Law (OUP, 2019).

Finck: Blockchain Regulation and Governance in Europe (CUP, 2018).

Cohen: Between Truth and Power: The Legal Constructions of Informational Capitalism (OUP, 2019).

Susskind: Online Courts and the Future of Justice (OUP, 2019).

**Assessment:** Essay (100%, 8000 words).

## LL4S4 Half Unit

### Digital Rights, Privacy and Security

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Orla Lynskey

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** Basic knowledge of EU law is desirable, but not essential, for this course. Students who do not have this background knowledge are advised to do some preparatory reading (2-3 chapters) before the seminar begins.

**Course content:** Personal data is an important factor of production in data-driven economies, and the processing of personal data can generate significant economic and social benefits. However, personal data processing can also have a detrimental impact on established rights and values, such as autonomy, privacy and data protection. As a result, legal frameworks to regulate personal data processing have been enacted across the world, with the EU legal model used as a blueprint. Yet, despite the development of such legal frameworks, critical questions remain unanswered. For instance, disagreement persists regarding how the balance should be struck between effective data protection and other rights (such as freedom of expression and freedom of information) and interests (such as innovation and national security).

This course will critically evaluate the legal framework applicable to personal data processing. It will do this predominantly with reference to the EU framework, as this has served as a model for over 100 other jurisdictions. Participants will be introduced to techniques and technologies for monitoring and processing personal data in the information society. In order to bring key issues to life, a number of case studies will be considered, including the application of data protection rules to online behavioural advertising and the use of automated decision-making in the criminal justice context.

**Teaching:** This course has 20 hours of teaching content in Michaelmas Term. Students will usually have two additional hours in the Summer Term. This course includes a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** All students are expected to contribute to a series of class exercises and to submit one piece of formative work for assessment.

**Indicative reading:**

- Bygrave: Data Privacy Law: An International Perspective (OUP, 2015).
- Cohen: Between Truth and Power (OUP, 2019).
- Kuner: Transborder Data Flows and Data Privacy Law (OUP, 2013).
- Lynskey: The Foundations of EU Data Protection Law (OUP, 2015)

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

This is an open-book exam.

## LL4S5 Half Unit

### Regulation of Digital Creativity and Investment

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Martin Husovec

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** The course examines how law and other regulatory systems incentivize creativity and investment in the digital space and with what consequences. Legislatures around the world constantly face the question of what intangible assets to protect and how to support social progress. The general intuition is that protecting from imitation is necessary to incentivize creativity and investment that are in everyone's interest. Several recent examples include potential protection of data, AI-generated creations, computer programs, and digital news.

The course provides a broad view of how legal incentives, social norms, technical architecture, and markets shape the legal design of new forms of protection of intangible assets. It draws on a number of recent policy developments in Europe and around the world to study when and by what means legislators decide to protect new digital assets from imitation and appropriation. It explores how legislators, regulators and industries interact in their attempts to develop a coherent and flexible body of law and regulatory practice.

At the end of the course, students should be able to:

- critically evaluate ongoing developments in law relating to IPRs and the digital environment.
- display an understanding of how these developments relate to one another.
- examine areas of doctrinal, academic and political debate surrounding rules and theories;
- evaluate those rules and theories in terms of internal coherence and practical outcomes;
- draw on the analysis and evaluation contained in primary and secondary sources.

**Teaching:** This course will have two hours of teaching content each week in Lent Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** All students are expected to contribute to a series of class exercises, and to submit to one one-hour mock exam.

**Indicative reading:** Academic papers by scholars of law, economics, and other social sciences, such as Alexrod, Coase, Husovec, Hugenhotz, Lemley, Mazzucato, Moser, and many others.

Justin Pila and Paul Torremans, European Intellectual Property Law (OUP 2019).

Murray: Information Technology Law: The Law and Society 4ed (OUP, 2019)

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4Y9 Half Unit Not available in 2022/23 Comparative and Transnational Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jacco Bomhoff

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students from other Departments are allowed to apply with permission of the Course Convener.

This course has a limited number of places and we cannot guarantee all students will get a place.

**Course content:** This course covers both the comparison of law and legal institutions from different legal systems and traditions (comparative law), and the study of forms of legal regulation beyond the state (transnational law). For each these two fields, topics for discussion are selected based on their relation to one or both of two broad themes: First, the connections between law and its surroundings (culture, society, economy, etc.); and second, the character of 'law' generally (as a form of reasoning, or a set of institutional arrangements, or a distinctive 'worldview', etc.). Studying these two classic themes across of a range different national- and transnational settings allows us to ask a series of more concrete questions, such as: "Why are courts in some legal systems more powerful or more trusted than courts in other systems?"; "Why do some countries send far more people to prison than others?"; "Is it possible for a lawyer from one legal system to really understand what law means or how law works in some other system; or for a legal doctrine from one system to be 'transplanted' to another?"; and: "How is 'law' in non-state contexts similar to and different from state law?".

The course combines attention to theory (social- and cultural theory, theories of comparison, and of the transnationalisation of law) with detailed case studies in selected areas from different fields of law (comparative constitutional law, comparative private law, comparative criminal justice, EU law; and commercial arbitration, among others). The course might be especially interesting for students already taking other courses with a comparative- or a transnational law dimension, and for all students interested in the ways law works, and does not work, and in how lawyers think, in different parts of the world.

**Teaching:** This course will have two hours of teaching content each week in Lent Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course. This essay is due in Week 7.

**Indicative reading:** -Adams, Maurice & Bomhoff, Jacco, *Practice and Theory in Comparative Law* (Cambridge, 2013)  
-Cotterrell, Roger, *What is Transnational Law?*, *LAW & SOCIAL INQUIRY* (2012)  
-Frankenberg, Gunther, *Critical Comparisons: Re-thinking Comparative Law*, *26 HARVARD INTERNATIONAL LAW JOURNAL* (1985)

-Shaffer, Greg, *Theorizing Transnational Legal Ordering*, *ANNUAL REVIEW OF LAW AND SOCIAL SCIENCE* (2016)  
-Special Issue: 'Comparative Socio-Legal Studies', *INTERNATIONAL JOURNAL OF LAW IN CONTEXT* (2017)

**Assessment:** Take-home assessment (100%) in the ST. The take home exam will consist of 2 essay questions (out of 6 set), each with a 3000 word limit. Students will be given their exam questions at 9:00 am on Wednesday morning of Week 1 Summer Term, via Moodle, and will have until 5:00 pm on Thursday afternoon of Week 2 Summer Term to submit the exam. The length of time set for this assessment already takes into account

that students may also have one or more other exams during this period.

---

## LL4Z1 Half Unit Business Taxation

**This information is for the 2022/23 session.**

**Teacher responsible:** Eduardo Baistrocchi

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you're not able to get a place on this course.

**Pre-requisites:** There are no formal pre-requisites for this module. It is recommended for those studying LL4AY International Tax Systems and LL4AZ Taxation of Multinational Enterprises: Transfer Pricing.

**Course content:** The course offers a comprehensive introduction to business taxation, using United Kingdom law as a case study. It looks at how businesses are taxed in this country. The course focuses on the key elements of the taxation of the income of businesses, including:

- taxation of trading income.
- corporation tax, the nature of taxes on companies and the taxation of dividends.
- capital allowances - relief for depreciation.
- capital gains taxation.
- partnership taxation.
- tax relief for losses

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will have the option of producing a formative essay of 2,000 words.

**Indicative reading:** G. Loutzenhiser, *Tiley's Revenue Law*; A. Fairpo and D. Salter, *Revenue Law: Principles and Practice*; Tolley's *Yellow Tax Handbook*. E. Baistrocchi, *Global Tax Hubs: Theory and Evidence*, SSRN, 2022. Detailed reading lists will be provided during the course via Moodle.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

---

## LL4Z2 Half Unit Not available in 2022/23 Principles of Taxation and Tax Disputes

**This information is for the 2022/23 session.**

**Teacher responsible:** Eduardo Baistrocchi NAB 7.33

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Pre-requisites:** The course is suitable both for students who have not studied taxation before and for those who have. It is recommended for students who have not studied taxation previously, as well as for those who are studying any of the other tax courses offered at LLM/MSc level.

**Course content:** This course looks at how tax systems work and the principles that lie behind tax systems. Topics covered include the reasons for taxation and the main types of tax, how income is taxed, how the tax administration operates, and the impact

of tax competition among countries on international tax policy. The course uses tax disputes from G20 countries to illustrate the issues discussed. The course is suitable for those who have not studied taxation before, as well as for those with a background in tax who are interested in exploring the principles of taxation in greater depth.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Appropriate readings from journal articles and from books including: Avi-Yonah, Sartori and Marian, *Global Perspectives on Income Taxation Law*; Messere et al., *Tax Policy: Theory and Practice in OECD Countries*; Baistrocchi, *A Theory of International Taxation*; Dagan, *International Tax Policy: Between Competition and Cooperation*; Murphy and Nagel, *The Myth of Ownership, Taxes and Justice*; Thuronyi, *Comparative Tax Law*; James and Nobes, *The Economics of Taxation*; Mirrlees et al., *Tax By Design*. Further materials include: Morse and Williams, *Davies Principles of Tax Law*; Kay and King, *The British Tax System*; Thuronyi, *Tax Law Design and Drafting*. Detailed reading lists will be provided during the course via Moodle.

Recommended preliminary reading: Avi-Yonah, Sartori and Marian, *Global Perspectives on Income Taxation Law* (Oxford University Press, 2011).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4Z5 Half Unit Not available in 2022/23 EU State Aid Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Pablo Ibanez Colomo NAB5.16

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Competition, Innovation and Trade; Corporate and/or Commercial Law; European Law; International Business Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Course content:** Member States of the EU are not free to award subsidies to companies or to support them in a comparable way (by, inter alia, granting them loans at favourable rates or by providing unlimited guarantees). In the wake of the recent financial crisis, for instance, bailout measures adopted across the EU had to be cleared by the European Commission in accordance with Articles 107 and 108 TFEU. The first part of the course explores the economic rationale underpinning the principle whereby State aid is incompatible with the EU internal market (the reasons why similar regimes are not implemented at the national level in federal countries facing similar issues, such as the United States, will also be explored). The second part is devoted to (i) the notion of State aid within the meaning of Article 107(1) TFEU (that is, the range of measures that are subject to ex ante control by the European Commission) and to (ii) the conditions under which such measures may be declared to be in the interest of the EU as a whole. The third part provides an overview of the application of the law in some sectors (including the energy or the communications sectors) or for some purposes (e.g. research and development, regional aid). The fourth part is devoted to the procedural aspects of the discipline and to the application of similar rules beyond the EU (in particular in the context of the WTO, the EEA and other trade agreements concluded by the EU).

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** Quigley, *European State Aid Law and Policy* (3rd Edition, 2015); Jones and Sufrin, *EU Competition Law* (online Chapter, 6th Edition, 2017); Bacon (ed), *European Community Law of State Aid* (3rd Edition, 2017).

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4Z6 Half Unit Comparative Constitutional Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jo Murkens

**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** Comparative Constitutional Law is a rejuvenated discipline that attracts a broad range of interdisciplinary interest in the formation, design, and operation of constitutions. LL4Z6 examines the central issues across a range of jurisdictions and from a variety of perspectives. In Part I, we will discuss the idea of comparative law as a legal discipline with its own distinctive method as well as the transnational transfer of constitutional ideas and ideologies. Part II deals with key constitutional concepts, in particular the historical origins of fundamental law, constituent power, constitutional change, and the rule of law. Part III deals with questions of constitutional design, with a special focus on constitution-making in deeply divided and authoritarian societies. LL4Z6 offers a rich historical and conceptual account of the origins of Western constitutional ideas. It also examines their contemporary meaning and application in non-Western contexts. In so doing, the course develops its own critique of mainstream liberal thought that idealises constitutions as normative constraints on politics or essentialises the concept of constituent power in constitutional theory. We will ask whether formal constitutions facilitate democratisation and political change or whether they undermine democracy and entrench the ruling elite. The study of law, like the study of all social phenomena, is always comparative and inevitably fragmented. In LL4Z6, we will not be comparing, doctrinally and systematically, the constitutional codes of different legal orders. Instead, the objective of the course is to study comparative constitutional law comprehensively, critically, and contextually. This approach enables the student to deepen their understanding of law as a method and to connect that understanding independently to other disciplines.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** There is not a set book for this course. All materials will be made available in advance on Moodle.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4Z7 Half Unit Comparative Constitutional Rights

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Kai Möller

**Availability:** This course is available on the LLM (extended part-

time), LL.M (full-time) and University of Pennsylvania Law School LL.M Visiting Students. This course is not available as an outside option.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course examines a range of controversial issues in human and constitutional rights law from a comparative perspective. These issues include: abortion; euthanasia and physician-assisted suicide; same sex marriage; religion in the public sphere; hate speech and denial of the holocaust; obscenity; affirmative action. We will approach them by comparing and contrasting judgments from courts all over the world, with a certain emphasis on cases from the U.S. Supreme Court, the Canadian Supreme Court, the South African Constitutional Court, the European Court of Human Rights, the U.K. Supreme Court, and the German Federal Constitutional Court. The goals of the course are, first, to introduce the students to the jurisprudence of those powerful and influential courts, and, second, to invite them to think about and critically analyse some of the most controversial, difficult, and important rights issues of our time.

**Teaching:** This course will have two hours of teaching content each week in the Lent Term and two hours in the Summer Term. There will be a Reading Week in Week 6 of Lent Term.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** The course is mainly case-based; however, interested students may find the following book helpful: V Jackson and M Tushnet, *Comparative Constitutional Law*, 3rd edition, 2014.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## LL4Z9 Half Unit Banking Law

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Jo Braithwaite

**Availability:** This course is available on the LL.M (extended part-time), LL.M (full-time) and University of Pennsylvania Law School LL.M Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

**Course content:** This course focuses on the private law of banking as it relates to the core banking activities. In particular, we look at the deposit-taking relationship, the legal issues surrounding bank payment services, and the inter-disciplinary debates about the nature of money and payments. The course aims to be both domestic and international in perspective, though the emphasis will be on English law. Topics include: 1. The deposit-taking relationship, including the duty of confidentiality; 2. Money, transfers of money and payment including the development of new digital currencies and decentralised payment systems, including the debates about central bank digital currencies; 3. Bank payment methods: funds transfers and unauthorised payments including the debate around tackling APP scams; and 4. Bank payment services in an international context, letters of credit.

**Teaching:** This course will have two hours of teaching content each week in Michaelmas Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Michaelmas Term.

**Formative coursework:** Students will be asked to submit one essay, which may be written in exam conditions. Students will also be expected to take part in individual and group presentations during the course.

**Indicative reading:** For introductory purposes, students are referred to Cranston et al, *Principles of Banking Law* (OUP, 3rd ed, 2017). Full reading lists will be distributed during the course. Please note that students will be expected to locate and prepare

primary legal sources including English cases and legislation for this course.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

## MA400 September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management)

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christoph Czichowsky

**Availability:** This course is compulsory on the MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students who wish to select this course as an outside option must have a quantitative background.

**Course content:** The purpose of this course is to review some key concepts of probability used in finance. The course develops the common mathematical background that is assumed by the MSc Financial Mathematics and addresses some aspects of the mathematical theory that is central to the foundations of the programme: probability spaces, random variables, distributions, expectations and moment generating functions are reviewed; the concepts of conditional probability and conditional expectation as random variables are introduced using intuitive arguments and simple examples; stochastic processes, martingales, the standard Brownian motion are introduced; Itô integrals, Itô's formula and Girsanov's theorem are discussed on a formal basis.

**Teaching:** This course is delivered through a combination of classes and lectures over two weeks in September, prior to the start of the academic year. The material covered in the lectures will be totalling to an amount of roughly 30 hours of lecturing and 8 hours of seminars. The teaching will generally be in person, but some of the material may be delivered via online videos or video link. There will be an informal examination at the end of the course. Its purpose is to provide student feedback and it does not count towards the degree.

**Formative coursework:** Exercises are assigned and form the basis of class discussion.

**Indicative reading:** Lecture notes will be provided.

S. Shreve, *Stochastic Calculus for Finance II Continuous-Time Models*, Springer.

D. Williams, *Probability with Martingales*, Cambridge University Press.

**Assessment:** This course does not form part of the degree award.

## MA402 Half Unit Mathematical Game Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Galit Ashkenazi-Golan COL 3.08

**Availability:** This course is available on the CEMS Exchange, MBA Exchange, MSc in Applicable Mathematics, MSc in Financial Mathematics and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

It is not available to students who have taken Game Theory (MA330) or Game Theory I (MA301).

**Pre-requisites:** Familiarity with a rigorous treatment of mathematics (through definitions, theorems and proofs) is expected. Students must know basics of linear algebra (matrix multiplication, geometric interpretation of vectors), analysis (continuity, closed sets), and probability theory (expected value, conditional probability, independence of random events).

**Course content:** Concepts and methods of mathematical game theory. Nim and combinatorial games. Congestion games. Games in strategic form, dominated strategies, Nash equilibrium. Cournot quantity competition. Game trees with perfect information, backward induction. Commitment. Expected utility. Mixed equilibrium. Zero-sum games, maxmin strategies. Extensive games with information sets, behaviour strategies, perfect recall. Bargaining. Geometry of equilibria.

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term.

**Formative coursework:** Weekly exercises are set and marked.

**Indicative reading:** Required text: B von Stengel, Game Theory Basics. Cambridge University Press, 2022.

**Assessment:** Exam (90%, duration: 2 hours) in the January exam period.

Continuous assessment (10%).

## MA407 Half Unit

### Algorithms and Computation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Tugkan Batu

**Availability:** This course is available on the MSc in Applicable Mathematics, MSc in Data Science, MSc in Operations Research & Analytics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. The course is compulsory for students on the MSc Applicable Mathematics who are not taking MA421 Advanced Algorithms; it is optional for students on the MSc Applicable Mathematics who take MA421 Advanced Algorithms.

**Pre-requisites:** Good general knowledge of mathematics, including familiarity with abstract concepts. A willingness to cope with technical details of computer usage, and with a rapid introduction to programming.

**Course content:** Introduction to programming in Java. Introduction to the theory of algorithms: running time and correctness of an algorithm. Recursion. Data structures: arrays, linked lists, stacks, queues, binary search trees. Sorting algorithms. Greedy algorithms. Dynamic programming. Inheritance and Generics in Java.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Michaelmas Term. There are also optional computer help sessions for this course. Before the start of Michaelmas Term, there will be 6 hours of pre-session programming tutorials.

**Formative coursework:** Weekly exercises are set and marked. Many of these will require implementation of programming exercises in Java.

**Indicative reading:** R Sedgewick, K Wayne, Introduction to programming in Java. T H Cormen, C E Leiserson, R L Rivest and C Stein, Introduction to Algorithms.

**Assessment:** Exam (65%, duration: 2 hours and 30 minutes) in the summer exam period.

Coursework (25%) in the MT.

Continuous assessment (10%).

## MA408 Half Unit

### Contemporary Discrete Mathematics

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Julia Boettcher

**Availability:** This course is available on the MSc in Applicable

Mathematics and MSc in Operations Research & Analytics.

This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students should have experience with proofs and proof techniques used in pure mathematics.

**Course content:** This course will cover the basics of graph theory and discrete probability, with an emphasis on how these subjects are used in modern technology.

In the first half of the course, we will introduce the necessary background including discrete random variables and expectations; moments and deviations; Chernoff bounds and concentration inequalities; Markov chains. In the second half we will cover practical applications. The emphasis will be on a rigorous analysis of the mathematics in a model situation, but we will explain briefly the connection to the real world usage. Possible topics include: randomised routing; discrete Fourier transform; Monte Carlo sampling; compressive sensing; infection models on networks.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 1 hour of lectures in the ST.

**Formative coursework:** Students will be expected to produce 10 exercises in the MT.

Weekly exercises are set and solved in the seminar. Feedback will be provided on selected exercises.

**Indicative reading:** Diestel, Graph Theory, Springer. Mitzenmacher and Upfal, Probability and Computing: Randomized Algorithms and Probabilistic Analysis, Cambridge University Press. Several of these texts are available online. More information, plus additional notes, will be provided during the course.

**Assessment:** Exam (75%, duration: 2 hours) in the summer exam period.

Coursework (10%) in the MT.

Coursework (15%) in the LT.

## MA409 Half Unit

### Continuous Time Optimisation

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Adam Ostojka-Ostaszewski

**Availability:** This course is available on the MSc in Applicable Mathematics, MSc in Operations Research & Analytics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students will need adequate background in linear algebra (facility with diagonalization of matrices for the purposes of solving simultaneous first-order differential equations is key here; knowledge of the relation between the range of a matrix transformation and the kernel of its transpose would be helpful), and in advanced calculus (manipulation of Riemann integrals such as 'differentiation under the integral' and the associated Leibniz Rule). Students unsure whether their background is appropriate should seek advice from the lecturer before starting the course. Background revision will be provided in the first two weeks of term.

**Course content:** This is a course in optimisation theory using the methods of the Calculus of Variations. No specific knowledge of functional analysis will be assumed and the emphasis will be on examples. It introduces key methods of continuous time optimisation in a deterministic context, and later under uncertainty. Calculus of variations and the Euler-Lagrange Equations. Sufficiency conditions. Pontryagin Maximum Principle. Extremal controls. Transversality conditions. Linear time-invariant state equations. Bang-bang control and switching functions. Dynamic programming. Control under uncertainty. Itô's Lemma. Hamilton-Jacobi-Bellman equation. If time allows: Applications to Economics and Finance: Economic Growth models, Consumption and investment, Optimal Abandonment, Black-Scholes model, Singular control, Verification lemma.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 32 hours across Lent Term and additionally up to 4 hours of revision near the end of Lent Term.

Background review of (i) elementary methods for solving differential equations, and (ii) pertinent linear algebra (diagonalization) will be included in the seminars of Weeks 1 and 2.

This course may have a reading week in LT by arrangement, **Indicative reading:** A full set of lecture notes will be provided.

Reference will be made to the following essential books: D Burghes & A Graham, Control and Optimal Control Theories with Applications, Horwood; E R Pinch, Optimal Control and the Calculus of Variations, Oxford Science Publications; A. Sasane, Optimization in Function Spaces, Dover; J L Troutman, Variational Calculus and Optimal Control, Springer; and occasionally to: D G Luenberger, Optimization by Vector Space Methods, Wiley. Further Reading and Advanced Literature: G Leitmann, Calculus of Variations and Optimal Control, Plenum; A K Dixit & R S Pindyck, Investment under Uncertainty, Princeton University Press; D Duffie, Security Markets, Academic Press; D J Bell & D H Jacobsen, Singular Optimal Control, Academic Press; W H Fleming & R W Rishel, Deterministic and Stochastic Optimal Control, Springer; W H Fleming; H M Soner Controlled Markov Processes & Viscosity Solutions, Springer; G Hadley; M C Kemp, Variational Methods in Economics, North Holland;

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

## MA410 Half Unit

### Information, Communication and Cryptography

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Robert Simon

**Availability:** This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students should be taking the course MA407 Algorithms and Computation or have taken an equivalent course to provide a basic knowledge of algorithms, and should have experience with proofs and proof techniques used in pure mathematics.

**Course content:** This course provides an introduction, for students with a mathematical background, to the applications of mathematics in information theory, coding theory, cryptography, and related areas. The course will cover mathematical aspects of the following topics: Noiseless coding, the Kraft-McMillan criterion, optimal coding, entropy, Shannon's first theorem; Noisy channels, capacity, system entropy; Error-correcting codes, decoding rules, bounds, construction and properties of linear and cyclic codes; Structure of natural languages, redundancy, the frequency table, making and breaking cryptosystems, historic examples; Public-key cryptography, complexity issues, the RSA system, authentication schemes, the ElGamal system. Subject to available time we may also cover elliptic curve cryptography and/or cryptocurrencies.

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term.

**Formative coursework:** Weekly exercises are set and discussed in seminars.

Students will be expected to produce 5 exercises in the LT which will be marked.

**Indicative reading:** N L Biggs, Codes, An Introduction to Information, Communication and Cryptography; G A Jones & J M Jones, Information and Coding Theory; C M Goldie & R G E Pinch, Communication Theory; D J A Welsh, Codes and Cryptography; D T Stinson, Cryptography Theory and Practice.

**Assessment:** Exam (75%, duration: 2 hours) in the summer exam period.

Coursework (25%) in the LT.

## MA411 Half Unit

### Probability and Measure

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Pavel Gapeev

**Availability:** This course is available on the MSc in Applicable Mathematics, MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Some background in real analysis is essential.

**Course content:** The purposes of this course are (a) to explain the formal basis of abstract probability theory, and the justification for basic results in the theory, and (b) to explore those aspects of the theory most used in advanced analytical models in economics and finance. The approach taken will be formal. Probability spaces and probability measures. Random variables. Expectation and integration. Convergence of random variables. Conditional expectation. The Radon-Nikodym Theorem. Bayes' formula. Martingales. Stochastic processes. Brownian motion. The Itô integral.

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term.

**Formative coursework:** Written answers to set problems will be expected on a weekly basis.

**Indicative reading:** Full lecture notes will be provided. The following may prove useful: J S Rosenthal, A First Look at Rigorous Probability Theory; G R Grimmett & D R Stirzaker, Probability and Random Processes; D Williams, Probability with Martingales; M Caplinski & E Kopp, Measure, Integral and Probability; J Jacod & P Protter, Probability Essentials.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

## MA412 Half Unit Not available in 2022/23

### Functional Analysis and its Applications

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Robert Simon

**Availability:** This course is available on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students should have taken a course in finite dimensional linear algebra which includes diagonalisation and inner products. General knowledge of real analysis and calculus would be helpful.

**Course content:** This course aims at familiarizing the student with the basic concepts, principles and methods of functional analysis and its applications. The topics covered are: normed and Banach spaces, continuous linear transformations, inner product and Hilbert spaces, compact operators, Hahn-Banach and Baire Category Theorems, applications to differential equations, numerical analysis, and approximation theory with illustrative examples.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 2 hours of lectures in the ST.

**Indicative reading:** Jean-Pierre Aubin, Applied Functional Analysis, Wiley, 2000; A.V. Balakrishnan, Applied Functional Analysis, Springer, 1981; Erwin Kreyszig, Introductory Functional Analysis with Applications, John Wiley, 1989; David Luenberger, Optimization by Vector Space Methods, Wiley-Interscience, 1997; Walter Rudin, Functional Analysis, McGraw-Hill 1991; Nicholas Young, An Introduction to Hilbert Space, Cambridge University Press, 1988.

**Assessment:** Exam (90%, duration: 2 hours) in the summer exam period.

Coursework (10%) in the LT.

## MA413 Half Unit Not available in 2022/23 Games of Incomplete Information

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Robert Simon COL 4.07

**Availability:** This course is available on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students should be familiar with the related mathematics of topology and functional analysis. Some degree of mathematical maturity is expected.

**Course content:** The techniques and results of game theory are increasingly important to economic analysis. This course focuses on the problems of information incompleteness and information asymmetry. This is a relatively new but rapidly expanding area of game theory with connections to several areas of economic theory, for example conflict resolution, auctions, principal-agent problems, and the logic of knowledge. The course is divided into three parts, I Basic Results, II Repeated Games, III Bayesian Games. For the first part we cover the Min-max Theorem and Nash's Theorem of Equilibrium Existence, Extensive Form and Discounted Games. For the second part we cover Zero-sum Games with Vector Payoffs, Repeated Game of Incomplete Information on One Side, and myopic equilibria. For the third part we cover Common Knowledge, Zero-Sum Bayesian Games, Locally Finite Games, and Non-Zero-Sum Bayesian Games in the theoretical context of ergodic theory.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

**Formative coursework:** Weekly exercises are set and marked.

**Indicative reading:** A full set of lecture notes will be provided.

Useful accompanying texts are Robert J. Aumann and Michael B. Maschler, Repeated Games with Incomplete Information, MIT Press, 1995; L. Breiman, Probability; K. Border, Fixed Point Theorems with Applications to Economics and Game Theory; R. Myerson, Game Theory, Analysis of Conflict, Harvard University Press; D. Fudenberg & J. Tirole, Game Theory, MIT Press.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## MA414 Half Unit Not available in 2022/23 Stochastic Analysis

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Arne Lokka

**Availability:** This course is available on the MSc in Applicable Mathematics and MSc in Financial Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** ST409 or MA411.

**Course content:** This course is concerned with a rigorous introduction to the area of stochastic analysis with emphasis on Itô calculus. The course begins necessary preliminaries, followed by a construction of the standard Brownian motion and a study of its properties. Subsequently, Lévy's characterisation of Brownian motion, martingale representation theorems and Girsanov's theorem are established. The course then expands on a study of stochastic differential equations.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.

**Indicative reading:** Full lecture notes will be provided. The following may prove useful: I Karatzas and S E Shreve, Brownian Motion and Stochastic Calculus, Springer; B Øksendal, Stochastic Differential Equations: An Introduction with Applications, Springer; D Revuz and M Yor, Continuous Martingales and Brownian Motion, Springer; L C G Rogers and D Williams, Diffusions, Markov Processes, and Martingales, Cambridge.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## MA415 Half Unit The Mathematics of the Black and Scholes Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Arne Lokka

**Availability:** This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have completed September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (MA400).

**Course content:** This course develops the mathematical theory of risk-neutral valuation. In the context of the binomial tree model for a risky asset, the course introduces the concepts of replication and martingale probability measures. The mathematics of the Black & Scholes methodology follow. In particular, the expression of European contingent claims as expectations with respect to the risk-neutral probability measure of the corresponding discounted payoffs, pricing formulae for European put and call options, and the Black & Scholes PDE are derived. The course expands on PDE techniques for the pricing and hedging of several options. Implied volatilities as well as stochastic volatility models are then considered. The course also introduces the Black & Scholes model for foreign exchange markets and various foreign exchange options.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT.

**Formative coursework:** Weekly homework

**Indicative reading:** N H Bingham and R Kiesel, Risk-Neutral Valuation, Springer; T Björk, Arbitrage Theory in Continuous Time, Oxford; P J Hunt and J Kennedy, Financial Derivatives in Theory and Practice, Wiley; D Lamberton and J Kennedy, Introduction to Stochastic Calculus Applied to Finance, Chapman & Hall; D. Lamberton and B. Lapeyre, Introduction to Stochastic Calculus Applied to Finance, Chapman & Hall/Crc Financial Mathematics Series, 2nd edition, 2007; S E Shreve, Stochastic Calculus for Finance: Continuous-time Models: vol. 2, Springer

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## MA416 Half Unit The Foundations of Interest Rate and Credit Risk Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Mihail Zervos

**Availability:** This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have completed Stochastic Processes (ST409).

**Course content:** This course studies the mathematical foundations of interest rate and credit risk theory. The course starts with a development of the multi-dimensional Black & Scholes theory with stochastic market data. This is then used to show how discount bond dynamics modelling can be approached by (a) the modelling of the short-rate process and the market price of risk, which underlies the family of short-rate models, or (b) the modelling of the market price of risk and the discount bond volatility structure, which gives rise to the Heath-Jarrow-Morton (HJM) framework. The course then expands on the theory of

interest rate market models and credit risk.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Lent Term.

**Indicative reading:** T R Bielecki and M Rutkowski, *Credit Risk Modeling, Valuation and Hedging*, Springer; M Musiela and M Rutkowski, *Martingale Methods in Financial Engineering*, Springer; R Rebonato, *Modern Pricing of Interest-rate Derivatives: The LIBOR Market Model and Beyond*, Princeton.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## MA417 Half Unit Computational Methods in Finance

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Luitgard Veraart

**Availability:** This course is compulsory on the MSc in Financial Mathematics. This course is not available as an outside option.

**Pre-requisites:** Students must have completed September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (MA400).

**Course content:** The purpose of this course is to (a) develop the students' computational skills, and (b) introduce a range of numerical techniques of importance to financial engineering. The course starts with random number generation, the fundamentals of Monte Carlo simulation and a number of related issues. Numerical solutions to stochastic differential equations and their implementation are considered. The course then addresses finite-difference schemes for the solution of partial differential equations arising in finance.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Lent Term.

**Formative coursework:** Weekly exercises and practicals are set and form the basis of the seminars.

**Indicative reading:** P.Glasserman, *Monte Carlo Methods in Financial Engineering*, Springer; R.U. Seydel, *Tools for Computational Finance*, Springer; P.E.Kloeden and E.Platen, *Numerical Solution of Stochastic Differential Equations*, Springer;

**Assessment:** Project (100%) in the ST.

## MA420 Half Unit Not available in 2022/23 Quantifying Risk and Modelling Alternative Markets

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christoph Czichowsky and Dr Pavel Gapeev

**Availability:** This course is available on the MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Pre-requisite: Students must have completed Stochastic Processes (ST409).

**Course content:** This course studies various issues arising in the context of investment risk specification as well as with the mathematical theory of so-called alternative markets, such as commodity and energy markets. In particular, the course considers the structural credit risk models and the quantification of risk by means of copulas and risk measures. Also, the course expands on the modeling of alternative markets and addresses the problem of valuation of investments in real assets.

**Teaching:** This course is delivered through a combination of

classes and lectures totalling a minimum of 30 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

**Formative coursework:** Two sets of written homework will be marked with feedback provided.

**Indicative reading:** F.Benth, J.Benth, S.Koekebakker, *Stochastic Modelling of Energy and Related Markets*, World Scientific 2008. H.Föllmer and A.Schied, *Stochastic Finance*, 3rd edition, De Gruyter, 2011.

A.McNeil, R.Frey and P.Embrechts, *Quantitative Risk Management*, Princeton University Press, 2005.

A.K.Dixit and R.S.Pindyck, *Investment under Uncertainty*, Princeton University Press, 1994.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## MA421 Half Unit Advanced Algorithms

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Konrad Swanepoel

**Availability:** This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites: Students must have completed Algorithms and Computation (MA407) or have taken an equivalent course to provide a basic knowledge in analysis of algorithms: running time and correctness of an algorithm, and basic knowledge of computer programming (preferably in Java). Students should be comfortable with proofs and proof techniques used in pure mathematics.**

**Course content:** Introduction to NP-Completeness, followed by Approximation Algorithms, Randomised Algorithms, and a selection of topics from Average-Case Analysis, Streaming Algorithms, Exponential-Time Algorithms, and Numerical Algorithms.

**Teaching:** 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

In-person lectures and seminars might be replaced by online ones depending on the future COVID-19 situation.

**Formative coursework:** Weekly exercises are set and marked. Some of these will include programming exercises in Java.

**Indicative reading:** T. H. Cormen, C. E. Leiserson, R. L. Rivest and C. Stein, *Introduction to Algorithms*, 3rd or 4th ed., MIT; M.R. Garey and D.S. Johnson, *Computers and Intractability: A Guide to the Theory of NP-completeness*, W.H. Freeman, 1979; D. Williamson, D. B. Shmoys, *The Design of Approximation Algorithms*, Cambridge University Press, 2011; V. Vazirani, *Approximation Algorithms*, 2nd ed., Springer, 2002; Michael Mitzenmacher and Eli Upfal, *Probability and Computing*, 1st or 2nd ed., Cambridge University Press.

**Assessment:** Exam (65%, duration: 2 hours and 30 minutes) in the summer exam period.

Coursework (25%) in the period between LT and ST.

Continuous assessment (10%) in the LT.

## MA422 Research Topics in Financial Mathematics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christoph Czichowsky

**Availability:** This course is available on the MPhil/PhD in Mathematics, MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes

where regulations permit.

PhD students in the departments of Mathematics and Statistics along with other members of the research community are welcome to attend.

**Course content:** The seminar ranges over many areas of financial mathematics, stochastic analysis and stochastic control theory.

**Teaching:** 6 hours of seminars in the MT. 6 hours of seminars in the LT.

6 x 1 hour talks by researchers in the MT and LT.

Additional seminars will be scheduled throughout the year. Please see the Timetables website for further information.

**Formative coursework:** This course is not assessed.

**Assessment:** This is a non-assessed course.

## MA423 Half Unit Fundamentals of Operations Research

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ahmad Abdi

**Availability:** This course is compulsory on the MSc in Operations Research & Analytics. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange) and MBA Exchange. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must know basics of Linear Algebra (matrix multiplication, geometric interpretation of vectors), Probability Theory (expected value, conditional probability, independence of random events) and Calculus (derivatives, limits).

**Course content:** An introduction to a range of Operations Research techniques, covering: foundations of linear programming, including the simplex method and duality; integer programming; markov chains; queueing theory; dynamic programming; deterministic and stochastic inventory models; game theory.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 35 hours across Michaelmas Term.

**Formative coursework:** Weekly exercises are set and marked in MT.

**Indicative reading:** The course has its own textbook which will be provided at the start of the term. The course will be taught from the textbook and also slides.

In addition to the textbook, students may also wish to consult:

- F S Hillier & G J Lieberman, Introduction to Operations Research, 9th edition (2009) (7th edition of Hillier & Lieberman (2000) is also acceptable).
- Wayne Winston, Operational Research; Applications and Algorithms, Fourth/International Student Edition.

**Assessment:** Exam (90%, duration: 3 hours) in the summer exam period.

Coursework (10%).

Weekly exercises are set and marked in MT, and count as coursework.

## MA424 Half Unit Modelling in Operations Research

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Katerina Papadaki and Prof Giacomo Zambelli

**Availability:** This course is compulsory on the MSc in Operations Research & Analytics. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange) and MSc in Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must know basics of linear algebra (matrix multiplication, geometric interpretation of vectors), linear programming, and probability theory (expected value, conditional probability, independence of random events). For students in the MSc in Operations Research & Analytics, MA423 and ST447 more than cover the prerequisites.

**Course content:** The course will be in 2 parts, covering the two most prominent tools in operational research: mathematical optimisation, the application of sophisticated mathematical methods to make optimal decisions, and simulation, the playing-out of real-life scenarios in a (computer-based) modelling environment.

**Optimisation:** This part enables students to formulate, model and solve real-life management problems as Mathematical Optimisation problems. In providing an overview of the most relevant techniques of the field, it teaches a range of approaches to building Mathematical Optimisation models and shows how to solve them and analyse their solutions. Topics include: formulation of management problems using linear and network models; solution of such problems with a special-purpose programming language; interpretation of the solutions; and formulation and solution of nonlinear models including some or all of binary, integer, convex and stochastic programming models.

**Simulation:** This part develops simulation modelling skills, understanding of the theoretical basis which underpins the simulation methodology, and an appreciation of practical issues in managing a simulation modelling project. Topics include: generating discrete and continuous random variables; Monte Carlo simulation; discrete event simulation; variance reduction techniques; Markov Chain Monte Carlo methods. The course will teach students how to use a simulation modelling software package.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Michaelmas Term.

Further, there is a minimum of 6 hours of computer workshop sessions delivered in Michaelmas Term. Computer workshops are not mandatory.

**Formative coursework:** Students will be expected to produce 2 projects in the MT.

Two mock projects will be given to students that resemble the summative projects. Students are asked to submit only selected parts of the mock projects for feedback.

**Indicative reading:** The reading will be a combination of lecture slides and chapters from the following list of books.

Optimisation

- W L Winston, Operations Research: Applications and Algorithms, Brooks/Cole (4th ed., 1998)
- D Bertsimas and J N Tsitsiklis, Introduction to Linear Optimization, Athena Scientific (3rd ed., 1997)
- George B. Dantzig and Mukund N. Thapa, Linear Programming 2: Theory and extensions, Springer (2003)

Simulation

- S Ross, Simulation, Academic Press (5th ed., 2012)
- Joseph K. Blitzstein, Jessica Hwang, Introduction to Probability, Chapman and Hall/CRC Press (2014)

**Assessment:** Project (50%) and project (50%) in the LT.

There will be one project on Mathematical Optimisation and another on Simulation. The deliverable is a report along with a soft copy of any computer code and solver output.

## MA425 Project in Operations Research & Analytics

**This information is for the 2022/23 session.**

**Teacher responsible:** TBC

**Availability:** This course is available on the MSc in Operations Research & Analytics. This course is not available as an outside option.

Cannot be taken with MA426 Dissertation in Operations Research

& Analytics.

**Course content:** The student will carry out and report upon a substantial practical piece of work in Operational Research and Analytics. The project is typically a consulting-like placement with an industry, government, or non-profit partner. The project is normally provided by the course team, but may be suggested by the student, subject to approval by the MA425 convenor.

**Teaching:** Teaching for this course is delivered through a combination of lectures and seminars totalling a minimum of 16.5 hours across Michaelmas Term and Lent Term.

**Formative coursework:** Each student will be assigned an LSE project supervisor who will monitor their progress on a continuing basis and give tutorial advice as required.

**Indicative reading:** Detailed suggestions for reading will be provided in the course of supervision.

**Assessment:** Project (100%).

Assessment is based on the project report, additionally taking note of client feedback.

The student is expected to work on this full time from early June to end of August. The report is due on or about 31st August.

## MA426

### Dissertation in Operations Research & Analytics

**This information is for the 2022/23 session.**

**Teacher responsible:** TBC

**Availability:** This course is available on the MSc in Operations Research & Analytics. This course is not available as an outside option.

Cannot be taken with MA425 Project in Operations Research & Analytics.

**Course content:** The aim of the dissertation is for students to pursue an independent piece of research within the field of Operations Research and Analytics. The dissertation may be theoretical or empirical. Students must obtain the approval of an advisor before embarking on any research.

**Teaching:** There will be a minimum of 12 hours of lectures and seminars delivered across Michaelmas and Lent terms. Most of the teaching will be shared with MA498. The ratio of lecture time and seminar time varies each week. Seminars do not include personal supervision time, which is scheduled independently with the supervisors.

An initial seminar will include presentations by members of the Operations Research Group in the Department of Mathematics on proposed topics for dissertations that they would be interested in supervising. Additional seminars will cover important aspects of writing a dissertation in mathematics, including: what plagiarism is and how to avoid it, the use of libraries for research, electronic research, general aspects of writing mathematics, and preparing a manuscript using mathematical text processing software (in particular, LaTeX). Each student will be assigned a supervisor who will monitor their progress and provide appropriate guidance through the LT, ST, and over the summer.

**Formative coursework:** Students are required to submit Dissertation Plans to their supervisor in LT and ST.

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

Assessment is based entirely on the dissertation itself, due on or about 31st August.

## MA427 Half Unit

### Mathematical Optimisation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Giacomo Zambelli

**Availability:** This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global

MSc in Management (MBA Exchange), MSc in Applicable Mathematics, MSc in Operations Research & Analytics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have sufficient knowledge of linear algebra (linear independence, determinants, matrix inversion and manipulation) and of basic multivariate calculus (derivatives and gradients).

**Course content:** Introduction to the theory and solution methods of linear and nonlinear programming problems, including: linear programming duality, Lagrangian duality, convex programming and Karush-Kuhn-Tucker conditions, algorithms for linear and convex optimisation problems, theory of good formulations for integer linear programming models, integer linear programming methods (branch and bound and cutting planes).

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term.

**Formative coursework:** Weekly exercises will be given that will be solved and discussed during the seminars. Three of those exercises will be handed in as formative coursework and the students will be given feedback on their submissions.

**Indicative reading:** Extensive lecture notes covering all parts of the course will be provided. Students interested in further readings can look at the books below.

- D Bertsimas and J N Tsitsiklis, Introduction to Linear Optimization (1997)
- S Boyd and L Vandenberghe, Convex Optimization (2004)
- M Conforti, G Cornuejols, G Zambelli, Integer Programming (2014)

**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.

## MA428 Half Unit

### Combinatorial Optimisation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Katerina Papadaki

**Availability:** This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is not available as an outside option.

**Pre-requisites:** Some familiarity with graph theory and some knowledge of linear programming is desirable. For students that have no linear programming background, it is recommended that they read the material of the first four lectures of course MA423, which can be found on the Moodle page of MA423.

**Course content:** The course is intended as an introduction to discrete and combinatorial techniques for solving optimisation problems, mainly involving graphs and networks. Topics covered include: minimum spanning trees; shortest path algorithms; maximum flow algorithms; minimum cost flow problems; matching and assignment problems; and other topics that may vary from year to year.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Lent Term.

**Formative coursework:** Students will be expected to produce 3 problem sets in the LT.

Students will be given weekly exercises. Oral feedback will be provided in the seminars, where the weekly homework will be discussed. Three of these weekly exercises will be handed in as formative coursework and the students will be given written feedback on their submissions.

**Indicative reading:** Lecture notes will be supplied for all topics. Most of the lectures will be based on topics from: R K Ahuja, T L Maganti and J B Orlin, Network Flows (2013).

William J. Cook, William H. Cunningham, William R. Pulleyblank, Alexander Schrijver, Combinatorial Optimization (1997).

**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.

## MA429 Half Unit Algorithmic Techniques for Data Mining

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Neil Olver

**Availability:** This course is available on the MSc in Applicable Mathematics, MSc in Marketing and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Priority is given to MSc students in the Department of Mathematics

**Pre-requisites:** Students are not permitted to take this course alongside ST443, Machine Learning and Data Mining.

Students must have knowledge of Statistics and the programming language R to the level of ST447, Data Analysis and Statistical Methods.

**Course content:** Data Mining is an interdisciplinary field developed over the last three decades. Vast quantities of data are available today in all areas of business, science, and technology as well as social networks. The goal of data mining is to extract useful information from massive-scale data. The aim of the course is to equip students with a theoretically founded and practically applicable knowledge of data mining. The theoretical foundations of the field come from mathematics, statistics, computer science and artificial intelligence.

The course introduces fundamental machine learning methods for basic data analytics problems. For classification and regression problems, these methods include naive Bayes, K-nearest neighbours, tree and forest construction, support vector machines, and neural networks. The course will also cover unsupervised learning methods such as clustering. The ethics of data mining is discussed, from data collection through applications.

The methods are illustrated on practical problems arising from various fields. The course uses data mining packages in R.

**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Lent Term.

**Formative coursework:** There will be a formative group project, in preparation for a similar summative project.

**Indicative reading:**

- James, Witten, Hastie, Tibshirani, An Introduction to Statistical Learning: with Applications in R (2016)
- Hastie, Tibshirani, Friedman, The Elements of Statistical Learning: Data Mining, Inference and Prediction, 2nd ed. (2009)
- Witten, Frank, Hall, Data Mining: Practical Machine Learning Tools and Techniques, 3rd or 4th ed. (2016)
- Torgo, Data Mining with R: Learning with Case Studies (2010)

**Assessment:** Exam (60%, duration: 2 hours) in the summer exam period.

Project (40%) in the ST.

The examination is critical to assessment. In order to pass this course, students need to achieve a mark of at least 50% in the examination. A fail mark in the exam will result in an overall fail mark for the course: it cannot be compensated by the marks in the other elements.

## MA431 Half Unit Not available in 2022/23 Advanced Topics in Operations Research and Applicable Mathematics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Ahmad Abdi and Dr Neil Olver

**Availability:** This course is available on the CEMS Exchange, MBA Exchange, MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Basic knowledge of graph theory and linear algebra. In particular, students should be familiar with graph theoretic notions such as spanning trees, cycles, cuts, stable sets, etc. and linear algebraic notions such as eigenvectors, eigenvalues, projections, the characteristic polynomial, etc.

**Course content:** An examination of advanced topics in Operations Research. The topics selected differ year to year; the topic for 2021/22 will be "Spectral Graph Theory".

Spectral Graph Theory is concerned with how combinatorial properties of graphs relate to the algebraic structure of certain matrices associated with the graph. One can look at the adjacency matrix of an undirected graph, which is a symmetric matrix, and consider the list of its eigenvalues, called the spectrum, along with the corresponding eigenvectors. The spectrum gives us important insight about the graph and its induced subgraphs, and perhaps surprisingly, this viewpoint can be used in the design of graph algorithms, such as network flow problems, plane drawings of planar graphs, isomorphism testing, etc.

Some highlights of the course include:

- Eigenvalue interlacing, and applications to graph theory
- Connections to electrical networks, random spanning trees, and random walks
- Spring layout drawings of graphs using spectral methods
- Clustering: how to find good ways of partitioning a graph into pieces via the spectrum
- Expander graphs: sparse graphs with exceptional connectivity properties

**Teaching:** 2 hours of help sessions in the ST.

This course is delivered through a combination of seminars and lectures totalling a minimum of 35 hours across Lent Term. This year, the lectures will be live, online and recorded. Depending on circumstances, seminars might be live and online, too.

**Formative coursework:** There will be 5 biweekly homework assignments, each of which will be marked and the student will receive feedback.

**Indicative reading:** Algebraic Graph Theory (Springer 2001), by Godsil and Royle.

Spectral and Algebraic Graph Theory (online), by Spielman.

**Assessment:** Assessment path 1

Exam (100%, duration: 3 hours) in the summer exam period.

Assessment path 2

Project (100%) in the ST.

Exam (100%, duration 3 hours)

PhD students are expected to complete a research-based project (worth 100%) in the ST as a replacement for the final exam.

## MA433 Half Unit Mathematics of Networks

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Andrew Lewis-Pye

**Availability:** This course is available on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Mathematical maturity and an ability to write mathematical proofs. Linear algebra (diagonalisation, eigenvalues and eigenvectors), some graph theory and some basic game theory would be useful, but necessary knowledge from these areas will be revised during the course.

**Course content:** Globalisation and the growth of the internet have meant not only an increasing need to understand the way in which social and communication networks form and operate, but also an unprecedented amount of data available to aid in this

analysis. The last decade has seen a coming together of multiple scientific disciplines in an effort to understand how these highly connected systems function. The aim of this course will be to give an introduction to the study of networks, requiring as little background knowledge as possible. The course will begin with an analysis of some of the fundamental properties normally observed in real world networks, such as the small world property, high degrees of clustering and power law degree distributions. After reviewing required notions from game theory, we shall then apply these techniques to an analysis of the spread of behavioural change on networks, together with cascading effects and epidemic models. The final part of the course will be concerned with specific applications to the world wide web and page ranking.

**Teaching:** This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term.

**Formative coursework:** Written answers to set problems will be expected on a weekly basis.

**Indicative reading:** (1) D. Easley, J. Kleinberg. Networks, crowds and markets, Cambridge University Press, 2010. .

(2) M. Newman. Networks: An Introduction, Oxford University Press, 2010.

(3) The Rise of the Network Society, The Information Age: Economy, Society and Culture, 2010 edition, Manuel Castells.

**Assessment:** Exam (80%, duration: 2 hours) in the summer exam period.

Presentation (20%).

20% of the final grade will be determined by groupwork, in which groups of around four or five students are each allocated a research paper by the lecturer. The students then have to meet (virtually or in person) in order to discuss and understand the paper, before giving a group presentation on the subject matter at the beginning of Lent Term.

---

## MA434 Half Unit

### Algorithmic Game Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Galit Ashkenazi-Golan

**Availability:** This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have completed Algorithms and Computation (MA407) or have taken an equivalent course that provides basic knowledge in the analysis of algorithms. No prior knowledge about Game Theory is required.

**Course content:** The last 15-20 years have witnessed a lively interaction between computer science and economics. Many problems central to computer science – from resource allocation problems in large networks to online advertising – fundamentally involve the interaction of multiple self-interested parties. Game theory and mechanism design offer a host of models and definitions to reason about such problems. But the flow of ideas also travels in the opposite direction, as research in computer science has complemented the traditional economics literature in several ways. For example, computer science offers a focus on and a language to discuss computational complexity, has popularised the use of approximation guarantees in situations where exact solutions are unrealistic or unknowable, and proposes several alternatives to Bayesian- or average-case analysis that emphasise robust solutions to economic design problems. This course gives an overview over the key ideas and developments of this young research field. The focus is on the various new techniques and methods that have been developed, and the new insights that they yield.

**Topics covered:**

- Complexity of equilibria: hardness of computing pure Nash equilibria, poly-time algorithm for correlated equilibria
- Best response dynamics and no-regret learning: existence and

speed of convergence

- Tools for bounding the inefficiency of equilibria: price of anarchy, price of stability, the smoothness framework
- Algorithmic mechanism design: the VCG mechanism and its computational complexity, characterization of truthful mechanisms and techniques for obtaining truthful poly-time approximation mechanisms
- Tools for the design and analysis of simple, robust, non-truthful mechanisms
- Posted price mechanisms and prophet inequalities

**Teaching:** This course is delivered through a combination of classes and lectures totaling a minimum of 30 hours across Lent Term.

**Formative coursework:** Students will be expected to produce 10 problem sets in the LT.

Written answers to set problems will be expected on a weekly basis.

**Indicative reading:**

1 Noam Nisan, Tim Roughgarden, Eva Tardos, Vijay V. Vazirani.

Algorithmic Game Theory. Cambridge University Press. September 2007.

2 Tim Roughgarden. Twenty Lectures on Algorithmic Game Theory. Cambridge University Press. August 2016.

3 David C. Parkes and Sven Seuken. Introduction to Economics and Computation: A Design Approach. Cambridge University Press. June 2019.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

## MA435 Half Unit

### Machine Learning in Financial Mathematics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christoph Czichowsky COL 3.11 and Prof Mihail Zervos COL 4.02

**Availability:** This course is available on the MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

**Pre-requisites:** Students must have completed Stochastic Processes (ST409).

Students are expected to have done ST409; students who haven't done ST409 need to obtain permission from the lecturer by providing a statement explaining why and how they know the material covered in ST409. Students are also expected to have basic Python programming skills and good command of linear algebra and calculus.

**Course content:** This course introduces a range of computational problems in financial markets and illustrates how they can be addressed by using tools from machine learning. In particular, portfolio optimisation, optimal trade execution, pricing and hedging of financial derivatives and calibration of stochastic volatility models are included. The course considers some theoretical results on machine learning basics such as empirical risk minimisation, bias-complexity tradeoff, model selection and validation as well as more advanced topics such as deep learning, feedforward neural networks, universal approximation theorems, stochastic gradient descent, back propagation, regularisation and different neural network architectures. Practical implementation in Python and training of neural networks for the above problems in financial markets are also addressed.

**Teaching:** 20 hours of lectures, 10 hours of seminars and 5 hours of seminars in the LT.

This course is delivered through a combination of seminars and lectures totalling to 35 hours across Lent Term.

**Formative coursework:** Students will be expected to produce 1 problem sets in the Week 6.

The main formative assessment will be in the form of weekly

exercise sets, which will be discussed in the seminars. Some of the topics of these will be similar to what is expected in the summative assessment (coursework and exam). Students will be expected to submit one piece of formative coursework in the middle of term, on which they will get detailed feedback.

**Assessment:** Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the LT Week 9.

Written exam (80%) in Summer examination period and coursework (20%) in Lent term. The assessed coursework will be given to the students in Week 7 for submission in Week 9. The coursework consists of a 4 to 5 pages PDF of a Jupyter Notebook (excluding code and pictures that will be given in an appendix). A Jupyter Notebook is a browser-based document containing an ordered list of input/output cells which can contain Python code, text (using Markdown), mathematics, plots and rich media.

## MA498

### Dissertation in Mathematics

**This information is for the 2022/23 session.**

**Teacher responsible:** Andrew Lewis-Pye

**Availability:** This course is compulsory on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The Dissertation in Mathematics is an individual, substantial project as an introduction to mathematical research methods. The student will investigate and study an area of mathematical research or application of advanced mathematical techniques, and to write a report on their findings. The project may include some programming. The dissertation topic will normally be proposed by the Department.

**Teaching:** A minimum of 15 hours of lectures/seminars across the Michaelmas and Lent terms. The ratio of lecture time and seminar time varies each week. Seminars do not include personal supervision time, which is scheduled independently with student supervisors.

Several seminars will include presentations by members of the Department of Mathematics on proposed topics for dissertations that they would be interested in supervising. Additional seminars will cover important aspects of writing a dissertation in mathematics, including: what plagiarism is and how to avoid it, the use of libraries for research, electronic research, general aspects of writing mathematics, and preparing a manuscript using mathematical text processing software (in particular, LaTeX).

Each student will be assigned a supervisor who will monitor their progress and provide appropriate guidance through the LT, ST, and over the summer.

**Formative coursework:** Students will be expected to produce an initial report (in LT) and an interim report (in ST) for which feedback will be provided.

**Indicative reading:** Detailed suggestions for reading will be provided by the supervisor.

**Assessment:** Dissertation (90%) in the LT and ST.

Oral examination (10%) in the ST.

Assessment is primarily based entirely on the Dissertation, three hard copies and one electronic copy of which must be submitted by early September (exact date to be specified later). The report may include some software relating to the project. Detailed information about the required format for this submission will be provided during the Seminars.

At the end of summer term, each student will produce a presentation on the topic of their dissertation. The presentation will be graded and worth 10% of the course grade. Students will be given support in the seminars on how to prepare, how to present and what is expected.

## MC401 Half Unit

### Mediated Resistance and Activism

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Bart Cammaerts

**Availability:** This course is available on the MSc in Media and Communications and MSc in Politics and Communication.

This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course focuses on the various ways in which citizens, activists and social movements use, appropriate and shape media and communication technologies to resist, to mobilise for resistance, but also how resistance and movement discourses are represented and mediated, by activists themselves through movement and social media as well as by the mainstream media. The course will address several aspects of the intricate relationship between media and communication, resistance and activism. The course is organised around the core-concept of the 'mediation opportunity structure' referring to the opportunities for agency through media and communication, as well as the structural constraints preventing agency and stifling dissent. Both Information and Communication Technologies (ICT's) and more traditional media will be considered and a dialectical perspective on power and the relationship between agency and structure is adopted with a particular emphasis on strategies of resistance and circumvention.

At a theoretical level this course is situated at the intersection of social movement theory, political theory and media and communication theory. The different lectures will focus on various aspects of the mediation opportunity structure, including action repertoires, self-mediation practices, mainstream media representations, counter-hegemony, networked opportunities – using examples from various regions in the world. Some case-studies will be situated at a local level of analysis, others at a national, while again others might relate to regional contexts or even transnational levels of contestation.

Seminar discussion revolve around relevant readings as well as case study presentations.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advanced reading, prepare seminar presentations and submit one essay of 1500 words.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the ST.

## MC402 Half Unit

### The Audience in Media and Communications

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Sonia Livingstone

**Availability:** This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Culture and Society, MSc in Marketing, MSc in Media and Communications, MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

**Course content:** This course examines a variety of social, cultural and psychological issues as they relate to the audiences for mass and social media. It analyses people's everyday engagement with a mediated world. We will review the history of audiences and audience research from the vantage point of the present digital age, also examining key theories of audiences' and users' interpretation, engagement, fandom and creativity in a global and cross-media perspective. Students will be encouraged to read widely, to forge links with other aspects of media, communications and cultural studies in order to critically examine the positioning of audiences and users within the field, and to debate the nature and future of audiences in a changing media landscape.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

**Indicative reading:**

- Abercrombie, N. & Longhurst, B. (1998) *Audiences: A Sociological Theory of Performance and Imagination*, Sage.

- Sender, K. (2012). *The makeover: Reality television and reflexive audiences*. New York: New York University Press.

**Assessment:** Essay (100%, 3000 words) in the ST.

## MC403 Half Unit

### Contemporary Issues in Media and Communications Policy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Damian Tambini

**Availability:** This course is available on the MSc in Marketing, MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance) and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be particularly beneficial to students with some background knowledge of media policy, regulation and governance. You are advised to consult the course teacher if you have not taken MC424, or if you do not have relevant professional experience.

This course is controlled access, meaning that there is a limit to the number of students who can be accepted.

**Pre-requisites:** No formal pre-requisite, but preparation for the course could include seeking additional reading in discussion with the course convenor, or auditing MC424 course materials and lectures from Moodle.

**Course content:** This course examines live issues in internet, broadcasting, press and telecommunications policy with a focus on current debates and an innovative format including practical exercises in policy engagement and guest speakers who are active in media policy. The aim will be to develop a practical approach to current debates at the same time referring to the longer term normative and theoretical background to intervention in this sector. After the first session, discussion will focus on a current issue each week, and the reading contains items relating to that issue. There may be some changes to the order of the sessions depending on availability of guest speakers, and supplementary readings may be advised during seminars or by email. Students will be encouraged to debate current policy issues including those that regulators and the government are currently consulting on, and develop a critical understanding of policy intervention, the policy process and strategy.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advanced reading, prepare seminar presentations and submit one essay of 1,500 words.

**Indicative reading:** A reading list will be provided for each topic. General works relevant to the course include:

**Assessment:** Essay (100%, 3500 words) in the ST.

## MC404 Half Unit

### Political Communication in Democracies

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nick Anstead

**Availability:** This course is compulsory on the MSc in Politics and Communication. This course is not available as an outside option.

**Course content:** The aim of the course is to examine the relationship between the media and political processes in comparative perspective. It offers a critical review of key aspects of contemporary theory and research in political communications, examining a range of interconnected issues concerning the relationship between politics and media including: the political influence of the media; public opinion; election and referendum campaigning; political marketing and branding; political reporting; media and public knowledge; and public diplomacy.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the LT.

## MC407 Half Unit

### International Media and The Global South

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Shakuntala Banaji

**Availability:** This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Inequalities and Social Science, MSc in Media and Communications, MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is controlled access, meaning that there is a limit to the number of students who can be accepted.

**Course content:** This course offers insight into how to approach the study of media constructions, discourses and representations of, and about, the global south and its citizens. The course challenges students to raise questions about the power and role of international media – including media originating in the global south, and that circulated by NGOs – in shaping discourses about the global south and group identities. Building on empirical examples, the lectures aim to demonstrate that the reporting and representation of gender, poverty, climate change, disasters, political unrest by international media organisations has implications, not only for the way the global south and its diverse populations are imagined and defined, but also for the arena of international and national policy and politics. Using theories of ideology, critical political economy and postcoloniality, the course critically investigates key questions concerning the role of international, national, NGO and subaltern media in colonial and violent relationships of power. The objectives are to: (a) Introduce debates about how media power shapes international development discourses and political realities for citizens in the global south; (b) Provide a postcolonial and Marxist critique of the study of representations of poverty, conflict, gender, participation and the global south; (c) Critically assess aspects of the political economy of international media production within the contexts in which international and local media groups and NGOs research, package and produce information about the world (d) Investigate whether and in what ways new and mobile technologies, and small and participatory media formats enable alternative voices and critical frameworks from the global south to be engaged through respectful critique. The course is organized into three sections: 1) a historical and theoretical overview of international media and the global south locating the debate(s) around development and communication within postcolonial and other critical frameworks, 2) Critical perspectives, drawn selectively from studies of political economy, postcolonial theory and cultural studies and pertaining

to race, identity, ideology, representation, regulatory frameworks, governance and democracy and 3) Cases and practices in reporting disinformation, poverty, inequality and humanitarian issues. Cross-cutting themes will include a consideration of gender, racism, ethnic and social conflict, tourism campaigns, social media and disinformation in the context of international media and change in the global south.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT

**Formative coursework:** All students are expected to complete advance reading, contribute to Moodle forums, prepare seminar presentations, and submit one essay of 1500 words.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the ST.

## MC408 Half Unit

### Theories and Concepts in Media and Communications

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Dylan Mulvin

**Availability:** This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications

(Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MPhil/PhD in Data, Networks and Society, MPhil/PhD in Media and Communications, MSc in Culture and Society, MSc in Gender, Media and Culture and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

**Course content:** This course introduces key theoretical and conceptual issues in the study of media and communications, within an interdisciplinary, social science perspective. It grounds the analysis of media and communications in broader theories of social order and social change to better understand the historical, political, economic, and technological significance of media, justice, and a changing society.

This course is the compulsory, theoretical component for all students in the MSc programmes of the Department of Media & Communications. As such, it is oriented towards introducing students with a broad range of academic and professional backgrounds to the core questions and problems in media and communication studies. Accordingly, its topics range from the power of networks and the politics of representation and difference, to the social and economic role of platforms, algorithms, and media ownership, to the changing shape of the public sphere.

As a team-taught course that combines weekly lectures and seminars, its purpose is to expose students to a wide range of research-led debates at an advanced level, and to enable students to develop their understanding and critical appraisal of the relation between media and power.

The course also includes an invited speaker series ('Media in Action Talks') which addresses the interface between academic issues taught on the Media and Communications programmes and professional issues facing media and communications industries. Speakers will normally include a mix of journalists, activists, and executives working for UK and global media companies or in the NGO-sector in London. The purpose is to provide an opportunity for students to relate the topics and themes addressed within their academic studies to the debates and concerns currently facing practitioners.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Michaelmas Term. This course includes a reading week in Week 6 of term.

As part of this course there will also be a series of 'Media and Communications in Action' Talks; a series of interviews with practitioners in the media and communications industries, which students will be expected to participate in and submit questions.

**Formative coursework:** All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words during MT.

**Indicative reading:** A specialist reading list will be provided for each topic. General reference readings relevant to the course include:

- Atton, C. (2015) *The Routledge Companion to Alternative and Community Media*. London: Routledge.

**Assessment:** Essay (100%, 3000 words) in the LT.

## MC409 Half Unit

### Media, Technology and Everyday Life

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Leslie Haddon

**Availability:** This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

**Course content:** The course aims to explore how information and communication technologies are experienced in everyday life. This includes examining how ICTs are socially shaped, through looking at current theoretical frameworks as well as historical and contemporary examples. The course covers such matters as the domestication of ICTs, their place in social networks and their implications for time and space. Finally, a range of potential social consequences are considered, from the specific implications for parent-child relationships to broader questions about the extent to which these technologies are changing social life.

**Teaching:** This course will be delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of online lectures and in-person classes/ classes delivered online. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading. One essay of 1,500 words is recommended.

**Indicative reading:**

- boyd, d. (2014) *It's complicated. The social lives of networked teenagers*, New Haven: Yale University Press. 160
- Byam, N. (2015) *Personal communications in a digital age*, Cambridge: Polity. Chapter 2.

**Assessment:** Essay (100%, 3000 words) in the ST.

## MC411 Half Unit

### Media and Globalisation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Wendy Willems

**Availability:** This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT) and MSc in Global Media and Communications (LSE and USC). This course is not available as an outside option.

**Course content:** The aim of this course is to explore and demonstrate the role of media, communications and technology in processes of globalisation by introducing the relevant literature, by examining various theories of globalisation and by exploring some of the key debates related to media, communication and globalisation. Topics taught include nationalism, the 'dewesternisation' and 'decolonisation' of knowledge production, comparative research, media imperialism, cosmopolitanism and racism.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, participate actively in seminar discussions, carry out seminar presentations and submit one essay of 1,500 words.

**Indicative reading:** A reading list will be provided for each topic. General works relevant to the course include:

- Appadurai, A. (1996). *Modernity at Large: Cultural Dimensions of Globalisation*. Minneapolis, MN: University of Minnesota Press.
- Eriksen, T. (2014) *Globalization*. London: Bloomsbury.
- Flew, T. (2018). *Understanding Global Media*. London: Red Globe Press.
- Kraidy, M.M. (2018). *Global Media Studies: A Critical Agenda*. *Journal of Communication* 68: 337-346.
- Lee, C.-C. (2015). *Internationalizing 'International Communication'*. Ann Arbor, MI: University of Michigan Press.

**Assessment:** Essay (100%, 3000 words) in the LT.

**MC416 Half Unit****Representation in the Age of Globalisation**

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Shani Orgad

**Availability:** This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications and MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is controlled access, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

**Course content:** Images and stories circulated in the media play a central role in informing how we imagine the world, others and ourselves. We become increasingly dependent, often exclusively, on what we see, read and hear in the news, on social media, our favourite television drama series, in advertisements, and films, or on the radio. This course focuses on the way media representations are implicated in the exercise of power over how we think and feel through the construction of meaning. It explores the opportunities that media representations present for the creation of a global and interconnected space, which enables the people living in it to conduct their social, cultural, political and economic lives in positive, just and inclusive ways. At the same time, the course discusses some of the critical challenges, limits and threats those visual and textual representations present. The discussion focuses on the representation of the Other and the production of difference, the representation of gender, suffering and migration - timely issues which are ever more urgent in contemporary public life. It examines how transformations in the contemporary media landscape, such as the expansion of social media platforms, the increasing commodification and global scope of communication, shape the ways in which public issues are framed, imaged, and constructed, the consequences this may have for the moral judgements people make and the possibilities for disrupting dominant narratives and imaginaries.

**Teaching:** This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1500 words.

**Indicative reading:**

- Amin, A. (2012). *Land of Strangers*, Polity.
- Bauman, Z. (2016). *Strangers at Our Door*, Polity.
- Hall, S. (1997) *Representation: Cultural Representations and Signifying Practice*, Sage.

- Pickering, M. (2001). *Stereotyping: The Politics of Representation*, Palgrave.

**Assessment:** Essay (100%, 3000 words) in the ST.

Students will produce a short film as a team during the course, on the basis of which they submit a 3000 word individual essay.

**MC418 Half Unit****Communication: Cultures and Approaches**

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Myria Georgiou

**Availability:** This course is compulsory on the MSc in Media and Communications. This course is available on the MPhil/PhD in Data, Networks and Society, MPhil/PhD in Media and Communications, MSc in Gender, Media and Culture, MSc in Media and Communications (Media and Communications Governance) and MSc in Media and Communications (Research). This course is not available as an outside option.

In order to accommodate academic staff leave, and in order to maintain smaller group sizes, this course is controlled access, meaning there is a limit to the number of students who can be accepted.

**Course content:** This course examines key concepts and critical perspectives on the processes of communication that underpin social, economic and cultural relations across diverse spheres of modern life. It takes an interdisciplinary and theoretical perspective, comparing the claims and contribution of selected key approaches of communication in order to understand and critique the symbolic and material power of communication media. With a substantive focus on the shifts from mass to networked media and from national to globalised communication processes, the course offers a selective introduction to key approaches in communication. It examines a series of critical perspectives, drawing on current research debates in the field of media and communications and beyond. The course is team taught by active researchers in the field of media and communications and aims to enable students to develop their critical understanding of the communication processes central to the contemporary media and communications environment.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, prepare seminar presentations, and submit an essay of 1500 words.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the LT.

## MC419 Half Unit Modern Campaigning Politics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nick Anstead

**Availability:** This course is available on the MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is highly recommended for MSc Politics and Communication students.

**Course content:** The focus of this module is the intersection between practical politics and academic research. The course is taught by a series of invited guest lecturers who are experts in the field of political campaigning for political parties and NGOs. It will connect with theory taught on other courses in the department and will enable students to see how theory is relevant and applied to the practice of modern political campaigns in the context of the evolving nature of contemporary political communication. It will examine core and general concepts in campaigning including political strategy and how it is developed; the shaping and measurement of public opinion; and the role of data targeting in modern campaign.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. To increase the geographic diversity of guest teacher sessions, a limited amount of this content will be delivered online. This course includes a reading week in Week 6 of term.

**Formative coursework:** This formative coursework for this course is a reduced length version of the summative assessment (see below for further details):

- A 500 word campaign memo advocating a specific strategy for a campaign of your choice (this might be for a candidate, a political party or a campaign / protest group).
- A 1000 word academic reflection on the strategy memo, where you will justify and explain your strategic recommendations with reference to relevant academic research.

### Indicative reading:

- Negrine, R. (2006) *The Political Communication Reader*, Routledge.
- Nielsen, R. K. (2012). *Ground wars: Personalized communication in political campaigns*. Princeton University Press.
- Nimmo, D. D. (2001) *Political persuaders: the techniques of modern election campaigns*, Transaction Publishers.
- Stanyer, J. (2007) *Modern Political Communication*, Polity.
- Swanson, D. L. & Mancini, P. (1996) *Politics, Media, and Modern Democracy An International Study of Innovations in Electoral Campaigning and Their Consequences*, Greenwood.
- Ross, T. (2015). *Why the Tories Won*. London: Biteback.
- Trent, J. S. & Friedenber, R. V. (2007) *Political Campaign Communication: Principles and Practices - 6th edition*, Rowman & Littlefield.

**Assessment:** Essay (100%, 3000 words) in the LT.

This summative assessment for this course is a two-part piece of coursework.

- A 1000 word campaign memo advocating a specific strategy for a campaign of your choice (this might be for a candidate, a political party or a campaign / protest group).
- A 2000 word academic reflection on the strategy memo, where you will justify and explain your strategic recommendations with reference to relevant academic research.

NB. One additional requirement of the summative coursework is that it cannot be on the same example used in the formative coursework.

## MC420 Half Unit Identity, Transnationalism and the Media

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Myria Georgiou

**Availability:** This course is available on the MSc in Culture and Society, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is controlled access, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

**Course content:** This course examines the relation between identity and the media in the context of migration and transnationalism. As the world becomes increasingly interconnected – not least as a consequence of technological advances that enable information, people and things to move between places and across distances – questions are raised about the consequences of those changes for identity. More particularly, the course examines (i.) how those who move, but also those who don't, develop a sense of self in an interconnected, mediated world; (ii.) how digital communication connects or disconnects people within and across space and what those connections mean for collective identities, communities and nations; and (iii.) how mediated communication raises or erases boundaries between people – locally, nationally and transnationally. Engaging with a range of theories, case studies and creative activities, the course invites students to develop a globally oriented and critical understanding of identity, media and transnationalism.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, prepare seminar presentations, and submit a 1500 word case study.

### Indicative reading:

- Vertovec, S (2009) *Transnationalism*, Routledge.

**Assessment:** Essay (100%, 3000 words) in the ST.

The essay will be based on a case study of students' choice.

**MC421 Half Unit****Critical Approaches to Media, Communication and Development**

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Shakuntala Banaji

**Availability:** This course is compulsory on the MSc in Media, Communication and Development. This course is not available as an outside option.

**Course content:** The content of the course addresses the history of and tensions between 'media for development' and 'communication for development', while challenging mainstream development perspectives on aid, modernisation, and the role of ICTs and media and communication in low income countries and unequal social contexts. It achieves this aim by emphasising the conflictual relationships between economic and political power structures and the empowerment of individuals, as well as among collective groupings within their local and regional contexts. In particular, paying attention to issues of history, colonisation, race and gender, this course questions who constructs knowledge and how knowledge is constructed in modernisation approaches to Media, Communication and Development. It explores the ways in which the concepts of ideology, discourse, orientalism, reflexivity and power can enable a critical understanding of social life, participation and change in the global south. The course also offers a sharp critique of scholarly and policy oriented literature that regards the media, information, and communication strategies, and information and communication technology applications, as obvious direct means of alleviating poverty, improving health outcomes and fostering democracy and human rights in low-income countries. It offers alternative theorisations of the contested way in which developments in these areas become embedded in the cultural and social fabric, especially where injustice, poverty and unequal power relations influence the capacities of individuals to make changes in their lives and communities.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Michaelmas Term and 1 hour in Summer Term. This course includes a film screening and discussion totalling 180 minutes in Michaelmas Term. This course includes a reading week in Week 6 of term..

**Formative coursework:** All students are expected to complete advance reading, participate in case studies and discussions on moodle forums, prepare seminar presentations, organise and attend practitioner seminars and film/documentary viewings and submit one essay of 1,500 words.

**Indicative reading:**

**Assessment:** Take-home assessment (100%) in the ST.

This is a seen examination, and the questions are made available to students seven days prior to the submission.

**MC422 Half Unit****Critical Studies in Media and Journalism**

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Charlie Beckett

**Availability:** This course is available on the MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research) and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is controlled access, meaning that there is a limit to the number of students who can be accepted.

**Course content:** The news media is vital not just for the dissemination information but as a forum for debate. Journalism shapes our individual and community lives. It frames ideological disputes and is a site of contestation. But journalism and the news itself is changing because of technological, social, economic and political forces. This course led by a media professor with 20 years of experience as a journalist, takes an ethical perspective on media change. It asks what impact journalism has, what kind of journalism do we want, and how will journalism reconstruct itself according to competing national, cultural, or political contexts. On completion of this course, students should be able to: understand the role of journalism in society today; critically discuss different theoretical conceptions of journalism as practiced in a wide variety of social and political contexts; compare and contrast the role of

journalism in contexts ranging from mainstream to alternative media outlets; evaluate the normative and empirical connections between media journalism, the production of news and ethical considerations; critically assess contemporary debates about the changing nature of journalism and its implications for cultural understanding and democracy.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1500 words.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the LT.

## MC423 Half Unit Global Media Industries

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jungmo Youn

**Availability:** This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is not available as an outside option.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is controlled access, meaning that there is a limit to the number of students who can be accepted.

**Course content:** This course helps you understand the operation of global media industries at the intersection of politics, business and culture. The course presents an overview of the changing mechanisms of media production, distribution and consumption in the age of digital networks and global interconnection. We will examine how media industries work, why they work as they do, and their broader social and cultural implications. We will take a comparative perspective to compare and contrast the arrangement of media and communication industries in different countries/regions. We will also highlight the changes that digital technologies have brought to different types of media industries, including news industry, entertainment industry, and marketing and advertising. Questions to be explored include "How modes of media production have changed in different contexts and periods?" "What are the key issues facing media industries?" "What role do advertising and market research play in the life and design of media products?" "How do technological and legislative developments influence the way that the products of media industries are produced, distributed and consumed?" In order to address these questions, we will utilize key concepts such as convergence, commodification, flexible

accumulation, and creative labour. We draw upon theoretical insights offered by political economy, cultural studies, sociology and feminism to analyze cases of media industries across the globe. Students will be encouraged to reflect on the industrial dynamics of media production as well as their own engagement with cultural industries.

**Course objectives:**

This course aims to help you:

- Understand different approaches to the study of media industries.
- Examine the transformation of media industries in the context of globalization.
- Critically analyse the relationship between institutional arrangements of media industries and the content being produced and disseminated.
- Critically evaluate global regulatory attempts to establish a new communication order and the dynamics of alternative media.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1500 words.

**Indicative reading:**

- Harvey, D. (1989) *The Condition of Postmodernity*. Oxford: Blackwell.
- Hesmondhalgh, D. (2012) *The Cultural Industries* (3rd Edition). London: Sage.

- Turow, J. (2011) *The Daily You*. New Haven: Yale University Press.

**Assessment:** Essay (100%, 3000 words) in the ST.

## MC424 Half Unit Media and Communication Governance

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Damian Tambini

**Availability:** This course is compulsory on the MSc in Media and Communications (Media and Communications Governance). This course is available on the MPhil/PhD in Data, Networks and Society. This course is not available as an outside option.

**Course content:** This course begins from the assumption that media and communication can only be fully understood if their governance and its implications for citizens and consumers, as well as producers and providers, are understood. Communication governance includes all attempts by public bodies to fund, licence or otherwise regulate or govern communication services or the providers of those services, usually for an alleged public benefit. The term 'governance' refers to the norms, rules and resources together with their theoretical underpinnings that inform the production and consumption of media and communication services. This course provides students with core theoretical perspectives and concepts required to critically analyse both the substance and processes of media and communication governance. Students will compare different rationales used to justify regulation of media and communication services. Students will also develop an understanding of regulatory instruments, institutional arrangements and institutional practices that help public authorities, corporations, citizens and consumers decide how to allocate public resources for the provision of such services. Illustrations are drawn from national and international contexts, thereby presenting a multi-levelled analytical approach to governance issues in the field.

Some of the questions addressed in this course include: Under what conditions should platforms be governed? Are industry professionals or regulators best positioned to determine when broadcasting institutions adequately serve the diverse information

needs of a population? To what extent should legacy media laws and policies be relaxed in the light of technological change? In what ways can 5G providers serve the public interest? These and other questions reflect the course's focus on developing a critical, informed and authoritative account of 'why', 'who', and 'how' to govern media and communication services.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term, and a revision session totalling 1 hour in Summer Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, participate in seminar activities, prepare seminar presentations, contribute to online discussion on Moodle and submit an essay of 1500 words in MT.

**Assessment:** Take-home assessment (100%) in the ST.

This is a take-home examination, and the questions are made available to students up to seven days prior to the due date.

## MC425 Half Unit Interpersonal Mediated Communication

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Ellen Helsper

**Availability:** This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

**Students are asked to write a short personal statement** on LSE for You indicating why they want to take this course and what they would bring to it. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

**Course content:** Communication media have simultaneously been blamed for a breakdown of social relationships and been hailed as powerful social tools that can connect people from all walks of life. This discussion is more important than ever, especially now the COVID 19 pandemic has moved our social lives online in unprecedented ways. The course looks at the impact digitisation might have on relationships and interactions. The aim of this course is to provide students with a critical understanding of mediated communication within small groups and dyadic relationships. It examines the influence of media on three key fields of interpersonal interaction which are identified as personal, social and professional communication. We will study the ways in which interpersonal relationships and communication are influenced by mediation, looking at harassment, discrimination, and social isolation but also at collaboration, connection and mutual understanding.

The first half of the course addresses the history of media in interpersonal communication as well as general interpersonal communication and relationship theories. The second half looks in more detail at how the interaction between media and interpersonal communication has been studied in relation to the cross-cutting themes of privacy/trust, isolation/socialisation and multi-modality. These central concepts of the course are reflected upon through theories of social norms, affordances, social capital and supplementation/substitution, and discussed from the perspective of different disciplinary and methodological paradigms. Application of theory to everyday life, practitioner and policy examples will give students the tools to understand what the practical implications are of the ways in which these different paradigms suggest that interpersonal communication processes vary depending on the type of platform this communication takes place on as well as the type of relationship that is under investigation and the context in which this relationship develops. As a result of the course the students will be able to evaluate the weaknesses and strengths of the theories that aim to explain apparently contradictory observations about the practise of interpersonal mediated communication. This can be applied to professional areas such as intra-organisational communication, and the design, moderation and regulation of social media and discussion forums.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, participate in the creation of a course wiki, prepare group seminar presentations and write an individual essay (1500 words) based on the presentation and the material provided

for the wiki (due the week after the week in which the student is responsible for the wiki).

**Assessment:** Essay (100%, 3000 words) in the ST.

## MC426 Half Unit

### Film Theory and World Cinema

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Shakuntala Banaji

**Availability:** This course is available on the MSc in Gender (Sexuality), MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is controlled access, meaning that there is a limit to the number of students who can be accepted.

**Course content:** This course is designed to enable a consistent, informed and plausible reading of popular film representations, discourses and cultures of consumption in specific geopolitical contexts. Introducing theories from the humanities and the social sciences, lectures offer alternative approaches to theorising sexuality, gender, race, class, religion, national identity, childhood, history and politics in popular commercial films and their interpretation by audiences. The impact of unequal power relations – on how representations are reproduced, spectatorship is theorised and censorship policies are formulated – will be demonstrated and analysed. While the course offers a particular focus on Bollywood, Hindi commercial cinema, as an example of World cinema, it refers more widely to examples from other National Cinemas such as those of China, Korea, Australia, Spain and Iran. A key learning method is the extensive interrogation of

audiovisual materials. To this end, there will be five film screenings and accompanying discussions alongside the lectures and seminars. Additionally, films referred to on the course will be made available through the library or can be downloaded and watched from popular film sites on the internet.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Micheltas Term. Additionally, this course includes five compulsory film screening and discussion sessions, each of which lasts 3 hours. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, participate in Moodle forums, present in seminar discussions, attend 5 film screenings and submit one essay of 1500 words.

**Assessment:** Essay (100%, 3000 words) in the LT.

## MC427 Half Unit

### Digital Media Futures

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Alison Powell

**Availability:** This course is available on the MSc in Media and Communications, MSc in Media and Communications (Data and Society) and MSc in Media and Communications (Research).

This course is available as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is controlled access, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

**Course content:** This course provides an historical, theoretical and methodological basis through which to assess the social and cultural transformations related to digital media infrastructures and related social practices. It focuses on the materiality and affordances of new media, as well as on the social transformations that have co-evolved, focusing on emerging media of the past, present and future. It critiques and questions the assumptions about the transformation of social and cultural life but also attempts to help students develop conceptual strategies beyond critique. Conceptual approaches draw from materialist studies of media and communication, as well as science and technology studies. Topics include but are not limited to: alternative and activist media and futures, the political economy and ecology of digital media, the politics of algorithms, remembering and forgetting, the anthropocene, artificial intelligence, data and AI ethics.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** Students will complete a 1500 word formative essay or creative proposal. They will also receive formative feedback on class participation and on a formative assignment.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the ST.

---

## MC428 Half Unit

### Media Culture and Neoliberalism in the Global South

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Wendy Willems

**Availability:** This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media

and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media, Communication and Development and MSc in Politics and Communication.

This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is controlled access, meaning that there is a limit to the number of students who can be accepted.

**Course content:** This course offers a comparative perspective on changing national media cultures in the Global South in the context of the neoliberal turn. The course not only considers neoliberalism as a crucial factor that has brought media industries such as private broadcasting stations, mobile phone companies and digital platforms into existence but also examines the extent to which these new forms of media and technology have played a role in reproducing neoliberalism as a process. It provides an understanding of how shifting economic policy regimes have impacted on the way in which people engage with media and technology, and how media and technology engage with people in the Global South. The first part of the course introduces the key concepts of 'media culture', 'neoliberalism' and 'Global South' which will be deployed throughout the course. The second part of the course discusses how key processes of social change in the Global South are linked to changing media cultures, including the commodification of national imaginaries, informality, crime and the rising middle class, religion and the prosperity gospel, self-help media and the neoliberal subject, and mobility and social relations. The course examines these themes through a series of empirically-grounded, mostly ethnographic case studies. The course encourages students to critically evaluate the extent to which the three key concepts in the course are helpful in gaining an understanding of changing media cultures in the Global South.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** Students will complete a formative 1500 word essay based on a case study.

**Assessment:** Essay (100%, 3000 words) in the ST.

---

## MC429 Half Unit

### Humanitarian Communication: Vulnerability, Discourse and Power

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Lee Edwards

**Availability:** This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media, Communication and Development and MSc in Strategic Communications. This

course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Today more than ever, images and narratives of vulnerable people in zones of poverty, disaster, violence and conflict routinely populate our everyday lives. They are produced by a wide range of organisations and individuals, and appear on a wide range of platforms, including NGO websites, news networks, social media and celebrity advocacy. In this course, we explore the changing practices of humanitarian communication in the 21st century by addressing questions such as: What are the histories of humanitarian communication? How is it changing today and why? What are the tensions and dilemmas that organizations face as they struggle to communicate the plight of distant others? What kind of politics of visibility and voice is played out in humanitarian communication? What are the ideological and ethical positions informing and informed by the digital narratives and spectacles of vulnerable others - and how do these change when 'others' speak for themselves? And finally, what are the challenges of 21st century humanitarian communication and can we do it better? To explore these issues, students will debate the theoretical principles and empirical realities of humanitarian communication, its contemporary power and moralising force, and the tensions and complexities that underpin its practices and effects.

**Teaching:** 30 hours of seminars in the LT.

This course is delivered through an in-person, 3-hour weekly seminar in Lent Term. The term includes a reading week in Week 6.

**Formative coursework:** All students are expected to complete advance reading, prepare reading-based seminar presentations, and submit one essay of 1500 words in the LT.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the ST.

## MC430 Half Unit

### Data in Communication and Society

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Alison Powell

**Availability:** This course is compulsory on the MSc in Media and Communications (Data and Society). This course is available on the MPhil/PhD in Data, Networks and Society. This course is not

available as an outside option.

**Course content:** This course investigates the significance of data in communications, social and cultural life. It introduces core theoretical perspectives on data and information from a social scientific perspective, and outlines research approaches that take account of the contemporary influence of data within communication and society. The course begins with the social history of data, providing a strong baseline from which to analyse the contemporary position of data. The course will provide students with conceptual tools that will help unpack the logic of data, and train them to critically analyse phenomena such as big data, algorithmic regulation and augmented civic space. Its focus on contemporary issues allows an investigation of the politics and culture of data production, and the use of data as evidence in a range of fields including politics, advocacy and audience research. Some of the questions addressed through the course include: Who owns data? Who makes data? Who makes sense of data? Is data public or private? How do different actors get access to data? How is data protected and regulated? What ethical and governance questions pertain to the study of data as a socio-technical assemblage? These and other questions reflect the course's focus on developing a critical account of how data is implicated in the structures that shape social life.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** Students will be expected to produce 1 presentation (group project, student-led session) in the MT, along with written formative coursework. There are two options for written formative coursework on this course. Students can choose to submit either a 1500 word essay; or a 1000 word proposal for case analysis and recommendation

**Indicative reading:**

- Vaidhyathan, S. (2006). Afterword: Critical Information Studies: A Bibliographic Manifesto. *Cultural Studies* 20(2-3): 292-315.

**Assessment:** Assessment path 1

Essay (100%, 3000 words) in the LT.

Assessment path 2

Project (100%, 3000 words) in the LT.

The project comprises of a case analysis and recommendation:

1 Description of case

2 Analysis

3 Recommendations

4 Theoretical and normative contextualization

Case study analysis and recommendation: Students choose a current data-related product, service or use case, providing an analysis of how data are theoretically constructed, valued,

managed and conceived within the project, using relevant theoretical material. The case study must identify an area of ethics, governance or social justice that this product, service or use case could improve, and provide a concrete set of recommendations, grounded in the existing theoretical, historical and empirical literature. This analysis and recommendation will be accompanied by a critical reflection that highlights the theoretical and normative aspects of the case, your analysis and your recommendation. This section should be grounded in the relevant theoretical material.

## MC431 Half Unit

### Critical Approaches to Strategic Communications

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Lee Edwards

**Availability:** This course is compulsory on the MSc in Strategic Communications. This course is not available as an outside option.

**Course content:** This course provides an advanced understanding of theoretical knowledge in the field of media and communication as it relates to strategic communications and the key promotional industries of advertising, branding and public relations. The focus is on the role, scope and activities of strategic communications in contemporary societies and in the context of globalisation and the digital age. Topics cover the context, practices and challenges of strategic communications, and are likely to include: the advance of promotional culture in and across public, political, non-profit and corporate institutions; professional structures and identities of the strategic communications industries; discourses of strategic communications, including reputation and relationship management; technologies of strategic communications; globalisation and strategic communications; strategic communications and inequalities (gender, 'race', class); and the ethics of strategic communications.

**Teaching:** This course is delivered through a three-hour weekly in-person seminar, totalling 30 hours across Michaelmas Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** Students will be expected to produce one 1500 word essay in the MT.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the LT.

## MC432 Half Unit

### Strategic Communication in Practice: Professional Perspectives

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Claire Forbes

**Availability:** This course is available on the MSc in Media and Communications, MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is controlled access, meaning that there is a limit to the number of students who can be accepted.

**Course content:** This course will be delivered as a combination of academic lectures and presentations from leading industry practitioners, in order to facilitate a cross-fertilisation between professional experience, academic perspectives, public debates and research. Students will be expected to critically engage with ideas from practice in the seminars, developing reflexivity and analytical skills through the course.

The professional lecturers will be experts working on various forms of strategic communication in a wide range of sectors, including the corporate sector; the not-for-profit sector such as global NGOs and activist organisations; voluntary sector; government and public sector organisations. The course assessment is the development of a strategic communications campaign, based on a real-life brief provided by the course leader.

The academic lectures will focus on campaign theory and development. The topics covered in the practitioner lectures will change each year depending on speaker availability, but as an illustration, they could include: connecting with elusive audiences; global media industries; global NGOs; communications in the retail industry; communicating in complex contexts; communicating change; communicating government policy; crisis communication.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, participate actively in seminar discussions and submit one essay of 1500 words.

**Indicative reading:**

**Assessment:** Project (100%, 5000 words) in the ST.

The summative assessment is a group campaign plan and critical essay, delivered by students working in pairs.

## MC433 Half Unit Technology and Justice

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Seeta Peña Gangadharan

**Availability:** This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Inequalities and Social Science, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students should apply by answering a few questions during Course Choice. Prior to the first class, students must also view a recorded lecture and complete select readings.

**Course content:** This course addresses questions of justice and inequity in relation to communication technologies of the 20th and 21st centuries. It begins with two premises: 1) communication technologies are critical in shaping the conditions for individual and collective self-government, and 2) policies that regulate such technologies influence the nature of democracy and inclusion in society today. The course engages historical perspectives, normative theories of justice and democracy, and legal theories of technology and innovation to assess the power of communication technologies and consider their costs and benefits to historically marginalized groups. In so doing, this course questions the adequacy of regulation in the development and deployment of technologies which exacerbate existing social, political, and economic divides, on the one hand, or address or alleviate such divides, on the other. The course will primarily focus on histories and contexts of marginalized groups in the United States and the Global South.

The first part of the course will introduce students to the theoretical and historical frameworks for the course and concentrate on mass communication technologies of the 20th century, such as print and broadcasting, and policy debates highlighting issues of justice and inequity. The second part of the course will centre on digital communication technologies in the late 20th and early 21st centuries and examine the intersection between networked communication, justice, and rights in historically marginalized communities. The third part will investigate innovations in automated technologies with respect to redistribution and recognition, issues core to the notion of social justice. By the end of the course, students will be able to evaluate differences between justice-based and rights-based approaches, explore the nature of digital inclusion, and compare the nature of communication inequalities across technologies.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. There will be a few flipped-lectures delivered as online videos. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, view and respond to interactive lectures, participate in seminar activities, and contribute to online discussion. Students are also expected to produce 1 piece of coursework in MT, which consists of short answers to four essay questions. Questions will be made available to students up to seven days prior to the due date.

**Assessment:** Presentation (30%) in the MT.

Essay (70%, 3000 words) in the LT.

---

## MC434 Half Unit Digital Platforms and Media Infrastructures

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jean-Christophe Plantin

**Availability:** This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research) and MSc in Strategic

Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is controlled access, meaning that there is a limit to the number of students who can be accepted.

**Pre-requisites:** No pre-requisites

**Course content:** While GAFAM companies (Google, Amazon, Facebook, Apple, Microsoft) are still studied as digital platforms, they now constitute major operators of the internet infrastructure, as witnessed by their involvement since 2010 in four sectors: data centers, undersea cables, telecommunications networks, and satellites. This course will study this radical extension of platform power on the internet architecture, uses, and governance. It will demonstrate how GAFAM companies become dominant actors in these four infrastructure sectors by using the platform strategy that granted them their initial success, and by adapting it from the web economy to infrastructure management.

The course presents key readings in media & communications and sciences & technology studies to analyse contemporary instances of digital media platforms. Students will explore the multiple facets of the increasing power of digital platforms, by critically analysing how platforms replace, conflict with, or influence existing infrastructures, and what are the social, political and epistemological consequences of these tensions. This focus on the relations between existing and emerging media configurations will invite students to investigate how platforms constitute ubiquitous media in everyday life, and how they increasingly shape communication, knowledge production, circulation of data, online participation and mobility.

The first part of the course will introduce the theoretical framework, blending together platform studies (coming from media & communication studies, political economy, management) with infrastructure studies (coming from history, information science, sciences & technology studies). The second part illustrates these interactions through four case studies that see tech giants taking over the existing infrastructure for global connectivity: data centers, undersea cables, telecommunications networks, and satellites. The third part addresses current social debates around the platformization of the internet infrastructure, e.g. in terms of global access to internet, tension between states and sovereignty, and governance and regulation.

At the end of the course, students will be able to critically assess the increasing power that tech giants have over the global infrastructure for connectivity, and to discuss the challenges this process brings in terms of access to communication, knowledge and democratic life.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to submit either a 1500 word formative essay on current theoretical debates around platforms, infrastructure, and society; or a 1500 word formative proposal for a case study analysis of a digital platform.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the ST.

---

## MC436 Half Unit Mediating the Past

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Omar Al-Ghazzi

**Availability:** This course is available on the MA in Modern History, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course starts with the premise that the understanding of the past and the future is socially-constructed, mediated, and shaped by power relations within the present. It critically explores cultural, political and technological issues in relation to the passing of time. It addresses questions such as: How do different kinds of media represent and structure collective notions about time whether in relation to the present, the past or the future? How do power relations shape understandings and experiences of time? How do we learn about history through media and why does that matter? How do memories and experiences of colonialism impact collective understandings of history and national futures? In addressing these questions, this course centres temporality in the study of media and communication studies. It introduces students to the field of collective memory, differentiating it from history and historiography. It then considers critical issues within the relation between history, memory and politics, such as colonialism/postcolonialism, nationalism, collective action, trauma, witnessing and war. The second part of the class focuses on the analysis of technology and media in the ways they contribute to the social construction of time. It addresses how privilege and access to technology regulate the speed and slowness of people's lives. It moves on to exploring how particular media conventions represent temporality, with a focus on news media, digital technologies and popular culture. By the end of the course, students will be able to identify key debates in the study of time and temporality, particularly as approached from the disciplinary perspective of communications and media studies.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Michaelmas Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** Students will be expected to produce one 1500 word essay.

**Assessment:** Essay (100%, 3000 words) in the LT.

## MC437 Half Unit

### Media, Data and Social Order

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Nick Couldry

**Availability:** This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff leave, and in order to maintain smaller group sizes, this course is controlled access, meaning there is a limit to the number of students who can be accepted.

**Pre-requisites:** No formal pre-requisites, but students will need to apply by submitting a statement via LSE for You during the Course Selection period.

**Course content:** Visions of contemporary society and its reliance on data processes are highly polarised: do they represent the end of freedom under a regime of continuous surveillance or the freeing up of an extended group mind through awesome computing power? Today's starkly opposed visions of media's contribution to social order have however a much longer history which we must grasp if today's transformations are to be understood. Since the 19th century, technologies for mediated communication have developed in increasingly institutionalised

forms. Those forms – from the traditional mass media (the press, radio, television) to contemporary media and information infrastructures – have played important roles in the organization of everyday life, and have been imagined to play a central role in the 'order' of society, even of the world. But do today's digital platforms for social interaction (especially 'social media'), and the data processes that underlie those platforms (the process sometimes called datafication), create a completely different type of social order from in the past? How is that order being constructed, and what are its implications for social life?

This course offers a primarily sociological, but also interdisciplinary, exploration of how a social order is being constructed in the era of social platforms and large-scale data-collection, and the social –indeed ethical - challenges to which the new 'datafied' social order is giving rise. The course is structured into two main parts. After the introductory lecture, Lectures two to five will explore alternative entry-points for analysing this social order, via transformations of social space, the creation of social relations, the creations of new forms of meaning via algorithms, and macro-theories of the emerging order. Lectures six to nine will apply these theoretical insights to the expanding uses of data in four areas of daily life: social justice, personalized marketing, surveillance (at work and at home), and the formation of individual subjects (in education and through self-tracking). The concluding lecture will draw together the course's themes with a particular focus on the normative implications of the datafied social order, with particular reference to the questions of autonomy, surveillance and data extraction.

The course will be aimed at all MSc students interested in acquiring a broad social-theoretical understanding of the role that media institutions play in ordering contemporary societies and developing their own critical perspective on whether media and datafication, as processes do, or do not, overall enhance human life, especially its social and ethical dimensions.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** Students will be given the option of choosing one of two alternative pieces of formative coursework in preparation for the summative essay. Students can submit either (1) a short essay on a theoretical approach to understanding data's role in social order (1200-1500 words); or (2) a short reflection: students should choose a short (200 word maximum) text of theory or business discourse, and then reflect on that text's implications for a data practice of their choice (1200-1500 words).

**Indicative reading:**

- Turow, Joseph (2017) *The Aisles Have Eyes*. Yale University Press.
- Van Dijck, Jose (2013) *The Culture of Connectivity*. Oxford: Oxford University Press.

**Assessment:** Essay (100%, 4000 words) in the ST.

Students will submit one piece of written work for the summative assessment: a 4000 word essay on questions set by the course convenor in which students will bring together theoretical discussion with the consideration of specific data practices.

## MC438 Half Unit Mediated Feminisms

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Simidele Dosekun

**Availability:** This course is available on the MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Media have been crucial to feminist politics across the globe, from 19th century pamphlets to early television representations to 90s zine culture to the multitude of hashtag feminisms in contemporary social media. This course explores the ways that feminisms in both the Global South and North are enacted through and represented on a variety of media platforms, from print to digital. Topics we will consider include: mainstream and alternative feminist media productions; the meanings and politics of feminist visibility and even popularity; feminist uses of the body as a medium of activism and communication; and mediated reactions to feminisms, including misogynist and sexist ones. The course draws on theories from cultural and media studies, creative industry studies, film studies and gender studies, and throughout we will take an intersectional and transnational approach, thinking of and across multiple forms and sites of 'difference.' The course is intended for MSc students interested in acquiring a broad cultural-theoretical understanding of the role that media play in defining feminisms for broad audiences, as well as those who are interested in feminist media productions across history.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** All students are expected to complete advance reading, participate actively in seminar discussions and submit one essay of 1500 words.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the ST.

## MC439 Half Unit Media, Technology, and the Body

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Dylan Mulvin

**Availability:** This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and

Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Every day we re-encounter our bodies through the mediations of technology. A sleep tracking app tells you about your bad night's sleep; your phone tells you which Underground stations are "step-free" but doesn't know about the broken lift at Victoria station, and it doesn't know about your knee pain; in the mail you receive some DNA results from a popular ancestry website (it's not the one that partners with drug companies; but it is the one that partners with law enforcement); your job, your university, and your grocery store ask you to select a race and a gender every time you fill out a form; on your way home your noise-cancelling headphones run out of battery; and adding insult to injury your phone tells you your "screen time" has increased 8% since last week. This class is prompted by such moments, by asking how sites of conflict and breakdown can illuminate the ways our bodies are understood, tested, and reconfigured through technology. Beginning with the assumption that there is no single, stable understanding of "the normal human body," this course introduces a wide range of interdisciplinary theories to interrogate human bodies and their relationships to technology. From the measurement of perception, to the micro-analysis of bodily gestures, to the surveillance of bodily functions, to the representation and coding of race, gender, and sexuality, media and communication studies has long interrogated the technologization of human bodies.

In addition to key readings from our field, this course also introduces students to the encounter of body-technology problems from the perspective of science and technology studies, disability studies, surveillance studies, feminist and queer theory, critical design studies, and the history of technology. Through these theories and debates, we will familiarise ourselves with approaches for documenting, describing, and analysing how notions of human bodily similarity and difference are encoded and hardwired in the technologies, media, and environments of everyday life.

**Teaching:** This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Lent Term. This course includes a reading week in Week 6 of term.

**Formative coursework:** The formative coursework includes a two-part mapping exercise in the LT:

- 1 Individual students will catalogue sites of conflict and friction between bodies and technologies. They will mark the site on a map and include 500-800 words describing the site and the conflict it produces. The compilation of these sites will serve as a shared database of techno-bodily conflict;
- 2 Students will outline how these sites could become research prompts for a larger project and annotate 3 potential sources to analyse a single site. Annotations should total between 300 and 500 words.
- 3 Participation will be measured based on the completeness of the above.

**Assessment:** Essay (90%, 3000 words) in the ST. Class participation (10%) in the LT.

## MC499

### Dissertation: Media and Communications

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Simidele Dosekun will convene the teaching and organisation of this course, and will oversee allocation of dissertation supervisors (one per student).

**Availability:** This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is not available as an outside option.

**Course content:** The aim of this dissertation is for students to pursue an independent piece of research within the field of media and communications following the guidelines provided in the MSc Dissertation Guide and the instructions by the School's staff members. The dissertation is usually a combination of theoretical enquiry and original empirical enquiry concerning an issue in the field of media and communications. On rare occasions it is based on a theoretical interrogation. Students are encouraged to select a topic that reflects the content of their MSc programme. In all cases, students must obtain the approval of their supervisor before embarking on any research.

**Teaching:** This course will be delivered through a combination of lectures, workshops and one-to-one supervision sessions in Michaelmas, Lent and Summer Term. This course includes a reading week in Week 6 of Michaelmas and Lent Term.

**Formative coursework:** Students are required to submit an ethics review, literature review and dissertation plan to their dissertation supervisor in LT and ST.

**Indicative reading:** There are no formal reading lists, but students are encouraged to consult departmental handbooks on how to write dissertations.

**Assessment:** Dissertation (100%, 12000 words) in August. The dissertation must be not less than 10,000 words and not more than 12,000 words in length.

## MC4M1 Half Unit

### Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Ellen Helsper and Dr Jean-

Christophe Plantin

**Availability:** This course is available on the MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is not available as an outside option.

**Course content:** The aims of the course are to provide students with a general training in research methods and techniques, including research design, the collection, analysis and interpretation of data, and to enable students to evaluate critically their own research and that of professional researchers. The course has three components:

#### 1 Principles of Research in Media and Communications:

a series of lectures offered by media and communications staff in Michaelmas Term. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, critical discourse analysis, social network analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

**2 Principles of Social Research:** a series of five three-hour workshops (each comprised of two 1.5-hour sessions) offered by media and communications staff in the Lent Term. Students are required to participate in two of the workshops.

**3 Quantitative Analysis:** Students take the following course offered by the Department of Methodology: MY464 Introduction to Quantitative Methods for Media and Communications in Michaelmas Term. Please note that this course is compulsory and automatically included within the MC4M1 course.

**Teaching:** This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 50 hours across Michaelmas and Lent Term. This course includes a reading week in Week 6 of both Michaelmas and Lent Term.

1 Principles of Research in Media and Communications: Delivered through lectures totalling a minimum of 10 hours across Michaelmas Term and 1 hour in Lent Term.

2 Principles of Social Research: Delivered through workshops totalling a minimum of 6 hours across Lent Term.

3 Revision sessions for summative methods essay: Delivered through lectures totalling a minimum of 2 hours across Lent Term and Summer Term.

4 Quantitative Analysis MY464:160 Delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term.

5 Methodology pilot drop in clinics: Delivered through workshops totalling 2 hours across Lent Term and Summer Term.

**Formative coursework: 1 Principles of Research in Media and Communications:** All students are expected to complete advance readings and submit one essay of 1,500 words to their supervisors Michaelmas Term.

2 Principles of Social Research: All students are expected to complete advance readings and submit workshop assignments.160

3 Quantitative Analysis: Most statistics courses require weekly assignments

  - Silverman, D. (2013). *Doing Qualitative Research: A Practical Handbook*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

**Assessment:** Exam (20%, duration: 2 hours) in the January exam period.

Coursework (80%, 3000 words) in the ST.

Description of assessment:

**Coursework:** One written assignment of not more than 3,000 words, relating to the combination of Principles of Research in Media and Communications and Principles of Social Research to be submitted in the ST (80%).

**Exam:** Two-hour January exam for MY464 component (20%).

## MC4M2

### Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Ellen Helsper and Dr Jean-Christophe Plantin

**Availability:** This course is compulsory on the MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students taking non-research track media and communications MSc programmes may take this course instead of MC4M1 subject to their own degree regulations and with the agreement of the teacher responsible.

**Course content:**

#### 1 Principles of Research in Media and Communications:

A series of lectures offered by media and communications staff in Michaelmas Term. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, social network analysis, critical discourse analysis, content analysis, visual analysis, survey design/questionnaires, experiments, ethnography and participant observation, as well as research ethics.

#### 2 Principles of Social Research and Specialist Social Research Workshops:

A series of ten three-hour workshops (comprised of two x 1.5 hour sessions) offered by media and communications staff in LT. Students are required to participate in all ten workshops.

**3 Quantitative Analysis:** Students take two statistics courses offered by the Department of Methodology: MY464 Introduction to Quantitative Methods for Media and Communications; and MY452L Applied Regression Analysis. These courses are compulsory and automatically included when students register for MC4M2. Students may be permitted to substitute a more advanced course offered by the Department of Methodology in place of MY464 and/or MY452L, with the approval of the MC4M2 course convenor and subject to timetabling constraints.

**Teaching:** This course is delivered through a combination of

lectures, seminars and workshops totalling a minimum of 90 hours across Michaelmas and Lent Term. This course includes a reading week in Week 6 of term.

1 Principles of Research in Media and Communications: Delivered through lectures totalling a minimum of 10 hours across Michaelmas Term and 1 hour in Lent Term.

2 Principles of Social Research and Specialist Social Research Workshops: 160 Delivered through workshops totalling a minimum of 30160 hours across Lent Term.

3 Quantitative Analysis: MY464: Delivered through a combination of classes and lectures totalling a minimum of 30 hours across Michaelmas Term. 160MY452L: Delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. 160

4 Methodology pilot drop in clinics: Delivered through workshops totalling 2 hours across Lent Term and Summer Term.

**Formative coursework:**

1 **Principles of Research in Media and Communications:** All students are expected to complete advance readings and submit one essay of 1500 words in Michaelmas Term.

2 **Principles of Social Research and Specialist Social Research Workshops:** All students are expected to complete advance readings and submit workshop assignments.

3 **Quantitative Analysis:** Most statistics courses require weekly assignments.

**Indicative reading:**

- Alasuutari, P. (1995). *Researching Culture: Qualitative Method and Cultural Studies*. London; Thousand Oaks, Calif: SAGE Publications Ltd.
- Bauer, M. W., & Gaskell, G. D. (2000). *Qualitative Researching with Text, Image and Sound: A Practical Handbook for Social Research*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

- Silverman, D. (2013). *Doing Qualitative Research: A Practical Handbook*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

**Assessment:** Exam (17%, duration: 2 hours) in the January exam period.

Exam (17%, duration: 2 hours) in the summer exam period.

Coursework (66%, 5000 words) in the ST.

Description of assessment:

1 Coursework: One written assignment of not more than 5000 words to be submitted in the ST (66%).

2 Two assessments relating to Quantitative Analysis: One exam in the January exam period for MY464, and one exam in the Summer exam period for MY452L (see Methodology Department course guides) (34%).

**MC4M7 Half Unit****Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis)**

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Ellen Helsper and Dr Jean-Christophe Plantin

**Availability:** This course is available on the MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is not available as an outside option.

**Course content:** The aims of the course are to provide students with a general training in research methods and techniques, including research design, the collection, analysis and interpretation of data, and to enable students to evaluate critically their own research and that of professional researchers.

The course has three components:

**1 Principles of Research in Media and Communications:**

A series of lectures offered by media and communications staff in Michaelmas Term. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, critical discourse analysis, social network analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

2 Principles of Social Research: A series of five three-hour workshops (each comprised of two 1.5-hour sessions) offered by media and communications staff in the Lent Term. Students are required to participate in two of the workshops.

3 **Quantitative Analysis:** Students take the following course offered by the Department of Methodology: MY452M Applied Regression Analysis. Please note that this course is compulsory and automatically included in the MC4M7 course.

**Teaching:** This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 40 hours across Michaelmas and Lent Term. This course includes a reading week in Week 6 of Michaelmas and Lent Term.

1 Principles of Research in Media and Communications: Delivered through lectures totalling a minimum of 10 hours across Michaelmas Term and 1 hour in Lent Term.

2 **Principles of Social Research:** Delivered through workshops totalling a minimum of 6 hours across Lent Term.

3 **Revision sessions for summative methods essay:** Delivered through lectures totalling a minimum of 2 hours across Lent Term and Summer Term.

4 **MY452M Applied Regression Analysis:** 160 Delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term.

5 **Methodology pilot drop in clinics:** Delivered through workshops totalling 2 hours across Lent Term and Summer Term

**Formative coursework:**

1 **Principles of Research in Media and Communications:** All students are expected to complete advance readings and submit one essay of 1500 words to their supervisor in Michaelmas Term.

2 Principles of Social Research: All students are expected to complete advance readings and submit workshop assignments. 160

3 MY452M Applied Regression Analysis: Most statistics courses require weekly assignments

**Indicative reading:**

2 **Exams:** One exam in the Summer exam period relating to MY455, and one exam in the Summer exam period relating to MY452M (see Methodology Department course guides) (34%).

---

## MG401 Half Unit Operations Management for Management Consultancy

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Richard Steinberg MAR 4.13

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Management of Information Systems and Digital Innovation. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 45. Students on the waiting list will be selected based on their academic background.

**Pre-requisites:** There is a pre-assignment that is due in early January. The specification of the pre-assignment will be posted to Moodle on the last day of Michaelmas term 2022. **Note that the pre-assignment is compulsory and cannot be accepted late.**

**Course content:** Operations Management (OM) is concerned with the processes by which organisations produce goods and services. This course is designed for students having an interest in operations management who may be considering a career in management consultancy. It is not a course in management consultancy.

The course covers nine topics: (1) Process Flow Analysis, (2) Bottleneck Analysis, (3) The Toyota Production System, (4) Inventory Management, (5) Assembly Line Balancing, (6) Critical Path Method, (7) Quality Management for Services—with an emphasis on Quality Management in Healthcare, (8) Forecasting, and (9) Scheduling. The course is structured in three parts. Part I is called 'Cases', and is based around a set of 5 readings: three Harvard Business School cases and two articles. Part II is called 'Techniques'. Part III is called 'The Goal', which takes place during the final 2-hour session, and consists of an in-depth discussion of the book, *The Goal: A Process of Ongoing Improvement*, by E.M. Goldratt and J. Cox.

**Teaching:** 16 hours of lectures and 12 hours of seminars in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** In addition to the pre-assignment students will have six assignments throughout the term covering the material in the course, and will be expected to work as a group on each assignment. The problems comprising each assignment will be discussed in the seminar classes, and each student will be individually responsible for answering all the problems for each assignment.

**Indicative reading:** (1) Case: 'National cranberry cooperative (abridged)'.  
(2) Case: 'Toshiba: Ome works'.

(3) Case: 'Toyota Motor Manufacturing, U.S.A., Inc.'.  
(4) Article: 'Controlling variation in health care: a consultation from Walter Shewhart'.

(5) Article: '-Distinguishing between common cause variation and special cause variation in a manufacturing system'.  
(6) Book: *The Goal: A Process of Ongoing Improvement*, E.M. Goldratt and J. Cox.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

**MG402 Half Unit****Public Management: A Design-Oriented Approach**

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Michael Barzelay MAR 4.28

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Development Management, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course cannot be combined with MG467 Strategy and Change in Public Sector Management. This course is available on course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The public needs capabilities from public organizations, such as those to implement major shifts in public policies; to provide safe and otherwise adequate public services; to deliver technological and programmatic systems through projects; to create credible scientific information for public and policy use; and to deter corruption across the public sector. Furnishing capability to accomplish such purposes requires management of public organizations, and, management, in turn, involves using professional knowledge and skilful abilities to devise mechanisms that will work in challenging situations and settings.

In this course, students will learn how to engage creatively – as designers and managers -- with practical theories and case-based knowledge in creating mechanisms that work in enabling public organizations to play their crucial roles in government. In particular, the course will focus on how a design-orientation in professional practice can be directed toward overcoming specific conditions and widespread tendencies that work against any specific public organization's success in furnishing the capabilities required of it. Case studies will be used to develop this design-orientation, while also expanding students' familiarity with varied roles played by public organizations, e.g., using regulation to promote waste-reduction in a region's industrial sector; using international cooperation projects to promote advanced technological education in a partner country; using design-projects to formulate and test operational concepts for performing sanitation functions in delivering a public event attended by millions; using project organizations and tools to control the use of public money and authority in infrastructure projects; and using national-level auditing and criminal investigation tools to combat corruption at the local level. In this sense, and by using pedagogical methods common to professional schools of public policy and management, the course is emblematic of the design-oriented professional discipline of Public Management. (Additional course content information on the Course Moodle site.)

**Teaching:** 30 hours of combined lecture/seminars in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Essay: Write a 2000-2500 word essay that reflectively examines one course reading from a list of several options. The purpose of the essay is to show how the publication can serve to add breadth and depth to the body of professional knowledge in the Public Management field.

Case analysis: Contribute to a group-project whose deliverable is a 2000-2500 word report that recovers the design of a public organization's primary working phenomena so that it can serve as a design-reference for future use in managing public organizations. All groups will be given the same project assignment.

**Indicative reading:** Publications:

E Bardach, 'The Extrapolation Problem' (2004); M Barzelay, Public Management as a Design-Oriented Professional Discipline (2019); M. Barzelay, et al., 'Good Trouble in the Academy: Inventing Design-focused Case Studies about Public Management as an Archetype of Policy Design Research' (2021); M Barzelay & C Campbell, Preparing for the Future: Strategic Planning in the U.S. Air Force (2003); M Barzelay & S Seabra, 'Auditing Against Corruption' (2020); J Bryson, Strategic Planning in Public and Nonprofit Organizations (2017); T Cellucci, 'Developing Operational Requirements' (2008); J Koopenjan, et. al., 'Competing Management Approaches in Large Engineering Projects' (2011); B Lawson, What Designers Know (2004); J Tendler & S Freedheim, 'Trust in a Rent-Seeking Society' (1994); J van Aken et. al., Problem-Solving in Organizations (2007); D Vaughan, 'Organizational Rituals of Risk and Error' (2005).

Videos:

'Programs and their Mechanisms' (2017); 'Public Management Gallery Tour' (2017); 'Furnishing Professional Knowledge about Public Management with Case Studies: A Long Primer' (2020).

Teaching case studies:

'Brazil in Action'; 'Managing Long-Term Organizational Collaborations in International Development: The Egypt-Japan University of Science and Technology'; 'Managing a Governmental Campaign for a Mega-Event: Strategic Planning for the 2019 Kumbh Mela Hindu Festival in Uttar Pradesh'; 'Paying the Bills in the Junta of Andalusia'; 'Preventing Pollution in Massachusetts: The Blackstone Project'; and 'Assessing Strategic Risks: Col. Jim Engle and the U.S. Air Force Futures Games'.

**Assessment:** Essay (45%, 3000 words) and case analysis (45%) in the ST.

Class participation (10%) in the LT.

Essay: Write an essay that reflectively examines one course reading from a list of several options. The purpose of the essay is to show how the publication can serve to add breadth and depth to the body of professional knowledge in the Public Management field (3000 maximum word length). (45%)

Case analysis: Write a case-analysis that recovers the design of a public organization's primary working phenomenon/a. The purpose of the case-analysis is to furnish design-references for future use in managing public organizations. Choices of cases to analyze will be limited (3000 maximum word length) (45%)

Class participation: Based on attendance, contribution to class discussion, and posting responses to target statements about readings in early weeks of the course. (10%)

**MG403 Half Unit****Pricing Strategy**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Om Narasimhan MAR 6.32

**Availability:** This course is available on the MSc in Marketing. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The content of the course is organised into two principal modules: (1) pricing strategy and fundamentals and (2) pricing tactics and implementation. The first module of the course covers the fundamental analytical tools, theories, and conceptual frameworks needed for price strategy formulation. Basic principles from marketing, economics, and psychology will be briefly reviewed and extended. The module provides an in-depth treatment of the role of price in the firm's value proposition to the customer and the determination of customer response to price. The second module of the course covers pricing tactics with an emphasis on pricing in the digital domain.

**Teaching:** 30 hours of seminars in the LT.

**Formative coursework:** Students will be engaged in analysing several cases, doing numerical problems, and analysing data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve numerical problems, case analysis, and analysing data sets). Students will be taking three short quizzes during the course of the term; these are meant to ensure a proper grasp of the concepts and tools covered in the lectures.

**Indicative reading:** *The Strategy and Tactics of Pricing: A Guide to Growing More Profitably* (2010): Nagle, Hogan, and Zale, Prentice Hall.

*Pricing Information: How to customize both the product and the price* (1998): Carl Shapiro and Hal Varian, Harvard Business School Chapters.

'Pricing as a Strategic Capability' (2002): Mark Bergen, Shantanu Dutta, Mark Ritson, Sloan Management Review

**Assessment:** Coursework (45%), project (40%) and quiz (15%) in the LT.

Coursework is an Individual Take-home assignment and the project will be in groups.

## MG404 Half Unit Consumer Insights: Behavioural Fundamentals

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Heather Kappes MAR 6.21

**Availability:** This course is compulsory on the MSc in Marketing. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** For many companies, non-profit organisations, and political figures, success relies on understanding the "consumers." What is it that they really want, and why? What information will they attend to, and what will they ignore? How do they make decisions, why do they sometimes make bad ones, and how can we help them make better ones? It can be tempting to answer these questions intuitively, based on your own experiences as a consumer. However, intuitions about human psychology are often wrong.

- Chronic and temporary sources of customer needs, desires, and motivations
- How customers search for information, acquire, and process information
- How customers allocate attention and how to attract it
- Customer decision-making processes, and the heuristics and biases that play a role
- The formation of attitudes and intentions, and processes for persuasively changing them
- Social influences on intentions and behaviour, including unconscious determinants
- Why intentions are or are not translated into behaviour, and what strategies can be used to narrow the intention-behaviour gap.

LSE offers two courses addressing consumer behaviour: MG404 Behavioural Fundamentals for Marketing and Management and PB417 Consumer Psychology for Sustainability. MG404 is designed for the students of Management to complement their curriculum, and PB417 targets the (future) decision-makers and advisers in business and organisations dealing with consumers, including non-commercial.

There are some similarities in the content of MG404 and PB417. Broadly, both courses introduce the psychological foundations of consumer behaviour, and are intended to equip students to apply psychological theories to business situations. There are, however, important differences in the orientations of the two courses. MG404 is intended for students studying management and

related disciplines, who want to learn how to influence consumer behaviour (e.g., how to construct persuasive advertising or sway purchase decisions). MG404 introduces the principles of consumer behaviour that firms need to recognize for successfully marketing their products and services, and which consumers themselves can use to make optimal decisions.

PB417 provides a skillset and a toolbox of theories and methods for analysing consumer demand, finding the levers for change and building sustainable business models. For assessment, students choose a real case and write a set of (justified) recommendations to the CEO. PB417 may especially be of interest to students across a broad range of programmes who are interested in developing new modes of relationship with consumers or building sustainable business models as an alternative to the current consumer society. The courses share some content where appropriate; other content differs in accordance with the different goals of the two courses.

**Teaching:** 30 hours of seminars in the MT.

This course has a reading week in Week 6 of MT.

**Formative coursework:** One quiz prior to the summative quizzes.

In-class discussions and instructor comments (e.g., on Moodle Forum posts) will help students prepare for the essay assignment.

**Indicative reading:**

- *Consumer Behavior*, 6th edition. Hoyer, MacInnis, & Pieters. South-Western Cengage Learning, 2010;
- *Consumer Behavior: Science and Practice*. Kardes, Cronley & Cline. South-Western Cengage Learning.
- *Influence: The Psychology of Persuasion*. Cialdini, Robert. Collins Business, 2006.

Further references, especially for journal articles and HBS case studies, will be provided at the commencement of the course.

**Assessment:** Essay (60%) and in-class assessment (40%) in the MT.

## MG409 Half Unit Auctions and Game Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Richard Steinberg MAR 4.13

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), MBA Exchange, MSc in Applicable Mathematics, MSc in Economics and Management, MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 45. Students on the waiting list will be selected based on their academic background.

**Pre-requisites:** Students should have a course equivalent to the LSE course Quantitative Methods (Mathematics) (MA107), which covers techniques of basic calculus and linear algebra, with emphasis on their application to economic problems. Students should also have some knowledge of probability.

**Course content:** The course provides an introduction to auctions and game theory. Topics covered are: noncooperative games, cooperative games, social choice, sequential and multi-stage games, auctions, and combinatorial auctions. In addition to the theory, a significant portion of the course will discuss applications. Specifically, four one-hour lectures each will be devoted to a single real-world application: caller display, competing Internet service providers, public housing space, and spectrum. We will also devote a two-hour lecture session to a Harvard Business School case based on five real-world applications of auctions: publishing, professional sport, on-line auctions, state privatization, and mergers and acquisitions.

**Teaching:** 16 hours of lectures and 12 hours of seminars in the LT. 2 hours of lectures in the ST.

A reading week will take place during Week 6. There will be no teaching during this week.

**Formative coursework:** Very full lecture notes are provided, and

every week a set of problems is given out in the lecture. These are discussed in the following seminars.

**Indicative reading:**

- Book: P. Cramton, Y. Shoham, and R. Steinberg, eds., Combinatorial Auctions.
- Book chapter: 'Auction Pricing', R. Steinberg, Chapter 27 in O. Ozer and R. Phillips, eds., Oxford Handbook of Pricing Management.
- Case study: 'Auction Vignettes', Harvard Business School Publishing.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## MG410 2.0 Units Term Abroad

**This information is for the 2022/23 session.**

**Availability:** This course is compulsory on the Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

**Course content:** CEMS MIM degree:

During Year 2 of the Global MSc in Management (CEMS MIM), students can apply to spend an international exchange term at a leading CEMS school, along with exclusive CEMS core courses in Global Management, skills seminars, block seminars, and an international internship.

MBA Exchange Term Abroad:

During Year 2 of the Global MSc in Management (MBA Exchange) students can apply to spend a term abroad at one of LSE's leading partner business schools in the US and Asia. Students will join an MBA class at their chosen school, and take a choice of optional elective courses offered by the school.

All students should register for the course code MG410 (Term Abroad) as their only LSE course for MT.

**Teaching:** July/August/September (according to the host school timetable) to December.

CEMS MIM partner schools: <https://www.cems.org/academic-members/our-members/list/>

MBA Exchange partner schools:

- University of Chicago - Booth School of Business
- Cornell University - Samuel Curtis Johnson Graduate School of Management
- Dartmouth College - Tuck School of Business
- Duke University - Fuqua School of Business
- Emory University - Goizueta Business School
- University of Michigan - Ross School of Business
- Northwestern University - Kellogg School of Management
- Peking University - Guanghua School of Management
- University of Texas at Austin - McCombs School of Business
- Yale University - School of Management

**Information for MBA Exchange track students**

All MBA Exchange students must take the following minimum number of credits/courses during the exchange term:

- Cornell: 12 credits
- Dartmouth: 12 credits
- Duke: 12 credits
- Kellogg: 4 credits
- Yale: 16 units
- Chicago Booth: 4 courses / 400 units
- Michigan Ross: 12 credits
- UT Austin: 12 credits
- Peking: 8-12 credits (4 classes)

Please be aware of the course choice regulations whilst on the MBA Exchange:

- LSE cannot validate non-taught courses as part of a student's term abroad grade. E.g. language, sports, skills workshops, society activities, oral communication etc. Only taught courses will be accepted.
- All students must ensure they take courses that award actual grades such as alphabetical grades etc.
- We are unable to use pass/fail courses as we cannot quantify or

convert them back into the LSE framework.

- LSE will not accept language courses.

**Information for LSE CEMS track students**

All LSE CEMS students must take 30 academic ECTS credits in Term 1.

All LSE students are required to take at least 30 ECTS credits in Term 1 so that they can meet the overall CEMS MIM Year ECTS course requirements.

- Total number of CEMS course (academic) credits that need to be taken in Term 1: 30 ECTS. 160 Students should not take courses that exceed the 30 ECTS requirement (unless due to the weighting of each course it is inevitable that the total amount of ECTS goes over by slightly by one or two ECTS credits).

- Total number of CEMS credits that should be acquired in Term 1: 34 ECTS. Academic courses and electives = 30 ECTS, Block Seminar = 3 ECTS, CEMS Skills Seminars = 1 ECTS.

- Maximum number of credits you are allowed to take in Term 1: 37.5 ECTS. This includes the Block Seminar and CEMS Skill Seminars.

Please be aware of the course choice regulations whilst on the CEMS term abroad:

- CEMS students must take the mandatory CEMS courses at their host institution and at LSE. In Term 1, this is Global Business Strategy (or similarly titled). In term 2, this is Global Leadership and the Business Project.

- Language courses are not included in the 30 ECTS requirement for LSE as the LSE GMiM degree does not recognise language courses as part of your LSE degree requirements. Students can take CEMS language courses to satisfy the CEMS language requirement only.

**Final considerations when choosing your classes on your term abroad:**

Students are not allowed to take more than the amount stated (unless due to the weighting of each course it is inevitable that the total amount of credits goes over by slightly by one or two credits.

LSE are not responsible for the course selection at the exchange schools. Some exchange schools do not offer a wide range of courses and you may find that some courses do not appeal to you.

However, you will still have to abide by minimum credit rule.

The GMiM Programme Office will not be held responsible for students who fail to meet the requirements listed above.

**Credit transfer from host university to LSE:**

The LSE term abroad does not operate on a pass/fail basis, and you will receive ONE final grade for your overall term abroad that will show as 2.0 units for MG410 in your second year.

LSE will then assign a number grade that will be used for LSE MG410, which is calculated using a weighted average of all the grades from courses taken during the exchange term.

We also take into consideration the variation in units for different courses.

Students can be awarded a 45 or 0 for failed courses depending on the nature of the fail.

**Assessment:** Courses equivalent to the value of 2.0 LSE units should be taken at one of the partner CEMS or MBA Exchange Institutions.

## MG411 Firms and Markets

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof John Sutton

**Availability:** This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.

**Course content:** A graduate course in microeconomic analysis, geared towards those parts of the subject that are of primary importance in the Management area. The first section focuses on competition between firms, using standard game theoretic models. This leads to a general treatment of market competition by reference to the concept of firms' capabilities. The next section

traces the basis of firms' capabilities to the set of elements of know-how possessed by the individuals comprising the firm, and by the mode of internal organization of those individuals. The analysis draws on the several strands in the modern literature on the theory of the firm. The final section of the course deals with the link between strategy and structure, and with the formulation of strategies in environments characterized by complexity and uncertainty.

The course syllabus covers Walrasian Equilibrium: Supply and Demand. Beyond the Walrasian model: Nash Equilibrium. Applications of Nash Equilibrium: options and bargaining. General approaches to the analysis of competition in oligopolistic markets. Applications in Industrial Organisations. The concept of capabilities. The roots of firms' capabilities : individuals and their collective know-how. The internal organization of firms. Contract theoretic approaches to the theory of the firm. The Chandlerian nexus: from strategy to structure.

**Teaching:** 20 hours of lectures and 20 hours of seminars in the MT. 20 hours of lectures and 20 hours of seminars in the LT. A weekly seminar devoted to problem sets. A weekly seminar devoted to case studies.

**Indicative reading:** Milgrom and Roberts, Economics, Organization and Management; Sutton, Sunk Costs and Market Structure

**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.

## MG412 Half Unit Not available in 2022/23 Globalization and Strategy

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof John Sutton

**Availability:** This course is available on the MSc in Economics and Management. This course is not available as an outside option.

**Course content:** The course studies the strategies of multinational corporations in an international context, with reference to make or buy, organization, and location choices. It studies current developments in the global economy with a focus on the key decisions that multinationals make in framing their global strategies:

1 Economic analysis of globalization process. Assessing the growth of Chinese and Indian manufacturing, 1990-2010. Evidence from benchmarking studies.

2 Production: What determines the strategies multinationals adopt - product range; generic strategies.

3 Location: Competitive advantage of different countries; growth in outsourcing and Offshoring; particularly emphasizing India and China and analyzing their increasing role in the global economy.

4 Organization: how multinationals combine the necessary local adaptation with the need to standardize to achieve efficiency.

5 The Globalization Debate.

6 The Prospects for sub-Saharan Africa.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students are required to make two class presentations and submit written reports on selected case studies

**Indicative reading:** A reading list will be provided at the start of the course.

**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.

## MG417 Half Unit Extended Essay

**This information is for the 2022/23 session.**

**Teacher responsible:** Various (depending on title chosen).

**Availability:** This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.

**Course content:** Students will undertake an extended essay which should normally be based on one of the two option courses taken. Students can, with special permission, base this piece of work on one of the compulsory courses.

**Teaching:** A supervisor will be allocated to individual students based on the essay title chosen who will provide students with supervision for this piece of work.

**Assessment:** Essay (100%, 6000 words) in the ST. Extended essay of no more than 6,000 words to be submitted the week before Summer Term commences.

## MG418 Half Unit Open Innovation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nadia Millington MAR 5.37

**Availability:** This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Management of Information Systems and Digital Innovation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Open innovation is a fresh take on innovation whereby a firm looks beyond its boundaries to exploit the creative power of users, communities and customers to co-develop new products, services and processes. Whether it is the fortune 500 companies that have used open innovation to transform their businesses (e.g. Proctor and Gamble and IBM) or even start-ups (such as iStock Photo); Open Innovation, through tools like crowdsourcing or open sourcing is disrupting markets and altering the nature of industries.

This course is divided into 2, a lecture stream and a project stream. During the lecture stream (roughly the first 5 weeks of the course) students will:

(1) Learn about the emergence of OI and how OI differs from other sources of external innovation.

(2) Learn to differentiate between the different types of OI tools (Crowdsourcing, Lead Users, Innovation Intermediaries, Design intermediaries, Innomediaries, Open Source) and to choose the right OI tool for different problem sets.

(3) Explore an emerging range of companies using open business models (e.g. Google, Facebook) in contrast to more traditional business approaches.

(4) Learn about the challenges of implementing OI and the drivers of success, not only based on practitioner sources but also in the context of organisational behaviour, innovation and network theory. During the project stream (roughly the last 5 weeks of the course) students work on a real live OI project developing solutions via the implementation of one or more open innovation tools. These last five weeks will also involve guidance from our Innovation partners (which in the past included companies like Google, Ludic Group, KPMG, Eidos) and in the final week of the term students will present their final solution.

**Teaching:** 30 hours of lectures in the LT.

Total of 40 contact hours in the LT.

30 hours of lectures

There are no seminars for this course, the additional 10 hours will comprise:

- Three 30-minute group sessions to help refine the scope of the project and develop the innovative solution.
- An introduction to your project session which lasts approximately 2 hours. This is usually held after class in the 4th week of the semester and refreshments are provided. But further details will be provided.
- A dress rehearsal at the end of the term where the student teams will exhibit their progress and will get feedback from the faculty team.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Students will be allocated to teams to undertake an Open Innovation consulting project. Whilst some class time is allocated to help teams progress their projects, as with any group project, student teams are expected to work independently beyond class times on their projects.

**Formative coursework:** Students will be provided with a formative essay, either in week 3 or 4 of the semester and grades and comments will be provided during week 7 or 8.

**Indicative reading:** Chesbrough, H.W. (2003). *Open Innovation: The new imperative for creating and profiting from technology*. Boston: Harvard Business School Press (chapter 1-3)

Brabham, D. (2008). *Moving the crowd at iStockphoto: The composition of the crowd and motivations for participation in a crowdsourcing application* First Monday, 13.

Fredberg, T., Elmquist, M. & Ollila, S. (2008) *Managing Open Innovation: Present Findings and Future Directions*, Vinnova VR 2008:02

Raffi Amit, C. Zott (2012), *Creating value through business model innovation*, *Sloan Management Review*, 53 (3), 41 - 49.

Tushman, M. L. and O'Reilly, C. A. (1996) 'Ambidextrous Organizations: Managing Evolutionary and Revolutionary Change', *California Management Review*, vol. 38, no. 4, pp. 8-30

**Assessment:** Essay (40%, 2000 words), group project (50%) and class participation (10%) in the LT.

The project assessment comprises an oral presentation and submission of PowerPoint slides with detailed appendices which provide evidence in support of your presentation.

## MG421 Half Unit

### International Business Strategy and Emerging Markets

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christine Cote MAR 5.25, Prof Saul Estrin MAR 6.16 and Dr Roger Fon MAR 4.16

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** An undergraduate or graduate course in international business, micro-economics or competitive strategy. Pre-requisites to be assessed by teacher responsible.

**Course content:** This course analyses the emergence of firms which operate across borders, often on a global scale, and their current and likely future interactions with emerging markets. It will combine the development of conceptual frameworks primarily through the lectures with the analysis of cases in the classes. Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades, their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The "new institutional economics" has recently developed as a field to understand the impact of variation in institutions on economic performance.

This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning,

and the resource based view. We provide an analysis of economic performance and growth in emerging markets building on the institutional economics and working with a large variety of data sets and sources. The course will then turn to key topics. These will include the determinants of FDI; the spillover effects of FDI on the host economy; entry mode choices; measures of institutional and cultural distance; and the growing importance of multinationals from emerging markets.

Students will work with case material as well as the required reading, and the group project will comprise a case write up, which will be presented prior to submission in class for comment and discussion.

**Teaching:** 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be required to write a 1,000 word essay and will be provided with feedback. They will also be required to present their group project in class.

**Indicative reading:** Dunning, John (1979). "Toward an Eclectic Theory of International Production: Some Empirical Tests". *Journal of International Business Studies*. 11 (1): 9-31.

R. Caves, *Multinational Enterprise and Economic Analysis*, 2nd Edition, Cambridge University Press 1996;

P. Ghemawat, *Redefining Global Strategy*, Harvard Business School Press, 2007;

J. Williamson, *The New Institutional Economics*, *Journal of Economic Literature*, 2000;

Estrin et. al., *Entry Mode in Emerging Markets*, *Strategic Management Journal*, 2009;

T. Khanna and K Palepu, *The Future of Business Groups in Emerging Markets*, *Academy of Management Journal* 2004.

**Assessment:** Project (40%) and class participation (10%) in the LT. Essay (50%) in the ST.

## MG422 Half Unit

### Thinking Strategically

**This information is for the 2022/23 session.**

**Teacher responsible:** Marina Agranov

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management (1 Year Programme) and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A knowledge of basic algebra is necessary to take this course.

**Course content:** This course is concerned with strategic thinking. The course is an interaction of game theory, economics and business strategic management. The focus is the study of situations in which two or more decision-makers (e.g., individuals, firms, political parties, etc) interact in a strategic manner. Understanding strategic situations that involve conflict and/or cooperation has proven critical in many areas of economics, business, political science, sports, law and other areas. The emphasis is to provide the fundamental thinking of good strategic making in these situations, rather than a mathematical and formal analysis.

The purpose of this course is threefold: (1) first, to introduce relevant tools of game theory in order to capture the key elements of different strategic situations and determine the most likely outcome in each situation; (2) second, to study various real-life applications and case-studies where thinking strategically has proven critical; (3) third, to cover modern developments in behavioural game theory, in particular in the areas of intertemporal choices and strategies, decision-making under risk and uncertainty, and experiments in strategic interaction.

Students should note that this course will involve weekly

calculations and numerical reasoning.

**Teaching:** 20 hours of lectures and 8 hours of seminars in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will have to complete 5-8 written assignments throughout the course, handing in 1-2 of them, and feedback will be provided.

**Indicative reading:** Thinking Strategically: Competitive Edge in Business, Politics and Everyday Life, WW Norton, 1993, by Avinash Dixit and Barry Nalebuff. The Art of Strategy, WW Norton, 2008, by Avinash Dixit and Barry Nalebuff. Games of Strategy, WW Norton, 3rd edition, 2009, by Avinash Dixit, Susan Skeath and David Reiley. Beautiful Game Theory, Princeton University Press, NJ, 2014, by Ignacio Palacios-Huerta. Set of academic articles and/or case studies, plus lecture notes written by instructor. Set of articles from the media.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

## MG430 Half Unit

### Firms & Markets in Emerging Economies

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Rocco Macchiavello MAR. 6.24

**Availability:** This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), MSc in Economics and Management, MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Marketing. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course applies tools from microeconomics, industrial organisation and organisational economics to the analysis of strategy. The emphasis is on the application of these concepts to business situations, and as such the course relies heavily on the analysis of case studies.

The course is divided into two parts. The first part focuses on the external context of strategy. It first reviews basic tools for understanding industry economics and the determinants of industry-wide profitability, focusing on positional aspects. It then applies basic game theory to analyse competitive interactions when the number of players is small and the industry profitability is largely determined by these players' interactions. This tool is used to analyse issues such as bargaining power, price competition and entry and exit decisions.

The second part studies the internal content of strategy. Topics vary from year to year and include, among others, strategy in the presence of standard setting and network effects, the scope of the firm, outsourcing and supply chain organizations, corporate governance in adding value and capturing synergies, internal management practices. This part relies on the application of both game theory, principal-agent problems and the analysis of empirical academic papers.

The course is heavily based on case discussions. For each class meeting, study questions will be assigned concerning a case study. We will discuss these questions and the material in the case during the class discussions. Students will need to prepare for class discussions by reading the assigned case and analysing it in view of the assignment questions. For each case, students are expected to prepare short slide deck discussing the case and be ready, if asked, to present their slides in the classroom to lead the discussion. Required cases and supplementary readings will be available on Moodle. The textbook, together with the lectures, contains the concepts necessary to analyse the cases.

**Teaching:** 20 hours of lectures and 12 hours of seminars in the LT. Students on this course will have a reading week in Week 6 of LT, in line with departmental policy

**Formative coursework:** Students are expected to prepare for classes and actively participate in case discussions. Students will receive feedback on their class participation. Students might be

asked to present during the class discussion to practice in view of the assessment. They will also be given the opportunity to discuss their preparation for the individual and group cases that count toward assessment during office hours devoted to this.

**Indicative reading:** A primary text will be: Saloner, G., Shepard, A. and Podolny, J. Strategic Management. New York, NY: John Wiley, 2001.

As mentioned above, cases and additional readings will be made available online.

**Assessment:** Group assignment (80%) in the ST.

Class participation (20%) in the LT.

(Class participation will be evaluated based on the quality and quantity of the student's participation in class.)

---

## MG431 Half Unit

### Managerial Economics

**This information is for the 2022/23 session.**

**Teacher responsible:** Mr Jose Vasquez Carvajal MAR 6.12

**Availability:** This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

**Course content:** A graduate-level introduction to the foundations of managerial economics. Topics include:

1. Consumer choice under certainty and uncertainty.
2. The theory of the firm and organizations.
3. Strategic interaction and dynamic competition.
4. Information and efficiency.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6 of MT, in line with departmental policy

**Formative coursework:** Problem sets will be assigned regularly.

They are meant to be practice for the final exam and they do not count for the final grade. The course leader will provide solutions to the problem sets after their due date.

**Indicative reading:** Useful textbooks (in no particular order):

- T van Zandt; Firms, Price and Markets, available online (2006); S. Estrin et al, Microeconomics, Prentice Hall (2008).
- D M Kreps, Microeconomics for Managers, W. W. Norton (2004).
- B. Douglas Bernheim and Michael D. Whiston, Microeconomics, McGraw Hill (2008).
- R. Pindyck and D. Rubinfeld, Microeconomics, Pearson.

Reading lists will be provided at the beginning of the course.

**Assessment:** Exam (90%, duration: 2 hours) in the January exam period.

Continuous assessment (10%) in the MT.

---

## MG434 Half Unit

### Organisational Behaviour

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Emma Soane MAR 5.39 and Dr Niranjana Janardhanan MAR 5.33

**Availability:** This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

**Course content:** This course seeks to understand individual, team and organisational-level attributes, processes and outcomes. It does this by reviewing psychological theories, thus demonstrating the contribution of psychological perspectives to understanding behaviour at work, and by critically evaluating empirical evidence. The course will balance theory and practice by applying the theories to organisations.

Topics covered will include personality and individual differences;

work motivation; rewards systems and the design of work; performance; health and well-being at work; creativity and innovation; team processes; leadership; power, influence and politics at work; organisational culture; and organisational risk.

**Teaching:** 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures and 1 hour and 30 minutes of seminars in the ST.

The teaching includes lectures and seminars. The teaching style is highly participative. Group work in seminars is an integral part of the course and students are expected to actively contribute to all group exercises. The course requires student commitment and willingness to engage fully with the readings and with seminar activities.

Students on this course will have a reading week in Week 6 of LT, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:** All course readings are articles from leading journals such as the *Academy of Management Journal* and the *Journal of Applied Psychology*. A full reading list is provided at the start of the course.

There is no set textbook for this course, however students may wish to consult one of the following:

- Colquitt, J., LePine, J. A., & Wesson, M. J. (2016). *Organizational Behaviour: Improving Performance and Commitment in the Workplace* (5th edition). McGraw-Hill;
- Robbins, S. P., & Judge, T. (2017). *Organizational Behavior* (17th Global Edition). Prentice Hall.

**Assessment:** Exam (75%, duration: 2 hours) in the summer exam period.

Presentation (25%) in the LT.

Students will work in groups to prepare and deliver a presentation that applies organisational behaviour concepts to a real organisation. Each group will select one specific organisation to focus on. Presentations must cover two topics from the course and include clear application of two relevant theories. Presentations are evaluated on the depth of subject knowledge; the quality of theoretical application and recommendations made; and, the structure and style of the presentation, including the quality of the materials and delivery of the presentation.

## MG439 Half Unit

### Organisational Behaviour for Master's in Management

**This information is for the 2022/23 session.**

**Teacher responsible:** Danny Heller

**Availability:** This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

This course is a core course for the one year MiM.

**Course content:** This course is about the people side of business. Although skills in finance, accounting, marketing and operations are crucial for organisational success, the ability to manage and understand an organisation, its groups, and its individuals is equally crucial. Technical skills may help you land a job, but people skills are likely to determine whether or not you keep it, and how much you can accomplish in your career.

In this course, we will explore a variety of perspectives and theories that explain the dynamics of individual, interpersonal, group, and organisational processes. Learning about these ideas will help you develop and apply insights about human behaviour in organisational settings. The course material will be useful in planning careers, managing relationships with other people, making complex decisions, designing jobs, becoming a leader, and making sense of today's – and tomorrow's – corporate world. This course will also help you understand some of the challenges involved in both managing and being managed. Ultimately, the tools and skills developed in this course should equip you to

become more effective contributors to the organisations that you join. Much of our learning in this course will be through case studies, exercises, and class discussions.

**Teaching:** 30 hours of lectures in the LT.

The format of the course is highly participatory and interactive and will involve a combination of case studies, interactive exercises, discussions and readings. Students are expected to attend course sessions and to participate actively in the discussions. Students' learning in this course is directly related to their willingness to expose their ideas and conclusions to the critical judgement of the class, and to their efforts to build on and evaluate the comments of classmates.

Full preparation for each session is essential. Students are to complete readings prior to the session for which they are assigned. Students on this course will have a reading week in Week 6, in line with departmental policy

**Formative coursework:** Students will be expected to produce 1 project in the LT.

The formative assignment will allow students to demonstrate their learning and receive in-depth feedback in preparation for a summative assessment. Details will be provided during the teaching term

**Indicative reading:** There is no set text for this course. The following are examples of articles that will be assigned: Harvard Business School case studies, academic journal articles, Harvard Business Review articles. Students will be given electronic access to cases, texts and articles during the teaching term.

**Assessment:** Project (40%), take-home assessment (30%) and continuous assessment (30%) in the LT.

Project (40%). This is a term-long individual paper, due the final week of Lent Term. Further details will be provided in the teaching term.

Take-Home Assessment (30%). This will be a written case analysis; further details will be provided in the teaching term.

Continuous Assessment (30%). The format of the course is highly participatory and interactive, and will involve a combination of case studies, interactive exercises, discussions and readings. Details will be provided in the teaching term.

## MG452 Half Unit Not available in 2022/23

### Behavioural Economics for Management

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Kristof Madarasz MAR 6.10

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Graduate level Microeconomics, Game Theory or Managerial Economics, Graduate level Econometrics or Quantitative Analysis is required.

**Course content:** The course covers formal (mathematical) models of behavioural economics and discusses both experimental and field evidence that motivate and test various aspects of these models.

This course is a post-graduate introduction to behavioural economics and strategy. The topics to be discussed are

1. Risk Perceptions, Loss Aversion and Reference-Dependence.
2. Procrastination, Self Control and Choice over Time.
3. Social Motivation: Image, Reciprocity and Inequity.
4. Processing Information and Mistakes in Cognition.
5. Naivite and Heuristics in Strategic Thinking.
6. Happiness and Welfare.

**Teaching:** 20 hours of lectures in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** A mock exam comprising of problem sets.

**Indicative reading:** Camerer, Colin, Linda Babcock, George Loewenstein, and Richard Thaler (1997) "Labor Supply of New York City Cabdrivers: One Day at a Time," *Quarterly Journal of Economics*

Fehr Ernst and Simon Gächter (2002) Fairness and Retaliation: The Economics of Reciprocity *Journal of Economic Perspectives*, 2000 (14); 159-181.

Kahneman, Daniel, and Amos Tversky (1979) "Prospect Theory: An Analysis of Decision under Risk" *Econometrica*, 47(2): 263-292.

Koszegi, B. and Matthew Rabin (2006) Reference-Dependent Preferences. *Quarterly Journal of Economics*

Laibson, David. (1997) Golden Eggs and Hyperbolic Discounting. *Quarterly Journal of Economics*

List, John A. 2004. "Neoclassical Theory Versus Prospect Theory: Evidence from the Marketplace," *Econometrica*, 72(2): 615-625.

Madarasz, Kristof (2012) Information Projection: Model and Applications. *Review of Economic Studies*

Thaler, Richard and Shlomo Benartzi (2004). Save More Tomorrow: Using Behavioral Economics to Increase Employee Saving, *Journal of Political Economy*.

Rabin, Matthew (2002) Inference by the Believers in the Law of Small Numbers. *Quarterly Journal of Economics*

Stortz, Richard. (1955) Myopia and Inconsistency in Dynamic Utility Maximization. *Review of Economic Studies*

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

---

## MG455 Half Unit

### Decisions, Biases and Nudges

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Barbara Fasolo MAR 5.27

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Marketing, MSc in Operations Research & Analytics, MSc in Risk and Finance and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped, and if place is available, it can be taken available as an outside option to students on any other programmes where regulations permit and is complementary to other behavioural courses offered at LSE

**Note for Exchange students:** You can take this course if your programme deadlines do not conflict with the beginning of the summer term deadline for MG455 summative coursework.

**Note for Auditors:** Due to the experiential nature of the course and groupwork required, this course is not suitable for auditing

**Pre-requisites:** It is an advantage to have had an introductory social science course in one of these fields: economics, management, psychology or sociology.

It is important to be comfortable with multi-disciplinary research, in-class activities and group work.

**Course content:** This course introduces students to Behavioural Decision Science: the science that explains and predicts how humans make decisions (the decision 'process') and how well (the decision 'outcome'). The course will focus on the process, and unveil the subtle and sometimes unconscious influences played by our mind (biases) and the context in which decisions are faced: What has been chosen in the past? Is there positive or negative affect - perhaps because of risk and uncertainty? All of these (and more) are factors that often determine how information is searched before choosing, how decisions are made, and the quality of the decision made.

In the theoretical part of the course, you will be guided to the scientific language of decisions, judgments and biases, and learn

how to elaborate on behavioural science articles. In the applied part of the course, you will work as a group and apply the steps of our proprietary tool 'Decision Canvas' to improve a real decision that you will select, applying different behavioural interventions – from 'debiasing' to 'choice architecture'.

The course is entirely seminar-based and balances theory, experiments and applications. It involves group-work throughout the course. We will alternate teaching with interactive activities designed to observe and feel the process of decision making from the 'inside', before reviewing behavioural decision theories and evidence from lab and field studies. Students will be able to apply the decision making skills acquired across different sectors and domains (e.g., managerial, policy, health, consumer).

The assessment is designed to give students the opportunity to work as a group and apply their new skills to support a real decision, as well as produce, individually, a rigorous and scholarly report on a specific aspect of decision making, of their interest.

**Teaching:** 25 hours of seminars in the LT.

Students on this course will have a reading week in line with departmental policy.

#### Formative coursework:

**1. Group submission** of mid-term progress on Decision Canvas (Group project) (week 5). Over several weeks (both in and outside class), you will work as a group to analyse a real decision that you will select. Students will submit progress on the group-work that they have done as a group in the first part of the course with the use of the 'Decision Canvas'. After the submission they will receive feedback as a group. This feedback will help you prepare for the summative Group project submission.

**2. Individual review** of anonymous essays (Week 7). Students will play the role of the "examiner" and review the anonymous essays (submitted by students from a previous year) by implementing the marking criteria which we use in this course. This exercise will help you develop your essay.

#### Indicative reading:

- Bazerman, M. (2017) *Judgment in Managerial Decision Making*. New York: Wiley. 8th edition;
- Kahneman, D. (2011) *Thinking Fast and Slow*. London: Allen Lane;
- Russo, J. E. & Schoemaker, P. J. H. (2002) *Winning decisions: How to make the right decision the first time*, Piatkus Publ. Limited.
- Larrick, R.P. (2004). Debiasing (Chapter 16). In D.J. Koehler, & N. Harvey, *Blackwell Handbook of Judgement and Decision Making*. Malden: Blackwell Publishing

**Assessment:** Essay (75%, 2000 words) in the ST.

Project (25%) in the LT.

**Group Project (25%)** in week 11. Over several weeks (both in and outside class), you will work as a group to analyse a real decision that you will select. In Week 11, groups submit their project on Moodle and give a short timed presentation of the decision, the bias and behavioural interventions recommended for the decision problem investigated with the 'Decision Canvas'

**Individual Essay (75% 2000 words)** (due beginning of ST): In the Essay (no more than 2,000 words) you will zoom in on a particular aspect of the course, or of the Decision Canvas which you as a developing behavioural scientist have found intriguing (e.g. decision frame, a judgement, a bias, a de-biasing or choice architecture technique). This is done in a scholarly and rigorous manner. You will be required to provide full essay-style referencing.

#### PDAM skills.

- self-management.
  - team working.
  - problem solving.
  - application of information skills.
  - communication
-

## MG456 Half Unit Not available in 2022/23 Strategic Decision Making

**This information is for the 2022/23 session.**

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Marketing. This course is available as an outside option to students on other programmes where regulations permit. This course is complementary to any behavioural course offered at LSE.

**Pre-requisites:** Elementary statistical and mathematical concepts, as well as a curiosity towards the fascinating field of decision making and a strong interest in rebooting your analytical "decision-ware".

As this course embraces the two key stages of the decision making process, i.e. the initial divergent and creative stage and the subsequent convergent and analytical one, please note that it is important to feel comfortable with interdisciplinary research, as well as with the use and discussion of both qualitative and quantitative strategies for successful decisions. Group work will also be a key component of the course.

**Course content:** This course is about making successful strategic decisions and building decision resilience during challenging times, in both the professional domain and the personal one. In this era of unprecedented uncertainty, learning how to make decisions against the backdrop of external factors that we cannot control or predict represents a fundamental skill for any sector of society and business. Knowledge of what it takes to develop a good decision making process is thus an invaluable part of everyone's toolbox, particularly for rising stars that will be in positions of leadership in the future. It is this ability that will be developed in this course, which introduces students to the key concept of decision quality and to cutting edge strategies and tools to integrate data and judgments and develop winning strategies.

This course's lectures will propose you a deep dive into the progressive stages of a strategic decision making process, with interactive experiments and puzzles to develop bias awareness and decision analysis expertise. Seminars will consist in interactive hands on sessions to master an actionable decision framework and become confident decision analysts. The learning outcomes of this course are twofold. First, you will discover what are the key decision traps we tend to fall into when framing, structuring and modelling decisions and why they are dangerous. Second, you will understand and master cutting edge, replicable and versatile solutions for framing, structuring, modelling and communicating better decisions.

**Teaching:** 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

A reading week will take place in Week 6. There will be no teaching during this week.

**Formative coursework:** Students will be expected to produce 1 presentation and 1 essay in the LT.

There are two pieces of formative assignments:

1. Group project plan presentation (i.e. the selected decision context, due in week 7).
  2. Group project pitch of the key decision analysis' impacts observed as a result of the strategic decision making process developed as a group across classes 2, 3, 4, and 6. Students will present and discuss the key impacts of their decision making process (e.g. discovery of new objectives that were not in their original mental models, recommendation of a different solution to the decision as a result of the used elicitation protocols, etc.) and receive real time feedback, from both their peers and the lecturer. Feedback will be provided following specific criteria (i.e. the same criteria that will be used to evaluate the individual technical account of the group project's impacts that is summative assignment n.2) and by completing a set of both descriptive and evaluative tasks (e.g. indicating the strongest part of the presentation, as well as parts that need revision, etc.).
- The above two formative assignments have been designed to

prepare the students for the following two summative works: (i) the group project presentation of the chosen decision making problem/opportunity and (ii) the individual technical account of one key impact observed in the group project.

The topic of the group project (i.e. a decision making problem or opportunity to be modelled and analysed by means of Multicriteria Analysis) can be a personal decision (e.g. which job offer to accept when confronted with multiple ones, which master to apply for, etc.) or a real world case (e.g. how to reduce plastic consumption in the LSE new coffee place). Students will have to collect data, develop and apply a quantitative model, interpret the results and refer to the key scientific literature for the main steps in the development of the model. Students are allowed to work in groups of maximum 4/5 people. This summative assignment will help students develop their strategic problem solving skills by demonstrating their ability to apply both qualitative and quantitative tools to frame, structure and model a decision, interpret its results, and develop sound recommendations.

In the individual technical account of the group project's impacts (max 1500 words), students will have to report on the developed process by focusing on the observed key impacts of the used tools. This second summative assignment will help students develop their critical thinking skills

**Indicative reading:** Belton, V. and Stewart, T. (2002) Multiple Criteria Decision Analysis. London, Kluwer.

Keeney, R.L. (1992) Value-Focused Thinking: A Path to Creative Decision-making. Cambridge: Harvard Univ. Press. HD30.23 K21 (Course Collection).

G.S. Parnell et al. (2013) Handbook of Decision Analysis. Hoboken, Wiley.

Spetzler C., Winter H., Meyer J. 2016. Decision quality: value creation from better business decisions. Wiley.

**Assessment:** Presentation (40%) in the LT.

Coursework (60%) in the ST.

Group presentation (40%) in the LT.

Technical report (60%) in the ST.

The presentation is a group project due in Week 11 of Lent Term.

The other assessment is an individual technical report (1500 words maximum) which will provide an explanation and insightful discussion of one key impact observed in the developed group decision making process. The individual report is due in Week 1 of Summer Term.

---

## MG458 Half Unit Foundations of Management I: Organisations and Management Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Rebecca Campbell MAR 5.15

**Availability:** This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

**Course content:** This course will equip students with a thorough understanding of the development of management and organisation theory since the emergence of modern industrial businesses in the late 19th century. Students will be provided with an overview of management as a subject of study and as a practice, and will develop an understanding of the disciplinary anchors in Sociology, Psychology and Economics. Within each field we will cover origins, disciplinary boundaries, triggers for growth, core concepts and the current state of play and debate. Weekly topics will include:

1. Course Introduction and the Origins of Management
2. Management and the Firm
3. Taylorism, Motivation, and Performance
4. The Rise and Decline of Labour
5. The Rise of Human Resources Management
6. Managerial Decision-Making

7. Understanding Organisational Structures  
 8. The Origins of Modern Strategy  
 9. Contemporary Strategic Management: Firms as Bundles of Resources  
 10. Financialisation and the crisis in capitalism  
 The course is also designed to introduce students to postgraduate study and learning at LSE, with instruction on academic reading, case analysis, critical thinking and writing skills.

**Teaching:** 20 hours of lectures, 10 hours of lectures and 15 hours of seminars in the MT.

Lectures will cover theoretical materials and concepts. Seminars will cover the assigned readings in more depth and include case discussions which will apply content covered in lectures to business situations.

Students on this course will have a reading week in Week 6, in line with departmental policy

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

Students will be expected to produce 1 case report in the MT.

**Indicative reading:** Willman, P. (2014) *Understanding Management: Social Science Foundations*. Oxford University Press. Wallace, M and A. Wray (2012). *Critical Reading and Writing for Postgraduates (Second Edition)*. London: Sage.

A full reading list will be provided at the beginning of the course.

**Assessment:** Exam (60%, duration: 2 hours) in the summer exam period.

Report (40%) in the MT.

## MG459 Half Unit

### Foundations of Management 2

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Yally Avrahampour MAR 5.24

**Availability:** This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

**Course content:** The aims of this course are to provide a basic grounding in the management literatures covering disciplines relating to financial control and management science, and of the literatures on the evolving managerial, organisational and professional contexts within which these disciplines are practiced. Students will be provided with an overview of each discipline with the aim that they acquire a basic working knowledge of each. The course will cover origins and disciplinary boundaries, the foundations of these disciplines in the social sciences, core concepts, practical applications and current state of play and debate. Weekly topics include:

- 1: Making Business Decisions that Commit Capital.
- 2: Representing a Firm's Financial Condition: 1.
- 3: Representing a Firm's Financial Condition: 2.
- 4: Valuing and Managing Costs.
- 5: Origins of Management Science.
6. READING WEEK.
- 7: Balanced Performance Measurement.
- 8: Measuring Shareholder Value.
- 9: Occupations, Professions and Expertise.
- 10: Individual and Institutional Investors in a Historical Context.
- 11: Organisation and Management Theory

**Teaching:** 22 hours of lectures and 30 hours of seminars in the LT. 3 hours of lectures in the ST.

Weeks 1-11: LT: 1 two hour lecture and 1 three hour case discussion, weekly. Students on this course will have a reading week in Week 6 of LT, in line with departmental policy

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

Students will be expected to jointly produce 2 group case discussion summaries.

**Indicative reading:** Weeks 1-8: Berk, J. & DeMarzo, P. (2014) *Corporate Finance*, Weetman, P. (2019) *Financial Accounting*:

An Introduction; Kaplan, R. & Atkinson, A. (2014) *Advanced Management Accounting*; Keys, P. (1994). *Understanding the Process of Operational Research*.

Weeks 9-11: Chandler (1990) *Scale and Scope*

**Assessment:** Essay (50%, 1500 words) in the LT.

Essay (50%, 1500 words) in the ST.

## MG460 Half Unit

### Emergencies Management: Humanitarian Intervention and Digital Innovation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Shirin Madon MAR 4.31 CON 8.09 and Dr Francesco Gualdi MAR 4.04

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Globally, the world is dealing with an unprecedented number of humanitarian crises such as natural disasters, armed conflict, forced displacement and major disease outbreaks such as Covid-19.

The course is anchored on two main observations:

First, over the past few decades humanitarian emergencies have been increasing in number and duration with the most devastating and long-lasting socio-economic effects in countries with weak physical and institutional infrastructures. Information and communication technologies have opened up new possibilities for the mitigation, preparedness and response to disasters, but its effective use requires change in the collaboration of humanitarian organisations and affected communities. In this course we will critically examine the potential opened by ICT innovation for managing crises.

Second, the course will connect core concepts and perspectives from humanitarian emergency literature to the unprecedented humanitarian crisis that the world is currently experiencing as a result of Covid-19 pandemic. At the global level, we will review and evaluate global networks and their value, while at the level of national economies and organisations we will study country strategies put in place to deal with the crisis. At all levels, digital innovations and technologies have become an absolute lifeline at different stages of the disaster management life cycle. As the Covid-19 crisis shows, the contribution from ICTs adoption needs to be carefully assessed in order to account for the economic, social and democratic challenges it might create.

More specifically, the course will cover the following thematic areas:

- humanitarian emergencies management and coordination structures for effective mitigation, preparedness and response
- emergency logistics and supply chain management
- ICT innovation and the development of organizational capacity for effective emergency action
- the link between episodic emergencies and long-term development in low-and-middle income countries
- managing pandemics through recent experiences

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will receive formative comments on both the group project and their individual essays. The formative essay is intended to help students explore available literature on the topic of their summative essay and give them feedback on how to proceed.

**Indicative reading:** Barnett, M. "Humanitarian Governance" *Annu. Rev. Polit. Sci.* (16) 2013, pp. 379-398.

**Assessment:** Project (30%, 5000 words), essay (55%, 3000 words) and class participation (15%) in the LT.

Group Project (30%, 25-30 pages) – this will relate to aspects of crisis management during the Covid-19 crisis.

Individual essay (55%, 3000 words) – enabling students to explore available literature on a topic related to the course.

Class participation (15%)

---

## MG463 Half Unit CEMS Global Leadership

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Connson Locke MAR 5.36

**Availability:** This course is compulsory on the CEMS Exchange. This course is not available as an outside option.

**Pre-requisites:** It is assumed that the students have already taken introductory Organisational Behaviour or Global Business courses. The 2nd year Global Master's in Management students are offered these prerequisites during their 1st year.

**Course content:** This course aims to answer the question, "How can I manage people in international settings and from different cultures?" By answering this question, you will develop

the skills to pursue an effective global career while keeping the core CEMS values of being responsible leaders contributing to a more open, sustainable, inclusive world. You will also develop an understanding of the challenges of interacting with and managing a diverse workforce in a complex environment characterized by distance-based interactions. Topics include: leader traits and attributes, cultural diversity, team leadership and virtual teams, power and influence, gender and the perception of leadership, organizational culture and change, global social responsibility.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:** Mendenhall, M.E., Reiche, B.S., Bird, A., & Osland, J.S. (2012). Defining the "global" in global leadership. *Journal of World Business*, 47: 493-503.

## MG464 Half Unit CEMS Global Business Strategy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Christine Cote MAR 5.25 and Dr Roger Fon MAR 4.16

**Availability:** This course is compulsory on the CEMS Exchange. This course is not available as an outside option. This course is compulsory for CEMS students.

**Course content:** The course examines how firms shape their international strategies in an ever-changing global environment. It will consider the context of globalisation with a focus on the relationship between international trade and investment, the emergence of global supply chains and the transformative role played by technology and innovation. It will seek to understand why and how firms internationalise as well as how they can create and sustain competitive advantage while operating across borders and in different institutional environments. Themes covered in this course will include the growing importance of emerging markets, the role of disruptive technologies in transforming industries, exploiting firm's resources and capabilities and sustaining cross border competitive advantage through strategies of global integration or local adaptation, managing staff across borders and creating shareholder value while ensuring corporate social responsibility.

**Teaching:** 30 hours of combined lectures and seminars in the MT. Students on this course will have a reading week in Week 6 of MT, in line with departmental policy

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:** Côté, C., Estrin, S. & Shapiro, D. Expanding the international trade and investment policy agenda: The role of cities and services. *J Int Bus Policy* (2020). <https://doi.org/10.1057/s42214-020-00053-x>

Bartlett, C. and Ghoshal, S., 'Tap Your Subsidiaries for Global Reach', Harvard Business Review, 1986

**Assessment:** Essay (45%, 2000 words), in-class assessment (45%) and class participation (10%) in the MT.

For the in-class assessment, the total mark (45%) will be comprised of one in-class group presentation.

## MG465 Half Unit

### Managerial Economics for Masters in Management Students

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Daniel Gottlieb 6.25 MAR

**Availability:** This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

**Course content:** This course is a graduate-level introduction to managerial economics with a focus on its applicability to business decisions. Students will develop a rigorous way of thinking about managerial problems, issues and decisions that managers face, as well as enabling a better understanding of the external business environment in which an organisation operates. The emphasis is on widely-used theoretical principles. Topics include an in-depth understanding of the geometric structure of the supply & demand model and its applications, the interaction of government and markets, efficiency analysis, international trade, game theory, monopoly and oligopoly strategy, price discrimination, dynamic competition, strategic moves, and information economics.

This course develops tools that are the foundation of courses in Marketing, Business Strategy, and Finance, which students will take in core courses throughout the rest of the year.

**Teaching:** 20 hours of seminars and 9 hours of classes in the MT.

**Formative coursework:** Students will be expected to produce 5 problem sets in the MT.

**Indicative reading:** T van Zandt, Firms, Price and Markets, available online (2006); S. Estrin et al, Microeconomics, Prentice Hall (2008).

D M Kreps, Microeconomics for Managers, W. W. Norton (2004); B. Douglas Bernheim and Michael D. Whiston, Microeconomics, McGraw Hill (2008).

**Assessment:** Exam (60%, duration: 2 hours) in the January exam period.

Class participation (10%) and in-class assessment (30%) in the MT.

## MG466 Half Unit Not available in 2022/23

### Supply Chain Management

**This information is for the 2022/23 session.**

**Teacher responsible:** Anran Li

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** None

**Course content:** Supply chain management is concerned with matching supply with demand. Excess supply is too costly, inadequate supply adversely impacts both current revenue and future demand. The course will cover the following key topics: supply chain inventory management, demand forecast and information sharing in supply chain, the manufacturer-retailer supply chain, centralised vs decentralised supply chains, sourcing policy and the buyer-supplier relationship, global sourcing and supplier management, supply chain network design. The course will also discuss tools for managing supply chains, re-engineering the supply chain, and the role of IT in supply chain integration.

**Teaching:** 18 hours of lectures and 12 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 6 exercises in the LT.

Six exercises in the last six weeks of the course.

**Indicative reading:**

- "Fast, Global, and Entrepreneurial: Supply Chain Management, Hong Kong Style (An interview with Victor Fung)"
- "Sorenson Research Company, Abridged," Harvard Business School, Case 9-677-257.
- The Bullwhip Effect in Supply Chains. H.L. Lee, V. Padmanabhan, & S. Whang, Sloan Management Review, Spring 1997.
- "Sport Obermeyer Ltd." Harvard Business School, Case 695022
- "Northco (A)," Harvard Business School, Case 9-697-017.
- "Barilla SpA (A)", Harvard Business School, Case 9-694-046.

**Assessment:** Essay (50%, 3000 words), presentation (20%), continuous assessment (20%) and class participation (10%) in the LT.

The presentation will be completed in groups of no more than three students per group.

## MG467 Half Unit Not available in 2022/23

### Strategy and Change in Public Sector Management

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Michael Barzelay NAB 3.19

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Management of Information Systems and Digital Innovation. This course is available as an outside option to students on other programmes where regulations permit.

This course cannot be combined with MG402 Public Management: A Design-Oriented Approach.

**Pre-requisites:** N/A

**Course content:** The course is designed to strengthen professional competences in effectuating the intent of public organizations, public programs, and related forms of enterprise within government. In support of this aim, the course enables students to acquire – and use – professional knowledge about public organizations, especially the performance of their constitutive management functions of planning, directing, coordinating and controlling. The focus of knowledge-use is within design-projects whose role within public organizations is to generate novel mechanisms in the form of systems, plans, and performances. The use of this knowledge is accentuated through theory-based experiential learning aimed at improving the professional abilities of sense-making, designing, argumentation, and dramatization – all of which involves mechanism-intent thinking about public organizations. Further, the course teaches how to translate purposive theories of enterprise-management into useful reference

points for public organizations and their design-projects; in complementary fashion, the course examines the theory and practice of conducting case studies with the aim of providing insight into how mechanisms work within situated public organizations to perform their management and other functions and, thereby, to effectuate their intent in creating public value. The teaching format includes discussion of case study analysis and design. The course also considers the past and future of public management as a design-oriented professional discipline.

**Teaching:** 30 hours of lectures in the LT.

It will be open to students on this course to attend a writing skills workshop in Week 6 on foundations of understanding and presenting mechanism-intent argumentation about enterprises and managing. This session does not form part of the formal teaching on the course.

**Formative coursework:** Students will be expected to produce 1 essay in the LT and 1 essay in the ST.

**Indicative reading:** M. Barzelay, *Public Management as Design-Oriented Professional Discipline* (2019), M Moore, *Creating Public Value: Strategic Management in Government* (1995); S Funnell & P Rogers, *Purposeful Program Theory: Effective Use of Change and Logic Models* (2011), M Barzelay & C Campbell, *Preparing for the Future: Strategic Planning in the U.S. Air Force* (2003); J Bryson, *Strategic Planning for Public and Nonprofit Organizations* (2018); E Bardach, 'The Extrapolation problem: How can we learn from the experience of others?' (2004); J van Aken, et al, *Problem-Solving in Organizations* (2007), J Tandler & S Freedheim, 'Trust in a rent-seeking world: Health and government transformed in northeast Brazil' (1994), P Coughlan, J Suri, & K Canales, 'Prototypes as (design) tools for behavioral and organizational change: A design-based approach to help organizations change work behaviors' (2007), and W Booth, G Colomb & J Williams, *The Craft of Research* (2006).

**Assessment:** Essay (45%, 2500 words) and case analysis (45%). Class participation (10%) in the LT.

The assessment for this course consists of the following:

A 2,500 word case analysis (45% of overall mark).

A 2,500 word individual essay (45% of overall mark).

Class participation (10% of overall mark)

## MG468 Half Unit

### Foundations of Management III: Business Ethics, Corporate Governance and Ethical Leadership

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Alexander Pepper MAR 5.38

**Availability:** This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

This is a core course for Global Master's in Management students and is not available as an outside elective.

**Pre-requisites:** This is a second year course for Global Master's in Management students who must have successfully completed the first year of the programme.

**Course content:** The purpose of the course is to provide students with a thorough understanding of key ideas in business ethics, corporate governance and ethical leadership, in order to prepare them for future leadership roles. Business leaders have a special role to play because of their ability to determine an organisation's mission, vision and values, how companies should be governed and led, and the ethical standards which business should aspire to. In the first part of the module, we consider two historical approaches to the ethical responsibilities of managers. According to the shareholder value maximisation approach, the interests of shareholders take priority over the interests of other stakeholders. According to the stakeholder approach, managers are morally obliged to balance competing stakeholder interests in their

decision-making. We discuss how both these approaches are importantly incomplete, and how a combination of two more recent approaches, the so-called "team-production theory of company law" and "market failures approach", may provide a viable alternative.

In the second part of the module we look at corporate governance, focusing in particular on the different roles of directors, managers and the main board.

In the final part of the module we look at organisational leadership in the context of business ethics and corporate governance. We examine various models of organisational leadership, including Michael Maccoby's thesis that many business leaders today are "productive narcissists", as well as recent research on authenticity, gravitas, and ethical leadership.

Our teaching encourages students to address questions such as:

- What obligations do business leaders owe to shareholders, employees, customers and other stakeholders?
- What is the difference between corporate governance and organisational management?
- What is the difference between organisational management and business leadership?
- What are the incredible pros and inevitable cons of narcissistic leadership?
- Are normative questions of "character" relevant in an organisational context?
- What constituted good ethical decision-making?

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT.

**Formative coursework:** Formative feedback will be provided in respect of participation in seminars.

**Indicative reading:** General

Mayer, C. (2018) *Prosperity: Better Business Makes Greater Good*. Oxford University Press

Business ethics

Heath, J. (2014) *Morality, Competition, and the Firm: The Market Failures Approach to Business Ethics*. Oxford: Oxford University Press., especially Chps 1,2 and 4, which are particularly relevant for weeks 2-4.

Moore, G. (2016) *Virtue at Work – Ethics for Individuals, Managers, and Organizations*. Oxford University Press, especially Chapter 4, relevant for week 11.

Governance

Mook, L. (2013) (ed.) *Accounting for Social Value*. University of Toronto Press

Tricker, B. (2019) *Corporate Governance: Principles, Policies and Practices* 4th ed. Oxford University Press

Leadership

Maccoby, M. (2007) *The Leaders We Need: And What Makes Us Follow*. Harvard Business Review Press., relevant for weeks 8-10.

Miller, C. (2018) *The Character Gap - How Good Are We?* Oxford University Press.

Newton, R. (2019) *Authentic Gravitas: Who Stands Out and Why*. The Orion Publishing Company Limited., relevant for weeks 8-10

**Assessment:** Assignment (75%), group exercise (15%) and other (10%).

Assessment is in three parts:

1. A slide deck (5 slides only) to be submitted in connection with a case study presentation (15% of total marks, assessed on a group basis).
2. Speaker's notes (500 words) to be submitted in connection with the debate in Week 11 (10% of total marks, assessed on an individual basis)
3. A 3500 word summative assignment (75% of total marks, assessed on an individual basis) to be completed at the end of the course.

## MG469 Half Unit

### Extended Essay for Management

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jonathan Liebenau MAR 5.30

**Availability:** This course is compulsory on the Global MSc in

Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

**Pre-requisites:** Students must have taken either 'Introduction to Quantitative Analysis (MY451L / MY451M)' or 'Applied Regression Analysis (MY452L / MY452M)'.

**Course content:** Students will undertake an extended essay which should normally be based on previously studied courses. It will not involve any primary research.

**Teaching:** 1 hour of lectures in the MT. 2 hours of lectures in the ST.

**Formative coursework:** Students will be required to submit a short outline of their proposed topic in week 8/9 of Lent term in order for a supervisor to be allocated. The supervisor will provide "light touch" supervision.

**Indicative reading:**

- Wray, Alison and Mike Wallace (2006). *Critical Reading and Writing for Postgraduates*. London: Sage
- Booth, Wayne C., Gregory G. Colomb and Joseph Williams (2008). *The Craft of Research*. Chicago: University of Chicago Press.

- Easterby-Smith, Mark, Richard Thorpe, and Paul Jackson (2012). *Management Research* (4th edition). London: Sage.

**Assessment:** Essay (100%, 6000 words).

---

## MG470 Management Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jonathan Liebenau MAR 5.30

**Availability:** This course is compulsory on the Global MSc in Management. This course is not available as an outside option. This is available to students on Global Masters in Management only.

**Pre-requisites:** Students must have taken either 'Introduction to Quantitative Analysis (MY451L / MY451M)' or 'Applied Regression Analysis (MY452L / MY452M)' and another methods course from the electives list.

**Course content:** Dissertations are based on a research question which students are required to agree with their assigned dissertation supervisor in year two.

Research questions may be investigated by:

- (a) Framing the question via a literature review and examining the problem in more detail through a small scale empirical research project, using either primary or secondary data sources; OR
- (b) Carrying out an extended literature review to provide a rigorous analysis of existing research investigating the problem.

This course is compulsory on the Global MSc in Management. This course is not available as an outside option.

**Teaching:** 3 hours of lectures in the MT. 4 hours and 30 minutes of lectures in the LT.

**Formative coursework:** No formative work is appropriate but students will meet regularly with advisers so will have an indication of how they are progressing.

**Indicative reading:**

- Wray, Alison and Mike Wallace (2006). *Critical Reading and Writing for Postgraduates*. London: Sage
- Booth, Wayne C., Gregory G. Colomb and Joseph Williams (2008). *The Craft of Research*. Chicago: University of Chicago Press.
- Ridley, Diana (2008). *The Literature Review: A Step-by-step guide for students*. London: Sage.
- Tharenou, Phyllis, Ross Donohue, and Brian Cooper (2007). *Management Research Methods*. Cambridge: Cambridge University Press.
- Gill, John and Phil Johnson (2010) *Research Methods for*

*Managers* (3rd edition). London: Sage

- Easterby-Smith, Mark, Richard Thorpe, and Paul Jackson (2012). *Management Research* (4th edition). London: Sage.

Other readings will be provided during lectures in MT and by dissertation advisors.

**Assessment:** Dissertation (90%, 10000 words) in August. Essay (10%, 1000 words) in the LT.

---

## MG471 Half Unit Not available in 2022/23 Chinese Economy: Entrepreneurship, Innovation and Growth

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Ruixue Jia

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Management (1 Year Programme) and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit. Course is available at the discretion of the Course Leader and following the admissions criteria of the Dept of Management.

**Course content:** Why has China been growing so fast in the past few decades? Is China's economic growth sustainable? How do firms behave in such a quasi-market economy known for a lack of rule of law and weak property rights? The course is designed to investigate these topical questions and provide students with a general overview of existing research on China's development, with emphasis on economic and management perspectives.

This course consists of lectures and group sessions related to China's development, organized along the behaviour of firms. We will cover the following major topics:

- 1) Institutions: Firms in the shadows of governments.
- 2) The State vs. the Private Ownership: what is the difference?
- 3) Entrepreneurship: who create the private firms?.
- 4) Innovation: does firms' innovation follows the government or the market?.
- 5) Chinese Investment Abroad: what are the consequences?

In addition, the course also aims to help students find topics for their future research such as their master thesis.

**Teaching:** 20 hours of lectures and 10 hours of seminars

**Formative coursework:** Each student is expected to present twice in this course with prepared slides. Students will receive feedback on both substance and presentation skills.

**Indicative reading:**

- Naughton, Barry J. *The Chinese economy: Adaptation and growth*. MIT Press, 2018. Chapter 14, 15
- Song, Zheng, Kjetil Storesletten, and Fabrizio Zilibotti. "Growing like china." *American economic review* 101, no. 1 (2011): 196-233.

- Chen, Zhao, Zhikuo Liu, Juan Carlos Suárez Serrato, and Daniel Yi Xu. Notching R&D investment with corporate income tax cuts in China. No. w24749. National Bureau of Economic Research, 2018.

**Assessment:** Essay (50%), group presentation (40%) and class participation (10%) in the LT.

---

## MG472 Half Unit

### Management and Socioeconomics of Digital Innovation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Antonio Cordella MAR 4.35

**Availability:** This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** This course has a strong focus on the management and economics of digital innovation and assumes a general understanding of the key information and communication technologies. Students are expected to have a basic understanding of the implementation and management of information systems in organisations.

**Course content:** The objective of this core course on the MSc MISDI programme is to address the managerial challenges associated with the most innovative digital innovations. This course does not focus on one specific technology but rather on the managerial, economic and organisational factors that shape the value generated by different clusters of digital innovations. Examples will be drawn from the implementation of digital innovations, such as platforms and ecosystems; artificial intelligence and learning algorithms; blockchain technologies; social computing; information services; and open innovation. The focus of this course is on the factors and processes that determine how different digital innovations create value for the organisations adopting them.

Discussing technological and organisational factors that determine business value creation led by different digital innovations the course provides unique managerial skills to successfully manage and exploit digital innovations to enhance organisational performance and business value creation. Whether organizations operate globally, regionally or nationally they are highly dependent on digital innovations produced by information and communication technologies for fulfilling their missions.

This course reviews the managerial and economic foundations of information systems and digital innovation and examines key insights about the emerging roles of ICTs and digital innovation in supporting organizations' performance. In this course we examine how the digital innovation-created value for organisations is dependent on specific economic dynamics and management strategies. Having reviewed distinctive digital innovations widely adopted by contemporary organisations, we identify issues of critical importance for information systems management including: the analysis of the economic dynamics that determine how different information systems generate value; the analysis of the technical functionalities of information systems; the assessment of the impact that these technical functionalities have on the business performance; the evaluation of business and organisational challenges associated with digital innovation adoptions; and how to best negotiate the organisation's business needs with technological requirements and functionalities.

The course provides a strategic overview of the management of information systems and innovation. We review theoretical approaches and frameworks used in practice and consider them alongside the academic literature on transaction costs, network economics, information systems strategy, and organization studies. Students studying this course will gain an understanding of how trends in strategy and operations are entangled with current processes of digitization and what these conditions of possibility mean going forward.

At the end of the course participants will be able to:

- 1 Understand what digital innovation is and how it shapes the contemporary economy.
- 2 Learn the fundamental theories, frameworks and strategies of management, economics and technology that underpin digital innovation business evolution.

- 3 Understand how leading cases of digital innovation generate value and how to successfully manage the associated challenges.
- 4 Recognise the complexity of factors that shape digital innovation business models

5 Use analytical frameworks for understanding the impact of digital innovation on organisational performance

6 Recognise and make recommendations on the strategic potential and impact of information systems and digital innovation in different organizational contexts.

7 Decide how organisations can best evolve in new markets.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

A reading week will take place in Week 6. There will be no teaching on MG472 during this week.

**Formative coursework:** Classes are based around reading and discussing selected journal articles from the course reading list. Formative feedback is provided on a mock examination, with questions from MG472, MG481 and MG487 will be held.

**Indicative reading:**

Essential Readings to be done on a weekly basis to build up general knowledge:

- The Economist – weekly news and regular relevant special studies.
  - The Financial Times – daily world commentary, regular regional/ theme special issues and archive.
  - The Wall Street Journal – detailed daily world commentary.
- The main journals that students may wish to search for additional articles on globalisation, business strategy, management and digital business are:
- Academy of Management Executive
  - Academy of Management Review

- Strategic Management Journal
- Long Range Planning
- Journal of Management Studies
- Journal of International Business Studies
- Journal of Management
- Management Information Systems Quarterly
- Executive
- Journal of Strategic Information Systems
- Organization Science
- Management International Review
- Harvard Business Review
- Sloan Management Review
- California Management Review

**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.

---

## MG473 Half Unit Negotiation Analysis

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr. Aurelie Cnop

Dr. Karin King

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Being a skilful negotiator is a core competence of effective managers in organisations today. This course introduces students to the essential concepts underlying effective negotiations and draws on both scholarly evidence and practical case exercises. The course curriculum covers essential negotiation concepts such as distributive and integrative bargaining, sometimes called pie-slicing and pie-expanding approaches, two-party and multi-party negotiation, as well as more advanced issues such as the impact of culture and the psychology of judgement and decision-making. Considering more advanced issues, lecturers highlight the importance of power, tactics, strategy, information and trust in shaping the structure and outcomes of negotiations. Students will engage in weekly negotiation simulation exercises to help them understand the concepts and develop their negotiation skills.

**Teaching:** 30 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Over the course of the term, students will compile a weekly learning journal reflecting on their experience in the negotiation case exercises and linking their analysis to the concepts and theories in the literature which have been taught in a given week.

Collective formative feedback is provided on case journals from weeks 1 through 4 and on class participation. Learning journals then form the foundation of the students' later summative work on the Negotiations Cases Journal. Students will also complete a formative essay. The formative essay is a learning activity which supports students to prepare for the summative essay.

**Indicative reading:** The main text, covering most of the material in the course is: Leigh Thompson, *The Mind and Heart of the Negotiator*, 7th edition Pearson, Harlow, 2020.

Students will be expected to read the set of essential readings which are provided in the MG473 Reading List. This is carefully curated for focus and quality over quantity.

The following texts are also recommended, as optional:

Roger Fisher and William Ury, *Getting to Yes: Negotiating Agreement Without Giving In*, Penguin Books, New York, 2012  
Ken Binmore, *Game theory: A Very Short Introduction*, Oxford University Press, Oxford, 2007

Andrew M. Colman, *Game Theory and its Application to the Social and Biological Sciences*. Routledge, Hove, 1999; Roy Lewicki et al 2020 *Negotiation*

**Assessment:** Essay (75%, 2000 words) in the ST.

Learning log (25%) in the LT.

Negotiation Cases Journal (25%) to be submitted in the LT and Essay (75%, 2000 words) to be submitted in the Summer Term. The Negotiations Cases Journal comprises 25% of the overall course grade and is submitted at the end of the Lent Term.

The course uses a continuous reflective exercise through the weekly use of a Negotiations Journal which comprises 25% of the overall course grade. Each week, students critically reflect on their experience in the week's negotiation simulation case. In doing so, students analyse each negotiation case based on knowledge of core concepts from the literature and write their analysis of the case in their Learning Journal in the form of a Learning Log for a given case. During the term, students submit their Negotiations Journal in draft, as a formative assessment for which they receive formative feedback. At the end of the term students submit their Negotiations Journal for summative assessment. In doing so, they select and submit their choice of three (3) of their case-specific learning logs.

The written essay is the second of two summative assessments in MG473 and comprises the remaining 75% of the overall course grade. The summative essay is submitted in the Summer Term. Summative essay questions are released at the end of the Lent Term when students submit their Negotiations Cases Journal.

---

## MG475 Half Unit Organisational Theory

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Lourdes Sosa MAR 5.40

**Availability:** This course is compulsory on the MSc in Human Resources and Organisations (Organisational Behaviour). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources) and MSc in Human Resources and Organisations (International Employment Relations/CIPD). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Organisations exert a central force in contemporary work and society. From the rise of large, machine-like bureaucracies in the 19th century to the flat, networked firms of nowadays, different assemblages of people and technology have produced a rich ecology of organisational forms – multinationals, R&D laboratories, etc. Organisational theory examines these arrangements with respect to their internal and external environment elements and dynamics - e.g. organisational design, inter-organisational collaboration, etc. The course readings include a selection of classic research on organisation theory to help students understand organisations as entities that influence the life of their members and affect work and society more generally.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will complete a formative assessment. Details will be provided in class.

**Indicative reading:** Foss, N.J. (2003). Selective Intervention and Internal Hybrids: Interpreting and Learning from the Rise and Decline of the Oticon Spaghetti Organization. *Organization Science*. 14(3): 331-349.

Baron, J.N., Hannan, M.T., & Burton, M.D. (2001). Labor Pains: Change in Organizational Models and Employee Turnover in Young, High-Tech Firms. *American Journal of Sociology*. 106(4): 960-

1012.

**Assessment:** Exam (50%, duration: 2 hours) in the summer exam period.

Essay (40%) and class participation (10%) in the MT.

## MG476 Half Unit

### Corporate Social Responsibility and International Labour Standards

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Sarah Ashwin, MAR 5.18

**Availability:** This course is available on the MRes/PhD in Management (Employment Relations and Human Resources), MSc in Accounting, Organisations and Institutions, MSc in Global Politics, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Human Rights and Politics and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Any social science background.

**Course content:** Corporate Social Responsibility (CSR) is becoming an expected element of corporate strategy. This course critically evaluates CSR, focusing on firms' attempts to prevent labour standards violations in their supply chains. We begin by analysing the rise of CSR, setting it in the context of global value chains, international labour standards, and emerging private forms of regulation. We then analyse topics such as: the impact of CSR on corporate financial performance; whether CSR is an effective means of raising labour standards; theories of CSR; how to embed CSR within the firm and comparative CSR. The course includes plenty of examples of how large firms are dealing with the ethical challenges posed by global supply chains. The course is interdisciplinary, and students are encouraged to bring insights from their "home" discipline so that seminars become a mutual learning experience. The course will include one lecture from a CSR professional.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

**Formative coursework:** One 2,000 word essay in LT.

**Indicative reading:** Crane, A. et al. (2008) *The Oxford Handbook of Corporate Social Responsibility*, Oxford: OUP.

Kaplan, S. (2019) *The 360° Corporation: From Stakeholder Trade-offs to Transformation*. Stanford: Stanford University Press.

Kuruvilla, S. (2021) *Private Regulation of Labor Practices in Global Supply Chains: Problems, Progress and Prospects*, Ithaca and London: ILR Press

Vogel, D. (2005) *The Market For Virtue: The Potential and Limits of Corporate Social Responsibility*, Washington D.C.: Brookings Institution Press.

**Assessment:** Essay (55%, 2000 words) and take-home assessment (40%) in the ST. Class participation (5%).

## MG477 Half Unit

### Strategic Reward: Key Models and Practices

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Rebecca Campbell MAR.5.15

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD) and

MSc in Human Resources and Organisations (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The aim of the course is to introduce the main theoretical models relating to employee and executive reward and to relate these to current pay practices. By the end of the course it is intended that students will be able to:

1. Describe the main economic, psychological and sociological theories relating to pay, reward and performance management;
2. Discuss current pay practices in both the private and public sectors, including variations between different countries, and evaluate these in light of the theoretical models;
3. Communicate effectively about pay and reward matters in a variety of professional and academic styles.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT. Students are expected to prepare for, and contribute to, the seminars. Seminars will include group work, preparing and giving presentations, case analyses, small group discussions, and self-assessment exercises. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will receive group feedback in class on case study analysis. In addition, regular informal quizzes will be conducted covering the readings or lecture material of the current week to support learners to consolidate their understanding of the main issues in the topic, to encourage questions, and to provide clarification.

**Indicative reading:** Course text books

Jones, E., and Perkins, S. (2020) *Reward Management, Alternatives, Consequences and Contexts*. CIPD, London (earlier editions are acceptable); White, G and Druker, J (2008) *Reward Management – a Critical Text*. Second edition. Routledge..

General reading

Gerhardt, B and Rynes, S (2000) *Compensation in Organizations, Current Research and Practice*. San Francisco, Jossey Bass.

Gomez-Mejia, L., Berrone, P., & Franco-Santos, M. (2010) *Compensation and Organizational Performance – Theory, research and Practice*. M.E. Sharpe

Hallock, K. (2012) *Pay – Why People Earn What They Earn (and What You Can Do Now to Make More)*. Cambridge University Press.

Pepper, A. (2015) *The Economic Psychology of Incentives*. Palgrave Macmillan..

Pepper, S. (2006) *Senior Executive Reward – Key Models and Practices*. Gower Publishing.

Trevor, J. (2011) *Can Pay Be Strategic?* Palgrave Macmillan.

**Assessment:** Case analysis (20%) in the LT Week 9.

Case analysis (70%) in the period between LT and ST.

Class participation (10%) in the LT.

## MG478 Half Unit

### The Management of People in Global Companies

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Katie-Anne Best

**Availability:** This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD) and MSc in Human Resources and Organisations (International Employment Relations/CIPD). This course is available on the Global MSc in Management, Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Organisational Behaviour) and MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course examines how current global factors influence the management of human resources in global enterprises. It explores how emerging digital technologies influence the forms of work and the roles of HRM in supporting

digital transformation and virtual work, the roles of HRM in supporting organizational changes such as merger & acquisition or outsourcing, and how HRM can help organizations meet contemporary social expectations such as diversity and social responsibilities. This is a practical course that draws heavily on case studies to analyze current issues in HRM and good practices. The course discusses topics such as: digital HRM, global virtual teams, flexible work arrangement and employee wellbeing, global diversity and inclusion, HR in mergers & acquisitions, outsourcing and HR, and HR & global corporate social responsibility.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT. Teaching will be supplemented by several guest speakers from leading industry practitioners.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will have the opportunity to write a management case memo based on a case discussed during the seminars. The feedback will prepare students for the summative case memos and analysis of new case in the final exam.

**Indicative reading:** Lazarova, M., Thomas, D. C., & Farndale, E. (2021). *Essentials of International Human Resource Management: Managing People Globally*. Edward Elgar Publishing.

Chong, S., Huang, Y., & Chang, C.-H. (D.). (2020). Supporting interdependent telework employees: A moderated-mediation model linking daily COVID-19 task setbacks to next-day work withdrawal. *Journal of Applied Psychology*, 105(12), 1408–1422. . Farh, C. I. C., Liao, H., Shapiro, D. L., Shin, J., & Guan, O. Z. (2021). Out of sight and out of mind? Networking strategies for enhancing inclusion in multinational organizations. *Journal of Applied Psychology*, 106(4), 582–598.

Edwards, M. R., & Edwards, T. (2013). Employee responses to changing aspects of the employer brand following a multinational acquisition: a longitudinal study. *Human Resource Management*, 52(1), 27–54.

**Assessment:** Class participation (10%).

Case analysis (30%) and take-home assessment (60%) in the ST. For the case analysis memos, each student will be expected to provide an individual solution to issues in the case

The take home assessment consists of an unseen case analysis and an essay question.

## MG479 Half Unit

### Information Systems for the Public Sector: Digital Government and Service Innovation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Antonio Cordella MAR 4.35

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation, MSc in Strategic Communications and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** Digital government and digital public sector services are the result of the widespread adoption of ICTs, Web processes and social media in public sector organisation - which cumulatively transform and may 'producize' the nature of public services delivered to citizens. This course covers the recent and likely-future major organizational and technology change processes in the government sector. Core topics include: the distinctive aspects of the public administration context for technology-enabled innovation; digital government and public sector reform; public sector ICT innovation and public value creation; the use of ICTs to streamline public services as part

of wider business process changes; measuring and growing productivity via digital changes; 'digital by default' services and social media in government; and next-generation shifts to EDGE (Essentially Digital Governance).

**Teaching:** 20 hours of lectures, 10 hours of seminars and 4 hours of workshops in the LT.

A reading week will take place in W6. There will be no teaching during this week.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

One 1000-word formative essay to be submitted in week 7.

Formative feedback is also provided on class participation with seminars based around reading and discussing selected journal articles.

**Indicative reading:**

- Shah R.C., Kesan J.P. & Kennis A., 2008. Lessons for Government Adoption of Open Standards: A Case Study of the Massachusetts Policy. *Journal of Information Technology & Politics*, 5(4), pp.387–398.

**Assessment:** Essay (60%, 3000 words) and project (40%, 12000 words) in the LT and ST.

The project coursework will be done in groups.

## MG480 Half Unit

### Foundations of Human Resource Management: Strategy and Practice

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Kathy Sun, MAR 5.10

**Availability:** This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

**Course content:** The course examines central issues pertinent to the theory and practice of Human Resource Management (HRM). It introduces students to a range of theoretical perspectives which underpin the ways in which organisations manage the employment relationship through the deployment of HRM strategy and policy. From a practice perspective, it reviews challenges involved in the design, implementation and evaluation of both overall HRM strategy and specific practice areas. In this respect we review HR policy and practice in the areas of diversity and inclusion, recruitment and selection, job redesign, training and development, employee voice and conflict, engagement, retention and attrition, performance management and appraisal, and strategic HRM.

**Teaching:** 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:** Students are expected to read widely in the appropriate journals; a detailed reading list will be provided at the start of the course.

For students who have not formally studied Human Resource Management previously and/or would like an introduction to course fundamentals, we recommend the following textbook:

- Torrington, et al. (2017). *Human Resource Management*. 10th edition.

If you already have an understanding of Human Resource Management foundations, we recommend the following textbook as it encompasses more than a fundamental text:

- Boxall, P.; Purcell, J.; & Wright, P. (2008): *The Oxford Handbook of Human Resource Management*, Oxford University Press.

Additional textbooks of interest include:

- Boxall, P. and Purcell, J. (2016) *Strategy and human resource management*. 4th ed. Palgrave
- Marsden, D (1999) *A theory of employment systems*, Oxford University Press.

**Assessment:** Exam (60%, duration: 2 hours) in the summer exam period.

Essay (40%, 1500 words) in the LT.

## MG481 Half Unit

### Innovating Organisational Information Technology

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Carsten Sorensen MAR 4.34

**Availability:** This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A basic knowledge of computing, including hardware and software. Students are expected to have a basic understanding of the challenges of implementing and managing information systems in organisations.

**Course content:** The course provides students with a practical and theoretical insight into the processes and practices of developing contemporary Information Systems. The course reflects the diversity of contemporary information systems contexts; discussing how we should manage the development of complex Internet enabled systems and services. The course focuses on new technologies and practices including cloud computing, Software as a Service, mobile and ubiquitous information technology, innovating customer relationship management, DevOps, mediating mutual adjustment and mass-scale mediated communities. The changing architectures of information systems towards an Internet based cloud are key themes of the course. Attention is however also given to the development of traditional ERP and information management systems which remain important in enterprises. The course also discusses the development challenges in small start-ups leveraging existing development platforms. Particular attention is given to problem structuring and problem design issues within such complex settings using Soft Systems Methodology and the Unified Modeling Language as a toolkit. Agile methods form a core part of the teaching, with Extreme Programming, Rapid Application Development and Internet-speed development contrasted with development formalism such as the Rational Unified Model and Capability Maturity Models. To ensure that students gain practical experience we include a one-week intensive "bootcamp" group Sprint project run during reading week in which outside consultants present a "real-world" case study of systems development and the groups undertake to rapidly analyse and design a proposal for a technical solution. This allows students to support their theoretical understanding with a strong practical experience of the pressures and difficulties of systems development today. The "bootcamp" group sprint project provides a realistic experience of developing systems within a consulting role and is supported by classes and question and answer session and face to face discussion. Students gain an understanding of the benefits and difficulties of working within a small team under pressure.

**Teaching:** 20 hours of lectures, 5 hours of seminars and 10 hours of seminars in the MT.

8 hours of these lectures, and 5 hours of classes will occur during the "Bootcamp" Sprint week which runs during reading week (Week 6) of MT.

**Formative coursework:** Students discuss articles, practice systems development techniques, and critically evaluate their success. Formative feedback is provided on class participation.

**Indicative reading:**

  - Zittrain, J. (2008): *The Future of the Internet: And How to Stop It*. Allen Lane.

**Assessment:** Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%) in the MT.

A two-hour unseen examination taken in the ST (50%). The team 'boot camp' project in Week 6 of the MT (50%).

## MG482 Half Unit Innovation and Technology Management

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jonathan Liebenau MAR 5.30

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The main focus of this course is on how innovative technologies are managed and their consequences. It includes technological innovation in areas such as telecoms, hi tech industries, pharmaceuticals, biotechnology, space technology, financial technologies. Aspects covered are how new industries are created, how existing industries can be transformed by new technologies, linkages between technological development and the creation of wealth, and implementation success and failure of technological systems. Topics include: technology and

entrepreneurship, technology strategy, R&D management, patents and intellectual property, disruptive radical and incremental innovation, technology policy. Economic, systems, managerial and sociological approaches will be compared using a variety of case studies.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Classes are based around reading and discussing selected journal articles and case studies available on or through the course Moodle site. Formative feedback is provided on class participation. In addition, students will present an essay plan in preparation for the final case-based essay, on which formative feedback will be provided.

**Indicative reading:** JJ Howells, *The Management of Innovation and Technology*, Sage, 2005;

C Perrow, *Normal Accidents: living with high-risk technologies*, Basic Books, 1984;

D Mowery & N Rosenberg, *Paths of Innovation: technological change in 20th century America*, Cambridge University Press, 1998;

**Assessment:** Essay (80%, 5000 words) in the LT.

Presentation (20%) in the MT.

---

## MG483 Half Unit eHealth: Policy, Strategy and Systems

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Elzbieta Taylor MAR 4.26

Teacher known as Ela Klecun.

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Health and International Development and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** There are no prerequisites. Students should have some appreciation of information management and systems implementation issues, and some understanding of healthcare systems. A short set of readings will be provided for students who require this background understanding.

**Course content:** This course aims to give the students theoretical and practical insights into the key issues informing policy and practice for digitalisation of healthcare. It does not teach technical design or programming skills but rather it aims to develop 'hybrid professionals' able to bridge healthcare management and information technology worlds. Hence, students from all backgrounds are welcomed.

As the result of COVID-19 pandemic healthcare is facing unprecedented challenges. Digital technologies are seen as critical in handling those. Many governments around the world are using digital channels to provide information to the public. Various apps are helping us to stay fit, to look after our mental health and to connect with health professionals. New systems have been developed for contact tracing. More significantly perhaps, the way the mainstream healthcare services, such as primary care are delivered is being transformed, from face-to-face to online. Simulation modelling and population based management tools are increasingly utilised to better plan and manage health of

populations and delivery of health services. Robotics and AI are hailed as breakthrough innovations. Many of the information technologies (IT) and service models utilized currently have existed in some form for years. Their adoption has been hindered by complex regulatory, organizational, social and technical problems. Significant challenges still remain. In this course we will explore opportunities for transforming healthcare and challenges faced in planning for, developing and adopting digital services and underlying healthcare information systems and infrastructures. The approach taken in this course to understanding those issues is informed by a socio-technical perspective that considers society (institutions, rules and regulations, work practices and people) and technology as inter-related. Both lectures and seminars are dedicated to presenting different aspects of eHealth. The seminars consist of student-led, in-depth discussions on issues related to particular topics within eHealth. The course assignments (blog post and essay) offer the students an opportunity to critically engage with their chosen topic. Topics addressed in the course include: assessing the transformative potential of digital technologies for health, the evolution and current state of information systems in primary and secondary care with international comparisons, healthcare policies for digital technologies and information infrastructures, issues of information systems implementation and use, evaluation of IT and building of an evidence base, new trends in health IT. Selected application domains discussed include: electronic health records and national information infrastructures, medicine management systems and e-prescribing, health apps, big data and data analytics, AI and robotics.

**Teaching:** 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

A reading week will take place in W6. There will be no teaching during this week.

**Formative coursework:** Seminars are based around reading and discussing selected journal articles. Formative feedback is provided on class participation. In addition, students complete formative proposals for their blog post and essay on which written feedback is provided.

**Assessment:** Essay (70%, 4000 words), class participation (10%) and blog post (20%) in the LT.

## MG486 Half Unit Not available in 2022/23 Social Computing, Data Analytics, and Information Services

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Jannis Kallinikos and Dr Zhi Cheng  
Dr Cheng is known as 'Aaron'.

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Media and Communications (Data and Society). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course is about the significance of digital data and the role they play in the current economy and society. The course reviews the technological arrangements, organisational forms and business models through and by means of which data are being produced and used. More specifically, the course pays attention to the role social media and commercial platforms play in engineering user participation to produce a computable data footprint that is subsequently used to develop a range of data-based resources and services.

The course also deals with the state-of-the-art data analytics techniques and methods used by social media and digital platforms to deploy personalisation strategies as a means of boosting user platform engagement and generating data. It covers the current and emerging approaches in data extraction, aggregation, predictive computing, personalisation and recommender systems, which shape the future of digital business strategy that builds on big data, machine intelligence and analytical thinking.

Overall, the course takes a unique approach to social media and commercial platforms by examining the data work they perform – encoding, aggregating, and computing – from the organisational, managerial and technical perspectives. The course blends theories, ongoing research insights, data analytics concepts and techniques, as well as real-life examples to analyse the socio-economic implications of these significant developments.

After students complete the course, they shall be able to:

- Explain the drives behind the evolution of social computing
- Understand data practices that underpin social computing and the digital economy
- Understand data infrastructures and ecosystems and the role they play in sustaining the operations of social media platforms and the digital economy
- Analyse business models of social media platforms
- Develop data-analytic thinking for decision-making in management and business
- Design a digital business strategy using the platform and algorithmic thinking
- Critically assess data-driven information services (e.g., personalisation, recommender systems) and their socio-economic implications.

**Teaching:** 20 hours of lectures, 9 hours of seminars and 3 hours of workshops in the LT.

The workshops will be dedicated to essay development.

There is a Reading Week in Week 6. There will be no teaching during this week.

**Formative coursework:** Written formative feedback is provided on the 500 words proposal for the summative essay.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the LT.

## MG487 Half Unit

### Innovation and Information Systems: Concepts and Perspectives

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Elzbieta Taylor MAR 4.26

**Availability:** This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Management (1 Year Programme), MSc in Media and Communications (Media and Communications Governance) and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The course explores the theoretical foundations for the study of digital innovation and concomitant organizational and social change. It integrates concepts and perspectives from the field of information systems and a range of other disciplines of the social sciences. By the end of this course, students will be able to draw from existing theories to address critically issues of

digital innovation, organizational change and information systems management.

The lectures cover literature related to three broad themes: digital ecosystems; the socio-technical process of the construction of digital technologies; information technology and organizational change. For each of these themes we identify and discuss relevant theoretical concepts and perspectives. The discussion of theories is structured in terms of technical/rational and socially embedded approaches.

**Teaching:** 15 hours of lectures, 18 hours of seminars and 5 hours of workshops in the MT. 1 hour of lectures in the ST.

This course has a reading week in Week 6 of the MT. There will be no teaching during this week.

**Formative coursework:** Formative feedback is provided at the seminars and the workshops. Seminars guide students to discuss selected journal articles that elaborate on concepts and theories introduced at the lectures. Workshops assist students to develop their critical literature review essay.

In addition, students will complete a formative essay of 750 words on which feedback will be provided.

A mock examination, shared with MG472 and MG481 will be held.

**Indicative reading:**

- Brynjolfsson E (2010), *Wired for innovation*, Cambridge, MA, The MIT Press.
- Ciborra, C (1993) *Teams, Markets, and Systems: Business Innovation and Information Technology* Cambridge, Cambridge University Press.
- Ciborra, C. (2000) *From Control to Drift: The Dynamics of Corporate Information Infrastructures* Oxford, OUP.
- Gawer, A. (ed) (2009), *Platforms, Markets and Innovation*, Cheltenham, Edward Elgar.
- Latour, B. (2005) *Reassembling the Social: an Introduction to Actor-Network-Theory*. Oxford, OUP.
- Tiwana, A. (2013) *Platform Ecosystems: Aligning Architecture, Governance and Strategy*, Amsterdam, Elsevier.
- Willcocks, L., and Mingers, J. (2004) *Social Theory and Philosophy for Information Systems*, Chichester, Wiley.

**Assessment:** Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 3000 words) in the MT.

## MG488A

### GMiM Capstone Course - Management in Action

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Emma Soane MAR 5.39 and Dr Rebecca Newton

**Availability:** This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

**Course content:** The GMiM Capstone Course builds connections between management theory and practice and aims to equip students with the skills necessary to succeed in their managerial careers. MG488 runs throughout the Global Master's in Management's first and second years.

First year students are prepared for MG488B by attending MG488A sessions during the first year of the programme. The MG488A programme comprises five speaker-led sessions for each of MT and LT. The remaining sessions can be used by students to have one to one meetings with a Careers Consultant or a member of the Capstone team from the Department of Management. Second year students are welcome to attend MG488A sessions. Second year students in MG488B apply the theoretical knowledge and business management skills gained in the first year by working on a business project. This takes place in either MT or LT and culminates in a presentation by each project team to their company sponsors and LSE faculty. At the start of term students

will be allocated to a client project team, typically comprising 5 or 6 students, supported by a sponsoring executive and a faculty coach, to carry out research on a business question posed by the client company. The actual topic is for the sponsoring organisation to decide and questions have historically been very diverse.

**Teaching:** 7 hours and 30 minutes of lectures in the MT. 7 hours and 30 minutes of lectures and 1 hour of lectures in the LT.

#### Year 1.

GMiM Capstone Lectures run once a fortnight throughout Michaelmas and Lent Terms. First year students are expected to attend all sessions. Students will also participate in a 30-minute blog group meeting in either Michaelmas or Lent Term. Additionally, there is a 60-minute assignment information session in Lent Term to help students prepare for their assignments.

#### Year 2.

In addition to the Capstone Lectures, in Year 2 there are 3 lectures to prepare students for the Business Projects taking place in the first weeks of either Michaelmas or Lent Term. The sessions cover a variety of topics, including a project overview, the basics of consulting, team building and working with your faculty coach. Students on this course will have a reading week in Week 6 of MT and Week 6 of LT, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

Students are invited to produce one essay in the Lent Term of their first year. The formative essay does not count towards grades but is an opportunity to get essay feedback in preparation for the summative essay.

Students produce an individual essay which considers the links between theory and practice. One essay title will be made available in Michaelmas Term of the first year. Essays will be submitted in Lent Term of the first year.

**Indicative reading:** Recommended readings will be provided for Capstone lectures when relevant.

**Assessment:** Essay (25%, 2000 words) in the MT.

Project (65%) and class participation (10%) in the MT and LT.

**Attendance at Capstone lectures** - 10% of total course marks.

Students are required to attend 10 Capstone lectures over the two years of the programme, with credits for attendance attached pro-rata to each session. Students must engage fully with session activities in order to receive attendance credit. It is recommended that students attend the 10 Capstone lectures in the first year of the programme.

**Individual Summative Assignment** – 25% of the total course marks. In year 2, students will write an academic essay on one of the Capstone lecture topics. Essay questions will be provided by the MG488 course team and will be made available in LT of the first year. Essays must consider application of management theory and practice. Students will submit their essays in MT of the second year.

**Group Business Project** - 65 % of total course marks. All business projects take place during the second year of study. Business projects are assessed on a group basis under three headings: quality of group presentation; quality of research (including application of theoretical concepts); quality of outcomes (recommendations and solutions) and other deliverables. Presentations for students working on their business projects in MT take place either via pre-recorded video/ in person during LT. Presentations for students working on their business projects in the LT take place via pre-recorded video or in person either during the last week of the LT or first week of the ST.

Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

**Pre-requisites:** Students must have completed GMiM Capstone Course - Management in Action (MG488A).

**Course content:** The capstone/ business project provides an opportunity to apply, integrate, and/ or deepen the knowledge, insights, and skills that students learn in the GMiM Master's programme at the LSE or an affiliate university that forms part of CEMS.

The project is a quasi- academic/ applied project which aims to analyse a real-world problem in a broadly related domain of the Master's program at one of LSE's corporate partners.

More specifically a quasi- academic / applied project requires that students support their analysis of the client partner's challenge / brief, with relevant theory - sourced from academic journals - and with some primary data collection where possible, leading to an evidence-based analysis and compelling recommendations. Every effort must be made to collect some first-hand evidence using standard research methodologies, but in different ways and to different degrees depending on the project.

One notable criterion for evaluation will be the way theory/research from academic journals whether taught in the degree programme/ independently sourced, are used to strengthen the analysis and recommendations of the project. Another criterion is the strength and implement-ability of the recommendations in relation to the client partner's objectives/ brief.

#### Project details

The projects will be sourced by LSE and are allocated, on average to groups of 4-6 students.

Client partners range from large multinational organisations to small social enterprises, located both in the UK and globally.

Students will be asked to indicate their project preferences and every aim will be made to place students in one of their preferred projects by week 3 of the term.

**Teaching:** 2 hours of lectures and 1 hour and 30 minutes of lectures in the MT. 2 hours of lectures and 1 hour and 30 minutes of lectures in the LT.

#### Year 1

GMiM Capstone Lectures run once a fortnight throughout Michaelmas and Lent Terms. First year students are expected to attend all sessions. Students will also participate in a 30 minute blog group meeting in either Michaelmas or Lent Term.

Additionally, there is a 60 minute assignment information session in Lent Term to help students prepare for their assignments.

#### Year 2

In addition to the Capstone Lectures, in Year 2 there are two 60 minute lectures and one 90 minute lecture to prepare students for the Business Projects taking place in either Michaelmas or Lent Term. The sessions cover a variety of topics, including a project overview, the basics of consulting, team building and working with your faculty coach.

Students on this course will have a reading week in Week 6 of MT and Week 6 of LT, in line with departmental policy.

#### Course Overview

Within the first 3 weeks of the term, the course leader is responsible for 3 separate lectures

-Course introduction.

-Project Introduction.

-Project kick-off

Further details about these sessions can be found in your timetable.

In the third week of the term/ beginning of the 4th week, each team will be provided with a dedicated faculty coach who will:

(i) provide guidance and advice throughout your project.

(ii) approve your research ethics form- (Student groups must complete an Ethics Review for their project).

(iii) if required, co-sign a non-disclosure agreement with your client partner and other members of your team. Should the client request one, a standard LSE non-disclosure agreement is available, but students may also be required to sign company-specific non-disclosure agreements.

## MG488B Half Unit

### GMiM Capstone Course - Management in Action

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Nadia Millington MAR 5.37

**Availability:** This course is compulsory on the Global MSc in

**Formative coursework:** The formative assessment will have been completed in the first year in line with the MG488A course guide.

**Indicative reading:** There are no specific readings for this course since all the projects differ greatly. However, many student groups utilise interviews / qualitative research as part of their data collection. The following book is very useful: *An Introduction to Qualitative research* – UWE Flick.

**Assessment:** Project (65%) and class participation (10%) in the MT and LT.

Essay (25%, 2000 words) in the MT.

**Attendance at Capstone lectures** - 10% of total course marks.

Students are required to attend 10 Capstone lectures over the two years of the programme, with credits for attendance attached pro-rata to each session. Students must engage fully with session activities in order to receive attendance credit. It is recommended that students attend the 10 Capstone lectures in the first year of the programme.

**Individual Summative Assignment** – 25% of the total course marks. In year 2 students will write an academic essay on one of the Capstone lecture topics. Essay questions will be provided by the MG488 course team and will be made available in LT of the first year. Essays must consider application of management theory and practice. Students will submit their essays in MT of the second year.

**Group Business Project** - 65 % of total course marks.

Student groups will be assessed via

-An oral presentation (approx 30-35 minutes)

-Written material- PowerPoint Slides of the oral presentation + appendices illustrating evidence in support of analysis and recommendations. There is no specific word count for this submission, but all written material must conform to LSE standards of post-graduate academic work, including explicit prohibitions against plagiarism.

-Students are also expected to present to the client.

Deadline for presentations will be established in the first week of the course but tends to be either the last week of the semester or the first week of the following semester.

---

## MG492 Half Unit

### Data Governance: Privacy, Openness and Transparency

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Edgar Whitley MAR 4.32

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Media and Communications (Data and Society). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The course provides a detailed consideration of the key elements of the concept of informational privacy, the open data movement and transparency. These topics lie at the intersection of diverse contemporary issues including, public sector reform, human rights, digital ecosystems and social networking, and the global and national regulation of business. The course content is international in focus, and reviews contemporary issues arising from new technologies, new policies of governments, new practices and business models in the private sector. Topics include personal privacy and identity systems; motivations for information sharing and transparency and its potential for driving beneficial change; transformations in the management of government information and processing practices; the technological and regulatory challenges faced by public sector and business; the protection of sensitive personal data including medical and financial information; data-mining in the context of national security and anti-terrorism policies; communications

surveillance policies; behavioural studies of privacy attitudes and the evolution of trust and consent in online environments. The course enables students to develop their understanding of the challenges presented by new informational regimes, their regulatory development and emerging governance structures.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT. A reading week will take place during Week 6. There will be no teaching during this week.

**Formative coursework:** Classes are based around reading and discussing selected journal articles. Formative feedback is provided on class participation. In addition, students will complete a formative essay plan on which feedback will be provided.

**Indicative reading:**

- Elliot, M., Mackey, E., O'Hara, K., and Tudor, C. (2020). *The anonymization decision-making framework* (Second edition.), UKAN Manchester (available at <https://ukanon.net/framework/>).
- ENISA (2015). *Privacy and Data Protection by Design*, (available at <http://www.enisa.europa.eu/activities/identity-and-trust/library/deliverables/privacy-and-data-protection-by-design>).
- Janssen, M., Charalabidis, Y., and Zuiderwijk, A. (2012). Benefits, Adoption Barriers and Myths of Open Data and Open Government, *Information Systems Management* 29(4), 258–268.
- Kaye, J., Whitley, E. A., Lund, D., Morrison, M., Teare, H., and Melham, K. (2014). Dynamic Consent – A Patient Interface for 21st Century Research Networks, *European Journal of Human Genetics* 23(2), 141–146.
- Murray, A. (2010). Chapter 18: Data protection, in *Information technology law the law and society*, Oxford University Press Oxford.
- Solove, D. J. (2008). *Privacy: A concept in disarray*, in *Understanding privacy*, Harvard University Press Cambridge, Mass., 1–11.
- Whitley, E. A., Gal, U., and Kjaergaard, A. (2014). Who do you think you are? A review of the complex interplay between information systems, identification and identity, *European Journal of Information Systems* 23(1), 17–35.

**Assessment:** Coursework (20%, 800 words) and essay (70%, 5000 words).

Class participation (10%) in the LT.

10% class participation.

20% 800 word "blog" article that summarises the key argument of the research essay.

70% 5000 word research essay on an approved topic

---

## MG493

### Dissertation

**This information is for the 2022/23 session.**

**Teacher responsible:** Various

**Availability:** This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

**Course content:** This course consists of an academic dissertation in which students explore a research question that is grounded in the academic literature. While students will be assigned a dissertation supervisor, the supervisor will only provide guidance as needed – students are expected to take the lead and demonstrate their ability to conduct independent research. Students can also apply for a Links project and, if accepted, will conduct research on an HR question posed by the Links sponsor. More information about Links projects will be provided in class.

**Teaching:** 12 hours of lectures in the MT. 4 hours of lectures in the LT.

12 hours of lectures in the MT during Weeks 1 to 4 inclusive. Lectures will explain dissertation requirements and expectations. 4 hours of lectures in LT will introduce students to quantitative and qualitative research methods. Students will be expected to

work independently on preparing a dissertation proposal, to be submitted at the end of MT. Supervisors will be assigned during the first few weeks of LT.

**Formative coursework:** Students will work with their dissertation supervisors in order to gauge their progress.

**Indicative reading:** Students will be instructed on how to conduct literature searches in order to find readings relevant to their research project.

**Assessment:** Dissertation (100%).

## MG496

### Study Skills and Contemporary Topics in Information Systems and Digital Innovations

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Antonio Cordella MAR 4.35

**Availability:** This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is not available as an outside option.

**Course content:** This course provides students with both a broader context for the study of information systems and digital innovation as well as the essential skills relevant to the MISDI programme.

The course will discuss the most contemporary trends in information systems and digital innovation and provide an overview of the changing nature and environment of information technology. It will include seminars by various visiting speakers from academia and industry who discuss a wide range of issues relevant to contemporary information systems. It will also offer an overview of different IS research domains and trends. Career advice, study skills, and other practical skills will be provided.

**Teaching:** 20 hours of lectures in the MT.

**Indicative reading:** Burrell, J. 2016. "How the Machine 'Thinks': Understanding Opacity in Machine Learning Algorithms," *Big Data & Society* (3:1), p. 2053951715622512.

Kohli, R. and Melville, N.P., 2019. Digital innovation: A review and synthesis. *Information Systems Journal*, 29(1), pp.200-223.

Nambisan, S., Lyytinen, K., Majchrzak, A. and Song, M., 2017. Digital Innovation Management: Reinventing innovation management research in a digital world. *Mis Quarterly*, 41(1).

Rossi, M., Mueller-Bloch, C., Thatcher, J.B. and Beck, R., 2019. Blockchain research in information systems: Current trends and an inclusive future research agenda. *Journal of the Association for Information Systems*, 20(9), p.14.

Other books and journal articles will be recommended.

**Assessment:** The course is not formally assessed.

## MG497 Half Unit

### Dissertation: MSc Management and Strategy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jorn Rothe MAR 6.13

**Availability:** This course is compulsory on the MSc in Management and Strategy. This course is not available as an outside option.

**Course content:** The dissertation consists of a research project within the subject of management. Students work on this project individually under the guidance of a dissertation advisor. The dissertation should make a contribution towards understanding a topic or question related to management based on original analysis and empirical evidence.

**Teaching:** There will be an introductory meeting, which will set out the requirements for the dissertation, the process, caution of plagiarism, etc. After this meeting students are welcome to approach staff with preliminary ideas in one-to-one meetings.

**Formative coursework:** Students will submit a preliminary

proposal by the end of Michaelmas Term and will be allocated a dissertation advisor, under whose guidance they will complete a detailed project proposal by the end of Lent Term. Students work on their dissertation over the summer, with supervision available until the end of the Summer Term.

**Assessment:** Dissertation (100%, 6000 words) post-summer term.

## MG4A1

### Introduction to Studying for GMiM

**This information is for the 2022/23 session.**

**Availability:** This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

**Course content:** The course is divided into the following subject areas:

- Introduction to maths for economics
- Introduction to quantitative analysis: Installing and navigating R
- Understanding company accounts
- How to present

#### Introduction to maths for economics:

This is for all students and the key learning objectives cover:

1 How to compute and draw the slope and the intercepts of a linear function.

2 How to graph a function: linear, quadratic, min, max,

3 Solving a linear equation of degree one and solving a linear system of two equations and two unknowns.

4 Partial derivatives of a polynomial in one variable. Differentiation of a polynomial and a Cobb-Douglas function of two variables with respect to each variable. Finding the maximum or the minimum of a one-variable function.

5 Computing the expectation of a discrete random variable.

#### Introduction to quantitative analysis: Installing and navigating R:

R is the statistical programming language that is used in MY451 (Introduction to Quantitative Analysis). MY451 is one of the core courses in the Michaelmas term. While no prior knowledge of R (or indeed statistics) is assumed for MY451, this is to help smooth your first few weeks. You will be shown how to download the R package onto your laptop, and how to navigate within the programme.

#### Understanding company accounts:

This will be covered in two pre-recorded on-line lectures.

#### Writing Skills for postgraduates:

These sessions are intended to help students who have backgrounds outside the social sciences and humanities make the transition to postgraduate work. Topics covered will include identifying and making an argument and the fundamentals of essay writing.

#### How to present:

There will be interactive sessions designed to improve your presentation skills.

**Teaching:** Sessions will be delivered during the two week pre-session activities prior to Michaelmas Term. Rounding out the schedule is a full programme of talks and activities designed to smooth your transition to postgraduate study at LSE.

#### Indicative reading: Introduction to maths for economics:

This book (4th edition) is good and it is open source (see website of one of the authors here). The chapters we cover:

i. Chapter 1 (functions).

ii. Subchapter 8.1.

iii. Appendix A.6 (systems of equations).

These readings (i, ii, & iii) should cover points 1-3 of the key learning objectives above. We strongly recommend that students read this in advance of the pre sessional if they are new to this material.

#### Introduction to quantitative analysis: Installing and navigating R

If you are new to statistics MY451 starts from first principles and there is no requirement to do any pre reading. However, you may wish to look at the MY451 course pack to give you a head start:

- The course pack for MY451 is available to download at: <https://lse-methodology.github.io/MY451/>. You can also find it on the Moodle page of MY451 which is open to enrolment.
- Spiegelhalter, D., 2019. *The art of statistics: Learning from data*. Penguin UK. An accessible and engaging introduction to statistics.

**How to present:**

- Anderson, C., 2016. TED Talks: The official TED guide to public speaking: Tips and tricks for giving unforgettable speeches and presentations. Hachette UK.

**Assessment:** No formal assessment. Students will sit a mock exam at the end of the introduction to maths for economics course based upon the material to aid learning.

## MG4A3 Half Unit

### Incentives and Governance in Organisations

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Catherine Thomas

**Availability:** This course is compulsory on the MSc in Management and Strategy. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Marketing and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A knowledge of Mathematics and Economics.

**Course content:** The course uses economic theory to gain insight into issues related to internal organisation, structure, and management of firms. The course will draw on various fields including management science, industrial organisation and microeconomics.

The course deals with three main topics:

- the provision of incentives in organisations;
- the use of information in markets and firms, and;
- the relationship between organisational structures and decisions.

A major theme concerns the question of how to provide incentives efficiently in organisations. Other important themes include efficiency, coordination, incompleteness of contracts and the use of the market versus internal exchange. The implications of asymmetric information are examined. Corporate governance is discussed in a principal-agent framework.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with Departmental policy.

**Indicative reading:** Main text:

- Roberts J (2004), *The Modern Firm. Organizational Design for Performance and Growth*, Oxford University Press, UK.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## MG4A5 Half Unit

### The Analysis of Strategy A

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Kristof Madarasz MAR 6.10

**Availability:** This course is compulsory on the MSc in Management and Strategy. This course is available on the MSc in Management (1 Year Programme). This course is not available as an outside option.

**Course content:** The objective of the two courses (A and B) is to provide students with a critical appreciation of behavioural economics and game theory relevant for strategic management. These two courses will help students to understand how

managers in the real world ought to read situations from an economic and strategic angle. Attention will be given to conceptual underpinnings.

The course focuses on decision making in individual and strategic settings also through the lens of behavioural economics. It is an amalgam of insights from economics, game theory, and strategic management. Some lectures will discuss key aspects of choice under uncertainty, risk perceptions, choice over time, and the social aspects of value. A powerful tool to study strategic situations is game theory. Lectures will then also be devoted to developing the basic concepts of game theory including Nash and sub-game-perfect Nash equilibrium. These issues will be deepened further in the accompanying seminars.

**Teaching:** 30 hours of lectures in the MT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

**Indicative reading:** D Besanko, D Dranove & M Shanley, *Economics of Strategy*, John Wiley, 6th Edition.; A Dixit & B Nalebuff, *Thinking Strategically: The Competitive Edge in Business, Politics and Everyday Life*, Norton, 1998.; J Roberts, *The Modern Firm: Organizational Design for Performance and Growth*, OUP 2007; Angner, E, *Behavioural Economics*, 2nd edition, 2016.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## MG4A6 Half Unit

### The Analysis of Strategy B

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jorn Rothe MAR 6.13

**Availability:** This course is compulsory on the MSc in Management and Strategy. This course is not available as an outside option.

**Pre-requisites:** Students must have completed *The Analysis of Strategy A* (MG4A5).

**Course content:** The aim of this course is to build on and integrate industrial economics, game theory and management strategy to develop a framework for thinking about competition within markets and industries. Game theory provides the abstract theory of strategic interaction, and microeconomics (specifically industrial economics) provides the background on demand, production, and market structures. In this course we discuss the integration and application of these components in thinking about competitive strategy for firms in markets.

This course focuses on the strategic aspects of competing against other firms within the same industry. We start by analysing market structure and various dimensions of competition - pricing, capacity choices, research and development and advertising. We will then discuss different aspects of strategic commitment and the commitment aspects of pricing, investment and financing decisions. We then focus on the dynamic aspect of pricing rivalry, in particular collusion and price wars. We will finally discuss the incentives for innovation and market entry and exit decisions. Our approach will emphasise both the power and the limits of a game-theoretic approach. We will use simple models to clarify the logic of strategic reasoning, and case studies to illustrate the link between the analysis of strategy and managerial decision making.

**Teaching:** 20 hours of lectures and 8 hours of seminars in the LT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

**Indicative reading:** There is no fully adequate textbook for this course.

The most important text is D Besanko, D Dranove & M Shanley and S Schaefer, *The Economics of Strategy*, John Wiley (6th edition, 2012). Among the other sources are:

- L M B Cabral, *Introduction to Industrial Organization*, MIT Press (2000);
- P Ghemawat, *Games Businesses Play: Cases and Models*, MIT Press (1997);
- D M Kreps, *Game Theory and Economic Modelling*, Clarendon Press (1990);
- J Sutton, *Technology and*

Market Structure, MIT Press (1998). A detailed reading list will be provided at the beginning of the course.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## MG4A8 Half Unit Strategy for the Information Economy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jorn Rothe

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Basic knowledge of economics.

**Course content:** The internet has created many new market opportunities. Web-based technology allows for new kinds of products and market interactions. Understanding the design and functioning of these new markets is central for business strategy. This course develops the relevant economic principles and applies them to the formulation of strategies for the provision of information goods and the competition between online market platforms.

The first part of the course is concerned with strategic aspects of the provision of information goods (such as news, music, software, search results). Topics include the pricing of information goods, versioning, switching costs, lock-ins, standards and network effects, and the strategic competition in platform markets. The course then focuses on the design and application of online auctions in market design for e-commerce, in particular Google's use of auctions in search-based advertising. The course provides a theoretical background and relates theory to various examples and case-studies.

**Teaching:** 10 hours of lectures and 9 hours of seminars in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

**Formative coursework:** Two exercise sets with a mixture of qualitative and quantitative questions.

**Indicative reading:** Hal R. Varian: Intermediate Microeconomics, W.W.Norton, 2014 (selected chapters); Carl Shapiro and Hal R. Varian: Information Rules, HBS Press, 1999 (selected chapters). A detailed reading list will be provided at the beginning of the course.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## MG4A9 Half Unit Business Strategy, Management and Analytics

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Yally Avrahampour MAR 5.24

**Availability:** This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD) and MSc in Human Resources and Organisations (International Employment Relations/CIPD). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

**Course content:** A basic grounding in the key management disciplines for students specialising in Human Resource Management. The aim of the course is for students to acquire a general understanding of the business and managerial context in which human resource management takes place.

Course contents include management theory, theory of the firm, business strategy, accounting and finance. Successful students will become intelligent discussion partners on these subjects and critical readers of financial information and the financial press.

**Teaching:** 20 hours of lectures and 20 hours of seminars in the MT. 2 hours of lectures and 2 hours of seminars in the ST.

Students are expected to prepare for, and contribute to, the seminars. Seminars will include group work, preparing and giving presentations, case analyses, small group discussions, and self-assessment exercises. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** One formative assignment of 1,500 words. Two group formative case analyses of 500 words maximum. Two group formative feedback commentaries of 250 words maximum.

**Indicative reading:** Flamholtz, E. (1993) Human Resource Accounting, 3rd Edition

Grant, R. & Jordan, J. (2015) Foundations of Strategy, 2nd Edition

Kaplan, R. & Atkinson, A. (2014) Advanced Management

Accounting, 3rd Edition

Willman, P. (2014) Understanding Management - the Social

Science Foundations

**Assessment:** Exam (50%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.

Essay (50%, 1500 words) in the LT.

## MG4B1 Half Unit Corporate Strategy

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jordi Blanes I Vidal MAR 6.08

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students will need to have some understanding of microeconomics and knowledge of basic statistical methods would be an advantage

**Course content:** This course is an introduction to the strategic management of modern diversified firms. It studies how the firm's portfolio of products and its internal organisation can be designed to maximise corporate performance.

The course addresses the following questions facing modern managers: what products and activities should the firm focus on? Which tasks should be subcontracted and which should be carried out inside the firm? How should the firm be organised internally in order to coordinate and motivate employees, managers and other stakeholders? How should the firm's scope and internal organisation adapt to changes in the environment?

**Teaching:** 30 hours of lectures in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be required to undertake the analysis of two Corporate Strategy problems which will be marked and handed back with feedback.

**Indicative reading:** Corporate Strategy, Tools for Analysis and Decision-Making, Phanish Puranam and Bart Vanneste, First Edition, Cambridge University Press, 2016.

**Assessment:** Exam (80%, duration: 2 hours) in the summer exam period.

Class participation (20%).

## MG4B3 Half Unit

### International Marketing: A Strategic Approach

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Amitav Chakravarti MAR 6.31

**Availability:** This course is available on the CEMS Exchange, MBA Exchange, MSc in Management and Strategy, MSc in Operations Research & Analytics, MSc in Social Innovation and Entrepreneurship and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of a simulated case study to develop participant's skills at analysing and making sense of complex real world business situations.

**Teaching:** 30 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

**Indicative reading:**

- Baker, M. J. and Saren, M. (eds.) (2014) *Marketing theory: a student text*. SAGE Publications Ltd. (2nd Edition).
- Alex Chernev (2011), *Strategic Marketing Management* (6th edition), Cerebellum Press
- Philip Kotler and Gary Armstrong (2001), *Principles of Marketing* (9th edition), Prentice Hall
- Philip Kotler and Kevin Keller (2011), *Marketing Management* (14th edition), Pearson PrenticeHall
- Homburg, C., Kuester, S. and Krohmer, H. (2009), *Marketing Management: A Contemporary Perspective*, McGrawHill
- Jobber, D. (2010), *Principles and Practice of Marketing* (6th edition), McGrawHill
- Lambin, J-J, Chumpitaz, R. & Schuiling, I. (2007), *Market-driven management: Strategic and operational marketing* (2nd edition). London: Palgrave Macmillan

Further references will be provided at the commencement of the course.

**Assessment:** Take-home assessment (50%), group project (40%) and class participation (10%) in the MT.

The group project is a non-assessed presentation and an assessed project report of 2,500 word max.

The take-home assessment is an individual assignment.

## MG4B6 Half Unit

### Design and Management of Organisations

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Yona Rubinstein MAR 6.26

**Availability:** This course is compulsory on the MSc in Management and Strategy. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** In this course we investigate aspects of

management and the internal organisation of the firm from birth to end.

What makes a successful entrepreneur? Are managers subject to human biases in decision making?

Our starting point is that entrepreneurs and managers are human. We neglect neither general heuristics nor biases exhibited by individuals and groups and their impact on firms' performance. We further recognise that they make decisions in situations in which information is not perfect and not symmetrically shared, neither internally with their employees nor externally. We also consider the capabilities of organisations to design management strategies to cope with that.

How can firms attract and select the 'right' employees? Can pay and promotions be structured to screen the best workers and extract their efforts? Should firms develop employees' talent and if so, how? Why do firms form teams and how are these used most effectively? Do experts follow the crowd? Why do they turn to be "yes-men"? Can pay incentives be structured to motivate experts to share their private knowledge?

*Design and Management of Organisations* introduces students to a set of conceptual tools to cope with these key managerial challenges and critically evaluate contemporary management approaches.

The organising principle of much of the content of the course has its conceptual origins in economic strategy and behavioral economics applied to issues that are relevant to management. Additionally we draw upon findings from psychology and sociology. The course complements MG4A3 (*Incentives and Governance in Organisations*) but can be taken as a stand-alone course.

**Teaching:** 33 hours of combined lecture/seminars in the LT and 2 hours of combined/lecture seminars in the ST.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

**Formative coursework:** Students will be expected to produce 1 problem sets in the LT.

Multiple exercises will be provided throughout the term and will be discussed during lectures and review sessions. In addition a major problem set will be circulated at the end of the week 5. This problem set will be discussed in class for feedback purposes only.

**Indicative reading:** The first set of slides will be provided during lecture 1 and subsequent sets will be posted online. These slides constitute the backbone of the course. You are expected to flesh out the slides using models, graphs, and examples discussed during the lectures.

Additional readings:

Canice Prendergast. 1993. *A Theory of 'Yes Men'*. *American Economic Review* 83(4): 757-770.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

**MG4B7 Half Unit****Leading Organisational Change**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Dorottya Sallai MAR 4.10

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MRes/PhD in Management (Employment Relations and Human Resources), MSc in Development Management, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The aim of the course is to provide students with different theories to understand the process and consequences of organisational change and in doing so addresses the following issues: type of organisational change, creating readiness for organisational change and leading change, the change agent, strategies for change, resistance to change and evaluation of and institutionalization of organisational change. Models and frameworks for analyzing and diagnosing change; the role of the change agent, leading change from the top; strategies of change; understanding key stakeholders to deliver change, reactions to change; theory and methods of evaluation of organisational change and reinforcing change interventions. The course covers contemporary issues in change management.

**Teaching:** 10 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and students are expected to actively engage throughout the course. Students are expected to prepare for and contribute to each session. Seminar work will include case analyses and small group discussions.

**Formative coursework:**

- Students will be required to write a 1,000 word case analysis and will be provided with feedback.
- Individual Reflection.
- Mid-term online quiz

**Indicative reading:** The course relies heavily on journal articles and the use of case studies.

A full reading list will be provided at the beginning of the term.

There is no required text. Indicative readings include:

Hayes, John. (2018) *The Theory and Practice of Change Management*. Fifth Edition. Palgrave

**Assessment:** Exercise (10%) and case analysis (90%) in the LT.

Case Analysis (2000 words): Students will receive a case that they need to analyse.

Simulation Exercise: Students assessed based on participation and engagement with a simulation game.

**MG4B8 Half Unit Not available in 2022/23****Evolutionary Psychology and Management**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Satoshi Kanazawa MAR 6.15

**Availability:** This course is available on the MSc in Management and Strategy. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** Principles of evolutionary psychology. The nature and limitations of the human brain as an evolved and adapted

organ. Evolutionary origins of cognitive biases, and their effects on organisational behaviour. Sex differences in organisational behaviour. The importance of physical attractiveness and general intelligence in organisational behaviour. "Discrimination" in labour market. Evolutionary psychological perspectives on cooperation, reciprocity, altruism, hierarchy, and leadership in modern corporations. Evolutionary origins of organisationally relevant emotions such as envy, spite, and positional bias. This course introduces the evolutionary psychological perspective on business and management. The emerging science of evolutionary psychology sheds entirely new light on, and offers different solutions to, old problems of management, such as glass ceiling, occupational sex segregation, sexual harassment and suboptimal decision making, and points to new potential problems.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy

**Formative coursework:** One class presentation and one essay based on the class presentation.

**Indicative reading:** Browne, Kingsley R. 2002. *Biology at Work: Rethinking Sexual Equality*, New Brunswick: Rutgers University Press; Kanazawa, Satoshi. 2012. *The Intelligence Paradox: Why the Intelligent Choice Isn't Always the Smart One*. Pinker, Susan. 2008. *The Sexual Paradox: Troubled Boys, Gifted Girls and the Real Difference Between the Sexes*.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

**MG4B9 Half Unit Not available in 2022/23****The World Trading System**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Veronica Rappoport NAB 5.29

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Basic Knowledge of Mathematics and Economics

**Course content:** The course studies a key component of the "globalization" process: the negotiation, implementation and implications of international trade agreements (ITAs). These include the World Trade Organisation and the fast-growing web of regional trade agreements. We analyse the challenges and opportunities faced by companies engaged in the global economy in this context. The course relies on recent theoretical and empirical research to gain insight into the motivations for ITAs and their consequences for consumers and firms. Globalisation - trends in the international economy and overview of their causes and effects. The sources of international trade. Trade barriers - restrictions to international trade and their consequences. The economics and politics of international trade agreements. The rules, accomplishments and shortcomings of the GATT/WTO system. Regional trade agreements - motivation, implications, and recent trends. The costs and benefits from exporting for individual firms. Challenges and opportunities for national and multinational firms in the global economy.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** In-class exercises.

**Indicative reading:**

- Robert Feenstra and Alan Taylor, *International Economics*, Worth Publishers, 2008.
- Kyle Bagwell and Robert W. Staiger, "The Economics of the World Trading System," MIT Press, 2004.

- The World Trade Organisation, "The WTO and preferential trade agreements: From co-existence to coherence," World Trade Report, 2011.
- Bernard M. Hoekman, Aaditya Mattoo, Philip English (editors), "Development, Trade, and the WTO: A Handbook," World Bank, 2002.
- Andrew Bernard, J. Bradford Jensen, Stephen Redding and Peter Schott, Firms in International Trade, *Journal of Economic Perspectives* 21(3), 105-130, 2007.

**Assessment:** Class participation (10%), group assignment (40%) and in-class assessment (50%) in the MT.

The assessment consists of Group assignments (40%), class participation (10%) and an in-class exam during the last week of the term (50%).

---

## MG4C2 Half Unit Organisational Behaviour

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Hyun-Jung Lee MAR 5.34

**Availability:** This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available on the CEMS Exchange, MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Organisational Behaviour), MSc in Marketing and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available in the Michaelmas Term only.

**Course content:** This course seeks to understand individual attitudes and behaviour in an organisational context. Specifically, we primarily take a psychological perspective to understanding human behaviour at work by reviewing psychological theories as they apply to organisations and critically evaluating the associated empirical evidence.

Key topics include: personality and individual differences, work motivation, decision-making, power, leadership, group processes and organisational culture.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures and 1 hour and 30 minutes of seminars in the ST.

The teaching is highly participative and includes lectures and seminars. The course is demanding of students and its success depends partly upon student commitment and willingness to participate fully.

Students on this course will have a reading week in Week 6, in line with departmental policy

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:** The course relies heavily on journal articles. An extensive reading list is provided in the syllabus at the start of the course. No suitable textbook exists but students may wish to consult one of the following:

- Buchanan, D. A. and Huczynski, A. A. (2019). *Organizational Behaviour* (10th ed.). Pearson
- Porter, L. W., Bigley, G. A., & Steers, R. M. (2002). *Motivation and work behavior* (7th ed.). McGraw-Hill.
- Staw, B. M (2004). *Psychological dimensions of organizational behavior* (3rd ed.), Prentice-Hall.

**Assessment:** Exam (100%, duration: 2 hours) in the summer exam period.

## MG4C3 Half Unit

### Information Technology and Service Innovation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Carsten Sorensen MAR 4.30

**Availability:** This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is limited to 60 students.

**Course content:** The course aims to give the students theoretical and practical insights into the key issues informing the design of contemporary digital technology (IT). The course relates the diversity of the design challenges facing contemporary IT development. It embraces the shifting conditions for small teams of developers to design significant services in the context of technology-based startups, or as part of entrepreneurship within an existing enterprise or public institution. The design challenges relate to constantly shifting possibilities, for example, for the capture and processing of digital data previously beyond reach, the ability to leverage existing boundary resources (APIs, SDKs etc), and the expanding possibilities for reaching end-users in new ways. The course is constructed as the meeting of theory and practice. The former is constituted by the presentation and discussion of theoretical themes aimed at sharpening the student's ability to reason fundamentally about contemporary design challenges and opportunities. This aspect is also examined through an individual essay. The practical design skills are primarily honed through a group design project running throughout the course. Conducting this group design project will engage students in highly detailed and constructive design discussions leading to the submission of a designed IT artifact. The practical design skills sought practiced in the course are related to but largely independent from skills solely aimed at setting and analysing requirements on the one hand, and expressing the design through programming, on the other. The course, therefore, neither requires, nor teaches detailed programming techniques, but instead focuses on teaching design skills through practices and to sensitise these design skills through the discussion of pertinent theoretical themes. These themes take their outset in the increasing complexity of designing IT artifacts as the granularity of technology and data capture is decreasing to enable increasing tracking of more and more granular aspects of human activities. These relate to a variety of personal-, local-, and global communications infrastructures, as well as a variety of possible multi-sided platforms, and software middleware layers enabling rapid prototyping of complex designs. Topics addressed will be: Digital infrastructure innovation; Digital platform strategies; Designing technology affordance diversity; Understanding technology performances; Individual interaction intimacy; Amplified teams; The technological organisation; Global crowd innovation with IT; Privacy by design; Global technology innovation tussles; Business innovation with information technology; and decentralised consensus arrangements through blockchains and cryptoassets. The weekly seminars will consist of presentations and discussions offering students opportunity to critically reflect on theoretical and pragmatic issues related to the subject matter of the course, such as; the IT artifact and ecosystem, the role of IT in business innovation, understanding the paradoxes of technology performances, intimate technology experiences, IT mediated team-working, the IT-enabled organisation, innovating global IT mediated crowds, innovation as organisational tussles, and the role of IT-based innovation for business development.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT. A reading week will take place in W6. There will be no teaching during this week.

**Formative coursework:** Classes are based around both the design group projects, as well as reading and discussing selected journal

articles. Formative feedback is provided on class participation.

**Indicative reading:**

**Assessment:** Project (70%) and essay (30%, 1500 words).

The course has two summative elements: an individual theoretical essay (30%), and from the group design project, a technical report (50%) and a separate submission of an individual essay reflecting on the group work and on group participation (20%), which jointly comprise one summative component (70%).

---

## MG4D2 Half Unit International Employment Relations

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Frido Wenten, MAR 5.17

**Availability:** This course is compulsory on the MSc in Human Resources and Organisations (International Employment Relations/CIPD). This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources) and MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A general knowledge of the social sciences is required.

**Course content:** The course aims to provide an introduction to the comparative analysis of work and employment relations at national, firm and workplace level throughout the world. It will introduce the dynamics of employment relations across the increasingly global markets, the key concepts and topics surrounding it (such as employee voice and labour conflicts, organisation and the future of work, diversity, global value chains, and inclusive development), and the theories required to understand it. The strategies and policies of the main actors will be explored through cross-national comparative analysis, introducing the main 'models' of employment relations: the US/ British, Japanese and European Social Models, as well as models of employment relations in the transitional economies. The course ensures that students have both the conceptual and empirical grounding they need to take the options offered in international comparative human resource management and cross-cultural management.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the MT.

The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and students are expected to actively contribute to their class groups. The course is demanding of students, and depends for its success partly upon, their commitment and willingness to participate fully. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students are required to submit an essay outline in Week 4, matching the topic of their first summative essay.

**Indicative reading:** C Frege & J Kelly (Eds) *Comparative Employment Relations in the Global Economy*, Routledge, 2013; G Bamber, R Lansbury & N Wailes (Eds), *International and Comparative Employment Relations*, 5th edn, Sage, 2011; R Hyman, *Understanding European Trade Unionism: Between Market, Class and Society*, Sage, 2001; M J Morley, P Gunnigle & DG Collings (Eds), *Global Industrial Relations*, Routledge, 2006.

**Assessment:** Essay (40%, 2500 words) in the MT. Essay (50%, 2500 words) in the LT. Class participation (10%).

---

## MG4D3 Half Unit Not available in 2022/23 The Dark Side of the Organisation

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Jonathan Booth NAB4.20

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Introductory OB course required. MG4C2, MG434, MG105, or equivalent course in another institution.

**Course content:** In this seminar, students will learn about a variety of topics related to the dark side of the organisation, (e.g. workplace aggression, retaliation, discrimination, substance abuse, corporate corruption, extreme stakeholder responses to organisations, and the dark side of impression management/emotional intelligence). In organisational behaviour courses, topics generally cover the 'light side' of the organisation and often explore how employee motivation and behaviour can promote beneficial outcomes for the organisation, as well as investigate the precursors to these more positive behaviours. However, not all

workplace behaviours and outcomes are beneficial and positive for employees and their organisations. Dark side behaviours typically lead to negative outcomes. Those who engage in these negative behaviours generally are aware that their actions can cause harm to others, their employer, and/or to them; hence, the instigator usually has intent. It is imperative that we more fully understand these behaviours and their antecedents and consequences so that we can identify these behaviours, as well as control, prevent, mitigate, or ameliorate their occurrences.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:** Anand, V, Ashforth, B. E., & Joshi, M. 2005. Business as usual: The acceptance and perpetuation of corruption in organizations. *Academy of Management Executive*, 19, 9-23. Vaughan, D. 1999. The dark side of organizations: Mistake, misconduct, and disaster. *Annual Review of Sociology*, 25, 271-305.

**Assessment:** Essay (40%, 1500 words) and video (20%) in the ST. Class participation (20%) and group presentation (20%) in the LT. The video assessment submitted by students in ST consists of a take-home video presentation.

## MG4D4 Half Unit

### Cross Cultural Management

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Hyun-Jung Lee MAR 5.34

**Availability:** This course is available on the MBA Exchange,

MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Some background in psychology and organisational behaviour, and/or international business is useful, but not required.

**Course content:** The ability to communicate cross-culturally and to understand the diverse perspectives of people from different cultures is a necessity in order to achieve a competitive advantage in the global economy. The aims of the course are to understand the impact of culture on management; to identify the areas in which cultural differences pose challenges as well as opportunities in managing people across cultures; and, to become more self-aware of our cultural conditioning, individual biases and assumptions.

Topics include i) understanding cultures and cultural conditioning, ii) analytical frameworks of cross-cultural comparisons, iii) multicultural teams, iv) managing global organisations, v) ethical dilemmas and global responsibility of multinational corporations, vi) cross-cultural communication, vii) global leadership and cultural intelligence, viii) international assignments and global careers.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT. Experiential learning is emphasised and team working is an integral part of the course. The teaching is highly participative. Students will be asked to make presentations and participate in various class exercises including role playing. The course is demanding of students and success depends partly upon student commitment and willingness to participate fully. Students on this course will have a reading week in Week 6, in line with departmental policy

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:** The following reading list contains some easily accessible introductory discussions. Most of the course reading is taken from journals. A full reading list will be provided in the syllabus at the start of the course.

- Gehrke, B. and Claes, M-T. (eds.) (2014), *Global leadership practices: A cross cultural management perspective*, Palgrave Macmillan
- Steers, R., et al. (2016), *Management across cultures* (3rd ed.), Cambridge University Press
- Thomas, D. D., and Peterson, M. (2014). *Cross cultural management* (2nd edition). London: Sage.

**Assessment:** Essay (50%), project (40%) and class participation (10%).

The essay is completed individually, and the project is completed as part of a group.

## MG4D5 Half Unit

### Leadership in Organisations: Theory and Practice

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Connson Locke, MAR.5.36

**Availability:** This course is available on the Global MSc in Management, Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Accounting and Finance, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Marketing and

MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to Department of Management students

**Course content:** This course is designed to provide students with the knowledge, skills and analytical capabilities needed to exercise leadership in organisations. It explores several facets of leadership and considers how leadership develops. The emphasis will be on application of theory and comparing and contrasting different approaches to leadership.

The course examines topics such as: leadership and management; trait, behavioural and contingency theories of leadership; individual differences in leadership; leadership development; transformational and transactional forms of leadership; and issues of gender and culture.

**Teaching:** 25 hours of seminars in the LT.

Each 2.5 hour session will include a combination of lecture and seminar work. Students are expected to prepare for and contribute to each session. Seminar work will include case analyses and small group discussions.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will have the opportunity to write a formative case analysis essay during LT and receive feedback. Students will also complete in-class case discussions to prepare them for the case analysis essay.

**Indicative reading:** A full reading list will be provided at the beginning of the term. There is no required text. Indicative readings include:

Antonakis, J., Cianciolo, A.T., & Sternberg, R.J. (2004) Leadership: Past, Present and Future (Chapter 1). In Antonakis, J., Cianciolo, A.T. & Sternberg, R.J. (Eds.) *The Nature of Leadership*, pp. 3-15. London: Sage Publications. George, J. M. (2000).

Judge, T., Bono, J., Ilies, R., & Gerhardt, M. (2002). Personality and leadership: A qualitative and quantitative review. *Journal of Applied Psychology*, 87(4), 765-780.

**Assessment:** Case analysis (100%) in the ST.

## MG4D7 Half Unit

### Dissertation: MSc MISDI

**This information is for the 2022/23 session.**

**Teacher responsible:** All members involved with MSc MISDI are involved in dissertation support.

**Availability:** This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is not available as an outside option.

**Course content:** The aim of the dissertation is for students to pursue an independent piece of research within the field of information systems. The dissertation is a quantitative or qualitative, theoretically informed, piece of research of IS-related questions. Students must obtain the approval of their advisor before embarking on any research. The course MY401 on research design and the course MG496 Study Skills and Contemporary Topics in Information Systems and Digital Innovations provide guidance and background material on undertaking dissertation work.

#### Arrangements for supervision:

Advisors will normally be allocated according to student dissertation proposals. The dissertation advisor will help the student identify an appropriate research question, and to work out a plan for a literature informed empirical study.

**Teaching:** Two courses prepare students for the dissertation: MY401 Research Design for Studies in Digital Innovation and MG496 Study Skills and Contemporary Topics in Information Systems and Digital Innovations. Students must follow both of these courses.

**Formative coursework:** Students will use the feedback to the summative essay of the MY401 course as a starting point for their dissertation research. They will also present their research topic

and research design at a workshop in mid/end of June and get feedback from fellow students and faculty.

**Assessment:** Dissertation (100%, 8000 words) post-summer term.

An electronic version of the dissertation must be submitted on a specified date in late August (no paper copies are required).

Penalties will be applied to any late submission. The word limit for the dissertation is 8000 words. The dissertation is critical to assessment on the programme.

## MG4E2 Half Unit

### Marketing Management

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Haider Ali

**Availability:** This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange) and MSc in Management (1 Year Programme). This course is not available as an outside option.

**Course content:** This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of case studies to develop participant's skills at analysing and making sense of complex real world business situations.

**Teaching:** 30 hours of seminars in the MT. 2 hours of seminars in the ST.

Course instruction will be conducted using lectures, case discussions, readings, and analysis of data.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the MT.

The formative will be undertaken by students in teams. The formative will comprise the plans that teams have formulated for the summative project together with their rationale. As a result, the formative will provide a foundation for the summative project and also help students practice the use of marketing theory, a skill that will be very useful for the exam.

**Indicative reading:** Alex Chernev (2018), *Strategic Marketing Management* (9th edition), Cerebellum Press.

**Assessment:** Exam (45%, duration: 3 hours) in the January exam period.

Project (45%) in the MT.

Class participation (10%).

## MG4E7

### Business Fundamentals

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Amitav Chakravarti MAR 6.31 and Prof Om Narasimhan MAR 6.32

**Availability:** This course is compulsory on the MSc in Marketing. This course is not available as an outside option. This is a non-assessed introductory course.

**Course content:** The aim of the introductory Core is to deliver some critical business prerequisites to incoming MSc Marketing students. Broadly, there will be four kinds of course materials covered during this one week: (1) Some modules are intended to strengthen participants' analytical skills. These modules comprise sessions on microeconomics/business economics that enable participants to analyse firms and markets in more depth, and sessions that impart basic knowledge in analytics/statistics that is becoming absolutely essential in the current age of Big Data; (2) Some other modules will expose participants to the fundamentals of other functional areas like Accounting, Finance, & Controls, Leadership, Organizational Behavior, and Team Building; (3) Some modules will look deeper into one of the fundamental skills that marketing managers try to hone—understanding and eliciting consumer insights; and finally, (4) The remaining modules will assist in career planning, coaching for marketing problem solving (e.g., as is common in consulting and/or case study-based interviews), with a broad understanding of the numerous options for internships, employment, companies, functions, and roles.

**Teaching:** Roughly 12 hours of teaching over one week prior to the Michaelmas Term. Full details of this will be sent to offer holders as part of their offer pack. The schedule will also include a full programme of activities and talks designed to welcome you to the LSE and the MSc Marketing programme.

**Formative coursework:** No formal assessment.

**Indicative reading:** Statistics: Anderson, D., Sweeney, D., Williams, T., Freeman, J., Shoemsmith, E. (2009). *Statistics for Business and Economics* (2nd edition), Hampshire: Cengage Learning.

Quantitative Skills: Hammond, P. and Sydsaeter, K. (2002).

*Essential Mathematics for Economic Analysis*. Prentice Hall; and Jacques, I. (2010). *Mathematics for Economics and Business*. (7th edition), Pearson.

Writing skills: Wallace, M. and Wray, A. (2011). *Critical Reading and Writing for Undergraduates* (2nd edition), London: Sage.

**Assessment:** No formal assessment.

## MG4E8 Half Unit

### Principles of Marketing

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Amitav Chakravarti MAR 6.31

**Availability:** This course is compulsory on the MSc in Marketing.

This course is not available as an outside option.

**Pre-requisites:** Completion of the MSc in Marketing pre-session course, MG4E7 Business Fundamentals.

**Course content:** This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of case studies and data analysis to develop participant's skills at analysing and making sense of complex real world business situations.

**Teaching:** 30 hours of lectures in the MT.

**Indicative reading:**

- Alex Chernev (2011), *Strategic Marketing Management* (6th edition), Cerebellum Press.
- Philip Kotler and Gary Armstrong (2001), *Principles of Marketing* (9th edition), Prentice Hall.
- Philip Kotler and Kevin Keller (2011), *Marketing Management* (14th edition), Pearson PrenticeHall.
- Homburg, C., Kuester, S. and Krohmer, H. (2009), *Marketing Management: A Contemporary Perspective*, McGrawHill.
- Jobber, D. (2010), *Principles and Practice of Marketing* (6th edition), McGrawHill.
- Lambin, J-J, Chumpitaz, R. & Schuiling, I. (2007), *Market-driven management: Strategic and operational marketing* (2nd edition). London: Palgrave Macmillan.

Further references, especially for journal articles and HBS case studies, will be provided at the commencement of the course.

**Assessment:** Coursework (50%), project (40%) and class participation (10%) in the MT.

Group Project (40%) - a non-assessed presentation and an assessed project report 2,500 word max .

Individual take home assignment (50%).

Class participation (10%)

## MG4E9 Half Unit

### Marketing Analytics I: Consumer Analysis Fundamentals

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Xiaolin Li

**Availability:** This course is compulsory on the MSc in Marketing. This course is not available as an outside option.

**Course content:** This course lays down the foundations of Marketing Analytics which is an absolute essential in the age of Big Data. The broad objective of this course is to provide a fundamental understanding of marketing analytics and research methods employed by well-managed firms. The course focuses on integrating problem formulation, research design, questionnaire construction, sampling, data collection and data analysis to yield the most valuable information. The course also examines the proper use of statistical applications as well as qualitative methods, with an emphasis on the interpretation and use of results. Since analytics is the discovery and communication of meaningful patterns in data, this course will also provide students with an analytics toolkit, reinforcing basic probability and statistics while throughout emphasizing the value and pitfalls of reasoning with data. Applications will focus on connections among analytical tools, data, and business decision-making. Advanced analytical tools will be discussed in-depth in the follow-up course Marketing

Analytics II.

**Teaching:** 30 hours of lectures in the MT.

**Formative coursework:** Students will be engaged in analysing a number of cases, doing numerical problems, as well as analysis data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve numerical problems, case analysis, and analysing data sets).

**Indicative reading:**

- Dawn Iacobucci and Gilbert A Churchill Jr., *Marketing Research: Methodological Foundations*. 10th ed. South Western Educational Publication, 2009. ISBN-13: 978-1439081013
- Naresh Malhotra *Marketing Research: An Applied Orientation* 7th ed. Pearson, 2018 ISBN-13: 978-0134734842
- Mercedes Esteban-Bravo and Jose M. Vidal-Sanz, *Marketing Research Methods: Quantitative and Qualitative Approaches*, Cambridge University Press, 2021

**Assessment:** Project (40%, 2500 words), class participation (10%) and take-home assessment (50%) in the MT.

The Group Project (40%) consists of a non-assessed presentation and an assessed project report 2,500 word max.

## MG4F1 Half Unit Marketing Action Learning Project

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Amitav Chakravarti MAR 6.31 and Dr Heather Kappes MAR 6.21

**Availability:** This course is compulsory on the MSc in Marketing. This course is not available as an outside option.

**Pre-requisites:** Completion of the MSc in Marketing pre-session course, MG4E7 Business Fundamentals.

**Course content:** Students are formed into groups and assigned to a company sponsor vetted by Department of Marketing staff. Companies vary from year to year but will range from large consumer goods corporations to midsize arts or telecom or food & beverage companies looking to launch new products or move into new markets, to small digital start-ups. Starting from a company brief, each group will identify core marketing issues where they can add value for their company sponsor, and will use the marketing techniques developed in the course to arrive at recommendations. Each group will produce an in-depth report that provides two critical classes of information: (a) Section 1 tells us how a "live" business is being run and what makes it tick (or not) from a marketing value-creation point of view, and (b) Section 2 provides data-based, scientific analysis of what the firm could do better for a more sustainable and competitive future.

**Teaching:** 2 hours of lectures in the ST.

One formal lecture, plus individual appointments through ST with groups to discuss their chosen projects.

**Indicative reading:**

- *Building a Marketing Plan*, by Ho Yin Wong; Kylie Radel; Roshnee Ramsaran-Fowda, Harvard Business School Publishing.
- *Writing Great Marketing Plans*, 2005, by T. Caulkins, Kellogg's/ Northwestern University.
- *The Marketing Plan Handbook* Paperback – 1 Sep 2011 by Alexander Chernev

**Assessment:** Project (100%) in August.

Students will be expected to submit a project report in August

## MG4F2 Half Unit Marketing Analytics II: Analytics for Managing Innovations, Products and Brands

**This information is for the 2022/23 session.**

**Teacher responsible:** TBC

**Availability:** This course is available on the CEMS Exchange,

Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Marketing and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Marketing managers need to make a variety of decisions about, for example, product features, prices, advertising (online and offline), distribution and sales compensation plans. In making these decisions, managers choose from among alternative courses of action in a complex and uncertain world. Increasingly, in this age of Big Data, companies that emerge as market leaders tend to be the ones that employ sophisticated Marketing Analytics. This course in Marketing Analytics will entail a deep-dive into state-of-the-art Marketing Analytics models that allow managers to make scientific decisions regarding launching new products or innovations and managing more mature products and brands. This course will focus upon the use of cutting-edge data analytic techniques to understand and inform managerial decision making with a primary focus on the formulation of dynamic marketing policies. The course is structured to enable the student to gain familiarity with techniques for sentiment analysis, discrete choice modelling, probability models for customer management, causal inference through A/B testing, classification and regression trees, and introductory machine learning.

**Teaching:** 30 hours of lectures in the LT.

**Formative coursework:** Students will be engaged in analysing several data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve analysing data sets given to them).

**Indicative reading:**

- Lilien GL, Kotler Ph, Moorthy KS. *Marketing Models*. Prentice Hall: Englewood Cliffs, 1992
- Leeflang PSH, Wittink DR, Wedel M, Naert PA. *Building Models for Marketing Decisions*. Kluwer Academic Publishers: Dordrecht / Boston 2000.

**Assessment:** Take-home assessment (55%) and group project (45%) in the LT.

Coursework is an Individual Take-home assignment and the project will be in groups.

## MG4F3 Half Unit Digital Marketing

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Xiaolin Li

**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation, MSc in Marketing and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students taking this course are expected to be able to demonstrate a strong foundation in quantitative analysis.

**Course content:** Marketing is evolving from an art to a science and decisions in new media are on the forefront of this transformation. This course is aimed at developing state-of-the-art knowledge in the area of online marketing (e.g., display ads and search ads, SEO, mobile marketing etc.) and social media (e.g., Twitter, Facebook, etc.). Furthermore, important topics of cross-cutting relevance to online marketing and social media will be addressed, including big data, data science, analytics, and integrative marketing. Many firms have extensive information about consumers' choices and how they react to marketing campaigns, but few firms have the expertise to intelligently act on such information. In this course, students will learn the scientific and strategic approach to marketing with hands-on implementation of online marketing

and social media strategies (e.g., strategic design and launch of a website, implementation of SEO strategies, design and manage of a corporate social media account). Using simple yet powerful hands-on interactive models and exercises, the course will cover both theory and applications.

**Teaching:** 30 hours of lectures in the LT.

**Formative coursework:** Students have the opportunity to submit a formative coursework in the LT. The formative course work might be an in-depth case analysis of a new media company. Students might be requested to use theory and frameworks to make sense of a case. Students might also be requested reflect on analytics and conduct simple data analysis.

**Indicative reading:**

- Larsen and Draper (2015): *Internet Marketing Essentials*, Digital Textbook.
- Chaffey, D. and Ellis-Chadwick, F. (2019): *Digital Marketing. Strategy, Implementation, and Practice*. 7th Edition. Pearson Education.
- Laudon, K. C. and Traver, C. G. (2015), *E-Commerce 2015: Business. Technology. Society*. Prentice Hall.

More readings in form of academic research papers and media outlets (e. g., *The Economist*) will be added for each week.

**Assessment:** Take-home assessment (50%), group project (40%) and class participation (10%) in the LT.

## MG4F4 Half Unit

### Strategy and Innovation in a Global Context

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Heather Kappes 6.21 MAR

**Availability:** This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

**Course content:** This Capstone Course builds connections between management theory and practice and equips students with the skills necessary to succeed in their managerial careers. The overarching teaching objective is to apply material learned in MiM courses to create managerial recommendations that can help a firm improve and defend its competitive advantage both immediately and for its future.

Before, during, and after an international trip, students will work in groups to tackle a client company's business problem(s). Students will need to balance company objectives, available resources, theoretical knowledge, and group members' knowledge and expertise. Success requires analytical techniques and reasoning as well as the ability to switch between considering the big picture and the fine-grained detail.

**Teaching:** 6 hours of seminars in the ST.

2 x 180 minute seminars plus approximately 40 hours of work during a one-week international trip the period after exams and summer term.

**Formative coursework:** Formative feedback will be provided on the basis of preparatory seminar work.

**Indicative reading:**

- 1) Chernev, Alexander. *The Marketing Plan Handbook*, 2011.
- 2) Stine, Robert, and Dean Foster. *Statistics for Business: Decision Making and*. Addison-Wesley, 2011.
- 3) D Besanko, D Dranove & M Shanley, *Economics of Strategy*, John Wiley, 6th Edition.; A Dixit & B Nalebuff, *Thinking Strategically: The Competitive Edge in Business, Politics and Everyday Life*, Norton, 1998.
- 4) D M Kreps, *Microeconomics for Managers*, W. W. Norton (2004).
- 5) Block, Peter, and Grover Gardner. *Flawless consulting: A guide to getting your expertise used*. San Francisco, CA: Pfeiffer, 1981.

**Assessment:** Project (80%, 2000 words), reflective learning report (10%) and other (10%) post-summer term.

This course is assessed on a project report, an individual reflection on the project and a peer review report that makes use of the concepts from the course and their application illustrated in the international trip. Details will be discussed during lectures.

## MG4F5 Half Unit

### Business in the Global Environment

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Rocco Macchiavello

**Availability:** This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

**Course content:** In this course we study two key components of the process called 'globalisation'. First, we consider the negotiation, implementation and implications of international trade agreements. These include the World Trade Organisation and the fast-growing web of regional trade agreements. Second, we look at the process of globalisation at the level of industries, firms and nations. We seek a solid understanding of the external, economy-wide factors that affect the performance and management of firms in today's global economy. The course relies on recent theoretical and empirical research. Topics include the changing structure of industries, the response of companies, both those based in the advanced industrial countries and those based in emerging markets, to increasing international competition; and the differences between countries in their institutions and policies. Course topics:

- 1) Globalisation: trends in the global economy, overview of their causes and effects
- 2) The workings, accomplishments and shortcomings of the GATT/WTO system
- 3) Trade barriers: causes and consequences of restrictions to international trade
- 4) The economics and politics of international trade agreements
- 5) Implications of trade agreements for national and multinational firms
- 6) Location of Production: Theory of Comparative Advantages
- 7) Location of Production: Factor Endowments across countries
- 8) Location of Production: Testing empirically the predictions of the theory
- 9) Location of Production: Empirical Analysis, institutions as a source of competitive advantage
- 10) Foreign Direct Investment and International Contracts

**Teaching:** 10 x 180 minute seminars in the period after exams and summer term

**Formative coursework:** Students will be expected to produce 1 piece of coursework in July.

**Indicative reading:** Giorgio Barba Navaretti & Anthony J Venables, *Multinational Firms in the World Economy*, Princeton, 2004  
Robert Feenstra and Alan Taylor, *International Economics*, Worth Publishers, 2008

Kyle Bagwell and Robert W. Staiger, "The Economics of the World Trading System," MIT Press, 2004

The World Trade Organisation, "The WTO and preferential trade agreements: From co-existence to coherence," World Trade Report, 2011.

**Assessment:** Continuous assessment (20%) and group project (80%).

## MG4F7 Half Unit

### Business Analysis

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Noam Yuchtman 6.27

**Availability:** This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

**Course content:** The course is designed to achieve an understanding of fundamental notions of data presentation and data analysis and to use statistical thinking in the context of business problems. The course deals with modern methods of data exploration (designed to reveal unusual or problematic aspects of databases), the uses and abuses of the basic

techniques of inference, and the use of regression as a tool for management and for financial analysis.

**Teaching:** 15 hours of lectures and 9 hours of seminars in the MT.

**Formative coursework:** Students will be expected to produce 1 project in the MT.

The two formative assessments will be in class exercises with two components. One component will help prepare students for the Project (i.e., an application of a statistical technique to solve a company problem or research question), and the other component will help prepare students for the Final Exam.

**Indicative reading:**

- Statistics for Business Decision Making and Analysis, by Robert Stine and Dean Foster (S & F) second edition Pearson.

**Assessment:** Exam (70%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Project (20%, 3000 words) and continuous assessment (10%) in the MT.

## MG4F8 Half Unit

### Managerial Economics and Quantitative Measurement for Social Entrepreneurs

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Yally Avrahampour MAR 5.24

With guest lecturer, Professor Saul Estrin

**Availability:** This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

**Course content:** The course will start with an introduction to economics for social entrepreneurs, with attention focused on markets and market failures, notably externalities and public goods. Questions of social welfare and income inequality will also be discussed. The course introduces social enterprises as hybrid organizations with multiple objectives. We then move to a series of economics topics of particular relevance in analysing the problems of social entrepreneurs, namely the representation and analysis of firm costs; the measurement of costs; analysis of consumer demand; and measurement of performance.

The course continues by introducing techniques used to measure and monetize social impact including Social Return on Investment (SROI). We will critically assess the SROI performance measure by discussing the cost of capital of social enterprises and the determination of the counterfactual for assessing impact. We then consider debates relating to randomized controlled trials and lean data and accounting for environmental impact. The course ends by considering strategy for social enterprises.

**Course Objectives**

Students should learn:

- Key theoretical approaches in economics and quantitative measurement, which includes related quantitative methods, to understanding social innovation and entrepreneurship;
- Empirical findings - typically from recent economics, accounting and management research;
- The most important economic, accounting and quantitative/statistical insights, concepts, theoretical approaches required to set-up, manage, and scale up social innovation and enterprises;
- To relate theoretical and methodological insights, concepts and frameworks for social innovation and enterprise to real world phenomena and social problems through the use of case studies.

**Teaching:** 20 hours of lectures and 15 hours of seminars in the MT.

Theoretical material and analytical frameworks from accounting and economics respectively of relevance to social entrepreneurs will be taught in the lecture slots, while the seminars will cover a relevant case study each week. Although the course covers two distinct disciplines, there will be an effort, where possible, to treat the issues in an integrated manner.

In addition students are expected to attend two introductory sessions, each lasting two hours.

**Formative coursework:**

- 1 Formative essay in the MT.
- Formative group feedback on other groups' presentations, twice in MT.

**Indicative reading:** Each week we draw on a variety of required and further readings. We also make suggestions regarding textbooks that provide background for the concepts outlined in the course.

For **Managerial Economics**, students without an economics background might start with the textbook by D.Begg, G. Vernasca, Fischer, Dornbusch (11th Edition) Economics, McGraw Hill.

A more advanced treatment is contained in S. Estrin, D. Laidler and M. Dietrich, Microeconomics (6th Edition), Pearson.

**Introductory Reading**

There are also a number of books that inform the field, that students might wish to read in advance or during the course as background material.

A. Sen, 2009, The Idea of Justice, Harvard University Press

A.V. Banerjee and E. Duflo, 2011, Poor Economics, BBS Publications

R.L. Martin and S.R. Osberg, 2015, Going Beyond Better, Harvard Business Review Press

For **Quantitative Measurement** the textbooks representing these background readings are:

Weetman, P. (2019) Financial Accounting: An Introduction.

(Available as an e-book through the LSE library).

Kaplan, R. & Atkinson, A. (2014) Advanced Management Accounting 3rd edition, Pearson

The following readings provide an introduction to accounting for social entrepreneurship:

Barker, R., Eccles, R. & Serafeim, G. (2020) "The Future of ESG is ... Accounting?" Harvard Business Review, December

Cohen, R. (2020) Impact: Reshaping Capitalism to Drive Real Change, Ebury Press

New Economics Foundation (NEF). (2007). Measuring Real Value: A DIY guide to social return on investment, available at [https://neweconomics.org/uploads/files/cf0968d3256d6bffcc\\_cim6bsty5.pdf](https://neweconomics.org/uploads/files/cf0968d3256d6bffcc_cim6bsty5.pdf)

**Assessment:** Essay (90%, 3000 words) in the LT.

Class participation (10%) in the MT.

Assessed essays (90%, 3000 words) in the LT.

Class participation (10%) based around student group presentations of cases in the MT.

## MG4F9 Half Unit

### Organisational Behaviour and Marketing for Social Entrepreneurs

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Niranjan Janardhanan and Prof Naufel Vilcassim. Prof Vilcassim - Marketing. Dr Janardhanan - Organisational Behaviour

**Availability:** This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

**Course content:** The course is a rigorous examination of key insights, concepts and theoretical frameworks that are essential in understanding social innovation and enterprises from the perspectives of Marketing and Organisational Behaviour (OB). Students learn to understand, synthesise and relate these insights, concepts and theoretical frameworks to real-life phenomena and problems through interactive lectures, cases, empirical studies and videos. In a very practical sense, students will test this knowledge by application to cases relating to different types of social enterprises in Marketing, as well as by applying to effecting social change in relation to such topics as motivation, team management, and organizational culture, in the OB portion of the course.

More specifically, students learn:

- Key theoretical approaches (through the lenses of organisational behaviour and marketing) to understanding social innovations and entrepreneurship;
- Empirical findings - typically from recent management research and related fields; this is a young field - on how Marketing and OB aspects of social innovations and enterprises are associated with social impact;
- A rigorous synthesis of the most important marketing and organisational behaviour insights, concepts, theoretical approaches to set-up, manage, and scale up social innovation and enterprises;
- Relating theoretical and methodological insights, concepts and frameworks for social innovation and enterprise to real world phenomena and social problems through applied case-related individual analysis in both Marketing and OB.;
- Also importantly this course provides essential knowledge and tools for the individual design or consulting projects on actual management problems for social innovation and enterprise in the capstone/dissertation course.

This course comprises a Marketing and Organisational Behaviour stream.

A: Organisational Behaviour

- Personality and Individual Differences
- Motivation and Rewards
- Organisational Culture, Ideological Currency & Making a difference
- Identity of entrepreneurs and the enterprise
- Leadership and decision-making.

B: Marketing

The **specific objectives** of this part of the course include the following tasks.

1. Analysing critically the task of marketing under contemporary conditions and examining the major functions that comprise the marketing task.
  2. Developing an awareness of the major types of marketing problems faced by social enterprises with the emphasis on sound analytical approaches (both qualitative and quantitative) to effective decision-making.
  3. Evaluating various types of strategies and tactics that can be employed in guiding the marketing activities of a SE by becoming familiar with different theories, concepts, frameworks, models, and methods that can be brought to bear in developing and executing marketing strategies and.
  4. Measuring the effectiveness of a firm's marketing strategy and tactics using appropriate metrics, given its objectives
- Regardless of your functional position, by the end of the course you should feel comfortable in applying key marketing concepts in practice and evaluating the marketing activities of your organization.

**Teaching:** 30 hours of lectures and 3 hours of workshops in the MT.

Five weeks (15hrs) will focus on OB and in the second five weeks (15hrs) will focus on core insights from Marketing, with the aim of imparting key managerial knowledge and skills required to catalyse the changes required to launch and lead successful entrepreneurial ventures in social innovation.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

Students will be expected to:

- a) produce 1 essay in the MT. This (optional) formative will be based on the OB section of the course, where students will be asked to submit a small essay-type section (~500 words) to reflect the format and the topic of their respective summative topics.
- b) provide written answers (maximum 1000 words) to any one of the cases assigned for class discussion in Marketing. As the respective cases will be discussed in the class sessions for which they have been assigned, the individual write-ups must be submitted at the beginning of the class session.

**Indicative reading:** For Marketing:

- Madeline Powell, Stephen P. Osborne, "Can marketing contribute to sustainable social enterprise?", *Social Enterprise Journal*, (2015) Vol. 11 Iss: 1, pp. 24-46.

- A Framework for Marketing Strategy Formation for Social Enterprises (Craig-Morse and Vilcassim, private note)
- Read: Digital Marketing and Communication for Social Enterprises. (Bandyopadhyay and Ray: Chapter 18 - Media Trust in a Digital World pp 251-262) Springer Nature Switzerland AG 2019

For Organisational Behaviour:

- Bargsted, M., Picon, M., Salazar, A., & Rojas, Y. (2013). Psychosocial characterization of social entrepreneurs: A comparative study. *Journal of Social Entrepreneurship*, 4(3), 331–346.
- Davis, G. & White, C. (2015). How your company can change the world. *Harvard Business Review* (5), 48-55.
- Fauchart, E., & Gruber, M. (2011). Darwinians, communitarians, and missionaries: The role of founder identity in entrepreneurship. *Academy of Management Journal*, 54(5), 935-957.

**Assessment:** Essay (45%, 2000 words) and take-home assessment (45%) in the LT.

Class participation (10%) in the MT.

OB: Essay (45%, 2000 words) in the LT.

MKT: Take-home assignment (45%, 2500 words) in the LT

---

## MG4G1 Half Unit

### Understanding Social Problems for Innovation and Entrepreneurship

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Harry Barkema, Professor Flora Cornish and Dr Lamees Tanveer.

**Availability:** This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

**Course content:** The aim of this course, together with Social Organization Design (MG4G2) in the Lent term, is to help you to better understand, design, lead, and grow your social enterprise. This course – MG4G1 – focuses on the first part of your entrepreneurial journey, starting with the crucial issue of understanding the social problem of your relevant target group. We will also discuss, during the second part of this course, key elements of your entrepreneurial journey, such as Lean Startup, pivots and learning from failure, as well as how to engage with others, such as other entrepreneurs, investors, incubators and accelerators to help you reach your goals better. The second course – MG4G2 – builds on this course in terms of better understanding and designing the business model and its key elements; value proposition, revenue model, and internal organization (leadership, incentives, processes for learning & innovation) and external organization (partners & ecosystems) of your social enterprise, as well as scaling strategies. Both courses are interactive and problem-based. At the heart of both courses is one real-life, evidence-based design challenge for a social enterprise, in the form of a group project (5-6 students) in a low-income neighbourhood in Nairobi or a township in Cape Town. The project starts with building a Theory of Change, based on your understanding of the social problem of your target group, anchored in fieldwork. .

Each week of the course consists of..

- Preparation: A set of core readings (journal articles, cases, etc.) for that week.
- A lecture (2 hours) where key insights are shared and discussed.
- An interactive seminar (1 hour), starting with a mini-lecture, followed by in-depth discussion in student groups (5-6 students), and a plenary discussion.
- Student-moderated group discussions of a case or key topic of the week (30 mins, groups of 5-6 students) with a short summary of insights and conclusions to be posted online.
- Reflection log, a short impression of your personal key learnings of the week ('Aha-moments'), posted online in the form of a 3-minute video or PPT.

Other key elements of the course are:

- A real-life group design project (5-6 students) addressing a real social problem in an emerging economy (in low-income neighbourhoods in Nairobi, Kenya, and in townships in Cape Town, South Africa). The group project is fully integrated into the program, and students work on it throughout the course.
- A 1-week international field trip to collect data for the group project to these sites (in week 8: Reading week). If the journey is not possible due to health and safety reasons (e.g., COVID-19) then the fieldtrip will be held 'on-line,' in cooperation with our local partners including local 'navigators,' in Nairobi and Cape Town to facilitate data collection through virtual interviews.
- An individual assignment, via two tracks – self-selected by students: a) designing your own social enterprise (in cooperation with Generate, our LSE incubator/accelerator) or alternatively, b) a consulting project, for an existing social enterprise or social business unit of a company, or an NGO, incubator, or impact investor of your choice.

**Teaching:** 20 hours of lectures, 10 hours of classes and 5 hours of classes in the MT.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:** Beteille, A. (2003). Poverty and inequality. *Economic and Political Weekly*, 4455-4463.

Wright, E.O., 2009, Understanding class, *New Left Review*, Nov-Dec.

Banerjee, A. V., & Duflo, E. (2007). The economic lives of the poor. *The Journal of Economic Perspectives: a journal of the American Economic Association*, 21(1), 141.

Dolan, C. and M.J. Johnstone-Louis, 2011, Re-siting Corporate Responsibility: The Making of South Africa's Avon Entrepreneurs, *Fiscaal: European Journal of Global and Historical Anthropology*, 60 (Summer) 21-33.

Dolan, C., Johnstone-Louis, M., & Scott, L. (2012). Shampoo, saris and SIM cards: seeking entrepreneurial futures at the bottom of the pyramid. *Gender & Development*, 20(1), 33-47.

Morduch, J. (1999). The microfinance promise. *Journal of economic literature*, 37(4), 1569-1614.

Shakya, Y. B., & Rankin, K. N. (2008). The politics of subversion in development practice: an exploration of microfinance in Nepal and Vietnam. *The Journal of Development Studies*, 44(8), 1214-1235.

**Assessment:** Project (35%, 5000 words), class participation (10%), class participation (10%) and learning log (10%) in the MT.

Essay (35%, 1500 words) in the LT.

The project (35%, 5000 words) will be a group piece of work, while the essay (35%, 1,500 words) will be an individual piece of work.

---

## MG4G2 Half Unit Social Innovation Design

**This information is for the 2022/23 session.**

**Teacher responsible:** Professor Harry Barkema and Dr Lamees Tanveer.

**Availability:** This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

**Course content:** The course provides a rigorous overview of insights, concepts, frameworks, methods, tools and evidence for designing a new business model for a social enterprise. The pedagogy implies interactive lectures, classes, guest speakers on selected core topics for the course, FB posts and discussions, cases, and most importantly, applying and synthesizing insights from all these sources and relating them to a real-life social problem by designing a new social enterprise, with your group. This course – in the Lent term – directly builds on – and complements – the MT courses MG4G1 'Understanding Social Problems,' leading to the design of a fully-fledged, evidence-based social enterprise. The course will have the same student teams as in MG4G1, that culminated in developing an actual, initial idea/ proposal for problem-based intervention, based on an in-depth understanding of a key social problem. This proposed idea is the starting point for

the **business model design** project in this course. Student teams will present parts of their design in class at subsequent stages, for feedback, culminating in 'pitching' the full-fledged social enterprise design for an external panel of experts in the last session. As part of their evidence-based design, students will have the opportunity to go over for field work and data collection (i.e., those students who did not go on the first field trip in MG4G1).

More specifically, students learn:

- Key theoretical approaches (insights, concepts, methodologies/frameworks, tools) related to social and economic goals, value propositions, revenue models, partners/alliances/ ecosystems, own organizational characteristics) for designing innovative social organizations for major social impact;
- Empirical findings and evidence-based insights – from recent management research and related fields; this is a young field – on social implications of a variety of social innovation designs; moderators; how these implications differ across contexts (cultural, economic, sociological, political);
- A rigorous framework synthesizing insights, concepts, methodologies/frameworks, and tools for social innovation design, including for extreme affordability (based on the course material developed at the LSE over the past ten years);
- Synthesizing and relating theoretical and methodological insights, concepts, and frameworks for social enterprises to real world phenomena and problems, by designing an actual social enterprise;
- How social enterprise designs are contingent – and can vary strongly – depending on the identified social problem.
- How to scale up your social enterprise for major social impact. Like MG4G1, each week of the present course consists of:
- Preparation: A set of core readings (journal articles, cases, etc.) for that week
- A lecture (2.0 hours) where key insights are shared and discussed
- An interactive seminar (1 hour), starting with a mini-lecture, followed by in-depth discussion in student groups (5-6 students), and a plenary discussion
- Student-moderated group discussions of a case or key topic of the week (30 mins, groups of 5-6 students) with a short summary of insights and conclusions to be posted online
- Reflection log, a short impression of your personal key learnings of the week ('Aha-moments'), posted online in the form of a 3-minute video or PPT.

**Teaching:** 20 hours of lectures, 10 hours of classes and 5 hours of classes in the LT.

In addition, students will attend a 3hr group dynamics workshop.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:** Johnson, M. W., Christensen, C. M., Kagermann, H., 2008. Reinventing your business model. *Harvard Business Review* 86(12), 50-59.

Yunus, M., Moingeon, B., & Lehmann-Ortega, L. (2010). Building social business models: lessons from the Grameen experience. *Long range planning*, 43(2), 308-325.

Dees, J. G., Anderson, B. B., & Wei-Skillern, J. (2004). Scaling social impact. *Stanford social innovation review*, 1(4), 24-32.

Battilana, J., Sengul, M., Pache, AC., Model, J., 2015, Harnessing productive tensions in hybrid organizations; The case of work integration social enterprises, *Academy of Management Journal*, vol. 58, no. 6, 1658-1685.

Elsie Onsongo, 2017, Institutional Entrepreneurship and social innovation at the base of the pyramid: the case of M-Pesa in Kenya, *Industry and Innovation*.

**Assessment:** Project (35%), class participation (10%), class participation (10%) and learning log (10%) in the LT.

Essay (35%, 1500 words) in the ST.

The project (35%, 5000 words) will be a group piece of work, while the essay (35%, 1,500 words) will be an individual piece of work.

---

**MG4G4 Half Unit****Topics in Management Research**

**This information is for the 2022/23 session.**

**Teacher responsible:** Prof Diane Reyniers MAR 6.07

**Availability:** This course is available on the CEMS Exchange, Diploma in Accounting and Finance, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management and MSc in Management and Strategy. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course addresses various interesting topics which will be used to encourage creative and logical thinking, structuring of clear arguments and critical assessment of evidence. The focus is on interpretation of findings rather than statistical or econometric techniques.

The intellectual backbone of the course is applied and empirical economics (including behavioural economics) and finance but, wherever appropriate, contributions from the psychology, sociology and management literature will be discussed. We will mainly deal with issues which are amenable to rigorous empirical investigation. The course is designed around a set of empirical research papers. Examples of questions considered are whether pain killers are more effective when they are expensive, whether creative people cheat more, whether people overvalue their own ideas.

The main objective of the course is to enable students to comprehend and critically assess the management literature, to evaluate statements in terms of evidence and to detect false reasoning or logic. Students will gain confidence in expressing their own ideas.

Topics vary each year (based on student feedback) but examples are racial discrimination, negotiation and gender, grit, leadership, optimism and entrepreneurship.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

**Formative coursework:** One take-home mock exam in the MT.

**Indicative reading: Lecture 1: Creativity and cheating**

Gino, F. & D. Ariely (2012) The dark side of creativity: Original thinkers can be more dishonest. *Journal of Personality and Social Psychology*, 102 (3), 445-459.

**Lecture 2: Marketing and placebos**

Shiv, B.; Z. Carmon & D. Ariely (2005) Placebo effects of marketing actions: consumers may get what they pay for. *Journal of Marketing Research*, XLII (November), 383-393.

**Lecture 3: Do we know what we want?**

Ariely, D.; G. Loewenstein & D. Prelec (2003) Coherent arbitrariness: Stable demand curves without stable preferences. *Quarterly Journal of Economics*, 73-105.

**Lecture 4: Racial discrimination**

Bertrand, M. & S. Mullainathan (2004) Are Emily and Greg more employable than Lakisha and Jamal? A field experiment on labor market discrimination. *American Economic Review*, 94, 4, 991-1013.

**Lecture 5: Fundraising and ask avoidance**

**Lecture 6: Grit**

Alan, S; T. Boneva & S. Ertac (2019) Ever failed, try again, succeed better: Results from a randomized educational intervention on grit. *Quarterly Journal of Economics*, 134, 3, 1121-1162.

**Lecture 7: Optimism and entrepreneurship**

de Meza, D. et al. (2019) Curb your enthusiasm: Optimistic entrepreneurs earn less. *European Economic Review*, 11, 53-69.

**Lecture 8: The dark side of leadership**

Nevicka, B.; F.S. Ten Velden, A.H.B. De Hoogh & A.E.M. Van Vianen (2011) Reality at odds with perceptions: Narcissistic leaders and group performance. *Psychological Science*, 22, 10, 1259-64.

**Lecture 9: We love our own ideas**

Hooshangi, S. & G. Loewenstein (2016) The impact of idea generation and potential appropriation on entrepreneurship: An experimental study. *Management Science*, 64, 1, 64-82.

**Lecture 10: Negotiation**

Small, D. A., M. Gelfand, L. Babcock & H. Gettman (2007) Who goes to the bargaining table? The influence of gender and framing on the initiation of negotiation. *Journal of Personality and Social Psychology*, 93, 4, 600-613

Bowles, H.R., L. Babcock & L. Lai (2007) Social incentives for gender differences in the propensity to initiate negotiations: Sometimes it does hurt to ask. *Organizational Behavior and Human Decision Processes*, 103, 84-103.

**Assessment:** Exam (100%, duration: 2 hours) in the January exam period.

**MG4G7 Half Unit Not available in 2022/23****Contemporary Topics in Advanced Technology Management**

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Edgar Whitley NAB 3.32

**Availability:** This course is available on the CEMS Exchange, MBA Exchange, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Media and Communications (Data and Society). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** This course has a strong management focus and assumes a general knowledge of information systems and their management equivalent to MG472 Global Strategy, Management and Information Systems.

**Course content:** This course introduces students to two Contemporary Topics in Advanced Technology Management. It uses academic perspectives on the topics to provide a detailed contextualisation of technology's historical and intellectual development and combines this with practitioner perspectives to highlight the management challenges associated with these technological developments.

The topics are expected to be Artificial intelligence and Machine learning and Financial Technologies including Open Banking, Distributed Ledgers and Blockchains.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the LT. Lecture durations vary by week and a detailed schedule is available on Moodle.

A reading week will take place during Week 6. There will be no teaching during this week.

**Formative coursework:** Students will be present two draft presentations and evolving essay plans in the LT.

**Indicative reading:** The reading list will be technology specific, and determined by the guest academics. As such, they are likely to vary from year to year. Detailed readings will be made available on Moodle.

**Assessment:** Essay (50%, 2500 words), presentation (40%) and class participation (10%) in the LT.

The individual essay will focus on the emergent management challenges introduced by one advanced technology not covered in the lectures. Two group presentations will make up the 40% presentation mark: Group Presentation 1 (15%) and Group Presentation 2 (25%).

## MG4J1

### Introduction to Mathematics and Data Analysis for Managers

**This information is for the 2022/23 session.**

**Teacher responsible:** Dr Veronica Rappoport NAB 5.29

**Availability:** This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

**Course content:** The course is divided into two separate subjects: Data Analysis (Statistics) and Mathematics for Managers.

The Data Analysis (Statistics) course is for all students and covers basic probability and statistics; hypothesis testing; analysis of variance; association, correlation and regression. It also includes basic training on data analysis software (STATA). It provides students with the basic analytical tools required in MG4F7 Business Analysis to analyse business data for decision making.

The Mathematics for Managers course is an introductory mathematics course which covers the following topics with application reference to economics and business: Functions, Linear Equations, Basic Calculus, and Comparative Statics Analysis. It provides students with the basic analytical tools required in MG465 Managerial Economics to analyse models of product market and factor markets competition.

**Teaching:** 20 hours of lectures in the two weeks prior to the Michaelmas Term. Rounding out the schedule is a full programme of talks and activities designed to smooth your transition to postgraduate study at LSE.
