Undergraduate Programme Regulations

Key to Undergraduate Regulations

(H) means a half-unit course

(AT) means Autumn Term

(WT) means Winter Term

(ST) means Spring Term

BSc in Accounting and Finance

Programme Code: UBAF

Department: Accounting

For students starting this programme of study in 2023/24

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

	LSE100	LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.
		Students will choose ONE of the three half-unit options below:
	LSE100A	The LSE Course: How can we transform our climate futures? (0.5)
	LSE100B	The LSE Course: How can we control AI? (0.5)
	LSE100C	The LSE Course: How can we create a fair society? (0.5)
		Year 1
Paper 1	AC105	Introduction to Financial Accounting (0.5) and AC106 Introduction to Management Accounting (0.5)
Paper 2	EC1A3	Microeconomics I (0.5) # and EC1B3 Macroeconomics I (0.5) # 1
		Or
	EC1A5	Microeconomics I (0.5) and EC1B5 Macroeconomics I (0.5) # 2
Paper 3	ST107	Quantitative Methods (Statistics) (0.5) # and one of the following:
	MA107	Quantitative Methods (Mathematics) (0.5) # or
	MA108	Methods in Calculus and Linear Algebra (0.5)
Paper 4	FM101	Finance (0.5) and one 0.5 unit course from the Year 1 options list:
		Year 1 options list
		Year 2
Paper 5	AC205	Intermediate Financial Accounting (0.5) # and AC206 Intermediate Management Accounting (0.5) #
Paper 6	FM212	Principles of Finance (1.0) # or
	FM213	Principles of Finance (1.0) # A
Paper 7		Either
		Courses to the value of 1.0 unit(s) from the following:
	EC2A3	Microeconomics II (0.5) # 34
	EC2B3	Macroeconomics II (0.5) # 56
	EC2C3	Econometrics I (0.5) # 7
		Or
		Courses to the value of 1.0 unit(s) from the following:
	EC2A5	Microeconomics II (0.5) # 8
	EC2B5	Macroeconomics II (0.5) # 9
	EC2C3	Econometrics I (0.5) # 10
Paper 8		Courses to the value of 1.0 unit from the Year 2 options list
		Year 2 options list
		Year 3

Paper 9	AC331	Contemporary Issues in Financial Accounting (0.5) # and AC311 Results Accountability and Management Control for Strategy Implementation (0.5) #
Paper 10		Courses to the value of 1.0 unit from the following:
	AC312	Performance Measurement, Strategy, and Uncertainty (0.5) #
	AC332	Financial Statement Analysis and Valuation (0.5) #
	AC341	Corporate Governance, Risk Management and Financial Audit (0.5)
	AC342	Accounting, Corporate Responsibility and Sustainability (0.5)
Paper 11	FM300	Corporate Finance, Investments and Financial Markets (1.0) #
Paper 12		Courses to the value of 1.0 unit from the Year 3 options list
		Year 1 options list
	MG104	Operations Management (0.5)
	MG105	Organisational Behaviour and Leadership (0.5)
	PH111	Introduction to Logic (0.5)
	ST101A	Programming for Data Science (0.5) #
	ST101W	Programming for Data Science (0.5) #
		Year 2 options list
	EC2A3	Microeconomics II (0.5) # 11
	EC2B3	Macroeconomics II (0.5) # 12
	EC2C3	Econometrics I (0.5) # 13
	EC2C4	Econometrics II (0.5) # 14
	EH240	Business and Economic Performance since 1945: Britain in International Context (1.0)
	GV101	Introduction to Political Science (1.0)
	GY121	Sustainable Development (1.0)
	GY202	Introduction to Global Development (1.0)
	GY222	Applied Environmental Economics (1.0)
	MA207	Further Quantitative Methods (Mathematics) (0.5) # 15
	MA213	Operations Research Techniques (0.5) #
	MA324	Mathematical Modelling and Simulation (0.5) # 16
	MG205	Econometrics: Theory and Applications (1.0) # 17
	MG209	E-business (0.5)
	MG212	Marketing (0.5)
	MG213	Information Systems (0.5)
	ST115	Managing and Visualising Data (0.5) #
	ST201	Statistical Models and Data Analysis (0.5) #
	ST205	Sample Surveys and Experiments (0.5) # 18
		Year 3 options list
	AC312	Performance Measurement, Strategy, and Uncertainty (0.5) #
	AC332	Financial Statement Analysis and Valuation (0.5) #
	AC341	Corporate Governance, Risk Management and Financial Audit (0.5)
	AC342	Accounting, Corporate Responsibility and Sustainability (0.5)
	EC2A3	Microeconomics II (0.5) #
	EC2B3	Macroeconomics II (0.5) #
	EC2C3	Econometrics I (0.5) #
	EC2C4	Econometrics II (0.5) #
	FM321	Risk Management and Modelling (0.5) #
	FM322	Derivatives (0.5) #
	GY326	Sustainable Business and Finance (0.5)
	GY327	Global Environmental Governance (0.5)
	LL202	Commercial Contracts (1.0) #
	LL203	Company Law (1.0) #
	LL293	Tax and Tax Avoidance (1.0)
	MA213	Operations Research Techniques (0.5) #
	MA301	Mathematical Game Theory (0.5) #
	MA324	Mathematical Modelling and Simulation (0.5) #

6 Undergraduate Programme Regulations

MA330	Game Theory for Collective Decisions (0.5) #
MG303	International Business Strategy and Emerging Markets (0.5) #
MG305	Innovation and Technology Management (0.5)
ST309	Elementary Data Analytics (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

1: EC1A3, EC1B3 can not be taken with EC1A5, EC1B5
 2: EC1A5, EC1B5 can not be taken with EC1A3, EC1B3
 3: Before taking EC2A3 you must take EC1A3
 4: EC2A3 can not be taken with EC2A5, EC201, MG207
 5: Before taking EC2B3 you must take EC1A3
 Before taking EC2B3 you must take EC1B3
 6: EC2B3 can not be taken with EC210, EC2B5
 7: EC2C3 can not be taken with MG205
 8: EC2A5 can not be taken with EC2A3
 9: EC2B5 can not be taken with EC2B3
 10: EC2C3 can not be taken with MG205
 11: EC2A3 can not be taken with MG207, EC201, EC2A5
 12: EC2B3 can not be taken with EC2B5
 13: EC2C3 can not be taken with MG205, EC210
 14: EC2C4 can not be taken with MG205
 15: MA207 can not be taken with MA100
 16: MA324 can not be taken with MA334
 17: MG205 can not be taken with EC2C3, EC2C4
 18: ST205 can not be taken with ST307

Footnotes

A: FM212 and FM213 course choice depends on Mathematics and Statistics courses taken by students in their first year. See course guides for further information.

Accreditation

Accredited by the following bodies for the purpose of exemptions from some professional examinations:

- Association of Chartered Certified Accountants (ACCA).
- Chartered Institute of Management Accountants (CIMA) through the Accredited degree accelerated route.
- Chartered Institute of Public Finance and Accountancy (CIPFA).
- Institute of Chartered Accountants in England and Wales (ICAEW).

Further information is available from the Department of Accounting (accounting@lse.ac.uk) or the BSc in Accounting and Finance homepage lse.ac.uk/study-at-lse/Undergraduate/Degree-programmes-2018/BSc-Accounting-and-Finance.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

subject to timetabling constraints and /or students meeting specific prerequisite requirements.

LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Students will choose ONE of the three half-unit options below:

LSE100A The LSE Course: How can we transform our climate futures? (0.5)
 LSE100B The LSE Course: How can we control AI? (0.5)
 LSE100C The LSE Course: How can we create a fair society? (0.5)

Paper 1	ST102	Elementary Statistical Theory (1.0) #
Paper 2	MA100	Mathematical Methods (1.0) #
Paper 3	Courses to the value of 1.0 unit(s) from the following: MA103 Introduction to Abstract Mathematics (1.0) #	
	Or Two half-unit courses from: AC102 Elements of Financial Accounting (0.5) AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5) MA102 Mathematical Proof and Analysis (0.5) # ST101A Programming for Data Science (0.5) # 1 ST101W Programming for Data Science (0.5) # 2 ST115 Managing and Visualising Data (0.5) #	
Paper 4	EC1A3	Microeconomics I (0.5) # and EC1B3 Macroeconomics I (0.5) #
	Year 2 ST202 Probability, Distribution Theory and Inference (1.0) #	
Paper 5	MA212	Further Mathematical Methods (1.0) #
Paper 6	ST226	Actuarial Investigations: Financial (0.5) #
Paper 7		and ST227 Survival Models (0.5) #
Paper 8	Courses to the value of 1.0 unit(s) from the following: A AC102 Elements of Financial Accounting (0.5) AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5) EH101 The Internationalisation of Economic Growth, 1870 to the present day (1.0) FM213 Principles of Finance (1.0) # MA102 Mathematical Proof and Analysis (0.5) # MA103 Introduction to Abstract Mathematics (1.0) # MA203 Real Analysis (0.5) # ST207 Databases (0.5) #	
	Undergraduate Outside Options List (Years 2 & 3)	
	Year 3	
Paper 9	ST301	Actuarial Mathematics (Life) (0.5) # and ST302 Stochastic Processes (0.5) #
Paper 10	ST330	Stochastic and Actuarial Methods in Finance (1.0) #
	Or Courses to the value of 1.0 unit(s) from the following: (please note that students can replace Papers 10, 11 or 12 with subjects to the value of one unit approved by their tutor from the Undergraduate Outside Options List, but this will affect exemptions from examinations set by the Institute and Faculty of Actuaries)	
	Undergraduate Outside Options List (Years 2 & 3)	
Paper 11	Courses to the value of 1.0 unit(s) from the following: ST300 Regression and Generalised Linear Models (0.5) # ST303 Stochastic Simulation (0.5) # ST304 Time Series and Forecasting (0.5) # ST306 Actuarial Mathematics (General) (0.5) # ST308 Bayesian Inference (0.5) # ST310 Machine Learning (0.5) # ST313 Ethics for Data Science (0.5) # ST326 Financial Statistics (0.5) #	
	Or Courses to the value of 1.0 unit(s) from the following: (please note that students can replace Papers 10, 11 or 12 with subjects to the value of one unit approved by their tutor from the Undergraduate Outside Options List, but this will affect exemptions from examinations set by the Institute and Faculty of Actuaries)	
	Undergraduate Outside Options List (Years 2 & 3)	
Paper 12	MA203	Real Analysis (0.5) #

10 Undergraduate Programme Regulations

MA208	Optimisation Theory (0.5) #

Courses to the value of 1.0 unit(s) from the following: (please note that students can replace Papers 10, 11 or 12 with subjects to the value of one unit approved by their tutor from the Undergraduate Outside Options List, but this will affect exemptions from examinations set by the Institute and Faculty of Actuaries)

Undergraduate Outside Options List (Years 2 & 3)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: ST101A can not be taken with ST101W

2: ST101W can not be taken with ST101A

Footnotes

A: Courses chosen from the Undergraduate Outside Options List must be discussed with the Academic Mentor.

Individual exemptions from 2019-2020 onwards:

CS1 ST102 (x0.45) ST202 (x0.40)

&

[ST300 or ST308 or ST306] (x0.15)

CS2 ST227 (x0.30), ST302 (x0.30)

&

The average of two of the following courses:

[ST303, ST306, ST304, ST326] (x0.4)

CM1 ST226 (x0.5) & ST301 (x0.5)

CM2 ST330 (x0.8) & ST306 (x0.20)

CB1 AC102 & AC103 (x0.5)

&

FM212/FM213 (x0.5)

CB2 EC1A3 & EC1B3

Accreditation:

Accredited by the Institute and Faculty of Actuaries for the purpose of exemption from some professional examinations. Students may obtain exemption from some professional examinations of the Chartered Institute of Management Accountants (CIMA)'s CGMA Professional Qualification through relevant pathway. Further information is available on the Department of Statistics website <https://www.lse.ac.uk/Statistics/Current-Students/Undergraduate-Programme-Accreditation-and-Exemptions>.

BSc in Actuarial Science

Programme Code: UBACT2

Department: Statistics

For students starting this programme of study in 2022/23

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

BSc in Actuarial Science (with a Placement Year)

Programme Code: UBACTPY

Department: Statistics

For students starting this programme of study in 2023/24

This is a four year programme with a one year abroad element at the end of year two. Students spend years one, two and four at the LSE. The overall degree will be based on marks obtained during those three years at LSE under the three-year classification scheme. In order to be eligible for the award of the degree students must also successfully pass all elements of assessment at the overseas Institution. The overseas Institution will provide all successful students with a certificate and transcript with information about their year abroad.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

A: LL141 is compulsory but does not affect the final degree classification.

B: LL100 is compulsory but does not affect the final degree classification.

C: No more than one unit taken under Papers 8 and 12 may be selected from Anthropology Selection List A.

D: No more than one unit taken under Papers 8 and 12 may be selected from Anthropology Selection List A.

Accreditation:

The qualifying law degree (QLD) is recognised by the Solicitors Regulation Authority www.sra.org.uk/consumers/consumers.page (SRA) for the purposes of satisfying the academic stage of training. Accredited by the Bar Standards Board www.barstandardsboard.org.uk/ for the purpose of a Qualifying Law Degree. Further information is available by emailing anthropology.enquiries@lse.ac.uk or accessing the Anthropology Department website lse.ac.uk/anthropology/degree_programmes/degree_programmes_home.aspx.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
	LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.
	Students will choose ONE of the three half-unit options below:
	LSE100A The LSE Course: How can we transform our climate futures? (0.5)
	LSE100B The LSE Course: How can we control AI? (0.5)
	LSE100C The LSE Course: How can we create a fair society? (0.5)
	Year 1
Paper 1	AN100 Being Human: Contemporary Themes in Social Anthropology (1.0)
Paper 2	AN101 A History of Anthropological Theory (1.0)
Paper 3	LL106 Public Law (1.0)
Paper 4	LL105 Property I (0.5) (withdrawn 2023/24) and

		LL109 Introduction to the Legal System (0.5) (withdrawn 2023/24)
Skills course	LL100	Legal Studies Skills (0.0) A
		Year 2
Paper 5	AN226	Political and Legal Anthropology (1.0)
Paper 6	LL108	Criminal Law (1.0)
Paper 7	LL104	Law of Obligations (1.0)
Paper 8		Courses to the value of 1.0 unit(s) from the following: B
		Anthropology Selection List A
		Anthropology Selection List B
		Year 3
Paper 9	LL232	Law and Institutions of the European Union (1.0)
Paper 10	LL275	Property II (1.0)
Paper 11		Courses to the value of 1.0 unit(s) from the following: Law Selection List
Paper 12		Courses to the value of 1.0 unit(s) from the following: C
		Anthropology Selection List A
		Anthropology Selection List B
		Anthropology Selection List C
		Anthropology Selection List A

LSE100B The LSE Course: How can we control AI? (0.5)

LSE100C The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1 ST102 Elementary Statistical Theory (1.0) #

Paper 2 MA100 Mathematical Methods (1.0) #

Paper 3 ST101A Programming for Data Science (0.5) # **and** ST115 Managing and Visualising Data (0.5) #

Paper 4 Courses to the value of 1.0 unit(s) from the following:

AC102 Elements of Financial Accounting (0.5)

AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5)

EC1A3 Microeconomics I (0.5) #

EC1B3 Macroeconomics I (0.5) # 1

FM101 Finance (0.5)

MA102 Mathematical Proof and Analysis (0.5) #

MA103 Introduction to Abstract Mathematics (1.0) #

Year 2

Paper 5 If MA102 or MA103 has not been taken in Year 1:

MA102 Mathematical Proof and Analysis (0.5) #

and MA222 Further Mathematical Methods (Linear Algebra) (0.5) # A

Or

If MA102 or MA103 has been taken in Year 1, either:

MA212 Further Mathematical Methods (1.0) #

Or

MA203 Real Analysis (0.5) # **and** MA222 Further Mathematical Methods (Linear Algebra) (0.5) #

Papers 6 & 7 Courses to the value of 2.0 unit(s) from the following:

Either

ST206 Probability and Distribution Theory (0.5) # **and** ST211 Applied Regression (0.5) #

and 1.0 unit(s) from the options list below

Or

ST202 Probability, Distribution Theory and Inference (1.0) # **and** ST211 Applied Regression (0.5) #

and 0.5 unit(s) from the options list below

Options list

Paper 8 MA214 Algorithms and Data Structures (0.5) # **and**

ST207 Databases (0.5) #

Year 3

Paper 9 ST310 Machine Learning (0.5) # **and** ST311

Artificial Intelligence (0.5) #

Paper 10 Courses to the value of 1.0 unit(s) from the following:

ST300 Regression and Generalised Linear Models (0.5) #

ST304 Time Series and Forecasting (0.5) #

ST308 Bayesian Inference (0.5) #

ST326 Financial Statistics (0.5) #

Paper 11

ST312 Applied Statistics Project (0.5) #

and 0.5 unit(s) from the list of options below

List of options

MA301 Mathematical Game Theory (0.5) #

MA316 Graph Theory (0.5) #

MA320 Mathematics of Networks (0.5) #

MA324 Mathematical Modelling and Simulation (0.5) #

MA333 Optimisation for Machine Learning (0.5) #

ST301 Actuarial Mathematics (Life) (0.5) # 3

ST302 Stochastic Processes (0.5) #

ST303 Stochastic Simulation (0.5) # 4

ST307 Aspects of Market Research (0.5) # 5

ST313 Ethics for Data Science (0.5) #

ST314 Multilevel and Longitudinal Models (0.5) #

any 0.5 unit(s) course listed under paper 10

Paper 10 options list

Paper 12

Courses to the value of 1.0 unit(s) from the following:

FM213 Principles of Finance (1.0) #

FM300 Corporate Finance, Investments and Financial Markets (1.0) # 6

MA330 Game Theory for Collective Decisions (0.5) #

ST313 Ethics for Data Science (0.5) #

ST327 Market Research: An Integrated Approach (1.0) # 7

ST330 Stochastic and Actuarial Methods in Finance (1.0) # 8

any courses listed under papers 10 & 11

Papers 10 & 11 options list

Options list

EC2A3 Microeconomics II (0.5) #

EC2B3 Macroeconomics II (0.5) # 2

EC2C3 Econometrics I (0.5) #

EC2C4 Econometrics II (0.5) #

FM213 Principles of Finance (1.0) #

LL210 Information Technology and the Law (1.0) #

MA103 Introduction to Abstract Mathematics (1.0) # B

MA203 Real Analysis (0.5) # C

MA208 Optimisation Theory (0.5) #

MA210 Discrete Mathematics (0.5) #

MA213 Operations Research Techniques (0.5) #

ST205 Sample Surveys and Experiments (0.5) #

ST226 Actuarial Investigations: Financial (0.5) #

ST227 Survival Models (0.5) #

Paper 10 options list

ST300 Regression and Generalised Linear Models (0.5) #

ST304 Time Series and Forecasting (0.5) #

ST308 Bayesian Inference (0.5) #

ST326 Financial Statistics (0.5) #

Papers 10 & 11 options list

MA301 Mathematical Game Theory (0.5) # 9

MA316 Graph Theory (0.5) #

MA320 Mathematics of Networks (0.5) #

MA324 Mathematical Modelling and Simulation (0.5) #

MA333 Optimisation for Machine Learning (0.5) #

ST300 Regression and Generalised Linear Models (0.5) #

ST301 Actuarial Mathematics (Life) (0.5) # 10

ST303 Stochastic Simulation (0.5) # 11

ST304 Time Series and Forecasting (0.5) #

ST307 Aspects of Market Research (0.5) # 12

ST308 Bayesian Inference (0.5) #

ST314 Multilevel and Longitudinal Models (0.5) #

ST326 Financial Statistics (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

1: Before taking EC1B3 you must take EC1A3

2: EC2B3 can not be taken with EC210

3: Before taking ST301 you must take ST227

4: Before taking ST303 you must take ST302

5: ST307 can not be taken with ST205, ST327

6: Before taking FM300 you must take FM213

7: ST327 can not be taken with ST307

8: Before taking ST330 you must take ST302

9: MA301 can not be taken with MA300

10: Before taking ST301 you must take ST227

11: Before taking ST303 you must take ST302

12: ST307 can not be taken with ST327, ST205

Footnotes

A: Students can obtain exemption from this course if they take MA103 in papers 6&7

B: Students taking this option are exempt from MA102

C: MA203 can only be taken if MA102 or MA103 has been taken under paper 4.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

- 1: Before taking ST301 you must take ST227
- 2: Before taking ST303 you must take ST302
- 3: ST307 can not be taken with ST205, ST327
- 4: Before taking FM300 you must take FM213
- 5: ST327 can not be taken with ST307
- 6: Before taking ST330 you must take ST302
- 7: MA301 can not be taken with MA300
- 8: Before taking ST301 you must take ST227
- 9: Before taking ST303 you must take ST302
- 10: ST307 can not be taken with ST327, ST205

Footnotes

- A: Students can obtain exemption from this course if they take MA103 in papers 6&7
 B: Students taking this option are exempt from MA102

BSc in Data Science

Programme Code: UBDCS

Department: Statistics

For students starting this programme of study in 2021/22

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Students will choose ONE of the three half-unit options below:

LSE100A The LSE Course: How can we transform our climate futures? (0.5)
 LSE100B The LSE Course: How can we control AI? (0.5)
 LSE100C The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1 EC1P1 Economics (0.5)

and

Paper 2 EC1A1 Microeconomics I (0.5) #

ST109 Elementary Statistical Theory I (0.5) # 1

and

Paper 3 EC1C1 Econometrics I (0.5) #

Either

MA108 Methods in Calculus and Linear Algebra (0.5)

and

EC1B1 Macroeconomics I (0.5) #

Or

MA100 Mathematical Methods (1.0) #

Paper 4 **If** MA108 was taken under paper 3, courses to the value of 1.0 unit(s) from the following:

Undergraduate Outside Options List (Year 1)

Or

If MA100 was taken under paper 3, courses to the value of 1.0 unit(s) from the following:

EC1B1 Macroeconomics I (0.5) #

and a 0.5 unit MT course from:

Undergraduate Outside Options List (Year 1)

Year 2

Paper 5 EC2A1 Microeconomics II (1.0) # 2

Paper 6 EC2B1 Macroeconomics II (1.0) # 3

Paper 7 EC2C1 Econometrics II (1.0) # 45

Paper 8 Courses to the value of 1.0 unit(s) from the following:

Undergraduate Outside Options List (Years 2 & 3)

Or

FM213 Principles of Finance (1.0) #

Year 3

Paper 9 Courses to the value of 1.0 unit(s) from the following:

EC319 Games and Economic Behaviour (1.0) #

EC333 Problems of Applied Econometrics (1.0) #

EC336 Econometric Theory A (0.5) #

EC337 Econometric Theory B (0.5) #

Paper 10 Courses to the value of 1.0 unit(s) from the following:

Econometrics and Mathematical Economics

Selection List

Paper 11 Courses to the value of 1.0 unit(s) from the following:

A

EC319 Games and Economic Behaviour (1.0) #

EC333 Problems of Applied Econometrics (1.0) #

EC336 Econometric Theory A (0.5) #

EC337 Econometric Theory B (0.5) #

Econometrics and Mathematical Economics

Selection List

Undergraduate Outside Options List (Years 2 & 3)

Before taking EC2C1 you must take EC1B1

Before taking EC2C1 you must take EC1C1

Before taking EC2C1 you must take EC1P1

5: EC2C1 can not be taken with MG205

Footnotes

A: In exceptional circumstances a student may substitute a paper from the Undergraduate Outside Options List for Paper 11. This outside paper should be both of an advanced nature and coherent with the student's other choice of papers. Permission to take such a paper should first be obtained from the Departmental Tutor who must countersign the Additional Permission Form. Any subsequent revision to the student's choice of papers must also be countersigned by the Departmental Tutor.

BSc in Economic History

Programme Code: UBEH

Department: Economic History

For students starting this programme of study in 2023/24

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper

Course number, title (unit value)

LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Students will choose ONE of the three half-unit

options below:

LSE100A The LSE Course: How can we transform our climate futures? (0.5)

LSE100B The LSE Course: How can we control AI? (0.5)

LSE100C The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1 EH101 The Internationalisation of Economic Growth, 1870 to the present day (1.0)

Paper 2 EC1A5 Microeconomics I (0.5) **and** EC1B5 Macroeconomics I (0.5) #

Economics Selection List

Or

In exceptional circumstances a student may select a course from the Undergraduate Outside Options List below. This outside paper should be both of an advanced nature and coherent with the student's other choice of papers. Permission to take such a paper should first be obtained from the Departmental Tutor who must countersign the Additional Permission Form. Any subsequent revision to the student's choice of papers must also be countersigned by the Departmental Tutor.

Undergraduate Outside Options List (Years 2 & 3)

LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Economics Selection List

EC302	Political Economy (1.0) #
EC307	Development Economics (1.0) #
EC310	Behavioural Economics (1.0) #
EC311	History of Economics: How Theories Change (1.0)
EC313	Industrial Economics (1.0) #
EC317	Labour Economics (1.0) #
EC319	Games and Economic Behaviour (1.0) #
EC321	Monetary Economics and Aggregate Fluctuations (1.0) #
EC325	Public Economics (1.0) #
EC330	Environmental Economics (1.0) #
EC333	Problems of Applied Econometrics (1.0) #
EC334	Advanced Macroeconomics (0.5) #
EC335	Economic Policy in the Global Economy (0.5) #
EC336	Econometric Theory A (0.5) #
EC337	Econometric Theory B (0.5) #
EC338	International Trade (0.5) #
EC339	International Macroeconomics (0.5) #
FM213	Principles of Finance (1.0) #
FM300	Corporate Finance, Investments and Financial Markets (1.0) # A
FM321	Risk Management and Modelling (0.5) # B
FM322	Derivatives (0.5) #
PH311	Philosophy of Economics (1.0) #

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: ST109 can not be taken with ST102, ST107, ST108
A: Before taking FM300 you must have previously taken FM213.

B: Before taking FM321 and/or FM322 you must have previously taken FM213. Students who have not taken FM213, but have an excellent quantitative background, may be allowed to take this course at the discretion of the course leader.

A maximum of one unit of Finance courses (either FM330 or FM321 and/or FM3322) may be chosen for Papers 9, 10 & 11; students wishing to choose more than one unit can do so as Paper 12.

Accreditation:

Accredited by the Chartered Institute of Management

Notes

Footnotes

Accountants (CIMA) for the purpose of exemption from some professional examinations through the Accredited degree accelerated route. Either EC100 or EC102 needs to be chosen for exemption of BA1 Fundamentals of Business Economics.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in Economics and Economic History

Programme Code: UBECEH

	GY350	Dissertation (1.0) # B

Notes

LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Footnotes

A: Approved courses to the value of 1.0 unit can be selected from the Language Courses **List 2**. A language option may be chosen if it is a continuation

of a language studied at A level (or equivalent). The appropriate course level is determined by the Language Centre.

B: Before taking GY350 students must take one of the following prerequisites in Year 2: GY245 or GY248 Level 1 courses are not permitted as part of this degree programme in Years 2 and 3.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in Environment and Development

Programme Code: UBENDV

Department: Geography and Environment

For students starting this programme of study in 2022/23

Students on this programme have the opportunity to receive a language specialism attached to their degree certificate and transcript. See the details at the bottom of this page for more information.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Footnotes

means there may be prerequisites for this course.

Please view the course guide for more information.

A: Approved courses to the value of 1.0 unit can be selected from the Language Courses **List 1**. A language option may be chosen if the student is new to the language or if the course is a continuation of a language studied at A level (or equivalent). The appropriate course level is determined by the Language Centre.

B: Approved courses to the value of 1.0 unit can be selected from the Language Courses **List 2**. A language option may be chosen if it is a continuation of a language studied at A level (or equivalent) or Year 1. The appropriate course level is determined by the Language Centre.

C: Approved courses to the value of 1.0 unit can be selected from the Language Courses **List 3**, for students wishing to receive a language specialism attached to their degree certificate and transcript. The appropriate course level is determined by the Language Centre and must be a progression from courses studied in Year 1 and 2.

D: Before taking GY350 students must take one of the following prerequisites in Year 2: GY245 or GY248. Level 1 courses are not permitted as part of this degree programme in Years 2 and 3.

Language Specialism: Students who have taken and passed one language course in each year of their degree (i.e. 25% of their overall programme of study) will receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose language courses in each year according to these rules will receive a language specialism. Degree certificates which include a language specialism will state the language in the title, for example: **BA in Geography (with French)**.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

This programme has been retitled to BSc in Environment and Sustainable Development for 2023/24. Last year of entry 2022/23.

BSc in Environment and Development

Programme Code: UBENDV

Department: Geography and Environment

For students starting this programme of study in 2021/22

Students on this programme have the opportunity to receive a language specialism attached to their degree certificate and transcript. See the details at the bottom of this page for more information.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

42 Undergraduate Programme Regulations

be selected from the Language Courses **List 2**. A language option may be chosen if it is a continuation of a language studied at A level (or equivalent). The appropriate course level is determined by the Language Centre.

B: Before taking GY350 students must take one of the following prerequisites in Year 2: GY245 or GY248 Level 1 courses are not permitted as part of this degree programme in Years 2 and 3.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in Finance

Programme Code: UBF1

Department: Finance

For students starting this programme of study in 2023/24

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
	LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.
	Students will choose ONE of the three half-unit options below:
	LSE100A The LSE Course: How can we transform our climate futures? (0.5)
	LSE100B The LSE Course: How can we control AI? (0.5)
	LSE100C The LSE Course: How can we create a fair society? (0.5)
	Year 1
Paper 1	FM100 Introduction to Finance (0.5)
	and one from:
	AC102 Elements of Financial Accounting (0.5) Or
	ST101A Programming for Data Science (0.5) #
Paper 2	EC1A3 Microeconomics I (0.5) # and EC1B3 Macroeconomics I (0.5) #
Paper 3	ST102 Elementary Statistical Theory (1.0) #
Paper 4	FM102 Quantitative Methods for Finance (0.5) # and MA108 Methods in Calculus and Linear Algebra (0.5)
	Year 2
Paper 5	FM213 Principles of Finance (1.0) # A
Paper 6	EC2A3 Microeconomics II (0.5) # 1
	And Either:
	ST115 Managing and Visualising Data (0.5) #
	OR one 0.5 unit course from the following:
	Undergraduate Outside Options List (Years 2 & 3)
Paper 7	EC2C3 Econometrics I (0.5) # and EC2C4 Econometrics II (0.5) #
Paper 8	FM200 Financial Systems and Crises (0.5) and FM201 Macro-Finance (0.5)
	Year 3
Paper 9	FM301 Market Anomalies and Asset Management (0.5) # and FM302 Theories of Corporate Finance (0.5) #

Paper 10	FM321 Risk Management and Modelling (0.5) # and FM322 Derivatives (0.5) #
Paper 11	FM304 Applied Corporate Finance (0.5) # and FM305 Advanced Financial Economics (0.5) #
Paper 12	Either:
	ST310 Machine Learning (0.5) # and ST311 Artificial Intelligence (0.5) #

Or

ST310 Machine Learning (0.5) # and courses to the value of 0.5 units from the following:

Undergraduate Outside Options List (Years 2 & 3)

Or

ST311 Artificial Intelligence (0.5) # and courses to the value of 0.5 units from the following:

Undergraduate Outside Options List (Years 2 & 3)

Or

Courses to the value of 1.0 units from the following: B

Undergraduate Outside Options List (Years 2 & 3)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: Before taking EC2A3 you must take EC1A3

A: Students must have completed: EC1A3, EC1B3 and ST102.

B: Courses selected from the Undergraduate Outside Options List must be approved.

Language Courses List 3

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

A: Approved courses to the value of 1.0 unit can be selected from the Language Courses **List 1**. A language option may be chosen if the student is new to the language or if the course is a continuation of a language studied at A level (or equivalent). The appropriate course level is determined by the Language Centre.

B: Approved courses to the value of 1.0 unit can be selected from the Language Courses **List 2**. A language option may be chosen if it is a continuation of a language studied at A level (or equivalent) or Year 1. The appropriate course level is determined by the Language Centre.

C: Approved courses to the value of 1.0 unit can

Footnotes

be selected from the Language Courses **List 3**, for students wishing to receive a language specialism attached to their degree certificate and transcript. The appropriate course level is determined by the Language Centre and must be a progression from course studied in Year 1 and 2.

Level 1 courses are not permitted as part of this degree programme in Years 2 and 3.

Language Specialism: Students who have taken and passed one language course in each year of their degree (i.e. 25% of their overall programme of study) will receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose language courses in each year according to these rules will receive a language specialism. Degree certificates which include a language specialism will state the language in the title, for example: **BA in Geography (with French)**.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

GY331 Geographies of Global Migration (0.5)

Language Courses List 3

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.

Please view the course guide for more information.

A: Approved courses to the value of 1.0 unit can be selected from the Language Courses **List 1**. A language option may be chosen if the student is

Footnotes

new to the language or if the course is a continuation of a language studied at A level (or equivalent). The appropriate course level is determined by the Language Centre.

B: Approved courses to the value of 1.0 unit can be selected from the Language Courses **List 3**, for students wishing to receive a language specialism attached to their degree certificate and transcript. The appropriate course level is determined by the Language Centre and must be a progression from course studied in Year 1 and 2.

Level 1 courses are not permitted as part of this degree programme in Years 2 and 3.

Language Specialism:

Students who have taken and passed one language course in each year of their degree (i.e. 25% of their overall programme of study) will receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose language courses in each year according to these rules will receive a language specialism. Degree certificates which include a language specialism will state the language in the title, for example: **BA in Geography (with French)**.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm](https://www.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm). Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm](https://www.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm).

BA in Geography

Programme Code: UBGY2

Department: Geography and Environment

For students starting this programme of study in 2021/22 Students on this programme have the opportunity to receive a language specialism attached to their degree certificate and transcript. See the details at the bottom of this page for more information.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

See note LSE100 The LSE Course

Year 1

Paper 1 GY100 Introduction to Geography (1.0)

Paper 2 GY140 Introduction to Geographical Research (1.0)

Paper 3 GY144 Human Geography and the City (1.0)

Paper 4

Either

Courses to the value of 1.0 unit(s) from the following:

GY103 Contemporary Europe (1.0)

GY120 Environmental Change: Past, Present and Future (1.0)

GY121 Sustainable Development (1.0)

Or

An approved paper taught outside the Department to the value of 1.0 unit from the following: A

AN100 Being Human: Contemporary Themes in Social Anthropology (1.0)

EC1A3 Microeconomics I (0.5) # **and** EC1B3

Macroeconomics I (0.5) #

EC1A5 Microeconomics I (0.5) **and** EC1B5

Macroeconomics I (0.5) #

GV101 Introduction to Political Science (1.0)

HY113 From Empire to Independence: World History in the Twentieth Century (1.0)

SO110 Power, Inequality, and Difference: Contemporary Themes in Sociology (1.0)

Or

A language option to the value of 1.0 unit from the following:

History List A

History List B

Paper 8 Courses to the value of 1.0 unit(s) from the following:

Undergraduate Outside Options List (Years 2 & 3)
Year 3

Papers 9 & 10 Courses to the value of 2.0 unit(s) from the following:
A

History List A

History List B

Paper 11 Courses to the value of 1.0 unit(s) from the following:

History List A

History List B

Undergraduate Outside Options List (Years 2 & 3)

Paper 12 HY300 Dissertation (1.0)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

Footnotes

A: One course in Papers 9 & 10 must be from History List B if no course from this list was already taken at Paper 5 or Paper 7.

Language Specialism:

Students who have taken and passed at least one language course in each year of their degree (i.e. 25% of their overall programme of study) will be offered the opportunity to receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose to take language courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a language specialism will state the language in the title, for example: **BA in History (with French)**.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page

for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BA in History

Programme Code: UBHY2

Department: International History

For students starting this programme of study in 2022/23

Students on this programme have the opportunity to receive a language specialism attached to their degree certificate and transcript. See the details at the bottom of this page for more information.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
	LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.
	Students will choose ONE of the three half-unit options below:
	LSE100A The LSE Course: How can we transform our climate futures? (0.5)
	LSE100B The LSE Course: How can we control AI? (0.5)
	LSE100C The LSE Course: How can we create a fair society? (0.5)

International Exchange (1 Term)

Programme Code: UOMNIMEX3

Department: Management

For students starting this programme of study in 2023/24

A one term (Michaelmas or Lent Term only) exchange programme for visiting BSc in Management students.

Students from partner exchange schools spend one term at LSE and choose 4 half-unit courses from the list below, according to which term they attend. Visiting students should be aware that the term in which these elective courses run may be subject to change. Visiting students will not be required to complete summative assessments or examinations outside of their term of study as they are not here in the main examination period. Therefore, assessment details for visiting students may differ from those listed in the course guide. Assessment methods for visiting students are confirmed no later than Week 6 of the course.

Students take half unit courses to the value of two units. Students are not permitted to take one unit courses.

Where the prerequisite of a course is prior study on a specific LSE course, applications from exchange students with equivalent academic experience will be considered. Decisions regarding admission to courses will be made by the relevant course leader on a case by case basis.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: Before taking IR320 you must take IR203

2: Before taking IR324 you must take IR203

Before taking IR324 you must take IR200

3: Before taking IR325 you must take IR200

Before taking IR325 you must take IR203

4: Before taking LL342 you must take LL278

A: LN250 Not available to 2nd and 3rd year students

on the BA/BSc in Social Anthropology programmes.

B: LN251 Not available to 2nd and 3rd year students

on the BA/BSc in Social Anthropology programmes.

C: LN252 Not available to 2nd and 3rd year students

on the BA/BSc in Social Anthropology programmes.

D: LN253 Not available to 2nd and 3rd year students

on the BA/BSc in Social Anthropology programmes.

E: LN254 Not available to 2nd and 3rd year students

on the BA/BSc in Social Anthropology programmes.

F: LN270 Not available to 2nd and 3rd year students

on the BA/BSc in Social Anthropology programmes.

G: Courses selected from the list of language courses must be approved.

Language Specialism:

Students who have taken and passed at least one

language course in each year of their degree (i.e. 25% of their overall programme of study) will be offered the opportunity to receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose to take language courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a language specialism will state the language in the title, for example: **BSc in International Relations (with French)**.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in International Relations

Programme Code: UBIR

Department: International Relations

For students starting this programme of study in 2022/23

Students on this programme have the opportunity to receive a language specialism attached to their degree certificate and transcript. See the details at the bottom of this page for more information.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Students will choose ONE of the three half-unit options below:

LSE100A The LSE Course: How can we transform our climate futures? (0.5)

LSE100B The LSE Course: How can we control AI? (0.5)

LSE100C The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1 IR100 International Relations: Theories, Concepts and Debates (1.0)

Paper 2 IR101 Contemporary Issues in International Relations (1.0)

Paper 3 Courses to the value of 1.0 unit(s) from the following:
HY113 From Empire to Independence: World History in the Twentieth Century (1.0) **or**
HY116 International Politics since 1914: Peace and War (1.0)

Paper 4 A course to the value of 1.0 unit relevant to the study of International Relations from outside the Department, approved by the candidate's Academic Mentor and the Departmental Tutor. The following courses are strongly recommended (if not already chosen for Paper 3):

Footnotes

	EH101	The Internationalisation of Economic Growth, 1870 to the present day (1.0)		IR324	The Practices of Transitional Justice (0.5) # 2(not available 2023/24)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: Before taking IR320 you must take IR203

2: Before taking IR324 you must take IR203

Before taking IR324 you must take IR200

3: Before taking IR325 you must take IR200

Before taking IR325 you must take IR203

4: Before taking LL342 you must take LL278

A: LN250 Not available to 2nd and 3rd year students

on the BA/BSc in Social Anthropology programmes.
 B: LN251 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.
 C: LN252 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.
 D: LN253 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.
 E: LN254 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.
 F: LN270 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.
 G: Courses selected from the list of language courses must be approved.

Language Specialism:

Students who have taken and passed at least one language course in each year of their degree (i.e. 25% of their overall programme of study) will be offered the opportunity to receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose to take language courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a language specialism will state the language in the title, for example: **BSc in International Relations (with French)**.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in International Relations and Chinese

Programme Code: UBIRCHI

Department: Language Centre

For students starting this programme of study in 2023/24

This is a four year programme with a one year abroad element at the end of year two. Students spend years one, two and four at the LSE. The overall degree will be based on marks obtained during those three years at LSE under the three-year classification scheme. In order to be eligible for the award of the degree students must also successfully pass all elements of assessment at Fudan University. Fudan University will provide all successful students with a certificate and transcript with information about their year abroad.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
LSE100	LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.
Students will choose ONE of the three half-unit options below:	
LSE100A	The LSE Course: How can we transform our climate futures? (0.5)
LSE100B	The LSE Course: How can we control AI?

62 Undergraduate Programme Regulations

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Progression Rules: Students must satisfy the LSE's progression rules before they are permitted to enrol on their year abroad at Fudan; namely, students must pass 7 out of 8 units of courses that they have attempted in year one and year two.

Failure to progress:

Where a student fails to meet the progression requirements they must resit the failed assessments and cannot progress to Fudan until they have passed 7 out of 8 units. Please note students are allowed three attempts to pass an assessment in year one and only two attempts to pass an assessment in year two. Where a student fails to meet the progression requirements and has run out of attempts to resit, they will fail the degree.

Failure to pass all courses at Fudan University:

Students must pass all assessments set by Fudan University in order to be eligible for the award of the degree. Where a student fails an assessment they will be provided a resit either in Fudan at the end of the year abroad or when they are back in London at the start of the final year of the programme.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

A: Students can select a maximum of one approved language (LN) course and a maximum of one approved paper taught outside the Department.

B: LN250 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

C: LN251 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

D: LN252 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

E: LN253 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

F: LN254 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

G: LN270 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

Footnotes**BSc in International Social and Public Policy**

Programme Code: UBISPP

Department: Social Policy

For students starting this programme of study in 2023/24

Students may elect to qualify for a specialism in Development and to have this title attached to their degree certificate and transcript. See the details at the bottom of this page for more information.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

LSE100 LSE100 is a half unit taken by all students,

running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Students will choose ONE of the three half-unit options below:

LSE100A The LSE Course: How can we transform our climate futures? (0.5)

LSE100B The LSE Course: How can we control AI? (0.5)

LSE100C The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1 SP100 Understanding International Social and Public Policy (1.0)

Paper 2 SP101 Foundations of Social Policy Research (1.0)

Paper 3 SP111 Social Economics and Policy (1.0) #

Paper 4 SP112 Politics of Social Policy Making (1.0)

Year 2

Paper 5 SP200 Comparative and International Social Policy (1.0) # 1

Paper 6 SP201 Research Methods for Social Policy (1.0) #

Papers 7 & 8 Courses to the value of 2.0 unit(s) from the following:

(up to one full unit of approved outside options only)

ISPP Selection List 2**Recommended Year 2 Outside Options List (ISPP)****Undergraduate Outside Options List (Years 2 & 3)****Year 3**

Paper 9 SP399 Dissertation (1.0)

Papers 10, 11

& 12

Social Policy students are not normally permitted to take level 100 (ie 1st year) courses in their final year of study. Any requests to take a level 100 course will need explicit permission from your Academic Mentor and you should, therefore, ensure you discuss the reasons for your request with them before submitting your course selection on LSE for You.

Courses to the value of 3.0 unit(s) from the following:

(up to one full unit of approved outside options only)

ISPP Selection List 2**ISPP Selection List 3****Undergraduate Outside Options List (Years 2 & 3)****Prerequisite Requirements and Mutually Exclusive Options**

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: Before taking SP200 you must take SP100

It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SP').

Development Specialism

In order to qualify for the Development Specialism, students must meet two requirements:

- Completion of SP210 Development and Social Change; and
- Their dissertation will need to focus on a question relevant to the specialism

Degree certificates which include a Development specialism will state the following in the title:

BSc in International Social and Public Policy (Development).**Note for prospective students:**

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions

can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

Footnotes

BSc in Language, Culture and Society

Programme Code: UBLNCUSO

Department: Language Centre

For students starting this programme of study in 2023/24 This is a four year programme with a one year abroad element at the end of year two. Students spend years one, two and four at the LSE. The overall degree will be based on marks obtained during those three years at LSE under the three-year classification scheme. In order to be eligible for the award of the degree students must also successfully pass all elements of assessment at the overseas Institution. The overseas Institution will provide all successful students with a certificate and transcript with information about their year abroad.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Progression Rules:

Students must satisfy the LSE's progression rules before they are permitted to enrol on their year abroad; namely, students must pass 7 out of 8 units of courses that they have attempted in year one and year two.

Failure to progress:

Where a student fails to meet the progression requirements they must resit the failed assessments and cannot progress to the overseas Institution until they have passed 7 out of 8 units. Please note students are allowed three attempts to pass an assessment in year one and only two attempts to pass an assessment in year two. Where a student fails to meet the progression requirements and has run out of attempts to resit, they will fail the degree.

Failure to pass all courses at the overseas Institution:

Students must pass all assessments set by the overseas Institution in order to be eligible for the award of the degree. Where a student fails an assessment they will be provided a resit either at the overseas Institution at the end of the year abroad or when they are back in London at the start of the final year of the programme.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

	LN122	Spanish Language and Society 2 (intermediate) (1.0) #	Progression Rules:	Students must satisfy the LSE's progression rules before they are permitted to enrol on their year abroad; namely, students must pass 7 out of 8 units of courses that they have attempted in year one and year two.
	LN220	Spanish Language and Society 4 (proficiency) (1.0) #	Failure to progress:	Where a student fails to meet the progression requirements they must resit the failed assessments and cannot progress to the overseas Institution until they have passed 7 out of 8 units. Please note
Paper 8	One from:			

students are allowed three attempts to pass an assessment in year one and only two attempts to pass an assessment in year two. Where a student fails to meet the progression requirements and has run out of attempts to resit, they will fail the degree.

Failure to pass all courses at the overseas Institution:

Students must pass all assessments set by the overseas Institution in order to be eligible for the award of the degree. Where a student fails an assessment they will be provided a resit either at the overseas Institution at the end of the year abroad or when they are back in London at the start of the final year of the programme.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in Language, Culture and Society

Programme Code: UBLNCUSO

Department: Language Centre

For students starting this programme of study in 2021/22

This is a four year programme with a one year abroad element at the end of year two. Students spend years one, two and four at the LSE. The overall degree will be based on marks obtained during those three years at LSE under the three-year classification scheme. In order to be eligible for the award of the degree students must also successfully pass all elements of assessment at the overseas Institution. The overseas Institution will provide all successful students with a certificate and transcript with information about their year abroad.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)

	LN252	Contemporary Literature and Global Society (1.0) #
	LN253	European Literature and Philosophy (1.0) #
	LN270	Society and Language: Linguistics for Social Scientists (1.0)
Notes	LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.	
	Prerequisite Requirements and Mutually Exclusive Options	
	# means there may be prerequisites for this course. Please view the course guide for more information.	
	1: SO210 can not be taken with SO240	
	2: SO240 can not be taken with SO210	
	3: SO240 can not be taken with SO210	
	Progression Rules:	
	Students must satisfy the LSE's progression rules before they are permitted to enrol on their year abroad; namely, students must pass 7 out of 8 units of courses that they have attempted in year one and	

year two.

Failure to progress:

Where a student fails to meet the progression requirements they must resit the failed assessments and cannot progress to the overseas Institution until they have passed 7 out of 8 units. Please note students are allowed three attempts to pass an assessment in year one and only two attempts to pass an assessment in year two. Where a student fails to meet the progression requirements and has run out of attempts to resit, they will fail the degree.

Failure to pass all courses at the overseas Institution:

Students must pass all assessments set by the overseas Institution in order to be eligible for the award of the degree. Where a student fails an assessment they will be provided a resit either at the overseas Institution at the end of the year abroad or when they are back in London at the start of the final year of the programme.

Note for prospective students

International Exchange Year

Students successful in securing a place on the optional exchange will spend a full academic year studying on one of the leading business programmes in Asia, Europe or the USA. Students carrying any failed or deferred assessments for first or second year courses studied at LSE will not be eligible for the exchange. The exchange year will not count towards the classification of the BSc in Management programme and courses studied abroad will not be credit bearing, however the exchange year will be recognised on students' LSE transcripts providing they meet the standards set by their host institution.

Footnotes

Partner schools will issue a separate transcript to confirm marks and grades achieved on courses studied overseas. Students will not have the option to resit assessment they have failed or been unable to attempt while overseas. Following the exchange, students will return to LSE to complete the third year of the BSc in Management programme.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

A: If not already taken under Papers 8, 10 or 11

International Exchange Year

Students successful in securing a place on the optional exchange will spend a full academic year studying on one of the leading business programmes in Asia, Europe or the USA. Students carrying any failed or deferred assessments for first or second year courses studied at LSE will not be eligible for the exchange. The exchange year will not count towards the classification of the BSc in Management programme and courses studied abroad will not be credit bearing, however the exchange year will be recognised on students' LSE transcripts providing they meet the standards set by their host institution. Partner schools will issue a separate transcript to confirm marks and grades achieved on courses studied overseas. Students will not have the option to resit assessment they have failed or been unable to attempt while overseas. Following the exchange, students will return to LSE to complete the third year of the BSc in Management programme.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

Footnotes

BSc in Mathematics, Statistics and Business

Programme Code: UBMSB

Department: Statistics

For students starting this programme of study in 2023/24

This programme was previously titled **BSc in Business Mathematics and Statistics**.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
	LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.
	Students will choose ONE of the three half-unit options below:
	LSE100A The LSE Course: How can we transform our climate futures? (0.5)
	LSE100B The LSE Course: How can we control AI? (0.5)
	LSE100C The LSE Course: How can we create a fair society? (0.5)
	Year 1
Paper 1	ST102 Elementary Statistical Theory (1.0) #
Paper 2	MA100 Mathematical Methods (1.0) #
Paper 3	EC1A3 Microeconomics I (0.5) #
	and one from:
	EC1B3 Macroeconomics I (0.5) #
	FM101 Finance (0.5)
Paper 4	Either: MA103 Introduction to Abstract Mathematics (1.0) #
	Or Two half units from:
	AC102 Elements of Financial Accounting (0.5)
	AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5)
	EC1B3 Macroeconomics I (0.5) #
	FM101 Finance (0.5)
	MA102 Mathematical Proof and Analysis (0.5) #
	ST101A Programming for Data Science (0.5) # 1
	ST101W Programming for Data Science (0.5) # 2
	Year 2
Paper 5	MA212 Further Mathematical Methods (1.0) #
Papers 6 & 7	Either ST202 Probability, Distribution Theory and Inference (1.0) # and ST211 Applied Regression (0.5) #
	And courses to the value of 0.5 unit(s) from List 1 or List 2:
	List 1 - For students who took MA103 under Paper 4:
	MA203 Real Analysis (0.5) #
	MA208 Optimisation Theory (0.5) #
	MA209 Differential Equations (0.5) #
	MA210 Discrete Mathematics (0.5) #
	MA211 Algebra and Number Theory (0.5) #
	MA213 Operations Research Techniques (0.5) #
	MA214 Algorithms and Data Structures (0.5) #
	ST205 Sample Surveys and Experiments (0.5) #
	ST207 Databases (0.5) # *
	ST226 Actuarial Investigations: Financial (0.5) #
	ST227 Survival Models (0.5) #
	List 2 - For students who did not take MA103 under Paper 4:
	MA102 Mathematical Proof and Analysis (0.5) #
	MA213 Operations Research Techniques (0.5) #
	ST205 Sample Surveys and Experiments (0.5) #
	ST207 Databases (0.5) # *
	ST226 Actuarial Investigations: Financial (0.5) #
	ST227 Survival Models (0.5) #
	Or ST206 Probability and Distribution Theory (0.5) # and ST211 Applied Regression (0.5) #
	And courses to the value of 1.0 unit from

List 1 or List 2:

List 1 - For students who took MA103 under Paper 4:

MA203	Real Analysis (0.5) #
MA208	Optimisation Theory (0.5) #
MA209	Differential Equations (0.5) #
MA210	Discrete Mathematics (0.5) #
MA211	Algebra and Number Theory (0.5) #
MA213	Operations Research Techniques (0.5) #
MA214	Algorithms and Data Structures (0.5) #
ST205	Sample Surveys and Experiments (0.5) #
ST207	Databases (0.5) # *
ST226	Actuarial Investigations: Financial (0.5) #
ST227	Survival Models (0.5) #

List 2 - For students who did not take MA103 under Paper 4:

MA102	Mathematical Proof and Analysis (0.5) #
MA208	Optimisation Theory (0.5) #
MA209	Differential Equations (0.5) #
MA210	Discrete Mathematics (0.5) #
MA213	Operations Research Techniques (0.5) #
MA214	Algorithms and Data Structures (0.5) #
ST205	Sample Surveys and Experiments (0.5) #
ST207	Databases (0.5) # *
ST226	Actuarial Investigations: Financial (0.5) #
ST227	Survival Models (0.5) #

Paper 8 Courses to the value of 1.0 unit(s) from the following:

A	
AC102	Elements of Financial Accounting (0.5)
AC103	Elements of Management Accounting, Financial Management and Financial Institutions (0.5)

AC200	Accounting Theory and Practice (1.0) #
EC2A3	Microeconomics II (0.5) # 3
EC2B3	Macroeconomics II (0.5) # 4
EC2C3	Econometrics I (0.5) #
EC2C4	Econometrics II (0.5) # 5
FM213	Principles of Finance (1.0) #

Undergraduate Outside Options List (Years 2 & 3)

Year 3

Paper 9 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 options list

Paper 11 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 options list

Paper 11 options list

Paper 12 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 options list

Paper 11 options list

Undergraduate Outside Options List (Years 2 & 3)

Paper 9 options list

ST300	Regression and Generalised Linear Models (0.5) #
ST301	Actuarial Mathematics (Life) (0.5) # ~1
ST302	Stochastic Processes (0.5) #
ST304	Time Series and Forecasting (0.5) #
ST306	Actuarial Mathematics (General) (0.5) # ~2
ST308	Bayesian Inference (0.5) # ~A
ST326	Financial Statistics (0.5) #
ST330	Stochastic and Actuarial Methods in Finance (1.0) # ~3~4~B

Footnotes for Paper 9 options list ~A: ST202 is a desirable prerequisite for ST308. ~B: ST330 can only be taken if ST302 is taken under Paper 10.

Prerequisite Requirements and Mutually Exclusive Options for Paper 9 options list~1: Before taking ST301 you must take ST227~2: Before taking ST306 you must take ST202

Before taking ST306 you must take ST302~3: Before taking ST330 you must take ST302~4: ST330 can not be taken with FM321, FM322

Paper 10 options list

MA203	Real Analysis (0.5) # ~1
MA208	Optimisation Theory (0.5) # ~2~A
MA209	Differential Equations (0.5) # ~3~B
MA210	Discrete Mathematics (0.5) # ~4
MA211	Algebra and Number Theory (0.5) # ~5
MA213	Operations Research Techniques (0.5) #
MA301	Mathematical Game Theory (0.5) #
MA315	Algebra and its Applications (0.5) # ~6(not available 2023/24)
MA316	Graph Theory (0.5) #
MA317	Complex Analysis (0.5) #
MA318	History and Culture of Mathematics (0.5) #
MA319	Partial Differential Equations (0.5) # ~7
MA320	Mathematics of Networks (0.5) #
MA324	Mathematical Modelling and Simulation (0.5) #
MA330	Game Theory for Collective Decisions (0.5) #
MA333	Optimisation for Machine Learning (0.5) #
ST302	Stochastic Processes (0.5) # ~C
ST303	Stochastic Simulation (0.5) #
ST307	Aspects of Market Research (0.5) # ~8
ST310	Machine Learning (0.5) # *
ST311	Artificial Intelligence (0.5) #
ST312	Applied Statistics Project (0.5) #
ST313	Ethics for Data Science (0.5) #
ST314	Multilevel and Longitudinal Models (0.5) #
ST327	Market Research: An Integrated Approach (1.0) # ~9

Footnotes for Paper 10 options list ~A: MA203 is a desirable prerequisite for MA208. ~B: MA203 is a desirable prerequisite for MA209. ~C: ST302 must be taken if ST330 was taken under Paper 9.

Prerequisite Requirements and Mutually Exclusive Options for Paper 10 options list

~1: Before taking MA203 you must take MA103~2: Before taking MA208 you must take MA103~3: Before taking MA209 you must take MA103~4: Before taking MA210 you must take MA103~5: Before taking MA211 you must take MA103~6: Before taking MA315 you must take MA103~7: Before taking MA319 you must take MA203~8: ST307 can not be taken with ST205, ST327~9: ST327 can not be taken with ST307

Paper 11 options list

AC200	Accounting Theory and Practice (1.0) #
AC331	Contemporary Issues in Financial Accounting (0.5) #
AC332	Financial Statement Analysis and Valuation (0.5) #
EC2A3	Microeconomics II (0.5) #
EC2B3	Macroeconomics II (0.5) #
EC2C3	Econometrics I (0.5) #
EC2C4	Econometrics II (0.5) #
EC302	Political Economy (1.0) #
EC310	Behavioural Economics (1.0) #
EC319	Games and Economic Behaviour (1.0) #
EC325	Public Economics (1.0) #
FM213	Principles of Finance (1.0) #
FM300	Corporate Finance, Investments and Financial Markets (1.0) # ~A
FM321	Risk Management and Modelling (0.5) #
FM322	Derivatives (0.5) #

Footnotes for Paper 11 options list ~A: FM300 can be taken if FM213 has been taken under Paper 8.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: ST101A can not be taken with ST101W

2: ST101W can not be taken with ST101A

3: Before taking EC2A3 you must take EC1A3

4: Before taking EC2B3 you must take EC1A3

Before taking EC2B3 you must take EC1B3

5: Before taking EC2C4 you must take EC2C3

A: Students may take certain courses from the Undergraduate Outside Options List, with the approval of the Course Tutor.

For students starting this programme of study in 2022/23

This programme was previously titled **BSc in Business Mathematics and Statistics**.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
LSE100	LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Students will choose ONE of the three half-unit options below:

LSE100A The LSE Course: How can we transform our climate futures? (0.5)

LSE100B The LSE Course: How can we control AI? (0.5)

LSE100C The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1 ST102 Elementary Statistical Theory (1.0) #

Paper 2 MA100 Mathematical Methods (1.0) #

Paper 3 EC1A3 Microeconomics I (0.5) #

and one from:

EC1B3 Macroeconomics I (0.5) #

FM101 Finance (0.5)

Paper 4

Either:

MA103 Introduction to Abstract Mathematics (1.0) #

Or

One half unit from:

AC102 Elements of Financial Accounting (0.5)

MA102 Mathematical Proof and Analysis (0.5) #

ST101 Programming for Data Science (0.5) # (withdrawn 2023/24)

Plus one half unit from:

AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5)

EC1B3 Macroeconomics I (0.5) #

FM101 Finance (0.5)

Year 2

Paper 5 MA212 Further Mathematical Methods (1.0) #

Papers 6 & 7

Either

ST202 Probability, Distribution Theory and Inference (1.0) # **and** ST211 Applied Regression (0.5) #

And courses to the value of 0.5 unit(s) from List 1 or List 2:

List 1 - For students who took MA103 under Paper 4:

MA203 Real Analysis (0.5) #

MA208	Optimisation Theory (0.5) #
MA209	Differential Equations (0.5) #
MA210	Discrete Mathematics (0.5) #
MA211	Algebra and Number Theory (0.5) #
MA213	Operations Research Techniques (0.5) #
MA214	Algorithms and Data Structures (0.5) #
ST205	Sample Surveys and Experiments (0.5) #
ST207	Databases (0.5) # *
ST226	Actuarial Investigations: Financial (0.5) #
ST227	Survival Models (0.5) #

List 2 - For students who did not take MA103 under Paper 4:

MA102	Mathematical Proof and Analysis (0.5) #
MA213	Operations Research Techniques (0.5) #
ST205	Sample Surveys and Experiments (0.5) #
ST207	Databases (0.5) # *
ST226	Actuarial Investigations: Financial (0.5) #
ST227	Survival Models (0.5) #

Or

ST206	Probability and Distribution Theory (0.5) # and ST211 Applied Regression (0.5) #
-------	--

And courses to the value of 1.0 unit from List 1 or List 2:

List 1 - For students who took MA103 under Paper 4:

MA203	Real Analysis (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: Before taking EC2A3 you must take EC1A3

2: Before taking EC2B3 you must take EC1A3

Before taking EC2B3 you must take EC1B3

3: Before taking EC2C4 you must take EC2C3

A: Students may take certain courses from the

Undergraduate Outside Options List, with the approval of the Course Tutor.

Accreditation:

Accredited by the Chartered Institute of Management Accountants (CIMA) for the purpose of exemption from some professional examinations through the Accredited degree accelerated route. Accredited by the Royal Statistical Society (RSS) for the purpose of eligibility for Graduate Statistician status. Further information is available from the BSc in Mathematics, Statistics, and Business homepage <https://www.lse.ac.uk/study-at-lse/Undergraduate/Degree-programmes-2021/BSc-Mathematics-Statistics-and-Business>.

Either AC100, AC102, AC103 or AC104 needs to be chosen for exemption of BA2 Fundamentals of Management Accounting.

Either AC100, AC102, AC103 or AC104 needs to be chosen for exemption of BA3 Fundamentals of Financial Accounting.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm](https://www.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm). Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm](https://www.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm).

ST205	Sample Surveys and Experiments (0.5) #
ST207	Databases (0.5) # *
ST226	Actuarial Investigations: Financial (0.5) #
ST227	Survival Models (0.5) #

List 2 - For students who did not take MA103 under Paper 4:

MA102	Mathematical Proof and Analysis (0.5) #
MA208	Optimisation Theory (0.5) #
MA209	Differential Equations (0.5) #
MA210	Discrete Mathematics (0.5) #
MA213	Operations Research Techniques (0.5) #
MA214	Algorithms and Data Structures (0.5) #
ST205	Sample Surveys and Experiments (0.5) #
ST207	Databases (0.5) # *
ST226	Actuarial Investigations: Financial (0.5) #
ST227	Survival Models (0.5) #

Paper 8 Courses to the value of 1.0 unit(s) from the following:

A	
AC102	Elements of Financial Accounting (0.5)
AC103	Elements of Management Accounting, Financial Management and Financial Institutions (0.5)
AC200	Accounting Theory and Practice (1.0) #
EC2A3	Microeconomics II (0.5) # 1
EC2B3	Macroeconomics II (0.5) # 2
EC2C3	Econometrics I (0.5) #
EC2C4	Econometrics II (0.5) # 3
FM213	Principles of Finance (1.0) #

Undergraduate Outside Options List (Years 2 & 3) Year 3

Paper 9 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 options list

Paper 11 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 options list

Paper 11 options list

Paper 12 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 options list

Paper 11 options list

Undergraduate Outside Options List (Years 2 & 3)

Notes LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Paper 9 options list

ST300	Regression and Generalised Linear Models (0.5) #
ST301	Actuarial Mathematics (Life) (0.5) # ~1
ST302	Stochastic Processes (0.5) #
ST304	Time Series and Forecasting (0.5) #
ST306	Actuarial Mathematics (General) (0.5) # ~2
ST308	Bayesian Inference (0.5) # ~A
ST326	Financial Statistics (0.5) #
ST330	Stochastic and Actuarial Methods in Finance (1.0) # ~3~4~B

Footnotes for Paper 9 options list ~A: ST202 is a desirable prerequisite for ST308. ~B: ST330 can only be taken if ST302 is taken under Paper 10.

Prerequisite Requirements and Mutually Exclusive Options for Paper 9 options list~1: Before taking ST301 you must take ST227~2: Before taking ST306

you must take ST202

Before taking ST306 you must take ST302~3: Before taking ST330 you must take ST302~4: ST330 can not be taken with FM321, FM322

Paper 10 options list

MA203	Real Analysis (0.5) # ~1
MA208	Optimisation Theory (0.5) # ~2~A
MA209	Differential Equations (0.5) # ~3~B
MA210	Discrete Mathematics (0.5) # ~4
MA211	Algebra and Number Theory (0.5) # ~5
MA213	Operations Research Techniques (0.5) #
MA300	Game Theory (1.0) # ~6(withdrawn 2022/23)
MA301	Mathematical Game Theory (0.5) # ~7
MA303	Chaos in Dynamical Systems (0.5) # ~C(withdrawn 2023/24)
MA315	Algebra and its Applications (0.5) # ~8(not available 2023/24)
MA316	Graph Theory (0.5) #
MA317	Complex Analysis (0.5) #
MA318	History and Culture of Mathematics (0.5) #
MA319	Partial Differential Equations (0.5) # ~9
MA320	Mathematics of Networks (0.5) #
MA324	Mathematical Modelling and Simulation (0.5) #
MA330	Game Theory for Collective Decisions (0.5) #
MA333	Optimisation for Machine Learning (0.5) #
ST302	Stochastic Processes (0.5) # ~D
ST303	Stochastic Simulation (0.5) #
ST307	Aspects of Market Research (0.5) # ~10
ST310	Machine Learning (0.5) # *
ST311	Artificial Intelligence (0.5) #
ST312	Applied Statistics Project (0.5) #
ST313	Ethics for Data Science (0.5) #
ST314	Multilevel and Longitudinal Models (0.5) #
ST327	Market Research: An Integrated Approach (1.0) # ~11

Footnotes for Paper 10 options list ~A: MA203 is a desirable prerequisite for MA208. ~B: MA203 is a desirable prerequisite for MA209. ~C: MA103 is a desirable prerequisite for MA303. ~D: ST302 must be taken if ST330 was taken under Paper 9.

Prerequisite Requirements and Mutually Exclusive

Options for Paper 10 options list~1: Before taking MA203 you must take MA103~2: Before taking MA208 you must take MA103~3: Before taking MA209 you must take MA103~4: Before taking MA210 you must take MA103~5: Before taking MA211 you must take MA103~6: MA300 can not be taken with MA301~7: MA301 can not be taken with MA300~8: Before taking MA315 you must take MA103~9: Before taking MA319 you must take MA203~10: ST307 can not be taken with ST205, ST327~11: ST327 can not be taken with ST307

Paper 11 options list

AC200	Accounting Theory and Practice (1.0) #
AC331	Contemporary Issues in Financial Accounting (0.5) #
AC332	Financial Statement Analysis and Valuation (0.5) #
EC2A3	Microeconomics II (0.5) #
EC2B3	Macroeconomics II (0.5) #
EC2C3	Econometrics I (0.5) #
EC2C4	Econometrics II (0.5) #
EC302	Political Economy (1.0) #
EC310	Behavioural Economics (1.0) #
EC319	Games and Economic Behaviour (1.0) #
EC325	Public Economics (1.0) #
FM213	Principles of Finance (1.0) #
FM300	Corporate Finance, Investments and Financial Markets (1.0) # ~A

FM321 Risk Management and Modelling (0.5) #
 FM322 Derivatives (0.5) #

Footnotes for Paper 11 options list ~A: FM300 can be taken if FM213 has been taken under Paper 8.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: Before taking EC2A3 you must take EC1A3

2: Before taking EC2B3 you must take EC1A3

Before taking EC2B3 you must take EC1B3

3: Before taking EC2C4 you must take EC2C3

A: Students may take certain courses from the Undergraduate Outside Options List, with the approval of the Course Tutor.

Accreditation:

Accredited by the Chartered Institute of Management Accountants (CIMA) for the purpose of exemption from some professional examinations through the Accredited degree accelerated route. Accredited by the Royal Statistical Society (RSS) for the purpose of eligibility for Graduate Statistician status. Further information is available from the BSc in Mathematics, Statistics, and Business homepage <https://www.lse.ac.uk/study-at-lse/Undergraduate/Degree-programmes-2021/BSc-Mathematics-Statistics-and-Business>.

Either AC100, AC102, AC103 or AC104 needs to be chosen for exemption of BA2 Fundamentals of Management Accounting.

Either AC100, AC102, AC103 or AC104 needs to be chosen for exemption of BA3 Fundamentals of Financial Accounting.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm](https://www.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm). Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm](https://www.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm).

For students starting this programme of study in 2023/24

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Students will choose ONE of the three half-unit options below:

LSE100A The LSE Course: How can we transform our climate futures? (0.5)

LSE100B The LSE Course: How can we control AI? (0.5)

LSE100C The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1	EC1A3	Microeconomics I (0.5) # and EC1B3 Macroeconomics I (0.5) #
Paper 2	MA100	Mathematical Methods (1.0) #
Paper 3	ST102	Elementary Statistical Theory (1.0) #
Paper 4	MA103	Introduction to Abstract Mathematics (1.0) #
	Year 2	
Paper 5	EC2A3	Microeconomics II (0.5) # and EC2B3 Macroeconomics II (0.5) #
Paper 6	MA212	Further Mathematical Methods (1.0) #
Paper 7		Courses to the value of 1.0 unit(s) from the following: Either: FM213 Principles of Finance (1.0) # Or EC2C3 Econometrics I (0.5) # And either: EC2C4 Econometrics II (0.5) # MA208 Optimisation Theory (0.5) # MA209 Differential Equations (0.5) # MA210 Discrete Mathematics (0.5) # MA211 Algebra and Number Theory (0.5) # MA213 Operations Research Techniques (0.5) # MA214 Algorithms and Data Structures (0.5) # MA203 Real Analysis (0.5) # And courses to the value of 0.5 unit(s) from the following: MA208 Optimisation Theory (0.5) # MA209 Differential Equations (0.5) # MA210 Discrete Mathematics (0.5) # MA211 Algebra and Number Theory (0.5) #
Paper 8		
Paper 9		Courses to the value of 1.0 unit(s) from the following: EC302 Political Economy (1.0) # EC310 Behavioural Economics (1.0) # EC313 Industrial Economics (1.0) # EC319 Games and Economic Behaviour (1.0) # EC321 Monetary Economics and Aggregate Fluctuations (1.0) # EC325 Public Economics (1.0) # EC333 Problems of Applied Econometrics (1.0) # EC334 Advanced Macroeconomics (0.5) # EC336 Econometric Theory A (0.5) # EC337 Econometric Theory B (0.5) # EC338 International Trade (0.5) # EC339 International Macroeconomics (0.5) #
Paper 10		Courses to the value of 0.5 unit(s) from the following: A MA208 Optimisation Theory (0.5) # MA209 Differential Equations (0.5) # MA210 Discrete Mathematics (0.5) # MA211 Algebra and Number Theory (0.5) # MA213 Operations Research Techniques (0.5) # MA214 Algorithms and Data Structures (0.5) # MA301 Mathematical Game Theory (0.5) # 1 MA315 Algebra and its Applications (0.5) # (not available 2023/24) MA316 Graph Theory (0.5) # MA317 Complex Analysis (0.5) # MA319 Partial Differential Equations (0.5) # MA320 Mathematics of Networks (0.5) # MA321 Measure Theoretic Probability (0.5) # MA322 Mathematics of Finance and Valuation (0.5) # MA324 Mathematical Modelling and Simulation (0.5) # 2 MA330 Game Theory for Collective Decisions (0.5) # MA333 Optimisation for Machine Learning (0.5) # MA334 Dissertation in Mathematics (0.5) # 3 And courses to the value of 0.5 unit(s) from the following: MA301 Mathematical Game Theory (0.5) # 4

	MA315	Algebra and its Applications (0.5) # (not available 2023/24)
	MA316	Graph Theory (0.5) #
	MA317	Complex Analysis (0.5) #
	MA319	Partial Differential Equations (0.5) #
	MA320	Mathematics of Networks (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.
Please view the course guide for more information.

- 1: MA301 can not be taken with MA300
- 2: MA324 can not be taken with MA334
- 3: MA334 can not be taken with MA324
- 4: MA301 can not be taken with MA300
- 5: MA324 can not be taken with MA334
- 6: MA334 can not be taken with MA324
- 7: MA300 can not be taken with MA301
- 8: MA301 can not be taken with MA300
- 9: MA300 can not be taken with MA301

Footnotes	A: No more than one from MA324 and MA334 can be chosen.
	B: No more than one from MA208, MA209, MA210 or MA211 can be taken in Year 3.

BSc in Mathematics with Data Science**Programme Code:** UBMAWDS**Department:** Mathematics

For students starting this programme of study in 2023/24

Please note that places are limited on some optional courses.**Admission onto any particular course is not guaranteed and may be
subject to timetabling constraints and /or students meeting specific
prerequisite requirements.**

Paper	Course number, title (unit value)
LSE100	LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

**Students will choose ONE of the three half-unit
options below:**

LSE100A	The LSE Course: How can we transform our climate futures? (0.5)
LSE100B	The LSE Course: How can we control AI? (0.5)
LSE100C	The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1	EC1A3	Microeconomics I (0.5) # and EC1B3 Macroeconomics I (0.5) #
Paper 2	MA100	Mathematical Methods (1.0) #
Paper 3	ST102	Elementary Statistical Theory (1.0) #
Paper 4	MA103	Introduction to Abstract Mathematics (1.0) #

Year 2

Paper 5	MA214	Algorithms and Data Structures (0.5) # and one from:
	ST101A	Programming for Data Science (0.5) #
	ST101W	Programming for Data Science (0.5) #
Paper 6	MA212	Further Mathematical Methods (1.0) #
Paper 7	MA203	Real Analysis (0.5) # and MA208 Optimisation Theory (0.5) #
Paper 8	ST202	Probability, Distribution Theory and Inference (1.0) #

Or

ST206	Probability and Distribution Theory (0.5) # and one from:
MA209	Differential Equations (0.5) #
MA210	Discrete Mathematics (0.5) #
MA211	Algebra and Number Theory (0.5) #

Year 3

Papers 9 & 10	Courses to the value of 2.0 unit(s) from the following:	
	MA316	Graph Theory (0.5) #
	MA320	Mathematics of Networks (0.5) #
	MA324	Mathematical Modelling and Simulation (0.5) #
	MA333	Optimisation for Machine Learning (0.5) #
	ST310	Machine Learning (0.5) #
	ST311	Artificial Intelligence (0.5) #
	ST313	Ethics for Data Science (0.5) #
Paper 11	Courses to the value of 1.0 unit(s) from the following:	
	MA301	Mathematical Game Theory (0.5) #
	MA315	Algebra and its Applications (0.5) # (not available 2023/24)
	MA317	Complex Analysis (0.5) #
	MA318	History and Culture of Mathematics (0.5) #
	MA319	Partial Differential Equations (0.5) #
	MA321	Measure Theoretic Probability (0.5) #
	MA322	Mathematics of Finance and Valuation (0.5) #
	MA330	Game Theory for Collective Decisions (0.5) #
	ST302	Stochastic Processes (0.5) #
	ST304	Time Series and Forecasting (0.5) #
	ST308	Bayesian Inference (0.5) #
	ST326	Financial Statistics (0.5) #

**(No more than one level two course can be taken in
Year 3):**

EC2A3	Microeconomics II (0.5) #
EC2B3	Macroeconomics II (0.5) #
EC2C3	Econometrics I (0.5) #
FM213	Principles of Finance (1.0) #
MA209	Differential Equations (0.5) #
MA210	Discrete Mathematics (0.5) #
MA211	Algebra and Number Theory (0.5) #
MA213	Operations Research Techniques (0.5) #
ST207	Databases (0.5) #

Papers 9 & 10 options list

Paper 12	Courses to the value of 1.0 unit(s) from the following: Any other course with permission from the Departmental Tutor
----------	--

Papers 9 & 10 options list**Paper 11 options list****Undergraduate Outside Options List (Years 2 & 3)****Papers 9 & 10 options list**

MA316	Graph Theory (0.5) #
MA320	Mathematics of Networks (0.5) #
MA324	Mathematical Modelling and Simulation (0.5) #
MA333	Optimisation for Machine Learning (0.5) #
ST310	Machine Learning (0.5) #
ST311	Artificial Intelligence (0.5) #

Paper 11 options list

MA301	Mathematical Game Theory (0.5) #
MA315	Algebra and its Applications (0.5) # (not available 2023/24)
MA317	Complex Analysis (0.5) #
MA318	History and Culture of Mathematics (0.5) #
MA319	Partial Differential Equations (0.5) #
MA321	Measure Theoretic Probability (0.5) #
MA322	Mathematics of Finance and Valuation (0.5) #
MA330	Game Theory for Collective Decisions (0.5) #
ST302	Stochastic Processes (0.5) #
ST304	Time Series and Forecasting (0.5) #
ST308	Bayesian Inference (0.5) #
ST326	Financial Statistics (0.5) #

(only one half unit allowed from a second-year course, if not selected under paper 11):

EC2A3	Microeconomics II (0.5) #
EC2B3	Macroeconomics II (0.5) #
EC2C3	Econometrics I (0.5) #
FM213	Principles of Finance (1.0) #
MA209	Differential Equations (0.5) #
MA210	Discrete Mathematics (0.5) #
MA211	Algebra and Number Theory (0.5) #
ST207	Databases (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

Department: Mathematics

For students starting this programme of study in 2023/24

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
	LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.
	Students will choose ONE of the three half-unit options below:
	LSE100A The LSE Course: How can we transform our climate futures? (0.5)
	LSE100B The LSE Course: How can we control AI? (0.5)
	LSE100C The LSE Course: How can we create a fair society? (0.5)
	Year 1
Paper 1	EC1A3 Microeconomics I (0.5) # and EC1B3 Macroeconomics I (0.5) #
Paper 2	MA100 Mathematical Methods (1.0) #

Paper 3	ST102 Elementary Statistical Theory (1.0) #
Paper 4	MA103 Introduction to Abstract Mathematics (1.0) #

Year 2

Paper 5	EC2A3 Microeconomics II (0.5) # and EC2B3 Macroeconomics II (0.5) #
Paper 6	MA212 Further Mathematical Methods (1.0) #
Paper 7	MA203 Real Analysis (0.5) #

And courses to the value of 0.5 unit(s) from the following:

MA208	Optimisation Theory (0.5) #
MA209	Differential Equations (0.5) #
MA210	Discrete Mathematics (0.5) #
MA211	Algebra and Number Theory (0.5) #

Paper 8 Courses to the value of 1.0 unit(s) from the following if not taken under Paper 7: A

FM213	Principles of Finance (1.0) #
MA208	Optimisation Theory (0.5) #
MA209	Differential Equations (0.5) #
MA210	Discrete Mathematics (0.5) #
MA211	Algebra and Number Theory (0.5) #
MA213	Operations Research Techniques (0.5) #
MA214	Algorithms and Data Structures (0.5) #
ST202	Probability, Distribution Theory and Inference (1.0) #

Year 3

Paper 9 Courses to the value of 1.0 unit(s) from the following:

EC2C3	Econometrics I (0.5) #
EC2C4	Econometrics II (0.5) #
EC302	Political Economy (1.0) #
EC310	Behavioural Economics (1.0) #
EC319	Games and Economic Behaviour (1.0) #
EC321	Monetary Economics and Aggregate Fluctuations (1.0) #
EC325	Public Economics (1.0) #
EC334	Advanced Macroeconomics (0.5) #
EC338	International Trade (0.5) #
EC339	International Macroeconomics (0.5) #

Papers 10 & 11

Courses to the value of 2.0 unit(s) from the following: B

MA208	Optimisation Theory (0.5) #
MA209	Differential Equations (0.5) #
MA210	Discrete Mathematics (0.5) #
MA211	Algebra and Number Theory (0.5) #
MA213	Operations Research Techniques (0.5) #
MA214	Algorithms and Data Structures (0.5) #
MA301	Mathematical Game Theory (0.5) #
MA315	Algebra and its Applications (0.5) # (not available 2023/24)
MA316	Graph Theory (0.5) #
MA317	Complex Analysis (0.5) #
MA318	History and Culture of Mathematics (0.5) #
MA319	Partial Differential Equations (0.5) #
MA320	Mathematics of Networks (0.5) #
MA321	Measure Theoretic Probability (0.5) #
MA322	Mathematics of Finance and Valuation (0.5) # 1
MA324	Mathematical Modelling and Simulation (0.5) # 2
MA330	Game Theory for Collective Decisions (0.5) #
MA333	Optimisation for Machine Learning (0.5) #
MA334	Dissertation in Mathematics (0.5) # 3
ST300	Regression and Generalised Linear Models (0.5) #
ST302	Stochastic Processes (0.5) # 4
ST304	Time Series and Forecasting (0.5) #
ST308	Bayesian Inference (0.5) #
ST310	Machine Learning (0.5) #
ST313	Ethics for Data Science (0.5) #

Paper 12 If FM213 was chosen under Paper 8, then courses to

the value of 1.0 unit(s) from the following:

- MA208 Optimisation Theory (0.5) #
- MA209 Differential Equations (0.5) #
- MA210 Discrete Mathematics (0.5) #
- MA211 Algebra and Number Theory (0.5) #
- MA213 Operations Research Techniques (0.5) #
- MA214 Algorithms and Data Structures (0.5) #
- ST202 Probability, Distribution Theory and Inference (1.0) #
- ST313 Ethics for Data Science (0.5) #

Or

If MA208, MA209, MA210, MA211, MA213, MA214 or ST202 were chosen under Paper 8, then courses to the value of 1.0 unit(s) from the following: C

- FM213 Principles of Finance (1.0) #

**Undergraduate Outside Options List (Years 2 & 3)
Prerequisite Requirements and Mutually Exclusive Options**

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: MA322 can not be taken with ST302

2: MA324 can not be taken with MA334

3: MA334 can not be taken with MA324

4: ST302 can not be taken with MA322

Footnotes

A: Courses selected from the Undergraduate Outside Options List require the approval of the Departmental Tutor.

B: Courses selected in Papers 10 & 11 must include at most one MA2xx course, at most two STxxx courses, and at least one MA3xx course.

No more than one from MA324 and MA334 can be chosen.

C: Courses selected from the Undergraduate Outside Options List require the approval of the Departmental Tutor.

- EC339 International Macroeconomics (0.5) #

- Papers 10 & 11

Courses to the value of 2.0 unit(s) from the following:
B

- MA208 Optimisation Theory (0.5) #

- MA209 Differential Equations (0.5) #

- MA210 Discrete Mathematics (0.5) #

- MA211 Algebra and Number Theory (0.5) #

- MA213 Operations Research Techniques (0.5) #

- MA214 Algorithms and Data Structures (0.5) #

- MA301 Mathematical Game Theory (0.5) #

- MA303 Chaos in Dynamical Systems (0.5) # (withdrawn 2023/24)

- MA315 Algebra and its Applications (0.5) # (not available 2023/24)

- MA316 Graph Theory (0.5) #

- MA317 Complex Analysis (0.5) #

- MA318 History and Culture of Mathematics (0.5) #

- MA319 Partial Differential Equations (0.5) #

- MA320 Mathematics of Networks (0.5) #

- MA321 Measure Theoretic Probability (0.5) #

- MA322 Mathematics of Finance and Valuation (0.5) # 1

- MA324 Mathematical Modelling and Simulation (0.5) # 2

- MA330 Game Theory for Collective Decisions (0.5) #

- MA333 Optimisation for Machine Learning (0.5) #

- MA334 Dissertation in Mathematics (0.5) # 3

- ST300 Regression and Generalised Linear Models (0.5) #

- ST302 Stochastic Processes (0.5) # 4

- ST304 Time Series and Forecasting (0.5) #

- ST308 Bayesian Inference (0.5) #

- ST310 Machine Learning (0.5) #

- ST313 Ethics for Data Science (0.5) #

- Paper 12

If course(s) from the Undergraduate Outside Options List or FM213 were chosen under Paper 8, then

courses to the value of 1.0 unit(s) from the following:

- MA208 Optimisation Theory (0.5) #
- MA209 Differential Equations (0.5) #
- MA210 Discrete Mathematics (0.5) #
- MA211 Algebra and Number Theory (0.5) #
- MA213 Operations Research Techniques (0.5) #
- MA214 Algorithms and Data Structures (0.5) #
- ST202 Probability, Distribution Theory and Inference (1.0) #
- ST313 Ethics for Data Science (0.5) #

Or

If MA208, MA209, MA210, MA211, MA213, MA214 or ST202 were chosen under Paper 8, then courses to the value of 1.0 unit(s) from the following:

- FM213 Principles of Finance (1.0) #

Undergraduate Outside Options List (Years 2 & 3)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: MA322 can not be taken with ST302

2: MA324 can not be taken with MA334

3: MA334 can not be taken with MA324

4: ST302 can not be taken with MA322

Footnotes

A: Courses selected from the Undergraduate Outside Options List require the approval of the Departmental Tutor.

B: Courses selected in Papers 10 & 11 must include at most one MA2xx course, at most two STxxx courses, and at least one MA3xx course.

No more than one from MA324 and MA334 can be chosen.

C: Courses selected from the Undergraduate Outside Options List require the approval of the Departmental Tutor.

BSc in Mathematics with Economics

Programme Code: UBMAWEC

Department: Mathematics

For students starting this programme of study in 2021/22

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

See note LSE100 The LSE Course

Year 1

Paper 1 EC1A3 Microeconomics I (0.5) # **and** EC1B3
Macroeconomics I (0.5) #

Paper 2 MA100 Mathematical Methods (1.0) #

Paper 3 ST102 Elementary Statistical Theory (1.0) #

Paper 4 MA103 Introduction to Abstract Mathematics (1.0) #

Year 2

Paper 5 EC2A3 Microeconomics II (0.5) # **and** EC2B3
Macroeconomics II (0.5) #

Paper 6 MA212 Further Mathematical Methods (1.0) #

Paper 7 MA203 Real Analysis (0.5) #

And courses to the value of 0.5 unit(s) from the following:

MA208 Optimisation Theory (0.5) #

MA209 Differential Equations (0.5) #

MA210 Discrete Mathematics (0.5) #

MA211 Algebra and Number Theory (0.5) #

Paper 8 Courses to the value of 1.0 unit(s) from the following if not taken under Paper 7: A

FM213 Principles of Finance (1.0) #

MA208 Optimisation Theory (0.5) #

MA209 Differential Equations (0.5) #

MA210 Discrete Mathematics (0.5) #

MA211 Algebra and Number Theory (0.5) #

MA213 Operations Research Techniques (0.5) #

MA214 Algorithms and Data Structures (0.5) #

MA231 Operational Research Methods (1.0) #
(withdrawn 2022/23)

ST202 Probability, Distribution Theory and
Inference (1.0) #

Undergraduate Outside Options List (Years 2 & 3)

Year 3

Paper 9 Courses to the value of 1.0 unit(s) from the following:

EC2C3 Econometrics I (0.5) # **and** EC2C4
Econometrics II (0.5) #

EC301 Advanced Economic Analysis (1.0) #
(withdrawn 2023/24)

EC302 Political Economy (1.0) #

EC310 Behavioural Economics (1.0) #

EC319 Games and Economic Behaviour (1.0) #

EC321 Monetary Economics and Aggregate
Fluctuations (1.0) #

EC325 Public Economics (1.0) #

EC334 Advanced Macroeconomics (0.5) #

EC338 International Trade (0.5) #

EC339 International Macroeconomics (0.5) #

Papers 10

& 11

Courses to the value of 2.0 unit(s) from the following:
B

MA208 Optimisation Theory (0.5) #

MA209 Differential Equations (0.5) #

MA210 Discrete Mathematics (0.5) #

MA211 Algebra and Number Theory (0.5) #

MA213 Operations Research Techniques (0.5) #

MA214 Algorithms and Data Structures (0.5) #

MA300 Game Theory (1.0) # 1 (withdrawn 2022/23)

MA301 Mathematical Game Theory (0.5) # 2

MA303 Chaos in Dynamical Systems (0.5) #
(withdrawn 2023/24)

MA315 Algebra and its Applications (0.5) # (not
available 2023/24)

MA316 Graph Theory (0.5) #

MA317 Complex Analysis (0.5) #

MA318 History and Culture of Mathematics (0.5) #

MA319 Partial Differential Equations (0.5) #

MA320 Mathematics of Networks (0.5) #

MA321 Measure Theoretic Probability (0.5) #

MA322 Mathematics of Finance and Valuation (0.5)
3

MA324 Mathematical Modelling and Simulation
(0.5) # 4

MA330 Game Theory for Collective Decisions (0.5)
#

MA333 Optimisation for Machine Learning (0.5) #

MA334 Dissertation in Mathematics (0.5) # 5

ST300 Regression and Generalised Linear Models
(0.5) #

ST302 Stochastic Processes (0.5) # 6

ST304 Time Series and Forecasting (0.5) #

ST308 Bayesian Inference (0.5) #

ST310 Machine Learning (0.5) #

ST313 Ethics for Data Science (0.5) #

Paper 12

If course(s) from the Undergraduate Outside Options
List or FM213 were chosen under Paper 8, then
courses to the value of 1.0 unit(s) from the following:

MA208 Optimisation Theory (0.5) #

MA209 Differential Equations (0.5) #

MA210 Discrete Mathematics (0.5) #

MA211 Algebra and Number Theory (0.5) #

MA213 Operations Research Techniques (0.5) #

MA214 Algorithms and Data Structures (0.5) #

MA231 Operational Research Methods (1.0) #
(withdrawn 2022/23)

ST202 Probability, Distribution Theory and

Inference (1.0) #
ST313 Ethics for Data Science (0.5) #
Or

If MA208, MA209, MA210, MA211, MA213, MA214, or ST202 were chosen under Paper 8, then courses to the value of 1.0 unit(s) from the following: C
FM213 Principles of Finance (1.0) #

Undergraduate Outside Options List (Years 2 & 3)

Notes LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission
means there may be prerequisites for this course. Please view the course guide for more information.

1: MA300 can not be taken with MA301

2: MA301 can not be taken with MA300

3: MA322 can not be taken with ST302

4: MA324 can not be taken with MA334

5: MA334 can not be taken with MA324

6: ST302 can not be taken with MA322

Footnotes

A: Courses selected from the Undergraduate Outside Options List require the approval of the Departmental Tutor.

B: Courses selected in Papers 10 & 11 must include at most one MA2xx course, at most two STxxx courses, and at least one MA3xx course.

No more than one from MA324 and MA334 can be chosen.

C: Courses selected from the Undergraduate Outside Options List require the approval of the Departmental Tutor.

BSc in Philosophy, Logic and Scientific Method

Programme Code: UBPHS3

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2023/24

Students on this programme have the opportunity to receive a language specialism attached to their degree certificate and transcript. See the details at the bottom of this page for more information.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Students will choose ONE of the three half-unit options below:

LSE100A The LSE Course: How can we transform our climate futures? (0.5)

LSE100B The LSE Course: How can we control AI? (0.5)

LSE100C The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1 PH103 The Big Questions: An Introduction to Philosophy (1.0) #

Paper 2 PH111 Introduction to Logic (0.5)

And Either:

PH105 Historical and Global Perspectives on Philosophy (0.5) **or**

PH112 Intermediate Logic and Probability (0.5) #
Papers 3 & 4 Courses to the value of 2.0 unit(s) from the following:

Undergraduate Outside Options List (Year 1) Year 2

Paper 5 PH201 Philosophy of Science (1.0)

Papers 6 & 7 Courses to the value of 2.0 unit(s) from the following:

Philosophy Options List

Paper 8 Courses to the value of 1.0 unit(s) from the following:

Philosophy Options List

Undergraduate Outside Options List (Years 2 & 3) Year 3

Papers 9, 10 & 11 Courses to the value of 3.0 unit(s) from the following:

Philosophy Options List

Paper 12 Courses to the value of 1.0 unit(s) from the following:

Philosophy Options List

Undergraduate Outside Options List (Years 2 & 3) Philosophy Options List

LL305 Jurisprudence (1.0) A

LN253 European Literature and Philosophy (1.0) #

LN254 Literature and Aspects of Ethics (1.0) #

PH105 Historical and Global Perspectives on

Philosophy (0.5) B

PH112 Intermediate Logic and Probability (0.5) #

PH214 Philosophy, Morals and Politics (1.0)

PH222 Philosophy and Public Policy (1.0)

PH223 Mind and Metaphysics (0.5) #

PH224 Epistemology (0.5) #

PH225 Business and Organisational Ethics (0.5)

PH226 Philosophy of Society (0.5) #

PH227 Genes, Brains and Society (0.5)

PH230 Einstein for Everyone: From time travel to

the edge of the universe (0.5) #

PH232 Physics and Uncertainty: From Quantum

Jumps to Stock Market Crashes (0.5) #

PH236 Set Theory (0.5) #

PH237 Advanced Logic (0.5) #

PH238 Philosophy of Language (0.5) # (not

available 2023/24)

PH239 Anarchy, Authority and Evidence: Topics in

Philosophy of Law (0.5)

PH240 The Ethics of Data and AI (0.5)

PH311 Philosophy of Economics (1.0) #

PH333 Philosophy of Gender and Race (0.5)

PH399 Dissertation in Philosophy (1.0) C

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission
means there may be prerequisites for this course. Please view the course guide for more information.

A: LL305 can be taken in the third year only.

B: PH105 can be taken in the first and second year only.

C: PH399 cannot be taken in Year 1 or Year 2.

Language Specialism:

Students who have taken and passed at least one language course in each year of their degree (i.e. 25% of their overall programme of study) will be offered the opportunity to receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose to take language courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a language specialism will state the language in the title, for example: **BSc in Philosophy, Logic and Scientific Method (with French).**

Students who choose to take language courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a language specialism will state the language in the title, for example: **BSc in Philosophy, Logic and Scientific Method (with French).**

Footnotes

A: LL305 can be taken in the third year only.

B: PH105 can be taken in the first and second year only.

C: PH399 cannot be taken in Year 1 or Year 2.

Language Specialism:

Students who have taken and passed at least one language course in each year of their degree (i.e. 25% of their overall programme of study) will be offered the opportunity to receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose to take language courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a language specialism will state the language in the title, for example: **BSc in Philosophy, Logic and Scientific Method (with French)**.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in Philosophy, Politics and Economics

Programme Code: UBPHPOLEC

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2023/24

Four-year Classification Scheme for BA/BSc degrees for all students from the 2018/19 academic year <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/BA-BSc-Four-Year-scheme-for-students-from-2018.19.pdf>

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
	LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.
Students will choose ONE of the three half-unit options below:	
	LSE100A The LSE Course: How can we transform our climate futures? (0.5)
	LSE100B The LSE Course: How can we control AI? (0.5)
	LSE100C The LSE Course: How can we create a fair society? (0.5)
Year 1	
Either	
Paper 1	ST107 Quantitative Methods (Statistics) (0.5) #
and one from:	
	MA107 Quantitative Methods (Mathematics) (0.5) # or
	MA108 Methods in Calculus and Linear Algebra (0.5)
Or	

Paper 2	MA100 Mathematical Methods (1.0) #	Paper 16	Courses to the value of 1.0 unit(s) from the following: I
Paper 3	GV101 Introduction to Political Science (1.0)		Economics Options List
	PH103 The Big Questions: An Introduction to Philosophy (1.0) # A		Philosophy Options List
Paper 4	EC1A3 Microeconomics I (0.5) # and EC1B3 Macroeconomics I (0.5) #		Government List B
	Year 2		Or
Paper 5	If ST107 was taken under Paper 1 then students may select the following:		Courses to the value of 1.0 unit(s) from the following: J
	GV249 Research Design in Political Science (1.0)		Undergraduate Outside Options List (Years 2 & 3)
	Or		Economics Options List
	EC2C3 Econometrics I (0.5) # and EC2C4 Econometrics II (0.5) #		EC302 Political Economy (1.0) #
	Or		EC307 Development Economics (1.0) #
	If MA100 was taken under Paper 1, then students must select the following:		EC311 History of Economics: How Theories Change (1.0)
	ST102 Elementary Statistical Theory (1.0) #		EC313 Industrial Economics (1.0) #
Paper 6	GV100 Introduction to Political Theory (1.0)		EC317 Labour Economics (1.0) #
Paper 7	EC241 PPE Interdisciplinary Research Seminar (0.5) and PH111 Introduction to Logic (0.5)		EC321 Monetary Economics and Aggregate Fluctuations (1.0) #
Paper 8	EC2A3 Microeconomics II (0.5) # and EC2B3 Macroeconomics II (0.5) #		EC325 Public Economics (1.0) #
	Year 3		EC330 Environmental Economics (1.0) #
Paper 9	Courses to the value of 1.0 unit(s) from the following:		EC333 Problems of Applied Econometrics (1.0) #
	Government List A		EC334 Advanced Macroeconomics (0.5) #
	Government List B		EC335 Economic Policy in the Global Economy (0.5) #
Paper 10	PH344 PPE Research Seminar (0.5) (not available 2023/24)		EC338 International Trade (0.5) #
	And		EC339 International Macroeconomics (0.5) #
	Courses to the value of 0.5 unit(s) from the following:		Philosophy Options List
	PH105 Historical and Global Perspectives on Philosophy (0.5)		LL305 Jurisprudence (1.0) D
	PH112 Intermediate Logic and Probability (0.5) #		LN253 European Literature and Philosophy (1.0) #
	PH223 Mind and Metaphysics (0.5) #		LN254 Literature and Aspects of Ethics (1.0) #
	PH224 Epistemology (0.5) #		PH105 Historical and Global Perspectives on Philosophy (0.5) E
	PH225 Business and Organisational Ethics (0.5)		PH112 Intermediate Logic and Probability (0.5) #
	PH227 Genes, Brains and Society (0.5)		PH201 Philosophy of Science (1.0)
	PH230 Einstein for Everyone: From time travel to the edge of the universe (0.5) #		PH214 Philosophy, Morals and Politics (1.0)
	PH232 Physics and Uncertainty: From Quantum Jumps to Stock Market Crashes (0.5) #		PH222 Philosophy and Public Policy (1.0)
	PH238 Philosophy of Language (0.5) # (not available 2023/24)		PH223 Mind and Metaphysics (0.5) # 1
	PH239 Anarchy, Authority and Evidence: Topics in Philosophy of Law (0.5)		PH224 Epistemology (0.5) # 2
	PH333 Philosophy of Gender and Race (0.5)		PH225 Business and Organisational Ethics (0.5)
Paper 11	Courses to the value of 1.0 unit(s) from the following:		PH226 Philosophy of Society (0.5) #
	Economics Options List		PH227 Genes, Brains and Society (0.5)
Paper 12	If ST107 was taken under Paper 1, then courses to the value of 1.0 unit(s) from the following:		PH230 Einstein for Everyone: From time travel to the edge of the universe (0.5) #
	Economics Options List		PH232 Physics and Uncertainty: From Quantum Jumps to Stock Market Crashes (0.5) #
	Philosophy Options List		PH236 Set Theory (0.5) #
	Government List A		PH237 Advanced Logic (0.5) #
	Government List B		PH238 Philosophy of Language (0.5) # (not available 2023/24)
	Or		PH239 Anarchy, Authority and Evidence: Topics in Philosophy of Law (0.5)
	If MA100 and ST102 were taken under Papers 1 and 5, then students must select the following:		PH240 The Ethics of Data and AI (0.5)
	EC2C3 Econometrics I (0.5) #		PH301 Rationality and Choice (1.0) # F
	And		PH311 Philosophy of Economics (1.0) #
	EC2C4 Econometrics II (0.5) #		PH333 Philosophy of Gender and Race (0.5)
	Year 4		PH399 Dissertation in Philosophy (1.0) G
Paper 13	PH341 Philosophy, Politics and Economics: Applications (1.0) #		Prerequisite Requirements and Mutually Exclusive Options
Paper 14	GV343 Philosophy, Politics and Economics: Capstone (0.5) and GV344 Philosophy, Politics and Economics: Research Project (0.5)		* means available with permission
Paper 15	Courses to the value of 1.0 unit(s) from the following: H		# means there may be prerequisites for this course. Please view the course guide for more information.
	Economics Options List		1: PH223 can not be taken with PH221
	Philosophy Options List		2: PH224 can not be taken with PH221
	Government List B		A: PH103 includes a supplementary five week Philosophy and Argumentative Writing Seminar.
			B: GV319 can be taken in Year 3 only.
			C: Only Available to students on the BSc in Philosophy, Politics and Economics as an option on Government List B. Students on other programmes may only select this course under Paper 12 of their programme regulations.
			D: LL305 can be taken in the third year only.

Footnotes

E: PH105 can be taken in Year 2 only.
 F: PH301 is only available to students in Year 4 of the BSc in Philosophy, Politics and Economics.
 G: PH399 cannot be taken in Year 1 or Year 2.
 H: Selection from the Government, Philosophy or Economics Options Lists is subject to timetabling constraints.
 I: Selection from the Government, Philosophy or Economics Options Lists is subject to timetabling constraints.
 J: Courses selected from the Undergraduate Outside Options List require permission. Selection from the Undergraduate Outside Options List is subject to timetabling constraints.

2: PH224 can not be taken with PH221

A: PH103 includes a supplementary five week Philosophy and Argumentative Writing Seminar.

B: GV319 can be taken in Year 3 only.

C: Only Available to students on the BSc in Philosophy, Politics and Economics as an option on Government List B. Students on other programmes may only select this course under Paper 12 of their programme regulations.

D: LL305 can be taken in the third year only.

E: PH105 can be taken in Year 2 only.

F: PH301 is only available to students in Year 4 of the BSc in Philosophy, Politics and Economics.

G: PH399 cannot be taken in Year 1 or Year 2.

Footnotes

H: Selection from the Government, Philosophy or Economics Options Lists is subject to timetabling constraints.

I: Selection from the Government, Philosophy or Economics Options Lists is subject to timetabling constraints.

J: Courses selected from the Undergraduate Outside Options List require permission. Selection from the Undergraduate Outside Options List is subject to timetabling constraints.

BSc in Philosophy, Politics and Economics

Programme Code: UBPHPOLEC

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2020/21

Four-year Classification Scheme for BA/BSc degrees for all students from the 2018/19 academic year <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/BA-BSc-Four-Year-scheme-for-students-from-2018.19.pdf>

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper **Course number, title (unit value)**

Year 1

Paper 1 **Either**

MA107 Quantitative Methods (Mathematics) (0.5) # **and** ST107 Quantitative Methods (Statistics) (0.5) #

Or

MA100 Mathematical Methods (1.0) #

Paper 2 GV101 Introduction to Political Science (1.0)

Paper 3 PH103 The Big Questions: An Introduction to Philosophy (1.0) # A

Paper 4 EC100 Economics A (1.0) # (withdrawn 2021/22)

or

EC102 Economics B (1.0) # B(withdrawn 2021/22)

Year 2

Paper 5 If MA107 and ST107 were taken under Paper 1 then students may select the following:

GV249 Research Design in Political Science (1.0)

Or

If MA107 and ST107 were taken under Paper 1 (and if a grade of 65 or above is achieved on both courses), then students may select the following:

EC220 Introduction to Econometrics (1.0) # (withdrawn 2022/23)

Or

If MA100 was taken under Paper 1, then students must select the following:

ST102 Elementary Statistical Theory (1.0) #

Paper 6 GV100 Introduction to Political Theory (1.0)

Paper 7 EC241 PPE Interdisciplinary Research Seminar (0.5) **and** PH111 Introduction to Logic (0.5)

Paper 8 If MA107 and ST107 were taken under Paper 1, then students must select the following:

EC201 Microeconomic Principles I (1.0) # (withdrawn 2023/24)

Or

If MA100 was taken under Paper 1, then students must select one of the following:

EC201 Microeconomic Principles I (1.0) # (withdrawn 2023/24)

EC202 Microeconomic Principles II (1.0) # (withdrawn 2022/23)

Year 3

Paper 9 Courses to the value of 1.0 unit(s) from the following:

Government List A

Government List B

Paper 10 Courses to the value of 1.0 unit(s) from the following:

Philosophy Options List

Paper 11 EC210 Macroeconomic Principles (1.0) # (withdrawn 2023/24)

Paper 12 If MA107 and ST107 were taken under Paper 1, then courses to the value of 1.0 unit(s) from the following:

Economics Options List

Philosophy Options List

Government List A

Government List B

Or

If MA100 was taken under Paper 1, then students must select the following:

EC2C3 Econometrics I (0.5) #

and

EC2C4 Econometrics II (0.5) #

Additional

course

In addition, students will also take the following course in MT & LT:

PH340 PPE Research Seminar (0.0)

Year 4

Paper 13 PH341 Philosophy, Politics and Economics: Applications (1.0) #

Paper 14 GV343 Philosophy, Politics and Economics: Capstone (0.5) **and** GV344 Philosophy, Politics and Economics: Research Project (0.5)

Paper 15 Courses to the value of 1.0 unit(s) from the following:

Economics Options List

Philosophy Options List

Government List B

Paper 16 Courses to the value of 1.0 unit(s) from the following:

J

Economics Options List

Philosophy Options List

Government List B

Or

Courses to the value of 1.0 unit(s) from the following:

K

Undergraduate Outside Options List (Years 2 & 3)

Economics Options List

EC301 Advanced Economic Analysis (1.0) # (withdrawn 2023/24)

EC302 Political Economy (1.0) #

EC307 Development Economics (1.0) #

EC311 History of Economics: How Theories Change (1.0)

EC313 Industrial Economics (1.0) #

EC315 International Economics (1.0) # (withdrawn 2023/24)

EC317 Labour Economics (1.0) #

EC321 Monetary Economics and Aggregate Fluctuations (1.0) #

EC325 Public Economics (1.0) #

EC333 Problems of Applied Econometrics (1.0) #

EC334 Advanced Macroeconomics (0.5) #

EC335 Economic Policy in the Global Economy (0.5) #

EC338 International Trade (0.5) #

EC339 International Macroeconomics (0.5) #

Philosophy Options List

LL305 Jurisprudence (1.0) E

LN253 European Literature and Philosophy (1.0) #

LN254 Literature and Aspects of Ethics (1.0) #

PH105 Historical and Global Perspectives on Philosophy (0.5) F

PH112 Intermediate Logic and Probability (0.5) #

PH201 Philosophy of Science (1.0)

PH203 Philosophy of Society (1.0) # (withdrawn 2023/24)

PH214 Philosophy, Morals and Politics (1.0)

PH217	Set Theory and Further Logic (1.0) # (withdrawn 2023/24)
PH221	Problems of Analytic Philosophy (1.0) # (withdrawn 2020/21)
PH222	Philosophy and Public Policy (1.0)
PH223	Mind and Metaphysics (0.5) # 1
PH224	Epistemology (0.5) # 2
PH225	Business and Organisational Ethics (0.5)
PH226	Philosophy of Society (0.5) #
PH227	Genes, Brains and Society (0.5)
PH230	Einstein for Everyone: From time travel to the edge of the universe (0.5) #
PH232	Physics and Uncertainty: From Quantum Jumps to Stock Market Crashes (0.5) #
PH236	Set Theory (0.5) #
PH237	Advanced Logic (0.5) #
PH238	Philosophy of Language (0.5) # (not available 2023/24)
PH239	Anarchy, Authority and Evidence: Topics in Philosophy of Law (0.5)
PH301	Rationality and Choice (1.0) # G
PH311	Philosophy of Economics (1.0) #
PH332	Effective Philanthropy: Ethics and Evidence (0.5) (withdrawn 2020/21)
PH333	Philosophy of Gender and Race (0.5)
PH399	Dissertation in Philosophy (1.0) H

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: PH223 can not be taken with PH221

2: PH224 can not be taken with PH221

Footnotes

A: PH103 includes a supplementary five week

Philosophy and Argumentative Writing Seminar.

B: EC102 course allocation dependent on Economics

A-level or equivalent background. See course guides

for further information.

C: GV319 can be taken in Year 3 only.

D: Only Available to students on the BSc in Philosophy,

Politics and Economics as an option on Government

List B. Students on other programmes may only

select this course under Paper 12 of their programme

regulations.

E: LL305 can be taken in the third year only.

F: PH105 can be taken in Year 2 only.

G: PH301 is only available to students in Year 4 of the
BSc in Philosophy, Politics and Economics.

H: PH399 cannot be taken in Year 1 or Year 2.

I: Selection from the Government, Philosophy or
Economics Options Lists is subject to timetabling
constraints.

J: Selection from the Government, Philosophy or
Economics Options Lists is subject to timetabling
constraints.

K: Courses selected from the Undergraduate Outside
Options List require permission. Selection from the
Undergraduate Outside Options List is subject to
timetabling constraints.

BSc in Philosophy and Economics

Programme Code: UBPHEC

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2023/24

Please note that places are limited on some optional courses.

**Admission onto any particular course is not guaranteed and may be
subject to timetabling constraints and /or students meeting specific
prerequisite requirements.**

Paper Course number, title (unit value)

LSE100 LSE100 is a half unit taken by all students,

running across Autumn and Winter Terms
in the first year. The course provides one of
the marks that is eligible to be included in
the calculation of the First Year Average for
purposes of classification.

Students will choose ONE of the three half-unit options below:

LSE100A The LSE Course: How can we transform our
climate futures? (0.5)

LSE100B The LSE Course: How can we control AI?
(0.5)

LSE100C The LSE Course: How can we create a fair
society? (0.5)

Year 1

Paper 1 EC1A3 Microeconomics I (0.5) # **and** EC1B3
Macroeconomics I (0.5) #

Papers 2 & 3

Either

MA100 Mathematical Methods (1.0) # **and** ST102
Elementary Statistical Theory (1.0) #

Or

PH111 Introduction to Logic (0.5) **and** ST107
Quantitative Methods (Statistics) (0.5) #

one from:

MA107 Quantitative Methods (Mathematics) (0.5)
#

MA108 Methods in Calculus and Linear Algebra
(0.5)

And:

PH105 Historical and Global Perspectives on
Philosophy (0.5) **Or**

Paper 4 PH112 Intermediate Logic and Probability (0.5) #
PH103 The Big Questions: An Introduction to
Philosophy (1.0) #

Year 2

Paper 5 Courses to the value of 1.0 unit(s) from the following:

Philosophy Options List

Paper 6 If PH111 was not taken under Papers 2 & 3, then
students must take:

PH111 Introduction to Logic (0.5) **and** PH112
Intermediate Logic and Probability (0.5) #

Or

If PH111 was taken under Paper 3, then courses to

the value of 1.0 unit(s) from the following:

Philosophy Options List

Paper 7 EC2A3 Microeconomics II (0.5) # **and** EC2B3
Macroeconomics II (0.5) #

Paper 8 EC2C3 Econometrics I (0.5) # **and** EC2C4
Econometrics II (0.5) #

Year 3

Paper 9 Courses to the value of 1.0 unit(s) from the following:

Philosophy Options List

Paper 10 Courses to the value of 1.0 unit(s) from the following:

Undergraduate Outside Options List (Years 2 & 3)

Or

Courses to the value of 1.0 unit(s) from the following:

Philosophy Options List

Or

Courses to the value of 1.0 unit(s) from the following:

Economics Options List

Paper 11 Courses to the value of 1.0 unit(s) from the following:

Economics Options List

Paper 12 PH311 Philosophy of Economics (1.0) #

Economics Options List

EC302 Political Economy (1.0) #

EC307 Development Economics (1.0) #

EC310 Behavioural Economics (1.0) #

EC311 History of Economics: How Theories
Change (1.0)

EC317 Labour Economics (1.0) #

EC319 Games and Economic Behaviour (1.0) #

EC321 Monetary Economics and Aggregate
Fluctuations (1.0) #

EC325	Public Economics (1.0) #
EC330	Environmental Economics (1.0) #
EC334	Advanced Macroeconomics (0.5) #
EC335	Economic Policy in the Global Economy (0.5) #
EC338	International Trade (0.5) #
EC339	International Macroeconomics (0.5) #
Philosophy Options List	
LL305	Jurisprudence (1.0) A
LN253	European Literature and Philosophy (1.0) #
LN254	Literature and Aspects of Ethics (1.0) #
PH105	Historical and Global Perspectives on Philosophy (0.5) B
PH112	Intermediate Logic and Probability (0.5) # C
PH201	Philosophy of Science (1.0)
PH214	Philosophy, Morals and Politics (1.0)
PH222	Philosophy and Public Policy (1.0)
PH223	Mind and Metaphysics (0.5) # 1

Footnotes

BSc in Politics

Programme Code: UBPOL

Department: Government

For students starting this programme of study in 2023/24

Students who have taken and passed at least 3.0 units of courses in a specific discipline over the course of their degree, of which at least 1.0 unit is taken in Year 3, will be offered the opportunity to receive a specialism attached to their degree certificate and transcript. Students are not obligated to receive a specialism. Students must take all courses in the same discipline to qualify for the specialism. Degree certificates which include a specialism will state the specialism in the title. The specialisms available are as follows:

BSc in Politics (with Anthropology)

BSc in Politics (with International History)

BSc in Politics (with Sociology)

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Footnotes

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

A: GV319 can be taken in Year 3 only.

B: Only Available to students on the BSc in Philosophy, Politics and Economics as an option on Government List B. Students on other programmes may only select this course under Paper 12 of their programme regulations.

BSc in Politics

Programme Code: UBPOL

Department: Government

For students starting this programme of study in 2022/23

Students who have taken and passed at least 3.0 units of courses in a specific discipline over the course of their degree, of which

at least 1.0 unit is taken in Year 3, will be offered the opportunity to receive a specialism attached to their degree certificate and transcript. Students are not obligated to receive a specialism. Students must take all courses in the same discipline to qualify for the specialism. Degree certificates which include a specialism will state the specialism in the title. The specialisms available are as follows:

BSc in Politics (with Anthropology)

BSc in Politics (with International History)

BSc in Politics (with Sociology)

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
	LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Students will choose ONE of the three half-unit options below:

LSE100A	The LSE Course: How can we transform our climate futures? (0.5)
LSE100B	The LSE Course: How can we control AI? (0.5)
LSE100C	The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1	GV100 Introduction to Political Theory (1.0)
Paper 2	GV101 Introduction to Political Science (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following: AN100 Being Human: Contemporary Themes in Social Anthropology (1.0) AN101 A History of Anthropological Theory (1.0) AN102 Ethnography through Mixed Media (1.0) EC1A3 Microeconomics I (0.5) # and EC1B3 Macroeconomics I (0.5) # EC1A5 Microeconomics I (0.5) and EC1B5 Macroeconomics I (0.5) # EH101 The Internationalisation of Economic Growth, 1870 to the present day (1.0) GY103 Contemporary Europe (1.0) HY113 From Empire to Independence: World History in the Twentieth Century (1.0) HY116 International Politics since 1914: Peace and War (1.0) HY118 Faith, Power and Revolution: Europe and the Wider World, c.1500-c.1800 (1.0) IR100 International Relations: Theories, Concepts and Debates (1.0) PH103 The Big Questions: An Introduction to Philosophy (1.0) # SO100 Key Concepts: Introduction to Social Theory (1.0) SO110 Power, Inequality, and Difference: Contemporary Themes in Sociology (1.0) SP110 Sociology and Social Policy (1.0) # (withdrawn 2023/24) SP111 Social Economics and Policy (1.0) #

AN282	Bangladesh and Beyond: Anthropological Perspectives (0.5) # (not available 2023/24)
AN292 A	Anthropological Entanglements in the Middle East (0.5)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

A: LN250 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

B: LN251 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

C: LN252 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

D: LN253 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

E: LN254 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

F: LN270 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

G: Language Specialism:

Students who have taken and passed one language course in each year of their degree (i.e. 25% of their overall programme of study) will receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose language courses in each year according to these rules will receive a language specialism. Degree certificates which include a language specialism will state the language in the title, for example: **BA in Social Anthropology (with French)**.

H: International History Specialism:

Students who have taken and passed at least one course from the Department of International History in each year of their degree (ie, 25 per cent of their overall programme of study) will be offered the opportunity to receive an International History specialism attached to their degree certificate and transcript. In order to qualify for the specialism, students must take HY113, HY116 or HY118 in their first year, courses to the value of one unit from International History List A in the second year, and courses to the value of one unit from International History List A or International History List B in the third year. Students who choose to take International

History courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include an International History specialism will state this in the title, i.e.: **BA in Social Anthropology (with International History)**.

I: Politics Specialism:

Students who have taken and passed at least one course from the Department of Government in each year of their degree (ie, 25 per cent of their overall programme of study) will be offered the opportunity to receive a Politics specialism attached to their degree certificate and transcript. In order to qualify for the specialism, students must take GV100 or GV101 in their first year, courses to the value of one unit from Government List A in the second year, and courses to the value of one unit from Government List A or Government List B in the third year. Students who choose to take Government courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a Politics specialism will state this in the title, i.e.: **BA in Social Anthropology (with Politics)**.

J: GV319 can be taken in Year 3 only.

K: Only Available to students on the BSc in Philosophy, Politics and Economics as an option on Government List B. Students on other programmes may only select this course under Paper 12 of their programme regulations.

Level 1 courses are not permitted as part of this degree programme in Years 2 and 3.

Footnotes**BA in Social Anthropology**

Programme Code: UBANA2

Department: Anthropology

For students starting this programme of study in 2022/23

Students on this programme have the opportunity to receive a language, International History, or Politics specialism attached to their degree certificate and transcript. See the details at the bottom of this page for more information.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
	LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Students will choose ONE of the three half-unit options below:

LSE100A	The LSE Course: How can we transform our climate futures? (0.5)
LSE100B	The LSE Course: How can we control AI? (0.5)
LSE100C	The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1	AN100 Being Human: Contemporary Themes in Social Anthropology (1.0)
Paper 2	AN101 A History of Anthropological Theory (1.0)
Paper 3	AN102 Ethnography through Mixed Media (1.0)
Paper 4	Courses to the value of 1.0 unit(s) from the following: Note that in addition to this list of courses offered in outside departments, any available language course run by the Language Centre will also be approved. Approved Outside Options (Year 1) Language Courses Language Specialism

Students wishing to graduate with a language specialism should refer to the requirements set out in the Language Specialism footnote. G

International History Specialism

Students wishing to graduate with an International History specialism should refer to the requirements set out in the International History Specialism footnote.H

Politics Specialism

Students wishing to graduate with a Politics specialism should refer to the requirements set out in the Politics Specialism footnote. I

Year 2

- Paper 5 AN200 The Anthropology of Kinship, Sex and Gender (1.0)
- Paper 6 AN226 Political and Legal Anthropology (1.0)
- Paper 7 AN256 Economic Anthropology (1): Production and Exchange (0.5) **and** AN298 Fieldwork in London: Learning Ethnographic Methods (0.5)

Paper 8 Courses to the value of 1.0 unit(s) from the following:

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

A: LN250 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

B: LN251 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

C: LN252 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

D: LN253 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

E: LN254 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

F: LN270 Not available to 2nd and 3rd year students on the BA/BSc in Social Anthropology programmes.

G: Language Specialism:

Students who have taken and passed one language course in each year of their degree (i.e. 25% of their overall programme of study) will receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose language courses in each year according to these rules will receive a language specialism. Degree certificates which include a language specialism will state the language in the title, for example:

BSc in Social Anthropology (with French).

H: International History Specialism:

Students who have taken and passed at least one course from the Department of International History in each year of their degree (ie, 25 per cent of their overall programme of study) will be offered the opportunity to receive an International History specialism attached to their degree certificate and transcript. In order to qualify for the specialism,

students must take HY113, HY116 or HY118 in their first year, courses to the value of one unit from International History List A in the second year, and courses to the value of one unit from International History List A or International History List B in the third year. Students who choose to take International History courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include an International History specialism will state this in the title, i.e.:

BA in Social Anthropology (with International History).

I: Politics Specialism:

Students who have taken and passed at least one course from the Department of Government in each year of their degree (ie, 25 per cent of their overall programme of study) will be offered the opportunity to receive a Politics specialism attached to their degree certificate and transcript. In order to qualify for the specialism, students must take GV100 or GV101 in their first year, courses to the value of one unit from Government List A in the second year, and courses to the value of one unit from Government List A or Government List B in the third year. Students who choose to take Government courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a Politics specialism will state this in the title, i.e.:

BA in Social Anthropology (with Politics).

J: GV319 can be taken in Year 3 only.

K: Only Available to students on the BSc in Philosophy, Politics and Economics as an option on Government List B. Students on other programmes may only select this course under Paper 12 of their programme regulations.

Level 1 courses are not permitted as part of this degree programme in Years 2 and 3.

Note for prospective students:

For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in Social Anthropology

Programme Code: UBANS2

Department: Anthropology

For students starting this programme of study in 2022/23

Students on this programme have the opportunity to receive a language, International History, or Politics specialism attached to their degree certificate and transcript. See the details at the bottom of this page for more information.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper

Course number, title (unit value)

LSE100	LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.
--------	--

Students will choose ONE of the three half-unit options below:

Footnotes

	LSE100A	The LSE Course: How can we transform our climate futures? (0.5)		
	LSE100B	The LSE Course: How can we control AI? (0.5)		
	LSE100C	The LSE Course: How can we create a fair society? (0.5)		
	Year 1

Paper	Course number, title (unit value)
	LSE100 LSE100 is a half unit taken by all students, running across Autumn and Winter Terms in the first year. The course provides one of the marks that is eligible to be included in the calculation of the First Year Average for purposes of classification.

Students will choose ONE of the three half-unit options below:

LSE100A	The LSE Course: How can we transform our climate futures? (0.5)
LSE100B	The LSE Course: How can we control AI? (0.5)
LSE100C	The LSE Course: How can we create a fair society? (0.5)

Year 1

Paper 1	SO102 Data in Society: Researching Social Life (1.0)
Paper 2	SO100 Key Concepts: Introduction to Social Theory (1.0)
Paper 3	SO110 Power, Inequality, and Difference: Contemporary Themes in Sociology (1.0)
Paper 4	Courses to the value of 1.0 unit(s) from the following: Undergraduate Outside Options List (Year 1) Or Courses to the value of 1.0 units from the following, subject to approval by the candidate's Academic Mentor and the Departmental Tutor: Undergraduate Outside Options List (Years 2 & 3)

Year 2

Paper 5	SO221 Researching London: Advanced Social Research Methods (1.0)
Paper 6	SO201 Key Concepts: Advanced Social Theory (1.0)
Paper 7	Courses to the value of 1.0 unit(s) from the following:

Sociology Options List

Paper 8	Courses to the value of 1.0 unit(s) from the following: Sociology Options List Undergraduate Outside Options List (Years 2 & 3)
---------	---

Notes Sociology students are not normally permitted to take level 1 (i.e. 1st year) courses in their 2nd and 3rd years of study apart from any available modern language degree course run by the Language Centre. Any requests to take other level 1 courses will be subject to approval by the student's Academic Mentor and the Departmental Tutor and you should, therefore, ensure you discuss the reasons for your request with them before submitting your course selection in LSE for You.

Year 3

Paper 9	SO302 The Sociological Dissertation (1.0) #
Paper 10	Courses to the value of 1.0 unit(s) from the following: Sociology Options List
Paper 11	Courses to the value of 1.0 unit(s) from the following: Sociology Options List
Paper 12	Courses to the value of 1.0 unit(s) from the following: Sociology Options List

Notes

Undergraduate Outside Options List (Years 2 & 3)

Sociology students are not normally permitted to take level 1 (i.e. 1st year) courses in their 2nd and 3rd years of study apart from any available modern language degree course run by the Language Centre. Any requests to take other level 1 courses will be subject to approval by the student's Academic Mentor and the Departmental Tutor and you should, therefore, ensure you discuss the reasons for your request with them before submitting your course selection in LSE for You.

Sociology Options List

SO203	Political Sociology (1.0)
SO210	Crime, Deviance and Control (1.0) 1(withdrawn 2023/24)
SO232	Sociology of Health and Illness (0.5)
SO234	Digital Technology, Speed and Culture (0.5) # (not available 2023/24)
SO235	The Sociology of Homicide (0.5)
SO236	Urban Society (0.5)
SO237	Racial Borderscapes (0.5)
SO240	Crime, Deviance and Control (0.5) 2
SO244	The Sociology of Race and Empire (0.5)
SO248	Gender and Society (0.5)
SO309	Atrocity and Justice (0.5)
SO310	The Sociology of Elites (0.5)
SO311	Law and Violence (0.5) A
SO312	Work, Inequality and Society (0.5)

SO314	Class, Culture and Meritocracy (0.5)
SO348	Family Diversity and Change (0.5)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

1: SO210 can not be taken with SP271, SP270, SO240

2: SO240 can not be taken with SO210, SP270, SP271

A: SO311 is available to students in Year 3 only.

Language Specialism:

Students who have taken and passed a 1.0 unit language course in each year of their degree (i.e. 25% of their overall programme of study) will be offered the opportunity to receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose to take language courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a language specialism will state the language in the title, for example: **BSc in Sociology (with French)**.

Footnotes

BSc in Sociology

Programme Code: UBSO2

Department: Sociology

For students starting this programme of study in 2021/22 Students on this programme have the opportunity to receive a language specialism attached to their degree certificate and transcript. See the details at the bottom of this page for more information. <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeBA-BSC-InOrAfter2007-08-OtherThanFourYear.pdf>

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific

prerequisite requirements.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: EC1A3 can not be taken with EC1A5

2: EC1A5 can not be taken with EC1A3

3: EC1B3 can not be taken with EC1B5

4: EC1B5 can not be taken with EC1B3

5: Before taking EC2C4 you must take EC2C3

Footnotes

A: ST314 is available in Year 3 only.

Erasmus Reciprocal Programme of Study

Programme Code: UOEXERA

Department: Undefined Department

For students starting this programme of study in 2023/24

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

The courses below are available to Erasmus students

Course List

Accounting

AC102	Elements of Financial Accounting (0.5)
AC103	Elements of Management Accounting, Financial Management and Financial Institutions (0.5)
AC200	Accounting Theory and Practice (1.0) # *
AC311	Results Accountability and Management Control for Strategy Implementation (0.5) # *
AC312	Performance Measurement, Strategy, and Uncertainty (0.5) # *
AC331	Contemporary Issues in Financial Accounting (0.5) # *
AC332	Financial Statement Analysis and Valuation (0.5) # *

AC341	Corporate Governance, Risk Management and Financial Audit (0.5)
AC342	Accounting, Corporate Responsibility and Sustainability (0.5)

Anthropology

AN100	Being Human: Contemporary Themes in Social Anthropology (1.0)
AN101	A History of Anthropological Theory (1.0)
AN200	The Anthropology of Kinship, Sex and Gender (1.0)
AN205	The Anthropology of Melanesia (0.5) (not available 2023/24)
AN221	The Anthropology of Christianity (0.5) # (not available 2023/24)
AN223	The Anthropology of Southeast Asia (0.5)
AN226	Political and Legal Anthropology (1.0)
AN237	The Anthropology of Development (0.5)
AN240	Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) (not available 2023/24)
AN243	Children and Youth in Contemporary Ethnography (0.5) # (not available 2023/24)
AN245	Borders and Boundaries: Ethnographic Approaches (0.5) (not available 2023/24)
AN250	The Anthropology of South Asia (0.5) # (not available 2023/24)
AN256	Economic Anthropology (1): Production and Exchange (0.5)
AN269	The Anthropology of Amazonia (0.5) # (not available 2023/24)
AN275	The Anthropology of Revolution (0.5) # (not available 2023/24)
AN276	Anthropology and the Anthropocene (0.5) *(not available 2023/24)
AN277	Topics in the Anthropology of sub-Saharan Africa (0.5) # *
AN280	Public Anthropology (0.5) # *
AN281	Health and Welfare: Anthropological Perspectives (0.5) (not available 2023/24)
AN283	Anthropology, Art, and Poetics (0.5)
AN284	Anthropological Approaches to Race, Racism, and Decolonisation (0.5) (not available 2023/24)
AN292	Anthropological Entanglements in the Middle East (0.5) *
AN303	Advanced Theory of Social Anthropology (0.5) # *
AN357	Economic Anthropology (2): Transformation and Globalisation (0.5)
AN393	Language, Signs, World, Action! Introduction to Linguistic Anthropology (0.5) # *

Data Science

DS101A	Fundamentals of Data Science (0.5)
DS101W	Fundamentals of Data Science (0.5)
DS105A	Data for Data Science (0.5)
DS105W	Data for Data Science (0.5)

Economics

EC1A3	Microeconomics I (0.5) # 1*
EC1A5	Microeconomics I (0.5) 2
EC1B3	Macroeconomics I (0.5) # 3*
EC1B5	Macroeconomics I (0.5) # 4
EC230	Economics in Public Policy (1.0) #
EC2A3	Microeconomics II (0.5) #
EC2A5	Microeconomics II (0.5) #
EC2B3	Macroeconomics II (0.5) #
EC2B5	Macroeconomics II (0.5) #
EC2C3	Econometrics I (0.5) #
EC2C4	Econometrics II (0.5) # 5
EC302	Political Economy (1.0) #
EC307	Development Economics (1.0) #
EC311	History of Economics: How Theories

	Change (1.0) *				
EC313	Industrial Economics (1.0) # *			GV262	Contemporary Political Theory (1.0) #
EC317	Labour Economics (1.0) #			GV263	Public Policy Analysis (1.0) #
EC319	Games and Economic Behaviour (1.0) #			GV264	Politics and Institutions in Europe (1.0) #
EC321	Monetary Economics and Aggregate Fluctuations (1.0) # *			GV267	Global Political Thought (1.0) #
				GV302	Key Themes in the History of Political Thought (1.0) # *
EC325	Public Economics (1.0) #			GV324	Applied Quantitative Methods for Political Science (0.5) #
EC330	Environmental Economics (1.0) # *			GV325	Topics in Political Economy (0.5) # *
EC334	Advanced Macroeconomics (0.5) #			GV326	Conflict, War and Revolution - Approaches to Political Theory (1.0) # *
EC335	Economic Policy in the Global Economy (0.5) #			GV328	Middle East Politics in Transnational Perspective (0.5) *
EC336	Econometric Theory A (0.5) # *			GV329	Making Democracy Work (0.5) # *
EC337	Econometric Theory B (0.5) # *			GV330	Data Science Applications to Politics Research (0.5) # *
EC338	International Trade (0.5) #			GV335	African Political Economy (0.5) *
EC339	International Macroeconomics (0.5) #			GV336	Latin America: Democracy and Development (0.5) *
	Economic History				Geography & Environment

means there may be prerequisites for this course. Please view the course guide for more information.

1: EC1A3 can not be taken with EC1A5

2: EC1A5 can not be taken with EC1A3

3: EC1B3 can not be taken with EC1B5

4: EC1B5 can not be taken with EC1B3

5: Before taking EC2C4 you must take EC2C3

Exchange Programme for Students in Anthropology (Cape Town)**Programme Code:** UOEXAN5**Department:** Anthropology

For students starting this programme of study in 2023/24

A full year exchange programme for visiting Year Abroad exchange students in the Department of Anthropology.

Students from the University of Cape Town spend three terms at LSE and choose courses to the value of 4.0 units from the list below.

Your course choice will be made with the approval of your LSE

Department of Anthropology Academic Mentor. At least 50% of your full study load should be in Anthropology courses.

Where the prerequisite of a course is prior study on a specific

LSE course, applications from exchange students with equivalent

academic experience will be considered. Decisions regarding admission to courses will be made by the relevant course leader on a case by case basis.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Papers 1 & 2	Courses to the value of 2.0 unit(s) from the following: Anthropology List
Papers 3 & 4	Courses to the value of 2.0 unit(s) from the following: Undergraduate Outside Options List (Years 2 & 3) Anthropology List
AN1E0	Being Human: Contemporary Themes in Social Anthropology (Anthropology Exchanges) (0.5) (not available 2023/24)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

Exchange Programme for Students from University of California, Berkeley

Programme Code: UOEXBE

Department: Undefined Department

For students starting this programme of study in 2023/24

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Course List	The courses below are available to Berkeley students Accounting
	AC102 Elements of Financial Accounting (0.5)
	AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5)
	AC200 Accounting Theory and Practice (1.0) # *
	AC311 Results Accountability and Management Control for Strategy Implementation (0.5) # *
	AC312 Performance Measurement, Strategy, and Uncertainty (0.5) # *
	AC331 Contemporary Issues in Financial Accounting (0.5) # *
	AC332 Financial Statement Analysis and Valuation (0.5) # *
	AC341 Corporate Governance, Risk Management and Financial Audit (0.5)
	AC342 Accounting, Corporate Responsibility and Sustainability (0.5)
	AN301 The Anthropology of Religion (1.0) #
	Anthropology
	AN100 Being Human: Contemporary Themes in Social Anthropology (1.0)
	AN101 A History of Anthropological Theory (1.0)
	AN200 The Anthropology of Kinship, Sex and Gender (1.0)
	AN205 The Anthropology of Melanesia (0.5) (not available 2023/24)
	AN221 The Anthropology of Christianity (0.5) # (not available 2023/24)
	AN223 The Anthropology of Southeast Asia (0.5)
	AN226 Political and Legal Anthropology (1.0)
	AN237 The Anthropology of Development (0.5)
	AN240 Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) (not available 2023/24)
	AN243 Children and Youth in Contemporary Ethnography (0.5) # (not available 2023/24)
	AN245 Borders and Boundaries: Ethnographic Approaches (0.5) (not available 2023/24)
	AN250 The Anthropology of South Asia (0.5) # (not available 2023/24)
	AN256 Economic Anthropology (1): Production and Exchange (0.5)
	AN269 The Anthropology of Amazonia (0.5) # (not available 2023/24)
	AN275 The Anthropology of Revolution (0.5) # (not available 2023/24)
	AN276 Anthropology and the Anthropocene (0.5)

*(not available 2023/24)

AN277	Topics in the Anthropology of sub-Saharan Africa (0.5) # *
AN280	Public Anthropology (0.5) # *
AN281	Health and Welfare: Anthropological Perspectives (0.5) (not available 2023/24)
AN283	Anthropology, Art, and Poetics (0.5)
AN284	Anthropological Approaches to Race, Racism, and Decolonisation (0.5) (not available 2023/24)
AN292	Anthropological Entanglements in the Middle East (0.5) *
AN303	Advanced Theory of Social Anthropology (0.5) # *
AN357	Economic Anthropology (2): Transformation and Globalisation (0.5)
AN393	Language, Signs, World, Action! Introduction to Linguistic Anthropology (0.5) # *

Data Science

DS101A	Fundamentals of Data Science (0.5)
DS101W	Fundamentals of Data Science (0.5)
DS105A	Data for Data Science (0.5)
DS105W	Data for Data Science (0.5)

Economics

EC1A3	Microeconomics I (0.5) # 1*
EC1A5	Microeconomics I (0.5) 2
EC1B3	Macroeconomics I (0.5) # 3*
EC1B5	Macroeconomics I (0.5) # 4
EC230	Economics in Public Policy (1.0) #
EC2A3	Microeconomics II (0.5) # *
EC2A5	Microeconomics II (0.5) #
EC2B3	Macroeconomics II (0.5) # *
EC2B5	Macroeconomics II (0.5) #
EC2C3	Econometrics I (0.5) # *
EC2C4	Econometrics II (0.5) # 5*
EC302	Political Economy (1.0) #
EC307	Development Economics (1.0) #
EC311	History of Economics: How Theories Change (1.0) *
EC313	Industrial Economics (1.0) # *
EC317	Labour Economics (1.0) #
EC319	Games and Economic Behaviour (1.0) #
EC321	Monetary Economics and Aggregate Fluctuations (1.0) # *
EC325	Public Economics (1.0) #
EC330	Environmental Economics (1.0) # *
EC334	Advanced Macroeconomics (0.5) #
EC335	Economic Policy in the Global Economy (0.5) #
EC336	Econometric Theory A (0.5) # *
EC337	Econometric Theory B (0.5) # *
EC338	International Trade (0.5) #
EC339	International Macroeconomics (0.5) #

Economic History

EH101	The Internationalisation of Economic Growth, 1870 to the present day (1.0)
EH102	Pre-industrial Economic History (1.0) *
EH111	The Internationalisation of Economic Growth (0.5)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

1: EC1A3 can not be taken with EC1A5

2: EC1A5 can not be taken with EC1A3

3: EC1B3 can not be taken with EC1B5

4: EC1B5 can not be taken with EC1B3

5: Before taking EC2C4 you must take EC2C3

Mutually exclusive options

The following courses may not be taken together i.e. students can only take one or other of the listed courses (and as programme regulations permit):

Course Mutually exclusive course(s)

DS101A	Fundamentals of Data ScienceDS101W Fundamentals of Data Science
DS101W	Fundamentals of Data ScienceDS101A Fundamentals of Data Science
DS105A	Data for Data ScienceDS105W Data for Data Science
DS105W	Data for Data ScienceDS105A Data for Data Science

Undergraduate Outside Options List (Year 1)

Where the regulations refer to an approved paper taught outside the department, this means that you may take any course in a subject other than the principal subject(s) of your degree, subject to timetabling constraints and any restrictions listed in the Course Guides. If your degree is for joint honours (e.g. Philosophy and Economics) or is a major/minor combination (e.g., Geography with Economics), a course outside the department means a course taught in any department other than the two named in the title of your degree. The home department of each course is indicated by the first two letters in its code.

Please note that some course combinations are not allowed. Please see the Mutually Exclusive Options list.

The courses available as outside options where regulations permit are:

Outside Options for students in Year 1:

AC102	Elements of Financial Accounting (0.5)
AC103	Elements of Management Accounting, Financial Management and Financial Institutions (0.5)
AN100	Being Human: Contemporary Themes in Social Anthropology (1.0)
AN101	A History of Anthropological Theory (1.0)
DS101A	Fundamentals of Data Science (0.5)
DS101W	Fundamentals of Data Science (0.5)
DS105A	Data for Data Science (0.5)
DS105W	Data for Data Science (0.5)
DS202A	Data Science for Social Scientists (0.5) #
DS202W	Data Science for Social Scientists (0.5) #
EC1A3	Microeconomics I (0.5) # ~1 *
EC1A5	Microeconomics I (0.5) ~2
EC1B3	Macroeconomics I (0.5) # ~3 *
EC1B5	Macroeconomics I (0.5) # ~4
EH101	The Internationalisation of Economic Growth, 1870 to the

ST101W	Programming for Data Science (0.5) #
ST102	Elementary Statistical Theory (1.0) # ~7
ST107	Quantitative Methods (Statistics) (0.5) # ~8
ST109	Elementary Statistical Theory I (0.5) # ~9
ST110	Elementary Statistical Theory II (0.5) # ~10
ST115	Managing and Visualising Data (0.5) # *

Undergraduate Outside Options List (Years 2 & 3)

Where the regulations refer to an approved paper taught outside the department, this means that you may take any course in a subject other than the principal subject(s) of your degree, subject to timetabling constraints and any restrictions listed in the Course Guides. If your degree is for joint honours (e.g. Philosophy and Economics) or is a major/minor combination (e.g., Geography with Economics), a course outside the department means a course taught in any department other than the two named in the title of your degree. The home department of each course is indicated by the first two letters in its code.

Please note that some course combinations are not allowed. Please see the Mutually Exclusive Options list.

An outside paper may be selected from the Undergraduate Course Guides, subject to the approval of the candidate's tutor and to the successful completion of prerequisites where necessary, with the following exceptions:

- certain first-year courses are not available to students in the second or third year of their degree;
- some courses are not available as an outside option; and
- some papers are mutually exclusive and may therefore not be combined.

The courses available as outside options where regulations permit are:

Outside Options for students in Year 2 and Year 3:

AC102	Elements of Financial Accounting (0.5)	AN275	The Anthropology of Revolution (0.5) # (not available 2023/24)

Undergraduate Course Guides

Undergraduate Course Guides

AC102 Half Unit

Elements of Financial Accounting

This information is for the 2023/24 session.

Teacher responsible: Dr Gulnaz Khamidullina MAR 3.26

Availability: This course is available on the BSc in Actuarial Science, BSc in Data Science, BSc in Finance, BSc in Management and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not capped, any student that requests a place will be given one.

Course content: This half-unit course introduces students to the fundamental principles of financial accounting. The course focuses on accounting from the viewpoint of users of financial information. By adopting the "user perspective," the course examines the potential uses and limitations of financial reporting information, which requires an understanding of how the financial reports are prepared. The course begins by discussing the framework of financial accounting, including its nature, intents and purposes, and the regulatory environment in which it operates. In the first weeks of the course, students learn about the processes used to record, summarise, and present financial accounting information, while addressing the limitations and potential biases in financial reporting. These include the use of estimates and assumptions, the impact of management choices on reported results, and the potential for earnings management. By understanding these limitations, students develop the ability to critically assess the reliability and usefulness of financial information. As the course progresses, students become familiar with the main financial statements, including the balance sheet, the income statement, and the statement of cash flows. In addition to understanding the preparation of financial statements, the course develops students' skills in analysing and interpreting financial information. This includes learning various financial analysis techniques, such as ratio analysis, trend analysis, and common-size analysis, which help in evaluating a company's financial health, operational efficiency, and future prospects. Towards the end of the course, students learn the key principles involved in preparing consolidated financial statements for a group of companies.

Teaching: 20 hours of lectures and 10 hours of classes in the AT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Written answers to numerical problems and discussion questions will be expected weekly. The course also involves two formative assessments.

Indicative reading: Detailed reading lists will be made available at the beginning of the course. Illustrative texts include Peter Atrill and Eddie McLaney *Financial Accounting for Decision Makers*, 10th ed, Pearson, 2022.

Assessment: Exam (100%, duration: 1 hour and 30 minutes, reading time: 15 minutes) in the spring exam period.

The exam duration is 1 hour and 45 minutes. The first 15 minutes will be reading time.

AC103 Half Unit

Elements of Management Accounting, Financial Management and Financial Institutions

This information is for the 2023/24 session.

Teacher responsible: Dr Gulnaz Khamidullina MAR 3.14 (Course Leader)

Dr Farooq Mahmood (Lecturer)

Availability: This course is available on the BSc in Actuarial Science, BSc in Data Science, BSc in Management and BSc in

Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not capped, any student that requests a place will be given one.

Course content: This is a half-unit course that introduces students to the fundamental principles of management accounting and financial management. The primary aim of the course is to help students understand how accounting information can be used by managers to make crucial decisions, such as pricing of products or services, discontinuing or offering new products, and expanding the product/service range or investing in new product development. Throughout the course, students are introduced to various topics in management accounting and financial management, including cost behaviour, cost-volume-profit analysis, costing systems, budgeting, variance analysis, performance measurement, and capital budgeting. As the course progresses, students are introduced to some key concepts in financial management, such as the role of financial markets and financial institutions, capital structure and risk. The course also covers topics related to the accounting of pension funds and insurance companies, which play an increasingly important role in the financial system. The course aims to provide students with a solid foundation in management accounting and financial management, allowing them to apply their knowledge in real-world situations.

Teaching: 22 hours of lectures and 10 hours of classes in the WT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Written answers to numerical problems and discussion questions will be expected weekly; some will be collected during classes for marking and feedback. The course involves two formative assessments.

Indicative reading: Detailed reading lists will be made available at the beginning of the course in a syllabus. Illustrative text includes Mahmood, F, *Elements of Management Accounting, Financial Management and Financial Institutions*, Pearson, 2020.

Assessment: Exam (100%, duration: 1 hour and 30 minutes, reading time: 15 minutes) in the spring exam period. The exam duration is 1 hour and 45 minutes. The first 15 minutes will be reading time.

AC105 Half Unit

Introduction to Financial Accounting

This information is for the 2023/24 session.

Teacher responsible: Dr Jacob Ott (MAR.3.31)

Availability: This course is compulsory on the BSc in Accounting and Finance. This course is not available as an outside option nor to General Course students.

Course content: This is a half-unit course that introduces students to fundamental principles of financial accounting. The course starts with a discussion of the framework of financial accounting: its nature, intents and purposes, and the context and environment in which it operates. This includes, and eventually entails, the need for, and various sources of, accounting regulation and "accounting standards". AC105 then unpacks various core financial accounting concepts and conventions. The course also looks into the processes used to record, summarise, and present financial accounting information as well as, crucially, its interpretation. Thus, and essentially, this part of the course focuses on the preparation, interpretation, and limitations of company financial statements for external reporting, and the regulatory framework in which financial reports are prepared.

Teaching: This course is delivered through two one and a half

hour sessions each week in the Autumn Term (10 weeks). The pedagogical approach in each session is interactive, often involving case study analyses and group discussions. This mode of teaching requires good advance preparation by the students; hence, every student should be ready to contribute to the discussion when called upon. Active participation is expected and encouraged.

Formative coursework: There will be several online tests ("quizzes") to test the student's knowledge and progress on a formative basis for feedback. Written answers to numerical problems and discussion questions will be expected weekly; some of the written work will be collected for marking and feedback.

Indicative reading: A detailed reading list will be made available on Moodle for each part of the course nearer the time of its scheduled start. An illustrative textbook for the course is:

- Libby, R., Libby, P.A., and Hodge, F. (2023) *ISE Financial Accounting*, 11th edition, McGraw Hill

Assessment: Exam (70%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Group assignment (20%) and quiz (10%) in the AT.

AC106 Half Unit

Introduction to Management Accounting

This information is for the 2023/24 session.

Teacher responsible: Dr Farooq Mahmood

Availability: This course is compulsory on the BSc in Accounting and Finance. This course is not available as an outside option nor to General Course students.

Course content: This is a half-unit course that introduces students to fundamental principles of management accounting. The course starts with a discussion of internal decision making and then provides an introduction to management and cost accounting. This includes the discussion of key concepts of cost calculation and various techniques of costing (such as absorption and variable costing approaches), as well as other alternative costing systems relevant for decision making. The aim is to help students understand how accounting information can help managers to make crucial decisions, such as about the pricing of products or services, or even whether to offer or discontinue a product or service, or whether to expand the product/service range or to invest in new product development. In summary, this part of the course focuses on the basic knowledge of management accounting - specifically, costing.

Teaching: This course is delivered through two one and a half hour sessions each week in the Winter Term (11 weeks). The pedagogical approach in each session is interactive, often involving case study analyses and group discussions. This mode of teaching requires good advance preparation by the students; hence, every student should be ready to contribute to the discussion when called upon. Active participation is expected and encouraged.

Formative coursework: There will be several online tests ("quizzes") to test the student's knowledge and progress on a formative basis for feedback. Written answers to numerical problems and discussion questions will be expected weekly; some of the written work will be collected for marking and feedback.

Indicative reading: A detailed reading list will be made available on Moodle for each part of the course nearer the time of its scheduled start. Illustrative textbooks include:

- Atrill, P. and McLaney, E. (2018) *Management Accounting for Decision Makers*, 9th edition, Pearson;
- Atrill, P. (2017) *Financial Management for Decision Makers*, 8th edition, Pearson.

Assessment: Exam (70%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Group assignment (30%) in the WT.

AC200

Accounting Theory and Practice

This information is for the 2023/24 session.

Teacher responsible: Dr Gulnaz Khamidullina (MAR 3.26) and Dr Per Ahblom (MAR 3.18)

Availability: This course is available on the BSc in Management, BSc in Mathematics, Statistics and Business and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Please seek permission from the BSc in Accounting and Finance Programme Director.

This course is not capped.

Pre-requisites: Students must have completed either (1) *Elements of Accounting and Finance* (AC100), or (2) *Elements of Financial Accounting* (AC102) and *Elements of Management Accounting, Financial Management and Financial Institutions* (AC103), or (3) equivalent.

Course content: This is a one-unit course that builds on the foundation laid by the first-year accounting courses. AC200 is also intended to provide students with the conceptual knowledge and technical skills necessary for final-year courses in accounting. The course considers the major theoretical and practical approaches to accounting and consists of two main components: financial accounting and management accounting.

Financial Accounting: The course begins with an evaluation of the regulatory environment in which financial accounting operates. This part of the course focuses on the preparation and analysis of the published financial statements of public interest entities operating on their own, or within group structures. The function and content of published financial statements, the issues posed by consolidated accounts, and the analysis of accounting information to evaluate corporate performance will also be examined. The course will delve into a range of specific financial accounting issues, such as accounting for revenue, intangible assets, and deferred taxation. However, the exact composition of the topics may vary from year to year driven by the latest developments in financial reporting, standard-setting and related debates.

Management Accounting: The course then explores theoretical concepts, practices, designs and wider issues of cost and management accounting. The characteristics and use of various systems and models, such as cost-driver analysis and activity-based costing, in organisational decision-making at both operating and strategic levels will be introduced and critically evaluated.

This part of the course also considers ways in which non-financial information can be used to complement financial accounting information in order to enable a more holistic approach aimed at providing relevant and useful information to management for the purposes of planning, decision-making, and organisational control.

Teaching: Teaching is delivered in two weekly one and a half hour seminars over 11 weeks across Autumn Term (AT Weeks 1-11) and Winter Term (WT Weeks 1-5, and Weeks 7-11 where Week 6 is a reading week).

There will be a two-hour revision session in Week 1 of the Spring Term. Seminars contain a variety of concept-focused content, practical exercises, and case analyses.

Formative coursework: Students are expected to come to each seminar prepared where the assigned course materials have been read and attempted. There will also be several online quizzes to assess student's knowledge and progress in both terms on a formative basis for feedback. Feedback on performance and progress will be provided during seminars, on selected written homework assignments, and during academic support and feedback hours.

Indicative reading: Detailed course programmes and reading lists will be made available via Moodle and Reading List @ LSE (<https://lse.rl.talis.com/courses/ac200.html>) before the first seminar of each term. A range of academic papers, professional reports and news articles will be used in the course.

Assessment: Exam (70%, duration: 2 hours, reading time: 15

minutes) in the spring exam period.

Coursework (15%) in the AT.

Project (15%) in the WT.

Further details of all aspects of assessment and coursework, as well as feedback, will be made available on Moodle nearer the scheduled start time of the course and will be updated as the course progresses with specific instructions, guidance, and feedback.

AC311 Half Unit

Results Accountability and Management Control for Strategy Implementation

This information is for the 2023/24 session.

Teacher responsible: Dr Oscar Timmermans MAR 3.33

Availability: This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, BSc in Economics and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Available to students on other undergraduate/Diploma programmes with the permission of the BSc Programme Director.

Pre-requisites: Students must have completed Elements of Accounting and Finance (AC100) or Elements of Management Accounting, Financial Management and Financial Institutions (AC103). Accounting Theory and Practice (AC200) is recommended to complement either AC100 or AC103, but not required.

AC311 can be taken together with Performance Measurement, Strategy, and Uncertainty (AC312) in the Winter Term, which focuses in more depth on one aspect of management control systems, namely performance measurement. In this course (AC311), however, performance measurement is just one aspect of a broader management control focus that entails results controls, incentive systems and various other organisational design features (e.g., responsibility centres and planning and budgeting). Students interested in careers in management consulting may benefit from taking both AC311 and AC312. Nevertheless, each course is also valuable as a standalone option.

Course content: AC311 examines results accountability and organisational control issues, focusing on how both financial and non-financial “results-oriented” practices underpin decision rights, planning and budgeting, and performance measurement and incentive systems, among other key organisational design features, to guide and ensure “strategy-aligned” decision-making in decentralised organisations. In other words, AC311 seeks to broaden and deepen your conceptual and technical understanding of accounting as it is used for management purposes—to implement strategy and ensure that everyone’s objectives and decisions are aligned with the organisation’s objectives by way of the key concept of results accountability.

The emphasis in AC311 is on financial controls, which are prevalent at managerial levels in all but the smallest organisations. Using financial controls requires managers to make decisions about: (1) responsibility structures (e.g., cost centres, profit centres); (2) performance measures and targets/benchmarks (e.g., market, financial, and/or non-financial measures and targets); (3) performance evaluations, which take into consideration these performance measures and targets/benchmarks; and (4) rewards (including incentive-compensation). The course is issue-oriented, with current and emerging topics as its major focus.

Aided by case studies and academic research, AC311 provides students with valuable insights into how financial results control systems vary across contexts, and how several situational factors, including organisational structure, culture, decision-making processes, and behavioural variables influence the design of financial results control systems. Some cases involve real-world data and the use of data analytics for strategic decision-making to address these management control problems.

The course is intended as an overview for those who will make business decisions, evaluate organisational performance, or evaluate others (and/or be evaluated) through the use of financial and non-financial information. And because management control is a core function of management, all students interested in business or management can benefit from this course. However, the course should be particularly useful for those who are, or aspire to be, managers, management consultants, financial specialists (e.g., controllers, budget analysts, auditors) or human resource specialists (e.g., compensation consultants).

Teaching: Teaching is delivered in two weekly 90-minute sessions over 10 weeks across Autumn Term.

The course consists of 10 principal topics delivered in two parts each week across Autumn Term. The first part of each week provides an introduction, positioning, and conceptual analysis of the key foundational elements of each topic. Students are expected to attend the session, together with having done the suggested readings for the week.

The second part each week offers a further discussion and expansion of the issues through case study analysis and real-world applications. The case study analyses and discussions permit the exploration of management control issues in a broad range of settings (e.g., large and small firms, manufacturing and service firms, multinational firms, startups and firms in distress, amongst others). The case method of instruction, however, requires good advance preparation by the students, and every student should be ready to contribute to the case discussion.

This course has a reading week in Week 6 of Autumn Term.

Formative coursework: The course makes extensive use of case studies. Students are expected to contribute to the case discussions by having read the case study and related materials in advance of the session and by participating in the discussion and offering their own analysis, views and/or perspectives on the issue at hand during the session.

Indicative reading: The main textbook for AC311 is: K. Merchant; W. Van der Stede; 2017. *Management control systems: Performance measurement, evaluation and incentives* (4th ed.). Pearson Education Limited.

In addition to the textbook, additional materials are accessible via Moodle.

Assessment: Exam (75%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Group project (25%) in the AT.

Further details relating to assessment and coursework, as well as feedback, will be made available on Moodle nearer the scheduled start time of the course and will be updated as the course progresses with specific instructions, guidance, and feedback.

AC312 Half Unit

Performance Measurement, Strategy, and Uncertainty

This information is for the 2023/24 session.

Teacher responsible: Dr Tommaso Palermo MAR 3.23

Availability: This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, BSc in Economics and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed *Elements of Accounting and Finance* (AC100) or *Elements of Management Accounting, Financial Management and Financial Institutions* (AC103) or equivalent introductory managerial accounting courses. Accounting Theory and Practice (AC200) is recommended to complement either AC100 or AC103, but not required.

This course can be taken together with Results Accountability and Management Control for Strategy Implementation (AC311). While AC311 provides an in-depth overview of management

control systems in decentralized organizations, AC312 focuses more specifically on one aspect of management control systems, namely performance measurement and the way in which performance measurement is evolving in contemporary organizations to deal with strategy formulation and decision-making under conditions of uncertainty.

Course content: This course examines practical problems that managers and employees are likely to confront in their work in a variety of organizational contexts. The fundamental issue is: how do you know when you have performed *well*? This question draws attention to the way in which performance is measured, visualised and assessed via performance measurement tools and frameworks, how performance measures and other sources of data are related to strategy formulation and decision-making, and the way in which strategy formulation and performance measurement can be adapted to confront increasingly volatile and uncertain business contexts.

The course addresses these themes in two parts. The first identifies key concepts and tools of performance measurement and how they can be used, through means including monitoring, reporting, and contracting, to influence behaviour. This part of the course includes practical exercises such as the design of an interactive performance dashboard and the development of a strategy and a balanced scorecard to be applied to a real-world case. The second part examines different approaches to deal with uncertainty as part of strategy formulation and performance measurement, including for example: the design and use of risk management processes; and how organisations can exploit large datasets to better understand and possibly predict key performance outcomes. As for the first part of the course, key concepts are put into practice via exercises and case discussions revolving around the use of data analytics, risk mapping and risk indicators design.

Aided by academic literature, examples taken from the financial and popular press, and case studies, AC312 provides students with valuable insights into how performance measurement approaches can vary across contexts, and how several situational factors, including business context, organisational structure, culture and behavioural variables influence them. Some cases will involve real-world data and the potential use of data analytics for strategy formulation, performance measurement and decision-making.

Teaching: 30 hours of seminars in the WT.

Comprising 10 weeks of twice-weekly 1.5 hour sessions.

There will be a reading week in Week 6. In person seminars are complemented by online recorded (asynchronous) videos.

Formative coursework: The course makes extensive use of case studies. Students are expected to contribute to the case discussions in each session. Students are asked to work in group on one case analysis and present their output for formative assessment in week 5 and week 11.

Indicative reading: No single book covers the entire course. Indicative readings include:

- Beasley, M.S., Branson, B.C., and Hancock, B.V. (2010). Developing key risk indicators to strengthen Enterprise Risk Management, Committee of Sponsoring Organizations of the Treadway Commission (COSO), 1-12.
- Ittner, C.D. and Larcker, D.F. (2003). Coming up short on nonfinancial performance measurement. *Harvard Business Review*, November, 88-95.
- Kaplan, R. S. and McMillan, D. (2021). Reimagining the Balanced Scorecard for the ESG Era. *Harvard Business Review*, February, 1-10.
- Mikes, A. and Kaplan, R.S. (2015). When one size doesn't fit all: Evolving directions in the research and practice of Enterprise Risk Management. *Journal of Applied Corporate Finance* 27 (1), 27-30.

The following books provide an overview of key themes addressed in the course:

- Bhimani, A., Horngren, C.T., Datar, S.M. and Rajan, M. (2019) *Management and cost accounting*, 7th Edition, Pearson Publishing.
- Neely, A. (Ed.). (2007). *Business performance measurement*:

Unifying theory and integrating practice, Cambridge University Press.

- Schildt, H. (2020). *The data imperative: How digitalization is reshaping management, organizing, and work*. Oxford University Press.

Assessment: Take-home assessment (75%) and group project (25%). Assessment consists of two components: an individual take-home assessment (75%); and a group project involving an analysis of a case (25%). Further details of all aspects of assessment and coursework will be made available on Moodle nearer the scheduled start time of the course and will be updated as the course progresses with specific instructions, guidance, and feedback.

AC331 Half Unit

Contemporary Issues in Financial Accounting

This information is for the 2023/24 session.

Teacher responsible: Dr Jeroen Koenraadt MAR 3.34

Availability: This course is compulsory on the BSc in Accounting and Finance. This course is available on the BSc in Management, BSc in Mathematics, Statistics and Business and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed *Elements of Accounting and Finance (AC100)* or *Elements of Financial Accounting (AC102)*.

Accounting Theory and Practice (AC200) is recommended to complement either AC100 or AC102, but not required.

Course content: AC331 considers key areas of topical interest and the impact of accounting standards on financial statements in an IFRS context. Specifically, the course critically analyses accounting practices and processes from the point of view of investors. The course will examine on revenue recognition, tangible and intangible assets, the reporting of financial instruments, off-balance-sheet accounting, stock-based compensation, as well as, issues related to the differential approaches to measurement including historical cost and fair values. However, the exact composition of the topics may vary from year to year driven by the latest developments in financial reporting, standard-setting and related debates.

The course aims to enhance students' understanding of contemporary issues in financial accounting. Throughout the course, taken-for-granted "wisdoms" will be critically evaluated and challenged. Finally, this course encourages and prepares students to become informed players on the debate around financial accounting and reporting issues.

Teaching: Teaching is delivered in two weekly 90-minute sessions over 10 weeks across Autumn Term.

Teaching sessions contain a variety of conceptual content, case analyses and practical exercises.

Formative coursework: Students should prepare weekly written work for class discussion. One specified piece of written work will be collected for marking.

Indicative reading: Detailed reading lists of books and journal articles will be provided during the course. No one book covers the entire course. Recommended books include:

- Beaver, W.H. (1998) *Financial Reporting: An Accounting Revolution*, 3rd edition, Pearson;
- Lewis and Pendril (2004) *Advanced Financial Accounting*, 7th edition, Financial Times Prentice Hall;
- Penman, S. (2013) *Financial Statement Analysis and Security Valuation*, 5th edition, McGrawHill

As well as accounting standards, firms' press releases, analysts' reports and academic research papers.

Assessment: Exam (75%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Group project (25%) in the AT.

AC332 Half Unit

Financial Statement Analysis and Valuation

This information is for the 2023/24 session.

Teacher responsible: Dr Stefano Cascino MAR 3.37

Availability: This course is available on the BSc in Accounting and Finance, BSc in Management, BSc in Mathematics, Statistics and Business and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Available to students on other undergraduate/Diploma programmes with the permission of the Accounting Departmental Tutor.

Pre-requisites: Students must have completed *Elements of Accounting and Finance* (AC100) or *Elements of Financial Accounting* (AC102).

Accounting Theory and Practice (AC200) is recommended to complement either AC100 or AC102, but not required.

Prior knowledge of statistical software packages (e.g., Stata) as well as prior coding (i.e., programming) experience is desirable although not required.

Course content: AC332 introduces and develops an economic framework for business analysis and corporate valuation.

The main focus is on integrating key concepts of economics, accounting, and finance in order to effectively evaluate the information content of financial reports; develop up-to-date applied knowledge of fundamental valuation techniques; and successfully implement investment strategies.

The aim of the course is to help students to become “sophisticated users” of financial accounting information from a *fundamental analysis* perspective. The course consists of four integrated parts: (i) strategy analysis; (ii) accounting analysis; (iii) financial analysis; and (iv) forecasting and valuation. Students are expected to develop financial-analysis and valuation-related skills to support the interpretation, evaluation, and use of accounting information from the viewpoint of major users of financial reports (i.e., equity investors, corporate lenders, etc.). Ultimately, students will be able to analyze a wide variety of financial reporting issues and discuss their valuation implications within the context of the relevant academic literature.

As recent trends in *big data* and *predictive analytics* are disrupting the way in which equity analysts, portfolio managers, credit-rating agencies, and regulators collect and analyze companies’ financial disclosures, students will also learn how to perform meaningful analyses on real-world data by using spreadsheets (e.g., MS Excel) and/or statistical software packages (e.g. Stata).

Teaching: 33 hours of seminars in the WT.

Teaching is delivered in two one and a half hour sessions each week.

The pedagogical approach in each session is interactive, often involving case study analyses and group discussions. This mode of teaching requires good advance preparation by the students; hence, every student should be ready to contribute to the discussion when called upon. Active participation is expected and encouraged.

Formative coursework: The course makes extensive use of real-world case studies. Students are expected to contribute to the case discussions in each session.

Indicative reading: There is no required textbook for this course. Illustrative textbooks covering specific parts of the course include:

- Palepu K. G., P. M. Healy, and E. Peek (2022), *Business Analysis and Valuation: IFRS Edition* (Cengage Learning), 6th edition.
- Penman, S. H. (2013), *Financial Statement Analysis and Security Valuation* (McGraw-Hill), 5th edition.

Assessment: Exam (60%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Group project (40%) in the WT.

Assessment consist of two components, one based on group work and the other on individual work:

- **Group project** (40%) in the Winter Term. The group project involves the preparation of an “analyst report” and the delivery of

a presentation. The analyst report gives students the opportunity to collect and analyze data on publicly listed companies. The preparation of the analyst report is meant to test: (i) students’ understanding of the core concepts of fundamental analysis and valuation; (ii) students’ ability to collect, manipulate, and analyze (big) data with the aid of spreadsheets (e.g., MS Excel) and/or statistical software packages (e.g., Stata). The presentation gives students the opportunity to share the findings documented in their analyst reports with the rest of their class as if they were presenting the results of their analyses in a formal business environment (e.g., to sell their research to institutional investors).

- **Final exam** (60%, duration: 2 hours, reading time: 15 minutes) in the Spring Term exam period.

AC341 Half Unit

Corporate Governance, Risk Management and Financial Audit

This information is for the 2023/24 session.

Teacher responsible: Dr Nadia Matringe MAR 3.19 and Dr Julia Morley MAR 3.22

Availability: This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, BSc in Economics and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not capped. Any student that requests a place will be given one.

Course content: What constrains the behaviour of profit-seeking corporations? What are the regulations that seek to prevent corporate disasters? This course attempts to answer these questions by critically examining the institutional and legal landscape of governance and accountability in which corporations operate. It takes students on a deep dive into the day-to-day practices of those charged with financial control and risk management within the organization. In addressing the financial accountability of corporations to their external stakeholders, the course critically evaluates the theory and practice of external financial audit, highlighting the structure of the market for audit, the practices of audit firms and the limits to the effectiveness of audit.

Some of the questions we will be asking are:

- How does an organization's purpose affect its governance?
- What disclosures are companies required to make concerning governance?
- How do organizations try to control operational and financial risk?
- What do studies about corporate disasters tell us about risk management? (e.g., the cases of Challenger and Boeing 737 Max)
- To what extent does current risk management address global phenomena such as pandemics?
- Given recent financial collapses (e.g. Carillion), what's the point in corporate financial audit?
- How should auditors respond if the viability of many businesses is uncertain?
- How might technology disrupt the market for risk management and corporate financial audit?

The course will critically evaluate academic studies and practitioner guidance to establish the “rules of the game” for corporate governance and accountability, but will also examine media coverage of corporate governance and auditing. Senior practitioners will speak to students during the course, offering insights into the practice of risk management and auditing. It should be noted that the course is grounded in the social sciences – it does not provide practical training in the application of risk management or auditing techniques and is not recognised for exemptions by the professional accountancy bodies.

Teaching: 30 hours of seminars in the AT, delivered as twice-weekly 1.5-hour sessions. There will be a reading week in week 6.

Formative coursework: Students will submit one 750-word essay

in week 3 on which they will receive written feedback.

Indicative reading: No one book covers the entire syllabus. In addition to professional and academic journals, reading will cover the following:

- Andersen (2019). *The Routledge Companion to Strategic Risk Management* (Routledge Companions in Business, Management and Accounting).
- Power (2016). *Riskwork: Essays on the Organizational Life of Risk Management*. Oxford University Press.
- Gray, Manson & Crawford (2019). *The Audit Process: Principles, Practice and Cases* (Cengage 7th Edition).
- Power (1999). *The Audit Society: Rituals of Verification*. Oxford University Press.

Students will also be provided with relevant examples of corporate and other reports and referred to relevant websites.

A detailed course outline and reading list will be made available at the beginning of the course.

Assessment: Exam (60%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Project (40%) in the AT Week 11.

Details of the project will be made available on Moodle nearer the scheduled start time of the course.

AC342 Half Unit

Accounting, Corporate Responsibility and Sustainability

This information is for the 2023/24 session.

Teacher responsible: Dr Julia Morley (MAR 3.22), Dr Xi Li (MAR 3.40) and Dr Aneesh Raghunandan (MAR 3.39)

Availability: This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, BSc in Economics and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: In the past decade, environmental, social and governance (ESG) issues have attracted enormous attention from investors, regulators, and other stakeholders. This is evidenced by the exponential growth of sustainable investing in global capital markets and the mandating of ESG-related disclosures across the world.

This course introduces students to the fundamental concepts of business ethics, sustainability reporting, and responsible investing. It evaluates the potential benefits of firms disclosing ESG information, as well as significant challenges to be overcome, including the risk of greenwashing. Students will learn about existing and emerging ESG regulations and frameworks for ESG performance metrics. The course also explores how key capital market participants, such as asset managers, analysts, and banks, could incorporate ESG information into their investment decisions. Students will take away from this course an understanding of the foundations and evolution of corporate ESG activities, the pros and cons of ESG disclosure, and the adoption of ESG information by different market participants.

Teaching: 30 hours of seminars in the WT.

Comprising 10 weeks of twice-weekly 1.5 hour sessions. There will be a reading week in week 6.

Formative coursework: The course invites students to critically reflect on recent developments in the field of sustainability accounting and comment on real world examples and case studies. Students will have the opportunity to submit a formative group project in Week 4 on which they will receive feedback. Students are expected to contribute to discussions in each session.

Indicative reading: No one book covers the entire syllabus. In addition to professional and academic journals, reading will cover the following

- Laine, M., Tregidga, H. and Unerman, J. (2021) *Sustainability Accounting and Accountability* (3rd ed.), Routledge;

Students will also be referred to relevant examples of corporate and other reports, and websites. Detailed course programmes and reading lists will be distributed at the first lecture of the course.

Assessment: Exam (60%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Group project (40%) in the WT.

Assessment consists of two components:

- **One group project (40%):** to be submitted during the Winter Term, and
- **Examination (60%):** in 160 Spring Term.

Further details relating to assessment and coursework, as well as feedback, will be made available on Moodle nearer the scheduled start time of the course and will be updated as the course progresses with specific instructions, guidance, and feedback.

AN100

Being Human: Contemporary Themes in Social Anthropology

This information is for the 2023/24 session.

Teacher responsible: Dr Clara Devlieger and Dr Anjana Bala

Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Politics and BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides a general introduction to Social Anthropology as the comparative study of human societies and cultures. Students will be introduced to key themes and debates in the history of the discipline. Ethnographic case studies will be drawn from work on a variety of societies, including hunter-gatherers, farmers, industrial labourers, and urban city-dwellers. The Autumn Term will explore the relationship between nature and culture, drawing on classic and contemporary debates about human difference and similarity. The term is divided into three blocks: 1) Culture, fieldwork and history; 2) Becoming people; 3) Bodies and Difference. Some questions considered during the term may include:

What distinguishes social anthropology from other social science disciplines? What does 'thinking like an anthropologist' involve? What is 'culture', and how are anthropological concerns shaped by the particular history and method of the discipline? How does language shape thought and action? How do societies 'make' the individuals of which they are composed? Why are human life stages so often characterised by rituals, and what do these rituals reveal about understandings of life? What does it mean to be a 'person' in society? How are bodily differences between people thought about in different contexts? How does culture shape our bodies and the health of those bodies?

The Winter Term will address different kinds of relations between and among people, animals and things, and how these are mediated in different ways. The term is also divided into three blocks: 1) Relations, 2) Place, 3) Technology. Some questions considered during the term include:

Is it valid to distinguish between people and things? What are the politics of human animal relations? To what extent is place a product of power? Can people only be dispossessed of material belongings? In what ways does technology mediate and reinvent expressions of race and racism? Do infrastructures only become visible on breakdown?

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of both the AT and WT.

Formative coursework: Students are expected to prepare

discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit one tutorial essay for this course to their academic mentor in the AT and one in the WT. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher in the AT and in the WT.

Indicative reading: M Engelke, *Think Like an Anthropologist* (2017)
R Astuti et al (eds.), *Questions of Anthropology* (2007)

M Carrithers, *Why Humans Have Cultures* (1992)

T Eriksen, *Small Places, Large Issues: An Introduction to Social and Cultural Anthropology* (2001)

M Bloch, *Prey into Hunter* (1996)

L Tuhiwai Smith *Decolonizing Methodologies: Research and Indigenous Peoples* (1999)

B Larkin, *Signal and Noise: Media, Infrastructure, and Urban Culture in Nigeria* (2008)

R. Govindrajan, *Animal Intimacies: Interspecies Relatedness in India's Central Himalayas* (2018)

K. Stewart, *A Space on the Side of the Road: Cultural Poetics in an "Other" America* (1996)

Assessment: Essay (50%, 2500 words) in the WT.
Essay (50%, 2500 words) in the ST.

AN101

A History of Anthropological Theory

This information is for the 2023/24 session.

Teacher responsible: Dr Johannes Steinmuller and Prof Alpa Shah

Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BSc in Politics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course discusses important aspects of anthropological theory in relation to ethnographic research. It covers the development of anthropological thought from the second half of the 19th century to today. Anthropology is situated within its context, including the social conditions of scholarship, as well as the histories of empires, nation-states, and capitalism. The course is intended to give students a sound grasp of central theoretical concepts and of their significance for empirical research.

Teaching: 10 hours of lectures and 10 hours of classes in the AT.
10 hours of lectures and 10 hours of classes in the WT.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of both AT and WT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes. Anthropology students taking this course will have an opportunity to submit one tutorial essay for this course to their academic mentor in the AT and one in the WT. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher in the AT and in the WT.

Indicative reading: Alan Barnard, *History and Theory in Anthropology*; Matthew Engelke, *Think Like an Anthropologist*; Adam Kuper, *Anthropology and Anthropologists*; George W. Stocking, *Observers Observed: Essays on Ethnographic Fieldwork*. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

AN102

Ethnography through Mixed Media

This information is for the 2023/24 session.

Teacher responsible: Dr Andrea Pia and Dr Mayanka Mukherji

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BSc in Politics. This course is not available as an outside option nor to General Course students.

Course content: This course provides training in the reading and interpretation of multimodal anthropology (with a focus on text, photography, film, sound, and games). It introduces students to detailed, holistic study of social and cultural practices within specific geographic and historical contexts and develops skills in bringing together the various elements of cultural and social life analysed by anthropologists. By the end of each term, successful students will have both a detailed knowledge of three important texts and media and have a rounded view of the three settings studied.

They will also have developed the capacity to think critically about ethnographic writing and filmmaking, and about anthropological engagements with other media such as games, photography, and sound. In addition, the course aims to enable students to examine in detail the process by which ethnographic media are produced through the close analysis of three book-length ethnographic accounts (or the equivalent) in the AT and by providing students with practical training in the production of photo, audio, and video materials in the WT. Students will study a film (or other visual or auditory material) associated with each text or topic each term.

In the AT, students will be required to read the three full set monographs, approximately a third of each monograph (two-four chapters) each week. In the WT, students will be required to read two to three academic chapters or articles each week (with more time given to practical work). It will be essential to do this in order to pass this course. The emphasis in classes and seminars will be on developing students' abilities to read and analyse texts, and to compare and contrast them to other material offered on the course. Supplementary readings or viewings may be provided during the term.

In the AT, students will be provided with basic training in coming up with a research project, taking photographs, recording audio, and shooting video. In the WT, students will be provided with basic training in ethics and risk and in post-production in photography, sound, and film. Over the course of the two terms, students will then be required to work in groups to develop their own media projects. This will be facilitated by a series of basic tasks to take photographs, record audio, shoot video, and work together to edit these into multimedia pieces.

Teaching: In the AT, there are 17 hours of lectures (of which 9 hours are multimedia sessions), 4.5 hours of seminars, 7 hours of classes, and 3 hours of practical training sessions.

In the WT, there 9 hours of lectures (of which 6 hours are multimedia sessions), 3 hours of seminars, 8 hours of classes, and 6 hours of practical training sessions.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of both AT and WT.

The practical training sessions will be run in collaboration with Darren Moon, Senior Learning Technologist of the Eden Centre for Education Enhancement at the LSE.

Formative coursework: Students will have the opportunity to submit up to four position pieces (two position pieces in the AT and two position pieces in the WT). Only the three position pieces with the highest marks will count towards the student's final grade for the course. Students are not required to submit all four position pieces but are encouraged to do so to allow one position piece to count as formative coursework.

Indicative reading: Detailed reading lists (including this year's set texts) will be provided at the beginning of the course.

For a general introduction to issues covered in the course, see the following:

- Engelke, M., ed. 2009. *The Objects of Evidence: Anthropological Approaches to the Production of Knowledge*. Oxford: Wiley-

Blackwell.

- Cox, R., Irving, A., and Christopher Wright. 2016. *Beyond text? Critical practices and sensory anthropology*. Manchester: Manchester University Press.
- MacDougall, D. 2006. *The Corporeal Image: Film, Ethnography, and the Senses*. Princeton University Press.
- Grimshaw, A., and A. Ravetz. 2009. *Observational Cinema: Anthropology, Film, and the Exploration of Social Life*. Bloomington: Indiana University Press.
- MacDonald, S. 2013. *American Ethnographic Film and Personal Documentary: The Cambridge Turn*. Berkeley: University of California Press.
- Marcus, G. E., and M. M. J. Fischer. 1986. *Anthropology as Cultural Critique: An Experimental Moment in the Human Sciences*. Chicago: University of Chicago Press.
- Wolf, M. 1992. *A Thrice-Told Tale: Feminism, Postmodernism, and Ethnographic Responsibility*. Stanford: Stanford University Press.

Assessment: Coursework (100%, 4500 words) in the AT and WT. All students will produce a portfolio of position pieces (worth 100% of the total mark), submitting a total of two position pieces in the AT and two position pieces in the WT. Position pieces should refer to the media (including text) covered on the course and relate these to the cycles covered in the lectures and classes. In the WT, students should also refer to their own photo, audio, or video productions in their position pieces. Portfolios will be assessed periodically throughout the year, with the final grade determined after the end of Winter Term.

Students who submit fewer than three position pieces will receive a mark of zero for each missed assessment. The overall mark will be the average of the three position pieces with the highest grades, including any zeroes for missed assessments.

Students who submit at least one position piece and fail the course will be expected to add to their portfolio at resit in order to achieve a pass.

Students who do not submit any position pieces (0 out of 4), will be awarded a Zero Absent for the whole course and cannot be awarded the degree until they submit sufficient work at resit to complete the course.

AN1E0 Half Unit Not available in 2023/24

Being Human: Contemporary Themes in Social Anthropology (Anthropology Exchanges)

This information is for the 2023/24 session.

Teacher responsible: Dr Gisa Weszkalnys

Availability: This course is available on the Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is not available as an outside option nor to General Course students.

Course content: This course provides a general introduction to Social Anthropology as the comparative study of human societies and cultures. Students will be introduced to key themes and debates in the history of the discipline. Ethnographic case studies will be drawn from work on a variety of societies, including hunter-gatherers, farmers, industrial labourers, and urban city-dwellers. The Lent Term will address the different types of relations people have with other beings, with places, and with a variety of technologies and infrastructures, and what how these are mediated by and produce forms of power, identity, and differences. The term is also divided into three blocks: 1) Relations, 2) Place, 3) Technology. Some of the questions considered during the term include:

Is it valid to distinguish between people and things? What are the politics of human animal relations? To what extent is place a product of power? Can people only be dispossessed of material belongings? In what ways does technology mediate and reinvent expressions of race and racism? Do infrastructures only become visible on breakdown?

Teaching: 10 hours of lectures and 10 hours of classes in the WT. This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit one tutorial essay for this course to their academic mentor in the WT. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher in the WT.

Indicative reading: M Engelke, *Think Like an Anthropologist* (2017) R. Govindrajana, *Animal Intimacies: Interspecies Relatedness in India's Central Himalayas* (2018)

Assessment: Essay (100%, 2500 words) in the ST.

AN200

The Anthropology of Kinship, Sex and Gender

This information is for the 2023/24 session.

Teacher responsible: Dr Teodor Zidaru-Barbulescu

In the Autumn Term this course will be co-taught by Dr Teodor Zidaru and Professor Sylvia Yanagisako.

In the Winter Term this course will be taught by Dr Mareike Winchell.

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an examination of the cultural frameworks and social aspects of kinship systems, gender roles, personhood and human sexuality, analysed through ethnographic examples from a diverse range of settings. It aims to equip students with the analytical tools to engage in theoretical debates concerning core concepts such as 'kinship', 'marriage', 'gender', 'sex', 'the person', and the relationship between 'nature' and 'culture', as well as exploring how the experiences of kinship, sex and gender vary according to the regimes of politics, law and materiality in which they are embedded. The course charts the history of anthropological debates on kinship, relatedness, sex and gender, and familiarises students with a range of contemporary approaches to these themes, placing ethnographic materials into a critical dialogue with recent developments in feminist theory, queer theory, the anthropology of colonialism, cognitive science, and psychoanalysis.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of both AT and WT.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 essay in the WT.

Indicative reading: Carsten, J. *After Kinship* (2003); Chodorow, N. *The Power of Feelings: Personal Meaning in Psychoanalysis, Gender and Culture* (1999); Donnan, H. and Magowan, F. *The Anthropology of Sex* (2010); Levi-Strauss, C. *The Elementary Structures of Kinship* (1969); Moore, H. L. *A Passion for Difference: Essays in Anthropology and Gender* (1994); Schneider, D. *A Critique of the Study of Kinship* (1984); Stone, L. *Kinship and Gender: An Introduction* (2006).

Assessment: Essay (50%, 3000 words) in the WT. Essay (50%, 3000 words) in the ST.

AN205 Half Unit Not available in 2023/24**The Anthropology of Melanesia****This information is for the 2023/24 session.****Teacher responsible:** Dr Michael W. Scott, OLD 1.17

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to selected themes in the anthropology of the region in the Southwest Pacific Ocean known as Melanesia. It gives students a grounding in the contemporary anthropology of the region, primarily through a close reading of three book-length ethnographies.

The three ethnographies, which are all new since 2013, are Christopher Wright's *The Echo of Things*, an account of what photography means to people in the western Solomon Islands; Alice Street's *Biomedicine in an Unstable Place*, an analysis of how persons and diseases are made visible or invisible in a hospital on the north coast of Papua New Guinea; and Maggie Wilson's *A True Child of Papua New Guinea* (edited by Rosita Henry), the part-memoir/part-ethnographic biography of a woman who lived between 'two worlds', that of her mother, a New Guinea Highlander, and that of her father, an Australian colonist.

These ethnographies not only provide students with focused accounts of three very different contexts in Melanesia, they also address histories, dynamics, and concerns familiar to people living throughout the region. Furthermore, because the three authors draw on different intellectual antecedents and disciplinary traditions, their work provides an entree into the most influential theoretical debates animating Pacific anthropology today.

Topics to be traced throughout the course include personhood and bodies, kinship and sociality, religion and cosmology, technology and infrastructure, belonging and development, globalization, and the state. Engagement with these three books will be enhanced and supplemented by other readings (including works by Pacific Islanders), ethnographic films, and a visit to the British Museum.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Christopher Wright, *The Echo of Things: The Lives of Photographs in the Solomon Islands* (2013); Alice Street, *Biomedicine in an Unstable Place: Infrastructure and Personhood in a Papua New Guinean Hospital* (2014); Maggie Wilson (edited with additions by Rosita Henry), *A True Child of Papua New Guinea: Memoir of a Life in Two Worlds* (2019).

Assessment: Essay (100%, 3000 words) in the ST.

The assessed essay must be between 2,500 – 3,000 words in length.

AN221 Half Unit Not available in 2023/24**The Anthropology of Christianity****This information is for the 2023/24 session.****Teacher responsible:** Dr Fenella Cannell OLD 5.07

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This course is intended for second and third year anthropologists, therefore students normally have at least one year's foundational anthropology. External students are welcome to join the course and often do so; depending on disciplinary background, external students may benefit from some additional contextual reading (please consult the course teacher.)

Course content: The ethnography of local Christianities in the light of differing cultural and social situations including colonial conditions. The relationship between Christianity and the discipline of anthropology. The course will examine a number of anthropological and historical studies of local forms of Christianity, from a range including local forms of Catholicism, Mormonism, contemporary and historical Protestantisms including American Protestant forms and 'heretical' and other unorthodox Christianities. The course asks why anthropologists shied away from analysing Christianity long after studies of other world religions, such as Islam, Hinduism and Buddhism, had become widely established. It looks at the relationship between Christianity and the history of anthropological thought, and locates the place of Christianity in the writings of Mauss, Durkheim, Foucault and others, in order to defamiliarise the religion which Europeans and Americans especially often take for granted. Issues examined may include the nature and experience of belief, conversion and the appropriation of Christian doctrines by local populations, the problems of writing about religion, Christianity and the state, the nature of religious confession, Christian texts, and Scriptural reading practices, Christian objects and materialities, Christianity and women's religious and social experience (from Medieval women mystics to women priests), inquisitions and heretical beliefs, priests and alternative forms of mediation with divine power, miraculous saints, incorrupt bodies and 'non-eaters' and changing ideas about death, Heaven and Hell. Where possible, the course will include a student fieldwork weekend and forms of reflection and reporting on that experience. Please check with the course teacher in any given year whether this is planned as part of the year's programme.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. There will be a reading week in Week 6 of the LT.

Formative coursework: Students will be expected to produce one essay in the LT.

Indicative reading: M Bloch, *From Blessing to Violence: History and Ideology in the Circumcision Ritual of the Merina of Madagascar*; F Cannell, *Catholicism, Spirit Mediums and the Ideal of Beauty in a Bicolano Community, Philippines* (PhD thesis, University of London); W Christian, *Person and God in a Spanish Valley* (reprint 1988); J Comaroff, *Body of Power, Spirit of Resistance*; J de Pina Cabral, *Sons of Adam, Daughters of Eve: the Peasant World View in the Alto Minho*; R Iletto, *Pasyon and Revolution: Popular Movements in the Philippines, 1840-1910*; J Nash, *We Eat the Mines and the Mines Eat us: Dependency and Exploitation in Bolivian Tin Mines*; M Taussig, *The Devil and Commodity Fetishism in South America*. Detailed reading lists are provided at the beginning of the course.

Assessment: Essay (100%, 3000 words) in the ST.

AN223 Half Unit**The Anthropology of Southeast Asia****This information is for the 2023/24 session.****Teacher responsible:** Dr Christopher Chaplin

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course

students.

Course content: The region of Southeast Asia has made a major contribution to the anthropological and ethnographic study of religion, gender, identity, violence, environmentalism, and state sovereignty. This course aims to introduce students to ethnographic materials and theoretical topics pertaining to society and culture within the region. In providing a strong grounding in regionally based empirical studies, the course will offer students the tools to critically evaluate anthropological contributions to understanding Southeast Asia, and to consider what role the region and Southeast Asians play in broader theoretical debates within the discipline.

Course Topics: The course will examine how anthropology contributes to and responds to interpretative challenges relating to:

1. Imagining Southeast Asia
2. Power, Potency and Puppetry
3. Anarchy, Egalitarianism and Entangled Freedoms
4. Violence, Memory, and Absence
5. Piety and Ritual: Manifestations of Global Religion
6. Gender Pluralism
7. Development: Spectres of Modernity
8. Democratic Imaginaries and Authoritarian Turns
9. Southeast Asia's Periphery: Belonging, Statelessness and Liminality
10. Southeast Asia and the World

Intended Learning Aims/Outcomes

The course is intended to familiarise students to the diversity of cultures and social systems in Southeast Asia. By the end of the course, students will be expected to be familiar with key topics and theoretical debates in the anthropological study of the region, including ideas of power, freedom, violence and memory, gender & sexuality, religion & ritual, ecology, capitalism, democracy and belonging. Additionally, the course aims to enable students to discuss and appraise the major debates stemming from anthropological research in Southeast Asia, and be equipped to consider the extent to which such research might be applied and relevant to other regions of the world.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. Film screenings will also take place throughout the term. There is a reading week for this course in Week 6 AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: Useful histories of Southeast Asia / Southeast Asian anthropology

M.C. Ricklefs, B. Lockhart, A. Lau, P. Reyes, and M.A. Thwin, *A New History of Southeast Asia* (2010);

V.T. King and W.D. Wilder, *The Modern Anthropology of South-East Asia: An introduction* (2003).

E. Thompson and V. Sinha, *Anthropology in Southeast Asia: National Traditions and Transnational Practices* (2019).

Ethnographies

Barker, J., E. Harms, and J. Lindquist, eds. 2014. *Figures of Southeast Asian Modernity*. Honolulu: University of Hawai'i Press.

Hinton, A. L. 2005. *Why Did They Kill? Cambodia in the Shadow of Genocide*. Berkeley: University of California Press.

Langford, J. M. 2013. *Consoling Ghosts: Stories of Medicine and Mourning from Southeast Asians in Exile*. Minneapolis: University of Minnesota Press.

Long, N. J. 2013. *Being Malay in Indonesia: Histories, Hopes and Citizenship in the Riau Archipelago*. Copenhagen: NIAS Press.

Peletz, M. G. 2009. *Gender Pluralism: Southeast Asia since Early Modern Times*. London & New York: Routledge.

Schwenkel, C. 2009. *The American War in Contemporary Vietnam: Transnational Remembrance and Representation*. Bloomington: Indiana University Press.

Scott, J. C. 2009. *The Art of Not Being Governed: An Anarchist History of Upland Southeast Asia*. New Haven & London: Yale University Press.

Sloane, P. 1999. *Islam, Modernity and Entrepreneurship among the Malays*. Basingstoke: Macmillan.

Detailed reading lists are provided at the beginning of the course.

Assessment: Coursework (100%, 3000 words) in the WT. Students will be asked to write a 3,000 word essay.

AN226

Political and Legal Anthropology

This information is for the 2023/24 session.

Teacher responsible: Dr Harry Walker and Dr Mukulika Banerjee

Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available on the Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne), Exchange Programme for Students in Anthropology (Tokyo) and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The anthropological analysis of political and legal institutions as revealed in relevant theoretical debates and with reference to selected ethnography. The development of political and legal anthropology and their key concepts including forms of authority; forms of knowledge and power; political competition and conflict; colonial transformation of indigenous norms; folk concepts of justice; the theory of legal pluralism; anthropological engagements with human rights.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of AT and WT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes, and to submit one essay in the AT and one mock exam question in the WT to their class teacher on which they will receive formative feedback.

Indicative reading: Appadurai, A, 2006, *Fear of small numbers: an essay on the geography of anger*; Blok, A, 1988, *The Mafia of a Sicilian Village 1860-1960: a study of violent peasant entrepreneurs*; Bryant, R, & Reeves, M, 2021, *The Everyday Lives of Sovereignty*; Clastres, P, 1987, *Society against the state: essays in political anthropology*; Mbembe, A, 2001, *On the Postcolony*; Navaro, Y, 2021, *The make-believe space: affective geography in a postwar polity*; Englund, H, 2006, *Prisoners of Freedom: Human Rights and the African Poor*; Moore, S F, 1978, *Law as Process*; Malinowski, B, 1916, *Crime and Custom in Savage Society*; Foblets, M. Goodale, M. Sapignoli, M. and Zenker, O. (eds.) 2020, *The Oxford Handbook of Law and Anthropology*.

Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

AN237 Half Unit

The Anthropology of Development

This information is for the 2023/24 session.

Teacher responsible: Prof Katherine Gardner

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course explores how anthropologists have evaluated, criticised and contributed to development. Focussing

on both 'Big D' development (schemes of improvement or projects) and 'little d' development (change which occurs as the result of economic growth or modernisation) the course shows how anthropological insights have been used to change practices from within as well as critique development from the outside. From anthropological work which seeks pragmatic engagement to that which deconstructs development as an oppressive and power laden discourse, the course aims to give students a broad background to the field. Topics covered include the role of the state; local politics and power relations; gender and empowerment; development as discourse and 'aidnography'; neo liberalism and global capital; corporate social responsibility; markets and micro credit; and the relationship between 'tradition' and modernity. Throughout, the course will draw upon a broad range of ethnographic examples.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of AT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes based on the core ethnographies covered in the course. Formative work will include a mock exam question.

Indicative reading: Gardner and Lewis 2015, Anthropology and Development: Twenty First Century Challenges; Ferguson, J. 1990 The Anti-Politics Machine: Development, Depoliticisation and Bureaucratic Power in Lesotho; Cambridge University Press; Li, T, 2014 Land's End: Capitalist Relations on an Indigenous Frontier; Karim, L., 2011 Micro-Finance and its Discontents: Women and Debt in Bangladesh; Elyachar, J. 2005; Markets of Dispossession: NGOs, the Market and the State in Cairo; Scherz, C. 2014. Having People, Having Heart: Charity, Sustainable Development, and Problems of Dependence in Central Uganda; Scott, J. 1998, Seeing Like a State: How Certain Schemes to Improve the Human Condition have Failed.

Detailed reading lists are provided at the beginning of the course.

Assessment: Take-home assessment (100%) in the period between AT and WT.

AN240 Half Unit Not available in 2023/24

Investigating the Philippines - New Approaches and Ethnographic Contexts

This information is for the 2023/24 session.

Teacher responsible: Dr Fenella Cannell OLD 6.07

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is most suitable for second and third year students but interested first year external students may seek an exemption. Also available to General Course students.

Course content: This course offers the chance to look at the ethnography of one country in more detail than is usual for regional courses. It considers topics taken from the ethnography of the lowland and highland Philippines, with a focus on exciting new high quality writing, drawing on the recent renaissance in Philippine Studies. The course will balance works by expert non-Filipino ethnographers with the new writing of 'native ethnographies' by Filipino scholars resident both in the Philippines themselves and in the US. The course will be framed within the colonial, religious and social history of the archipelago, and will consider both new interpretations of Philippine history, and topics on contemporary social issues, as well as using classic works on the Philippines. Teaching each week will normally be organised around the reading

of one outstanding ethnography, allowing students to look closely at particular cases. Topics in any year are likely to be drawn from the following list (although obviously only ten topics can be offered in one year); Migration, 'mail-order' brides, and the Philippine diaspora; New religious movements: Philippine colonialism and the processes of conversion: Healing, spirit possession, midwifery and local medicine: The contemporary Catholic Church; Violence in the Philippines; Ecology, landscape and environmental politics: Kinship and its transformations; Gender, Philippine queer theory and Philippine transvestitism: Ritual, drama and local performance traditions: Philippine architecture and material culture.: Philippine cinema: Colonial politics, tribal politics and issues of self-representation: Magic, sorcery and "anitismo"; Tourism, symbolic economies and the impact of international capitalism.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. There will be a reading week in Week 6 of the WT.

Formative coursework: Students are expected to prepare discussion material for classes/seminars. Students taking this course will be expected to produce one essay in the LT.

Indicative reading: Selected/ indicative texts: Renato Rosaldo Ilongot Headhunters; Vicente Rafael Contracting Christianity; Fenella Cannell Power and Intimacy in the Christian Philippines; Sally-Ann Ness Where Asia Smiles; Heather L. Claussen, Unconventional Sisterhood; J.Neil C. Garcia Philippine Gay Culture: the Last Thirty Years; M. F. Manalansan Global Divas: Filipino Gay Men in the Diaspora; Vicente Rafael White Love and Other Events in Filipino History; Evelyn Tan Culleman Babaylanism in Negros; Benito M Vergera Displaying Filipinos: Photography and Colonialism in Early 20th Century Philippines; Renaldo Clemena Iletto Pasyon and Revolution; K.F. Wiegele, Investing in Miracles: El Shaddai and the Transformation of Popular Catholicism in the Philippines; Nicole Constable Maid to Order in Hong Kong; Albert Alejo Generating Energies in Mount Apo: Cultural Politics in a Contested Environment; Catherine Ceniza Choy Empire of Care: Nursing and Migration in Filipino American History; Esther C.M. Yau and Kyung Hyun Kim Asia/Pacific Cinema; Caroline S. Hau, Necessary Fictions; Philippine Literature and the Nation. Detailed reading lists are provided at the beginning of the course.

Assessment: Essay (100%, 3000 words) in the WT.

Students will complete written work on one or more topics from the course, with a total word count of 3,000 words. Specific guidance and advice will be given during the course but for example, students may choose to pursue one topic in depth and with the use of additional and external materials, or to write on two topics more closely related to the course work and course outline. Further guidance and a range of suggested topics and questions will be provided during the course.

AN243 Half Unit Not available in 2023/24

Children and Youth in Contemporary Ethnography

This information is for the 2023/24 session.

Teacher responsible: Prof Catherine Allerton OLD 6.13

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should normally have completed an introductory course in anthropology unless granted exemption by the course teacher.

Course content: This course explores the paradoxes and contexts of social science work on children and youth through an intensive focus on contemporary ethnographies exploring children's social

worlds. This ethnographic work is multi-disciplinary (emerging from anthropology, geography, sociology, media studies), and builds both on earlier ethnographies of childhood from the mid-twentieth-century onwards, and on growing theoretical interest in cross-cultural understandings of 'the child' and their competencies. In the first half of the course, we investigate 5 central paradoxes that emerge through a consideration of children and childhood. These are: 1) Universal/ Constructed; 2) Being/ Becoming; 3) Structure/ Agency; 4) Protection/ Participation; and 5) Representation/ Reality. These paradoxes allow us to consider important questions such as: What does it mean to see childhood as a 'construction'? How has ethnographic work questioned universal frameworks for child development? How should we understand children's agency? How successfully can 'child rights' be achieved in different cultural contexts? Why should children's perspectives be taken more seriously in the social sciences? In the second half of the course, we turn to 5 key contexts for ethnographic analyses of children's lives. These are: the street, school, work, play and war. How have the lives of 'street children' been approached and understood? What do critical ethnographies of schooling tell us about its role in reproducing inequalities? What, if anything, is the difference between beneficial child work and harmful 'child labour'? How can we recognise and theorise children's play? And how have ethnographic accounts documented both trauma and resilience in the context of 'child soldiering'?

Teaching: 10 hours of lectures and 10 hours of classes in the WT. This course has a reading week in Week 6 of the LT. Film screenings in the Lent Term.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: RA Levine and RS New (eds) 2008.

Anthropology and child development: a cross-cultural reader; N Scheper-Hughes and C Sargent (eds) 1998. *Small wars: the cultural politics of childhood*; KF Olwig and E Gulløv (eds) 2003. *Children's Places: Cross-cultural perspectives*; D Durham and J Cole (eds) 2006. *Generations and globalization: youth, age and family in the new world economy*; M Liebel. 2004. *A will of their own: cross cultural perspectives on working children*; V Amit-Talai and H Wulff (eds) 1995. *Youth cultures: a cross-cultural perspective*; A James. 1993. *Childhood identities: self and social relationships in the experience of the child*; J Boyden and J de Berry (eds) 2004. *Children and youth on the frontline: ethnography, armed conflict and displacement*; BA Levinson, DE Foley and DC Holland (eds) 1996. *The cultural production of the educated person: critical ethnographies of schooling and local practice*; H Montgomery. 2009. *An introduction to childhood: anthropological perspectives on children's lives*.

Assessment: Essay (100%, 3000 words) in the ST.

AN245 Half Unit Not available in 2023/24

Borders and Boundaries: Ethnographic Approaches

This information is for the 2023/24 session.

Teacher responsible: Prof Mathijs Pelkmans OLD 5.08

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: How do territorial borders influence human behaviour and thinking, and how, in turn, do people create, manage, and manipulate such borders? These questions have become pressing with the intensification and politicisation of global interconnectedness. While a few decades ago the tearing down of the Berlin Wall seemed to herald a border-less world, today's the

loudest politicians promise to create "huge, great, great, beautiful walls." This course studies the numerous tensions accompanying global interconnectedness. Why is it so difficult to make borders impermeable? How do smuggling networks operate? What does the world look like from the perspective of undocumented migrants? What are the effects of new border fortification technologies? What is it like to live in a gated community? Are people boundary-drawing creatures? Why do borders play a central role in images of utopia? Why is it silly yet productive to ask: where is the border between Europe and Asia? These and other questions will be discussed by situating ourselves ethnographically in the borderlands, potentially making us realise that "the frontier is all around us."

Teaching: 10 hours of lectures and 10 hours of classes in the AT. This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected.

This course has a reading week in Week 6 of MT.

Formative coursework: Students are expected to prepare discussion materials for presentation in the classes. Students will be expected to produce 1 essay in the MT.

Indicative reading:

- Andersson, R. (2014). *Illegality, Inc.: Clandestine migration and the business of bordering Europe*;
- Berdahl, D. (1999). *Where the world ended: Re-unification and identity in the German borderland*;
- Hastings, D., and T. Wilson (1999). *Borders: Frontiers of identity, nation and state*;
- Khosravi, S. (2010). *'Illegal' traveller: an auto-ethnography of borders*;
- Low, S. (2004). *Behind the gates: Life, security, and the pursuit of happiness in fortress America*;
- Pelkmans, M. (2006). *Defending the border: identity, religion, and modernity in the Republic of Georgia*;
- Reeves, M. (2014). *Border work: spatial lives of the state in rural Central Asia*.

Assessment: Take-home assessment (100%) in the AT.

The take home exam will be held the week following the end of the MT.

AN250 Half Unit Not available in 2023/24

The Anthropology of South Asia

This information is for the 2023/24 session.

Teacher responsible: Dr Rebecca Bowers

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: You are required to be enrolled in a degree programme at LSE in which you are trained to write essays and read qualitative research. You may be asked to submit written work to determine your ability for this course.

Course content: This course will aim to address issues of citizenship, inequality and social justice, religious faith and practices, migration and labour and consumption patterns in rural and urban South Asia. The course will cover both classic and current literature and weekly sessions will be organised thematically. South Asia is an ideal setting to examine many paradoxes that exist elsewhere - alongside some of the highest rates of economic growth there is growing inequality, there is a growing middle class but high rates of precarious poverty, the countries remain largely rural yet they will hold the largest urban population in the world in less than ten years and so on. In order

to understand these paradoxes, it is essential that issues of macro economic policy, social inequality, infrastructural development, political mobilisation and popular culture, mobilisation along religious lines in each country and the rise of the 'threatened majorities' that behave like minority populations - be examined in greater detail. Using a rich body of anthropological research on South Asia, this course will examine several of these issues and more in this course. The literature on India is the largest available but every attempt will be made to cover the anthropological literature on Pakistan, Nepal, Sri Lanka and Bangladesh alongside.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. This course will have a series of optional online film screenings in the MT. The course has a reading week in Week 6 of the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Please read at least TWO of the following background readings before the start of the course and certainly by the end of the second week of the course: Sunil Khilnani, *The Idea of India*; Ramachandra Guha, *India After Gandhi*; Corbridge, S. and Harris, J., *Reinventing India: Liberalization, Hindu Politics and Popular Democracy*; Rana Dasgupta, *Capital: The Eruption of Delhi*; Ammara Maqsood, *The New Pakistani Middle class*; Delwar Hussain, *Boundaries Undermined: The ruins of progress on Bangladesh-India Border*

Fiction: Vikram Seth, *A Suitable Boy*; Rohinton Mistry, *A Fine Balance*; Bapsi Sidhwa, *Ice Candy Man*; Neel Mukherjee, *The Lives of Others*; Daniyal Mueenuddin, *In Other Rooms, Other Wonders*; Arundhati Roy, *The God of Small Things*; Saadat Hasan Manto, *Toba Tek Singh*: Stories

You will be required to present your thoughts on the background readings you have done in Week 2 class/seminar.

Assessment: Take-home assessment (100%) in the AT.

The take home exam will be held the week following the end of the MT.

AN256 Half Unit

Economic Anthropology (1): Production and Exchange

This information is for the 2023/24 session.

Teacher responsible: Ms Agathe Faure

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: What is the economy? We will explore how the history of capitalism has been inextricably tied to producing an idea of the economy as a distinctive domain of life and how anthropologists have persistently challenged this understanding, showing how economic life is inextricably tied to religion, politics and kinship, for instance. We will show the radical possibilities of social relations that anthropologists have offered by studying communities that appear to be 'the original affluent society', seemingly not affected by capitalist societies, or incorporated on their own terms. At the same time, we will examine the impact of capitalism and the inequalities it has brought on diverse people around the world, looking at the role of colonialism and empire, industrialisation and neoliberalisation, which includes regimes of production, accumulation and dispossession. Central to our examination will be understanding processes and experiences of exploitation, oppression and domination. We will unveil the invisible work of the many that is never valued but gets hidden in precarity, by migration regimes and within households. We will highlight the

ways in which gender, race, ethnicity, caste and class need to be central to any analysis of the economy. At all times, we will look for people's creative responses to the situations they find themselves in, whether it is through acquiescence, reincorporation, religious conversion, weapons of the weak or outright rejection and revolt.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 1 hour of lectures in the ST.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of AT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

Indicative reading:

A few ethnographies to whet your appetite: Bronislaw Malinowski (1964) *Argonauts of the Western Pacific*; Marshall Sahlins (1974) *Stone Age Economics*; Marcel Mauss (1990 [1925]) *The Gift: the form and reason for exchange in archaic societies*; Sidney Mintz (1985) *Sweetness and Power: The Place of Sugar in Modern History*; June Nash (1979) *We Eat the Mines and the Mines Eat Us: dependency and exploitation in Bolivia's tin mines*; Michael Taussig (1980) *The Devil and Commodity Fetishism in South America*; Jonathan Parry (2020) *Classes of Labour in a Central Indian Steel Town*; Maria Mies (1982) *The Lace Makers of Narsapur: Indian Housewives produce for the World Market*; Carol Stack (1974) *All Our Kin*; Claude Meillassoux (1981) *Maidens, Meat and Money: capitalism and the domestic community*; Jan Breman (1974) *Patronage and Exploitation: changing agrarian relations in South Gujarat India*; Alpa Shah, Jens Lerche, Richard Axelby, Brendan Donegan, Dale Benbabaali, Jayaseelan Raj and Vikramaditya Thakur (2018) *Ground Down by Growth: Tribe, Caste, Class and Inequality in 21st Century India*; Tania Murray Li (2014) *Land's End: Capitalist Relations on the Indigenous Frontier*.

A few general overview texts: James G. Carrier and Don Kalb (eds) (2015) *Anthropologies of Class: Power, Practice, and Inequality*; Richard Wilk and Lisa Cliggett (1996) *Economics and Cultures: Foundations of Economic Anthropology*; James Carrier (ed) (2005) *A Handbook of Economic Anthropology*

Other general introductory texts: Stephen Gudeman (2001) *The Anthropology of Economy*; Chris Hann and Keith Hart (2011) *Economic Anthropology*; Susana Narotzky (1997) *New Directions in Economic Anthropology*; Jonathan Parry and Maurice Bloch (Eds) (1989), *Money and the Morality of Exchange*; Stuart Plattner (ed) (1989) *Economic Anthropology*; James Carrier (2019) *A Research Agenda for Economic Anthropology*.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

AN269 Half Unit Not available in 2023/24

The Anthropology of Amazonia

This information is for the 2023/24 session.

Teacher responsible: Dr Harry Walker OLD 5.06B

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology.

Course content: The course will introduce students to selected themes in the anthropology of Amazonia. It will provide a grounding in the ethnographic literature of the region while seeking to engage with current theoretical debates, highlighting their potential importance to the discipline of anthropology. Topics to be covered include history, indigenous social movements; sexuality and gender; trade and inter-ethnic relations; politics and power;

illness, well-being and death. Students will be encouraged to reflect on the broader relationship between ethnography and theory, to challenge common stereotypes of Amazonia and its inhabitants, and to explore ways in which the region has inscribed itself on the imagination of anthropologists and laypersons alike.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. This course has a reading week in Week 6 of AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: Clastres, Pierre. 1987. *Society Against the State: Essays in Political Anthropology*.
Overing, Joanna. & Alan Passes (eds). 2000. *The Anthropology of Love and Anger: The Aesthetics of Conviviality in Native Amazonia*.
Walker, Harry. 2012. *Under a Watchful Eye: Self, Power and Intimacy in Amazonia*.
Descola, Philippe. 1994. In *the Society of Nature: A Native Ecology in Amazonia*.
Gow, Peter. 2002. *An Amazonian Myth and its History*.
Fisher, William H. 2000. *Rainforest Exchanges: Industry and Community on an Amazonian Frontier*.
Seeger, Anthony. 2004. *Why Suyá Sing: A Musical Anthropology of an Amazonian People*.
Gregor, Thomas. 1985. *Anxious Pleasures: The Sexual Lives of an Amazonian People*.
Lévi-Strauss, Claude. 1984. *Tristes Tropiques*.
Conklin, Beth. 2001. *Consuming Grief: Compassionate Cannibalism in an Amazonian Society*.
Assessment: Take-home assessment (100%) in the AT. The take home exam will be held the week following the end of the AT.

AN275 Half Unit Not available in 2023/24

The Anthropology of Revolution

This information is for the 2023/24 session.

Teacher responsible: Prof Alpa Shah OLD 6.17A

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Optional for BA/BSc Social Anthropology and BA Anthropology and Law. Also available to students on other degree programmes as an outside option, and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology (AN100 Introduction to Social Anthropology).

Course content: This course will focus on the study of revolution from an anthropological perspective. It will concentrate on three different types of revolutionary struggle, in three different continents, through three different types of ethnographies: the Zapatista indigenous movement in Mexico, the Zimbabwean anti-colonial struggle, and the Maoist movement in South Asia. In each case, students will be encouraged to critically consider the varying degrees of involvement of the anthropologist in the movements concerned, the theoretical premises of the anthropologists and how these affect the politics and ethics of writing. In this process, students will deepen their understandings of the theoretical debates around production and reproduction, social transformation, religion and secularism, activism and anthropology, and violence and ethics in radical social change. The course will demonstrate that although anthropologists were once criticised for 'missing the revolution' on their doorstep, in fact their long term engagement with communities who come to be affected by revolutionary struggles has much to offer to the theoretical and

practical work of radical social transformation.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: This course will be based on the close reading of the following three ethnographic monographs:

Earle, Duncan, & Simonelli, Jeanne. (2005). *Uprising of Hope: Sharing the Zapatista Journey to Alternative Development*. Walnut Creek: Altamira Press.
Lan, David. (1985). *Guns and Rain: guerrillas and spirit mediums in Zimbabwe*. Berkeley: University of California Press.
Shah, Alpa (2018) *Nightmarch: Among India's Revolutionary Guerrillas*. London: Hurst Publishers

Assessment: Take-home assessment (100%) in the WT. The take home exam will be held the week following the end of the LT.

AN276 Half Unit Not available in 2023/24

Anthropology and the Anthropocene

This information is for the 2023/24 session.

Teacher responsible: Dr Gisa Weszkalnys

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: In August 2016, scientists participating in the Anthropocene Working Group put forward an official recommendation to rename our present time interval 'the Anthropocene'. It postulates that humans now exert recognisable influences on the earth's bio- and geophysical systems sufficient to warrant the naming of a distinct geological epoch encompassing the earth's present, recent past, and indefinite future. The Anthropocene thus echoes contemporary anxieties about climate change, the deterioration of global ecologies, and other environmental crises on unprecedented scales, as well as humans' capacity to devise adequate solutions to the problems they face. The scholarly and popular debate on the Anthropocene has exploded in recent years, with anthropologists contributing both theoretical and important ethnographic insight into how people apprehend and deal with the repercussions of anthropogenic environmental change. It now seems that the continued successful existence of humanity on this planet will require us to live differently both with each other and with the earth: 'We will go onwards in a different mode of humanity or not at all' (Val Plumwood 2007).

In this course, we will approach the Anthropocene as a contested category, with evident political and ethical implications. We will begin by examining the dramatic changes in the relationship between humans and their natural environments brought about by industrialisation, specifically, the increased exploitation of natural resources as well as the production and use of fossil fuels on a large scale. We will attend to the practices and cosmologies of people who in their everyday lives – for example, by digging, polluting, and wasting – participate in the work of anthropogenic alterations, drawing on case studies from across the world. We will consider alternative labels, such as the Capitalocene, Plantationocene, Plasticene, Eurocene, Misanthropocene, and Neologocene, each of which tells a different origin story for what Donna Haraway has called 'the trouble'. However, we then move to ask whether the Anthropocene might be less a marker of an epochal transformation than a signal of a profound anti-political shift in discussions about the future of the planet. We will inspect the scientific and non-scientific controversies the Anthropocene

has provoked, and the particular forms of power, authority, reason, imagination, and subjectivity it has generated.

Students will be expected to engage with a variety of resources, including online publications, blogs, documentary and feature films, and other media, and an emergent interdisciplinary literature, spanning the social and natural sciences, which we will read in relation to a more long-standing engagement with the environment within the anthropological discipline. This will lead us to interrogate established binaries of human/nonhuman, subject/object, and nature/culture, and, significantly, to ask about the critical valence of anthropologists' enquiry into the 'anthropos' for an age so profoundly shaped by humans. What methods and modes of analysis are required to comprehend the diverse human/non-human interactions and seemingly incommensurable scales that the Anthropocene invokes? What types of collaboration, knowledge, and mutual care does an anthropocenic outlook make possible? How can we anchor the manifold theoretical proposals that have been put forward not just in ethnographic examples but also in our own 'experiments for living'?

Teaching: 7 hours of lectures, 7 hours of classes and 6 hours of workshops in the AT.

The course is comprised of three cycles of three weeks plus an additional, concluding week. Each cycle consists of two weeks taught in the traditional lecture/class format, and a third week with a two-hour workshop in a larger group. While the one-hour classes will focus on core readings set by the lecturer, the two-hour workshop will, in addition, offer space for viewing other resources (films, online material), discussing students independently researched material, student presentations, etc.

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the AT.

Indicative reading: N. Clark and B. Szerszynski (2020) *Planetary Social Thought: The Anthropocene challenge to the social sciences*
J. Cruikshank (2005) *Do Glaciers Listen? Local Knowledge, Colonial Encounters, and Social Imagination*

J. Salazar Parreñas (2018) *Decolonizing Extinction: The Work of Care in Orangutan Rehabilitation*
A. Tsing et al. (2017) *Arts of Living on a Damaged Planet*

Assessment: Essay (100%, 3000 words) in the WT.

AN277 Half Unit

Topics in the Anthropology of sub-Saharan Africa

This information is for the 2023/24 session.

Teacher responsible: Prof Deborah James

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

In deciding whether to admit students from the General Course and/or other departments, consideration will be given to

preliminary/general training in anthropology and/or cognate social science disciplines.

Pre-requisites: Students must have completed Being Human: Contemporary Themes in Social Anthropology (AN100) and A History of Anthropological Theory (AN101).

It is preferred that students will normally have done preliminary/first-year courses in Anthropology as noted above, but there is some flexibility (eg in the case of General Course students). Students should consult the course lecturer.

Course content: This course gives students a critical understanding of ethnographic and theoretical writing on sub-Saharan Africa. Grounded in some classic debates around tradition and modernity (kinship-based polities vs states; studies on occult knowledge vs rationally-oriented political economy approaches; 'objective' class vs forms of identification such as tribe or race), it explores questions about how the sub-continent's societies orient themselves, and respond to new precarities, in a postcolonial and neoliberal age. How are changing urban realities experienced and expressed in popular culture? How are the politics of land and belonging being reshaped? Do youth have a future of work in post-industrial Africa - and what new gender identities are they developing? Are there specifically African forms of knowledge? What is postcolonial about the 'postcolony'? Is Europe 'evolving towards Africa', as has been maintained? The course also thinks through the role of fiction, non-ethnographic writing and non-academic voices in shaping anthropology on the sub-continent.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. These contact hours are the minimum expected. This course has a reading week in Week 6 of AT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

This will consist of a formative review written during term time, to be evaluated by and discussed with the course lecturer.

The formative review will allow for students' individuality and expression and allow them to bring their own interest in current debates into interplay with course materials.

Indicative reading: Adebawale, Wale. 2017. *The Political Economy of Everyday Life in Africa: Beyond the Margins*. Oxford: James Currey.

Moore, H. L. 2013. *Still life: hopes, desires and satisfactions*. London, John Wiley & Sons.

Piot, Charles 1999. *Remotely Global: village modernity in West Africa*. Chicago: University of Chicago Press.

Assessment: Take-home assessment (100%) in the period between AT and WT.

AN280 Half Unit

Public Anthropology

This information is for the 2023/24 session.

Teacher responsible: Dr Andrea Pia

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

In deciding whether to admit students from the General Course and/or other departments, consideration will be given to preliminary/general training in anthropology and/or cognate social science disciplines.

Pre-requisites: Students must have completed Being Human: Contemporary Themes in Social Anthropology (AN100) and A History of Anthropological Theory (AN101).

It is preferred that students will normally have done preliminary/first-year courses in Anthropology as noted above, but there is some flexibility (e.g. in the case of General Course students). Students should consult the course lecturer.

Course content: What and how does anthropology contribute to public life? Do anthropologists have a responsibility to meaningfully contribute to communities beyond the academy that make the study of anthropology possible? This module explores the challenges, difficulties, and stakes of having ethnographic research encounter various publics, ranging from journalists, legal experts, and policymakers to activist groups, local populations, and other scholars. Students of this module engage critically with a variety of media (books, newspaper articles, documentaries, podcasts, social platforms and interactive digital tools) with a view of analysing the ways in which anthropological ideas are conveyed to broader audiences, reflecting on how to improve their representation and effectiveness, and proposing new ways of disseminating these ideas to different publics.

Teaching: 6 hours of lectures, 3 hours of seminars, 8 hours of classes and 12 hours of workshops in the WT.

The course is divided into ten weeks, consisting of a combination of lectures/movie workshops/classes. Each week students read excerpts from selected ethnographic texts across geographical areas that have spurred public interest for the sensitiveness of their subject matter or the questionability of their research ethics. Workshops introduce students to the public buzzes generated by these studies and ask them to reflect on the politics and situatedness of ethnographic research and on the relatability of its findings. In some of the seminars a 'local expert' will be present to serve as a resource in the discussion of the issues.

The focus of this module is on the relationship between anthropological theory, the power fields in which it is inserted and its diverse publics. The types of questions this module address are both of critical and applied nature: to what extent can ethnographic studies of the food production system, waste management and water and energy provisions make global social infrastructures fairer? To what extent structure/agency debates in anthropology (and cognate disciplines) may move public perceptions of criminality and marginality towards more sympathetic positions? How effective have ethnographic-based critiques of trickle-down economics and social mobility really been, and why? How can anthropological accounts of systemic inequality take root into public representations of otherness?

The course ends by examining recent anthropological proposals within academia for a more vocal and engaged anthropology. It asks student to critically reflect on whether the discipline's colonial past may still weigh on today's attempts at engaging new publics. What disciplinary benchmarks of successful engagement should anthropologists set up for their own scholarship?

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will have the opportunity to write a (unmarked) formative essay on a 'public issue' of their choosing and will be invited to discuss feedback during office hours.

Fassin, Didier 2013. *Enforcing Order: An ethnography of Urban Policing*. Blackwell's.

Assessment: Take-home assessment (100%) in the period between WT and ST.

The take-home exam asks students to answer one question from a set of synoptic questions which will cover all ten weeks of teaching.

AN281 Half Unit Not available in 2023/24 Health and Welfare: Anthropological Perspectives

This information is for the 2023/24 session.

Teacher responsible: Dr Clara Devlieger OLD 6.08

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will focus on the study of health and welfare from an anthropological perspective. The course departs from a focus on biomedicine, examining how anthropologists have analysed the individualising medical gaze and the consequences of biopolitics. We consider how understandings of illness, care and healing are socially defined in different socio-cultural contexts, paying attention to issues such as disease, old age, disability, and mental health. Such issues of health are increasingly shifting towards broader conceptions of 'well-being'. As we progress, therefore, we turn to examine how such ideas of health increasingly intersect with the policies and values of welfare, as the political management of well-being. Welfare is both a description of life, as well as a form of intervention that aims to improve those lives. We therefore consider how ethnographic approaches to redistributive work touch on issues concerned with what it means to fare well and how that might be secured in a world defined by inequalities. Ethnographic case studies here may include ethnographies of austerity, dependency and sharing.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the WT.

Assessment: Essay (100%, 3000 words) in the WT.

AN282 Half Unit Not available in 2023/24 Bangladesh and Beyond: Anthropological Perspectives

This information is for the 2023/24 session.

Teacher responsible: Professor Katy Gardner

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Undergraduates taking this course should normally have completed an introductory course in anthropology unless granted exemption by the course teacher.

Pre-requisites: Undergraduates taking this course should normally have completed an introductory course in anthropology unless granted exemption by the course teacher.

Course content: This course takes Bangladesh and its diaspora as a starting point for a range of anthropological debates, situating ethnographic material in comparative perspective and thus moving beyond a narrow regionalist approach. Whilst routinely overlooked in India centric South Asian studies, Bangladesh has much to teach us. Since its independence in 1971 it has moved from being an international 'basket case' to being a 'middle income country'; it is the birth place of micro credit, lauded for programmes of 'female empowerment', a 'hybrid regime' in which secular nationalism and Islam uneasily co-exist, and a new frontier of corporate capitalism and speculation. Questions of mobility are central. As we shall see, from its colonial heritage to the present day Bangladesh and its people have always been on the move; as an ethnographic or cultural region what we might describe as 'Bangladeshi' therefore cannot be spatially bounded, confined within national or regional borders or understood in narrow regionalist terms. Moreover, as we progress through the course we will be intellectually mobile, studying comparative ethnographies from South Asia and far beyond and seeking intellectual, geopolitical and cultural connections as well as context specific particularities. Topics covered include: the legacies of colonialism, partition and war; political protest and mobilisation; speculation and extraction; climate change and the environment; micro finance; piety and freedom; marriage, divorce and dowry; transnational communities and diaspora.

The course explicitly covers a range of perspectives and case studies, drawn not only from Bangladesh but also comparative sites across the world. A range of voices are represented, including though not limited to many Bangladeshi and South Asian scholars. Overall the course avoids a narrow regionalist focus by widening the lens to the Bengali diaspora and beyond. Questions of gender, race and colonialism, class and ethnicity are core.

Teaching: 4 hours of lectures, 10 hours of classes, 2 hours of workshops and 4 hours of workshops in the AT.

The course will be taught via a mixture of lectures, classes, films / off campus visits / online content and a workshop. These

activities will be arranged in three weekly cycles, which follow the four organising themes of the course: Weeks 1-3: Desh; Weeks 4-6: Stories of Development; Weeks 7-8: Intimate Lives; Weeks 9-10: Bidesh

Each theme / cycle will involve the following, on sequential weeks:

1 x 1 hour lecture: This will provide contextual knowledge and perspectives for the theme

1 x Off Campus Visit / online activity (listed above as 'workshop' X 4) These activities will be designed to fit with each theme and will involve (for example) a visit to Brick Lane, in which students are tasked with answering questions about the history of the area; a visit to a London museum to research the colonial history of Bengal; (if lockdown restrictions continue to be in place in 22/23, these activities will be replaced by online activities.) online activities might include a zoom Q and A with leading Bangladeshi feminist activists, or a quiz which involve online research. All these activities will stretch the students' ability to work independently, to broaden their knowledge of Bangladesh and its diaspora and to make connections between academic debates and 'real life' issues.

10 x Classes will take place every week. In these, students will discuss and analyse the comparative ethnographies and make links with the broader themes outlined in the lecture, films and off campus / online activities.

1 x Workshop: In order for students to develop their research essays there will be one 2 hour workshop, held towards the end of the course. In this, students will present their ideas and receive feedback from their peers and the course teacher.

The total hours for the course are therefore 4 x 1 hour lecture; 10 x class; 1 workshop (2 hours); 4 x off campus / online activities (which are asynchronous). Total hours = 20

Students on this course will have a reading week in week 6 in line with department policy

Formative coursework: Students will be expected to produce 1 piece of coursework in the Week 8.

The formative coursework is an essay outline / plan of 1500 words in which the student outlines preliminary ideas for and sections of their summative research essay.

Assessment: Essay (100%, 3000 words) in the WT Week 1.

AN283 Half Unit Anthropology, Art, and Poetics

This information is for the 2023/24 session.

Teacher responsible: Prof Michael Scott

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology,

Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: 'Art' and 'poetics' – practices of making and creating – are prolific, diverse, fluid, and mutable. Nowadays, anything can become art, and art can be as many things as there are people who make and study it. The broad theme of this course will be the historical and ongoing nexus between art and anthropology. We will discover how anthropology has informed the theory and practice of art and vice versa.

Topics covered will include: art and the anthropology of modernity; the significance of qualifiers attached to the category art (e.g., 'primitive', 'fine', 'sacred', 'commercial', 'decorative', 'practical'); art and alternative modernities; Surrealism and anthropology; class, race, and gender in relation to art; the concept of ethnoaesthetics; economies of value; the ethnographic study of artists and art-making; the concept of art worlds; art and agency; the ethnography of art collecting and curation; the works of artist ethnographers and ethnographer artists; ways of decolonizing art; problems of cultural appropriation; intellectual property; and modes of relational and collaborative poetics.

Teaching: 10 hours of lectures and 10 hours of classes in the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will have the opportunity to write an (unmarked) formative essay (1,500 words) and will be invited to discuss the written feedback during office hours.

Assessment: Essay (100%, 3000 words) in the ST.

AN284 Half Unit Not available in 2023/24 Anthropological Approaches to Race, Racism, and Decolonisation

This information is for the 2023/24 session.

Teacher responsible: Dr Imani Strong and Prof Laura Bear

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne)

and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course is a call to action—in the tradition of the movements and literatures it examines—that will provide students with a foundational understanding of race and contemporary racism, as well as approaches and theories central to their potential transformation. The course will focus on the discipline's historical and present theoretical orientations to race, explore alternative modes and questions in the practice of anthropology raised by anthropologists and theorists of colour, and provide an understanding of the policies—institutional, economic, social, and bureaucratic—that maintain both an academic and social racial status quo. Explicitly asking students to engage with the concept of antiracist and decolonial futures for anthropology, the course centres non-white/non-Western thought and thinkers, "activist" anthropology as a norm, and racial subjectivities as central to theory and practice.

The course will ask:

- What has been the role of the anthropologists of colour in forming the basis of what is commonly thought of as anthropological theory? What can we learn from their theories and methods?
- How can we understand contemporary racisms and how, positioned in the legacy of anthropology's contribution to its construction, can anthropology become an antiracist tool?
- Where can anthropology intervene on policy or re-orient theory to engage an antiracist epistemology in a transformative way? What is the scope of a so-called "activist" anthropology?
- What are the potential futures for anthropology as a discipline actively engaged in decolonising theory and methods?

Teaching: 10 hours of lectures and 10 hours of classes in the AT. This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Students will have the opportunity to write a 1,500-word formative essay in the MT. Feedback will be provided online, and/or during office hours.

Assessment: Essay (100%, 3000 words) in the WT.

All UG students will be required to submit a 3,000 word policy proposal, which will be due in the first week of the subsequent term.

Students will be able to choose between:

- a) a policy essay utilizing ethnographic evidence for an anti-racist/ decolonial intervention on a particular institution explored during the course,
- b) a design for an anti-racist social movement or campaign, or,
- c) a traditional theoretical essay taking race as the analytical lens for examination of an institution or policy addressed in the course.

AN292 Half Unit

Anthropological Entanglements in the Middle East

This information is for the 2023/24 session.

Teacher responsible: Dr Frederick Wojnarowski and Dr Yazan Doughan

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne), Exchange Programme for Students in Anthropology (Singapore) and Exchange Programme for Students in Anthropology (Tokyo). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides a wide-ranging, critical, and historically informed introduction to the ways anthropological knowledge has been produced, used and contested in the Middle East. It examines the conditions of possibility under which the idea of the Middle East as an ethnographic subject emerged, as situated within wider colonial contexts and European Orientalist thinking. It examines how anthropology came to turn its gaze upon people long-cast as Europe's original and exemplary cultural Other, and how, at times, scholars and writers from these societies have sought to return or reverse the occidental gaze. In doing so the course asks questions around the history, politics and poetics of representation that still resonate in popular discourses around the region today, and indeed in wider anthropology.

The course focuses ethnographically on the Arabic-speaking Mashriq; Egypt, Palestine, Syria, the Arabian Peninsular, Iraq, Jordan and Lebanon, as well as including, to a lesser extent, ethnographic work from Iran, Turkey and North Africa. A key theme running through the course is how representations of modernity have been created, debated and contested within various Middle Eastern societies over the last two centuries in the face of colonialism, war and mass forced migration, from late Ottoman reforms to the Arab Uprisings of the last decade; from 'Tanzimat to Tahrir'. We will look at the political cultures and subjectivities these histories have given rise to, and how these are resisted. Considering a variety of voices and perspectives, the course will look at the relationship between ethnographies of the region and wider debates in the discipline. As well as scholarly works, we will engage with a number of works of fiction and film over the course. After some initial situating lectures, the course will involve a series of thematic and ethnography-driven lectures and classes, considering key themes and preoccupations in anthropological

work in the region. These include; late Ottoman and colonial modernising projects; tribalism and segmentary theories as early anthropological obsessions and totalising models; changing approaches to questions of gender, from 'harem' studies, liberal feminism and its alternatives, to an increased interest in masculinities and sexuality; various approaches to Islam and to religious authority and piety; an examination of post-Orientalism critiques of anthropology and the discipline's own interrelated crisis of representation; anthropologists' resulting turn towards cities, nationalisms, diasporic communities and migration in the last three decades; an introduction to ethnographic approaches to media and popular cultures; a look at youth, protest and revolution in a historical context; and finally a consideration of anthropological engagements with ideas of ecological crisis and environmental justice in an area widely expected to be especially affected by anthropogenic climate change, but where technocratic attention often ignores its social and political economic implications and intersections.

Teaching: 10 hours of lectures and 10 hours of classes in the AT.

Formative coursework: Students will be expected to produce 1 essay (1500 words) in the AT.

Assessment: Essay (100%, 3000 words) in the WT.

AN298 Half Unit

Fieldwork in London: Learning Ethnographic Methods

This information is for the 2023/24 session.

Teacher responsible: Prof Catherine Allerton

Availability: This course is compulsory on the BA in Social Anthropology, BSc in Social Anthropology and Exchange Programme for Students in Anthropology (Melbourne). This course is available on the BA in Anthropology and Law, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan) and Exchange Programme for Students in Anthropology (Tokyo). This course is not available as an outside option nor to General Course students.

Course content: The aim of this course is to guide and support students as they identify, execute and write-up their own ethnographic project. In parallel with their research activities, students will develop research skills for the collection, analysis and representation of ethnographic data. The course will provide training in ethnographic observation, participation, listening, questioning, interviewing, analysing and writing. One session will be dedicated to discussing a range of ethical dilemmas that may emerge during the course of ethnographic research.

Students will demonstrate their research skills by applying them to the research questions pursued in their ethnographic project. They will write a 4,500 to 5,000- word essay reporting on their research activities and findings.

Teaching: 1 hour of lectures in the AT. 20 hours of seminars in the WT.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of WT.

Formative coursework: A short description of the student's proposed research project will be discussed in WT week 1 in a student-led workshop. Students will then produce a 1000-word report due between weeks 5 and 7, describing the progress made on the research, including a sample ethnographic description and an explanation of the methods used to date. Students will receive feedback on the report within two weeks of submission.

Indicative reading: Amit, Vered. *Constructing the Field: Ethnographic Fieldwork in the Contemporary World* (2003); DeWalt, K.M. & DeWalt, B.M *Participant Observation: A guide for fieldworkers* (2010); Bernard. H.R. *Research Methods in Anthropology*, 5th edition (2011).

Assessment: Essay (100%, 5000 words) in the ST.

AN2E0 Half Unit Not available in 2023/24 The Anthropology of Kinship, Sex and Gender (Anthropology Exchanges)

This information is for the 2023/24 session.

Teacher responsible: Dr Mayanka Mukherji

Availability: This course is available on the Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is not available as an outside option nor to General Course students.

Course content: This course provides an examination of the cultural frameworks and social aspects of kinship systems and gender roles, analysed through ethnographic examples from a diverse range of settings. It aims to equip students with the analytical tools to engage in theoretical debates concerning core concepts such as 'kinship', 'care', 'gender', 'the body', and the relationship between 'nature' and 'culture', as well as exploring how the experiences of kinship, sex and gender vary according to the regimes of politics, law and materiality in which they are embedded. The course considers how the practices and meanings of kinship, sex and gender are entangled with culturally and historically specific ideas of bodily control, pollution, beauty, race, nationalism, modernity, and care. In the first half of the term, we consider Bodies and Reproduction; in the second half, we focus on Materialities, Movements and Care.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Carsten, J. *After Kinship* (2003); Donnan, H. and Magowan, F. *The Anthropology of Sex* (2010); Moore, H. L. *A Passion for Difference: Essays in Anthropology and Gender* (1994); Stone, L. *Kinship and Gender: An Introduction* (2006); S. Franklin and S. McKinnon, *Relative Values: Reconfiguring Kinship Studies* (2001); G.R. Bentley and R. Mace, *Substitute Parents: Biological and Social Perspectives on Alloparenting Across Human Societies* (2009).

Assessment: Essay (100%, 3000 words) in the ST.

AN2E6 Half Unit Not available in 2023/24

Political and Legal Anthropology (Anthropology Exchanges)

This information is for the 2023/24 session.

Teacher responsible: Dr Harry Walker

Availability: This course is available on the Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is not available as an outside option nor to General Course students.

Course content: The anthropological analysis of legal institutions as revealed in relevant theoretical debates and with reference to selected ethnography. The development of legal anthropology and their key concepts including forms of authority; forms of knowledge and power; political competition and conflict; colonial transformation of indigenous norms; writing legal ethnography of the 'other'; folk concepts of justice; the theory of legal pluralism; accommodation of religious practices in secular laws of European states.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes, and to submit one mock exam question in the LT to their class teacher on which they will receive formative feedback.

Indicative reading: Moore, S F, 1978, *Law as Process*; Malinowski, B, 1916, *Crime and Custom in Savage Society*; Bohannan, P, 1957, *Justice and Judgement among the Tiv*; Comaroff J and Roberts S, 1981, *Rules and Processes*. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

AN301

The Anthropology of Religion

This information is for the 2023/24 session.

Teacher responsible: Dr Fenella Cannell

Dr Yazan Doughan

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: Students should have a substantial background in Social Anthropology.

Course content: This course covers current approaches to and reconsiderations of classic topics in the anthropology of religion, such as: myth, ritual, belief and doubt, supernatural experience, ethical self-cultivation, asceticism, sacrifice, authority and charisma. In the Michaelmas term, students will be introduced to debates concerning the ways in which 'religion' is said to influence or shape personal experience and collective public life in both western and non-western contexts. Students will explore some of the key concepts that inform contemporary understandings of religion as a force in the world, the history of these concepts, how they enter into various political and ethical projects, and the extent to which they predefine 'religion' as an object of anthropological study. Specific areas of focus may include: the relationship between 'religion' and 'secularism'; conceptions

of 'religious freedom'; conversion; inter-religious conflict; the ethnography of religious minorities; the anthropology of religious movements; and the comparative anthropology of 'religions'. In the Lent term, students will be asked to rethink the category of 'religion' and its role in anthropological analysis. The guiding underlying approach will be to ask; what is the study of 'religion' for the social sciences, and what are the potentials and limitations of different answers to that question. We will also be asking where (if anywhere) religion is located as category, practice and experience for a range of interlocutors, and in different kinds of analytic writing. Topics facilitating this project may include some of the following: shamanism, spirit mediumship, death rituals and ritual theory, magic and witchcraft, 'spirituality' and new religious movements, religion and kinship, ghosts, spirits and ancestors, cosmology, faith-healing, life-cycle rituals, human-nonhuman relations, and religion in diaspora and social change, religion and 'ethics', problems of suffering and critical approaches to religion, violence and inequality, encounters with the divine and sacred, religion, capitalism and the fetish, religion, gender and the body, religion and development, implicit religion. Examples will be drawn both western and non-western contexts, and from both 'salvation religions' such as Hinduism, Judaism and Christianity, and other including so-called 'animist' contexts.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of the AT and WT.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 essay in the WT.

Indicative reading:

- Talal Asad 2009, *Genealogies of Religion: Discipline and Reasons of Power in Christianity and Islam*;

Detailed reading lists provided at the start of each term.

Assessment: Essay (50%, 3500 words) in the WT.

Essay (50%, 3500 words) in the ST.

AN303 Half Unit

Advanced Theory of Social Anthropology

This information is for the 2023/24 session.

Teacher responsible: Prof Laura Bear

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is not available as an outside option. This course is available with permission to General Course students.

Places are limited and the course may only be suitable for external students in unusual cases. Any student who wishes to make an exceptional request to be considered should please contact the course teachers for advice on suitability and availability of places.

Pre-requisites: Students should have a substantial background in Social Anthropology.

Course content: The aim of this course is to train students to engage critically with classic and contemporary texts in the discipline, thereby deepening understandings of current trends and emerging debates. It will examine the theoretical implications of particular anthropological approaches by surveying their origins, their strengths and their critique. The course will take the form of lectures and classes conducted as an intensive reading group in which approximately three texts will be discussed and analysed in depth, along with supplementary reading material where appropriate. Students will be expected to develop their own critical responses to each text, as well as an appreciation of the context in which it was written and its contribution to relevant theoretical discussions and debates. Students taking this course will develop their capacity to meet the distinctive demands of reading and analysing longer (typically book-length) texts. This course offers a step towards graduate-level skills of independent work, and places emphasis on the active role of the students in identifying their own lines of analysis in relation to a set text.

Teaching: 4 hours of lectures and 20 hours of classes in the AT. Lectures provide a general introduction to the text and relevant issues or debates, which may include background and contextual issues, comparative materials (published, visual, primary text etc as appropriate) and in some instances debates about what is at stake in the different ways in which we learn to think and write. The contact hours listed above are the minimum expected.

This course has a reading week in Week 6 in AT.

Indicative reading:

- Gillian Feeley-Harnik. Selection of articles, including chapters in S. Mckinnon and F. Cannell eds. (2013) *Vital Relations* and in S. Franklin and S. Mckinnon eds. (2001) *Relative Values*.
- Deirdre de la Cruz. *Mother figured: Marian apparitions and the making of a Filipino universal*.
- Emily Martin *Bipolar expeditions*

Assessment: Coursework (100%, 3000 words) in the AT.

All students will produce a portfolio of position pieces (worth 100% of the total mark), to which they are expected to make a contribution after each of the three cycles. Portfolios will be assessed periodically during and after AT.

Students who submit fewer than two position pieces will receive a mark of zero for each missed assessment. The overall mark will be the average of the two position pieces with the highest grades, including any zeros for missed assessments.

Students who submit at least one position piece and fail the course and are not eligible to graduate will be expected to add to their portfolio at resit in order to achieve a pass. Students who do not submit any position pieces (0 out of 3), will be awarded a Zero Absent for the whole course and cannot be awarded the degree until they submit sufficient work at resit to complete the course. In addition to following the guidance that will be given in lectures and classes, students are welcome to come and discuss their summative coursework plans individually with the course teacher in office hours.

AN357 Half Unit Economic Anthropology (2): Transformation and Globalisation

This information is for the 2023/24 session.

Teacher responsible: Prof Deborah James

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course explores the limits and potentials of contemporary global capitalism. We all know that we live in a global economy, but how has this come into being? What are its political, social and cultural consequences? Why is the global economy so volatile? How does it produce inequality for many and abundance for some? Is globalisation dead in an era of 'de-coupling' and populism? What might the futures of global capitalism be? Through the term we will answer these questions in relation to classic themes of production, social reproduction, redistribution, circulation and consumption. Our theoretical approaches will be expanded to explore the emerging anthropology of some of the following: logistical power, the commodification of intimacy, algorithmic interactions, global branding, media spectacles, the security state, financialisation and speculation. The course will demonstrate that globalisation does not have a single logic nor is it a towering force. Instead, our focus on ethnography takes us inside the local processes through which the durable capture of accumulation and power are created. We will also be examining globalisation from the perspective of global elites, the middle classes and the precarious poor. By taking an anthropological approach to globalisation we will move away from an economic or 'deterministic' theory of capitalism. Instead we will explore the significance of desire, kinship, affect, political dreams, ethics and culture to the intimate economy of capitalism. At the end of the course we will have a better understanding of recent global changes, as well as a set of theoretical tools that can help us to rethink approaches to capitalism in general.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures in the ST.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Allison, A. (2009). *Nightwork: Sexuality, pleasure, and corporate masculinity in a Tokyo hostess club*. Amooore, Louise, and Volha Piotukh, eds. (2015) *Algorithmic life: Calculative devices in the age of big data*. Routledge University of Chicago Press.

Bear, Laura (2015) *Navigating Austerity: Currents of Debt Along a South Asian River*. Stanford University Press.

Coleman, Gabriella (2014) *Hacker, hoaxer, whistleblower, spy: The many faces of Anonymous*. Verso books.

Stout, N. (2019) *Dispossessed: how predatory bureaucracy foreclosed on the American Middle Class*. University of California Press.

Tufekci (2017) *Twitter and tear gas: The power and fragility of networked protest*. Yale University Press.

Upadhyay (2015) *Re-engineering India: Work, Capital and Class in an Offshore Economy*, Oxford University Press

Yanagisako, S. and L. Rofel (2019) *Fabricating Transnational Capitalism: a collaborative ethnography of Italian-Chinese Global Fashion*, Duke University Press.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

AN393 Half Unit

Language, Signs, World, Action! Introduction to Linguistic Anthropology

This information is for the 2023/24 session.

Teacher responsible: Dr Yazan Doughan

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Social Anthropology, Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne), Exchange Programme for Students in Anthropology (Singapore) and Exchange Programme for Students in Anthropology (Tokyo). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course from departments other than Anthropology should have completed EITHER an introductory course in anthropology such as AN100 or AN101 OR have completed an AN200 course in their second year of study.

Course content: This course introduces contemporary anthropological approaches to understanding socio-cultural life as what is precipitated through socially organized linguistic and broader semiotic processes. It considers how socio-cultural life is mediated by sign phenomena in all modalities of experience, and how sign systems are produced through socio-cultural processes. We will look at sign phenomena from two complimentary perspectives: how signs function semantically by looking at how signs (re)present their objects, and how they function pragmatically as appropriate and/or effective practice-in-context by drawing on and instantiating structural orders. The focus, however, will be on the pragmatics of language use, or how people act through language use. We will study the social life of language use by considering various artifacts, sites, institutionalizations, processes, and social networks. The aim throughout is to investigate the constitutive role of language and semiotic figuration in sociocultural power and in sociohistorical processes. In the first half of the course, students will be introduced to some key concepts in semiotic and linguistic anthropology and their place in the long tradition of thinking about language in anthropology and related disciplines, such as linguistics, semiotics, the philosophy of language, and sociology. These will include concepts such as sign, text and context, poetics, performativity, pragmatics and metapragmatics, linguistic differentiation, language ideologies, genres, addressivity, and publics. The second half of the course will be structured thematically whereby we consider how a focus on language use can illuminate various phenomena of interest to anthropological inquiry. These may include topics such as social interaction, nationalism and linguistic standardization, space and place, political communication, professional cultures, knowledge and expertise, selfhood, authority, and ethical life. By the end of the term students will be able to incorporate a semiotic and linguistic anthropological approach into their thinking and research.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will be given different sets of ethnographic materials to analyse using the concepts they have learned. Feedback will be provided online, and in group tutorials.

Indicative reading:

- Duranti, Alessandro. 2014. *The Anthropology of Intentions*. Cambridge University Press.
- Enfield, N. J., and Jack Sidnell. 2017. *The Concept of Action*. New Departures in Anthropology. Cambridge: Cambridge University Press.
- Gal, Susan. 2019. *Signs of Difference: Language and Ideology in Social Life*. Cambridge, United Kingdom ; New York, NY: Cambridge University Press.
- Goffman, Erving. *Forms of talk*. University of Pennsylvania Press, 1981
- Keane, Webb. 2016. *Ethical Life: Its Natural and Social Histories*. Princeton University Press.
- Kroskrity, Paul V., ed. *Regimes of language: Ideologies, polities, and identities*. School of American Research Press, 2000
- Lee, Benjamin. *Talking heads*. Duke University Press, 1997.
- Lucy, John A. *Language diversity and thought: A reformulation of the linguistic relativity hypothesis*. Cambridge University Press, 1992
- Mertz, Elizabeth & Parmentier, Richard J., eds. *Semiotic mediation: Sociocultural and psychological perspectives*. Academic Press, 1985.
- Silverstein, Michael. 2022. *Language in Culture: Lectures on the Social Semiotics of Language*. New edition. Cambridge ; New York, NY: Cambridge University Press.

Assessment: Take-home assessment (100%) in the period between WT and ST.

AN397

Special Essay Paper in Social Anthropology

This information is for the 2023/24 session.

Teacher responsible: Dr Harry Walker and Dr Mukulika Banerjee

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

Course content: The course guides students through the process of researching and writing an extended essay on an anthropological theme of their own choosing. Topics covered include: what makes a good dissertation; conducting an effective literature search; refining research questions; contribution and evidence; adequate referencing.

Teaching: 8 hours of lectures and 1 hour of seminars in the AT. 4 hours of seminars and 2 hours of workshops in the WT.

Formative coursework: Following an introductory lecture and seminar, students will submit a Dissertation Topic form at the end of AT week 2 (using a template published on Moodle). They will then work with their academic mentor and through timetabled teaching. They will submit a Critical Literature Review form during AT week 7, a 2,500-word extract during of WT week 2, and a Dissertation Contents form during WT week 7.

Indicative reading: There is no formal course content. Students will be expected to draw widely on their readings from other anthropology courses.

Assessment: Dissertation (100%, 9000 words) in the ST. The essay is 9,000 words of main text, including footnotes and appendices but excluding bibliography. The essay should be typed, double spaced, and should follow the reference procedures of *The Journal of the Royal Anthropological Institute*. The essay must be handed in to the Anthropology Departmental Office by the date announced in the Department's Handbook, normally week 2 of ST.

AN3E1 Half Unit Not available in 2023/24

The Anthropology of Religion (Anthropology Exchanges)

This information is for the 2023/24 session.

Teacher responsible: Dr Fenella Cannell

Availability: This course is available on the Exchange Programme for Students in Anthropology (Cape Town), Exchange Programme for Students in Anthropology (Fudan), Exchange Programme for Students in Anthropology (Melbourne) and Exchange Programme for Students in Anthropology (Tokyo). This course is not available as an outside option nor to General Course students.

Course content: Students will be asked to rethink the category of 'religion' and its role in anthropological analysis. The guiding underlying approach will be to ask; what is the study of 'religion' for the social sciences, and what are the potentials and limitations of different answers to that question. We will also be asking where (if anywhere) religion is located as category, practice and experience for a range of interlocutors, and in different kinds of analytic writing. Topics facilitating this project may include some of the following: shamanism, spirit mediumship, death rituals and ritual theory, magic and witchcraft, 'spirituality' and new religious movements, religion and kinship, ghosts, spirits and ancestors, cosmology, faith-healing, life-cycle rituals, human-nonhuman relations, religion and nature, and religion in diaspora and social change, religion and 'ethics', problems of suffering and critical approaches to religion, violence and inequality, encounters with the divine and sacred, religion, capitalism and the fetish, religion, gender and the body, religion and development, implicit religion. Examples will be drawn both western and non-western contexts, and from both 'salvation religions' such as Hinduism, Judaism and Christianity, and other including so-called 'animist' contexts.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Susannah Crockford 2021 *Ripples of the Universe; spirituality in Sedona, Arizona* Naomi Leite 2017 *Unorthodox Kin; Portuguese Marranos and the Global Search for Belonging* Michael Lambek 2002 *The Weight of the Past* Charles Stewart 2017 *Dreaming and historical consciousness in island Greece* Sonja Luehrmann ed. Sonja Luehrmann 2017 *Praying with the senses; contemporary orthodox Christian spirituality in practice* Talal Asad 2009, *Genealogies of Religion: Discipline and Reasons of Power in Christianity and Islam*; Webb Keane 2007, *Christian Moderns: Freedom and Fetish in the Mission Encounter*; W. F. Sullivan, E. S. Hurd, et al. (eds.) 2015, *Politics of Religious Freedom*; Courtney Bender 2010, *The New Metaphysicals: Spirituality and the American Religious Imagination*; Leigh Eric Schmidt 2000, *Hearing Things: Religion, Illusion, and the American Enlightenment: Changing the Terms of the Religion Versus Secularity Debate*; D. C. Posthumus 2018, R. Willerslev 2007, *Soul Hunters: Hunting, Animism, and Personhood among the Siberian Yukaghirs*; D. E. Young and J-G. Goulet (eds.) 1994, *Being Changed: The Anthropology of Extraordinary Experience*. Willem Pietz 1985 *The Problem of the Fetish*
Detailed reading lists provided at the start of each term.

Assessment: Essay (100%, 3500 words) in the ST.

DS101A Half Unit

Fundamentals of Data Science

This information is for the 2023/24 session.

Teacher responsible: Dr Ghita Berrada COL.1.02

Availability: This module is designed for students on social science degree programmes who do not have A-level Mathematics (e.g. in Anthropology, Law, and Social Policy). Students with little or no experience in computer programming are welcome.

This course can serve as an entry point or be taken concurrently

with other DS courses, such as DS105 or DS202. However, please note that this course is not suitable for students who have already completed other DS courses.

This course is not capped. Any student who requests a place is likely to be given one.

Material from the previous year can be found on the course's dedicated public webpage: <https://lse-dsi.github.io/DS101>.

Course content: This course is designed to introduce students to data science and its practice: how it works and how it can produce insights from social, political, and economic data. It combines accessible knowledge of data science as a field of study with practical knowledge about data science as a career path. By combining case studies in applications of both with the study of the content of data science, it aims for a coverage of data science that is both pedagogic but accessible, as well as fundamentally applied and practical. It combines three perspectives: inferential thinking, computational thinking, and real-world relevance.

The topics covered include:

- The fundamentals of the data science approach, with an emphasis on social scientific analysis and the study of the social, political, and economic worlds;
- A survey of the forms of data and the challenges of working with data, including an overview of databases;
- The basis of computational thinking and algorithmic design;
- An introduction to the logic of statistical inference including probability and probability distributions and how they form the basis for statistical decision-making;
- A survey of the basic techniques of statistical learning and machine learning, including a comparison of different approaches, including supervised and unsupervised methods;
- How to integrate the insights from data analytics into knowledge generation and decision-making;
- Examples of methods for working with unstructured data, such as text mining.

Our applications are drawn from the social science fields represented at LSE but also from private and public sector non-academic examples.

Teaching: 16 hours and 40 minutes of lectures and 7 hours and 30 minutes of classes in the AT.

Reading Week in Week 6.

Formative coursework: Students will be expected to produce 9 pieces of coursework in the AT.

Throughout the course, students will receive guided questions related to the week's readings, which they are expected to answer and discuss with the rest of the group. Active participation is encouraged. Additionally, some sessions will include structured problem sets during staff-led classes, with solution examples provided at the end of each week.

Indicative reading:

- Mayer-Schönberger, Viktor, and Kenneth Cukier. *Big Data: A Revolution That Will Transform How We Live, Work and Think*. 1st edition. London: Murray, 2013.
- Shah, Chirag. *A Hands-on Introduction to Data Science*. Cambridge, United Kingdom; New York, NY, USA: Cambridge University Press, 2020.
- Schutt, Rachel, and Cathy O'Neil. *Doing Data Science*. 1st edition. Beijing [China]; Sebastopol [CA]: O'Reilly Media, 2013.
- Knaflic, Cole Nussbaumer. *Storytelling with Data: A Data Visualization Guide for Business Professionals*. Hoboken, New Jersey: Wiley, 2015.
- Denning, Peter J., and Matti Tedre. *Computational Thinking*. The MIT Press Essential Knowledge Series. Cambridge, Massachusetts: The MIT Press, 2019.
- Bruce, Peter C., and Andrew Bruce. *Practical Statistics for Data Scientists: 50 Essential Concepts*. 1st edition. Sebastopol [CA]: O'Reilly, 2017.
- Flach, Peter A. *Machine Learning: The Art and Science of Algorithms That Make Sense of Data*. Cambridge: Cambridge University Press, 2012.
- Shan, Carl, Max Song, Henry Wang, and William Chen. *The Data Science Handbook: Advice and Insights from 25 Amazing Data Scientists*. 1st edition. The Data Science Bookshelf, 2015.

- Hare, Stephanie. *Technology Is Not Neutral: A Short Guide to Technology Ethics*. Perspectives. London: London Publishing Partnership, 2022.

Assessment: Essay (30%, 1500 words) and presentation (10%) in the AT.

Essay (60%, 2000 words) in the WT.

DS101W Half Unit

Fundamentals of Data Science

This information is for the 2023/24 session.

Teacher responsible: Dr Ghita Berrada COL.1.02

Availability: This module is designed for students in social science degree programmes who do not have A-level Mathematics (e.g., in Anthropology, Law, and Social Policy). Students with little to no experience in computer programming are welcome.

This course can serve as an entry point or be taken concurrently with other DS courses, such as DS105 or DS202. However, please note that this course is not suitable for students who have already completed other DS courses.

- Hare, Stephanie. *Technology Is Not Neutral: A Short Guide to Technology Ethics*. Perspectives. London: London Publishing Partnership, 2022.

Assessment: Essay (30%, 1500 words) and presentation (10%) in the WT.

Essay (60%, 2000 words) in the ST.

DS105A Half Unit

Data for Data Science

This information is for the 2023/24 session.

Teacher responsible: Dr Jonathan Cardoso-Silva COL.1.03

Availability: This course is available on the BSc in Politics and Data Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

While this course is not capped and, in principle, any student who requests a place is likely to be given one, restrictions might need to be imposed if the demand is too high.

Material from the previous year can be found on the course's dedicated public webpage: <https://lse-dsi.github.io/DS105/>.

Course content: The main goal of this course is to teach students how to collect and handle 'real data' in a hands-on manner. The first few weeks of the course will cover theoretical concepts through traditional lectures with slides, but then the format will shift to a more practical approach. Live coding demonstrations will be used to guide students through the material, which can be followed in real-time on their laptops. Python will be the primary programming language used in staff-led lectures and classes, but students are also permitted to use R for their assignments if they prefer.

An important note on programming: While programming is not strictly required for this course, basic programming knowledge, preferably in Python or R, is highly recommended. Students should be comfortable creating and updating variables, creating simple functions, and using flow control expressions like if-else statements, for and while loops, etc. Those who are new to coding may find the course challenging, and we encourage them to consider the Winter iteration of the course, DS105W. This will provide additional time to improve their programming skills. We recommend that students with limited programming experience explore courses such as ST101, Digital Skills Lab workshops or the pre-session courses listed on the DS105 Moodle page.

In terms of content, the learning objectives of this course are to:

- Understand the basic structure of data types and common data formats.
- Show familiarity with international standards for common data types.
- Manage a typical data acquisition, cleaning, structuring, and

analysis workflow using practical examples.

- Clean data and diagnose common problems involved in data corruption and how to fix them.
 - Understand the concept and fundamentals of databases.
 - Link data from various sources.
 - Use the collaboration and version control system GitHub, based on the git version control system.
 - Markup Language and the Markdown format for formatting documents and web pages.
 - Create and maintain simple websites using HTML and CSS.
 - Use APIs to send and retrieve data from Internet sources.
- Note that this course introduces basic concepts of databases, but it is not a hands-on course on their use. If you are interested in learning more about databases, we recommend that you consider taking ST207 Databases, which covers the topic in more detail.
- Teaching:** 16 hours and 40 minutes of lectures and 13 hours and 30 minutes of classes in the AT.
Reading Week in Week 6.

Formative coursework: In the initial sessions, students will work on weekly and structured problem sets in the staff-led class sessions. Examples of exercises involve navigating the terminal on the computer, accessing computer servers, writing code to scrape and pre-process data from the Web, and setting up GitHub. Later on, students will be expected to work on their group projects in the staff-led class sessions.

Indicative reading:

Text as Data: A New Framework for Machine Learning and the Social Sciences. Princeton: Princeton University Press, 2022.

Assessment: Coursework (60%, 1000 words) and group project (40%) in the WT.

The coursework will involve three individual programming assignments.

The group project will include progress presentations and a final public report. The final part of the group project will involve creating a data-based public website that will be published on GitHub. The deadline for the final project will be set for the early Winter Term.

DS105W Half Unit Data for Data Science

This information is for the 2023/24 session.

Teacher responsible: Dr Jonathan Cardoso-Silva COL.1.03

Availability: This course is available on the BSc in Politics and Data Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

While this course is not capped and, in principle, any student who requests a place is likely to be given one, restrictions might need to be imposed if the demand is too high. Material from the previous year can be found on the course's dedicated public webpage: <https://lse-dsi.github.io/DS105/>.

Course content: The main goal of this course is to teach students how to collect and handle 'real data' in a hands-on manner. The first few weeks of the course will cover theoretical concepts through traditional lectures with slides, but then the format will shift to a more practical approach. Live coding demonstrations will be used to guide students through the material, which can be followed in real-time on their laptops. Python will be the primary programming language used in staff-led lectures and classes, but students are also permitted to use R for their assignments if they prefer.

An important note on programming: while programming is not strictly required for this course, basic programming knowledge, preferably in Python or R, is highly recommended. Students should be comfortable creating and updating variables, creating simple functions, and using flow control expressions like if-else statements, for and while loops, etc. We recommend that students with limited programming experience explore courses such as ST101, Digital Skills Lab workshops or the pre-session courses listed on the DS105 Moodle page.

In terms of content, the learning objectives of this course are to:

- Understand the basic structure of data types and common data formats.
- Show familiarity with international standards for common data types.
- Manage a typical data acquisition, cleaning, structuring, and analysis workflow using practical examples.
- Clean data and diagnose common problems involved in data corruption and how to fix them.
- Understand the concept and fundamentals of databases.
- Link data from various sources.
- Use the collaboration and version control system GitHub, based on the git version control system.
- Markup Language and the Markdown format for formatting documents and web pages.
- Create and maintain simple websites using HTML and CSS.
- Use APIs to send and retrieve data from Internet sources.

Note that this course introduces basic concepts of databases, but it is not a hands-on course on their use. If you are interested in learning more about databases, we recommend that you consider taking ST207 Databases, which covers the topic in more detail.

Teaching: 16 hours and 40 minutes of lectures and 13 hours and 30 minutes of classes in the WT.

Reading Week in Week 6.

Formative coursework: In the initial sessions, students will work

on weekly and structured problem sets in the staff-led class sessions. Examples of exercises involve navigating the terminal on the computer, accessing computer servers, writing code to scrape and pre-process data from the Web, and setting up GitHub.

Later on, students will be expected to work on their group projects in the staff-led class sessions.

- Grimmer, Justin, Margaret E. Roberts, and Brandon M. Stewart. *Text as Data: A New Framework for Machine Learning and the Social Sciences*. Princeton: Princeton University Press, 2022.

Assessment: Coursework (60%, 1000 words) and group project (40%) in the ST.

The coursework will involve three individual programming assignments. The group project will include progress presentations and the final public report. The final part of the group project will involve creating a data-based public website that will be published on GitHub. The deadline for the final project will be set in the Spring Term.

DS202A Half Unit Data Science for Social Scientists

This information is for the 2023/24 session.

Teacher responsible: Dr Jonathan Cardoso Silva COL.1.03

Availability: This course is compulsory on the BSc in Politics and

Data Science and BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST201 Statistical Models and Data Analysis.

Material from the previous year can be found on the course's dedicated public webpage: <https://lse-dsi.github.io/DS202/>

Pre-requisites: A-level maths or equivalent.

An important note on programming: While programming is not strictly a pre-requisite for this course, basic programming knowledge, preferably in Python or R, is highly recommended. Students should be comfortable creating and updating variables, creating simple functions, and using flow control expressions like if-else statements, for and while loops, etc. Those who are new to coding may find the course challenging, and we encourage them to consider the Winter iteration of the course, DS202W. This will provide additional time to improve their programming skills. We recommend that students with limited programming experience explore courses such as ST101, the Digital Skills Lab workshops or the self-paced pre-session course listed on the DS202 Moodle page.

Course content: The main goal of this course is to provide students with a hands-on introduction to the most fundamental machine learning algorithms, as well as the metrics commonly used to assess algorithmic performance and decision-making aspects in real-life scenarios. The course will be taught through a combination of staff-led lectures and classes, with a primary focus on practical applications. R will be the primary programming language, and there will be a recap of the tidyverse set of packages in the first weeks of the course.

In terms of content, the learning objectives of this course are to:

- Understand the fundamentals of the data science approach, with an emphasis on social scientific analysis and the study of the social, political, and economic worlds;
- Understand how classical methods such as regression analysis or principal components analysis can be treated as machine learning approaches for prediction or for data mining;
- Know how to fit and apply supervised machine learning models for classification and prediction;
- Know how to evaluate and compare fitted models, and to improve model performance;
- Use applied computer programming, including the hands-on use of programming through course exercises;
- Apply the methods learned to real data through hands-on exercises;
- Integrate the insights from data analytics into knowledge generation and decision-making;
- Understand an introductory framework for working with natural language (text) data using techniques of machine learning;
- Learn how data science methods have been applied to a particular domain of study (applications).

Teaching: 16 hours and 40 minutes of lectures and 13 hours and 30 minutes of classes in the AT.

This course will have a Reading Week in Week 6.

Formative coursework: Students will be expected to produce 10 problem sets in the AT.

Students will work on weekly, structured problem sets in the staff-led class sessions. Example solutions will be provided at the end of each week.

Indicative reading:

- Wickham, Hadley, and Garrett Grolemund. *R for Data Science: Import, Tidy, Transform, Visualize, and Model Data*. 1st edition. Sebastopol [CA]: O'Reilly, 2016. Made freely available online by the author: <https://r4ds.had.co.nz/>.
- Ismay, Chester, and Albert Young-Sun Kim. *Statistical Inference via Data Science: A Modern Dive into R and the Tidyverse*. Chapman & Hall/CRC the R Series. Boca Raton: CRC Press / Taylor & Francis Group, 2020. Made freely available online by the author: <https://moderndiver.com/>.
- James, Gareth, Daniela Witten, Trevor Hastie, and Robert Tibshirani. *An Introduction to Statistical Learning: With*

Applications in R. 2nd edition. Springer Texts in Statistics. New York [NY]: Springer, 2021. Made freely available online by the author: <https://www.statlearning.com/>.

- Zumel, Nina, and John Mount. *Practical Data Science with R*. 1st edition. Shelter Island [NY]: Manning Publications Co, 2014.
- Kuhn, Max, and Julia Silge. *Tidy Modeling with R: A Framework for Modeling in the Tidyverse*. 1st edition. Beijing Boston Farnham Sebastopol Tokyo: O'Reilly, 2022. Made freely available online by the author: <https://www.tmw.org/>.
- Silge, Julia, and David Robinson. *Text Mining with R: A Tidy Approach*. 1st edition. Beijing [China]; Boston [MA]: O'Reilly, 2017. Made freely available online by the author: <https://www.tidytextmining.com/>.
- Grimmer, Justin, Margaret E. Roberts, and Brandon M. Stewart. *Text as Data: A New Framework for Machine Learning and the Social Sciences*. Princeton: Princeton University Press, 2022.

Assessment: Online assessment (40%, duration: 4 hours) in the January exam period.

Coursework (60%, 2000 words) in the AT.

DS202W Half Unit

Data Science for Social Scientists

This information is for the 2023/24 session.

Teacher responsible: Dr Ghita Berrada COL.1.02

Availability: This course is compulsory on the BSc in Politics and Data Science and BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST201 Statistical Models and Data Analysis.

Material from the previous year can be found on the course's dedicated public webpage: <https://lse-dsi.github.io/DS202/>

Pre-requisites: A-level maths or equivalent.

An important note on programming: While programming is not strictly a pre-requisite for this course, basic programming knowledge, preferably in Python or R, is highly recommended. Students should be comfortable creating and updating variables, creating simple functions, and using flow control expressions like if-else statements, for and while loops, etc. Those who are new to coding may find the course challenging, and we encourage them to consider the Winter iteration of the course, DS202W. This will provide additional time to improve their programming skills. We recommend that students with limited programming experience explore courses such as ST101, the Digital Skills Lab workshops or the self-paced pre-session course listed on the DS202 Moodle page.

Course content: The main goal of this course is to provide students with a hands-on introduction to the most fundamental machine learning algorithms, as well as the metrics commonly used to assess algorithmic performance and decision-making aspects in real-life scenarios. The course will be taught through a combination of staff-led lectures and classes, with a primary focus on practical applications. R will be the primary programming language, and there will be a recap of the tidyverse set of packages in the first weeks of the course.

In terms of content, the learning objectives of this course are to:

- Understand the fundamentals of the data science approach, with an emphasis on social scientific analysis and the study of the social, political, and economic worlds;

Assessment: Online assessment (40%, duration: 4 hours) in the Spring exam period.

Coursework (60%, 2000 words) in the WT.

EC1A1 Half Unit Microeconomics I

This information is for the 2023/24 session.

Teacher responsible: Prof Dimitra Petropoulou SAL 4.27

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics and BSc in Economics. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Economics (EC1P1) and Elementary Statistical Theory I (ST109).

Students must also either have completed Methods in Calculus and Linear Algebra (MA108) or else be taking Mathematical Methods (MA100) alongside.

Course content: This course introduces students to the principles of microeconomics analysis, including recent developments in thinking around decision-making. The first part of the course explores consumer rationality and decision-making under constraints and under uncertainty, including selected applications to savings and labour supply decisions. Students will also be introduced to behavioural economics and insights from psychology relating to consumer decisions. The second part

of the course explores firm decision-making in different market structures. Insights from consumer and producer theory will be combined with evidence to address important policy-relevant questions and explore the role of government policy.

Students will make use of quantitative methods covered in MA108 and MA100. Appropriate quantitative tools will be reviewed or taught as required.

EC1A1, in combination with EC1B1, contributes towards certificate level exemptions from professional Chartered Institute of Management Accountants (CIMA) examinations.

This course, combined with EC1B1, contributes to the CB2 Exemption of the Institute and Faculty of Actuaries (IFoA).

Teaching: 20 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will also be 6 hours of online interactive Question and Answer (Q&A) sessions in the WT, to discuss further examples and past paper questions, discuss related reading and tackle student questions.

There will be a reading week in Week 6 of WT (no lectures, classes or support sessions that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term.

Student learning will be supported through the EC1A1 Support Lab and through a dedicated discussion forum.

Formative coursework: Students are expected to complete the weekly problem sets and any required reading before attending class and are encouraged to work in small study groups. A mock exam will be marked by class teachers and feedback provided.

Feedback will also be provided on a 10-minute video presentation exploring a policy-relevant theme. The diversity of tasks makes the course more inclusive and help students develop a broader range of skills.

Indicative reading: There is no set textbook for this course. There will be required reading from journal articles or reports that will be made available as the course unfolds. Students will be expected to critically discuss the theoretical ideas and models taught by engaging with this required reading alongside working through microeconomic problems. There will be opportunities to discuss the readings in the Q&A sessions and/or in weekly classes.

Students wishing to complement their study of the lecture material can consult, among others, the following textbooks (though this is not required, and students need not purchase any textbooks). Any edition can be used.

- Varian, H. *Intermediate microeconomics: with calculus*, W.W. Norton & Company
- Perloff, J.M. *Microeconomics: theory & applications with calculus*, Pearson.

Students wishing to read further or refresh mathematical tools can consult:

- Jacques, I. *Mathematics for Economics and Business*, Pearson.

Assessment: Exam (85%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Coursework (15%) in the WT.

EC1A3 Half Unit Microeconomics I

This information is for the 2023/24 session.

Teacher responsible: Prof Ronny Razin SAL.4.01

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Economics and Economic History, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in Finance, BSc in Financial Mathematics and Statistics, BSc in Geography with Economics, BSc in International Social and Public Policy and Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics

(with a Year Abroad) and BSc in Politics and Economics. This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Data Science, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Politics and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is mutually exclusive with EC1A5 Microeconomics I, EC100 Economics A and EC102 Economics B.

Pre-requisites: A-level mathematics, or equivalent.

Course content: In this course, you will learn the main building blocks of microeconomics analysis and their applications. You will study the foundations of rationality and individual decision making and learn about strategic interaction and equilibrium (game theory). You will apply these tools to understand many applications, such as how consumers behave, how companies choose their strategies and how auctions work. The course will also touch upon behavioural models and how we think about individual welfare in economics.

This course, in combination with either EC1B3 or EC1B5, exempts those who complete them from BA1 Fundamentals of Business Economics of the Chartered Institute of Management Accountants (CIMA).

This course, combined with EC1B3, contributes to the CB2 Exemption of the Institute and Faculty of Actuaries (IFoA).

Teaching: 20 hours of lectures and 10 hours of classes in the AT. The teaching in this course is based on a “flipped-classroom” pedagogical approach. Students will learn through a mix of deliverable content and engagement using technology. The course will include:

- Pre-recorded videos for independent learning and preparation for live sessions.
- 10 hours of interactive online synchronous lectures in the AT with further content, live exercises and other engagement activities using technology.
- 10 hours of in-person lectures in the AT
- 5 hours of online biweekly in-person “consolidation” lectures in the AT, with further content, student discussions and Q&A.
- 10 hours of in-person classes in the AT

We appreciate that this is the first university level course most students on the course are taking. Care will be taken from the outset to proactively manage students’ expectations, and a welcoming, open-minded, respectful, and constructive learning space will be fostered. Participants will be supported throughout the course with regular assurances and guidance about the emotional and intellectual labour involved and encouraged to participate in the spirit of productive discomfort. Please chat with or email the course team in case of concerns, or if you would like more information.

Formative coursework: Weekly problem sets and Moodle quizzes. Feedback will be given on two problem sets. These are tailored to replicate material you will be assessed on in the exam.

Indicative reading: Optional suggested further reading is listed below. Any edition of these books can be used.

- Further reading on topics: Microeconomics – Daron Acemoglu, David I. Laibson, and John A. List (note the content is also part of the textbook Economics by the same authors).
- Further readings on tools: Jacques, I. Mathematics for Economics and Business, Pearson.

Assessment: Exam (90%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Continuous assessment (10%) in the AT.

Continuous assessment will consist of weekly midweek tasks. These tasks are meant to provide a broader understanding and appreciation for the concepts we learn in the course. Preparation and submission of the midweek tasks contributes towards the continuous assessment for the course.

EC1A5 Half Unit

Microeconomics I

This information is for the 2023/24 session.

Teacher responsible: Prof Alan Manning SAL.2.36A

Availability: This course is compulsory on the BSc in Economic History. This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Politics, BSc in Politics and International Relations and BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with EC1A3 Microeconomics I, EC100 Economics A or EC102 Economics B.

Course content: This course offers a conceptual introduction to microeconomics principles and uses these to shed light on important contemporary economic questions across a range of fields. You will study consumers and producers, competitive and monopolistic markets, inequality and taxation, market failure and what can be done about it. The ideas of microeconomics will be used to analyse a variety of topics including climate change, the minimum wage, universal basic income, the impact of technology on work, immigration, discrimination the gender pay gap and what we should do about the tech giants. You will develop the skills and intuition to tackle important microeconomic questions using a minimal amount of mathematics (in particular, without the use of calculus).

This course, in combination with either EC1B3 or EC1B5, exempts those who complete them from BA1 Fundamentals of Business Economics of the Chartered Institute of Management Accountants (CIMA).

This course, combined with EC1B5, contributes to the CB2 Exemption of the Institute and Faculty of Actuaries (IFoA).

Teaching: 20 hours of lectures and 10 hours of classes in the AT. This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours in the Autumn Term.

Formative coursework: Students will submit weekly problems sets, and feedback will be provided on two pieces of work. Solutions will be available for both problem sets and weekly Moodle quizzes.

Indicative reading: The course will loosely follow the following textbook. Any edition can be used.

- Microeconomics – Daron Acemoglu, David I. Laibson, and John A. List (note the content is also part of the textbook Economics by the same authors).

The following source will be useful for applications and discussion of core microeconomic issues:

- The Economy, Economics for a changing world. The Core Team.

Assessment: Exam (90%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Continuous assessment (10%) in the AT.

EC1B1 Half Unit

Macroeconomics I

This information is for the 2023/24 session.

Teacher responsible: Dr Jonathon Hazell, SAL.1.22

Availability: This course is available on the BSc in Econometrics and Mathematical Economics and BSc in Economics. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Economics (EC1P1) and Elementary Statistical Theory I (ST109).

Students must also either have completed Methods in Calculus and Linear Algebra (MA108) or else be taking Mathematical Methods (MA100) alongside.

Course content: This course builds on the knowledge learned in EC1P1. You will learn why economic activity fluctuates over time

(business cycles). We will discuss how government policy can affect short-term outcomes, such as unemployment, GDP and inflation. Other topics will include inequality and financial crises. We will apply the tools developed in the course to recent events, as well as historical events such as the Great Depression. An important aspect of the course is a coding exercise with data. This will help you acquire a deeper understanding of the material.

EC1B1, in combination with EC1A1, contributes towards certificate level exemptions from professional Chartered Institute of Management Accountants (CIMA) examinations.

This course, combined with EC1A1, contributes to the CB2 Exemption of the Institute and Faculty of Actuaries (IFoA).

Teaching: 20 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT only (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term and Spring Term.

Formative coursework: There will be weekly assignments and feedback will be given on two.

The coursework will be a set of coding exercises, with data, in Python. This is a group project and the course will teach you the necessary programming skills.

Indicative reading: There is no set textbook for the course. Lecture material may occasionally be complemented by supplementary readings.

Students wishing to complement their study should consult the following textbook:

- C. Jones, *Macroeconomics*, W.W. Norton & Company, 5th Edition.

Assessment: Exam (85%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Coursework (15%) in the WT.

EC1B3 Half Unit

Macroeconomics I

This information is for the 2023/24 session.

Teacher responsible: Dr Antonio Mele SAL.4.29

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Economics and Economic History, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in Finance, BSc in Financial Mathematics and Statistics, BSc in Geography with Economics, BSc in International Social and Public Policy and Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Economics. This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Data Science, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Mathematics, Statistics and Business, BSc in Politics and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with EC1B5 Macroeconomics I, EC100 Economics A or EC102 Economics B.

Pre-requisites: Students must have completed Microeconomics I (EC1A3).

A-level mathematics, or equivalent.

Course content: This course is an introduction to macroeconomic analysis. We will study how countries' economic performance is determined in the long run. We will learn why we observe economic growth and development in some countries but not in others. We will discuss how the labour market works and how unemployment is determined. We will analyse how the largest components of GDP, consumption and investment, are formed. We will also

cover the role of policy and how it affects the economy. We will look at fiscal challenges in the long run. Emphasis will be given to concepts and tools used by macroeconomists in the analysis of macroeconomic phenomena. This course, in combination with either EC1A3 or EC1A5, exempts those who complete them from BA1 Fundamentals of Business Economics of the Chartered Institute of Management Accountants (CIMA).

This course, combined with EC1A3, contributes to the CB2 Exemption of the Institute and Faculty of Actuaries (IFoA).

Teaching: 20 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT only (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term and Spring Term.

Formative coursework: There will be weekly assignments and feedback will be given on two.

Indicative reading: There is no set textbook for the course. The required reading material will sample from the textbooks listed below and it will possibly include e.g. reports from international organisations, academic research articles, video presentations, and academic blog posts. Lecture material may occasionally be complemented by supplementary readings, either required or optional, discussing the topics in more detail.

- Mankiw, G. (2019), *Macroeconomics*, 10th edition or later, Macmillan, London. Available online on the LSE Library website
- Jones, C. (2020), *Macroeconomics (Fifth Edition)*, 5th Edition or later, W. W. Norton. Available online on the LSE Library website
- Williamson, S. (2019), *Macroeconomics*, 6th Edition, Pearson Education. Available online on the LSE Library website

Assessment: Exam (90%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Coursework (10%) in the WT.

EC1B5 Half Unit

Macroeconomics I

This information is for the 2023/24 session.

Teacher responsible: Dr Keyu Jin SAL. 1.17

Availability: This course is compulsory on the BSc in Economic History. This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Politics, BSc in Politics and International Relations and BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with EC1B3 Macroeconomics.

Pre-requisites: Students must have completed Microeconomics I (EC1A5).

Course content: This course is an introductory course in macroeconomics, which is the study of the overall economic performance of countries. You will learn about economic growth, business cycles (booms and recessions), unemployment, inflation, exchange rates, monetary and fiscal policy. We will apply the tools developed in the course to historical and contemporary events. This course, in combination with either EC1A3 or EC1A5, exempts those who complete them from BA1 Fundamentals of Business Economics of the Chartered Institute of Management Accountants (CIMA).

This course, combined with EC1A5, contributes to the CB2 Exemption of the Institute and Faculty of Actuaries (IFoA).

Teaching: 20 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT only (no lectures or classes).

This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term and

Spring Term.

Formative coursework: There will be weekly assignments and feedback will be given on two.

Indicative reading:

- Macroeconomics – Daron Acemoglu, David I. Laibson, and John A. List (note the content is also part of the textbook *Economics* by the same authors).

Assessment: Exam (90%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.
Coursework (10%) in the WT.

EC1C1 Half Unit

Econometrics I

This information is for the 2023/24 session.

Teacher responsible: Dr Michael Callen SAL.3.18

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics and BSc in Economics. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Economics (EC1P1) and Elementary Statistical Theory I (ST109).

Students must also either have completed Methods in Calculus and Linear Algebra (MA108) or else be taking Mathematical Methods (MA100) alongside.

Course content: This course is an applied introduction to econometrics. Its aim is to introduce students to the principles of estimation, statistical inference, and the central tool of regression. The course draws heavily on empirical questions and you will work with statistical software analysing actual data sets and learn some basic programming and data handling skills in the process. You will learn how statistical tools can be used to answer causal questions (e.g., "What is the causal effect of electing a better educated politician on the quality of service delivery?"). as well as prediction problems (e.g., "what individual characteristics, such as income or education, predict who political parties select to run for office?").

Topics include: program evaluation; randomised experiments; univariate regression; omitted variable bias; selection bias; sampling fluctuation; statistical inference; standard errors; and hypothesis testing.

Teaching: 20 hours of lectures and 10 hours of lectures in the WT. 1 hour of lectures in the ST.

There will be a reading week in Week 6 of WT only (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term and Spring Term.

Formative coursework: There are weekly assignments and feedback will be given on two.

Indicative reading:

- J. D. Angrist and J. S. Pischke *Mastering 'Metrics. The Path from Cause to Effect*, Princeton University Press.
- J. H. Stock and M. Watson *Introduction to Econometrics*, Pearson

Assessment: Exam (85%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.
Coursework (15%) in the WT.

EC1P1 Half Unit

Economics

This information is for the 2023/24 session.

Teacher responsible: Prof Ricardo Reis SAL.1.27

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics and BSc in Economics. This course is not available as an outside option nor to General Course students.

Course content: In this course, we discuss fundamental economic

concepts and apply them to current events. The goal is to learn to think like economists by using economic theory to produce compelling arguments and economic data to distinguish and quantify them. Some examples are the measurement of economic well-being and inequality, the impact of immigration, what is a central bank and why it is mandated with controlling inflation, the design of auctions, competition in the age of technology giants, the strengths and weaknesses of market economies, and how to rationally make sense of irrational behaviour. Students will learn how to characterize the relevant aspects (measurement), how to use economic analysis to shed light on any social phenomenon (models), how to use data to measure the causes of these phenomena (empirics) and how to estimate the impact of policies that improve human wellbeing.

Teaching: 20 hours of lectures and 10 hours of classes in the AT. This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term.

Formative coursework: There are weekly assignments and feedback will be given on two.

Indicative reading: There is no set textbook for this course.

Students are expected to engage with supplementary reading that will be provided for each topic as the course unfolds.

Students can complement their study of the course material by consulting, among others, the following books (though this is not a requirement and students need not purchase any books).

- *Economics for the Common Good*, Jean Tirole.
- *The Armchair Economist*, Steven E. Landsburg.
- *Poor Economics*, Abhijit V. Banerjee and Esther Duflo.

Assessment: Exam (90%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Group project (10%) in the AT.

In the group project, student will produce a short video or poster on an economics topic.

EC230

Economics in Public Policy

This information is for the 2023/24 session.

Teacher responsible: Chiara Sotis (SAL.1.28A) and Dr Mohan Bijapur (SAL.1.31)

Availability: This course is available to General Course and GO LSE students only.

EC230 is mutually exclusive with EC2A5 and EC2B5.

Pre-requisites: Students normally will have completed Microeconomics I (EC1A5) and Macroeconomics I (EC1B5), or their equivalent.

Course content: This course uses economic analysis to explore important questions in contemporary public policy. The first term focuses on microeconomic policy problems while the second term focusses on macroeconomic policies. The use of mathematics is minimal (in particular with no calculus) and the emphasis of instruction is on graphical analysis and economic intuition and reasoning. Precise topics and readings will be announced each term and are selected to be of current interest.

Last academic year key questions addressed were: how can we evaluate the welfare effect of policies? How do consumers make decisions in risky situations and over time and why might these decisions be subject to biases? How can we design policies to improve consumer decision making?; What are the effects of the Covid-19 pandemic?; How can we tackle environmental concerns?; Why did the UK government grant independence to the Bank of England in 1997 and adopt an inflation target?; What caused the global financial crisis and how can policy prevent future crises?; How was global financial regulation reformed in the aftermath of the crisis?; What unconventional tools of monetary policy did central banks implement?; What causes currency crises?; Why has the US been a more successful currency union than the Eurozone, what caused the European sovereign debt crisis and how is it related to Brexit?; How should governments deal with a debt crisis?; Why do some countries stay poor and what can policy do

about it?

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across Autumn Term and Winter Term:

15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT only (no lectures, classes or office hours that week).

Student learning will be supported through office hours and through a dedicated discussion forum.

Formative coursework: Students will receive feedback on two pieces of formative work per term. Students are expected to make positive contributions to class discussions.

Indicative reading: There is no set course textbook due to the topical nature of the applications chosen. A list of selected texts and readings will be provided at the start of each term.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

The January examination is based on the AT syllabus, and the Spring exam on the WT syllabus.

EC241 Half Unit

PPE Interdisciplinary Research Seminar

This information is for the 2023/24 session.

Teacher responsible: Dr Jeremiah Dittmar SAL 2.22

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics and BSc in Philosophy, Politics and Economics (with a Year Abroad). This course is not available as an outside option nor to General Course students.

Course content: Governments serve several functions key to economic development, including correcting market failures, raising taxes, delivering services, and protecting property rights. Yet, particularly in poor countries, they often fail to do so effectively. In this course, we will explore the empirical body of evidence on what can be done to improve service delivery. We view this evidence through an analytical framework emphasizing the agency problems between citizens, politicians and bureaucrats. Correspondingly, the course is divided into four sections. We will first focus on how democratic institutions select and constrain politicians. Second, we will explore issues of bureaucratic selection and incentives affecting bureaucrats. Third, we will review evaluations of specific reforms aimed at strengthening institutions, promoting accountability, and improving service delivery. In a final section, we will explore the interactions between governance, development, and political conflict. This section emphasizes cases where subnational conflict reflects a violent competition for legitimate political control. This discussion also will relate modern efforts at state building to classical philosophical and political discussions on the creation of legitimate states. We will also focus extensively on empirical case studies of policies, reforms, and innovations that have proven effective.

Teaching: 10 hours of lectures and 9 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT only (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Winter Term and Spring Term.

Formative coursework: Students are expected to prepare for weekly classes. Feedback will be given on select assignments.

Indicative reading:

- Acemoglu, Daron and James Robinson, *Why Nations Fail*, Crown Books, 2012;
- Besley, Timothy and Torsten Persson, *Pillars of Prosperity: The Political Economics of Development Clusters*, Princeton University Press, 2011

Assessment:

Class participation (10%) in the WT.

Coursework 1 (30%, 1,500 words) in WT Week 7

Coursework 2 (60%, 2,000 words) in ST Week 2

EC2A0

Introductory Course in Microeconomic Principles

This information is for the 2023/24 session.

Teacher responsible: Prof Frank Cowell SAL 3.25A

Availability: This course is compulsory on the MSc in Economics (2 Year Programme). This course is not available as an outside option nor to General Course students.

Course content: EC2A0 is an introduction to the compulsory core microeconomics EC2A1 covered in the AT and WT of year 1 of the MSc in Economics (2 Year Programme).

The course aims to provide students with an understanding of the essential analysis of individual economic agents in a market setting, firms, consumers and workers. It is designed to deliver a solid basis for EC2A1 Microeconomics, taught in the AT and WT of the first year of the MSc in Economics (2 Year Programme).

The course starts with a brief overview of optimisation in economics: constraints, objectives and maximisation techniques.

The two main topic areas then apply this optimisation analysis as follows:

The firm: Profit maximisation and cost minimisation. Demand for inputs and supply of output in competitive markets. Market equilibrium. Analysis of monopoly.

The consumer: Utility maximisation subject to budget constraints. Demand for commodities. Extensions to factor supply.

Applications to intertemporal decision-making and labour-market decisions. Extension to decision-making under uncertainty.

Topics of the algebra workshops include: rules and properties of summation notation; properties of expectation, variance, and covariance; matrix algebra; definitions of terms regarding convergence of random variables and properties of estimators; and derivation of the OLS estimator. The content regarding matrix algebra is most prominent. It begins with basic operations (such as addition and multiplication), includes discussion of important definitions (such as "idempotent" and "symmetric") and includes content on transposes, inverses, and rank of a matrix.

Teaching: 20 hours of microeconomics lectures, 10 hours of interactive microeconomics classes and 5 linear algebra workshops delivered in person over 3 weeks in September

Formative coursework: Students will be required to complete daily sets of self-testing exercises during the course.

Indicative reading: Recommended readings and preparation materials will be provided over the summer.

Assessment: At the end of the course, students will be assessed through a closed-book, timed examination on optimisation by competitive firms and households.

EC2A1

Microeconomics II

This information is for the 2023/24 session.

Teacher responsible: Prof Michele Piccione SAL 4.07

Prof Timothy Besley SAL 3.37

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics, BSc in Economics and MSc in Economics (2 Year Programme). This course is not available as an outside option nor to General Course students.

Pre-requisites: Microeconomics I (EC1A1) and either Quantitative Methods (Mathematics) (MA107) or Mathematical Methods (MA100).

Students on the MSc in Economics (2 Year Programme) must

have completed Introductory Course in Microeconomic Principles (EC2A0) and be taking either Mathematical Methods (MA100) or Further Mathematical Methods (MA212) alongside EC2A1.

Course content: In this course, we build on the tools learnt in Microeconomics I (EC1A1) to provide an in-depth analysis of microeconomic theory, as well as applications of the tools of microeconomics to concrete economic problems.

The first part of the course explores game theory and considers a range of applications:

- Extensive Forms and Normal Form games.
- Pure and mixed strategy Nash Equilibria.
- Backward induction and Subgame Perfection.
- Applications: Cournot, Stackelberg, Bertrand with homogeneous and differentiated goods; entry games and limit capacity, bargaining.
- Repeated games – Application: cartel stability
- Games with incomplete information and belief refinements.
- Applications: Limit Pricing, Auctions, Signalling.

The second part of the course builds on the analysis of demand and supply side in EC1A1 to analyse general equilibrium, market failures and the role of government intervention:

- The Market System as a General Equilibrium – Efficiency and distribution.
- Living Interdependently – Public goods and externalities; private action and the role of government.
- Behavioural Economics – Markets with behavioural biases; the role of government.
- Political Economy – Effectiveness of government; preference aggregation; constraints on the power of the state.
- Asymmetric Information – Contracts and markets with moral hazard and adverse selection.
- Innovation – product and process innovation; the role of government in supporting innovation.

The course prepares students for third year optional courses.

Teaching: 20 hours of lectures and 10 hours of classes in the AT. 20 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

Students will also benefit from Q&A sessions (online in the AT and in person in the WT).

There will be a reading week in Week 6 of WT (no lectures, classes or support sessions that week).

Student learning will be supported through the EC2A1 Support Lab and through a dedicated discussion forum.

This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Students are expected to complete the weekly problem sets and any required reading before attending class and are encouraged to work in small study groups on unassessed work.

A minimum of two pieces of work will be assigned and marked each term with feedback provided.

Indicative reading: For the Autumn Term the set textbook is:

- Watson, Joel. "Strategy: An Introduction to Game Theory", WW Norton (2013), 3rd edition

For the Winter Term, there is no set textbook. Lecture material is complemented with required additional reading from journal articles, reports, and other sources.

Assessment: Exam (70%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

Coursework (30%) in the AT and WT.

EC2A3 Half Unit Microeconomics II

This information is for the 2023/24 session.

Teacher responsible: Prof Dimitra Petropoulou, SAL 4.27

Availability: This course is compulsory on the BSc in Economics and Economic History, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with

Economics, BSc in Finance, BSc in Geography with Economics, BSc in International Social and Public Policy and Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Economics. This course is available on the BSc in Accounting and Finance, BSc in Data Science, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Mathematics with Data Science, BSc in Mathematics, Statistics and Business and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Note, EC2A3 is mutually exclusive with EC201, EC202 and MG207.

Pre-requisites: Students must have completed Microeconomics I (EC1A3) and Macroeconomics I (EC1B3), or equivalent.

Students must also have completed Quantitative Methods (Mathematics) (MA107) or Mathematical Methods (MA100), or equivalent.

Course content: In this course, we use the tools you learned in Microeconomics I (EC1A3) to provide an in-depth analysis of microeconomic theory, as well as applications of the tools of microeconomics to concrete economic problems. We build on analysis of demand from EC1A1 and combine with the supply side, bringing the two sides of the market together in the analysis of general equilibrium. We then explore social welfare and consider issues of efficiency, distribution, and inequality, alongside an introduction to political economy and the effectiveness of government. We will also examine the effects of living interdependently, exploring public goods and externalities and the role of government intervention in correcting market failures. Finally, the study of asymmetric information in markets and implications for contract design, as well as analysis of insurance markets and adverse selection.

Teaching: 20 hours of lectures and 10 hours of classes in the AT. Student learning will be supported through a series of online Q&A sessions, the EC2A3 Support Lab and through a dedicated discussion forum.

Formative coursework: Students are expected to complete the weekly problem sets and any required reading before attending classes and will be encouraged to work in small study groups. Two pieces of work will be marked, and feedback provided.

Indicative reading: Lecture material will be complemented with required additional reading from journal articles or reports. There is no set textbook for this course, though chapters from suitable intermediate textbooks can be recommended for those who may wish to consult a text (though this is not required).

Students will be expected to discuss critically the theoretical ideas and models taught by engaging with the required reading alongside working through microeconomic problems.

Assessment: Exam (90%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Continuous assessment (10%) in the AT.

EC2A5 Half Unit Microeconomics II

This information is for the 2023/24 session.

Teacher responsible: Ms Chiara Sotis SAL.1.28A

Availability: This course is available on the BSc in Accounting and Finance, BSc in Economic History, BSc in Environment and Development, BSc in Environment and Sustainable Development and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Note, EC2A5 is mutually exclusive with EC230.

Pre-requisites: Students will have completed Microeconomics I (EC1A5) or equivalent.

Course content: In this course, we apply the knowledge acquired

in Microeconomics I (EC1A5) to analyse economic problems and issues at a higher level. This course teaches microeconomic analysis to let you explore important contemporary questions and special emphasis is given to the question how public policy can change (economic) outcomes. You will learn how to understand economic problems by focusing on their key characteristics, choosing the relevant microeconomic mechanisms and developing a solid intuition. The use of mathematics is minimal (in particular, with no calculus) and the emphasis of instruction is on graphical analysis and economic intuition. Precise topics and readings will be announced and are selected to be of current interest, such as the impact of the pandemic and environmental concerns.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. Student learning will be supported through office hours and through a dedicated discussion forum.

Formative coursework: Students will receive feedback on two pieces of formative work during AT. Students are expected to make positive contributions to class discussions.

Indicative reading: There is no set course textbook because of the topical nature of the applications chosen. A list of selected texts and readings will be provided at the start of term, given the topical nature of the course.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

EC2B1 Macroeconomics II

This information is for the 2023/24 session.

Teacher responsible: Professor Wouter Den Haan, SAL.1.08A
Professor Benjamin Moll, SAL. 1.19

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics, BSc in Economics and MSc in Economics (2 Year Programme). This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Microeconomics I (EC1A1) and Macroeconomics I (EC1B1), or equivalent. Students must also have completed Quantitative Methods (Mathematics) (MA107) or Mathematical Methods (MA100), or equivalent.

MSc in Economics (2 Year Programme) students can take either Mathematical Methods (MA100) or Further Mathematical Methods (MA212) alongside EC2B1.

Course content: This is an intermediate course in macroeconomics that builds on the knowledge learned in Macroeconomics I (EC1B1). A set of important frameworks and approaches to model macroeconomic developments will be discussed. You will be challenged to apply the tools that we develop in the course to understand better historical and contemporary events. An important aspect of the course is that you will acquire a deeper understanding of the material through an assignment containing some programming and data analysis. The AT part of the course focuses on long-term economic developments. We will explore possible explanations for the empirical observation that macroeconomic developments differ so widely across countries. We begin with conventional economic reasoning, but will also explore the role of political systems, (financial) institutions, and culture. In addition to long-term economic growth, we will also study why countries are susceptible to economic crises and what policies and/or institutions can be put in place to reduce this risk. We will not just focus on economic aggregates, but also analyse how economic growth affect different individuals. Specifically, we will look at the interaction between economic growth and social inclusion and in particular women's rights.

The WT part of the course provides a unified approach to study macroeconomics which is based on microfoundations and general equilibrium taking into account possible market imperfections. We will study economic choices that are key for macroeconomic developments, such as the consumption-savings decision, the

labour-leisure decision, and the investment decisions. These are the building blocks for some models with which we can study the behaviour of aggregate variables as well as the role of economic policies.

Teaching: 20 hours of lectures and 10 hours of classes in the AT. 20 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of LT, during which there will be no lectures or classes.

Student learning will be supported through the EC2B1 Support Lab and through a dedicated discussion forum.

Formative coursework: There are weekly assignments and feedback will be given on two per term.

Indicative reading:

- Weil, David. "Economic Growth, international student edition." (2014 or the 4th edition if it has become available).

- Kurlat, Pablo. "A Course in Modern Macroeconomics." (2020)

Assessment: Exam (70%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

Project (30%, 2500 words) in the WT.

The project comprises a programming component, some data analysis, and a description of the results.

EC2B3 Half Unit Macroeconomics II

This information is for the 2023/24 session.

Teacher responsible: Dr Kevin Sheedy, SAL.1.09

Availability: This course is compulsory on the BSc in Economic History with Economics, BSc in Economics and Economic History, BSc in International Social and Public Policy and Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Economics. This course is available on the BSc in Accounting and Finance, BSc in Data Science, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Management, BSc in Mathematics with Data Science, BSc in Mathematics, Statistics and Business and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Note: EC2B3 is mutually exclusive with EC210.

Pre-requisites: Students must have completed Microeconomics I (EC1A3) and Macroeconomics I (EC1B3), or equivalent.

Students must also have completed Quantitative Methods (Mathematics) (MA107) or Mathematical Methods (MA100), or equivalent.

Course content: This an intermediate-level course in macroeconomics that builds on the material you covered in EC1B3. You will learn about money and inflation, and how central banks can use monetary policy to control inflation. You will study business cycles - booms and recessions - and the potential role for fiscal and monetary policy in stabilising the economy. You will learn about the interaction between the economy and financial markets and banks, especially in times of crisis. You will also study the international aspects of macroeconomics arising from trade in goods and financial assets with the rest of the world. We will apply the tools developed in the course to historical and contemporary events.

Teaching: 20 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT, during which there will be no lectures or classes.

Student learning will be supported through the EC2B3 Support Lab and through a dedicated discussion forum.

Formative coursework: Students are expected to work on weekly problem sets ahead of classes, two of which will be marked and feedback provided.

Indicative reading: There is no set textbook for the course. Lecture material may occasionally be complemented by supplementary readings. Students wishing to complement their study should consult the following textbook:

- P. Kurlat, A Course in Modern Macroeconomics, 2020

Assessment: Exam (90%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Continuous assessment (10%) in the WT.

EC2B5 Half Unit Macroeconomics II

This information is for the 2023/24 session.

Teacher responsible: Dr Mohan Bijapur SAL.1.31

Availability: This course is available on the BSc in Accounting and Finance, BSc in Economic History, BSc in Environment and Development and BSc in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Note, EC2B5 is mutually exclusive with EC230.

Pre-requisites: Students will have completed Macroeconomics I (EC1B5), or equivalent.

Course content: This course builds on the knowledge acquired in Macroeconomics I (EC1B5). We will use macroeconomic analysis to explore important contemporary questions and special emphasis is given to how public policy can change economic outcomes. You will learn how to understand economic problems by focusing on the key characteristics, choosing the relevant mechanisms and developing a solid intuition. The use of mathematics is minimal (in particular, with no calculus) and the emphasis of instruction is on graphical analysis and economic intuition. Precise topics and readings will be announced and are selected to be of current interest, such as: is central bank independence a good thing?; what are the macroeconomic effects of the Covid-19 pandemic?; what caused the global financial crisis and how can policy prevent future crises?; how was global financial regulation reformed in the aftermath of the crisis?; what unconventional tools of monetary policy did central banks implement?; what causes currency crises, how can policy prevent them and what sparked the Trump trade war?; why has the US been a more successful currency union than the Eurozone?; what caused the European sovereign debt crisis and how is it related to Brexit?; how should governments deal with a debt crisis - did Greece make the right choice?; what drives convergence in income levels across countries, why do some countries stay poor and can policy change this?

Teaching: 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT (no lectures, classes or office hours in this week).

Student learning will be supported through office hours and through a dedicated discussion forum.

Formative coursework: There are weekly assignments and feedback will be given on two in the Winter Term. Students are expected to make positive contributions to class discussions.

Indicative reading: There is no set course textbook because of the topical nature of the applications chosen. A list of selected texts and readings will be provided at the start of term given the topical nature of the course.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

EC2C1 Econometrics II

This information is for the 2023/24 session.

Teacher responsible: Dr Marcia Schafgans, SAL.4.12

Professor Steve Pischke, SAL.2.16

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics, BSc in Economics and MSc in Economics (2 Year Programme). This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory I (ST109), Quantitative Methods (Mathematics) (MA107) or Mathematical Methods (MA100), and Econometrics I (EC1C1), or equivalent.

MSc in Economics (2 Year Programme) students can take either Mathematical Methods (MA100) or Further Mathematical Methods (MA212) alongside EC2C1.

Course content: This course builds on the knowledge learned in Econometrics I (EC1C1). In the AT part of the course, the focus is an introduction to the theory of econometrics. You will study in detail various estimators common in the literature: the least squares estimator, the instrumental variable estimator, and the maximum likelihood estimator. You will discuss how (and whether) these estimators can be used for inference purposes under a range of assumptions underlying the data generating process. Topics include the derivation of finite sample properties (unbiasedness, precision (standard error) and efficiency), asymptotic properties (consistency and asymptotic distribution), confidence intervals and hypothesis testing. Most discussions will pertain to the use of cross-sectional data and the linear model. We will consider the binary choice model as an example of a nonlinear model and will cover some aspects of time series data. Various discussions make use of matrix algebra.

In the WT part of the course, you will learn more econometric techniques, including difference-in-differences, and regression discontinuity designs that make use of panel data and you will revisit the instrumental variable technique. Teaching in WT will be based on empirical examples and you will find out how to conduct your own empirical investigation. As part of the course, you will work on an empirical project and write an individual report about your analysis and findings.

Teaching: 30 hours of lectures, 10 hours of classes and 10 hours of help sessions in the AT. 20 hours of lectures and 10 hours of classes in the WT.

There will be a reading week in Week 6 of WT, during which there will be no lectures. Week 6 classes will run as usual.

Student learning will be supported through the EC2C1 Support Lab and through a dedicated discussion forum.

Formative coursework: During AT, there are weekly assignments and feedback will be given on two.

During WT, there will be four homework assignments. Students are expected to give a progress report on their individual project and are given feedback on this.

Indicative reading:

- J. Wooldridge Introductory Econometrics. A Modern Approach, Cengage
- J. D. Angrist and J. S. Pischke Mastering 'Metrics. The Path from Cause to Effect, Princeton University Press.

Assessment: Exam (45%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Project (45%, 2500 words) in the ST.

Continuous assessment (10%) in the AT and WT.

EC2C3 Half Unit Econometrics I

This information is for the 2023/24 session.

Teacher responsible: Dr Michael Gmeiner (SAL.4.28)

Availability: This course is compulsory on the BSc in Economic History with Economics, BSc in Economics and Economic History,

BSc in Finance, BSc in International Social and Public Policy and Economics, BSc in Philosophy and Economics and BSc in Politics and Economics. This course is available on the BSc in Accounting and Finance, BSc in Data Science, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Note, EC2C3 is mutually exclusive with EC220, EC221 and MG205.

Pre-requisites: Students will have completed Elementary Statistical Theory (ST102) or Quantitative Methods (Statistics) (ST107), or equivalent.

Course content: This course is an applied introduction to econometrics. The focus is on regression-based techniques and interpreting results in applied settings. The course will centre on how statistical tools can be used to answer causal “what-if” questions (e.g., “What is the effect of years of education on income?”). You will work with statistical software to analyse actual data sets and will learn basic programming in Stata through dedicated workshops. Topics include: randomised experiments, programme evaluation, matching, simple and multiple regression analysis, inference, omitted variable bias, functional form specification, measurement error, missing data, reverse causality, and instrumental variables.

Teaching: 30 hours of lectures, 10 hours of classes, and 5 online Stata workshops in the AT.

Student learning will be supported through the EC2C3 Support Lab and through a dedicated discussion forum.

Formative coursework: Students are expected to engage with the problem sets each week. At least two of these will be marked and feedback provided.

Indicative reading: Lecture materials are complemented by reading of J. D. Angrist and J. S. Pischke, *Mastering 'Metrics. The Path from Cause to Effect*, Princeton University Press.

Lecture materials are self-contained with regards to econometric theory, so reading of econometrics textbooks is not required. The following texts are recommended for students interested in consulting a textbook.

- J. Wooldridge, *Introductory Econometrics. A Modern Approach*, Cengage
- J. H. Stock and M. Watson, *Introduction to Econometrics*, Pearson

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

EC2C4 Half Unit Econometrics II

This information is for the 2023/24 session.

Teacher responsible: Dr Ragvir Sabharwal, SAL 1.28A.
Dr Marcia Schafgans, SAL 4.12.

Availability: This course is compulsory on the BSc in Economics and Economic History, BSc in Finance, BSc in International Social and Public Policy and Economics, BSc in Philosophy and Economics and BSc in Politics and Economics. This course is available on the BSc in Accounting and Finance, BSc in Data Science, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Geography with Economics, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and Diploma in Accounting and Finance. This course

is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Note, EC2C4 is mutually exclusive with EC220, EC221 and MG205.

Pre-requisites: Students must have completed Econometrics I (EC2C3), or equivalent.

Course content: This course builds on the material learned in EC2C3. The focus of the course is the underlying theory of empirical research in economics: estimation methods, properties of estimators (unbiasedness, standard error formula, sampling distribution, consistency) and hypothesis testing. Topics include: Bivariate and multiple regression (estimation, inference, asymptotic property); heteroskedasticity; endogeneity (omitted variables and simultaneity); instrumental variables and two-stage least squares; binary choice models; and time series analysis.

Teaching: 30 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT, during which there will be no lectures or classes.

Student learning will be supported through the EC2C4 Support Lab, some help sessions and through a dedicated discussion forum.

Formative coursework: Students are expected to engage with the weekly problem sets each week. Two of these will be marked and feedback provided.

Indicative reading: J. Wooldridge *Introductory Econometrics. A Modern Approach*, Cengage

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

EC302

Political Economy

This information is for the 2023/24 session.

Teacher responsible: Prof Ronny Razin SAL.4.01 and Dr Michael Callen SAL.3.18

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in International Social and Public Policy and Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: This course makes use of key concepts in economic theory as well as econometric analysis. We welcome all students with a strong background and proven record in quantitative courses, such as econometrics (EC220 or EC221 or EC2C1 or EC2C3 and EC2C4, or equivalent), statistics (ST107 or ST102, or ST109 combined with EC1C1, or equivalent) microeconomics (EC201 or EC202 or EC2A1 or EC2A3, or equivalent) and mathematics (MA107 or MA100).

Course content: The course seeks to introduce students to the major theoretical models of Political Economy and the available empirical evidence. Sample topics to be covered include: Social Choice theory and Preference aggregation; Comparative electoral systems; Political economy of income redistribution; Turnout in elections; Strategic and Sincere voting; Political Parties; Debates and Communication; Political Agency Models; Citizen-Candidate Models; and some Empirical Studies of Political institutions.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across Autumn Term,

Winter Term and Spring Term.

Formative coursework: Four pieces of written work (two per term) will be handed in and assessed by class teachers.

Indicative reading: There is no textbook covering all the material in the course. The following books are recommended as supplements to lecture content:

- *Analyzing Politics, Rationality, Behavior and Institutions*, K.A. Shepsle and M.S. Bonchek. W. W. Norton & Company, New York, London.
- *Liberalism Against Populism*, W.H. Riker, Waveland Press, Prospect Heights, Illinois.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

EC307

Development Economics

This information is for the 2023/24 session.

Teacher responsible: Prof Oriana Bandiera SAL.3.02 and Prof Robin Burgess SAL.3.03

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environment and Sustainable Development with Economics, BSc in Geography with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: This course makes use of key concepts in economic theory as well as econometric analysis. We welcome all students with a strong background and proven record in quantitative courses, such as econometrics (EC220 or EC221 or EC2C1 or EC2C3 and EC2C4, or equivalent), statistics (ST107 or ST102, or ST109 combined with EC1C1), microeconomics (EC201 or EC202 or EC2A1 or EC2A3, or equivalent) and mathematics (MA107 or MA100).

Course content: This course explores the microeconomic foundations of economic development. We will discuss economic growth, inequality, poverty traps, labour markets, capital markets, education, health, gender, service delivery, taxation, the role of the state, governance and accountability, conflict, access to finance, infrastructure, trade, firms and markets, energy, environment and climate change. In studying each of these topics, we will ask: what determines the decisions of households and firms in less developed countries? What constraints do they face? Is there scope to improve livelihoods and productivity through the actions of governments, international organizations, NGOs, or market participants? What policies have been tried? How have they fared? This course combines theory and empirics but maintains a strong applied focus. Under each theme, we will derive testable implications from the theory, subject these predictions to econometric testing, comment on the robustness of the results obtained, and seek to draw policy conclusions.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across Autumn Term, Winter Term, and Spring Term.

Formative coursework: Feedback will be provided on four assignments (two in AT and two in WT).

Indicative reading: Teaching in the course will be done mainly from journal articles drawn from the forefront of theoretical and applied research in development economics. Background texts for the course are A. Banerjee and E. Duflo, *Poor Economics*, Public

Affairs, 2011 and D. Ray, *Development Economics*, Princeton UP, 1998.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

EC310

Behavioural Economics

This information is for the 2023/24 session.

Teacher responsible: Dr Matthew Levy SAL3.21

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics with Economic History, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business, BSc in Philosophy and Economics and BSc in Psychological and Behavioural Science. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Students taking the course as an outside option are required to meet the pre-requisites as detailed below.

Pre-requisites: Ideally, students must have completed EC202 or EC2A1. A highly motivated student who has done well in EC201 or EC2A3-- as a guideline 65 or better – is welcome on the course, but only if handling economics mathematically comes naturally. If in doubt, students should consult with Dr Levy enrolling onto the course. Fluency in calculus is essential, and some knowledge of methods of mathematical proof, including those using sets, is necessary.

Course content: The course will expose students to a number of major topics in Behavioural Economics and will link theory with empirical applications. The first half of the course will focus on departures from neoclassical preferences, while the latter half will cover departures from rational expectations. The particular topics to be covered include:

- Reference Dependent Preferences and Loss Aversion
- Social Preferences
- Hyperbolic Discounting
- Naiveté and Self-Control
- Projection Bias
- Happiness and Adaptation
- Heuristics and Biases
- Inattention and Shrouding
- Nudging and Framing
- Behavioural Welfare Analysis

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across Autumn Term, Winter Term, and Spring Term.

Formative coursework: At least four exercises or pieces of written work will be assessed by class teachers and feedback provided.

Indicative reading: Congdon, William, Jeffrey Kling, and Sendhil Mullainathan. *Policy and Choice: Public Finance Through the Lens of Behavioral Economics* (selected chapters). Brookings Institution Press: Washington, D.C. 2011

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

EC311

History of Economics: How Theories Change

This information is for the 2023/24 session.

Teacher responsible: Mr Andres Mauricio Guiot Isaac

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in International Social and Public Policy and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the ways in which economics has developed from the Mercantilists of the 17th century to the Neoclassical thinking of the later 20th century. The course will explore how the theories, concepts and methods of economics have changed over the last 250 years, focusing on Europe and North America. We will use the original texts in order to understand how economists of the past approached perennial questions (about for example, the sources of growth or the role of money) and resolved them in the context of the economic conditions of their own time and place; and use theories about scientific change to understand the longer history of economics.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn and Winter Term.

This course includes a reading week in Week 6 of Autumn and Winter Term.

Formative coursework: Students will be expected to discuss assigned texts and produce several pieces of written work.

Indicative reading: A reading list of original texts and secondary literature will be given at the beginning of the course. For an introduction, students may read R L Heilbroner's, *The Worldly Philosophers*; for general background, consult Roger E Backhouse's, *The Penguin History of Economics* or David Colander & Harry Landreth's, *History of Economic Thought*.

Assessment: Take-home assessment (100%) in the ST.

EC313

Industrial Economics

This information is for the 2023/24 session.

Teacher responsible: Prof Martin Pesendorfer SAL.4.19

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in International Social and Public Policy and Economics, BSc in Mathematics and Economics, BSc in

Philosophy, Politics and Economics and BSc in Philosophy, Politics and Economics (with a Year Abroad). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or Microeconomics II (EC2A1). A highly motivated student who has done well in EC2A3-- as a guideline 65 or better -- is welcome on the course, but only if handling economics mathematically comes naturally. Also, students must have completed Introduction to Econometrics (EC220) or Principles of Econometrics (EC221) or Econometrics II (EC2C1) or Econometrics I (EC2C3) in combination with Econometrics II (EC2C4), or equivalent. Students who believe they have completed an equivalent course instead of one of these must receive permission from Prof. Pesendorfer before selecting the course.

Course content: The aim of the course is to provide students with a working knowledge of theoretical and empirical methods for industry studies. Topics may include: monopoly, price discrimination, oligopoly theory, mergers, product differentiation, dynamic industry models, collusion, demand estimation, production function estimation, empirical techniques for oligopoly models, identification of conduct, advertising, search, auction markets, empirics of auction markets, winner's curse, collusion in auctions, matching markets, and moral hazard. The topics will be discussed with applications for selected industries and considering competition policy questions.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT (no lectures or classes that week).

This course is delivered through a combination of lectures and classes totalling a minimum of 50 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Two marked assignments per term.

Indicative reading: The course will draw on a variety of texts, the main ones being:

1 Jeffrey R. Church and Roger Ware. *Industrial Organization: A Strategic Approach*.

2 Jean Tirole. *Theory of Industrial Organization*

3 Guillaume Haeringer. *Market Design: Auctions and Matching*

A detailed reading list will be provided at the beginning of the course.

Some notes will be provided where textbook coverage is inadequate.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

EC317

Labour Economics

This information is for the 2023/24 session.

Teacher responsible: Dr Guy Michaels SAL.2.10

Professor Stephen Machin SAL.2.06A

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in International Social and Public Policy and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Philosophy, Politics and Economics (with a Year Abroad). This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or Microeconomics II (EC2A1) or Microeconomics II (EC2A3), or equivalent. Also, students must have completed Introduction to Econometrics (EC220) or Principles of Econometrics (EC221) or Econometrics II (EC2C1) or Econometrics I (EC2C3) in

combination with Econometrics II (EC2C4), or equivalent.

Course content: This course is an introduction to the economic analysis of behaviour and institutions in labour markets. Primarily microeconomic models are applied to labour market phenomena, such as labour supply and participation for individuals and households, labour demand by firms, wage determination, employment, and unemployment under different institutional settings. Specific topics to be studied will include: labour market inequalities and technological change; education and wage returns; unions; alternative work arrangements; crime and the labour market. Students will learn how to distinguish alternative theories empirically using real world data. The course explores how models and empirical analysis can be applied to evaluate labour market policies, some examples being the minimum wage, school dropout ages, welfare programmes, and immigration restrictions. The goal of the course is to enable students to think critically and independently about labour market issues, drawing on the models and tools developed during the course.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Problems sets in the course involve hands-on statistical analysis of real world data.

Indicative reading: G Borjas, *Labor Economics*. Additional reading, drawn from journals, will be suggested during the course.

Assessment: Exam (85%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

Class participation (15%) in the AT and WT.

EC319

Games and Economic Behaviour

This information is for the 2023/24 session.

Teacher responsible: Dr Andrew Ellis SAL.3.15
Dr Christopher Sandmann SAL.4.24

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business and BSc in Philosophy and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or Microeconomics II (EC2A1) or Microeconomics II (EC2A3), or equivalent. Fluency in calculus is essential, and some knowledge of analysis, probability theory, linear algebra and set theory is advantageous.

Course content: This course reviews fundamental concepts in economic theory and presents some of its most successful applications. The first part of the course will survey concepts in non-cooperative game theory and will introduce students to game theoretic modelling in economics. After setting up the primitives of the game theory framework, different solution concepts will be analysed with an emphasis on economic applications including bargaining, voting, communication, and matching. The second part of the course consists of an introduction to auction theory. Auctions have been widely used to allocate spectrum licenses, drilling rights or central bank lending against collateral; their design is therefore of immediate practical concern. The theory, drawing on mechanism design, allows us to analyse what makes auctions desirable, how different formats compare, and tackle issues such as strategic entry, collusive behaviour, or allocative externalities. Our treatment will be mostly theoretical and cover fundamental

issues, most importantly the revenue equivalence theorem. From here we will embark on an eclectic tour, covering issues relating to competition policy and auction design, and exploring connections with competitive markets and nonlinear pricing.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Students are expected to attempt assigned problem sets ahead of the class, where these will be discussed. In addition, students are expected to submit up to four of the designated hand-in problem sets, two for each term, to receive feedback from class teachers.

Indicative reading: M. Osborne, *An Introduction to Game Theory*, Oxford University Press, 2003.

P. Milgrom, *Putting Auction Theory to Work*, Cambridge, 2004

Other sources include:

V. Krishna, *Auction Theory*, Academic Press, 2009.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

EC321

Monetary Economics and Aggregate Fluctuations

This information is for the 2023/24 session.

Teacher responsible: Professor Sir Charles Bean SAL.1.16
Dr Tim Willems (room TBC)

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Mathematics and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or Microeconomics II (EC2A1) or Microeconomics II (EC2A3), or equivalent. Students must also have completed Macroeconomic Principles (EC210) or Macroeconomics II (EC2B1) or Macroeconomics II (EC2B3) or Macro-Finance (FM201), or equivalent. In exceptional cases and only with permission, students may be allowed to take EC321 if they also take macroeconomics concurrently. Students must have mathematics and statistics to at least the level of Quantitative Methods (MA107 and ST107), while Mathematical Methods (MA100) and Elementary Statistical Theory (ST102), or else Elementary Statistical Theory I (ST109) in combination with Econometrics I (EC1C1), are strongly preferred. Introduction to Econometrics (EC220) or Principles of Econometrics (EC221) or Econometrics II (EC2C1) or Econometrics I (EC2C3) in combination with Econometrics II (EC2C4), or equivalent are desirable though not essential.

Course content: The course provides an introduction to monetary theory, to the effects of monetary variables on the macroeconomic system, the role of banks and of the central bank, and the conduct of monetary and financial policies. Subjects likely to be covered include: The nature and function of money; Asset prices and the term structure of interest rates; Classical monetary theory, neutrality and inflation; Interest-rate feedback rules; The interaction between monetary and fiscal policy; Theories of the demand for money; The market for reserves; Financial markets and financial intermediaries; The transmission mechanism of monetary policy

and theories of the Phillips curve; The optimal rate of inflation and optimal stabilisation policy; The positive theory of inflation and the case for central bank independence; Policymaking in an uncertain environment; The role of banks in the transmission mechanism and the case for bank regulation; Financial crises and the role of the central bank as a lender of last resort; The 2007-8 financial crisis, unconventional monetary policies and macro-prudential policy.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Students are required to submit two essays or exercises in the AT and the WT. Feedback is provided on these by the class teacher. Students are expected to make positive contributions to class discussions.

Indicative reading: The most useful textbooks are M Lewis & P Mizen, *Monetary Economics*, and C Walsh, *Monetary Theory and Policy* 4th edn. Other useful texts include: C Goodhart, *Money, Information and Uncertainty*, 2nd edn; D Laidler, *The Demand for Money*, 4th edn; R Aliber and C Kindleberger, *Manias, Panics and Crashes: A History of Financial Crises*, 7th edn. The main source of assigned readings is, however, journal articles.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

EC325

Public Economics

This information is for the 2023/24 session.

Teacher responsible: Dr Kate Smith SAL 3.16
Prof Camille Landais SAL.3.23

Availability: This course is compulsory on the BSc in International Social and Public Policy and Economics. This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or Microeconomics II (EC2A1) or Microeconomics II (EC2A3), or equivalent. The capacity to read and understand applied research methods as covered in EC220 or EC221 or EC2C1 or EC2C3 and EC2C4 is highly desirable.

Course content: The first part of the Autumn term content focus on the foundations of public economics. We begin by introducing classical theories concerning equity, efficiency, and the rationales for government intervention in the economy. We discuss market failure in the context of public goods and externalities, including environmental policy. We also discuss problems of public choice and political economics, and the implications of recent research in behavioural economics for policymaking. We also study modern empirical methods that are used to evaluate the causal effects of public policies. The second part of the Autumn term considers social insurance policies, including unemployment insurance, disability insurance, retirement pensions, and public health insurance. We study the economic rationale for government

intervention in social insurance and the optimal type and extent of interventions, and we relate this to empirical evidence on the causal effects of changes in social insurance policies.

In the Winter Term the course is devoted to tax and transfer programs. We begin by examining the incentive effects of taxes and transfers on labour supply, and then go on to consider migration, tax avoidance, and tax evasion. As inequality is a key input to tax and transfer policy, we critically examine the measurement of and trends over time in income and wealth inequality in various countries. We look at the effect of taxation on economic efficiency and explore the optimal taxation of commodities and income. Finally, we consider questions of tax administration and apply them in a developing country context.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Feedback is provided for one problem set and one mock exam each term (Autumn and Winter).

Indicative reading: The recommended textbook for the course is Jonathan Gruber (2016) *Public Finance and Public Policy*, 5th edition, Worth Publishers. Many of the readings will be journal articles.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

EC330

Environmental Economics

This information is for the 2023/24 session.

Teacher responsible: Prof Robin Burgess and Dr Clare Balboni

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in International Social and Public Policy and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course is suitable for students on Economics joint degree and other programmes who have followed the quantitative stream of the new economics curriculum.

Pre-requisites: This course makes use of key concepts in economic theory as well as econometric analysis. We welcome all students with a strong background and proven record in quantitative courses such as econometrics, statistics, microeconomics, mathematics, other advanced economics courses.

Course content: This course explores key concepts and recent advances in environmental economics with the view to addressing environmental policy questions. It is concerned with studying the interaction between human activity and the natural environment. We capture work both on how economic growth can be made cleaner but also on how to mitigate the damages from this growth. The course illustrates how frontier theory and empirics from economics can be brought to bear on the key climate, environmental and energy challenges that face mankind. These topics loom ever larger in careers across the private sector, public sector and academia and this course helps to prepare students for these careers.

Autumn term deals with how humans interact with the natural environment and covers growth and the environment, public goods and externalities, climate change, pollution, natural resource depletion, migration, urbanization, trade, values and preferences and social justice and the environment.

Winter term shifts to examining what policies and actions might be taken to confront and slow environmental change and covers adaptation, taxation, tradable permits, conservation, access to energy, technical change, innovation and diffusion, infrastructure and structural change and political economy.

This course is complementary to the courses Applied Environmental Economics (GY222) and Applied Economics of Environment and Development (GY329).

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours.

Formative coursework: Weekly classes will focus on academic papers covered in the lecture alongside an assignment to guide your reading. These are designed to help deepen your analytical capacity. Students are expected to engage with weekly assignments and actively participate in class discussions. Two assignments will be marked, and feedback provided each term. Students are permitted to work in groups but must provide their own individual written attempt to each assignment.

Indicative reading: The course combines theory and empirics and has a strong applied focus. There is no textbook for the course. Students will instead be required to engage with academic papers at the frontier of the literature, as well with historic seminal works. The following are indicative of recent papers students can expect to engage with:

- Carleton, T.A., Jina, A., Delgado, M.T., Greenstone, M., Houser, T., Hsiang, S.M.,
- Hultgren, A., Kopp, R.E., McCusker, K.E., Nath, I.B. and Rising, J., 2020. Valuing the global mortality consequences of climate change accounting for adaptation costs and benefits, Forthcoming QJE.
- Deryugina, T., Heutel, G., Miller, N. H., Molitor, D., & Reif, J. (2019). The mortality and medical costs of air pollution: Evidence from changes in wind direction. *American Economic Review*, 109(12), 4178-4219.
- Hassler, J., Krusell, P. and Olovsson, C., 2021. Directed technical change as a response to natural resource scarcity. *Journal of Political Economy*, 129(11), pp.3039-3072.
- Desmet, K., Kopp, R.E., Kulp, S.A., Nagy, D.K., Oppenheimer, M., Rossi-Hansberg, E. and Strauss, B.H., 2021. Evaluating the Economic Cost of Coastal Flooding. *American Economic Journal: Macroeconomics*, 13(2).
- Henderson, J.V., Storeygard, A. and Deichmann, U., 2017. Has climate change driven urbanization in Africa?. *Journal of Development Economics*, 124, pp.60-82.
- Shapiro, J.S., 2021. The environmental bias of trade policy. *The Quarterly Journal of Economics*, 136(2), pp.831-886.
- Aghion, P., Bénabou, R., Martin, R. and Roulet, A., 2020. Environmental preferences and technological choices: is market competition clean or dirty? (No. w26921). National Bureau of Economic Research.

- Balboni, C. A. (2019). In harm's way? Infrastructure investments and the persistence of coastal cities. Revise and resubmit *American Economic Review*
- Burgess, R., Hansen, M., Olken, B. A., Potapov, P., & Sieber, S. (2012). The political economy of deforestation in the tropics. *Quarterly Journal of Economics*, 127(4), 1707-1754.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

EC331

Quantitative Thesis

This information is for the 2023/24 session.

Teacher responsible: Dr Matthew Levy SAL 3.21

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Principles of Econometrics (EC221) or Econometrics II (EC2C1), or exceptionally Introduction to Econometrics (EC220) or Econometrics I (EC2C3) in combination with Econometrics II (EC2C4).

Course content: This course provides an opportunity to learn how to do independent quantitative economic research at an advanced level. Students are expected to pursue research on a question of their own choice under the supervision of a member of staff. They are expected to formulate an initial proposal near the start of AT in order to be matched with a supervisor, refining their choice into a manageable research question during that term. Following independent work during AT, a seminar in week 9 will review student progress. In the WT seminars, each student will present a preliminary outline of the results for comments by fellow students and teachers, and later a follow-up presentation on further, more final results and a draft thesis. Seminars in WT are formally timetabled as classes.

Teaching: 4 hours of seminars in the AT. 20 hours of seminars in the WT.

In week 11 of the AT and the WT students will work independently (with supervisory advice).

Formative coursework: Students are required to prepare material for their presentations in the seminar, but this is not formally assessed. Students are additionally expected to participate in discussion on the presentations of other students as this is part of the training of a research economist, but this is also not formally assessed.

Indicative reading: As each student chooses an individual research question, there is no common reading list for this course.

Assessment: Thesis (100%) in the ST.

A completed thesis (up to 10,000 words, not including abstract, footnotes, bibliography and tables) on an approved subject will be required to be submitted in the Spring term.

EC333

Problems of Applied Econometrics

This information is for the 2023/24 session.

Teacher responsible: Prof Mark Schankerman SAL.4.30 and Dr Pasquale Schiraldi SAL 4.22

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Mathematics and Economics, BSc in Philosophy, Politics and Economics and BSc in Philosophy, Politics and Economics (with a Year Abroad).

This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: Students must have completed Microeconomic

Principles I (EC201) or Microeconomic Principles II (EC202) or Microeconomics II (EC2A1) or Microeconomics II (EC2A3), or equivalent. Also, students must have completed introduction to Econometrics (EC220) or Principles of Econometrics (EC221) or Econometrics II (EC2C1) or Econometrics I (EC2C3) in combination with Econometrics II (EC2C4), or equivalent. Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or Microeconomics II (EC2A1) or Microeconomics II (EC2A3), or equivalent. Also, students must have completed introduction to Econometrics (EC220) or Principles of Econometrics (EC221) or Econometrics II (EC2C1) or Econometrics I (EC2C3) in combination with Econometrics II (EC2C4), or equivalent. Students who have completed EC220 or EC2C3 in combination with EC2C4, rather than EC221 or EC2C1, should refer to Dr Schiraldi for advice before starting the course regarding additional preparatory work for Winter term course material.

Course content: The purpose of this course is to provide a solid grounding in recent developments in applied micro-econometrics. A major feature of the course is the use of both analytical and computer-based (data) exercises for the classes, as well as reading applied economic papers from the journals which apply the techniques being taught. This mix will enable students to gain practical experience in analysing a wide variety of econometric problems. The topics covered in the Autumn term include randomised control experiments, exact and propensity score matching methods, difference-in-differences estimation, instrumental variables and the identification of the local average treatment effect, technique for estimating the marginal treatment effect, the weak instrument problems, and sharp and fuzzy regression discontinuity design. The lectures will be focused on the methodology, with particular emphasis on understanding the key assumptions required for each technique to deliver consistent estimates of the treatment effects. The Winter term will mainly focus on the following topics: the analysis of cross section and panel data, including fixed and random effects, computing standard error and clustering, issues of measurement error, binary choice models, maximum likelihood estimation, introduction to discrete choice model and demand estimation.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of WT (no lectures or classes that week).

This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Autumn term: Required weekly "referee reports" (3-4 pages) on assigned journal articles, and/or analytical exercises, with two graded. The choice of graded reports/exercises will not be announced beforehand. Feedback to be provided by the class teacher. Winter term: A required problem set, usually to include econometric questions and/or applications. Feedback to be provided by the class teacher.

Indicative reading: A detailed reading list will be provided at the beginning of each term of the course. In parts of the Autumn we will use sections from the textbook "Mostly Harmless Econometrics" by Angrist and Pischke. A complementary text, which is also available in an online version, is Scott Cunningham's "Causal Inference: The Mixtape." It is a good reference to gain intuition about the core causal methods we will study in the semester (although we will not have the time to cover all the methods discussed in the book). The level is somewhere between Stock & Watson and Angrist & Pischke.

There is no single text for the Winter term, but useful books include "A Guide to Modern Econometrics" by Marno Verbeek, "Introduction to Econometrics" By Stock and Watson (somewhat less advanced than the lectures) and "Econometric Analyses of Cross Section and Panel Data" by Wooldridge (somewhat more advanced than the lectures).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

EC334 Half Unit Advanced Macroeconomics

This information is for the 2023/24 session.

Teacher responsible: Jonathan Hazel (SAL.1.10) and Maarten De Ridder (SAL.1.11)

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in International Social and Public Policy and Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have completed Macroeconomics II (EC2B1) or Macroeconomic Principles (EC210), or Macroeconomics I (EC1B3) combined with either Macroeconomics II (EC2B3) or Macro-Finance (FM201), or equivalent.

Students should also have completed Econometrics I (EC2C3) and Econometrics II (EC2C4) or Introduction to Econometrics (EC220) or Principles of Econometrics (EC221), or otherwise show a capacity to read and understand applied research methods. Students who have thoroughly mastered mathematics to the level of Quantitative Methods (Mathematics) (MA107) should be able to follow the course but would find it difficult. Mathematical Methods (MA100) would give a better grounding.

Course content: The course is split into a few segments where, in each one, an advanced model in macroeconomics is covered, and its empirical implications are drawn out and taken to the data. The topics will be varied, but few, and depth will be privileged over breadth. The goal is to confront some key questions in macroeconomics: Why are some countries richer than others? Why does economic activity fluctuate? Why is inflation high? Why are exchange rates so volatile? The precise questions that will be covered every year will be connected to challenges at the time of the course. The emphasis is on introducing students to advanced tools that they can use broadly to answer macroeconomic questions.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours. 15 hours of lectures and 10 hours of classes in the Autumn Term.

Formative coursework: Students will submit and receive feedback on two pieces of formative work during the term.

Indicative reading: The course is mainly based on lecture notes and journal articles. As an example of the level and content of the reading in economics articles, students may wish to look at the following:

- Hazell, J., J. Herreno, J. E Nakamura, J. Steinsson 2022. "The Slope of the Phillips Curve: Evidence from US States" Quarterly Journal of Economics, 137: 1299-1344.
- De Ridder, M., B. Grassi, G. Morzenti (2022). "The Hitchhiker's Guide to Markup Estimation" CEPR discussion paper 17532
- Itskhoki, O. and D. Mukhin (2021). "Exchange Rate Disconnect in General Equilibrium" Journal of Political Economy, 2021, 129, 2183-2232

Assessment: Project (100%, 5000 words) in the WT.

EC335 Half Unit Economic Policy in the Global Economy

This information is for the 2023/24 session.

Teacher responsible: Dr Thomas Sampson (SAL.2.34)

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in International Social and Public Policy and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Politics and Economics. This

course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have completed Microeconomics II (EC2A1 or EC2A3) or Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202), or equivalent.

Students should also have completed Econometrics II (EC2C1) or Econometrics I (EC2C3) in combination with Econometrics II (EC2C4) or Introduction to Econometrics (EC220) or Principles of Econometrics (EC221), or equivalent.

Course content: The course explores economic policy in the global economy. We study the causes and consequences of international economic integration, focusing on how globalisation affects the trade-offs that shape policy. Both theoretical and empirical analyses will be considered. Key topics include international trade, capital flows, migration, technology diffusion, taxation in the global economy, and the relationship between globalisation and national sovereignty.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours.

15 hours of lectures and 9 hours of classes in the Winter Term. 1 hour of classes in the Spring Term. There will be a reading week in Week 6 of Winter Term (no lectures or classes that week).

Formative coursework: Students will submit and receive feedback on two problem sets during the term.

Indicative reading: The course is mainly based on lecture notes and journal articles. As an example of the level and content of the reading in economics articles, students may wish to look at the following:

- Rodrik, D. 2011. The Globalization Paradox. Oxford University Press.
- Harrison, A. and Scorse, J. 2010. "Multinationals and Anti-Sweatshop Activism" *American Economic Review* 100(1): 247-273.

Assessment: Exam (90%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.
Class participation (10%) in the WT.

EC336 Half Unit

Econometric Theory A

This information is for the 2023/24 session.

Teacher responsible: Prof Taisuke Otsu SAL.4.25

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics and BSc in Mathematics and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: A good knowledge of linear algebra, calculus and statistical theory is essential, so Mathematical Methods (MA100) and either Elementary Statistical Theory (ST102) or Elementary Statistical Theory I (ST109) in combination with Econometrics I (EC1C1), or equivalent.

Students should have also completed either Econometrics II (EC2C1) or have a strong performance in Econometrics I (EC2C3) and Econometrics II (EC2C4), or equivalent.

Students seeking permission to take this course as an outside option should consult with Professor Otsu before selecting this course.

Course content: This proof-based course focuses on an in-depth exploration of cross-sectional data environments and linear models, consolidating and building on theoretical and analytical skills learned in the Year 2 econometrics sequence.

The course will begin with a review of probability theory, and then covers central limit theory, inference, asymptotic theory for OLS, instrumental variables regression (linear), generalized method of moments (linear) and maximum likelihood.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours in the Autumn Term (AT). 15 hours of lectures and 10 hours of classes in

the AT.

Formative coursework: Students are expected to engage with problems on a weekly basis and to make positive contributions to class discussions. Students will receive feedback on two problem sets during the term.

Indicative reading: Core reading will be from the following texts:

- Hansen, Bruce. *Probability and Statistics for Economists*. Princeton University Press, 2022.
- Hansen, Bruce. *Econometrics*. Princeton University Press, 2022.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

EC337 Half Unit

Econometric Theory B

This information is for the 2023/24 session.

Teacher responsible: Prof Javier Hidalgo (SAL.4.20)

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics and BSc in Mathematics and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: A good knowledge of linear algebra, calculus and statistical theory is essential, so Mathematical Methods (MA100) and either Elementary Statistical Theory (ST102) or Elementary Statistical Theory I (ST109) in combination with Econometrics I (EC1C1), or equivalent.

Students should have also completed either Econometrics II (EC2C1) or have a strong performance in Econometrics I (EC2C3) and Econometrics II (EC2C4), or equivalent.

Students seeking permission to take this course as an outside option should consult with Professor Hidalgo before selecting this course.

Course content: This methodology course covers general data environments (time series, panel data and clustered data) and various models (dynamic, non-linear, simultaneous equations etc), broadening knowledge and understanding of topics explored in the Year 2 econometrics sequence.

Topics covered: method of moments and GMM (general); generalized least squares (heteroskedasticity and autocorrelation); dynamic model and time series analysis; system of equations and simultaneous equations; panel data analysis; hypothesis testing: general principle and applications; bootstrap; unit root and cointegration.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours. 15 hours of lectures and 9 hours of classes in the Winter Term (WT); 1 hour of classes in the Spring Term (ST).

There will be a reading week in Week 6 of WT (no lectures or classes that week).

Formative coursework: Students are expected to engage with problems on a weekly basis and to make positive contributions to class discussions. Students will receive feedback on two problem sets during the term.

Indicative reading: Core reading will be from the following texts:

- Davidson, Russell, and James G. MacKinnon. *Econometric theory and methods*. Vol. 5. New York: Oxford University Press, 2004.
- Harvey, Andrew C. *The econometric analysis of time series*. MIT Press, 1990.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

EC33 Half Unit

International Trade

This information is for the 2023/24 session.

Teacher responsible: Dr Isabela Manelici (SAL.2.29)

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in International Social and Public Policy and Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Microeconomics II (EC2A1) or Microeconomics I (EC1A3) combined with Microeconomics II (EC2A3), or Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202), or equivalent.

Course content: This course offers an introduction to international trade theory and develops the main tools for trade policy analysis. We start by studying the patterns of trade distinguishing between inter-industry and intra-industry trade flows. We then proceed to an in-depth analysis of the causes and the effects of those flows based on the concepts of absolute and comparative advantage, relative factor abundance and relative factor intensity, increasing returns to scale and imperfect competition. Finally, we discuss the gains and losses from trade, their distribution among people and firms, and their implications for the debate on trade liberalization versus protectionism.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours in the Autumn Term (AT). 15 hours of lectures and 10 hours of classes in the AT.

Formative coursework: Students are expected to complete a problem set weekly, two of which will be marked, and feedback provided.

Indicative reading: Students can consult the textbook:
• Paul Krugman, Marc Melitz and Maurice Obstfeld; International Economics: Theory and Policy, 12th edition, Pearson. (Earlier editions are also relevant).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

EC339 Half Unit

International Macroeconomics

This information is for the 2023/24 session.

Teacher responsible: Dr Keyu Jin (SAL.1.17)

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in International Social and Public Policy and Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have completed Macroeconomics II (EC2B1) or Macroeconomic Principles (EC210), or Macroeconomics I (EC1B3) combined with either Macroeconomics II (EC2B3) or Macro-Finance (FM201), or equivalent.

Course content: This course offers an introduction to international

macroeconomic theory and develops the main tools for macroeconomic policy analysis. We start by studying the balance of payments and the causes and consequences of global imbalances, followed by an in-depth study of the determination of exchange rates, money, and prices in open economies. We discuss the costs and benefits of different nominal exchange rate regimes and their sustainability, as well as examine the causes and consequences of debt and default, speculative attacks and financial crises.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours. 15 hours of lectures and 9 hours of classes in the Winter Term (WT); 1 hour of classes in the Spring Term (ST).

There will be a reading week in Week 6 of WT (no lectures or classes that week).

Formative coursework: Students are expected to complete a problem set weekly, two of which will be marked, and feedback provided.

Indicative reading: Students can consult the textbook:

• Paul Krugman, Marc Melitz and Maurice Obstfeld; International Economics: Theory and Policy, 12th edition, Pearson. (Earlier editions are also relevant).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

EH101

The Internationalisation of Economic Growth, 1870 to the present day

This information is for the 2023/24 session.

Teacher responsible: Prof Neil Cummins SAR 5.13, Prof Sara Horrell SAR 6.03 and Prof Christopher Minns SAR 6.15

Availability: This course is compulsory on the BSc in Economic History, BSc in Economic History and Geography and BSc in Economics and Economic History. This course is available on the BA in History, BSc in Actuarial Science, BSc in International Relations, BSc in Politics and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the inter-relationships between the development of the international economy and the growth of national economies since the late nineteenth century. The course is designed to introduce students not only to a wide variety of topics and issues, but also to the wide variety of approaches used by historians. The course includes analyses of the original leading nation, Britain, and its replacement, the United States, as well as the catch-up of areas such as continental Europe, and the failure to catch-up of earlier well-placed areas such as Latin America. The effects of major events - such as wars and debt crises - are investigated, and we also consider the implications of changing global economic institutions, such as the Gold Standard and IMF, as well as the effects of sometimes rapid changes in product and process technology.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn Term and Winter Term.

This course includes a reading week in Week 6 of AT and WT.

Formative coursework: Students are expected to write an annotated bibliography, three very short essays and two longer essays during the year.

Indicative reading: The following are particularly useful:

- R C Allen, Global Economic History: A Very Short Introduction (2011).
- R Floud, J Humphries & P Johnson (Eds), The Cambridge Economic History of Modern Britain, Vol 2 (2014).
- B Eichengreen, Globalizing Capital: A History of the International Monetary System (2008).
- K H O'Rourke and J G Williamson, Globalization and History: The

- Evolution of a Nineteenth-Century Atlantic Economy (1999).
- E Jones, L Frost & C White, *Coming Full Circle. An Economic History of the Pacific Rim* (1993).
 - M S Blackford, *The Rise of Modern Business in the USA, Britain and Japan* (1998).
- (A complete reading list and class topics will be given out at the first meeting.)
- Assessment:** Exam (100%, duration: 3 hours) in the spring exam period.

EH102

Pre-industrial Economic History

This information is for the 2023/24 session.

Teacher responsible: Dr Jordan Claridge SAR 5.05

Availability: This course is compulsory on the BSc in Economic History and BSc in Economics and Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course surveys long-term processes of growth and development in late medieval and early modern Europe (eleventh to eighteenth centuries). It focuses on the transition from a hierarchical society of estates or corporate orders to a market society based on legal equality and freedom of contract. There are two core questions: First, why did this transition occur in an evolutionary way in England and the Netherlands, whereas it was severely delayed the rest of Europe? And second, how is it related to the 'small divergence' between the Dutch Republic and England on the one side and most of the Continent on the other, where the North-West enjoyed significantly higher living standards and per capita incomes than other countries long before the onset of industrialisation?

The course thus raises fundamental questions about societies and economies: Was pre-industrial economic growth transitory and regional? Or was it a recurrent, even normal phenomenon, which however could occasionally be reversed? Was Dutch and British success the result of their social and institutional features? Or was it a combination of geographical factors and good fortune? To what degree did early modern governments help or hinder economic development? Did Europe's political fragmentation hold back the continent's development, or did competition between states have beneficial consequences? In conclusion, can we define an optimal combination of social, political, and economic institutions that sustained growth in the past (and thus, perhaps, in the future)?

The course has a strong focus on skills training, in particular on essay writing.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across AutumnTerm and WinterTerm.

This course includes a reading week in Week 6 of Autumn and Winter Term.

Formative coursework: Students will be expected to produce 1 exercise and 1 other piece of coursework in the AT.

Students are expected to produce two pieces of formative written coursework in the Autumn Term. They will give formative presentations on topics that form part of the course content. They will receive structured feedback on their formative coursework.

Indicative reading:

- Anderson, J.L. (1991): *Explaining long-term economic change*, Cambridge (Cambridge University Press).
- Cipolla, C.M. ed. (1971/72). *The Fontana economic history of Europe*, vols. 1 and 2, London (Fontana).
- de Vries, J. (1976). *The economy of Europe in an age of crisis, 1600-1750*, Cambridge, London, New York etc. (Cambridge University Press).
- Hatcher, J. and Bailey, M. (2001): *Modelling the Middle Ages. The History and Theory of England's Economic Development*, Oxford

(Oxford University Press).

- Miskimin, H. (1969). *The Economy of Early Renaissance Europe 1300-1460*. Englewood Cliffs/NJ: Prentice-Hall.
- Miskimin, H. (1977). *The Economy of Later Renaissance Europe 1460-1600*. Cambridge, London, New York, Melbourne: Cambridge University Press.
- Persson, K. G. (2010). *An Economic History of Europe: Knowledge, Institutions and Growth, 600 to the Present*. Cambridge: Cambridge University Press.

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.
Essay (30%, 2000 words) in the WT.

EH111 Half Unit

The Internationalisation of Economic Growth

This information is for the 2023/24 session.

Teacher responsible: Prof Neil Cummins SAR 5.13 and Prof Christopher Minns SAR 6.15

Availability: This course is available as an outside option to students on non-Economic History programmes where regulations permit and to General Course students.

Course content: The course examines the inter-relationships between the development of the international economy and the growth of national economies until the late nineteenth century. The course is designed to introduce students not only to a wide variety of topics and issues, but also to the wide variety of approaches used by historians. The course includes analyses of the original leading nation, Britain, and its replacement, the United States, as well as the catch-up of areas such as continental Europe, and the failure to catch-up of earlier well-placed areas such as Latin America.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across AutumnTerm.

This course includes a reading week in Week 6 of AT.

Formative coursework: Students are expected to write an annotated bibliography, a very short essay and a longer essay during the term.

Indicative reading: The following are particularly useful:

- R C Allen, *Global Economic History: A Very Short Introduction* (2011).
- K H O'Rourke and J G Williamson, *Globalization and History: The Evolution of a Nineteenth-Century Atlantic Economy* (1999).
- G. Clark, *A Farewell to Alms* (2007)

(A complete reading list and class topics will be given out at the first meeting.)

Assessment: Take-home assessment (100%) in the WT.

EH204

Money and Finance: From the Middle Ages to Modernity

This information is for the 2023/24 session.

Teacher responsible: Prof Oliver Volckart SAR 6.10 and Prof Albrecht Ritschl SAR 6.06

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides an overview of the main developments in monetary and financial history from 800 to the present day, taking the students from the simple beginnings of medieval European monetary history to the complex financial arrangements of the modern world. The first part of the course

covers the emergence of money and finance from the medieval ages to the early modern period. The second part examines the main developments in the global financial system since the nineteenth century. Historical developments in major European and non-European countries (England, Spain, Italy, France, Germany, USA) will be discussed and compared. The course is designed to introduce students to the main concepts of money and finance (financial development, financial integration, monetary policy, banking crises etc.) and to provide a long run perspective to the current policy debate.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a Reading Week in Week 6 of AT and WT.

Formative coursework: The students will produce one formative essay in AT, and one outline of their summative essay in WT. The exercise will help them practice academic writing (structuring and presenting arguments, providing explanations, referencing etc.); a skill both necessary for the dissertation they are expected to write in year 3 and helpful for the exam of this course that will take place in summer term. The class presentation has a formative character, too. Students will practice presenting complex arguments to their peers and answering questions from the audience.

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Essay (15%, 1500 words) in the AT.

Essay (15%, 1500 words) in the WT.

Coursework of two take home essays of 1,500 words (inclusive of bibliography and footnotes) to be completed independently by each individual student. The essays should develop arguments, analysis and evidences on a specific research question (or a set of research questions) chosen by the student in consultation with teachers and should be related to the course materials covered. While it is essential to demonstrate one's grasp of the course material, students are encouraged to develop their own insights and arguments going beyond the course material.

Eh207

China since 1800: Culture, institutions and economic growth

This information is for the 2023/24 session.

Teacher responsible: Dr Melanie Meng Xue SAR 6.12

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: A background in econometric methods is preferred but not required.

Course content: The first half of the course focuses on facts and follows a chronological order, covering major phases of historical China, including pre-1800 China, the Great Divergence, late Qing and Republican China, Communism, and post-1979 economic and political reform. The second half of the course is more analytical and examines a number of topics, including (1) Geography, (2) Institutions, (3) States, (4) Culture, (5) Gender, (6) Human capital, (7) Social Mobility, (8) Trade & Markets, (9) Disasters.

Eh209

The Family Economy in History: 1260 to the present day

This information is for the 2023/24 session.

Teacher responsible: Prof Sara Horrell SAR 6.03

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Introductory economics is not a strict pre-requisite for this course, but students may find a basic introduction to economics helpful in understanding some of the material.

Course content: In recent accounts the actions of individuals within families and the household have emerged as important explanations for pre-industrial and industrial economic growth. Female agency in marriage decisions resulted in a variant of household formation which allowed high living standards after the ravages of the Black Death. Later, the consumption desires of households prompted increased market participation of women and children, creating an early modern industrious revolution with the potential to evolve into industrial revolution. High wages and child labour have both emerged as contenders in determining the path to industrialisation, and shifts in the provision of education and health services have impacted women's duties within the household and their opportunities in the wider economy throughout the twentieth century. This course examines the role played by the family in determining the path of development. While the lectures largely relate to the British experience, the classes and assessment invite comparisons with experiences in Europe, Asia, and North America. Simple economic models of individual and household behaviour provide the theoretical basis for understanding outcomes, but the focus is on evidence, often quantitative, and critical evaluation of contending explanations.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn and Winter Term.

This course includes a reading week in Week 6 of Autumn and Winter Term.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the AT and 1 essay and 1 presentation in the WT.

Students are expected to write two essays or equivalent pieces of written work.

Students are expected to participate in group presentations of specific readings to the rest of the class twice during the course.

Indicative reading:

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Essay (30%, 3000 words) in the WT.

The summative essay chosen from a selection of topics covered during the course.

Eh211 Not available in 2023/24

Africa and the World Economy, 1500-2000

This information is for the 2023/24 session.

Teacher responsible: Prof Leigh Gardner SAR 5.07

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines the economic history of Africa from the medieval period to the present. Its overall aim is to situate Africa within global economic history, illustrating how Africa and Africans contributed to global economic change as well as exploring the impact of those changes on African economies. Lectures provide a chronological introduction to significant periods in African economic history, from the trans-Saharan trade through the slave trade, colonial rule, and independence. The course ends by considering the significance of recent economic expansions and population growth. While lectures and classes focus on broader themes, assessed work includes a case study research project allowing students to learn about the diversity of experience around the continent.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term. Lectures will either be recorded or given in the form of live webinars. This year, while we are planning for most classes and seminars to be delivered in-person, it is possible that some or all of this teaching may have to be delivered virtually.

This course includes a reading week in Week 6 of Michaelmas and Lent Term.

Formative coursework: Students should expect to complete two formative assignments per term. This will include one essay or equivalent plus an assignment related to the summative case study project. Students will need to have the selection of their case study approved by the course convener by the end of MT, and prepare an outline and reading list by the middle of LT.

Indicative reading: For a general overview of African history over the period, see R.J. Reid, *A History of Modern Africa* (2009); J. Iliffe, *Africans: The History of a Continent* (1995). For accessible introductions to a variety of themes in African economic history, see the African Economic History Network's online textbook, *The History of African Development*.

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Project (30%, 3000 words) in the ST.

The research project will involve a case study (3000 words) of an African country, focused on one of the themes/questions addressed in the course.

Eh214 Half Unit

Money and Finance: From the Middle Ages to the Eighteenth Century

This information is for the 2023/24 session.

Teacher responsible: Prof Oliver Volckart SAR 6.10

Availability: This course is available as an outside option to students on non-Economic History programmes where regulations permit and to General Course students

Course content: The course provides an overview of the main developments in monetary and financial history from 800 to the eighteenth century, taking the students from the simple beginnings of medieval European monetary history to the emergence of the complex financial arrangements characterising the modern world. Historical developments in major European and non-European countries (England, Spain, Italy, France, Germany) will be discussed and compared. The course is designed to introduce students to the main concepts of money and finance (commodity money, inflation and deflation, financial development, financial integration, monetary policy etc.).

Teaching: 10 hours of lectures and 10 hours of classes in the AT. There will be a Reading Week in Week 6 of AT.

Formative coursework: The students will produce one formative essay. The exercise will help them practice academic writing (structuring and presenting arguments, providing explanations, referencing etc.); a skill helpful for the exam of this course that will take place in the January exam period. The class presentation has a formative character, too. Students will practice presenting

complex arguments to their peers and answering questions from the audience.

Indicative reading: 1. Barrett, W. (1990): *World Bullion Flows, 1450-1800*, in: Tracy, J.D., ed., *The Rise of Merchant Empires: Long-Distance Trade in the Early Modern World 1350-1750*, Cambridge (Cambridge University Press), pp. 224-254.

2. Volckart, O. (2018). *Money and its Technologies: The Principles of Minting in the Middle Ages*, in: Naismith, R., ed., *A Cultural History of Money in The Medieval Age*, London (Bloomsbury Academic), pp. 15-35.

3. Spufford, P. (1991): *Money and its Use in Medieval Europe*, Cambridge et al. (Cambridge University Press).

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

EH215 Half Unit

Money and Finance: From the Eighteenth Century to Modernity

This information is for the 2023/24 session.

Teacher responsible: Prof Albrecht Ritschl SAR 6.06

Availability: This course is available as an outside option to students on non-Economic History programmes where regulations permit and to General Course students.

Course content: The course provides an introduction into monetary and financial history from the 18th century to the present day. It examines the main developments in international monetary architecture and the global financial system since the Glorious Revolution. The course is designed to introduce students to major concepts of money and finance (financial development, financial integration, monetary policy, banking crises etc.) and to provide a long run perspective to the current policy debate.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. There will be a Reading Week in Week 6 of WT.

Formative coursework: The students will produce one formative essay. The exercise will help them practise academic writing (structuring and presenting arguments, providing explanations, referencing etc.); a skill helpful for the exam of this course that will take place in the spring exam period. Students will also give a formative class presentation to practice presenting complex arguments to their peers and answering questions from the audience.

Indicative reading:

1. Neal, L. *The Rise of Financial Capitalism*, Cambridge and New York, Cambridge University Press, 1990.

2. Eichengreen, B. (1992), *Golden Fetters: The Gold Standard and the Great Depression, 1919-1939*, Oxford (Oxford University Press).

6. Reinhart, C. and K. Rogoff (2009), *This Time Is Different: Eight Centuries of Financial Folly*, Princeton (Princeton University Press).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

EH217 Half Unit Not available in 2023/24

Chinese Economic History since 1800: A Chronology

This information is for the 2023/24 session.

Teacher responsible: Dr Melanie Meng Xue SAR 6.12

Availability: This course is available as an outside option to students on non-Economic History programmes where regulations

permit and to General Course students.

Pre-requisites: A background in statistical methods is preferred but not required.

Course content: The first half of the course follows a chronological order, covering major phases of historical China, including traditional China, the Great Divergence, late Qing and Republican China, Communist era, and post-1979 economic reform.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students are expected to produce 1 essay during the teaching term.

Indicative reading:

• Deng, Kent, *Mapping China's Growth and Development in the Long Run, 221 BC to 2020* (London: World Scientific Press and Imperial College Press);

• Richard von Glahn, *The Economic History of China: From Antiquity to the Nineteenth Century* Cambridge University Press, 2016;

Boom and Bust: Macroeconomic History of the Modern World

This information is for the 2023/24 session.

Teacher responsible: Dr Jason Lennard

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography and BSc in Economics and Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Business cycles have destabilised societies for centuries. These fluctuations are mini-disasters that are associated with drops in welfare and economic growth. Beyond the economic costs, business cycles have other adverse effects, such as on health and politics.

This course explores the short-run in a long-run perspective to understand the causes and consequences of business cycles. The first part of the course covers the basics: how to define and measure business cycles, the costs of business cycles, the key business cycle facts, and models of the business cycle. The second part investigates propagation mechanisms, such as sticky prices and wages. The third part of the course focuses on impulses, such as shocks to technology, economic policy, financial crises, expectations, and uncertainty.

The course studies advanced and developing economies from the Industrial Revolution to the present. This interval of modern economic history includes deep recessions, major financial panics, reversals of expectations, and episodes of nominal inertia.

Teaching: 10 hours of lectures and 9 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the AT and WT.

Indicative reading:

Essay (30%, 3000 words) in the ST.

EH222

Economic History of the Middle East and North Africa

This information is for the 2023/24 session.

Teacher responsible: Prof Mohamed Saleh SAR 5.12

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course explores the economic history of the Middle East and North Africa (MENA). Many, if not most, of MENA's contemporary problems cannot be understood without a deep understanding of its history, not only during the postcolonial period, but also during the precolonial and colonial periods. The course will first introduce students to the definition of the MENA region, and the broad trends in its history since antiquity. It will then examine specific themes that are of great importance for understanding the economic history of the region, such as: how most of MENA's population became Muslims in the Middle Ages? What do we know about MENA's economic performance vis-à-vis Europe in the long run? How did "Islamic" institutions emerge? What legal rights did people have over land and labor? We will also discuss state-led development, inequality, education, socioeconomic inequality across ethnoreligious groups, and the demographic transition. Throughout the course, we will focus on the view from below, examining the living conditions, preferences, and behavior of local populations, rather than taking a macroeconomic perspective that studies MENA only in comparison to Europe. We will also emphasize the recent developments in MENA economic history based on novel data sources, including MENA local archives, papyrology, medieval chronicles, literary sources, and archeology. In terms of methods, the course will draw upon both qualitative and quantitative approaches to history, employing economic

theory, econometric methods, novel data sources, and solid historical evidence.

Due to its interdisciplinary nature, this course should be of interest to students in economic history, economics, international history, political science, and international development.

Teaching: 10 hours of lectures and 9 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of AT and LT.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the AT and 1 presentation in the WT.

Indicative reading:

1. Cuno, K. M. (1992). *The Pasha's Peasants: Land, Society, and Economy in Lower Egypt 1740–1858*. Cambridge: Cambridge University Press.

7. Pamuk, S. (1987). *The Ottoman Empire and European Capitalism, 1820–1913: Trade, Investment and Production*. Cambridge: Cambridge University Press.
8. Artung, C. (2015). "The Price of Legal Institutions: The Beratli Merchants in the Eighteenth-Century Ottoman Empire." *The Journal of Economic History*, 75(3), 720–748.

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Essay (30%, 3000 words) in the WT.

The relative weighting of the two modes of assessment follows agreed norms in the Department of Economic History, which are helpful in managing student expectations and workloads.

EH225

Latin America and the International Economy

This information is for the 2023/24 session.

Teacher responsible: Dr Alejandra Irigoin, SAR.6.11

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the development trajectory of Latin America and its relation with the international economy from the Early Modern period (c. 1700) to the present. It focuses on the political and economic factors that drove - and that resulted from- the region's engagement with the world economy attending to the environment, population and factor endowments, institutions and policies. The causes and outcomes of this 'engagement' will be explored in the following broad themes: the determinants of Latin American growth performance, the political economic legacy of colonialism and of the formation of modern states and markets; the ambivalent relation with international markets and institutions, the continuous quest for development together with political and macroeconomic instability; the economic policies of different political experiments and political culture - from authoritarian to democratic regimes and various generations of populism interspersed with military rule and direct democracy- and the short and long run impact on equality, poverty and the prospect for sustained intensive growth.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn and Winter Term.

This course includes a reading week in Week 6 of Autumn and Winter Term.

Formative coursework: Students are expected to write a short weekly report, to be presented verbally, either individually or in a team throughout the course.

Indicative reading: V. Bulmer-Thomas (2014) *The Economic History of Latin America since Independence*, Cambridge University Press, *Ibid.* (2012) *The Economic History of the Caribbean since the Napoleonic Wars*, Cambridge University Press; P. Theories and Evidence in Economic History

This information is for the 2023/24 session.

Teacher responsible: Prof Patrick Wallis SAR 5.11

Prof Eric Schneider SAR 5.18

Availability: This course is compulsory on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: This course teaches students how to conduct, evaluate and interpret research in economic history. Taking a practical, applied approach, students will design and conduct three research projects drawing heavily upon the archival material available in the LSE Archives and Library. The course also introduces students to critical interpretation and analysis of primary sources and research methodologies. By the end of the course, students will have a good understanding of research design, historical sources and methods, which will leave them well-prepared for their dissertation in their final year. In addition, they will have a non-technical understanding of more complex quantitative methods such as regression so that they can engage critically with current scholarship in economic history.

Teaching: This course is delivered through a combination of classes, workshops and lectures totalling a minimum of 40 hours across Autumn and Winter Term.

This course includes a reading week in Week 6 of Autumn and Winter Term.

Formative coursework: Students are expected to write one formative essay and complete other shorter formative coursework for the course.

Indicative reading: J Tosh, *The Pursuit of History* (2002), L Jordanova, *History in Practice* (2000), CH Feinstein and M Thomas,

Making History Count (2002), and P Hudson, History by Numbers (2000)

Assessment: Project (25%, 4000 words) in the AT.

Project (50%, 3000 words) in the ST.

In-class assessment (15%) in the WT.

Class participation (10%) in the AT and WT.

Assessment comprises a group project (25%, 4000 words) in the AT; an individual project (50%, 3000 words) due in ST; a summative in-class exercise (15%) in the WT; and 10% for participation and submission of formative work.

EH238

The Origins of Growth

This information is for the 2023/24 session.

Teacher responsible: Prof Neil Cummins SAR 5.13

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course explores the origins of modern economic growth through major themes such as life, love, death, place and inheritance. The focus is on the world's first breakthrough in Britain during the Industrial Revolution. Students will be exposed to frontier debates in economic history. Widespread use is made of intuitive econometrics, interdisciplinary insights and historical context.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn and Winter Term.

This course includes a reading week in Week 6 of AT and WT.

Formative coursework: During the course students are expected to write four essays or equivalent pieces of written work.

Indicative reading: Allen, *The British Industrial Revolution in Global Perspective*; Clark, *A Farewell to Alms*; Diamond, *Guns, Germs and Steel*; Henrich, *The WEIRD People in the World*; Piketty, *Capital in the 21st Century*; Clark, Cummins et al., *The Son also Rises*

Assessment: Exam (90%, duration: 3 hours) in the spring exam period.

Class participation (10%) in the AT, WT and ST.

EH240

Business and Economic Performance since 1945: Britain in International Context

This information is for the 2023/24 session.

Teacher responsible: Dr Gerben Bakker SAR 6.04

Availability: This course is available on the BSc in Accounting and Finance, BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Management and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the successes and failures of British business and industry, with an emphasis on the post-World War II period. It assesses many of the hypotheses on why the UK economy grew more slowly than other OECD nations during this period. Explanations of relative economic decline are examined in the context of comparisons with other European nations and with the US, Japan and more recently China. The course is organised to combine major economic and political themes, such as de-industrialisation, globalisation, education and

training, management organisation and practices, labour relations, and Britain's relationship with the EEC/EU, with case studies of industries as diverse as textiles, motors, banking, pharmaceuticals, and steel. By interacting themes and case studies, students get a sense of how national policies can affect business opportunities, and how governments can both aid and harm business.

The impact of government policies such as nationalisation/privatisation, regional policy and competition are also examined in this context. The primary focus is on the post-World War II period, including current changes in performance, but the historical roots of Britain's recent performance are also considered.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn and Winter Term.

This course includes a reading week in Week 6 of AT and WT.

Formative coursework: During the course students are expected to write three essays or equivalent pieces of written work.

Indicative reading: The main work used in the course is G. Owen, *From Empire to Europe: The Decline and Revival of British Industry since the Second World War* (2000). The following are also useful: S. Broadberry, *The productivity race: British manufacturing in international perspective 1850-1990* (1997), R Floud & P Johnson (Eds), *The Cambridge economic history of modern Britain: structural change and growth, 1939-2000* (2004), B Elbaum & W Lazonick (Eds), *The Decline of the British Economy* (1986), M. Blackford, *The rise of modern business: Great Britain, the United States, Germany, Japan, and China* (2008).

Assessment: Take-home assessment (100%) in the ST.

EH304

The Economic History of North America: from Colonial Times to the Cold War

This information is for the 2023/24 session.

Teacher responsible: Prof Christopher Minns SAR 6.15

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students taking the course as an outside option must have completed at least one other economic history course.

Course content: The course surveys major developments in the economic history of North America between 1600 and 2000. Colonial development; the American Revolution; Early North American Industry; Slavery; Westward expansion; the American Civil War; Regional Economic Development; Railroads and growth; International and internal trade; Finance and banking in the 19th century; Migration and labour markets in the 19th century world wars and North American Economies; the Great Depression; Post-war economic development and policy.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn Term and Winter Term. This course includes a reading week in Week 6 of Autumn and Winter Term.

Formative coursework: At least one essay and a mock examination.

Indicative reading:

- Atack and Passell, *A New Economic View of American History* (1994);
- Engerman and Gallman, *The Cambridge Economic History of the United States*, vols 1,2,3 (2000);
- Hughes, *American Economic History* (1990);
- Haines and Steckel (eds.), *A Population History of North America* (2000).

Assessment: Essay (30%, 3000 words) in the AT.

Take-home assessment (70%) in the ST.

The course is assessed via a summative essay in AT (30%) and an

online take home exam (70%) in spring exam period.

EH306

Monetary and Financial History since 1750

This information is for the 2023/24 session.

Teacher responsible: Prof Olivier Accominotti SAR 5.14

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.

Course content: This course covers international Monetary and Financial History since the mid-18th century. The course is designed to introduce students to the key issues around globalised finance and money. It will look into the rise and eventual demise of the Gold Standard, the emergence and occurrence of financial crises, the globalisation and geography of financial markets, and changes in policy responses and regulation over time.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn Term and Winter Term. The two-hour seminar in ST will be a revision seminar.

This course includes a reading week in Week 6 of Autumn and Winter Term.

Formative coursework: During the course students are expected to write three essays or equivalent pieces of written work

Indicative reading: Kindleberger, Manias, Panics, and Crashes, Ferguson, Ascent of Money, Foreman-Peck, History of the World Economy, Eichengreen, Golden Fetters, Eichengreen, Globalising Capital.

Assessment: Take-home assessment (100%) in the ST.

EH307 Not available in 2023/24

The Economic History of South Asia, 1600-2000

This information is for the 2023/24 session.

Teacher responsible: Prof Tirthankar Roy SAR 6.16

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.

Course content: South Asia is one of the fastest growing economies of the world. The region is also home to nearly one-third of the world's poorest people. How did this paradoxical mix between the creation of wealth and persistence of poverty come into being? Does economic history suggest an answer? The course introduces the stylized facts and major debates in the economic history of modern South Asia. It considers the legacies of empires and developmental states, globalizations of the past and the present times, and the role of indigenous institutions and resource endowments. The course begins with a discussion of empires and markets before European colonial rule began, with special reference to maritime trade and craft production, in which the European East India companies were interested in. For the colonial period, the major theme is the transformation engendered by colonialism and international economic integration. In the sixty years since the end of colonial rule, developmental states tried to overcome the obstacles to growth as the economists interpreted them. The course considers how successful they were in meeting the aim, and why they were limitedly successful.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of Michaelmas and Lent Term.

Formative coursework: Students are expected to write three essays or equivalent pieces of written work.

Indicative reading:

1. Dietmar Rothermund, An Economic History of India (1993)
2. B.R. Tomlinson, The Economy of Modern India (2013)
3. Tirthankar Roy, The Economic History of India 1757-2010 (2020)
4. G. Balachandran, ed., India and the World Economy 1850-1950 (2003)
5. Latika Chaudhary and others, eds., A New Economic History of Colonial India (2016)
6. P.J. Marshall, ed., The Eighteenth Century in Indian History (2004)

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

EH308

Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries

This information is for the 2023/24 session.

Teacher responsible: Prof Juan Roses Vendoiro SAR 5.15

Availability: This course is compulsory on the BSc in Economic History and Geography. This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course explores how and why the location of economic activities changes across time and space from industrialization up to the present. One goal for this course is to demonstrate the importance of history in the formation of the present-day economic landscape. An equally important goal is to demonstrate the applicability of the study of economic geography to the understanding of historical patterns of development and underdevelopment. The course is not organized chronologically but thematically. Particular attention focuses on four major issues: the development of cities, the creation of national markets, the historical basis for manufacturing agglomeration, and the historical evolution and sources of regional inequality.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

This course is delivered via 2-hour seminars in Autumn and Winter Term.

The course includes a reading week in Week 6 of Autumn and Winter Term..

Formative coursework: All students are expected to write one formative essay, or similar piece of work, and make one formative presentation that will not be used in the final assessment.

Indicative reading: Combes, Pierre-Philippe, Thierry Mayer and Jacques-François Thisse, Economic Geography: The Integration of Regions and Nations. Princeton University Press, 2008. Garretsen, Harry and Martin, Ron (2010), Rethinking (New) Economic Geography Models: Taking Geography and History More Seriously, Spatial Economic Analysis, 5, 2, pp. 127-160. Joan Ramón Rosés and Nikolaus Wolf (eds), The Economic Development of Europe's Regions: A Quantitative History since 1900, Routledge, 2018. Daniel A. Tirado-Fabregat, Marc Badia-Miro, Henry Willebald (eds) Time and Space: Latin American Regional Development in Historical Perspective, Palgrave, 2020. W.Walker Hanlon and Stephan Heblich (2022), History and urban economics, Regional Science and Urban Economics, 94.

Assessment: Essay (35%, 3500 words) and presentation (30%) in the WT.

Essay (35%, 3500 words) in the ST.

EH312**Knowledge, Technology and Economy from the Middle Ages to Modernity**

This information is for the 2023/24 session.

Teacher responsible: Dr Jordan Claridge SAR 5.05

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.

Course content: How has technology changed the way we live? How have humans managed to raise levels of productivity under a range of different circumstances and in an array of environmental conditions? This course addresses these questions through an exploration of the production and diffusion of knowledge and how this has affected technical change and economic growth in the very long run, from the Middle Ages to modernity.

The course will explore, both theoretically and empirically, how economists and historians have accounted for technical change. Social scientists have for decades tried to parse the respective contributions of capital, technology and labour to economic development. To what extent do the differing roles ascribed to technical change account for divergent interpretations of the key factors in long-run economic development and productivity growth? How can we explain shifts in the locus of technological leadership and dynamism over time?

These themes will be expanded upon throughout the course with case studies drawn from across place and time. We will look closely at paradigm-changing innovations and their economic effects from, for example, the introduction of the heavy plough, the clock and the printing press in the Middle Ages to more recent technologies like steam, railways, telegraphs, electricity and shifts in production technology towards automation.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Autumn Term and Winter Term.

The course includes a reading week in Week 6 of Autumn and Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 essay in the WT.

Students are also expected to give one presentation to class.

Indicative reading:

- Edgerton, David. *The Shock of the Old : Technology and Global History since 1900* (London: Profile, 2008).
- Landes, David S. *The Unbound Prometheus : Technical Change and Industrial Development in Western Europe from 1750 to Present* (New York: Cambridge University Press, 2003).
- MacKenzie, Donald A. *Knowing Machines : Essays on Technical Change*. (Cambridge: MIT Press, 1998)
- Moky, Joel. *The Gifts of Athena*. (Princeton: Princeton University Press, 2002).
- Rosenberg, Nathan. *160Inside the Black Box: Technology and Economics* (Cambridge: Cambridge University Press, 1983).160
- White, Lynn, *Medieval Technology and Social Change*. (Oxford: Oxford University Press, 1962).

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Essay (30%, 3000 words) in the WT.

The exam will cover all topics of the course and take place during the Spring examination period.

The 3,000-word summative essay is an opportunity for students to explore some of the themes of the course in greater depth. More detailed guidance on the essay will be disseminated early in Autumn Term.

EH314**Political economy and economic policies: Europe from the High Middle Ages to the French Revolution**

This information is for the 2023/24 session.

Teacher responsible: Professor Oliver Volckart

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course applies the theoretical toolkit of political economy to important questions in medieval and early modern economic history. The first term examines core issues of European history such as the character of feudalism (were feudal principalities states or was feudalism a type of market? what was the link between feudal rule and the structure of society?), state formation (how and why did political organisations invested with monopolies of force emerge?), interstate rivalries (war vs. competition for mobile factors of production - did competition between states contribute to growth?) and constitutional change (Absolutism vs. parliamentarism: How limited was Absolutist rule, and for which reasons? Which factors determined the power of parliaments?).

In the Lent term, we turn to core issues of economic policies: the expulsion of minorities (Why did rulers expel for example Jews and Huguenots?), trade and industrial policies (Mercantilism: Was this a result of interstate rivalries or of state formation?), monetary policies (what motivated debasements? why did premodern countries form currency unions?) and financial and fiscal policies (rent seeking, tax farming vs. bureaucratic taxation). Throughout, the focus is on the consequences these issues had for economic performance and growth.

The course strongly emphasises working with primary sources.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

This course is taught as a seminar, with classes totalling 40 hours across the Michaelmas and Lent Term.

This course includes a reading week in Week 6 of Michaelmas and Lent Term.

Formative coursework: One 500-words outline of an existing historical podcast. This is due shortly after the reading week of the MT.

One 1000-words outline of the historical podcast students will produce as part of their summative assessment. This is due early in the LT.

One 1000-words outline of the 4000-words summative essay. This is due later in the LT.

Indicative reading: R. Bonney, ed. *Economic Systems and State Finance*. Oxford: Oxford University Press, 2002.

Assessment: Essay (50%, 4000 words) in the ST.

Podcast (50%) in the WT.

EH316**Atlantic World Slavery**

This information is for the 2023/24 session.

Teacher responsible: Dr Anne Ruderman SAR 5.06

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will explore the way the transatlantic slave trade and subsequent systems of slavery in the Americas have shaped our modern world. In doing so, it will offer a broad look at questions of slavery, resistance, and abolition from the late seventeenth through the nineteenth centuries. Thoroughly international in focus, this course will look at slavery in Africa, Europe and the Americas, considering the formation of transatlantic slavery, similarities and differences in Caribbean and North American slaveries and potential explanations for slavery's demise. We will consider the workings of the slave trade, the plantation complex, crops such as sugar, slavery outside of plantation economies, the intersection of slavery and science, gender, rebellion, revolt, abolition and war.

Atlantic world slavery has prompted a wide range of creative approaches from historians, and we will examine the different types of sources that historians of slavery have used to try to understand the past. In doing so we will juxtapose economic history with other historical methods, and consider some of the economic, social, cultural and legal aspects of slavery, from the commercial organization of the transatlantic slave trade to the multiple forms of slave resistance. Additionally, this course will introduce students to the rapidly expanding world of digital history, by incorporating digital projects related to slavery into weekly readings.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a Reading Week in Week 6 of the Autumn and Winter Term.

Formative coursework: The podcast project will include several formative assessments, due throughout the Winter Term. These formative assessments are: A review and outline of an existing historical podcast, a topic and outline for the students' podcast and audio reading responses for discussion section.

Indicative reading:

Assessment: Essay (50%, 4000 words) in the period between AT and WT.

Podcast (50%) in the WT.

EH317**Disease, Health and History**

This information is for the 2023/24 session.

Teacher responsible: Prof Eric Schneider SAR 5.18

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.

Course content: Infectious disease has profoundly affected health, well-being and society in the past. Although we are currently primed to think first of mass pandemics such as the Black Death, the influence of disease is often more subtle, sapping a person's energy and well-being without causing death. However, humans have not simply been the pawns of various diseases over time. We have actively contributed to the spread of disease, for instance by transporting yellow fever to the New World, and we have sought to control the disease environment to make it more healthy for humans. This course explores the inter-relationship between infectious disease and humans' efforts to control it over the past five hundred years.

The course focuses on four questions:

1. How has infectious disease shaped population health, society and the economy over time?
2. What factors influenced infectious disease prevalence in the past?
3. How have social factors affected inequality in disease prevalence and health?
4. How have humans sought to exert control over infectious disease and how successful were these efforts?

The course is split into four units. The first unit provides a window into infectious disease in the premodern world by studying the Colombian Exchange, the exchange of pathogens following the integration of the New World into the global economy at the end of the fifteenth century. We will discuss the factors that made it possible for Old World pathogens such as smallpox and yellow fever to cross the Atlantic and also the factors that made these pathogens particularly virulent for populations in the New World. The second unit focuses on the epidemiologic transition, the vast improvements in health since the mid nineteenth century largely driven by the control of infectious disease. We will explore how societies were able to control infectious disease in ways that were impossible before, i.e. to what extent did improving nutrition, public health measures, medical interventions, individual behaviours and household decisions affect the reduction in infectious disease mortality? We will also discuss whether the improvements have been shared equally across all dimensions of health, focusing on changes in fetal health and morbidity.

The third unit explores inequalities in population health including inequalities due to class, race and gender. We will explore how these social factors influenced different groups' susceptibility to disease and the drivers that increased or reduced health inequalities in the long run.

The fourth unit focuses specifically on national and global efforts to eradicate specific infectious diseases throughout history. We will discuss why the smallpox eradication campaign was successful but the malaria eradication campaign of the postwar period was not. We will also consider whether eradicating these diseases had an influence on economic growth. Finally, we will evaluate what lessons historical disease eradication campaigns have for efforts to eradicate other diseases in the world today.

Teaching: 20 hours of classes in the AT. 20 hours of classes in the WT. 2 hours of classes in the ST.

This course is taught as a seminar, with classes totalling 40 hours across the Autumn and Winter Terms. The two-hour seminar in Spring Term, will be a revision seminar.

This course includes a reading week in Week 6 of Autumn and Winter Term.

Formative coursework: Students will be expected to produce 2 essays and 3 presentations in the AT and WT and 1 piece of coursework in the ST.

Students will write two formative essays during Autumn and Winter Terms. Students will also be responsible for group presentations throughout the course. The final formative assessment will be a mock take-home exam due at the beginning of Spring Term.

EH326 Not available in 2023/24

Innovation and its Finance in the 19th and 20th Centuries

This information is for the 2023/24 session.

Teacher responsible: Dr Gerben Bakker SAR 5.09

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students taking the course as an outside option must have completed at least one other economic history course.

Course content: The course explores the relationship between innovation and the financing of it in the nineteenth and twentieth centuries, the impact on economic growth and how policy makers managed (or failed) to encourage innovation investment and technology adoption.

Technological change and organizational innovation are critical determinants of the pace of economic growth. This course looks at the specific ways in which innovation transformed industries around the world in the modern era. The course has a global reach though it will concentrate on countries in Northern Europe and the United States. Particular attention focuses on links between innovation and finance: finance is a fundamental input for almost every type of productive activity. The course will explore issues such as; the relationship between market size and structure and technological progress; how firms developed the capabilities to profit from new technologies; and how policy makers attempted to nurture institutions to stimulate investment and technology adoption. The course will therefore cover themes such as the process of invention, innovation typologies, the history of R&D management, anti-trust policy, corporate governance, organisational change, incentives, intellectual property rights and the regulation of technology and its finance more broadly.

Teaching: This course is delivered through a series of seminars totalling 40 hours across Michaelmas Term and Lent Term. This course includes a reading week in Week 6 of both terms.

Formative coursework: All students are expected to write three essays or equivalent pieces of written work

Indicative reading: Naomi Lamoreaux and Kenneth Sokoloff eds.,

Financing Innovation in the United States, 1870 to the Present (MIT Press, 2007); Joel Mokyr, *The Gifts of Athena: Historical Origins of the Knowledge Economy*, (Princeton University Press, 2002); Raghuram Rajan and Luigi Zingales, "Financial Dependence and Growth," *American Economic Review* 88 (1998): 559-586; Nathan Rosenberg, *Inside the Black Box: Technology and Economics*, (Cambridge University Press, 1982); Joseph A. Schumpeter, "Can Capitalism Survive?" in his *Capitalism, Socialism and Democracy* (Routledge reprint, 1942, 2000); Benn Steil, David G. Victor and Richard R. Nelson eds., *Technological Innovation and Economic Performance* (Princeton University Press, 2002); John Sutton, *Technology and Market Structure: Theory and History* (MIT Press, 1998); James M. Utterback, *Mastering the Dynamics of Innovation* (Harvard Business School Press, 1996).

Assessment: Take-home assessment (100%) in the ST.

EH327

China's Economy and its Growth in the Very Long-Term

This information is for the 2023/24 session.

Teacher responsible: Prof Kent Deng SAR 5.17

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.

Pre-requisites: There are no prerequisites for this course.

Course content: The course explores the main aspects China's economic growth in the very long term from c.221 BC to the present day. It begins with a survey of general models/themes commonly used in studying Chinese economic history, followed by particular issues: the formation, expansion and the function of the Chinese empire; Confucian values and state economic policies; property rights; peasantry and peasant economy; proto-industrialisation; commerce and trade; science and technology; demographic fluctuations; living standards; external shocks and foreign influence; internal rebellions and revolutions; reforms and modernisation.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn Term and Winter Term, with 1-2 revision sessions in the Spring Term.

This course includes a reading week in the Week 6 of Autumn and Winter Term.

Students are expected to do prior readings and to make presentations on a regular basis.

Formative coursework: One formative essay (1000 words) in the AT.

One formative essay (1000 words) in the WT.

Indicative reading: A full reading list and course outline are available on Moodle. The following readings provide indication of the scope and nature of materials used in the course: K G Deng, 'A Critical Survey of Recent Research in of Chinese Economic History', *Economic History Review* (2000); J K Fairbank, *Chinese Thought and Institutions* (1957); M Elvin, *The Pattern of the Chinese Past* (1973); C A Ronan, *The Shorter Science and Civilisation in China* (1978-86); J Y Lin, 'The Needham Puzzle: Why the Industrial Revolution did not Originate in China', *Economic Development and Cultural Change* (1995); G W Skinner, *The City in Late Imperial China* (1977); J Lee & F Wang, *One Quarter of Humanity* (1999); K Pomeranz, *The Great Divergence, Europe, China and the Making of the Modern World Economy* (2000); A Watson, *Economic Reform and Social Change in China* (1992); R B Wong, *China Transformed* (1997); K Deng 'Imperial China under the Song and Late Qing', in Andrew Monson and Walter Scheidel (eds), *Fiscal Regimes and Political Economy of Premodern States*, Cambridge University Press (2015): ch. 10 (pp. 308–42). Deng, Kent and Zheng, Lucy (2015) *Economic restructuring and*

demographic growth: demystifying growth and development in Northern Song China, 960–1127 *Economic History Review*, 68 (4). 1107-1131.

Assessment: Essay (15%, 2000 words) in the AT.

Essay (15%, 2000 words) in the WT.

Take-home assessment (70%) in the ST.

EH390

Dissertation in Economic or Social History

This information is for the 2023/24 session.

Teacher responsible: Prof Oliver Volckart SAR 6.10

Availability: This course is compulsory on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available on the BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course emphasises working with primary sources. The subject of the dissertation should relate broadly to one of the economic history courses that have been chosen. This course consists of two lectures, the first in week 2 of AT and the second in week 1 of WT. All students also participate in an intensive workshop in week 7 of AT. This provides the opportunity for students to present their dissertation ideas and receive feedback from their peers.

Assessment: Dissertation (100%, 10000 words) in the ST. The dissertation must not exceed 10,000 words in length. The title of the dissertation should be approved by the candidate's supervisor early in AT and a title form signed by the supervisor must be submitted to the course organiser before the AT reading week.

EU3A1 Half Unit Not available in 2023/24

The Politics and Policies of 'Brexit': The UK's changing relationship with the European Union

This information is for the 2023/24 session.

Teacher responsible: Prof Kevin Featherstone CBG.5.04 and Prof Antony Travers CBG.5.28

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: This course examines the United Kingdom's departure from the European Union as an agenda of ongoing significance for both the UK and the EU27. With many on-going issues under review, it is an important focus for the UK and a continuing agenda for the EU. To reflect the complexity of BREXIT, the course examines its politics and its policy implications as an episode and in the longer term.

The course begins with consideration of how BREXIT occurred: the history of a troubled relationship; the issue of EU membership in domestic party and electoral politics; and the course of the BREXIT negotiations themselves. BREXIT requires much adjustment in terms of governance and policies. The course examines these across a set of major policy agendas and discusses the implications for both the UK and for the EU27.

With unresolved issues even after the UK's final departure from transitional arrangements, the discussion highlights the continuing significance of the BREXIT agenda for London and Brussels. Note: the lectures are to be shared with MSc students. The seminar questions for the UG students differ from those for MSc students, taking account of the different stages of study and the intended learning outcomes.

Teaching: This year, some or all of this teaching will be delivered through a combination of online and on-campus lectures and classes in the Autumn term. This course will hold a Reading Week in Autumn Term Week 6.

Formative coursework: Students will be expected to produce 1 essay in the AT.

The formative essay (1500 words), due by mid-term, will address a question relevant to the impact of BREXIT on the UK political system, drawing upon the readings and seminar discussion.

Indicative reading:

- D. Dinan et al, eds. (2017) *The European Union in Crisis*; London: Palgrave.
- A. Geddes (2013) *Britain and the European Union*; London: Palgrave.
- B. Simms (2016) *Britain's Europe: A Thousand Years of Conflict and Cooperation*. London: Allen Lane.
- S. Wall (2008) *A Stranger in Europe: Britain and the EU from Thatcher to Blair*. Oxford: OUP.
- H. Young (1998) *This Blessed Plot: Britain and Europe from Churchill to Blair*. London: Macmillan.
- K. Armstrong (2017) *BREXIT Time: Leaving the EU -why, how and when?* Cambridge: Cambridge University Press.
- H. Clarke, M. Goodwin and P. Whiteley (2017) *BREXIT: Why Britain voted to leave the European Union*. Cambridge: Cambridge University Press.
- E. O. Eriksen and J. E. Fossum (2015) *The European Union's Non-Members: independence under hegemony?* London: Routledge.
- S. Hobolt (2016) 'The BREXIT vote: a divided nation, a divided continent', *Journal of European Public Policy*, 23, 9. And 'Debate Section': 'British exit from the EU - legal and political implications', in the same issue.
- L. Halligan and G. Lyons (2017), *Clean BREXIT: Why leaving the EU still makes sense*; London: Biteback Publishing.
- The 'Generation BREXIT' website - an LSE project.

Assessment: Project (90%, 3000 words) in the WT.

Essay plan (10%) in the AT.

The summative assessment for this course takes the form of:

- Individual Policy Project Plan - up to 1000 words (10%)
- Individual Policy Project - up to 3,000 words (90%)

FM100 Half Unit

Introduction to Finance

This information is for the 2023/24 session.

Teacher responsible: Dr Constantin Charles

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Course content: This course will provide a non-technical introduction to Finance and an overview of the Finance discipline. The aim of the course is to explain the importance of finance to individuals, firms, and society in general. Topics will include discounting and present value, risk and return, financial markets and trading, mutual and hedge funds, banks and other financial intermediaries, financial securities, capital structure, venture capital and private equity, initial public offerings, and valuation of firms and projects.

Teaching: 30 hours of seminars in the WT.

Additional workshops may be scheduled as needed.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Weekly homework assignments.

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course.

Assessment: Continuous assessment (100%) in the WT.

FM101 Half Unit

Finance

This information is for the 2023/24 session.

Teacher responsible: Dr Paula Lopes Cocco

Availability: This course is compulsory on the BSc in Accounting and Finance and BSc in Management. This course is available on the BSc in Data Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with AC100 Elements of Accounting and Finance.

This course is not capped, any eligible student that requests a place will be given one.

Course content: This course includes an introduction to: the financial decisions of firms, in particular capital budgeting; the financial decisions of households; the role of the financial system in the economy and the flow of funds; causes and consequences of the recent financial crises.

Teaching: 10 hours of lectures and 9 hours of classes in the WT. 1 hour of classes in the ST.

Formative coursework: Classwork exercises will be set each week. Two classworks will be marked by class teachers.

Indicative reading: The main readings for this course are selected chapters from two textbooks available from the LSE library:

Hillier et al (2022) *Fundamentals of Corporate Finance*, European Edition, McGraw-Hill.

Cecchetti et al (2021) *Money, banking and financial markets*, McGraw-Hill.

A few additional readings will be discussed during the lectures and posted on Moodle for downloading.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

FM102 Half Unit

Quantitative Methods for Finance

This information is for the 2023/24 session.

Teacher responsible: Dr Alberto Pelliccioli

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Methods in Calculus and Linear Algebra (MA108).

Course content: The main aim of this course is to help students connect the mathematical tools that they have acquired in previous courses, including MA108, with the economics and financial models that they will be covering in their subsequent courses. Additional mathematical tools will be covered as well. All mathematical material will be covered in the context of economic and financial models.

The mathematical material covered includes (i) linear algebra, vector spaces, matrices, eigenvalues and eigenvectors, (ii) derivatives, integrals, partial derivatives, and implicit functions, (iii) unconstrained and constrained optimization, (iv) probability distributions, conditional probability, expectation and regression, (v) stochastic calculus, Ito processes and Ito's lemma, and (vi) differential equations and partial differential equations.

The economics and financial models covered include (i) expectation and present value of uncertain cashflows, (ii) pricing of government bonds and other fixed-income securities, (iii) pricing of options and other derivatives, (iv) utility maximization and portfolio

choice, (v) financing decisions by firms, and (vi) trading games between agents with public or private information.

Teaching: 33 hours of seminars in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Weekly homework assignments.

Indicative reading: Mathematics for economists, Carl Simon and Lawrence Blume, W.W. Norton & Company, International Student Edition.

Assessment: Continuous assessment (100%) in the WT

FM200 Half Unit

Financial Systems and Crises

This information is for the 2023/24 session.

Teacher responsible: Prof Dimitrios Vayanos

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Course content: The course FM200 Financial Systems and Crises covers financial markets and institutions, and their interaction with the real economy. The course emphasizes particularly banks and credit markets, and their role in generating economic growth as well as financial crises. Basic economic theories and models developed to understand these phenomena are covered, and the theoretical analysis is complemented with a historical perspective.

The first part of the course, taught over weeks 1-6 of Autumn Term, presents theories of debt and banks; reviews key historical developments pertaining to banks and financial crises until the middle of the 20th century; and presents theories of credit booms and busts in the macroeconomy.

The second part of the course, taught over weeks 7-10 of Autumn Term, reviews key historical developments pertaining to banks and financial crises from the middle of the 20th century until now; reviews how money markets work and how central banks conduct monetary policy; presents the theory and practice of bank regulation; and reviews the international monetary system.

Teaching: 33 hours of seminars in the AT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Students will be expected to produce a number of problem sets in the AT.

Indicative reading: 1. Kindleberger, Charles, 2015, *Manias, Panics and Crashes: A History of Financial Crises*, 7th edition, Palgrave Macmillan.

2. Gorton, Gary, 2012, *Misunderstanding Financial Crises: Why We Don't See Them Coming*, Oxford University Press.

3. Tirole, Jean, 2006, *The Theory of Corporate Finance*, Princeton University Press.

Assessment: Continuous assessment (100%) in the AT.

FM201 Half Unit

Macro-Finance

This information is for the 2023/24 session.

Teacher responsible: Dr Paula Lopes

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Course content: This course will study the relationship between financial markets and the macro-economy. Topics include the behaviour of returns of different asset classes over the business cycle, the relationship between returns and inflation, and the

implications for expected returns and portfolio choice.

Teaching: 33 hours of seminars in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are “sessions” only, and the pedagogical approach in each session is interactive.

Formative coursework: Weekly problem sets

Indicative reading: Detailed course programme and reading lists are distributed at the start of the course.

Illustrative texts include: Blanchard, *Macroeconomics*, 7th ed. and Mankiw, *Macroeconomics*, 9th ed.

Assessment: Continuous assessment (100%) in the WT.

FM212

Principles of Finance

This information is for the 2023/24 session.

Teacher responsible: Dr James Clark

Dr Jojo Paul

Availability: This course is available on the BSc in Accounting and Finance, BSc in International Social and Public Policy and Economics, BSc in Management and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course cannot be combined with FM213.

Permission forms from the General Course admin office should be submitted to the Department of Finance by email at finance@lse.ac.uk with a copy of the transcript attached.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Pre-requisites: Students must have completed: one level 1 Economics course, one level 1 Mathematics course and one level 1 Statistics course.

Course content: The course examines the theory of financial decision-making by firms and examines the behaviour of the capital markets in which these decisions are taken. The topics covered are the theory of capital budgeting under certainty in perfect and imperfect capital markets, portfolio theory, equity and bond markets, the capital asset pricing model, efficient markets, derivative pricing, sources of funds, basic theory of capital structure and the cost of capital, company dividend decisions and financial markets and institutions.

This course covers the same topics as FM213. Thus, both FM213 and FM212 are equivalent content-wise. However, compared to FM213, this course puts less emphasis on the underlying statistical theory and relies less on the use of mathematical methods. Nonetheless, the course is quantitative in nature, and familiarity with mathematical and statistical methods taught in first-year courses will be assumed.

Teaching: 20 hours of lectures and 10 hours of classes in the AT. 20 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

There will also be workshops in both AT and WT.

Formative coursework: Students are expected to produce written work for classes and to make positive contributions to class discussion.

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include:

- *Principles of Corporate Finance* by Richard Brealey, Stewart Myers, and Franklin Allen, McGraw-Hill Inc.
- *Corporate Finance* by Jonathan Berk and Peter Demarzo, Pearson Global Edition.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

FM213

Principles of Finance

This information is for the 2023/24 session.

Teacher responsible: Dr Cameron Peng and Dr Kim Fe Cramer

Availability: This course is compulsory on the BSc in Finance and BSc in Financial Mathematics and Statistics. This course is available on the BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Data Science, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is not available as an outside option nor to General Course students.

Students on the BSc in Management can only take this course if they have met the following programme-specific prerequisites: a 1st in MA107 and/or ST107 and email permission from their Senior Undergraduate Tutor.

This course cannot be combined with FM212. Students on the BSc in Accounting and Finance can only take this course if they have met the general course prerequisites as below.

This course is not capped, any eligible student that requests a place will be given one.

Pre-requisites: Students must have completed: one level 1 Microeconomics course (EC1A3 or EC1A5), MA100 and ST102. Alternatively, students can access the course by completing MA107, EC1A1, ST109 and EC1C1.

Course content: The course examines the theory of financial decision-making by firms and examines the behaviour of the capital markets in which these decisions are taken. The topics covered are the theory of capital budgeting under certainty in perfect and imperfect capital markets, portfolio theory, equity and bond markets, the capital asset pricing model, efficient markets, derivative pricing, sources of funds, basic theory of capital structure and the cost of capital, company dividend decisions and financial markets and institutions.

This course covers the same topics as FM212. Thus, both FM213 and FM212 are equivalent content-wise. However, compared to FM212, this course puts more emphasis on the underlying statistical theory and relies more on the use of mathematical methods.

Teaching: 20 hours of lectures and 15 hours of classes in the AT. 20 hours of lectures and 15 hours of classes in the WT. 2 hours of lectures and 1 hour and 30 minutes of classes in the ST.

Formative coursework: Students are expected to produce written work for classes and to make positive contributions to class discussion.

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: *Principles of Corporate Finance* by Richard Brealey, Stewart Myers, and Franklin Allen, McGraw-Hill Inc.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

FM300

Corporate Finance, Investments and Financial Markets

This information is for the 2023/24 session.

Teacher responsible: Prof Konstantinos Zachariadis and Prof Alex Edmans

Availability: This course is compulsory on the BSc in Accounting and Finance. This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics, Statistics and Business and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is controlled

access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Pre-requisites: Principles of Finance (FM212) or Principles of Finance (FM213)

Course content: This course is intended for third-year undergraduates and will be a broad-based follow-up to FM212/FM213 Principles of Finance. The goal is to broaden, and selectively deepen, students' understanding of finance, building on their existing knowledge of financial economics. The course will cover a broad range of topics, with both a theoretical and an empirical emphasis. These include topics in corporate finance, investments and performance evaluation and international finance. The course consists of two interchangeable ten-week components, one on investments and international finance, and the other on corporate finance.

The first component provides students with a way of thinking about investment decisions by examining the empirical behaviour of security prices. We first study the empirical evidence of the CAPM and other asset pricing models, and then analyse different tests of market efficiency focusing on event studies and investment anomalies. We also study the main empirical findings in behavioural finance. We then learn how to measure the performance of a portfolio manager and to attribute it to different types of skill. Finally, this section of the course introduces the foundations of international finance and explores issues related to international portfolio management.

The second component of the course examines theory and evidence concerning major corporate financial policy decisions. It builds on FM212/FM213 (Principles of Finance) and emphasis practical implementation, with some of the same topics covered in more depth, and some additional topics not covered before. This is achieved with a combination of lectures, problem sets, and case studies such that students can apply the concepts using real-life situations.

The goal of corporations is to take on the best possible projects (e.g. a plant expansion) and finance them in the best way possible (e.g. through profits, debt, or equity). The time and uncertainty of investment payoffs make these problems nontrivial and essential for long-term success. The course will focus on answering the following questions:

(a) Valuation: How can we value and choose projects? What is the value of a company? What should be the expected return for a project, division, and the whole firm?

(b) Capital Structure: How should corporations obtain financing? For what projects?

Teaching: 20 hours of lectures and 10 hours of classes in the AT. 20 hours of lectures and 10 hours of classes in the WT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to produce written work for classes and to make positive contributions to class discussions.

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: Bodie, Kane & Marcus, Investments (Irwin) and Grinblatt & Titman, Financial Markets and Corporate Strategy (Irwin, McGraw-Hill).

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

FM301 Half Unit

Market Anomalies and Asset Management

This information is for the 2023/24 session.

Teacher responsible: Dr Cameron Peng

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed FM213 Principles of Finance.

Course content: This course will examine the extent to which financial markets are informationally efficient. Topics include

notions of market efficiency, return predictability in bond, stock, and derivatives markets, limits to arbitrage and other theories of return predictability. It will also cover both behavioural and frictional theories of return predictability and other asset-pricing phenomena.

Teaching: 33 hours of seminars in the AT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Weekly homework assignments

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: Shleifer, Inefficient Markets: An Introduction to Behavioral Finance (Oxford University Press).

Assessment: Continuous assessment (100%) in the AT.

FM302 Half Unit

Theories of Corporate Finance

This information is for the 2023/24 session.

Teacher responsible: Dr Dimitris Papadimitriou

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed FM213 Principles of Finance.

Course content: This course introduces concepts and theories to critically assess major corporate financial policy decisions. The course focuses in particular on a firm's capital structure and the impact of taxes, bankruptcy costs, agency conflicts, and asymmetric information on a firm's financing decisions. We will also discuss other major topics in corporate finance, such as the market for corporate control. In developing tools to analyze these issues, we will introduce the key concepts of corporate finance theory, including debt overhang, risk shifting, and the free-rider problem.

Teaching: 33 hours of seminars in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Students will be expected to produce 9 problem sets in the WT.

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: "Financial Markets and Corporate Strategy" by Hillier, Grinblatt and Titman. "Corporate Finance" by Ivo Welch, and "The Theory of Corporate Finance" by Tirole.

Assessment: Continuous assessment (100%) in the WT.

FM304 Half Unit

Applied Corporate Finance

This information is for the 2023/24 session.

Teacher responsible: Dr Ashwini Agrawal

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed FM213 Principles of Finance

Course content: This course will focus on the applications of key concepts in corporate finance and implicitly extend the topics covered in "Principles of Corporate Finance". There will be three main topics covered in the course. The first topic is corporate investment. We will consider various methods used by firms to evaluate investment opportunities. The second topic is financing

decisions. We will cover how firms finance their operations using debt and equity. The third topic is valuation. We will learn methods used to value companies and specific transactions such as mergers, acquisitions, and leveraged buyouts. Each topic will be addressed using both theoretical material provided by the professor and weekly case studies with questions and solutions.

Teaching: 30 hours of seminars in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Weekly homework assignments.

Indicative reading: A course pack will be distributed that includes case studies as well as additional readings such as textbook chapters, and practitioner articles.

Assessment: Continuous assessment (100%) in the WT.

FM305 Half Unit

Advanced Financial Economics

This information is for the 2023/24 session.

Teacher responsible: Dr Georgy Chabakauri and Prof Dimitri Vayanos

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed FM213 Principles of Finance.

Course content: This course will present modern theories of financial markets and asset valuation. The first part of the course will cover the principle of no arbitrage, state prices and the stochastic discount factor, utility functions and portfolio choice, and equilibrium pricing and risk-neutral pricing. The second part of the course will build on this material and develop additional tools to explore the effects of frictions in financial markets, such as asymmetric information, costs of search and market participation, leverage constraints and delegated portfolio management.

Teaching: 33 hours of seminars in the AT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Indicative reading: Teaching notes will be provided.

Assessment: Continuous assessment (100%) in the AT.

FM321 Half Unit

Risk Management and Modelling

This information is for the 2023/24 session.

Teacher responsible: Dr Linyan Zhu

Availability: This course is compulsory on the BSc in Finance and BSc in Financial Mathematics and Statistics. This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Mathematics, Statistics and Business and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not capped, any eligible student that requests a place will be given one.

Pre-requisites: Students must have completed Principles of Finance (FM212 or FM213) and Statistical Methods (Elementary Statistical Theory (ST102) or Econometrics II (EC2C1) or (Econometrics I (EC2C3) or Statistical Models and Data Analysis (ST201))). Mathematical Methods (MA100) is desirable but not required. Students who have not taken Principles of Finance

(FM212 or FM213), but have an excellent quantitative background, may be allowed to take this course at the discretion of the course leader.

Course content: This course is intended for third-year undergraduates and builds upon FM212/FM213 Principles of Finance. The main topics covered are financial risk analysis and financial risk. The course provides students with a thorough understanding of market risk from both a practical and technical point of view. A representative list of topics covered includes:

- empirical properties of market prices (fat tails, volatility clusters) and forecasting of conditional volatility
- concepts of financial risk (volatility, Value-at-Risk)
- univariate and multivariate volatility models (ARCH, GARCH)
- implementation and evaluation of risk forecasts
- endogenous risk

Students apply the models to real financial data using Matlab/Python/R, a programming environment widely used in industry and academia. No prior knowledge of programming is assumed: students will learn-by-doing in class. Students will at times use data and software for classwork assignments.

Teaching: 20 hours of lectures and 10 hours of classes in the AT.

Formative coursework: Students will be expected to produce written work for classes and to make positive contributions to class discussion

Indicative reading: J Danielsson, Financial Risk Forecasting: The Theory and Practice of Forecasting Market Risk will be the required textbook for the course. Additional readings may be assigned as needed.

Assessment: Coursework (100%) in the AT.

FM322 Half Unit

Derivatives

This information is for the 2023/24 session.

Teacher responsible: Dr Rohit Rahi

Availability: This course is compulsory on the BSc in Finance and BSc in Financial Mathematics and Statistics. This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Mathematics, Statistics and Business and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not capped; any eligible student that requests a place will be given one.

Pre-requisites: Students must have completed Principles of Finance (FM212 or FM213). Mathematical Methods (MA100) is recommended but not required. Students who have not taken MA100 or equivalent are advised to do some pre-reading (see "Indicative reading" below). Students who have not taken Principles of Finance (FM212 or FM213), but have an excellent quantitative background, may be allowed to take this course at the discretion of the course leader.

Course content: This course is intended for third-year undergraduates and builds upon FM212/FM213 Principles of Finance. It focuses on derivatives, with a particular emphasis on equity derivatives (standard call and put options, exotic options), futures and forward contracts, and interest rate derivatives (swaps, caps and floors, swaptions). It systematically addresses three basic questions: how do these products work, i.e. what are their payoffs? How can they be used, for hedging purposes or as part of trading strategies? And above all: how are they priced? The course emphasises a small number of powerful ideas: absence of arbitrage, replication, and risk-neutral pricing. These are typically introduced in the context of discrete-time models, but the course also covers some well-known continuous-time models, starting with a comprehensive treatment of the Black-Scholes model. The level of mathematics is appropriate for third-year students with a solid quantitative background.

Teaching: 20 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are “sessions” only, and the pedagogical approach in each session is interactive.

Formative coursework: Exercises will be discussed in class each week. Students will be expected to make positive contributions to class discussion.

Indicative reading: There is no required textbook, but the following is an excellent reference: John C Hull, *Options, Futures, and Other Derivatives*.

The following pre-reading is recommended for students who have not taken Mathematical Methods (MA100) or equivalent:

Martin Anthony and Michele Harvey, *Linear Algebra: Concepts and Methods*

Chapter 5: Vector Spaces

Chapter 6: Linear Independence, Bases and Dimension

Ken Binmore and Joan Davies, *Calculus, Concepts and Methods*

Section 5.7: Taylor series for scalar valued functions of n variables

Assessment: Exam (90%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Coursework (10%) in the WT.

GV100

Introduction to Political Theory

This information is for the 2023/24 session.

Teacher responsible: Prof Paul Kelly

Availability: This course is compulsory on the BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available on the BA in Social Anthropology, BSc in Environment and Development, BSc in Environment and Sustainable Development and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introduction to political theory through the thought and texts of some of the most important political theorists. A study of the ideas of some of the major political theorists from the ancient Greeks to the 20th Century. Topics will include theories of human nature, the origin of government and law, man's relation to society and the state, the basis of political obligation, the idea of social contract, the idea of social progress, the critique of capitalism, and questions about race and gender. The thinkers discussed this year will include Plato, Aristotle, Machiavelli, Hobbes, Locke, Rousseau, Kant, The Federalist, J S Mill, Marx, Nietzsche, Arendt, Fanon.

Teaching: This course provides a combination of classes and lectures totalling no less than 29 hours in the Autumn term, and no less than 30 hours in the Winter term. There will be a reading week in Week 6 of both Autumn and Winter terms.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: D. Boucher and P. Kelly, *Political Thinkers: From Socrates to the Present* (Oxford 2017); Plato, *Republic*; Aristotle, *Politics*; Machiavelli, *The Prince*; Hobbes, *Leviathan*; Locke, *2nd Treatise of Government*; Rousseau, *Discourse on the Origins of Inequality and The Social Contract*; Kant, *Perpetual Peace*; *The Federalist Papers*; J S Mill, *Utilitarianism, The Subjection of Women, and On Liberty*; Marx, *Selected Writings* (Ed D McLellan); Nietzsche, *The Genealogy of Morality*; Arendt, *The Origins of Totalitarianism*; Fanon, *Black Skins, White Masks*.

Assessment: Essay (33%, 2000 words) in the AT. Essay (33%, 2000 words) and essay (34%, 2000 words) in the WT. The summative assessment will be 3 essays for whole course. Effectively this means 1 summative assessment in AT and 2

for WT. However, in the event of the first, formative AT essay being 'best', students will be allowed to count that as one of their summative essays (so the best 3 out of 4 essays will form the summative assessment for this course).

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 80% class participation and 20% attendance.

GV101

Introduction to Political Science

This information is for the 2023/24 session.

Teacher responsible: Dr Ryan Jablonski, Dr Melissa Sands and Dr Florian Foos

Availability: This course is compulsory on the BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available on the BA in Geography, BA in Social Anthropology, BSc in Economic History and Geography, BSc in International Relations, BSc in International Social and Public Policy, BSc in Psychological and Behavioural Science and BSc in Social Anthropology. This course is not available as an outside option. This course is available to General Course students.

Course content: The course is an introduction to politics in a globalised world, with a focus on how political science tries to understand and explain cross-country and cross-time differences. The course will begin by introducing students to some of the main empirical variations in political behaviour, political institutions, and outcomes across the world, focusing mainly on democratic and partially democratic countries (in both the developed and developing world), and introducing students to some of the basic theoretical ideas and research methods in political science. Each subsequent week will be devoted to a substantive topic, where a more detailed analysis of political behaviour, political institutions, or political outcomes will be presented and various theoretical explanations will be assessed. Most weeks will involve an interactive element.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across Autumn Term, Winter Term and Spring Term. There will be reading week in Week 6 of both the AT and WT terms.

Formative coursework: Students will be expected to undertake one problem set and a formative essay in the AT.

Indicative reading:

- W Clark, M Golder and S Nadenichek Golder, *Foundations of Comparative Politics*, Sage, 2019.
- A Lijphart, *Patterns of Government: Government Forms and Performance in Thirty-Six Countries*, 2nd ed., Yale University Press, 2012.
- G. Tsebelis, *Veto Players: How Political Institutions Work*, Princeton University Press, 2002.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (50%, 2000 words) in the WT.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 75% class participation (including attendance and contribution), and 25% formative essay.

The Exam Grade for General Course students will be 50% essay and 50% exam.

GV225

Public Choice and Politics

This information is for the 2023/24 session.

Teacher responsible: Prof Torun Dewan

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy, BSc in Psychological and Behavioural Science and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students will normally be expected to have taken GV101 Introduction to the Study of Politics, or equivalent, in a previous year. An introductory knowledge of economics would be useful.

Course content: This course is concerned with positive political economy and public choice theory applied to the study of political conflicts, democratic institutions and public policy. The course covers the main tools for the study of public choice (rational decision-making theory, game theory, social choice theory) and a number of both theoretical and applied topics, including the empirical study of institutions. This course will cover the main topics in positive political economy and institutional public choice. These include: the aggregation of preferences; voting paradoxes and cycles; electoral competition and voting behaviour; the problems of and solutions to collective action; welfare state and redistribution; the impact of information and mass media on voting behaviour and public policy; the theory of coalitions, the behaviour of committees and legislatures including agenda-setting and veto-player power; principal-agent problems in politics; models of bureaucracy.

Teaching: This course provides a combination of classes and lectures totalling 24 hours in the Autumn Term, 25 hours in the Winter Term and 2.5 hours in the Spring Term. There will be reading week in Week 6 of both the AT and the WT.

Formative coursework: Students will complete at least one formative essay and at least one timed essay in each term to allow practise on problem sets and essay writing under exam conditions.

Indicative reading: P Dunleavy, *Democracy, Bureaucracy and Public Choice*; D Mueller, *Public Choice III*; K A Shepsle & M S Bonchek, *Analyzing Politics*; George Tsebelis, *Veto Players*. Major Works; A Downs, *An Economic Theory of Democracy*; M Olson, *The Logic of Collective Action*; W Niskanen, *Bureaucracy and Representative Government*.

Assessment: Exam (50%, duration: 2 hours) and Exam (50%, duration: 2 hours) in the spring exam period.

The first exam is based on problem sets from the Autumn Term course material. The second exam is essay-based on questions related to topics covered in the Winter Term.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 25% formative essay (best mark), 25% timed essay (best mark), 50% class participation (including presentations and attendance).

GV245

Democracy and Democratisation

This information is for the 2023/24 session.

Teacher responsible: Professor Francisco Panizza

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Relations, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International

Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not controlled access. If you request a place and meet the criteria, you are likely to be given a place.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course is concerned with theories of democratisation and case studies of democratic transformations during the so-called "third wave" of democratisation from the 1970s to the present. It analyses processes of transition and consolidation of democracy and of democratic reversal in the context of globalisation. The first five weeks study the concept of democracy, theories of transition to democracy, democratic consolidation and hybrid regimes and the crisis of liberal democracy. The remainder of the course uses the conceptual tools of the first five weeks to study the condition of democracy in different regions of the world, including Southern Europe, Africa, Turkey, South East Asia, the Middle East, Latin America and Eastern Europe.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across the Autumn and Winter Terms. There will be a revision lecture in the Spring Term. There will also be a reading week in Week 6 of both the AT and WT.

Formative coursework: Students will be expected to produce 2 essays in the AT and WT.

Indicative reading: The most useful introductory readings are: J. Grugel and M. L. Bishop (2016) *Democratization: A Critical Introduction*; and S. Noakes and C. Wilson (2023) *Democratization. A Thematic Approach*.

Other useful texts are: L. Whitehead (2002) *Democratization*. S. Levitsky and D. Ziblatt (2018) *How Democracies Die*; Donatella Della Porta (2013) *Can Democracy be Saved?*

Assessment: Exam (60%, duration: 3 hours) in the spring exam period.

Essay (40%, 2500 words) in the WT.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 70% formative coursework, 20% class presentation, 10% class participation (including attendance and contribution).

GV248

Power and Politics in the Modern World: Comparative Perspectives

This information is for the 2023/24 session.

Teacher responsible: Dr David Woodruff

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Other background in political science will be considered as a substitute for GV101 for students outside of Government.

Course content: This course will acquaint students with the contemporary study of comparative politics, focusing largely on theories susceptible to testing with narrative historical evidence. Students will learn to address the methodological challenges of developing and testing such theories. The course will treat a wide variety of themes, including the political impact of natural

resources in developing countries, social and political revolutions, political and bureaucratic corruption, the political economy of distribution, and political ideologies. With respect to each theme, students will receive a grounding in theories of the topic and samples of application to empirical cases drawn from throughout the developed, developing, and post-Communist world.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across the Autumn, Winter and Spring Terms.

Classes are expected to run from Weeks 2-5 and 7-11 in AT and Weeks 1-5 and 7-11 in WT. There will be a reading week in Week 6 of both terms.

The Week 11 lecture in WT will be a revision lecture and there will be one revision class per group in Week 1 of ST.

Formative coursework: Students will be expected to produce 2 essays in the AT and 1 essay in the WT.

The highest-marked formative essay will count for assessment; see below.

Indicative reading: Skocpol, Theda. *States and Social Revolutions*. Cambridge: Cambridge University Press, 1979.

Hertog, Steffen. "Shaping the Saudi State: Human Agency's Shifting Role in Rentier-State Formation." *International Journal of Middle East Studies* 39, no. 4 (2007). doi:10.2307/30069487. <http://www.jstor.org/stable/30069487>.

Brierley, Sarah. "Unprincipled Principals: Coopted Bureaucrats and Corruption in Ghana." *American Journal of Political Science* 64, no. 2 (2020): 209-222. doi:10.1111/ajps.12495.

Weyland, Kurt. "The Rise of Latin America's Two Lefts: Insights From Rentier State Theory." *Comparative Politics* 41, no. 2 (2009): 145-164. <http://www.jstor.org/stable/40599207>.

Hacker, Jacob S, and Paul Pierson. "Winner-Take-All Politics: Public Policy, Political Organization, and the Precipitous Rise of Top Incomes in the United States." *Politics & Society* 38, no. 2 (2010). doi:10.1177/0032329210365042.

Orloff, Ann Shola. "Gender and the Social Rights of Citizenship: The Comparative Analysis of Gender Relations and Welfare States." *American Sociological Review* 58, no. 3 (1993). doi:10.2307/2095903.

Fourcade Gourinchas, Marion, and Sarah L. Babb. "The Rebirth of the Liberal Creed: Paths to Neoliberalism in Four Countries." *American Journal of Sociology* 108, no. 3 (November 2002): 533-79. <https://doi.org/10.1086/367922>.

Assessment: Exam (60%, duration: 3 hours) in the spring exam period.

Essay (40%, 1500 words) in the AT and WT.

Students' summative essay mark will be the highest mark of those given for the three formative essays. Students who attempt all three (3 out of 3) will receive the highest mark achieved. Students who attempt two essays (2 out of 3) will receive the highest mark out of the two essays attempted. However, students who submit fewer than two essays (1 out of 3 or 0 out of 3) will be awarded a Zero Incomplete for the whole course and cannot be awarded the degree until they submit the work at resit (either the second of two essays if only 1 out of 3 was completed, or two essays if 0 out of 3 were completed). In such circumstances the student's resit course mark will be capped at the pass rate of 40%.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be based on the average of the three formative essays (75%) and attendance (25%).

GV249

Research Design in Political Science

This information is for the 2023/24 session.

Teacher responsible: Dr Florian Foos

Availability: This course is compulsory on the BSc in Politics and Data Science. This course is available on the BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in

Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy.

This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 7 groups at maximum.

Course content: The course will introduce students to the design, conduct and analysis of research in empirical Political Science spanning different subfields. The first term covers the formulation of research questions, and the development of theory and empirically testable hypotheses. From there, we will discuss different types of data, measurement, the distinction between description and inference, as well as correlation and causation, and basic quantitative and qualitative data collection and analysis strategies. Moreover, students will learn about research ethics, and some of the major methodological challenges that we face as a discipline including p-hacking, the file-drawer problem, issues of statistical power, as well as potential solutions such as pre-registration and results-blind review. The second term introduces students to specific research designs including ethnographic research, comparative case studies, as well as experimental and quasi-experimental designs. Throughout the year, there is an emphasis on the importance of good research design, and a solid understanding of the assumptions underlying the design that have implications for data analysis. The ultimate goal of the course is to equip students with the knowledge and skills to conduct their own research projects such as their BA thesis, and to allow them to evaluate published and unpublished work, as well as scientific and journalistic claims, based on the quality of the underlying research design.

In AT, the course includes an introduction to the statistical programming language R, where students will learn practical skills of basic data management and analysis.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 51 and a half hours across Autumn Term, Winter Term and Spring Term. There will be a Week 6 reading week in both the AT and WT.

Formative coursework: Students will complete three formative problem sets throughout the course, two in AT and one in WT, that allow them to apply material from the course to concrete political science examples (e.g., identifying design elements of a published research paper; proposing strategies for answering a given research question, etc.). Some of these problem sets will involve applied problems in R.

Indicative reading: Bueno de Mesquita, E. & Fowler, A. 2022.

Wedeen, L. 2010. Reflections on ethnographic work in political science. *Annual Review of Political Science* 13: 255-272.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Coursework (20%, 1800 words) in the WT Week 1.

Coursework (30%, 2000 words) in the ST Week 1.

The coursework to be submitted in the Winter Term will consist of a Summative Problem Set, and the coursework to be submitted in the Spring Term will consist of a Research Design Proposal.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 25% Problem Set 1, 25% Problem Set 2, 25%

Problem Set 3, and 25% Problem Set 4.

GV250 Half Unit Not available in 2023/24 Ethics and Politics of Artificial Intelligence

This information is for the 2023/24 session.

Teacher responsible: TBC

Availability: This course is compulsory on the BSc in Politics and Data Science. This course is available on the BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: This course examines the ethical and political questions that arise from the use of machine learning algorithms in a broad range of social and policy areas. Through case studies in criminal justice, the workplace, social media, care, sex, warfare, traffic and art the course will reflect on the concepts of fairness, equality, freedom, democracy, power, privacy, property, moral responsibility, rights, and the public sphere and explore their changing meanings in a technological society. It will pay special attention to the relationship between individual ethics, political action and public policy.

Outline of weekly topics:

- 1 Introduction: Ethics and politics in a technological society
- 2 Statistical discrimination in criminal justice and the labor market
- 3 Social media, free speech and democracy
- 4 Ethics of big data: Privacy and ownership
- 5 Surveillance and state power
- 6 Automation I: Work
- 7 Automation II: Sex and care
- 8 Automation III: Self-driving cars and killer robots
- 9 Robots and us
- 10 From ethics to aesthetics: The politics of digital taste-making

Teaching: 15 hours of lectures and 10 hours of classes in the WT. There will be a reading week in Week 6 of the Winter Term.

Formative coursework: One 1500-word essay, due in the Winter Term.

Indicative reading:

- Kasper Lippert Rasmussen. "Nothing personal: On statistical discrimination." *Journal of Political Philosophy* 15, no. 4 (2007): 385-403.
- Benedict Rumbold and James Wilson. "Privacy rights and public information." *Journal of Political Philosophy* 27, no. 1 (2019): 3-25.
- John Stuart Mill, *On Liberty*, Ch. 2
- Spiekermann, Kai et al. "Big data justice: A case for regulating the global information commons." *The Journal of Politics* 83, no. 2 (2021): 577-588.
- Michel Foucault, *Discipline and Punish*, pp. 195-217.
- Bernard Harcourt, *Exposed: Desire and Discipline in the Digital Age*.
- Shoshana Zuboff, "Big other: Surveillance capitalism and the prospects of an information civilization." *Journal of Information Technology* 30, no. 1 (2015): 75-89.
- Cynthia Estlund, "What should we do after work: Automation and employment." *Yale Law Journal* 128 (2018), pp. 254; 283-300 (Section 2)
- Amanda Sharkey and Noel Sharkey, "Granny and the robots: Ethical issues in robot care for the elderly." *Ethics and Information Technology* 14, no. 1 (2012): 27-40.
- Robert Sparrow. "Killer robots." *Journal of Applied Philosophy* 24, no. 1 (2007): 62-77.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GV251

Government, Politics and Public Policy in the European Union

This information is for the 2023/24 session.

Teacher responsible: Prof Sara Hobolt

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Relations, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course is divided into two parts; (i) Government and Politics: the EU as a political system, the Council, the Commission and the European Parliament, the Court of Justice and Judicial politics, public opinion and EP elections, parties and Europe, interest representation; (ii) Public Policy. Policy sessions usually include: the policy-making process, the Single Market, budgetary policies, redistributive policies, EMU, asylum, migration and refugee policies, social and employment policies, external relations policies, and others.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 41 hours across the Autumn, Winter and Spring Terms. This course includes reading weeks in Week 6 of both the AT and WT.

Formative coursework: Two essays per term; students' preparedness for the examinations will depend on this written work and on private reading.

Indicative reading: H Wallace, M Pollack & A Young (Eds), *Policy-Making in the European Union*, 8th edn (2020); N Nugent, *Government and Politics of the European Union*, 8th edn (2017); S Hix and B Hoyland, *The Political System of the European Union*, 3rd edn.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 15% class participation, 80% formative coursework (each formative essay counts for 20%) and 5% attendance.

The Exam Grade for General Course students will be 100% exam.

GV252 Half Unit

Politics and Policy of Data Science

This information is for the 2023/24 session.

Teacher responsible: Prof Cheryl Schonhardt-Bailey

Availability: This course is compulsory on the BSc in Politics and Data Science. This course is available on the BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: How do information technology, social media, and big data shape politics and public policy? How are they, in turn, shaped by politics and public policy? How are data science tools used in politics and public policy themselves? This course offers students a critical understanding of these key intersections between data science and politics.

Major topics include debates over how social media shapes

politics, the global confrontations over rules governing data, how data are used in administrative and policymaking processes, the dangers of algorithmic bias, and how politics shapes and is shaped by innovation and openness. The course will offer a conceptual, non-technical overview of key data science tools and how they are applied by policymakers in settings such as health policy, economic policy, crisis decision-making and public participation. It will also address the challenges faced by policymakers as AI applications continue to develop. The course will also include talks from policymakers who are themselves engaged in data science in their own fields, thereby enabling students to better understand how data science applies in various policy areas.

Teaching: 15 hours of lectures and 9 hours of classes in the AT. There will be a reading week in Week 6 of the AT.

Formative coursework: Students will be expected to complete an assignment in the AT.

Indicative reading:

- Zuboff, Shoshana. 2019. *The Age of Surveillance Capitalism: The Fight for a Human Future at the New Frontier of Power*
- Lehdonvirta, Vili. 2022. *Cloud Empires: How Digital Platforms are Overtaking the State and How We Can Regain Control*
- Bernholz, Landemore and Reich. 2021. *Digital Technology and Democratic Theory*

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

GV262

Contemporary Political Theory

This information is for the 2023/24 session.

Teacher responsible: Prof Paul Apostolidis

Availability: This course is available on the BA in Social Anthropology, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in History and Politics, BSc in International Relations, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Introduction to Political Theory or equivalent.

Course content: This course engages the study of contemporary political theory by examining 20th and 21st century texts while also considering concrete, practical political and social problems. Throughout the AT, we highlight theoretical analyses of questions that concern politics and economic life. Such questions include normative issues about how to define a just distribution of social goods and the relation between economic justice and freedom, as well as critical-theoretical questions about how to understand oppression and popular mobilisation in historical contexts defined by capitalist, colonial, racial and gender power. During the WT, we explore various theoretical problems regarding immigration, environmental politics and global justice in the wake of colonisation. GV262 challenges students to consider a wide range of approaches to writing political theory and diverse perspectives on the basic question of what 'political theory' is. The course offers a WT option to participate in a public-oriented group research activity in partnership with an external organisation, and the course also qualifies as a CIVICA Engage Course for students who pursue the CIVICA Engage Track.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across Autumn Term and Winter Term. There will be reading weeks in AT Week 6 and WT Week 6.

Formative coursework: Students are expected to submit one formative essay and one formative blog in AT.

The course requires students to organize their workloads, to

complete readings in advance of lectures, and to prepare to participate actively in seminars. The course thus emphasizes the development of verbal and written communication abilities. Students also should expect to tackle basic questions about what it means to write political theory by exploring tensions and affinities between normative/ethical and critical-theoretical approaches.

Indicative reading: John Rawls, "A Theory of Justice"; Robert Nozick, "Anarchy, State, and Utopia"; Jacques Rancière, "Disagreement"; Joseph Carens, "The Ethics of Immigration"; Michel Foucault, "Two Lectures"; Mohandas K. Gandhi, "Hind Swaraj"; James Baldwin, "The Fire Next Time"; Rosa Luxemburg, "The Mass Strike"; V. I. Lenin, "What Is To Be Done?"; C. L. R. James, "The Black Jacobins"; Susan Moller Okin, "Justice, Gender, and the Family"; Friedrich A. von Hayek, "The Constitution of Liberty"; Herbert Marcuse, "One-Dimensional Man"; Ingolfur Blühdorn, "Sustainability - Post-Sustainability - Unsustainability".

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (35%, 1500 words) and blog post (15%) in the WT.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 15% class participation, 50% assessed coursework, 30% formative coursework (15% per assignment), and 5% attendance.

GV263

Public Policy Analysis

This information is for the 2023/24 session.

Teacher responsible: Prof Edward Page

Availability: This course is available on the BA in Social Anthropology, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: GV101 Introduction to Political Science (or equivalent).

Course content: A systematic examination of the policy process in the context of developed nations. This course introduces key theories and models in the study of public policy and encourages a critical appreciation of the main trends in contemporary public policy-making. The course looks at the different stages of the 'policy cycle' (e.g. agenda-setting, implementation and evaluation), the determinants of public policy (for example, public opinion, political parties, technology) as well as central themes in the study and practice of public policy, such as corruption and policy learning.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 50 hours across the Autumn, Winter and Spring Terms. There will be reading weeks in Week 6 of AT and WT.

Indicative reading: Christoph Knill and Jale Tosun, *Public Policy*, Macmillan, 2020; Hal Colebatch and Robert Hoppe, *Handbook on Policy, Process and Governing*, Edward Elgar, 2018; P Cairney, *Understanding Public Policy. Theories and Issues*, Palgrave, 2019; BW Hogwood & A L Gunn, *Policy Analysis for the Real World*, Oxford University Press, 1984; J W Kingdon, *Agendas, Alternatives and Public Policies* (2nd edn), HarperCollins, New York 1995; A Hassel and K Wegrich, *How to Do Public Policy* (2022).

Assessment: Exam (75%, duration: 3 hours) in the spring exam period.

Essay (25%, 2500 words) in the WT.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 25% attendance, 37.5% formative essay (best essay), 37.5% participation.

GV264

Politics and Institutions in Europe

This information is for the 2023/24 session.

Teacher responsible: Dr Vesselin Dimitrov

Prof Michael Bruter, Prof Sara Hobolt and Prof Tony Travers

Availability: This course is available on the BA in Social Anthropology, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in History and Politics, BSc in International Relations, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course aims to give students an understanding of the full range of leading topics and areas of debate and research relevant to the analysis of political institutions and politics in Europe. The course focuses on both traditional fields of comparative enquiry, such as the study of party competition and voting behaviour, and emerging fields of interest, such as national and European identities, and immigration. The course places particular emphasis on the diverse experiences of liberal democracy in different parts of Europe. The course covers not only long-established democracies in Western Europe, but also the relatively new democracies in Central and Eastern Europe. In the Lent Term, the course will study in depth a number of European countries, such as Britain, France and Germany, analysing the main developments in the country concerned in the last twenty years (elections, parties, governments), and then examining issues of particular interest related to that country. Course topics include: electoral behaviour; ideology and issues; political parties and party competition; government formation and coalitions; regionalism and federalism; national and European identities; and immigration.

Teaching: This course provides a combination of lectures and classes totalling a minimum of 50 and a half hours across the Autumn, Winter and Spring Terms.

There will be reading weeks in Week 6 of the AT and Week 6 of the WT for private study and essay and assessment preparation.

Formative coursework: Students will be expected to produce 2 essays in the AT and 2 essays in the WT.

Indicative reading: T Bale, *European Politics: A Comparative Introduction* (4th edn) (2017); M Gallagher et al, *Representative Government in Modern Europe* (5th edn) (2011); P Heywood et al (Eds), *Developments in European Politics* (2006); S Hix and B Hoyland, *The Political System of the European Union* (3rd edn) (2011); V Dimitrov, K H Goetz & H Wollmann, *Governing after Communism: Institutions and Policymaking* (2006); A Lijphart, *Patterns of Democracy* (2nd edn) (2012).

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 15% general contribution to class discussions, 15% presentation(s) and, if applicable, essay outline(s), 60% grading of formative coursework (15% for each of the 4 essays), 10% attendance.

GV267

Global Political Thought

This information is for the 2023/24 session.

Teacher responsible: Prof Leigh Jenco

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Relations, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at three groups.

Pre-requisites: Introduction to Political Theory or equivalent.

Course content: This course examines normative and conceptual theories of politics from a global, transhistorical perspective. We go beyond current theories of "decolonization" to consider how conversations about political life can be and have been transformed on the basis of distinctive concerns that emerge from specific times and places, marked by different levels of affluence, historical connections (or the lack thereof), textual or oral heritages, as well as the experience of imperialism. The course will bring these diverse sources into a meaningful discussion about the political questions that they pose, both on their own and in comparison with others. We consider how context should matter in the investigation of political ideas. We ask how, but also whether, we should integrate these disparate perspectives into a shared conversation.

The course cannot aspire to comprehensiveness, but it aims for a certain integrity of themes and builds up a methodological toolbox for critical engagement with a diverse range of sources. All readings will be in English.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 10 hours of classes in the WT.

Lectures of 90 minutes; seminars of 60 minutes based on intensive student participation.

There will be a reading week in Week 6 of the Autumn and Winter terms.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 "comparison grid" in the WT. One formative essay of 1500 words (AT) and one "comparison grid" (requiring comparison of multiple texts on different questions, WT).

Indicative reading: Ibn Tufayl, Muhammad ibn Abd al-Malik, *Ibn Tufayl's Hayy Ibn Yaqzan: A Philosophical Tale*. Trans. Lenn Evan Goodman. Updated edition. Chicago: The University of Chicago Press, 2009.

Saaler, Sven, and Christopher W. A. Szpilman, eds. *Pan-Asianism: A Documentary History*. Lanham, Md: Rowman & Littlefield, 2011.

Tedlock, Dennis, ed. *Popol Vuh: The Mayan Book of the Dawn of Life*. Rev. ed. New York: Simon & Schuster, 1996.

Radhakrishnan, Sarvepalli, and Charles A. Moore, eds. *A Source Book in Indian Philosophy*. Princeton: Princeton University Press, 1957.

Confucius, *The Analects: With Selections from Traditional Commentaries*. Translated by Edward Slingerland. Indianapolis: Hackett Publishing, 2003.

Assessment: Exam (40%, duration: 3 hours) in the spring exam period.

Essay (40%, 2000 words) in the WT.

Class participation (20%) in the AT and WT.

GV302**Key Themes in the History of Political Thought**

This information is for the 2023/24 session.

Teacher responsible: Prof Katrin Flikschuh

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option. This course is available with permission to General Course students.

This course is capped at one group.

Pre-requisites: Students will normally be expected to have taken GV100, 'Introduction to Political Theory', or equivalent in a previous year.

Course content: This advanced course treats some of the major themes in the history of western European political thought as drawn from the writings of selected political philosophers of the ancient Greek, Roman, early modern and modern periods. The aim is to analyse and interpret in some depth a selected subset of thinkers and topics in order to explore continuities and discontinuities in ethical and political problems and their solutions over time and changing contexts.

Examples of possible themes include: different views on the nature of "man" and the consequences for political agency of different perspectives on human reason; changing conceptions of justice; different views on government and the state's relation to the individual; the historical and socio-political presuppositions behind the different constitutional regimes; the role of religion in politics; changing perspectives on the relationship between life in the family and a life of active citizenship.

This year, we will focus on debates over the relation between reason, morality, and political authority in the works of Aristotle, Hobbes, Hume, Kant, and JS Mill. We shall consider how these different thinkers' underlying conceptions of practical reasoning informed their views on personhood, morality, political authority, and citizenship. Throughout, we shall consider these thinkers' abiding influence on contemporary views about the relation between reason, morality, and politics.

Teaching: This course is delivered through seminars totalling a minimum of 40 hours across the Autumn and Winter terms. There will be a reading week in Week 6 of the Autumn and Winter terms. This course is taught in a seminar style format. There will be no distinction between lectures and classes; we will instead meet for weekly 2 hour sessions during Autumn and Winter Terms. Seminar discussion will be student led, which means that it is vital for students to come to the sessions well prepared, with weekly readings being done in advance of each session. As this course is assessed by written essays, there will be no revision session during Spring Term. The total teaching will be 40 hours.

Formative coursework: There will be 2 formative assignments over the year, with an essay of up to 1,500 words due & returned in the AT, and a second essay of up to 1,500 words due towards the end of the WT.

Indicative reading: Primary Sources: Aristotle, *The Nicomachean Ethics*; Aristotle, *The Politics*; Hobbes, *Leviathan*; Kant, *Groundwork of the Metaphysics of Morals*; Kant, *The Metaphysics of Morals*; JS Mill, *On Liberty*; JS Mill, *Utilitarianism*.

Assessment: Essay (50%, 2500 words) in the WT. Essay (50%, 2500 words) in the ST.

GV307 Half Unit**Conflict and Cooperation: A Few Provocative Debates**

This information is for the 2023/24 session.

Teacher responsible: Dr Omar Shahabudin McDoom

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

Course content: (Q1) When is it permissible to kill civilians for a political cause? (Q2) Should governments be permitted to restrict civil liberties in the name of security? (Q3) Is cultural diversity more problematic than desirable in societies? (Q4) Should we preserve and promote multiculturalism? (Q5) Do grievances and ideologies matter more in explaining radicalization and terrorism? (Q6) How convincing are the arguments in favour of open borders? (Q7) What role, if any, does inequality play in the onset of political violence? (Q8) How skeptical should we be of apocalyptic claims regarding climate refugees and violent conflict? (Q9) When it is justifiable to use drones to kill? (Q10) What are the arguments for and against an international responsibility to protect civilians in cases of gross human rights violations?

This course is organized around these ten "big" empirical and normative questions which touch on issues in the public sphere relating to political and ethnic conflict and cooperation. The selection of debates and cases may vary year-to-year as the scholarly frontier of understanding and the world's catalogue of conflicts also evolve. The course is taught as a research seminar comprising ten weekly two-hour sessions. Given its research-oriented focus, the course is attentive to methodology and students will be taught to critically evaluate the more common approaches to empirical research in the field. Students will have the opportunity to undertake a single substantial research project on a course-related topic resulting in an assessed summative essay.

Teaching: This course is delivered through 20 hours of seminars in the Autumn Term. This course includes a reading week in Week 6 of the AT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

Students will submit a 1000 word annotated bibliography, in which they summarize between 3 and 6 scholarly writings (articles or books) that they have carefully chosen themselves after conducting a comprehensive literature search on a course topic and research question approved by the course instructor.

Indicative reading:

- A statement from Al Qaeda regarding the mandates of the heroes and the legality of the operations in New York and Washington - Al Qaeda, 2002
- *The Lesser Evil* - Michael Ignatieff, 2004
- *E Pluribus Unum: Diversity and Community in the Twenty-first Century* The 2006 Johan Skytte Prize Lecture - Robert D. Putnam, 2007-06
- *Are There Any Cultural Rights?* - Kukathas, Chandran
- *Dying to win: the strategic logic of suicide terrorism* - Robert Anthony Pape, 2005
- *Aliens and Citizens: The Case for Open Borders* - Joseph Carens
- *Beyond greed and grievance: feasibility and civil war* - P. Collier, A. Hoeffler, D. Rohner
- *Climate Change and Conflict: The Migration Link* - Nils Petter Gleditsch, Ragnhild Nordas
- *Killing by remote control: the ethics of an unmanned military* - Jeff McMahan, 2013
- *The 'Responsibility to Protect' and the Structural Problems of Preventive Humanitarian Intervention* - Roland Paris, 2014-10-20

Assessment: Essay (80%, 3000 words).

Class participation (20%) in the AT.

The annotated bibliography will inform the final 3000 word summative long essay on the student's chosen course topic.

GV309 Half Unit

Politics of Money and Finance in Comparative Perspective

This information is for the 2023/24 session.

Teacher responsible: Dr David Woodruff

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students. This course is capped at one group.

Pre-requisites: While there are no pre-requisites, students will occasionally need to use very basic mathematical reasoning (on the level of the earlier parts of the GCSE curriculum, or equivalent) in understanding monetary and financial issues.

Course content: The course focuses on empirical and normative issues relevant to the politics of money and finance in rich constitutional democracies. It will provide an introduction to the history and practical operation of finance, banking, and monetary policy. Students will consider debates about the role of monetary policy in controlling price levels and stimulating employment and growth, as well as its potential relationship to inequality. The course will also examine arguments about the causes of chronic financial instability in capitalist economies. In light of these theories, we will evaluate the case for making central banks independent of direct democratic control, considering the relationship between central banks and elected politicians in various circumstances, including those of recession or low growth, financial crisis, and high inflation. We will also consider whether and how financial markets limit policymakers' autonomy. The course uses both contemporary and historical material, and adopts a comparative country perspective, rather than an international relations perspective.

Teaching: 20 sessions of 90 minutes each in the AT, approximately half of which will be lectures and half seminar-style discussion of set readings. Students should expect to read at least 3-4 journal articles or pieces of equivalent length each week. There will be a reading week in week 6 of the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: Robert Z. Aliber and Charles P. Kindleberger, "The Anatomy of a Typical Crisis," in *Manias, Panics, and Crashes*, by Robert Z. Aliber and Charles P. Kindleberger (London: Palgrave Macmillan UK, 2015), 38–52.

Blinder, A., *The Quiet Revolution: Central Banking Goes Modern* (Yale University Press, 2004).

Assessment: Exam (40%, duration: 2 hours) in the January exam period.

Essay (60%, 3000 words).

The exam will be designed to ensure engagement with reading throughout the course.

GV311

British Government

This information is for the 2023/24 session.

Teacher responsible: Prof Antony Travers

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This course is capped.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course will provide an introduction to contemporary British government, notably the institutions involved and processes of policy-making. The first part of the course will explain the evolution of British government from the earliest times, including the philosophical ideas that have come to underpin contemporary politics. The key institutions of British government will be described and analysed, focusing on factors that explain the functioning of a complex modern State. By the end of the course, students will have a practical understanding of the entire system of British government and the influences that affect it.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 51 and a half hours across the Autumn, Winter and Spring Terms. There will be a reading week in Week 6 of both the AT and WT.

Formative coursework: Students will be required to submit 2 unassessed essays in both the Autumn and Winter Terms.

Indicative reading: R. Heffernan, P Cowley and C Hay, *Developments in British Politics* 9, Palgrave Macmillan, 2011
P. Norton, *The British Polity*, 5th Edition, London, Pearson Longman, 2010

M. Garnett and P. Lynch, *Exploring British Politics*, 2nd edition, London, Pearson Longman, 2009

R. A. W. Rhodes, *Everyday Life in British Government*, Oxford University Press, 2011

C. Hood, *The blame game: spin, bureaucracy, and self-preservation in government*, Princeton University Press, 2011

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

GV313 Half Unit Politics of Trade in Comparative Perspective

This information is for the 2023/24 session.

Teacher responsible: Prof Stephanie Rickard

Availability: This course is available on the BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This course is capped at two groups.

Pre-requisites: A background in international economics and solid understanding of key concepts, such as comparative advantage, externalities and equilibrium would be advantageous.

Course content: The course focuses on the role of interests and institutions in the process and formulation of trade policy. We examine the influences of interests and institutions in trade policy-making, focusing predominantly on developed countries. We draw on theories from economics and political science and analyze these using both historical and contemporary examples, and do so from a comparative perspective, rather than an international relations perspective.

The primary focus of the course is on policy outcomes.

Teaching: This course provides a minimum of 30 hours of lectures and seminars in the Winter Term. There will be a reading week in WT Week 6.

Formative coursework: Weekly writing assignments.

Indicative reading: Hiscox, Michael. (2002) "Commerce, Coalitions, and Factor Mobility: Evidence from Congressional Votes on Trade Legislation." *American Political Science Review* 96(3): 593-608.
Evans, Carolyn. (2009) "A Protectionist Bias in Majoritarian Politics: An Empirical Investigation." *Economics & Politics* 21(2): 278-307.
Milner, Helen V. and Keiko Kubota. (2005) "Why the Move to Free Trade? Democracy and Trade Policy in the Developing Countries." *International Organization* 59 (Winter): 107-144.

Assessment: Essay (100%, 3500 words).

GV314 Empirical Research in Government

This information is for the 2023/24 session.

Teacher responsible: Prof Edward Page

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students. This course is capped at one group.

Course content: The course introduces a variety of techniques and issues in the empirical study of political science and applies them to a practical research project in which students participate throughout the year. No prior knowledge of statistics or research methods is required. The focus of the course will be the practical research project. At the theoretical level the course will cover questions relating to the utilization of policy research, forms of research design, sampling, questionnaire construction, coding and converting non-quantitative to quantitative indicators, response rates, elite interviewing and research ethics. As the practical research project progresses classes will cover the development of practical skills such as, principles of research report writing and, where appropriate for the project, use of text processing programmes, and basic routines in the widely-used Statistical Package for the Social Sciences (SPSS), such as those used for

compiling crosstabulations.

Teaching: This course is delivered through a combination of seminars and workshops totalling a minimum of 40 hours across the Autumn, Winter and Spring Terms. There will be reading weeks in Week 6 of AT and WT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: Ronald F. Czaja and Johnny E. Blair *Designing Surveys: A Guide to Decisions and Procedures* (2005, 2014 online accessible through LSE Library); Sandra Halperin and Oliver Heath, *Political Research. Methods and Political Skills* 2nd edn (2016); Sage Research Methods database (online accessible through LSE Library); Floyd J. Fowler *Survey Research Methods*, 5th edn (2013); Claus Moser and Graham Kalton, *Survey Methods in Social Investigation*, 2nd edn (1985); Melanie Mauthner et al (eds), *Ethics in Qualitative Research* (2002).

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (25%, 2500 words) in the WT.

Research paper (25%) in the ST.

Each student completes a 2500 word essay (25%) in the Winter Term and writes up a 3300 word report on the research project (25%) in the Spring Term. The mark for the research project report includes a small peer review element. There will also be a 2 hour exam (50%) in the Spring exam period.

GV315 Half Unit Voting and Elections in Developing Democracies

This information is for the 2023/24 session.

Teacher responsible: Dr Ryan Jablonski

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students. The course is capped at two groups.

Pre-requisites: Government students should have completed GV101 Introduction to Political Science or equivalent.

Course content: Most governments in the developing world have adopted electoral institutions, many in the last few decades. However, these institutions vary considerably in their ability to hold politicians accountable. Emergent democracies are frequently plagued by violence, fraud, corruption, weak accountability, and clientelism. This seminar is a discussion of the nature of electoral institutions in developing democracies, with a particular focus on the causes and consequences of these ills. Among other things, we will seek answers to the following questions: Why do governments adopt electoral institutions, but then fail to permit free and fair voting? When and why do governments use fraud and violence to win elections? What has been the impact of development aid, election monitoring and democracy assistance on elections and democratization? To answer these questions we will draw on an emerging political science literature on these issues, as well as several case studies. Students are expected to be active participants in this course, and will participate in several class debates and writing exercises.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours in the Winter Term. There will be a Reading Week in Week 6 of WT.

Formative coursework: Students will be expected to produce a research proposal of 500 words in the WT. Students are also expected to participate in a policy simulation, and must prepare one written policy statement in WT.

Indicative reading: Stokes, Susan C., et al. *Brokers, Voters, and*

Clientelism: the puzzle of distributive politics. Cambridge University Press, 2013.

Wantchekon, Leonard. 2003. "Clientelism and Voting Behavior: Evidence from a Field Experiment in Benin." *World Politics* 55, no. 3: 399-422.

Zakaria, F. 1997. The Rise of Illiberal Democracy. *Foreign Affairs* 76: 22-43.

Bratton, Michael, and Nicholas Van de Walle. Democratic experiments in Africa: Regime transitions in comparative perspective. Cambridge University Press, 1997.

Weitz-Shapiro, Rebecca. "What wins votes: Why some politicians opt out of clientelism." *American Journal of Political Science* 56.3 (2012): 568-583.

Assessment: Essay (80%, 4000 words) in the ST. Presentation (20%) in the WT.

GV316 Half Unit

Advanced Issues in Applied Political Theory

This information is for the 2023/24 session.

Teacher responsible: Prof Kai Spiekermann

Availability: This course is available on the BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at two groups.

Pre-requisites: A foundational course in contemporary political theory (such as GV262 or equivalent) is recommended.

Course content: An investigation of contemporary questions in applied political theory. Taking as a starting point a pressing social and political challenge, the course instructs students to systematically apply different political theories to approach the problem, to understand and critically discuss different normative viewpoints, and to develop and defend their own position in these debates.

Examples of such themes include environmental and climate change, free speech, multiculturalism and toleration, poverty and global justice, colonialism, or surveillance and privacy. The topics are selected each year to reflect current debates and the interests of the course convener. The course gives students the opportunity to experience research-led teaching, as the course convener will typically create a syllabus to reflect their current research projects. In 2023-24, the focus on the course will be political-philosophical questions in the context of environmental change, especially climate change. The approach will be interdisciplinary and exploratory. While the focus is on normative-philosophical issues, we will also make use of positive-analytical and empirical literature. Some of the possible questions to be discussed are: How should we balance the interests of current and future generations? How does climate change affect our obligations towards the global poor? How do we make policy decisions if the effects are uncertain but potentially severe or irreversible? Are we individually or collectively responsible for causing climate change, and what follows from this? How do we relate to the environment and what precisely is valuable about preserving it?

Teaching: This course provides a combination of classes and lectures totalling 25 hours in the Winter Term. There will be a reading week in WT Week 6.

Formative coursework: One short formative essay in the WT.

Indicative reading:

- John Broome (2012) *Climate Matters: Ethics in a Warming World*, New York (W.W. Norton);
- Stephen Gardiner, Simon Caney, Dale Jamieson and Henry Shue,

eds. (2010) *Climate Ethics: Essential Readings*, Oxford (Oxford University Press);

- Denis G. Arnold, ed. (2011) *The ethics of global climate change*, Cambridge (Cambridge University Press);
- Stephen M. Gardiner (2011) *A Perfect Moral Storm: The Ethical Tragedy of Climate Change*, Oxford (OUP);
- Jeremy Moss, ed. (2015). *Climate Change and Justice*, Cambridge: Cambridge University Press;
- Simon Caney (2020). "Climate Justice", in: *Stanford Encyclopedia of Philosophy*, Ed. Edward N. Zalta. Available at: <https://plato.stanford.edu/entries/justice-climate/>;
- Intergovernmental Panel on Climate Change (2021-2) *Sixth Assessment Report*, Available at www.ipcc.ch.

Assessment: Essay (100%, 3000 words) in the ST.

GV318 Half Unit

Building Democracies from Conflict? Violence, Power-Sharing and Institutional Design

This information is for the 2023/24 session.

Teacher responsible: Dr Paul Mitchell

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

This course is capped at two groups.

Pre-requisites: Students may find it helpful to have completed Introduction to Political Science (GV101).

Course content: How can we design, build and sustain 'democracies' in less than ideal circumstances? We will explore societies torn apart by political violence and ethnic conflict. The main purpose is to diagnose the central problems, and examine what political responses are most appropriate. The first part of the course mostly looks at the problems, in particular political violence. We consider the likely futures for Iraq, Kurdistan and Islamic State. What are the justifications for political violence? How much political violence is there and what are the main types and trends? We shall examine the strategies terrorism and suicide terrorism. Since the end of the cold war, almost all wars are 'civil wars' and we will consider what causes civil wars, what sustains them (why do some last much longer than others?), and how do they end? The second part of the course shifts the focus of attention to 'solutions' and policy responses to divided societies and failing states. Informed responses might include: intervention, mediation and peace agreements; power-sharing and constitutional design; territorial management of conflict; transitional justice; elections, party systems and institutions for governing divided societies.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 35 hours in the Autumn Term. There will be a Reading Week in Week 6.

Formative coursework: Students will be expected to produce 1 project in the AT.

Formative - one short project proposal - which should be a research design plan for the project. Students will receive written and verbal feedback on the viability and quality of their proposal, but it will not be graded. It is feedback and advice, not part of summative assessment. The deadline will be week 7, just after reading week in week 6. Length 1000 words. Pedagogically, preparation of the research proposal combined with advice and feedback will help improve the quality of the final project.

Indicative reading:

- Paul Collier (2010), *Wars, Guns and Votes: Democracy in Dangerous Places*. London: Vintage.
- Lars-Erik Cederman, Kristian Gleditsch and Halvard Buhaug

(2013), *Inequality, Grievances and Civil War*. Cambridge University Press.

- Vinjamuri, Leslie and Jack Snyder (2015), 'Law and Politics in Transitional Justice', *Annual Review of Political Science* 18: 303-327.
- Brancati, Dawn and Jack Snyder (2012), 'Time to Kill: The Impact of Election Timing on Postconflict Stability', *Journal of Conflict Resolution*.
- Brownlee, Jason, Tarek Masoud and Andrew Reynolds (2015), *The Arab Spring: Pathways of Repression and Reform*. Oxford University Press.

A full reading list will be available on Moodle.

Assessment: Project (80%, 4000 words) in January. Presentation (20%) in the AT.

As a final year course, the aim is to have a 'research output' as the main method of assessment in the form of a mini-project. This will be similar to the shorter 'research notes' sections of many academic journals and should not exceed 4,000 words. Students will also each make one seminar presentation, on which they will receive feedback and a grade.

GV319 Half Unit

Experimental Politics

This information is for the 2023/24 session.

Teacher responsible: Dr Florian Foos

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

Pre-requisites: Familiarity with basic research design and statistics as covered by at least one foundational Statistics course, such as ST102, ST107, ST108, GY140, SA201.

Course content: This course will introduce students to the design, conduct and analysis of randomized field experiments (RCTs) in politics to evaluate theories, programmes and policies. The course will cover the science and methods of experimentation (weeks 1-3), debate the practicalities of collaborating with political actors such as parties, NGOs and governments, as well as the ethics of field experimentation (week 5). The second part of the course examines the findings of experimental research in five distinct political domains (weeks 7-11). Topics include:

1. Voter mobilisation
2. Social networks
3. Political persuasion
4. Social contact and prejudice reduction
5. Gender and politics

Teaching: This course will be delivered through a combination of seminars and lectures totalling a minimum of 25 hours across the Winter Term and Spring Term. There will be no lecture during week 6 (reading week) of WT and no class during weeks 1 and 6 of WT.

Formative coursework: Students will be expected to solve 1 formative problem set, in WT.

Indicative reading: Required textbook:

Gerber, Alan and Donald P. Green. 2012. *Field Experiments: Design, Analysis, and Interpretation*, New York: W.W. Norton, 2012.

Suggested texts:

Gerber, Alan S., and Donald P. Green. 2017. "Field experiments on voter mobilization: An overview of a burgeoning literature." In *Handbook of Economic Field Experiments*, Vol. 1, pp. 395-438.

John, Peter. 2017. *Field Experiments in Political Science and Public Policy: Practical Lessons in Design and Delivery*, London: Routledge.

Karlan, Dean and Jacob Appel. *Failing in the Field*, Princeton, NJ: Princeton University Press, 2016.

Journal articles and other reading list texts, as assigned.

Students will have free choice on their experimental research design topic, so they should expect to find and read additional books and articles on the topic in consultation with the instructor and the library.

Assessment: Take-home assessment (50%) in the WT.

Research design (50%) in the ST.

The assessment for this module consists of one problem set (50%) and one research design essay (50%). The problem set combines short theoretical problems, and applied problems requiring basic data manipulation/analysis using R. In the experimental research design essay (3000 words) you are asked to write an experimental design outlining how you would address a causal research question of your choice in Political Science using a randomized field experiment. The research design should include a short literature review, hypotheses, research design, and pre-analysis plan. There is also a practice problem set, for which cohort feedback is provided. The two problem sets (formative and summative) will ensure that students have the skills necessary to propose a credible experimental design. One-on-one meetings after Reading Week will provide a checkpoint to obtain early feedback.

GV320 Half Unit

Populism

This information is for the 2023/24 session.

Teacher responsible: Professor Francisco Panizza

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

This course is capped at one group.

Course content: The course studies populism from a conceptual and comparative perspective. Given the highly contested nature of populism, the first weeks will look in depth to different theories of populism, including ideational, strategic, and performative understandings of populism. It will then move to explore the conditions of emergence of populism, the relation between populism and democracy, varieties of populism and grassroots populist movements. The last three lectures will seek to apply the conceptual tools presented in the first part of the course to

regional and country case studies.

Teaching: This course provides a combination of classes and lectures totalling 25 hours in the Winter term. There will be a reading week in Week 6 of the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

One short essay (approx. 500-700 words) to be submitted in Week 8 of the WT. The formative essay will consist of a draft outline of the summative essay. It will require the choice of an essay topic and title, the justification of why it is relevant, a short literature review, the formulation of the essay question and a summary of how the question will be addressed (for instance, using comparative cases). The essay will not receive a grade, instead feedback will be provided to promote critical thinking and guide students through the real-life process of academic writing. Students will not be allowed to submit the summative essay without previously submitting the formative essay.

Indicative reading: Essential Readings

- Ben Moffit. *Populism*. Cambridge: Polity, 2020.
- Cristobal Rovira Kaltwasser, Paul Taggart, Pierre Ostiguy and Paulina Ochoa- Espejo (eds). *Oxford Handbook on Populism*. Oxford: Oxford University Press, 2017.

Additional Readings

- M. Canovan. "Trust the People". *Populism and the two faces of democracy*. *Political Studies* 47 (11) 1999.
- Jan-Werner Müller. *What is Populism?* 160 Princeton: Princeton University Press, 2016.
- P. Ostiguy, F. Panizza and B. Moffitt. *Populism in Global Perspective. A Performative and Discursive Approach*. New York: Routledge, 2021.
- C. de la Torre (ed) *Routledge Handbook of Global Populism*. London: Routledge, 2019.

Assessment: Presentation (20%) in the WT.

Essay (80%, 3500 words) in the ST.

The essay will be marked in line with departmental guidance on assessed essays. This will allow for a scale of outcomes in line with different levels of academic outputs. It will be marked for command of the literature, theories and empirical findings, analytical sophistication, use of evidence, critical judgement and originality. The individual class presentations will take the form of a 15-minute presentation followed by 30 minutes of questioning from both the class and the teacher. Particular value will be placed on the ability to present contending arguments in a clear and balanced way, the use of empirical evidence to support arguments and the capacity to raise relevant questions for class discussion.

GV321 Half Unit

Concepts and Controversies in Political Theory

This information is for the 2023/24 session.

Teacher responsible: Prof Lea Ypi

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

This course is capped at two groups.

Pre-requisites: Students will be expected to have some familiarity with political theory (e.g., having taken GV100 Introduction to Political Theory, or GV262 Contemporary Political Theory or some other, relevant module).

Course content: This course is devoted to the advanced study of key concepts and related controversies in political theory. It will look at the idea of socialism, the philosophy associated to it and the key political writings of the twentieth century. In the first half of the course we will cover some key issues in the study of Marxism

such as the materialist conception of history, the idea of class and class struggle, the role of the state, the analysis of exploitation, the defence of revolution, the role of the party. In the second half we will cover historical developments of Marxism, consider how fundamental concepts examined in the first part are deployed in the course of Marxism's historical development, assess and compare approaches to each other and examine their contribution to the further development of Marxist studies as well as their contemporary relevance.

This course does not require any prior knowledge of socialist theories but we will move quickly through the different texts so interest in philosophy and in the history of political thought is strongly recommended. The only prerequisite is one prior course in political theory, such as GV100 or GV262.

At the end of the course students will be expected to be familiar with the key concepts in the study of socialism, engage critically with them, relate debates and authors with one another, evaluate their arguments and establish links with other key thinkers in the history of political thought.

Teaching: This course provides a combination of classes and lectures totalling 25 hours in the Autumn Term. There will be a reading week in AT Week 6.

Formative coursework: Students will be expected to submit a 1500 word formative essay by the end of week 6 (reading week).

Indicative reading:

- McLellan, D. (2000), *Karl Marx: Selected Writings*, Oxford, Oxford University Press.

Introductory

- Wolff, Jonathan, *Why Read Marx Today?* (Oxford: OUP 2002).

Historical

- McLellan, David. *Marxism after Marx*. 4th ed. ed. Basingstoke: Palgrave Macmillan, 2007, ch. 3, 6 and 7.
- Kolakowski, L. (1978), *Main Currents of Marxism*, Oxford, Oxford University Press.

Assessment: Essay (80%, 3000 words) and class participation (20%).

GV323 Half Unit Not available in 2023/24

Transparency and Accountability in Government

This information is for the 2023/24 session.

Teacher responsible: Dr Daniel Berliner

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

This course is capped at one group.

Course content: Is "sunlight the best disinfectant"? Can information empower citizens to hold their government accountable? How have information technologies been used to enable civic engagement and participation? What are the relationships between transparency, secrecy, corruption, and accountability?

This course will familiarise students with the theory and practice of transparency and accountability in government, enabling them to critically address these questions and engage meaningfully in fast-moving contemporary policy debates.

The course will offer a grounding in theories of democracy, representation, and accountability, as well as debates over the merits of transparency in light of competing values like secrecy and privacy. The course will also enable students to evaluate the role played by different forms of information in political systems, as well as to critically assess the theories of change and assumptions behind information-based policy initiatives.

The course has a global scope, focusing on applications in both

developed and developing countries, and on policy types including freedom of information, information-based regulation, participatory budgeting, crowdsourced policymaking, "civic tech," open data, campaign finance and asset disclosures, and applications of transparency to sectors like extractive industries, the environment, and public health.

Teaching: 15 hours of lectures and 10 hours of classes in the WT. 4 hours of workshops in the ST. There will be a Reading Week in Week 6 of LT.

Formative coursework: Students will be expected to produce one formative essay of 1,000 words in the LT.

Indicative reading: Fung, Archon. 2013. "Infotopia: Unleashing the democratic power of transparency." *Politics & Society* 41(2): 183-212.

Schedler, Andreas. 1999. "Conceptualizing accountability." In *The self-restraining state: Power and accountability in new democracies*, Schedler, Andreas, Larry Diamond, and Marc F. Plattner, eds. Boulder: Lynne Rienner Publishers.

Fox, Jonathan A. "Social accountability: what does the evidence really say?" *World Development* 72 (2015): 346-361.

Stasavage, David. 2004. "Open-door or closed-door? Transparency in domestic and international bargaining." *International Organization* 58(4): 667-703.

Tan, Yeling. 2014. "Transparency without democracy: The unexpected effects of China's environmental disclosure policy." *Governance* 27(1): 37-62.

Ackerman, John M., and Irma E. Sandoval-Ballesteros. "The global explosion of freedom of information laws." *Administrative Law Review* 58 (2006): 85.

Berliner, Daniel. 2014. "The political origins of transparency." *The Journal of Politics*, 76(2), 479-491.

Gonçalves, Sónia. "The effects of participatory budgeting on municipal expenditures and infant mortality in Brazil." *World Development* 53 (2014): 94-110.

Worthy, Ben. 2015. "The impact of open data in the UK: Complex, unpredictable, and political." *Public Administration*, 93(3), 788-805.

Roberts, Alasdair. 2012. "WikiLeaks: the illusion of transparency." *International Review of Administrative Sciences* 78(1): 116-133.

Assessment: Essay (90%, 2500 words) and presentation (10%) in the ST.

GV324 Half Unit

Applied Quantitative Methods for Political Science

This information is for the 2023/24 session.

Teacher responsible: Prof Valentino Larcinese

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. This course will be freely available to students with the required background.

Pre-requisites: Students must have completed Quantitative Methods (Mathematics) (MA107) and Quantitative Methods (Statistics) (ST107), or equivalent courses.

Course content: This course provides an introduction to the most commonly used methods for causal inference in the social sciences using observational data. It covers simple and multiple regression (particularly focussing on the conditions for a causal interpretation of the coefficients), matching, panel data, diff-in-diff, instrumental variables, regression discontinuity. The course will prioritize the practical understanding and application of the methods rather than their statistical foundations. Applications will

be selected from existing research literature.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 30 hours in the Winter Term, with a reading week in WT Week 6.

Formative coursework: Students will be expected to produce 1 problem set and 1 case study in the WT.

Indicative reading: Stock & Watson: "Introduction to Econometrics", Pearson International (various editions, all equally valid)

Dunning: "Natural experiments in the social sciences", CUP 2012
Angrist & Pischke: "Mastering metrics", Princeton University Press 2015

Assessment: Exam (40%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Group project (60%) in the WT and ST.

The group project includes a presentation element.

GV325 Half Unit

Topics in Political Economy

This information is for the 2023/24 session.

Teacher responsible: Prof Stephane Wolton

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy, BSc in Psychological and Behavioural Science and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students are expected to have taken GV225 Public Choice and Politics, or EC201 Microeconomic Principles I, or equivalent, in a previous year. An introductory knowledge of economics and econometrics would be useful.

Course content: This course provides an overview of recent research in political economy. The focus will be on the applications of game theoretical and empirical approaches to the understanding of contemporary political issues. During the lectures, we will cover some seminal and some most recent models to think critically about the topics studied. In addition, we will go over papers testing or related to the theories we cover. Students will learn to assess critically the usefulness and limitations of theories and empirics alike. As such, this course allows students to understand how the tools they acquired in GV225 – Public Choice (or equivalent course) and GV249 – Research Design (or equivalent course) can be combined to study important political questions.

Themes covered change every year as a function of current debates in the scholarly community and of pressing problems in the world at large. In recent years, the topics studied in the course have included, among others, populism, media and democracy, autocratic politics, terrorism. Questions covered during the lectures have included the sources of populists' success, the effect of biased media on political outcomes, the role of violence in securing autocratic regimes, or the evaluation of counter-terrorist policies, among many others.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours in the Autumn Term and 5 hours in the Spring Term, with a reading week in Week 6 of the AT. There will be a two-hour mock exam and a two-hour revision lecture in the ST.

Formative coursework: Students will complete one problem set to further their understanding of the concepts covered in the course and prepare for the coursework. There will also be a timed exam in ST Week 1 to allow practice on problem sets solving under exam conditions.

Indicative reading: Canes-Wrone, Brandice, Michael C. Herron,

and Kenneth W. Shotts. 2001. "Leadership and pandering: A theory of executive policymaking." *American Journal of Political Science* 45(3): 532-550.

Most of the reading is from journal articles; a complete list will be supplied at the start of the term. A useful overview of political economy topics in democracy is: T Besley, *Principled Agents? Selection and Incentives in Politics*, Oxford University Press, 2005.

Assessment: Exam (50%, duration: 2 hours and 45 minutes, reading time: 15 minutes) in the spring exam period. Coursework (50%) in the WT.

GV326

Conflict, War and Revolution - Approaches to Political Theory

This information is for the 2023/24 session.

Teacher responsible: Prof Paul Kelly

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Introduction to Political Theory (GV100).

Course content: The course explores some different approaches to the problem and challenge of politics through the careful reading of a number of important texts and thinkers from the Ancient Greeks to the present. It will build on and assume the overview of Political Theory in GV100 but go beyond a broad superficial reading to an in depth and critical engagement with complex texts from history, philosophy and theology to explore the methodologies of political thinking and critical reading in order to understand to challenge and problem of political action. The thinkers discussed comprise Thucydides, Augustine of Hippo, Machiavelli, Hobbes, Rousseau, Clausewitz, Lenin and Mao, Carl Schmitt. These paradigmatic thinkers challenge the presuppositions of contemporary liberal egalitarianism and state focused models of politics and distinguish the domain of the political from other ways of thinking about human practical modes of experience such as morality, society and the economy. Alongside ways of reading these texts the course will also explore a number of issues about the nature of politics including how the domain of politics is conceived, the sites of political engagement such as the polis, city, republic, empire, state, system of states, and multitude. We will focus on the nature, justification and legitimacy of violence, force and conflict. Finally the course will also examine the 'meta-narratives' or overarching contexts within which they argue the political takes place, such as the structure and meaning of history and whether history justifies political action or redeems human suffering and oppression.

Teaching: This course is delivered through seminars totalling a minimum of 40 hours across the Autumn and Winter Terms. This course includes reading weeks in Week 6 of both the AT and WT.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 essay in the WT.

Indicative reading:

- Kelly, Paul, *Conflict, War and Revolution*, LSE Press, 2022.
- Thucydides, *History of the Peloponnesian War*, trans. R. Warner, Harmondsworth, Penguin, 1972.
- Augustine, *The City of God Against the Pagans*, trans. R.W. Dyson, Cambridge, Cambridge University Press, 2013.
- Machiavelli, *The Prince*, eds. Q. Skinner and Russell Price, Cambridge, Cambridge University Press, 2012.
- Hobbes, *Leviathan*, ed. R. Tuck, Cambridge, Cambridge University Press, 1991.

- Rousseau, *Of the Social Contract and Other Political Writings*, Harmondsworth, Penguin, 2012.
- Clausewitz, Carl von., *On War*, eds. M. Howard and P. Paret, Princeton, Princeton University Press, 1984.
- Lenin, V.I., *The State and Revolution*, Harmondsworth, Penguin, 2009.
- Mao, *Quotations From Chairman Mao Tse-Tung*, (the Little Red Book), Beijing, Progress Publishers, 1976.
- Schmitt, Carl, *The Concept of the Political*, trans. George Schwab, Chicago, University of Chicago Press, 2007.

Assessment: Essay (100%, 5000 words) in the ST.

GV327 Half Unit

Governance and Corruption

This information is for the 2023/24 session.

Teacher responsible: Dr Sarah Brierley

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

Pre-requisites: Comfort with basic statistics as covered by Research Design in Political Science (GV249) or an equivalent course in research design or introductory statistics (such as ST102, ST107, ST108, GY140, SA201) is recommended.

Course content: The design and implementation of government policies depends on the actions and capacity of politicians and bureaucrats. For policies to be effective, they must be implemented according to programmatic criteria, while avoiding leakage. This course will overview recent theoretical and empirical work on governance, corruption and state capacity. The cases we investigate will be focused on low and middle-income countries in South Asia, Latin America and Sub-Saharan Africa. During the course we will explore questions such as: why do politicians and bureaucrats engage in corruption? Do multi-party elections encourage graft? Are anti-corruption bodies effective? Can technological solutions improve the delivery of public services?

Teaching: This course is delivered through seminars totalling a minimum of 20 hours in the Winter Term. Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 formative essay of 1,000 words in Week 7.

Indicative reading:

- Golden and Fisman. 2017. *Corruption: What Everyone Needs to Know*. Oxford University Press.
- Geddes, Barbara. 1994. *Politician's dilemma: building state capacity in Latin America*. University of California Press.

Assessment: Essay (100%, 3000 words) in the ST.

GV328 Half Unit

Middle East Politics in Transnational Perspective

This information is for the 2023/24 session.

Teacher responsible: Prof John Chalcraft

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option. This course is available with permission to General Course students.

This course is capped at one group. Priority will be given to students enrolling from the Department of Government.

Course content: This course offers an advanced introduction to the politics of the Middle East and North Africa in transnational perspective. It takes a critical, sociological, historically-informed, and qualitative approach. It focuses on cross-border forms of resistance and subaltern activism. We study such topics as transnational revolutionary movements, Third World national liberation, popular movements on the Arabian peninsula, feminism, Salafi-Wahhabism, human rights advocacy, and transnational Palestinian activism. Students will develop an advanced introductory understanding of the transnational politics of the region.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 26 hours in the Autumn Term. There is no teaching scheduled in reading week, but one of the seminars (of the total of 11) will be a (compulsory) essay writing workshop scheduled towards the end of Week 5 (most likely Thursday). In other words, there will be two seminars in Week 5.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: Abdelrahman, Maha. 2007. 'The Nationalization of the Human Rights Debate in Egypt', *Nations and Nationalism*, 13(2), pp. 285–300; Abu-Lughod, Lila. 2013. *Do Muslim Women Need Saving?* Cambridge MA: Harvard University Press; Chalcraft, John. 2016. *Popular Politics in the Making of the Modern Middle East*. Cambridge University Press; Farquhar, Michael. 2017. *Circuits of Faith: Migration, Education and the Wahhabi Mission*. Stanford: Stanford University Press; Featherstone, David. 2012. *Solidarity: Hidden Histories and Geographies of Internationalism*. London: Zed Books; Gill, Stephen. 2000. 'Towards a Post-Modern Prince? The Battle in Seattle as a Moment in the New Politics of Globalisation'. *Millennium*, 29, 1: 131-40; Moghadam, V. M. 2012. 'Global Social Movements and Transnational Advocacy'. In *The Wiley-Blackwell Companion to Political Sociology* John Wiley and Sons, pp. 408-420; Perugini, Nicola and Neve Gordon. 2015. *The Human Right to Dominate*. Oxford: Oxford University Press; Prashad, Vijay. 2007. *The Darker Nations: A People's History of the Third World*. New York: New Press; Pratt, Nicola. 2007. 'Transnational Politics: Contention and Institutions in International Politics' *Annual Review of Political Science* 2001 4:1, 1-20.

Assessment: Essay (100%, 3000 words) in the WT.

GV329 Half Unit

Making Democracy Work

This information is for the 2023/24 session.

Teacher responsible: Dr George Ofosu CBG 3.04

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option. This course is available with permission to General Course students.

This course is capped at 1 group.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Comfort with basic statistics as covered by Research Design in Political Science (GV249) or an equivalent course in research design or introductory statistics (such as ST102, ST107, ST108, GY140, SA201) is recommended but not required.

Course content: The extent to which electoral competition motivates elected officials to respond to the needs of citizens determines the quality of a democratic political system. This course examines the theoretical and practical challenges to how elections promote democratic responsiveness and accountability. The course will cover contemporary political science research on a series of topics. How do elections incentivize political responsiveness? How do politicians campaign and distribute state resources to win elections? Why do some voters support corrupt, underperforming politicians while others choose effective leaders? Why are some elections rigged while others are free and fair? Why do some elections spark violence while others are peaceful? Which interventions to promote the quality of democracy work? Readings will draw on empirical cases from many world regions, including Africa, Latin America, the post-Soviet countries, South Asia, and the historical United States. Students are expected to be active participants in this course, and will participate in several class debates and writing exercises.

Teaching: This course provides a minimum of 20 hours of seminars in the Winter Term. There will be a reading week in WT Week 6.

Formative coursework: There are two pieces of formative coursework: 2 presentations in the WT and a short proposal (800-1000 words) for a final project in week 7.

The first formative coursework involves two-class group presentations. The assignment will help students to connect empirical work in the field of electoral accountability to the theories introduced in the first part of the course.

The second formative assignment will help students prepare an outline for their final essay. The short essay will comprise a research question, an overview of the argument, a draft structure and an indicative reading list. Feedback will be provided via email and/or individual sessions with students.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

GV330 Half Unit

Data Science Applications to Politics Research

This information is for the 2023/24 session.

Teacher responsible: Dr Melissa Sands

Availability: This course is compulsory on the BSc in Politics and Data Science. This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101) and either Research Design in Political Science (GV249) or an equivalent course (containing coursework in econometrics). Familiarity with R is also required.

Course content: The goal of this course is to introduce students to the latest empirical research using big data in political science. This course will cover different applications of big data in political science. For each, students will be introduced to the type of questions that each type of data can help answer and learn to apply the methods needed to analyse each type of data.

Teaching: 15 hours of lectures and 15 hours of classes in the WT. There will be a reading week in WT Week 6.

Formative coursework: Students will be expected to produce 1 problem set and 1 presentation in the WT.

Indicative reading: Brady, Henry E. "The challenge of big data and data science." *Annual Review of Political Science* 22 (2019): 297-323.

Gohdes, Anita R. "Repression technology: Internet accessibility and state violence." *American Journal of Political Science* (2020).

King, Gary, Jennifer Pan, and Margaret E. Roberts. "How censorship in China allows government criticism but silences collective expression." *American Political Science Review* 107, no. 2 (2013): 326-343.

Krupenkin, Masha. "Does partisanship affect compliance with government recommendations?." *Political behavior* 43, no. 1 (2021): 451-472.

Titunik, Rocío. "Can big data solve the fundamental problem of causal inference?." *PS: Political Science & Politics* 48, no. 1 (2015): 75-79.

Assessment: Coursework (80%) in the ST.

Problem sets (20%) in the WT.

The coursework would comprise a replication exercise, where students would replicate and extend the analysis of one paper of their choice, discussed in class.

GV331 Half Unit Not available in 2023/24

Capstone Data Science & Civic Engagement

This information is for the 2023/24 session.

Teacher responsible: TBC

Pre-requisites: Students must have completed Introduction to Political Science (GV101), Elementary Statistical Theory (ST102), Programming for Data Science (ST101) and Research Design in Political Science (GV249).

Course content: The Data Science and Civic Engagement Capstone requires groups of students to carry out an applied research project in order to address a practical policy issue or problem relevant to a civic partner organisation. This allows students to extend their capabilities and apply methodological knowledge and skills they learned in the Politics and Data Science degree to address real-life social, political, or policy problems. Capstone partner organisations may include advocacy groups, NGOs, thinktanks, public sector bodies, local governments, international organisations, or private companies where projects involve the social good. The initial weeks of the course will introduce students to the requirements of their Capstone project, key research strategies and essential questions. At the same time, from week 1 students will begin to research in allocated teams. Students are also expected to work steadily throughout the term with members of their team and with their supervisors. The completed research will be presented by week 11, both in the form of a team presentation and a report.

Teaching: 2 hours of workshops in the AT. 6 hours of workshops in the WT. 2 hours of workshops in the ST.

2 hours of workshops in MT, 6 hours of workshops in LT, and 2 hours of presentations in ST.

These workshops are supplemented with regular help sessions.

Formative coursework: Students will be expected to produce 1 presentation in the WT.

Capstone groups must produce 1 team presentation for the "check-in" session, usually in week 5 of LT.

Indicative reading: As a capstone project course, there will not be required readings. However, students will be directed towards potentially useful background resources including:

Cyd Harrell (2020). *A Civic Technologist's Practice Guide*. Five Seven Five Books.

Eugene Bardach and Eric M. Patashnik (2016). *A Practical Guide for Policy Analysis*. London: Sage.

Brian A. Griffith and Ethan B. Dunham (2015). *Working in Teams: Moving from High Potential to High Performance*. London: Sage.

Edward R. Tufte (2001). *The Visual Display of Quantitative Information*. 2nd edition. Cheshire, Conn.: Graphics Press.

Assessment: Project (80%, 8000 words) and presentation (20%) in the WT.

Group project (80%, 8000 words) and group presentation (20%) in the LT.

GV332 Half Unit

Big Data in Politics: A Few Provocative Debates

This information is for the 2023/24 session.

Teacher responsible: Dr Omar Mcdoom

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

Course content: The course is organized around a set of discrete debates and illustrative case studies whose unifying theme is the examination of the political implications of Big Data. The course scope is purposely broad to enable the particular selection of debates and cases to evolve over time and to reflect our rapidly-

expanding understanding of how Big Data are shaping the political realm. The debates may be normative, evaluative, or empirical in nature and thus aim to take advantage of the broad exposure to the study of politics that third year Government students at the LSE will have acquired.

Some of the debates that may be covered touch on the following areas:

Political communication: How should democracies respond to the information oligopolies created by Big Tech?

Civil liberties: What does the increasing use of Big Data by the intelligence industry imply for the debate between liberty and security in liberal democracies?

Governance: How are Big Data altering trust in and the accountability of governments?

Contentious Politics: What are the risks and benefits of using Big Data to predict and prevent protests, riots, and violence?

Inequality: In what ways could Big Data both amplify and reduce disparities in political participation and economic status between individuals and groups?

Public Good Provision: What does the increasing amount of personal data collected by local and central governments mean for the quality of public services?

Democracy: In what ways are Big Data changing the relationship between governments and corporations in democracies?

Teaching: 20 hours of seminars in the WT.

There will be a reading week in WT Week 6.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Students will choose one of the questions posed in each weekly debate to answer in their summative essay and once chosen they will then write an annotated bibliography (1500 words) that evaluates between 3 and 6 sources relating to that debate they will use in the summative essay.

Indicative reading:

- Jemielniak, Dariusz. *Thick big data: Doing digital social sciences*. Oxford University Press, 2020.
- Wright, Nicholas. "How artificial intelligence will reshape the global order." *Foreign Affairs* 10 (2018).
- Lane, Julia, Victoria Stodden, Stefan Bender, and Helen Nissenbaum. *Privacy, big data, and the public good: Frameworks for engagement*. Cambridge University Press, 2014.
- Zegart, Amy, and Michael Morell. "Spies, Lies, and Algorithms: Why US Intelligence Agencies Must Adapt or Fail." *Foreign Aff.* 98 (2019): 85.
- Castillo, Carlos. *Big crisis data: social media in disasters and time-critical situations*. Cambridge University Press, 2016.
- Zuboff, Shoshana. *The Age of Surveillance Capitalism: The Fight for a Human Future at the New Frontier of Power: Barack Obama's Books of 2019*. Profile Books, 2019.
- Kendall-Taylor, Andrea, Erica Frantz, and Joseph Wright. "The Digital Dictators: How Technology Strengthens Autocracy." *Foreign Aff.* 99 (2020): 103.
- Lanier, Jaron. *Ten arguments for deleting your social media accounts right now*. Random House, 2018.
- O'Neil, Cathy. *Weapons of math destruction: How big data increases inequality and threatens democracy*. Broadway Books, 2016.

Assessment: Essay (80%, 3000 words) in the ST.

Class participation (20%) in the WT.

The summative assessment will comprise two components.

First, a student's overall contribution to the course (20%) will be assessed by way of oral participation in the classroom and written contribution to an online discussion forum where each of the debates examined in the course will be the subject of potential discussion. Second, students will choose one of the questions posed each week - or else adapt this question with the approval of the instructor - and write a long essay totalling 3000 words.

GV334 Half Unit

Comparative Perspectives on Inequality and Politics: Global North, Global South

This information is for the 2023/24 session.

Teacher responsible: Prof Catherine Boone

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option. This course is available with permission to General Course students.

The course is available in the third year only and capped at one group of students.

Course content: Rising levels of social inequality have attracted enormous attention in public discourse and social science research. What political consequences should we expect to see, and will these differ across countries? This course considers the distribution and drivers of different forms of social-economic inequality (income, spatial, urban/rural, ethnic/racial), and asks whether and how they produce different forms of politics in different parts of the world. Weekly readings and lectures center on significant works in global and comparative political economy. The course considers the hypothesis that the political salience of different forms of inequality (a.) varies over time and space, and (b.) that political institutions play an important role in conditioning the ways in which social inequalities become politically salient and find expression in the political arena.

Over the course of the term, the analytic focus of the class moves from the global level, to the OECD (Organization for Economic Cooperation and Development) countries, to developing countries. We consider how socio-economic structure, levels of development, and modes of integration into the global economy shape domestic forms of inequality, and how domestic institutions condition the political expression thereof.

Teaching: This course is delivered through seminars totalling 25 hours in the Winter Term. There will be a reading week in Week 6 of the Winter Term.

Formative coursework: Students will be expected to produce 1 presentation in the WT.

This will be a class presentation outlining the proposed research question and theoretical framing of the 3,000 word summative paper.

Indicative reading: Mann, Michael, Riley, Dylan. 2006. "Explaining Macro-Regional Trends in Global Income Inequalities, 1950–2000." *Socio-Economic Review* 5(1):81–115.

Charles Tilly, *Durable Inequality* (University of California press, 1998).

Assessment: Essay (80%, 3000 words) in the ST.

Critical evaluation (20%) in the WT.

The summative work consists of:

- one 3-page (1,000 word) paper summarizing and critiquing a week's reading, week 5-7 (20%), and
- a 12-page (3,000 word) final class paper assessing different arguments about inequality and whether and how it produces political effects in light of comparative case study or large-N evidence (80%)

GV335 Half Unit

African Political Economy

This information is for the 2023/24 session.

Teacher responsible: Dr George Ofosu

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in International Social and Public Policy with Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option. This course is available with permission to General Course students.

This course is capped at 1 group.

Course content: This class is an introduction to the study of contemporary African political economy. The goal is to set major questions of state and economy in historical, geographic, and international context. Course readings and lectures stress marked unevenness in national and subnational trajectories and in the political-economic character of different African countries, and introduce students to theories that aim to identify causes of similarity and difference across and within countries. Students will come away with a better understanding of the possibilities and limits of structured, focused comparisons in comparative politics, and with an introduction to political economy approaches to questions of late development. They will also develop substantive knowledge of the political economy of sub-Saharan Africa and analytic tools to describe and make sense of its diversity.

Teaching: This course provides a minimum of 20 hours of seminars in the Autumn Term. There will be a reading week in AT Week 6.

Formative coursework: There will be one 1,200 word formative assignment (short essay).

Indicative reading: Texts used may include all or part of the following:

- Christensen and Laitin (2019). *African States Since Independence: Order, Development & Democracy*.
- Katherine Baldwin. *The Paradox of Traditional Leaders in Democratic Africa*. Cambridge University Press.
- Catherine Boone, *Property and Political Order in Africa: Land Rights and the Structure of Politics* (CUP 2014).
- Fred Cooper, *Africa Since 1940* (Cambridge U. Press).
- Jeffrey Herbst, *States and Power in Africa* (Princeton 2000).
- Prempeh, H. Kwasi. "Presidents untamed." *Journal of Democracy* 19.2 (2008).
- Mahmood Mamdani, *Citizen and Subject: Africa and the Legacy of late Colonialism* (Princeton 1996).
- Andrew M. Mwenda Roger Tangri, *Patronage politics, donor reforms, and regime consolidation in Uganda* *African Affairs* (2005).
- Nicolas van de Walle, *African Economies and the Politics of Permanent Crisis, 1979-1999* (Cambridge University Press 2001).

Assessment: Essay (75%, 3000 words) in January.

In-class assessment (25%) in the AT.

For the in-class assessment: Students will be asked to serve as a seminar discussant during the term. On these weeks the discussant will write a two or three-page memo that discusses the readings in a comparative perspective. In the last class meeting, each student will give a 5-minute overview of his/her plans for the

final course essay.

GV336 Half Unit

Latin America: Democracy and Development

This information is for the 2023/24 session.

Teacher responsible: Dr Mathias Poertner

Availability: This course is available on the BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: Latin America has long been the center of dynamic political, social, and economic change. The region has suffered some of the most repressive political regimes, highest degrees of economic inequality, and worst organized crime. Yet Latin America has also been the focus of some of the most innovative experiments in democratic participation and social mobilization.

This course examines the course of political and economic change in twentieth and twenty-first century Latin America. The bulk of the course will focus on the rise of industrialization and populism in the 1930s and 1940s to the collapse of democracy and establishment of military regimes in the 1960s and 1970s, the return to democracy in the 1980s, and more recent processes of democratic consolidation and economic liberalization. In addition to learning about the politics and contemporary history of Latin American countries, we will also explore the theoretical terrain underlying the causes and consequences of phenomena such as populism, industrialization, authoritarianism, democratization, neoliberalism, and popular representation. The course will provide a combination of empirical exploration of the region and a variety of explanations for the general processes of change across the region and the variation across countries.

Students will gain empirical knowledge on the region's politics, a deeper theoretical understanding of issues of democratic representation and economic development, as well as crucial analytical skills.

Tentative outline of weekly topics:

- 1 Overview & Introduction
- 2 Populism & the Growth of the Working Class
- 3 Democratic Breakdown & Authoritarian Regimes
- 4 Democratic Transitions
- 5 The Politics of Economic Reform
- 6 Civil Society and Social Movements
- 7 Political Parties
- 8 Ethnicity, Gender, and Class in Electoral Politics
- 9 Clientelism
- 10 The Inclusionary Turn and Participatory Institutions

Teaching: 20 hours of seminars in the WT.

This course is delivered through seminars totalling a minimum of 20 hours during Winter Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

A detailed outline (500 words) on the policy issue to be explored in detail through the group project (including key readings to be used).

Indicative reading:

- Bulmer-Thomas, Victor. 2014. *The Economic History of Latin America since Independence*. Cambridge: Cambridge University Press, Ch. 9-11.
- Collier, Ruth Berins and David Collier. 1991. *Shaping the Political Arena: Critical Junctures, the Labor Movement, and Regime Dynamics in Latin America*. Princeton: Princeton University Press, excerpts.
- Kapiszewski, Diana, Steven Levitsky, and Deborah J. Yashar, eds., 2021. *The Inclusionary Turn in Latin American Democracies*.

Cambridge: Cambridge University Press, excerpts.

- Madrid, Raúl. 2008. "The Rise of Ethnopolitics in Latin America" *World Politics* 60(3): 475-508.
- Magaloni, Beatriz. 2006. *Voting for Autocracy: Hegemonic Party Survival and its Demise in Mexico*. Cambridge: Cambridge University Press, pp. 1-43.
- Poertner, Mathias. 2020. "The Organizational Voter: Support for New Parties in Young Democracies." *American Journal of Political Science*, forthcoming.
- Williamson, John. 1990. "What Washington Means by Policy Reform." In Williamson, ed., *Latin American Adjustment: How Much Has Happened?* Washington D.C.: Peterson Institute for International Economics.

Assessment: Presentation (20%) and group project (80%) in the WT.

- **Classroom participation & country reporting (20%):** Students should actively participate in class discussions, ask questions, listen to their fellow students, complete all required readings, and be attentive. Those who consistently demonstrate a sharp understanding of the readings and who use that understanding to move the discussion forward will earn an excellent participation grade. Participation does not only mean talking a lot; it means making comments and asking questions that reflect thought, e.g., about the readings. In addition to active participation in class, students are responsible for ongoing reporting about politics in one Latin American country, assigned in Week 1, throughout the course of the semester. Students will be responsible for following the news on "their" country every week. Once during the semester, each student will give a current event report on "their" country. This brief (5 minutes) presentation should describe one of the major political events that have affected "their" country within the last six months.
- **Group project (50% for written policy analysis; 30% for oral presentation):** 160The group project is meant to challenge students to work effectively in teams while relating theory and evidence to policy. 160For the group project, students will be split up into small groups. Each group will select a policy issue to analyze using the theoretical tools covered in class. 160 Each group will then 1) write a policy analysis (1,500 words); and 2) prepare a detailed presentation on the topic.

GV337 Half Unit

Politics, Crime, and Criminal Justice in Comparative Perspective

This information is for the 2023/24 session.

Teacher responsible: Dr Nirvikar Jassal

Availability: This course is available on the BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

Pre-requisites: Familiarity with basic research design and statistics as covered by Research Design in Political Science (GV249) or an equivalent course (such as ST102, ST107, ST108, GY140, SA201) is helpful but not necessary.

Course content: Newspaper reports often discuss "police reform" or "criminal justice reform." Yet, these terms are likely to have different meanings across countries, and how states' political systems are organized may help or hinder change. This course explores the intersection between politics and criminal justice (law enforcement and the judiciary) in the advanced industrialized democracies such as the United States as well as those in the Global South. Questions that the course will cover include: do judges make biased decisions based on race or gender? Can community policing improve citizen perceptions of law enforcement? Do government-mandated hiring quotas for women

and minority groups affect police legitimacy? Broadly, the course grapples with empirical social science scholarship – primarily from political science and economics – that uses a variety of analytical techniques to explore inequities in citizen interactions with the police and courts, how inequalities are perpetuated, and which governmental reforms have been shown to be more effective than others in reducing crime, making law-and-order institutions accountable, and mitigating bias.

Teaching: 20 hours of seminars in the AT.

There will be a reading week in Week 6 of the Autumn Term.

Formative coursework: As a formative assessment, students will be expected to produce an outline for their final essay. This will enable them to gain feedback about their research question and methodology for their final or summative assessment.

Indicative reading: Blair, Robert A., Sabrina M. Karim, and Benjamin S. Morse. 2019. "Establishing the Rule of Law in Weak and War-Torn States: Evidence from a Field Experiment with the Liberian National Police." *American Political Science Review* 113 (3): 641–57.

Abrams, David S., Marianne Bertrand, and Sendhil Mullainathan. 2012. "Do Judges Vary in Their Treatment of Race?" *The Journal of Legal Studies* 41 (2): 347–83.

Vanden Eynde, Oliver, Patrick M. Kuhn, and Alexander Moradi. 2018. "Trickle-Down Ethnic Politics: Drunk and Absent in the Kenya Police Force (1957–1970)." *American Economic Journal: Economic Policy* 10 (3): 388–417.

Blair, Graeme, Jeremy M. Weinstein, Fotini Christia, Eric Arias, Emile Badran, Robert A. Blair, Ali Cheema, Ahsan Farooqui, Thiemo Fetzer, and Guy Grossman. 2021. "Community Policing Does Not Build Citizen Trust in Police or Reduce Crime in the Global South." *Science* 374 (6571).

McCrary, Justin. 2007. "The Effect of Court-Ordered Hiring Quotas on the Composition and Quality of Police." *American Economic Review* 97 (1): 318–53.

Assessment: Essay (100%, 3000 words) in the WT.

The summative assessment comprises one final take-home essay which will be either (a) an essay on the readings or, alternatively, (b) on an original research topic following discussion with the convenor.

GV338 Half Unit

Politics and Political Economy of India

This information is for the 2023/24 session.

Teacher responsible: Dr Pavithra Suryanarayan

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

Course content: India is the world's largest democracy and its second most populous country. This course introduces core issues in the study of modern Indian politics. The class is organized around the following topics: we trace India's journey to Independence; the consolidation of democracy in the early decades; the relationship between the state and the economy; the state's institutional architecture; how political parties and electoral campaigns operate; the threats posed by corruption, criminality and dynastic politics; the role of caste and religion in shaping politics; the political and economic consequences of economic liberalization; elections; and the recent rise of right-wing hindutva in the country. The focus is on building knowledge and understanding of the Indian case. But we will also consider to what extent India's experience is reflective of more general theories of politics, and how they might change because of what India can teach us. Class sessions will be interactive, with plenty of opportunity for group discussion. The reading list is diverse and draws from political

science, sociology, history, and anthropology.

Teaching: 20 hours of seminars in the AT.

There will be a reading week in AT Week 6.

Formative coursework: Students will be expected to produce 1 essay in the AT.

The formative assessment comprises one 1000-word response essay written for the week that the students serve as discussant in class.

Indicative reading:

- 1) Washbrook, David. "India, 1818-1860: the two faces of colonialism." *The Oxford History of the British Empire* 3 (1999).
- 2) Paul Brass. 1994. *The Politics of India since Independence*, 1-63.
- 3) Jha, S. (2004). "Representation and Its Epiphanies: A Reading of Constituent Assembly Debates." *Economic and Political Weekly*: 4357-4360.
- 4) Mehta, Uday S. 2010. "Indian Constitutionalism: The Social and Political Vision," in Jayal and Mehta (eds.) *The Oxford Companion to Politics in India*.

Assessment: Essay (100%, 3000 words) in the period between AT and WT.

The summative assessment comprises a 3000-word final essay due in the period between AT and WT, based on a topic on India.

GV343 Half Unit

Philosophy, Politics and Economics: Capstone

This information is for the 2023/24 session.

Teacher responsible: Dr Joachim Wehner

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics and BSc in Philosophy, Politics and Economics (with a Year Abroad). This course is not available as an outside option nor to General Course students.

This course is exclusively for fourth year BSc PPE students.

Course content: The Capstone requires groups of students to carry out research and analysis in order to address a practical policy issue or problem relevant to a client organisation. This allows students to extend their capabilities and apply disciplinary and methodological knowledge and skills they learned in the PPE core courses to address real-life policy needs. Capstone clients may include public sector bodies, private companies, international organisations, think tanks and NGOs. The initial weeks of the course will introduce students to the requirements of Capstone projects, key research strategies and essential questions. At the same time, from week 1 students will begin to research in allocated teams. Students are also expected to work steadily throughout the term with members of their team and with their advisors. The completed research has to be presented by week 11 of AT, both in the form of a team presentation and a research report.

Further details: By the start of AT, students will receive a list of projects available (on Moodle) and they can indicate their preferences, which will be taken into account in deciding allocations. Workshops in weeks 1 and 2 of AT will discuss expectations and key research and project skills. The workshop in week 5 of AT will be a "course correction" session for teams to get feedback and guidance on the planned final shape of their reports. In addition, students can access regular help sessions throughout the term. Capstone teams will present their project findings by week 11 of AT.

Teaching: 8 hours of workshops in the AT.

These workshops are supplemented with regular help sessions. This course includes a reading week in week 6 of AT.

Formative coursework: Capstone groups must produce 1 team presentation for the "course correction" session in week 5 of AT. They must also produce a poster or presentation from their final (assessed) presentation for a final showcase workshop, which is usually held in week 1 of ST.

Indicative reading:

- Charles E. Lindblom and David K. Cohen. *Useable Knowledge: Social Science and Social Problem Solving* (New Haven: Yale

University Press, 1979).

- Eugene Bardach and Eric M. Patashnik. *A Practical Guide for Policy Analysis* (Sage, 2016).
- Brian A. Griffith and Ethan B. Dunham. *Working in Teams: Moving from High Potential to High Performance* (Sage, 2015).
- Ray Pawson. *The Science of Evaluation: A Realist Manifesto* (Sage, 2013).

Assessment: Project (80%, 8000 words) and presentation (20%) in the AT.

GV344 Half Unit

Philosophy, Politics and Economics: Research Project

This information is for the 2023/24 session.

Teacher responsible: Dr Sarah Brierley

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics and BSc in Philosophy, Politics and Economics (with a Year Abroad). This course is not available as an outside option nor to General Course students.

This course is exclusively for fourth year BSc PPE students.

Course content: The focus of the course is on the production of an individual academic paper and poster presentation. This is your chance to choose a topic of your interest and use what you've learnt in the last three years into what interests you most. You will be encouraged to develop an interdisciplinary research question. The initial weeks in Winter Term will be focused on outlining your research plans. Group feedback and individual feedback sessions will take place regularly throughout term. The aim of this course is not only to produce a written piece of research but to also summarise your research in a poster and be able to present it in an informal setting.

Teaching: 2 hour introductory session in week 11 AT. 2 hour introductory session on research methods in week 1 WT. 6 hours of seminars in the WT. 3 hours of workshops in the ST.

The course is structured around an initial presentation and various group and individual feedback sessions. In week 11 of AT we'll have a two-hour introductory session. During this session we'll establish the goals of the course and you will then have the Christmas break to think about the topic you want to work on in the WT. There will be an initial introductory session in week 1 of the WT to give you some guidance on the different research methods that are at your disposal. There will be group feedback sessions in weeks 2, 5, 8 and 11. These seminars / workshops will be supplemented with regular individual feedback sessions.

Formative coursework: Students must prepare a draft outline synopsis for their individual project by Thursday of Week 1 Winter Term, and present on it in a seminar in Week 2. Students must then present a detailed account of their progress in Weeks 5, 8 and 11.

Indicative reading: On writing:

- Inger Furseth, Euris Everett and Larry Everett, *Doing Your Master's Dissertation: From Start to Finish* (Sage Study Skills Series, 2013);
- Stella Cottrell, *Dissertations and Project Reports: A Step by Step Guide* (Palgrave Study Skills, 2014);
- Diana Ridley, *The Literature Review: A Step-by-Step Guide for Students* (SAGE Study Skills Series, 2008);
- Christopher Hart, *Doing a Literature Review* (SAGE Study Skills Series, 2018);
- Sharon M. Ravitch and J. Matthew Riggan, *Reason and Rigor: How Conceptual Frameworks Guide Research* (2nd edition, Sage Publications, 2016).

On research:

- Catherine Hakim, *Research Design: Successful Designs for Social Economics Research*, 2nd ed. (Routledge, 2000);
- Joseph A. Maxwell, *Qualitative Research Design* (3rd edition, Sage, 2013);
- Alan Bryman, *Social Research Methods*, 5th ed. (Oxford University Press, 2015);
- David Partington, *Essential Skills for Management Research*

(Sage Publications, 2002).

A list of readings will be made available on Moodle.

Assessment: Report (80%) and presentation (20%) in the ST Week 1. There are two pieces of assessment. A final report (max 5,000 words) that counts towards 80% of the final mark, and a short video presentation on your key conclusions that counts towards 20% of the final mark. Both elements will have to be submitted by Week 1 of ST.

You will be invited to present your findings on a poster presentation during the Spring Capstone Showcase.

GV366

Political Economy of the Developing World

This information is for the 2023/24 session.

Teacher responsible: Dr Steffen Hertog

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students. This course is capped at one group.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: This course introduces students to the broad theoretical traditions in the study of political economies outside of the OECD, and provides an empirical overview of a number of concrete phenomena that shape the interplay of the politics and economics in different world regions. It will address puzzles like: Why did some developing countries grow much faster than others after WWII? Are some forms of corruption more compatible with development than others? Which impact do natural resource rents have on politics and development? Under which conditions can countries with a short history of independent statehood build efficient institutions?

GV366 will engage with broad theoretical traditions like modernization theory, dependency theory, and neo-patrimonialism, and with concrete empirical topics like state-business relations, the developmental state, corruption and clientelism, the politics of public enterprise, and the political economy of resource-rich countries.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 10 hours of classes in the WT. 1 hour of classes in the ST.

Formative coursework: One essay of 3,500 words to be submitted in the WT.

Indicative reading: Bardhan, Pradeep (1997). "Corruption and Development", *Journal of Economic Literature*, Vol. 35.

Evans, Peter (1995). *Embedded Autonomy: States and industrial transformation* (Princeton: Princeton University Press).

Ross, Michael (2012). *The Oil Curse: How Petroleum Wealth Shapes the Development of Nations* (Princeton: Princeton University Press).

Schneider, Ben Ross, and Sylvia Maxfield (eds.) 1997. *State-Business Relations in Developing Countries* (Ithaca: Cornell University Press).

Wade, Robert (2003). *Governing the Market: Economic Theory and the Role of Government in East Asian Industrialization* (Princeton: Princeton University Press).

Waterbury, John (1993). *Exposed to Innumerable Delusions: Public Enterprise and State Power in Egypt, India, Mexico, and Turkey* (Cambridge: Cambridge University Press).

Assessment: Exam (40%, duration: 2 hours) in the spring exam period.

Essay (40%) and class participation (20%).

GV390

Government Dissertation Option

This information is for the 2023/24 session.

Teacher responsible: Prof Michael Bruter

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students. This course may be taken only in the third year. A BSc Politics and History student cannot choose both HY300 and GV390; a BSc Politics and Philosophy student cannot choose both GV390 and PH399; and a BSc Politics and International Relations student cannot choose both GV390 and IR398.

Course content: A dissertation of not more than 10,000 words on a topic to be approved by a proposed dissertation supervisor and the Course Convener. The topic should be chosen from any area within the field covered by the degree course and supported by a member of the academic staff from the Department of Government willing to act as dissertation supervisor. Following the dissertation information session organised by the Department in the second year of the students' curriculum, candidates should approach their academic mentor during the Winter Term or Spring Term of their second year to discuss the possibility of a proposed dissertation topic. After also having received approval for a topic by a prospective supervisor, students must submit a dissertation form detailing the final title and synopsis/prospectus to the Course Convener for approval. Dissertation approval forms must be submitted no later than the deadline. Please note that any change from what was approved in the dissertation form will require the approval of the dissertation supervisor.

In 2023/4 the deadline for submitting Dissertation Approval Forms will be Tuesday 3 October 2023, AT Week 2.

Students who fail to submit a proposal approved by an eligible supervisor by the deadline will be unenrolled from the course.

Note that there is no automatic right to change topics or supervisor after the form has been approved and submitted so students should complete it carefully.

Teaching: This course provides dissertation-focussed seminars totalling 9 hours over the Autumn and Winter Terms. There will be a reading week in Week 6 of each term.

The teaching involves separate streams for students writing an empirical dissertation and those writing a theory dissertation with students asked to choose which stream they feel will help them most. Four of the six sessions will be taught separately for the two streams whilst two will be common.

Assessment: Dissertation (100%, 10000 words).

GV398 Not available in 2023/24

Inside the Mind of a Voter: Research in Electoral Psychology

This information is for the 2023/24 session.

Teacher responsible: Prof Michael Bruter CBG 3.03

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students. This course has a limited number of places (it is capped) and priority will be given to students on the programmes named above. Students from other degrees are not normally accepted on the

course except with the exceptional discretionary approval of the course teacher.

This course is capped at one group.

Course content: This final year undergraduate course has three important ambitions.

Substantively, it aims to introduce students to the study of electoral psychology and electoral ergonomics, which represent novel and dynamic approaches to the study citizens' electoral behaviour and the way voters' psychology interacts with the organisation of elections.

Methodologically, it introduces students to some of the key methods used in the field and enables them to practice fieldwork in one of them through an empirical group project. That project will change each year in terms of topic and method, and will be announced at the start of the academic year. It may include lab experiments, interviews, diaries, or any of the core methods used in the field.

Finally, it introduces students to the research process through the main assessment component, which is a supervised 7,000 word dissertation, and supports them through several research clinics whereby we discuss students' dissertation issues and problems collectively throughout the year.

Teaching: This course is taught using seminars only including 20 hours of seminars in the MT, 20 hours of seminars in the LT, and 4 hours of seminars in the ST. This year, some or all of this teaching may be delivered through a combination of online or on campus seminars. This course includes reading weeks in Week 6 of both MT and LT.

The seminars are divided into:

- 7 x 2 hour SUBSTANTIVE SEMINARS on key issues in electoral psychology
- 7 x 2 hour FIELDWORK SEMINARS focused on preparation and fieldwork for the group project (note: some fieldwork seminars may be rescheduled or combined into longer sessions depending on fieldwork needs)
- 6 x 2 hour RESEARCH CLINICS on the preparation and discussion of analytical, methodological, and ethical issues faced by students with regards to their dissertation
- 1 x 4 hour CONFERENCE WORKSHOP where students will briefly present their findings to one another.

Formative coursework: Formative assessment includes:

- draft research synopsis and design (end of MT)
- draft research methodology (early in LT)
- unassessed critiques of further readings (throughout MT/LT)

Indicative reading: Bruter, M. and Harrison, S. *Inside the Mind of a Voter*

Lipset, S., Lazarsfeld, P. et al. *The psychology of voting*

Sniderman, P. *Personality and democratic politics*

Bruter, M., and Lodge, M. *Political Science research methods in action*

Baddeley, A. *The psychology of memory*

Cammaerts, B. et al. *Youth participation in democratic life*

Harrison, S and Bruter, M. *Mapping extreme right ideology*

Assessment: Dissertation (70%, 7000 words) in the ST.

Group project (15%) in the AT.

Critical evaluation (15%) in the AT and WT.

The critical evaluation involves critiques of further readings work as follows: to make the reading list more manageable for the 7 substantive seminars, all students will only be expected to familiarise themselves with the core readings, and will divide the further readings between themselves. Each student will be expected to be responsible for a total of 5-6 further readings throughout the year, each from different weeks.

Students responsible for a further reading will be asked to write a short (1-2 page) critique of it following a set format (1) what is the research question and why is it interesting, 2) what methods are the authors using, 3) what are the main findings, 4) what are the main shortcomings or what do you wish the authors had done differently) and post it on moodle by the Sunday before the seminar so that students can quickly browse the week's 'menu' in advance. The students having each covered different further readings will bring them into the

seminar discussion.

The critiques count for 15% of the final mark as follows: 5% for completing 5 quality critiques throughout the year, and 10% based on the average mark for what they choose as their two best critiques.

The group work mark (15%) is based on the satisfactory completion of the tasks assigned to small groups of students during the fieldwork (e.g. conducting interviews or experiments, etc depending on the topic of the year).

GV3L1 Half Unit

Analytical Approaches to British Politics

This information is for the 2023/24 session.

Teacher responsible: Prof Torun Dewan

Availability: This course is available on the BA in Social Anthropology, BSc in History and Politics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Public Choice and Politics (GV225).

The course is designed primarily for students on the BSc Politics and Economics programme. Students from other BSc Politics programmes who have taken GV225 may also apply.

Course content: Strøm (2000) argues that the conceptual essence of Parliamentary government is a "historical evolution" – an accident of 19th century Britain that spread to other parts of the world. Recent analytical political science has shed light on Britain's political development and how its institutions function, using game theoretic modelling, rational choice narratives, and quantitative data. The course covers this literature and takes an analytical approach to topics such as: the historical development of British institutions and Imperial governance; the emergence and impact of Government-vs-Opposition; the historical development of the British party system; the causes and consequence of franchise extension; the Cabinet and its conventions; and the composition of the Executive and Parliament over time.

Teaching: This course is delivered through seminars totalling a minimum of 35 hours in the Winter Term. This course includes a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

1500 word essay to be completed by the end of reading week.

Indicative reading:

- Cox, G. (1987) *The Efficient Secret*, Cambridge University Press
- Berlinski, S., Dewan, T, and Dowding K. (2012) *Accounting for Ministers: Scandal and Survival in British Government 1945-2007*, Cambridge University Press
- Mclean, I (2002) *Rational Choice and British Politics: An Analysis of Rhetoric from and Manipulation from Peel to Blair*, Oxford University Press
- Schonhardt-Bailey, C (2006) *From the Corn Laws to Free Trade: Interests, Ideas and Institutions in Historical Perspective*, MIT Press

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GV3L2 Half Unit**The Politics and Policy of Climate Change and Sustainability**

This information is for the 2023/24 session.

Teacher responsible: Dr Michael Lerner

Availability: This course is available on the BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics, BSc in Politics and Data Science, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course has a limited number of places (it is capped) and demand is typically very high. This course is capped at 1 group.

Pre-requisites: Prior coursework in public policy, comparative politics, or equivalent. A basic understanding of the physical science of climate change would be advantageous.

Course content: This course introduces students to the policy interventions and underlying political dynamics that shape the pace and direction of efforts to mitigate to climate change and transition toward sustainability.

The course provides a survey of core and emerging topics in environmental politics and policy, such as climate obstruction, environmental authoritarianism, and the governance of geoengineering. A unifying theme of the course will be its frequent attention to the political economy of climate (in)action. The course will also offer foundational instruction in the use of the comparative method to describe and explain variation in environmental politics. This course focuses primarily, but not exclusively, on domestic environmental politics in advanced industrialized democracies.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

There will be a reading week in Week 6 of the Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Bernstein, Steven, and Matthew Hoffmann. "Climate politics, metaphors and the fractal carbon trap." *Nature Climate Change* 9.12 (2019): 919-925.

Seto, Karen C., et al. "Carbon lock-in: Types, causes, and policy implications." *Annual Review of Environment and Resources* 41 (2016): 425-452.

Parris, Thomas M., and Robert W. Kates. "Characterizing a sustainability transition: Goals, targets, trends, and driving forces." *Proceedings of the National Academy of Sciences* 100.14 (2003): 8068-8073.

Meckling, Jonas. "Oppose, Support, or Hedge? Distributional Effects, Regulatory Pressure, and Business Strategy in Environmental Politics." *Global Environmental Politics* 15.2 (2015): 19-37.

Stroup, Sarah S., and Wendy H. Wong. *The Authority Trap*. Cornell University Press (2017). Chapter 1.

Finnegan, Jared J. "Institutions, climate change, and the foundations of long-term policymaking." *Comparative Political Studies* (2022).

Baldwin, Elizabeth, Sanya Carley, and Sean Nicholson-Crotty. "Why do countries emulate each other's policies? A global study of renewable energy policy diffusion." *World Development* 120 (2019): 29-45.

Stokes, Leah C. *Short Circuiting Policy: Interest Groups and the Battle over Clean Energy and Climate Policy in the American States*. Oxford University Press (2020). Chapter 1.

Assessment: Video (20%) in the WT.

Research paper (80%) in the ST.

Students will create two 4–6 minute video blog posts interpreting a recent event through the lens of course material (one in the first five weeks of the term, one in the last five weeks of the term, 9 opportunities total), of which one will be submitted for assessment.

The research paper will consist of a comparative case analysis of 2500 words.

GY100**Introduction to Geography**

This information is for the 2023/24 session.

Teacher responsible: Dr Laura Antona CKK 3.16, Dr Murray Low CKK 3.09 and Dr Meredith Whitten CKK 4.09
Dr Carolin Hulke, CKK 4.03

Availability: This course is compulsory on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development and BSc in Geography with Economics. This course is available on the BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Note: As with all undergraduate courses, unless a course is core on a degree programme, allocation of places is done by School on a first come, first served basis and does not allow the Department to prioritise who is accepted

Course content: This course provides students with an introduction to Geography at LSE. In Michaelmas Term we will examine human geography's key concepts, including space, place, landscape, nature, globalization, mobility, society and city. In the Lent Term the course will move on to introductory sections on environmental geography and economic geography. The environmental section will trace how geography as a discipline has approached nature-society relationships, covering topics such as, the anthropocene, socio-materiality, wilderness, urban nature, and local and global environmental movements. The economic geography section will introduce students to the changing location of economic activity, inequalities within and between countries, regions and cities, and the rationale, objectives and tools of local and regional development policies in a globalizing world.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of classes and lectures across Autumn Term and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and Week 6 of Winter Term

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT and 2 essays in the AT and WT.

Indicative reading: Detailed reading-lists related to the different topics within the course will be provided at the start of the course. General useful texts include Clifford, N.J., S.L. Holloway, S.R. Rice and G. Valentine (eds) (2009) *Key Concepts in Geography*, 2nd Ed, Sage, London; Dicken, P. (2011) *Global Shift: Mapping the Changing Contours of the World Economy* 6th Edition Sage Publications; W.E. Murray, *Geographies of globalization*, 2006; Pike A., A. Rodriguez-Pose and J. Tomaney (2017) *Local and regional development*. London: Routledge; N. Castree (2014) *Making Sense of Nature*

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

GY101**Succeeding in your degree: Critical skills for Geography and Environment students**

This information is for the 2023/24 session.

Teacher responsible: T.B.C.

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is not available as an outside option nor to General Course students. This course is very strongly recommended for all first year Geography and Environment undergraduate students.

Course content: This course seeks to provide an introduction to key study skills that Geography and Environmental Social Science students will use throughout their three years of undergraduate study. It will teach students how to get the most out of lectures and classes and, furthermore, how to best prepare for them through effective reading strategies and skills. During the course, students also will learn what makes a good essay, and how to effectively research, write and deliver them. The course will additionally introduce students to how their work is assessed and, moreover, how to best make use of feedback to improve their grades. All first-year undergraduates are strongly encouraged to take this course which has been purposefully designed to maximise their potential.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through lectures in Autumn Term.

Indicative reading: Burns, T. and S. Sinfield (2016). *Essential Study Skills: The Complete Guide to Success at University*. 2nd edition. Sage.

Cottrell, S. (2013). *The Study Skills Handbook*. 4th edition. Palgrave Macmillan.

Greetham, B. (2018). *How to Write Better Essays*. 4th edition. Palgrave Macmillan.

GY103

Contemporary Europe

This information is for the 2023/24 session.

Teacher responsible: Prof Neil Lee CKK 4.23 and Prof Riccardo Crescenzi CKK 4.28

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Geography with Economics, BSc in Politics and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course aims at: introducing students with little prior knowledge of European issues to some of the most important economic, social, and political challenges the European Union overcame in the past and currently faces; developing an understanding of the determinants and the historical evolution of these challenges, and the related public reactions and policies at different geographical levels; learning about strengths, weaknesses and lessons to be drawn from the most striking example of integration among nation states as a result of historical forces and in the context of a globalised world. The course covers critical issues such as different degrees of economic integration in theory and practice, historical bases for integration, competitiveness, cohesion, innovation and growth, enlargements, Euro crisis, Brexit, Europe in the world, social policy, employment trends, poverty, migration, ageing, and social exclusion and inequality. Particular emphasis is laid upon the geographical foundations of these themes, at various spatial scales in Europe: supranational, national and subnational (e.g. regional, local, urban) levels. The course is traditionally based on close interactions with the lecturers and class teachers, and extra curriculum events will be also organised.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Autumn and Winter Term.

This course includes a reading week in Week 6 of Autumn and a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce two class essays during the year (worth 10% each) and will also be expected to give class presentations.

Indicative reading: Given the diversity of the subject, there is no one textbook that covers all of the topics. A mix of academic articles and chapters from textbooks is used in the course. Reading lists are provided electronically, and additional web sources will also be indicated during the lectures. Indicative textbooks are the following: R Baldwin and C Wyplosz, *The Economics of the European Integration*, 4th ed. 2012; S Senior Nello, *The European Union. Economics, Policies and History*, 3rd ed. 2012; J. McCormick, *European Union Politics*, Palgrave, 2nd ed. 2015.

Assessment: Essay (10%, 1000 words) in the AT.

Essay (10%, 1000 words) in the WT.

Take-home assessment (80%) in the ST.

GY120

Environmental Change: Past, Present and Future

This information is for the 2023/24 session.

Teacher responsible: Dr Thomas Smith CKK4.18

Availability: This course is compulsory on the BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics and BSc in Environmental Policy with Economics. This course is available on the BA in Geography. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Many consider that 'Climate Change' is the greatest challenge currently facing human society, mainly because of the 'Environmental Changes' that it will cause. But what are 'Climate Change' and 'Environmental Change'? What causes these changes? How much have they changed in the past and how do we know? How much is human activity responsible for the recent changes identified and when did this influence begin? How is the climate going to change in the next century and what are the consequences going to be for extreme weather events, sea-level rise? What can we do about it? Should we adapt, mitigate, or begin to engineer our climate?

To answer these questions requires that the course focuses on developing an appreciation of the Planet Earth as the home of human societies. Through a combination of lectures, classes, practical work, and fieldwork, the course focuses on the physical nature of the 'natural' or biophysical systems and involves consideration of how the solid earth, the gaseous atmosphere, the hydrosphere and the biosphere, were formed, have evolved, interact and have changed over time due to both external (extra-terrestrial) and internal factors, including humans. From this, an appreciation of change and evolution over differing time-scales is developed, which will serve as an essential basis for students when evaluating the contemporary two-way interaction between humans and the environment in the 'anthropocene'. The relevant science will be taught as and when required.

The course consists of the following sections:

PART A: Introduction to environmental change

- A framework for environmental geography
- The nature and causes of environmental/climate change

PART B: Key components of environmental change: The Biosphere

- Formation of the biosphere and change over time
- Contemporary ecosystem processes and change
- The biodiversity crisis: extreme change in the anthropocene

PART C: Key components of environmental change: Atmosphere & Oceans

- Solar radiation, the atmosphere, and interactions
- Global and local energy budgets
- Circulation - atmosphere, oceans, and carbon

PART D: Key components of environmental change: The Hydrosphere

- Water in the atmosphere, clouds and rainfall
- Hydrological cascade, rivers and flooding

PART E: Long-term environmental change

- Geological-scale climate change and Earth's 'greenhouse' and 'icehouse' environments.
- Orbital-scale climate change and the great ice ages
- Millennial-scale climate change and deglaciation

PART F: Contemporary climate change: The emerging human influence

- The Holocene
- Contemporary climate change associated with fossil fuel emissions
- Contemporary climate change and extreme weather
- Land-use and land-cover change (deforestation)

PART G: Future climate change

- Modelling future climate change
- Fixing the future: Adaptation, mitigation, and geoengineering

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Autumn and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and Week 6 of Winter Term.

Formative coursework: Students will be expected to produce two assignments during the year, one in each term, and give class papers.

Indicative reading:

- Ahrens, C.D., 2012. *Meteorology today: an introduction to weather, climate, and the environment*. Cengage Learning.
- Gaston, K.J. and Spicer, J.I., 2004. *Biodiversity: An Introduction*. Wiley-Blackwell, Oxford.
- Houghton, J.T., 2009. *Global Warming. The Complete Briefing*. 4th edition, Cambridge Univ. Press
- IPCC, 2013. *Climate Change 2013: The Physical Science Basis. Contribution of Working Group I to the Fifth Assessment Report of the Intergovernmental Panel on Climate Change* [Stocker, T.F., D. Qin, G.-K. Plattner, M. Tignor, S.K. Allen, J. Boschung, A. Nauels, Y. Xia, V. Bex and P.M. Midgley (eds.)]. Cambridge University Press, Cambridge, United Kingdom and New York, NY, USA, 1535 pp, doi:10.1017/CBO9781107415324. [online] Available from: <http://www.ipcc.ch/report/ar5/wg1/> [last accessed 17 September 2016]
- IPCC, 2018. *Global Warming of 1.5°C. An IPCC Special Report on the impacts of global warming of 1.5°C above pre-industrial levels and related global greenhouse gas emission pathways, in the context of strengthening the global response to the threat of climate change, sustainable development, and efforts to eradicate poverty* [V. Masson-Delmotte, P. Zhai, H. O. Pörtner, D. Roberts, J. Skea, P.R. Shukla, A. Pirani, W. Moufouma-Okia, C. Péan, R. Pidcock, S. Connors, J. B. R. Matthews, Y. Chen, X. Zhou, M. I. Gomis, E. Lonnoy, T. Maycock, M. Tignor, T. Waterfield (eds.)].
- Maslin, M., 2013. *Climate: a very short introduction*. OUP Oxford.
- Ruddiman, W.F., 2001. *Earth's Climate: past and future*. Macmillan.
- Smithson, P., Addison, K. and Atkinson, K., 2013. *Fundamentals of the physical environment*. Routledge.

Assessment: Exam (60%, duration: 2 hours) in the spring exam period.

Essay (15%, 1500 words) and policy brief (25%) in the WT. The policy brief will be formatted in the style of a UK Parliament science briefing note (POSTnote), with a 2,000 words limit.

GY121**Sustainable Development**

This information is for the 2023/24 session.

Teacher responsible: Dr Julia Corwin CKK 311

Availability: This course is compulsory on the BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics and BSc in Environmental Policy with Economics.

This course is available on the BA in Geography, BA in Social Anthropology, BSc in Accounting and Finance, BSc in Geography with Economics and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Studying sustainable development today means recognizing the urgency of social and environmental problems facing current and future generations across the world. Throughout the year, we explore the relationship between human lives and the environment, debate what human 'development' and 'sustainability' mean, and discuss how to understand these complex and flexible concepts together. The first term focuses on understanding current and historical challenges for sustainable development, and the second term looks more closely at sustainable development programmes and proposed solutions. In the Autumn Term, we study the origins of sustainable development discourse and programmes and explore the challenges of sustainable development by looking at major global environmental and social changes, including debates on resource and energy use, urban growth, technology, industrial agriculture, commodity use and disposal, and changes in the global economy. Winter term then focuses on a variety of sustainable development programmes and proposed solutions, in order to critically examine how sustainable development is implemented throughout the world. Together, these two terms expose students to the diversity of ways that sustainable development is thought about and studied, in order to foster critical understanding about the connections between environmental and social problems.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded videos, in-person lectures, live online lectures, and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Autumn and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and in Week 6 of Winter Term

Formative coursework: Students will be expected to work on a number of small assignments throughout both terms.

Indicative reading: There are a variety of texts available for this course. A detailed reading list will be given at the beginning of each term but an indicative list includes:

J Hicel (2017) *The Divide: A Brief Guide to Global Inequality and its Solutions*. Windmill Books; R Patel and J Moore (2018) *A History of the World in Seven Cheap Things*. Verso Books; G Atkinson, S Dietz, E Neumayer and M Agarwala, eds. (2014) *Handbook of Sustainable Development*, 2nd edition, Edward Elgar Publishing; P McMichael and H Weber (2022). *Development and Social Change: A Global Perspective*, SAGE Publications.

Assessment: Exam (40%, duration: 2 hours) in the January exam period.

Coursework (40%) and continuous assessment (20%).

The participation grade is based on student engagement with course material, and is assessed through a number of small assignments throughout both terms as well as participation in class.

GY140**Introduction to Geographical Research**

This information is for the 2023/24 session.

Teacher responsible: Dr Austin Zeiderman, Dr Murray Low, Dr Richard Perkins, Dr Ryan Centner, Prof Henry Overman, Ms Jessie Speer and Prof Claire Mercer

Availability: This course is compulsory on the BA in Geography and BSc in Economic History and Geography. This course is available on the BSc in Environment and Development and BSc in Environment and Sustainable Development. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The main objective of this course is to introduce

students to the production of geographical and environmental knowledge and to prepare them to become producers of such knowledge themselves. It provides students with a sound understanding of both the conceptual foundations and real-world applications of a variety of methodological approaches for conducting research. To appreciate why, how, and to what ends geographers conduct research on the social and spatial dimensions of human activity, the research process is examined from beginning to end: selecting a topic, performing a literature review, designing a project, collecting and analysing data, and communicating results. The process of producing knowledge about geography and the environment is also examined from a number of different perspectives: examining case studies of written work, engaging with internationally-renowned researchers, discussing the rationale for choosing a methodological approach, practicing the application of individual methods, and designing and executing a piece of independent research. Both quantitative and qualitative research methods are discussed in detail and practical exercises give students the opportunity to apply various methods from the course in their own research.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of lectures and classes across the Autumn Term and Winter Term. Students on this course will have a reading week in Week 6 of Autumn Term and Week 6 of Winter Term.

Formative coursework: Students will be given the opportunity to complete two formative assignments during the course of the year: one in AT that draws on qualitative research methods and one in WT that draws on quantitative research methods. Information on the formative assignments will be provided.

Indicative reading: Methods in human geography: a guide for students doing a research project (Flowerdew and Martin, 2005); Statistics: a tool for social research (Healey, 2012); Statistics in geography and environmental science (Harris and Jarvis, 2011); Geography and geographers: Anglo-American geography since 1945 (Johnston, 1997); International Encyclopedia of Human Geography (Kitchin and Thrift, 2009); Key methods in geography (Clifford, French, and Valentine, 2010); Qualitative research methods in human geography (Hay, 2010).

Assessment: Project (50%, 3500 words) in the WT. Project (40%, 2500 words) and problem sets (10%) in the ST. The first project (3500 words) will be due toward the end of Winter Term. The problem set (500 words) and second project (2500 words) will be due at the start of Spring Term.

GY144

Human Geography and the City

This information is for the 2023/24 session.

Teacher responsible: Dr Alan Mace

Availability: This course is compulsory on the BA in Geography. This course is available on the BSc in Geography with Economics. This course is not available as an outside option. This course is available to General Course students.

Course content: The purpose of the course is to introduce you to selected ways in which human geographers seek to understand cities. Throughout you will focus on the relationship between people and place. Primarily engaging with London, you will consider how the city has been shaped over time by its people and how, in turn the city experience has shaped and continues to shape the lives of those who live there.

You will look at how the city is described, imagined and planned through official discourses. And at how people create a sense of place, of self and of others in the city. In the Autumn Term you will think about the relationship between planning, architecture, design and people's identities. And in the Winter Term you will look at the relationship between infrastructure and people. Throughout

you will look at how human geographers engage with the lived experience of the city through the lens of, for example, ethnicity, class, and sexual identity.

The course seeks to complement courses in methods and theory in human geography by giving you an opportunity to ground that material in a study of London. You will be able to develop and apply theories of, for example, place, territory, landscape, and migration. And you will engage with a range of methods for geographical research, including the use of walking, archives and the arts. You will also be encouraged to reflect on your personal geography of and relationship with the city.

By the end of the course, you will be able to employ selected concepts and methods from human geography to develop arguments on the relationship between people and place (paying particular attention to the significance of ethnicity, class, sexual identity & faith), including the relationship between a city's population, the physical form and infrastructure.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Autumn and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and in Week 6 of Winter Term

Formative coursework: Students are expected to write two formative assignments and to participate actively in classes in the AT and the WT.

Indicative reading: Mapping tool (don't miss 'layer tools' in bottom left of right-hand window) <https://www.layersoflondon.org/map>
Municipal dreams – <https://municipaldreams.wordpress.com/>
Jonathan Meades on Letchworth Garden City (The suburbanisation of the UK) <https://www.youtube.com/watch?v=1qT5FquwhpA>
de Botton, Alain. 2009. A Week at the Airport: A Heathrow Diary. London: Profile Books.
Hall, Stuart. 2017. Familiar Stranger: A Life Between Two Islands. London: Penguin.

Assessment: Essay (50%, 2000 words) in the AT. Essay (50%, 2000 words) in the WT.

GY202

Introduction to Global Development

This information is for the 2023/24 session.

Teacher responsible: Dr Romola Sanyal

Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environment and Sustainable Development. This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Economic History and Geography, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in Geography with Economics and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introduction to analysing global development, focusing on key development theories, strategies, problems and trajectories. In Autumn Term we cover concepts and theories of development, histories of colonialism, the debt crisis and structural adjustment, neoliberalism, aid, governance and civil society. In Winter Term we examine poverty, migration, informality, housing, water, sanitation and gender.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Autumn and Winter Term

This course includes a reading week in Week 6 of Autumn Term

and Week 6 of Winter Term.

Formative coursework: Students will produce two formative assignments- one each during the AT and the WT.

Indicative reading: S. Chant and C. McIlwaine, *Geographies of Development in the 21st Century:*

An Introduction to the Global South, 2009; S. Chari and S.

Corbridge (eds), *The Development Reader*, 2008; G. Williams, P. Meth and K. Willis, *Geographies of Developing Areas: the Global South in a Changing World*, 2009; V Desai & R Potter (Eds), *The Companion to Development Studies*, 2nd ed, 2008; T Forsyth (Ed), *The Routledge Encyclopaedia of Development*, 2005; D. Simon (Ed.), *Fifty Key Thinkers on Development*, 2005; K Willis (2011)

Theories and practices in development, 2nd ed; UNDP, *Human Development Report*, published annually; World Bank, *World Development Report*, published annually.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (50%, 3000 words) in the WT.

GY204 Half Unit

Political Geography

This information is for the 2023/24 session.

Teacher responsible: Dr Murray Low

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: GY100 would be advantageous.

Course content: An introduction to political geography.

Topics covered include power and states, nationalism, collective mobilisation and social movements, elections, and democratisation.

Teaching: 15 hours of lectures, 10 hours of classes and 5 hours of help sessions in the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading:

- Peter Taylor and Colin Flint (2018) *Political Geography*. Routledge.
- Joe Painter and Alex Jeffrey (2009) *Political Geography: an introduction to space and power*. Sage.
- Benedict Anderson (2016) *Imagined Communities: reflections on the origins and spread of nationalism*. Verso.
- Sidney Tarrow (2011) *Power in Movement: social movements and contentious politics*. Cambridge University Press.
- Ruth Collier (1999) *Paths toward Democracy: the working class and elites in Western Europe and South America*. Cambridge University Press.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GY206 Half Unit

Urban Geography and Globalisation

This information is for the 2023/24 session.

Teacher responsible: Dr Pooya Ghoddousi

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces students to the intersection of urban geography and the geography of globalisation, with the aim of understanding key references in academic debates, and their relevance for real-world social, economic, and political issues in our cities today. The course offers a critical, human-geographical perspective on 'global cities', how these manifest in different parts of the world, how they matter for distinct realms of urban life, and how we can study features of global urban geography. Themes include empires, development, and cities; 'global cities'; 'Third World cities' or 'cities of the global South'; urban spaces of neoliberalism; new geographies of urban theory; and planetary urbanisation. We examine cases related to migration, sexual minorities, the circulation of ideas, and gentrification. Examples come from both the 'global North' and the 'global South', with the aim of helping students understand when and how these categories may be useful.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: The formative work will be an essay plan that directly prepares students for the summative work.

Indicative reading: Sassen, Saskia. 2001. *The Global City*. New York, London, Tokyo. Second edition.

Brenner, Neil and Nik Theodore (eds). 2002. *Spaces of Neoliberalism*.

Davis, Mike. 2006. *Planet of Slums*.

Robinson, Jennifer. 2006. *Ordinary Cities: Between Modernity and Development*.

Brenner, Neil and Christian Schmid (eds). 2014. *Implosions/Explosions: Towards a Study of Planetary Urbanization*.

Ghaziani, Amin. 2014. *There Goes the Gayborhood?*

Assessment: Essay (65%, 2500 words), class participation (20%) and presentation (15%) in the AT.

GY207 Half Unit

Economy, Society and Place

This information is for the 2023/24 session.

Teacher responsible: Dr Alan Mace

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Why do people choose to live in particular places? Is it simply a trade-off of affordability and housing space or are other factors at play? Through which other mechanisms is the choice of residential location influenced and how significant is the outcome? Employing the theory of Bourdieu throughout the half unit, we address these and other questions, examining the interrelatedness of economy, governance and society in influencing the choice of where we live. We focus on the role of culture in nuancing class-based explanations of the relationship between people and place. We consider how housing choices can confer social advantage or disadvantage on individual households. And we discuss the significance for policy makers of placing the social at the centre of our understanding of housing choices. We use a series of place-based typologies and phenomenon to relate theory to practice. Examples might include but are not limited to; suburbanisation, rural second homes and gentrification.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person

lectures and other supplementary interactive live activities. This course is delivered through a combination of classes and lectures in Winter Term. There is no teaching in week 11 due to the anticipated second year geography field trip.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: The formative work will be an essay plan that directly prepares students for the summative work.

Indicative reading:

- Bourdieu, P. (2005) 'Habitus'. In Jean Hillier and Emma Rooksby (eds) *Habitus: a sense of place*. 43-5.
- Mace, A. (2017), Spatial capital as a tool for planning practice. *Planning Theory* 16(2) 119-132.
- Peck, J. (2011). Neoliberal Suburbanism: Frontier Space. *Urban Geography*, 32(6), 884–919.
- Savage, M. The Lost Urban Sociology of Pierre Bourdieu (chapter 45). In Gary Bridge and Sophie Watson (eds) *The new Blackwell companion to the city*. 511-520.

Assessment: Essay (100%, 3000 words) in the ST.

GY209 Half Unit

The Economic Geography of Trade, Production and Development

This information is for the 2023/24 session.

Teacher responsible: Dr Davide Rigo

Availability: This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Economics, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics and BSc in Environmental Policy with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Economics A (EC100) or Economics B (EC102) or Microeconomics I (EC1A1 or EC1A3 or EC1A5) in combination with Macroeconomics I (EC1B1 or EC1B3 or EC1B5), and ST107 (or equivalent course in statistics) strongly recommended.

Course content: This course is concerned with economic geography. In particular we use ideas from International Trade, International Economics, Development and Regional Economics to talk about the location of economic activity across space and the consequences of uneven location. This module is concerned with two fundamental questions: i) what determines the distribution of production and trade across countries and regions? ii) which are the implications for economic development and inequalities? To answer to these questions, this module provides students with an introduction of international trade theories, their mechanisms and implications for trade patterns. In parallel, this module provides students with a review of the main empirical studies testing for those theories and documenting the implications of trade liberalisation for economic development and income inequalities. Armed with these theories and empirical facts, the module critically evaluates current trade policy disputes.

The main topics covered during the module will be:

1. Introduction to trade
2. The Ricardian model of comparative advantage
3. Heckscher-Ohlin and factor endowments
4. Trade, globalisation and inequality
5. Krugman's New Trade Theories
6. Spatial Distribution of Trade and Production
7. Trade Policy
8. Gravity models
9. Heterogeneous firms and trade

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and

lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to prepare for group discussion of the main readings and hand in a short essay for formative assessment.

Indicative reading:

- Pugel T.A. *International Economics*. McGraw-Hill.
- Baldwin R and Martin P, (1999), Two waves of globalization: superficial similarities, fundamental differences, NBER working paper 6904.
- Antràs, P. (2020), Conceptual aspects of global value chains. World Bank Policy Research Working Paper 9114.
- Autor D. Dorn D. and Hanson G. (2013), The China Syndrome: Local Labor Market Effects of Import Competition in the US. *American Economic Review*, 103(6), 2121-2168.
- Feenstra C. and Hanson G. (1999), The Impact of Outsourcing and High-Technology Capital on Wages: Estimates for the United States, 1979-1990. *Quarterly Journal of Economics*, 114, 907-940.
- Krugman, Paul (1979), Increasing returns, monopolistic competition, and international trade. *Journal of International Economics*, Vol. 9(4), pp. 469-479.
- Krueger, A. O. (1997), Trade Policy and Economic Development: How we learn. *The American Economic Review*, 87(1).
- James Feyrer, (2009), Distance, Trade, and Income – The 1967 to 1975 Closing of the Suez Canal as a Natural Experiment. NBER Working Papers 15557.
- Bernard A., J.B. Jensen, S.J. Redding, and P.K. Schott (2007), "Firms in International Trade". *The Journal of Economic Perspectives*, Volume 21, Number 3, pp. 105-130.
- Bustos, P. (2011), Trade Liberalization, Exports, and Technology Upgrading: Evidence on the Impact of MERCOSUR on Argentinian Firms. *The American Economic Review*, 101(1), 304-340

Assessment: Coursework (100%, 3000 words) in the WT.

GY210 Half Unit

The Economics of Cities

This information is for the 2023/24 session.

Teacher responsible: Prof Henry Overman

Availability: This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Economics, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics and BSc in Environmental Policy with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 80 students.

Pre-requisites: Economics A (EC100) or Economics B (EC102) or Microeconomics I (EC1A1 or EC1A3 or EC1A5) in combination with Macroeconomics I (EC1B1 or EC1B3 or EC1B5), and ST107 (or equivalent course in statistics) strongly recommended.

Course content: Urban economics is concerned with the spatial form of cities and the division of national economic activity into cities, both at a point in time and over time. Three fundamental questions are: (1) Why are economic activities within a country so unequally distributed across space? (2) Why do cities (and agglomerations of firms and workers) emerge and in what locations? (3) How and why are economic activities within cities unequally distributed in general and between the city centre and the suburbs?

The main topics covered in this course include:

- Why do cities exist and why do firms cluster?
- What determines equilibrium city size and features of the urban system?
- City growth and spatial transformation
- Diseconomies in cities: Urban location, land rents and land use patterns
- The role of local governments

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of classes and lectures across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to prepare for group discussion of some readings and hand in short essays or problem sets.

Indicative reading:

- O'Sullivan, A., *Urban Economics*. Boston: Irwin- McGraw-Hill, 9th Edition, 2019.
- Greenstone M. R. Hornbeck & E. Moretti (2010). Identifying agglomeration economies: Evidence from winners and losers of large plant openings, *Journal of Political Economy*, Vol. 118, No. 3, 536-598.
- Duranton, G.160& Puga, D. (2001). Nursery cities: Urban diversity, process innovation, and the life cycle of products. *American Economic Review*, 91(5).
- Ahlfeldt, G. M., & McMillen, D. P. (2018). Tall buildings and land values: Height and construction cost elasticities in Chicago, 1870–2010. *Review of Economics and Statistics*, 100(5), 861-875.
- Hilber, C. A., & Vermeulen, W. (2016). The impact of supply constraints on house prices in England. *The Economic Journal*, 126(591), 358-405.
- Hilber, C.A.L. & Lyytikäinen, T. (2017). Transfer Taxes and Household Mobility: Distortion on the Housing or Labor Market? *Journal of Urban Economics* 101, 57-73.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GY212 Half Unit

Pathways in Human Geography

This information is for the 2023/24 session.

Teacher responsible: Dr Murray Low

Availability: This course is compulsory on the BA in Geography. This course is available on the BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: GY100 and GY140 would be advantageous

Course content: This course will provide some intellectual pathways from GY100. Human Geography is a broad subject and there may be changes in the particular topics from year to year. Topics to be discussed will be Imperialism, East and West; contemporary geopolitics; concepts of "home" and Patriarchy; material aspects of globalisation such as containerisation and shipping; non-economic aspects of agglomeration in cities; biopolitics and the geography of disease and viruses; the geography of affect or feelings; soundscapes and music.

Teaching: 15 hours of lectures, 10 hours of classes and 5 hours of help sessions in the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

- Tim Cresswell (2012) *Geographic Thought: a critical introduction*. Wiley-Blackwell.
- Michael Mann (2011) *Power in the 21st Century*. Polity Press
- David Edgerton (2019, revised edition) *The Shock of the Old: technology and global history since 1900*. Profile Books.
- Ashley Jackson (2013) *The British Empire: a very short introduction*. OUP.
- Franz Kafka (1926, various translations) *The Castle*.

- Nigel Thrift (2021) *Killer Cities*. Sage.

- Sarah Whatmore (2002) *Hybrid Geographies. Natures, Cultures, Spaces*. Sage.

Assessment: Take-home assessment (100%) in the WT.

GY220

Environment: Science and Society

This information is for the 2023/24 session.

Teacher responsible: Dr Thomas Smith CKK4.18 and Dr Jessica Templeton

Availability: This course is compulsory on the BSc in Environment and Development, BSc in Environment and Sustainable Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Sustainable Development with Economics and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An analysis of the debates concerning the nature, causes and effects of, and the alternative solutions to, the key natural environmental degradation and pollution problems faced by human societies. The purpose of this course is to provide essential information, first, about the scientific foundations for much environmental concern and, secondly, a social-science perspective on that science, identifying how it is communicated and employed in areas of environmental governance. The course provides both a grounded discussion of physical changes underlying some key environmental debates, and an introduction to approaches from social science concerning the governance implications of environmental science. Students will explore the role of science in environmental understanding and governance through a combination of lectures, classes, and practical environmental monitoring.

The course consists of two major sections, although the specific content, order and relative proportion of teaching may change with staff availability:

Part A: Environmental Science, Risk, and Policy [10 weeks]:

This section includes an introduction to positivist and post-positivist approaches to knowledge production and examines the physical science basis of current regional and global environmental risks, including geohazards, ozone depletion, climate change, deforestation, and global atmospheric pollution. We discuss different knowledge production pathways, including the positivist scientific approach, indigenous/traditional knowledge, citizen science, and 'divergent' knowledge. This section of the course involves a student-led air pollution monitoring activity, contributing to a citizen science database.

Part B: Science and Environmental Governance [9 weeks]:

This section introduces students to the social scientific perspectives on scientific knowledge and environmentalism, and how that knowledge is used to govern environmental issues. This includes how environmental science and knowledge is incorporated in global environmental governance. The environmental governance of climate change, stratospheric ozone depletion, and agrarian risk are covered in this section.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Autumn and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 2 pieces of coursework in the AT and WT.

One essay/report in AT, one mock exam essay in WT

Indicative reading: No one book or small group of books adequately covers the themes considered in the course, and

separate reading lists are provided for each distinct part of the syllabus. Basic reading material includes:

- T. Forsyth, *Critical Political Ecology; The Politics of Environmental Science*, 2003;
- A. Goudie (Ed), *The Human Impact Reader*, 6th edition, 2006;
- M. K. Hill, *Understanding Environmental Pollution*, 1997;
- J. Houghton, *Global Warming: The Complete Briefing*, 5th edition, 2015;
- M. Hulme, *Why We Disagree About Climate Change*, 2009;
- A.M. Mannion, *Dynamic World: Land Cover and Land-Use Change*, 2002;
- G. T. Miller (Ed), *Living in the Environment*, 2000;
- K. Smith, *Environmental Hazards*, 2001;
- United Nations Environment Programme, *UNEP Yearbook 2015*, 2015;
- M. Whitehead, *Environmental Transformations*, 2014.

Assessment: Exam (60%, duration: 2 hours) in the spring exam period.

Assignment (40%) in the WT.

Students may choose their assignment as either an environmental monitoring report (3000 words) or a summative essay (3000 words).

GY222

Applied Environmental Economics

This information is for the 2023/24 session.

Teacher responsible: Dr Eugenie Dugoua (course manager), Dr Sefi Roth, Dr Stephen Jarvis

Availability: This course is compulsory on the BSc in Environmental Policy with Economics. This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Geography with Economics and BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: This course is an introduction to economic principles in the analysis of environmental change and natural resource use and in designing appropriate policy responses. The first part of the course primarily covers the concepts and tools of environmental and resource economics, such as the evaluation of regulatory and market-based instruments in controlling pollution; moral suasion and voluntary regulation; the economics of renewable resources (e.g. fisheries); the economics of non-renewable resources (e.g., fossil fuels and minerals). The second part applies these concepts and tools to provide an economic perspective on real-world policy issues. Topics covered include the following: cost-benefit analysis and environmental valuation; stated and revealed preferences methods (and some behavioural considerations); sustainable development; biodiversity; climate change; energy; directed technological change and green innovation; health and the environment.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of classes and lectures across Autumn Term and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and Week 6 of Winter Term.

Formative coursework: Students will be expected to produce non-assessed coursework throughout the year that will include at least

one essay and may be asked to give class presentations.

Indicative reading: Detailed reading lists will be provided to support each course component.

For an overview and introduction to the main issues covered by the course, students may wish to consult the following:

Field, B., & Field, M. K. (2016). *Environmental economics*. McGraw-Hill Education.

Keohane, N. O., & Olmstead, S. M. (2016). *Markets and the Environment*. Island Press.

Kolstad, C. (2011). *Intermediate environmental economics: International edition*. OUP Catalogue

OECD. (2018). *Cost-Benefit Analysis and the Environment: Further Developments and Policy Use*. OECD Publishing.

Assessment: Exam (75%, duration: 3 hours) in the spring exam period.

Essay (25%, 2000 words).

GY245 Half Unit

Quantitative Methods in Geography and GIS

This information is for the 2023/24 session.

Teacher responsible: Dr Ana Varela Varela

Availability: This course is compulsory on the BA in Geography and BSc in Geography with Economics. This course is available on the BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics and BSc in Environmental Policy with Economics. This course is not available as an outside option nor to General Course students.

Pre-requisites: GY140 Introduction to Geographical Research or a 1st year statistics course such as ST107 Quantitative Methods (Statistics)

Course content: This course provides students with an introduction to quantitative methods for geographical analysis, specifically regression analysis and Geographical Information Systems (GIS). An understanding of quantitative methods of this type is essential for those who wish to go on to do their own research and for those who will use GIS in their future undertakings. The first part of the course is devoted to the principles of regression analysis as applied to quantitative social science. The second part of the course introduces students to the use of GIS in research. Theoretical discussion in the lectures is accompanied by practical computer classes in which students learn how to apply these methods on real data sets. The practical classes develop a range of skills which lead on to an assessed practical project.

Topics covered:

- 1 Introduction to quantitative methods
- 2 Regression analysis: linear models; parameter estimation; regression output interpretation; dummy variables
- 3 Regression analysis: hypothesis tests
- 4 Regression analysis: classical assumptions; omitted variables; reverse causality; heteroscedasticity; multicollinearity
- 5 Regression: practical applications in project work
- 6 GIS: Introduction
- 7 GIS: Spatial representation; vector data; raster data; remote sensing; databases, joins
- 8 GIS: Queries, spatial joins, overlay and data management
- 9 GIS: Examples

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Formative work is based solely on the first part of the course on regression analysis. A dataset is provided alongside a specific set of questions.

Indicative reading: Studenmund, A.H., *Using Econometrics: a practical guide*. Longman: London.
Bernhardsen, T (2002), *Geographic Information Systems: An Introduction*. New York: John Wiley and Sons.
Breslin, P., Frunzi, N., Napoleon, E., Ormsby, T., *Getting to Know ArcView GIS*. San Francisco: ESRI Press.

Assessment: Project (100%, 3000 words) in the WT.

GY246 Half Unit

Field Methods in Geography

This information is for the 2023/24 session.

Teacher responsible: Dr Laura Antona (Course Convenor)

Availability: This course is compulsory on the BA in Geography. This course is not available as an outside option nor to General Course students.

Course content: The course aims to prepare second-year students to undertake field research, focusing specifically on qualitative methods. It is linked to the BA Geography field course that takes place at the end of WT, and offers key preparation for third-year Independent Research Projects (IRP) that BA Geography students must conduct after this course.

Attendance and active participation is crucial for appropriate preparation for the field trip.

The course examines methodologies in field-based geographical research and evaluates their application to different kinds of research problems. It considers the choice of methods which may be used in the student's own IRP, and how to plan research. It enables students to acquire familiarity with, and practice of, contemporary qualitative research techniques and to examine different ways of, and gain experience in, presenting research results. A further aim of the course is to enable students to evaluate critically the methodological validity of qualitative geographical research as distinct from quantitative approaches. The course covers the following qualitative approaches to social science methodologies:

(i) techniques for qualitative data analysis including structured and unstructured interviewing, participant observation, and transecting, including ethics when conducting fieldwork;

(ii) application of qualitative research techniques in the field; and
(iii) techniques for designing, carrying out, and presenting field research, including both the course's field report and the third-year IRP.

Topics covered:

1. Ethics, planning & qualitative methods in independent geography research projects
2. Observation & ethnography in human geography
3. Interviews & focus groups as qualitative methods
4. Transecting in field research
5. Field journals
6. Field-course location: History & context
7. Field-course location: Topics in the field A
8. Field-course location: Topics in the field B
9. Field-course location: Topics in the field C

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

Field-course: The course includes a one week-long field trip, normally in the final week of the Winter Term. In the past the field course has visited Havana, Cuba. The destination, duration and content of the field trip in 2020/21 is subject to change, depending on the global situation regarding coronavirus and restrictions on travel.

Students should be aware that, although the costs of this course are subsidised by the Department, they will be expected to make a substantial financial contribution themselves. There are bursaries available from the Department for students who can document financial need.

An alternative field exercise will be undertaken by students who

are unable to participate in the above one-week residential field-course.

Students on this course will have a reading week in Week 6.

Formative coursework: Short exercises conducted in preparation for class sessions throughout the Winter Term.

Indicative reading:

- Chilson, P. and Mulcahy, J.B. (2017) *Writing abroad: A guide for travelers*. Chicago: University of Chicago Press.
- Bastian, H. (2019) *Everyday adjustments in Havana: Economic reforms, mobility, and emerging inequalities*. Lanham: Lexington Books.
- Becker, H. S. (1998) *Tricks of the trade: How to think about your research while you're doing it*. Chicago: University of Chicago Press.
- Becker, H. S. (2007) *Writing for social scientists: How to start and finish your thesis, book, or article (2nd edition)*. Chicago: University of Chicago Press.
- Cloke, P. et al (2004) *Practising human geographies*. London: Sage.
- Esterberg, K.G. (2002) *Qualitative Methods in Social Research*. Boston: McGraw-Hill.
- Flowerdew, R. and Martin, D. (eds.) (2005) *Methods in human geography: A guide for students doing a research project (2nd edition)*. Harlow: Pearson/Prentice Hall.
- Hain, I. (2010) *Qualitative research methods in human geography (3rd edition)*. Oxford: Oxford University Press.
- Hennink, M. et al (2011) *Qualitative research methods*. London: Sage.
- Jones, J., Quinn, S. and Brown, H. (2011) *Writing for sociology (2nd edition)*. Berkeley: Department of Sociology, University of California at Berkeley.
- Luker, K. (2008) *Salsa dancing into the social sciences: Research in an age of info-glut*. Cambridge: Harvard University Press.
- Parsons, T. and Knight, P. (1995) *How to do your dissertation in geography and related disciplines*. London: Chapman & Hall.

Assessment: Project (60%) and research proposal (20%) in the ST. Class participation (20%) in the WT.

GY247 Half Unit

Field Methods in Geography with Economics

This information is for the 2023/24 session.

Teacher responsible: Dr Erica Pani (Course Convenor), Dr Elena Renzullo

Availability: This course is compulsory on the BSc in Geography with Economics. This course is not available as an outside option nor to General Course students.

Course content: The course aims to prepare second-year students to undertake field research, focusing specifically on qualitative methods. It is linked to the BSc Geography with Economics field trip that takes place at the end of WT, and offers key preparation for this and third-year Independent Research Projects (IRP).

Attendance and active participation is crucial for appropriate preparation for the field trip.

The course examines methodologies in field-based geographical research and evaluates their application to different kinds of research problems. It considers the choice of methods which may be used in the student's own research, and how to plan research. It enables students to acquire familiarity with, and practice of, contemporary qualitative research techniques and to examine different ways of, and gain experience in, presenting research results. A further aim of the course is to enable students to evaluate critically the methodological validity of qualitative geographical research as distinct from quantitative approaches. The course covers the following qualitative approaches to social science methodologies:

(i) techniques for qualitative data analysis including structured and unstructured interviewing, participant observation, and transecting, including ethics when conducting fieldwork;

(ii) application of qualitative research techniques in the field; and

(iii) techniques for designing, carrying out, and presenting field research, including both the course's field report and the third-year IRP.

Topics covered:

1. Ethics, planning & qualitative methods in independent geography research projects
2. Observation & ethnography in human geography
3. Interviews & focus groups as qualitative methods
4. Transecting in field research
5. Field journals
6. Topics related to field trip research planning and poster preparation.

Field-course:

The field course offers an opportunity to apply the methods studied on the first part of the course to research on the economic geography of a specific location. Students will embark on a series of orientation and research activities during the trip. In the past, the field trip has visited the state of Kerala in south India, in the area around Kochi (formerly Cochin). Kerala provides a rich and fascinating introduction to South Asian landscapes and culture, both new and old. Kerala is often described as a success story of economic development – the so called 'Kerala model' – with high levels of literacy and life expectancy, despite its relatively low per capita income. In other years the field trip has run to L'Aquila in Italy, a site of recent earthquakes, to learn about local economic development policy in the context of disaster recovery. The destination, duration and content of the field trip is subject to change, depending on the global situation regarding coronavirus and restrictions on travel.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/ seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. Field-course: The course includes a residential field trip, normally in the final week of the Winter Term. In the past the field course has visited Kerala, India or L'Aquila, Italy. The destination, duration and content of the field trip is subject to change, depending on the global situation and restrictions on travel.

Students should be aware that, although the costs of this course are subsidised by the Department, they will be expected to make a substantial financial contribution themselves. There are bursaries available from the Department for students who can document financial need.

An alternative field exercise will be undertaken by students who are unable to participate in the above one-week residential field-course.

Students on this course will have a reading week in Week 6.

Formative coursework: Short exercises conducted in preparation for class sessions throughout the Winter Term.

Indicative reading:

- Chilson, P. and Mulcahy, J.B. (2017) *Writing abroad: A guide for travelers*. Chicago: University of Chicago Press.
- Bastian, H. (2019) *Everyday adjustments in Havana: Economic reforms, mobility, and emerging inequalities*. Lanham: Lexington Books.
- Becker, H. S. (1998) *Tricks of the trade: How to think about your research while you're doing it*. Chicago: University of Chicago Press.
- Becker, H. S. (2007) *Writing for social scientists: How to start and finish your thesis, book, or article* (2nd edition). Chicago: University of Chicago Press.
- Cloke, P. et al (2004) *Practising human geographies*. London: Sage.
- Esterberg, K.G. (2002) *Qualitative Methods in Social Research*. Boston: McGraw-Hill.
- Flowerdew, R. and Martin, D. (eds.) (2005) *Methods in human geography: A guide for students doing a research project* (2nd edition). Harlow: Pearson/Prentice Hall.
- Hain, I. (2010) *Qualitative research methods in human geography* (3rd edition). Oxford: Oxford University Press.
- Hennink, M. et al (2011) *Qualitative research methods*. London: Sage.

- Jones, J., Quinn, S. and Brown, H. (2011) *Writing for sociology* (2nd edition). Berkeley: Department of Sociology, University of California at Berkeley.
- Luker, K. (2008) *Salsa dancing into the social sciences: Research in an age of info-glut*. Cambridge: Harvard University Press.
- Parsons, T. and Knight, P. (1995) *How to do your dissertation in geography and related disciplines*. London: Chapman & Hall.

Assessment: Research proposal (20%) and poster (60%) in the ST. Class participation (20%) in the WT.

This course has three assessment components: 60% is for a poster describing field-work research carried out as part of the course field trip (approximately 1000 words, but with graphical elements and images); 20% is for participation in classes and field trip activities; and 20% is for a proposal for future research (1250 words) such as that you will do if you take GY350, the 3rd Year Independent Research Project.

GY248 Half Unit

Field Methods in Geography & Environment

This information is for the 2023/24 session.

Teacher responsible: Dr Laura Antona, Dr Thomas Smith and Dr Julia Corwin (field trip joint co-ordinators)

Availability: This course is available on the BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics and BSc in Environmental Policy with Economics. This course is not available as an outside option nor to General Course students.

Course content: The course aims to prepare second-year students to undertake individual research projects. It examines the methodologies used in field-based geographical and environmental research and evaluates their application to different kinds of research problems. It considers the choice of methodology which may be used in the student's own Independent Research Project (IRP) and how to plan research. It enables students to acquire familiarity with, and practice of, contemporary qualitative research techniques and to examine different ways of, and gain experience in, presenting research results. A further aim of the course is to enable students to evaluate critically the methodological validity of geographical literature.

The course covers the following approaches to social science methodologies:

- (i) techniques for qualitative data analysis including structured and unstructured interviewing, participant observation, and research ethics, including ethics when conducting fieldwork;
- (ii) application of field-specific qualitative and field-specific quantitative research techniques in the field; and
- (iii) techniques for designing, carrying out, and presenting an Independent Research Project.

Topics covered:

1. Planning an independent research project
2. Qualitative methodology in human geography: What can we know? What kind of knowledge can we gain about qualities of the social and spatial world? And how?
3. Interviews (plus questionnaires and focus groups): What people think, and are able/willing to tell us
4. Ethnography & observation: What people do, and maybe even how they feel about it
5. Transecting & comparing: Making sense of places
6. How to design a research project
7. Field-trip specific teaching
8. Field-trip specific teaching
9. Field-trip specific teaching

Field-course

The destination, duration and content of the field trip in 2023/24 is subject to change. The following details are taken from a similar trip, but we hope to undertake similar activities in this academic year, but at a different destination.

In previous years, our trip destination has been Kerala, India. The

Kerala field course offers an excellent opportunity to experience a fascinating environment at first hand. The field trip visits the states of Kerala and Tamil Nadu in south India, and will transect a section of the Western Ghats from Munnar to Thekaddy, before heading to the Kerala Backwaters and Fort Cochin. Kerala provides a rich and fascinating introduction to South Asian landscapes and culture, both new and old. The Western Ghats Mountains separate Kerala from Tamil Nadu and are important for agro-forestry products such as tea, cardamom, and other spices. South of Kochi is the complex agro-ecological system of the 'backwaters' – a chain of lagoons, lakes and canals along the length of Kerala. Students will embark on a series of orientation and research activities during the trip.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. Students should be aware that, although the costs of this course are subsidised by the Department, they will be expected to make a substantial financial contribution themselves. There are bursaries available from the Department for students who can document financial need.

An alternative field exercise will be undertaken by students who are unable to participate in the above one-week residential field-course.

Students on this course will have a reading week in Week 6.

Formative coursework: Short exercises conducted in preparation for class sessions throughout the Winter Term.

GY307 Half Unit

Regional Economic Development

This information is for the 2023/24 session.

Teacher responsible: Prof Michael Storper

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Economics, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: In 2016, politics were shaped by regional development. In Britain, certain regions voted to leave the European Union and others (Greater London, Scotland) to stay. In the American presidential election in November 2016, 473 counties voted for the Democratic Party candidate and about 2600 counties voted for the Republican. However, the 473 counties contain more than 2/3 of the country's economic output, a majority of its population, produce almost all of its technological innovations, have higher personal incomes, and are responsible for most of the country's exports. This pattern has continued into the 2020s. This is because economic development is uneven across regions, within countries and at a wider global scale, between countries and continents. Over the past 40 years, in the current cycle of economic development that is defined by globalization and new technologies, these differences have become sharper, leading to more sharply divided politics in many countries. In many countries, a limited set of Superstar metropolitan areas has detached its economic performance from the rest of the national territory. If we bring this down to the personal level, where one lives matters for their opportunities, economic welfare and lifestyle. But places do not have a secure position in the world: they can go up or down the economic hierarchy and, with them, alter the opportunities or lack thereof for the people in them, as well as define opportunities or obstacles to migration. In cycles of about 40 years, the hierarchies of incomes among places can undergo significant change. Formerly prosperous places can decline; formerly less wealthy places can, under some conditions, develop, but only under the right conditions. Those that survive the cycles do so by changing their economic base and many other features of the local economy and society. With such change, the ways we live in places also evolves.

In 2009, the Nobel Prize in economics was awarded to Paul Krugman for founding what is now known as the "New Economic Geography." Since then, researchers have assembled a powerful, unified vision of what causes cities, metropolitan areas, regions, and countries in the world to develop in a geographically uneven manner. This vision brings together theories of the location of firms and households, trade, local labor markets, transport and trade costs, and local development policies/politics, into a unified whole.

There are challenges today for both the "473" counties and the

other 2600. Roughly speaking, the 473 have to keep doing things that have made them prosperous, but this is a moving target as technologies change, and patterns of competition change at a local and global scale. Moreover, even prosperous city-regions have internal challenges, such as poor neighborhoods or unequal opportunities for their people. The less prosperous “2600” counties have different challenges: they have been largely bypassed by the positive dimensions of globalization and technological change. Yet regional policies in the US and other countries have not been very successful in helping them adjust to the current world.

In this course, we will learn the theories, analytical tools and data that explain these issues and frame the challenges for development of both prosperous and less prosperous regions.

Teaching: This course will be delivered through live, in-classroom lectures, which will also be recorded and posted online for further consultation.

This course is delivered through weekly seminars in Autumn Term where the teacher actively invites student participation in the form of questions and debates, in addition to taught classes that involve readings, problem sets, debates and discussions, on a weekly basis

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: A variety of exercises including problems, reading analyses, use of examples that complement theoretical articles and so on. We draw these up as close as possible to the term, or even during the term, in order to enhance the student experience by making the examples relevant and contemporary.

Indicative reading:

Assessment: Take-home assessment (100%) in the WT.

The take home exam involves a combination of short responses (eg a paragraph or so); and essays. The essay questions consist of a list of essay questions that correspond to the topics covered in the lectures. These essays will be grouped into different sections on the exam, and students will choose one question from each group. There will be either two or three groups of questions from which students will select.

GY308 Half Unit Not available in 2023/24

The Economic Geography of Growth and Development

This information is for the 2023/24 session.

Teacher responsible: Prof Olmo Silva STC 5.06a

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Economics, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will introduce students to the framework and tools used by economists to study the processes of growth and development, and analyse its determinants. After a short discussion of the basic modelling framework, the course

will focus on empirical aspects. First, it will discuss the drawbacks and failures of simple models in which technological change fully determines the rate of growth of a country or region. Then it will present a set of enriching ingredients, which will allow for a better understanding of why different countries and regions around the world are characterised by different stages of development. The presentation of the material will be structured around four main blocks: Human Capital, Education and Growth; Trade and Globalization; the Role of Geography and History; and the New Institutional Paradigm. The course will close with a discussion of how the original framework worked out by economists back in '60s, coupled with new insights, provides a flexible tool to derive policy implications for growth and development.

Topics covered:

1. Stylized facts and a general economic framework for studying growth
2. Physical and human capital accumulation
3. Trade and globalization: their effects on growth and inequality
4. The Role of Geography and History
5. Institutions and growth

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to prepare for group discussion of some readings and hand in short essays. There is also a class debate (normally taking place after Reading Week during one of the students' assigned classes) where students are asked to work in small groups and deliver a presentation on an assigned debate topic.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GY309 Half Unit Not available in 2023/24**The Political Geography of Development****This information is for the 2023/24 session.****Teacher responsible:** Dr Camilla Royle**Availability:** This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.**Course content:** This course analyses the politics of contemporary development processes and the geopolitical interests that influence them. We will critically explore the assumption that peace leads to development and development leads to peace. The course considers development as both practical pursuit and as a series of discourses and representations. Topics addressed include: Critical Approaches to Development; Histories of Development and Geopolitics (Cold War through Neoliberal Contexts); 9/11 and the Security-Development Nexus; The Geopolitics of Climate Change; and New Geopolitical Landscapes (China and South-South Ties). The course will examine these themes using various case studies from the Global South and students are encouraged to develop their own research interests.**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of classes and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students will be expected to produce one formative essay plan in the Lent Term.**Indicative reading:** A comprehensive reading list will be provided during the course. Recommended readings include:

- Chant, S.; McIlwaine, C., 2009. *Geographies of Development in the 21st Century*. Northampton, MA: Edward Elgar.
- Feldman, S.; Geisler, C.; and Menon, G., 2011. *Accumulating Insecurity: Violence and Dispossession in the Making of Everyday Life*. 160 Georgia: University of Georgia press.
- Flint, C, 2016, *Introduction to Geopolitics*, London and New York: Taylor and Francis.
- Gregory, D., 2004. *The Colonial Present: Afghanistan, Palestine, and Iraq*. Malden, MA: Blackwell.
- Kapoor, I., 2008. *The Postcolonial Politics of Development*. London: Routledge.
- Massaro, V.A.; Williams, J., 2013. *Feminist Geopolitics*. *Geography Compass* 7(8), pp. 567-577.
- Mercille, J., 2011. *Violent narco-cartels or US hegemony? The political economy of the 'war on drugs' in Mexico*. *Third World Quarterly* 32(9), pp.1637-1653.

- Wright, M., 2011. *Necropolitics, Narcopolitics, and Femicide: Gendered Violence on the Mexico-U.S. Border*. *Signs: Journal of Women in Culture and Society* 36(3), pp. 707-731.

Assessment: Essay (100%, 3000 words) in the ST.**GY310 Half Unit
Urban Politics****This information is for the 2023/24 session.****Teacher responsible:** Dr Murray Low**Availability:** This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics,

BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course covers theories and processes of contemporary urban development from a variety of perspectives – it aims to introduce students to key concepts in, and approaches to, politics in cities, as these have emerged and developed over time. Themes include, but are not limited to, political and economic power in cities, the role of 'elites', urban government finance, the politics of local economic development policy, the multidimensional role of culture in urban change, and the emergence of forms of urban governance. Case studies are largely drawn from cities in the United States and the United Kingdom, reflecting the development of core ideas in mainstream urban politics largely in these contexts.**Teaching:** In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of classes and lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: One essay plan due in the AT.**Indicative reading:**

- David Harvey (2005) *A Brief History of Neoliberalism*.
- Robert Dahl (1961) *Who Governs?*
- Clarence Stone (1988) *Regime Politics*.
- Sharon Zukin (1995) *The Cultures of Cities*.

Assessment: Essay (100%, 3000 words) in the WT.**GY311 Half Unit****The Political Economy of Urbanisation****This information is for the 2023/24 session.****Availability:** This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.**Course content:** This course covers theories and processes of contemporary urban development from a critical political economy perspective, addressing urban problems and policy responses in our rapidly urbanizing world. The course examines what urbanisation means to the state, to (global/domestic) businesses, and ordinary citizens, focusing on a selected set of key themes that are pertinent to the understanding of urban injustice. Such themes may include, but not limited to, the understanding of the (social) production of unequal urban space, global circulations of urbanism, gentrification, displacement and dispossession. Case studies are largely drawn from a diverse range of cities across the world, providing opportunities for students to contest urban theories that have largely been rooted in the experiences of the advanced economies.**Teaching:** 9 hours of lectures, 9 hours of seminars and 2 hours of workshops in the AT.

In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce one formative essay outline in the Autumn Term.**Indicative reading:**

Assessment: Coursework (100%, 3000 words) in the AT.

GY313 Half Unit

Firms and Economic Geography: Location, Technology and Innovation

This information is for the 2023/24 session.

Teacher responsible: Elena Renzullo

Availability: This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Sustainable Development with Economics and BSc in Environmental Policy with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have normally taken Economics A (EC100) or Economics B (EC102) or Microeconomics I (EC1A1 or EC1A3 or EC1A5) in combination with Macroeconomics I (EC1B1 or EC1B3 or EC1B5), and one or more of GY209, GY222, EC201, EC202, EC2A1, EC2A3 or EC2A5.

Course content: This course aims to develop theoretical and empirical understanding of spatial economic processes in order to study and evaluate a wide range of issues and policies. Particular emphasis will be put on regional economies, business and worker location decisions, focusing in particular on models of the location of economic and innovation activity with a particular emphasis on regional economies. We will analyse the New Economic Geography theories and the agglomeration of economic activity, with a particular focus on EU integration as a testing ground. We will also look at the global and local knowledge economy, focusing on core aspects of a society based on knowledge and technical progress and how this proceeds hand in hand with the enlargement of markets and the intensification of exchange. We will also explore the seeming contradiction that geographically localized knowledge may be increasingly significant just as so much of our world becomes more globalized.

Topics covered:

1. Core-periphery patterns and New Economic Geography theories
2. Formal tests of New Economic Geography models
3. Geographical clustering of firms
4. Spatial distribution of firms, skills and growth
5. Geographical clustering of innovative activities
6. Externalities: knowledge spillovers, networks and agglomeration
7. Relatedness, path dependency and resilience
8. Location strategies of multinational enterprises
9. The impact of foreign investment

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to prepare for group discussion of the main readings and hand in a short essay for formative assessment.

Indicative reading:

- Assessment:** Coursework (100%, 3000 words) in the WT.

GY314 Half Unit

The Economics of Housing Markets and Migration

This information is for the 2023/24 session.

Teacher responsible: Prof Olmo Silva CKK.4.30

Availability: This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Sustainable Development with Economics and BSc in Environmental Policy with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have normally taken Economics A (EC100) or Economics B (EC102) or Microeconomics I (EC1A1 or EC1A3 or EC1A5) in combination with Macroeconomics I (EC1B1 or EC1B3 or EC1B5), and one or more of GY209, GY210, GY222, EC201, EC202, EC2A1, EC2A3 or EC2A5.

Course content: The main aim of this course is to analyse how decisions made by individuals influence the distribution of economic activities across space. The lectures will focus on how people sort across areas; on how they express their demand and preferences for specific locations and spatial attributes; and on how individual decisions carry important implications for the urban/regional economies and their labour markets. The emphasis will be on quantitative aspects and the lectures will cover both economic theories and related empirical methodology/applications. The course will be split into two interrelated blocks.

One will concentrate on residential markets and study decisions made by individuals in relation to tenure choice and demand for housing space. Some time will be devoted to analysing how these processes affect the neighbourhoods where individuals live in terms of social stratification and externalities. The other part of the course will analyse the dynamics of local labour markets, geographical mobility, national and international migration and their effects on the local economy.

Topics covered:

1. Housing markets: the own vs. rent decision
2. Housing markets: the elasticity of supply and demand of space
3. Housing markets: real estate cycles, price fluctuations and real estate trends after Covid19
4. Housing markets: hedonics to uncover "what people want"
5. Neighbourhood effects: do places matter?
6. The externalities of homeownership and the public policy debates
7. Mobility, migration and the spatial equilibrium framework
8. Local labour markets, spatial mismatch and the Work-From-Home (WFH) 'revolution'
9. The local economic effects of migration: labour markets
10. The local economic effects of migration: innovation and entrepreneurship

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of classes and lectures across the Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to prepare for group discussion of some readings and hand in short essays and/or problem sets.

Indicative reading: Hilber, C. (2005): "Neighborhood Externality Risk and the Homeownership Status of Properties", *Journal of Urban Economics*, 57(2), 213-241.

Card, D. (2005): "Is the New Immigration Really So Bad?", *Economic Journal*, F300-F323.

Hunt, J. and M. Gauthier-Loiselle (2010): "How Much Does Immigration Boost Innovation?" *American Economic Journal: Macroeconomics*, 2, 31-56.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GY315 Half Unit Geographies of Race

This information is for the 2023/24 session.

Teacher responsible: Dr Austin Zeiderman CKK 3.10

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is not available as an outside option nor to General Course students.

Course content: This course will critically analyze the intimate

relationship between race and geography in the modern world. Through a range of historical and contemporary cases, it will examine how interconnected forms of racial and spatial difference are produced, reproduced, and transformed. Focusing on the material and cultural formation of racialized geographies, students will learn to recognize how racially inflected discourses and practices shape the production of space and how geographical location matters to racial classification, identification, and discrimination. The course will be organized around a series of archetypal spaces: for example, the body, the nation, the colony, the city, the home, the prison, the plantation, the border, the school, or the street. In each case, students will examine the confluence of race and space within broader themes, such as colonialism, capitalism, urbanization, globalization, environmentalism, migration, and incarceration. Since race often intersects with other forms of difference, students will also learn to interrogate the influence of gender, class, religion, nationality, and sexuality on the production of space and place. Texts from human geography (particularly Black geographies), critical race theory, colonial and postcolonial studies, history, sociology, and anthropology in addition to other media, such as film, literature, journalism, and photography, will provide students with conceptual resources and methodological tools. The ultimate objective is to advance a comparative, critical analysis of the relationship between geography and race, past and present, and to explore the conditions of future possibility for anti-racism and spatial justice.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of lectures and classes in Autumn Term.

Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce one formative essay outline in the Autumn Term.

Indicative reading: A detailed reading list will be provided at the beginning of the course, including works such as:

- Stuart Hall, "Race, Articulation and Societies Structured in Dominance" (1980);
- Michael Omi and Howard Winant, "Racial Formation" (1986);
- Kimberlé Crenshaw, "Mapping the margins: Intersectionality, identity politics, and violence against women of color" (1991);
- Katherine McKittrick and Clyde Woods, *Black Geographies and the Politics of Place* (2007);
- Paul Gilroy, *There Ain't No Black in the Union Jack: The Cultural Politics of Race and Nation* (1987);
- Edward Said, *Orientalism* (1978); Frantz Fanon, *The Wretched of the Earth* (1961);
- Cedric Robinson, *Black Marxism: The Making of the Black Radical Tradition* (1982);
- Laura Pulido, "Rethinking Environmental Racism: White Privilege and Urban Development in Southern California" (2000);
- bell hooks, "Homeplace: A Site of Resistance" (1991);
- C. L. R. James, *The Black Jacobins: Toussaint L'Ouverture and the San Domingo Revolution* (1938);
- Michelle Alexander, *The New Jim Crow: Mass Incarceration in the Age of Colorblindness* (2010);
- Ruth Wilson Gilmore, *Golden Gulag: Prisons, Surplus, Crisis, and Opposition in Globalizing California* (2007);
- Paul Gilroy, *Black Atlantic: Modernity and Double Consciousness* (1993).

Assessment: Essay (100%, 3000 words) in the WT.

GY316 Half Unit Gender, Space and Power

This information is for the 2023/24 session.

Teacher responsible: Dr Jessie Speer

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environment and

Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Building on geographic approaches, this class will examine a range of spaces and processes through which gender is imagined and produced. These will include 1) empire and race; 2) nation and mobility; 3) city and property; 4) factory and labour; 5) market and consumption; 6) home and reproduction; 7) body and sexuality; 8) media and identity; and 9) nature and ecology. Through each topic, students will engage with feminist theory—as well as a range of contemporary case studies from across the globe—to better understand how power and resistance operate through the geographies of gender.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of classes and lectures across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: The formative coursework will consist of a paper outline and bibliography due mid-term, through which students begin designing their final essays. This assignment will be marked with written feedback attached before the end of WT in order to help students prepare for the essay.

Indicative reading:

- Wright, M. W. (2011). Necropolitics, narcopolitics, and femicide: Gendered violence on the Mexico-US border. *Signs: Journal of Women in Culture and Society*, 36(3), 707-731.

Assessment: Coursework (70%, 2500 words) in the ST.

Group presentation (30%) in the WT.

GY317 Half Unit Geographies of Urban Violence

This information is for the 2023/24 session.

Teacher responsible: Prof Gareth Jones STC 506

Gareth A Jones, Professor of Urban Geography, Department of Geography & Environment

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable

Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the relationships between urban space and different forms of violence. Cities are often depicted as inherently, even naturally, violent spaces such that the urban condition is understood to generate, reproduce and transform violence, while for many people the urban experience is framed by living with possibilities of violence and the effectiveness of security measures. The course will analyze four main claims. First, the case for understanding violences as plural socio-spatial processes that produce urban spaces. Second, the case for urban processes such as planning, infrastructure interventions, and segregation producing violences. Third, the case for understanding how people's everyday lives are framed by violences and policy responses, and how these affect their relations with cities. Fourth, the case for cities as spaces for innovations in violence management and reduction. Students will be introduced to an interdisciplinary range of literatures plus materials from think-tanks, film, and journalism, and if possible, engagement with civil society and policy-makers. The course aims to challenge the dominance of US and European focused research to understandings and policy prescriptions to violences in cities and draw from perspectives relevant to the Global South.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. This course is delivered through a combination of lectures and classes in Lent (Winter) Term. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay in the WT. The formative essay is 1,000 word annotated bibliography on a theme relevant to your summative essay choice. The formative essay should assess a minimum of three texts with a short explanation of why these have been chosen and how they relate to each other. The annotated bibliography should summarise the key argument of each paper, critically consider the empirical or other evidence that supports this argument, address embedded assumptions and potential impacts for policy application if relevant.

Assessment: Essay (100%, 3000 words) in the ST.

GY326 Half Unit Sustainable Business and Finance

This information is for the 2023/24 session.

Teacher responsible: Dr Richard Perkins

Availability: This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This course seeks to explore and critically interrogate the governance of environmental sustainability by corporate and financial actors - commonly framed in terms of corporate social responsibility (CSR) and sustainable and responsible investment (SRI), respectively. Drawing on a range of theoretical ideas, the emphasis of the course is on providing students with an understanding of the motives, practices and outcomes of market actors' growing involvement in sustainability. Topics covered include business ethics, strategic CSR, regulation and self-regulation, ESG (environmental, social and governance) data/ratings, green bonds, and greenwashing.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through weekly 2.5-hour interactive seminars across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce a formative policy brief plan in the Autumn Term.

Indicative reading: Cato, M.S. (2022). *Sustainable Finance: Using the Power of Money to Change the World*. Berlin, Palgrave Macmillan/Springer Cham.

Rasche, A., Morsing, M. and Moon, J. (eds) (2018). *Corporate Social Responsibility: Strategy, Communication*. Cambridge, Cambridge University Press.

Schoenmaker, D. and Schramade, W. (2018). *Principles of Sustainable Finance*. Oxford, Oxford University Press.

Assessment: Assignment (100%) in the AT.

The assignment will be a policy brief (3000 words).

GY327 Half Unit

Global Environmental Governance

This information is for the 2023/24 session.

Teacher responsible: Prof Michael Mason

Availability: This course is compulsory on the BSc in Environment and Sustainable Development with Economics. This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines the issues, actors and processes that shape environmental governance at the transnational and global scales. Introductory lectures on the global environmental policy process introduce different scholarly perspectives informing recent and current research: these approaches are referred to as subsequent lectures address particular actor groups, processes and issues. Students are encouraged to think critically about the ways in which the regulation of global environmental risk is framed and politically negotiated.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live lectures and other supplementary interactive live activities

This course is delivered through a combination of classes and lectures across Winter Term.

Students on this course will have a reading week in Winter Term Week 6.

Formative coursework: Students will be expected to produce a formative essay (1500 words) in the Winter Term.

Indicative reading:

- Betsill, M.M., Hochstetler, K. and Stevis, D. (eds.) (2014) *Advances in International Environmental Politics*, second edition, Basingstoke: Palgrave Macmillan.

- Park, S. and T. Kramarz (2019) *Global Environmental Governance and the Accountability Trap*, Cambridge, MA: MIT Press.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GY328 Half Unit

Political Ecology of Development

This information is for the 2023/24 session.

Teacher responsible: Dr Kasia Paprocki

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course explores the complex relationships between development, poverty and the environment. It covers a range of important natural resource and environmental issues, and provides students with the necessary tools to critically evaluate how these issues have been addressed by different stakeholders and at different levels of governance. Using concepts and analytical tools grounded in political ecology and critical development studies, the course examines several topics, including: the politics of sustainable development; environmental governance and tenure; and critical resource issues.

Teaching: This course involves one lecture period and one class period per week during Autumn Term. The lecturer will provide short "flipped classroom" recorded lecture content at the beginning of the week, and students will participate in discussions and other learning activities during the designated lecture period. Note that these lecture periods will not be recorded, so students will be expected to attend both lectures and weekly classes.

This course takes place in Autumn Term only. It includes a reading week in Week 6.

Formative coursework: Students will be expected to produce one formative essay plan in the Autumn Term.

Indicative reading: Li, T (2007) *The Will to Improve*, Durham: Duke University Press.

Structural Racism, Inequality and Climate Change." In A. Johnson, R. Joseph-Salisbury, & B. Kamunge (Eds.), *The Fire Now: Anti-Racist Scholarship in Times of Explicit Racial Violence* (pp. 99-113). London: Zed Books.

Assessment: Essay (100%, 3000 words) in the AT.

GY329 Half Unit

Applied Economics of Environment and Development

This information is for the 2023/24 session.

Teacher responsible: Prof Charles Palmer

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Applied Environmental Economics (GY222) and/or Intermediate Microeconomics (EC201 or EC202 or EC2A1 or EC2A3 or EC2A5)

Course content: This course explores the complex relationships between economic development, poverty and the environment. It covers a range of important natural resource and environmental issues in developing countries, and provides students with the necessary tools to critically evaluate how these issues have been addressed by different stakeholders and at different levels of governance. Using concepts and analytical tools grounded in applied economics, primarily environmental and development economics, the course will examine a range of topics, including: the poverty-environment trap; property rights and governance; the food-energy-environment nexus; biofuels; and urbanization.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of classes and lectures across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce a 'mock exam' essay during the Winter Term.

Indicative reading: Barbier, E (2005) *Natural Resources and Economic Development*, Cambridge University Press.

Lopez, R., and M. Toman (2006) *Economic Development and Environmental Sustainability*. Columbia University Press.

Assessment: Take-home assessment (100%) in the ST. 3-day Take-Home assessment

GY331 Half Unit

Geographies of Global Migration

This information is for the 2023/24 session.

Teacher responsible: Prof Claire Mercer CKK.3.20

Professor Claire Mercer and Dr Romola Sanyal

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is not available as an outside option nor to General Course students.

Course content:

Section 1: Understanding global migration

Section 2: Migration and development

Section 3: Migration and security

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce one piece of formative work in the Winter Term

Indicative reading: Andersson, R (2014) *Illegality Inc: Clandestine migration and the business of bordering Europe* Berkeley, University of California Press

Knott, K. and S. McLoughlin (eds) (2010) *Diasporas: concepts, intersections, identities*, Zed, London

Mercer, C., B. Page and M Evans (2008) *Development and the African diaspora: place and the politics of home*, Zed, London

Van Naerssen, T., E. Spaan and A. Zoomers (eds) (2011) *Global migration and development*, London, Routledge

Assessment: Exam (75%, duration: 2 hours) in the spring exam period.

Coursework (25%, 750 words) in the WT.

GY350

Dissertation

This information is for the 2023/24 session.

Teacher responsible: Dr Laura Antona

Availability: This course is compulsory on the BA in Geography.

This course is available on the BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is not available as an outside option nor to General Course students.

For students required to, or choosing to, submit an independent research project ('IRP') as part of a Bachelor's degree within the programmes' listed above.

Pre-requisites: GY245, GY246, GY247 or GY248 are a pre-requisite.

Course content: Students plan their own independent research project from start to finish on a geography topic of their choice. Carrying out the project generally includes reviewing the literature in their chosen topic area, formulating a viable and geography-relevant research question, analysing primary or secondary evidence or other material appropriate to the investigation (often a case study, data set, archival source, fieldwork observation, survey results or interviews, but also other material), and drafting the findings from their investigation into a final, polished submission. Students are expected to deal with the many procedural and analytical decisions that arise in independent research themselves, with guidance from Academic Advisers and others.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Autumn Term as well as methods surgeries through AT and WT

This course includes a reading week in Week 6 of Autumn and Week 6 of Winter Term.

Formative coursework: Students are required to produce an extended proposal which they must submit during the AT. They will be expected to report regularly to their Academic Adviser on the progress they are making on their dissertation, at least during regular termly Advisee meetings, if not more frequently. Students may also choose to arrange additional oversight and update arrangements with either their Academic Adviser or PhD Adviser. Students are also required to deliver a presentation on their dissertation project during the WT.

Assessment: Research project (100%) in the ST. Dissertations should not exceed 10,000 words, exclusive of appendices and other supportive material. Appendices may be used for supporting documentation and evidence, but not for discussion and analysis.

HY113

From Empire to Independence: World History in the Twentieth Century

This information is for the 2023/24 session.

Teacher responsible: Dr Tanya Harmer SAR M.11

Availability: This course is available on the BA in Geography, BA in History, BA in Social Anthropology, BSc in Economic History and Geography, BSc in History and Politics, BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History, BSc in Politics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introductory survey of world history in the twentieth century, with a particular emphasis on the collapse of the Western colonial empires, the development of relations between the West and the new states within Asia and Africa, revolutionary developments in Latin America, and the rise of non-Western models of political development. The course includes the state of the European empires in the first half of the century; the Japanese challenge to the West; the Chinese revolution; Indian independence; the decolonization process in Asia and Africa; the Japanese developmental state; the rise of the non-aligned movement; the Cuban Revolution; the development of the Arab and non-Arab Middle East; American and Soviet relations with the Third World; post-independence South Asia; modernization and underdevelopment debates; post-independence Africa; China under Mao and Deng; the Iranian Revolution.

Teaching: 10 hours of lectures and 9 hours of classes in the AT. 9 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: Students will be asked to write at least three essays and to present a number of brief class reports

Indicative reading: W G Beasley, *The Rise of Modern Japan* (1990); A Best, J Hanhimäki, J Maiolo and K Schulze, *International History of the Twentieth Century* (2001); J Darwin, *Britain and Decolonization* (1988); J P Dunbabin, *International Relations since 1945, Vol 1, The Cold War, the Great Powers and their Allies* (1994) Vol 2, *The Post-Imperial Age, The Great Powers and the Wider World* (1994); D Fieldhouse, *Black Africa, 1945-1980* (1986); Goldschmidt, *A Concise History of the Middle East*; R Holland, *European Decolonization, 1918-81* (1985); W Keylor, *The Twentieth Century World* (1984); S Sarkar, *Modern India, 1885-1947* (1983); J Spence, *The Search for Modern China* (1990); M Yapp, *The Near East since the First World War* (1991); Skidmore and Smith, *Modern Latin America* (2005).

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY116

International Politics since 1914: Peace and War

This information is for the 2023/24 session.

Teacher responsible: Prof Nigel Ashton SAR M.07

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations, BSc in International Relations and Chinese,

BSc in International Relations and History, BSc in Politics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course offers an overview of international politics since 1914, providing a factual grounding and surveying the main historiographical debates. Lectures and classes examine the origins, course, and aftermath of the First World War; the Great Depression, appeasement, the origins of the Second World War in East Asia and Europe; the course and aftermath of the Second World War and the global origins of the Cold War; and aspects of the Cold War world, including decolonization, European integration, the Arab-Israeli conflict, the 'American war' in Vietnam, and peaks and troughs of tension between the superpowers. The course also addresses the history of international organizations and of peace movements. It closes with the end of the Cold War and the origins of the Persian Gulf/Iraq wars of 1991 and 2003.

Teaching: 10 hours of lectures and 9 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures in the ST.

Lectures will be held in-person but also recorded and accessible online. There will be a reading week in the Autumn and the Winter terms.

Formative coursework: Students will be required to write three 2,000-word essays during the course of the year, two in the AT and one in the WT, from topics chosen from a past examination paper or designated in the course reading list. Essays do not form part of the final course assessment. However, they are required components of the course.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, will be found in the HY116 Moodle site. The following works offer useful background: students should consider reading one of them in advance:

- A. Best, J. Hanhimäki, J. Maiolo, K. E. Schulze, *International History of the Twentieth Century and Beyond* (2015);
- W R Keylor, *The Twentieth Century World and Beyond: an International History since 1900* (2011).

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY118

Faith, Power and Revolution: Europe and the Wider World, c.1500-c.1800

This information is for the 2023/24 session.

Teacher responsible: Dr Gagandeep Sood SAR 2.07

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: This course provides an introduction to the international history of the early modern period by examining the complex political, religious, military and economic relationships between Europe and the wider world. The period between 1500 and 1800 is a crucial period in international history. In political terms, it covers the rise of major dynastic states, with increasingly centralised institutions and concepts, such as absolutism, to promote the authority of the monarch, as well as the challenges to that authority and growing interest in political and social reform, culminating in the revolutions examined at the end of the course. Internationally, the period witnessed the gradual consolidation of leading European powers, as reflected in the Treaty of Westphalia (1648), with formerly peripheral states emerging to vie with these powers by the early eighteenth century. At the same time, the rise of major Islamic empires in Eurasia and the growing contact between Europe and the wider world give students important

points of comparison between European and non-European states. The intellectual, religious and cultural developments of the period contextualise and rationalise these major political events. The course discusses the influence of key movements, such as the Renaissance, the Scientific Revolution and the Enlightenment, which re-ignited an interest in the Classical past and fostered a culture of systemic enquiry into the natural world. Yet religion remained a vital component in the world-view of contemporaries, whether Christian, Muslim, or Jewish. This world-view was subject to challenges throughout the period, as during the Reformation, and often sought to impose its own orthodoxy, whether through religiously-motivated conflicts or the persecution / conversion of certain groups. The course seeks to familiarise students with some of the most significant issues and current debates on these aspects of the period. While its scope is necessarily broad in nature, the course will help students to deal with the dynamics of continuity and change over a long stretch of time.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: One essay in the Autumn Term. Two essays in the Winter Term. There may also be a mock exam.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

in debates about the best way to approach the past since the earliest institutionalisation of the discipline in nineteenth-century universities, and even before. But the idea that there might be different, equally valid historical methods is relatively new. Some of the newer methods are often referred to as 'turns', such as the linguistic turn, or the postmodern turn, and their emergence is often accompanied by controversies within the discipline. It is worth noting that the emergence of a new approach does not signify that previously existing approaches become invalid. Rather, the course introduces students to a toolkit of approaches which equips future historians to develop independent approaches to their work.

The year begins with a critical discussion of the two institutions at the core of History: universities and archives. Students examine the power relations they sustain and the possibilities for change in the twenty-first century. Next students consider different case studies which shed light on scalar and spatial approaches to history, examining global, international and transnational history. In the second term, the course explores approaches to identity, culture, and society, including the history of commodities, sport and clothing. Finally students explore non-textual sources. As students encounter these different methodologies and sources, they maintain a critical approach to the work historians do and the archives they use for their research. While exploring these themes, the course also introduces students to key skills required of a historian: navigating a reading list; taking notes; composing reading summaries; identifying & using historiography; approaching essay questions; developing an argument; structuring essays; footnoting and evidence; avoiding plagiarism; and critically engaging with archival materials.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in the week 6 of the Autumn and the Winter Terms.

Formative coursework: Students will be expected to produce 2 essays and 5 short pieces of group coursework across the AT and the WT.

Regular Moodle posts are a component of the coursework for this course.

Assessment: Exam (60%, duration: 2 hours) in the spring exam period.
Essay (40%, 2000 words) in the WT.

HY200

The Rights of Man: the History of Human Rights Discourse from the Antigone to Amnesty International

This information is for the 2023/24 session.

Teacher responsible: Dr Tim Hochstrasser SAR 2.14

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Human Rights are often assumed to have a precise twentieth-century origin in the 1948 Universal Declaration or in the succeeding decades of increasing activism. However, the history of human rights discourse and its practical impact emerged as only the latest stage of a sequence of intellectual debates and real-life struggles in specific historical settings over political, religious, economic rights, broadly defined. Different cultural milieus have produced a variety of contexts for working out tensions between claims by individuals or minorities for autonomy on the one hand and the rival demands of collective obligation and identity on the other.

This course will seek to explore an (inevitably selective) range of these historical contexts in order to demonstrate the continuity of perennial themes of conflict between the claims of individual actors and corporate institutions, whether states, churches, empires or other institutions, while also showing how and when key changes take place in the recognition of rights of political action, conscience, property ownership, gender identity and workers' rights etc. The growth of toleration and free speech, the abolition of slavery and torture, and the role of Declarations of Rights will all be examined, but less familiar subjects will also find their place. The contribution of the conceptual legacy and historical inspiration of Greece and Rome will be recognised as will the crucial role of the political thought of the High Middle Ages, and at the other end of the course specific connection will be made to the recent development of human rights organisations.

In each session a contrasted selection of contemporary writings

will be studied to recover the intellectual framework of the discussion and the role of the dispositive political, social, and economic circumstances of the debate will also be considered.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in week 6 of the AT and the WT. Students will be expected to read essential primary and secondary material for each weekly meeting, to participate fully in class discussions and offer an assessed presentation. Both presentations and participation will form part of summative assessment.

Formative coursework: There will be two essays of 2,000 words to be submitted in the Autumn and the Winter Terms.

Indicative reading: Michael Barnett, *Empire of Humanity: A History of Humanitarianism* (Ithaca, 2011)

Assessment: Exam (70%, duration: 3 hours) in the spring exam period.

Class participation (15%) and presentation (15%) in the AT and WT. Students MUST give a summative presentation in either the AT or the WT.

HY206

The International History of the Cold War, 1945-1989

This information is for the 2023/24 session.

Teacher responsible: Dr Aaron Clift

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The Cold War dominated the second half of the 20th century, but until recently we had only an imperfect sense of what it was all about. Historians wrote about it, of necessity, from within the event they were seeking to describe, so that there was no way to know its outcome. And because only a few Western countries had begun to open their archives, these accounts could only reflect one side of the story. Cold War history, hence, was not normal history: It was both asymmetrical and incomplete. The end of the Cold War and the subsequent partial opening of Soviet, Eastern European, and Chinese archives have revolutionised the field. Everything we thought we knew is up for reconsideration, whether because of the new documents available to us, or as a consequence of being able to reflect on how it all came out in new ways - given that the historical discipline has evolved methodologically as well.

The course will provide an introduction to key topics in the new, international history of the Cold War. The selected topics vary from the study of specific Cold War crises to the exploration of broader themes such as the roles of ideology and technology.

Course objectives: (i) To equip students with comprehensive knowledge of the international politics of the Cold War; (ii) To offer a firm basis for more advanced historical work in this area; (iii) To provide some of the factual grounding and conceptual apparatus necessary to understand the contemporary world.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

Students are expected to keep up with readings for weekly meetings, and to participate in the class discussions.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: Barrass, G, *The Great Cold War* (2009); Gaddis, J L, *The Cold War: A New History*; Hanhimäki, J & Westad, O A, *The Cold War: A History in Documents and Eyewitness Accounts*; Leffler, M P, *For the Soul of Mankind* (2007); Leffler, M P & Painter, D, *Origins of the Cold War* (2005); Reynolds, D, *One World Divisible: A Global History since 1945* (2001); Sarotte, M, 1989 (2009); Westad, O A, *Reviewing the Cold War: Approaches, Interpretations, Theory* (2000); Westad, O A, *The Global Cold War* (2005);

Assessment: Essay (35%, 3500 words) in the WT.

Essay (35%, 3500 words) in the ST.

Presentation (15%) and class participation (15%) in the AT and WT.

HY221

The History of Russia, 1676-1825

This information is for the 2023/24 session.

Teacher responsible: Dr Paul Keenan SAR 2.13

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years, General Course students and as an

outside option where regulations, timetabling constraints and teaching capacity permit.

Course content: The course provides an introduction to the history of the Russian empire during the 'long eighteenth century'; that is, from the accession of Peter I (the Great) in 1682 to the death of Alexander I in 1825. This period is commonly considered to be transformational in terms of Russia's development, both domestically and internationally. Successive Russian rulers throughout this period attempted to overcome the traditional weaknesses of the Russian state (with varying degrees of success) in what some historians have described as a process of 'modernisation'. Yet the narrative of autocratic rule and centralising reforms masks a complicated series of relationships and negotiations at work between the ruler, the apparatus of the Russian state, and the various groups within Russian society. This was complicated further still as the Russian empire annexed neighbouring territories, with their own institutions and traditions, including Ukraine, Siberia, Poland, and Finland. This ambitious and aggressive imperial expansion helped to establish Russia as one of Europe's 'Great Powers' by the end of this period, playing a key role in the defeat of Napoleon Bonaparte and establishing the post-war settlement in Europe after 1815, but this was achieved at a very significant cost. The Decembrist Revolt, which followed Alexander I's death in 1825, arose from critical questions amongst a disaffected imperial elite about the nature and direction of Russia's development over the preceding century, thereby providing a useful conclusion for the course.

The course is organised in a broadly chronological fashion but there are several themes that are addressed throughout the period. These themes include: the nature and extent of autocratic rule in Russia; the role and influence of the Orthodox Church; the relationship between the ruler, the elite and the other major social groups in Russia; the significance of serfdom for Russia's economic, institutional and legal development; the aims and outcomes of major reforms under successive Russian rulers; the impact and influence of European ideas (such as the Enlightenment) in Russia; the multi-ethnic nature of the Russian empire; resistance and accommodation in the Russian imperial contact; the relationship between Russia and other European/international powers.

Teaching: 10 hours of lectures and 10 hours of classes in the Autumn Term. 10 hours of lectures and 10 hours of classes in the Winter Term. 1 hour of lectures in the Spring Term.

There will be a reading week in the Autumn and the Winter terms.

Formative coursework: Students will be required to write three essays, one of which will be done under examination conditions.

Indicative reading: A full reading list will be provided at the start of the course. Useful introductory works include: E. Kimerling-Wirschafter, *Russia's Age of Serfdom*; N. S. Kollman, *The Russian Empire, 1450-1801*; J. Hartley, *A Social History of the Russian Empire 1650-1825*; S. Dixon, *The Modernization of Russia: 1676-1825*; M. Raeff, *Understanding Imperial Russia: State and Society in the Old Regime*; J. Billington, *The Icon and the Axe: An Interpretive History of Russian Culture*; A. Kahan, *The Plow, the Hammer and the Knout: An Economic History of 18th-Century Russia*; P. Dukes, *The Making of Russian Absolutism, 1613-1801*; D. Saunders, *Russia in the Age of Reaction and Reform, 1801-1881*.

Assessment: Exam (65%, duration: 2 hours) in the spring exam period.

Presentation (20%) and class participation (15%) in the AT and WT.

HY226

The Great War 1914-1918

This information is for the 2023/24 session.

Teacher responsible: Dr Alex Mayhew

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This

course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years where regulations permit.

Course content: Historian Jörn Leonhard has described the First World War as the 'elemental crisis' of the twentieth century. On this module, we will trace the crises that precipitated the conflict, underpinned its events, and spiralled in its aftermath. Significantly, scholars now agree that the war can only truly be understood by adopting a global (and comparative) lens. This is, therefore, going to be a global (and comparative) history of the conflict; one that analyses its military, diplomatic, political, economic, social, and cultural features. Amongst other things, we will investigate the origins and outbreak of the war; the military campaigning on the European and extra-European fronts; the war at sea and in the air; the intervention of neutral powers; the belligerents' home fronts; the war's economic and social effects; the experience of combat; the road to the Armistice; the global pandemic of 1918-19; and the struggles of peace making. Fundamentally, though, this is a course about how individuals and social groups made sense of the Great War as it raged and after it ended.

Teaching: 10 x 1-hour lectures and 10 x 1-hour classes in the Autumn Term; 10 x 1-hour lectures and 10 x 1-hour classes in the Winter Term; 1 x 1-hour revision lecture in the Spring Term. There will be a reading week in the Autumn and the Winter terms.

Formative coursework: Students will be required to write three essays of 2500 words: two in the AT and one in the WT, and a mock examination in the ST.

Indicative reading: Holger Afflerbach, *On a Knife Edge: How Germany Lost the First World War* (Cambridge: Cambridge University Press, 2022); Christopher Clark, *The Sleepwalkers: How Europe Went to War in 1914* (London: Penguin, 2013); Robert Gerwath and Erez Manela (eds.), *Empires at War, 1911-1923* (Oxford: Oxford University Press, 2015); Robert Gerwath and John Horne, *War in Peace: Paramilitary Violence in Europe after the Great War* (Oxford: Oxford University Press, 2013); Susan Grayzel and Tammy Proctor, *Gender and the Great War* (Oxford: Oxford University Press, 2017); Alan Kramer, *Dynamic of Destruction, Culture and Mass Killing in the First World War* (Oxford: Oxford University Press, 2007); Anna Maguire, *Contact Zones of the First World War: Cultural Encounters across the British Empire* (Cambridge: Cambridge University Press, 2021); David Stevenson, *1914-1918: The History of the First World War* (London: Penguin, 2004); Hew Strachan (ed.), *The Oxford Illustrated History of the First World War* (Oxford: Oxford University Press, 1998); Alexander Watson, *Ring of Steel: Germany and Austria-Hungary in World War I* (London: Penguin, 2014); Jay Winter (ed.), *The Cambridge History of the First World War*, 3 vols. (Cambridge: Cambridge University Press, 2014).

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY235

Modernity and the State in East Asia: China, Japan and Korea since 1840

This information is for the 2023/24 session.

Teacher responsible: Professor Antony Best, SAR 3.14

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years where regulations permit.

Course content: The course is concerned with providing a comparative political history of the major East Asian countries, China, Japan and Korea, in the period from the Opium War to the

1990s. The course is concerned with providing a comparative political history of the major East Asian countries, China, Japan and Korea, in the period from the Opium War to the 1990s. It begins by looking at the impact of the arrival of Western imperialism in the mid-nineteenth century and the respective approaches taken by Japan, Korea and China in response to this encroachment. For Japan, it covers the rise of the Meiji state, the beginnings of constitutional government and the development of Japanese imperialism. This naturally is linked with the study of Korea's failed efforts to maintain its independence; in regard to China it deals with the attempts by the Qing state to introduce reforms and the final collapse of Imperial China. It then deals with the difficulties provoked by modernization and nationalism in the first-half of the twentieth century, taking in the rise and fall of Taisho democracy and the drift towards fascism in Japan and the Guomindang's revolution and state-building and the birth of the Chinese Communist Party in China. The course then concentrates on the aftermath of the Second World War for East Asia, studying the Chinese Civil War and the emergence of the People's Republic, the course and legacy of the US occupation of Japan and the formation of the two Koreas. The last part of the course covers the development of the People's Republic under Mao and Deng, the rise of Japan as an economic superpower and the emergence of South Korea and Taiwan as economic powers.

Teaching: 10 hours of lectures and 9 hours of classes in the AT. 9 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: Students will be required to submit three 2000 word essays in all and to sit a mock exam.

Indicative reading: A detailed reading list will be issued at the start of the course, but the following survey texts are essential: W G Beasley, *The Rise of Modern Japan*; P Duus (Ed), *The Cambridge History of Japan: The Twentieth Century*; L Eastman (Ed), *The Nationalist Era in China, 1927-1949*; J L McLain, *Japan: A Modern History*; R MacFarquhar (Ed), *The Politics of China, 1949-1989*; A Buzo, *The Making of Modern Korea*; J Spence, *The Search for Modern China*.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY239

People, Power and Protest in Latin America, c.1895 to the present day

This information is for the 2023/24 session.

Teacher responsible: Dr Tanya Harmer SAR M.11

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: HY239 is designed to provide students with an introduction to the history of Latin America from the late nineteenth century to the present day. Its focus is predominantly on Latin Americans and what happened within the region. However, the course will also explore Latin Americans' interaction with the wider world, including their pivotal and expanding relationship with the United States during the twentieth century. Major themes covered on the course include identity, citizenship and nationalism; neo-colonialism and anti-imperialism; state-building and concepts of "development"; revolution and resistance; dictatorship and violence; democratization and the struggle for social justice. Among more specific topics covered in lectures and seminars are Cuba's War of Independence; the Mexican Revolution; migration and workers' movements; the Guatemalan Revolution and the US-sponsored 1954 coup against Jacobo Arbenz's government; the Cuban Revolution; the Catholic Church and Liberation Theology;

Allende's Chile and the 1973 Chilean coup; military dictatorship and anticommunism in the Southern Cone; solidarity networks and Human Rights; Central American revolutionary movements and conflict; democratization and peace; transitional justice and memory wars; the rise and fall of Latin America's Pink Tide; neoliberalism; and the struggle for indigenous and LGBTQ+ rights. In addressing these themes and topics, we will be paying particular attention to histories of race, class and gender with students encouraged to consider how different Latin Americans experienced and influenced the course of history in the region.

Teaching: 4 hours of lectures and 16 hours of classes in the Autumn Term. 4 hours of lectures and 16 hours of classes in the Winter Term. 1 hour lecture in the Spring Term.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: Students will be required to do two presentations, to write one 2,000-word essay and one 1,000-1,500-word book review, and to contribute to weekly Moodle discussion forums. These assignments will not form part of the final assessment but they are a required component of the course, and students must complete them in order to be admitted to the course examination.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, will be provided at the first lecture and will also be available on Moodle and in the departmental public folders. However, the following works are useful introductions for the course:

- Appelbaum, Macpherson and Roseblatt (eds), *Race and Nation in Modern Latin America*;
 - Brown, *From Frontiers to Football: An Alternative History of Latin America since 1800*;
 - Burgos-Debray, (ed.), *I, Rigoberta Menchú: An Indian Woman in Guatemala*;
 - Chase, *Revolution within the Revolution: Women and Gender Politics in Cuba, 1952-1962*;
 - Dinges, *The Condor Years: How Pinochet and His Allies Brought Terrorism to Three Continents*;
 - Drinot (ed), *Che's Travels: The Making of a Revolutionary in 1950s Latin America*;
 - Gibbins, *Our Time is Now: Race in Postcolonial Guatemala*
 - Lasso, *Erased: The Lost Towns of the Panama Canal: A Forgotten Story of Tropical Modernity*
 - Meade, *A History of Modern Latin America: 1800 to the Present*
 - Moya, *The Oxford Handbook of Latin American History*;
 - Pensando, *Rebel Mexico: Student Unrest and Authoritarian Political Culture in the Long Sixties*
 - Putnam, *The Company They Kept: Migrants and Politics of Gender in Caribbean Costa Rica, 1870-1960*
 - Riofrancos, *Resource Radicals: From Petro-Nationalism to post-Extractivism in Ecuador (2020)*
 - Skidmore and Smith, *Modern Latin America*;
 - Williamson, *The Penguin History of Latin America*
- Assessment:** Essay (25%, 3000 words) in the WT.
Take-home assessment (75%) in the ST.

HY240

From Empire to Commonwealth: war, race and imperialism in British History, 1780 to the present day

This information is for the 2023/24 session.

Teacher responsible: Dr Rishika Yadav

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in Economic History and Geography, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The study of Empire has always been political.

But with support for Brexit partly explained by pundits as imperial nostalgia, and the sweeping rise of the global Black Lives Matter movement, the imperative and importance of studying the British Empire and its legacy has gone stratospheric. This course will bring you back down to earth. It offers a unique and scholarly history of the complexity of the British Empire through its origins, rise, fall and legacy. No subject is off limit. Its primary focus is on understanding the experience of and the reasons for these processes including controversies and catastrophes. It includes histories of black women and men in Britain and the experience of what it was like being from the Empire and living in Britain. Many of the case studies are Africa focused. It is based on the premise that to understand the significant impact of Britain's empire and imperial experience you need to know your C19th. Within the context of Britain's wider political, social and cultural history, the course will examine from the late 1700s the following: the origins of the second empire; explorers; liberalism and racism; the expansion of colonies of white settlement; the role of missionaries; the scramble for Africa; the Victorians and popular imperialism; the contribution of empire to the First and Second World Wars; fast exit strategies; violent decolonisation; race and immigration; post-colonial dictators and the legacy of white settlers. Case studies include Britain and Zimbabwe; Idi Amin and Uganda; the Mau Mau insurgency in Kenya; plus British rule in Somaliland and the fallout of the Somali civil war. The thread of racism, the imperialism of industrial capitalism and the role of key individuals are recurring themes. This was an empire that I believe was uniquely polyphonic, ideological and Victorian, pushed along from above and pulled down from below.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures in the ST.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: Students will be expected to produce 2 essays in the AT and WT.

A mock exam may also be offered.

Indicative reading: C19th: Padraic Scanlan, *Slave Empire: How Slavery Made Modern Britain (2020)*; Benjamin Bowser and Aime Charles-Nicholas, *The Psychological Legacy of Slavery: Essays in Trauma, Healing and the Living Past (2021)* esp chs 7 & 8; Hazel V Carby, *Imperial Intimacies: A Tale of Two Islands (Verso 2019)*; David Olusoga, *Black and British: A forgotten History (2016)*; John Darwin, *The British Empire Project: The Rise and Fall of the British World System, 1830-1970 (2010)*; Ronald Hyam, *Understanding the British Empire (2010)*; John Newsinger, *The blood never dried: A people's history of the British Empire (Bookmark Publications 2006)*; Bill Schwarz, *The White Man's World: Memories of Empire (2012)*; Shashi Tharoor, *Inglorious Empire: What the British Did to India (Penguin, 2018)*; P D Morgan; S Hawkins (ed) *The Black Experience and the Empire (OUP, 2004)*; Ashley Jackson & David Tomkins, *Illustrating Empire: A Visual History of British Imperialism (2011)*; James Belich, *The Settler Revolution and the Rise of the Anglo-world (OUP, 2011)*; Christian Høgsbjerg, Robert Hughes, *Fatal Shore: History of the Transportation of Convicts to Australia, 1787-1868 (Vintage Books, 2003)*; Gareth Atkins, Shinjini Das & Brian Murray, *The Bible, Race and Empire in the Long C19th (2020)*; Berny Sèbe, Bertrand Taithe, Peter Yeandle Max Jones (eds) *Decolonising Imperial Heroes (2018)*; Mary Kingsley, *Travels in West Africa (National Geographic adventure classics, 2002 edn)* J G Farrell, *The Siege of Krishapur 1857 (Phoenix Paperback, 2002 edn)*

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY241

What is History? Methods and Debates

This information is for the 2023/24 session.

Teacher responsible: Dr Tim Hochstrasser SAR 2.14

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

General Course students must seek prior permission from the teacher responsible to take this course. Permission will only be given for students with previous study experience in History.

Course content: What is history? How and for what purposes do we study the past? What kinds of debates and controversies result from historical study? The purpose of this course is to provide undergraduate students with an introduction to these important issues. We will discuss the history of history from ancient times to the present and how it has changed as an intellectual pursuit over the years. We will think about different types of history – for example, international history, intellectual history, social history, economic history, cultural history or the history of religion – and we will discern their different concerns and priorities. We will analyse some of the most important themes in modern historical study: empires and colonialism, war and conflict, nationalism. We will outline different ideological frameworks for conducting historical research, for example Marxism, postmodernism, and gender studies. We will debate some of the key philosophical questions surrounding historical research: for example, how historians determine facts, and whether or not historical study can ever be truly objective? Finally, we will look at different ways of presenting the past, from traditional history books to museums and TV history.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 1 hour of seminars in the ST.

The first hour in each of the seminar sessions will be delivered as a lecture.

There will be a reading week in the Autumn and the Winter terms.

Formative coursework: Students will be expected to produce one formative essay in the AT and one formative essay in the WT (2000 words).

Indicative reading: A full reading list will be provided at the start of the course but will include the following introductory surveys: Berger, Feldner and Passmore, *Writing History*; D Cannadine (Ed), *What is History now?*; L Jordanova, *History in Practice*; R Evans, *In Defence of History*; J Tosh, *The Pursuit of the Past*; M Bloch, *The Historian's Craft*; R G Collingwood, *The Idea of History*; T. Garton Ash, *The File*.

Assessment: Exam (70%, duration: 3 hours) in the spring exam period.

Class participation (15%) and presentation (15%) in the AT and WT. Students MUST give a summative presentation in either the AT or the WT.

The class participation will be graded and averaged across the AT and the WT.

HY242

The Soviet Union: Domestic, International and Intellectual History

This information is for the 2023/24 session.

Teacher responsible: Prof Vladislav Zubok SAR 3.13

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will cover the history of the Soviet Union, from its inception as a combination of the Russian Revolution and a Bolshevik dictatorship, through the Stalinist terror and World War II, its role as an international centre of the 'socialist camp' during the Cold War, to the fumbling search for "socialism with a human face" that ended in the epic failure of Gorbachev's reforms and the sudden demise of the Soviet system and state. Rather than dealing separately with power politics, social history, wars, international relations, and intellectual/cultural developments, this course connects these threads into one narrative by focusing on major issues that delineate the place of the Soviet Union in modern history. The course takes advantage of the extraordinary wealth of new sources and interpretations produced by last decades of scholarship. Putin's war in Ukraine brought some of them into focus and challenged the others. The following questions will be examined during this course. Was the Soviet Union a continuation or rejection of its Russian imperial heritage? What were the sources of Soviet mode of modernization and expansionism? Why did "the Great Patriotic War" against the Nazis become a centerpiece of Soviet identity? How did the outside world affect Soviet domestic evolution? Why it was so hard for the Soviet state and society to overcome Stalinist legacy? The course provides an essential background for understanding of Russia's imperialism, militancy, and illiberalism today.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: Students will be required to write two 2,000-word essays (one in the AT and one in the WT) and make two class presentations (one in the AT and one in the WT).

Indicative reading: Vladislav Zubok, *A Failed Empire. The Soviet Union in the Cold War from Stalin to Gorbachev* (2007); Vladislav Zubok, *Zhivago's Children: The Last Russian Intelligentsia* (2009); Martin Malia, *The Soviet Tragedy. period.

HY243 Not available in 2023/24

Islamic Empires, 1400 - 1800

This information is for the 2023/24 session.

Teacher responsible: Dr Gagandeep S. Sood. SAR 2.07

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in Economic History and Geography, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Following the great upheavals wrought by the Mongols in the thirteenth and fourteenth centuries, there emerged the Ottomans, Safavids and Mughals in the Near East, Iran and India. The 'Islamic' empires they founded would go on to rank among the wealthiest and most powerful regimes of the early modern world. Supported by an array of provincial and local elites, they were at the zenith of their power in the sixteenth and seventeenth centuries, spanning a region that extended from the Mediterranean to the Bay of Bengal, from the Yemen to the Crimea. Their populations were producers, consumers, importers and exporters of goods crucial for global trade; their location accorded them a vital role in the flow of ideas and information; there was a remarkable flowering of the arts in the period; and conversion to the region's dominant religion, Islam, continued apace, breaching new frontiers. By the eighteenth century, however, the empires had been reduced to a shadow of their former selves, with power monopolised by a kaleidoscope of smaller regimes vying with each other for supremacy. This struggle paved the way for the region's later subordination to Europe's global empires, and the emergence of today's Middle East and South Asia.

This course will examine the Ottoman, Safavid and Mughal regimes, and the larger world to which they belonged, from their formation in the fifteenth and early sixteenth centuries to the 'unscripted possibilities' of the eighteenth century. We will study the ways in which temporal power was institutionalised; the patterns of daily life in urban and rural settings, as well as on the frontier; Islam in theory and in practice, and its relationship to the region's other major religious traditions; diplomacy within and without the region; the prevailing techniques and technologies of warfare; inherited and collective knowledge of other lands, near and far; the everyday movement of people, goods and news; the signal achievements in the literary, visual and architectural realms; material changes to the region's societies and economies; early modern millenarianism, fundamentalism and reformism; the eighteenth-century demise of the Islamic empires; and the concomitant rise of successor regimes which shaped the later paths to modernity taken within the region.

Teaching: 10 hours of lectures and 9 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 2 hours of classes in the ST.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: Students are expected to submit two 2000-word essays (one in the AT, one in the WT), give an oral presentation in class, and take a 1-hour mock exam in the ST.

Indicative reading: Christopher A. Bayly, *The Birth of the Modern World, 1780-1914: Global Connections and Comparisons* (2004) Stephen F. Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY245

The United States and the World since 1776

This information is for the 2023/24 session.

Teacher responsible: Dr Elizabeth Ingleson SAR 2.06

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This course explores how the United States has engaged with the world since 1776. After gaining independence from Britain, the United States looked westward, expanding its territory through indigenous dispossession and a pursuit of hemispheric dominance. By the end of the nineteenth century, the United States held overseas colonies. Soon thereafter, it became involved in one, and then a second, world war followed shortly by the Cold War and more recently the "forever wars." Together we will think broadly about who has been involved in shaping U.S. foreign relations with the world. We will explore decisions made by diplomats and policymakers in Washington as well as the voices of a wide range of people who influenced and resisted U.S. power including missionaries, American Indians, businesspeople, women, workers, and immigrants. Over the course of the semester we ask three key questions: what is the U.S. empire and how did it develop and change over time? How has capitalism shaped and been shaped by U.S. engagement with the world? And how has the history of U.S. relations with American Indians influenced the development and projection of U.S. power?

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: One essay in the Autumn Term and one essay in the Winter Term.

An exam preparation workshop is offered as part of exam revision arrangements.

Indicative reading:

1. Walter LeFever, *The American Age: United States Foreign Policy at Home and Abroad, 1750 to the Present* (1994)
2. Jane Burbank and Fredrick Cooper, *Empires in World History: Power and the Politics of Difference* (2010)
3. Brian DeLay, *War of A Thousand Deserts: Indian Raids and the U.S.-Mexican War* (2008)
4. Emily Rosenberg, *Financial Missionaries to the World: The Politics and Culture of Dollar Diplomacy* (2003)
5. Kristen Hoganson, *American Empire at the Turn of the Twentieth Century: A Brief History with Documents* (2016)
6. Erez Manela, *The Wilsonian Moment: Self-Determination and the International Origins of Anticolonial Nationalism* (2007).
7. Elizabeth Borgwardt, *A New Deal for the World: America's Vision for Human Rights* (2005)
8. Mae Ngai, *Impossible Subjects: Illegal Aliens and the Making of Modern America* (2014)

9. Mary Dudziak, *Cold War Civil Rights* (2000)
 10. Greg Grandin, *Empire's Workshop: Latin America, The United States and the Rise of the New Imperialism* (2007)
Assessment: Essay (35%, 3000 words) in the WT.
 Take-home assessment (50%) in the ST.
 Class participation (15%) in the AT and WT.

HY246

The Global Caribbean: Colonialism, Race and Revolutions 1780s-1980s

This information is for the 2023/24 session.

Teacher responsible: Dr Timo McGregor

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: The Caribbean, while geographically small, has played a major role in global history. Over the course of five-hundred-years the Caribbean has been at the centre of clashes and encounters between indigenous peoples, Europeans, Africans, and Asians all of which has led to momentous political, social, economic and cultural change. Far from simply being a tropical tourist paradise or tax haven, the Caribbean is widely recognised as a key site of modernity through the role the region has played in global historical processes of exploration, colonialism, transatlantic slavery, capitalism, revolution, wars, migrations and diasporas. Critical movements have emerged from the Caribbean ranging from pan-Africanism, Garveyism, Rastafarianism, and multiculturalism all of which impacted Africa, Asia, the United States, Europe and Latin America. The Caribbean has spawned foundational writers, artists, and intellectuals like José Martí, C L R James, Una Marson, Eric Williams, Nicolás Guillén, Sam Selvon, Jean Price-Mars, Aimé Césaire, Frantz Fanon, Fidel Castro, Claudia Jones, Walter Rodney, Bob Marley, Jamaica Kincaid, to name just a few who have provided critical commentary on the region and its links to the wider world.

This course presents an overview of Caribbean political, social and cultural history from the height of transatlantic slavery to the late twentieth century. It especially focuses on the three central themes of American and European colonialism, race and revolution and takes an expansive view of the Anglophone, Francophone, and Hispanic Caribbean. Wherever possible, comparisons and contrasts with Europe, the United States and Latin America are drawn upon. Weekly topics that will be explored in lectures and classes include: European Colonial Encounters; transatlantic slavery and the making of 'race'; the structure of slave societies: plantations and Maroons; the Haitian Revolution; abolition, apprenticeship and emancipation in the British and French Caribbean; Asian Indentureship and the continuation of slavery in the Hispanic Caribbean; Independence, Wars, and the rise of US imperialism in the Hispanic Caribbean; inter-regional labour migrations and radicalism; the First World War; extra-regional labour migrations, Black Internationalism and Negritude; the US Occupation of the Dominican Republic and Haiti; economic Depression and Labour Rebellions; the Second World War and Departmentalisation; the Cold War; the Cuban Revolution and Caribbean Federation; Decolonization; the Black Power Movement; neo-colonialism, tourism, violence, and the politics of reparations.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: Students will be expected to produce one source analysis in the AT.

Indicative reading:

- Bolland, O Nigel, *On the March: Labour Rebellions in the British*

Caribbean, 1934-39 (Kingston: Ian Randle, 1995).

- Childers, Kristen Stromberg, *Seeking Imperialism's Embrace: national identity, decolonization and assimilation in the French Caribbean* (New York: Oxford University Press, 2016).

Assessment: Essay (35%, 3500 words) in the WT.

Essay (35%, 3500 words) in the ST.

Class participation (15%) in the AT and WT.

Source analysis (15%) in the AT.

HY247 Not available in 2023/24

The History of Modern Turkey, 1789 to the Present

This information is for the 2023/24 session.

Teacher responsible: Prof Marc Baer SAR 3.17

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: The history of modern Turkey provides the student an important opportunity to examine a crucial nation bridging Europe and the Middle East, through the lenses of democracy and dictatorship, globalisation and nationalism, revolution and reform, and tolerance and genocide. This course explores late Ottoman and Turkish Republican history from 1789 to the present. The following topics may be studied: Global change and the Ottoman 'New Order', 1789-1807; the reforms of Mahmut II and the Tanzimat; reform and repression in the Hamidian era, 1876-1908; Salonica as window onto Ottoman transformations; the revolution of 1908; the Committee of Union and Progress and the Balkan Wars, 1908-1913; Talat Pasha, World War I, and the Armenian genocide; the collapse of the empire; Greco-Turkish wars, 1918-1922; Mustafa Kemal and the new Republic, 1923; the revolutionary changes wrought by Kemalism, 1923-1945; Turkey and World War II; transition to democracy, 1945-1950; democratising reforms, 1950-1960; the three coups of 1961, 1970, and 1980; political Islam in Turkey since the 1970s; the Turkish diaspora in Germany; the Kurdish issue since the 1980s; opening up to the world, 1983-1991; and Recep Tayyip Erdogan: new Atatürk, new caliph.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

There will be a reading week in the Michaelmas and the Lent Terms.

Note that lectures are pre-recorded and available to the students

online.

Formative coursework: Students are required to submit one essay of 2000 words in the Michaelmas Term.

Indicative reading: A full reading list will be provided at the start of the course. Most of the selected readings are written by scholars from Turkey. The textbook is Erik J. Zürcher, *Turkey, A Modern History*, 4th ed. Other readings will include Nilufer Göle, *The Forbidden Modern: Civilization and Veiling*; Kemal Karpat, *The Politicisation of Islam*; Müge Göçek, *Denial of Violence*; Mark Mazower, *Salonica: City of Ghosts*; Yalçın Çetinkaya, *The Young Turks and the Boycott Movement*; Taner Akçam, *A Shameful Act*; Sükrü Hanioglu, *Atatürk: An Intellectual Biography*; Esra Özyürek, *Nostalgia for the Modern*; Fethiye Çetin, *My Grandmother: An Armenian-Turkish Memoir*; Begüm Adalet, *Hotels and Highways: The Construction of Modernization Theory in Cold War Turkey*; Gökçe Yurdakul, *The Headscarf Debates*; and a graphic novel, *Jenny White and Ergün Gündüz, Turkish Kaleidoscope: Fractured Lives in a Time of Violence*.

Assessment: Essay (50%, 3000 words) in the WT. Essay (50%, 3000 words) in the ST.

HY300

Dissertation

This information is for the 2023/24 session.

Teacher responsible: Prof Nigel Ashton SAR M.07

Availability: This course is compulsory on the BA in History. This course is available on the BSc in History and Politics, BSc in International Relations and History and BSc in Politics and History. This course is not available as an outside option nor to General Course students.

Course content: A dissertation of not more than 10,000 words on a topic to be approved by the candidate's supervisor. It is designed to allow a detailed and thorough exploration of a topic of interest to the candidate. The topic should fall within the parameters of the degree course. It should include the examination of primary sources, in printed, manuscript and/or digital form.

Teaching: Workshops: 2 for second-year students in the Winter Term; 1 for third-year students in the Autumn Term.

Candidates should secure in the course of the WT of their second year the agreement of a member of academic staff in the Department of International History (who need not be their advisor or tutor) to supervise a suitable topic, and then submit a title to the Undergraduate Programmes Administrator by published deadline. Supervisors can be expected to offer advice on the scholarly literature, guidance on research and writing, and detailed comments on a sample of up to 3000 words.

Assessment: Dissertation (100%, 10000 words) in the ST. The dissertation must be submitted by the published deadline in Week 1 of the ST in the student's third year. It should be typewritten. Precise details on length, format, presentation and deadline will be issued by the Department through the workshops and Moodle. Candidates may be called for an oral examination if the Examiners wish to satisfy themselves that the dissertation is the candidate's own work.

HY311

Limited War During the Cold War Era: The US in Korea (1950-53) and Vietnam (1954-75)

This information is for the 2023/24 session.

Teacher responsible: Dr Richard Saich

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes

where regulations permit and to General Course students.

Course content: Based on a variety of primary sources, and a wide range of secondary reading, this course will explore US attitudes and policies towards and during the Korean and Vietnam Wars. The problems of limited war; the origins of the Korean War; Truman and the decision to intervene; Inchon and the decision to cross the 38th parallel; the Chinese intervention and its consequences; the US home front during the Korean War; the Truman-MacArthur Controversy; Korea and US Cold War strategy: NSC-68, NATO, and 'The Great Debate'; fighting while negotiating, 1951-53; legacies; JFK and Vietnam; LBJ and the decision to escalate; LBJ as Commander in Chief; the war on the ground in Vietnam: 'search and destroy' versus 'hearts and minds'; the Tet Offensive; the media and military at war; the US home front during the Korean War; Vietnam and US Cold War strategy: détente and triangular diplomacy; fighting while negotiating, 1969-73; legacies.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: Students will be required to write two essays and two gobbet exercises during the year.

Indicative reading: A detailed course outline and reading list, as well as handouts, will be available as the start of the course. The following works are recommended: Steven Casey, *Selling the Korean War* (2008); William Stueck, *Rethinking the Korean War* (2002); Burton I. Kaufman, *The Korean War: Challenges in Crisis, Credibility and Command* (1986, or later edition); Rosemary Foot, *The Wrong War: American Policy and the Dimensions of the Korean Conflict, 1950-53* (1985); George Herring, *America's Longest War* (various editions); David L. Anderson, *Shadow on the White House: Presidents and the Vietnam War* (1993); David L. Anderson (ed), *The Columbia History of the Vietnam War* (2011); Robert J. McMahon, *The Limits of Empire: The United States and Southeast Asia since World War II* (1999).

Assessment: Exam (100%, duration: 3 hours).

HY315

The European Enlightenment, c.1680-1799

This information is for the 2023/24 session.

Teacher responsible: Dr Tim Hochstrasser, room SAR 2.14

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The European Enlightenment of the eighteenth century is conventionally taken to be the period in which the disciplines of philosophy, history, economics and anthropology, and other social sciences began to emerge as discrete disciplines independent of state and church control. This course therefore sets out to explore the new ideas generated in these areas as a result of a fresh understanding of man's place in the physical world. But while the course aims to look at ideas and concepts in themselves it is also concerned with the way that they were applied in political practice and adapted to provide new understanding of social structures, or as contemporaries put it, a 'Science of Man'. The chronological context of the Enlightenment is taken to be Europe between the reign of Louis XIV and the end of the Directory in France in 1799. Within this broad framework the following large themes provide the subject matter of both lectures and classes in the Michaelmas Term: the impact of the Scientific Revolution upon institutionalised religion; the emergence of a 'Republic of Letters'; English and French critiques of absolutist monarchy; the creation of scientific approaches to the study of ethics and politics; the political theory of enlightened despotism; the intellectual origins of the French Revolution; intellectual encounters with the New World; the concept of a Counter-Enlightenment; and the move from a private to a public sphere of cultural inquiry. The contributions

of Newton, Locke, Voltaire, Montesquieu, and Rousseau - among others - will be highlighted. In the Lent Term the focus will be more narrowly directed to the study of individual key authors and texts and on the impact of enlightened ideas in particular countries, notably England, France, Prussia, Russia and the Habsburg Monarchy. Space will also be found for an examination of the contribution of enlightened thought to the visual arts and music in the 18th century. The course gives students the chance to consider whether or not the Enlightenment was an era of European history that fostered the application of reason to political and social reform, an end to censorship, torture, and hierarchical social models, and a beginning to religious toleration and recognizably modern concepts of human rights, international law and social equality. The focus throughout will be on the writings of the philosophes themselves and their attempts to convert theoretical innovation into practical reform through the agency of bureaucracy and rulers.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 1 hour of seminars in the ST.

The first hour in each seminar session will be given as a lecture. There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: Two pieces of formative assessment are required, the first a source-criticism exercise in the Autumn Term and the second a conventional essay (2000 words) in the Winter Term.

Indicative reading: A full reading list will be provided at the start of the course. The following represent basic introductory reading only, and an indication of some primary sources: T C W Blanning, *The culture of power and the power of culture* (2002); D Outram, *The Enlightenment* (1995); T Munck, *The Enlightenment* (2000); R Porter, *The Enlightenment* (2001); Ritchie Robertson, *The Enlightenment* (2021); Anthologies: I Kramnik (Ed), *The Portable Enlightenment Reader* (1995); S Eliot & B Stern (Eds), *The Age of Enlightenment* (2 vols, 1979).

Assessment: Exam (70%, duration: 3 hours) in the spring exam period.

Presentation (15%) and class participation (15%) in the AT and WT. Students MUST give a summative presentation in either the AT or the WT.

Class participation will be graded across both the AT and the WT.

HY319

Napoleon and Europe

This information is for the 2023/24 session.

Teacher responsible: Dr Paul Keenan SAR 2.13

Availability: This course is available on the BA in History, BSc in International Relations, BSc in International Relations and History and BSc in Politics and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The Napoleonic Empire was crucial in the formation of modern Europe. Much of Europe was covered by the Napoleonic Empire and its impact was felt across large parts of the non-European world. The influence of the emperor and his policies was most obvious in relation to the European international system, particularly through his military campaigns and his territorial reorganisation of Europe in the wake of his successes. However, the Napoleonic era also saw major developments in the legal, constitutional, social, and economic order of many states, whether allied or opposed to the Napoleonic project. Likewise, in the aftermath of the French Revolution, much attention is paid to the impact of the Napoleonic era on the relationship between Church and State and the rise of national consciousness, whether in political or cultural terms. By studying how Napoleon's empire was created, challenged, and ultimately defeated, the course will focus on the nature of power and legitimacy in this era. An attempt will be made to place the Napoleonic empire in a broader context, in part by comparing it to other contemporary, rival states,

including Russia, Austria, and the United Kingdom. Finally, the course will begin and end with an assessment of the Napoleonic myth, both in terms of his contemporaries and for subsequent generations of historians.

Teaching: 20 hours of seminars in the Autumn Term. 20 hours of seminars in the Winter Term.

There will be a reading week in the Autumn and the Winter terms.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the AT.

Indicative reading: A full reading list will be provided at the beginning of the course. Useful introductory reading includes: A. Mikaberidze, *The Napoleonic Wars: A Global History*; M. Lyon, *Napoleon Bonaparte and the Legacy of the French Revolution*; G. Ellis, *The Napoleonic Empire*; C. Emsley, *Napoleon: Conquest, Reform and Reorganisation*; M. Broers, *Europe under Napoleon, 1799-1815*; C. Esdaile, *Napoleon's Wars*; S. J. Woolf, *Napoleon's Integration of Europe*; P. Dwyer (ed.), *Napoleon and Europe*; P. Geyl, *Napoleon, For and Against*.

Assessment: Essay (35%, 3500 words) in the ST.

Essay (35%) in the WT.

Presentation (15%) and class participation (15%) in the AT and WT.

The Winter Term essay will be document-based. The Spring Term essay will be question-based.

HY320

The Cold War Endgame

This information is for the 2023/24 session.

Teacher responsible: Dr Aaron Clift

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Based upon a variety of primary sources, this course will explore why and how in the second half of the 1980s the East-West conflict between the United States and the Soviet Union transformed itself so suddenly and peacefully into the collapse of (European) communism, German unification and the end of the USSR and her empire, while China took an entirely different exit from the Cold War era. In doing so, we will ask what was the correlation between "high" and "low politics" in these events and processes? Topics will include: the onset of détente and *neue Ostpolitik*; the impact of Helsinki (1975) and human rights; détente's death, Euromissiles and the war in Afghanistan; the second Cold War of the early 1980s, pacifism and transatlantic turmoil; the Pope and the Polish crisis of 1980-81; Gorbachev's new thinking and reforms in the USSR; Reagan and Gorbachev: superpower summitry; the Chinese crackdown and the eastern European revolutions; German unification: domestic and international aspects; Kohl, Mitterrand and the road to the European Union; the collapse of the Soviet 'empire'; the Baltic independence struggle, Yeltsin and the Moscow coup; Soviet disintegration and Yugoslavia's implosion; explanations and interpretations of the Cold War endgame. The discussion in each seminar will draw on a combination of primary and secondary material.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

There will be a reading week in the Autumn Term and the Winter Term.

Formative coursework: Students will be required to present one short class paper during the AT or the WT as well as to submit a practice essay (1,500 words) and one gobbet answer during the AT. There will also be opportunity to do a 90min. timed written exercise consisting of an essay and gobbet answer in late WT.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, as well as a document pack will be available at the beginning of the course on Moodle. The following

works are recommended as essential reading: K Spohr, *Post Wall Post Square* (2019); P Zelikow & C Rice, *To Build a Better World* (2019); V Zubok, *Collapse* (2021); S Dockrill, *The End of the Cold War Era* (2005); O A Westad et al (eds), *The Cambridge History of the Cold War*, vols 2-3 (2010); M E Sarotte, 1989 (2009); Hal Brands, *The Unipolar Moment* (2016); A Brown, *The Gorbachev Factor* (1996); R L Garthoff, *The Great Transition* (1994); Idem, *Détente and confrontation* (1985); J Levesque, *The Enigma of 1989* (1997); C S Maier, *Dissolution* (1997); H Adomeit, *Imperial Overstretch* (1998); R Summy & M E Salla (eds), *Why the Cold War Ended* (1995). Also students should familiarise themselves with the Cold War International History Project homepage (<http://www.wilsoncentre.org>) and in particular: Bulletins No 5 'Cold War Crises', No 8-9 'The Cold War in the Third World and the Collapse of Detente in the 1970s', and No 12/13 'The End of the Cold War'.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY322

Nazi Germany's War: Violence and Occupation in Europe, 1939-1945

This information is for the 2023/24 session.

Teacher responsible: Dr Artemis Photiadou

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The Second World War was the most destructive conflict in modern European history. At the height of the war, German soldiers occupied lands from the Channel Islands to the Caucasian mountains, from Scandinavia to Attica. Across the continent, societies were torn apart by war, occupation, and civil war. Drawing on key secondary texts and primary sources, this course examines Nazi Germany's war in Europe from a comparative perspective. It looks at the origins of the conflict; the course of the war, from the partition of Poland to the fall of Berlin; war crimes; Nazi occupation regimes; local collaboration and the recruitment of hundreds of thousands of non-Germans into Hitler's armies; resistance and partisan insurgency; ethnic cleansing and genocide; and the aftermath of the war. The focus is not only on political leaders, party functionaries, and generals, but also on ordinary people, such as soldiers, peasants, slave workers, and concentration camp inmates. Particular attention is given to the views and experiences of contemporary intellectuals, such as George Orwell, Raphael Lemkin, Marc Bloch, and Hannah Arendt. The course considers the Second World War as an amalgam of different forms of conflict, including wars between states, civil wars, and partisan wars, and it also addresses more general questions about conflict and violence in the modern age.

Teaching: 10 x 2-hour seminars in the Autumn Term; 10 x 2-hour seminars in the Winter Term; 1 x 2-hour seminar in the Spring Term.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: Students will be required to write one 1800-word gobbet essay during the Winter Term and one timed mock exam in the Spring Term. Students will also be required to prepare short summaries of the readings (bullet points) for the weekly meetings.

Indicative reading: Omer Bartov, *The Eastern Front, 1941-45: German Troops and the Barbarisation of Warfare* (London, 1985). Christopher Browning, *Ordinary Men: Reserve Police Battalion 101 and the Final Solution in Poland* (New York, 1992). Richard J. Evans, *The Third Reich at War, 1939-1945* (London, 2008). Jozo Tomasevich, *War and Revolution in Yugoslavia, 1941-1945: Occupation and Collaboration* (Stanford, 2001).

Assessment: Exam (85%, duration: 3 hours) in the spring exam period.

Presentation (15%) in the AT and WT.

HY323 Not available in 2023/24

Travel, Pleasure and Politics: The European Grand Tour, 1670-1825

This information is for the 2023/24 session.

Teacher responsible: Dr Paul Stock SAR 2.15

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Throughout the eighteenth century thousands of young British men and women embarked on extensive journeys to continental Europe – an activity known as the Grand Tour. 'Travel, Pleasure and Politics: The European Grand Tour 1670-1825' explores who these people were, where they went, and the reasons for their expeditions. For some, the Tour was the final stage of formal education; to others an opportunity for sexual adventures and pleasure-seeking. The course discusses the practical challenges of eighteenth-century travel, the political, religious, and cultural contexts of the Tour, as well as the key places to visit and the reasons for their popularity. It also considers what the Tourists brought back with them: from physical artefacts for public and private collections, to new ways of seeing and understanding the world. 'Travel, Pleasure and Politics' introduces students to the actual writings of the Tourists, showing how they experienced international travel and shaped the modern tourist industry.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT and 2 essays in the AT and WT. Specifically, the course's formative coursework will consist of two essays (MT and LT), one document analysis (LT). Students will also have an opportunity to sit a mock exam.

HY327

The Anglo-American Special Relationship, 1939-89

This information is for the 2023/24 session.

Teacher responsible: Prof Nigel Ashton SAR M.07

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Primarily for 3rd year BA History, BSc International Relations and History, and BSc Government and History students, but may be taken by 2nd years where regulations permit. May also be taken as an outside option and by General Course students where regulations, timetabling constraints and capacity permit.

Course content: This course will analyse the changing nature of the Anglo-American "special" relationship from its creation against the backdrop of the Second World War through to the end of the 1980s. It will illuminate the foundations of the relationship in terms of culture and ideology, and also the threat posed by common enemies in the Second World War and Cold War. The competitive dimension of the Anglo-American relationship will also be highlighted as a means of explaining instances of discord such as the Suez Crisis of 1956. Topics addressed include: the creation of the Anglo-American alliance, 1939-41; competitive co-operation in war strategy and politics, 1941-45; the American "occupation" of Britain during the Second World War; the emergence of the Cold War in Europe and Asia, 1945-54; the Palestine question; the Suez Crisis; nuclear relations; the Cuban Missile Crisis; European integration; decolonisation; the impact of the Vietnam War; the cultural Cold War; intelligence co-operation; Anglo-American relations in the 1970s; the Falklands War of 1982; and the revival of the special relationship under Thatcher and Reagan in the 1980s.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

In common with other Level 3 History courses, this course will include the study and discussion of primary sources in each weekly seminar. Documents will be drawn from published collections, including the Foreign Relations of the United States

series and the Documents on British Policy Overseas, the diaries of key politicians or officials, copies of documents from the UK National Archives, the US National Archives and the relevant US Presidential Libraries.

There will be a reading week in week 6 of the Autumn and the Winter terms.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 essay and 1 other piece of coursework in the WT.

Formative assessment will be through the submission of one essay in week 7 of the AT, and one essay in week 5 of the WT (each essay must be a maximum of 2000 words long and be drawn from a list supplied at the start of the course).

One 'gobbet' answer, consisting of commentaries on two extracts, must also be submitted in week 9 of the WT.

Indicative reading: K. Burk, *Old World, New World: the Story of Britain and America* (2007)

D. Reynolds & D. Dimbleby, *An Ocean Apart: the Relationship between Britain and America in the Twentieth Century* (1988)

J. Dumbrell, 'A Special Relationship': *Anglo-American Relations from the Cold War to Iraq* (2006)

W. R. Louis & H. Bull (Eds), *The Special Relationship: Anglo-American Relations since 1945* (1984)

D. C. Watt, *Succeeding John Bull: America in Britain's Place, 1900-75* (1984)

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

The summative assessment will consist of a three-hour final examination, requiring candidates to write two essays selected from a list of questions, and two commentaries on extracts selected from the allocated primary sources.

HY328

The Arab-Israeli Conflict: Nationalism, Territory, Religion

This information is for the 2023/24 session.

Teacher responsible: Dr Kirsten Schulze SAR 2.12

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is not available as an outside option. This course is available with permission to General Course students.

The course is available to General Course students whose home department is International History.

Course content: The 1948 Arab-Israeli War; Israeli foreign and defence policy; the 1956 Suez-Sinai Campaign; the 1967 Six-Day War; regime change in Egypt and Syria in 1970; 1970/71 Black September; the 1973 Yom Kippur War; the 1975 Lebanese civil war; the ascendance of the Likud; the Camp David Accords 1979; the invasion of the Lebanon 1982; Palestinian resistance; the 1987 Intifada; the 1991 Madrid Peace Conference; the 1993 Oslo Accords; the 1994 Jordanian-Israeli Peace Treaty; the 2000 al-Aqsa intifada; peace efforts since 2000; the 2006 Lebanon War; and the 2006-2014 Gaza Wars.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

Week 6 of both the Autumn and the Winter terms will be a Reading Week.

Formative coursework: Students are required to write two 1500-word essays and a one-hour timed essay.

Assessment: Exam (75%, duration: 3 hours) in the spring exam period.

Class participation (25%) in the AT and WT.

HY329

Independent India: Myths of Freedom and Development

This information is for the 2023/24 session.

Teacher responsible: Dr Diva Gujral

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Focusing on the early decades after India gained independence in 1947, this course raises questions about the nature of freedom and the tasks of development and modernisation faced by postcolonial nations. The course begins with a brief study of Jawaharlal Nehru, India's first prime minister. Students will survey his philosophy and his style of leadership while exploring the myth of the strong male leader. The course will then cover India's foreign policy, asking students to probe the meaning of Nonalignment, and inspect the character of India's relations with Indians Overseas and with its neighbours, including China and Pakistan. Students will then turn to the nature of secularism in India by examining the treatment of Muslims who remained in India after the creation of Pakistan. This section also probes official attempts to reform Hinduism and improve the lives of Dalits (former untouchables) in India. Students then are asked to query how socialist India was by reading political theory from Communists, Socialists, Gandhians and others. Next, students interrogate the nature and extent of economic development achieved in this period by studying the strengths and weaknesses of international aid supplied to the country, as well as India's own development programmes. Students will then explore how Indians expressed their visions of modernity in the realms of science, art & architecture and the emancipation of women. Finally, the course concludes by scrutinising the Constitution and the conduct of India's first democratic elections. Using a variety of primary source materials, with a strong element of film and visual arts, this course asks students to see India and Indians in new ways.

Teaching: 10 x 2-hour seminars in the Autumn Term. 10 x 2-hour seminars in the Winter Term. There will be a reading week in the Autumn and the Winter terms.

Formative coursework: Students will be expected to produce 1 essay (2000 words) in the AT, and 1 gobbet exercise (600 words) in the AT. The AT essay will be a draft for the WT summative essay,

Assessment: Essay (30%, 3000 words) and document analysis (20%) in the WT.

Essay (35%, 3000 words) in the ST.

Class participation (15%) in the AT and WT.

The class participation includes weekly Moodle uploads, engagement in the seminar and class presentations in WT.

HY330

From Tea to Opium: China and the Global Market in the Long Eighteenth Century

This information is for the 2023/24 session.

Teacher responsible: Dr Jose Canton-Alvarez

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Did China foster or resist the early wave of globalisation? How should we situate China within the global context prior to the First Opium War? Compared with the Dutch and the British, in what ways did the Chinese interact with the world that had been created by global trade? Had China already become the world factory in the eighteenth century? Using both primary and secondary sources, this seminar examines these questions by looking at the production, circulation and consumption of a variety of commodities that were exported from and imported to China. If we agree that a commodity has its own social life and history, then we can also examine its story in order to complicate our understanding of China's role and significance in the global market throughout the long eighteenth century. This seminar is divided into two parts. In Part I (the first five sessions) we will historicise the political, social and economic background of the Qing dynasty in the early modern period. From week to week, we will identify remarkable watersheds that changed or transformed the way that China engaged in or became disengaged from the global market, covering the China Seas, Indian Ocean, Atlantic and Pacific. We will also focus on port cities in China and Southeast Asia, so as to illustrate exactly how peoples and places facilitated the flow of commodities on a global scale. In Part II (the remaining sixteen sessions) we will study a series of commodities that each fits under different featured themes, such as 'When Silk was Gold', 'Pepper and Parley', 'Camphor and Taiwan' and 'Opium and Power'.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in the Autumn Term and the Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the AT.

HY331

Henry Kissinger and the Global 1970s

This information is for the 2023/24 session.

Teacher responsible: Dr Roham Alvandi SAR M.12

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: Henry Kissinger might be the most controversial American statesman of the twentieth century. More than forty years since he left office, he remains the focus of intense popular and scholarly debate concerning the uses of American power during the Cold War. This course offers an introduction to these controversies in the study of 'America and the World' in the 1970s. The course begins by examining how Kissinger's ideas about foreign policy evolved during his early life in wartime Germany and his career as a foreign policy intellectual at Harvard University. The majority of the course is then concerned with the central controversies of Kissinger's time in office as national security adviser and secretary of state between 1969 and 1976. Each week students will examine Kissinger's role in shaping and implementing American foreign policy in a particular theatre of the global Cold War, focusing on the major crises and conflicts of the decade. Students read and reflect on extracts from Kissinger's memoirs as a primary source, in conjunction with the latest historical research on that topic. They are asked to engage with ongoing historiographical debates about Kissinger's record and legacy and to form their own judgements, based on their reading of primary and secondary sources. Finally, students are asked to reflect on Kissinger's ideas about international relations in light of his praxis as a statesman by asking, is Henry Kissinger really a Realist?

Teaching: 10 x 2-hour seminars in the Autumn Term; 10 x 2-hour seminars in the Winter Term.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: A 2,000-word essay in the Autumn Term.

HY332

Interwar worlds: the cultural consequences of the First World War

This information is for the 2023/24 session.

Teacher responsible: Dr Dina Gusejnova room SAR M.14

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: A political catastrophe of global proportions, the First World War also had a transformative impact on cultural life worldwide throughout the interwar period. Trench coats, jazz, shellshock, avantgarde, aerial photography, radio news, spotlights – such fashions and cultural practices were the consequence of wartime developments or technologies which had become widespread as the conflict evolved. This course will examine how technological, social, and political changes brought about cultural change in postwar societies, principally focusing on the transnational and global circulation of commodities, ideas,

population groups, and cultural fashions between Europe and the world. Technological advancements spurred by military needs, such as radio, telephony, and photography, became available to postwar populations on a new scale. The representation of war atrocities and their impact on the human psyche created a need for new, hybrid, multilingual, and multimedia communication. Wartime disruption and change to education continued to have an impact on schools and universities in the postwar years, intensifying the global circulation of ideas. The increase in contact between previously disconnected communities, mediated as well as direct in places like prisoner of war camps, increased the exposure to different ideas, sights and sound, leading to the emergence of increasingly global cultural fashions such as jazz. Nonetheless, this globalisation of culture also went hand in hand with the growth of new forms of racist caricature and the drawing of new frontiers. The role of international and humanitarian organisations such as the Red Cross or YMCA in wartime changed the relationship between states and societies by introducing a transnational dimension to cultural provision, yet it is noteworthy that this new internationalism was neither disinterested nor did it lie 'beyond' ideology.

Did the war create a new, hybrid global culture? Or did it increase the global hegemony of European culture? How did America's entry into the war affect the place of American culture in the postwar period? To what extent did the war give greater resonance to previously marginal cultural movements? How did gender norms change as a result of the permeation of military culture into what used to be the home front? Interwar culture is often associated with urban and metropolitan communities, but how did it develop in rural or distant settings? How did the new exposure to previously unfamiliar populations change ideas of friends and enemies? Which earlier myths or historical memories were mobilised in order to cope with the war experience? The course will be organised around the close reading and interpretation of key artefacts, ideas, or works of intellectual history, whose analysis will facilitate a nuanced understanding both of the scale and the depth of cultural change brought about by the war.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: Recording of a book discussion in the AT. Draft of a source analysis in the AT. Annotated research bibliography in the WT.

HY333

People and Power in West African History, c. 1450 - 1850

This information is for the 2023/24 session.

Teacher responsible: Dr Jake Subryan Richards SAR 2.08

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: What role did West Africa and West African people play in the Atlantic world? In this module, we will investigate how African political communities formed and changed from the era of the trans-Saharan trade to the age of revolutions. Between c. 1450 and 1840, empires rose and fell, trading patterns were transformed, and social and cultural practices changed in the regions that became known as the Gold Coast, Bight of Benin, and West Central Africa. African empires that had expanded were threatened by revolutionary political rivals. Slaving, which had begun as a marginal enterprise, became the primary export activity, generating widespread warfare and demographic distortion. And ideas and practices regarding gods, gender, and land changed to make sense of problems such as inequality, the abuse of political power, and the interference of outsiders. We will discover how Africans participated in commerce, diplomacy, and cultural production on equal terms with Europeans between c. 1450 and 1700. We will trace how those relationships changed with growing commercial dependence on the transatlantic slave trade, along with its devastating effects on military conflict, spiritual beliefs, and political stability. Through various themes such as kinship, trade, spirituality, and political power, this course investigates how West Africans were participants in the Atlantic world, rather than its one-dimensional victims.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Essay (45%, 3500 words) in the ST.

HY334

Communication Revolutions in Latin America, c.1539 to the Present

This information is for the 2023/24 session.

Teacher responsible: Dr Anna Cant SAR 3.12

Availability: This course is available on the BA in History, BSc in History and Politics, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: From the invention of the printing press to the explosion of social media, how and with whom we communicate has had powerful consequences throughout history. This course examines the idea of the communication revolution from two perspectives. First, it looks at how inventions such as the printing press, the camera and the radio helped connect Latin Americans to national and international networks and gave rise to new political and cultural identities. Second, it investigates how individuals and groups used new communication technologies to both push for and resist revolutionary change. Examples include the role of print culture in the Atlantic Revolutions, the global impact of Cuban poster art and the pioneering use of radio education in the Andean countryside during the 1960s. The course is organised thematically around print, visual, electronic and digital communication revolutions, and extends from the colonial era to the present day. Students will be introduced to an exciting range of primary sources spanning newspapers, photographs, posters, film and sound archives, alongside secondary literature from the fields of anthropology, history, art history, and cultural studies. This course will be of particular interest to those considering careers in advertising, marketing and journalism. It will enable students to reflect critically on the relationship between the media and social change, both in Latin America and beyond.

The course has three main objectives:

1. To critically examine changes in communication systems and their impact on Latin American societies, predominantly in the post-Independence era.
2. To familiarise students with the conceptual frameworks and methodologies used to study the history of communication.
3. To enable students to develop skills in comparative history and the analysis of primary sources.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: One 2,000-word essay in the Autumn term. Two 10-minute presentations, one in the Autumn Term and one in the Winter Term. A discussion post (c. 300 words) each week on the Moodle discussion board.

HY335

History of Foreign Relations of the People's Republic of China, 1949-2008

This information is for the 2023/24 session.

Teacher responsible: Dr Qingfei Yin, SAR M.06

Availability: This course is available on the BA in History, BSc in History and Politics, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: China's reemergence as a global player raises important questions about the origins of the country's foreign policy and the impact of its international strategy on the Asia-Pacific region and the world. This course provides a comprehensive introduction to the history of foreign relations of the People's Republic of China (PRC) from 1949 to the early 21st century. In particular, students will assess competing explanations, such as historical experience, domestic politics, and the international system, for key events and policies.

The seminar combines a chronological and thematic approach.

It begins with two important historical legacies of China's interactions with the outside world: the "tributary system" and the "century of humiliation." It then traces the foreign relations of the PRC from the Maoist era to the post-Maoist period, with special attention to the country's involvement in important regional conflicts, entanglement with the great powers, and relations with the Third World. The last part of the course introduces students to some new approaches to the studies of the history of PRC's foreign relations, such as historical memory, borderlands, migration, and global history.

The weekly readings will be drawn from both scholarly works and translated primary sources. Upon completion of the course, students should be able to critically examine how the past shapes China's relations with the world in present day.

Teaching: 10 x 2-hour seminars in the Autumn Term; 10 x 2-hour

seminars in the Winter Term. Students on this course will have a reading week in Week 6 of the AT and the WT.

Formative coursework: One formative source analysis in the AT; one formative essay, 2000-2500 words, in the WT.

HY336 Not available in 2023/24

The United States and nuclear weapons from the Manhattan project to the end of the Cold War

This information is for the 2023/24 session.

Teacher responsible: Prof Matthew Jones SAR 309

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in History and Politics, BSc in International Relations and History, BSc in Politics and History and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes

where regulations permit and to General Course students.

Course content: This undergraduate level 3 course looks at the way nuclear weapons and the challenges they have posed have influenced the course of American foreign and defence policy, strategic thinking, and domestic politics, as well as wider trends in society and culture, from the instigation of the Manhattan project – the wartime US programme to develop an atomic bomb – to the end of the Cold War in the late 1980s. The course will examine the political and moral dilemmas raised by the possession and possible use of nuclear weapons, the role they have played in the way the United States pursued its policies during the years of Cold War confrontation with the Soviet Union and People's Republic of China, and the domestic political controversies that US nuclear policies engendered. In the latter area we will consider the rise of anti-nuclear grass roots activism in the United States, alongside the place of nuclear issues in presidential elections and Congressional politics. We will also necessarily study some of the major events and crises of the Cold War, including the Berlin crises of 1948, 1958/9 and 1961, the Korean War, Indochina crisis of 1954 and the Cuban missile crisis. Debates over a nuclear test ban, culminating in the Partial Test Ban Treaty of 1963 will also be featured. The last portion of the course features analysis of the international negotiations over arms control and non-proliferation that have featured since the late 1960s and the controversies they generated. Throughout the course students will engage with contemporary writings and study primary source documents which will accompany each topic.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

Students will be expected to read essential primary and secondary material for each weekly two hour seminar class, to deliver presentations, and to participate in seminar discussions.

There will be a reading week in the Michaelmas and the Lent terms, and also a revision seminar class in the first week of the Summer term.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 piece of coursework in the WT.

Students will be required to complete two pieces of formative work for this course - a 1,500 word essay for submission in week 7 of the MT, and a 1,000 word primary source analysis to be submitted in the week 7 of the LT.

Indicative reading: Paul Boyer, *By the Bomb's Early Light: American Thought and Culture at the Dawn of the Atomic Age* (1985).

Herbert York, *The Advisors: Oppenheimer, Teller and the Superbomb* (1976).

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

Summative assessment consists of a three hour examination paper sat in the Summer Term. The paper includes a section which asks candidates to analyse a selection of primary sources, and a section where candidates are required to complete two essays.

IR100

International Relations: Theories, Concepts and Debates

This information is for the 2023/24 session.

Teacher responsible: Dr Sinja Graf

Availability: This course is compulsory on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is available on the BSc in Environment and Sustainable Development. This course is not available as an outside option. This course is available with permission to General Course students.

Students who have this course as a compulsory course are guaranteed a place.

Course content: This course offers an introduction to the study of International Relations (IR). It surveys mainstream and critical theories to the subject. The course also places these theories into conversation with each other to highlight key concepts and debates in the study of IR. We will begin by exploring the history of the modern inter-state system and the formation of IR as an academic discipline. We will proceed with studying major theories that analyse and/or criticize the modern international order before engaging several key topics from various perspectives. Overall, this course asks whether IR has developed based on particular (Anglo-American/European) experiences and viewpoints and whether it can and should become more global in its representation of diverse histories, concepts and theories.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn Term and Winter Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write two essays of 1,500 words.

Indicative reading: A full course description and guide to reading will be provided. Relevant course texts include:

- R Devetak, J George & S Percy (Eds) *An Introduction to International Relations* (Cambridge, 2017)
- J Baylis, S Smith & P Owens (Eds) *The Globalization of World Politics* (Oxford, 2016)
- Robbie Shilliam, *Decolonizing Politics* (Polity, 2021)
- R B Persaud & A Sajed (Eds) *Race, Gender, and Culture in International Relations. Postcolonial Perspectives* (Routledge, 2018).

Assessment: Take-home assessment (100%) in the ST.

IR101

Contemporary Issues in International Relations

This information is for the 2023/24 session.

Teacher responsible: Dr Luca Tardelli CBG 10.05

Prof. Peter Trubowitz CBG 10.16

Availability: This course is compulsory on the BSc in International Relations. This course is available on the BSc in International

Relations and History and BSc in Politics and International Relations. This course is not available as an outside option nor to General Course students.

Students who have this course as a compulsory course are guaranteed a place.

Course content: This course provides an opportunity to gain an analytically deeper understanding and reflect critically upon some of the most topical issues that currently confront international relations and which shape the development of the contemporary international order. These include but are not limited to: the rise of China; the war in Ukraine and tensions between Russia and the West; violent conflict in the Middle East; US foreign policy under President Joe Biden; European security and the future of NATO; challenges to multilateral cooperation and liberal internationalism; China's growing involvement in Africa; the use of armed drones; international financial crises; climate change and environmental security; and migration and refugee crises. The course encourages students to engage in debating the nature of, and possible responses to, contemporary challenges and crises in international politics. The course complements IR100 with a more applied policy focus, while emphasising the need for critical analytical depth when reflecting on the origins, nature and implications of current affairs. Students will develop an awareness of the relationship between the discipline of International Relations as a field of knowledge and the practices of world politics.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn Term and Winter Term.

Students on this course will have a reading week in Week 6 of Autumn Term and Winter Term, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 formative opinion piece in the AT. Students will then be expected to produce 1 formative policy memo in the WT and submit the outline of their summative policy memo in the WT. In addition, students will be expected to deliver short class presentations in the AT.

Indicative reading:

- John Baylis, Steve Smith and Patricia Owen (eds), *The Globalization of World Politics* 8th ed (OUP: 2020)
- Jenny Edkins and Maja Zehfuss (eds), *Global Politics: A New Introduction* (Routledge: 2019)
- Mary Kaldor and Iavor Rangelov (eds), *The Handbook of Global Security Policy* (Wiley-Blackwell: 2014).

Assessment: Policy memo (70%) in the ST.

Class participation (10%) in the AT and WT.

Group presentation (20%) in the AT.

Students on the course will write a 2,500 word 'policy memo' (70%) on a particular contemporary issue. Students will also give a group presentation on a particular issue or problem (20%). Participation in the class discussion will also be assessed (10%).

IR102

Thinking Globally: Studying International Relations

This information is for the 2023/24 session.

Teacher responsible: Dr Luca Tardelli CBG.10.05

Availability: This course is compulsory on the BSc in International Relations and BSc in International Relations and Chinese. This course is available on the BSc in Politics and International Relations. This course is not available as an outside option nor to General Course students.

Students who have this course as a compulsory course are guaranteed a place.

Students for whom the course is optional must commit to the course when they choose it.

Course content: The aims of this short course are two-fold. First, to enable you to reflect on and share ideas with other students about why you chose to study international relations and what it means to study international relations. Second, to acquire and

develop the key skills you need to study international relations, including communications skills (verbal and written) and team working skills. Students will work together on the skills required for reading for academic purposes and taking notes; writing essays; using sources and referencing; delivering class presentations; and succeeding as an IR scholar.

Teaching: This course is delivered through a combination of workshops totalling 7 hours and 30 minutes across Autumn Term (AT).

Formative coursework: There is no formal 'formative assessment' for the course. A variety of 'formative exercises' will be used in the workshop setting aimed at developing and enhancing a range of study skills linked to the study of international relations.

Indicative reading: Chris Brown, *Understanding International Relations* 5th ed (Palgrave: 2019)

LSE LIFE Learning Resources, available at: <https://info.lse.ac.uk/current-students/lse-life/resources>

Assessment: There is no summative assessment for this course.

IR200

International Political Theory

This information is for the 2023/24 session.

Teacher responsible: Dr Martin Bayly CBG 9.13

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Pre-requisites: Students must have completed *International Relations: Theories, Concepts and Debates* (IR100).

Course content: This course offers an introduction to the history of international political theory (IPT). The course deals with debates and themes prompted by classical thinkers and considers their location within the existing IR canon including realism, liberalism, feminist, and postcolonial theory. The course also broadens this purview to consider how 'classical' international thought has been adopted, adapted, and critiqued by more recent thinkers, including those situated outside of the 'west'. Students will be encouraged to consider how international thought sits within global intellectual history, the impact of world political events on IPT, and its enduring relevance. Topics covered will include sovereignty, the state, and war; international government, empire, and decolonization; gender, race, and class.

Teaching: This course is delivered through a combination of classes and lectures totaling a minimum of 40 hours across Autumn Term and Winter Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write two essays of a maximum length of 1,500 words each to be set and marked by class teachers. They are also expected to give at least one class presentation.

Indicative reading:

- D. Armitage, *Foundations of Modern International Thought*;
- E. Keene, *International Political Thought: A Historical Introduction*;
- S. Burchill, *Theories of International Relations*;
- R. Shilliam, *International Relations and Non-Western Thought*;
- I. Kant, *Kant's Political Writings*;
- E. H. Carr, *The Twenty Years' Crisis*;
- B. K. Sarkar, *The Futurism of Young Asia*;
- R. Vitalis, *White World Order, Black Power Politics: The Birth of American International Relations*

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

IR202

Foreign Policy Analysis 1

This information is for the 2023/24 session.

Teacher responsible: Mr Dimitrios Stroiikos CBG.10.07

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Course content: The course analyses various theoretical perspectives on foreign policy, and the means of conduct of the main actors in the international system towards each other.

It focuses mainly, but not entirely, on states. Foreign Policy Analysis as a sub-discipline of IR; the problem of formulating goals and choosing policy instruments; the role of leadership and psychological elements in policy making; the rational actor model; bureaucratic politics; the impact of history and identity on foreign policy; domestic sources of foreign policy including public opinion, pressure groups and constitutions; the motivations underpinning foreign policy; the role and influence of transnational actors in relation to foreign policy making; foreign policy crises. The discussion classes combine a discussion of these themes with their application to the foreign policies of major powers in the international system.

In the WT the course turns to an analysis of the foreign policies of a selected group of major states, with due regard to their respective national interests, external commitments, traditional values and other relevant factors. There will be lectures on Britain, China, the United States and the Soviet Union/Russia. Additional guest lecturer country case studies will be included for the remainder of the course. The guest lectures offer additional empirical material to help with answering theoretical questions.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn Term, Winter and Spring Terms.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write two essays of about 1,500 words each for their class teachers during the course and to make presentations in the discussion classes.

Indicative reading: C Alden and A Aran, *Foreign Policy Analysis – New Approaches*, 2nd Edition, Routledge, 2017; S Smith, A Hadfield and T Dunne (Eds), *Foreign Policies: Theories, Actors and Cases*, 3rd Edition, Oxford University Press, 2016.

Assessment: Take-home assessment (100%) in the ST.

IR203

International Organisations

This information is for the 2023/24 session.

Teacher responsible: Dr Ulrich Sedelmeier CBG 10.02

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Pre-requisites: Students should have a background in International Relations. Prior familiarity with international relations theory is an advantage, but not necessary.

Course content: International organizations abound, ranging from the World Trade Organization to the United Nations. These institutions are forums for international cooperation and global problem solving, and they often have profound effects on the everyday interactions of states, with ultimate consequences for the lives of people worldwide. At the same time, the contemporary

liberal international institutional order is increasingly challenged domestically and internationally. This course draws on theories of international institutions to explain comparatively the role of International Organisations in international politics. These questions include why states create International Organisations, why states transfer certain powers to them, how decisions in International Organisations are made, what impact they have, why they have become increasingly contested, and how they have adapted to such challenges. The course explores these questions across a wide-range of issues, including international peace and security, international economic relations, global environmental politics, and human rights. International organisations to be discussed include the United Nations, the International Monetary Fund, the World Bank, the World Trade Organization, NATO, the International Criminal Court and regional organisations like the European Union, the African Union, and ASEAN.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn, Winter and Spring Terms. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the AT, 1 essay in the WT and 1 presentation in either AT or WT.

Formative essays are 1,500 words. Class teachers will mark the essays and provide feedback on student presentations.

Indicative reading: Ian Hurd (2021): *International Organizations: Politics, Law, Practice*, 4th edition (Cambridge: Cambridge University Press);

Volker Rittberger, Bernhard Zangl and Andreas Kruck, and Hylke Dijkstra *International Organization: Polity, Policy, Politics*, 3rd ed. (Basingstoke: Palgrave, 2019).

Assessment: Exam (25%, duration: 2 hours) in the January exam period.

Essay (75%, 2000 words) in the ST.

IR205

International Security

This information is for the 2023/24 session.

Teacher responsible: Dr Lauren Sukin CBG 9.06

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Course content: This course tackles questions of war, peace and security from an analytical perspective, by highlighting changes and continuities in international security. What are the causes and consequences of war? What explains the use of violence for the resolution of inter and intra-state disputes? Does the liberal order promote peace and stability? What are the implications of changes in the distribution of power and the world? What renders the threat of force credible? Can intervention in civil wars ever curb violence and bring about peace? Do nuclear weapons make the world less safe? We address these questions through a combination of theoretical discussions and contemporary policy debates. The first half of the course reviews the major theoretical frameworks that have been used to explain the causes of war on the world stage, as well as its character and duration in the international and domestic arenas. We use these theoretical frameworks as a lens through which to examine problems of war and peace, and threats to individual, national and international security in the contemporary era. The second half of the course turns to questions of security more generally. We examine political violence, terrorism, insurgency, humanitarian emergencies, climate change, and other threats to individual and collective security.

Teaching: This course is delivered through a combination of

classes and lectures totalling a minimum of 40 hours across Autumn Term and Winter Term. This course includes a reading week in Week 6 in line with departmental policy.

Formative coursework: Students will submit one formative essay in AT and one formative essay in WT, each essay up to 1,500 words. Detailed explanations and requirements will be posted on Moodle at the beginning of the academic year.

Indicative reading:

Assessment: Take-home assessment (90%) in the ST. Class participation (10%) in the AT and WT.

IR206

International Political Economy

This information is for the 2023/24 session.

Teacher responsible: Dr Nikhil Kalyanpur CBG.8.04

Availability: This course is available on the BSc in Economics, BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Course content: The course examines the role of power and politics in international economic relations. Besides international structural factors, it emphasises the role of domestic political interests and their influence over foreign economic policies. Major approaches covered include historical views on international political economy, and contemporary systemic theories of international cooperation, interest groups politics, ideas and institutions. The course provides an overview and explanation of the international monetary and trade systems since 1944. It also discusses current debates on trade, monetary policy, the political roots of financial crises, globalisation and the retreat of the state, and environmental protection.

Teaching: This course is delivered through a combination of classes and lectures totaling a minimum of 40 hours across Autumn Term, Winter Term and Spring Term. This course includes a reading week in Week 6 in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 essay in the WT.

Formative Essays 1,500 words.

Indicative reading: Basic references are:

- A detailed reading list will be given at the beginning of the course.
- Assessment:** Exam (65%, duration: 2 hours) in the spring exam

period.
Other (35%) in the WT.

IR305 Not available in 2023/24

Strategic Aspects of International Relations

This information is for the 2023/24 session.

Teacher responsible: Dr Jürgen Haacke CBG 9.01

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Course content: This course examines key topics in relation to contemporary strategy. The course begins by exploring its relationship to the field of strategic and security studies. This includes an introduction to the literature on strategic theory, and the meanings of a range of strategy-related concepts. The course will then explore the insights and contributions of some important strategic thinkers, such as Carl von Clausewitz and Sun Tzu. With regard to military strategy, the course offers a particular focus on maritime strategy and the uses of air power. In addition, the course covers strategy in relation to several further topics including: nuclear power and deterrence; irregular war, especially insurgency and counterinsurgency; technological change; as well as ethical constraints. Multiple contemporary empirical cases relating to the study of strategic aspects of international relations will be discussed, such as the failures of counterinsurgency strategies; Russian strategy and 'hybrid war'; geostrategies towards the North Atlantic and the Arctic region; US-China strategic competition; contemporary hedging strategies by smaller powers; as well as debates about recent UK strategic defence and security reviews.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be required to write two essays (c. 2000 words each) in the course of the year, one in MT and one in LT.

Indicative reading: Beatrice Heuser, *The Evolution of Strategy: Thinking War from Antiquity to the Present* (Cambridge University Press, 2010).

Thucydides's Trap? (Houghton Mifflin Harcourt, 2017).

Assessment: Online assessment (100%) in the ST.

The online assessment is a 3-hour online exam in the summer exam period.

IR312 Half Unit

Genocide

This information is for the 2023/24 session.

Teacher responsible: Dr Howie Rechavia-Taylor

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

This course cannot be taken in conjunction with SO309 Atrocity and Justice.

Course content: This course provides an introduction to the study of genocide. The course's disciplinary ambit ranges from anthropology to economics, from history to law, and from political science to sociology. Against the background of diverse disciplinary approaches, it explores major theoretical and empirical aspects of the role(s) of genocidal campaigns in international politics, inter alia, their origins, development, and termination; the manner of their perpetration, progression, and diffusion; their impact on the maintenance of international peace and security; their consequences for the reconstruction and development of states and the building of nations; and their adjudication in domestic and international courts and tribunals. Empirical cases to be discussed include Australia, Cambodia, China, the Democratic Republic of Congo, East Timor, Nazi Germany, Guatemala, Iraq, Northern Ireland, the Ottoman Empire, Rwanda, Uganda, the Soviet Union, Sudan, the former Yugoslavia, and Myanmar, among others. The course is designed to equip students with the analytic tools necessary for making sense of the evolution of the international system from the nineteenth century to the present - and for critically assessing the promise and limits of responding to collective violence.

Teaching: This course is delivered through ten 2-hour classes totalling a minimum of 20 hours in Autumn Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to research and write one formative essay (1,000 words) due in Week 7 of Autumn Term. Essays must be fully - and carefully - referenced using one of the major conventions consistently.

Indicative reading:

- Lee Ann Fujii, *Show Time: The Logic and Power of Violent Display* (Ithaca: Cornell University Press, 2021).
- Christian Gerlach, *The Extermination of the European Jews* (Cambridge: Cambridge University Press, 2016).

- William A. Schabas, *Genocide in International Law: The Crimes of Crimes*, Second edition (Cambridge: Cambridge University Press, 2009).

Assessment: Essay (100%, 3000 words) in the WT.

IR313 Half Unit Not available in 2023/24

Managing China's Rise in East Asia

This information is for the 2023/24 session.

Teacher responsible: Dr Jurgen Haacke CBG.9.01

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available to General Course students.

Course content: The main focus of this class-based half-course on the contemporary international relations of East Asia is the management of China's rise. The course begins by exploring China's re-emergence as a major regional power, in part by discussing the economic, political and military dimensions of Chinese power, China's evolving identity, as well as the major aspects of its declaratory and substantive foreign and security policy. It also examines from different theoretical and political perspectives the implications that China's rise has been posing for East Asia. As regards the management of China's growing capabilities, status and ambitions, the course explores what political and security strategies vis-à-vis China have in turn been adopted by the key states that are either resident in or have a significant presence in the wider East Asia, such as the United States, Japan, Russia and India. The course also explores the ways in which China's rise has impacted on conflicts in the South China Sea and on the Korean peninsula, and the nature of the management of China's rise by states from continental and maritime Southeast Asia. It moreover examines how regional arrangements and institutional frameworks for dialogue and cooperation led by lesser regional states have served the management of China's rise. Concepts and theories from International Relations will be drawn upon as appropriate.

Teaching: 20 hours of classes in the AT. 2 hours of classes in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write two essays with a maximum length of 2,000 words and present on class topics.

Indicative reading: William A. Callahan, *China the Pessoptimist Nation* (Oxford: Oxford University Press, 2010); Thomas J. Christensen, *The China Challenge: Shaping the Choices of a Rising Power* (New York: W.W. Norton, 2015).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

IR314 Half Unit Not available in 2023/24

Southeast Asia: Intra-regional Politics and Security

This information is for the 2023/24 session.

Teacher responsible: Dr Jürgen Haacke CBG.9.01

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Course content: This class-only half unit course examines key aspects of the contemporary international relations of Southeast Asia, with the primary focus being on the intramural relations of the member states of the Association of Southeast Asian Nations (ASEAN). In order to contextualise these intramural relations, the course first explores the different domestic political settings in which Southeast Asian decision-makers have operated, including ethnic politics and insurgencies. It also examines some of the past interstate tensions and disputes in Southeast Asia and more recent transnational security challenges. The course then, secondly, analyses the foreign and security policies of select ASEAN states. This will involve taking account of a range of additional factors, such as geography, leadership, state-society relations, and economic interests. Thirdly, the course explores how the domestic backdrops and foreign policy outlooks of Southeast Asian states have shaped the nature, effectiveness and limits of ASEAN as a vehicle for intramural political-security cooperation. Specifically, the course assesses the grouping's efforts to establish an ASEAN political-security community. Fourthly, the course focuses on defence modernisation amid wider regional security challenges that maritime Southeast Asian states in particular are facing in the contemporary period. Concepts and theories drawn from International Relations, and especially Foreign Policy Analysis and Security Studies, will be applied as appropriate.

Teaching: This course is delivered through classes totalling a minimum of 20 hours across Michaelmas Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write one essay with a maximum length of 2,000 words and present on class topics.

Indicative reading: Ba, Alice D. and Beeson, Mark (2018). *Contemporary Southeast Asia*, 3rd ed. (Houndmills, Basingstoke: Palgrave Macmillan).

Assessment: Online assessment (100%) in the ST.

The online assessment is a 2-hour online exam in the summer exam period.

IR315**International Relations of the Middle East**

This information is for the 2023/24 session.

Teacher responsible: Prof Fawaz Gerges CBG.10.03

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Pre-requisites: Students must have completed International Political Theory (IR200) or Foreign Policy Analysis (IR202) or an equivalent course.

Course content: The course applies the theories and conceptual tools of the discipline of International Relations to the study of the Middle East region. It uses the empirical material offered by the history, politics, political economy and international politics of the region to explore these concepts and theories.

More specifically, it provides an analysis of the regional politics of the Middle East since 1918, and of their interaction with problems of international security, global resources and great power/super power/hyperpower politics.

Topics covered include: The emergence of the state system in the Middle East during the inter-war period; the interplay of domestic politics, regional conflicts and international rivalries; the Cold War and post-Cold War significance of the Middle East in global politics; the importance of oil and other economic factors and interests; conflict in the Gulf and the Arab-Israeli conflict; the foreign policies of major Middle Eastern states and the Lebanese civil war; the role of ideologies and social movements: Arab nationalism, militarism, political Islam and global jihadism; state and non-state actors; democracy and human rights issues, the Arab Spring uprisings; and international relations theory and its significance for the study of Middle East politics.

Teaching: This course is delivered through a combination of classes and lectures totaling a minimum of 40 hours across Autumn Term and Winter Term.

Formative coursework: Two essays of 1,500 words each and 2 presentations in the AT and WT.

Indicative reading: Students are strongly advised to read before the beginning of the course:

Fawaz A. Gerges, *Making the Arab World: Nasser, Qutb, and the Clash That Shaped the Middle East*

F. Halliday, *The Middle East in International Relations: Power, Politics and Ideology*

Madawi al-Rasheed, *A Most Masculine State: Gender, Politics and Religion in Saudi Arabia*

Fawaz A. Gerges, *The Superpowers and the Middle East: Regional and International Politics*

Louise Fawcett, *International relations of the Middle East*

Course readings include:

Nazih Ayubi, *Over-stating the Arab State: politics and society in the Middle East*

Lisa Anderson, 'The State in the Middle East and North Africa' *Comparative Politics*, October 1987

R Hinnebusch & A Ehteshami (Eds), *The Foreign Policies of Middle East States*

B Korany & A Dessouki (Eds), *The Foreign Policies of Arab States*

John Chalcraft, *Popular Politics in the Making of the Middle East*

Madawi al-Rasheed, *Demystifying the Caliphate*

Fanar Haddad, *Sectarianism in Iraq: Antagonistic Visions of Unity*

Fawaz A. Gerges (ed.), *The New Middle East: Protest and Revolution in the Arab World*

Z. Lockman, *Contending Visions of the Middle East: The History and Politics of Orientalism*

Assessment: Take-home assessment (100%) in the ST.

IR317 Half Unit**American Grand Strategy**

This information is for the 2023/24 session.

Teacher responsible: Prof Peter Trubowitz CBG 10.16

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Course content: This course explores American foreign policy at the broadest level of analysis – the level known as grand strategy. The course showcases the main theoretical perspectives that inform the study of grand strategy and applies them to historical and contemporary cases of American statecraft. In this connection, we will assess the relevance of the U.S. experience for theorizing about power politics and the implications of alternative theories for thinking critically about American international behaviour. Emphasis is placed on the debates and controversies that animate the study of grand strategy, as well as of the unique challenges posed by making foreign policy in the American political, economic, and cultural context.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT.

Formative coursework: Students will write short weekly blog posts on Moodle and provide an 800-word outline of their assessed essay by the end of Week 8. This will be returned by the end of WT.

Indicative reading:

• John Lewis Gaddis, *Strategies of Containment* (2005)

• Peter Trubowitz, *Politics and Strategy* (Princeton 2011)

• Linda Weiss, *America Inc.?* (Cornell 2014)

• Rebecca Thorpe, *The American Warfare State* (Chicago 2014)

• Robert Kagan, *The Jungle Grows Back* (Knopf, 2018)

• Joan Hoff, *A Faustian Foreign Policy* (Cambridge 2008)

Assessment: Essay (100%, 2500 words) in the WT.

Students will write a 2,500 word assessed essay selecting from a list of topics and questions provided by the course coordinator.

The essay will be due at the end of Week 1 of the WT.

IR318 Half Unit**Visual International Politics**

This information is for the 2023/24 session.

Teacher responsible: Prof William Callahan CBG.9.05

Darren Moon (Co-Teacher) KSW 4th floor

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Course content: We live in a visual age. Images play an increasingly important role in shaping international political events and our understanding of them. The objective of this course is to examine how visual sources - maps, photographs, film, television, new media - influence international political phenomena, our perception of them, and public responses to them. The course has conceptual, empirical, and practical objectives.

At a conceptual level students will acquire knowledge of key theoretical and methodological debates necessary to study visual international politics. At an empirical level, students will gain a better understanding of several concrete instances where images helped to shape international political phenomena, from wars to humanitarian crises, from global social movements to alternative world orders. At a practical level, students will learn how to make a short documentary film.

Teaching: This course is delivered through lectures and classes totalling a minimum of 20 hours across Autumn Term. Students

on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay-diary and 1 project in the AT.

AT week 7: 750-word essay diary

AT week 8: Rough edit of film - approx. 2 minutes duration

Indicative reading: Bleiker, Roland, ed. (2018) *Visual Global Politics*. London: Routledge.

Callahan, William A. (2020) *Sensible Politics: Visualizing International Relations*. New York: Oxford University Press.

Harman, Sophie. (2019) *Seeing Politics: Film, Visual Method, and International Relations*. McGill-Queens University Press.

Rose, Gillian (2016) *Visual Methodologies: An Introduction to Researching with Visual Materials*, 4th ed. London: Routledge.

Berger, John (1972) *Ways of Seeing*. London: Penguin.

Evans, Jessica and Stuart Hall, eds. (1999) *Visual Culture: The Reader*. London: Sage.

Mirzoeff, Nicolas (2015) *How to See the World*. London: Pelican Books.

Shapiro, Michael J. (2011) *Cinematic Geopolitics*. London: Routledge.

Assessment: Project (50%) in the AT.

Essay Diary (50%, 2500 words) in the WT.

The project will be a 5-minute documentary film, which will be made by teams of 3 students.

IR319 Half Unit Not available in 2023/24

Empire and Conflict in World Politics

This information is for the 2023/24 session.

Teacher responsible: Prof Tarak Barkawi CBG.9.03

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: This is a course about war and empire. Many peoples and places in the world have been shaped by imperialism. This course explores some of the violent dimensions of the imperial past and present. It imagines world politics as a space of co-constitution and war or violent conflict as a form of social interconnection. The course considers armed conflict in imperial context from colonial "small war" through to the War on Terror. It looks at how warfare shapes (and is shaped by) the societies, cultures and polities that populate world politics. It also considers some of the intellectual traditions that have arisen out of the experience of, and inquiry into, colonial violence, from the thought of resistance leaders to subaltern and postcolonial studies. The premise of the course is that imperial warfare and violence have been generative forces in shaping world politics, well beyond the times and places of specific battles and killings.

This course familiarises students with some themes from scholarship on empire and conflict in the social sciences and humanities. This involves, first, understanding the limitations of the sovereign nation-state as the basic unit of world politics. For most people in most times and places, international relations have taken imperial form of one kind or another. What would it mean to take empire seriously in international thought and inquiry? The course approaches this question by looking at the relations between empire and globalisation in historical and theoretical context. Second, although much scholarship on empire concerns economy and culture, the history of empire is a history of continual warfare and armed resistance. Such "small wars" have shaped society and politics in both the core and periphery of the international system, and often continue to do so long after the guns fall silent (as for example in the case of the US and the Vietnam War). The course will cover the histories, strategies and theories associated with such wars and their effects. Third and finally, the course will explore the intersection between empire and knowledge in political

theory and social inquiry. Not only did anti-colonial resistance produce its own theorists, such as Frantz Fanon and Mao Zedong, but in recent decades empire has been the site of new turns in social and political theory and inquiry, as for example in subaltern studies and post-colonialism. The course will introduce students to this work and its applications to understanding world politics.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Lent Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

Lectures

- 1) Introduction: Empire and International Relations
- 2) Empire/History/Globalization
- 3) Empire, the Regions, and World Politics
- 4) Politics/Strategy/War
- 5) Decolonising War
- 6) Orientalism and 'Small war'
- 7) Revolutionary Guerrilla War
- 8) Counterinsurgency
- 9) Empire after 1945
- 10) The War on Terror and the Colonial Present

Undergraduate Class Topics

- 1) Empire and History
- 2) Orientalism
- 3) The Politics of Imperial War
- 4) War and Society
- 5) The Global Colour Line
- 6) Empire and the United Nations
- 7) Counterinsurgency
- 8) Case Study: The Wars in Vietnam
- 9) Empire and the War on Terror

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Note: Required texts for this course change every year

- 1 Frantz Fanon, *The Wretched of the Earth* (London: Penguin, 2001 [1961]).
- 2 Tzvetan Todorov, *The Conquest of America: The Question of the Other* (Norman: University of Oklahoma Press, 1999 [1984])
- 3 Doty, Roxanne Lynn. (1996) *Imperial Encounters: The Politics of Representation in North-South Relations*. Minneapolis, MN: University of Minnesota Press.
- 4 Richard Drinnon, *Facing West: The Metaphysics of Indian-Hating and Empire-Building* (Norman: University of Oklahoma Press, 1997).
- 5 Michel Rolph-Trouillot, *Silencing the Past: Power and the Production of History* (Boston: Beacon, 2015 [1995])
- 6 Edward Said, *Culture and Imperialism* (New York: Vintage, 1994 [1993]).
- 7 Mark Mazower, *No Enchanted Palace: The End of Empire and the Ideological Origins of the United Nations* (Princeton: Princeton University Press, 2009)
- 8 Wolf, Eric R. (1997[1982]) *Europe and the People Without History*. Berkeley: University of California Press.

Assessment: Essay (100%, 4000 words) in the ST.

IR320 Half Unit Not available in 2023/24

Europe's Institutional Order

This information is for the 2023/24 session.

Teacher responsible: Prof Karen Smith CLM 4.09

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available to General Course students.

Pre-requisites: Students must have completed International Organisations (IR203).

Course content: Europe is the region with the highest density of organisations in the world. This course will analyse the importance

of European organisations for both their member states and international relations in general. It will review the development of Europe's institutional order in the post-war era and its evolution since the end of the Cold War. Much emphasis will be placed on the evolution of West European organisations such as the Council of Europe, the European Union and NATO, but attention will also be given to European organisations in the former communist bloc, trans-European organisations, and sub-regional organisations.

Lecture and class topics:

1. Europe in International Relations
2. Building Europe's Institutional Order I: NATO and the Warsaw Pact
3. Building Europe's Institutional Order II: economic integration in the European Community
4. Building Europe's Institutional Order III: economic cooperation in EFTA and COMECON
5. Europe's Institutional Order and the ending of the Cold War
6. Europe's security and defence institutions after the Cold War I: what is NATO for?
7. Enlarging Europe's institutional order after the Cold War I: NATO
8. Integration in Europe after the Cold War: the European Union since Maastricht
9. Enlarging Europe's institutional order after the Cold War II: the EU
10. Europe's security and defence institutions after the Cold War II: the case of the Ukraine crisis 2014

Teaching: 20 hours of classes in the WT.

20 hours of classes in the LT.

In line with departmental policy, students on the course will have a reading week in Week 6.

Independent study based on the readings is required. Classes provide an opportunity to discuss issues in depth in a small group setting. Attendance at classes is mandatory, as is adequate preparation for participation in each class discussion. Students will be required to give at least one presentation on one of the topics on the class schedule. Each presenter should provide the class with a one-page outline of the presentation. Presentations should be a maximum of 15 minutes long.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the WT. Students will produce one short 1,500 word formative essay due in week 6 of the Lent Term. The essay question is to be selected from a list provided to students in week 1. The purpose of the essay is to provide experience of summarising succinctly and engaging with complex empirical and theoretical material, develop research and writing skills necessary for the assessed essay, and to assist in the development of ideas and arguments for the assessed essay. Independent study, based on the readings indicated on the reading list, is required.

Students will also produce a 1.5-2 page outline of their summative essay in week 9. The outline will include the essay question/title, an overview of the argument, a draft of the structure, and an indicative reading list. The reading list must include primary sources. Feedback will be given to students by the end of week 10.

Indicative reading: Brent Nelsen and Alexander Stubb, *The European Union: Readings on the Theory and Practice of European Integration* 4th ed (Palgrave, 2014)

Stuart Croft et al, *The Enlargement of Europe* (Manchester University Press, 1999)

Peter Stirk and David Weigall (eds), *The Origins and Development of European Integration* (Pinter, 1999)

Desmond Dinan, *Europe Recast: A History of the European Union*, 2nd ed (Palgrave, 2014)

Desmond Dinan, *Ever Closer Union? An Introduction to the European Union*, 4th ed. (Palgrave, 2010)

Mette Eilstrup-Sangiovanni (ed), *Debates on European Integration: A Reader* (Palgrave, 2006)

William Hitchcock, *The Struggle for Europe: the Turbulent History of a Divided Continent 1945 to the Present* (Anchor Books 2004)

Ben Rosamund, *Theories of European Integration* (Palgrave, 2000)

Assessment: Essay (100%, 3000 words) in the ST.

IR322 Half Unit Not available in 2023/24

Sovereignty, Rights and Justice: Issues in International Political Theory

This information is for the 2023/24 session.

Teacher responsible: Prof Chris Brown

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Combines insights and concepts from political theory and international relations theory, and focuses on modern debates on sovereignty, the rights of states, individuals and peoples, and international justice.

Sovereignty and the norm of non-intervention; the contemporary international human rights regime; the ethics of war and violence; the politics of humanitarian intervention; the politics of international criminal law and the ICC; global social justice. Further details will be provided at the start of the session.

Teaching: 20 hours of seminars in the WT.

(10 x 2 hr seminars.)

Week 6 is a reading week, in line with departmental policy

Formative coursework: Students will write one formative essay (1,500 words) due end of week 6; they can use this to develop ideas for the summative essay but students will not be allowed to 'cut and paste' their formative work into the summative essay. Students will produce a 2 page outline of the assessed essay in Week 10. This will set out the research question, an overview of the argument, a draft structure and indicative reading list. Students will receive approval of the research topic and feedback on the outline by the end of Week 11.

Indicative reading: A detailed list of references will be provided: Suitable introductions include : Chris Brown, *International Society, Global Polity: An Introduction to International Political Theory* (2015) and Anthony Lang, *International Political Theory* (2014);

Assessment: Essay (100%, 4000 words) in the ST.

Students will write an essay of 4,000 words on a topic approved by the course convener due in Week 1 of the LT. Full details and guidance will be provided on Moodle and in the first seminar.

IR323 Half Unit

Gendered/ing International Politics

This information is for the 2023/24 session.

Teacher responsible: Dr Katharine Millar CBG.8.13

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Course content: The course examines the gendering of both the practices/events studies as international politics and the discipline/study of international relations. The course is grounded in feminist theory, and provides students with an introduction to feminist epistemologies and methods. Students will discover how 'gender matters' to the study and conduct of international politics through an examination of several substantive areas of international politics, including security, development, and NGOs and transnational social movements. These overarching topics are balanced with issue-specific case studies (e.g. sexual/sexualised violence in conflict; gendering of informal economy) to be discussed in class. Particular thematic attention will be paid to the on-going construction of global/transnational hierarchies that are gendered and gendering.

Indicative topics to be covered:

- 1 Where (and why) is gender in international politics?
- 2 Introduction to feminist theory and its relation to the 'international'
- 3 Gender, epistemology and the study of international politics
- 4 Gender, the economy, and hierarchy
- 5 Intersectionality: gender, race, empire
- 6 Queer theory and sexuality in IR
- 7 Femininity, masculinity and security
- 8 Gender and poverty/development
- 9 Gender, the Environment and Climate Change
- 10 Feminist activism, NGOs and transnational social movements

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Winter Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: An essay question and outline due in WT

Indicative reading: C Enloe, *Bananas, beaches and bases: making feminist sense of international politics*, rev'd 2nd ed (University of California Press, 2014)

C Weber, *Queer International Relations: sovereignty, sexuality and the will to knowledge* (OUP, 2016)

A Sisson Runyan and S Peterson, *Global Gender Issues in the New Millennium* 4th ed (Westview Press, 2013)

L Sjoberg, *Gender, War and Conflict* (Polity, 2014)

B Ackerly, J True and M Stern (eds), *Feminist Methodologies for International Relations* (CUP, 2006)

Assessment: Coursework (25%) in the WT.

Essay (75%, 3000 words) in the ST.

The coursework is comprised of:

- One (500 word max) blog posts, to a Moodle forum on a week assigned by the instructor (marked with grade, 15%).
- Two (250 word max) response to colleagues' blog posts (completion/participation grade, 10%, for 5% each)

Marks are docked for late submission

IR324 Half Unit Not available in 2023/24

The Practices of Transitional Justice

This information is for the 2023/24 session.

Teacher responsible: Prof Jens Meierhenrich CLM.6.07

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students must have completed International Organisations (IR203) and International Political Theory (IR200).

Course content: This taught seminar introduces students to the theory and history of transitional justice. It explores the logic of amnesties, apologies, memorials, lustrations, reparations, trials, truth commission, and related responses to genocide, crimes against humanity, and other mass atrocities. Examining the whole array of historical and contemporary solutions to the problems of 'radical evil' (Immanuel Kant), the seminar assesses the conditions for - and limitations to - achieving order, truth, and justices in domestic politics and international affairs. Utilising insights from political science, law, history, sociology, and philosophy, the seminar will compare alternative institutional designs and divergent choices and consider their real, and imagined, social, political and economic consequences across space and time, from Athens to South Africa to Libya.

Teaching: 20 hours of seminars in the WT. 1 hour of seminars in the ST.

In line with departmental policy, students on the course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students are required to research and write one essay (2,500 words). In addressing a given essay topic, students must seek to integrate, where applicable, theory and history and bring empirical

evidence to bear on the research question they have chosen.

Essays must be fully—and carefully—referenced using one of the major conventions consistently. Submissions are due in Week 8 and must be made in hard copy. Feedback is provided by the course teacher, who is responsible for marking essays.

Several criteria are applied in the evaluation of student essays, notably: (1) Originality of argument: How unexpected is the advanced claim? (2) Use of literature: Has relevant scholarship been digested and put to good use? (3) Soundness of analysis: Is the inquiry comprehensive and logically consistent? (4) Organisation of evidence: Have argument and evidence been introduced and presented in a compelling manner? (5) Validity of findings: Does the argument remain valid when applied empirically? (6) Clarity of presentation: Are grammar, punctuation, and references flawless?

Indicative reading: Indicative reading list:

Jon Elster, *Closing the Books: Transitional Justice in Historical Perspective* (Cambridge: CUP, 2004)

Jens Meierhenrich, Alexander Laban Hinton and Lawrence Douglas (eds), *The Oxford Handbook of Transitional Justice* (Oxford: OUP, 2017)

Tricia D Losen, Leigh A Payne and Andrew G Reiter (eds), *Transitional Justice in Balance: Comparing Processes, Weighing Efficacy* (Washington DC: USIP, 2010)

Rosalind Shaw and Lars Waldorf (eds), *Localizing Transitional Justice: Interventions and Priorities after Mass Violence* (Stanford: Stanford University Press, 2010)

Kathryn Sikkink, *The Justice Cascade: How Human Rights Prosecutions are Changing World Politics* (New York: Norton, 2011)

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

IR325 Half Unit Not available in 2023/24

The Situations of the International Criminal Court

This information is for the 2023/24 session.

Teacher responsible: Prof Jens Meierhenrich CBG.10.01

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: This taught seminar introduces students to the practices of the International Criminal Court (ICC). Focusing on the ICC's ongoing investigations and prosecutions - its so-called 'Situations' - the course exemplifies the politics of international law in the context of one of the most embattled international organisations in the international system. On the foundation of 'practice theory', it blends methodological approaches from law, the social sciences and the humanities. By adopting an evolutionary perspective to the ICC, the seminar raises - and answers - pertinent theoretical questions about institutional design and development of in international politics. Empirical cases to be discussed include the settings of the ICC's nine Situations (the DRC, Uganda, the Central African Republic, Sudan, Kenya, Libya, Cote d'Ivoire, and Mali) as well as the territories of the ICC's preliminary examinations (Afghanistan, Columbia, Georgia, Guinea, Iraq, Nigeria, Palestine, and Ukraine). Students will learn to work with both court documents and theoretical texts.

Teaching: This course is delivered through classes totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of in-person classes/classes delivered online. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students are required to research and write one essay (2,500

words). In addressing a given essay topic, students must integrate theory and history and bring empirical evidence to bear on the research question they have chosen. Essays must be fully - and carefully - referenced using one of the major conventions consistently. Submissions are due in Week 8 and must be in hard copy. Feedback is provided by the course teacher, who is responsible for marking essays.

Several criteria are applied in the evaluation of student essays, notably: (1) originality of argument. (2) use of literature: has relevant scholarship been digested and put to good use? (3) soundness of analysis: is the inquiry comprehensive and logically consistent? (4) organisation of evidence: have argument and evidence been introduced and presented in a compelling manner? (5) validity of findings: does the argument remain valid when applied empirically? (6) clarity of presentation: are grammar, punctuation and references flawless?

Indicative reading: Indicative reading list:

Robert Cryer, Darryl Robinson, and Sergey Vasiliev, *An Introduction to International Criminal Law and Procedure*, Fourth edition (Cambridge: Cambridge University Press, 2019)

Jens Meierhenrich (ed) 'The Practices of the International Criminal Court', *Law and Contemporary Problems Special Issue*, Vol.76, Nos 3 & 4 (2014)

Patrick S Wegner, *The International Criminal Court in Ongoing Intrastate Conflicts: Navigating the Peace-Justice Divide* (Cambridge: CUP, 2015)

Assessment: Essay (100%) in the ST.

IR326 Half Unit Not available in 2023/24

The Rule of Law: A Global History

This information is for the 2023/24 session.

Teacher responsible: Prof Jens Meierhenrich CBG.10.01

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History, BSc in Politics and International Relations and LLB in Laws. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Course content: This taught seminar course introduces students to the theory and history of the rule of law, one of the most frequently invoked - and least understood - ideas of political theory and practice. What exactly is the rule of law? Is it still a harbinger of liberty or just the latest manifestation of neocolonial domination? Is it a moral ideal or merely a means to an end? Can it really facilitate democracy, development, and economic growth? And why is the rule of law compatible with authoritarianism? In answer to these and related questions debated in law and the social sciences as well as in international organizations, governments, think tanks, and NGOs the world over, this interdisciplinary course introduces students to important advocates of the rule of law (from A. V. Dicey to the World Bank) and also to notable critics (including Thomas Hobbes, Carl Schmitt, Judith Shklar, and Eric Posner). Through close readings of seminal texts and a global analysis of historical cases and trajectories, students will gain an innovative and in-depth understanding of the promise - and limits - of one of the most foundational concepts of the modern world.

Teaching: This course is delivered through classes totalling a minimum of 20 hours across Lent Term. This year, some or all of this teaching will be delivered through a combination of in-person classes/classes delivered online.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to research and write one formative essay (1,000 words) on an assigned topic and due in Week 7 of Lent Term. This essay will be used to sketch out ideas for the summative essay. Essays must be fully - and carefully - referenced using one of the major conventions consistently.

Indicative reading: Jens Meierhenrich and Martin Loughlin, eds., *The Cambridge Companion to the Rule of Law* (Cambridge: Cambridge University Press, 2021)

Tom Ginsburg and Tamir Moustafa, eds., *Rule by Law: The Politics of Courts in Authoritarian Regimes* (Cambridge: Cambridge University Press, 2008)

R. W., Kostal, *A Jurisprudence of Power: Victorian Empire and the Rule of Law* (Cambridge: Cambridge University Press, 2005)

José Maria Maravall and Adam Przeworski, eds., *Democracy and the Rule of Law* (Cambridge: Cambridge University Press, 2003)

Friedrich Kratochwil, *The Status of Law in World Society: Meditations on the Role and Rule of Law* (Cambridge: Cambridge University Press, 2014)

Eric Posner, *The Perils of Global Legalism* (Oxford: Oxford University Press, 2009)

Assessment: Essay (100%, 4000 words) in the ST.

Essays must be fully - and carefully - referenced using one of the major conventions consistently.

IR327 Half Unit

World Orders in Historical International Relations

This information is for the 2023/24 session.

Teacher responsible: Dr Martin Bayly

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Pre-requisites: Students should have completed International Relations: Theories, Concepts and Debates (IR100) and International Political Theory (IR200), but exceptions to this will be considered.

Course content: What is 'world order', how has it changed historically, and what sort of world order shifts are we living through today? These are some of the biggest questions in International Relations. This course approaches world order through two avenues: theory and history. First the course offers a focused introduction to theorising world order, revisiting topics of anarchy, hierarchy, and the practices of world order making. Second, and in parallel with this theoretical element, the course will cover historical instances of world orders and world order making. We will consider interstate orders, civilizational and cultural orders, imperial orders, 'liberal' orders, anti-colonial and insurgent orders, as well as orders of capital, knowledge, and 'non-human' orders. By the end of the course, students will be able to (1) theorise order from different theoretical standpoints; (2) speak knowledgeably about recent works on international order in IR; (3) identify and describe the historical evolution of international order on a global scale; and (4) critically assess the contemporary international/world order and its possible futures.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours in the Winter Term. Each week, in preparation for their classes, students will consider a practical example of world order and engage with a recent substantial text in historical International Relations and world order studies. Complementing this, a weekly lecture will offer intellectual

scaffolding – supplying the theoretical tools and conceptual criteria associated with a particular approach to the theory and history of international and world order.

Formative coursework: This course adopts a ‘students as producers’ approach to formative coursework. At the start of the course, students will be assigned to one of the weekly topics and in agreement with the course convenor they will decide on the type of content they want to contribute. This may be a class presentation, blog post, v-log, or other content that will form a key element to classwork and will be uploaded to the course web-page. Collectively the students will thereby produce a course archive that will provide a core resource for their later summative assessment.

Indicative reading: Adler, Emanuel. *World Ordering: A Social Theory of Cognitive Evolution*. Cambridge: Cambridge University Press, 2019.

Allan, Bentley B. *Scientific Cosmology and International Orders*. Cambridge, United Kingdom ; New York, NY: Cambridge University Press, 2018.

Zarakol, Ayse. *Before the West: The Rise and Fall of Eastern World Orders*. New edition. Cambridge New York, NY Melbourne New Delhi Singapore: Cambridge University Press, 2022.

Assessment: Essay (100%, 3000 words) in the WT.

IR345

Global Politics of China

This information is for the 2023/24 session.

Teacher responsible: Prof William A. Callahan CBG.9.05

Availability: This course is available on the BSc in International Relations and BSc in International Relations and Chinese. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: China has long been of interest to students of International Relations due to its historical role as the major power of East Asia, and its current status as a great power with influence in geopolitics, world trade, and global governance. The course lectures examine the development of China’s relations with the world in terms of history, culture, and policy-making, and consider how power works in various ways: economic power, military power, soft power, hard power, sharp power, propaganda, and United Front Work. The remainder of the course analyses case studies on China’s relations with the United States, Russia, Japan, Hong Kong and Taiwan, Southeast Asia, and on the topical issues of Chinese IR theory, grand strategy, the Belt and Road Initiative, the environment, global cyber-politics, and Chinese world orders (including analysing science fiction for China’s futuristic ‘galactic politics’).

Teaching: 10 hours of lectures and 12 hours of classes in the AT. 18 hours of classes in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will complete two 1500-word essays during the course, and will make two presentations to the seminar. It is permissible for the presentations to be on the same

topics as the essays.

Indicative reading:

• Economy, Elizabeth C., *The World According to China*, Oxford University Press, 2022.

• Breslin, Shaun. *China Risen? Studying Chinese Global Power*, Bristol University Press, 2021.

• Yahuda, Michael, *The International Politics of the Asia-Pacific*, 4 edn. London: Routledge, 2019.

• Zhao, Suisheng, *China’s Big Power Ambition under Xi Jinping: Narratives and Driving Forces*, Routledge, 2021.

Assessment: Essay (75%, 2500 words) in the ST.

Presentation (25%) in the AT and WT.

During the course of the seminars students will participate in a group presentation (25%) and submit a 2500 word essay (75%) at the start of the ST.

It is permissible for the summative essays to be on the same topic(s) as the formative essays and presentations.

IR349

Conflict and Peacebuilding

This information is for the 2023/24 session.

Teacher responsible: Dr David Rampton

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Pre-requisites: A basic background knowledge of the subject themes or related areas would be an advantage.

Course content: This course is intended for those interested in theoretical and practical approaches to the question of peace, the problems of war, conflict and violence, and responses to these issues, particularly in the form of liberal peacebuilding and statebuilding. The course is divided into three unequal but interconnected parts. The first part examines ideas and debates about the concepts, causes, contexts, dynamics and representations of conflict, violence and war. The second explores and problematises the concept of peace and the nature, meanings and goals of peace and peacebuilding. This leads into the third section which is concerned with a critical engagement with the range of international responses to conflict associated with the discourses and practices of liberal peacebuilding and statebuilding. The classes explore the nexus between theory and practice.

Although the course and its readings are mainly theoretical and conceptual rather than empirical, students are encouraged to apply the ideas to actual cases, past and present. The course reading list has been selected in order to explore the contentions between mainstream and critical (e.g. feminist, postcolonial and poststructural) perspectives.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn and Winter Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

The course teaching includes film showings linked to some of the lecture themes, followed by a discussion session. These are normally delivered in-person but may occasionally involve online screening and discussion sessions

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 essay in the WT.

Formative essays 1,500 words.

Indicative reading: Mark Duffield *Global Governance and the New Wars* (Zed Books 2014).

Sinisa Malesevic *The Sociology of War and Violence* (Cambridge University Press 2010).

Gezim Visoka *Peace Figuration after International Intervention: Intentions, Events and Consequences of Liberal Peacebuilding* (Routledge 2018)

Edward Newman and Karl DeRouen (eds.) Routledge Handbook of Civil Wars (Routledge, 2016).

Jorg Kustermans, Tom Sauer and Barbara Segaeert (eds.) A Requiem for Peacebuilding? (Palgrave Macmillan 2021).

Jacob Bercovitch, Victor Kremenyuk and William Zartman (eds.) The Sage Handbook of Conflict Resolution (Sage Publications, 2009)

Oliver Richmond (ed.) Palgrave Advances in Peacebuilding: Critical Developments and Approaches (Palgrave MacMillan UK 2010).

Hugh Miall, Oliver Ramsbotham, and Tom Woodhouse, Contemporary Conflict Resolution: The Prevention, Management and Transformation of Deadly Conflicts, 3rd ed (Polity, 2011).

Assessment: Essay (40%, 2000 words) in the WT.

Essay (60%, 3000 words) in the ST.

IR354 Half Unit

Governing International Political Economy: Lessons from the Past for the Future

This information is for the 2023/24 session.

Teacher responsible: Dr James Morrison CBG.9.12

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Some background knowledge of international political economy, such as that provided by IR206 'International Political Economy', will be useful for students taking this course.

Course content: Who governs the global economy? How do they do so? And to what ends do they govern it? This course examines these questions by examining the canonical theories of—and state approaches to—the challenges of global economic governance across the last several centuries. While this course takes history seriously, the primary objective is to use the history to tease out generalisable insights into those challenges we face today. More generally, this course of study will demonstrate the incomparable insights historical thinking offers in addressing contemporary challenges. History has always been central to the study and practice of international political economy. The most influential scholars and practitioners of international political economy have repeatedly turned to history both to explain, and to offer a fresh perspective on, the great challenges of their day. This course is designed to help students cultivate that invaluable skill and habit of mind.

Proceeding from the seventeenth century to the present, it examines:

- seminal theorists' particular treatments of international political economy
- the ongoing, timeless debate between these theorists
- the major shifts in the global economic order
- the interaction between theories and policy in each shift

The course begins with mercantilism and the 'age of empires.' It then explores the great critics of mercantilism—Adam Smith and David Hume—and the relationship between their critique and the revolutions in IPE that followed. It goes on to analyse the rise of so-called 'English' political economy and the 'First Era of Globalisation' in the 19th Century.

The course then pivots to consider two major challenges to this hegemony of thought and practice. First, it traces the development of socialism from an internal critique through the writings of Marx & Engels to an instantiated alternative system in the early Soviet Union. Second, it considers the German Historical School's return to mercantilism and the ascent of the American Empire onto the global stage. These clash of empires then leads to the cataclysm of the First World War.

In the interwar period, the course analyses the failed attempts to restore the global order. It analyses the radical challenge posed by fascist political economy. It also considers the variety of responses

issued by different types of liberals. The course then transitions into a discussion of the several postwar orders, from Keynes's neoliberal institutionalism to Gandhi's rejection of Eurocentric political economy.

Last, the course turns to the modern era. It analyses the trajectories of the postwar global trade and financial systems. It then turns to contemporary issues, such as the post-Cold War order, the 2008 Global Financial Crisis, and the rise of emerging markets.

Teaching: 15 hours of lectures and 15 hours of classes in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay and 2 presentations in the AT.

Indicative reading: Thomas Munn. England's Treasure by Foreign Trade.

Adam Smith. An Inquiry into the Nature and Causes of the Wealth of Nations.

Karl Marx. Communist Manifesto.

JM Keynes. General Theory of Employment, Interest, & Money.

Gandhi, Mohandas K. Hind Swaraj or Indian Home Rule.

Assessment: Essay (100%, 2500 words) in the WT.

IR355 Half Unit

Economic Diplomacy

This information is for the 2023/24 session.

Teacher responsible: Dr Boram Lee, CBG.8.09

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Some background knowledge of international political economy, such as that provided in IR206 'International Political Economy', will be useful to students taking this course.

Course content: The course introduces students to the theories and analytical frameworks relating to decision-making and negotiation in international economic relations and enables them to develop the skills needed to apply these to cases. It discusses the roles of the main actors, institutional settings and processes involved in domestic decision-making and international economic negotiations, and their interaction. The aim of the course is to provide participants with the ability to understand and analyse the factors shaping international negotiations in a range of policy issues from trade and investment, to the environment, economic summits and finance.

Teaching: This course is delivered through a combination of classes including lectures and workshops totalling a minimum of 20 hours during Winter Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

The course is composed of two modules. The first module (Week 1-3) discusses analytical toolkits for understanding economic diplomacy. During these initial weeks, students will learn about four approaches to economic diplomacy: a) balance of power and coercive bargaining, b) negotiations within international institutions, c) the effect of domestic politics, and d) the role of ideas and issue framing.

The second module (Week 4-10) features specific negotiation tactics frequently adopted by policymakers and important challenges that negotiators face in policy processes.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will be expected to produce a short policy memo in the WT.

Indicative reading:

- Bayne, Nicholas and Woolcock, S. *The new economic diplomacy: decision-making and negotiation in international economic relations*, Third edition, Ashgate, Stephen 2013.

- Koremenos, Barbara. *The continent of international law: Explaining agreement design*. Cambridge University Press, 2016.
- Davis, Christina L. "Food fights over free trade." *Food Fights over Free Trade*. Princeton University Press, 2011.
- Oye, Kenneth A. *Economic discrimination and political exchange: World political economy in the 1930s and 1980s*. Princeton University Press, 1993.

Assessment: Take-home assessment (100%) in the ST. Take-home assessment (100%) in the ST. Students will be expected to produce a policy memo of no more than 2500 words.

IR367 Half Unit

Political Economy of Climate Change

This information is for the 2023/24 session.

Teacher responsible: Dr Noah Zucker [Office TBC]

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Pre-requisites: There are no prerequisites, though some background knowledge of international political economy, such as that provided in IR206 International Political Economy, might be useful to students taking this course.

Course content: Why has climate change proven to be such a challenging issue for global governance? How will intensified climate disruptions and decarbonization transform countries' economies and politics? Who are the winners and losers of these transitions and how are they shaping climate governance today? This course will address these questions in a survey of the political economy of climate change. We will explore cutting-edge research on climate politics and critically analyze various theoretical concepts and models, assess the advantages and drawbacks of different empirical approaches, and draw connections to core debates in international political economy and political science. Students will gain familiarity with the frontier of climate politics scholarship, learn how to constructively critique academic work, and develop skills in designing and executing rigorous political economy research.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce an outline of the summative climate policy proposal in the WT.

Indicative reading:

- Tamma Carleton and Solomon Hsiang. 2016. "Social and Economic Impacts of Climate." *Science* 353(6304).
- Timothy Mitchell. 2011. *Carbon Democracy: Political Power in the Age of Oil*. New York: Verso.
- Robert Falkner. 2016. "The Paris Agreement and the New Logic of International Climate Politics." *International Affairs* 92(5): 1107–1125.
- Scott Barrett. 2003. *Environment and Statecraft: The Strategy of Environmental Treaty-Making*. New York: Oxford University Press.
- Jeff Colgan, Jessica Green, and Thomas Hale. 2021. "Asset Revaluation and the Existential Politics of Climate Change." *International Organization* 75(2): 586–610.

- Sabrina Arias and Christopher Blair. 2022. "Changing Tides:

Public Attitudes on Climate Migration." *Journal of Politics* 84(1): 560–567.

Assessment: Essay (100%, 2500 words) in the ST.

IR368 Half Unit

The Political Economy of Trade

This information is for the 2023/24 session.

Teacher responsible: Dr Marta Soprana CBG.8.10

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Pre-requisites: Some background knowledge of international political economy, such as that provided in IR206 International Political Economy, will be useful to students taking this course.

Course content: This course provides the basis for understanding the current trends in international trade, including the growth of unilateralism and protectionist pressures and the crisis of the world trading system. This understanding will be based on:

- the intellectual history of free trade and how this has shaped and continues to shape policy;
- an understanding of trade theory;
- background on changes in the nature of trade and investment in the 21st century;
- an analyses the structural tensions in the trading system as well as the domestic economic and political factors shaping policy;
- knowledge of the underlying trends towards the use of preferential and plurilateral rather than multilateral cooperation in trade and investment
- the core issues in current trade negotiations;
- and thus an understanding of the current fundamental challenges facing the international trading system.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Winter Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the WT.

The formative essay is 1,500 words.

Indicative reading:

- Heydon. K and Woolcock. S (eds) (2012) *The Ashgate Research Companion to International Trade Policy*, HF 1379 A 82: (e-book and hard copies available).
- Hoekman. B and Kosteki. (2009) *The Political Economy of the World Trading System* HF 1359 H69 (e-book available but reasonably price in paperback so something to purchase).
- Martin. L (ed) (2014) *Oxford Handbook of The Political Economy of International Trade*, (available as an e-book).

Assessment: Take-home assessment (100%) in the ST.

IR369 Half Unit

Politics of Money in the World Economy

This information is for the 2023/24 session.

Teacher responsible: Prof Jeffrey Chwieroth CBG.10.12

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Pre-requisites: Some background knowledge of international political economy, such as that provided in IR206 International Political Economy, will be useful to students taking this course.

Course content: This course is designed as a component of the study of a global system in which the management and mismanagement of money and finance are matters of fundamental consequence for international relations. It is intended to be of particular relevance to students specialising in international political economy. This is a course in applied international political economy theory. It deals with the basic concepts regarding the creation, use and management of money and finance in the global system. Students are then introduced to the political foundations of international monetary governance. Issues covered include the use of national currencies as international money, the politics of exchange rate adjustment, the operations of banks and other institutions in international money and capital markets, the evolution of global financial markets, the relationship between states and markets in the arena of global finance, international monetary cooperation, and the choices of monetary and financial policies open to developed and developing countries. The course emphasises that contemporary issues, such as international financial crises, international financial regulation and the politics of IMF conditionality, are best understood in a broader theoretical and analytical context.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Autumn Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the AT.

The essay will be 1500 words. Students are also expected to make presentations on topics of their choice

Indicative reading: No one book covers the entire syllabus, but the following general works provide a useful introduction:

- B Eichengreen, *Globalizing Capital* (2019);
- T Porter, *Globalization and Finance* (2005);
- D Andrews (ed), *International Monetary Power* (2006);
- J Frieden, *Currency politics: the political economy of exchange rate policy* (2015);
- E Helleiner, *The status quo crisis: global financial governance after the 2008 meltdown* (2014);
- C. Norloff, *America's global advantage: US hegemony and international cooperation* (2010);
- B Cohen, *Currency power: understanding monetar rivalry* (2015)
- J Chwieroth and A Walter, *The Wealth Effect* (2019)

Assessment: Take-home assessment (100%) in January.

IR372 Half Unit Not available in 2023/24 Nuclear Non-proliferation and World Politics (Special Topics in International Relations)

This information is for the 2023/24 session.

Teacher responsible: Professor Etel Solingen and Dr Ulrich Sedelmeier

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: This course will apply theories of international relations to explain why some states have pursued nuclear weapons whereas most others have abstained. What is the role of the nonproliferation regime, major powers, international norms, democracy, and globalization on decisions to acquire or renounce nuclear weapons? How do international institutions, major powers and other states respond to violations of international legal commitments not to develop nuclear weapons? What is the relative effectiveness of sanctions and positive inducements

in persuading states to abandon nuclear weapons programs? Countries under focus will be North Korea, Iran, Japan, Taiwan, Iraq, Libya, South Korea, India, Pakistan, Israel, and Egypt, among others. There will be simulations of negotiations geared to dissuade actual or potential nuclear proliferators from pursuing such designs.

Teaching: 9 hours of lectures and 13 hours and 30 minutes of classes in the WT.

Formative coursework: 1 x Essay (1,500 words) and 1 x Essay Plan (1 page) in the Winter Term.

Indicative reading: Etel Solingen, *Nuclear Logics: Contrasting Paths in East Asia and the Middle East* (Princeton University Press, 2007)

William Potter and G. Mukhatzhanova, "Divining Nuclear Intentions" *International Security* 33, 1 (2008)

Nicholas L. Miller, "The Secret Success of Nonproliferation Sanctions," *International Organization* 68, No. 4 (2014): 913-944.

Nina Tannenwald, *The Vanishing Nuclear Taboo?* *Foreign Affairs* November/December 2018.

Etel Solingen (ed.), *Sanctions, Statecraft, and Nuclear Proliferation* (Cambridge University Press, 2012)

Assessment: Essay (100%, 3000 words) in the ST.

IR373 Half Unit

China and the Global South

This information is for the 2023/24 session.

Teacher responsible: Professor Chris Alden 9th Floor IDEAS, PAN

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Pre-requisites: Foreign Policy Analysis (IR202)

Course content: This course focuses on the substantive role that China plays in the Global South where its preponderance of material power and putative developing country status confers upon it a dominant position in bilateral and regional political economies. China's economic position, coupled to an astute use of finances flowing from its mercantilist policies, has enabled it to become the leading trading partner and a significant investor in the developing world. Moreover, the Global South is increasingly figuring in Beijing's expanding security interests and soft power provisions. Interpretations embedded in prevailing academic discourses like socialisation, threat and peaceful rise take on new meaning when studied through the lens of ties with developing countries. Understanding how dynamics in this relationship are impacting upon a host of global and contemporary issues (BRICs, multilateralism, peacekeeping, the environment) is crucial to the shape of the 21st century.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Autumn Term. Students on this course will have a reading week in Week 6, in line with departmental policy. The course is delivered in cooperation with Dr. Alvaro Mendez (PAN 9.01C).

Formative coursework: Students will be expected to produce 1 book review in AT.

Indicative reading: Chris Alden & Lu Jiang. (2019). *Brave new world: debt, industrialization and security in China-Africa relations*. *International Affairs*, 95(3), 641-657. doi:<https://doi.org/10.1093/ia/iiz083>

Gaston Fornes & Alvaro Mendez. (2018). *The China-Latin America Axis: Emerging Markets and their Role in an Increasingly Globalised World* (2 ed.). New York: Palgrave Macmillan

David Shambaugh (Ed.) (2016). *The China Reader: Rising Power* (6th ed.). Oxford, UK: Oxford University Press,

Assessment: Exam (75%, duration: 2 hours) in the January exam period.
Presentation (25%) in the AT.

IR377 Half Unit

The Politics of Peace & Security in Sub-Saharan Africa

This information is for the 2023/24 session.

Teacher responsible: Dr Stephanie Schwartz

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: This course explores the politics of peace, civil wars, and security in sub-Saharan Africa as it relates to the broader global context. Using post-independence sub-Saharan Africa as the background, we will explore the causes of civil war and determinants of peace, as well as the different political responses embraced by African leaders and politicians to other security challenges characteristic of the post-colonial period. We will study with a range of cases, including Rwanda, Burundi, Sudan and South Sudan, through which we will engage topics such as the relationship between identity and conflict, the origins of insurgency, conflict prevention, and post-conflict justice and reconciliation.

Teaching: 20 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students should post 2 discussion questions each week to Moodle. They will also do a written response to a film assigned for viewing. Through the film response the students will practice applying theories learned in class to analyze the film in response to a guided prompt. This type of analysis will be central to their summative take-home assessment.

Assessment: Class participation (20%).

Take-home assessment (80%) in the ST.

IR378 Half Unit Not available in 2023/24

Critical War Studies

This information is for the 2023/24 session.

Teacher responsible: Prof Tarak Barkawi CBG.9.03

Tarak Barkawi is Professor in the Department of International Relations at the London School of Economics and Political Science. He studies warfare between the West and the non-European world, past and present. He writes on the pivotal place of armed force in globalization, imperialism, and modernization, and on the neglected significance of war in social and political theory. He is author of *Soldiers of Empire, Globalization and War* and many scholarly articles.

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: War transforms the social and political orders in which we live, just as it obliterates our precious certainties. Nowhere is this more obvious than in the fate of truths offered about war itself. War regularly undermines expectations, strategies and theories, and along with them the credibility of those in public life and the academy presumed to speak with authority about it. This course begins with the recognition that the unsettling character of war has been a profound opportunity for scholarship. For it is precisely in war's disordering and unsettling of politics and identities that the socially and historically generative powers of war are exposed. In bending, stretching and even breaking institutions and societies, war reveals them to us anew and offers perspectives obscured in times of peace. At the same time, these disruptions shape and inform the course and character of war. This violent but fecund juncture between war, society and politics is what this course seeks to understand.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

This course consists of three elements all taught in Michaelmas: a lecture series, classes, and a film series.

This course is an advanced undergraduate option. It is a text-based course and not a survey course. That means we will concentrate on a few required readings—read carefully and in-depth. Rather than being given a list of readings for you to select from, you will be given specific, required readings that everyone must read.

For each class, you will be doing required reading of approximately half a book, sometimes more. For each lecture, you are given one

recommended background reading. In planning your time, you should read first for the class and second for the lectures. It is essential that you do the required reading for each class before class.

The lecture series provides concepts, ideas and histories—intellectual scaffolding—against which to read the course texts. It is an essential and helpful aid to your reading.

The film series, attendance at which is voluntary, provides an opportunity for sociability and the exploration of course themes in popular cultures.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: Note: required texts change every year
Hew Strachan, *Clausewitz's On War: A Biography* (New York: Grove Press, 2007)

Paul Fussell, *The Great War and Modern Memory* (New York: Oxford University Press, 1975)

William H. McNeill, *The Pursuit of Power: Technology, Armed Force, and Society since A.D. 1000* (Chicago: Chicago University Press, 1982)

Michael Sherry, *In the Shadow of War: The United States since the 1930s* (New Haven: Yale University Press, 1995)

Anders Engberg-Pedersen, *Empire of Chance: The Napoleonic Wars and the Disorder of Things* (Cambridge: Harvard University Press, 2015)

Debbie Lisle, *Holidays in the Danger Zone: Entanglements of War and Tourism* (Minneapolis: University of Minnesota Press, 2016)

Antoine Bousquet, *The Scientific War of Warfare: Order and Chaos on the Battlefields of Modernity* (London: Hurst, 2009)

Susan Jeffords, *The Remasculinization of America: Gender and the Vietnam War* (Bloomington: Indiana University Press, 1989)

Bruno Cabanes, *The Great War and the Origins of Humanitarianism 1918-1924* (Cambridge: Cambridge University Press, 2014)

Assessment: Essay (100%, 4000 words) in the WT.

The course will be 100% assessed by essay due after the end of term and based on a topic of the student's choice. Students will be given a list of questions to work from and may choose a question provided or develop their own question (based on course texts) in discussion with the course coordinator.

IR379 Half Unit

Eastern Europe: Domestic Regimes and Foreign Policies

This information is for the 2023/24 session.

Teacher responsible: Prof Tomila Lankina CBG 10.13

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: None. If students have not taken Foreign Policy Analysis (IR202), they can consider attending the lecture of Foreign Policy Analysis (IR202) to enhance their knowledge and understanding.

Course content: The course offers an analysis of key issues in the development of the domestic, foreign and security policies of East European countries. The course covers the various factors shaping the domestic, foreign and security policy of Ukraine, Belarus, Russia, as well as countries in Central Asia, the Caucasus, and the Baltic states. It will explore both the domestic aspects of politics, political regime and protest; and foreign policy and security issues, such as national liberation struggles, geopolitical orientations, membership in regional organizations and alliances. It will also discuss Russia's war against Ukraine and Ukraine's popular movements and mobilization against Russia's aggression. Other topics that we will discuss in class are the economic power projection of countries in the region and those of external players

like China and the European Union; the geopolitics of oil and gas; soft power and soft security aspects of the foreign policies of the countries studied in this class. We will also discuss authoritarian and democratic diffusion processes in the 1990s and 2000s; the role of the Russian state media and propaganda and attempts of other states to resist it; the role of ideas and norms in shaping national politics and geopolitical orientations; and the historical legacies influencing the politics and political regimes of the countries in the region. Each of the ten topics covered will speak to the major theoretical debates on the factors shaping domestic and foreign policy and students will be encouraged to evaluate the merits of the various theories based on available evidence.

The background class focuses on the domestic and international politics of the countries studied, in the twentieth century, including national liberation struggles and Soviet forcible annexations, and we will also discuss the period immediately preceding the collapse of the Soviet Union. The subsequent sessions analyse the domestic and foreign policies of the countries surveyed with a special focus on the 2000s, including processes of democratization and authoritarian backsliding, domestic civil society and protests, energy politics, the role of China, cross-border cooperation among states in Central Asia and the Caucasus, ethnic and religious conflicts, European Union accession and/or prospects for accession, the role of the US in the various states, and Russia's wars against Georgia and Ukraine.

Some of the questions to be addressed in the course of the ten seminars and lectures are: How have domestic institutions and political regimes changed over the course of the twentieth and twenty-first centuries? What are the impacts of domestic politics on foreign policy making and thinking? How has Russia sought to use traditional security mechanisms, hard power and soft power to influence its neighbours and what mechanisms have the target states devised to resist Russian hard and "soft" power? What kind of relationships have the countries in the region forged with countries in Asia, Africa, the Middle East, North and South America, and with the EU and other non-EU European states? And what are the factors shaping these relationships? What role do energy politics play in the ties and alliances that countries have forged?

Teaching: 10 hours of lectures and 15 hours of classes in the AT. Students are expected to engage in independent study, using the reading list to deepen their knowledge and understanding of the subject. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the AT. The class presentation will be on the same topic as the topic covered that week and will help students better understand the subject of that seminar. Each student will write a review of one of the required readings in no more than 300 words.

Indicative reading:

Assessment: Essay (80%, 2500 words) in the WT. Class participation (20%) in the AT.

IR380 Half Unit**The Politics of Inequality and Development**

This information is for the 2023/24 session.

Teacher responsible: Dr Victoria Paniagua

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students must have completed International Political Economy (IR206).

Some background knowledge of international political economy, such as that provided in IR206 International Political Economy, will be useful to students taking this course.

Course content: This course examines the interaction between markets and states to understand the causes and consequences of economic development and inequality. We will explore these topics in light of contemporary theoretical, substantive, and methodological debates within the fields of international and comparative political economy. The empirical focus of this course is the developing world. We will cover case studies in a variety of regions, including Latin America, Africa, Middle East, Asia, and Eastern Europe. However, because the approach of this course is comparative, historical, and analytical, to disentangle patterns in these regions we will also discuss the trajectories of advanced economies such as the United States and England. The course is divided in two main parts. The first one is dedicated to exploring within country income and wealth inequalities. We will address the following questions:

What are the political (and market) forces behind inequality?

What can be done to curb down inequality and what is the role of the state in this process? How do citizens' preferences affect and are affected by inequality? Furthermore, we will examine the political consequences associated with the growing spread of income and wealth inequalities, particularly, its effects on regime type, democratic backsliding, the political influence of the top 1%, and recent trends in political polarization. The second part of the course is devoted to addressing between countries economic inequality, in other words, why are some countries wealthier than others? To answer this question, we will study why some countries have developed earlier (and more) than others and why some have fell behind.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. There will be 10 weekly lectures of one hour each, shared with IR480. In addition, starting in Week 1, lectures will be followed by a weekly one hour class, where the required readings and lecture content will be discussed. Students are expected to read all required readings before attending the lectures and to actively engage during both the lecture and the seminar sessions.

Formative coursework: Formative coursework includes acting as a discussion leader; and submitting a discussion comment and question.

Discussion leader role:

Students will choose 1 (one) week in which they would like to perform as the discussion leader during the seminar session. The discussion leader will: (1) propose a set of 2 or 3 questions related to the required readings for discussion in class; (2) read in advance the pre-seminar comments posted on the Moodle forum (see below) and integrate these into our conversation; (3) moderate the discussion; (4) draw a brief summary/conclusion at the end of the discussion.

Students will choose 4 (four) weeks in which they will submit a brief comment, critique and/or question on the week readings (max. 100 words). It should be uploaded to the seminar group Moodle forum at least 24 hours before the seminar session. These brief comments will be used by the instructor and discussion leader as input for in-class discussion.

Indicative reading: Piketty, T. (2013). *Capital in the 21st Century*. Harvard University Press. (Chapter 1).
Milanovic, B. (2016). *Global inequality: A New Approach for the Era*

of Globalization. Harvard University Press. (Chapters 1-3).

Lockwood, E. (2021). The international political economy of global inequality. *Review of International Political Economy*, 28(2), 421-445.

Atkinson, A. (2015). *Inequality: What can be done?* Harvard University Press (chapters 1-3).

Kuznets, S. (1955). Economic growth and income inequality. *The American Economic Review*, 45(1), 1-28.

Milanovic, B. (2010). *The haves and the have-nots: A brief and idiosyncratic history of global inequality*. Basic Books (AZ).

Assessment: Presentation (10%) in the WT.

Take-home assessment (90%) in the ST.

IR391 Half Unit**Globalisation and the State in Developing Countries**

This information is for the 2023/24 session.

Teacher responsible: Dr Natalya Naqvi

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped).

Course content: What role should the state play in economic development? How has globalisation affected what the state can still actually do to promote economic development? Between the 50s and 80s, the East Asian 'developmental state' model delivered rapid industrialisation through extensive state intervention, seemingly refuting not only the claims of free market economics, but also of dependency theory: that poor countries could never develop due to the very nature of the capitalist world system. Since the 80s, the applicability of the East Asian model was challenged in new ways. Structural changes in the global political economy, including the end of fixed exchange rates, increased capital mobility, the development of international financial markets, privatisation of the commanding heights of the economy, the proliferation of restrictive trade and investment agreements, and the rise of global value chains, led many to argue that even if it was economically beneficial for other countries to implement the East Asian model, this was no longer possible because globalisation had dramatically constrained the power of the nation state. Others argued that concerns over the constraints posed by globalisation were overblown, and that domestic interests, institutions, and ideas were responsible for holding back structural transformation of the economy.

This course will combine debates in IPE, over how the process of globalisation has transformed the capacity for state action, with debates in the political economy of development over the role of the state in the process of late development. Students will gain an understanding not only of the debate over how much domestic policy autonomy developing countries have after globalisation, but also of the kinds of policies they need this policy space for. Problems of underdevelopment are approached through the prism of both core-periphery power relations, and power relations arising from the domestic productive structure. By the end of the course, students will be able to:

1. Make theoretically informed arguments in written and oral form, supported by empirical evidence on key questions in the study of globalization and late development
2. Critically engage (understand and be able to point out the weaknesses and strengths of) with various theoretical approaches (dependency, developmentalist, liberal, Marxist) to the study of late development
3. Critically engage with various theoretical approaches (hyperglobalists, constraints school, sceptics, compensation hypothesis) to the study of globalisation

4. Apply these theoretical frameworks to empirical situations

Teaching: 10 hours of lectures and 15 hours of classes in the AT. This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours in Autumn Term. 1 hour lectures and 1.5 hour seminars.

Formative coursework: Students will receive feedback on a PowerPoint presentation on a pre-assigned essay question, similar to that set for the summative assessment. The presentation will be in effect an essay outline. This will provide students with the opportunity to refine their work prior to grading. The feedback will focus not only on academic content, but also presentation skills. Students will also be set one test in a random week. This will test their understanding of key concepts covered so that they know where their weaknesses lie. It will also incentivize students to keep up to date with the core readings.

Indicative reading:

- Kicking Away the Ladder, Ha Joon Chang
- States and Markets, Susan Strange
- States Versus Markets, Herman Schwartz
- Globalisation in Question, Hirst, Thompson and Bromley
- The Myth of the Powerless State, Linda Weiss
- Reclaiming Development Economics, Chang and Grabel
- The Developmental State, Woo-Cummings
- Business and the State in Developing Countries, Maxfield and Schneider

Assessment: Essay (90%, 1800 words) in the AT. Class participation (10%).

A summative seminar participation grade will be given (10%). This will reflect engagement with the lectures and readings. This will enhance the quality of seminar discussion, ensuring that students get the most out of contact hours, and get the most out of interactions with their peers.

A summative essay of 1800 words on a choice of pre-set essay questions will count for 90% of the grade.

IR395 Half Unit

The Politics of Displacement and Refuge

This information is for the 2023/24 session.

Teacher responsible: Dr Stephanie Schwartz

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Priority will be given to students on the BSc in International Relations programme.

Course content: The number of forcibly displaced people has nearly doubled in the last decade. Amid this rise in forced migration, how are states, international organisations, and local communities responding? What is causing this increase in displacement and what are the political consequences - both in the Global North and the Global South? What are the everyday realities of being forcibly displaced? This course takes on these questions as we examine the politics of displacement and the evolution of the global asylum and refugee protection regime.

The course begins with an overview of the historical and legal origins of the asylum and refugee protection regime, including who qualifies as a refugee and asylum-seeker under international law and why. We then explore the disconnect between this foundation and the realities of displacement and mobility today. The course continues with an analysis of the causes and consequences of displacement, followed by an examination of the evolution of state, international and local responses to asylum-seeking. Throughout the course we pay particular attention to the politics of refugee and IDP hosting in the Global South, where the majority of displaced persons live, as well as refugees' and migrants' own perspectives on the experience and politics of displacement.

By the end of the course students will be able to articulate complex

issues related to forced migration and global asylum governance; synthesize and critique scholarly work from a variety of disciplines - including political science, sociology, and anthropology; and analyze the causes of displacement and state responses to asylum-seeking.

Teaching: Lectures and classes totalling a minimum of 20 hours in AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 case study and 1 presentation in the AT.

Students can choose between one of two formative coursework options:

Option 1: Students can produce a case study proposal and a class presentation in the Autumn Term (AT).

Option 2: Students can produce an essay outline and weekly reflection posts in tandem with a volunteer posting (this formative coursework option is available only if the student secures a volunteering position previously agreed with the course convener). Both of these assessments will elicit feedback to aid the student in the preparation of the summative case study submission.

Indicative reading:

- Fiddian-Qasmiyeh, Elena et al., eds. Oxford Handbook of Refugee and Forced Migration Studies. Oxford: Oxford University Press. 2014.
- Nguyen, V.T. ed., 2018. The displaced: Refugee writers on refugee lives. Abrams
- Rawlence, B., 2016. City of thorns: Nine lives in the world's largest refugee camp. Picador.
- Tinti, P. and Reitano, T., 2018. Migrant, Refugee, Smuggler, Saviour. Oxford University Press.
- Hannah Arendt. "We Refugees" (1943) (11 pp)
- Gammeltoft-Hansen, T., 2014. International refugee law and refugee policy: The case of deterrence policies. Journal of Refugee Studies, 27(4), pp.574-595.

Assessment: Assessment path 1

Case study (80%) in the WT.

Class participation (20%) in the AT.

Assessment path 2

Essay (80%, 2500 words) in the WT.

Class participation (20%) in the AT.

Students can choose one of two summative assessment paths listed above.

IR398

Dissertation

This information is for the 2023/24 session.

Teacher responsible: Dr Mathias Koenig-Archibugi CBG.3.38

Availability: This course is available on the BSc in International Relations, BSc in International Relations and Chinese and BSc in Politics and International Relations. This course is not available as an outside option nor to General Course students.

Course content: Dissertations offer students the chance to enhance their knowledge through an in-depth analysis of a question in an area of particular interest to them. The dissertation assesses different skills from examinations and other forms of assessment. The aim is to develop the ability to make independent judgements and decisions about a promising and feasible research question, and on selecting and analysing the most important and relevant material. The outcome will be a coherent, sustained, systematically developed, and well supported argument on a topic, typically combining empirical material and theoretical insights, within the field of International Relations. The subject of the dissertation can be anything within the field of International Relations that the International Relations Faculty are able to supervise. The dissertation may draw entirely on secondary literature. There is no requirement for the use of primary sources and original material such as unpublished documents, archives, or personal interviews.

Candidates submit their dissertation of up to 10,000 words,

excluding bibliography, but including notes and any appendices and tables, at the beginning of the Spring Term (ST). Candidates submit the title of their dissertation for approval by the IR398 Course Co-ordinator before the end of the Autumn Term (AT), and an outline of their project early in Winter Term (WT). Students also receive written feedback from their supervisors on a 2,000-3,000 word dissertation sample as long as this is submitted by the end of the Winter Term (WT).

Teaching: This course is delivered through a combination of classes, workshops, and lectures totalling a minimum of 10 hours and 30 minutes across Autumn Term (AT) and Winter Term (WT). In addition to formal teaching, students will see their dissertation supervisors regularly during both terms (usually twice per term, for a maximum of six times in total over the course of the year) for meetings of around 30 minutes each. The IR398 Course Co-ordinator will also run small group tutorials in the Winter Term (WT) and will be available for consultation throughout the year to help students address problems as and when they arise. IR398 contains lectures on how to formulate a research question, how to structure a dissertation, and how to find and use evidence. Classes explore how questions are formed, how literature is used, and how evidence is deployed. Workshops and tutorials are a chance for students to discuss outlines, and receive guidance on issues of structure, research design and evidence. There may also be a chance for some students to present their work.

Advice and Assistance

The IR398 Course Co-ordinator will provide guidance on the nature and process of writing an IR dissertation, through the course lectures, classes and workshops, and office hours. They will also be available for consultation throughout the year to help students address problems as and when they arise.

While students will receive ample guidance and feedback on their work, the dissertation is an independent project. As such, although students will have a supervisor, and colleagues both in IR and other departments can be approached for informal advice, no Faculty member can read a full draft of the thesis.

Students can proceed with IR398 only if they have a confirmed dissertation supervisor. Students who do not have a confirmed supervisor by the beginning of the course will be required to change their course selection and secure a place in another course or set of courses before the relevant course selection deadlines and based on course availability at that time.

Assessment: Dissertation (100%, 10000 words) in the ST.

LL100

Legal Studies Skills

This information is for the 2023/24 session.

Teacher responsible: Dr Sonya Onwu CKK 5.07
Additional teacher TBA

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is not available as an outside option nor to General Course students.

Course content: A non-assessed course to help students develop their legal skills. By the end of this course, students will be able to:

1. actively read legal material, and produce comprehensive working notes.
2. engage in independent, self-directed research.
3. critically evaluate a range of legal materials.
4. present clear written arguments in a structured, logical and well-reasoned way, and supported by substantiating evidence.
5. identify and apply the relevant law to the facts of a problem scenario in a structured and methodical manner.
6. assess and reflect upon their own skills development, identify areas for improvement, and the appropriate mechanisms for doing so.

Teaching: An initial two lectures will take place during Induction Week, followed by 10 weekly 45 minute classes. This course includes a reading week in Weeks 6 of Michaelmas Term.

Formative coursework: Each week, students will be asked to upload a sample of work. Students will receive feedback in-class on their work.

Indicative reading: Readings will be taken from the assigned weekly material for the LLB first year core courses to avoid students having to read additional pieces. A guide to readings will be provided at the start of the course.

LL104

Law of Obligations

This information is for the 2023/24 session.

Teacher responsible: Professor Nick Sage and Professor Emmanuel Voyiakis

Availability: This course is compulsory for second year students on the BA in Anthropology and Law. It is not available to any other students.

Course content: Introduction to the law of contract especially contract formation. Introduction to the law of torts, with a focus on negligence.

Teaching: The Contract and Tort sections of the course will be each take up a period of 10 teaching weeks, with the Contract teaching chiefly concentrated in Autumn Term and the Tort teaching concentrated in Winter Term.

The Contract section of the course will be taught through a weekly in-person lecture and one hour class.

The Tort section of the course will be taught through two hours of pre-recorded lectures per week in combination with a weekly in-person, two hour seminar.

In Spring Term there will be a two hour revision seminar covering both Contracts and Torts.

Formative coursework: Students will be expected to complete two formative assignments, set and marked by their class or seminar teacher.

Indicative reading: A general reading list will be issued at the commencement of each term. Students should follow the advice of their course convenor as to the textbooks and other sources to be read.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

LL106

Public Law

This information is for the 2023/24 session.

Teacher responsible: Professor Jo Murkens
Additional Teachers: Professor Martin Loughlin, Professor Thomas Poole, Dr Andrew Scott, and Professor Conor Gearty.

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course covers: the conceptual framework of public law; central government and the executive; parliament; multi-layered government (the European Union, devolution and local government); judicial review; and civil liberties and human rights.

Teaching: 16 hours of lectures and 9 hours of classes in the AT. 20 hours of lectures and 10 hours of classes in the WT.

This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students will be expected to produce one essay in the AT and one essay in the WT.

Other assignments will be set by the class teacher or the course convenor, as required.

Indicative reading: Basic texts: Martin Loughlin, *The British Constitution: A Very Short Introduction* (Oxford: Oxford University

Press, 2013); A. Le Sueur, M. Sunkin & J. Murkens, *Public Law: Text, Cases, and Materials* (Oxford: Oxford University Press, 5th edn, 2023).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

LL108

Criminal Law

This information is for the 2023/24 session.

Teacher responsible: Dr Abenaa Owusu-Bempah

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the 'general part' of criminal law and selected areas of the special part of criminal law in the context of theories of the aims and functions of criminalisation. The course will discuss the limits to criminalisation; the conceptual framework of criminal liability (conduct, responsibility, capacity, defences); homicide; sexual offences; non-fatal violence against the person; property offences (with particular reference theft, fraud, robbery and burglary); secondary participation in crime; attempts, conspiracy, encouragement; 'pre-inchoate' offences; regulatory offences.

Teaching: 16 hours of lectures and 9 hours of classes in the AT. 20 hours of lectures and 10 hours of classes in the WT.

This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: A minimum of two pieces of written work will be required (one per term), usually one essay and one problem.

Indicative reading: A detailed reading list will be distributed at the start of the course. A number of criminal law textbooks are available, and students will be expected to read the relevant parts of the most recent editions of one of these, e.g. Nicola Lacey, Oliver Quick & Celia Wells, *Reconstructing Criminal Law*; Jeremy Horder, *Ashworth's Principles of Criminal Law*; Jonathan Herring, *Criminal Law: Text, Cases and Materials*; M. Allen, *Introduction to Criminal Law*. They will also be expected to read all cases and materials marked as primary on the detailed reading lists provided.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

LL141

Introduction to Legal Systems

This information is for the 2023/24 session.

Teacher responsible: Prof Nicola Lacey

Dr. Jacco Bomhoff, Prof. Neil Duxbury

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is not available as an outside option nor to General Course students.

This is an intensive foundation course that prepares students to take LL1xx level courses.

Course content: The course is designed as an intensive foundation course to familiarise law students with the basic characteristics and functioning of legal systems. While most LLB courses focus on particular areas of law, covering the main doctrinal rules and principles which govern them, this course is distinctive in equipping students with three further important tools for a rounded understanding of law, its practical operation, and its impact in society. These are, first, an examination of the main paradigms elucidating the nature of law itself; second, a detailed study of the rules, protocols and conventions which govern the judicial interpretation and development of law in the English legal system; of the continent of Europe, and the common law system of the United States, implying key difference in the constitutions of

these legal systems; third, an examination of the distinctive ways in which legal rules and processes are embedded in particular institutional structures and traditions, and of the ways in which these institutions have been changing in recent decades, with implications for the social impact of law and for the relationship between law and other social rules, conventions and regulatory systems. The course, which will run over the first two weeks of the Autumn Term, will be prefaced by a session in Welcome week, introducing students to varieties of legal order - civilian and common law; national; sub-national; transnational; international - along with a comparative and historical analysis of the different rules, protocols and institutional frameworks characterising these systems.

The course will include the following topics:

Welcome week: Varieties of Legal Order

1 What is law?

2 Reading Law: Statutory interpretation

3 Reading Law: Common law and judicial precedent

4 Adjudication and Due Process: the role of the trial

5 The Judiciary: Does it matter who the judges are?

6 Developments in Civil Justice; Alternative forms of Dispute Resolution

7 Social Ordering beyond Formal Law: Legal Pluralism

8 Legal Decision-making beyond Lawyers: Lay Participation

Teaching: 18 hours of lectures in the AT.

The course will run over the first two weeks of the Autumn Term with an additional session in Week 0 (Welcome Week).

Material covered in this course will be discussed in classes that are scheduled as part of Contract Law, Tort Law, Public Law, and Criminal Law.

Formative coursework: Essay of up to 1500 words assessed via a Pass/Fail grade.

The content and skills we aim to develop in this intensive course are designed to feed into students' approach to their four full unit courses, and will accordingly be incorporated in the formative assessments of those courses. This will serve both to underline the relationship between this intensive course and the four full unit courses, and to make most effective use of student time.

Indicative reading:

LL142

Contract Law

This information is for the 2023/24 session.

Teacher responsible: Dr Nicholas Sage

Additional teachers include: Paul MacMahon, Charlie Webb

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Contracts are essential to most business transactions. Contract law also shapes interpersonal relations in many other areas of life. This course introduces the general principles of contract law, including contract formation, interpretation, defences (eg misrepresentation, duress), breach, and remedies. Students will learn to apply these principles to resolve concrete legal problems. Students will also be invited to reflect on whether the existing legal doctrines are justifiable in light of their important social consequences.

The focus will be on the common law of contract as developed in England. This body of law is articulated largely through judicial decisions, supplemented by some detailed legislation. The course will aim to foster the lawyerly skills of closely reading, reasoning about, and debating the key legal sources.

Teaching: 16 hours of lectures and 9 hours of classes in the AT. 20 hours of lectures and 10 hours of classes in the WT. 2 hours of lectures and 1 hour of classes in the ST.

The first two hours of classes in the AT will introduce aspects of the legal system.

The course is delivered through weekly two-hour lectures and one-hour classes (with mid-term reading weeks in AT and WT).

Formative coursework: Two formative written assessments, one in AT and one in WT.

There will be opportunities to complete further optional assessments (eg writing practice exam answers).

Indicative reading: We will read a wide range of case law, as well as statutes and legal scholarship. A representative selection of five readings:

- Gibson v Manchester City Council [1979] 1 WLR 294 (HL)
- Williams v Roffey Bros & Nicholls (Contractors) Ltd [1991] 1 QB 1 (CA)
- Co-operative Insurance Society Ltd v Argyll Stores (Holdings) Ltd [1998] AC 1 (HL)
- Consumer Rights Act 2015
- Stephen A Smith, 'Contracting Under Pressure: A Theory of Duress' [1997] Cambridge Law Journal 343

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

LL143

Tort Law

This information is for the 2023/24 session.

Teacher responsible: Prof Emmanuel Voyiakis

Tim Liau, Nick Sage, Charlie Webb

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: One person's carelessness causes another to suffer a broken leg, damage to their car, or a financial loss. Someone plays music too loudly all through the night, disturbing their neighbours' sleep. One person defames another, or touches their body without their consent. These are examples of torts. Tort law tells us when the person who has suffered injury has a civil right to require the injurer to make repair. Our course examines the fundamental principles and functions of tort law; the general tort of negligence and its application in specific settings (e.g. actions of public authorities, occupiers' liability); the distinction between negligence and strict liability; liability for defective products;

defamation; the land-related torts; the main economic torts; the kinds of injury that tort law deems worthy of compensation (especially the complex position with regard to psychiatric and economic harm); and the kinds of remedy that it provides to claimants.

Teaching: 16 hours of lectures and 9 hours of classes in the AT. 20 hours of lectures and 10 hours of classes in the WT.

The course is delivered through a combination of weekly two-hour lectures and weekly one-hour classes over the Autumn and Winter terms. The course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: One piece of coursework per term.

Indicative reading: There are several decent tort textbooks, the list below is indicative. Most textbooks are updated frequently, so generally aim to consult the latest editions. Most items listed below are available as e-books through the LSE library, but you may want your own hard copy.

- Witting Ch., Street on Torts
- McBride N. – Bagshaw R., Tort Law
- Lunney M. – Oliphant K., Tort Law: Text and Materials
- Goudkamp J. – Nolan D., Winfield & Jolowicz on Tort
- Stevens R., Torts and Rights

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

LL201

Law and State Power

This information is for the 2023/24 session.

Teacher responsible: Prof Thomas Poole

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content:

Outline:

The course provides an opportunity to take a deep dive into the modern state. We investigate how the state organises and exercises power, and how such power is legitimated and controlled. At all times we remain alert to the pathologies of state power - corruption, mismanagement, capture by elites - and what might be done to prevent them. Classic themes surrounding law and state power - such as tensions between technocracy and democracy, bureaucratic rationality and charismatic authority, agency autonomy and political accountability - are given contemporary resonance by studying topical themes of importance, such as populism and illiberal democracy, citizenship deprivation and the politics of pandemic management.

Syllabus:

Theories of power. The nature of the modern state. Law and government. Power and prerogative. Soft law: the role of policies and guidance in governance structures. Technocracy and democracy. Corruption and administration. The 'contracting state'. Risk and the regulatory state. Crisis management including COVID-19 case study. The legal control of state power. Biopolitics - citizenship deprivation and the Illegal Migration Bill.

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term, in the form of a two hour seminar. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: At least one formative essay per term.

Indicative reading: Martin Loughlin, *The Idea of Public Law* (Oxford, 2004)

Carol Harlow and Richard Rawlings, *Law and Administration* (Cambridge, 4th ed., 2021)

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL202

Commercial Contracts

This information is for the 2023/24 session.

Teacher responsible: Dr Paul Macmahon (Autumn Term) and Dr Joseph Spooner (Winter and Spring Terms)

Additional Teachers: Professor Hugh Collins

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: Completion of LL104 - Law of Obligations is normally a prerequisite.

Course content: LL202 Commercial Contracts is a study of the general principles of English law governing commercial contracts. It approaches the topic in two parts. Part 1, 'Fundamentals of Commercial Contracting' is effectively a study of advanced contract law, and examines several important aspects of, or themes in, the law's regulation of commercial contracting. The topics are chosen because of their intrinsic interest, and because of the opportunity offered for an advanced contextualised examination of contract law. This part explores significant aspects of contract law such as contractual interpretation and the doctrines of mistake and frustration. Other topics include pre-contractual negotiations, multi-party transactions, and agreed remedies. Part 2, 'Fundamentals of Commercial Law' examines core topics in commercial law, offering students an overview of the most significant areas in this field, and applying contract law in commercial contexts. It focuses on sales contracts; banking contracts; credit and secured transactions; agency; assignment; commercial dispute resolution; and international commercial contracts.

Topics are likely to include:

Part 1 – Fundamentals of Commercial Contracting

- Agreed Remedies
- The interpretation of contracts
- Mistakes in contracts
- Frustration of contracts
- Relational contracts and implied duties of good faith performance
- Multi-party projects (privity of contract)

Part 2 – Fundamentals of Commercial Law

- Agency
- Assignment
- Sale of goods contracts
- Credit and security
- Banking contracts
- Commercial dispute resolution
- International commercial contracting

Teaching: Two hours of lectures and one hour of class per week in Autumn Term and Winter Term. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: At least one formative (unassessed) essay per term.

Indicative reading: For the advanced contract law portion of the course, students may choose as the main text either

- Chen-Wishart, *Contract Law*, (7th edn, OUP 2022) or
- McKendrick, *Contract Law* (15th edn, Red Globe Press 2023).

Up-to-date casebooks include

- Burrows, *A Casebook on Contract*, (7th edn, Hart Publishing 2020) and
- McKendrick, *Contract Law: Text, Cases and Materials* (10th edn, OUP 2022).

For the commercial law topics, there is no main textbook but

- McKendrick (ed.), *Goode and McKendrick on Commercial Law* (6th edn, Penguin 2021) is used for some topics.

For cases and materials, you might find useful

- Clarke, Hooley, Munday, Sealy, Tettenborn, and
- Turner, *Commercial Law: Text, Cases, and Materials*, (6th edn, OUP 2020).

For topic overviews, you may also wish to try

- Burrows (ed.), *English Private Law* (3rd edn, OUP 2013), available online through the LSE Library website.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL203

Company Law

This information is for the 2023/24 session.

Teacher responsible: Prof Eva Micheler

Availability: This course is available on the BA in Anthropology and Law, BSc in Accounting and Finance and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Although this course is open to second and third year law students, experience suggests that third years are more successful.

Pre-requisites: It is helpful to have studied or be studying Property II, although this is not a formal pre-requisite.

Course content: This course examines the nature of the legal vehicles available for the carrying on of entrepreneurial activities, paying particular attention to the analysis of companies. It examines the core features of the company. These are: separate legal personality, limited liability, centralised management, the allocation of control rights, and free transferability of shares. The course analyses how the law implements these features and the policy trade-offs among them.

We analyse the relationship between various groups with an interest in the affairs of the company – shareholders, directors, managers, financiers, trade creditors, employees, consumers and regulators - and the balance of power between them. The course looks beyond purely technical legal issues and encourages a critical examination of the system and proposals for reform. Registered companies are creatures of statute and close attention to the Companies Act 2006 and related legislation is essential. However, no attempt is made to deal with all, or even most, of the complex technical aspects of the legislation and non-statutory regulation. The course concentrates on the problems and policies underlying the legislation, with some more detailed consideration of selected provisions. The influence of European Directives and Regulations on UK company law is also reflected.

Despite the importance of statute, common law and equitable principles have played a major role in the development of company law by the courts. This has relied heavily on principles of agency and the equitable principles relating to fiduciaries. Case analysis is therefore a major element of the course. Excellent case books are available.

This subject covers a wide range of businesses - from the one-person firm (the local greengrocer or plumber) to family companies, to major multinational groups listed on the Stock Exchange. This wide coverage plus the policy emphasis means that this course should appeal to all students with an interest in the economic, social and political aspects of business organisations and not only to those wishing to practise commercial law.

Topics usually covered are:

- Introductory concepts and themes including limited liability and corporate personality.
- Capacity of companies & the powers of individuals acting for companies.
- Shares and share capital.
- Directors: powers, duties and corporate governance issues.
- The role of shareholders in companies: rights, decision-making and governance

Teaching: This course will have two hours of lectures each week and a two-hour class every fortnight. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: At least one formative (unassessed) essay per term.

Indicative reading: Detailed lists will be provided during the course. The primary recommended text is: Eva Micheler, *Company Law - A*

Real Entity Theory (OUP 2021); Brenda Hannigan, *Company Law* (6th edition, 2021). We also recommend: Sealy and Worthington, *Cases and Material on Company Law* (12th edn, 2022).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL204

Advanced Torts

This information is for the 2023/24 session.

Teacher responsible: Professor Emmanuel Voyiakis

Additional Teachers: Professor Charlie Webb, Dr Rachel Leow and Dr Timothy Liao

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: Students must have completed Law of Obligations (LL104).

Course content: If you liked Obligations, you are going to love this. Advanced Torts aims to broaden and deepen your knowledge of tort law in two ways. First, we look at a range of important torts that are not covered in the Obligations course. Second, we tackle the 'big' theoretical questions of tort law. You will emerge from the course not only with a better understanding of the rules and principles that govern specific torts, but also with the ability to engage critically with different views about the overall purpose and the moral and social function of tort law.

Here are some topics we usually cover:

- Theories of tort law: what is the aim of tort law, and do judges need a theory of it?
- Corrective justice vs economic theories of tort law
- Tort law, moral responsibility and luck
- Tort law and the 'compensation culture'
- The position of public authorities in negligence
- Tort actions for unwanted pregnancy/birth & children born with disabilities
- Strict liability regimes: liability for ultra-hazardous activities; liability for defective products; the justification of strict liability.

Teaching: This course is delivered through seminars totalling a minimum of 40 hours across Autumn Term and Winter Term. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: At least one formative essay per term

Indicative reading: If all goes according to plan, the depth we will attain in the course and the focused nature of our reading lists for each topic will make textbooks redundant, or at least useful only as a basic introduction to the issues we will be covering. This means that the tort textbook you may have purchased for the LL104 Law of Obligations course will probably be good enough for our purposes. Here are some other introductory or general texts that you might like to consult from time to time, just to get a different perspective on things, and some more advanced or specialized books from which we will be setting reading for certain topics:

- General Texts: (try to consult their latest edition but earlier ones will probably do)
- W E Peel & J Goudkamp, *Winfield & Jolowicz on Tort*;
- N J McBride & R Bagshaw, *Tort Law*;
- B A Hepple et al., *Hepple and Matthews' Tort Law: Cases and Materials*;
- S Deakin, A Johnston & B Markesinis, *Markesinis and Deakin's Tort Law*.

Advanced/Specialised Texts:

- Arthur Ripstein, *Private Wrongs* (2016);
- Emmanuel Voyiakis, *Private Law and the Value of Choice* (2017);
- Ernest Weinrib, *The Idea of Private Law* (1995);
- David Owen (ed.), *Philosophical Foundations of Tort Law* (1997);
- Robert Stevens, *Torts and Rights* (2007);
- Jules Coleman, *Risks and Wrongs* (2002);

- Guido Calabresi, *The Cost of Accidents: A Legal and Economic Analysis* (1970);

- John Oberdiek, *Philosophical Foundations of the Law of Torts* (2014);

- Nicolette Priaulx, *The Harm Paradox: Tort Law and the Unwanted Child in an Era of Choice* (2007).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL205

Medical Law

This information is for the 2023/24 session.

Teacher responsible: Dr Cressida Auckland

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Medical law is a rapidly developing and increasingly important subject. The unprecedented restrictions on liberty during the pandemic, and the very real possibility that the NHS might run out of ventilators became central political issues in 2020. New technologies, such as genome editing, egg freezing and face transplants, are invariably accompanied by demands for their regulation. In this course we examine the legal framework within which health services are provided, and we explore some of the difficult legal and ethical dilemmas that arise when determining the limits of medical innovation.

Subjects include resource allocation; public health; malpractice litigation; consent; mental capacity; medical decision-making for children; mental health law; confidentiality; clinical research; the regulation of medicines; organ transplantation; embryo and stem cell research; abortion; assisted conception; preimplantation genetic diagnosis; surrogacy and end-of-life decision-making.

Teaching: This course is delivered through a combination of weekly one-hour classes and weekly 1.5-2 hour lectures across Autumn Term and Winter Term. All teaching in 2023_24 will be in-person. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: At least one formative (unassessed) essay per term.

Indicative reading: Jackson, *Medical Law: Text, Cases and Materials*, 6th edition (Oxford UP, 2022).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL207

Civil Liberties and Human Rights

This information is for the 2023/24 session.

Teacher responsible: Professor Kai Moller and Professor Conor Gearty

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides a challenging introduction to human rights law and builds on the knowledge that students have acquired in Public Law in year one. The first term starts by focusing on the European Convention on Human Rights with an in depth analysis of the case law on several important rights, including but not limited to freedom of expression, freedom of association, freedom of religion, the right to respect for private life, and freedom from torture and inhuman or degrading treatment or punishment. This is followed by a couple of weeks on theories of rights and judicial review, focusing on Robert Alexy's theory of rights as principles, and the culture of justification. In Winter Term,

the focus shifts to civil liberties in the UK and to the UK Human Rights Act, considering the common law approach to liberty and then analysing in depth how the Human Rights Act impacts on the protection of civil liberties and human rights in this area. The emphasis will be on the way in which civil liberties are protected in UK law, with the law on police powers, on public order and on terrorism being the subject of particular interest. Inevitably in the current political climate, the future of the Human Rights Act is also considered. The goal of the course is to enable students to critically assess the European Court of Human Rights' and the UK Supreme Court's arguments about the compatibility of a policy or administrative decision with human rights and the particularities of human rights adjudication within the UK legal system, including the extent to which it can be said to promote and protect civil liberties. To this end, the course will focus on the necessary doctrinal and conceptual frameworks, theoretical aspects of human rights law, and in depth analysis of selected problems in human rights law. This course does not touch upon strategic or policy issues (such as the most effective ways to promote human rights, NGO practices, etc.); rather it focuses on the controversial and often difficult moral and political issues that arise in human rights adjudication and on unravelling the implications of the particular way in which U.K. law has incorporated the ECHR, and the extent to which – if at all – civil liberties protection has been improved. The teaching of this course is mainly case based. To complete it successfully, students must prepare for each class by reading and thinking through the relevant cases; the classes will be conducted on the basis of the expectation that the students are familiar with the materials. There is no comprehensive textbook available for this course.

Syllabus:

The European Convention on Human Rights and the European Court of Human Rights; proportionality, the margin of appreciation, the living instrument doctrine, emerging consensus, negative and positive obligations. Freedom from torture and inhuman or degrading treatment; freedom of expression; freedom of association and 'militant democracy'; freedom of religion; the right to respect for private and family life. Theories of proportionality-based rights adjudication: Robert Alexy's theory of rights as principles; the culture of justification and the right to justification. The Human Rights Act 1998; the relationship between the Act and the protection of civil liberties; the law on police powers; the law on freedom of assembly and public order; UK anti-terrorism law. The debate about a new bill of rights for Britain.

Teaching: This course is delivered through seminars totalling a minimum of 40 hours across Autumn Term and Winter Term. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term. There will be a revision class in Spring Term.

Formative coursework: Students will be expected to produce one formative essay in each of the two teaching terms.

Indicative reading: For the European Convention on Human Rights, interested students may want to take a look at
 • Harris, O'Boyle and Warbrick, *Law of the European Convention on Human Rights* 4th edn (OUP, 2018).

For the more theoretical aspects of the course, see

• Kai Möller's *The Global Model of Constitutional Rights* (OUP, 2015).
 For the UK side, representative works include

- Conor Gearty, *Civil Liberties* (OUP, 2007) and (more recently)
- *On Fantasy Island. Britain, Strasbourg and Human Rights* (OUP, 2016),
- Tom Hickman, *Public Law after the Human Rights Act* (Hart, 2010),
- Aileen Kavanagh, *Constitutional Review under the UK Human Rights Act* (CUP, 2009).

For the civil liberties side of the course see

- Bradley, Ewing and Knight, *Constitutional and Administrative Law* (18th edn, paperback 2022).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL208 Half Unit

Race, Class, and Law

This information is for the 2023/24 session.

Teacher responsible: Dr Roxana Willis

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is not available as an outside option nor to General Course students.

Course content:

Course summary

Students typically learn how to become lawyers by studying, analysing, and applying 'the law'. This is principally because mainstream legal courses prioritise teaching these skills to law students. While this approach is indeed valuable, it tends to presume the idea of the law as a fixed and objective entity. In this course, we develop a decolonial approach to the study of law that challenges this central presumption: we explore what the law 'is' by looking, among other things, at how real people in real situations experience and act upon the legal system. Taking the English legal system as its point of departure, the course centres several inquiries: an examination of the legal system as experienced 'from below', a historical understanding on the making and workings of 'modern law', and a critical analysis of law beyond the confines of the nation state. By the end of the course, students will have acquired a fresh perspective on the law as seen from a diversity of perspectives, developed new skills to critique current laws, and engaged in innovative thinking about the future of law and potential for change.

Course Structure

There are ten substantive topics that will be covered by this course, taught through a combination of lectures and interactive seminars. The first week addresses the question 'What is law?' from the perspective of dominant legal theory as well as critical schools of thought, including feminist, Marxist, and socio-legal. The second week works towards a decolonial agenda for law, offering a genealogy of key decolonial thinkers and applying their thinking to the law. The third week turns to the historical making of modern law, with a focus on the legal subject and the criminalised 'immoral other'. Over the remaining weeks, students then examine the legal subject as it occurs in overlapping legal fields, including property rights and land, labour law and immigration, welfare and housing, crime and criminal justice, climate justice and the Anthropocene, and indigenous justice movements. We conclude the course by reflecting on recent calls for abolition.

Teaching: 20 hours of seminars in the AT.

Formative coursework: Participation in a co-organised class symposium where work-in-progress is presented (pre-recorded videos are permitted as a presentational form).

Indicative reading:

- Bhabra, G. (2007) *Rethinking modernity: Postcolonialism and the sociological imagination*. Berlin: Springer.
- Adébiśí, F. (2023) *Decolonisation and Legal Knowledge Reflections on Power and Possibility*, Bristol University Press.
- Harrison, F. V. (Ed.) (2010) *Decolonizing Anthropology - Moving Further toward an Anthropology for Liberation* (Third ed.). Arlington, VA: American Anthropological Association.
- Bhattacharyya, G., Elliott-Cooper, A., Balani, S., Nisancioglu, K., Koram, K., Gebrial, D., El-Enany, N. and de Noronha, L. (2021). *Empire's Endgame: Racism and the British State*. London: Pluto Press.
- Elliot-Cooper, A. (2021) *Black resistance to British Policing*, Manchester University Press.
- Gopal, P. (2019) *Insurgent Empire: anticolonial Resistance and British dissent*, Verso Books.
- Bradley and De Noronha (2022) *Against borders: the case for abolition*. Verso Books.
- Willis, R. (2023) *A Precarious Life: Community and conflict in a deindustrialised town*, OUP.
- Koch, I. (2018), *Personalizing the state: An anthropology of law, politics, and welfare in austerity Britain*, OUP.
- Klinkert, V. L. (2021). 'Humbling anthropology: Ego reflexivus and White ignorance.' *HAU: Journal of Ethnographic Theory*, 11(1),

309-318.

Assessment: Essay (100%, 4000 words) in the ST. Students will devise their own essay title, with support and feedback from the course convenor. Students will be expected to engage with readings across at least two weeks of the course and will be encouraged to research beyond the essential readings.

LL210

Information Technology and the Law

This information is for the 2023/24 session.

Teacher responsible: Professor Andrew Murray and Dr Martin Husovec

Availability: This course is available on the BA in Anthropology and Law, BSc in Data Science and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This course does not require an in-depth understanding of contemporary computer technology – we are primarily interested in the implications of the use of information technology, and the intended and unintended consequences of regulating that use.

Course content: This survey course enables students to assess critically a selection of fundamental legal issues in the field of Information Technology (IT) Law. It begins by introducing students to key debates in technology and internet governance: do we need distinct legal rules to regulate technological systems? Who does, and should, enact these rules? Are technological systems like the Internet neutral, and should they be? Once students are equipped with this knowledge of technology governance and the challenges this poses for the law, we consider how the law has responded to the challenges brought about by technological systems and the extent to which legal issues have shaped the development of information society policy. The course does this by examining the key issues under headings such as data and digital platforms. The EU has taken the lead in proposing and adopting regulations to address the challenges of digitisation, ranging from its General Data Protection Regulation (GDPR) to the more recent Digital Services and AI Acts. Our primary focus will therefore be on EU law, although we will examine relevant developments and divergences in UK law and significant developments in other jurisdictions where relevant.

Aims and Objectives:

At the end of the course, students should be able to:

- Critically evaluate ongoing developments in law relating to technological systems;
- Display an understanding of how these developments relate to one another;
- Examine areas of doctrinal and political debate surrounding rules and theories;
- Evaluate those rules and theories in terms of internal coherence and practical outcomes;
- Draw on the analysis and evaluation contained in primary and secondary sources.

Indicative Content:

Internet Governance and Infrastructure

- An Introduction to IT Law
- Who Regulates? Questions of Jurisdiction
- What we Regulate?
- Net Neutrality
- Case study: Governing Cloud Computing

Data

- Data Flows and Data Localisation
- The GDPR: Regulating Personal Data Processing
- AdTech and the Monetisation of Personal Data
- Legal Responses to Automated Decision-Making and Profiling
- State Surveillance and Facial Recognition Technology

Digital Platforms

- Intermediaries and Freedom of Expression

- Platforms: Global Models
- Copyright Law in the Digital Environment
- Online Safety Bill and Defamation
- Website Blocking

Current Challenges

- The Emergent Legal Issues of the Sharing Economy
- Children's rights in the Digital Environment
- Robotics, Risk and Ethics
- AI and Justice

This is an indicative programme.

Teaching: This course will be delivered by lectures and classes each week, totalling at least 30 hours in both Autumn and Winter Terms. This course includes a reading week in Weeks 6 of Autumn and Winter Terms.

Indicative reading:

- Murray: *Information Technology Law: Law and Society* 5th ed (Oxford: OUP, 2023)
- Lloyd: *Information Technology Law* 8th ed (Oxford: OUP, 2017).
- Lessig: *Code and Other Laws of Cyberspace* ver.2.0 (New York: Basic Books, 2006).

Suggested Initial Reading:

Murray: *Information Technology Law: Law and Society* 5th ed, Ch.1.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

This exam will consist of a combination of problem and essay questions.

LL211 Half Unit

Law, Poverty and Access to Justice

This information is for the 2023/24 session.

Teacher responsible: Dr Joseph Spooner and Dr Sarah Trotter

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is not available as an outside option nor to General Course students.

Course content: This course will examine key issues in the relationships between law, poverty, and inequality. These include the way in which legal principles and policy may create and perpetuate inequality, and the manner in which legal process and method – and difficulties of accessing law - disadvantage the poor. It will also explore the progressive potential of law as a tool for alleviating poverty. The course aims ultimately to act as a counterpart to the LSE Law School Clinic, which the law School hopes to establish in the near future. It also will aim to present a novel offering on the LLB programme, which may be of particular contemporary relevance as the UK once more experiences a crisis of living standards, in the context of ongoing austerity and Welfare State retrenchment.

The course will be divided into two main parts. The first part will ask key overarching questions regarding the extent to which the law can advance the interests of the poor, and how legal scholars and practitioners can work to alleviate poverty through service, advocacy, and/or activism. The introduction to the course will ask students to consider definitions and data relating to poverty and inequality. It will offer further context by considering the legal needs of low-income households, and how problems of the poor reach the legal system. The introduction will also integrate LSE Law school history and heritage into the syllabus, noting the contribution of classic texts from Griffith, Zander, and Cranston. Further sessions will consider key questions such as

- Reflections on the Limits of Legal Change: Is Law for the Rich? What can Law do for the Poor?
- Access to Justice under endless Austerity (history of legal aid as a pillar of the Welfare State; post-2012 cuts to legal aid and increase of court user fees; access to justice in the contemporary Welfare State)
- Technologies of Access to Justice (ADR and the Informal Justice movement; ombuds offices; class actions and group litigation; online dispute resolution)

• Role of Lawyers in an Age of Inequality (how legal practice can perpetuate and alleviate poverty and inequality; historical perspectives on the Poverty Law and Law Centres movements; models of cause lawyering and legal provision for the poor) Treatments of these topics will take an interdisciplinary and data-driven approach, by considering problems from a range of perspectives (including, for example views from market-failure analysis, feminist theories, human rights, vulnerability theory, and political economy), and by introducing students to contemporary and historical trends in poverty in and across the UK.

The second part of the course will aim to adopt a thematic approach which examines key areas where the law plays an important role in the lives of low-income households. Each session will take a snapshot focus on a different area of law, applying the ideas and theoretical perspectives from the first part of the course to concrete substantive legal field. While the topics selected for the second part of the course may vary, proposed subjects include:

- The Poor Pay More: Law, Inequality, and Markets (how private law “ground rules” influence inequality and poverty)
- Money and Debt (areas such as the regulation of high-cost credit; bankruptcy)
- Housing
- Education
- Welfare and Work
- Health
- Family and Relationships

Teaching: 20 hours of seminars in the WT.

Formative coursework: 1,500 word essay

Indicative reading:

- Michael Adler (ed), *A Research Agenda for Social Welfare Law, Policy and Practice* (Edward Elgar Publishing 2022)
- Philip Alston, ‘Visit to the United Kingdom of Great Britain and Northern Ireland: Report of the Special Rapporteur on Extreme Poverty and Human Rights’ (United Nations General Assembly 2019)
- Ross Cranston, *Legal Foundations of the Welfare State* (2 edition, Cambridge University Press 1985).
- Helen Hershkoff and Stephen Loffredo, *Getting By: Economic Rights and Legal Protections for People with Low Income* (Oxford University Press 2019)
- Emma Hitchings, ‘The Impact of Recent Ancillary Relief Jurisprudence in the Everyday Ancillary Relief Case’ (2010) 22 *Child and Family Law Quarterly* 93
- Marc Galanter, ‘Why the Haves Come out Ahead: Speculations on the Limits of Legal Change’ (1974) 9 *Law and Society Review* p.95 et seq.
- JAG Griffith, *Politics of the Judiciary* (Fifth edition (Reissue), Fontana Press 2010).
- Duncan Kennedy, ‘Legal Education and the Reproduction of Hierarchy’ (1982) 32 *Journal of Legal Education* 591

- Katharina Pistor, *The Code of Capital* (Princeton University Press 2019)
- Tony Prosser, *Test Cases for the Poor: Legal Techniques in the Politics of Social Welfare* (Child Poverty Action Group 1983).
- Jon Robins and Daniel Newman, *Justice in a Time of Austerity: Stories From a System in Crisis* (Bristol University Press 2021).
- Joe Spooner. “Contract Law when the Poor Pay More”, Working Paper
- Joe Spooner, ‘Seeking Shelter in Personal Insolvency Law: Recession, Eviction, and Bankruptcy’s Social Safety Net’ (2017) 44 *Journal of Law and Society* 374
- Michael Zander, *Legal Services for the Community* (Temple Smith 1978)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL212

Conflict of Laws

This information is for the 2023/24 session.

Teacher responsible: Dr Jacobus Bomhoff

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Interested students may wish to consider taking this course as an option in their third year. That said, over the past years many second year students have taken this course without any problems. The only required background understanding relates to (English) law of obligations. Basic issues of EU law relevant to the course will be covered in class.

It is also available as an outside option to third year students where regulations permit and with the permission of the course teacher.

Course content: Conflict of laws – also known as private international law – is the area of law concerned with private law cases that cross borders. Conflict of laws differs from public international law in that it deals with transactions between private individuals, rather than with those directly implicating States or international organizations.

What rules should an English court apply to a contract between companies from different countries, or to a tort claim arising out of an environmental disaster abroad? Should foreign celebrities be allowed to sue in the English courts when they feel they have been defamed in an article posted on an American website? Should the English courts recognize judgments from other countries, even when they conflict with English ideas of right and wrong? Should courts in EU countries still give effect to the judgments from English courts in a post-Brexit world? It is questions like these that make up the subject of the conflict of laws. The field’s central technical questions are (1) jurisdiction (will an English court or a foreign court hear the case?), (2) choice of law (should the court apply its own law or that of a foreign country?), and (3) the recognition and enforcement of foreign judgments. During the course, these three questions will frame reflection on a range of topics, including commercial/practical issues (how can companies structure their cross-border transactions?), but also questions of a more political nature (to what extent should States be able to regulate matters beyond their own borders?) or with a strong social/cultural dimension (how should foreign cultural values be accommodated in English law?).

Although conflict of laws has a long history within English law, for some areas many of the relevant rules have changed dramatically in recent years under the influence of EU legislation and case law. Some of these EU rules have been retained in English law after Brexit. Others have been replaced by either English law or by international treaties. In this course, we will look at English law, EU law, and international treaty regimes where relevant; and we will take a comparative look at selected topics in US law.

During the course, we will look at (1) jurisdiction in international commercial litigation, (2) choice of law issues in contract and tort, (3) recognition and enforcement of foreign judgments, and (4) comparative aspects and theoretical foundations of conflict of laws.

Most of the material for this course (cases, literature extracts, text, and further reading references) is contained in a Course Reader which is uploaded in instalments on the course Moodle page.

Syllabus:

- Jurisdiction of English courts under the traditional English rules for actions in personam: Service of a claim form within the jurisdiction & out of the jurisdiction, choice of court clauses, stay of proceedings, restraining foreign proceedings (anti-suit injunctions).
- Jurisdiction of courts in other EU Member States under European Union Council Regulation 1215/2012, and the parallel regime in the Lugano Convention 2007.
- Recognition & enforcement of foreign judgments at common law (in English courts), under European Union rules (in EU Member

States), under the Lugano Convention 2007, and under the Hague Conventions.

- Choice of law relating to contracts under the retained rules of the EU Rome I Regulation: Interpreting choice of law clauses in contracts, applicable law in absence of choice, overriding mandatory rules, public policy, foreign illegality in English law.
- Choice of law relating to tort under the retained rules of the Rome II Regulation, older English approach, 'interest analysis' and other approaches of the 'US conflict of laws revolution'
- Comparative conflict of laws & Theoretical foundations

Teaching: This course is taught as a two-hour seminar each week. The course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: One formative (unassessed) essay per term.

Indicative reading: Briggs, *The Conflict of Laws* (4th ed., Oxford University Press, 2019); Cheshire, North & Fawcett, *Private International Law* (15th ed., Oxford University Press, 2017)

Resources: www.conflictolaws.net (Topical references, cases and reviews)

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL221

Family Law

This information is for the 2023/24 session.

Teacher responsible: Dr Sarah Trotter

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This is a course about the way in which law constructs and regulates family relationships and about the effect of that regulation on those relationships. We will examine law's idea of 'the family' and its ways of engaging with a range of relationships, including those that have tended to preoccupy family law (namely relationships between couples and between children and their parents) and those that have tended to attract less legal attention (including relationships between grandparents and grandchildren and between siblings). The kinds of questions that we will explore include: how should disputes over children be resolved? In what circumstances should a local authority intervene to remove a child from their family? How should the state respond to domestic abuse? Should cohabiting siblings be able to have a civil partnership? How should money and property be distributed in the event of a couple's separation? How should the law respond to a situation in which a birthmother conceals her pregnancy and wants the baby to be taken into care without the birthfather's knowledge? If you are interested in thinking through such questions and in embarking on a broader inquiry into how and why law constructs a particular vision of 'the family' and indeed regulates family life at all, then this could be a good course for you. The structure of the course is as follows: In the first term we will study: 1. Legal constructions of 'the family', 'family life', and 'families'; 2. Legal gender; 3. The institutions of marriage and civil partnership and the rise of cohabitation; 4. The law of marriage and civil partnership; 5. Divorce and dissolution; 6. Family finances (including child support); 7. Financial orders on divorce and dissolution; 8. The nature and extent of domestic abuse; 9. Legal measures and state obligations in relation to domestic abuse; 10. Inheritance law. In the second term we will study: 1. Legal constructions of 'children' and 'childhood'; 2. Legal parenthood and parental responsibility; 3. Child welfare; 4. Children's rights; 5. Post-separation parenting and disputes over children; 6. Grandparents; 7. Child protection; 8. Adoption; 9. Siblings; 10. Experiences of the family justice system.

Teaching: There will be a 2-hour lecture and a 1-hour class every week in Autumn Term and Winter Term. In Spring Term (and before

the exam) there will be two revision sessions (a 2-hour lecture and a 1-hour class). This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: You will be expected to write at least 1 essay in the first term and 1 essay in the second term. Additional optional essays will be set at the end of each term and there will be an optional mock exam before the summer exam.

Indicative reading: A course guide containing the syllabus will be provided at the start of the course and a reading list and handout with questions to think about will be provided for each topic. The essential reading for each class will be based on articles and cases.

To get a sense of the subject of family law prior to commencing the course, I would suggest reading

- *Family Law and Personal Life* (2nd edition) by John Eekelaar (2017, Oxford University Press) and
- *In Your Defence: Stories of Life and Law* by Sarah Langford (2018, Doubleday).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL232

Law and Institutions of the European Union

This information is for the 2023/24 session.

Teacher responsible: Dr Floris De Witte

Availability: This course is compulsory on the BA in Anthropology and Law. This course is available on the LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

It is recommended that this course is taken in the second year of the LLB.

It is available to second and third year LLB and BA Anthropology and Law students. It is also available as an outside option to second and third year students where regulations permit.

Course content: The course is an introduction to European Union Law. The course considers a legal and political system which has become the most formidable system of transnational government in modern times. It is also a system that has become, in recent years, a source of continual political conflict: both over the content of its measures and the presence of its involvement in many spheres of activity. Discussions on the democratic nature of the EU, the relationship between the welfare state and EU law, and its very existence for example, will be covered in this course. Special attention will be given to the three major crisis that the EU is facing: the Euro-crisis, the refugee crisis, Russia's invasion of Ukraine and Brexit.

This course covers two aspects of EU law. First, it covers the institutional and constitutional structure of the European Union, including its political and judicial institutions. Second, it looks at the central policies of the European Union, notably the rights to free movement for goods, services, workers, and Union citizens.

At the end of the course you will be able to critically and independently assess both the legal structure of the EU as well as the political and social context within which it operates.

Topics include:

- History and Theory of European Integration
- Institutions and Law-Making of the European Union
- Democracy in the EU
- Sovereignty and EU Law
- Brexit and its consequences
- The Withdrawal Agreement and the UK-EU Trade and Cooperation Agreement
- Differentiated Integration and the Future of the EU
- Application of Union law in the Member States
- Judicial Review of EU law
- Fundamental Rights
- Internal Market and Free Movement
- Refugee Crisis and the AFSJ

Teaching: This course will have a minimum of two hours of

teaching content each week in Autumn Term and Winter Term in the form of a lecture (every week) and one hour class. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term. Essays will be set around reading week to allow students to dedicate time to writing skills.

Formative coursework: Students will be expected to produce 1 essay in the Autumn Term and 1 essay or mock exam in the Winter Term. Further peer-marked assessment is possible through the Moodle environment.

Indicative reading: Dawson & De Witte, *EU Law and Government* (CUP 2022). In addition, the course uses a broad range of online reading material (to be linked on Moodle).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL233

Law of Evidence

This information is for the 2023/24 session.

Teacher responsible: Dr Abenaa Owusu-Bempah and Dr Federico Picinali

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: If a person is suspected of committing a crime, how does the prosecution go about proving that she is guilty? Are there any restrictions on the type of evidence that the prosecution can use to prove its case? What protections does the law offer to defendants in order to safeguard them against false conviction? Is accurate decision-making all that matters in the criminal trial? These are among the central questions in the law of criminal evidence, that is, the set of rules governing the production of evidence, as well as its admissibility and its use in criminal trials. This course concentrates on criminal, rather than civil, evidence. Emphasis is placed on matters of principle, conceptual issues and the most significant legal rules. The aims of the course are to teach students how to reason about evidence, and to encourage them to reflect critically on the modern law of criminal evidence. At a more detailed level, we consider how inferences are drawn from evidence, and how basic ideas of probability can give insights on this process. We study the standard of proof, asking whether a high standard such as 'proof beyond reasonable doubt' is justified. As far as pre-trial procedures are concerned, we examine – among other things – how the police gain confessions from suspects and produce eyewitness identification evidence; we also look at how the law regulates the admissibility of these types of evidence. A central theme on the course is the question as to what makes a trial fair. The European Convention on Human Rights is relevant to this question. In this context, we look – among other things – at whether courts should admit improperly obtained evidence, and we ask what the privilege against self-incrimination is and whether it can be justified. The study of trial fairness will also lead us to consider the roles that sexism and racism may play in the interpretation and application of the law of evidence. We will ask whether, beyond the veneer of neutrality, the law of evidence has been, and can be, used as an instrument of oppression of disadvantaged social groups. And we will discuss ways to prevent this from happening. As you will learn, much of the law of evidence consists of rules of admissibility. Among these we cover 'traditional' rules such as those regulating the admissibility of hearsay evidence (a topic that now has an important human rights angle) and of bad character evidence (can a defendant's previous convictions be introduced against her at trial?). We also look at particular problems relating to testimony, ranging from the protections afforded to vulnerable witnesses to the admissibility of evidence concerning the sexual history of complainants in trials for sexual offences.

Syllabus: While coverage may vary from year to year, we usually

focus on the following themes and topics:

Reasoning with Evidence:

- Analysing Evidence: Relevance, Probative Value and Generalisations;
- Relevance and Probative Value Through the Lenses of Gender and of Race;
- The Standard of Proof, the Burden of Proof and the Presumption of Innocence;

Trial Fairness and the Gathering of the Evidence:

- Improperly Obtained Evidence;
- Eyewitness Identification;
- Confessions;
- *Entrapment*;

Traditional Rules of Admissibility:

- Hearsay;
- Confrontation;
- Bad Character Evidence;

Trial Fairness and Defendant Cooperation:

- The Privilege Against Self-Incrimination;
- Drawing Inferences from Silence;
- Disclosure;

Testimony:

- Examination of Witnesses
- Vulnerable Witnesses;
- Sexual History Evidence.

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term, in the form of a lecture and one hour class. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the Autumn Term and 1 essay in the Winter Term.

Indicative reading: There is no set text for the course, but standard texts are useful on many topics. Consider, for instance,

- I. H. Dennis, *The Law of Evidence* (London: Sweet & Maxwell, 7th ed, 2020);
- A. Choo, *Evidence* (Oxford: OUP, 6th ed, 2021);
- L. Campbell, A. Ashworth and M. Redmayne, *The Criminal Process* (Oxford: OUP, 5th ed, 2019);
- P. Roberts, *Roberts and Zuckerman's Criminal Evidence* (Oxford: OUP, 3rd ed, 2022).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL241

European Legal History

This information is for the 2023/24 session.

Teacher responsible: Dr Umberto-Igor Stramignoni

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course seeks to explore some of the relations and processes that gave origins to the law of Western Europe.

The course opens with the emergence of a certain kind of "law" in and around Rome circa 8th century BCE. It then turns to law's subsequent developments as they made the Roman world possible, but also as they related to each other over time. As the ancient world wanes, and is replaced by the extraordinary and expansive world of Christianity, Roman law takes on new and different configurations. Things will shift again during the Italian Renaissance, Northern Humanism, and European Enlightenment, and with the French Revolution of 1789, leading up to the first major codification of law to take place in modern Europe.

Teaching: This course will be taught by a weekly lecture and class in Autumn Term and Winter Term. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: At least one formative (unassessed) essay per term.

Indicative reading: There is no single textbook for this course. Instead, students will be required to familiarize themselves with the content of a mixture of visual aids (designed specifically for this course by Dr Stramignoni) and of written texts, including a selection of chapters from a range of different books and shorter articles from a variety of scientific journals suggesting different philosophical, historical, anthropological, cultural, and other approaches to the past of the law in Europe. Those thinking to take this course are encouraged to explore the course Moodle page for more information or contact the course convenor directly.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL250

Law and The Environment

This information is for the 2023/24 session.

Teacher responsible: Prof Veerle Heyvaert

Also taught by: Mr Jakub Bokes

Availability: This course is available on the BA in Anthropology and Law, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in International Relations and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The aim of this course is to study and understand how law can be used as a tool to pursue environmental goals and to think critically about law's contribution to local and global environmental protection.

Content:

I. General features of environmental law in the UK:

The introductory sessions examine how we understand 'the value of the environment' as an object of legal protection, and how environmental law evolved through time. We review international and EU law as important sources of environmental law in the UK, and consider the impacts of Brexit. We study the responsibilities of and the relationship between Parliament, the Government, the Court, environmental agencies and devolved administrations, and consider the 2021 Environment Act as a blueprint for the future of environmental protection in the UK.

II. Controlling space

This section reviews legal strategies for environmental protection through the management of the built environment, parks and nature. It covers planning law, environmental impact assessment, and nature conservation law.

III. Controlling climate change

Seminars on climate change examine international law and the politics of climate change, different regulatory strategies to respond to the climate change challenge, and climate change litigation.

IV. Controlling enterprise

Section IV looks at how environmental harm can be prevented or limited by regulating heavily polluting industries. We study mandatory permitting approaches, and also pay attention to the role of ESG and CSR in shaping the environmental performance of private actors. We examine the relationship between international trade law and environmental protection, both generally and in the context of climate change. Section IV also addresses the legacy of industrial exploitation and examines the legal framework for the clean up of contaminated land.

V. The future of environmental law

The final section focuses on new and upcoming developments in environmental law, both at the UK level and beyond. It includes an examination of the role of human rights in the pursuit of environmental protection, and discusses the potential for animal and nature rights.

Teaching: This course is delivered through a weekly 2-hour seminar totalling a minimum of 40 hours across Autumn Term and Winter Term. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students are expected to write a formative essay and participate in a mock exam.

Indicative reading: There is no set textbook that covers the entire course. Several sessions use either:

- Bell, McGillivray, Pedersen et. al, *Environmental Law* (9th edition, Oxford University Press, 2017) or;
- Fisher, Lange & Scottford, *Environmental Law. Text, Cases and Materials* (2nd edition, OUP, 2019).

Both these books are available online via the LSE library. A detailed reading list is provided for each seminar. Materials that are not sourced from the textbooks are made available on Moodle. Older but still useful introductory books include:

- Lazarus, *The Making of Environmental Law*, 2004;
- Holder & Lee, *Environmental Protection, Law & Policy*, 2007;
- R Carson, *Silent Spring*, 1962; R Eckersley, *Environmentalism and Political Theory*, 1992.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL251

Intellectual Property Law

This information is for the 2023/24 session.

Teacher responsible: Dr Sivaramjani Thambisetty Ramakrishna

Dr Luke McDonagh

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Intellectual Property Law consists in the rules determining when, and subject to what conditions, the products of creative or intellectual labour, in other words 'information' (broadly conceived) - can be protected in order to exclude others from access to that same information. The reasons to exert creative and intellectual labour are myriad and may include the expression of personhood, generation of profits, reputational gain or as a response to an external incentive. While it often takes creativity, effort and investment to produce them, intangibles may be easily copied. To restrict this copying and thereby encourage the exercise of creative labour and the production of information, the law intervenes by establishing intellectual property rights around certain valuable intangibles – creative works like books, paintings and songs; inventions ranging from vaccines to the bag-less vacuum cleaner; and valuable brands like Coke ® or Google ®. However, unlike the physical objects associated with real property rights, intangibles are non-rival and non-excludable. While the chair you may be sitting on accommodates only one person, many can whistle the same tune without depriving others of it. Therefore, many scholars question the philosophical basis and legitimacy of property rights on intangibles that allow information to be monopolised, based both on the intrinsic nature of information, and on the basis of the consequences of such monopolies. Given that information in many different forms is an important source of commercial value within the modern economy, it is not surprising that Intellectual Property Law is such a fast-growing field in domestic jurisdictions and in international law, often pushing normative and doctrinal boundaries. Its relentless growth is the focus of vigorous debate. **Copyright** already provides the legal foundation for the well-established film, music, TV and publishing industries, and its continuing expansion into unprecedented kinds of works is said by some to be crucial, and by others to be a threat to free speech and creativity. **Patents** sustain key lucrative technologies in diverse sectors such as pharmaceuticals and computer implemented inventions; but monopolies over life-sustaining or merely life-enhancing technologies can raise complex ethical and political issues. **Trade Marks** are central to effective advertising and marketing but at the same time exemplify the tendency of more and more aspects of our cultural landscape to be 'commodified'.

The course is structured around a strong theme that runs

persistently through all parts of IP law. Indicative themes include 'the public domain' (which is often construed as an architectonic principle of intellectual property law), and 'the incentive effect' (an essential strand in the justification of intellectual property law). The central theme will be used to introduce the basic elements of each branch of intellectual property and to focus on examples which illustrate contemporary intellectual property law: the constitution of the public domain in digital environments, the capture of public discourse by leading brands, the impact of incentives in the creation of software, the international dimension of incentives in the pharmaceutical sector. The objective in this introductory course is to develop the skills required to engage critically with the mechanics of each branch through a detailed examination of the chosen theme. Seminars will be based on informal lectures, class discussion, and a variety of exercises.

Teaching: This is a seminar course which will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students will be expected to produce 1 formative essay in the Autumn Term and 1 formative essay in the Winter Term. The word limit for each formative will be 2000 words.

Indicative reading: Boyle *The Public Domain: Enclosing the Commons of the Mind* (Yale University Press, 2008) Bently and Sherman *Intellectual Property Law* (OUP, 2018). The course is supported by Moodle, so reading lists will be linked there or accessible via library-based websites.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL253

The Law of Corporate Insolvency

This information is for the 2023/24 session.

Teacher responsible: Prof Sarah Paterson

Availability: This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

Course content: This course is concerned with English corporate insolvency law. Specifically, the course (1) examines the possible solutions for a company which is in financial distress and the legal procedures which are available to achieve them; and (2) examines important principles of English corporate insolvency law and how they impact not only financially distressed companies but also healthy companies contracting outside insolvency.

In Autumn Term, and for the first two weeks of Winter Term, we analyse the principal insolvency procedures available in English law, with a view to evaluating the extent to which they meet their aims and objectives and the case for reform. For the rest of Winter Term, we analyse the legal rules affecting distressed and insolvent companies and those concerned with them (for example, creditors, directors, and employees) and the issues and principles underlying a corporate insolvency regime. This will lead us to consider how different goals are balanced in the corporate insolvency legislation, for example: ensuring that vulnerable stakeholders are protected while encouraging the rescue of financially distressed companies; giving companies a chance to recover while ensuring that companies cease to trade when failure is inevitable and losses must be stopped; and saving jobs while encouraging the purchase of financially distressed businesses.

(Corporate Insolvency Law bears a close relationship to the Law of Business Associations (BA) and students may find that taking BA as well as Corporate Insolvency will give them a broad understanding of major themes relating to corporate activity. Students who have studied, or are studying, Commercial Contracts also find that the courses complement each other in some respects.)

Syllabus:

Corporate Borrowing

- Outline of corporate borrowing and development and nature of

security interests: fixed and floating charges; intercreditor issues.

- The test of insolvency.

Insolvency Procedures

- Out-of-court rescue in the era of the London Approach
- Receivership
- Administration (i) as a business rescue tool; and (ii) as a corporate rescue tool
- Part A1 moratorium
- Pre-packaged administration
- Company Voluntary Arrangements
- Schemes of Arrangement
- Part 26A restructuring plan procedure
- Liquidation

Principles of Corporate Insolvency Law

- Setting aside transactions
- The distributional order of priority
- Quasi-security devices for consumer creditors and commercial suppliers
- Liability of company directors
- Employees
- The regulation of insolvency practitioners

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: At least one formative (unassessed) essay per term.

Indicative reading: Detailed reading lists will be provided during the course. The recommended book is V. Finch and D. Milman, *Corporate Insolvency Law: Perspectives and Principles* (3rd ed., 2017) (Cambridge University Press).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL257

Employment Law

This information is for the 2023/24 session.

Teacher responsible: Dr Astrid Sanders

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This subject builds on contract and tort, and to some extent public law and EU law, but introduces the distinctive legal regulation of employment relations, such as the law of dismissal and discrimination law, and the institutional arrangements of industrial relations, including trade unions and collective bargaining. Employment law is an important area of legal practice, with employment law disputes representing one of the largest topics of civil litigation.

Outline:

- Contract of Employment: the duties of employer and employee; the variety of work relations; vulnerable workers and the personal scope of employment law
- Regulation of the Employment Relation: minimum wage, working time
- Anti-Discrimination Law: implications of the Equality Act 2010
- Dismissal: wrongful and unfair dismissal, economic dismissals
- Human Rights in the Workplace: civil liberties of employees at work
- Membership of Trade Unions, Worker Representation, and Collective Bargaining: freedom of workers to associate with each other and to act in association with each other
- Industrial disputes: strikes, other industrial action and lockouts; rights and liabilities of individual workers who take industrial action; civil liabilities for organising industrial action – the economic torts, the 'golden formula' immunities and loss of immunity – industrial action ballots.

Teaching: This course will have a minimum of two hours of

teaching content each week in Autumn Term and Winter Term, in the form of a two hour seminar. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: At least one formative (unassessed) essay per term.

Indicative reading: For a concise overview of the subject a suggestion is:

- H. Collins, *Employment Law* (Oxford: OUP, 2nd ed, 2010).
- See also P. Davies and M. Freedland (eds), *Kahn-Freund's Labour and the Law* (London: Stevens and Son, 3rd ed, 1983) chapter 1.

The leading textbooks are

- H. Collins, K.D.Ewing, A. McColgan, *Labour Law: Law in Context* (Cambridge: CUP, 2nd ed, 2019);
- S. Deakin & G. Morris, *Labour Law* (Oxford: Hart Publishing, 6th edn, 2012);
- A.C. L. Davies, *Perspectives on Labour Law*, 2nd edn (Cambridge: CUP, 2009).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL272 Half Unit

Outlines of Modern Criminology

This information is for the 2023/24 session.

Teacher responsible: Prof Nicola Lacey

Additional teacher: Dr Richard Martin

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This half-unit course is a general introduction to the study of modern criminology. The course is highly selective and every effort is made to hold the reading requirements within reasonable limits. It is suitable for General Course students, and a limited number may be admitted on application.

The main focus is on the classical and contemporary theories developed over the past two hundred years to explain and predict criminal behaviour in society. The propositions, assumptions, empirical validity, and policy implications of these criminological theories, as well as the social context in which they were developed, will be examined. Other significant issues in criminology – such as the measurement and extent of crime, the role of demographics (age, race, gender, social class) in the causation of and reaction to crime, the influence of the media and political regimes, and the changing boundaries of criminological research – will also be discussed.

Course content:

- The history of criminological theory.
- Trends in crime and crime statistics. How official statistics can be interpreted and the role of crime surveys
- 'Classical' criminology, rational choice, and crime prevention theories.
- Individual explanations of crime: biological, psychological and psychoanalytic theories.
- Sociological explanations of crime, including macro and micro approaches and recent critical theories
- Criminal justice policy and 'law and order' politics.
- Discrimination, Inequalities, crime and criminal justice
- Crime and the mass media
- Green Criminology
- 'Big Data', Technology and Criminology

Teaching: This course will be taught through a weekly two-hour seminar in the Autumn Term. The course includes a reading week in Week 6.

Formative coursework: The formative coursework consists in one class presentation (in groups) and one formative essay. Feedback on that essay will help prepare students for the summative assessment.

Indicative reading: The texts for this course are:

- *Criminology*, 3rd ed. by T. Newburn (2017)

- *The Oxford Handbook of Criminology*. By Leibling, A; Mcara, L. and Maruna, S (eds) 6th edition (2017) (or 7th edition, currently in production)

- *Crime: The Mystery of the Common Sense Concept*. By R. Reiner (2017)

Recommended Readings

- Phillips, Coretta, Earle, Rod, Parmar, A and Smith, D (2020) Dear British criminology: where has all the race and racism gone? *Theoretical Criminology*, 24 (3). 427 - 446.160 <http://eprints.lse.ac.uk/101611/>
- Mary Bosworth and Carolyn Hoyle (eds.) *What is Criminology?* (2011)
- *Law and Order: An Honest Citizen's Guide to Crime and Control*. by R. Reiner (2007)
- *Crime, Shame, and Reintegration*. by J. Braithwaite (1989)
- *Understanding Deviance* 7th Ed. by D. Downes, P. Rock and E. McLaughlin (2016)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL275

Property II

This information is for the 2023/24 session.

Teacher responsible: Professor Neil Duxbury and Professor Charlie Webb

Availability: This course is compulsory on the BA in Anthropology and Law. This course is available on the LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Property II examines principles of Land Law and the Law of Trusts. Land Law is taught in the first term and Trusts in the second term.

The Land Law component of Property II is designed to introduce students to the principles of the law of real property (i.e., land). The course examines estates and interests in land, legal and equitable ownership, title registration, and trusts of land (including constructive trusts). It also considers the law governing specific third party interests – licences, proprietary estoppel claims, easements, freehold covenants and mortgages.

The Trusts component of the course focuses on general principles of trusts law and examines the circumstances in which trusts arise, the obligations of trustees, and the remedies available to beneficiaries when these obligations are breached. It also considers the nature and classification of trusts, including resulting and constructive trusts, and how the law of trusts relates to and impacts on the law of contract, wrongs and unjust enrichment.

Teaching: The course has at least two hours of teaching content each week. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Two formative (unassessed) essays per term.

Indicative reading: Advice on reading, including textbook recommendations, will be provided at the beginning of the first and second terms. An essay which students might profitably read before the commencement of the course is Peter Birks, 'Before We Begin: Five Keys to Land Law', in *Land Law: Themes and Perspectives*, ed. S. Bright & J. Dewar (Oxford: Oxford University Press, 1998), 457-86.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

Students are required to answer questions on both the Land Law and Trusts components of the course.

LL276 Not available in 2023/24**Property**

This information is for the 2023/24 session.

Teacher responsible: Prof Neil Duxbury (MT and ST) and Prof Charles Webb (LT)

Availability: This course is compulsory on the BA in Anthropology and Law. This course is available on the LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Property II examines principles of Land Law and the Law of Trusts. Land Law is taught in the first term and Trusts in the second term.

The Land Law component of Property II is designed to introduce students to the principles of the law of real property (i.e., land). The course examines estates and interests in land, legal and equitable ownership, title registration, and trusts of land (including constructive trusts). It also considers the law governing specific third party interests – licences, proprietary estoppel claims, easements, freehold covenants and mortgages.

The Trusts component of the course focuses on general principles of trusts law and examines the circumstances in which trusts arise, the obligations of trustees, and the remedies available to beneficiaries when these obligations are breached. It also considers the nature and classification of trusts, including resulting and constructive trusts, and how the law of trusts relates to and impacts on the law of contract, wrongs and unjust enrichment.

Teaching: The course has at least two hours of teaching content each week in the Michaelmas and Lent terms. In both terms, Week 6 is a reading week.

Formative coursework: Two formative (unassessed) essays per term.

Indicative reading: Advice on reading, including textbook recommendations, will be provided at the beginning of the first and second terms. An essay which students might profitably read before the commencement of the course is Peter Birks, 'Before We Begin: Five Keys to Land Law', in *Land Law: Themes and Perspectives*, ed. S. Bright & J. Dewar (Oxford: Oxford University Press, 1998), 457-86.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

Students are required to answer questions on both the Land Law and Trusts components of Property II.

LL278**Public International Law**

This information is for the 2023/24 session.

Teacher responsible: Professor Gerry Simpson

Additional Teachers: Dr Margot Salomon, Dr Mona Pinchis-Paulson, Professor Susan Marks

Availability: This course is available on the BA in Anthropology and Law, BSc in Environmental Policy with Economics, BSc in International Relations and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to the concepts, principles, institutions and debates that define public international law today. We begin with an overview of the international legal system, considering the sources of international law, the scope of responsibility for its breach, and its role in the creation and empowerment of states. In this connection we examine the work of the International Court of Justice, the WTO Appellate Body, various human rights courts and committees, the International Criminal Court, along with judgments of national courts invoking international law. We will take up a range of topical issues of global concern, studying their international legal dimensions. The issues to be discussed are likely to include war, trade and investment, human rights, climate change, and

international crime. We also investigate aspects of the history of international law and its relation to the establishment and retreat of European empires, as well as approaches to international law that focus on gender, and the problem of fragmentation. Overall, our aim is to lay the basis for an informed assessment of the contribution and limits of international law as a force in world affairs.

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term, in the form of a two hour seminar. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: One formative (unassessed) essay per term.

Indicative reading: Reading lists will be provided for each topic on Moodle. You are asked to buy M. Evans (ed.), *International Law* (Oxford: OUP, 5th ed, 2018) and *Blackstone's International Law Documents*.

Some other works to which you may wish to refer include the most recent editions of: D. Harris, *International Law: Cases and Materials*; H. Charlesworth and C. Chinkin, *The Boundaries of International Law*; M. Shaw, *International Law*; M. Koskeniemi, *From Apology to Utopia*; V. Lowe, *International Law*; and J. Crawford, Brownlie's *Principles of Public International Law*.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL284 Half Unit**Topics in Sentencing and Criminal Justice**

This information is for the 2023/24 session.

Teacher responsible: Dr Richard Martin

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: In this course we explore the routine practices and decision-making of key actors within the criminal justice system. In doing so, we examine the laws, policies and regulatory schemes that purport to govern how actors perform their specific roles in the criminal process. In the first five weeks, we track the construction of cases through the criminal process. This requires us to closely analyse the work of police, prosecutors and judges: How do they exercise their discretion? What kinds of dynamics, sub-cultures and formal (and informal) rules affect their decision-making? And how does this impact on the rights and interests of suspects, defendants, offenders and victims? In the second five weeks, we enter the realm of sentencing law and practice. We focus on how judges perform their role as sentencers, the principles and legal guidelines they rely upon and the types of sentences they can (or must) hand down in different types of cases. We use the sentencing of rioters and the life sentence for murder as case studies to apply the general principles of sentencing, then conclude the course by studying the impact of an offender's race on sentencing practices. By preparing fully for seminars and actively contributing to our discussions, the course will equip you with the knowledge and tools necessary to critically assess contemporary criminal justice issues.

Course aims:

- To explore with students the substance and modes of legal regulation, including human rights principles, that have come to govern the criminal justice system in the recent decades.160
- To examine in detail the routine practices and decision-making that animates how power is wielded by key decision-makers in the criminal justice system, specifically police, prosecutors, and judges.160
- To familiarise students with contemporary theories and principles that are used by scholars to critically analyse the criminal process and specific practices within it.160
- To critically engage with empirical studies of the law-in-action, in

addition to the case law analysis students will likely be familiar with from their LLB.

Topics by Week

1. The Criminal Justice System in England and Wales
2. In the Community: What Do Police Do and Why Do They Do It?
3. In the Station: Police Practices and Case Construction
4. The Charging Decision: Prosecutorial Discretion and Victims' Rights
5. The Magistrates' Courts and Legal Representation
6. Reading Week
7. Sentencing Rationales: Aims, Principles and Policies
8. Sentencing Practices: Discretion and Guidelines
9. Sentencing: Rioters
10. The Life Sentence for Murder
11. Race and Sentencing

Teaching: This course runs in the Winter Term and will have a minimum of two hours of teaching content each week, in the form of a two hour seminar. This course includes a reading week in Week 6 of term. I will begin the seminar with some introductory remarks, outlining the topic or setting out its legal or political context. There are PowerPoint slides which will be uploaded on the Course's Moodle webpage in advance of each seminar. We will work in and out of these slides during the seminar. Each seminar's key learning outcomes can be found on the first PowerPoint slide; these outcomes will be reiterated at beginning of the seminar. It should go without saying that seminars are your opportunity to discuss, debate and reason with one another – it is essential you come to the seminar well-read and prepared to contribute to our discussions, whichever material you have chosen to read. Seminars include small group discussion and full seminar discussions; you should focus your seminar preparation on the discussion questions and be ready to share your answer in the seminar.

Formative coursework: Students will be expected to produce a 1500-word literature review.

Indicative reading: There is textbook reading, the material and topics assigned are designed to be as contemporary and engaging as possible, so the course supplements these texts with more recent articles or chapters that are particularly helpful or insightful. Sanders, Young and Burton's *Criminal Justice* is a leading text: it is informative and offers sharp, critical analysis but can be a bit too basic in places.

The 5th edition of Campbell, Ashworth and Redmayne's *The Criminal Process* (2019) is very good and can be accessed via OUP's Law Trove.

The standard sentencing text for England and Wales is: Ashworth and Kelly (2022) *Sentencing and Criminal Justice* (7th ed., Hart) and S. Easton and C. Piper (2016) *Sentencing and Punishment: The Quest for Justice* (4th ed., Oxford: OUP) is also good.

Most of our readings are articles in journal e.g. *British Journal of Criminology* (BJ Crim), the *Criminal Law Review* (Crim LR) and the *Journal of Law and Society* (J. Law & Soc) and chapters in edited collection (various readings come from the sixth edition of the *Oxford Handbook of Criminology*).

The course is designed to give students the time, support and intellectual freedom to read and research issues for themselves. The Summative Assessments, will after all, be testing students ability to read broadly, but purposefully, in order to critically evaluate a topic and advance a clear argument.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL293

Tax and Tax Avoidance

This information is for the 2023/24 session.

Teacher responsible: Dr Michael Blackwell and Mr Eduardo Baistrocchi

Availability: This course is compulsory on the BA in Anthropology and Law. This course is available on the BSc in Accounting and

Finance and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Taxation is a topic that has throughout history pervaded political debate and is encountered in every area of life. Taxation was one of the very first subjects to be taught at LSE. The teaching of tax law as an academic subject started at LSE, where it was introduced by Professor GSA Wheatcroft in 1957.

The syllabus is set out below, although there is some variation of topics selected from year to year, depending on the focus of current debate, and in the order of topics.

- The first term of the course begins by looking at the tax administration system in the UK. The remainder of the first term focuses on a technical legal approach to tax. Using a mixture of legislation and case law we assess liability to UK tax on (i) employment income; (ii) business income; and (iii) capital gains. The term concludes by looking at 'international tax', ie the liability to tax where an individual or company is potentially subject to the tax laws of several jurisdictions.
- The second term of the course focuses on tax avoidance looking at questions such as: What is tax avoidance and how does it differ from tax planning? What strategies do individuals and companies adopt to avoid tax? How do judges respond to tax avoidance through anti-avoidance doctrines and rules of interpretation and to what extent is that compatible with the judicial role? How effective can legislative responses to tax avoidance be and what are the limitations on such responses? How can companies be fairly taxed in the digital economy? How have public attitudes to tax avoidance changed over time? Should corporations behave 'responsibly' and pay their fair share of taxes, or are they obliged to do whatever they can to maximize shareholder returns? To what extent does professional ethics inform accountants and lawyers who advise on tax avoidance?

On the course the approach to the subject includes a strong policy perspective. However, legal issues are still important. The UK tax code is long and complex. There are also many relevant cases that are required reading too. This course requires students to understand and apply difficult concepts and legislation.

By taking this course you should develop the following skills and attributes (i) working with and analysing legislation; (ii) working with and analysing case law; (iii) research skills; (iv) communication skills; (v) professionalism.

Students taking this course should be prepared to use a variety of sources ranging from statute and case law to literature on public policy. The precise balance of materials used varies from topic to topic. All the readings set will be accessible and non-mathematical. NO COMPUTATION is required and no knowledge of any discipline other than law is required. The course is open to second and third year law students, and experience suggests that it is equally suitable for both years.

Teaching: This course will have three hours of teaching content each week in Autumn Term and Winter Term. There will be a reading week in Week 6 of each term.

A variety of methods will be used within the weekly classes/seminars. This system is not suitable for students who favour passive lecture learning and regurgitation of facts. Student participation will be central. Assistance will be given with methods for statute-based work. Substantial preparation by students will form an integral part of the course.

Formative coursework: Students are expected to produce at least 2 formative assignments over the academic year.

Indicative reading:

- Eduardo Baistrocchi, *The International Tax Regime and Global Power Shifts*. *Virginia Tax Review*, Vol. 20, No. 2, 2021, Available at SSRN: <https://ssrn.com/abstract=3744992>
- M.C. Blackwell 'The April 2019 loan charge' [2019] *British Tax Review* 240-257. https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3434951
- M.C. Blackwell 'Conduct Unbefitting: Solicitors, the SRA and Tax Avoidance' [2019] *British Tax Review* 31-54. https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3354776
- M.C. Blackwell 'Variation in the Outcomes of Tax Appeals

Between Special Commissioners: An Empirical Study' [2013] *British Tax Review* 154. https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3337780

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

Selected 'Legislation' may be taken into the exam, with non-verbal markings only.

LL295

Media Law

This information is for the 2023/24 session.

Teacher responsible: Dr Andrew Scott

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines freedom of speech and the legal and administrative regulation of the mainstream and social media. It centres on law and regulation in the UK, as influenced by European and international law.

The course opens with introductory lectures that introduce themes such as the 'media landscape', the sources and forms of media law (ethical, cultural and technological constraints, self-regulation, common law, statute, EC law and international law), and the rights and values that frame this area of law (free speech; privacy; impartiality; the protection of rights to a fair trial).

Thereafter, the course moves through three 'blocks' of study.

These blocks of study focus on (a) regulating content in defence of private interests (misuse of private information, data protection, confidentiality, copyright and defamation), (b) regulating content in defence of public interests (contempt and the integrity of justice; political diversity and impartiality; disinformation, fabrication and 'fake news'; offensive content; terrorism and national security), and (c) the control of journalistic newsgathering practices (risks to and protection of sources; technological circumvention of source protection; access to state information (FoI, and official secrets); open justice and access to courts and court documents; the regulation of the journalistic 'dark arts' (misrepresentation and subterfuge).

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term. Teaching will be conducted primarily through weekly two-hour seminars and a recorded introductory lecture. Students will also receive supervision in respect of an assessed research paper. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students will be expected to submit two drafts of formative essays or essay plans, one in Autumn Term and one in Winter Term, in support of the development of their summative coursework.

Indicative reading: Supporting texts for the course include

- Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (Oxford University Press, 2016);
- Parkes and Busutill (eds) *Gatley on Libel and Slander* (13th edn, Sweet & Maxwell, 2022),
- Moreham and Warby (eds), *Tugendhat and Christie: The Law of Privacy and the Media* (3rd edn, Oxford University Press, 2016), and
- Leveson, *An Inquiry Into the Culture, Practices and Ethics of the Press: Report*, HC 780, 2012.

These and other materials relevant to the course are generally made available via the BLPES electronic resources or online.

Assessment: Essay (100%, 8000 words) in the ST.

LL300

Competition Law

This information is for the 2023/24 session.

Teacher responsible: Ms Ayse Gizem Yasar

Additional teachers: Dr Niamh Dunne and Professor Pablo Ibanez Colomo

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Competition is widely understood to be the best means to deliver better goods and services at lower prices. The point of competition law is to preserve the process of rivalry between firms, and, by doing so, to benefit consumers and society at large. A broad range of corporate strategies are subject to this field of law. For instance, competition authorities enforce the law against large multinational firms (such as Microsoft, Google, or Intel) that have the ability to influence market conditions and exclude smaller rivals. Competition authorities also have the power to block mergers and acquisitions that are capable of harming consumers (think of a merger creating a monopoly). Attempts by firms to avoid competing by means of secret arrangements (the so-called 'cartels') are another key area of enforcement.

Competition law regimes have progressively become a major feature of legal systems around the world. They have long applied in the US and Europe – including the UK – but have now been adopted (and/or are actively enforced), *inter alia*, in jurisdictions like Brazil, Chile, China, Hong Kong, India, Malaysia, Singapore and South Africa. Unlike other legal disciplines, the relevant provisions in all of these regimes are virtually identical in their form and substance. This is, in other words, a truly cosmopolitan field. After this module, you will be equipped to understand and practice competition law almost anywhere in the world.

After an introduction in which competition law is put in its economic and institutional context, this module will address the main substantive and procedural aspects of the discipline. Topics covered include the following:

- Anticompetitive agreements between firms (including cartels and distribution agreements).
- Abusive practices by dominant firms.
- Mergers and acquisitions, including both mergers between competitors and vertical and conglomerate transactions.

Teaching: This course will have three hours of teaching content each week in Autumn Term and Winter Term in the form of a two-hour lecture and a one-hour class. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students are expected to produce at least two formative essays per term

Indicative reading: N. Dunne, A. Jones and B. Sufrin, *EU Competition Law* (Oxford: OUP, 8th ed, 2023); and H. Hovenkamp, *The Antitrust Enterprise* (Cambridge: Harvard University Press, 2005).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL301 Not available in 2023/24

Global Commodities Law

This information is for the 2023/24 session.

Teacher responsible: Prof Stephen Humphreys

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

The course is historical and theoretical in nature. It deals in the main with events from the colonial period (c.1510-1960) as they relate to the history of international and transnational law.

It does not aim to prepare students to work in commodity trading nor to equip them with expertise in the contemporary law of

commodity markets. (For topics in these areas, see LL202, LL203, LL253, or LL300). While this class is complementary to LL278, it is not necessary to have studied LL278 to take this class.

Course content: This course provides a critical introduction to the history of international law, with a focus on the colonial histories of Asia, Africa and the Americas. We will track the development of the production and consumption of raw materials, from their domestic origins to their marketization and circulation in global trade today. The histories of some principal commodities—spices, silver, sugar, coffee, rubber, oil—tell the story of today's global economy in microcosm. Their evolving regulation and exchange has provided the base for central elements of the contemporary international and transnational legal architecture. In exploring this history, we will touch on cross-cutting issues relating to some or all of the following: slavery, the law of the sea, human rights, trade law, environmental law, the laws of war, labour law, climate change and animal welfare law. We will also be looking at theories of consumption and production more generally, adopting a broad definition of 'commodity', drawn from Marxian and post-Marxist thought, to enrich our understanding and discussion of these topics. Our examination of emerging commodity markets will remain cognizant of the state-formation processes, international law developments, and trans-global networking entailed in their consolidation. We will also read and discuss theoretical and historical texts.

Summative assessment is through class presentation and dissertation work. Students will be expected to contribute regularly and often throughout the year and special emphasis is placed on producing a quality dissertation, critical in nature, extending into the theoretical and historical dimensions of contemporary international law problems. Lent Term in particular focuses on presentation and dissertation-writing with considerable time given over to individual feedback.

Following completion of the course, students can expect to have a broad understanding of the historical evolution of global law, with specific knowledge of how certain commodities have contributed to and shaped the most important international law challenges of our time. Through individual presentations and research projects students are expected to develop critical perspectives on aspects of the topics covered throughout the year as well as hone presentation skills.

On completion students should be able to demonstrate:

- A broad understanding of the historical rise in trade of global commodities and of its contribution to the development of international law, especially during colonial times.
- An awareness of intersecting legal issues relating to, for example: human rights, trade disputes, law of the sea, laws of war, environmental law, labour, animal welfare and illegal trade.
- An understanding of the impact that historical patterns of production and consumption of commodities around the world have had on contemporary international law structures.
- An appreciation of the critical theories that inform scholarly analysis of the global economy.

Teaching: This course will have a minimum of two hours of teaching content each week in Michaelmas Term and Lent Term, in the form of a two hour seminar. This course includes a reading week in Weeks 6 of Michaelmas Term and Lent Term.

Formative coursework: Students will be expected to submit one 2,000-word essay

Indicative reading: Fernand Braudel, *The Perspective of the World* (Civilization and Capitalism), 3 vols. trans. Sian Reynolds (Collins, 1984); Sarah Rose, *For All the Tea in China* (Arrow Books, 2010); Jean Baudrillard, *The Consumer Society* (Sage, 1998 [1970]); Duncan Kennedy (1985) 'The Role of Law in Economic Thought: Essays on the Fetishism of Commodities' 34 *The American University Law Review* 939-1001; Hugo Grotius, *The Freedom of the Seas, or the Right Which Belongs to the Dutch to take part in the East Indian Trade* [Mare Liberum], trans. Ralph Van Deman Magoffin (Oxford UP, 1916); David Graeber, *Debt: the First 5000 Years* (Melville House, 2011); Martti Koskenniemi (2011) 'Empire and International Law: The Real Spanish Contribution' 61 *University of Toronto Law Journal* 1-36; Lauren Benton and Benjamin

Straumann (2010) 'Acquiring Empire by Law: From Roman Doctrine to Early Modern European Practice' 28 *Law and History Review* 1-37; Michel Foucault, *Territory, Security, Population* (Palgrave, 2009); Anne Orford (2005) 'Beyond Harmonization: Trade, Human Rights and the Economy of Sacrifice' 18 *Leiden Journal of International Law* 179-213; Peter Linebaugh and Marcus Rediker, *The Many-Headed Hydra: The Hidden History of the Revolutionary Atlantic* (Verso 2002); Steven Topik, Carlos Marichal and Zephyr Frank (eds), *From Silver to Cocaine: Latin American Commodity Chains and the Building of the World Economy, 1500-2000* (Duke University Press, 2006).

Assessment: Essay (85%, 8000 words) in the WT and ST. Project (15%) in the AT and WT.

Summative assessment will be in two parts:

- 85% for an 8,000 word long essay (proposal to be submitted in LT)
- 15% for participation in, and presentation of, a research project.

LL302 Half Unit

Restitution for Unjust Enrichment

This information is for the 2023/24 session.

Teacher responsible: Dr Rachel Leow and Dr Timothy Liau

Availability: This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

The course is primarily aimed at students who are interested in a demanding course in advanced private law and presupposes at the very least, a strong grounding in English contract law, trusts law, and property law.

Pre-requisites: This course will appeal to those with an interest in private law. It builds upon modules taken in the core undergraduate compulsory curriculum (eg contract, property, and equity).

Students who enjoyed studying these courses will find that this course advances their understanding of private law as a whole. Many issues in the material covered have practical importance in commercial litigation.

A strong foundation in common law reasoning will be presumed.

Course content: This course is about the law of restitution for unjust enrichment: it is concerned with when a defendant may be compelled to make restitution to a claimant, because the defendant has been unjustly enriched at the claimant's expense. In England and Wales, unjust enrichment was only first judicially recognised as an independent source of obligations by the House of Lords in 1991 but has now become one of the most vibrant areas of modern private law. Many controversies exist, and the scope of restitution for unjust enrichment is still being worked out by courts across the common law world. In previous private law modules such as Law of Obligations and Property II, you may already have encountered fleeting references to 'unjust enrichment', explored in a necessarily superficial way; for example in cases on frustration, illegality, tracing, and knowing receipt.

The course aims to develop in students a deeper understanding of unjust enrichment, and its place within the broader map of private law. Generating distinctive rights and obligations, it forms a body of law independent from the laws of contract and torts, cutting across the jurisdictional divide between the common law and equity. After this course, students will be introduced to some modern debates about unjust enrichment, as well as accurately describe, apply, and evaluate the law of unjust enrichment in England and Wales.

This course will appeal to those with an interest in private law. It builds upon modules taken in the core undergraduate compulsory curriculum (eg contract, property, and equity). Students who enjoyed studying these courses will find that this course advances their understanding of private law as a whole. Many issues in the material covered have practical importance in commercial litigation.

Teaching: 20 hours of seminars in the AT.

Formative coursework: Students will have the opportunity to
