the way we do? Have you ever questioned why the 'logic' of the law operates as it does? Have you noticed that certain issues, ideas, or voices are absent? And have you ever dreamt of using your legal education to effect change? In *Race, Class, and Law* we develop our critical, reflective, collaborative, and creative capacities to interrogate what the law does and to re-imagine what it can or should do. Borrowing from Audre Lorde's influential metaphor, rather than attempting to use the master's tools to dismantle the master's house – rather than trying to change the law by staying within the bounds of the procedures we've inherited – in *Race, Class, and Law*, we traverse a range of disciplines in search of new tools and ways to use them. Taking the English legal system as its point of departure, the course centres several inquiries: an examination of the legal system as experienced 'from below', a historical understanding on the making and workings of 'modern law', and a critical analysis of law beyond the confines of the nation state. By the end of the course, you will have acquired a fresh perspective on the law as seen from a diversity of perspectives, developed new skills to critique current laws, and engaged in innovative thinking about the future of law and potential for change.

The course is delivered through ten interactive weekly seminars. The first part of the course involves expanding our critical toolkit by re-examining foundational concepts that underpin the law, such as 'neutrality', 'objectivity', and 'rationality', allowing for creativity and feeling to inform our work. During our search for alternative ways to study law, we critically engage with decolonial debates, exploring how these ideas apply to law and reflecting on whether they should. Relatedly, we delve into abolitionist debates and the potential for transformative justice to improve law and society. Substantive topics include revisiting the 'reasonable man' in law and assessing the significance of gender, class, and race in his formation. We also explore the impact of trans-Atlantic slavery on the creation of the modern law and how its afterlives persist. Over the remaining weeks, we use our newly acquired tools in overlapping fields of law, such as crime and criminal justice, welfare and housing, labour law and immigration, conflict and violence, and climate justice and the Anthropocene. Instead of accepting the law as it is, in *Race, Class, and Law* you are invited to evoke your radical imagination and envision how the law could be transformed in ways still to be discovered.

Teaching: 20 hours of seminars.

Formative coursework: Students answer and submit a mock exam question (maximum 2,000 words).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL210 Not available in 2024/25 Information Technology and the Law

This information is for the 2024/25 session.

Teacher responsible: Professor Andrew Murray and Dr Martin Husovec

Availability: This course is available on the BA in Anthropology and Law, BSc in Data Science and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This course does not require an in-depth understanding of contemporary computer technology – we are primarily interested in the implications of the use of information technology, and the intended and unintended consequences of regulating that use.

Course content: This survey course enables students to assess critically a selection of fundamental legal issues in the field of Information Technology (IT) Law. It begins by introducing students to key debates in technology and internet governance: do we need distinct legal rules to regulate technological systems? Who does, and should, enact these rules? Are technological systems like the Internet neutral, and should they be? Once students are equipped with this knowledge of technology governance and the challenges this poses for the law, we consider how the law has responded to the challenges brought about by technological systems and the extent to which legal issues have shaped the development of information society policy. The course does this by examining the key issues under headings such as data and digital platforms. The EU has taken the lead in proposing and adopting regulations to address the challenges of digitisation, ranging from its General Data Protection Regulation (GDPR) to the more recent Digital Services and AI Acts. Our primary focus will therefore be on EU law, although we will examine relevant developments and divergences in UK law and significant developments in other jurisdictions where relevant.

Aims and Objectives:

At the end of the course, students should be able to:

- Critically evaluate ongoing developments in law relating to technological systems;
- Display an understanding of how these developments relate to one another;
- Examine areas of doctrinal and political debate surrounding rules and theories;
- Evaluate those rules and theories in terms of internal coherence and practical outcomes;
- Draw on the analysis and evaluation contained in primary and secondary sources.

Indicative Content:

Internet Governance and Infrastructure

- An Introduction to IT Law
- Who Regulates? Questions of Jurisdiction
- What we Regulate?
- Net Neutrality
- Case study: Governing Cloud Computing

Data

- Data Flows and Data Localisation
- The GDPR: Regulating Personal Data Processing
- AdTech and the Monetisation of Personal Data
- Legal Responses to Automated Decision-Making and Profiling
- State Surveillance and Facial Recognition Technology

Digital Platforms

- Intermediaries and Freedom of Expression
- Platforms: Global Models

- Copyright Law in the Digital Environment
- Online Safety Bill and Defamation
- Website Blocking

Current Challenges

- The Emergent Legal Issues of the Sharing Economy
- Children's rights in the Digital Environment
- Robotics, Risk and Ethics
- AI and Justice

This is an indicative programme.

Teaching: This course will be delivered by lectures and classes each week, totalling at least 30 hours in both Autumn and Winter Terms. This course includes a reading week in Weeks 6 of Autumn and Winter Terms.

Indicative reading:

- Murray: *Information Technology Law: Law and Society* 5th ed (Oxford: OUP, 2023)
- Lloyd: *Information Technology Law* 8th ed (Oxford: OUP, 2017).
- Lessig: *Code and Other Laws of Cyberspace* ver.2.0 (New York: Basic Books, 2006).

Suggested Initial Reading:

Murray: *Information Technology Law: Law and Society* 5th ed, Ch.1.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

This exam will consist of a combination of problem and essay questions.

LL211 Half Unit Law, Poverty and Access to Justice

This information is for the 2024/25 session.

Teacher responsible: Dr Joseph Spooner and Dr Sarah Trotter

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is not available as an outside option nor to General Course students.

Course content: This course will examine key issues in the relationships between law, poverty, and inequality. These include the way in which legal principles and policy may create and perpetuate inequality, and the manner in which legal process and method – and difficulties of accessing law – disadvantage the poor. It will also explore the progressive potential of law as a tool for alleviating poverty and inequality. The course aims to act as an academic counterpart to the Law School's support of the pro bono work undertaken by our LLB students, and should be of particular contemporary relevance as challenging economic conditions impact household living standards across the UK.

The course will be divided into two main parts. The first part will ask key overarching questions regarding the extent to which the law shapes the lives and can advance the interests of the poor. It considers how existing legal structures influence conditions of poverty and inequality, and explores how the work of legal scholars and practitioners can contribute to alleviating poverty through service, advocacy, and/or activism. Sessions will consider key questions such as

- Law and Poverty: what is the role of the law in relation to contemporary problems of poverty and inequality?
- Reflections on the limits of legal change: Is law for the rich? What can law do for the poor?
- How can access to justice be achieved under endless Austerity?
- What is the role of lawyers in an age of inequality?

Treatments of these topics will consider a range of perspectives (including, for example, views from market-failure analysis, feminist theories, human rights, vulnerability theory, and political economy), and will aim to introduce students to contemporary and historical trends in poverty and inequality in and across the UK.

The second part of the course will adopt a thematic approach to examine key areas where the law plays an important role in the lives of low-income households. Each session will take a snapshot focus on a different area of law, applying the ideas and theoretical perspectives from the first part of the course to concrete

substantive legal fields. While the topics selected for the second part of the course may vary, proposed subjects include:

- The Poor Pay More: law, inequality, and markets
- Money and Debt (including the regulation of high-cost credit, and the role of bankruptcy as a debt relief measure for over-indebted households)
- The role of Government as a Creditor of the Poor
- Welfare conditionality: law, rhetoric, and reality
- The interaction of structural inequalities and benefits policies: the role the courts
- Housing and the case of the bedroom tax

Teaching: 20 hours of seminars.

Formative coursework: 1,500 word essay

Indicative reading:

- Philip Alston, 'Visit to the United Kingdom of Great Britain and Northern Ireland: Report of the Special Rapporteur on Extreme Poverty and Human Rights' (United Nations General Assembly 2019)
- Meghan Campbell, 'The Austerity of Lone Motherhood: Discrimination Law and Benefit Reform' (2021) *Oxford Journal of Legal Studies* 41(4), 1197-1226

- Lisa Vanhala and Jacqueline Kinghan, 'The "madness" of accessing justice: legal mobilisation, welfare benefits and empowerment' (2022) *Journal of Social Welfare and Family Law* 44(1), 22-41

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL212

Conflict of Laws

This information is for the 2024/25 session.

Teacher responsible: Dr Jacobus Bomhoff

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Interested students may wish to consider taking this course as an option in their third year. That said, over the past years many second year students have taken this course without any problems. The only required background understanding relates to (English) law of obligations. Basic issues of EU law relevant to the course will be covered in class.

It is also available as an outside option to third year students where regulations permit and with the permission of the course teacher.

Course content: Conflict of laws – also known as private international law – is the area of law concerned with private law cases that cross borders. Conflict of laws differs from public international law in that it deals with transactions between private individuals, rather than with those directly implicating States or international organizations.

What rules should an English court apply to a contract between companies from different countries, or to a tort claim arising out of an environmental disaster abroad? Should foreign celebrities be allowed to sue in the English courts when they feel they have been defamed in an article posted on an American website? Should the English courts recognize judgments from other countries, even when they conflict with English ideas of right and wrong? Should courts in EU countries still give effect to the judgments from English courts in a post-Brexit world? It is questions like these that make up the subject of the conflict of laws. The field's central technical questions are (1) jurisdiction (will an English court or a foreign court hear the case?), (2) choice of law (should the court apply its own law or that of a foreign country?), and (3) the recognition and enforcement of foreign judgments. During the course, these three questions will frame reflection on a range of topics, including commercial/practical issues (how can companies structure their cross-border transactions?), but also questions of a more political nature (to what extent should States be able to regulate matters beyond their own borders?) or with a strong social/cultural dimension (how should foreign cultural values be accommodated in English law?).

Although conflict of laws has a long history within English law, for some areas many of the relevant rules have changed dramatically in recent years under the influence of EU legislation and case law. Some of these EU rules have been retained in English law after Brexit. Others have been replaced by either English law or by international treaties. In this course, we will look at English law, EU law, and international treaty regimes where relevant; and we will take a comparative look at selected topics in US law.

During the course, we will look at (1) jurisdiction in international commercial litigation, (2) choice of law issues in contract and tort, (3) recognition and enforcement of foreign judgments, and (4) comparative aspects and theoretical foundations of conflict of laws.

Most of the material for this course (cases, literature extracts, text, and further reading references) is contained in a Course Reader which is uploaded in instalments on the course Moodle page.

Syllabus:

- Jurisdiction of English courts under the traditional English rules for actions in personam: Service of a claim form within the jurisdiction & out of the jurisdiction, choice of court clauses, stay of proceedings, restraining foreign proceedings (anti-suit injunctions).
- Jurisdiction of courts in other EU Member States under European Union Council Regulation 1215/2012, and the parallel regime in the Lugano Convention 2007.
- Recognition & enforcement of foreign judgments at common law (in English courts), under European Union rules (in EU Member States), under the Lugano Convention 2007, and under the Hague Conventions.
- Choice of law relating to contracts under the retained rules of the EU Rome I Regulation: Interpreting choice of law clauses in contracts, applicable law in absence of choice, overriding mandatory rules, public policy, foreign illegality in English law.
- Choice of law relating to tort under the retained rules of the Rome II Regulation, older English approach, 'interest analysis' and other approaches of the 'US conflict of laws revolution'
- Comparative conflict of laws & Theoretical foundations

Teaching: This course is taught as a two-hour seminar each week. The course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: One formative (unassessed) essay per term.

Indicative reading: Briggs, *The Conflict of Laws* (4th ed., Oxford University Press, 2019); Cheshire, North & Fawcett, *Private International Law* (15th ed., Oxford University Press, 2017)
Resources: www.conflictolaws.net (Topical references, cases and reviews)

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL213 Half Unit

Commercial Law

This information is for the 2024/25 session.

Teacher responsible: Dr Paul MacMahon

Additional Teachers: Dr Rachel Leow and Dr Joseph Spooner

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is not available as an outside option nor to General Course students.

Pre-requisites: This course builds on LL142 Contract Law. Students are advised to take it concurrently with LL276 Property (or after LL275 Property II).

Course content: This half-unit course covers fundamental ideas in the private law of business-to-business transactions. Building on LL142 Contract Law, the course explores how contract law principles apply to specific types of business deal. It also complements LL275 Property II and LL276 Property's examination of property and trusts by addressing personal property law issues in commercial contexts. Topics are likely to include sale of goods, banking, credit and security, agency, and assignment. Students will learn to apply their knowledge to new situations and to evaluate existing laws and proposed reforms.

Teaching: Two hours of lectures and one hour of class per week in Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: At least one formative essay.

Indicative reading: Core reading consists mainly of judicial decisions and statutory provisions. Useful secondary sources include:

- Goode and McKendrick on Commercial Law (6th edition, LexisNexis Butterworths, 2020)
- William Day, *Commercial Law* (Hart Publishing, 2023)
- Rachel Leow, 'Understanding Agency: A Proxy Power Definition' (2019) 79 *Cambridge Law Journal* 99
- Andrew Dyson (Summers) and Adam Kramer, 'There is No "Breach Date Rule": Mitigation, Difference in Value and Date of Assessment' (2014) 130 *Law Quarterly Review* 259
- Michael Bridge, 'Risk, Property, and Bulk Goods in International Sales' [2019] *Lloyd's Maritime and Commercial Law Quarterly* 57
- Paul MacMahon, 'Rethinking Assignability' (2020) 79 *Cambridge Law Journal* 288
- Sarah Paterson, 'The Insolvency Law Consequences of the Abolition of the Fixed/Floating Charge Distinction' Secured Transactions Law Reform Project Discussion Paper (2016)
- Sir Ross Cranston et al, *Principles of Banking Law* (3rd edn, OUP, 2018)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL216 Half Unit

Freedom and the Law in Britain

This information is for the 2024/25 session.

Teacher responsible: Professor Conor Gearty

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The focus of this course is on civil liberties protection in the UK, their history and development over the years, and the state of freedom in contemporary Britain. It considers the common law approach to liberty and analyses how the Human Rights Act impacts on the protection of civil liberties. The emphasis will be on the way in which civil liberties are practically protected in the UK, with the law on police powers, on public order and on terrorism being the subject of particular interest. Inevitably in the current political climate, the future of the Human Rights Act is also considered. Contemporary protests on climate change, inequality and Palestine, are discussed in order to answer the question, how much protest is possible in Britain today. The goal of the course is to enable students to critically assess the extent to which freedom is protected in UK law, both historically and at the current time. Has protection declined over the years? Was there ever a 'golden age' for freedom in Britain? How relevant is Britain's colonial past to its approach to civil liberties today? The teaching of this course is mainly case-based. There will be one one-hour lecture and one two-hour seminar weekly in the Winter Term. To complete it successfully, students must prepare for each class by reading and thinking through the relevant cases; the classes will be conducted on the basis of the expectation that the students are familiar with the materials. There is no comprehensive textbook available for this course.

Syllabus:

The theory of civil liberties protection; the history of civil liberties; the Human Rights Act 1998; the relationship between the Act and the protection of civil liberties; the law on police powers; the law on freedom of assembly and public order; UK anti-terrorism law. The debate about a new bill of rights for Britain.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours in Winter Term. This course includes a reading week in Week Six. There will also be a revision class in Spring Term.

Formative coursework: Students will be expected to produce one formative essay.

Indicative reading:

- Conor Gearty, *Civil Liberties* (OUP, 2007) and (more recently)
- Tom Hickman, *Public Law after the Human Rights Act* (Hart, 2010),
- Aileen Kavanagh, *Constitutional Review under the UK Human Rights Act* (CUP, 2009).
- Keith Ewing and Conor Gearty, *Freedom under Thatcher* (Oxford, 1990)
- Keith Ewing and Conor Gearty, *The Struggle for Civil Liberties* (Oxford, 2000)
- Conor Gearty, *On Fantasy Island. Britain, Strasbourg and Human Rights* (OUP, 2016),
- Conor Gearty, *Homeland Insecurity. The Rise and Rise of Global Anti-terrorism Law* (Polity, 2024)
- Bradley, Ewing and Knight, *Constitutional and Administrative Law* (18th edn, paperback 2022).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL217 Half Unit**European Human Rights Law**

This information is for the 2024/25 session.

Teacher responsible: Professor Kai Moller

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course starts with an introduction to the European Convention on Human Rights and the doctrinal framework that the European Court of Human Rights has developed (in particular: proportionality; the margin of appreciation; the living instrument doctrine; the emerging consensus doctrine; negative and positive obligations). This will be followed by five weeks in which we will study the Court's jurisprudence on a number of important human rights, including freedom of expression, freedom of religion, freedom of association and the right to vote, freedom from torture and inhuman or degrading treatment or punishment, and the right to respect for private and family life. The course will place special emphasis on understanding and analysing the human rights implications of morally and politically sensitive and controversial issues, such as questions relating to the protection of hate speech, the relevance of offence to religious feelings, the protection of religious symbols and religious dress such as Christian crosses and Islamic burqas, the protection of sexual practices such as sado-masochism and incest, the human rights status of same-sex relationships, and the question of the applicability of the right to freedom from torture and inhuman or degrading treatment in the context of extradition and deportation. The goal of this part of the course is to enable the students to develop subtle, sophisticated, and balanced arguments about controversial human rights issues. The final part of the course introduces the students to the theory of human rights adjudication, including Robert Alexy's theory of rights as principles and optimisation requirements, Mattias Kumm's theory of rights adjudication as Socratic contestation, Ronald Dworkin's theory of rights as trumps, and the culture of justification.

Syllabus:

The European Convention on Human Rights and the European Court of Human Rights; proportionality, the margin of appreciation, the living instrument doctrine, emerging consensus, negative and positive obligations. Freedom from torture and inhuman or degrading treatment or punishment; freedom of expression; freedom of association and 'militant democracy'; freedom of religion; the right to respect for private and family life. Theories of proportionality-based rights adjudication: Robert Alexy's theory of rights as principles; Mattias Kumm's theory of rights adjudication as Socratic contestation; Ronald Dworkin's theory of rights as trumps; the culture of justification and the right to justification.

Teaching: This course is delivered in Autumn Term and through a combination of 2 hours of lectures and a 1 hour class per teaching week. This course includes a reading week in Week 6 of Autumn Term. There will be a revision class in Spring Term.

Formative coursework: Students will be expected to produce one formative essay.

Indicative reading: For the European Convention on Human Rights, interested students may want to take a look at

- Harris, O'Boyle and Warbrick, *Law of the European Convention on Human Rights* 5th edn (OUP, 2023).

For the more theoretical aspects of the course, see

- Kai Möller's *The Global Model of Constitutional Rights* (OUP, 2015).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL220 Half Unit**Technology Law and Regulation**

This information is for the 2024/25 session.

Teacher responsible: Professor Andrew Murray

Availability: This course is available on the BA in Anthropology and Law, BSc in Data Science and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This course does not require an in-depth understanding of contemporary computer technology – we are primarily interested in the implications of the use of information technology, and the intended and unintended consequences of regulating that use.

Course content: This course examines and discusses topical issues in relation to the law and digital data information storage, access, and exchange through digital information devices (computers, smartphones, tablets etc.). It examines issues relating to network regulation or control by addressing questions such as "can internet-enabled communications be regulated?" and "who is competent to police online content and activity?" It concludes its examination of structural controls by examining the highly topical and politically charged issue of enshrined network neutrality: by asking the question: should Internet Service Providers be allowed to vary service conditions by types of content? It will also address cutting edge issues such as algorithmic regulation, profiling, deceptive content, the regulation of AI, legal technologies and dispute resolution, and online safety.

The course is delivered in two parts: (1) An introduction to technology regulation and governance (Code as Law) and (2) Governance of and by Algorithms.

Aims and Objectives:

At the end of the course, students should be able to:

- Critically evaluate ongoing developments in law relating to information and communications technologies (ICTs);
- Display an understanding of how these developments relate to one another;160
- Examine areas of doctrinal and policy debate surrounding rules and theories;160
- Evaluate those rules and theories in terms of internal coherence and practical outcomes;160
- Draw on the analysis and evaluation contained in primary and secondary sources.

Indicative Content:

1 *Digitisation, Datafication and Law*

2 *How We Regulate the Internet: Lawrence Lessig's Modalities and their Critiques*

3 *How We Regulate the Internet: Contemporary Approaches*

4 *Net Neutrality*

5 *Surveillance Capitalism and Personal Data Privacy*

6 *Dominant Platforms: Market Regulation*

7 *Dominant Platforms: Platform Governance*

8 *Regulating Artificial Intelligence and Machine Learning I: Legal Risks and Challenges*

9 *Regulating Artificial Intelligence and Machine Learning II: The Regulatory Landscape*

10 *Artificial Intelligence and Machine Learning in Legal Practice*

This is an indicative programme.

Teaching: This course will be delivered by lectures and classes each week, totalling 30 hours in Autumn Term. This course includes a reading week in Weeks 6 of Autumn Term.

Indicative reading:

- Murray: *Information Technology Law: Law and Society* 5th ed (Oxford: OUP, 2023)
- Phillip Hacker, Andreas Engel & Marco Mauer: *Regulating ChatGPT and other Large Generative AI Models Fairness, Accountability, and Transparency* (FAccT '23) June 2023.
- Lessig: *Code and Other Laws of Cyberspace* ver.2.0 (New York: Basic Books, 2006).

Suggested Initial Reading:
Murray: *Information Technology Law: Law and Society* 5th ed,

Ch.1.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

This exam will consist of discursive essay questions.

LL221

Family Law

This information is for the 2024/25 session.

Teacher responsible: Dr Sarah Trotter

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This is a course about the way in which law constructs and regulates family relationships and about the effect of that regulation on those relationships. We will examine law's idea of 'the family' and its ways of engaging with a range of relationships, including those that have tended to preoccupy family law (namely relationships between couples and between children and their parents) and those that have tended to attract less legal attention (including relationships between grandparents and grandchildren and between siblings). The kinds of questions that we will explore include: how should disputes over children be resolved? In what circumstances should a local authority intervene to remove a child from their family? How should the state respond to domestic abuse? Should cohabiting siblings be able to have a civil partnership? How should money and property be distributed in the event of a couple's separation? How should the law respond to a situation in which a birthmother conceals her pregnancy and wants the baby to be taken into care without the birthfather's knowledge? If you are interested in thinking through such questions and in embarking on a broader inquiry into how and why law constructs a particular vision of 'the family' and indeed regulates family life at all, then this could be a good course for you. The structure of the course will be as follows: In the first term we will study: 1. Legal constructions of 'the family', 'family life', and 'families'; 2. Legal gender; 3. The institutions of marriage and civil partnership and the rise of cohabitation; 4. The law of marriage and civil partnership; 5. Divorce and dissolution; 6. Family finances (including child support); 7. Financial orders on divorce and dissolution; 8. The nature and extent of domestic abuse; 9. Legal measures and state obligations in relation to domestic abuse; 10. Inheritance law. In the second term we will study: 1. The family justice system; 2. Child law in practice; 3. Legal parenthood and parental responsibility; 4. Child welfare; 5. Children's rights; 6. Post-separation parenting and disputes over children; 7. Child protection; 8. Adoption.

Teaching: There will be a 2-hour lecture and a 1-hour class every week in the Autumn Term and the Winter Term. In the Spring Term (and before the exam) there will be two revision sessions (a 2-hour lecture and a 1-hour class). This course includes a reading week in Weeks 6 of the Autumn Term and the Winter Term.

Formative coursework: You will be expected to write 1 essay in the Autumn Term and 1 essay in the Winter Term. Additional optional essays will be set at the end of each term.

Indicative reading: A course guide containing the syllabus will be provided at the start of the course and a reading list and handout with questions to think about will be provided for each topic. The essential reading for each class will be based on articles and cases.

To get a sense of the subject of family law prior to commencing the course, I would suggest reading *Family Law and Personal Life* (2nd edition) by John Eekelaar (2017, Oxford University Press) and *In Your Defence: Stories of Life and Law* by Sarah Langford (2018, Doubleday).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL224 Half Unit

Regulation of Platforms

This information is for the 2024/25 session.

Teacher responsible: Dr Martin Husovec

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Digital services, such as social media, online marketplaces, app stores, and search engines, were left largely unregulated for twenty years. While users of the services were exposed to liability under typical content rules applicable to obscenity, defamation or intellectual property, the platforms were regulated only lightly. The first generation of content regulation focused on enabling companies to operate services that process user-generated content through a set of liability exemptions (US Communication Decency Act, EU E-Commerce Directive, etc.). The global norm was reliance on self-regulation of the technology industry when it comes to content issues. Following a number of controversies, in the early 2020s, legislatures around the world started introducing new comprehensive content-related regulations to address various problems, ranging from hate speech and terrorist content to child sexual abuse material and copyright infringements. This course covers some of the basic content laws dealing with what users can and cannot do online, and regulatory models dealing with platforms and other digital providers that host, distribute and give access to content.

An indicative list of topics includes:

Users, Intermediaries and Freedom of Expression

Policing Obscenity

Policing Defamation

Policing Antisocial and Harmful Content

Platforms: Business Models and Regulatory Approaches

Platform Competition and Ex-Ante Rules

Content Moderation Fair Procedure

Platform Design Practices and Risk Management

Filtering and Website blocking by Infrastructure Providers

Territoriality of Content Enforcement

Teaching: 20 hours of lectures and 9 hours of classes in the WT. 2 hours of seminars in the ST.

Core teaching will be delivered across 11 weeks, e.g. lectures in Weeks 1-10, classes/seminars in Weeks 2-11. There will be a Reading Week in Week 6.

Formative coursework: 1,500 word essay.

Indicative reading: A Murray: Information Technology Law: Law and Society 5ed (esp. Part II)

P Bernal, *The Internet, Warts and All: Free Speech, Privacy and Truth* (CUP 2018)

T Garton Ash, *Free Speech: Ten Principles for a Connected World* (Atlantic 2016)

M Husovec, *Principles of the Digital Services Act* (Oxford University Press, 2024, forthcoming)

M Husovec, *Rising Above Liability: The Digital Services Act as a Blueprint for the Second Generation of Global Internet Rules* (2023) *Berkeley Technology Law Journal* Vol. 38, No. 3 (2024), available at <https://ssrn.com/abstract=4598426>

J Riordan, *The Liability of Internet Intermediaries* (OUP 2016)

M Collins, *Collins on Defamation* (OUP 2014)

J Balkin, 'Free speech is a triangle' (2018) 118 *Columbia Law Review* 2011

de Stree, Alexandre and Feasey, Richard and Kraemer, Jan and Monti, Giorgio, *Making the Digital Markets Act More Resilient and Effective* (May 26, 2021). Available at SSRN: <https://ssrn.com/abstract=3853991> or <http://dx.doi.org/10.2139/ssrn.3853991>

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL225 Half Unit

Critical Theory and Law

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Wilkinson

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines the state and law from the perspective of critical theory. The nature of critique varies, but central to critical theories are issues of power, and specifically, inequalities of power and how they shape society. Also central are issues of law's relationship to social and political change. Critical theory diagnoses modern society and offers evaluation of the causes of things, but it also offers various remedies, both reformist and revolutionary in nature. It is therefore explanatory and normative in dual perspective.

The course will tackle classical critical theory rooted in the work of Karl Marx, 20th century critical theory associated with the 'Frankfurt school', and more contemporary strands of critical theory, such as Black Marxism, Critical Legal Studies, and Law and Political Economy. We will also look at theories of the relationship between law and politics and law and democracy, and current challenges to law and the state coming from environmental movements and global concerns.

Topics include:

Introduction to Critical Theory
Enlightenment and Critical Theory
Classical Marxism
Contemporary Marxism
Frankfurt School Critical Theory
Critical Legal Studies
Law and Politics
Law and Democracy
Law and Political Economy
Environmentalism
Populism
Eurocentrism

Teaching: 20 hours of seminars in the WT. 2 hours of seminars in the ST.

Formative coursework: 1,500 word essay.

Indicative reading: There is not one single text. We will be looking at specific texts for each topic (some of which are currently part of the Jurisprudence syllabus (which I can provide on request). An introductory text to critical theory is Raymond Geuss, *The Idea of a Critical Theory* (CUP 1981). We will be looking at excerpts from some of the following texts: Karl Marx and Friedrich Engels, *The Communist Manifesto* (Penguin, 2002), Hannah Arendt, *The Human Condition* (Penguin 1958), Jürgen Habermas, *Towards a Discourse Theory of Law and Democracy* (MIT, 1992), Nancy Fraser, 'Behind Marx's Hidden Abode' (New Left Review, 2014), Samir Amin, *Eurocentrism* (Monthly Review Press, 2010).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

and most ambitious experiment with governance beyond the state. This course focuses on how the EU works, and how it has navigated the tension between, on the one hand, the commitment to 'do things together', solve collective problems by cooperation and the creation of institutions beyond the state, and, on the other hand, the desire for domestic self-rule, national interests and political identities. It covers the basic institutional, constitutional, and substantive discussions that animate EU law and that influence the EU-UK relationship. It covers the EU law aspects of the GLD and SQE.

Teaching and learning activities will include lecture elements as well as facilitated synchronous discussions and problem solving. In addition, peer-to-peer elements such as small-group work will be employed. The module will follow the Universal Design for Learning philosophy to create an inclusive learning environment. Adjustments will be made for students with disabilities and learning difficulties. Slides and class questions will be posted in advance.

At the end of the course you will be able to critically and independently assess both the legal structure of the EU as well as the political and social context within which it operates.

Topics include:

- Understanding EU Law
- Institutions and Law-Making
- Democracy
- Legal Order
- Judicial System
- Internal Market
- Free Movement of Persons
- Values
- Brexit I: Institutions and Differentiation
- Brexit II: Substantive dimension

Teaching: This course will have a minimum of three hours of teaching content each week in Autumn Term in the form of a two-hour lecture (every week) and an one-hour class. This course includes a Reading Week in Weeks 6 of Autumn Term. Essays will be set around reading week to allow students to dedicate time to writing skills.

Formative coursework: Students will be expected to produce one essay of 1,500 words in the Autumn Term.

Indicative reading:

- Dawson & De Witte, *EU Law and Governance* (CUP 2022).
- K. Hayward, 'Flexible and Imaginative: The EU's Accommodation of Northern Ireland in the EU-UK Withdrawal Agreement' (2021) 58 *International Studies* 201.
- Pavone & Keleman, 'The Evolving Judicial Politics of European Integration: The European Court of Justice and national courts revisited' (2019) *ELJ*.
- Roederer-Rynning and Greenwood, 'Black boxes and open secrets: trilogues as 'politicised diplomacy'' (2021) 44 *West European Politics* 485.
- V. Perju, 'Against Bidimensional Supremacy in EU Constitutionalism' (2020) *GLJ* 1007.
- Dawson & De Witte, *EU Law and Government* (CUP 2022). In addition, the course uses a broad

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL228 Half Unit

European Union Law

This information is for the 2024/25 session.

Teacher responsible: Dr Floris De Witte

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

It is recommended that this course is taken in the second year of the LLB.

Course content: The EU is central to all of the most pressing challenges that we face: migration, environment, Russia's invasion of Ukraine, rule-of-law backsliding, AI regulation. It is the biggest

LL229 Half Unit

Law of the European Market

This information is for the 2024/25 session.

Teacher responsible: Dr Jan Zginski

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The EU's internal market is the biggest in the world in terms of GDP. It is also one of the most powerful legal systems in the world, with a global regulatory influence on a variety

of matters. It covers technical areas such as financial services, and more practical questions such as the sale of alcoholic products. Understanding the EU's market is understanding not just how the EU's economy is structured, but how economic goals interact with social, cultural, and other normative concerns.

This course takes you through the institutional configuration of the EU's internal market, highlighting how judicial power and legislative power intersect. It focuses on some of the most contentious and high-profile aspects of the internal market, including the corporate, financial, and digital market. Finally, it reflects on the interaction between the EU's market and the UK and global markets.

Teaching and learning activities will include lecture elements as well as facilitated synchronous discussions, problem solving, and peer-to-peer elements such as small-group work. The module will follow the Universal Design for Learning philosophy to create an inclusive learning environment. Adjustments will be made for students with disabilities and learning difficulties. Slides and class questions will be posted in advance. The topics and readings will consider diverse views and voices.

Topics:

- The Structure of the Internal Market: Judicial and Legislative
- Trade Barriers and Defences
- The Corporate Market
- The Social Market
- The Digital Market
- The Financial Market
- Global Markets and UK-EU Trade

Teaching: 20 hours of seminars in the WT. 2 hours of seminars in the ST.

Formative coursework: 1,500 word essay.

Indicative reading:

- Bradford, *The Brussels Effect: How the European Union Rules the World* (OUP 2020)
- Egan, *Single Markets: Economic Integration in Europe and the United States* (OUP 2014)
- Dunne, 'Liberalisation and the Pursuit of the Internal Market' (2018) 34 *European Law Review* 803
- Snell, 'The Internal Market and the Philosophies of Market Integration' in Peers and Barnard (eds.), *European Union Law* (3rd ed, OUP 2020) 334
- Sadl, López Zurita and Piccolo, 'Route 66: Mutations of the Internal Market Explored Through the Prism of Citation Networks' (2023) 21 *International Journal of Constitutional Law* 826
- Ashiagbor, 'Unravelling the Embedded Liberal Bargain: Labour and Social Welfare Law in the Context of EU Market Integration' (2013) 19 *European Law Journal* 303
- Havelková, 'Women on Company Boards: Equality Meets Subsidiarity' (2019) 21 *Cambridge Journal of European Legal Studies* 187
- De Gregorio, 'The Rise of Digital Constitutionalism in the European Union' (2021) 19 *International Journal of Constitutional Law* 41
- Zginski, 'The UK Internal Market: A Global Outlier?' (2023) 82 *Cambridge Law Journal* 350.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL232

European Union Law

This information is for the 2024/25 session.

Teacher responsible: Prof Floris De Witte

Availability:

This course is semi-core in Year 3 of the BA in Anthropology and Law. This course is not available as an outside option nor to General Course students.

Only third year students of BA in Anthropology and Law can take this course.

Course content: The EU is central to all of the most pressing challenges that we face: migration, environment, Russia's invasion

of Ukraine, rule-of-law backsliding, AI regulation. It is the biggest and most ambitious experiment with governance beyond the state. This course focuses on how the EU works, and how it has navigated the tension between, on the one hand, the commitment to 'do things together', solve collective problems by cooperation and the creation of institutions beyond the state, and, on the other hand, the desire for domestic self-rule, national interests and political identities. It covers the basic institutional, constitutional, and substantive discussions that animate EU law and that influence the EU-UK relationship. It covers the EU law aspects of the GLD and SQE.

Teaching and learning activities will include lecture elements as well as facilitated synchronous discussions and problem solving. In addition, peer-to-peer elements such as small-group work will be employed. The module will follow the Universal Design for Learning philosophy to create an inclusive learning environment. Adjustments will be made for students with disabilities and learning difficulties. Slides and class questions will be posted in advance.

At the end of the course you will be able to critically and independently assess both the legal structure of the EU as well as the political and social context within which it operates.

Topics include:

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL233 Not available in 2024/25

Law of Evidence

This information is for the 2024/25 session.

Teacher responsible: Dr Abenaa Owusu-Bempah and Dr Federico Picinali

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: If a person is suspected of committing a crime, how does the prosecution go about proving that she is guilty? Are there any restrictions on the type of evidence that the prosecution can use to prove its case? What protections does the law offer to defendants in order to safeguard them against false conviction? Is accurate decision-making all that matters in the criminal trial? These are among the central questions in the law of criminal evidence, that is, the set of rules governing the production of evidence, as well as its admissibility and its use in criminal trials. This course concentrates on criminal, rather than civil, evidence. Emphasis is placed on matters of principle, conceptual issues and the most significant legal rules. The aims of the course are to teach students how to reason about evidence, and to encourage them to reflect critically on the modern law of criminal evidence. At a more detailed level, we consider how inferences are drawn from evidence, and how basic ideas of probability can give insights on this process. We study the standard of proof, asking whether a high standard such as 'proof beyond reasonable doubt' is justified. As far as pre-trial procedures are concerned, we examine – among other things – how the police gain confessions from suspects and produce eyewitness identification evidence; we also look at how the law regulates the admissibility of these types of evidence. A central theme on the course is the question as to what makes a trial fair. The European Convention on Human Rights is relevant to this question. In this context, we look – among other things – at whether courts should admit improperly obtained evidence, and we ask what the privilege against self-incrimination is and whether it can be justified. The study of trial fairness will also lead us to consider the roles that sexism and racism may play in the interpretation and application of the law of evidence. We will ask whether, beyond the veneer of neutrality, the law of evidence has been, and can be, used as an instrument of oppression of disadvantaged social groups. And we will discuss ways to prevent this from happening. As you will learn, much of the law of evidence consists of rules of admissibility. Among these we cover 'traditional' rules such as those regulating the admissibility of hearsay evidence (a topic that now has an important human rights angle) and of bad character evidence (can a defendant's previous convictions be introduced against her at trial?). We also look at particular problems relating to testimony, ranging from the protections afforded to vulnerable witnesses to the admissibility of evidence concerning the sexual history of complainants in trials for sexual offences.

Syllabus: While coverage may vary from year to year, we usually focus on the following themes and topics:

Reasoning with Evidence:

- Analysing Evidence: Relevance, Probative Value and Generalisations;
- Relevance and Probative Value Through the Lenses of Gender and of Race;
- The Standard of Proof, the Burden of Proof and the Presumption of Innocence;

Trial Fairness and the Gathering of the Evidence:

- Improperly Obtained Evidence;
- Eyewitness Identification;
- Confessions;
- Entrapment;

Traditional Rules of Admissibility:

- Hearsay;
- Confrontation;
- Bad Character Evidence;

Trial Fairness and Defendant Cooperation:

- The Privilege Against Self-Incrimination;
- Drawing Inferences from Silence;
- Disclosure;

Testimony:

- Examination of Witnesses
- Vulnerable Witnesses;
- Sexual History Evidence.

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term, in the form of a lecture and one hour class. This course includes a

reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the Autumn Term and 1 essay in the Winter Term.

Indicative reading: There is no set text for the course, but standard texts are useful on many topics. Consider, for instance,

- I. H. Dennis, *The Law of Evidence* (London: Sweet & Maxwell, 7th ed, 2020);
- A. Choo, *Evidence* (Oxford: OUP, 6th ed, 2021);
- L. Campbell, A. Ashworth and M. Redmayne, *The Criminal Process* (Oxford: OUP, 5th ed, 2019);
- P. Roberts, *Roberts and Zuckerman's Criminal Evidence* (Oxford: OUP, 3rd ed, 2022).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL241

European Legal History

This information is for the 2024/25 session.

Teacher responsible: Dr Umberto-Igor Stramignoni

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course seeks to explore some of the relations and processes that gave origins to the law of Western Europe.

The course opens with the emergence of a certain kind of "law" in and around Rome circa 8th century BCE. It then turns to law's subsequent developments as they made the Roman world possible, but also as they related to each other over time. As the ancient world wanes, and is replaced by the extraordinary and expansive world of Christianity, Roman law takes on new and different configurations. Things will shift again during the Italian Renaissance, Northern Humanism, and European Enlightenment, and with the French Revolution of 1789, leading up to the first major codification of law to take place in modern Europe.

Teaching: This course will be taught by a weekly lecture and class in Autumn Term and Winter Term. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: At least one formative (unassessed) essay per term.

Indicative reading: There is no single textbook for this course.

Instead, students will be required to familiarize themselves with the content of a mixture of visual aids (designed specifically for this course by Dr Stramignoni) and of written texts, including a selection of chapters from a range of different books and shorter articles from a variety of scientific journals suggesting different philosophical, historical, anthropological, cultural, and other approaches to the past of the law in Europe. Those thinking to take this course are encouraged to explore the course Moodle page for more information or contact the course convenor directly.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL243 Half Unit

Constitutionalism Beyond Courts

This information is for the 2024/25 session.

Teacher responsible: Prof Tarun Khaitan

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course is a study of constitutional law and politics from a comparative perspective. It has two distinctive features: first, the course goes beyond a focus on courts and legal

norms. While constitutional courts will feature, they will do so as one of many constitutional actors that comprise a constitutional system. We will therefore also a study of other constitutional actors (such as legislatures, executives, political parties, the opposition, the military, and guarantor institutions such as electoral commissions, ombudsoffices, human rights and equality commissions, and anti-corruption bodies).

Second, the course will seek to understand these non-judicial actors by adopting a comparative constitutional perspective. We will draw our examples not only from constitutionally influential jurisdictions (such as United States, United Kingdom, South Africa and Germany), but also from jurisdictions outside the 'canon' of comparative constitutional law, such as China, Iran, Australia, Pakistan, Sri Lanka, Kenya, Hong Kong, Afghanistan, and the Netherlands. This diverse jurisdictional lens should help us critique the dominant court-focused approach and explore other possibilities of constitutional design.

Teaching: 20 hours of seminars in the WT. 2 hours of seminars in the ST.

Formative coursework: 2,000 word essay.

Indicative reading: Adem Abebe, 'Tackling Winner-Takes-All Politics in Africa: Inclusive Governance through Constitutional Empowerment of Opposition Parties' in T Ginsburg et al eds, *The Constitutional Design of Elections and Parties* (forthcoming 2024) Dinesha Samararatne, 'Sri Lanka's Guarantor Branch' in Swati Jhaveri et al eds, *Constitutional Resilience Beyond Courts* (2023) Tarun Khaitan, 'Directive Principles and the Expressive Accommodation of Ideological Dissenters' (2018) *International Journal of Constitutional Law* 389 Ozan Varol, *The Military as the Guardian of Constitutional Democracy*, *Columbia Journal of Transnational Law* (2013) Mirjam Künkler and David S Law, 'Islamic Constitutionalism: Iran' in David Law, *Constitutionalism in Context* (2022) Gabrielle Appleby & Eddie Synot, 'A First Nations Voice: Institutionalising Political Listening' (2020) *Federal Law Review* 529
Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL244 Half Unit

Sports: Law and Governance

This information is for the 2024/25 session.

Teacher responsible: Dr Jan Zgliniski

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Sport has increasingly been in the public limelight over the past years. Events such as the announcement of the European Super League, the sanctions imposed against Russian athletes in the wake of the Ukraine invasion, and the human rights breaches committed in the context of the Football World Cup in Qatar have raised important political, ethical, economic, as well as, growingly, legal questions. This half-unit examines the foundations of and key developments in sports law and governance. The module will introduce students to how sport governing bodies are organised, which regulatory constraints they are under, and how the sports justice system is structured. In addition, it will zoom in on the most pressing contemporary issues in the field, including the role of human rights, the protection of gender and racial equality, as well as issues surrounding financial sustainability and competitive balance. National, European, and international law will be assessed. Students will also be introduced to the concept of *lex sportiva* and the jurisprudence of the Court of Arbitration for Sport. Examples will be drawn from a range of sports, including football, athletics, golf, baseball, ice skating, and those pertaining to the Olympic movement more broadly. The module will pursue a 'law in context' approach, looking at the legal developments in this field, while exploring their political, economic, and socio-cultural significance from a critical perspective.

Teaching and learning activities will include lecture elements as well as facilitated synchronous discussions, problem solving, and peer-to-peer elements such as small-group work. The module will follow the Universal Design for Learning philosophy to create an inclusive learning environment. Adjustments will be made for students with disabilities and learning difficulties. Slides and class questions will be posted in advance. The topics and readings will consider diverse views and voices.

Topics:

- The Structure of Sports: Governance Models and *Lex Sportiva*
- The Autonomy of Sports: Regulatory Freedoms and Restraints
- Sports Justice
- Athletes' Rights
- Sports and Politics
- Human Rights
- Gender and Racial Equality
- Financial Sustainability
- Integrity of Sport: Doping and Betting
- Fans and Identity

Teaching: 20 hours of seminars in the AT. 2 hours of seminars in the ST.

Formative coursework: 1,500 word essay.

Indicative reading:

- Geeraert and van Eekeren, *Good Governance in Sport: Critical Reflections* (Routledge 2022)
- Lindholm, *The Court of Arbitration for Sport and Its Jurisprudence* (Springer 2019)
- Kuper and Szymanski, *Soccernomics* (HarperCollins 2022)
- Wrack, *A Women's Game* (Faber 2022)
- Semenya, *The Race to Be Myself* (Penguin 2022)
- Dodd and Ordway, 'FIFA Governance: How Crisis Opened the Door for Gender Equality Reforms' (2020) *Jean Monnet Working Paper* 14/20
- Krech, 'To Be a Woman in the World of Sport: Global Regulation of the Gender Binary in Elite Athletics' (2017) 35 *Berkeley Journal of International Law* 262
- Weatherill, 'Saving Football from Itself: Why and How to Re-make EU Sports Law' (2022) 23 *Cambridge Yearbook of European Legal Studies* 1
- Heerd, 'Tapping the Potential of Human Rights Provisions in Mega-Sporting Events' *Bidding and Hosting Agreements* (2018) 17 *International Sports Law Journal* 170
- Duval, 'The Olympic Charter: A Transnational Constitution Without a State?' (2018)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL245 Half Unit

Feminist Legal Theory

This information is for the 2024/25 session.

Teacher responsible: Prof Nicola Lacey and Dr Sarah Trotter

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The purpose of this course would be to examine the ways in which law acts on and shapes the lives and experiences of women and to reflect on how feminist legal thinking – and in particular its exposure of law's role in the production and perpetuation of gender-related inequalities – has shaped and acted on law. Students would be challenged to identify and think critically about the assumptions that structure legal frameworks and to consider the effects of these assumptions in practice. The course would be structured in two parts: Part I of the course would involve an analysis of the structuring effects of law and of the development of feminist legal thinking about this. Is law itself gendered, and if so, how? Conversely, how is law involved in gendering its subjects? We would study foundational texts of feminist legal theory and address the

perspectives of different schools of thought on questions of power, subjectivity, agency, autonomy, equality, and intersectionality. Part II of the course would be more applied, and would involve consideration of topics including, for example (and subject to teaching availability): work, surrogacy, prostitution, pornography, sexual harassment, and domestic abuse. These topics would be addressed and debated in the light of the ideas and theoretical perspectives raised in the first part of the course, but through them we would also consider wider questions about legal constructions of – and assumptions about – care, agency, consent, freedom, and economic security.

Teaching: 20 hours of seminars in the AT.

Formative coursework: 2,000 word essay.

Indicative reading: Readings would include extracts from:

Joanne Conaghan, *Law and Gender* (2013, Oxford University Press)

Joanne Conaghan and Yvette Russell, *Sexual History Evidence and The Rape Trial* (2023, Bristol University Press)

Drucilla Cornell, *At the Heart of Freedom: Feminism, Sex, and Equality* (1999, Princeton University Press)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL250

Law and The Environment

This information is for the 2024/25 session.

Teacher responsible: Prof Veerle Heyvaert

Also taught by: Dr Giulia Leonelli

Availability: This course is available on the BA in Anthropology and Law, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in International Relations and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: I. General features of environmental law in the UK: The introductory sessions examine how we understand 'the value of the environment' as an object of legal protection, and how environmental law evolved through time. We review international and EU law as important sources of environmental law in the UK, and consider legal change after Brexit. We study how environmental law is developed, adopted and enforced in the UK and beyond.

II. Controlling space

This section reviews legal strategies for environmental protection through the management of the built environment, parks and nature. It covers planning law, environmental impact assessment, and nature conservation law.

III. Controlling climate change

Seminars on climate change examine international law and the politics of climate change, different regulatory strategies to respond to the climate change challenge, and climate change litigation in the UK.

IV. Controlling enterprise

Section IV looks at how environmental harm can be prevented or limited by regulating heavily polluting industries. We study mandatory permitting approaches, and also pay attention to the role of ESG and CSR in shaping the environmental performance of private actors. We examine the relationship between international trade law and environmental protection, both generally and in the context of climate change. Section IV also addresses the legacy of industrial exploitation. We examine the statutory framework for the clean up of contaminated land, and explore the contribution of the common law to holding polluters accountable, both for local environmental harm and for damage caused in the Global South

V. The future of environmental law

The final section focuses on new and upcoming developments in environmental law, both at the UK level and beyond. It includes an examination of the role of human rights in the pursuit of environmental protection, and discusses the potential for animal and nature rights.

Teaching: This course is delivered through a weekly 2-hour seminar totalling a minimum of 40 hours across Autumn Term and Winter Term. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students are expected to write a formative essay and participate in a mock exam.

Indicative reading: There is no set book that covers the entire course, however, several sessions use Bell, McGillivray, Pedersen et. al, *Environmental Law* (9th edition, Oxford University Press, 2017). A detailed reading list is provided for each seminar. All materials are digitally accessible, either via the course reading list which links to the LSE Library or Materials that are not sourced from Bell, McGillivray & Pedersen are made available on Moodle. A good alternative source is Fisher, Lange & Scotford, *Environmental Law. Text, Cases and Materials* (2nd edition, OUP, 2019). Older but still useful introductory books include: Lazarus, *The Making of Environmental Law*, 2004; Holder & Lee, *Environmental Protection, Law & Policy*, 2007; R Carson, *Silent Spring*, 1962; R Eckersley, *Environmentalism and Political Theory*, 1992.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL251

Intellectual Property Law

This information is for the 2024/25 session.

Teacher responsible: Dr Luke McDonagh

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Intellectual Property Law consists in the rules determining when, and subject to what conditions, the products of creative or intellectual labour, in other words 'information' (broadly conceived) - can be protected in order to exclude others from access to that same information. The reasons to exert creative and intellectual labour are myriad and may include the expression of personhood, generation of profits, reputational gain or as a response to an external incentive. While it often takes creativity, effort and investment to produce them, intangibles may be easily copied. To restrict this copying and thereby encourage the exercise of creative labour and the production of information, the

law intervenes by establishing intellectual property rights around certain valuable intangibles – creative works like books, paintings and songs; inventions ranging from vaccines to the bag-less vacuum cleaner; and valuable brands like Coke ® or Google ®. However, unlike the physical objects associated with real property rights, intangibles are non-rival and non-excludable. While the chair you may be sitting on accommodates only one person, many can whistle the same tune without depriving others of it. Therefore, many scholars question the philosophical basis and legitimacy of property rights on intangibles that allow information to be monopolised, based both on the intrinsic nature of information, and on the basis of the consequences of such monopolies. Given that information in many different forms is an important source of commercial value within the modern economy, it is not surprising that Intellectual Property Law is such a fast-growing field in domestic jurisdictions and in international law, often pushing normative and doctrinal boundaries. Its relentless growth is the focus of vigorous debate. Copyright already provides the legal foundation for the well-established film, music, TV and publishing industries, and its continuing expansion into unprecedented kinds of works is said by some to be crucial, and by others to be a threat to free speech and creativity. Patents sustain key lucrative technologies in diverse sectors such as pharmaceuticals and computer implemented inventions; but monopolies over life-sustaining or merely life-enhancing technologies can raise complex ethical and political issues. Trade Marks are central to effective advertising and marketing but at the same time exemplify commodification of our cultural landscape. The course is structured around a strong theme that runs persistently through all parts of IP law. Indicative themes include 'the public domain' (which is often construed as an architectonic principle of intellectual property law), and 'the incentive effect' (an essential strand in the justification of intellectual property law). The central theme will be used to introduce the basic elements of each branch of intellectual property and to focus on examples which illustrate contemporary intellectual property law: the constitution of the public domain in digital environments, the capture of public discourse by leading brands, the impact of incentives in the creation of software, the international dimension of incentives in the pharmaceutical sector. The objective in this introductory course is to develop the skills required to engage critically with the mechanics of each branch through a detailed examination of the chosen theme. Seminars will be based on informal lectures, class discussion, and a variety of exercises. In 2024-25 students will be examined by an in-person, open book written examination. Rubric and details will be confirmed in Autumn Term.

Teaching: This is a seminar course which will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students will be expected to produce 1 formative essay in the AT and 1 formative essay in the WT. The word limit for each formative will be 2000 words.

Indicative reading: Boyle *The Public Domain: Enclosing the Commons of the Mind* (Yale University Press, 2008) Karapapa and McDonagh *Intellectual Property Law* (OUP, 2019). The course is supported by Moodle, so reading lists will be linked there or accessible via library-based websites.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

Course content: This course is concerned with English corporate insolvency law. Specifically, the course (1) examines the possible solutions for a company which is in financial distress and the legal procedures which are available to achieve them; and (2) examines important principles of English corporate insolvency law and how they impact not only financially distressed companies but also healthy companies contracting outside insolvency.

In Autumn Term, and for the first two weeks of Winter Term, we analyse the principal insolvency procedures available in English law, with a view to evaluating the extent to which they meet their aims and objectives and the case for reform. For the rest of Winter Term, we analyse the legal rules affecting distressed and insolvent companies and those concerned with them (for example, creditors, directors, and employees) and the issues and principles underlying a corporate insolvency regime. This will lead us to consider how different goals are balanced in the corporate insolvency legislation, for example: ensuring that vulnerable stakeholders are protected while encouraging the rescue of financially distressed companies; giving companies a chance to recover while ensuring that companies cease to trade when failure is inevitable and losses must be stopped; and saving jobs while encouraging the purchase of financially distressed businesses.

(Corporate Insolvency Law bears a close relationship to the Law of Business Associations (BA) and students may find that taking BA as well as Corporate Insolvency will give them a broad understanding of major themes relating to corporate activity. Students who have studied, or are studying, Commercial Contracts also find that the courses complement each other in some respects.)

Syllabus:

Corporate Borrowing

- Outline of corporate borrowing and development and nature of security interests: fixed and floating charges; intercreditor issues.
- The test of insolvency.

Insolvency Procedures

- Out-of-court rescue in the era of the London Approach
- Receivership
- Administration (i) as a business rescue tool; and (ii) as a corporate rescue tool
- Part A1 moratorium
- Pre-packaged administration
- Company Voluntary Arrangements
- Schemes of Arrangement
- Part 26A restructuring plan procedure
- Liquidation

Principles of Corporate Insolvency Law

- Setting aside transactions
- The distributional order of priority
- Quasi-security devices for consumer creditors and commercial suppliers
- Liability of company directors
- Employees
- The regulation of insolvency practitioners

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: At least one formative (unassessed) essay per term.

Indicative reading: Detailed reading lists will be provided during the course. The recommended book is V. Finch and D. Milman, *Corporate Insolvency Law: Perspectives and Principles* (3rd ed., 2017) (Cambridge University Press).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL253 Not available in 2024/25

The Law of Corporate Insolvency

This information is for the 2024/25 session.

Teacher responsible: Prof Sarah Paterson

Availability: This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

LL257**Employment Law****This information is for the 2024/25 session.****Teacher responsible:** Dr Astrid Sanders**Availability:** This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.**Course content:** This subject builds on contract and tort, and to some extent public law and EU law, but introduces the distinctive legal regulation of employment relations, such as the law of dismissal and discrimination law, and the institutional arrangements of industrial relations, including trade unions and collective bargaining. Employment law is an important area of legal practice, with employment law disputes representing one of the largest topics of civil litigation.**Outline:**

- Contract of Employment: the duties of employer and employee; the variety of work relations; vulnerable workers and the personal scope of employment law
- Regulation of the Employment Relation: minimum wage, working time
- Anti-Discrimination Law: implications of the Equality Act 2010
- Dismissal: wrongful and unfair dismissal, economic dismissals
- Human Rights in the Workplace: civil liberties of employees at work
- Membership of Trade Unions, Worker Representation, and Collective Bargaining: freedom of workers to associate with each other and to act in association with each other
- Industrial disputes: strikes, other industrial action and lockouts; rights and liabilities of individual workers who take industrial action; civil liabilities for organising industrial action – the economic torts, the 'golden formula' immunities and loss of immunity – industrial action ballots.

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term, in the form of a two hour seminar. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.**Formative coursework:** At least one formative (unassessed) essay per term.**Indicative reading:** For a concise overview of the subject a suggestion is:

- H. Collins, *Employment Law* (Oxford: OUP, 2nd ed, 2010).
- See also P. Davies and M. Freedland (eds), *Kahn-Freund's Labour and the Law* (London: Stevens and Son, 3rd ed, 1983) chapter 1. The leading textbooks are
- H. Collins, K.D.Ewing, A. McColgan, *Labour Law: Law in Context* (Cambridge: CUP, 2nd ed, 2019);
- S. Deakin & G. Morris, *Labour Law* (Oxford: Hart Publishing, 6th edn, 2012);
- A.C. L. Davies, *Perspectives on Labour Law*, 2nd edn (Cambridge: CUP, 2009).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

limited number may be admitted on application.

The main focus is on the classical and contemporary theories developed over the past two hundred years to explain and predict criminal behaviour in society. The propositions, assumptions, empirical validity, and policy implications of these criminological theories, as well as the social context in which they were developed, will be examined. Other significant issues in criminology – such as the measurement and extent of crime, the role of demographics (age, race, gender, social class) in the causation of and reaction to crime, the influence of the media and political regimes, and the changing boundaries of criminological research – will also be discussed.

Course content:

- The history of criminological theory.
- Trends in crime and crime statistics. How official statistics can be interpreted and the role of crime surveys
- 'Classical' criminology, rational choice, and crime prevention theories.
- Individual explanations of crime: biological, psychological and psychoanalytic theories.
- Sociological explanations of crime, including macro and micro approaches and recent critical theories
- Criminal justice policy and 'law and order' politics.
- Discrimination, Inequalities, crime and criminal justice
- Crime and the mass media
- Green Criminology
- 'Big Data', Technology and Criminology

Teaching: This course will be taught through a weekly two-hour seminar in the Autumn Term. The course includes a reading week in Week 6.**Formative coursework:** The formative coursework consists in one class presentation (in groups) and one formative essay. Feedback on that essay will help prepare students for the summative assessment.**Indicative reading:** The texts for this course are:

- *Criminology*, 3rd ed. by T. Newburn (2017)
- *The Oxford Handbook of Criminology*. By Leibling, A; Mcara, L. and Maruna, S (eds) 6th edition (2017) (or 7th edition, currently in production)
- *Crime: The Mystery of the Common Sense Concept*. By R. Reiner (2017)

Recommended Readings

- Phillips, Coretta, Earle, Rod, Parmar, A and Smith, D (2020) Dear British criminology: where has all the race and racism gone? *Theoretical Criminology*, 24 (3). 427 - 446.160 <http://eprints.lse.ac.uk/101611/>
- Mary Bosworth and Carolyn Hoyle (eds.) *What is Criminology?* (2011)
- *Law and Order: An Honest Citizen's Guide to Crime and Control*. by R. Reiner (2007)
- *Crime, Shame, and Reintegration*. by J. Braithwaite (1989)
- *Understanding Deviance* 7th Ed. by D. Downes, P. Rock and E. McLaughlin (2016)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.**LL272 Half Unit****Outlines of Modern Criminology****This information is for the 2024/25 session.****Teacher responsible:** Prof Nicola Lacey

Additional teacher: Dr Richard Martin

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.**Course content:** This half-unit course is a general introduction to the study of modern criminology. The course is highly selective and every effort is made to hold the reading requirements within reasonable limits. It is suitable for General Course students, and a**LL275****Property II****This information is for the 2024/25 session.****Teacher responsible:** Professor Neil Duxbury and Professor Charlie Webb**Availability:** This course is compulsory on the BA in Anthropology and Law. This course is not available as an outside option nor to General Course students.

Only third year students of BA in Anthropology and Law can take this course.

Course content: Property II examines principles of Land Law and the Law of Trusts. Land Law is taught in the first term and Trusts in the second term.

The Land Law component of Property II is designed to introduce students to the principles of the law of real property (i.e., land). The course examines estates and interests in land, legal and equitable ownership, title registration, and trusts of land (including constructive trusts). It also considers the law governing specific third party interests – licences, proprietary estoppel claims, easements, freehold covenants and mortgages.

The Trusts component of the course focuses on general principles of trusts law and examines the circumstances in which trusts arise, the obligations of trustees, and the remedies available to beneficiaries when these obligations are breached. It also considers the nature and classification of trusts, including resulting and constructive trusts, and how the law of trusts relates to and impacts on the law of contract, wrongs and unjust enrichment.

Teaching: The course has at least two hours of teaching content each week. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Two formative (unassessed) essays per term.

Indicative reading: Advice on reading, including textbook recommendations, will be provided at the beginning of the first and second terms. An essay which students might profitably read before the commencement of the course is Peter Birks, 'Before We Begin: Five Keys to Land Law', in *Land Law: Themes and Perspectives*, ed. S. Bright & J. Dewar (Oxford: Oxford University Press, 1998), 457-86.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

Students are required to answer questions on both the Land Law and Trusts components of the course.

LL276

Property

This information is for the 2024/25 session.

Teacher responsible: Professor Neil Duxbury and Professor Charlie Webb

Availability: This course is compulsory on the BA in Anthropology and Law. This course is available on the LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Property examines principles of Land Law and the Law of Trusts. Land Law is taught in the first term and Trusts in the second term.

The Land Law component of Property is designed to introduce students to the principles of the law of real property (i.e., land). The course examines estates and interests in land, legal and equitable ownership, title registration, and trusts of land (including constructive trusts). It also considers the law governing specific third party interests – licences, proprietary estoppel claims, easements, freehold covenants and mortgages.

The Trusts component of the course focuses on general principles of trusts law and examines the circumstances in which trusts arise, the obligations of trustees, and the remedies available to beneficiaries when these obligations are breached. It also considers the nature and classification of trusts, including resulting and constructive trusts, and how the law of trusts relates to and impacts on the law of contract, wrongs and unjust enrichment.

Teaching: The course has at least two hours of teaching content each week in the Autumn and Winter terms. In both terms, Week 6 is a reading week.

Formative coursework: Two formative (unassessed) essays per term.

Indicative reading: Advice on reading, including textbook recommendations, will be provided at the beginning of the first and second terms. An essay which students might profitably read before the commencement of the course (available on the course page) is Peter Birks, 'Before We Begin: Five Keys to Land Law', in *Land Law: Themes and Perspectives*, ed. S. Bright & J. Dewar

(Oxford: Oxford University Press, 1998), 457-86.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL279 Half Unit

Public International Law

This information is for the 2024/25 session.

Teacher responsible: Professor Gerry Simpson

Additional Teachers: Dr Chaloka Beyani, Dr Oliver Hailes, Dr Devika Hovell, Professor Stephen Humphreys, Professor Susan Marks, Dr Mona Paulson, Dr Margot Salomon

Availability: This course is available on the BA in Anthropology and Law, BSc in Environmental Policy with Economics, BSc in International Relations and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Public international law is traditionally understood as the law governing the coexistence and cooperation between states. This course provides an introduction to the concepts, principles, institutions, history and argumentative structure of this distinctive, and distinctively political, legal order. The aim of the course is to lay the basis for an informed assessment of the contribution, limits and possibilities of international law as a language of, and force in, world affairs. We begin by asking what kind of legal order we are dealing with (in the particular context of recent challenges to the whole concept of international legality itself). We then turn to the question of how international legal norms emerge (through custom and treaty) among entities known as sovereign states, in something called an 'international society' (composed also of international organizations, non-governmental organizations, corporations and individuals) and we ask how those states seek to resolve disputes in that (anarchic) order and are held responsible for wrongs they commit. Later in the term, we consider the origins of the system in European colonial arrangements across the modern period and we consider the emancipatory potential of the principle of self-determination as a response to these arrangements. The term ends with seminars on the problem of war in international law.

International law increasingly forms part of the law practised in the UK, and an understanding of international law will be important for those interested in foreign affairs, investment arbitration, regulation of AI and other digital technologies, global supply chains, global commodities, climate change, environmental law, refugee and human rights law.

The course is a prerequisite for and will be complemented by LL280 Advanced Issues in Public International Law, which will examine specialized regimes of international law.

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term. This course includes a reading week in Weeks 6 of Autumn Term.

Formative coursework: One formative essay.

Indicative reading: Reading lists will be provided for each topic on Moodle. You are asked to buy M. Evans (ed.), *International Law* (Oxford: OUP, 5th ed, 2018) and *Blackstone's International Law Documents*.

Some other works to which you may wish to refer include the most recent editions of: D. Harris, *International Law: Cases and Materials*; H. Charlesworth and C. Chinkin, *The Boundaries of International Law*; M. Shaw, *International Law*; M. Koskeniemi, *From Apology to Utopia*; V. Lowe, *International Law*; and J. Crawford, *Principles of Public International Law*.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL280 Half Unit**Advanced Issues in Public International Law****This information is for the 2024/25 session.****Teacher responsible:** Dr Margot Salomon

Additional Teachers: Dr Oliver Hailes, Dr Mona Paulsen, Dr Marie Petersmann

Availability: This course is available on the BA in Anthropology and Law, BSc in Environmental Policy with Economics, BSc in International Relations and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.**Pre-requisites:** Students must have completed Public International Law (LL279).

LL279 Public International Law is a prerequisite for and will be complemented by LL280 Advanced Issues in Public International Law.

Course content: In this advanced-level course, we build on Public International Law by considering how the concepts and structuring ideas explored in that course give rise to and organise work in a number of specialised fields of international law. We are interested in understanding how those fields and their associated institutions function, with a keen focus on the particular legal ordering – categories, inclusions and exclusions – they create. We will begin with an introduction to the course, by the teaching team, exploring how international law works in the world, and, in making explicit the terms of legal ordering across the fields, expose what kinds of politics, protections and wrongs they make possible. Our first case study will then follow: feminist approaches to international law will allow us to interrogate the boundaries, assumptions, and beneficiaries set by the international legal system and we'll do so by considering a range of fields including peace and security, international humanitarian law and international human rights law. From there, the course will dedicate two weeks to the study of a chosen field of international law, starting with a detailed lecture on the law and architecture of that field followed by a cutting-edge case study that engages explicitly with its complexities of legal ordering.

We begin our coverage of specific areas of international law with a focus on International Environmental Law, followed by a case study on the Rights of Nature and the turn to centring ecosystems as bearers of legal rights. We will then study the field of International Investment Law before delving into a case study on seabed mining, impacts on the marine environment and local communities, and the plurality of interests and norms that are engaged by investment treaty disputes. From there, we take a deep dive into the field of International Trade Law to understand theories of free trade and the core World Trade Organization principles and rules before unpacking, through the case study, the first ever use of security exceptions to justify WTO-inconsistent trade measures in a case brought by Ukraine against Russia. The next field we'll want to understand is International Human Rights Law, internationally and regionally. Our case study here explores how law conditions our political and economic order and how the recent UN Declaration on the Rights of Peasants to seeds, food sovereignty, decommodification, and economic democracy attempts to reorder international law.

Teaching: This course will have a minimum of two hours of teaching content each week in Winter Term. This course includes a reading week.**Formative coursework:** One formative essay.**Indicative reading:** Reading assignments are provided for each seminar on Moodle and draw from various primary and secondary source materials. Some other works to which you may wish to refer include: H. Charlesworth and C. Chinkin, *The Boundaries of International Law*; J. Klabbbers, *International Law*; J.T. Gathii and N. Tzouvala, 'Racial Capitalism and International Economic Law: Introduction' 25 *Journal of International Economic Law* 2 (2022).**Assessment:** Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.**LL284 Half Unit****Topics in Sentencing and Criminal Justice****This information is for the 2024/25 session.****Teacher responsible:** Dr Richard Martin**Availability:** This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.**Course content:** In this course we explore the routine practices and decision-making of key actors within the criminal justice system. In doing so, we examine the laws, policies and regulatory schemes that purport to govern how actors perform their specific roles in the criminal process. In the first five weeks, we track the construction of cases through the criminal process. This requires us to closely analyse the work of police, prosecutors and judges: How do they exercise their discretion? What kinds of dynamics, sub-cultures and formal (and informal) rules affect their decision-making? And how does this impact on the rights and interests of suspects, defendants, offenders and victims? In the second five weeks, we enter the realm of sentencing law and practice. We focus on how judges perform their role as sentencers, the principles and legal guidelines they rely upon and the types of sentences they can (or must) hand down in different types of cases. We use the sentencing of rioters and the life sentence for murder as case studies to apply the general principles of sentencing, then conclude the course by studying the impact of an offender's race on sentencing practices. By preparing fully for seminars and actively contributing to our discussions, the course will equip you with the knowledge and tools necessary to critically assess contemporary criminal justice issues.**Course aims:**

- To explore with students the substance and modes of legal regulation, including human rights principles, that have come to govern the criminal justice system in the recent decades.¹⁶⁰
- To examine in detail the routine practices and decision-making that animates how power is wielded by key decision-makers in the criminal justice system, specifically police, prosecutors, and judges.¹⁶⁰
- To familiarise students with contemporary theories and principles that are used by scholars to critically analyse the criminal process and specific practices within it.¹⁶⁰
- To critically engage with empirical studies of the law-in-action, in addition to the case law analysis students will likely be familiar with from their LLB.

Topics by Week

1. The Criminal Justice System in England and Wales
2. In the Community: What Do Police Do and Why Do They Do It?
3. In the Station: Police Practices and Case Construction
4. The Charging Decision: Prosecutorial Discretion and Victims' Rights
5. The Magistrates' Courts and Legal Representation
6. Reading Week
7. Sentencing Rationales: Aims, Principles and Policies
8. Sentencing Practices: Discretion and Guidelines
9. Sentencing: Rioters
10. The Life Sentence for Murder
11. Race and Sentencing

Teaching: This course runs in the Winter Term and will have a minimum of two hours of teaching content each week, in the form of a two hour seminar. This course includes a reading week in Week 6 of term. I will begin the seminar with some introductory remarks, outlining the topic or setting out its legal or political context. There are PowerPoint slides which will be uploaded on the Course's Moodle webpage in advance of each seminar. We will work in and out of these slides during the seminar. Each seminar's key learning outcomes can be found on the first PowerPoint slide; these outcomes will be reiterated at beginning of the seminar. It should go without saying that seminars are your opportunity to discuss, debate and reason with one another – it is essential you come to the seminar well-read and prepared to contribute

to our discussions, whichever material you have chosen to read. Seminars include small group discussion and full seminar discussions; you should focus your seminar preparation on the discussion questions and be ready to share your answer in the seminar.

Formative coursework: Students will be expected to produce a 1500-word literature review.

Indicative reading: There is textbook reading, the material and topics assigned are designed to be as contemporary and engaging as possible, so the course supplements these texts with more recent articles or chapters that are particularly helpful or insightful. Sanders, Young and Burton's *Criminal Justice* is a leading text: it is informative and offers sharp, critical analysis but can be a bit too basic in places.

The 5th edition of Campbell, Ashworth and Redmayne's *The Criminal Process* (2019) is very good and can be accessed via OUP's Law Trove.

The standard sentencing text for England and Wales is: Ashworth and Kelly (2022) *Sentencing and Criminal Justice* (7th ed., Hart) and S. Easton and C. Piper (2016) *Sentencing and Punishment: The Quest for Justice* (4th ed., Oxford: OUP) is also good.

Most of our readings are articles in journal e.g. *British Journal of Criminology* (BJ Crim), the *Criminal Law Review* (Crim LR) and the *Journal of Law and Society* (J. Law & Soc) and chapters in edited collection (various readings come from the sixth edition of the *Oxford Handbook of Criminology*).

The course is designed to give students the time, support and intellectual freedom to read and research issues for themselves. The Summative Assessments, will after all, be testing students' ability to read broadly, but purposefully, in order to critically evaluate a topic and advance a clear argument.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL293

Tax and Tax Avoidance

This information is for the 2024/25 session.

Teacher responsible: Dr Andy Summers and Dr Alexandra Evans

Availability: This course is available on the BA in Anthropology and Law, BSc in Accounting and Finance and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Taxation is a topic that has throughout history pervaded political debate and is encountered in every area of life. Taxation was one of the very first subjects to be taught at LSE. The teaching of tax law as an academic subject started at LSE, where it was introduced by Professor GSA Wheatcroft in 1957.

The syllabus is set out below, although there is some variation of topics selected from year to year, depending on the focus of current debate, and in the order of topics.

- The first term of the course begins with an introduction to the principles of statutory interpretation, including in tax avoidance cases. The course then focuses on a technical legal approach to the taxation of personal income, focusing on (i) employment income; and (ii) trading income (of unincorporated businesses). In connection with the latter, we also touch on the tax treatment of capital gains.
- The second term of the course begins by analysing the value added tax legislation in the UK and the principles relating to UK VAT that derive from European Law and understanding why and how these principles are still relevant following BREXIT. The course then focuses on tax avoidance, looking at questions such as: What is tax avoidance and how does it differ from tax planning? What strategies do individuals and companies adopt to avoid tax? How do judges respond to tax avoidance through anti-avoidance doctrines and rules of interpretation and to what extent is that compatible with the judicial role? How effective can legislative responses to tax avoidance be and what are the limitations on such responses? How can companies be fairly

taxed in the digital economy? How have public attitudes to tax avoidance changed over time? Should corporations behave 'responsibly' and pay their fair share of taxes, or are they obliged to do whatever they can to maximize shareholder returns? To what extent does professional ethics inform accountants and lawyers who advise on tax avoidance?

The approach to these topics is first-and-foremost doctrinal, although it also includes a strong policy perspective. The UK tax code is long and complex. There are also many relevant cases that are required reading too. This course requires students to understand and apply difficult concepts and legislation.

By taking this course you should develop the following skills and attributes (i) working with and analysing legislation; (ii) working with and analysing case law; (iii) research skills; (iv) communication skills; (v) professionalism.

Students taking this course should be prepared to use a variety of sources ranging from statute and case law to literature on public policy. The precise balance of materials used varies from topic to topic. All the readings set will be accessible and non-mathematical. NO COMPUTATION is required and no knowledge of any discipline other than law is required. The course is open to second- and third-year law students, and experience suggests that it is equally suitable for both years.

Teaching: This course will have two hours of teaching content each week in Autumn Term and Winter Term. There will be a Reading Week in Week 6 of each term.

A variety of methods will be used within the weekly seminars, typically a mix of lecture-style and interactive small group exercises. Student participation is central to both formats. Assistance will be given with methods for statute-based work. Substantial preparation by students will form an integral part of the course.

Formative coursework: Students are expected to produce 1 formative assignment per term.

Indicative reading:

- *News Corporation UK v Revenue and Customs Commissioners* [2023] STC 446
- *Duke of Westminster v Commissioner of Inland Revenue* (1935) 19 TC 490
- *HMRC v Vermilion Holdings Ltd* [2023] UKSC 37
- Dan Neidle, 'Carried Too Far? A Challenge to the Tax Treatment of Carried Interest in the Private Equity Industry' (2023) *British Tax Review* 1, 45-67
- Michael Blackwell, 'Case note: Unreasonably Limiting Access to the Courts? R (Haworth) v Revenue and Customs Commissioners' (2022) 85(5) *Modern Law Review* 1562
- Joshua D Blank, 'What's Wrong with Shaming Corporate Tax Abuse?' (2009) 62(4) *Tax Law Review* 539
- Reuven Avi-Yonah, 'Corporate Taxation and Social Responsibility' (2014) 11(1) *NYU Journal of Law & Business* 1

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

Selected 'Legislation' may be taken into the exam, with non-verbal markings only.

LL295

Media Law

This information is for the 2024/25 session.

Teacher responsible: Dr Andrew Scott

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines freedom of speech and the legal and administrative regulation of the mainstream and social media. It centres on law and regulation in the UK, as influenced by European and international law.

The course opens with introductory lectures that introduce themes such as the 'media landscape', the sources and forms of media

law (ethical, cultural and technological constraints, self-regulation, common law, statute, EC law and international law), and the rights and values that frame this area of law (free speech; privacy; impartiality; the protection of rights to a fair trial). Thereafter, the course moves through three 'blocks' of study. These blocks of study focus on:

- 1 regulating content in defence of private interests (misuse of private information, data protection, confidentiality, copyright and defamation)
- 2 regulating content in defence of public interests (contempt and the integrity of justice; political diversity and impartiality; disinformation, fabrication and 'fake news'; offensive content; terrorism and national security), and
- 3 the control of journalistic newsgathering practices (risks to and protection of sources; technological circumvention of source protection; access to state information (FoI, and official secrets); open justice and access to courts and court documents; the regulation of the journalistic 'dark arts' (misrepresentation and subterfuge).

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term. Teaching will be conducted primarily through weekly two-hour seminars and a recorded introductory lecture. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students will be expected to submit two formative essays, one at the end of the Autumn Term and one in the Winter Term.

Indicative reading: Supporting texts for the course include:

- Greenawalt, 'Free Speech Justifications' (1989) 89 Columbia Law Review 119,
- Parkes and Busutill (eds), *Gatley on Libel and Slander* 13th edn, Thomson Reuters, 2022),
- Waldron, *The Harm in Hate Speech* (Harvard University Press, 2012),
- Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (OUP, 2016),
- Kenyon and Scott (eds), *Positive Free Speech: Rationales, Methods and Implications* (Hart Publishing, 2020),
- Moreham and Warby (eds), *Tugendhat and Christie: The Law of Privacy and the Media* (3rd edn, Oxford University Press, 2016), and
- Leveson, *An Inquiry Into the Culture, Practices and Ethics of the Press: Report*, HC 780, 2012.

These and other materials relevant to the course are generally made available via the BLPES electronic resources or online.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL300

Competition Law

This information is for the 2024/25 session.

Teacher responsible: Ms Ayse Gizem Yasar

Additional teachers: Dr Niamh Dunne and Professor Pablo Ibanez Colomo

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Competition is widely understood to be the best means to deliver better goods and services at lower prices. The point of competition law is to preserve the process of rivalry between firms, and, by doing so, to benefit consumers and society at large. A broad range of corporate strategies are subject to this field of law. For instance, competition authorities enforce the law against large multinational firms (such as Microsoft, Google, or Intel) that have the ability to influence market conditions and exclude smaller rivals. Competition authorities also have the power to block mergers and acquisitions that are capable of harming consumers (think of a merger creating a monopoly). Attempts by

firms to avoid competing by means of secret arrangements (the so-called 'cartels') are another key area of enforcement.

Competition law regimes have progressively become a major feature of legal systems around the world. They have long applied in the US and Europe – including the UK – but have now been adopted (and/or are actively enforced), *inter alia*, in jurisdictions like Brazil, Chile, China, Hong Kong, India, Malaysia, Singapore and South Africa. Unlike other legal disciplines, the relevant provisions in all of these regimes are virtually identical in their form and substance. This is, in other words, a truly cosmopolitan field. After this module, you will be equipped to understand and practice competition law almost anywhere in the world.

After an introduction in which competition law is put in its economic and institutional context, this module will address the main substantive and procedural aspects of the discipline. Topics covered include the following:

- Abusive practices by dominant firms.
- Anticompetitive agreements between firms (including cartels and distribution agreements).
- Mergers and acquisitions, including both mergers between competitors and vertical and conglomerate transactions.

Teaching: This course will have three hours of teaching content each week in Autumn Term and Winter Term in the form of a two-hour lecture and a one-hour class. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students are expected to produce one formative essay per term.

Indicative reading: N. Dunne, A. Jones and B. Sufrin, *EU*

Competition Law (Oxford: OUP, 8th ed, 2023); and H. Hovenkamp, *The Antitrust Enterprise* (Cambridge: Harvard University Press, 2005).

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL302 Half Unit

Restitution for Unjust Enrichment

This information is for the 2024/25 session.

Teacher responsible: Dr Rachel Leow and Dr Timothy Liao

Availability: This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

The course is primarily aimed at students who are interested in a demanding course in advanced private law and presupposes at the very least, a strong grounding in the basics of English contract law, trusts law, and property law.

Pre-requisites: This course builds on modules taken in the core undergraduate compulsory curriculum (eg contract, property, and equity). Students who enjoyed studying these courses will find that this course advances their understanding of private law as a whole.

This is a case-law heavy subject – a strong foundation in common law reasoning and analysis will be presumed.

Course content: This course is about the law of restitution for unjust enrichment: it is concerned with when a defendant may be compelled to make restitution to a claimant, because the defendant has been unjustly enriched at the claimant's expense. In England and Wales, unjust enrichment was only first judicially recognised as an independent source of obligations by the House of Lords in 1991 but has now become one of the most vibrant areas of modern private law. Many controversies exist, and the scope of restitution for unjust enrichment is still being worked out by courts across the common law world. In previous private law modules such as Law of Obligations, Contract Law, and Property II, you may already have encountered fleeting references to 'unjust enrichment', explored in a necessarily superficial way; for example in cases on frustration, tracing, knowing receipt, and illegality. The course aims to develop in students a deeper understanding of unjust enrichment, and its place within the broader map of private law. Generating distinctive rights and obligations, it forms

a body of law independent from the laws of contract and torts, cutting across the jurisdictional divide between the common law and equity. After this course, students will be introduced to some modern debates about unjust enrichment, as well as accurately describe, apply, and evaluate the law of unjust enrichment in England and Wales.

This course will appeal to those with an interest in private law. Many issues in the material covered have practical importance in commercial litigation.

Teaching: 20 hours of seminars in the AT.

Compulsory pre-reading is set for each seminar.

Formative coursework: Students will have the opportunity to produce one formative during the course.

Indicative reading:

- Peter Birks, *Unjust Enrichment*, 2nd ed (OUP 2005)
- Andrew Burrows, *The Law of Restitution*, 3rd ed (OUP 2011)
- James Edelman and Elise Bant, *Unjust Enrichment*, 2nd ed (Hart 2016)
- Charles Mitchell, Paul Mitchell, and Stephen Watterson (eds), Goff & Jones on *Unjust Enrichment*, 10th ed (Sweet & Maxwell 2022)
- Robert Stevens, *The Laws of Restitution* (OUP 2023)
- Elise Bant, Simone Degeling, and Kit Barker (eds) *Research Handbook on Unjust Enrichment and Restitution* (Edward Elgar Publishing 2020)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL303 Half Unit

Cultural Heritage and Art Law

This information is for the 2024/25 session.

Teacher responsible: Dr Tatiana Flessas

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Cultural Property and Heritage Law is an expanding area of legal practice, scholarship and policy-making. It addresses the question 'who owns the past', by looking at ownership and regulatory claims to ancient objects, traditional cultural practices, and historic locations. The protection and management of heritage sites, antiquities, artefacts, and public and private museums give rise to increasing amounts of domestic and international legislation and regulation. This area of law is especially important to peoples attempting to claim (or reconstruct) their identity after war, colonialism, or other forms of culture loss; and to people or organizations that stand to make serious profits from memorial or historical goods and experiences. We also look at some very timely heritage disputes: is Russia taking cultural property out of Ukraine? Should statues of slaveowners still be in public places? Can anyone tell the story of a particular group, or is it 'cultural appropriation' to do so?

The second half of the course, 'Art Law', is the body of law, involving numerous disciplines, that protects, regulates and facilitates the creation, use and marketing of art. Art law relies in part on a specialised jurisprudence drawn from intellectual property law, and specific warranties as to title and authenticity provided by auction houses and art dealers. However, no one jurisprudence applies to all legal matters vital to artists, purchasers, sellers, museums, dealers and others involved in the art world. Rather, practitioners and academics in this field draw on property and trusts law, some criminal and tort law (for example, as applied to street art or fakes and forgeries), and statutes, import/export controls, treaties and other forms of regulation (for example in determining whether an artwork is a 'national treasure' and should be denied an export licence).

In this course, we will take both a practical and a scholarly and interpretive approach to the issues. We will explore the important ethical and legal aspects in the creation, sale, collection and display of antiquities and art. We will be looking at international

Conventions as well as domestic legislation and common-law approaches that attempt to define 'property', 'culture' and 'theft'. We will also look at the major institutions in the field, such as UNESCO and ICOM. We will discuss issues such as authenticity, attribution, restoration, money laundering, and stolen art. We will consider the recent developments in addressing the restitution of art taken during the Nazi era. Finally, we will consider what, if any, obligations owners have to 'their' art. The course will welcome guest speakers and include the opportunity to speak with practitioners and experts from outside the LSE.

Teaching: 20 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 essay and 1 case study in the AT.

Formative assessment in either case study or essay form

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL304 Half Unit

Global Commodities: The Rise of International Law

This information is for the 2024/25 session.

Teacher responsible: Prof Stephen Humphreys

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

The course is historical and theoretical in nature. It deals in the main with events from the colonial period (c.1510-1960) as they relate to the history of international and transnational law.

It does not aim to prepare students to work in commodity trading

nor to equip them with expertise in the contemporary law of commodity markets. (For topics in these areas, see LL202, LL203, LL253, or LL300). While this class is complementary to LL279, it is not necessary to have studied LL279 to take this class.

Course content: This course provides a critical introduction to the history of international law, with a focus on the colonial histories of Asia, Africa and the Americas. We will track the development of the production and consumption of raw materials, from their domestic origins to their marketization and circulation in global trade today. The histories of some principal commodities—spices, silver, sugar, coffee, rubber, oil—tell the story of today's global economy in microcosm. Their evolving regulation and exchange has provided the base for central elements of the contemporary international and transnational legal architecture. In exploring this history, we will touch on cross-cutting issues relating to some or all of the following: slavery, the law of the sea, human rights, trade law, environmental law, the laws of war, labour law, climate change and animal welfare law. We will also be looking at theories of consumption and production more generally, adopting a broad definition of 'commodity', drawn from Marxian and post-Marxist thought, to enrich our understanding and discussion of these topics. Our examination of emerging commodity markets will remain cognizant of the state-formation processes, international law developments, and trans-global networking entailed in their consolidation. We will also read and discuss theoretical and historical texts.

Following completion of the course, students can expect to have a broad understanding of the historical evolution of global law, with specific knowledge of how certain commodities have contributed to and shaped the most important international law challenges of our time. Through individual presentations and research projects students are expected to develop critical perspectives on aspects of the topics covered throughout the year as well as hone presentation skills.

On completion students should be able to demonstrate:

- A broad understanding of the historical rise in trade of global commodities and of its contribution to the development of international law, especially during colonial times.
- An awareness of intersecting legal issues relating to, for example: human rights, trade disputes, law of the sea, laws of war, environmental law, labour, animal welfare and illegal trade.
- An understanding of the impact that historical patterns of production and consumption of commodities around the world have had on contemporary international law structures.
- An appreciation of the critical theories that inform scholarly analysis of the global economy.

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term, in the form of a two hour seminar. This course includes a reading week in Weeks 6 of Autumn Term.

Formative coursework: Students will undertake a presentation in the final two weeks of terms, in groups of two or more. The topic will be chosen by the second week of term and a draft presentation submitted for feedback at the end of reading week.

Indicative reading: Fernand Braudel, *The Perspective of the World* (Civilization and Capitalism), 3 vols. trans. Sian Reynolds (Collins, 1984); Sarah Rose, *For All the Tea in China* (Arrow Books, 2010); Jean Baudrillard, *The Consumer Society* (Sage, 1998 [1970]); Duncan Kennedy (1985) 'The Role of Law in Economic Thought: Essays on the Fetishism of Commodities' 34 *The American University Law Review* 939-1001; Hugo Grotius, *The Freedom of the Seas, or the Right Which Belongs to the Dutch to take part in the East Indian Trade* [Mare Liberum], trans. Ralph Van Deman Magoffin (Oxford UP, 1916); David Graeber, *Debt: The First 5000 Years* (Melville House, 2011); Martti Koskeniemi (2011) 'Empire and International Law: The Real Spanish Contribution' 61 *University of Toronto Law Journal* 1-36; Lauren Benton and Benjamin Straumann (2010) 'Acquiring Empire by Law: From Roman Doctrine to Early Modern European Practice' 28 *Law and History Review* 1-37; Michel Foucault, *Territory, Security, Population* (Palgrave, 2009); Anne Orford (2005) 'Beyond Harmonization: Trade, Human Rights and the Economy of Sacrifice' 18 *Leiden Journal of*

International Law 179-213; Peter Linebaugh and Marcus Rediker, *The Many-Headed Hydra: The Hidden History of the Revolutionary Atlantic* (Verso 2002); Steven Topik, Carlos Marichal and Zephyr Frank (eds), *From Silver to Cocaine: Latin American Commodity Chains and the Building of the World Economy, 1500-2000* (Duke University Press, 2006).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL305

Jurisprudence

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Wilkinson

Availability: This course is compulsory on the LLB in Laws. This course is not available as an outside option nor to General Course students.

Course content: The aims of the course are: To introduce students to philosophical thinking about the law. To familiarise students with the main methodological, conceptual, and normative issues in the study of law and its legitimacy. To provide students with knowledge of some of the most influential legal and political philosophers and their theories of the state and law. To encourage and enable students to think about doctrinal legal questions from a philosophical and critical perspective. To help students to develop legal reasoning skills by training them in abstract, philosophical arguments. Some of the themes that the course covers are: the social contract tradition (Hobbes, Kant, Rawls, Rousseau); the democratic legitimacy of the state and its law; Marxism and critical theory; Arendt's political theory and its implications for law; methodology in jurisprudence; natural law; legal positivism; the rule of law and legality; the use and significance of principles in adjudication and legal reasoning.

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term and Winter Term in the form of a lecture (every week) and one hour class. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students will be expected to write at least one essay per term.

Indicative reading: Students are provided with outlines and readings for topics discussed in the Michaelmas and Lent Terms. For some introductory and background reading see: S. Veitch, E. Christodoulidis, and M. Goldoni, *Jurisprudence: Themes and Concepts* (3rd. ed), Routledge 2018; J.E. Penner and E. Melissaris, McCoubrey & White's *Textbook on Jurisprudence*, OUP 2012; Brian Bix, *Jurisprudence: Theory and Context* (3rd ed.), Thomson Sweet & Maxwell 2003.

Assessment: Exam (100%, duration: 3 hours and 30 minutes) in the spring exam period.

LL306 Half Unit

Theories of Law

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Wilkinson

Availability: This course is available on the BA in Anthropology and Law, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics and Philosophy and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: The aims of the course are: To introduce students to philosophical thinking about the law. To familiarise students with the main methodological, conceptual, and normative issues

in the study of law and the rule of law. To provide students with knowledge of some of the most influential legal philosophers and their theories of law. To encourage and enable students to think about doctrinal legal questions from a philosophical and critical perspective. To help students to develop legal reasoning skills by training them in abstract, philosophical arguments. Some of the themes that the course covers are: legal realism, natural law; legal positivism; the rule of law and legality; the use and significance of principles in adjudication and legal reasoning, methodology in jurisprudence.

Teaching: This course will have a minimum of two hours of teaching content each week in Autumn Term in the form of a lecture (every week) and one hour class. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to write at least one essay.

Indicative reading: Students are provided with outlines and readings for topics discussed in the Michaelmas and Lent Terms. For some introductory and background reading see: S. Veitch, E. Christodoulidis, and M. Goldoni, *Jurisprudence: Themes and Concepts* (3rd. ed), Routledge 2018; J.E. Penner and E. Melissaris, McCoubrey & White's *Textbook on Jurisprudence*, OUP 2012; Brian Bix, *Jurisprudence: Theory and Context* (3rd ed.), Thomson Sweet & Maxwell 2003.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL307 Half Unit

Justifying Political Authority

This information is for the 2024/25 session.

Teacher responsible: Prof Emmanuel Voyiakis

Availability: This course is available on the BA in Anthropology and Law, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics and Philosophy and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: The course aims to introduce students to philosophical thinking about the justification of state authority and coercion, to familiarise students with the main methodological, conceptual, and normative issues in the study of political obligation, to provide students with knowledge of some of the most influential political philosophers and their theories of the state, to encourage and enable students to think critically about the role of ideas such as consent, natural rights, or associative obligation following ideas in justifying political authority, and to help students to develop advanced reasoning skills by training them in abstract, philosophical arguments. The themes that the course covers include: anarchism; libertarianism; perfectionism; the consent or social contract tradition; the associative obligation tradition; and democratic and critical (Marxist) theories of the state.

Teaching: This course will have a minimum of two hours of teaching content each week in Winter Term in the form of a lecture (every week) and one hour class. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to write one essay in the term.

Indicative reading: Students are provided with outlines and readings for topics discussed. For some introductory and background reading see: Simmons A.J., *Moral Principles and Political Obligations* (1980); Klosko, *Political Obligations* (2005); Wolff, *In Defense of Anarchism* (1970); Nozick R., *Anarchy, State, and Utopia* (1974); Rawls J., *Political Liberalism* (1993).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL332 Half Unit

Advanced EU Law

This information is for the 2024/25 session.

Teacher responsible: Dr Floris De Witte

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course will be seminar-based (20 hours of teaching time).

Reading Week will be used to consolidate knowledge and work on the formative.

Pre-requisites: Students should have completed the second year European Union Law course or an equivalent course from another department in the School.

Course content: This course is an advanced study of the European Union. It builds on the work students will have done in their second year and explores in more depth and in an interdisciplinary fashion some of the most crucial questions that the EU and its legal system tackle. This includes both institutional and substantive dimensions. On the institutions side of things, we will discuss modes of law-making, questions pertaining to the structure of the judicial system and its relationship with national legal system, problems in the enforcement of EU law, and the challenges of reforming the EU. On the substantive side of things, this course looks at the equality policies of the EU, highlighting the many different dimensions of equality that the EU engages with (in more or less successful ways), including an analysis of racial equality, the rights of LGBTQ+ families, welfare rights for migrants, and animal rights. Both sides of the course complement each other: it is not possible to understand how the EU engages in its substantive policies without an affinity with the powers that shape law-making and dominate enforcement practices; nor is it useful to focus on the institutions without a substantive analysis of what the EU's powerful machinery is used for.

At the end of the course, students will have gained a deep proficiency with the EU as an institutional system and be able to critically evaluate the social dimension of European integration.

Topics:

- Weeks 1-5: Legislative Law-Making, Executive Law-Making, Judicial Independence, Preliminary Reference Procedure, Infringement Procedure, Revision and Differentiation.
- Weeks 7-11: Racial Equality, Migration, LGBTQ+ family rights, Welfare rights, Animal Rights.

Teaching: 20 hours of seminars in the AT. 2 hours of seminars in the ST.

Formative coursework: 1,500 word essay.

Indicative reading: - M. Hillebrandt & P. Leino-Sandberg, 'Administrative and Judicial Oversight of Trilogues' (2021) JEPP 53.

- V. Schmidt, 'European Emergency Politics and the Question of Legitimacy' (2022) 29 JEPP 979.
- Klose, Perot, Temizisler, 'Spot the Difference: Differentiated Co-operation and Differentiated Integration in the European Union' (2022) JCMS forthcoming.
- O'Brien, 'Civis Capitalist Sum: Class as the New Guiding Principle of EU Free Movement Rights' (2016) 53 Common Market Law Review 937
- De Witte, 'The Liminal European: Subject to the EU Legal Order' (2021) 40 Yearbook of European Law 56
- Schiek, 'On Uses, Mis-Uses and Non-Uses of Intersectionality Before the Court of Justice (EU)' (2018) 18 International Journal of Discrimination and the Law 82

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL342**International Protection of Human Rights**

This information is for the 2024/25 session.

Teacher responsible: Dr Chaloka Beyani

Availability: This course is available on the BA in Anthropology and Law, BSc in International Relations and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course should be taken in the third year (see prerequisites). It is capped at 25 students.

Pre-requisites: Students need to have already taken and done well in a course in Public International Law or in Civil Liberties Law.

Course content: This course aims to provide a comprehensive and analytical account of the application of human rights standards in international law, and the operation of the existing international machinery for the protection of human rights. The course engages with both the theory and practice of human rights law and, in that process, some of the most vexing issues facing us today will be considered. What is the scope of the right to privacy in a digital age? What's the geographical scope of a state's human rights obligations? How does human rights law apply in war? What are the human rights obligations of corporations in a globalized landscape? How do human rights inform responses to modern slavery? What rights do asylum seekers have when they are fleeing conflict? Does existing law adequately protect women's rights or indigenous peoples? What is the role of human rights law in achieving the sustainable development goals?

The law of human rights reflects attempts made internationally to articulate basic legal standards for the protection of individuals and groups in their relations with the state, and to use the authority of international law, institutions, and procedures, to secure compliance with such standards. Human rights law is a modern phenomenon; but it has an ancient lineage. Some account of its evolution is given, from natural rights, civil liberties, the history of minorities protection, and the progressive development of human rights in public international law since 1945.

However, the major part of the course relates to post-1945 events concerning the protection of human rights. A section of the course deals with the role and reform of the United Nations to promote and secure the observance, on a universal basis, of international standards of human rights. The development of important legal standards (such as those of non-discrimination) is traced; and the work of various UN bodies in applying and promoting human rights is analyzed.

Comparisons are also drawn with regional attempts to promote and protect human rights, with the European system, the Inter-American system and the African system receiving special attention as regards their treaties, their institutions, procedure, and case-law.

By the end of the course students should have a good understanding of the substantive content of contemporary human rights and of the existing and alternative means available for protecting these rights and fundamental freedoms.

Extensive use is made of relevant case law, of the Civil and Political Covenant, the European Convention, the American Convention, the African Charter, and the International Court of Justice; and particular rights (such as those of persons belonging to minorities or indigenous peoples, the right to life, the prohibition of torture, the right to a fair trial, family life, and the fundamental freedoms) are studied in considerable detail.

Teaching: This course will have two hours of teaching content each week in Autumn Term and Winter Term, in the form of a two hour seminar. This course includes a reading week in Weeks 6 of Autumn Term and Winter Term.

Formative coursework: Students are expected to produce 1 essay in Autumn Term and 1 essay in Winter Term.

Indicative reading: R. Smith, *International Human Rights*; Ilias Bantekas and Lutz Oette, *International Human Rights Law and Practice*.

Assessment: Essay (100%, 8000 words) in the ST.

LL398 Half Unit**Half-Unit Dissertation on an approved legal topic**

This information is for the 2024/25 session.

Availability: This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

This course is available to students in Year 3. It may be taken in Year 2 in exceptional circumstances with permission of the Departmental Tutor. This course cannot be taken in the same year as LL399.

Course content: Students wishing to do a half-unit dissertation should first consult their Academic Mentor in the preceding Spring Term about:

- 1 whether a dissertation is a suitable option for the student;
- 2 the particular dissertation topic;
- 3 who might be an appropriate dissertation supervisor.

Because this option requires considerable independent study, it is generally not advisable to opt to write a full-unit dissertation unless the student has been achieving marks of an upper second class standard. The dissertation subject must be of a suitable academic character that has not already or will not have been explored in depth in any taught course taken by the student but is related to subjects taught in the School.

In light of discussions with their Academic Mentor, a student wishing to pursue this option should approach a potential supervisor for approval. This must be a full-time academic member of staff in the Law School. Once they have their supervisor's approval, students should select the relevant dissertation course on LFY. They will then need to complete the 'Dissertation Topic Approval form' (available on LLB Dissertation Moodle page) which needs to be signed off by the student's Academic Mentor and proposed Dissertation Supervisor by the end of Week 4 of Autumn Term.

Including the initial meeting, students will have four support meetings with their supervisor to guide them through the research process as follows:

- 1 One initial meeting to establish the broad topic.
- 2 A second meeting to agree a title, review an outline and see an initial bibliography.
- 3 A third meeting to discuss progress and difficulties (optional for half-unit essays).
- 4 A fourth meeting to give feedback on progress to date, to take place before the end of the Winter Term. In order for this feedback meeting to be of use, students will need to have made substantial progress with the preparation of a draft dissertation by the middle of the Winter Term. It is the student's responsibility to arrange these meetings with the supervisor.

The dissertation should be 6,000-8,000 words in length and must be submitted by midday on Wednesday 1 May 2024.

Further information can be found on the LLB Dissertation Moodle page and in the LLB Dissertation Handbook (found on the Moodle page).

Teaching: 1 hour of lectures in the AT.

Beyond the one-to-one sessions held with the dissertation supervisor there is no formal teaching. However, there is a one hour session held in the Autumn term for all half-unit and full-unit dissertation students to orient them to the requirements of writing a dissertation.

Indicative reading: There is no essential reading as such. The LLB Dissertation Moodle page provides full information.

Assessment: Dissertation (100%, 8000 words) in the ST. Word limit is 6000-8000 words.

LL399

Full-unit Dissertation on an approved legal topic

This information is for the 2024/25 session.

Availability: This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

This course is available to students in Year 3 only. It cannot be taken in the same year as LL398.

Course content: Students may write a full-unit dissertation on a legal topic approved by the Law School. The full-unit dissertation may only be taken in the third year when students are better prepared for it.

Students wishing to do a full-unit dissertation should first consult their Academic Mentor in the preceding Spring Term about:

- 1 whether a dissertation is a suitable option for the student;
- 2 the particular dissertation topic;
- 3 who might be an appropriate dissertation supervisor.

Because this option requires considerable independent study, it is generally not advisable to opt to write a full-unit dissertation unless the student has been achieving marks of an upper second class standard. The dissertation subject must be of a suitable academic character that has not already or will not have been explored in depth in any taught course taken by the student but is related to subjects taught in the School.

In light of discussions with their Academic Mentor, a student wishing to pursue this option should approach a potential supervisor for approval. This must be a full-time academic member of staff in the Law School. Once they have their supervisor's approval, students should select the relevant dissertation course on LFY. They will then need to complete the 'Dissertation Topic Approval form' (available on LLB Dissertation Moodle page) which needs to be signed off by the student's Academic Mentor and proposed Dissertation Supervisor, by the end of Week 4 of Autumn Term.

Including the initial meeting, students will have four support meetings with their supervisor to guide them through the research process as follows:

- 1 One initial meeting to establish the broad topic.
- 2 A second meeting to agree a title, review an outline and see an initial bibliography.
- 3 A third meeting to discuss progress and difficulties (optional for half-unit essays).
- 4 A fourth meeting to give feedback on progress to date, to take place before the end of the Winter Term. In order for this feedback meeting to be of use, students will need to have made substantial progress with the preparation of a draft dissertation by the middle of the Winter Term. It is the student's responsibility to arrange these meetings with the supervisor.

The dissertation should be 12,000 – 15,000 words in length and must be submitted by midday on Wednesday 1 May 2024. Further information can be found on the LLB Dissertation Moodle page and in the LLB Dissertation Handbook (found on the Moodle page).

Teaching: 1 hour of lectures in the AT.

Beyond the one-to-one supervision sessions held with the student's dissertation supervisor there is no formal teaching as such.

However, a one-hour session will be held in the Autumn Term for all full-unit and half-unit dissertation students to orient them with the dissertation requirements.

Indicative reading: There is no essential reading as such. The LLB Dissertation Moodle page provides full information.

Assessment: Dissertation (100%, 15000 words) in the ST. Word limit is 12,000-15,000 words.

LN100

Russian Language and Society 3 (advanced)

This information is for the 2024/25 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01a, Mrs Irina Forbes and Mrs Natalia Bershadski

Availability: This course is available on the MA in Modern History. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Students can take this course in any year of their studies following approval from the teacher responsible.

Priority will be given to Language Centre BSc students and students from other Departments following a Language Specialism.

Pre-requisites: Completion of the Russian Language and Society 2 (Intermediate) course (LN102); or a good pass at A Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Advanced study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 40 hours of classes in the AT. 40 hours of classes in the WT. 4 hours of classes in the ST.

Four hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using multi-media and web-based materials. Structured activities during the reading week.

This course has reading weeks in week 6 of the Autumn and Winter terms.

Formative coursework: Students will be required to complete weekly language exercises.

Indicative reading:

- *Colloquial Russian 2*, by Olga Sobolev, Natasha Bershadski et al, Routledge, 2018

Additional:

- Russian media sources on the web;
- Terence Wade, *A Comprehensive Russian Grammar* (Blackwell, 2010);
- Jeffrey Brooks, *The Firebird and the Fox: Russian Culture under Tsars and Bolsheviks* (Cambridge University Press, 2019)

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Oral examination (30%) in the ST.

Continuous assessment (40%) in the AT and WT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN101

Russian Language and Society 1 (beginner)

This information is for the 2024/25 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01a, Mrs Irina Forbes and Mrs Natalia Bershadski

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies subject to their programme regulations, and following approval from the teacher responsible.

Priority will be given to Language Centre BSc students and students from other Departments following a Language

Specialism.

Pre-requisites: No previous knowledge of Russian is required; students with limited prior knowledge may be considered for the course subject to an interview with the course co-ordinator.

Course content: Beginners to higher intermediate study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 60 hours of classes in the AT. 60 hours of classes in the WT. 6 hours of classes in the ST.

Six hours per week, which will feature: (a) interactive topic work; (b) oral classes; (c) grammar classes; (d) tutorials; and (e) guided study using multi-media and web-based materials. Structured activities during the reading week.

Students should note that the timetable will be kept extremely flexible to accommodate students from all departments. Please contact the teacher responsible if you would like to follow this language course.

This course has reading weeks in week 6 of the Autumn and Winter terms.

Formative coursework: Students will be required to complete weekly language exercises.

Indicative reading: • LSE Study Pack

• *Colloquial Russian*, by Svetlana Le Fleming, Susan Kay & Mikhail Vodopyanov, Routledge, 2023

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Oral examination (30%) in the ST.

Continuous assessment (40%) in the AT and WT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN102

Russian Language and Society 2 (intermediate)

This information is for the 2024/25 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01a, Mrs Irina Forbes and Mrs Natalia Bershadski

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies subject to their programme regulations, and following approval from the teacher responsible. Priority will be given to Language Centre BSc students and students from other Departments following a Language Specialism.

Pre-requisites: Completion of the Russian Language and Society 1 (Beginner) course (LN101); or a good pass at GSCE/AS Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: A bridge from intermediate to advanced study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 50 hours of classes in the AT. 50 hours of classes in the WT. 5 hours of classes in the ST.

Five hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials;

and (e) guided study using multi-media and web-based materials. Structured activities during the reading week.

This course has reading weeks in week 6 of the Autumn and Winter terms.

Formative coursework: Students will be required to complete weekly language exercises.

Indicative reading:

• *Colloquial Russian*, by Svetlana Le Fleming, Susan Kay & Mikhail Vodopyanov, Routledge, 2023

• Additional (cultural awareness): Jeffrey Brooks, *The Firebird and the Fox: Russian Culture under Tsars and Bolsheviks* (Cambridge University Press, 2019).

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Oral examination (30%) in the ST.

Continuous assessment (40%) in the AT and WT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN104

Mandarin Language and Society Level 1 (Beginner)

This information is for the 2024/25 session.

Teacher responsible: Dr Hua Xiang PEL.6.01b

Availability: This course has a limited number of places (it is capped) and priority will be given to Language Centre BSc students and students from other Departments following a Language Specialism.

All students should seek approval from the teacher responsible before completing course selection.

Please see here for information on seeking approval for undergraduate modern language degree courses:

<https://www.lse.ac.uk/language-centre/undergraduate-degree-courses/degree-courses-as-part-of-an-undergraduate-degree>.

Pre-requisites: No previous knowledge of Mandarin is required; students with limited prior knowledge may be considered for the course subject to an interview with the course co-ordinator.

Course content: Beginners to intermediate study of the Mandarin language within the framework of social sciences and culture.

In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness. In this level, the students are required to read and write up to 750 Chinese characters.

Teaching: 60 hours of classes in the AT. 60 hours of classes in the WT. 6 hours of classes in the ST.

Six hours per week, which will feature: (a) interactive topical work; (b) oral practise; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

This course has reading weeks in Week 6 of each term.

Formative coursework: The students will be required to complete weekly exercises. This includes grammar activities, writing Chinese characters and online communicative materials.

Indicative reading:

• CH Xiang, 2010, *Mastering Chinese*, London. Palgrave Macmillan.

• X Liu (ed.), 2006, *New Practical Chinese Reader*, Vol. 1, text book and workbook, Beijing. Beijing Language and Cultural University Press.

• Y Po-Ching & D Rimmington, 2002, *Beginners Chinese – A Grammar and Workbook*, Routledge.

• Oxford Chinese Dictionary, 2010, Oxford Dictionaries.

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.
 Oral examination (30%) in the ST.
 Continuous assessment (40%) in the AT and WT.
 Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN110

German Language and Society 3 (advanced)

This information is for the 2024/25 session.

Teacher responsible: Dr Peter Skrandies PEL.6.01f

Availability: This course is available on the MA in Modern History. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course has a limited number of places (it is capped) and priority will be given to Language Centre BSc students and students from other Departments following a Language Specialism. This course is available as an outside option to students on other programmes where regulations permit and on the MA in Modern History. This course is available with permission to General Course students. All students should seek approval from the teacher responsible before completing course selection. Please see here for information on seeking approval for undergraduate modern language degree courses (<https://www.lse.ac.uk/language-centre/undergraduate-degree-courses/degree-courses-as-part-of-an-undergraduate-degree>).

Pre-requisites: An A-level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Advanced study of the German language within the framework of the social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, and the use of authentic multi-media materials. The focus is on accuracy and communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 40 hours of classes in the AT. 40 hours of classes in the WT. 4 hours of classes in the ST.

Four hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. The course has a reading week in week 6 of the AT and the WT.

Formative coursework: Weekly language exercises

Indicative reading:

- Beattie, S. (ed.) (2007) *160 Collins German Dictionary*, 1607th160edition, Glasgow: Harper Collins
- Durrell, Martin et al. (2015) *160 Essential German Grammar*, 2nd edition, 160London: 160Routledge
- Wolski, Werner (2012), *Pons Kompaktwörterbuch Deutsch als Fremdsprache*, Stuttgart: Klett Verlag

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Oral examination (30%) in the ST.

Continuous assessment (40%) in the AT and WT.

Language courses map to the Common European Framework for Language Learning. LN112

German Language and Society 2 (Intermediate)

This information is for the 2024/25 session.

Teacher responsible: Dr Peter Skrandies PEL.6.01f

Availability: This course has a limited number of places (it is capped) and priority will be given to Language Centre BSc students and students from other Departments following a Language Specialism. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. All students should seek approval from the teacher responsible before completing course selection. Please see here for information on seeking approval for undergraduate modern language degree courses (<https://www.lse.ac.uk/language-centre/undergraduate-degree-courses/degree-courses-as-part-of-an-undergraduate-degree>).

Pre-requisites: A good pass at GSCE/AS Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: The course is designed to be a bridge from intermediate to advanced study of the German language within the framework of social sciences and culture. It will introduce students to the study of the society, economy and culture of German-speaking countries through the medium of German. In a dynamic and communicative way the course develops speaking, listening, reading and writing skills through individual and group work, topical discussions, and by using authentic and multi-media material. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 50 hours of classes in the AT. 50 hours of classes in the WT. 5 hours of classes in the ST.

Five hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. The course has a reading week in week 6 of the AT and the WT.

Formative coursework: Weekly language exercises

Indicative reading: Beattie, S. (ed.) (2007) *Collins German Dictionary*, 7th edition, Glasgow: Harper Collins

Braun, Birgit, Margit Doubek et. al. (2016) *DaF kompakt neu B1, Kursbuch und Arbeitsbuch*. Stuttgart: Ernst Klett. ISBN: 978-3-12-676315-8. (Set course book, purchase is required)

Durrell, Martin et al. (2015) *Essential German Grammar*, London: Routledge

Wolski, Werner (2012), *Pons Kompaktwörterbuch Deutsch als Fremdsprache*, Stuttgart: Klett Verlag

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Oral examination (30%) in the ST.

Continuous assessment (40%) in the AT and WT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN115

Intercultural Communication and Management

This information is for the 2024/25 session.

Teacher responsible: Dr Hua Xiang PEL.6.01b and Dr Neil Mclean 20KSW.G.07

Availability: This course is compulsory on the BSc in International Relations and Chinese. This course is available on the BSc in Language, Culture and Society. This course is not available as an outside option nor to General Course students.

This course is capped.

Pre-requisites: No pre-requisite required.

Course content: The course will cover the main theories and concepts involved in inter-cultural communication, such as: face, politeness, (im)politeness, speech acts and pragmatics. It explains and analyses how theories and concepts about the above phenomena apply in real life, in business and in political communications. A range of case studies will be presented in the course. These demonstrate how linguistic and communication strategies can be used effectively in different interactional contexts.

Some important themes and areas include:

- The intercultural challenge, such as the importance of intercultural communication, barriers to intercultural communication, and how to deal with difference
- Understanding of culture and cultural dimensions, such as various theories of culture, socialisation and its role in the acquisition of language, non-verbal communication, communication styles and relativity as explored through concepts such as time, space, distance, as well as role performance and 160 speech acts, such as apologies, giving compliments and showing gratitude
- Pragmatics and how language use should be and/or could be applied in a comparative cultural context
- Case studies of miscommunication across cultures and research on cultural difference

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

Two hours per week, featuring: (a) one hour lectures on a range of concepts and themes; (b) one hour classes; (c) student presentations; (d) tutorials. Structured activities will take place in the Week 6 Reading Week of the Michaelmas Term and the Lent Term.

Formative coursework: Students will be expected to produce 1 essay and 1 case study in the AT and 1 presentation and 1 project in the WT.

Short essay, case study analysis, presentation, and a project analysing a case of language use.

Indicative reading: Bowe, Heather, Martin Kylie and Manns Howards (2014). *Communication across Cultures. Mutual Understanding in a Global World*, 2nd ed. Cambridge University Press.

Mooney, Annabelle et al (2010). *Language, Society and Power. An Introduction*, 3rd ed., London: Routledge

Scollon, Ron and Scollon Suzanne Wong (2001). *Intercultural Communication*, 2nd ed, Blackwell Publishing

Yule, George (2010). *The Study of Language*, 4th ed., Cambridge: Cambridge University Press

Chapters from:

Wodak, Ruth, Barbara Johnstone & Paul Kerswill (eds) (2011). *The Sage Handbook of Sociolinguistics*, London: Sage

Spencer – Oatey, Helen (2008). *Culturally speaking: Culture, communication and politeness theory* (2 nd edition). London & New York, Continuum

Assessment: Coursework (50%) in the AT and WT.

Project (50%) in the WT.

Following DTC Chair's action, this change is to reduce the assessment load and reward the work students put in on their projects.

LN120

Spanish Language and Society 3 (advanced)

This information is for the 2024/25 session.

Teacher responsible: Ms Maria Lourdes Hernandez Martin PEL. 6.01d and Ms Mercedes Coca PEL. 6.01i

Availability: This course has a limited number of places (it is capped) and priority will be given to Language Centre BSc students

and students from other Departments following a Language Specialism. This course is available as an outside option to students on other programmes where regulations permit and on the MA in Modern History. This course is available with permission to General Course students.

All students should seek approval from the teacher responsible before completing course selection. Please see information on seeking approval for undergraduate modern language degree courses <https://www.lse.ac.uk/language-centre/undergraduate-degree-courses/degree-courses-as-part-of-an-undergraduate-degree>

Pre-requisites: Completion of the Spanish Language and Society 2 (Intermediate) course (LN122); or a good pass at A Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Advanced of the Spanish language through themes related to Spanish speaking societies within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 40 hours of classes in the AT. 40 hours of classes in the WT. 4 hours of classes in the ST.

This course has reading weeks in week 6 of Autumn (AT) and Winter (WT) terms.

Four hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

Formative coursework: The students will be required to complete weekly language exercises

Indicative reading:

- USO de la gramática española: avanzado, Francisca Castro, editorial Edelsa (más clave con respuestas);
- E Galeano, *Las Venas Abiertas de América Latina*, Siglo XXI 1988;
- H Graham & J Labanyi (Eds), *Spanish Cultural Studies*, OUP 1995;
- Carlos Fuentes, *El Espejo Enterrado*, Taurus Bolsillo, 1998
- Edwin Williamson, *The Penguin History Of Latin America: New Edition*. 2009
- Giles Tremlett, *España Ante Sus Fantasmás*, Siglo XXI 2006.

Students will be advised to buy any relevant materials at the beginning of the course.

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Oral examination (30%) in the ST.

Continuous assessment (40%) in the AT and WT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN121

Spanish Language and Society 1 (beginner)

This information is for the 2024/25 session.

Teacher responsible: Dr Roser Martínez-Sánchez PEL 6.01g
Ms Ms Margarita Rois-Quiroga PEL 6.01i

Availability: This course has a limited number of places (it is capped) and priority will be given to Language Centre BSc students and students from other Departments following a Language Specialism. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. All students should seek approval from the teacher responsible before completing course selection. Please see information on

seeking approval for undergraduate modern language degree courses <https://www.lse.ac.uk/language-centre/undergraduate-degree-courses/degree-courses-as-part-of-an-undergraduate-degree>

Pre-requisites:

- No previous knowledge of Spanish is required; students with limited prior knowledge may be considered for the course subject to an interview with the course co-ordinator.
- Please contact one of the teachers responsible **before** registering for this course.
- If you are thinking of taking this course in your 2nd or 3rd year, it is advisable to contact one of the teachers responsible **before** the summer vacation.

Course content:

- Beginners to intermediate study of the Spanish language through themes related to Spanish-speaking societies **within the framework of social sciences and culture**.
- In a dynamic and communicative way the course develops **all language skills** through individual and group work, authentic and multi-media materials, and research based learning.
- The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural critical awareness.

Teaching: 60 hours of classes in the AT. 60 hours of classes in the WT. 6 hours of classes in the ST.

Six hours per week, which will feature: (a) interactive topical work; (b) oral practise; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

This course has reading weeks in week 6 of Autumn Term (AT) and Winter Term (WT).

Formative coursework: Students will be required to complete weekly tasks.

Indicative reading: Students will be advised on relevant materials at the beginning of the course.

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Oral examination (30%) in the ST.

Continuous assessment (40%) in the AT and WT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN122

Spanish Language and Society 2 (intermediate)

This information is for the 2024/25 session.

Teacher responsible: Ms Maria Lourdes Hernandez Martin PEL.6.01D and Dr Roser Martinez-Sanchez PEL.6.01G

Availability: This course has a limited number of places (it is capped) and priority will be given to Language Centre BSc students and students from other Departments following a Language Specialism.

This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

All students should seek approval from Lourdes Hernandez-Martin **before** completing course selection. Please see here for **information on seeking approval for undergraduate modern language degree courses**: <https://www.lse.ac.uk/language-centre/undergraduate-degree-courses/degree-courses-as-part-of-an-undergraduate-degree>

Pre-requisites:

- A good pass at GCSE+ / AS Level or its equivalent is required.
- For undergraduates who have either successfully completed LN121 (the beginner course).
- **All students should seek approval** from Lourdes Hernandez-

Martin **before** completing course selection. Please see here for **information on seeking approval for undergraduate modern language degree courses**: <https://www.lse.ac.uk/language-centre/undergraduate-degree-courses/degree-courses-as-part-of-an-undergraduate-degree>

- If you are thinking of taking this course in your **2nd or 3rd year**, it is advisable to contact Lourdes Hernandez-Martin (l.hernandez-martin@lse.ac.uk) **before** the summer vacation.

Course content: This course is designed to help students reach an advanced-level of proficiency in Spanish by developing their interaction, production, reception, and mediation skills. Students will explore a diverse range of topics gaining a deeper understanding of the contexts where Spanish is spoken.

In a dynamic and communicative way the course develops all language skills through individual and group work. Students have also the opportunity to carry out research of their choice.

Teaching: 50 hours of classes in the AT. 50 hours of classes in the WT. 5 hours of classes in the ST.

Five hours per week. This course has reading weeks in week 6 of Autumn (AT) and Winter (WT) terms.

The course is taught via sociocultural units and a research-based project.

Students' initiative and participation are essential.

Formative coursework: Students will be required to complete weekly tasks.

Indicative reading: Students will be advised on relevant materials at the beginning of the course.

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Oral examination (30%) in the ST.

Continuous assessment (40%) in the AT and WT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN130

French Language and Society 3 (advanced)

This information is for the 2024/25 session.

Teacher responsible: Miss Florence Niclot PEL.6.01.L and Mr Francois Simon PEL.6.01.K

Availability: This course has a limited number of places (it is capped) and priority will be given to Language Centre BSc students and students from other Departments following a Language Specialism. This course is available as an outside option to students on other programmes where regulations permit and on the MA in Modern History. This course is available with permission to General Course students. All students should seek approval from the teacher responsible before completing course selection. Please see here for information on seeking approval for undergraduate modern language degree courses: <https://www.lse.ac.uk/language-centre/undergraduate-degree-courses/degree-courses-as-part-of-an-undergraduate-degree>

In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness. The focus will be specific vocabulary related to International Relations and reading skills of simple texts in the target language on International Relations topics.

Teaching: 44 hours of classes in the AT. 44 hours of classes in the WT. 4 hours of classes in the ST.

Four hours per week, which will feature: (a) interactive topical work; (b) oral practise; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Reading week in Week 6 of MT and LT.

Formative coursework: Students will be expected to produce 1 essay, 1 exercise, 1 presentation, 1 project and 1 other piece of coursework in the AT and WT.

The students will be required to complete weekly exercises. This includes vocabulary quizzes, grammar activities, writing Chinese characters and use of online communicative materials.

Indicative reading: Newspaper articles, internet sources, other web-based materials dealing with international relationship issues. <http://www.ftchinese.com/story/001065369?full=y>
<https://zht.globalvoices.org/category/topics/international->

relations/

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Coursework (50%) in the AT and WT.

Oral examination (20%) in the ST.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN250

English Literature and Society

This information is for the 2024/25 session.

Teacher responsible: Dr Angus Wrenn PEL.6.01a

Availability: Available as an outside option to students on all undergraduate programmes where regulations permit, and to General Course students. Students can take this course in any year of their studies.

Pre-requisites: An A-level pass or equivalent is recommended but not required (especially for General Course students).

Course content: (a) Study of 20th century British literature (prose, poetry and drama) in its socio-political context; Study of individual authors (in weekly lectures) - these form the basis of the examination assessment (b) Study of major cultural themes running through the century e.g. Imperialism; Feminism; Modernism; Political writing - these form the basis of the student's research project presentation. (c) Several trips to theatre productions during the year; (d) Extensive use of archive recordings of authors, and video; (e) Students encouraged to draw on background in their main discipline, and to read widely.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

Structured activities during the reading week in the AT and WT.

Revision workshops and tutorials in the ST.

This course has reading weeks in Week 6 of Autumn and Winter Terms.

Formative coursework: Two essays per year; topically based research presentations.

Indicative reading: (Primary texts) Conrad *Heart of Darkness*; T S Eliot *The Waste Land*; Virginia Woolf *Mrs Dalloway*; James Joyce *Portrait of the Artist E.M. Forster* *Passage to India* George Orwell *Nineteen Eighty-Four*; Philip Larkin *Collected Poems*; Seamus Heaney *Collected Poems*; Doris Lessing *The Golden Notebook*; Salman Rushdie *Midnight's Children* (Secondary text) *The Cambridge History of Twentieth-Century English Literature* (The New Cambridge History of English Literature) by Laura Marcus and Peter Nicholls Cambridge: CUP, 2012

Assessment: Exam (85%, duration: 3 hours) in the spring exam period.

Presentation (15%) in the WT.

Presentation of assigned research project

LN251

Comparative Literature and 20th Century Political History

This information is for the 2024/25 session.

Teacher responsible: Dr Olga Sobolev PEL.6.01a and Dr Angus Wrenn PEL.6.01a

Availability: This course is available on the BA in History, BSc in History and Politics, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside

option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Although an A-level pass or equivalent in Literature is useful, it is not an absolute requirement (especially for General Course Students).

Course content: Comparative literature of the twentieth century leading up to and including the Cold War. (a) Study of major authors (prose, poetry and drama, in English translation where relevant) on both sides of the Iron Curtain with a focus on the recurrent cultural themes: social Utopia/Dystopia; art with a social/political function; the East-West dichotomy in the Cold War; ideological scepticism; individual and the state; the value of political protest (b) Use of video-recording related to the texts (c) Several related trips to galleries, film festivals and theatre productions during the year; (d) Students encouraged to draw upon background in their main discipline, and to read widely.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

Structured activities during the reading week in the AT and WT. Revision tutorials in the ST.

This course has reading weeks in week 6 of the Autumn and Winter terms.

Formative coursework: Students will be expected to produce 2 essays in the AT and WT.

Indicative reading: A. Huxley *Brave New World*; G.B. Shaw *Annajanska the Bolshevik Empress*; E. Zamyatin *We*; G. Orwell *Animal Farm* & 1984; M. Bulgakov *The Heart of a Dog*; W. H. Auden poems; V. Mayakovsky poems; A. Solzhenitsyn *A Day in the Life of Ivan Denisovich*; Ian Fleming *From Russia with Love*; John le Carré *Tinker Tailor Soldier Spy*; Peter Schneider *The Wall Jumer*, Ian McEwan *The Innocent*, A. Makine *A Life's Music*; M. Kundera *The Unbearable Lightness of Being*; T. Stoppard *Professional Foul*; S. Dovlatov *The Suitcase*; B. Chatwin *Utz*.

Assessment: Exam (70%, duration: 3 hours) in the spring exam period.

Project (30%, 2500 words) in the WT.

a presentation (in the form of a topic-specific discussion) constitutes an essential part of the project-work

LN252

Contemporary Literature and Global Society

This information is for the 2024/25 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01a and Dr Angus Wrenn PEL 6.01a

Availability: This course is available as an outside option to students on all undergraduate programmes, and to General Course students. Students can take this course in any year of their studies, subject to their own programme regulations.

Pre-requisites: Although an A-level pass or equivalent in Literature is useful, it is not an absolute requirement (especially for General Course students).

Course content: (a) Study of contemporary (chiefly post 2000) literature and films in the context of modern globalised society, covering prose, poetry, drama and cinematic works; (b) Focus on cultural postmodernism, including such aspects as: decline of national cultural frameworks; 'commodification' of culture; 'media-driven' society; gender issues; the problem of identity; social elites and social fragmentation; (c) study of films and individual authors in English translation (where relevant). (d) several related trips to galleries, film festivals and theatre productions during the year; (e) extensive use of archive recordings of authors, and video; (f) students are encouraged to draw upon their background in their main discipline, and to read widely.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

Structured activities during the reading week in the AT and WT. Revision tutorials in the ST.

This course has reading weeks in week 6 of the Autumn and Winter terms.

Formative coursework: Students will be expected to produce 2 essays in the AT and WT.

Indicative reading: Literature: Douglas Coupland, *Generation X*; Viktor Pelevin, *Generation P (Babylon)*; Vesna Goldsworthy Gorsky (Scott Fitzgerald *The Great Gatsby*); Branden Jacobs-Jenkins, *Gloria*, Milan Kundera, *Ignorance*; Mohsin Hamid, *The Reluctant Fundamentalist*; Marina Lewicka *A Short History of Tractors in Ukrainian*; Monica Ali, *Brick Lane*; Jonathan S. Foer *Everything Is Illuminated*; Zadie Smith, *White Teeth*, John le Carré *A Most Wanted Man*.

Films: *Good Bye, Lenin!* (2003); *Everything Is Illuminated* (2005); *Borat* (2006); *The Riot Club* (2014); *Loveless* (2018).

Assessment: Exam (70%, duration: 3 hours) in the spring exam period.

LN254

Literature and Aspects of Ethics

This information is for the 2024/25 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01a and Dr Angus Wrenn PEL 6.01a

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Students can take this course in any year of their studies.

Pre-requisites: Although an A-level pass or equivalent in Literature is useful, it is not an absolute requirement (especially for General Course students).

Course content: a) Literary treatment/projection of the aspects of ethics, focusing on the classical ideas of Aristotle and Kant, Schopenhauer, and Nietzsche, developed in modern times by Sartre, Lacan, Bernard Williams and Michel Foucault. The course will draw on a range of themes arising from the interface between literary and philosophical studies and will explore such issues as the objectivity of moral reasoning (the question whether the practices that are traditionally and factually legitimated by religion, law or politics are indeed worthy of recognition); the spiritual crisis of the modern world (desire, guilt and innocence); technological omnipotence versus determinism; and the illusion of liberty in a tolerant democracy based on consensus. It will also be concerned with such questions as whether philosophy and literature, when combined, can achieve more than the sum of the two parts. b) The course is based on a carefully chosen range of short stories from world literature (including such authors as Kafka, Murakami, Kundera, Borges, Bessie Head, Isabel Allende etc.) where there is either a direct allusion to or a strong parallel with the key ethical issues. c) Related trips to galleries and theatre productions during the year. d) Use of archive recordings of authors, and video. e) Students encouraged to draw upon background in their main discipline, and to read widely.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

Structured activities during the reading week in the AT and WT. Revision tutorials in the ST.

This course has reading weeks in week 6 of the Autumn and Winter terms.

Formative coursework: Students will be expected to produce 2 essays in the AT and WT.

Indicative reading: Literary texts: Bashevis Singer *The Spinoza of Market Street*; Franz Kafka *In The Penal Colony*; Isabel Allende *The Schoolteacher's Guest*; Thomas Mann *Death in Venice*; Jorge-Luis Borges *Blue Tigers*; Haruki Murakami *The Ice Man*; Jean-Paul Sartre *The Wall*; Guy de Maupassant *The Model*; Heinrich Böll *To Work or not to Work*; Bessie Head *A Power Struggle*. Additional reading: Peter Singer and Renata Singer (eds), *The Moral of the Story: An Anthology of Ethics Through Literature* (Wiley-Blackwell, 2004); Alex Voorhoeve, *Conversations on Ethics* (Oxford University Press, 2011); Luc Bovens, 'The Ethics of Making Risky Decisions for Others'. in Mark White (ed.), *The Oxford Handbook of Ethics and Economics* (Oxford University Press, 2019); Brian Stock, *Ethics through Literature: Ascetic and Aesthetic Reading in Western Culture* (Brandeis, 2008).

Assessment: Exam (70%, duration: 3 hours) in the spring exam period.

Project (30%, 2500 words) in the WT.

a presentation (in the form of a topic-specific discussion) constitutes an essential part of the project-work

LN270

Society and Language: Linguistics for Social Scientists

This information is for the 2024/25 session.

Teacher responsible: Dr Peter Skrandies PEL 6.01f

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies. All students should seek approval from the teacher responsible before completing course selection.

Course content: The course will introduce students to key (socio) linguistic concepts (semantic and pragmatic meaning, discourse, register, genre, dialect, idiolect, sociolect) employed in the analysis of language use as a social process. Students will explore the reciprocal relationship between language and specific social contexts and structures (class, gender, ethnicity), and study the role that language plays in the creation, maintenance and change of social relations and institutions. Important themes are changing attitudes to language and the prestige afforded to particular languages and language varieties. The use of language for academic purposes will be analysed, as will be situations of language contact, multilingualism and the role of translation in intercultural and international communication. The implications and consequences for less widely used languages of the emergence of English (and other widely spoken languages) as global lingua francas will be outlined and discussed.

Teaching: 10 hours of seminars and 10 hours of classes in the AT. 10 hours of seminars and 10 hours of classes in the WT. 1 hour of seminars and 1 hour of classes in the ST.

Two hours per week, featuring: (a) Presentations on a range of concepts and themes; (b) classes including students' presentations; (c) revision workshops. Students on this course will have a reading week in week 6 of AT and WT.

Formative coursework: Short essays, linguistic analyses, presentations.

Indicative reading:

- Edwards, John (2013). *Sociolinguistics: A Very Short Introduction*. Oxford: Oxford University Press
- Mesthrie, Rajend (ed) (2011). *The Cambridge Handbook of Sociolinguistics*, Cambridge: Cambridge University Press
- McConnell-Ginet, S., (2020). *Words matter: Meaning and power*. Cambridge: Cambridge University Press
- Mooney, Annabelle et al (2015). *Language, Society and Power. An Introduction*, 4th edition, London: Routledge
- Ottenheimer, H. J., & Pine, J. M. (2018). *The anthropology of language: an introduction to linguistic anthropology*. Wadsworth: Cengage Learning.
- Wodak, Ruth et al (2011). *The SAGE Handbook of Sociolinguistics*, London: SAGE
- Yule, George (2016). *The Study of Language*, 6th ed., Cambridge: Cambridge University Press

Assessment: Coursework (50%) in the WT and ST.

Take-home assessment (50%) in the ST.

The coursework consists of a sociolinguistic project which includes an oral presentation of the project (10%, 500 words) in the WT and a project essay (40%, 4000 words).

The take-home assessment set during the spring exam period will have to be completed over a period of seven days.

LN303

Language Studies Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Olga Sobolev and Dr Neil Mclean

Availability: This course is available on the BSc in Language, Culture and Society. This course is not available as an outside option nor to General Course students.

Pre-requisites: The dissertation builds on first and second year linguistics or literature options offered by the Language Centre.

These options require students to complete research tasks and projects as part of their coursework. Students' dissertation topics will be expected to reflect their study of appropriate options in intercultural communication, sociolinguistics or literature in their first and second years.

Course content: The dissertation will have two elements. These are the dissertation text of 7,000 words in the target language and a viva in English. Students' research questions will explore an area of linguistic or literary study or theory introduced during students first two years on the BSc in Papers 4 and 8. In addition to these courses, students will have completed SO201 and research projects written in their target language as part of their LS4 coursework. The dissertation will build on these learning experiences.

The dissertation will provide the opportunity to carry out an extended independent research project in the target language, and to present the findings of this study in two formats. The first is the text of 7,000 words written in the target language and following academic conventions in that language. The dissertation will contain the following core elements:

- Literature review demonstrating the student's ability to work with a variety of sources in the target language, and justifying their research interest / niche.
 - Methodological framework, based on their first and second year grounding in systematic analysis within linguistic research or literary theory, and the research methods training offered in the Department of Sociology.
 - Original analysis of primary or secondary data specific to the topic.
- The second format is the viva, during which the student will present and discuss their work with their main language teacher and a second member of the Language Centre who teaches either linguistics or literature.

Teaching: 10 hours of workshops in the AT. 8 hours of workshops in the WT.

Students will attend fortnightly dissertation workshops. In the Autumn term, these will focus on the design of their project, methodology, data collection, and analysis, in the Winter term they will focus on recording and presenting their findings. Students will also have two individual supervision meetings each term.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the AT and 2 essays in the WT.

Indicative reading: This will depend on the dissertation topic. Students will be guided by their supervisor.

Assessment: Dissertation (70%, 7000 words) and presentation (30%) in the ST.

LN320

Spanish Language and Society 5 (mastery)

This information is for the 2024/25 session.

Teacher responsible: Ms Maria Lourdes Hernandez Martin PEL 6.01 d

Availability: This course is available on the MA in Modern History. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course has a limited number of places (it is capped) and priority will be given to Language Centre BSc students and students from other Departments following a Language Specialism.

This course is available as an outside option to students on other programmes where regulations permit and on the MA in Modern History. This course is available with permission to General Course students.

All students should seek approval from the teacher responsible before completing course selection. Please see here for **information on seeking approval for undergraduate modern language degree courses:** <https://www.lse.ac.uk/language-centre/undergraduate-degree-courses/degree-courses-as-part-of-an-undergraduate-degree>.

Pre-requisites: Completion of the Spanish Language and Society 4

(Proficiency) course (LN220) or its equivalent is required.

All students should seek approval from Lourdes Hernández-Martin before completing course selection. Please see here for **information on seeking approval for undergraduate modern language degree courses:** <https://www.lse.ac.uk/language-centre/undergraduate-degree-courses/degree-courses-as-part-of-an-undergraduate-degree>.

Course content: This course is designed to help students reach a mastery-level of proficiency in Spanish by developing their interaction, production, reception, and mediation skills. Through the analysis of the creative outputs of writers, artists, musicians, filmmakers, and others, students will explore a diverse range of topics while gaining a deeper understanding of the contexts where Spanish is spoken.

The course offers students the opportunity to carry out research of their choice.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

Two hours per week.

This course has reading weeks in week 6 of Autumn (AT) and Winter (WT) terms.

The course is based on a seminar approach and collaborative tasks. Students' initiative and participation are essential.

Formative coursework: The students will be required to complete weekly tasks

Indicative reading: Students will be advised on relevant materials at the beginning of the course.

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Oral examination (30%) in the ST.

Continuous assessment (40%) in the AT and WT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN330

French Language and Society 5 (mastery)

This information is for the 2024/25 session.

Teacher responsible: Mr Francois Simon PEL 6.01 K

Availability: This course has a limited number of places (it is capped) and priority will be given to Language Centre BSc students and students from other Departments following a Language Specialism. This course is available as an outside option to students on other programmes where regulations permit and on the MA in Modern History. This course is available with permission to General Course students. All students should seek approval from the teacher responsible before completing course selection. Please see here for information on seeking approval for undergraduate modern language degree courses : <https://www.lse.ac.uk/language-centre/undergraduate-degree-courses/degree-courses-as-part-of-an-undergraduate-degree>

Pre-requisites: Students must have completed French Language and Society 4 (proficiency) (LN230).

AND / OR attend a compulsory interview with the course co-ordinator prior to registration.

Course content:

- Further advanced (up to the level of mastery) study of the French language within the framework of social sciences and culture.
- dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic materials.
- The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural

awareness.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

Two hours per week, which will feature: (a) seminars; (b) Oral Classes; (c) Workshops; (d) Tutorials; and (e) Guided study using Language (f) grammar. Showroom, IT and web-based material including a virtual learning environment supported by Moodle. This course has reading weeks in week 6 of Michaelmas and Lent terms.

Formative coursework:

- 40% : Research project (in the MT and LT (including an Oral examination (20%) in the main exam period).
- 20% : Continuous assessment (in the MT and LT).

See Assessment below

Indicative reading: Students are encouraged to make full use of the resources of French books in the Library as well as reference books. Students are also strongly advised to use the resources available on the World Wide Web.

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Oral examination (30%) in the ST.

Continuous assessment (40%) in the AT and WT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN340 Not available in 2024/25

Mandarin Language and Society 5 (Mastery)

This information is for the 2024/25 session.

Teacher responsible: Dr Hua Xiang PEL, 601B

Availability: This course is available on the MA in Modern History.

This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Students must have completed Mandarin Language and Society 4 (Proficiency) (LN240).

This is a Mastery course, and in order to register, completion of Language and Society 4 or equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Further advanced (up to the level of mastery) study of the Mandarin language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness. At this level, the students are required to read and write up to 5000 Chinese characters.

Teaching: 20 hours of classes in the AT. 20 hours of classes in the WT. 2 hours of classes in the ST.

Two hours per week, which will feature: (a) interactive topical work; (b) oral practise; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

This course has reading weeks in Week 6 of Michaelmas and Lent terms.

Formative coursework: The students will be required to complete weekly exercises. This includes newspaper reading, research projects and online communicative materials.

Indicative reading: Students are encouraged to make full use of the resources of language gateway at LSE and online magazine

subscription. There will be guided authentic materials from newspaper, web and journals.

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the spring exam period.

Oral examination (30%) in the ST.

Continuous assessment (40%) in the AT and WT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN341

Mandarin in the Global Workplace

This information is for the 2024/25 session.

Teacher responsible: Dr Hua Xiang PEL.6.01B

Availability: This course is compulsory on the BSc in International Relations and Chinese. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

However, requests to take LN341 as an unlisted course will be considered in special circumstances.

Pre-requisites: The students should have completed their third year abroad in China.

Course content: The linguistic focus will continue to advance students' receptive and productive skills, as well as to develop their mediation skills (translation and interpretation skills) in order to expand students' coherent and detailed subject knowledge into vocabulary, syntactic (semantic) structures and pragmatic usages associated with International Relations discourse.

The course will also target improving students' analytical and critical thinking abilities to evaluate one or more aspect of culture, history, geography, politics, social and economic structures in Chinese societies, using and improving intercultural and transferable skills. This will ultimately ensure students' autonomous problem solving ability and key/generic skills within a structured environment. The ultimate aim of this course is to help students to establish the effective communication between English and Chinese in international relations contexts, both orally and in writing, and therefore to improve their professional competence employability.

COMMUNICATIVE CONTENT:

The course is focused on the following communicative functions:

- Providing critical reasoning.
- Giving coherent description and logical comment.
- Participating constructively in discussion or debate.
- Exchanging specific information in international relations contexts: international law (such as human rights), international conventions and international organisations.
- Assessing the relevance and importance of the ideas of others.
- Reading and summarising texts from newspapers, journals, TV news and radio broadcasting.
- Competitive translation and interpretation skills on international relation topics.
- Writing essays to discuss issues with International Relations elements.
- Fostering intercultural awareness and understanding.
- Adopting a non-Eurocentric perspective.

Teaching: 22 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.

Two hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

Reading week in Week 6 of AT and WT.

Formative coursework: Students will be expected to produce 2 essays, 2 problem sets, 2 presentations, 2 projects and 2 other pieces of coursework in the AT and WT.

The students will be required to complete weekly exercises. This includes vocabulary quiz, presentation, writing, translation/interpretation and online communicative materials.

Indicative reading: Authentic materials will be used in this class.

Assessment: Coursework (70%) in the AT and WT.

Oral examination (30%) in the ST.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN342

Academic Chinese for International Relations

This information is for the 2024/25 session.

Teacher responsible: Dr Hua Xiang PEL6.01B

Availability: This course is compulsory on the BSc in International Relations and Chinese. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

However, requests to take LN341 as an unlisted course will be considered in special circumstances.

Pre-requisites: Students must have completed Mandarin Language and Society 4 (Proficiency) (LN240).

Course content: This course aims to develop students' linguistic skills at a near mastery level through studying authentic materials relevant to Year 4 international relation students. Possible topics such Sino-UK relation, Sino-USA relation, Modernity and the State in China, China's recent rise, e-Commerce, wealth inequality, gender discrimination, migrant workers, and so on (Four themes – China and the world, China: past and current, China: economic development, China: human rights and equality). The students will be given opportunities to learn the key vocabulary related to China's history and current society, foreign policy, economic development, and human rights. Meanwhile, they will discuss and analyse real cases using methods/tools they have developed from their IR courses. The course is communicative and interactive. The students are required to read authentic materials in the target language and learn to discuss, summarise and debate ideas and issues in China as well as consider the applicability in different social/culture context.

COMMUNICATIVE CONTENT:

- Fluently express one's opinion in mandarin Chinese
- Fluently read and comprehend newspaper articles in mandarin Chinese (1500-2000 words)
- Skillfully summarise newspaper articles
- Understand presentations, talks, lectures in related areas in mandarin Chinese.
- Clearly and convincingly express one's subject analysis and viewpoint in mandarin Chinese

Teaching: 22 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.

2 hour classes per week. The teaching will be theme based, communicative and using integrated approaches. The teaching will be focusing on:

- Learn proficiency/mastery level Chinese phrases and expressions (equivalent to HSK 6) specific to IR.
- Chinese proverbs.
- Longer sentences and more complicated sentence structures.
- Introduction of traditional Chinese characters and classical Chinese160

Formative coursework: Students will be expected to produce 2 essays, 2 presentations, 2 exercises and 1 project in the AT and WT.

The students will be required to complete weekly exercises. This includes essays, in class presentation or recording, and project work.

Indicative reading: The students will be working with authentic materials in this unit, such as newspaper, journal articles and chapter selection from Chinese books.

Assessment: Coursework (70%) in the AT and WT.

Oral examination (30%) in the ST.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN370

Discourse and Communication

This information is for the 2024/25 session.

Teacher responsible: Dr Alison Standing PEL6.01E

Availability: This course will only be open to General Course students hosted by the Language Centre.

Course content: The course will cover key theories and concepts involved in communication with a contrast between written and spoken discourse, and a focus on genre and identity. Students will be English majors and so will apply the theories and concepts to the appropriate and effective usage of English in real-life cases and will analyse how linguistic and communication strategies can be used effectively in English-medium social, professional and academic contexts.

Some important themes and areas include:

- The features of written and spoken discourse
- Methods of analysing discourse
- Genre
- Identity

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

Two hours per week integrating: (a) lecture input on a range of concepts and themes; (b) class discussion building on pre-set reading; (c) student presentations and tasks; (d) tutorials.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: The 2-hour weekly sessions will be task-based and these tasks will help prepare students for their summative assessment. Students will also have 1-2-1 sessions in office hours in order to discuss progress on summatively assessed coursework tasks. This is normal LSE practice for courses using continuous assessment.

Assessment: Essay (25%, 1500 words) in the AT Week 6.

Coursework (25%, 1500 words) in the AT Week 11.

Project (25%, 2000 words) in the WT Week 6.

Presentation (25%) in the WT Week 11.

LSE100A Half Unit

The LSE Course: How can we transform our climate futures?

This information is for the 2024/25 session.

Teacher responsible: Dr Christopher Blunt KSW.4.12 and Dr Jillian Terry KSW.4.11

Availability: All first year undergraduate students take one of LSE100A, LSE100B or LSE100C.

Course content: LSE100 is LSE's flagship interdisciplinary course taken by all first-year undergraduate students as part of your degree programme. The course is designed to build your capacity to tackle multidimensional problems through research-rich education, giving you the opportunity to explore transformative global challenges in collaboration with peers from other departments and leading academics from across the School. Before registering at LSE, you will have the opportunity to select one of three themes to focus on during LSE100, each of which foregrounds a complex and pressing question facing social scientists. In 2024/25, the available themes are:

- How can we transform our climate futures?
- How can we control AI?
- How can we create a fair society?

In the 'How can we transform our climate futures?' theme, you will investigate how social scientific research can underpin our response to climate change. With ambitious vision and decisive action, there is still time to reach the international community's aim of limiting global temperatures to 1.5°C above pre-industrial levels. Amid competing ideas of what a net zero world would entail, we ask: how should we reshape our political, economic, social and legal systems to meet the needs of a sustainable future? In what ways should we act on climate change to create thriving and inclusive communities on both local and global scales?

This module explores questions of agency, responsibility, and solidarity to better understand the complex social, political and economic systems that combine to threaten the future of our environment. What are the planetary limits of economic growth?

Will a circular approach transform our economies for the better, or will it put too much power in the hands of the market? How do systems of waste and consumption reinforce colonial narratives and widen global inequalities?

Throughout LSE100, you will investigate the ways in which systems are being transformed by a changing climate as you consider how we might tackle the challenges that lie ahead. You will learn to use the tools and frameworks of systems thinking in order to analyse the impacts of environmental degradation, broaden your intellectual experience, and deepen your understanding of your own discipline as you test theories, evidence and ideas from different disciplinary perspectives.

Teaching: 7 hours and 30 minutes of seminars in the AT. 7 hours and 30 minutes of seminars in the WT.

90-minute seminars take place in alternate weeks. Students will attend an LSE100 seminar in either weeks 1, 3, 5, 7 and 9 or weeks 2, 4, 6, 8 and 10 of Autumn Term, and weeks 1, 3, 5, 7 and 9 or weeks 2, 4, 6, 8 and 10 of Winter Term.

AT: Seminar – 5 x 90min

WT: Seminar – 5 x 90min

In addition to seminars students will engage with bespoke video lectures featuring academics from across the School (approx. 20 minutes per seminar).

Formative coursework: In seminars throughout both terms, students will practice:

1 analysing quantitative and qualitative data

2 using systems thinking and systems change tools

3 constructing and communicating evidence-based academic arguments

Teachers will provide feedback during seminars and in post-seminar communications to groups and individuals.

During the Winter Term, groups will have the opportunity to submit and receive formative feedback on a project brief, summarising their research project. Students will also try out the tools of systems thinking and systems change that they will use in their summative group research project.

Indicative reading: The following readings are indicative of the texts students will be assigned. The total amount of reading assigned for each seminar will be a maximum of 20 pages.

- Jason Hickel (2021) *Less is More: how degrowth will save the world* (London: Penguin Random House)
- Elinor Ostrom (2008). 'Tragedy of the commons', in Steven N. Durlauf and Lawrence E. Blume (eds.) *The New Palgrave Dictionary of Economics*, 2nd edition.
- Kate Ervine (2012). 'The politics and practice of carbon offsetting: Silencing dissent', *New Political Science*, 34(1), pp.1-20.
- Camila Moreno, Daniel Speich Chasse & Lili Fuhr (2016). *Carbon Metrics: global abstractions and ecological epistemicide* (Heinrich Boll Stiftung: Publication Series Ecology, Vol.42).
- Jessie Kindig (ed.) (2022). *Property Will Cost Us the Earth: Direct Action and the Future of the Global Climate Movement*. (London: Verso)
- Naomi Klein (2014). *This Changes Everything: Capitalism vs the Climate*, (London: Allen Lane)
- Murray, A., Skene, K. & Haynes, K. (2017). 'The Circular Economy: An Interdisciplinary Exploration of the Concept and Application in a Global Context'. *J Bus Ethics*, 140, 369–380.
- Walter R. Stahel (2016). 'The circular economy'. *Nature* 531, 435–438.
- Oran R. Young (2017). 'The age of complexity' in *Governing Complex Systems: Social Capital for the Anthropocene* (MIT Press)

Assessment: Coursework (50%, 1000 words) in the AT.

Project (50%) in the WT.

Summative assessment will include an individual written assessment in the Autumn Term (50%) and a collaborative research project in the Winter Term (50%).

LSE100B Half Unit

The LSE Course: How can we control AI?

This information is for the 2024/25 session.

Teacher responsible: Dr Christopher Blunt KSW.4.12 and Dr Jillian Terry KSW.4.11

Availability: All first year undergraduate students take one of LSE100A, LSE100B or LSE100C.

Course content: LSE100 is LSE's flagship interdisciplinary course taken by all first-year undergraduate students as part of your degree programme. The course is designed to build your capacity to tackle multidimensional problems through research-rich education, giving you the opportunity to explore transformative global challenges in collaboration with peers from other departments and leading academics from across the School. Before registering at LSE, you will have the opportunity to select one of three themes to focus on during LSE100, each of which foregrounds a complex and pressing question facing social scientists. In 2024/25, the available themes are:

- How can we transform our climate futures?
- How can we control AI?
- How can we create a fair society?

In the 'How can we control AI?' theme, you will explore the emergence of artificial intelligence and its implications. Rapid advances in artificial intelligence are augmenting our ability to solve previously intractable problems, changing society in ways that are both thrilling and intimidating.

Generative AI tools, recommendation algorithms, facial recognition, and autonomous vehicles can automate burdensome tasks and optimise systems, but can also be used to threaten the freedom, safety, and livelihoods of people worldwide. Is AI transforming society for the better, or is it reinforcing existing biases, inequalities, and structures of power? Who decides? Can we harness the potential of AI for good?

In this module, we will explore the ways in which social systems are being transformed by technological change. You will learn to use the tools and frameworks of systems thinking in order to analyse the impacts of AI, broaden your intellectual experience, and deepen your understanding of your own discipline as you test theories, evidence and ideas from different disciplinary perspectives.

Teaching: 7 hours and 30 minutes of seminars in the AT. 7 hours and 30 minutes of seminars in the WT.

90-minute seminars take place in alternate weeks. Students will attend an LSE100 seminar in either weeks 1, 3, 5, 7 and 9 or weeks 2, 4, 6, 8 and 10 of Autumn Term, and weeks 1, 3, 5, 7 and 9 or weeks 2, 4, 6, 8 and 10 of Winter Term.

AT: Seminar – 5 x 90min

WT: Seminar – 5 x 90min

In addition to seminars students will engage with bespoke video lectures featuring academics from across the School (approx. 20 minutes per seminar).

Formative coursework: In seminars throughout both terms, students will practice:

- 1 analysing quantitative and qualitative data
- 2 using systems thinking and systems change tools
- 3 constructing and communicating evidence-based academic arguments

Teachers will provide feedback during seminars and in post-seminar communications to groups and individuals.

During the Winter Term, groups will have the opportunity to submit and receive formative feedback on a project brief, summarising their research project. Students will also try out the tools of systems thinking and systems change that they will use in their summative group research project.

- Robert Sparrow & Mark Howard (2017) 'When human beings are like drunk robots: driverless vehicles, ethics and the future of transport' in *Transportation Research, Part C: 80: 206-15*

Assessment: Coursework (50%, 1000 words) in the AT.

Project (50%) in the WT.

Summative assessment will include an individual written assessment in the Autumn Term (50%) and a collaborative research project in the Winter Term (50%).

LSE100C Half Unit

The LSE Course: How can we create a fair society?

This information is for the 2024/25 session.

Teacher responsible: Dr Christopher Blunt KSW.4.12 and Dr Jillian Terry KSW.4.11

Availability: All first year undergraduate students take one of LSE100A, LSE100B or LSE100C.

Course content: LSE100 is LSE's flagship interdisciplinary course taken by all first-year undergraduate students as part of your degree programme. The course is designed to build your capacity to tackle multidimensional problems through research-rich education, giving you the opportunity to explore transformative global challenges in collaboration with peers from other departments and leading academics from across the School. Before registering at LSE, you will have the opportunity to select one of three themes to focus on during LSE100, each of which foregrounds a complex and pressing question facing social scientists. In 2024/25, the available themes are:

- How can we transform our climate futures?
- How can we control AI?
- How can we create a fair society?

In the 'How can we create a fair society?' theme, you will explore contrasting understandings of fairness and how these shape our responses to inequality and injustice. While food costs soar and housing prices reach record levels, the combined fortunes of billionaires increase by \$2.7 billion each day – leading to calls for reform to level the playing field.

As wealth and income inequality surge while gender and ethnicity gaps widen, we are urgently asking: is this fair? What would a fairer society look like? How do we conceptualise and measure the fairness of our political, economic and social systems? What do we owe each other, and whose responsibility is it to ensure an equitable approach?

This module explores the tensions between competing understandings of fairness and asks how we can draw on social scientific expertise to create a fair society. From across the boroughs of London to the precarious labour markets of the Global South, we will consider what fairness looks like in the 21st century and how we might achieve it.

Throughout LSE100, you will investigate the ways in which

systems are transforming and being transformed by complex questions of fairness. You will learn to use the tools and frameworks of systems thinking in order to analyse the impacts of inequalities, broaden your intellectual experience, and deepen your understanding of your own discipline as you test theories, evidence and ideas from different disciplinary perspectives.

Teaching: 7 hours and 30 minutes of seminars in the AT. 7 hours and 30 minutes of seminars in the WT.

90-minute seminars take place in alternate weeks. Students will attend an LSE100 seminar in either weeks 1, 3, 5, 7 and 9 or weeks 2, 4, 6, 8 and 10 of Autumn Term, and weeks 1, 3, 5, 7 and 9 or weeks 2, 4, 6, 8 and 10 of Winter Term.

AT: Seminar – 5 x 90min

WT: Seminar – 5 x 90min

In addition to seminars students will engage with bespoke video lectures featuring academics from across the School (approx. 20 minutes per seminar).

Formative coursework: In seminars throughout both terms, students will practice:

- 1 analysing quantitative and qualitative data
- 2 using systems thinking and systems change tools
- 3 constructing and communicating evidence-based academic arguments

Teachers will provide feedback during seminars and in post-seminar communications to groups and individuals.

During the Winter Term, groups will have the opportunity to submit and receive formative feedback on a project brief, summarising their research project. Students will also try out the tools of systems thinking and systems change that they will use in their summative group research project.

Indicative reading: The following readings are indicative of the texts students will be assigned. The total amount of reading assigned for each seminar will be a maximum of 20 pages.

- Abhijit Banerjee & Esther Duflo (2019). *Good economics for hard times: better answers to our biggest problems* (London: Allen Lane)
- Minouche Shafik (2021) *What we owe each other: a new social contract for a better society* (Princeton University Press).
- Janna Thompson (2010), "What is Intergenerational Justice?", *Future Justice*, 2010:5-20
- Paul Lewis, et al. (2011) *Reading the riots: investigating England's summer of disorder*. (London School of Economics and Political Science and The Guardian: London, UK)
- Thomas Piketty (2015). *The economics of inequality*. (Cambridge, MA: The Belknap Press of Harvard University Press)
- Kate Pickett and Richard Wilkinson (2010) *The spirit level: why equality is better for everyone* (London: Penguin)
- Michael Sandel (2010). 'Justice and the common good', in *Justice: what is the right thing to do?* (Penguin).
- Oran R. Young (2017). 'The age of complexity' in *Governing Complex Systems: Social Capital for the Anthropocene* (MIT Press)

Assessment: Coursework (50%, 1000 words) in the AT. Project (50%) in the WT.

Summative assessment will include an individual written assessment in the Autumn Term (50%) and a collaborative research project in the Winter Term (50%).

MA100

Mathematical Methods

This information is for the 2024/25 session.

Teacher responsible: Dr Ioannis Kouletsis

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Data Science, BSc in Economics with Economic History, BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available on the BSc in Econometrics and Mathematical Economics, BSc in

Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This course assumes knowledge of the elementary techniques of mathematics including calculus, as evidenced for example by a good grade in A Level Mathematics.

Course content: This is an introductory level course for those who wish to use mathematics seriously in social science, or in any other context. A range of basic mathematical concepts and methods in calculus of one and several variables and in linear algebra are covered and some applications illustrated. It is an essential pre-requisite for any mathematically orientated economics options and for many further mathematics courses. Topics covered: Matrices, reduced row echelon form, rank. Systems of linear equations, Gaussian elimination. Determinants. Vector spaces, linear independence, basis, dimension. Linear transformations, similarity. Eigenvalues. Diagonalization. Orthogonal diagonalization. Complex numbers. Vectors. Functions of several variables, derivatives, gradients, tangent hyperplanes. Optimisation including Lagrange's method. Vector-valued functions, derivatives and their manipulation. Inverse functions, local inverses and critical points, use in transformations. Integration, differential and difference equations. Some applications of the above topics.

Teaching: This course is delivered through a combination of classes, lectures, and pre-recorded videos, totalling a minimum of 60 hours across Autumn Term and Winter Term.

Formative coursework: Students will be expected to attempt a number of weekly self-study exercises (and check their answers using solutions provided) in preparation for their classes. Classwork will be submitted weekly to the appropriate class teacher for marking and feedback. In addition, Home Assignments with Exam-Style Questions will be submitted for marking and feedback at regular intervals throughout the year. Success in this paper depends on dealing with the written work as it is assigned, in a regular and systematic manner.

Indicative reading: Ken Binmore & Joan Davies, *Calculus, Concepts and Methods*; Martin Anthony & Michele Harvey, *Linear Algebra, Concepts and Methods*.

Assessment: Exam (75%, duration: 3 hours) in the spring exam period.

Exam (25%, duration: 1 hour) in the January exam period.

MA102 Half Unit

Mathematical Proof and Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Peter Allen

Availability: This course is compulsory on the BSc in Data Science. This course is available on the BSc in Actuarial Science, BSc in Data Science and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have taken, or be taking concurrently, the course Mathematical Methods (MA100), **or** the course Methods in Calculus and Linear Algebra (MA108), **or** the course Quantitative Methods (Mathematics) (MA107). Students taking MA107 should talk to the convenor before the course begins.

Course content: The course is an introduction to the use of formal definitions and proofs in mathematics, and to basic results of elementary logic, set theory and analysis. Specific topics covered are as follows: Logic, sets and functions, relations, real numbers, infimum and supremum, sequences, limits and continuity. This course is intended as preparation for a student interested in the application of mathematical concepts and proof to subjects such as computer science (in particular the analysis of algorithms)

and economics.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn Term.

Formative coursework: Students will be expected to produce 10 problem sets in the AT.

Written answers to set problems will be expected on a weekly basis.

Indicative reading: Students may wish to have one of the recommended textbooks:

- N L Biggs, *Discrete Mathematics* (2nd edn) **or**
- P J Eccles, *An Introduction to Mathematical Reasoning*, but these are not required.

Further background reading can be found in:

- R Allenby, *Numbers and Proofs*;
- M Liebeck, *A Concise Introduction to Pure Mathematics*;
- V Bryant, *Yet Another Introduction to Analysis*, *and*;
- R Bartle & D Sherbert, *Introduction to Real Analysis*.

Assessment: Exam (90%, duration: 1 hour and 30 minutes) in the spring exam period.

Continuous assessment (10%) in the AT.

MA103

Introduction to Abstract Mathematics

This information is for the 2024/25 session.

Teacher responsible: Prof Peter Allen and Prof Martin Anthony

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Data Science and BSc in Mathematics with Economics. This course is available on the BSc in Actuarial Science, BSc in Data Science and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have taken, or be taking concurrently, the course *Mathematical Methods* (MA100), **or** the course *Methods in Calculus and Linear Algebra* (MA108). In Winter Term students will need basic knowledge of Python. Students who do not have this, and who are not attending MA160P, should contact the course convenor at the beginning of AT.

Course content: The course is an introduction to the use of formal definitions and proofs in mathematics, and to basic results of elementary set theory, number theory, linear algebra, algebra and analysis. Specific topics covered are as follows: Logic, sets and functions, relations, real numbers, infimum and supremum, sequences, limits and continuity, integers, prime numbers, greatest common divisor and modular arithmetic, algorithms and running time, complex numbers, groups and vector spaces.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 80 hours across Autumn Term and Winter Term.

Formative coursework: Students will be expected to produce 20 problem sets in the AT and WT.

Written answers to set problems will be expected on a weekly basis.

Indicative reading: Students may wish to have one of the recommended textbooks: N L Biggs, *Discrete Mathematics* (2nd edn) **or** P J Eccles, *An Introduction to Mathematical Reasoning*, but these are not required. Further background reading can be found in R Allenby, *Numbers and Proofs*; M Liebeck, *A Concise Introduction to Pure Mathematics*; V Bryant, *Yet Another Introduction to Analysis*; R Bartle & D Sherbert, *Introduction to Real Analysis* and H Anton, *Elementary Linear Algebra*.

Assessment: Exam (90%, duration: 3 hours) in the spring exam period.

Continuous assessment (10%) in the AT and WT.

MA107 Half Unit

Quantitative Methods (Mathematics)

This information is for the 2024/25 session.

Teacher responsible: Dr James Ward

Availability: This course is compulsory on the BSc in Economic History with Economics, BSc in Economics and Economic History, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in International Social and Public Policy and Economics and BSc in Management. This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics and Economics and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: A-level Mathematics (or equivalent).

Students with A-level Mathematics who are confident of their mathematical skills may, regulations permitting, also consider the full unit **MA100 Mathematical Methods** or the Half Unit **MA108 Methods in Calculus and Linear Algebra**.

Course content: The aim of this course is to develop the basic mathematical tools necessary for further study in economics and related disciplines. To this end we focus on: techniques of calculus (differentiation, partial differentiation, optimisation and integration), methods of linear algebra (use of matrices), and the solution of difference and differential equations. The ideas are taught systematically, with emphasis on their application to economic problems. Examples are used throughout the course for motivation and illustration.

Specific topics are as follows: sets, functions, equations, graphs. Difference equations, sequences, limits. Differentiation, inverse functions, exponential and logarithmic functions. Partial differentiation, chain rule, homogeneous functions. Optimisation in two variables: unconstrained and constrained. Lagrange multipliers. Vector notation and convexity. Matrix notation, systems of linear equations, inverse matrices. Integration. Differential equations.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Useful background reading can be found in M Anthony & N L Biggs, *Mathematics for Economics and Finance: Methods and Modelling*, CUP, 1996. There are many other books with titles like *Mathematics for Economists* which may be of some use.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

MA108 Half Unit

Methods in Calculus and Linear Algebra

This information is for the 2024/25 session.

Teacher responsible: Ioannis Kouletsis

Availability: This course is compulsory on the BSc in Finance. This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Philosophy, Politics and Economics (with a Year Abroad). This course is not available as an outside option. This course is available to General Course students.

Course content: This is an introductory level course for those who wish to use mathematics seriously in finance or economics. A range of basic mathematical concepts and methods in calculus of one and several variables and in linear algebra are covered

and some applications illustrated. It is an essential pre-requisite for any mathematically orientated economics options and for many further mathematics courses. Topics covered: One-variable calculus including inverse functions, local inverses, critical points, optimisation, integration and differential equations, Functions of several variables including derivatives, gradients, tangent hyperplanes, directional derivatives, classification of critical points, convexity, concavity, unconstrained optimisation and Lagrange's method, Matrices including determinants, reduced row echelon form and rank, Systems of linear equations including Gaussian elimination and analysis of solution sets, Vector spaces including subspaces, linear independence, linear span, basis and dimension, Linear transformations including diagonalisation. Some applications of the above topics.

Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the AT.

This course is delivered through a combination of lectures, example sessions (workshops), and classes, totalling a minimum of 40 hours across Autumn Term.

Formative coursework: Students will be expected to attempt a number of weekly self-study exercises (and check their answers using solutions provided) in preparation for their classes. Classwork will be submitted weekly to the appropriate class teacher for marking and feedback. In addition, Home Assignments with Exam-Style Questions will be submitted for marking and feedback at regular intervals throughout the year. Success in this paper depends on dealing with the written work as it is assigned, in a regular and systematic manner.

Indicative reading: Ken Binmore & Joan Davies, *Calculus, Concepts and Methods*; Martin Anthony & Michele Harvey, *Linear Algebra, Concepts and Methods*.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

MA203 Half Unit

Real Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Konrad Swanepoel

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Data Science and BSc in Mathematics with Economics. This course is available on the BSc in Actuarial Science and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Introduction to Abstract Mathematics (MA103) or Mathematical Proof and Analysis (MA102) are essential.

Course content: This is a course in real analysis for those who have already met the basic concepts of sequences and continuity on the real line. Here we generalize these concepts to Euclidean spaces and to more general metric and normed spaces. These more general spaces are introduced at the start and are emphasized throughout the course.

Topics covered are:

- Metric and normed spaces, open and closed sets.
- Sequences in metric spaces, compactness, completeness.
- Pointwise and uniform convergence of sequences of functions.
- Continuity of real valued functions and of functions between metric spaces, uniform continuity and Lipschitz condition.
- Differentiation of real valued functions, the mean value theorem, differentiation of functions between Euclidean spaces, and partial derivatives.
- Series, including power series and series in normed spaces.
- Riemann integral and the fundamental theorem of calculus.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term, and an hour at the start of Spring Term.

Formative coursework: Written answers to set problems will be

expected on a weekly basis.

Indicative reading: A comprehensive pack of lecture notes will be provided. The following book may prove useful for some aspects of the course:

- Walter Rudin, *Principles of Mathematical Analysis*, Third edition, McGraw-Hill, 1976.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA207 Half Unit

Further Quantitative Methods (Mathematics)

This information is for the 2024/25 session.

Teacher responsible: Dr James Ward

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have previously taken **MA107 Quantitative Methods (Mathematics)**. It is not available to students who have taken **MA100 Mathematical Methods** or **MA108 Methods in Calculus and Linear Algebra** or higher level methods courses.

Course content: This is a second course in quantitative methods, following on directly from MA107 Quantitative Methods (Mathematics). This course will contain further algebra and calculus. As with the course MA107, the emphasis will be on applications in economics and finance. Topics covered: Matrix methods in portfolio analysis. Linear independence. Rank of a matrix. Eigenvalues and eigenvectors. Diagonalisation. Linear systems of recurrence equations. Markov process. Second-order recurrence equations. Macroeconomic models. Vector geometry. Gradient and directional derivative. Tangent hyperplanes and the optimal bundle. Resource allocation and Pareto efficiency. Orthogonal matrices and quadratic forms. Critical points of quadratic functions. Taylor's approximation. Optimisation of functions of two or more variables.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: M Anthony & N Biggs, *Mathematics for Economics and Finance* (Cambridge, 1996); A Ostaszewski, *Mathematics in Economics* (Blackwell, 1993).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA208 Half Unit

Optimisation Theory

This information is for the 2024/25 session.

Teacher responsible: Prof Giacomo Zambelli COL.2.06

Availability: This course is compulsory on the BSc in Mathematics with Data Science. This course is available on the BSc in Actuarial Science, BSc in Data Science, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103) are pre-requisites. Real Analysis (MA203) is desirable, and students who have not done MA203 should contact the teacher responsible.

Course content: Based on the relevant mathematical theory, the course describes various techniques of optimisation and shows

how they can be applied. More precisely, the topics covered are: Introduction and review of mathematical background. Introduction to combinatorial optimisation; shortest paths in directed graphs; algorithms and their running time. Classical results on continuous optimisation: Weierstrass's Theorem concerning continuous functions on compact sets; optimisation of differentiable functions on open sets; Lagrange's Theorem on equality constrained optimisation; Karush, Kuhn, and Tucker's Theorem on inequality constrained optimisation. Linear programming and duality theory.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Good sources of literature are R K Sundaram, *A First Course in Optimisation Theory*; N L Biggs, *Discrete Mathematics* (2nd edition). Additional notes will be made available throughout the course.

Assessment: Exam (90%, duration: 2 hours) in the spring exam period.

Continuous assessment (10%).

MA209 Half Unit Differential Equations

This information is for the 2024/25 session.

Teacher responsible: Dr Pavel Gapeev

Availability: This course is available on the BSc in Actuarial Science, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103) (or MA102) are pre-requisites. Real Analysis (MA203) and/or Further Mathematical Methods (MA212) are highly desirable, and students who have done neither MA203 nor MA212 should contact the lecturer.

Course content: The course concentrates on the theory and qualitative analysis of (ordinary) differential equations, although some solution techniques will be considered as well. Special attention will be paid to geometric concepts and the role of differential equations in the theory of dynamical systems. Specific topics covered are: First examples; illustrations of use of the computer package Maple. Existence and uniqueness of solutions. Autonomous 1 and 2 dimensional systems. Linear equations and systems: phase portraits; classification of systems in the plane; higher dimensional systems and higher order equations. Nonlinear systems in the plane: local and global behaviour; linearisation and stability at equilibrium points; Lyapunov functions; limit cycles. Control theory; linear systems; controllability.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Full notes will be handed out throughout the course. A good additional text book is D K Arrowsmith & C M Place, *Dynamical Systems - Differential Equations, Maps and Chaotic Behaviour*. Other books closely related to R Grimshaw, *Nonlinear Ordinary Differential Equations* and W A Brock & A G Malliaris, *Differential Equations, Stability and Chaos in Dynamic Economics*.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA210 Half Unit Discrete Mathematics

This information is for the 2024/25 session.

Teacher responsible: Dr Robert Simon

Availability: This course is available on the BSc in Data Science, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA103 Introduction to Abstract Mathematics, or an equivalent course giving a background in rigorous mathematics.

Course content: This is a course covering a number of concepts and techniques of discrete mathematics. Topics covered: Counting: selections; inclusion-exclusion; generating functions; recurrence relations. Graph Theory: basic concepts; walks, paths, tours and cycles; trees and forests; colourings. Coding theory: basic concepts; linear codes.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: PJ Cameron, *Combinatorics* (CUP 1994)

An alternative book is: NL Biggs, *Discrete Mathematics* (OUP 2004) Extensive notes covering the course content in full will be distributed, so you may well not need either book.

Assessment: Exam (90%, duration: 2 hours) in the spring exam period.

Continuous assessment (10%).

MA211 Half Unit Algebra and Number Theory

This information is for the 2024/25 session.

Teacher responsible: Prof Jozef Skokan

Availability: This course is available on the BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Introduction to Abstract Mathematics (MA103) and Mathematical Methods (MA100).

Course content: The aim of this course is to continue (from MA103) the study of abstract algebraic structures. There are two main strands in the course. First, we develop further the theory of groups, using permutation groups as a key example. We investigate the important concepts of normal subgroups and quotient groups. Secondly, we introduce rings, and study factorisation in rings, where we also look at some connections with number theory. Groups: Review of basic group theory; permutations and permutation groups; homomorphisms; conjugation, normal subgroups and quotient groups; the first isomorphism theorem for groups. Rings: basic properties of rings and examples (including polynomial rings, matrix rings, and number rings); subrings, ideals and ring homomorphisms; divisibility in integral domains; greatest common divisors; Euclidean rings and unique factorisation; applications to number theory; principal ideal domains.

Teaching: This course is delivered through a combination of classes and lectures, totalling a minimum of 30 hours across Michaelmas Term. This year teaching will be delivered face-to-face.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: *A Book of Abstract Algebra*, Charles C Pinter, (Dover, 2nd edition, 2010);

Introduction to Algebra, Peter J Cameron (OUP 1988);
Rings, Fields and Groups: Introduction to Abstract Algebra, Reg Allenby (Butterworth-Heinemann, 2nd edition 1991).

Assessment: Exam (90%, duration: 2 hours) in the spring exam period.

Continuous assessment (10%).

MA212

Further Mathematical Methods

This information is for the 2024/25 session.

Teacher responsible: Prof Adam Ostoja-Ostaszewski and Dr James Ward

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available on the BSc in Economics, BSc in Management and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should ideally have taken the course **Mathematical Methods** (MA100) or equivalent, entailing intermediate-level knowledge of calculus (proficiency in techniques of differentiation and integration) and linear algebra (including linear independence, eigenvalues and diagonalisation).

Course content: This course develops ideas first presented in MA100. It is divided into two halves: calculus and linear algebra. The calculus half explores how integrals may be calculated or transformed by a variety of manipulations, and how they may be applied to the solution of differential equations. This aim is achieved by studying the following topics: Limit calculations. Riemann integral. Multiple integration. Improper integrals. Manipulation of integrals. Laplace transforms. Riemann-Stieltjes integral, to a level of detail dependent on time constraints. The linear algebra half covers the following topics: Vector spaces and dimension. Linear transformations, kernel and image. Real inner products. Orthogonal matrices, and the transformations they represent. Complex matrices, diagonalisation, special types of matrix and their properties. Jordan normal form, with applications to the solutions of differential and difference equations. Singular values, and the singular values decomposition. Direct sums, orthogonal projections, least square approximations, Fourier series. Right and left inverses and generalized inverses.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn and Winter Terms.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Useful background texts:

(i) for the calculus half:

Adam Ostaszewski, *Advanced Mathematical Methods*, (Cambridge University Press 1999)

Ken Binmore and Joan Davies, *Calculus, Concepts and Methods* (Cambridge University Press 2002);

Robert C. Wrede and Murray R. Spiegel, *Advanced Calculus* (McGraw-Hill Education; 3rd edition 2010).

(ii) for the linear algebra half:

Martin Anthony and Michele Harvey, *Linear Algebra: Concepts and Methods* (Cambridge University Press 2012).

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

MA213 Half Unit

Operations Research Techniques

This information is for the 2024/25 session.

Teacher responsible: Prof Gregory Sorkin

Availability: This course is available on the BSc in Accounting and Finance, BSc in Data Science, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Mathematics, Statistics and Probability Theory to the level of the courses *Quantitative Methods (Mathematics)* (MA107) and *Quantitative Methods (Statistics)* (ST107) is required. In particular, students should have covered elementary probability theory and the Poisson process, and have an elementary knowledge of linear algebra and calculus.

Course content: An introduction to the main methodologies in Operations Research and their theoretical foundations.

Linear Optimisation: a basic introduction, discovering the solution to small problems by graphical methods, duality, sufficient conditions for optimality, solution by the simplex method, and sensitivity analysis. Various other operational research techniques such as: Shortest Paths, Critical Path Analysis, Markov Chains, Queueing Theory, Inventory Management, and Dynamic Programming.

Teaching: 20 hours of lectures and 10 hours of classes in the AT. This course is delivered through a combination of lectures and classes, totalling a minimum of 30 hours in Autumn Term.

Formative coursework: Students will be expected to produce 10 problem sets in the AT.

Students will be asked to submit weekly homework consisting of problem sets.

Indicative reading: A comprehensive pack of lecture notes will be provided.

The following books may prove useful for some aspects of the course:

- F S Hillier, G J Lieberman, *Introduction to Operations Research*, McGraw-Hill Series in Industrial Engineering and Management Science. 7th edition or later.

- W L Winston, *Operations Research*, Duxbury Press (2004).

- W L Winston, S C Albright: *Practical Management Science*, Cengage Learning. 4th edition or later.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

MA214 Half Unit

Algorithms and Data Structures

This information is for the 2024/25 session.

Teacher responsible: Prof Julia Boettcher

Availability: This course is compulsory on the BSc in Data Science and BSc in Mathematics with Data Science. This course is available on the BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed *Mathematical Proof and Analysis* (MA102) **or** *Introduction to Abstract Mathematics* (MA103).

Basic Knowledge of Python is essential, such as provided by ST101 or a pre-session provided by the Digital Skills Lab.

Course content: Introduction to the fundamental principles of data structures and algorithms and their efficient implementation. Developing algorithmic thinking. Basic toolkit for the design and analysis of algorithms: Running time, recurrence relations,

big-O notation, amortised analysis, correctness, finite induction, loop invariants. Tour of the most important data structures, fundamental algorithms, and algorithm design techniques: lists, stacks, queues, dynamic arrays, hash tables, heaps, priority queues, disjoint set unions, binary search trees, incremental and recursive algorithms, divide-and-conquer, greedy algorithms, randomisation in algorithms, sorting algorithms, algorithmic lower bounds, graph algorithms.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 30 hours across Winter Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading:

• T H Cormen, C E Leiserson, R L Rivest & C Stein, *Introduction to Algorithms*, MIT Press, 3rd edition, 2009.

Assessment: Exam (80%, duration: 2 hours) in the spring exam period.

Coursework (20%) in the WT.

MA221 Half Unit Not available in 2024/25 Further Mathematical Methods (Calculus)

This information is for the 2024/25 session.

Teacher responsible: Prof Adam Ostoja-Ostaszewski

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available on the BSc in Economics, BSc in Management and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should ideally have taken the course Mathematical Methods (MA100) or equivalent, entailing intermediate-level knowledge of calculus (proficiency in techniques of differentiation and integration)

Course content: This course develops ideas first presented in MA100. It explores how integrals may be calculated or transformed by a variety of manipulations, and how they may be applied to the solution of differential equations. This aim is achieved by studying the following topics: Limit calculations. Riemann integral. Multiple integration. Improper integrals. Manipulation of integrals. Laplace transforms. Riemann-Stieltjes integral, to a level of detail dependent on time constraints.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Useful background texts:

Adam Ostaszewski, *Advanced Mathematical Methods*, (Cambridge University Press 1999)

Ken Binmore and Joan Davies, *Calculus, Concepts and Methods* (Cambridge University Press 2002);

Robert C. Wrede and Murray R. Spiegel, *Advanced Calculus* (McGraw-Hill Education; 3rd edition 2010).

Assessment: Exam (100%, duration: 1 hour and 30 minutes) in the January exam period.

MA222 Half Unit Further Mathematical Methods (Linear Algebra)

This information is for the 2024/25 session.

Teacher responsible: Dr James Ward

Availability: This course is compulsory on the BSc in Data Science. This course is available as an outside option to students on other

programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should ideally have taken the course Mathematical Methods (MA100) or equivalent, entailing intermediate-level knowledge of linear algebra, linear independence, eigenvalues and diagonalisation.

Course content: This course develops ideas first presented in MA100. It consists of the linear algebra part of MA212, covering the following topics: Vector spaces and dimension. Linear transformations, kernel and image. Real inner products. Orthogonal matrices, and the transformations they represent. Complex matrices, diagonalisation, special types of matrix and their properties. Jordan normal form, with applications to the solutions of differential and difference equations. Singular values, and the singular values decomposition. Direct sums, orthogonal projections, least square approximations, Fourier series. Right and left inverses and generalized inverses.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours in the Winter Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: The following is a useful background text:

• Martin Anthony and Michele Harvey, *Linear Algebra: Concepts and Methods* (Cambridge University Press 2012).

Assessment: Exam (100%, duration: 1 hour and 30 minutes) in the spring exam period.

MA301 Half Unit Mathematical Game Theory

This information is for the 2024/25 session.

Teacher responsible: Dr Galit Ashkenazi-Golan COL 3.08

Availability: This course is available on the BSc in Accounting and Finance, BSc in Data Science, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business and BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Familiarity with a rigorous treatment of mathematics (through definitions, theorems and proofs) is expected. Basic knowledge of matrices and continuity as covered in Mathematical Methods (MA100) or Quantitative Methods (MA107) as well as some knowledge of probability is required.

Course content: Concepts and methods of mathematical game theory. Nim and combinatorial games. Congestion games. Games in strategic form, dominated strategies, Nash equilibrium. Cournot quantity competition. Game trees with perfect information, backward induction. Commitment. Expected utility. Mixed equilibrium. Zero-sum games, maxmin strategies. Extensive games with information sets, behaviour strategies, perfect recall. Bargaining. Geometry of equilibria.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Required text: B von Stengel, *Game Theory Basics*. Cambridge University Press, 2022.

Assessment: Exam (90%, duration: 2 hours) in the January exam period.

Continuous assessment (10%).

MA315 Half Unit Not available in 2024/25 Algebra and its Applications

This information is for the 2024/25 session.

Teacher responsible: Prof Martin Anthony

Availability: This course is available on the BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: MA103 Introduction to Abstract Mathematics and MA211 Algebra and Number Theory are essential pre-requisites.

Course content: The aim of the course is to continue the study of abstract algebraic structures and show how these structures can be used to solve concrete problems. There are three strands: Group actions; Rings, polynomials and fields; Applications, including coding and cryptography. Group actions; revision of permutation groups; orbits and stabilizers, the orbit-stabilizer theorem; applications to counting problems. Rings, polynomials and fields: revision of rings; quotient rings; polynomial rings and the Euclidean algorithm for polynomials; irreducible polynomials and factorisation of polynomials. fields; fields as quotients of polynomial rings; construction and properties of finite fields: Applications: Designs and orthogonal latin squares ; Error-correcting codes, including linear codes, cyclic codes and perfect codes; cryptography.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Lent Term. This year, apart from pre-recorded lecture videos, there will be a weekly live online session of an hour. Depending on circumstances, classes might be online.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided. No additional reading is required, but the following books are recommended for further reading.

Introduction to Algebra, Peter J Cameron (OUP 2007);

Codes, N.L. Biggs (Springer, 2008).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA316 Half Unit Graph Theory

This information is for the 2024/25 session.

Teacher responsible: Prof Konrad Swanepoel

Availability: This course is available on the BSc in Data Science, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA103 or equivalent course giving a background in rigorous mathematics.

Course content: This course examines the basic concepts and techniques of graph theory. The topics to be covered are: fundamental concepts, connectivity and matchings, colourings, extremal problems, Ramsey theory, the probabilistic method.

Teaching: 20 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures in the ST.

This course is taught through a combination of classes and lectures totalling a minimum of 30 hours in Winter Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: D. B. West, *Introduction to Graph Theory*, Prentice Hall 2001

R. Diestel, *Graph Theory*, Springer 2010.

N. L. Biggs, *Discrete Mathematics*, OUP 2004

J.A.Bondy and U.S.R. Murty, *Graph Theory with Applications*, North-Holland, 1976

B. Bollobas, *Modern Graph Theory*, Springer 1998.

Assessment: Exam (90%, duration: 2 hours) in the spring exam period.

Coursework (10%) in the WT.

MA317 Half Unit Complex Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Amol Sasane

Availability: This course is available on the BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Solid grounding in mathematics, especially analysis, in particular MA203 Real Analysis.

Course content: The course will cover the fundamental concepts and methods in complex analysis. The basic objects of study in the course will be complex differentiable functions in domains, and the far-reaching consequences of the notion complex differentiability will be dealt with in the course. The specific topics that will be covered are: the geometry of complex numbers, complex differentiation, Cauchy-Riemann equations, Cauchy's integral theorem and its consequences, Taylor and Laurent series, and harmonic functions. The core results will be illustrated with computational examples and applications.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: (1) S.D. Fisher. *Complex Variables*. Corrected reprint of the second (1990) edition, Dover Publications, Inc., Mineola, NY, 1999.

(2) J.E. Marsden and M.J. Hoffman. *Basic Complex Analysis*. Second edition, W. H. Freeman and Company, New York, 1987.

(3) D.O. Tall. *Functions of a Complex Variable*. Routledge and Kegan Paul, London, 1985

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA318 Half Unit History and Culture of Mathematics

This information is for the 2024/25 session.

Teacher responsible: Prof Jan van den Heuvel

Prof June Barrow-Green

Availability: This course is available on the BSc in Actuarial Science, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100).

General Course students may substitute an equivalent course.

Course content: This course surveys the development of mathematics from the beginning of history with an emphasis on its relation with the societies and cultures in which those developments happened. Major themes are the origins of mathematics in different cultures with a special emphasis on the development of money and finance; diversity in mathematics;

mathematics and ethics; and the place of mathematics in modern society.

Teaching: 20 hours of lectures and 11 hours of classes in the WT.

Formative coursework: Students are expected to submit written work on a weekly basis. These will be in the form of short to medium length (500-1000 words) essays.

In addition, students will be expected to contribute to discussion topics in class.

Indicative reading: Jacqueline Stedall, *History of Mathematics: A Very Short Introduction* (Oxford, 2011) is recommended for introductory (background) reading.

Additional reading for each of the sections of the course will be given in the course material. The historical parts of the course is based on source material which will be distributed to students.

Indicative further reading:

- June Barrow-Green, Jeremy Gray, and Robin Wilson, *The History of Mathematics: A Source-Based Approach*, volume 1 (AMS, 2019).
- June Barrow-Green, Jeremy Gray, and Robin Wilson, *The History of Mathematics: A Source-Based Approach*, volume 2 (AMS, 2021).
- Norman Biggs, *Quite Right: The Story of Mathematics, Measurement and Money* (Oxford, 2016).
- Mathilde Gerbelli-Gauthier, Pamela E. Harris, Michael A. Hill, Dagan Karp, and Emily Riehl (eds.), *A Conversation on Professional Norms in Mathematics* (AMS, 2021).
- George Gheverghese Joseph, *The Crest of the Peacock: Non-European Roots of Mathematics* (Princeton, 2010).
- Helaine Selin (ed.), *Mathematics Across Cultures: The History of Non-Western Mathematics* (Springer, 2000).

Assessment: Exam (40%, duration: 2 hours, reading time: 5 minutes) in the spring exam period.

Essay (45%, 2000 words) and presentation (15%) in the ST Week 1. There is a 2-hour Exam in Spring Term counting for 40% of the final mark. The Coursework counting for 60% is in the form of an Essay counting for 45% (due week 1 of Spring Term), plus a related Oral Presentation counting for 15% (which will be scheduled during the first weeks of Spring Term).

MA319 Half Unit

Partial Differential Equations

This information is for the 2024/25 session.

Teacher responsible: Simon, Robert

Availability: This course is available on the BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212) and Real Analysis (MA203).

Course content: The aim of the course is the study of partial differential equations. The focus will be on first order quasilinear equations, and second order linear equations. The method of characteristics for solving first order quasilinear equations will be discussed. The three main types of linear second order partial differential equations will be considered: parabolic (diffusion equation), elliptic (Laplace equation), and hyperbolic (wave equation) and their relation to the classification of conic sections. Techniques for solving these for various initial and boundary value problems on bounded and unbounded domains, using eigenfunction expansions (separation of variables, and elementary Fourier series), and integral transform methods (Fourier and Laplace transforms) will be treated. How to change between polar and Cartesian coordinates will be presented, especially for the solution of Laplacian and Poisson equations. Elementary distributional calculus and the notion of weak solutions will also be considered. Applications and examples will be discussed throughout the course.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across

Autumn Term.

Formative coursework: Students will be expected to produce 10 problem sets in the AT.

Written answers to set problems will be expected on a weekly basis.

Indicative reading: 1 S.J. Farlow. *Partial Differential Equations for Scientists and Engineers*. Dover, 1993.

2 J.D. Logan. *Applied Partial Differential Equations*. Second Edition. Springer, 2004.

3 W. Strauss. *Partial Differential Equations. An Introduction*. Second Edition. John Wiley, 2008.

Lecture notes will be provided.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA320 Half Unit

Mathematics of Networks

This information is for the 2024/25 session.

Teacher responsible: Prof Andrew Lewis-Pye

Availability: This course is available on the BSc in Data Science, BSc in Mathematics and Economics, BSc in Mathematics with Data Science and BSc in Mathematics with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed MA100 or MA108 and also either MA103 or MA102.

Course content: Globalisation and the growth of the internet have meant not only an increasing need to understand the way in which social and communication networks form and operate, but also an unprecedented amount of data available to aid in this analysis. The last decade has seen a coming together of multiple scientific disciplines in an effort to understand how these highly connected systems function. The aim of this course will be to give an introduction to the study of networks, requiring as little background knowledge as possible. The course will begin with an analysis of some of the fundamental properties normally observed in real world networks, such as the small world property, high degrees of clustering and power law degree distributions. After reviewing required notions from game theory, we shall then apply these techniques to an analysis of the spread of behavioural change on networks, together with cascading effects and epidemic models. The final part of the course will be concerned with specific applications to the world wide web and page ranking.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: (1) D. Easley, J. Kleinberg. *Networks, crowds and markets*, Cambridge University Press, 2010.

(2) M. Newman. *Networks: An Introduction*, Oxford University Press, 2010.

(3) *The Rise of the Network Society, The Information Age: Economy, Society and Culture*, 2010 edition, Manuel Castells.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA321 Half Unit

Measure Theoretic Probability

This information is for the 2024/25 session.

Teacher responsible: Prof Graham Brightwell

Availability: This course is available on the BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Data Science and BSc in Mathematics

with Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Real Analysis (MA203).

Course content: This is a first course in measure-theoretic probability. It covers the following topics. Abstract probability spaces: sample spaces, sigma-algebras, probability measures, examples. Borel sigma-algebra, Lebesgue measure. Random variables: distribution functions, discrete and absolutely continuous distributions, examples. Expectation and the Lebesgue integral: convergence theorems and properties. Different modes of convergence of random variables. Conditional expectation: definition, properties, examples. Changes of probability measure, Bayes' theorem.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Comprehensive lecture notes will be provided. The following books may prove useful:

D Williams, *Probability with Martingales*.

J. Jacod & P. Protter, *Probability Essentials*; A. Klenke *Probability Theory. A Comprehensive Course*

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA322 Half Unit

Mathematics of Finance and Valuation

This information is for the 2024/25 session.

Teacher responsible: Dr Arne Lokka COL.4.08

Availability: This course is available on the BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Data Science and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Measure Theoretic Probability (MA321).

Course content: This course provides mathematical tools of stochastic calculus and develops the Black-Scholes theory of financial markets. It covers the following topics. Continuous-time stochastic processes, filtrations, stopping times, martingales, examples. Brownian motion and its properties. Construction of the Ito integral: simple integrands, Ito's isometry. Ito processes, Ito's formula, stochastic differential equations, Girsanov's theorem. Black-Scholes model: self-financing portfolios, risk neutral measure, risk neutral valuation of European contingent claims, Black-Scholes formula, Black-Scholes PDE, the Greeks. PDE techniques for derivative pricing. Implied volatility, basic ideas of calibration.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided.

The following books may be useful.

T. Bjork, *Arbitrage Theory in Continuous Time*, Oxford Finance, 2004;

A. Etheridge, *A Course in Financial Calculus*, CUP, 2002;

M Baxter & A Rennie, *Financial Calculus*, CUP, 1996;

P. Wilmott, S. Howison & J. Dewynne, *The Mathematics of Financial Derivatives*, CUP, 1995;

J Hull, *Options, Futures and Other Derivatives*, 6th edition, Prentice-Hall, 2005.

D. Lamberton & B. Lapeyre, *Introduction to stochastic calculus applied to finance*, 2nd edition, Chapman & Hall, 2008.

S. E. Shreve, *Stochastic Calculus for Finance. Volume I: The Binomial Asset Pricing Model*. Springer, New York, 2004.

S. E. Shreve, *Stochastic Calculus for Finance. Volume II: Continuous-Time Models*. Springer, New York, 2004.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA323 Half Unit

Computational Methods in Financial Mathematics

This information is for the 2024/25 session.

Teacher responsible: Dr Christoph Czichowsky

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Introduction to Pricing, Hedging and Optimization (ST213).

Course content: Random number generation; the fundamentals of Monte Carlo (MC) simulation and applications in financial mathematics; variance reduction techniques for MC simulation and related issues; stochastic differential equations and their numerical solutions by means of MC simulation and their implementation.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term. This year, some of the teaching will be delivered through a combination of virtual classes and lectures delivered as online videos.

Formative coursework: Students will be expected to produce 5 problem sets and 5 other pieces of coursework in the WT.

Indicative reading: P. Glasserman, *Monte Carlo Methods in Financial Engineering*, Springer; R.U. Seydel, *Tools for Computational Finance*, Springer; S.M. Ross, *Simulation*, Academic Press (5th edition).

Assessment: Project (100%) in the ST.

The project will be a computational project due to in the week before ST starts.

MA324 Half Unit

Mathematical Modelling and Simulation

This information is for the 2024/25 session.

Teacher responsible: Dr Aled Williams

Availability: This course is available on the BSc in Accounting and Finance, BSc in Data Science, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

General Course Students should check with the course convenor if they satisfy the prerequisites.

This course cannot be taken with MA334 Dissertation in Mathematics.

Pre-requisites: Students should have knowledge of: (1) linear programming, including duality, to the level of *Operations Research Techniques* (MA213) **or** *Optimisation Theory* (MA208); **and** (2) probability theory to the level of *Quantitative Methods (Statistics)* (ST107), in particular elementary distribution theory and the Poisson Process.

Course content: The course covers some of the most prominent tools in modelling and simulation. Both deterministic and stochastic models are covered. These include mathematical optimisation, the application of sophisticated mathematical

methods to make optimal decisions, and simulation, the playing-out of real-life scenarios in a (computer-based) modelling environment.

Topics include: formulation of management problems using linear/nonlinear and network models (including linear, integer, binary and convex programming models) as well as solving these problems and analysing the solutions; modelling tricks (including how to deal with fixed costs, modelling logical conditions and semi-continuous variables); optimisation problems on graphs; quadratic optimisation; second order cone programming problems; generating discrete and continuous random variables using Monte Carlo simulation; discrete event simulation; variance reduction techniques; Markov Chain Monte Carlo methods.

The course will additionally teach students to use modelling and simulation computer packages.

If you have questions in relation to the course content feel free to contact the course convenor.

Teaching: 20 hours of lectures, 10 hours of classes and 5 hours of computer workshops in the WT.

Formative coursework: Formative assessment will be in the form of weekly homework and a mock project. Some of the weekly homework will feature questions that are similar in nature to what is expected for the assessed project. There will additionally be a formative mock project given in the second half of WT. This mock project will not contribute towards your final grade, however, it will give you a good indication of what to expect from the final assessment.

Indicative reading: Detailed lecture slides will be provided. The reading will be a combination of lecture slides and chapters from the following list of books.

Optimisation

- W L Winston, Operations Research: Applications and Algorithms, Brooks/Cole (4th ed., 1998)
- D Bertsimas and J N Tsitsiklis, Introduction to Linear Optimization, Athena Scientific (3rd ed., 1997)
- George B. Dantzig and Mukund N. Thapa, Linear Programming 2: Theory and extensions, Springer (2003)

Simulation

- S Ross, Simulation, Academic Press (5th ed., 2012)
- Joseph K. Blitzstein, Jessica Hwang, Introduction to Probability, Chapman and Hall/CRC Press (2014)

Assessment: Project (100%) in the ST.

The deliverable is a report of 15-20 pages, along with a copy of any computer code used.

MA330 Half Unit

Game Theory for Collective Decisions

This information is for the 2024/25 session.

Teacher responsible: Dr Galit Ashkenazi-Golan

Availability: This course is available on the BSc in Accounting and Finance, BSc in Data Science, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business and BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Familiarity with a rigorous treatment of mathematics (through definitions, theorems and proofs) is expected. Basic knowledge of matrices as covered in Mathematical Methods (MA100) or Quantitative Methods (MA107) as well as some knowledge of probability is required. Recommended: MA301 Mathematical Game Theory, otherwise with approval from the MA330 lecturer.

Course content: Coalitional game theory - central solution concepts and applications to economics: games with transferable utility, the Core, Shapley value, market games, social choice, stable

matching.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided, as well as references to selected papers. Further reading: M Maschler, E Solan, S Zamir: Game Theory, Cambridge University Press 2020.

Assessment: Exam (90%, duration: 2 hours) in the spring exam period.

Continuous assessment (10%).

MA333 Half Unit

Optimisation for Machine Learning

This information is for the 2024/25 session.

Teacher responsible: Dr Ahmad Abdi

Availability: This course is available on the BSc in Data Science, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should be familiar with the fundamentals of continuous optimisation, to the level in Optimisation Theory (MA208) or equivalent.

Course content: Machine learning uses tools from statistics, mathematics, and computer science for a broad range of problems in data analytics. The course introduces a range of optimisation methods and algorithms that play fundamental roles in machine learning. This is primarily a proof-based course that focuses on the underlying mathematical models and concepts. The secondary goal of the course is to demonstrate implementations of the discussed algorithms on problems from machine learning, their limitations on large training sets, and how to overcome such obstacles.

After a review of basic tools from convex analysis, Lagrangian duality, and Karush-Kuhn-Tucker conditions, the course makes a deep dive into first- and second-order optimisation methods and their convergence guarantees. The first-order methods include projected, conditional, and stochastic gradient descent. Newton's method from second-order optimisation is also covered. The course also considers online convex optimisation, and covers online gradient and multiplicative weight methods.

A key component of the course is the application of optimisation methods to machine learning. As such, we will see applications of the methods taught to linear regression, ridge and lasso regularization, logistic regression, binary classification and support vector machines, and online learning algorithms such as Perceptron and Winnow. A key learning outcome is how to solve such problems in the presence of large training sets.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 32 hours across Winter and Spring terms.

During the lectures, the focus will be on the optimisation methods and their convergence guarantees. During the classes, in addition to discussing the exercise sheets, implementations of the methods will be shown and their effectiveness on large training sets will be discussed.

Formative coursework: Students will be expected to produce 10 exercises in the WT.

Written answers to set problems will be expected on a weekly basis.

Indicative reading:

- Vishnoi, N. (2018). Algorithms for Convex Optimization (2021). Cambridge University Press.
- Boyd, S., & Vandenberghe, L. (2004). Convex optimization. Cambridge University Press.

- Nesterov, Y. (2018). Lectures on convex optimization (Vol. 137). Springer.
- B. Gärtner and M. Jaggi. Optimization for machine learning (lecture notes), 2021.
- E. Hazan. Introduction to online convex optimization (lecture notes), 2021.

Assessment: Exam (90%, duration: 2 hours) in the spring exam period.

Coursework (10%) in the WT.

A combination of the weekly exercises (set and marked in Winter Term) count as coursework.

MA334 Half Unit

Dissertation in Mathematics

This information is for the 2024/25 session.

Teacher responsible: Prof Graham Brightwell

Availability: This course is available on the BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is not available as an outside option nor to General Course students.

This course cannot be taken with MA324 Mathematical Modelling and Simulation.

Pre-requisites: Students must have completed Real Analysis (MA203).

This course requires a high degree of independence and commitment from the student, and has to be completed on time by the end of WT. The expected workload is high but also rewarding, and is completed by the end of WT (no exam). Some dissertation topics might require additional pre-requisites which will be specified in the description of the topic provided by the member of staff supervising the dissertation.

Course content: The dissertation in mathematics is an individual project that serves as an introduction to mathematical research. The student will investigate and study an area of mathematical research or apply advanced mathematical techniques to model and solve problems arising in other areas related to the student's degree programme (e.g., in finance or economics). The student will write a report on their findings and present and discuss their findings in an oral examination. The project may include some programming. The dissertation topic will normally be proposed by the Department.

Teaching: 5 hours of seminars in the AT. 4 hours of seminars in the WT.

This course is delivered through: (i) seminars totalling a minimum of 8 hours across Autumn and Winter Term, which give general and practical information, (ii) personal supervision time, which is scheduled independently with a student's academic supervisor. The seminars in AT will cover important aspects of writing a dissertation in mathematics, including: what plagiarism is and how to avoid it, the use of libraries for research, electronic research, general aspects of writing mathematics, managing a research project and the writing up process. Seminars in AT will also provide guidance on preparing a manuscript using mathematical text processing software (in particular, LaTeX). The seminars in WT will cover how to give a presentation about the findings in the dissertation. Each student will be assigned a supervisor who will monitor their progress and provide appropriate guidance throughout the AT and WT. Students will have at least three individual supervision meetings each term.

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the WT.

Indicative reading: This will depend on the topic of the dissertation. Students will be guided by their supervisor.

Assessment: Dissertation (75%) in the WT Week 10.

Presentation (25%) in the WT Week 11.

Assessment is based on the dissertation and the presentation, submitted in the form of a video.

The dissertation must be submitted by week 10 of Winter Term. The submission may include some computer code relating to

the project. The dissertation excluding the bibliography must not exceed 20 pages of A4 paper, where the dissertation is required to have 1.5 line spacing at a minimum (at most 33 lines of text/mathematical formulae per page), 11-point font and 1-inch margins all around. If the dissertation contains any computer code this should be placed in the appendix of the dissertation and does not count towards the page limit.

The presentation must be submitted by week 11 of Winter Term, in the form of a 15-minute video, covering the main findings contained in the dissertation. Students will be given support in the seminars on how to prepare, how to present, and what is expected.

MC300 Half Unit

Media, Communication and Power

This information is for the 2024/25 session.

Teacher responsible: Dr Philip Seufferling

The course will also feature guest lectures covering various topics from the field of media and communications, presented by faculty from the Department of Media and Communications.

Availability: This course is available on the BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

The course is open to final-year students from **all** undergraduate programmes, where regulations permit.

Course content: This course will offer an opportunity to develop knowledge and expertise in the media and communications industries, how they operate in contemporary societies, their social, political and cultural impact on the world around us and their role as a powerful mode of public engagement and knowledge creation. Students will be able to reflect on how industries associated with their 'home' discipline (e.g. the policy sector, the international development sector, the climate adaptation industry, the financial industry) are narrated, justified and understood as a result of the way they communicate, and the way media represent them.

Learning outcomes: By the end of this course, students will be able to:

- 1 Critically reflect on the social, political and cultural impact of media and communication industries and practices on the world around us and its role as a powerful mode of public engagement and knowledge creation.
- 2 Describe and analyse the use and impact of a variety of media and communication tools and techniques.
- 3 Synthesise and critically reflect on different aspects of their learning from the different theoretical, methodological and epistemological perspectives introduced in this course and across their studies.
- 4 Demonstrate resilience, creativity and adaptability in their approach to their studies.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

This course includes a reading week in Week 6 of the AT and the WT.

Formative coursework: Annotated bibliography, 5 sources reviewed, total of 1000 words in the WT.

Indicative reading: Hodkinson, P. (2024). Media, Culture and Society. An Introduction. 3rd edition. London: SAGE.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG104 Half Unit**Operations Management**

This information is for the 2024/25 session.

Teacher responsible: Dr Nayat Horozoglu MAR 4.11

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Accounting and Finance, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Course content: Operations management is a key function in every organisation. It is concerned with the processes that transform inputs into goods and services. This course introduces students to key concepts and techniques used in operations management, and their practical applications. The course covers a range of topics related to manufacturing and service operations such as operations strategy, sustainability, process design and analysis, supply chains, inventory management, lean operations, and quality control.

Teaching: Teaching hours in the WT will be commensurate with a usual half-unit undergraduate course.

This course includes a reading week in Week 6 of the Winter Term, in line with Departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students are expected to prepare answers to set questions on a weekly basis, and they will receive teacher and peer feedback during the classes. One formative assessment will be set in WT.

Students will also be offered additional support for their summative assessments in preparatory sessions, and they will have the opportunity to ask questions during assessment clinics.

Indicative reading: A selection of essential readings is provided below. For further details, please refer to the full reading list for the course.

- Sadun, R., Bloom, N., and Van Reenen, J. (2017). "Why do we undervalue competent management? Neither great leadership nor brilliant strategy matters without operational excellence". *Harvard Business Review*, 95(5), pp. 120–127.
- Whelan, T. and Fink, C. (2016). "The comprehensive business case for sustainability", *Harvard Business Review*, (21 October).
- Frei, F. (2006). "Breaking the trade-off between efficiency and service". *Harvard Business Review*, 88(11), pp. 93–101.
- Fisher, M. L. (1997). "What is the right supply chain for your product?" *Harvard Business Review*, 75(2), pp. 105–116.
- Lee, H. L., Padmanabhan, V., and Whang, S. (1997). "The bullwhip effect in supply chains". *Sloan Management Review*, 38(3), pp. 93–102.

Assessment: Report (70%) in the ST.

Quiz (15%) and class participation (15%) in the WT.

Students who do not attempt all quizzes will receive a mark of 0 for the missed quiz(zes) and will receive an overall average mark based on their score in the attempted quiz(zes) and a zero for the missed one(s). Students who fail to attempt any of the quizzes will be awarded a 'Zero Incomplete' for the whole course and cannot be awarded the degree until they submit the work at resit.

The participation grade will be based on contribution to weekly class discussions and engagement with lecture material. As such, lecture attendance is strongly encouraged to enable students to fully engage with lecture material.

MG105 Half Unit**Organisational Behaviour and Leadership**

This information is for the 2024/25 session.

Teacher responsible: Professor Connson Locke, MAR.4.14 and Dr Dorottya Sallai, MAR.4.10

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Accounting and Finance, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis. The lectures for this course are open for students to audit, though priority for space in the lecture theatre will go to registered students

Course content: This course introduces students to social science theories, research and application related to understanding human behaviour in the workplace. That is, this course is about the people side of business and management. Each week focuses on a different topic investigating individual, group, and organisational issues.

Topics include: personality and performance, managerial decision-making, motivating others, fairness in organisations, the multicultural workplace, power and influence, the adaptive leader, team leadership.

Teaching: Teaching hours in the AT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of AutumnTerm, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will have the opportunity to submit a 1000-word essay during AT and receive formative feedback. Students will also work in groups to answer an essay question through an in-class presentation and will receive structured feedback based on the criteria for marking essays (e.g. structure, evidence).

Indicative reading: Colquitt, J.A., LePine, J.A., & Wesson, M.J. (2009) *Organizational Behavior: Improving Performance and Commitment in the Workplace* (International edition). Yukl, G. (2009). *Leadership in Organizations*. (7th ed.). Englewood Cliffs, NJ: Prentice Hall.

Assessment: Essay (70%, 1500 words).

Class participation (15%) and quiz (15%) in the AT.

Class participation will be based on oral representations of weekly reading summaries, participation in classes, as well as engagement with lecture material. Lecture attendance is strongly encouraged to enable students to fully engage with lecture material.

Essay topics will be available at the end of AT and due before the start of WT.

Quizzes will take place throughout AT. Students who do not attempt all quizzes will receive a mark of 0 for the missed quiz(zes) and will receive an overall average mark based on their score in the attempted quiz(zes) and a zero for the missed one(s). Students who fail to attempt any quizzes will be awarded a Zero Incomplete for the whole course and cannot be awarded the degree until they submit the work at resit.

MG205**Econometrics: Theory and Applications**

This information is for the 2024/25 session.

Teacher responsible: Dr Jordi Blanes I Vidal MAR.6.08

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Accounting and Finance. This course is available as an outside option to

students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Pre-requisites: Quantitative Methods (Mathematics) (MA107) or equivalent and Quantitative Methods (Statistics) (ST107) or equivalent

Course content: Simple and Multiple Regression; Hypothesis Testing; Mechanics and Limitations of OLS; Causality; Natural, Field and Laboratory Experiments. Panel Data and Fixed Effect Models. Instrumental Variables Regression.

The main aim of this course is to provide a thorough understanding of the quantitative techniques which guide evidence-based managerial decision-making. It seeks to develop a framework in which students can examine whether the predictions of managerial, social or economic theory are supported by empirical evidence. Particular emphasis is made on (a) illustrating the many ways in which evidence is abused in the academic or managerial debate, and (b) trying to establish causality in the relationship between variables. The approach is both formal, as the course makes extensive use of econometric theorems and techniques, and solidly grounded in intuition, as it provides numerous examples of tests of real-life relations. Many of these examples will be illustrated using the STATA software package, and the students will be expected to learn the basics of data manipulation and regression running. A solid base of introductory statistics and probability (equivalent to that provided by ST107) and introductory algebra and calculus (equivalent to that provided by MA107) will be expected.

Teaching: Teaching hours will be commensurate with a usual full unit undergraduate course.

This course includes a reading week in Week 6 of each term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 problem sets in the AT and 1 problem sets in the WT. There will be two formative assessments, one in the last week of each term. During lecture time, the students will be given a shorter exam and an hour to complete it. The lecturer will then discuss the answers in the second hour of the lecture. The exams will be marked and given back to the students.

Indicative reading: The textbook for the course is:

- James H. Stock and Mark W. Watson, Introduction to Econometrics, Second Edition, Pearson, 2007.
- Two other very useful (complementary) books are:
- Christopher Dougherty, Introduction to Econometrics, Third Edition, Oxford University Press, 2007;
- Jeffrey M. Wooldridge, Introductory Econometrics - A Modern Approach, Third Edition, South-Western, 2006.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

MG206 Half Unit

Firms, Management and Competitive Advantage

This information is for the 2024/25 session.

Teacher responsible: Mr Nilesh Dattani MAR.6.14

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students

who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Pre-requisites: Students must have completed EC100 OR EC102 OR EC1A1 AND EC1B1 OR EC1A3 AND EC1B3 OR EC1A5 AND EC1B5 OR equivalent.

Course content: This is not a course on corporate strategy. It focuses on the evolution of thinking about firms and the activity of management and examines firm advantages through conceptual ideas and empirical knowledge. There will be an emphasis on analysing firms as reservoirs of resources and capabilities and topics to be covered will include distinctive capabilities of firms, organisational design, decision making in firms, organisational routines, managerial leadership and the role of ethics. Particular attention will be given to firms in technology-based industries and the management of innovation and contrasts will be made with public sector management.

Please watch the following video to find out more about this course: http://richmedia.lse.ac.uk/management/20160606_UGcourse_MG206.mp4

Teaching: Teaching hours in the WT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of Winter Term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students are expected to produce one piece of written work and to do the weekly class exercises

Indicative reading: A reading list will be available to students taking the course.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG207

Managerial Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Catherine Thomas MAR.6.29 and Dr Raquel Campos Gallego MAR.6.17

Availability: This course is compulsory on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place.

Pre-requisites: Economics A (EC100) or Economics B (EC102) or Microeconomics I (EC1A3) is a pre-requisite. In addition, Quantitative Methods (Mathematics) (MA107) or equivalent is also a pre-requisite. This course cannot be combined with Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or Microeconomics II (EC2A1 and EC2A3).

Course content: The objective of the course is to provide students with insights from economic theory which are relevant to applications in managerial decision making. The emphasis is on applying microeconomics ideas to solve problems. Topics covered include consumer theory, production, market structure, monopoly, oligopoly, pricing, game theory, bargaining, auctions, and asymmetric information.

Teaching: Teaching hours will be commensurate with a usual full unit undergraduate course.

This course includes a reading week in Week 6 of each term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students are expected to prepare

answers to set problems on a weekly basis. Some of this work will be assessed. Assiduous preparation for the weekly tutorials is essential to achieve a good exam performance.

Indicative reading: No textbook covers the whole course but Hal R Varian, *Intermediate Microeconomics with Calculus* (International Student Edition) is the best textbook to use for the course. In addition, students are advised to refer to T C Bergstrom & H R Varian, *Workouts in Intermediate Microeconomics* (1990), which contains practice problems.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

MG209 Half Unit

E-business

This information is for the 2024/25 session.

Teacher responsible: Dr Magda Hercheui

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Course content: This course presents an analysis of the management, economics and information systems theories and practices in online business. This is a management information systems course and not a technical course. It is mainly directed at undergraduate students. It focuses on the study of the impact of digital technologies on business strategies and market configurations. Internet-based systems offer new means to operate businesses and to compete in the global marketplace and it is important for future executives and entrepreneurs to understand the economic and managerial implications of these transformations. Students will gain a good understanding of why and how successful companies are taking advantage of e-business, as well as an understanding of the main challenges and risks associated with different e-business models and strategies in a fast changing technological and business environment.

The course is structured into four main sections:

1. Strategic, technological, and economic foundations of e-business
2. E-business and its configurations: B2C and B2B
3. E-business: strategic and organisational challenges
4. Implementation of e-business strategies'

Teaching: Teaching hours in the WT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of Winter Term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will complete a formative assessment where formative feedback will be provided.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Group project (30%) and class participation (20%) in the WT.

MG210 Half Unit Not available in 2024/25

Corporate Social Responsibility and International Labour Standards

This information is for the 2024/25 session.

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Pre-requisites: Any social science background

Course content: Corporate Social Responsibility (CSR) is becoming an expected element of corporate strategy. This course critically evaluates CSR, focusing on firms' attempts to prevent labour standards violations in their supply chains. We begin by analysing the rise of CSR, setting it in the context of global value chains, international labour standards, and emerging private forms of regulation. We then analyse topics such as: the impact of CSR on corporate financial performance; whether CSR is an effective means of raising labour standards; theories of CSR; how to embed CSR within the firm and comparative CSR. The course includes plenty of examples of how large firms are dealing with the ethical challenges posed by global supply chains. The course is interdisciplinary, and students are encouraged to bring insights from their "home" discipline so that seminars become a mutual learning experience. The course will include one lecture from a CSR professional.

Teaching: Teaching hours in the WT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of Winter Term, in

line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Kaplan, S. (2019) *The 360° Corporation: From Stakeholder Trade-offs to Transformation*. Stanford: Stanford University Press;

Kuruvilla, S. (2021) *Private Regulation of Labor Practices in Global Supply Chains: Problems, Progress and Prospects*, Ithaca and London: ILR Press;

Locke, R. (2013) *The Promise and Limits of Private Power: Promoting Labor Standards in a Global Economy*, Cambridge: Cambridge University Press.

Vogel, D. (2005) *The Market For Virtue: The Potential and Limits of Corporate Social Responsibility*, Washington D.C.: Brookings Institution Press.

Assessment: Exam (40%, duration: 1 hour and 15 minutes) in the spring exam period.

Essay (60%, 2000 words) in the ST.

MG212 Half Unit Marketing

This information is for the 2024/25 session.

Teacher responsible: Dr Heather Kappes MAR.6.21

Availability: This course is available on the BSc in Accounting and Finance, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped).

Course content: The course will introduce basic marketing concepts including customer behaviour; segmentation, targeting and positioning; product management and diffusion; pricing, placement and promotion; and marketing relationships.

Teaching: 20 hours of lectures and 10 hours of classes in the WT. Teaching hours in the WT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of Winter Term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Formative feedback will be provided on group presentations of a project that forms the basis for the individual submissions.

Indicative reading: Indicative readings:

Kotler, P. and Armstrong, G. (2010) *Principles of Marketing*, Pearson, New Jersey.

Kotler and Keller (2009) *Marketing Management*, Pearson PrenticeHall.

Lambin, J-J, Chumpitaz, R. and Schuiling, S. (2007) *Market Driven Management: Strategic and Operational Marketing*, Palgrave Macmillan.

Assessment: Report (85%) and class participation (15%) in the WT. Individual submission of a marketing report, informed by group work completed during the term.

MG213 Half Unit Information Systems

This information is for the 2024/25 session.

Teacher responsible: Prof Edgar Whitley (MAR.4.32)

Availability: This course is available on the BSc in Accounting and Finance, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Course content: The course will cover the role of data, information, knowledge and artificial intelligence within management; the evolution of digital management practices; digital business strategy; information systems development and organisational change; data privacy and security information systems outsourcing; and IT infrastructure including cloud computing, and digital platforms.

Teaching: 20 hours of lectures and 10 hours of classes in the AT. Teaching hours in the AT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of Autumn Term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will present draft essay plans for peer review in the AT and have an opportunity for formative work on elements of the group project.

Indicative reading: Indicative readings:

Beynon-Davies, P. (2013). *Business Information Systems*, Palgrave, London.

Bharadwaj, A., El Sawy, O. A., Pavlou, P. A., and Venkatraman, N. (2013). *Digital Business Strategy: Toward a Next Generation of Insights*, MIS Quarterly 37(2), 471–482.

Galliers, R. and Leidner, D. (2009) *Strategic Information Management*. Routledge, London.

Laudon, K and Laudon, J (2013) *Management Information Systems*, Pearson, London.

Sarker, S., Chatterjee, S., Xiao, X., and Elbanna, A. (2019). *The Sociotechnical Axis of Cohesion for the IS Discipline: Its Historical Legacy and its Continued Relevance*, MIS Quarterly 43(3), 695–719.

Willcocks, L. P., Venters, W., and Whitley, E. A. (2014). *Moving to the Cloud Corporation: How to face the challenges and harness the potential of cloud computing*, Palgrave Basingstoke.

Assessment: Essay (50%) in the period between AT and WT.

Group project (40%) and reflective learning report (10%) in the AT.

The reflective learning report will be individual reflections on group working.

MG214 Half Unit Human Resource Management

This information is for the 2024/25 session.

Teacher responsible: Dr Jeffrey Thomas MAR.5.14

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Pre-requisites: Students must have completed Organisational

Behaviour and Leadership (MG105) or equivalent.

Course content: This course is designed to provide insights into Human Resource Management, especially in a way that appeals to students of management who are quite international in their orientation. After setting the global scene of labour markets, Human Resources and organisational change in the twenty-first century, it then proceeds to look at the management of people in different national contexts. The focus then shifts down to the employment relationship – why firms hire workers and how they strategically manage them. Once workers are hired as employees, we begin to explore how the latter might be motivated and rewarded, and how the design of policies varies across organisations of different types. To help us with this, we usefully draw on key ideas and models from the field of organisational studies that are also a prelude to thinking through the implications for HRM in environments where innovation and technology are prone to rapid change. This then allows us to gain an overview of the potential contribution that HRM can make to the dynamic capabilities of firms generally.

Topic outline

1. Motivation and incentives (theories from Economics and Psychology)
2. The macro-context (enterprise governance, employer networks, skill and training, and employment relations)
3. Stakeholders in firms and employee management (Corporate Social Responsibility and HR)
4. Cross-cultural management of employees: the complexities and opportunities
5. Firm strategy and international HR alignment
6. Identification of talent gap and solutions (expatriation and repatriation)

7. Global Talent Management (selection, training and development, performance appraisal and management, compensation)
- 8.. Managing HR in cross-border alliances, in particular international Mergers and Acquisitions and Joint Ventures
9. Negotiations in relation to human resource management

Teaching: Teaching hours in the AT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of Autumn Term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: The formative assessment will help students to prepare for the summative assessment.

Indicative reading:

- Caligiuri, P. M. (2006). Chapter 9 Performance management in a cross-national context. In Bennett, W., Jr., Lance, C., & Woehr, D. (Eds.). *Performance measurement: Current perspectives and future challenges*. Mahwah, NJ: Erlbaum.
- Cappelli, P. (2015). Why We Hate HR and What HR Can Do About It. *Harvard Business Review*, July – August.
- Giangreco, A., Sebastiano, A., & Peccei, R. (2009). Trainees' reactions to training: an analysis of the factors affecting overall satisfaction with training. *The International Journal of Human Resource Management*, 20(1), 96-111.
- Randall S Schuler, Ibraiz Tarique, Susan E Jackson (2004), *Managing Human Resources in Cross-Border Alliances*, in (ed.) 3 (Advances in Mergers & Acquisitions, Volume 3), Emerald Group Publishing Limited, pp.103-129.
- Briscoe, D., Schuler, Randall S, & Tarique, Ibraiz. (2016). Chapter 6 International Employment Law, Labor Standards, and Ethics. In (Eds.) *International human resource management: Policies and practices for multinational enterprises* (5th ed.). New York, NY: Routledge.
- Brown, M. P., Sturnam, M. C., & Simmering, M. J. (2003). Compensation Policy and Organizational Performance: The Efficiency, Operational, and Financial Implications of Pay Levels and Pay Structure. *The Academy of Management Journal*, 46, 752-762.
- Lewicki, R.J., Barry, B. and Saunders, D.M.2010. *Negotiation*. New

York: McGraw-Hill.

- Chapter 1 – The Nature of Negotiation, pp. 1-31.

The course also draws on additional articles from a variety of international journals in the field e.g. *The International Journal of Human Resource Management*, *British Journal of Industrial Relations*, *Harvard Business Review*. Students will also analyse multiple cases from Insead and Harvard Business Publishing.

Assessment: Essay (50%) in the period between AT and WT.

Class participation (15%) and group presentation (35%) in the AT.

Participation Grade (15%), The participation grade is based on **presence and quality of participation** in classes and engagement with lecture material. Absence without reason in classes will influence the participation grade and lecture attendance is strongly encouraged as students are expected to demonstrate their engagement with lecture material during classes.

The Group project presentation (35%) will be group work.

Students will have the opportunity to form their own project groups within their allocated class, but the course teaching team will retain the right to make changes to group membership where necessary. Peer review will be conducted and will provide context for the marker of the group projects, while allowing students to develop the skills of peer review.

Individual Final Project: Multi-media Essay (50%) in the period between AT and WT. The essay will be a "multi-media" essay.

It requires a written text essay, complimented by another form of media: either a video, or an audio interview, or a graphic - illustrating the effects of HR theory and research on the practice of each students' target job after graduation.

MG228 Half Unit Not available in 2024/25 Managing the Stone-Age Brain

This information is for the 2024/25 session.

Teacher responsible: Dr Satoshi Kanazawa MAR.6.15

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not capped, any student that requests a place will be given one.

Course content: The course will introduce Management students to the new science of evolutionary psychology and explore the biological and evolutionary foundations of human behaviour. In the first few weeks, various critiques of and competing perspectives on evolutionary psychology, with regard especially to the relative importance of biological/evolutionary vs. social/cultural determinants of human behaviour and its sex differences will be discussed and debated. In later weeks, an evolutionary perspective will be applied to various topics in management such as organizational behaviour, occupational choice, productivity, and status hierarchy. The study of business and management is currently dominated by economic perspectives, supplemented by sociological and social psychological perspectives, in American business schools. The course will provide a necessary corrective to the dominance of economics perspectives in the study of business and management by providing biological and evolutionary perspectives and thereby throwing a new light on the old problems (and finding potential solutions for them) in organizations and organizational behaviour. The course will provide evolutionary and biological perspectives on management and organizational behaviour. It will introduce the students to the following topics: Principles of evolution; Principles of evolutionary psychology; Sex differences in preferences, values, cognition, emotions, and behaviour; Physical attractiveness; General intelligence; Evolutionary constraints on human behaviour and their relevance to organizational behaviour.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures in the ST.

Teaching hours in the WT will be commensurate with a usual Half

unit undergraduate course. This course includes a reading week in Week 6 of Winter Term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Each student will give a class presentation on the week's readings and their presentation will be evaluated by the course instructor and the feedback will be given to the student within one week.

Indicative reading: Buller, David J. 2005. *Adapting Minds: Evolutionary Psychology and the Persistent Quest for Human Nature*. Cambridge: MIT Press. [The most comprehensive book-length critique of modern evolutionary psychology to date] Saad, Gad. (Editor.) 2011. *Evolutionary Psychology in the Business Sciences*. New York: Springer.

Nicholson, Nigel. 2000. *Managing the Human Animal*. New York: Thompson Texere.

Miller, Geoffrey. 2009. *Spent: Sex, Evolution, and Consumer Behavior*. New York: Viking.

Miller, Alan S. and Satoshi Kanazawa. 2007. *Why Beautiful People Have More Daughters*. New York: Penguin.

Kanazawa, Satoshi. 2012. *The Intelligence Paradox: Why the Intelligent Choice Isn't Always the Smart One*. New York: Wiley.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG301

Strategy

This information is for the 2024/25 session.

Teacher responsible: Prof Ricardo Alonso MAR.6.30

Availability: This course is compulsory on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Pre-requisites: Students should have completed (i) Economics A (EC100) or Economics B (EC102) or Microeconomics I (EC1A1/EC1A3) in combination with Macroeconomics I (EC1B1/EC1B3), (ii) Quantitative Methods (Mathematics) (MA107) or equivalent and Quantitative Methods (Statistics) (ST107) or equivalent, and (iii) Economics for Management (MG207) or Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or Microeconomics II (EC2A1 and EC2A3).

Course content: The first half of the course studies how firms compete with each other. More specifically, we will study strategic situations (competition and rivalry, competitive advantage (sources and sustainability), entry and entry deterrence, product differentiation, the role of information in markets, etc.) and formulate decision models of these situations. While the modelling and predictions are based on game theory, we will contrast our findings to real life games according to the growing empirical evidence.

The second half of the course studies how firms organize and the challenges they face in doing so. More specifically, we study the way managers interact with the different constituencies inside the firm- workers, board members, and other managers- and how those interactions shape the actual design of organizations. It presents, again with a heavy emphasis on the evidence, how the need to motivate organizational members and to coordinate their actions shape the provision of incentives, the allocation of authority, the ownership structure, acquisition and diffusion of knowledge, and patterns of communication.

Beyond the emphasis on the content of the course, the course also aims to be a course where students learn to think critically

and analytically. Students will learn to identify trade-offs in how firms behave and the way they organize themselves, and critically evaluate the sources of those trade-offs by appealing to simple models of individual behaviors. Students will learn to read the primary literature, discuss papers in class, interpret the evidence etc. Students will learn to ask questions such as: What is the evidence? What evidence would convince me of the opposite hypothesis?

Teaching: Teaching hours will be commensurate with a usual full unit undergraduate course.

This course includes a reading week in Week 6 of each term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Formative work such as mock exam questions and self-assessment will be set.

Indicative reading: The basic readings for the course will be the lecture notes written by Dr. Alonso. These lecture notes can be complemented with the following additional readings:

- Thinking Strategically: Competitive Edge in Business, Politics and Everyday Life, WW Norton, 1993, by Avinash Dixit and Barry Nalebuff
- The Art of Strategy, WW Norton, 2008, by Avinash Dixit and Barry Nalebuff.
- Games of Strategy (WW Norton, 3rd edition, 2009) by Avinash Dixit, Susan Skeath and David Reiley.
- Economics of Strategy (5th Edition) David Besanko, David Dranove, Mark Shanley, Scott Schaefer. (2009)
- An Introduction to Game Theory (Oxford, 2003) by Martin J. Osborne
- Strategic Management, Garth Saloner, Andrea Shepard and Joel Podolny, Wiley, 2000
- The Modern Firm: Organizational Design for Performance and Growth, John Roberts 2007.
- Build, Borrow, or Buy: Solving the Growth Dilemma (Harvard Business Press 2012) Laurence Capron and Will Mitchell

Assessment: Exam (70%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Continuous assessment (30%) in the AT and WT.

Two in-lecture multiple choice quizzes (week 10 of the AT and week 8 of the WT). For the continuous assessment, students are required to attempt both in-lesson assessments.

Students who attempt less than two in-lecture assessments will receive a mark of 0 for the missed assessment and will receive an overall average mark based on their score in the attempted assessment and a zero for the missed assessment. Students who fail to attempt any in-lecture assessments (0 out of 2), will be awarded a Zero Incomplete for the whole course and cannot be awarded the degree until they submit the work at resit.

MG302 Half Unit

Topics in Management Research

This information is for the 2024/25 session.

Teacher responsible: Prof Diane Reyniers MAR.6.07

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Pre-requisites: Third year only.

Course content: This course addresses various interesting topics which will be used to encourage creative and logical thinking, structuring of clear arguments and critical assessment of

evidence. The focus is on discussion and interpretation of findings rather than statistical or econometric techniques.

The intellectual backbone of the course is applied and empirical economics (including behavioural economics) and finance but, wherever appropriate contributions from the psychology, sociology and management literature will be discussed. We will mainly deal with issues which are amenable to rigorous empirical investigation. The course is designed around a set of empirical research papers. Examples of questions considered are whether pain killers are more effective when they are expensive, whether creative people cheat more, whether people overvalue their own ideas. The main objective of the course is to enable students to comprehend and critically assess the management literature, to evaluate statements in terms of evidence and to detect false reasoning or logic. Students will gain confidence in expressing their own ideas.

Topics vary each year (based on student feedback), but examples are self-stereotyping, negotiation and gender, grit, wages in finance, optimism and entrepreneurship.

Please watch the following video to find out more about this course:

<https://echo360.org.uk/media/b724a1cb-48eb-4198-abdb-786be177f6fd/public>

Teaching: 10 hours of lectures and 10 hours of classes in the AT. Teaching hours in the AT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of Autumn Term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: A take-home mock exam paper.

Indicative reading: A reading list will be available on Moodle.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

MG303 Half Unit

International Business Strategy and Emerging Markets

This information is for the 2024/25 session.

Teacher responsible: Dr Christine Cote MAR.5.25

Availability: This course is available on the BSc in Accounting and Finance, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

This course is not available to students with timetable clashes due to Harvard style of teaching.

Pre-requisites: All students, including BSc Management students, must be in their 3rd year and should have taken Economics A (EC100) or Economics B (EC102) or Microeconomics I (EC1A3) in combination with Macroeconomics I (EC1B3), or equivalent. This course cannot be taken with MG307 International Context of Management.

Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. It will combine the development of conceptual frameworks primarily through the lectures with the analysis of key cases in the classes.

Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment.

In the past few decades their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The "new institutional economics" has recently developed as a field to understand the impact of variation in institutions on economies' performance.

This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concepts such as the resource based view. We will provide an analysis of economic performance and growth in emerging markets building on the new institutional economics and working with a large variety of datasets and sources. The course will then turn to key topics. These will include the interaction between international trade and investment in the internationalisation choices of MNEs; the emergence of global supply chains; the determinants of FDI; the effects of FDI on the host economy; entry mode choices; measures of institutional and cultural distance; and the growing importance of multinationals from emerging markets.

Students will work with case material as well as the required reading, and the group project will comprise a case write up, which will be presented prior to submission in class for comment and discussion.

Teaching: 30 hours of lectures in the WT.

This course includes a reading week in Week 6 of Winter Term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will undertake a formative essay (1500 words) for which feedback will be provided in preparation for the final summative coursework.

Indicative reading:

Assessment: Essay (50%) in the ST.

Project (40%) and class participation (10%) in the WT.

WT group project will be a case based project which will consist of a group presentation.

MG305 Half Unit

Innovation and Technology Management

This information is for the 2024/25 session.

Teacher responsible: Dr Jonathan Liebenau MAR.5.30

Availability: This course is available on the BSc in Accounting and Finance, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Course content: The focus of this course is on how innovative technologies are managed and their consequences. It includes technological innovation in areas such as telecoms, hi tech industries, pharmaceuticals, biotechnology, space technology, financial technologies. Aspects covered are how new industries are created, how existing industries can be transformed by new technologies, linkages between technological development and the creation of wealth, and implementation success and failure of technological systems. Topics include: technology and entrepreneurship, technology strategy, R&D management, patents and intellectual property, disruptive, radical and incremental innovation, technology policy. Economic, systems, managerial and sociological approaches will be compared using a variety of case studies.

Teaching: Teaching hours in the AT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of Autumn Term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Classes are based around reading and discussing selected journal articles and case studies from the course study pack on Moodle. Formative feedback is provided on class participation.

In addition, students will present an essay plan in preparation for the final case-based essay, on which formative feedback will be provided.

Indicative reading: J Howells, *The Management of Innovation and Technology*, Sage, 2005;

J Fagerberg, D.C. Mowery, and R.R. Nelson (Eds.), *The Oxford handbook of innovation* (Series Oxford Handbooks in Business and Management), Oxford University Press, 2006;

J McLaughlin, P Rosen, D Skinner & A Webster, *Valuing Technology: organisations, culture and change*, Routledge, London and New York, 1999;

Assessment: Essay (90%, 5000 words) in January.

In-class assessment (10%) in the AT.

Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with MG303 International Business Strategy and Emerging Markets.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Pre-requisites: This course cannot be taken with MG303 International Business Strategy and Emerging Markets.

Course content: The course aims to apply social science theory to the analysis of the conduct and management of transnational activities; to critically appraise concepts such as globalisation, regionalisation, national competitiveness, transnationality of firms, etc. in the context of international management structures and processes; to delineate the international political, economic, social and legal structures and environments within which the activity of management takes place. The topics to be covered will include: the nature of the contemporary global political economy; the globalisation of business, finance and trade in goods and services; Global competition; the transnational corporation in the global economy; the tension between globalisation and regionalisation; the international trading order; the international monetary regime; the impact of culture on global business; the changing position of the state in the global economy; the new diplomacy of states and firms.

Teaching: Teaching hours in the AT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of Autumn Term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students are expected to produce one piece of written work and do the weekly class exercises.

Indicative reading: M. Peng & K. Meyer, *International Business* (4th edn), Cengage (2023);

R.W. Griffin & M.W. Pustay, *International Business: A Managerial Perspective* (9th edn), Pearson (2019);

O. Shenkar, Y. Luo & T. Chi, *International Business* (4th edn), Routledge (2021)

Assessment: Essay (100%, 3000 words) in the WT.

MG308 Half Unit

Simulations for Managerial Decisions

This information is for the 2024/25 session.

Teacher responsible: Dr Nayat Horozoglu

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Pre-requisites: ST107 Quantitative Methods (Statistics) or equivalent. A core understanding of and practical experience with Microsoft Excel are required.

Course content: This course introduces students to concepts, techniques and applied aspects of the development and analysis of simulation models. Students will not only gain insights into simulation modelling, which is a widely used technique in real-life decision-making, but also develop valuable graduate skills such as communicating complex technical information to expert and non-expert audiences.

The course covers two main approaches for modelling problems bound by uncertainty (stochastic behaviour): Monte Carlo Simulations and Discrete Event Simulations. Topics of the course

MG307 Half Unit

International Context of Management

This information is for the 2024/25 session.

Teacher responsible: Mr Nilesh Dattani MAR.6.14

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full

include structuring managerial problems for simulations, building and running simulation models using specialist software, and decision-making using simulation outputs.

Teaching: Teaching hours in the WT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of the Winter Term, in line with Departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: One formative assessment will be set in WT.

Indicative reading: The extensive lecture notes provided are the essential reading for this course. These lecture notes can be complemented with the following background readings:

- Banks, J., Carson, J., Nelson, B., & Nicol, D. (2013). Discrete-event system simulation. Harlow: Pearson Education.
- Rees, M. (2015). Business risk and simulation modelling in practice: Using Excel, VBA and @RISK. New York: John Wiley & Sons.
- Robinson, S. (2014). Simulation: The practice of model development and use (2nd ed.). London: Bloomsbury Publishing.
- Ross, S. M. (2012). Simulation (5th ed.). San Diego: Elsevier Science & Technology.

Assessment: Project (100%) in the ST.

MG310 Half Unit Not available in 2024/25

Strategic Decision Making

This information is for the 2024/25 session.

Teacher responsible: Dr Valentina Ferretti

Availability: This course is available on the BSc in Management, BSc in Psychological and Behavioural Science, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Pre-requisites: Elementary statistical and mathematical concepts, as well as a true curiosity towards the fascinating field of decision making and a strong interest in rebooting your analytical “decision-ware”.

As this course embraces the two key stages of the decision making process, i.e. the initial divergent and creative stage and the subsequent convergent and analytical one, please, note that it is important to feel comfortable with interdisciplinary research, as well as with the use and discussion of both qualitative and quantitative strategies for successful decisions. Group work will also be a key component of the course.

Course content: This course is about making successful strategic decisions and building decision resilience during challenging times, in both the professional domain and the personal one. In this era of unprecedented uncertainty, learning how to make decisions against the backdrop of external factors that we cannot control or predict represents a fundamental skill for any sector of society and business. Knowledge of what it takes to develop a good decision making process is thus an invaluable part of everyone's toolbox, particularly for rising stars who will be in positions of leadership in the future. This course introduces students to the key concept of decision quality and to cutting edge strategies and tools to integrate data and judgments and develop winning strategies. This course's lectures will entail a deep dive into the progressive stages of a strategic decision making process, with interactive experiments and puzzles to develop bias awareness and decision analysis expertise. Seminars will consist of interactive sessions, enabling you to master an actionable decision framework and

become confident decision analysts. The learning outcomes of this course are twofold. First, to discover the key decision traps when framing, structuring and modelling decisions and why they are dangerous. Second, to understand and master cutting edge, replicable and versatile solutions for framing, structuring, modelling and communicating better decisions.

Teaching: Teaching hours will be commensurate with a usual Half Unit undergraduate course but note that teaching may take a different format and/or structure in 2021/22.

Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Two formative assignments:

1. Group project plan presentation (i.e. the selected decision context, due in week 7)
2. Group project pitch of the key decision analysis' impacts observed as a result of the strategic decision making process developed as a group across classes 2, 3, 4, and 6. Students will present and discuss the key impacts of their decision making process (e.g. discovery of new objectives that were not in their original mental models, recommendation of a different solution to the decision as a result of the used elicitation protocols, etc.) and receive real time feedback, from both their peers and the lecturer. Feedback will be provided following specific criteria (i.e. the same criteria that will be used to evaluate the individual technical account of the group project's impacts that is summative assignment n.2) and by completing a set of both descriptive and evaluative tasks (e.g. indicating the strongest part of the presentation, as well as parts that need revision, etc.).

The above two formative assignments have been designed to prepare the students for the following two summative works: (i) the group project presentation of the chosen decision making problem/opportunity and (ii) the individual technical account of one key impact observed in the group project.

The topic of the group project (i.e. a decision making problem or opportunity to be modelled and analysed by means of Multicriteria Analysis) can be a personal decision (e.g. which job offer to accept when confronted with multiple ones, which master to apply for, etc.) or a real world case (e.g. how to reduce plastic consumption in the LSE new coffee place). Students will have to collect data, develop and apply a quantitative model, interpret the results and refer to the key scientific literature for the main steps in the development of the model. Students are allowed to work in groups of maximum 4/5 people. This summative assignment will help students develop their strategic problem solving skills by demonstrating their ability to apply both qualitative and quantitative tools to frame, structure and model a decision, interpret its results, and develop sound recommendations.

In the individual technical account of the group project's impacts (max 1500 words), students will have to report on the developed process by focusing on the observed key impacts of the used tools. This second summative assignment will help students develop their critical thinking skills.

Indicative reading: Belton, V. and Stewart, T. (2002) Multiple Criteria Decision Analysis. London, Kluwer.

Keeney, R.L. (1992) Value-Focused Thinking: A Path to Creative Decision-making. Cambridge: Harvard Univ. Press. HD30.23 K21 (Course Collection).

G.S. Parnell et al. (2013) Handbook of Decision Analysis. Hoboken, Wiley.

Spetzler C., Winter H., Meyer J. 2016. Decision quality: value creation from better business decisions. Wiley.

Assessment: Group project (50%) in the WT Week 11.

Technical report (50%) in the ST Week 1.

The individual technical report (1500 words maximum) will provide an explanation and insightful discussion of one key impact observed in the developed group decision making process.

MG311 Half Unit**Foundations of Behavioural Decision Science****This information is for the 2024/25 session.****Teacher responsible:** Dr Luc Schneider**Availability:** This course is available on the BSc in Management, BSc in Psychological and Behavioural Science, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Pre-requisites: It is an advantage to have taken an introductory social science course in one of these fields: economics, management, psychology or sociology.

It is important to be comfortable with multi-disciplinary research and group work.

Note that the groupwork in this course will require you to meet with your groupmates for several hours every week, outside of class. You will NOT be able to split the work between groupmates to work on it by yourself, so flexibility of schedule and a strong commitment to the group project is required.

Course content: This course introduces students to the foundations of Behavioural Decision Science: the science that explains and predicts how humans make decisions (the decision 'process') and how well (the decision 'outcome'). The course will explore the different stages of the decision-making process identifying factors important in understanding our decision making. Students will be introduced to the way in which we make judgements, understand the rich and diverse influences of risk, uncertainty and affect (emotions), and investigate strategies for decision making. Throughout the course, students will be introduced to many cognitive biases and aspects of context which influence how/what judgements and decisions we make. In the final portion of the course, students will get the opportunity to see examples of how information/choice designers are seeking to help or influence decision makers or teach skills to help the public or professionals to make better decisions themselves. Many of these concepts and techniques can, and have been applied across personal, professional and policy situations – and the course will provide opportunities to learn about and discuss such applications. Importantly, across both parts of the course, discussion of core concepts and examples will be woven together with new advances and applications in the field, particularly those within the course leader's field of expertise.

The course is entirely seminar-based and will combine within the sessions - traditional lecture-style teaching of concepts with hands-on demonstrations of the concepts in action, and in-depth class discussions of the week's material. Examples used within the sessions will be drawn from across a range of different domains which could include managerial, policy, health, emergency response, law, consumer, and even personal domains. From week 4 onwards, seminars will be dedicated to an intense, immersive group project, in which students will aid one of their peers with a real, high-stakes decision. This group project will provide students with the practical experience to implement the concepts and frameworks from the course in their own personal and professional strategic decisions beyond the course.

By the end of this course, students will have an understanding of the key concepts in Behavioural Decision Science, be able to evaluate the strengths and weaknesses of human decision making, and be able to recognise and adapt different techniques to improve decision making. The summative will provide an opportunity to show the skills and knowledge you have learnt throughout the course and consists of two parts which are described below.

Teaching: Teaching hours in the WT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6, in line with departmental policy.

*In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.***Formative coursework:** 1. Thought piece (Week 4): Students will write a short thought piece (500 words) on a topic of their choice from weeks 1 to 3, placing it in a context that goes beyond the content covered in lectures. This exercise may later be used as the basis for the summative essay.

2. Review of anonymous essays (Week 11): Students will play the role of the "examiner" and using anonymous examples of summative assessments (submitted by students from a previous year) explore the different evaluation criteria which are used in this course. This exercise will help you improve your summative assessment.

Indicative reading:

- Bazerman, M. (2017) Judgment in Managerial Decision Making. New York: Wiley. 8th edition;
- Hastie, R., and Dawes, R.M. (2001). Rational Choice in an Uncertain World. Sage Publications, Thousand Oaks;
- Kahneman, D. (2011) Thinking Fast and Slow. London: Allen Lane;
- Russo, J. E. & Schoemaker, P. J. H. (2002) Winning decisions: How to make the right decision the first time, Piatkus Publ. Limited.

Assessment: Coursework (55%, 2000 words) in the ST.

Group presentation (30%) in the WT Week 10.

Class participation (15%) in the WT.

Presentation: Starting in week 4, as a group, you will be analysing a real decision by one of your group members and apply the practical insights from the course to improve this decision. Each week, you will work on a different step of the Decision-Making process, and you will fill in a Decision Canvas (template will be provided). You will then present your work in week 10. For this part of the summative, you will be marked on the delivery of your presentation, as well as on the content of the slides that you will have submitted on Moodle prior to your presentation. This part of the summative will count for 30% of your grade. For this, you will not need to provide academic references.

Coursework (due beginning of ST): The summative assessment will be an in-depth Scholarly Essay (no more than 2000 words). You will choose a topic from within MG311, which you as a developing scholar has found interesting or important and write your in-depth essay on it. This essay should be done in a scholarly and rigorous manner making reference to behavioural literature, theories, and concepts. The essay will count for 70% of your grade. You will be required to provide full essay-style referencing.

MG312 Half Unit Not available in 2024/25
Science of People in Workplaces**This information is for the 2024/25 session.****Teacher responsible:** Dr Xiaoran Hu**Availability:** This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Course content: Is conflict always detrimental to team and organizational performance? Can subtle changes in resume or job advertisement wording influence hiring outcomes? Does the type of food people consume shape different cultures? Science of People in Organizations aims to help students gain a science-based understanding of some of the most intriguing phenomena in the workplace and society. This course is designed to help students develop analytical skills that are crucial for both academic and industry careers. Students who are interested in

understanding the Asian business environment are especially encouraged to take this course. It will draw upon scientific research from various disciplines, including psychology, sociology, history, and anthropology, to critically examine topics such as creativity and innovation, emotions at work, leadership, cross-cultural differences, and management in an Asian context

Teaching: Teaching hours will be commensurate with a usual Half Unit undergraduate course but note that teaching may take a different format and/or structure in 2023/24

Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 2 pieces of coursework (1 mini report and 1 presentation)

Indicative reading: The course relies heavily on journal articles (for example, Academy of Management Journal, Organization Science, Journal of Applied Psychology, and Harvard Business Review). An extensive reading list is provided at the start of the course. Indicative readings include:

- Ashforth, B. E., & Humphrey, R. H. 1993. Emotional Labor in Service Roles: The Influence of Identity. *Academy of Management Review*, 18(1): 88–115.
- Bendersky, C., & Hays, N. A. 2011. Status Conflict in Groups. *Organization Science*, 23(2): 323–340.
- Bitterly, T. B., Brooks, A. W., & Schweitzer, M. E. 2017. Risky business: When humor increases and decreases status. *Journal of Personality and Social Psychology*, 112(3): 431.
- Greer, L. L., & Chu, C. 2020. Power struggles: When and why the benefits of power for individuals paradoxically harm groups. *Current Opinion in Psychology*, 33: 162–166.
- Kakkar, H., & Sivanathan, N. 2017. When the appeal of a dominant leader is greater than a prestige leader. *Proceedings of the National Academy of Sciences*, 201617711.
- Parke, M. R., Seo, M.-G., Hu, X., & Jin, S. 2021. The Creative and Cross-Functional Benefits of Wearing Hearts on Sleeves: Authentic Affect Climate, Information Elaboration, and Team Creativity. *Organization Science*.
- Shin, J., & Grant, A. M. 2021. When Putting Work Off Pays Off: The Curvilinear Relationship between Procrastination and Creativity. *Academy of Management Journal*, 64(3): 772–798.
- Wang, L., Restubog, S. L. D., Shao, B., Lu, V., & van Kleef, G. A. 2017. DOES ANGER EXPRESSION HELP OR HARM LEADER EFFECTIVENESS? THE ROLE OF COMPETENCE-BASED VERSUS INTEGRITY-BASED VIOLATIONS AND ABUSIVE SUPERVISION. *Academy of Management Journal*.

Assessment: Project (100%) in the WT.

Assessment is based on a 3,000 word project which will be due at the beginning of WT and will account for 100% of the final grade in this course.

MG316 Half Unit

Brand Strategy

This information is for the 2024/25 session.

Teacher responsible: Mr Guido Van Garderen

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not available for postgraduates.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Course content: Steven Forbes, founder of Forbes magazine, once stated "Your brand is the single most important investment

you can make in your business" as it persuades customers to pay more, purchase more frequently, and retains their loyalty. In short, strong brands influence the behavior of customers, which subsequently drives business results. In this course you will learn how to evaluate a brand strategy and how to use defined models and analytical tools to improve upon it. It covers the complete process, from consumer research, competitor analysis and positioning, to bringing the brand to life through design and activations. The course is based on the latest academic insights and infused with examples from our daily lives. It will help you prepare for a future as a marketeer, brand strategist or entrepreneur.

Teaching: Teaching hours in the WT will be commensurate with a usual Half Unit undergraduate course.

This course includes a reading week in Week 6 of Winter Term, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will work during class in groups, where they will do exercises and receive immediate feedback. The groups will use the same exercises to create their final group project. Detailed guidelines on the group project will be provided in the course syllabus and sample projects will be available.

Indicative reading:

- David A. Aaker (1996) *Building strong brands*. New York: The Free Press.
- Byron Sharp (2010) *How brands grow - what marketers don't know*. Melbourne: Oxford University Press.
- Youngme Moon (2010) *Different, Escaping the Competitive herd*. New York: Crown Business, Random House.
- Kevin Lane Keller, Brian Sternthal and Alice Tybout (2002) Three questions you need to ask about your brand, *Harvard Business Review*, volume 80, issue 9, page 80-86.
- March Chong (2007) The role of internal training and communication in infusing corporate values and delivering brand promise: Singapore Airlines' Experience, *Corporate Reputation Review*, Volume 10, Number 3, page 201-211.
- David A. Aaker and Erich Joachimsthaler (2000) The Brand Relationship Spectrum – The Key to the Brand Architecture Challenge, *California Management Review*, Volume 42, Number 4, pages 8-23.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Project (40%) and class participation (10%) in the WT.

The Group Project will be completed during the course in groups.

MG317 Half Unit

Leading Organisational Change

This information is for the 2024/25 session.

Teacher responsible: Dr Dorottya Sallai MAR.4.10

Availability: This course is available on the BSc in Management.

This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Exceptional permission cannot be granted to take this course where it clashes with another course.

This course has a limited number of places (it is capped). The lectures for this course are not open for students to audit due to space restrictions.

Pre-requisites: Organisational Behaviour and Leadership (MG105) or equivalent.

Course content: Businesses operate in an increasingly complex environment, where change is a constant feature of business life. The impact of not managing change effectively can be devastating for small and large businesses alike. Getting people to change even when it is in their best interest is the most difficult task faced by today's leaders. Yet, successful change can be achieved at

the individual, team and organisational levels through the use of several practical tools and skills. The course gives students an understanding of organisational change as a multifaceted phenomenon and equips them with skills to adopt a reflective, multi-dimensional approach when managing change in their future careers.

Topics addressed in the course will include:

- Identifying the need for change and diagnosing what to change
- Understanding organisational change strategies
- Managing internal power, stakeholders and politics
- Leadership in change
- Culture and mergers in change projects
- Resistance to change
- Fairness and change
- Communication and change
- Sustaining change and learning

Teaching: Teaching hours in the WT will be commensurate with a usual half-unit undergraduate course.

This course includes a reading week in Week 6, in line with Departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to complete one quiz and one mock case analysis (1000 words) in the WT

Indicative reading:

- ISE Managing Organizational Change: A Multiple Perspectives Approach 4th Edition, By Ian Palmer, Richard Dunford, David A. Buchanan, 2022 | Published: January 11, 2021
- The Theory and Practice of Change Management (5th Edition), John Hayes, Publisher: Red Globe Press, 2021
- Amis, J.M. & Greenwood, R., 2021. Organisational Change in a (Post-) Pandemic World: Rediscovering Interests and Values. *Journal of management studies*, 58(2), pp.582–586.
- Amis, J.M. & Janz, B.D., 2020. Leading Change in Response to COVID-19. *The Journal of applied behavioral science*, 56(3), pp.272–278.

Assessment: Exercise (10%), case analysis (80%) and class participation (10%) in the WT. Students will write a 2000-word case analysis of an unseen case. The readings, case studies, lectures, and classes will prepare you for the case analysis. It helps to summarise each reading, highlighting the most important concepts as we progress with the term.

The participation grade is based on **presence and participation** in classes. Absence without reason in classes will influence the participation grade and lecture attendance is strongly encouraged as students are expected to demonstrate their engagement with lecture material during classes.

Exercise: Students are expected to complete the simulation game during the term.

All summative grades are based on individual work, no group grades are given on this course.

MG318 Half Unit

Social Enterprise Design Fundamentals

This information is for the 2024/25 session.

Teacher responsible: Dr Nadia Millington MAR.5.37

Guest lecturers / external team mentors

Availability: This course is available on the BSc in Management. This course is not available as an outside option nor to General Course students.

This course has a limited number of places (it is capped). This course is not available to students with timetable clashes due to Harvard style of teaching

Course content: The lecture weeks (5 weeks)

During the foundational element, students will be provided with a theoretical overview of this young field, including but not limited to:

- (1) Introduction to social enterprise- definitions / taxonomies of social innovation/business models for social innovation
- (2) Solving social problems- human centered vs problem centric vs opportunity centric approaches
- (3) Theory of change
- (4) Designing social business models & social Innovation
- (5) Social impact measurement

Throughout the course, examples are given of real social enterprises in order to give practical insight to complement the theory and cases studies where applicable will be utilised.

The Interactive Lecture weeks (5 weeks)

During the interactive lecture weeks, students will be provided with a short lecture followed by interactive exercises that help them to develop the initial stages of a social enterprise solution based and then will develop a draft business model and conduct some minimum viable product testing to check the validity of their recommendations. An advantage of the course for students will be an opportunity to discover lean and human centred design principles as an approach to problem solving that spans many social disciplines and is being used by social scientists, creative designers and world class entrepreneurs

Ethical limitations:

Students will be encouraged to engage in developing solutions to problems without complex ethical considerations as there is insufficient time for the students to get approval for these projects from the Ethics Committee before the term concludes. More specifically students will be steered away from working with:

- (i) Minors
- (ii) Vulnerable populations such as refugees / homeless without a third party (the logic is that an established third party can provide the structure for students to approach these populations in a safe way)
- (iii) Any domestic violence related initiative
- (iv) Other such initiatives that would mean that the team cannot self-certify its project

Further students will be advised of LSE's ethical standards to ensure that they comply with them fully in the execution of their projects.

Teaching: 20 hours of lectures and 1 hour of help sessions in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Assessment: Essay (50%, 1400 words) and group presentation (50%) in the WT.

MY360 Half Unit

Quantitative Text Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Friedrich Geiecke

Availability: This course is available on the BSc in Politics and Data Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Knowledge of statistics and probability to the level of ST107 or equivalent.

Course content: The course surveys methods for systematically extracting quantitative information from text for social scientific purposes, starting with classical content analysis and dictionary-based methods, classification methods, and state-of-the-art scaling methods. It continues with probabilistic topic models, word embeddings, and concludes with an outlook on current neural network based models for texts. The course lays a theoretical foundation for text analysis but mainly takes a very practical and applied approach, so that students learn how to apply these methods in actual research. A common focus across methods is that they can be reduced to a three-step process: first, identifying texts and units of texts for analysis; second, extracting from the texts quantitatively measured features - such as coded content categories, word counts, word types, dictionary counts, or parts of speech - and converting these into a quantitative matrix; and third, using quantitative or statistical methods to analyse this matrix in order to generate inferences about the texts or their authors. The course systematically surveys these methods in a logical progression, with a practical, hands-on approach where each technique will be applied using appropriate software to real texts. Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.

Teaching: A combination of classes and lectures totalling a minimum of 30 hours across Winter Term. This course has a Reading Week in Week 6 of WT.

Formative coursework: One problem set in WT.

Indicative reading: quanteda: An R package for quantitative text analysis. <http://kbenoit.github.io/quanteda/>
 Benoit, Kenneth. 2020. "Text as Data: An Overview." In Curini, Luigi and Robert Franzese, eds. Handbook of Research Methods in Political Science and International Relations. Thousand Oaks: Sage. pp461-497.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MY361 Half Unit

Social Network Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Milena Tsvetkova

Availability: This course is available on the BSc in Politics and Data Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None, although prior knowledge of statistics, including logistic regression, and/or some background in social theory, is desirable.

Course content: This course focuses on data about connections, forming structures known as networks. Networks and network data describe an increasingly vast part of the modern world, through connections on social media, communications, financial transactions, and other ties. This course covers the fundamentals of network structures, network data structures, and the analysis and presentation of network data. Students will work directly with network data, and structure and analyse these data using the R statistical programming language.

Social networks have always been at the centre of human interaction, but especially with the explosive growth of the internet, network analysis has become increasingly central to all branches of the social sciences. How do people influence each other, bargain with each other, exchange information (or germs), or interact online? A diverse array of deep questions about human behaviour can only be answered by examining the social networks encompassing and shifting around us. Network analysis has emerged as a cross-disciplinary science in its own right, and has in fact proven to be of even greater generality and broader applicability than just the social, extending to ecology, physics, genetics, computer science, and other domains.

This course will develop the theory and methodological tools needed to model and predict social networks and use them in social sciences as diverse as sociology, political science, economics, health, psychology, history, or business. The core of the course will comprise the essential tools of network analysis, from centrality, homophily, and community detection, to random graphs, network formation, and information flow. The course will also provide an introduction to network modelling, analysis and visualisation using R (a statistical programming language).

Teaching: A combination of classes and lectures totalling 30 hours across Winter Term. This course has a Reading Week in Week 6 of WT.

Formative coursework: Students will be expected to submit one formative problem set that builds on what was covered in the staff-led lab sessions, to be completed by the student outside of class. Example answers and written feedback will be given.

Student groups will give an oral presentation of their plan for their group project in the final seminar of the term, for which they will receive peer feedback and verbal feedback from staff.

Indicative reading:

- Newman, M.E.J. (2010). Networks: An introduction. Oxford, UK: Oxford University Press.
- Scott, J. (2017). Social Network Analysis. Los Angeles: SAGE. 4th edition.
- Easley, D., and Kleinberg, J. (2010). Networks, Crowds, and Markets: Reasoning about a highly connected world. New York: Cambridge University Press.

Assessment: Project (20%) and group project (20%) in the ST. Problem sets (60%) in the WT.

Three summative problem sets will be marked in the WT. These will constitute 60% of the final overall mark. The group project will be a structured, independent exploration of a social network dataset written up as a report. 20% of the final overall mark will be based on the subsection of the group report written by the student, and 20% of the final overall mark will be based on the collectively written sections of the group report.

PB100

Foundations of Behavioural Science

This information is for the 2024/25 session.

Teacher responsible: Prof Liam Delaney CON.4.07 and Dr Miriam Tresh CON.3.14

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Students following the BSc in Psychological and Behavioural Science will automatically be enrolled onto PB100.

Course content: The aim of this course is to provide an understanding of, and the ability to critically appraise, the fundamental ideas which drive the multidisciplinary field of behavioural science in relation to policymaking. The course gradually moves from the foundational principles of behavioural science to the practical applications based on those principles. The course is organised into three interlinked blocks. The first block introduces dual-processing models of human behaviour to highlight the role of the environment in shaping decisions; this block considers the Dual System approach, heuristics and biases, and the influence of time, risk, and social preferences. The second block delves into the science of happiness by introducing the main accounts of subjective wellbeing, how it is conceptualised and measured and its implications for policy and other contexts. Finally, in the third block, we introduce various techniques from Behavioural Economics (incentives, commitments, defaults), Social Psychology (ego, messenger and social norms), and Cognitive Psychology (priming, affect) can be used to shape behaviour by means of the MINDSPACE checklist. We close by addressing the role of behavioural spillover effects and a discussion on the ethics of nudging. Throughout the course, evidence from observational studies, laboratory experiments and field experiments will be discussed, with a special emphasis on policy-level interventions. By the end of the course you should:

- Have a broad understanding of the fundamental principles of behavioural science, and its relations with foundational principles in Psychology and Economic Theory and policy;
- Be able to critically appraise the evidence base, tools and impact of behavioural science and its relation to policy interventions;
- Be able to explain the approaches that have been developed to change behaviour, based on the MINDSPACE framework;
- Be able to apply the core theories of Behavioural Science in policy and practice-based contexts.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 40 hours across Autumn Term and Winter Term.

There is a reading week in Week 6 of both Autumn Term and Winter Term.

Formative coursework: Students will complete a number of pieces of formative work to cement learning and prepare for summative assessments:

- Essay plan (comprising an introduction and then plan for the remaining sections).
- Practice pitch with peer feedback.

Indicative reading:

- Sunstein, C. R., & Thaler, R. (2009). *Nudge: Improving Decisions About Health, Wealth and Happiness*. London: Penguin.
- Kahneman, D. (2011). *Thinking, fast and slow*. Macmillan.
- Dolan, P. (2015). *Happiness by Design: Finding Pleasure and Purpose in Everyday Life*. London: Penguin.
- Halpern, D. (2015). *Inside the Nudge Unit: How small changes can make a big difference*. London: W H Allen.
- Dolan, P. (2019). *Happy Every After: Escaping the myth of a perfect life*. London: Penguin.
- Kahneman, D., Sibony, O., & Sunstein, C. R. (2021). *Noise: a flaw in human judgment*. Hachette UK.

Assessment: Essay (60%, 3000 words) and presentation (40%) in the WT.

Students will be required to write a 3,000 word essay answering

a question. There will be a number of questions provided and students can choose which they'd like to answer.

The presentation will take the form of a 3 minute pitch delivered as part of the annual *PB100 Behavioural Science Foundations to Real-World Applications Forum*.

PB101

Foundations of Psychological Science

This information is for the 2024/25 session.

Teacher responsible: Dr Michael Muthukrishna, CON.4.11

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Students following the BSc in Psychological and Behavioural Science will be automatically enrolled onto PB101.

Course content: This course provides an introduction to human cognition and behaviour, addressing foundational topics in psychological science. These foundational topics include key concepts from evolution, genetics, neuroscience, human evolutionary biology and anthropology, and specific topics, such as perception, memory, heuristics and biases, decision-making, child development, psychopathology, personality and individual differences, emotion, attraction and sexuality, cross-cultural differences, social relations, stereotypes and prejudice, norms and attitudes, social learning, social influence and persuasion, and group processes.

The course will offer an integrated perspective on these topics, investigating the evolution and variation in human psychology over time, across cultures, and over the lifespan. The course will introduce the history of the study of humans and human psychology, offering students the historical context to trends in research. By the end of the course, students will have a broad knowledge of key topics in psychology and related disciplines. Students will be prepared for more in-depth investigations of more advanced topics in later courses.

By the end of this course you should:

- Have an introductory understanding of the psychological and behavioural sciences.
- Have an understanding of how the psychological and behavioural sciences connect to other closely related social and biological sciences.
- Have developed "mental models" of human behaviour that you can apply to understanding interactions in your everyday lives and events occurring in the world around you.
- Be able to connect different levels of understanding such that you can zoom into the individual brain, zoom out to the societal-level and contextualize both in the breadth of human history and depth of evolutionary history.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 40 hours across Autumn Term and Winter Term. There is a reading week in Week 6 of both Autumn Term and Winter Term.

Formative coursework: Students will complete a number of pieces of formative work to cement learning and prepare for summative assessments:

- A number of pop-quizzes
- A practice blog-post

Indicative reading:

- Chudek, M., Muthukrishna, M., & Henrich, J. (2015). Cultural Evolution in Buss, D.M. (Ed.) *The Handbook of Evolutionary Psychology* (2nd ed., Vol. 2). Hoboken, NJ: John Wiley and Sons.
- Gray, P. O., & Bjorklund, D. F. (2018). *Psychology* (8th ed.). New York, NY: Worth Publishers.
- Heine, S. J. (2015). *Cultural Psychology*. New York, NY: W. W. Norton.
- Henrich, J. (2016). *The secret of our success: How culture is driving human evolution, domesticating our species, and making us smarter*. Princeton, NJ: Princeton University Press.

- Henrich, J., Heine, S. J., & Norenzayan, A. (2010). The weirdest people in the world? *Behavioral and Brain Sciences*, 33(2-3), 61-83.
- Laland, K. N., & Brown, G. (2011). *Sense and nonsense: Evolutionary perspectives on human behaviour*. 160 New York, NY: Oxford University Press.
- Muthukrishna, M., & Henrich, J. (2016). Innovation in the collective brain. *Philosophical Transactions of the Royal Society of London B: Biological Sciences*, 371(1690).
- Muthukrishna, M., & Henrich, J. (2019). A problem in theory. *Nature Human Behaviour*, 3, 221-229.

Assessment: Exam (25%, duration: 1 hour and 30 minutes) in the spring exam period.

Blog post (25%) in the AT.

Wikipedia article (25%) in the WT.

Multiple choice quiz (25%) in the ST.

Blog Post - Students will write a 1000 word blog post that summarises a key finding or findings in psychology. This will result in more engagement, communication and summarizing of research as well as encouraging them to seek out new findings in the psychological and behavioural science, finding ways to connect these to the real world.

Wikipedia Article - Students will create or edit a Wikipedia or Simple Wikipedia entry on a topic in psychology that is either incorrect, badly described, or missing. This will teach students critical thinking skills, not to take information at face value, and how to communicate research to a smart audience looking for both an overview and details.

Multiple Choice Quiz - The quiz will take place online during the Spring Term and will consist of sixty multiple choice questions.

Exam (25%) in ST - The exam will take place in the spring exam period and consist of four questions requiring short written answers.

PB102 Not available in 2024/25

Social Psychology

This information is for the 2024/25 session.

Teacher responsible: Prof Bradley Franks QUE.3.05

Availability: This course is available on the BA in Social Anthropology, BSc in Psychological and Behavioural Science and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course can be taken as an outside option by students on any year of undergraduate degrees, and as an option by students on the General Course. You should check with your department any restrictions they may place on outside options.

Course content: This course aims to provide a thorough introduction to the fundamental topics of social psychology -- a branch of psychological science that seeks to understand and explain human behaviours in actual or assumed presence of others. In this course, we will review and critically evaluate socio-psychological explanations and theories of individual, interpersonal and group processes. Here, we will study a wide range of phenomena, ranging from the way individuals perceive and think about the social world, to the way they conceptualize themselves and participate in social groups, to the way that the broader social context influences our thoughts and behaviour. Other topics will include interpersonal attraction, attitudes and attitude change, pro-social behaviour, and human aggression.

A short video on the course is here: <https://youtu.be/cO6bINGn2jQ>
The course offers an essential complement to any degree programme in the social sciences, and it is particularly relevant to any profession that involves dealing with other people. Over the duration of this course, you will develop the knowledge and analytical skills necessary to apply the insights gained from Social Psychology to real-world social issues and to identify effective ways for achieving behavioural and societal change.

Teaching: 10 hours of lectures and 9 hours of classes in the AT.

10 hours of lectures and 10 hours of classes in the WT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to produce two assignments as coursework, one in MT and one in LT. The first assignment comprises of four separate short answers responding to a choice of eight questions, comprising up to 2,000 words in total (i.e. about 300 to 500 words each).

The second assignment is an essay that students write under exam conditions as a 1-hour mock exam. Students will be given three topics, from which they can choose one to prepare and answer the corresponding mock exam question. All formative assignments will be assessed by the class teachers, who will provide detailed feedback to the students.

Indicative reading: Hogg, M. A. and Vaughan, G. M. (2013). *Social Psychology*, 7th edition. Harlow, Prentice Hall.

Library catalogue number is HM251 H71 and the book is also available electronically through the library website.

Additional references and a synopsis of lectures and class topics will be made available online in early September, and will also be distributed in the first lecture of the series.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

The exam will consist of four short answer out of eight questions, and two essay answers out of six questions.

PB130

Statistics and Research Methods for Psychological and Behavioural Science

This information is for the 2024/25 session.

Teacher responsible: Dr Ben Tappin CON.5.05

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: This course equips students with the bedrock knowledge and skills for conducting research in psychology and behavioural science. It integrates core concepts from the process of planning and conducting research with those involved in understanding and analysing data. Its lectures and classes introduce enough research methods and statistics to provide a foundation for Years 2 and 3. Students will be provided with a dataset that they can use to put what they learn into practice, as well as having the opportunity to collect and analyse data of their own. By the end of this course, you should:

- Be able to situate contemporary research in psychology and behavioural science in the historical context of psychological enquiry.
- Understand the processes required in planning, carrying out, summarising, and evaluating research in psychological and behavioural science.
- Understand the principles for designing, conducting, and writing up qualitative and quantitative research projects.
- Understand the statistical methods needed to familiarise oneself with a dataset, summarise its key features, and identify key relationships among variables.
- Have practical experience collecting and analysing psychological and/or behavioural data.
- Be prepared for later courses in statistics and research methods for psychological and behavioural science.

Teaching: This course is delivered through a combination of lectures, workshops, lab sessions and classes totalling a minimum of 84.5 hours across Autumn Term and Winter Term. There is a reading week in Week 6 of both Autumn Term and Winter Term.

Formative coursework: Students will complete several pieces of formative work to cement learning and prepare for summative assessments:

- Several statistics worksheets.
- A160practice piece of writing

Indicative reading:

- American Psychological Association (2020). *Publication manual*. (7th ed.). Washington: APA.
- Braun, V., & Clarke, V. (2013). *Successful qualitative research: A practical guide for beginners*. London: Sage.

- Hunt, M. (2007). *The story of psychology*. (2nd ed.) London: Random House.
- Navarro, D. (2015). *Learning Statistics with R: A Tutorial for Psychology Students and Other Beginners* (Version 0.5). Adelaide: University of Adelaide.
- Phillips, N. D. (2017). *Yarr! The pirate's guide to R*.
- Poldrack R. A. (2019). *Statistical Thinking for the 21st Century*.
- Son, J. Y., & Stigler, J. W. (2019). *Introduction to Statistics: A Modelling Approach*
- Urdan, T. C. (2011). *Statistics in plain English*. London: Routledge.

Assessment: Poster (20%) in the AT.

Exercise (40%) and research project (40%) in the WT.

- **Poster (20%) in AT** - Working as a group you will design a mixed methods research project and present this as a poster.
- **Research Project (40%) in WT** - You will carry out the project that you proposed in your poster. Data collection will be done with your group, the analysis and write up will be completed individually.
- **Exercise (40%) in WT** - You will be required you to write methods and results for two **secondary data analysis** tasks.

PB200 Half Unit

Biological Psychology

This information is for the 2024/25 session.

Teacher responsible: Dr Deema Awad, CON 5.18

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: This course offers an introductory and integrated perspective on the biological bases of behaviour. After a discussion of the philosophical and historical background of biological psychology, the course will consider neurophysiology and how the structure of the brain connects to research methods. The course will then frame biological psychology by reference to theories of concepts such as behavioural genetics, evolutionary psychology and the impact of hormones on behaviour. Following this, the course moves on to consider the biological underpinnings of cognition and behaviour. It appraises the applied application of biological psychology and is concerned with identifying how the biology of psychology can inform our understanding and interpretation of real-world issues.

By the end of the course you should:

- Have a broad understanding of the fundamental principles of Biological Psychology.
- Be able to critically appraise the philosophy and development of Biological Psychology.
- Be able to understand the biological underpinnings of cognition and behaviour.
- Be able to identify how Biological Psychology can inform real-world issues.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 25 hours across Autumn Term. There is a reading week in Week 6 of Autumn Term.

Formative coursework: Students will complete a number of pieces of formative work to cement learning and prepare for summative assessments:

- Weekly multiple choice question sets
- Podcast episode plan

Indicative reading:

- Breedlove, S.M., & Watson, N.V. (2010). *Biological psychology: An introduction to behavioural, cognitive, and clinical neuroscience*. Sunderland, MA: Sinauer Associates.
- Cacioppo, J.T, Visser, P.S., & Pickett, C.L. (2006). *Social neuroscience: People thinking about thinking people*. Cambridge, MA: MIT Press
- Gazzaniga, M.S., Ivry, R.B., & Mangun, G.R. (2014). *Cognitive neuroscience: The biology of the mind*. New York, NY: W.W. Norton.
- Glimcher, P. W., Camerer, C., Poldrack, R. A., & Fehr, E. (2013). *Neuroeconomics: Decision making and the brain*. Amsterdam: Academic Press.
- Kolb, B., Wishaw, I.Q., & Teskey, C.C., (2016). *An introduction to brain and behaviour* (6th ed.). New York, NY: Worth Publishers.
- Nettle D. (2009). *Evolution and genetics for psychology*. Oxford: Oxford University Press.
- Pinel, J.P.J. & Barnes, S.J. (2013). *Biopsychology* (Global Edition). Harlow: Pearson
- Plomin, R., DeFries, J.C., Knopik, V.S., & Neiderhiser, J.M. (2013). *Behavioral Genetics*. New York, NY: Worth Publishers.

Assessment: Essay (70%, 3000 words) and podcast (20%) in the AT. Essay (10%) in the ST.

Essay (70%) in AT – You will produce a 3000 word essay answering a question. There will be a number of questions provided and students can choose which they'd like to answer.

Podcast (20%) in AT – Working in pairs you will develop a 6 to 8 minute podcast.

Essay (10%) in ST - Students following the BSc in Psychological and Behavioural Science will be expected to submit one 3000 word **'Integration Essay'** in their second year. The integration essay will count towards 10% of the final mark in PB200, PB201, PB202, PB204 and PB205. The integration essay will discuss a topic investigated in one course and use its approach to integrate and debate approaches from two other courses taken in Year 2. For example, if you choose to base your integration essay in Biological Psychology (this course) you will use a topic from this course as the basis for debating the treatment of that topic by theories from two of Cognitive Psychology (PB201), Developmental Psychology (PB202), Social Psychology: Individuals, Groups and Culture (PB204) or Individual Differences and Why They Matter (PB205).

PB201 Half Unit

Cognitive Psychology

This information is for the 2024/25 session.

Teacher responsible: Dr Rana Qarooni

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: This course will offer an account of core theories, debates and phenomena in Cognitive Psychology. It will cover essential aspects of cognitive psychology, ranging from phenomena concerned with 'low level' cognition such as attention and perception, through to 'high level' cognition such as reasoning and decision making and consciousness, and will interweave areas that span levels such as knowledge representation, concepts and language processing. It will also relate these areas to core aspects of behavioural science, such as levels of processing, the influence of context, and the roles of heuristics and biases in information processing. The course will also seek to assess the application of these theories and concepts to relevant real world examples and policy issues via the class discussions. Students will become familiar with methods that can be used to explore a myriad of cognitive functions, will be faced with concrete modelling tasks

and see the application of cognitive psychology for interventions such as policy changes, changes in economic boundary conditions, social pressure, political campaigns etc.

By the end of the course you should:

- Be able to critically appraise the philosophy, history and development of Cognitive Psychology.
- Be able to generate and critique computational and dynamic models
- Be able to critically assess methodological and conceptual limitations of interventions in complex systems
- Be able to relate these areas to core aspects of behavioural science.
- Be able to assess the application of these theories and concepts to real world examples.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 25 hours across Autumn Term. There is a reading week in Week 6 of Autumn Term.

Formative coursework: Students will complete a number of pieces of formative course to cement learning and prepare for summative assessments:

- Develop a summary and lead a discussion in one class.
- Develop a plan for the presentation, including details of what will be included in the slides and handout.

Indicative reading:

- Eysenck, M. & Keane, M. (2015). *Cognitive Psychology: A Student's Handbook*. (7th ed). Hove: Psychology Press.
- Gazzaniga, M. S., Ivry, R. B., Mangun, G. R. (2014). *Cognitive Neuroscience: The Biology of the Mind*. (4th ed.) New York, NY: W.W. Norton
- Gilbert, N. (2008) *Agent-Based Models*. Los Angeles, CA: SAGE
- Gluck, M. A., Mercado, E. & Myers, C. E. (2016). *Learning and Memory*. (3rd ed.). New York, NY: Worth
- Goldstein, E. B. (2017). *Sensation and Perception* (10th ed.). Boston, MA: Cengage Learning
- Johnson, N. (2009) *Simply Complex: A clear guide to complexity theory*. One World
- Marr, D. (2010) *Vision*. Cambridge, MA: MIT Press
- Oaksford, M. & Chater, N. (2007) *Bayesian Rationality: The probabilistic approach to human reasoning*. Oxford: Oxford University Press

Assessment: Essay (10%) in the ST.

Group presentation (20%) and other (70%) in the AT.

Group Presentation (20%) in AT – You will work in groups to record a 15 minute presentation and develop a handout. You will be expected to submit the recording, slides and a handout.

Other (70%) in AT160– You will write a 2500 Op-Ed on a topic from the course.

Essay (10%) in ST – Students following the BSc in Psychological and Behavioural Science will be expected to submit one 3000 word 'Integration Essay' in their second year. The integration essay will count towards 10% of the final mark in PB200, PB201, PB202, PB204 and PB205. The integration essay will discuss a topic investigated in one course and use its approach to integrate and debate approaches from two other courses taken in Year 2. For example, if you choose to base your integration essay in Cognitive Psychology (this course) you will use a topic from this course as the basis for debating the treatment of that topic by theories from two of Biological Psychology (PB200), Developmental Psychology (PB202), Social Psychology: Individuals, Groups and Culture (PB204) or Individual Differences and Why They Matter (PB205).

phenomena in developmental psychology. It will begin by framing developmental psychology by reference to core explanatory approaches to development and outlining key theories, perspectives and frameworks. The course then covers a range of central empirical areas of development, illustrating the ways in which the major theories explain, or fail to explain, the phenomena in those areas. The course is also concerned with locating psychological development in a wider cultural and societal context, including the relations between typical and atypical development and considers developmental psychology as a paradigm for understanding and interpreting real-world issues.

By the end of the course you should:

- Be able to critically appraise the philosophy, history and development of Developmental Psychology.
- Have a broad understanding of major classical theoretical approaches.
- Have a broad understanding of core explanatory approaches to development.
- Be able to locate psychological development in wider context.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 25 hours across Winter Term. There is a reading week in Week 6 of Winter.

Formative coursework: Students will complete a number of pieces of formative work to cement learning and prepare for summative assessments.

- Develop a short case study
- Practice visual design

Assessment: Essay (10%) in the ST.

Research proposal (90%) in the WT.

Research Proposal and Visual Media (90%) in WT – You will produce a 3000-word research proposal which identifies a topic or principle from Year 1 and proposes how it can be examined from the perspective of theories, frameworks and methods discussed in the course. In addition you will produce a visual representation of your research proposal on an A5 postcard to be submitted alongside the research proposal.

Essay (10%) in ST – Students following the BSc in Psychological and Behavioural Science will be expected to submit one 3000 word 'Integration Essay' in their second year. The integration essay will count towards 10% of the final mark in PB200, PB201, PB202, PB204

PB202 Half Unit

Developmental Psychology

This information is for the 2024/25 session.

Teacher responsible: Dr Miriam Tresh CON.3.14

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: This course will cover core approaches and

and PB205. The integration essay will discuss a topic investigated in one course and use its approach to integrate and debate approaches from two other courses taken in Year 2. For example, if you choose to base your integration essay in Developmental Psychology (this course) you will use a topic from this course as the basis for debating the treatment of that topic by theories from two of Biological Psychology (PB200), Cognitive Psychology (PB201), Social Psychology: Individuals, Groups and Culture (PB204) or Individual Differences and Why They Matter (PB205).

PB204 Half Unit

Social Psychology: Individuals, Groups and Culture

This information is for the 2024/25 session.

Teacher responsible: Professor Jeremy Ginges CON.3.04

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: This course builds core knowledge of Social Psychology, studying the way our thinking and behaviour is influenced by the actual, imagined or implied presence of other people. It aims to understand how thinking and behaviour depends on the connections between individuals, the groups of which they are members and the cultural settings of both. These are all understood in evolutionary context. The lectures and classes will discuss a range of social psychology topics, such as social cognition, self and identity, prejudice, group membership, crowds and collective behaviour, and social exclusion. Each topic will highlight the relations between real world problems, social psychological theory and empirical data, and draw connections to behavioural science. This course will foster a critical evaluation of social psychological science and its relation to other areas of psychological and behavioural science.

By the end of the course you should:

- Be able to present core theories and phenomena in social psychology.
- Be able to demonstrate that social psychology should be understood as both a social science and a natural science.
- Be able to draw connections between social psychology and real-world policy.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 25 hours across Autumn Term. There is a reading week in Week 6 of Autumn Term.

Formative coursework: Students will complete a number of pieces of formative work to cement learning and prepare for summative assessments:

- Group presentation on the topic of the week and its application to social issues.
- Plan for policy proposal.
- Practice executive summary.

Indicative reading:

- Gilovich, T., Keltner, D., Chen, S., & Nisbett, R.E. (2023) *Social Psychology* 160(6th ed.) New York, NY: Norton
- Hewstone, M., Stroebe, W., Jonas, K. (2020). *160 An Introduction to Social Psychology* (7th ed.). Chichester: BPS Wiley.
- Hogg, M.A., & Vaughan, G.M. (2021). *Social Psychology* (9th ed.). Harlow: Pearson.
- Steg, L., Keizer, K., 160 Buunk, A. & Rottengatter, T. (2017) *Applied Social Psychology: Understanding and managing social problems* (2nd ed.). Cambridge: Cambridge University Press.
- Van Lange, P.A.M., Kruglanski, A. W., & Higgins, E.T., (Eds.) (2012) *Handbook of theories of social psychology: Volume 1*. London: Sage.
- Van Lange, P.A.M., Kruglanski, A. W., & Higgins, E.T., (Eds.) (2012) *Handbook of theories of social psychology: Volume 2*. London: Sage.

Assessment: Essay (10%) in the ST.
Proposal (90%) in the AT.

Proposal and Executive Summary (90%) in AT - Using theories and phenomena from the course you will propose a policy or project for an organisation (e.g. governmental, charity, for profit, non-profit) to address a social issue and produce a short, non-technical, **Executive Summary** of your proposal.

Essay (10%) in ST - Students following the BSc in Psychological and Behavioural Science will be expected to submit one 3000 word '**Integration Essay**' in their second year. The integration essay will count towards 10% of the final mark in PB200, PB201, PB202, PB204 and PB205. The integration essay will discuss a topic investigated in one course and use its approach to integrate and debate approaches from two other courses taken in Year 2. For example, if you choose to base your integration essay in Social Psychology: Individuals, Groups and Culture (this course) you will use a topic from this course as the basis for debating the treatment of that topic by theories from two of Biological Psychology (PB200), Cognitive Psychology (PB201), Developmental Psychology (PB202) or Individual Differences and Why They Matter (PB205).

PB205 Half Unit

Individual Differences and Why They Matter

This information is for the 2024/25 session.

Teacher responsible: Dr Sakshi Ghai CON 3.20

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: This course offers insight into the nature of differences in the psychological processes of individuals and the implications of such variation for behaviour and behaviour change. While most policies are designed with the 'average citizen' in mind, we know there is large variety between people's thoughts, choices and behaviour. More recently, these differences are leveraged to personalise behavioural intervention, advertising and political communication to target specific 'segments' of the population with the aim to enhance results. This course digs deeper into the psychological and behavioural assumptions which underlie how individuals behave collectively and individually in the wider societal context. Sample topics include how individual traits affect cognitive performance, how ideological preferences and voting patterns can be traced to individual and group variation, whether there is use in mapping personality, grit, perfectionism or motivation, and the ethical implications of applying these insights in behaviour change contexts. We will consider sources of individual variation from the micro-level (e.g. temporal variation in one person) to the macro-level by aligning content to sustainability goals (e.g. political decision outcomes, global health and climate change communications or resource distribution). Ultimately, the goal is to understand why and how people differ in their enduring patterns of thinking, feeling and behaving across contexts, and what this means for contemporary societies.

By the end of the course you should:

- Understand the biological and social underpinnings of systematic psychological and behavioural variation between and within individuals.
- Understand the theoretical and methodological approaches used to capture such variation in thinking, feeling and behaviour.
- Understand the implications of such variation in thinking, feeling and behaviour in a wider societal context.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 25 hours across Winter Term. There is a reading week in Week 6 of Winter Term.

Formative coursework: Students will complete a number of pieces of formative work to cement learning and prepare for summative assessments:

- Complete a weekly peer- and self- reviewed annotated bibliography.
- Develop an outline for a 2-page POSTnote report supported by 1605 samples of annotated bibliography.

Indicative reading:

- Rose, T. (2017) *The End of Average: How to Succeed in a World That Values Sameness* London: Penguin
- Bryan, C.J., Tipton, E. & Yeager D.S. (2021) Behavioural Science is unlikely to change the world with a heterogeneity revolution *Nature* 5(8) 980-989

Assessment: Essay (10%) in the ST.

Report (90%) in the WT.

Report and Annotated Bibliography (90%) in WT – You will produce a POSTnote with a supporting thematically annotated bibliography.

Essay (10%) in ST – Students following the BSc in Psychological and Behavioural Science will be expected to submit one 3000 word 'Integration Essay' in their second year. The integration essay will count towards 10% of the final mark in PB200, PB201, PB202, PB204 and PB205. The integration essay will discuss a topic investigated in one course and use its approach to integrate and debate approaches from two other courses taken in Year 2. For example, if you choose to base your integration essay in Individual Differences and Why They Matter (this course) you will use a topic from this course as the basis for debating the treatment of that topic by theories from two of Biological Psychology (PB200), Cognitive Psychology (PB201), Developmental Psychology (PB202) or Social Psychology: Individuals, Groups and Culture (PB204).

PB230

Intermediate Statistics and Research Methods for Psychological and Behavioural Science

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Curran CON 3.16

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Statistics and Research Methods for Psychological and Behavioural Science (PB130).

Course content: This course aims to provide students with integrated core knowledge and skills in contemporary research and analysis methods in psychological and behavioural science. Specific core methodological tools for preregistering and collecting data will be presented in lectures, selected to reflect parallel theoretical issues raised in PB200 Biological Psychology, PB201 Cognitive Psychology, PB202 Developmental Psychology, PB204 Social Psychology: Individuals, Groups and Culture, and PB205 Individual Differences and Why They Matter.

This course presents conceptual and practical knowledge on the range of tools available to the psychological/behavioural scientist. In particular, this course will examine current controversies and new developments in research methods in psychology and behavioural science. The overall goal of the course is to learn to think critically about how psychological and behavioural science is conducted, how conclusions are drawn, and how data are appropriately analysed considering intermediate issues such as measurement error and clustering. We will cover both methodological and statistical issues that affect the validity of research in psychology, with an emphasis on psychological and behavioural sciences. We will also discuss the recent controversy in psychology about the replicability of scientific results and preregistration of both quantitative and qualitative research. The course also instructs students in the use of quantitative data collection methods, including surveys, experiments, assessment tools, and computerised tasks. It also covers principles and issues involved in the analysis of quantitative data, including the importance of transparency in data analysis and reporting. Where statistics are concerned, this course presents students with knowledge of, and practical exposure to, statistical modelling. It covers linear and non-linear models, factor analysis, structural equation modelling, multilevel modelling, and intermediate issues

in data cleaning and imputation. These topics build directly on from the introduction to the linear model students received in PB130. Throughout the course, an understanding of key concepts such as statistical power and effect sizes will be emphasised in line with current controversies regarding replicability and questionable research practice. Practical sessions will equip students with knowledge of how to conduct the taught statistical techniques using the R programming language.

By the end of the course you should:

- Be able to situate recent trends in open science in the context of psychological enquiry.
- Have practical experience of collecting and analysing psychological and/or behavioural data.
- Understand statistical methods needed to conduct intermediate data analyses.
- Understand intermediate methods of qualitative enquiry.

Teaching: This course is delivered through a combination of lectures, workshops, lab sessions and classes totalling a minimum of 62 hours across Autumn Term and Winter Term. There is a reading week in Week 6 of both Autumn Term and Winter Term.

Formative coursework: Students will complete several pieces of formative work to cement learning and prepare for the summative assessments:

- Practice a pre-registration report
- Complete several statistics worksheets

Indicative reading:

- American Psychological Association (2020). *Publication manual of the American Psychological Association*. (7th ed.) Washington DC: APA
- Braun, V., & Clarke, V. (2013). *Successful qualitative research: A practical guide for beginners*. London: Sage.
- Camerer, C. F., Dreber, A., Holzmeister, F., Ho, T. H., Huber, J., Johannesson, M., ... & Altmeld, A. (2018). Evaluating the replicability of social science experiments in Nature and Science between 2010 and 2015. *Nature Human Behaviour*, 2(9), 637-644.
- Chambers, C. (2017). *The 7 deadly sins of psychology: A manifesto for reforming the culture of scientific practice*. Princeton, NJ: Princeton University Press.
- Keith, T. (2015). *Multiple regression and beyond*. New York, NY: Routledge.
- L. Haven, T., & Van Grootel, D. L. (2019). Preregistering qualitative research. *Accountability in Research*, 26(3), 229-244.
- Munafo, M. R., Nosek, B. A., Bishop, D. V., Button, K. S., Chambers, C. D., Du Sert, N. P., ... & Ioannidis, J. P. (2017). A manifesto for reproducible science. *Nature human behaviour*, 1(1), 1-9.
- Nosek, B. A., & Lakens, D. (2014). Registered reports: A method to increase the credibility of published results. *Social Psychology*, 45(3), 137-141.
- Open Science Collaboration. (2015). Estimating the reproducibility of psychological science. *Science*, 349(6251).
- Tabachnick, B., & Fidell, L. (2013). *Using multivariate statistics*. Boston, MA: Pearson Education.

Assessment: Report (50%) in the AT.

Exercise (50%) in the WT.

Report (50%) in AT – You will develop a pre-registered report assignment of around 3500 words.

Exercise (50%) in WT – You will undertake a secondary data analysis comprising three tasks. The combined write up will be 3500 words.

PB300

Advances in Psychological and Behavioural Science

This information is for the 2024/25 session.

Teacher responsible: Prof Liam Delaney CON.4.07 and Dr Miriam Tresh CON.3.14

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside

option nor to General Course students.

Course content: This course will offer an advanced-level account of applying psychological and behavioural science to real world issues. The course is delivered as four distinct but interlinked blocks.

We will start by re-examining and developing our understanding of the intellectual foundations behind behavioural and psychological science, this will be an opportunity not only to re-consider what was covered in Year 1 and Year 2 but also to develop your depth of understanding. Topics include schools of thought, ethics and interdisciplinarity. The remaining lectures relate these intellectual foundations to real-world issues. Faculty from the department and professionals working at the cutting edge of applying psychological and behavioural science will join us to present on their areas of expertise. The specific topics will be relevant and timely and thus will change each year; in previous years lectures have covered themes of technology, one health, work and wellbeing, and heterogeneous practices. We'll also consider the key issue of scalability and the importance of culture in understanding the impacts of behavioural interventions.

The goal of the course is to explore and critically reflect on the process of integrating theory into policy, and we do this practically through the lens of NGBS, our fictitious not-for-profit consultancy firm. We'll talk about how such organisations work, the professional roles available and the type and scopes of projects. The assessments see students applying to work for NGBS and then working on a project.

Throughout the course there will be regular opportunities for synthesis, recap, review and reflection.

By the end of the course you should:

- Have an in-depth understanding of recent advances in psychological and behavioural science.
- Be able to critically appraise the evidence base, tools, and impact of select recent studies.
- Have an in-depth understanding of how psychological and behavioural science link to the other social sciences and the real world.
- Understand how to apply and integrate theories in the real world.

Teaching: This course is delivered through a combination of lectures, classes and workshops totalling a minimum of 42 hours across Autumn, Winter and Summer Term. There is a reading week in Week 6 of both Autumn and Winter Terms.

Formative coursework: Students will complete a number of pieces of formative work to cement learning and prepare for summative assessments:

- Plan for Showcase Portfolio
- Preparation for the Simulation exercise (either meeting minutes or a summary of your group's research)

Indicative reading:

- Cialdini, R. (2016). *Pre-Suasion: A Revolutionary Way to Influence and Persuade*. New York: Random House.
- Halpern, D. (2015). *Inside the Nudge Unit: How small changes can make a big difference*. London: W H Allen.
- Lewis, A. (Ed.) (2012). *The Cambridge Handbook of Psychology and Economic Behaviour*. Cambridge: CUP.
- Oliver, A. (Ed.) (2013). *Behavioural Public Policy*. Cambridge: CUP.

Assessment: Portfolio (50%) in the WT.

Group exercise (50%) in the ST.

Portfolio (50%) in WT – You will develop a showcase portfolio on CampusPress which will be used to apply for a role at NGBS. The portfolio should have two components; a curated set of artefacts and a 3000 word rationale articulating how the artefacts show your key insights and skills. The artefacts can be chosen from your summative submissions in Year 1, 2 and 3 or formative work from Year 3.

Group Exercise (50%) in ST – As a group, you will prepare for and take part in a simulation day. The simulation will see you work, in your roles as professionals at NGBS, to produce a white paper and presentation that addresses a client's project request. The simulation will take place during summer term, in London.

PB301 Half Unit Not available in 2024/25

Cognition and Culture

This information is for the 2024/25 session.

Teacher responsible: Prof Bradley Franks QUE.3.03

Availability: This course is available on the BSc in Psychological and Behavioural Science. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course discusses the relations between cognition and culture using evolutionary perspectives. The course is therefore suitable for students enrolled in other programmes who wish to enrich their understanding by drawing on detailed understanding of the psychological and cultural processes that underpin thought and behaviour, and to locate them in an evolutionary setting.

Pre-requisites: Students should have taken Foundations of Behavioural Science (PB100) **or** Foundations of Psychological Science (PB101).

Course content: This course will offer students an overview of key theoretical approaches and debates concerning the relations between cognition and culture as they are related to evolution.

The course will compare and contrast accounts that emphasise the role of mental adaptations with those that emphasise the role of cultural evolution. It will do so via a consideration of a range of empirical domains, such as categorisation, theory of mind, sense of self and religion. Students will be encouraged to integrate the ideas from the course with their wider learning in psychological and behavioural sciences, and to consider the application of those ideas to real world cases and problems.

The course will include topics such as:

- Relating Cognition and Culture via Evolution
- Thinking about the Natural World
- Thinking about the Social World
- Thinking about (Other) Minds: theory of Mind
- How Thoughts are Expressed: Language and Thought
- How Thoughts Get Around: Cultural Transmission
- Thinking about Ourselves: Self and Identity
- Thinking about Ultimate Things: Religion
- Culture and Special-Purposeness
- Relativity and Universals

Teaching: 10 hours of lectures and 10 hours of classes in the WT.

Formative coursework: 1. Essay in the LT
2. Take-home multiple choice quiz in the LT
3. Group-based presentation in the LT

Indicative reading: Dunbar, R. I. & L. Barrett (Eds.). (2007). *Oxford handbook of evolutionary psychology*. Oxford: Oxford University Press.

Haidt, J. (2012). *The Righteous Mind: Why Good People Are Divided by Politics and Religion*. Pantheon

Henrich, J. (2016). *The secret of our success: How culture is driving human evolution, domesticating our species, and making us smarter*. Princeton, NJ: Princeton University Press.

Kitayama, S., & Cohen, D. (Eds.) (2007). *Handbook of Cultural Psychology*. New York: Guilford Press.

Kurzban, R. (2011). *Why everyone (else) is a hypocrite: Evolution and the modular mind*. Princeton, NJ: Princeton University Press.

Laland, K. N. and Brown, G. R. (2002). *Sense and Nonsense: Evolutionary Perspectives on Human Behaviour*. Oxford University Press

Nisbett, R. L. (2003). *The Geography of Thought*. Free Press.

Pinker, S. (2002). *The Blank Slate: The Modern Denial of Human Nature*. New York: Viking.

Richerson, P. J., & Boyd, R. (2005). *Not by Genes Alone: How culture transformed human evolution*. Chicago: University of Chicago Press.

Students will be expected to read essential readings plus additional reading from the primary literature per class. These readings will be provided in the course outline.

Assessment: Essay (100%, 2500 words) in the WT.

PB302 Half Unit Not available in 2024/25**Creativity and Innovation**

This information is for the 2024/25 session.

Teacher responsible: Prof Alex Gillespie

Availability: This course is available on the BSc in Psychological and Behavioural Science. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course examines the social and psychological basis of creativity and innovation. The course is therefore suitable for students enrolled in other programmes who wish to enrich their understanding by drawing on detailed understanding of the psychological and cultural processes that underpin thought and behaviour.

Pre-requisites: Students should have taken Foundations of Psychological Science (PB101) or Foundations of Behavioural Science (PB100).

Course content: The course will cover the social conditions (i.e., face-to-face or online, one-to-one or group, autocratic or democratic, specialisation or integration, etc.) conducive to creativity and innovation, including the social conditions for socialisation creative individuals and the social and institutional factors which enable productive novelty to be recognised and instituted. Specific topics will include: theories of creativity, play & imagination, insight and problem solving, identifying good ideas, materiality, cultural evolution, the resistance to innovation, user innovation, utopias and how people imagine the future.

The course will include topics such as:

- Defining creativity and innovation
- Approaches to creativity
- Social interaction and creativity
- Creative problem solving
- Expansive and double-loop learning
- User innovation and feedback
- Resistance to innovation
- Evaluating ideas
- Play and imagination
- Utopias and imagining the future

Teaching: 10 hours of lectures and 10 hours of classes in the WT.

Formative coursework: 1. Take-home multiple choice quiz in the LT

2. Essay in the LT

3. Group presentation in the LT

Indicative reading: Kaufman, J. C., & Sternberg, R. J. (2010). *The Cambridge handbook of creativity*. Cambridge University Press. (especially history (chapter 1), theories (chapter 2), assessment (chapter 3), organizational creativity (chapter 8), developmental approaches to creativity (chapter 12), and functional creativity (chapter 16) and individual and group creativity (chapter 19))

Bechtoldt, M.N., De Dreu, C.K., Nijstad, B.A., and Choi, H.S. (2010). Motivated information processing, social tuning, and group creativity. *Journal of Personality and Social Psychology*, 99(4), 622.

Maddux, W.W., and Galinsky, A.D. (2009). Cultural borders and mental barriers: The relationship between living abroad and creativity. *Journal of Personality and Social Psychology*, 96(5), 1047-1061.

Mainemelis, C. (2010). Stealing fire: Creative deviance in the evolution of new ideas. *Academy of Management Review*, 35(4), 558-578.

Paulus, P.B. and Yang, H.C. (2000). Idea generation in groups: A basis for creativity in organisations. *Organisational Behaviour and Human Decision Processes*, 82(1), 76-87.

Zittoun, T. & Gillespie, A. (2016). *Imagination in human and cultural development*. London: Routledge.]

Students will be expected to read essential readings plus additional reading from the primary literature each class. These readings will be provided in the course outline.

Assessment: Essay (100%, 2500 words) in the WT.

PB303 Half Unit**Organisations, Groups and Identity**

This information is for the 2024/25 session.

Teacher responsible: Dr Ilka Gleibs CON.4.13 and Dr Miriam Tresh CON.3.14

Availability: This course is available on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: In any society and any successful organisation, understanding group dynamics and identity processes and how they are connected to the individual is an essential element.

This understanding often provides a competitive advantage in managing organisations of all types. Thus, the dynamics within and between groups directly informs the ability of individuals to think, learn, and innovate together. This course provides students with a critical understanding of the different theories and practices associated with identity and group dynamics in organisational settings and beyond.

This course aims to highlight how a better understanding of key social and organisational psychological concepts can contribute to understanding and managing the effectiveness of groups.

Examples of topics that will be covered include: Why group dynamics?; influence and power; identity and inclusion; collective behaviour; importance of groups on mental and physical health; performance and decision-making; diversity management; organisational change; group dynamics and the internet.

By the end of the course you should:

- Understand past and present theories of identity and group dynamics by introducing concepts used by social psychologists and behavioural scientists to understand and improve group behaviour.
- Be able to apply and critically evaluate how identity and group dynamics theories help us to explain and predict real-life experiences.
- Be able to demonstrate how understanding key social psychological and behavioural science concepts can contribute to understand the effectiveness of groups in various settings.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 25 hours across Winter Term. There is a reading week in Week 6 of Winter term. Lectures will be delivered jointly with PB425, an MSc level course in the department. Classes will be specific for undergraduate students.

Formative coursework: For each major and minor assessment option there is an equivalent piece of formative coursework. These are designed to help students to prepare for the summative assessments.

Formative coursework to support minor assessment

- Draft script for presentation
- Draft script for podcast
- Proposal for poster
- Proposal for visual media

Formative coursework to support major assessment

- Draft proposal for policy case study
- Outline of essay
- Draft parliamentary POSTnote and annotated bibliography
- Draft blog post and Draft Op-ed

Indicative reading:

- Brown, R. & Peherson, S. (2019). *Group processes: Dynamics within and between groups*. Oxford: Blackwell
- Forsyth, D. R. (2019). *Group dynamics*. (7th ed.). Boston, MA: Cengage Learning
- Haslam, S.A., (2004). *Psychology in Organisations. A Social Identity Approach* (2nd ed.). London: Sage
- Levi, D. (2017). *Group dynamics for teams* (5th ed.). Los Angeles: Sage

Assessment: Assignment (30%) in the WT.

Assignment (70%) in the ST.

Students will choose ONE minor and ONE major assessment from the lists below:

Minor Assessment (30%, due at the end of Winter Term)

- 10 minute recorded presentation
- 10 minute podcast
- A1 poster
- A5 visual media

Major Assessment (70%, due at the start of Summer Term)

- 3000 word Policy Case Study comprised of Executive Summary (250 words) and Proposal (2500 words)
- 3000 word Essay
- 1500 word parliamentary POSTnote with 1000 word annotated bibliography
- 1500 word blog post AND 1500 word Op-ed

PB304 Half Unit Not available in 2024/25

Organisational and Social Decision-Making

This information is for the 2024/25 session.

Teacher responsible: Miss Atrina Oraee CON.4.05 and Dr Miriam Tresh CON.3.14

Availability: This course is available on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: This course teaches theory and engages with research from the field of organisational and social decision-making. It is primarily focused on complex organisational contexts shaped by scarce resources, high uncertainty and high consequences for failure. The course provides a historical introduction to decision-making and introduces the core concepts used by social psychologists to understand (and improve) decision-making processes in organisations. It draws upon the social, cognitive and organisational psychology literatures, and considers the core concepts and tools used to understand, research, and support decision-making in organisations. These theories and tools are contextualized through empirical and case study examples taken from domains such as humanitarian operations, healthcare and finance.

Students will be encouraged to take a critical perspective, and to consider how the principles taught on the course can be applied to (and used to improve) a variety of social or organisational scenarios. The course will cover psychology (or 'Human Factors') concepts such as: intuitive and analytical forms of decision-making; individual traits and cognitive factors that influence decision-makers (e.g. biases and emotions); human error and decision-failures; rule breaking; and group decision-making processes (e.g. teamwork and leadership). It will teach methods for analysing decision errors, identifying decision-making competencies, observing decision-making, and supporting group decision processes.

By the end of the course you should:

- Understand the topic of organisational and social decision-making, and to demonstrate its importance.
- Be informed about the core theories and concepts used by psychologists to understand and explain decision-making in organisational and social settings and to relate them to theories in behavioural science.
- Be able apply this understanding in order to understand how decision-making processes influence outcomes in organisational and social settings.
- Have reviewed methods and approaches used to research real-life decision-making in psychology and behavioural science.
- Have explored the psychological and behavioural science tools and techniques for improving organisational and social decision-making processes.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 20 hours across Winter Term. There is a reading week in Week 6 of Winter term. Lectures will be delivered jointly with PB427, an MSc level course in the department. Classes will be specific for undergraduate students.

Formative coursework: For each major and minor assessment option there is an equivalent piece of formative coursework.

These are designed to help students to prepare for the summative assessments.

Formative coursework to support minor assessment

- Draft script for presentation
- Draft script for podcast
- Proposal for poster
- Proposal for visual media

Formative coursework to support major assessment

- Draft proposal for policy case study
- Outline of essay
- Draft parliamentary POSTnote and annotated bibliography
- Draft blog post and Draft Op-ed

Indicative reading:

- Bazerman, M. & Moore, D. (2009) *Judgement in Managerial Decision-Making*. Hoboken, NJ: Wiley
- Brown, R. (2000) *Group Processes: dynamics within and between groups*. Oxford: Blackwell
- Furnham, A. (2005). *The Psychology of Behaviour at Work*. Hove: Psychology Press

Assessment: Assignment (30%) in the WT.

Assignment (70%) in the ST.

Students will choose ONE minor and ONE major assessment from the lists below:

Minor Assessment (30%, due at the end of Winter Term)

- 10 minute recorded presentation
- 10 minute podcast
- A1 poster
- A5 visual media

Major Assessment (70%, due at the start of Summer Term)

- 3000 word Policy Case Study comprised of Executive Summary (250 words) and Proposal (2500 words)
- 3000 word Essay
- 1500 word parliamentary POSTnote with 1000 word annotated bibliography
- 1500 word blog post AND 1500 word Op-ed

PB307 Half Unit

Consumer Psychology for Sustainability

This information is for the 2024/25 session.

Teacher responsible: Dr Maxi Heitmayer and Dr Miriam Tresh CON.3.14

Availability: This course is available on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: The course will address the psychology of consumption at different levels of analysis: individual, group and societal. It will ground this psychology in the relevant literature, and teach you the field's foundational theories, allowing you to develop a mental model of human behaviour as it relates to consumption. This is not a standard marketing or consumer research course. It is not about brand territories and market shares, but about how understanding various psychological processes in conjunction with these forces can provide us with tools to improve the world. How can we leverage consumer psychology to solve our sustainability problem?

By the end of this course you should:

- Be able to present the social psychology of consumption at different levels of analysis: individual, group and societal level.
- Be able to relate this to core psychology and behavioural science.
- Be able to use the above to explain phenomena classically described in marketing and consumer science.
- Have explored innovative research methods, theories and business models relating to sustainability and consumption.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 30 hours across Winter Term. There is a reading week in Week 6 of Winter term. Lectures will be delivered jointly with PB417, an MSc level course in the department. Classes will be specific for undergraduate students.

Formative coursework: For each major and minor assessment option there is an equivalent piece of formative coursework. These are designed to help students to prepare for the summative assessments.

Formative coursework to support minor assessment

- Draft script for presentation
- Draft script for podcast
- Proposal for poster
- Proposal for visual media

Formative coursework to support major assessment

- Draft proposal for policy case study
- Outline of essay
- Draft parliamentary POSTnote and annotated bibliography
- Draft blog post and Draft Op-ed

- 3000 word Essay
- 1500 word parliamentary POSTnote with 1000 word annotated bibliography
- 1500 word blog post AND 1500 word Op-ed

PB308 Half Unit

Social Psychology of Economic Life

This information is for the 2024/25 session.

Teacher responsible: Dr Frederic Basso CON 4.10 and Dr Miriam Tresh CON.3.14

Availability: This course is available on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: The idea of a social psychology of economic life is not obvious. From the point of view of mainstream economics, economic life – usually understood as the production, distribution, and consumption of goods and services – is under the scope of economics. As a mathematical science, economics is, to some extent, a rejection of social and psychological dimensions in the analysis of economic life. As the “queen of social sciences”, mainstream economics was even considered by some authors as the framework (the so-called “economic imperialism”) for studying social and psychological processes out of the economic life. Yet, some of the most important advances over the last four decades in the understanding of human economic behaviour (and its link to some of the most pressing societal issues nowadays) are derived from concepts and methods of psychology and other social sciences.

This course presents how social psychology (broadly interpreted to include micro-sociology, cultural anthropology and social neuroscience) is the key to understanding real-world economic life by taking into account cognitive, affective and social processes, and also to contributing to better solutions to societal problems. By the end of the course you should:

- Understand economic theories and key relevant phenomena in everyday life.
- Have considered the limitations of economic theories from the perspective of social psychology.
- Be able to relate the above to psychology and behavioural science.
- Have explored solutions to the limitations inspired by social psychology and behavioural science.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 25 hours across Winter Term. There is a reading week in Week 6 of Winter term. Lectures will be delivered jointly with PB431, an MSc level course in the department. Classes will be specific for undergraduate students.

Formative coursework: Students will be expected to produce 1 other piece of coursework and 1 other piece of coursework in the WT.

For each major and minor assessment option there is an equivalent piece of formative coursework. These are designed to help students to prepare for the summative assessments.

Formative coursework to support minor assessment

- Draft script for presentation
- Draft script for podcast
- Proposal for poster
- Proposal for visual media

Formative coursework to support major assessment

- Draft proposal for policy case study
- Outline of essay
- Draft parliamentary POSTnote and annotated bibliography
- Draft blog post and Draft OpEd

Indicative reading:

- Lea, S., Tarpy, R.M. & Webley, P. (1987) *The Individual in the Economy: a textbook of economic psychology*, Cambridge: Cambridge University Press
- Lewis, A., Webley, P. & Furnham, A. (1995) *The New Economic Mind: The social psychology of economic behaviour*. Hemel Hempstead: Harvester
- Lewis, A. (ed.) *The Cambridge Handbook of Psychology and Economic Behaviour* Cambridge: Cambridge University Press
- Webley, P., Burgoyne, C., Lea, S. & Young, B. (2001) *The Economic Psychology of Everyday Life*. Hove: Psychology Press

Assessment: Assignment (30%) in the WT.

Assignment (70%) in the ST.

Students will choose ONE minor **and** ONE major assessment from the lists below:

Minor Assessment (30%, due at the end of Winter Term)

- 10 minute recorded presentation
- 10 minute podcast
- A1 poster
- A5 visual media

Major Assessment (70%, due at the start of Summer Term)

- 3000 word Policy Case Study comprised of Executive Summary (250 words) and Proposal (2500 words)
- 3000 word Essay
- 1500 word parliamentary POSTnote with 1000 word annotated bibliography
- 1500 word blog post AND 1500 word Op-ed

PB310

Independent Research Project

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Curran CON 3.16

Availability: This course is compulsory on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

The BSc in Psychological and Behavioural Science is accredited by the British Psychological Society. Students will be eligible for Graduate Basis for Chartered Membership if they gain a lower second classification (2:2) overall and pass this course.

Pre-requisites: Students should have taken Year 1 and Year 2 of the BSc in Psychological and Behavioural Science, which provide the necessary knowledge and skills to undertake guided independent research.

Course content: The Independent Research Project is an empirical investigation, carried out by students under supervision. Research topics and methodologies vary considerably, but must relate to Psychological and Behavioural Science as broadly understood.

All research topics will need to be approved in advance by a supervisor who is a faculty member of the Department of Psychological and Behavioural Science.

The final lectures in PB230, Intermediate Statistics and Research Methods for Psychological and Behavioural Science, will serve as an introduction to the Independent Research Project. After this, students will be presented with the research interests and skills of supervising faculty. Students will then decide on potential topics during the summer vacation, ready to start work in early Michaelmas Term of Year 3. Faculty can supervise both qualitative and quantitative projects.

Supervisors will meet regularly with students individually and as groups to; guide the formulation of the research question and investigative methods, complete pre-registration, plan a timeline, develop reading lists, obtain ethical approval, and provide feedback on the research as it unfolds.

Students should see the project as much as an exercise in project management as it is an investigation. Throughout the process, attention should be given to replicability and transparency.

Teaching: Supervisors will offer regular sessions and each student will be expected to meet with their supervisor at least twice in Autumn term and twice in Winter term. Supervision sessions will be available both individually and within groups.

After the introduction at the end of PB230, there will be two 2-hour lectures in Year 3 which are designed as check-in points.

There will also be regular support sessions available with staff from the Behavioural Lab for Research and Teaching to assist with the planning and completion of experimental work.

Formative coursework: To ensure continued progress throughout the year students will be expected to:

- 1 Draft a timeline and discuss this with their supervisor in AT
- 2 Write a short summary of progress on the research in WT

Indicative reading:

- American Psychological Association. (2020). *Publication manual*

of the American psychological association (7th Edition).

- Bernard, H. R. (2000) *Social Research Methods: Qualitative and quantitative approaches*. 160 London: Sage. 160
- Dittmann, M. (2005) Starting the dissertation *GradPsych* 2005(1)
- Flick, U. (2015) *Introducing Research Methodology: A Beginner's Guide to doing a research project* (2nd ed.). London: Sage.
- Harrison, E., & Rentzelas, P. (2020). *Your Psychology Dissertation*. London: Sage.
- Holman, A.J. & Jones, T. (2018) Identifying a Topic for a Psychology Dissertation: A Process Map for Students *Psychology Teaching Review* 24(1)
- Levin, P. (2005) *Excellent Dissertations* Maidenhead: Open University Press

Assessment: Project (80%) in the ST.

Report (20%) in the AT.

- **Report (20%) in AT:** Students will be required to submit a research compendium for their research at the end of Autumn Term.
- **Project (80%) in ST:** The final project will be due in early Summer Term. It will consist of two objects your report and your final research compendium. The report should be no more than 25 pages in APA style. The compendium should contain folders for methods, analysis (if you're doing a quantitative study), ethics and any appendices (data of quantitative study, transcripts if qualitative study, and any tools used). Only the report will be marked, but the compendium should be well populated for replicability and transparency.

PB312 Half Unit

Research Apprenticeship

This information is for the 2024/25 session.

Teacher responsible: Dr Deema Awad CON.5.18

Availability: This course is available on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

The number and type of apprenticeship places available each year will be governed by the research taking place in the department of Psychological and Behavioural Science

We will do our best to provide apprenticeships to all students that wish to take this course but we may have to limit numbers. Where there are more students wanting to take the course than there are apprenticeships available places will be allocated on an application basis.

Once students have a place on the course, they will be asked to shortlist their three preferred apprenticeships and provide a statement explaining why they would like to work in these labs. As far as possible, we hope to allocate students to one of their three choices. However, this may not always be possible; in these cases we will use the statements provided to inform our decisions.

Pre-requisites: Students must have completed Statistics and Research Methods for Psychological and Behavioural Science (PB130) and Intermediate Statistics and Research Methods for Psychological and Behavioural Science (PB230).

Course content: This course offers students at the advanced stages of the BSc in Psychological and Behavioural Science to gain experience working as a research apprentice in an active research 'lab' within the department. Some labs will host one apprentice, some may host several. Research Apprenticeships offer students a hands-on introduction to research in the department.

A lab can be anything from a qualitative study; to an analysis of real-world data; to the development of a theory or concept; to an experimental investigation taking place in the Behavioural Lab for Teaching and Research. A lab is distinct from a project in that it introduces rigour, standards and will have appropriate checks and balances.

For each lab, an induction session will introduce the student(s) to the research topics and approach of the lab. After this, structured research training sessions will teach the student(s) the key skills and techniques needed to conduct the research. The student(s)

will spend the bulk of their time providing research support; this may take the form of design and preparation of study materials, recruitment of participants, collection of data (e.g. through on-street surveys, running lab experiments, conduct of interviews/focus groups, online media analysis, etc.), and preparation of data for analysis. Where possible, students will also be exposed to training in how the data collected during their time in the lab will be analysed. The student(s) are expected to attend all lab meetings, during which research ongoing in the lab is presented and discussed.

The goal of this course is to help students learn the skills needed to conduct successful research by taking part in the day-to-day tasks of a PBS lab. Students will benefit from structured mentoring and feedback from experienced researchers.

Teaching: The 'teaching' on this course will involve active training and participation in an ongoing lab. The specific activities will vary from one lab to another, but they will typically involve an introductory session, several lab meetings and training sessions. You should expect to spend the equivalent of ten term weeks as an apprentice. Given the nature of this course, the exact start and finish times, and how much time is required each week will vary between labs. As an indication, we expect most apprenticeships to start around the middle of Autumn Term and finish around the middle of Winter Term.

Students will spend the bulk of their time working on structured research tasks.

Formative coursework: During the apprenticeship students will need to complete two pieces of formative work. This is designed to cement the training that the student will receive and prepare them for the summative assessments:

- Write a summary of a key text, discussing its implications for the lab's research.
- Develop a piece of work support the chosen second assessment (draft of the research report; proposal for the poster; draft of the literature review / annotated bibliography; draft of the further research proposal; plan for the presentation).

Indicative reading: Readings appropriate to the research topic of the labs will be provided by the lab lead(s) at the start of the course. Readings are specific to the labs offering this course, and will cover core readings on the theory, findings & research approaches pertinent to the lab in question.

Assessment: Learning log (50%) and assignment (50%) in the WT.

Learning Log (50%) in WT: You will maintain a research diary during your apprenticeship.

Assignment (50%) in WT: For the second assessment, students will choose one assessment from the list below to demonstrate the outcome of the lab and/or the potential for future research. Students should work with the lab lead to ascertain the best type of assessment for their lab.

- Research Report of between 2000 and 3000 words.
- A1 Poster.
- Literature Review and/or annotated bibliography of between 2000 and 3000 words.
- Further research proposal of between 2000 and 3000 words.
- Recorded Presentation of between 10 and 15 minutes.

PB314 Half Unit

Behavioural Science in an Age of New Technology

This information is for the 2024/25 session.

Teacher responsible: Dr Steward Mills and Dr Miriam Tresh
CON.3.14

Availability: This course is available on the BSc in Psychological and Behavioural Science. This course is not available as an outside option nor to General Course students.

Course content: When Psychology and Economics got "married", the product was Behavioural Science. Although this discipline has elevated theoretical and practical understanding of human

behaviour to previously unseen heights, recent technological developments have produced new insights in understanding and predicting people's actions that not only supplement traditional tools of behavioural science but also go beyond them. The future of the discipline will therefore likely depend on how effectively behavioural scientists can harness new developments in technology to understand and change the way people act.

The course will tackle behavioural science in relation to motion tracking, virtual environments, social robotics, social networks, and other relevant developments in information technology.

By the end of the course you should:

- Understand major technological advancements that are relevant for predicting, influencing, and understanding human psychology and behaviour.
- Be able to outline how the above can supplement and extend commonly used tools of behavioural change.
- Have examined how a wide range of technological developments can be used to propel psychological and behavioural science into the future.
- Have investigated whether new technologies merely allow behavioural scientists to scale up traditional tools of behavioural change, or whether they produce new insights that can result in novel tools of behavioural change previously unknown to behavioural scientists.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 20 hours across Winter Term. There is a reading week in Week 6 of Winter term. Lectures will be delivered jointly with PB434, an MSc level course in the department. Classes will be specific for undergraduate students.

Formative coursework: For each major and minor assessment option there is an equivalent piece of formative coursework. These are designed to help students to prepare for the summative assessments.

Formative coursework to support minor assessment

- Draft script for presentation
- Draft script for podcast
- Proposal for poster
- Proposal for visual media

Formative coursework to support major assessment

- Draft proposal for policy case study
- Outline of essay
- Draft parliamentary POSTnote and annotated bibliography
- Draft blog post and Draft OpEd

Indicative reading:

- Krpan, D., & Urbanik, M. (2020). From Libertarian Paternalism to Liberalism: Behavioural Science and Policy in an Age of New Technology. *Behavioural Public Policy* 1-27
- Kosinski, M., Stillwell, D., & Graepel, T. (2013). Private traits and attributes are predictable from digital records of human behavior. *Proceedings of the National Academy of Sciences*, 110(15), 5802-5805.

- Broadbent, E. (2017). Interactions with robots: The truths we reveal about ourselves. *Annual Review of Psychology*, 68, 627-652.

Assessment: Assignment (30%) in the WT.

Assignment (70%) in the ST.

Students will choose ONE minor **and** ONE major assessment from the lists below:

Minor Assessment (30%, due at the end of Winter Term)

- 10 minute recorded presentation
- 10 minute podcast
- A1 poster
- A5 visual media

Major Assessment (70%, due at the start of Summer Term)

- 3000 word Policy Case Study comprised of Executive Summary (250 words) and Proposal (2500 words)
- 3000 word Essay
- 1500 word parliamentary POSTnote with 1000 word annotated

bibliography

- 1500 word blog post AND 1500 word Op-ed

PH103

The Big Questions: An Introduction to Philosophy

This information is for the 2024/25 session.

Teacher responsible: Dr Paola Romero

Availability: This course is compulsory on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available on the BA in Social Anthropology, BSc in Economic History and Geography, BSc in International Relations, BSc in International Social and Public Policy, BSc in Politics, BSc in Politics and International Relations, BSc in Psychological and Behavioural Science and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None

Course content: At some point in our lives, we are all gripped by deep and fundamental questions. Questions about life, the universe and everything. Philosophers aim to make progress on these questions with clear and precise arguments. In this course, some of the big questions we may address include:

- (1) Do I know anything?
- (2) What is consciousness?
- (3) Do I have free will?
- (4) How can I tell right from wrong?
- (5) What's the best form of government?

No one has definitive answers to these questions. But understanding the possible answers, and the arguments for and against them, is what philosophy is all about.

By grappling with these questions, you will learn the essential skills of a philosopher. First, you will develop your ability to read philosophical texts, focusing on how to extract and present a philosophical thesis and argument in a clear, logical way. Second, you will develop your thinking skills and analytical abilities by participating in philosophical discussions with your peers. Finally, you will develop your ability to construct philosophical arguments of your own by writing philosophy essays.

The questions of this course are some of the hardest that have ever been asked. We can't promise that you'll feel any closer to knowing the answers at the end of the course than you did at the beginning. But this course will help you understand the big questions, and to think about them in a reflective, philosophical way.

Teaching: 10 hours of lectures and 15 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

In addition to the regular class content, the 90 minutes long AT classes will also provide you with practical advice and exercises to improve your writing style.

This course is delivered through a combination of classes and lectures totalling a minimum of 45 hours across Autumn Term and Winter Term. This course includes a reading week in Week 6 of Autumn and Winter Term.

Formative coursework: Students will be expected to write three pieces of formative coursework during the year.

Indicative reading: The readings will be articles and excerpts from books and will be made available via Moodle.

Assessment: Essay (40%, 1500 words), coursework (40%) and exercise (10%) in the ST.

In-class assessment (10%) in the AT and WT.

You will be assessed in class throughout the year using short-answer questions.

You will produce coursework in the form of a video learning diary. This will consist of short segments on different topics recorded throughout the year, recorded in accordance with your teacher's

instructions.

Your summative essay will be a revision of one of your formative essays, using feedback from your class teacher and other appropriate sources.

This essay will be accompanied by a 750-word reflective commentary explaining how feedback and participation in learning activities enabled you to improve your essay.

PH105 Half Unit

Historical and Global Perspectives on Philosophy

This information is for the 2024/25 session.

Teacher responsible: Dr Marie Milofsky

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This syllabus is conceived as a travel across space and across time, zooming in and out of particular places at particular periods.

We will first go to Ancient China at the time of the Warring States Period. Several schools of thought flourished during these 250 years: Confucianism, Mohism, Daoism or Legalism. We will explore the political responses suggested by Mozi (Mohist doctrine) and Laozi (Daoist school) to this violent period of history. Where Mozi suggested a stronger political structure, Laozi recommended 'non-action'.

Our travel will next take us to south Asia, at the beginning of Buddhism. Buddhist ethics promotes a deep-rooted work on human behaviour through ethical conduct, meditation and perception of the world. Unfortunately, the theory is not always followed in practice, and we will see that justifications for war grew in Buddhism despite a strict interdiction to kill.

After the birth of Islam in the 7th Century, a flourishing medieval Muslim philosophy emerged; Avicenna, Al Ghazali, Averroes, just to name a few, brought the use of reason into faith. Their field of exploration was rather vast, ranging from the cosmological argument to the debate on free will vs determinism and moral responsibility. We will cover one of these themes.

1492, Columbus arrived in South America. Walking in the Spaniards' footsteps, we witness the 'Destruction of the Indies' through war, genocide, enslavement and colonisation. Dominican Friars who came to teach the Gospel opened some of the most interesting legal debates on: who has jurisdiction over these territories? To whom belong the natural resources? Is it permissible to restrict the immigration right? If yes on which grounds? ... You will re-enact these debates as a member of a team.

Our journey ends in Africa where post-colonial philosophers ask fundamental questions about the definition and purpose of philosophy. We will then focus on the work of Nkiru Nzegwu; she argues that the feminist movement is a Western construct that may adequately identify and address the issues of women in the West, but that is not adapted to the status and role of women in a society such as the Igbo one.

Teaching: 10 hours of lectures and 13 hours of classes in the WT. Please note that the classes in weeks 7, 8 and 9 are two hours long and are compulsory. A summative exercise (30% of the final grade) will take place during these sessions. Attendance to the lectures in these weeks is strongly recommended.

No meetings will take place in reading week (Week 6).

Assessment: Coursework (60%, 2250 words) in the ST.

Class participation (10%) and in-class assessment (30%) in the WT. The in-class assessment is a game based on a presentation and debates.

The written assignment is composed of a 1,500 words essay and 750 words reflective commentaries.

PH111 Half Unit

Introduction to Logic

This information is for the 2024/25 session.

Teacher responsible: Dr Wesley Wrigley

Availability: This course is compulsory on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Arguments and inferences play a fundamental role in almost all areas of human life and society. For example, a scientist will test a theory by reasoning that if that theory is true then some other claim, one that can be checked experimentally, must be true as well. Or a politician will defend a policy by putting forward an argument in favour of it and criticising counterarguments. More mundanely, we reason, argue and draw inferences all the time and our actions are guided by the conclusions we draw. We are so used to this that we are often not even aware of it.

Logic is the study of arguments and inferences – it therefore has an enormously broad scope. Its main task is to give an explicit characterisation of those arguments and inferences that are valid (and hence differentiate them from those that are invalid). Logic tells you exactly when some conclusion follows from some premises and when it does not. It turns out that most arguments we encounter in everyday life are far from the ideal of logical validity. However, good philosophers and scientists should be able to devise arguments satisfying that ideal. This skill can also be of great advantage in fields such as law or public policy.

We train this skill based on classical theories of logical consequence. Among other things, the course provides rigorous answers to the following questions.

- 1 What exactly are arguments and inferences and which quality criteria should they satisfy?
- 2 Under what conditions is an argument or inference logically valid?
- 3 How can one demonstrate that an argument or inference is valid?
- 4 How can one demonstrate that an argument or inference is not valid?

The course begins with a simple system called sentential or propositional logic, which despite its simplicity captures a significant range of important arguments. The course then focuses on (first-order) predicate logic, which is much more powerful and provides the logical basis for analysing a great variety of arguments and theories.

Teaching: 15 hours of lectures and 10 hours of classes in the AT. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Formative coursework will take the form of problem sets and online quizzes. Students are required to complete problem sets before the associated class and to be ready to present and discuss their answers in class. Online quizzes serve as continuous formative assessment.

Indicative reading: There will be comprehensive lecture slides and materials covering the entire course content. Indicative background readings include:

- Button, T. and Magnus, P.D. (2017): forall x: *Cambridge*, URL= <<http://www.homepages.ucl.ac.uk/~uctytbu/OERs.html>>
- Copi I.M., Cohen, C. and McMahon K. (2014): *Introduction to Logic*. Pearson.
- Salmon, M.H. (2013): *Introduction to Logic and Critical Thinking*. Wadsworth.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

PH112 Half Unit

Intermediate Logic and Probability

This information is for the 2024/25 session.

Teacher responsible: Dr Xinhe Wu

Availability: This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed, or be in the process of completing PH111 Introduction to Logic.

Course content: This course aims to familiarise students with intermediate topics in logic (building on PH111 Introduction to Logic). It focuses on concepts and theories that are useful for a deeper understanding and critical analysis of claims and arguments in contemporary philosophical research and in the social and natural sciences.

The art of defining

The modern theory of definitions offers a precise definition of 'definition' as well as rigorous criteria for checking whether a definition is formally correct. The skill of defining in a correct way can hardly be overestimated in areas such as philosophy, science, law and public policy. It prevents misunderstandings and can drastically improve the clarity of concepts, claims and arguments. It is particularly important for philosophers because many philosophical questions require definitions as answers (e.g., 'What is knowledge?', 'What is truth?', 'What is a just society?', 'Under which conditions is an act morally wrong?').

Set theory and model theory

Scientists often use mathematical structures to model real-world systems and to predict or explain their behaviour. Model theory is the study of mathematical structures from a logical point of view. It rests on set theory, which can be viewed as the foundation of modern mathematics. Students will be introduced to core concepts of set theory and model theory that help to better understand the formal architecture of scientific theories and models.

Possible world semantics

Classical logic only deals with truth-functional logical connectives (e.g., 'not', 'and', 'or'). However, there are also non-truth-functional connectives which play a central role in philosophical and scientific reasoning. Prime examples are counterfactual conditionals ('if A were the case, then B would be the case') and modal notions (such as 'it is possible that A' and 'it is necessary that A'). But what exactly is the meaning of these notions? In other words: how could a semantics for such non-truth-functional connectives look like? This course introduces students to the basic ideas of possible world semantics.

Probability theory and inductive logic

In the case of a deductively valid inference, it is utterly impossible that the conclusion is false when the premises are true. However, many inferences we draw in practice do not satisfy this ideal of validity. Often, it is only improbable that the conclusion is false given that the premises are true. In such cases, the premises support the conclusion to some degree, but their truth would not guarantee the truth of the conclusion. For example, it does not follow logically from the premise that someone smokes 40 cigarettes a day (together with background medical theories and data) that they will die early from smoking-related illness – but it is much more probable that they will than if they did not smoke. Inductive logic is the systematic study of inferences of that type. Students will be introduced to the fundamentals of inductive logic and probability theory.

Teaching: 15 hours of lectures and 10 hours of classes in the WT. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Formative coursework will take the form of problem sets and online quizzes. Students are required to complete problem sets before the associated class and to be ready to present and discuss their answers in class. Online quizzes serve as continuous formative assessment.

Indicative reading: There will be comprehensive lecture materials covering the entire course content. Indicative background readings include:

- Gupta, A. (2015): "Definitions", *Stanford Encyclopedia of Philosophy*, URL=<<https://plato.stanford.edu/entries/definitions/>>.
- Fitelson, B. (2006): "Inductive Logic", Sarkar, Sahotra and Jessica Pfeifer (eds.), *The Philosophy of Science: An Encyclopedia*, Routledge.
- Hodges, W. and Scanlon, T. (2018): "First-order Model Theory", *Stanford Encyclopedia of Philosophy*, URL=<<https://plato.stanford.edu/entries/modeltheory-fo/>>.
- Papineau, D. (2012): *Philosophical Devices: Proofs, Probabilities, Possibilities and Sets*. OUP.
- Salmon, M.H. (2013): *Introduction to Logic and Critical Thinking*. Wadsworth.
- Sider, T. (2010): *Logic for Philosophy*. OUP.
- Skyrms, B. (2010): *Choice and Chance: An Introduction to Inductive Logic*. Fourth edition. Wadsworth

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

PH201

Philosophy of Science

This information is for the 2024/25 session.

Teacher responsible: Prof Miklos Redei

Availability: This course is compulsory on the BSc in Philosophy, Logic and Scientific Method. This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Science is chock full of miraculous predictions, shocking revolutions, and unexpected results that few science fiction writers could have ever dreamed of. What makes science so special? This course is a tour of the philosophical underpinnings of modern science. No background in any science is needed for this course; everything you need to know will be covered.

Indicative topics include: Emergence and institutionalization of philosophy of science as a sub-field in philosophy, the logical positivist demarcation of science from non-science, Popper's falsificationism, Lakatos' Methodology of Scientific Research Programmes, Kuhn's concept of science. Explanation: the deductive nomological explanation, statistical explanation. The positive instance account of confirmation. Foundations of probability and Bayesian confirmation. Laws of Nature: the regularity view of laws, the best systems account. Intertheory relations: reductionism and pluralism. Realism versus Antirealism: Scientific realism and antirealism, the no miracles argument, inference to the best explanation, the pessimistic meta-induction, constructive empiricism, entity realism, structural realism. Models: scientific modelling and scientific representation. Recent trends in operating modes of science.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

Formative coursework: Students will be expected to write two essays (one in AT and one in WT), and participate in class discussion.

Indicative reading: P Godfrey-Smith: *Theory and Reality: An Introduction to the Philosophy of Science*. C Hitchcock (editor): *Contemporary Debates in Philosophy of Science*.

Assessment: Essay (50%, 1500 words) in the WT.

Essay (50%, 1500 words) in the ST.

Students are expected to produce 1 summative essay in WT and 1 summative essay in ST.

PH214

Philosophy, Morals and Politics

This information is for the 2024/25 session.

Teacher responsible: Dr Daniel Guillery

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will cover key topics in **moral and political philosophy**.

The course addresses questions such as the following (indicative examples only; precise content varies from year to year): What sacrifices are we required to make for the sake of others? Does it make a moral difference that a person is less well off than she could have been? Is it permissible to cause harm to others in order to prevent greater harm? Can it benefit or harm people to bring them into existence? Do individual actions make a difference to large-scale problems such as climate change and global inequality? What moral obligations do we have to obey the law? When, and how, can we be justified in resisting injustice? When we tax the rich to give to the poor are we restricting freedom, enhancing it or redistributing it? Can the cultural circumstances in which we grow up absolve us of blame for bad beliefs? Is private property in land justified? Do moral questions have objectively correct answers? Can the members of one culture legitimately criticise the moral norms of another culture? Do states act morally permissibly in excluding would-be immigrants from their territory? What kind of rights, if any, are grounded in the value of culture? How should we rectify historical wrongs?

Topics in other areas of moral and political philosophy may also be covered.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

Formative coursework: Students will be expected to produce 2 essays in the AT and WT.

Indicative reading: Thomson, J.J. 'Self-Defense', *Philosophy and Public Affairs* 20 (1991)

Otsuka, M. 'Killing the Innocent in Self-Defense', *Philosophy and Public Affairs* 23 (1994)

Quinn, W. 'Actions, Intentions and Consequences: The Doctrine of Doing and Allowing', *The Philosophical Review* 98 (1989)

Øverland, G. 'Moral Obstacles: An Alternative to the Doctrine of Double Effect', *Ethics* 124 (2014)

Parry, J. 'Defensive Harm, Consent, and Intervention', *Philosophy and Public Affairs* 43 (2017)

Geoff Sayre-McCord, 'Metaethics', *The Stanford Encyclopedia of Philosophy* <<http://plato.stanford.edu/archives/sum2014/entries/metaethics/>>

Matthew Chrisman, What is this thing called Metaethics?

Michael Smith, The Moral Problem;

J.L. Mackie, Ethics: Inventing Right and Wrong

Nozick, R. Anarchy, State and Utopia

Locke, J. Second Treatise of Government

Cohen, G. A., 'Nozick on Appropriation', *New Left Review*, no. 150 (1985)

Jefferson, T., Letter to James Madison (1789)

Boxill, B., 'Black Reparations', *Stanford Encyclopedia of Philosophy* (2015)

Assessment: Exam (45%, duration: 2 hours) in the spring exam period.

Essay (45%, 2000 words) in the WT.

Class participation (10%).

PH222

Philosophy and Public Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Kieran Oberman

Availability: This course is compulsory on the BSc in Politics and Philosophy. This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Philosophy, Politics and Economics (with a Year Abroad). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as the following.

- What is a correct public measure of well-being?
- Should people be left to bear the consequences of their free choices?
- May the government force you to buy health insurance?
- Is torture ever justified?
- Do prosperous countries have a right to close their borders to immigrants from poor countries?
- Should hate speech be protected by freedom of speech?
- Should the development of new drugs be left to private companies rewarded by patent protection?
- What is the optimal population size and what policies may the state pursue in order to achieve it?
- Should higher education be financed by student loans or general taxation?
- Should we be free to act as we choose so long as we do not harm others?
- How should we distribute the burdens of military service?
- Should children be given the vote?

Teaching: 10 hours of lectures and 10 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT.

This course has a reading week in Week 6 of both AT and WT.

Formative coursework: Students will be expected to produce 1 essay in the AT and 2 essays in the WT.

Indicative reading: A detailed list of readings will be available on moodle. The following is an indicative sample of readings that may be discussed in the course.

- Greg Bogner and Iwao Hirose (2014). *The Ethics of Health Care Rationing*. Routledge.
- A. Voorhoeve (2018) 'May a Government Mandate More Comprehensive Insurance than People Want for Themselves?' *Oxford Studies in Political Philosophy*.
- Michael Rustin (2016), 'The neoliberal university and its alternatives', *Soundings*
- Ronald Dworkin et al (1997) 'Assisted Suicide: The Philosophers' Brief'
- Carol Kates (2004). 'Reproductive Liberty and Overpopulation' *Environmental Ethics*.
- Jonathan Wolff (2011), *Ethics and Public Policy: A Philosophical Inquiry*
- Joseph Carens (1987), 'Aliens and Citizens: The Case for Open Borders', *The Review of Politics*
- Jeff McMahan (2008), 'Torture in Theory and Practice', *Public Affairs Quarterly*
- Michael J. Robillard and Bradley J. Strawser (2016), 'The Moral Exploitation of Soldiers', *Public Affairs Quarterly*
- Annabelle Lever (2014), 'When the Philosopher Enters the Room', *Philosophy and Public Issues*

Assessment: Exam (45%, duration: 2 hours) in the spring exam period.

Essay (45%, 2000 words) in the WT.

Class participation (10%) in the AT and WT.

PH223 Half Unit

Mind and Metaphysics

This information is for the 2024/25 session.

Teacher responsible: Dr Harriet Fagerberg

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: You, me, and many other living creatures have a special set of properties in common: we have *mental properties*, like having thoughts, emotions and feelings. Not everything that exists has properties like this. Rocks don't feel joy. Tables don't make plans or promises. Chairs do not care about being sat on. How should we understand and explain this difference between things with minds and things without? This is the central question of the metaphysics of mind. Increasingly, philosophers who engage with this question aim to give a *naturalist* account of the mind: one that fits into the picture of the world offered to us by the sciences. But many features of the mind – including, in particular, conscious experience – fit uneasily into this naturalistic world view. In this course, we'll discuss some central questions in the metaphysics of mind, such as:

- Is consciousness physical? Can it be explained scientifically?
 - Does the mind extend beyond the brain and into the world?
 - Could we share mental properties with very different sorts of beings, like animals, aliens or artificial intelligences?
 - Do our mental state concepts pick out anything real?
- Along the way, we'll also keep our eyes on the methodological questions that face philosophers working in this area, such as:
- What makes a philosophical theory of the mind a good one?
 - What is involved in giving a naturalist account of the mind? Can it be done?
 - Should we treat the mind primarily as a biological phenomenon?
 - Do philosophers have anything to contribute to our understanding of the mind, or should we leave these questions to the scientists?

Teaching: 10 hours of lectures and 10 hours of classes in the AT.

Formative coursework: Students will be expected to write one short formative essay. This will be an extended outline of the summative essay assignment.

Students will be expected to participate actively in their classes.

They may be asked to give group presentations on assigned texts, or conduct small pieces of independent research, such as finding news articles relevant to the course material, to be discussed in class.

Indicative reading:

- E. Diaz-León (2008). We are living in a material world (and I am a material girl). *Teorema* 27 (3) 85-101
- Kathleen V. Wilkes (1984). Is consciousness important? *British Journal for the Philosophy of Science* 35 (3) 223-243
- Jennifer Corns (2016). Pain eliminativism: scientific and traditional. *Synthese* 193 (9) 2949-2971
- Isaac Wiegman (2016). Angry rats and scaredy cats: Lessons from competing cognitive homologies. *Biological Theory* 11 (4) 224-240

Assessment: Essay (65%, 2000 words) and reflective learning report (10%) in the WT.

Continuous assessment (15%) and class participation (10%) in the AT.

1. A 2000-word summative essay, submitted at the beginning of WT. (65%)
2. A 500 word reflective commentary explaining how you revised your essay in response to formative feedback and other learning activities, submitted at the same time as the summative essay. (10%)
3. Short answer questions on the course material, submitted throughout AT. (15%).
4. Class participation. (10%).

PH224 Half Unit

Epistemology

This information is for the 2024/25 session.

Teacher responsible: Dr Wesley Wrigley

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed, or be in the process of completing PH111 Introduction to Logic (or PH101/PH104).

Course content: Each of us represent the world as being a certain way. Perhaps we have knowledge about the world, or at any rate beliefs, or probabilities in certain possibilities. But how do we arrive at these representations? Do these representations reflect reality? And which conditions should they satisfy in order to be rational? Are perception, memory, testimony and intuitions reliable sources of information? The way that we represent the world affects the choices that we make, but how exactly do or should we arrive at decisions? These are some of the questions that we cover in this course on epistemology.

The first half of the course is an exploration of classic epistemology. We begin with the argument for skepticism about the external world, and in seeking to solve this problem we consider a range of positions and arguments in epistemology, including: the JTB account; the causal theory of knowing; reliabilism; internalism and externalism; contextualism and semantic externalism.

The second half of the course focuses on modern formal epistemology. Moving from a qualitative to a quantitative concept of belief, we explore Bayesian epistemology – a powerful account of rational degrees of belief or credence. We consider a series of puzzles for Bayesian epistemologists: the sleeping beauty problem; imprecise probabilities; awareness growth; and the surprise exam paradox.

Throughout, the aim will be to give a sharp understanding of key concepts, arguments, and the logical relationships between different ideas. We aim to give students a conceptual toolbox for rigorous analysis that can be applied to a range of areas.

Teaching: 10 hours of lectures, 10 hours of classes and 2 hours of workshops in the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

- Bertrand Russell, *The Problems of Philosophy*;
- Barry Stroud, *The Significance of Philosophical Scepticism*;
- Laurence Bonjour, *Epistemology: Classic Problems and Contemporary Responses*, 2nd Edition;
- Brian Skyrms, *Choice and Chance*

Assessment: Exam (80%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the January exam period.

Exercise (10%) and class participation (10%) in the AT.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: This course is about the ethical issues arising in the conduct of business and public administration. The first few weeks of the course will introduce you to some fundamental ideas in moral and political philosophy. Then, we will apply these ideas to a variety of problems that you may face during a career in business or government.

What responsibility do businesses have to society? Is it okay to lie, bribe, or exploit others if it's good for your business? How should civil servants weigh the interests of different citizens? Is there anything that should never be sold?

This course will not present you with a code of conduct, ready-made solutions or dogmatic answers. Instead, you will practice logical reasoning, careful analysis and critical thinking to enable you to develop your own understanding of ethical problems, with the help of philosophy. Through discussions and essays you will also develop skills in argument and writing that will help you express your thoughts in a rigorous and convincing way.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. This course has a reading week in Week 6.

Formative coursework:

Students will be expected to produce one formative essay (word limit: 1500 words), which will then be revised, following feedback, into a summative essay (2000 words).

Indicative reading:

- Milton Friedman (1970) "The Social Responsibility of Business is to Increase its Profits", *The New York Times Magazine*.
- Joseph Heath (2014) *Morality, Competition, and the Firm: The Market Failures Approach to Business Ethics*, Oxford: Oxford University Press.
- Sissela Bok (1999) *Lying: Moral Choice in Public and Private Life*. New York: Vintage Books.
- Janet Radcliffe Richards (1996) "Nephrological Goings On: Kidney Sales and Moral Arguments", *Journal of Medicine and Philosophy*, 21:375-416.
- Joseph Heath (2020) *The Machinery of Government: Public Administration and the Liberal State*, Oxford: Oxford University Press.
- Julia Driver (2009) "Normative Ethics", in *The Oxford Handbook of Contemporary Philosophy*, Oxford: Oxford University Press.
- Christopher McMahon (1981) "Morality and the Invisible Hand", *Philosophy & Public Affairs*, 10(3):247-277.
- Benjamin Powell & Matt Zwolinski (2012) "The Ethical and Economic Case Against Sweatshop Labor: A Critical Assessment", *Journal of Business Ethics*, 107(4):449-472.
- Fared Zakaria & Lee Kuan Yew (1994) "Culture Is Destiny: A Conversation with Lee Kuan Yew", *Foreign Affairs*, 73(2):109-126.
- Charles Sherwood (2022) "A Lie Is a Lie: The Ethics of Lying in Business Negotiations", *Business Ethics Quarterly*, 32(4):604-634.
- Nikhil Venkatesh (2021) "Surveillance Capitalism: a Marx-inspired Account", *Philosophy* 96(3):359-385.

Required readings amount to about two papers per week.

Assessment: Essay (80%, 2000 words) in the WT.

Class participation (20%) in the AT.

The summative essay will be a revised version of the formative essay, submitted with a commentary on how it has been changed in the light of feedback.

The class participation grade will be based on teacher assessment of student contributions to class each week. Where students have missed classes with good reason, this will not adversely affect their grade.

PH225 Half Unit

Business and Organisational Ethics

This information is for the 2024/25 session.

Teacher responsible: Dr Charles Sherwood

Availability: This course is available on the BSc in Management, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics and Philosophy, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

PH226 Half Unit

Philosophy of Society

This information is for the 2024/25 session.

Teacher responsible: Prof. J. McKenzie Alexander

Availability: This course is available on the BSc in Economic History and Geography, BSc in International Relations, BSc in

Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: No formal pre-requisites, but PH103 *The Big Questions: An Introduction to Philosophy* or equivalent is recommended.

Course content: This course examines how a number of traditional philosophical questions take on an interesting new character when we consider our existence as socially embedded entities. The course will investigate the nature of personal identity, the possibility of understanding others, social structures, the philosophical theory of action, the situationist critique of virtue ethics, the nature of social norms, and other topics. The kinds of questions considered will span epistemology, moral and political philosophy, scientific modelling, and metaphysics. The primary aim will not be to reach an agreed view on any of the issues discussed, but to develop an understanding of the concepts and theoretical frameworks which can be used to construct arguments for a particular position.

Teaching: 10 hours of lectures and 10 hours of classes in the AT.

Formative coursework: Students will be expected to write one formative essay in the Autumn Term which they will develop into a summative essay based on the feedback received. Class presentations or weekly activities may also be required, depending on the pedagogical approach of the class teacher.

Indicative reading: A detailed reading list will be provided at the beginning of the course. Indicative readings include:

- Nancy Cartwright and Elinora Montuschi (eds.), *Philosophy of the Social Sciences: a new introduction*;
- Harold Kincaid, John Dupré, and Alison Wylie (eds.), *Value-Free Science: Ideals and Illusions*;
- Jon Elster, *Explaining Social Behaviour*; 160
- John H. Miller and Scott Page, *Complex Adaptive Systems*;
- Dawn Langan Teele, *Field Experiments and Their Critics: Essays on the Uses and Abuses of Experimentation in the Social Sciences*;
- J. McKenzie Alexander, *The Open Society as an Enemy*
- Alex Rosenberg, *Philosophy of Social Science (Fifth edition)*;
- Harold Kincaid, *Philosophical Foundations of the Social Sciences*;
- Daniel Steel and Francesco Guala (eds.), *The Philosophy of Social Science Reader*;
- Michael Martin and Lee McIntyre (eds.), *Readings in the Philosophy of Social Science*.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Essay (50%, 2000 words) in the WT.

The summative assessment for this course will consist of one essay and one exam. The summative essay can be a revised and expanded version of the formative essay, taking into account the feedback received. If this is done, an additional 500-word supplementary response needs to be submitted, explaining how the essay was revised in light of the feedback received, detailing the changes made along with the reasons why.

PH227 Half Unit Not available in 2024/25 Genes, Brains and Society

This information is for the 2024/25 session.

Teacher responsible: Dr Harriet Fagerberg

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines, from a philosophical perspective, the interplay between social, biological, and genetic

causal factors in science and society.

Topics covered include:

Human nature: Does the concept of 'human nature' have any biological basis? Can we distinguish between those traits which are part of 'human nature' and those which are not? Should we attempt to improve human nature by means of technologies such as gene editing?

Natural Kinds and Social Kinds: Are some categories more 'natural' than others? How do we distinguish social kinds from natural kinds? In what ways do biological and social scientific kinds change in response to changes in the social world? Does this threaten the objectivity of science?

Biological Functions: In virtue of what do our bodies have functions? Are biological norms part of the natural world, or a human invention? What does it mean for a trait to fail to perform its function? How does biological function relate disease and disability?

Mental Disorders and Brain Disorders: What are psychiatric disorders? Are psychiatric disorders biological or social phenomena? Are mental disorders better understood as physical brain diseases, or are some psychiatric illnesses 'purely mental'? What does all this imply for treatment?

Sex and Gender: Are 'sex' and 'gender' the same thing? Are gender categories natural or social? Are there robust psychological differences between men and women? If so, are these 'hardwired' into the brain or the product of socialisation?

Teaching: 10 hours of lectures and 10 hours of classes in the AT. Lectures: Weeks 1-5 and 7-11

Classes: Weeks 1-5 and 7-11

Formative coursework: Essay (1,500 words) in the AT.

Indicative reading: Suggested introductory readings:

- Garson, J. (2019). What biological functions are and why they matter. Cambridge University Press.
- Hannon, E., & Lewens, T. (Eds.). (2018). Why we disagree about human nature. Oxford University Press.
- Hacking, I. (2000). The social construction of what?. Harvard university press.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

PH230 Half Unit

Einstein for Everyone: From time travel to the edge of the universe

This information is for the 2024/25 session.

Teacher responsible: Dr Nadia Blackshaw

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: Does the universe have an edge? Is time travel possible? What is a black hole, and in what sense are space, time and gravity a matter of "geometry"? The modern theory of spacetime introduced by Einstein provides a precise framework in which to ask these questions. This course makes their analysis accessible to everyone.

Students will have the opportunity to engage with Einstein's theories of relativity, to use them to analyse philosophical problems, and to examine their philosophical and practical implications. Students will learn to apply these conceptual tools to the analysis of space, time and gravity, as well as to formulate and argue for their own perspectives on the philosophical implications of relativity theory.

One is often faced with unsubstantiated declarations about the

implications of Einstein's theories, by both scientists and non-scientists. This course will equip non-scientists with the conceptual tools needed to critically analyse these claims for themselves. It will also provide students with the tools needed to discuss the philosophy of space and time from a modern perspective. Einstein for Everyone requires absolutely no background in physics or maths.

Teaching: 10 hours of lectures and 10 hours of classes in the AT. This year, some or all of this teaching will be delivered through a combination of virtual classes and flipped-lectures delivered as short online videos.

Formative coursework: Students will be expected to produce 1 problem sets and 1 other piece of coursework in the AT.

Indicative reading:

- Norton, John D. (2015) *Einstein for Everyone*.
- Hugget, Nick. (2010) *Everywhere and Everywhen: 160 Adventures in Physics and Philosophy*.
- Einstein, Albert (1920) *Relativity: The special and general theory*.
- Euclid (1908) *The Thirteen Books of Euclid's Elements*, Vol I.
- Poincaré, Henri (1905) *Science and Hypothesis*.

Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles.

Assessment: Exam (45%, duration: 1 hour and 30 minutes, reading time: 5 minutes) in the spring exam period.

Essay (45%, 2000 words) in the AT.

Class participation (10%).

The exam for this course is an e-Exam, an invigilated in-person exam on the LSE campus in which, instead of completing your answers on a paper script, you use your own personal laptop to type your answers and submit electronically.

e-Exam duration: 1 hour and 30 minutes with 5 minutes reading time in the Spring exam period.

PH232 Half Unit

Physics and Uncertainty: From Quantum Jumps to Stock Market Crashes

This information is for the 2024/25 session.

Teacher responsible: Dr Nadia Blackshaw

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: One of the most surprising discoveries of 20th century physics is that enormous progress can be made by embracing our uncertainty, and modelling it using probabilistic techniques. This powerful thinking led to discoveries like the first evidence of the atomic hypothesis, that the matter is made of tiny atoms moving randomly about. It also paved the way for the discovery of quantum mechanics, our best theory of matter and energy. These techniques even spilled outside of physics, into places like the social and financial world, where similar techniques were applied.

This course is about some of the philosophical issues underlying the physics of uncertainty, and the kinds of issues they raise for the natural and social sciences.

Students in this course will explore some of the important conceptual and philosophical questions underlying physics and finance, like: How are assumptions about randomness compatible with observed forms of determinism? How is it possible to seek truth using statistical theories? What does it mean to be an atom? How does the quantum world differ from the everyday world? What explains why physical models have unexpected applications in finance? To what extent do such applications help to underpin how the prices of financial instruments are set?

This course will proceed at a conceptual level that is suitable for

students of all backgrounds: no background in physics is needed, and there is no advantage to having one.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. This year, some or all of this teaching will take place online.

Formative coursework: Students will be expected to produce 1 problem sets and 1 other piece of coursework in the WT.

Indicative reading: Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles. Some indicative readings include:

- MacKenzie, Donald. *An Engine Not a Camera*, excerpts.
- Malkin, Burton G. *A random walk down Wallstreet*, excerpts.
- Norton, John D. *Einstein for Everyone*, Chapters 34-37 on Brownian motion and the origins of quantum theory.
- Weatherall, James O. *The Physics of Wallstreet* (optional further reading)

Assessment: Exam (45%, duration: 1 hour and 30 minutes, reading time: 5 minutes) in the spring exam period.

Essay (45%, 2000 words) in the WT.

Class participation (10%).

The exam for this course is an e-Exam, an invigilated in-person exam on the LSE campus in which, instead of completing your answers on a paper script, you use your own personal laptop to type your answers and submit electronically.

PH236 Half Unit Not available in 2024/25

Set Theory

This information is for the 2024/25 session.

Teacher responsible: Prof Miklos Redei (LAK.4.03) and Dr Wesley Wrigley (KGS.2.06)

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have taken *Introduction to Logic* (PH111) and obtained a grade of at least 65. Students who have not taken PH111 should instead have taken *Mathematical Proof and Analysis* (MA102) or *Introduction to Abstract Mathematics* (MA103).

Course content: The aim of the course is to make students of philosophy familiar with the elements of naive set theory.

Two types of concepts and theorems are covered:

- 1 the ones needed to understand the basic notions, constructions and mode of thinking in modern mathematical logic
- 2 those that have philosophical-conceptual significance in themselves (elementary theory of ordinals and cardinals, transfinite induction, Axiom of Choice, its equivalents and their non-constructive character, Continuum Hypothesis, set theoretical paradoxes /such as Russell paradox/).

The emphasis is on the conceptual-structural elements rather than on technical-computational details. Not all theorems that are stated and discussed are proven and not all proofs are complete. Students taking this course should tolerate abstract mathematics well but it is not assumed that they know higher mathematics (such as linear algebra or calculus).

Teaching: 10 x 1.5 hours of lectures and 10 x 1 hours of classes during Autumn Term.

Formative coursework: Students are required to submit solutions to two problem-sets, and write one essay (word limit 1,500 words) on a topic selected from a list or proposed by the student and approved by the instructor in the Autumn Term.

Indicative reading:

- Cameron, Peter: *Sets, Logic and Categories* (Springer, 1999);160
- Halmos, Paul: *Naive Set Theory* (Springer reprint 2011)

Specific sections of this text that are relevant to weekly topics will be indicated in the detailed course description and in the Moodle page of the course.

Assessment: Exam (100%, duration: 2 hours) in the January exam

period.

The exam questions are chosen from a list of questions that are made available at the beginning of the academic year ("seen exam").

PH237 Half Unit

Advanced Logic

This information is for the 2024/25 session.

Teacher responsible: Dr Wesley Wrigley

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have taken *Introduction to Logic* (PH111) and obtained a grade of at least 65.

Students who have not taken PH111 should instead have taken *Mathematical Proof and Analysis* (MA102) or *Introduction to Abstract Mathematics* (MA103).

Course content: The course begins with taking a look at the big picture: the main problems and milestones of modern logic. Then, after a quick review of classical propositional and first-order predicate logic, the course delves into the central meta-theorems about classical logic (such as the soundness and completeness theorems). This will lead the way to an outline of the famous limitative results that have philosophical ramifications: Godel's incompleteness theorems and Tarski's undefinability theorem. The course ends with exploring extensions of and alternatives to classical logic, namely modal logic, provability logic, and intuitionistic logic.

Teaching: 10 x 1.5 hours of lectures and 10 x 1 hours of classes in the WT.

Formative coursework: Students are required to hand in solutions for problem sets and to write an essay (word limit: 1500 words) on a topic that is selected from a list or proposed by the student with approval of the instructor in the Winter Term.

Indicative reading:

- Sider, Theodore (2010): *Logic for Philosophy* (Oxford University Press).
- Cameron, Peter J. (1999): *Sets, Logic and Categories* (Springer).
- Curry, H.B. (1963): *Foundations of Mathematical Logic* (McGraw-Hill).
- Smith, P. (2016): *Godel without (too many) tears* (available online).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

The exam questions are chosen from a list of questions that are made available at the beginning of the academic year ("seen exam").

PH238 Half Unit

Philosophy of Language

This information is for the 2024/25 session.

Teacher responsible: Xinhe Wu

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students taking this course should have taken a course in introductory logic such as PH111 (or PH101/PH104)

Course content: We use language all the time to express our thoughts and understand others. But how does language work?

What is it that makes squiggles on a page, or strings of noises meaningful? What are these meanings, and where do they come from? This is the starting point for an investigation into the Philosophy of Language.

Philosophers have been interested in language for centuries, and in the 20th and 21st century with the development of modern logic and the dawn of analytic philosophy, philosophy of language has taken a central role. Key questions covered in this course include: how do names refer to an object? Do words mean whatever we intend or use them to mean? What role does convention play in fixing meanings? Are our terms vague, or precise? Can a person have a private language? How do we communicate beyond the literal? What are speech acts and are they available to everyone in our society? All of these questions are of interest in their own right, and also have applications to further issues in philosophy and beyond.

Teaching: 10 hours of lectures, 10 hours of classes and 3 hours of workshops in the WT.

No meetings take place in reading week (week 6).

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading:

- Lycan, William G. (1999). *Philosophy of Language: A Contemporary Introduction*. Routledge.
- Kripke, Saul A. (1980). *Naming and Necessity*. Harvard University Press.
- Keefe, Rosanna (2000). *Theories of Vagueness*. Cambridge University Press.
- Wittgenstein, Ludwig (1953). *Philosophical Investigations*. Wiley-Blackwell.
- Grice, H. Paul (1975). *Logic and Conversation*. In Maite Ezcurdia & Robert J. Stainton (eds.), *The Semantics-Pragmatics Boundary in Philosophy*. Broadview Press. pp. 47.
- Langton, Rae & Hornsby, Jennifer (1998). *Free speech and illocution*. *Legal Theory* 4 (1):21-37.

Assessment: Exam (80%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the spring exam period.

Exercise (10%) and class participation (10%) in the WT.

PH239 Half Unit

Anarchy, Authority and Evidence: Topics in Philosophy of Law

This information is for the 2024/25 session.

Teacher responsible: Dr Lewis Ross LAK 401

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This half-unit course tackles philosophical issues raised by the law and criminal justice. No prior legal knowledge is required. The first half of the course discusses big picture questions about the purpose and defensibility of law—for example, scrutinising the obligation to obey the law, the justification of punishment, and the circumstances in which we can engage in civil disobedience. The second half of the course will examine a variety of philosophically interesting legal questions. An indicative list includes: When should a court consider something proven? How should the law use algorithms? Should we defer to juries or professional judges? Does it make sense to treat a corporation as morally responsible? Throughout the course, we explore the connection between legal philosophy and other areas of philosophy—especially moral philosophy, political philosophy, and epistemology.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT.

Formative coursework: Formative feedback will be given on a

student-led presentation to equip those taking the course with the ability to present their philosophical ideas in a clear, interesting, and rigorous way.

Indicative reading: Delmas, Candice (2018). *A Duty to Resist: When Disobedience Should Be Uncivil*. New York, USA: Oxford University Press.

Kropotkin, Petr (2015). *The Conquest of Bread*. Penguin.

Huemer, Michael (2012). *The Problem of Political Authority: An Examination of the Right to Coerce and the Duty to Obey*. Basingstoke: Palgrave Macmillan.

Nagel, Thomas (1976) *Moral Luck*. *Proceedings of the Aristotelian Society, Supplementary Volumes*. Vol. 50

Jorgensen, Renée (2020). The rational impermissibility of accepting (some) racial generalizations. *Synthese* 197 (6):2415-2431.

Hoskins, Zachary (2017). Punishment. *Analysis* 77 (3): 619–632.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

The course will be assessed by examination in Spring.

PH240 Half Unit

The Ethics of Data and AI

This information is for the 2024/25 session.

Teacher responsible: Dr Alessandra Basso

Availability: This course is compulsory on the BSc in Politics and Data Science. This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces you to the core philosophy of science, philosophy of mind, and ethics concepts needed to build better technology and reason about its impact on the economy, civil society, and government.

Some questions that the course might consider include:

- What is intelligence, and how does it vary between types of agents (human, animal, artificial)? What are the normative assumptions behind research in intelligence?
- What is data, and how can we design more ethical data governance regimes?
- Can technology be racist? If so, what are promising strategies for promoting fairness mitigating algorithmic bias?
- Can we understand black box AI and explain its outputs? Why is it morally important that we do so?
- How can we embed human values into AI systems?

Teaching: 10 hours of lectures and 10 hours of classes in the WT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Students will write a formative outline of how they would answer an essay question for the summative. Students will then respond to feedback on the outline in writing the summative. Students may also be asked to do class presentations or other activities in class, depending on the class teacher.

Indicative reading:

- Gabriel, "Towards a Theory of Justice for Artificial Intelligence", *Daedalus*
- Friedman, Kahn, and Borning, "Value Sensitive Design and Information Systems"
- Serpico "What kind of kind is intelligence?"
- Henry Shevlin, Karina Vold, Matthew Crosby & Marta Halina, "The limits of machine intelligence"
- Halina, "Insightful artificial intelligence"
- Alexandrova and Fabian, "Democratizing Measurement: Or Why Thick Concepts Call for Coproduction"
- Northcott, "Big Data and Prediction: Four Case Studies"
- Simons and Alvarado, "Can we trust Big Data? Applying philosophy of science to software"

- Viljoen, "A Relational Theory of Data Governance"
- Johnson, "Are Algorithms Value Free?"
- Munton, "Beyond accuracy: Epistemic flaws with statistical generalizations."
- Barocas, Hardt, and Narayanan, *Fairness and Machine Learning: Limitations and Opportunities* [selections]

Assessment: Essay (50%, 2000 words) in the ST.

Project (50%, 1000 words) in the WT.

For the group project, students will be assessed individually on their presentation (20%) and on an individual write-up of the group activity (30%). For students who are not able to do a class presentation on Disability and Wellbeing grounds, their entire group project mark will be determined by the individual write-up (50%). The essay is a re-write of a shorter formative outline on the basis of feedback from the class or seminar teacher and peers.

PH241 Half Unit

Animal Minds and Animal Ethics

This information is for the 2024/25 session.

Teacher responsible: Prof Jonathan Birch and Dr Alexandria Boyle

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines, from a philosophical perspective, what we know about the minds of other animals - and what this means for the ethics of how we treat them.

Topics covered are likely to include:

Understanding other animals: We will explore theoretical and methodological challenges affecting the science of animal minds, including how biases affect our interpretation of animal behaviour, and which methods can tell us most about animals' minds.

Thought and reasoning: Humans are sometimes described as the only 'rational animal'; some philosophers have even argued that animals don't think. We will examine arguments and evidence for and against ascribing thought and rationality to animals.

Sentience and consciousness: Different theories of consciousness yield different verdicts about which other animals are sentient. How should we evaluate the case for animal sentience in the face of this uncertainty? Will we ever know which animals are sentient?

Memory, planning and time: Some psychologists argue that animals are 'cognitively stuck in time', with no awareness of the past or future. We will critically examine the case for this claim, and the ethical questions it raises.

Thought in a social world: Many animals must navigate complex social dynamics. We will consider how animals understand their social worlds. Do they recognise others as agents with minds? Do they have normative concepts, like fairness or harm? Do they understand death?

Excluding other animals: Western philosophy has a long tradition of ethical theories that give either zero or very little moral consideration to other animals. We will examine (with a critical eye) how people ended up with such views, zooming in on key figures such as Aristotle, Aquinas, Descartes and Kant.

Including other animals: We will compare different ways of bringing other animals within the scope of our ethical thinking, including utilitarianism, the animal rights tradition, and the idea of ahimsa in Indian animal ethics.

Animals as food: We will consider specific ethical issues raised by the use of animals as food. What are our obligations as consumers? Do we have an ethical obligation to be vegan or vegetarian?

Animals in science: Animals, especially mice and rats, are routinely used for research purposes around the world. What are the ethical limits on animal experimentation? What does it mean to

"replace, reduce and refine"?

Teaching: 10 hours of lectures and 10 hours of classes in the AT.
Lectures: Weeks 1-5 and 7-11

Classes: Weeks 1-5 and 7-11

Formative coursework: Students will be expected to produce 1 essay in the AT.

An initial draft of the essay or essay plan (up to 1000 words) in the AT.

Indicative reading: Indicative reading:

Andrews, Kristin (2020) *The Animal Mind: An Introduction to the Philosophy of Animal Minds*. Routledge.

Andrews, Kristin (2020) *How to Study Animal Minds*. Cambridge University Press.

Beauchamp, Tom and Frey, R. G. (eds.) (2011) *The Oxford Handbook of Animal Ethics*. Oxford University Press.

Birch, Jonathan (2024) *The Edge of Sentience: Risk and Precaution in Humans, Other Animals, and AI*. Oxford University Press.

Boyle, Alexandria (2023) *Disagreement & classification in comparative cognitive science*. *Nous*.

Assessment: Essay (50%, 1500 words) in the WT.

Project (50%) in the AT.

Summative assessment will be by a collaborative project (50%) and by a 1500-word essay (50%).

The precise collaborative project is likely to vary from one year to the next. It will most likely involve writing a report for a non-specialist audience (e.g. a policy/legal brief or encyclopedia entry) about a practice involving humans' use or treatment of animals. In the essay, students will be expected to engage in an in-depth reflection on their personal contributions to the collaborative project and on the project's successes and failures more broadly.

PH311

Philosophy of Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Remco Heesen

Availability: This course is compulsory on the BSc in Philosophy and Economics. This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed a university-level introductory course in economics, such as the combination of EC1A3 and EC1B3.

Although it is a third-year course, second-year students can take it with permission.

Course content: This course provides a philosophical discussion of (1) the methods and (2) the normative commitments of contemporary economics.

(1) Here the course will focus on economic methodology and the foundations of utility theory, with an eye to important current debates in economics. We will discuss questions such as: What is utility, and how do economists measure it? Does evidence of widespread 'irrationality' from behavioural economics undermine standard microeconomic theory? Can idealised models teach us anything about real-world phenomena? If yes, how? How should we measure important economic variables, such as inflation? How do we best find out what interventions work in development? Does macroeconomics need microfoundations? Is the economics profession to blame for its failure to predict the financial crisis? (2) The second area of focus is on welfare economics, and the ethical assumptions and implications of economics. We will cover questions such as: Is getting what you want always good for you? Can you be harmed by something if you never know about it? Does it make sense to say that eating pizza gives me more happiness than going to the movies gives you? Is it possible to combine

the preferences of individuals into an overall 'social' preference? Does it matter if the well-being of some people is less than that of others? When and why are markets desirable? Is paternalism always bad, and does welfare economics really avoid it? How should we resolve collective action problems? What is a fair way to distribute the tax burden?

Teaching: 15 hours of lectures and 10 hours of classes in the AT. 15 hours of lectures and 10 hours of classes in the WT.

This course is delivered through a combination of seminars and lectures totalling a minimum of 50 hours across Autumn Term and Winter Term. This course includes a reading week in Week 6 of both Autumn Term and Winter Term.

Formative coursework: Students will be expected to produce 2 essays in the AT and WT.

Students will be expected to produce two formative essays of 1,200 words, one each on the AT and WT material respectively. Note that both of these must be submitted since a reworked version is an essential part of the summative work for the course.

Indicative reading: D. Hausman, *The Philosophy of Economics: An Anthology*; J. L. Bermudez, *Decision Theory and Rationality*; J. Cohen and W. Easterly, *What Works in Development: Thinking Big and Thinking Small*; D. Hausman and M. McPherson, *Economic Analysis, Moral Philosophy, and Public Policy*; M. D. Adler, *Measuring Social Welfare: An Introduction*; D. Satz, *Why Some Things Should Not Be for Sale*.

Assessment: Essay (35%, 1500 words) in the WT.

Essay (35%, 1500 words) in the ST.

Multiple choice quiz (20%) in the AT and WT.

Class participation (10%).

Summative Essay 1 (1,200 words, +300 words reflective commentary, 35%, due in WT) is a rewritten version of the formative essay on the AT material.

Summative Essay 2 (1,200 words, +300 words reflective commentary, 35%, due in ST) is a rewritten version of the formative essay on the WT material.

Weekly multiple-choice quizzes testing reading comprehension count for 20% of the course grade.

Class participation counts for 10% of the course grade.

PH333 Half Unit

Philosophy of Gender and Race

This information is for the 2024/25 session.

Teacher responsible: Dr Jingyi Wu

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Gender, race, class, sexualities, etc. are messy and difficult concepts. They are part of the fabric against which we come to form beliefs, attitudes, dispositions, and feelings about the world. They matter in our lives, even when we do not want or expect them to be. In this half-unit, we will utilize philosophical tools to analyze how gender, race, and other social categories have shaped our lives, and how they can shape our future. We will also think about how gender and race have shaped philosophy as a discipline, and how they can shape the future of philosophy. Topics covered may include:

Gender and Biology: How does "gender" relate to "sex"? Is our concept of biological "sex" objective, and free from gender stereotypes and norms? Is our sex fixed or changeable?

Gender and Society: Is gender a matter of internal identity, or is it an externally-imposed social class? How does sexism intersect with other oppressions, like racism and transphobia?

Race and Society: How does the social meaning of "race" vary around the world? Should we try to reconcile "ordinary" conceptions of "race" with technical conceptions of "race"?

How should we understand the directionality and limits of racial classification?

The Future of Gender and Race: Will race and gender still exist in the future? Should we try to work for a race-free and gender-free world, or should these ways of classifying people be preserved? We will focus on approaches to these questions from "analytic" philosophy, including feminist and race-critical approaches and approaches from the philosophy of science. The aim is to confront the big questions of gender and race by analysing and constructing careful and precise philosophical arguments.

Teaching: 10 hours of lectures and 10 hours of classes in the WT. Students on this course will have a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 2 pieces of coursework in the WT.

Students will have the opportunity to receive feedback on their summative essay plan.

Other formative activities may be introduced.

Indicative reading: Suggested introductory reading:

- Fausto-Sterling, 2000 [2020 New Edition]. *Sexing the Body: Gender Politics and the Construction of Sexuality*.
- Crenshaw, K., 1989. Demarginalizing the Intersection of Race and Sex: A Black Feminist Critique of Antidiscrimination Doctrine, Feminist Theory and Antiracist Politics.
- Haslanger [2000] 160 "Gender and Race, (What) Are They? (What) Do We Want Them To Be."
- Appiah, Kwame Anthony, 2005. *The Ethics of Identity*.
- Mills, Charles, 2007. "White ignorance"
- Glasgow, J., Haslanger, S., Jeffers, C. and Spencer, Q., 2019. What is Race?
- Zack, Naomi, 1993. Race and Mixed-Race. *Morality of Race*.

Assessment: Project (85%, 1500 words) in the ST.

Class participation (10%) and other (5%) in the WT.

Details of Summative Assessment:

Essay (1500 words), or instructor-approved final project of comparable length and effort (85%) in the Spring Term.

Self-evaluated participation (10%) in the Winter Term.

Weekly discussion forum postings (5%) in the Winter Term.

There is no exam for this half-unit.

PH341

Philosophy, Politics and Economics: Applications

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Rowe

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics and BSc in Philosophy, Politics and Economics (with a Year Abroad). This course is not available as an outside option nor to General Course students.

Available only to fourth-year PPE students.

Pre-requisites: The course will be available only to 4th-year PPE students.

Course content: This course will draw on concepts, theories and findings from Philosophy, Politics and Economics to tackle questions faced by decision-makers in public and private institutions. Each week will focus on a case study. Students will be expected to have had some prior exposure to the issues in previous courses—this course will stand out by being more interdisciplinary, in-depth and practical. Questions covered may include:

1 Risky public decisions: Decision theorists speak of risky situations when the decision-maker can assign probabilities to all relevant outcomes of their choices. How should we assess policies such as cancer screening that expose everyone to both a large chance of a small or moderate cost (such as inconvenience or false positive tests) while also saving them from a small chance of a very large harm (such as early death)?

2 Severely uncertain public decisions: Decision theorists speak

of severely uncertain situations when the decision-maker cannot assign probabilities to all relevant outcomes of their choices. How should we assess policies, such as measures to combat a novel, highly infectious disease, or climate change, in such severely uncertain situations?

3 Privacy and consent in online environments: Are current regulations involving the transfer of personal data online adequate? If not, how should they be revised?

4 The Resource Curse: In unstable or grossly undemocratic states, the presence of natural resources often leads to oppression and/or civil war. Should democracies therefore ban the purchase of natural resources from such states?

5 International reparations: What, if anything, do the formal imperial powers owe their former colonies?

6 A market for refugee quotas: Should countries who do not wish to host refugees be able to pay other countries to take them in, in a "free market" for hosting refugees?

7 Discrimination and the market: Some have argued that free markets are good because they will, over time, eliminate discrimination, both because, in markets, people will mix with people of all backgrounds and because they will be judged on the quality of their goods or services alone. How powerful is this case?

8 Concentration of wealth and economic power: In many societies, economic power is becoming increasingly concentrated, in two ways: many sectors are dominated by a handful of large firms; and wealth is becoming increasingly unequal. In which ways, if any, is this problematic? What are the implications of this concentration for democracy? Should dominant firms be forcibly broken up? Should inheritance be highly taxed?

9 Behavioural science and policy: Do the irrationalities documented by behavioural science legitimate paternalistic nudges, taxation, and subsidies? Does sensitivity of people's answers to how questions are framed make surveys about people's opinions on matters of policy untrustworthy?

10 Science and society: Can natural and social scientific expertise be deferred to in a democracy, or is such deference inimical to democratic rule? Which social institutions can ensure that scientists have the right incentives to produce reliable work, rather than fraudulent or unreliable findings? How should we decide which research gets funded?

Teaching: 15 hours of seminars and 15 hours of classes in the AT. 15 hours of seminars and 15 hours of classes in the WT. 2 hours of workshops in the ST.

The shared, large seminar will set out key ideas in a format that allows plenty of Q&A with students and for occasional short supplementary guest lectures. It will present theories and findings from the three disciplines relevant to the policy issue being studied in that week. The smaller-group classes will involve further in depth discussion of the material.

Formative coursework: Students will be expected to produce 1 exercise in the AT and 2 essays in the AT and WT.

Students will write two 1,500-word formative essays

Students will give feedback on other students' essays.

Indicative reading:

- D. Hausman, M. McPherson and D. Satz, *Economic Analysis, Moral Philosophy and Public Policy*. Cambridge University Press, revised edition, 2016.
- A. Oliver (ed.) *Behavioural Public Policy*. Cambridge University Press, 2013.
- L. Bovens, "The Ethics of Nudge." In *Preference Change*. 160Theory and Decision Library 16042 (2009): 207-219.
- L. Wenar. *Blood Oil*. Oxford University Press, 2015.

An extensive list of required and further readings will be available on Moodle.

Assessment: Essay (35%, 2000 words) and oral examination (35%) in the ST.

Exercise (15%) in the WT.

Class participation (15%).

PH344 Half Unit

PPE Research Seminar

This information is for the 2024/25 session.

Teacher responsible: Dr Vincent Harting

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

Course content: In this course, PPE students are placed in reading groups to discuss books by scholars working at the intersection of Philosophy, Politics and Economics. Philosophy faculty guide their selection of books and subsequent reading and research on the book. Each group organizes a research seminar on their book or a related topic open to the wider LSE PPE community.

Teaching: 2 hours of lectures, 6 hours of seminars and 10 hours of classes in the AT.

Two 1-hour lectures, four 1.5-hour seminars and ten 1-hour classes. No meetings take place in reading week (Week 6).

Formative coursework: Each student will lead the reading group discussion once, in the term in which their reading group takes place.

In addition, each student will be asked to write a 250 word abstract of the book review they would like to write. Students will be placed in small groups to write their book reviews on the basis of these abstracts.

Indicative reading: Examples of recent books appropriate for PPE reading groups:

- Elizabeth Anderson, *Private Government: How Employers Rule Our Lives (and Why We Don't Talk about It)* (2017)
- Kwame Anthony Appiah, *The Lies That Bind: Rethinking Identity* (2018)
- Anthony Atkinson, *Measuring Poverty Around the World* (2019)
- David Colander and Craig Freedman, *Where Economics Went Wrong: Chicago's Abandonment of Classical Liberalism* (2018)
- Robert Goodin and Kai Spiekermann, *An Epistemic Theory of Democracy* (2018)
- Kate Manne, *Down Girl: The Logic of Misogyny* (2017)
- Cailin O'Connor, *The Origins of Unfairness* (2019)
- Eric Posner and Glen Weyl, *Radical Markets: Uprooting Capitalism and Democracy for a Just Society* (2018)
- Robert Sugden, *The Community of Advantage* (2018)
- Paul Tucker, *Unelected Power: The Quest for Legitimacy in Central Banking and the Regulatory State* (2018)
- Philippe Van Parijs and Yannick Vanderborght, *Basic Income: A Radical Proposal for a Free Society and a Sane Economy* (2017)

The students will also get the chance to make their own proposals of books to read, which we will vet.

Assessment: Class participation (30%), group exercise (20%), group essay (40%) and assignment (10%) in the AT.

Participation (of which attendance is a crucial part) counts for 30% of the grade. This includes assessment of a presentation to the class of one's assigned part of a selected book. 20% is for doing one's fair share in helping to organize one of the research seminars, assessed by a short written reflection on one's contribution. Students will be asked to produce a 3,000 word book review in small groups, which counts for 40% of the grade. A first draft will be peer reviewed and discussed at a feedback workshop. The student contribution to the peer review assignment (listed as 'assignment' in the list of assessments above) will count for the final 10% of the grade (note that the book review is not peer assessed, that is, other students' feedback will not directly affect a

group's grade for the book review).

PH399

Dissertation in Philosophy

This information is for the 2024/25 session.

Teacher responsible: Dr Remco Heesen

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad) and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

Course content: The dissertation may be on any topic for which a suitable supervisor in the Philosophy department can be found.

Selection of topic

Candidates should have the subject of their dissertation approved by their supervising member of department.

Arrangements for supervision

The dissertation is an opportunity to do extended independent research and writing and to present this work to one's peers. It should reflect the candidate's own views but must develop out of some established part of the philosophical literature. Students should carefully discuss their topic and approach with their supervisor who will also advise on reading and give feedback on written work. Students must have regular meetings with their supervisor, submit written work regularly, and keep a formal record of their work and progress. Students must also present an early version of their argument to fellow students and will be given feedback on the quality of their presentation as well as on the content of their arguments. Finally, students must give a poster presentation on their dissertation at the end-of-degree showcase event in week 1 of ST.

Teaching: 2 hours of seminars in the AT. 15 hours of seminars in the WT.

1 hour of seminar(s) in the ST (for students to do poster presentations on their dissertation).

Formative coursework: The formative coursework sets out several steps towards the dissertation:

- a literature review (due in AT);
- a first 2,000 words (due in week 1 of WT),
- a subsequent 3,000 words (which may be in part a revision of the first 2,000 words), due in week 6 of WT;
- a full draft of the dissertation, due in week 11 of WT;
- a presentation of the student's arguments in WT;
- and a poster presentation in the ST.

All written coursework must be submitted by email to both the student's supervisor and the teacher responsible. Students who fail to submit this coursework on time may be barred from submitting the dissertation. Participation in the weekly seminar and the quality of the presentation will determine 10% of the final mark for the course.

Assessment: Dissertation (85%, 7000 words) in the ST. Class participation (10%) and presentation (5%).

Dissertations must be submitted in the ST, exact date to be confirmed. They should be 5,000-7,000 words, and should be typewritten.

SO100

Key Concepts: Introduction to Social Theory

This information is for the 2024/25 session.

Teacher responsible: Dr David Pinzur

Availability: This course is compulsory on the BSc in Language, Culture and Society and BSc in Sociology. This course is available on the BSc in International Relations, BSc in International Social and Public Policy, BSc in Politics, BSc in Politics and International

Relations and BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Course content: The course aims to introduce students to sociological theory by examining the work and ideas of normally eight key thinkers in social thought. For each thinker, the course will provide an overview of their contribution to the discipline of sociology, examine in detail one or more of their important texts, and also consider how their analysis could be applied to contemporary social issues.

Teaching: This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 40 hours across AT and WT, with revision sessions in ST.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: Four formative essays or their equivalent (two in AT; two in WT), for feedback from class teachers.

Indicative reading: A detailed reading list will be available at the first lecture, but for general preparatory reading, students might wish to consult the following: D Lee & H Newby, *The Problem of Sociology*; Z Bauman, *Thinking Sociologically*; S Bruce, *Sociology: A Very Short Introduction*.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

Attendance at all classes and submission of all set coursework is required.

S0102

Data in Society: Researching Social Life

This information is for the 2024/25 session.

Teacher responsible: Dr Qilyu Hong (Autumn Term) and Dr Anastasia Kakou (Winter Term)

Availability: This course is compulsory on the BSc in Sociology. This course is not available as an outside option nor to General Course students.

Course content: This course explores how numbers are deployed in social settings, and how they are used in sociology to construct and challenge our understanding of the social world. The first part of the course introduces students to the importance of quantification in modern societies, familiarizes them with the main instruments for the collection of quantitative data, and provides them with an overview of the methods used to treat such data in contemporary sociology. We cover both descriptive and explanatory methods, and we reflect on the vision of the social world implicitly associated with each of the methods we encounter. In the second part students start learning basic descriptive skills of quantitative data analysis, notably how to download large data sets, how to manipulate variables and carry out descriptive statistical analyses with statistical software Stata, and how to present statistical information in tabular and graphical form. The quantitative analysis is done in the context of a sociological observation or hypothesis, and emphasis is given on the interpretation of the results and their comparison to the findings of key readings.

Teaching: This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 40 hours across Autumn Term (AT) and Winter Term (WT). Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: One 2000-word essay (AT).

One 1500-word report including a review of key readings, data processing and descriptive statistical analysis using Stata, interpretation of results, and conclusion (WT).

Indicative reading: Desrosières, Alain. 2002. *The Politics of Large*

Numbers: A History of Statistical Reasoning. Cambridge: Harvard University Press.

Savage, Mike, and Roger Burrows. 2007. "The Coming Crisis of Empirical Sociology", *Sociology* 41: 885-898.

Catherine Marsh and Jane Elliot (2008): *Exploring Data* (2nd ed.)

Assessment: Project (50%, 3000 words) in the ST.

Take-home assessment (50%) in January.

Take home exam to be completed in the January exam period.

Attendance at all classes and submission of all set coursework is required.

S0110

Power, Inequality, and Difference: Contemporary Themes in Sociology

This information is for the 2024/25 session.

Teacher responsible: Prof Suki Ali

Availability: This course is compulsory on the BSc in Language, Culture and Society and BSc in Sociology. This course is available on the BA in Geography, BA in Social Anthropology, BSc in Politics, BSc in Politics and International Relations and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Course content: The course provides an introduction to key areas of theory and analysis in contemporary sociology. Students will gain an understanding of critical research and debates within the discipline, and of how sociology engages with topical real-world issues. The course centres on the ways in which power relations, social and economic inequalities, forms of identity and difference are shaped in contemporary societies – focusing on both formal political and socio-economic structures and everyday experiences and identities. These issues include: class, capitals and social mobility; race, ethnicity and multi-culturalism; gender and sexual identities; politics, social movements and the nation-state.

Teaching: This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 40 hours across AT and WT, with revision sessions in ST.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: Two formative essays in AT, one formative essay in WT.

Indicative reading: M. Savage (2015) *Social Class in the 21st Century*; B. Skeggs (1997) *Formations of Class and Gender*; L. Back and J. Solomos (Eds) (2000) *Theories of Race and Racism: A Reader*; A. Gutmann (Ed) (1994) *Multiculturalism: Examining the Politics of Recognition*; K. Woodward (Ed) (2004) *Questioning Identity: Gender, Class and Ethnicity*; Hill-Collins, P. (1986), 'Learning from the Outsider Within: The Sociological Significance of Black Feminist Thought' in S. Jackson & S. Scott (Eds) (2002) *Gender: A Sociological Reader*; G. Bhattacharyya (2002) *Sexuality and Society*;

West, Candace, and Don H. Zimmerman (1987) 'Doing Gender' Gender & Society 1 (2): 125-51; B Anderson (1983) Imagined Communities; E Gellner (1983) Nations and Nationalism; M. Flinders (2012) Defending Politics: Why Democracy Matters in the Twenty-First Century.

Assessment: Exam (70%, duration: 3 hours) in the spring exam period.

Essay (30%, 3000 words) in the ST.

Attendance at all classes is required and submission of all set coursework is compulsory.

S0201

Key Concepts: Advanced Social Theory

This information is for the 2024/25 session.

Teacher responsible: Dr Olivia U. Rutazibwa

Availability: This course is compulsory on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option nor to General Course students.

Course content: This course engages key sociological issues through the critical reading of theoretical and analytical texts. Students will engage with advanced concepts in sociological thought, and will explore the connections between theoretical arguments and the practice of social enquiry and analysis. Students will read a combination of social theory texts in a range of traditions as well as contemporary research studies.

Teaching: This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 40 hours across AT and WT, with a revision session in ST.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: One formative essay each term.

Indicative reading: There is no set textbook for this course - each week's teaching is based on the critical reading of key texts.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (50%, 3500 words) in the WT.

Attendance at all classes and submission of all set coursework is required.

S0203 Not available in 2024/25

Political Sociology

This information is for the 2024/25 session.

Teacher responsible: Dr Robin Archer STC.S114a and Dr Kristin Surak STC.S105

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students. This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: Political Sociology concerns the way in which political and social factors interact to produce the societies in which we live. This course aims to discuss some central empirical and theoretical questions in the field. The course begins by examining classic comparative debates about the relationship between the development of states and nations on the one hand, and the rise of capitalism and democracy on the other. We will then examine the impact that social cleavages have on parties, elections and other political institutions in a number of different countries. We will examine the strength and political impact of both labour movements and other important social movements. And we will examine why similar countries can develop very different social and economic policies. In addition we will examine some of the founding writings of Marx and Weber and critically assess the use of political concepts. Throughout the course we will

consider some of the main theoretical approaches that are used in the study of political sociology.

Teaching: This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 40 hours across AT and WT.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: A class presentation and a termly paper in both AT and WT.

Indicative reading: R Dalton, Citizen Politics, 5th edn; G Esping-Andersen, The Three Worlds of Welfare Capitalism; E. Gellner, Nations and Nationalism; A Giddens, Capitalism and Modern Social Theory; R Inglehart, Culture Shift in Advanced Industrial Society; J Manza & C Brooks, Social Cleavages and Political Change; F. Piven and R. Cloward, Poor People's Movements; D. Rueschmeyer et al, Capitalist Development and Democracy; T Skocpol, States and Social Revolutions; S Tarrow, Power in Movement.

Assessment: Exam (70%, duration: 3 hours) in the spring exam period.

Essay (30%, 2500 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Thursday of Spring Term. Attendance at all classes and submission of all set coursework is required.

S0221

Researching London: Advanced Social Research Methods

This information is for the 2024/25 session.

Teacher responsible: Dr Jana Melkumova-Reynolds and Dr Haley McAvay

Availability: This course is compulsory on the BSc in Sociology. This course is not available as an outside option nor to General Course students.

Course content: This course will provide students with a first understanding of social research design and analysis of social research data. It involves a dynamic introduction to a range of research methods, both qualitative and quantitative, through practical exercises in the context of London's social life. By the end of the course students will:

- Understand the key role of research design for conducting original empirical social research. In particular, taking into account relevant extant literature, they will develop a research question of their own interest and identify appropriate research method(s) to address it.
- Have engaged with practical research strategies and methods including the design of interview guides and survey questionnaires, conducting qualitative interviews, ethnographic observation, and a survey in the context of London.
- Have a sense of the urban sociology of London and a first-hand experience of its potential for exploring contemporary social issues.
- Be able to analyse different types of data, using a range of methods, such as thematic analysis in the case of qualitative data and regression analysis in the case of quantitative data.
- Be able to assess the quality of employed methodologies on the basis of formal criteria, such as reliability, validity and generalizability.
- Understand the ethical issues involved in social research.
- Have developed a research proposal which will strengthen their dissertation design, and might inform their dissertation topic.

Teaching: This course is delivered through a combination of lectures, online materials and workshops totalling a minimum of 50 hours across AT and WT.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: There is one piece of formative assessment which will be marked and on which you will get

feedback in the Autumn Term (AT).

Indicative reading: A. Agresti & B. Finlay (2008) *Statistical Methods for the Social Sciences*. 4th edition. Pearson.
Bryman, A. (2014). *Social research methods*, 4th edition. Oxford University Press.

Tourangeau, R., Rips, Lance J, & Rasinski, Kenneth A. (2000). *The psychology of survey response*. New York: Cambridge University Press.

Assessment: Essay (20%, 2000 words) and project (30%) in the WT.

Research proposal (50%) in the ST.

The first assessment, a qualitative interview transcript or ethnographic fieldnotes and 2000 word essay (20%).

The second assessment, a survey design group project (30%), will be carried out in Winter Term.

The third assessment, a 2,000 word research proposal (50%).

Attendance at all workshops and submission of all set coursework is required.

S0232 Half Unit

Sociology of Health and Illness

This information is for the 2024/25 session.

Teacher responsible: Dr Carrie Friese

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course is not available as a first year option.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: Sociology of Health and Illness explores the ways in which experiences of health and illness are socially patterned. We will also ask how the management of health and illness organizes social life. To explore experiences of health and illness, we will look at how specific 'medical disorders' (e.g., ageing, cancer, mental health, disabilities, reproductive and sexual health, obesity etc.) are 'embodied' in socially patterned ways. Empirical studies of specific disorders will be read, in conjunction with analysis of other kinds of texts (e.g., popular writing, film, performance art, museum exhibits, etc.). To address how the management of health and illness organizes social life and vice versa, key theories in the sociology of health and illness will be explored. This will include Parsons's sick role; Weberian and feminist understandings of professional dominance; medicalization, demedicalization and biomedicalization; stigma and stigmatization; health inequalities and the social determinants of health; and Foucaultian notions of surveillance, biopolitics and governmentality. The goal of the course is to introduce students to the historical development of, and the contemporary debates

within, the Sociology of Health and Illness as a subfield of Sociology.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: One post on Moodle of no more than 300 words, and one response to another student's Moodle post, also of no more than 300 words.

Indicative reading:

- B Prainsack. *Personalized Medicine: Empowered Patients in the 21st Century?* (2017)
- A Nelson *Body and Soul: The Black Panther Party and the Fight Against Medical Discrimination* (2011)
- Mason, KA *Infectious Change: Reinventing Chinese Public Health After and Epidemic* (2016)
- A Frank, *The Wounded Storyteller: Body, Illness and Ethics* (1997)
- E Martin *Bipolar Expeditions: Mania and Depression in American Culture* (2007)
- J Latimer *The Gene, The Clinic and the Family* (2013)
- S Kaufman *Ordinary Medicine* (2015)
- Eugene Raikhel and William Garriott *Addiction Trajectories* (2013)
- G Davis. *Contesting Intersex: The Dubious Diagnosis* (2015)
- N Tounsi. *Edges of Exposure: Toxicology and the Problem of Capacity in Postcolonial Senegal* (2018)

Assessment: Exam (60%, duration: 2 hours) in the January exam period.

Portfolio (40%) in the AT.

Attendance at all classes and submission of all set coursework is required.

S0235 Half Unit

The Sociology of Homicide

This information is for the 2024/25 session.

Teacher responsible: Dr Janet Foster

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: This half-unit course examines patterns of homicide in different contemporary societies with different social and political contexts (for example, Russia, Jamaica, USA, Colombia, South Africa, and Britain) and the explanations for their contrasting homicide incidence. We explore the differences between fictional representations of murder and its actualities both in terms of type/prevalence, as well as investigative practices. The importance of class, gender and race in patterns of homicide victimisation are explored, as well as the experiences of victims' families and the significance of murder in contemporary society.

Teaching: 30 hours of workshops in the WT.

Course Outline

Week 1 Introduction: Myth busting - we explore perceptions of homicide, what these are based on, and how these images might differ from available evidence on patterns of victimisation

Week 2 Researching Homicide: patterns, issues and problems - we explore how homicide is defined, what problems exist with these definitions and why these matter. We also discuss key theoretical explanations of homicide.

Week 3 Sherlock Holmes & CSI: the impact of crime fiction and media portrayals

Week 4 Patterns of homicide: Using case studies from different parts of the globe, with differing social and political contexts we explore patterns of homicide and the sociological explanations for these varying patterns

Week 5 Intersectionalities: gender, race, and sexuality – the risk of homicide is not equal and in this session we explore how race,

gender and sexuality feature in homicide victimisation.

Week 6 Reading week

Week 7 Presentations

Week 8 Investigating homicide – how do homicide investigations work and what factors affect the likelihood of perpetrators being caught?

Week 9 Living a life sentence: victims' families experiences

Week 10 Homicide perpetrators: why do people kill?

Week 11 Synthesis: The sociological significance of homicide

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Students are expected to read, and prepare in advance, for each of the workshops. Students must complete either a 1,500 word essay, or a poster, to be submitted in week 8, on one of the topics covered in weeks 2-5 of the course.

Indicative reading: Allsop, C. (2018) *Cold Case Reviews: DNA, Detective Work and Unsolved Major Crimes* Oxford: Oxford University Press

Allsop C & Pike S (eds.) (2024) *The Routledge International Handbook of Homicide Investigation* Abingdon

Policing and Society (2013) Vol. 23, No. 3 Special Issue on homicide

UNODC (2019) *Global Study on Homicide: Trends/Context/Data* United Nations Office on Drugs and Crime

Wilson, D (2009) *A History of British Serial Killing* London: Sphere

Assessment: Essay (80%) in the ST.

Presentation (20%) in the WT.

The essay length is between 2,500-3000 words.

SO236 Half Unit

Urban Society

This information is for the 2024/25 session.

Teacher responsible: Dr David Madden

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course is not available as a first year option.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: This course is an introduction to urban sociology and urban studies. The course is organised around a set of key concepts for developing a critical understanding of urban space today. These key concepts may include terms such as community, public space, infrastructure, displacement, segregation, multicultural, informality or social movements. The course will draw on a variety of texts that illuminate and interrogate city life from a variety of sociological perspectives, so in addition to academic studies, students will analyse planning reports, historical documents, first-person literary essays, and other representations of the urban experience.

Teaching: This course is delivered through a combination of lectures, seminars and online materials totalling a minimum of 20 hours in AT, with a revision session in ST.

Reading Weeks: Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1

essay in the AT.

Formative coursework will be due by the start of week 7. It will consist of writing a short 500 word essay asking students to take an original photograph and use it as the basis for a reflection on one of the key concepts explored in class. This reflection will serve to prepare students for their summative essay.

Indicative reading:

• Wirth, Louis. 1938. "Urbanism as a Way of Life." *American Journal of Sociology* 44 (1): 1-24.

• Gans, Herbert J. 1962. "The Community." Pp 104-119 in *The Urban Villagers: Group and class in the life of Italian-Americans*. Free Press.

These texts are examples of the articles and books from sociology and urban studies that the course will examine. The course will also analyse texts from various other urban-oriented fields and genres.

Assessment: Exam (75%, duration: 2 hours) in the spring exam period.

Essay (25%, 1500 words) in the AT.

There will be two summative assessments: a final exam and a short essay.

Final exam: 75%

Short illustrated essay (1500 words) on one of the concepts explored in class: 25%

SO237 Half Unit

Racial Borderscapes

This information is for the 2024/25 session.

Teacher responsible: Prof Suzanne Hall

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course is not available as a first year option.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis

Course content: This course explores the relationship between the racialised migration systems and the everyday life of borders. By working with the frame of 'borderscapes' this course provides opportunities to explore the spatial production of racialised borders across national, urban and intimate scales. The course critically examines border regimes by engaging in sociological and spatial perspectives. We will analyse how concepts such as 'sovereignty',

'citizenship', 'race' and 'illegality' are spatialised, bringing these into dialogue with formations such as camps, domestic interiors and workplaces. Through these spaces we will also explore practices of cultural debordering and political resistance that occur through the everyday and the commonplace. Our learning process is enlivened through student presentations and writing workshops.

Teaching: This course is delivered through a combination of lectures, classes, workshops and online materials totalling a minimum of 20 hours in WT. Students are required to attend lectures, classes and workshops.

There will be student group presentations in seminars across most weeks and a writing workshop to help prepare for the summative essay.

Students on this course will have a Reading Week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce an essay plan in the WT.

300-500 word essay plan to be submitted in Week 7 of Winter Term in preparation for the writing workshop.

The formative classwork ranges from brief in-class writing exercises, to a short essay plan on which feedback is given in a writing workshop where essay plans are further developed.

Attendance at the writing workshop is required.

Assessment: Essay (80%, 3000 words) in the ST.

Group presentation (20%) in the WT.

Attendance at all classes and submission of all set coursework is required.

are allocated on a first come first served basis.

This course cannot be taken with SP271 Psychology of Crime and Criminal Justice or SO210 Crime, Deviance and Control.

Course content: This course encourages students to think about and debate some of the major issues in the sociology of crime and crime control. We explore the social construction of crime and deviance; key factors that shape patterns, perspectives and experiences of crime and crime control, including gender, race and ethnicity, and the media. The main objective is to develop a holistic perspective on some of the key topics of criminological scholarship.

Teaching: 12 hours of lectures and 9 hours of classes in the WT. 1 hour of lectures in the ST.

Formative coursework: Students are required to complete one piece of formative assessment.

Indicative reading: There is no set text for this course. The following is useful introductory reading that includes topics covered on the course:

- Carrabine E et al (2016) Criminology: A Sociological Perspective
- Downes, D & Rock, P (2011, 4th Edition) Understanding Deviance
- Liebling, A et al, (2017, 5th Edition) The Oxford Handbook of Criminology
- Tierney, J (2018, 4th Edition) Criminology: Theory and Context
- Walklate, S (2016) Criminology: The Basics

Assessment: Essay (70%, 3000 words) in the ST.

Group presentation (30%) in the WT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the third Tuesday of Spring Term. Attendance at all classes and submission of all set coursework is required.

SO243 Half Unit

Political Sociology: Nation-States Unravelling

This information is for the 2024/25 session.

Teacher responsible: Dr Kristin Surak

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course cannot be taken in conjunction with SO203 Political Sociology. This course has a limited number of places (it is capped).

Course content: Political sociology has traditionally focused on the nation-state and how it works as a power source and power container as both a membership unit (the nation) and a territorial unit (the state). Political sociology has also often taken the limits of the nation-state for granted. This course addresses a number of key topics around nation-states while also considering key challenges to them, both epistemological (e.g. how fruitful is it to study the world by taking the nation-state as the natural unit of analysis) and substantive (e.g. in what ways is state sovereignty or state membership always partial or challenged). The focus, as we move across this terrain of "unravelling" nation-states, is broadly macropolitical.

In the first section, we set up the field of debate by breaking down what nation-states are and looking at how they operate as a key unit of analysis in much of traditional sociology. The second section moves to empire and colonial legacies to examine the very recentness of the rise of nation-states and their past and present intertwinings with empire, imperialism, and hegemony. In the third section, we look at issues around membership and exclusion, focusing on citizenship and migration. The fourth section turns to social movements and political participation to examine engagements against, with, and beyond the state. We wrap up by examining a series of contemporary challenges to nation-states that have appeared in many parts of the world. If SO203 is not offered, this course may be available in its place.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

SO240 Half Unit Not available in 2024/25

Crime, Deviance and Control

This information is for the 2024/25 session.

Teacher responsible: Dr Ioanna Gouseti STC S105a

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped). Places

This course is delivered through a combination of lectures, online materials and classes totalling a minimum of 20 hours in WT. Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Formative Presentation

Each week from Week 2 will feature a student presentation (alone or in pairs, depending on enrolment) of no more than 15 minutes that engages the readings and applies them to one or more real-world cases. This offers the opportunity for in-depth engagement of class materials by the presenter(s), which helps prepare for the final exam and helps other students "recharge" the readings in their minds before small-group discussion. It's also an opportunity to creatively work with the materials, push arguments further, and incorporate different perspectives. See the "Presentation Guidelines" on Moodle for more details on "how-to."

Formative Mock Exam

In preparation for the summative exam, there will be a formative mock exam in which students will be given three questions and chose one to answer in a 45-minute period.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

Attendance at all classes and submission of all set coursework is required.

S0244 Half Unit

The Sociology of Race and Empire

This information is for the 2024/25 session.

Teacher responsible: Dr Sara Salem

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: The course provides an introduction to theoretical, historical and contemporary debates around race, racism and empire. It covers the following thematic areas: **history; theory; experience; futurism.**

We begin by exploring the historical events and contemporary afterlives that have created a world structured by racism and colonialism. From the Enlightenment to nationalism; from science to secularism, we look at how this world came to be, and why these often-hidden histories matter. We then look at different ways people have tried to understand this world. Theoretical paradigms include anticolonial theory, the Black Radical Tradition, Queer theory, Trans* theory, and postcolonial theory, decoloniality and settler colonialism, among others. The third block looks at the everyday experiences of race and empire. From the food we eat to the way we travel, we will see that race and empire are never far from the scene. We look at the politics around tourism, climate change, technology, intimacy, movement and food to unpack the

very minute and not-so-minute ways race and empire seep into and structure our daily lives. We end the course by thinking about abolition as a means of imagining a future free of racism.

Teaching: This course is delivered through a combination of lectures/seminars and online materials totalling a minimum of 20 hours in WT.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: One formative essay (1500 words) due in Week 7 of WT.

Indicative reading: Cesaire, A. 1955. *Discourse on Colonialism*. Grove Press.

Assessment: Essay (80%, 3000 words) in the ST.

Presentation (20%) in the WT.

Attendance at all classes and submission of all set coursework is required.

S0248 Half Unit

Gender and Society

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: The course will explore the meaning of gender in contemporary society. It considers gendered relations of power and the articulation of gender with other kinds of social difference such as race, class and sexuality. A variety of theoretical perspectives will be applied to a number of substantive issues of contemporary concern.

Indicative topics are: gender and sexuality; masculinities; violence; gender and literature; representation; queer theory.

Teaching: 10 hours of lectures and 10 hours of classes in the WT, with a minimum of 1 hour in the ST.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to prepare one piece of formative assessment.

Indicative reading: S Benhabib et al, *Feminist Contentions: A Philosophical Exchange*, Routledge, 1995

 Thousand Oaks, CA: Sage, 2017

A more detailed reading list will be provided at the beginning of the course.

Assessment: Take-home assessment (80%) in the ST.
 Presentation (20%) in the WT.

Attendance at all classes and submission of all set coursework is required

S0302

The Sociological Dissertation

This information is for the 2024/25 session.

Teacher responsible: Prof Suki Ali

Availability: This course is compulsory on the BSc in Sociology. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students undertaking this course need to have completed the first two years of the BSc in Sociology.

Course content: The dissertation takes the form of an independent research project of 10,000 words on a sociological topic of the students' choosing, developed in consultation with their Academic Mentor. The dissertation process includes reviewing relevant literature on the topic of study, formulating a viable and sociologically-relevant research problem, collecting and analysing primary and/or secondary data (such as a case study, data set, fieldwork observations, corpus of texts, survey results or interviews), and writing up an independent analysis based on this research.

Students' work on the dissertation is supervised in small-group and individual tutorials with their Academic Mentor over AT and WT.

The Dissertation process is supported by a series of compulsory group workshops in the AT and WT which focus on research project design. The workshops cover topics such as identifying a sociological problem for investigation, constructing a bibliography, research ethics, research access, data collection, data analysis and writing up.

Teaching: 7 hours and 30 minutes of seminars in the AT. 6 hours of seminars in the WT.

Seminars will be structured as follows: 5 x 1.5 hour seminars in the AT. 4 x 1.5-hour seminars in the WT.

5 x 1.5-hour small-group tutorials with Academic Mentors in AT.
 2 x individual supervisions with Academic Mentors plus drop-in sessions in WT.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: One piece of formative coursework in the AT.

Assessment: Dissertation (90%, 10000 words) in the ST.
 Research proposal (10%) in the AT.

S0309 Half Unit

Atrocity and Justice

This information is for the 2024/25 session.

Teacher responsible: Dr Claire Moon

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

- This course is not available as a first-year option.
- This course has a limited number of places (it is capped). Places are allocated on a first come first served basis with priority given to students on the the BSc in Language, Culture and Society and BSc in Sociology.

• This course cannot be taken in conjunction with IR312 Genocide.

Course content: This course introduces undergraduate students to a range of issues relevant to the study of mass atrocity and justice for atrocity. It introduces students to a range of perspectives, from sociological to historical, to social psychological and philosophical. More concretely, it investigates topics covering definitions of state crime and atrocity, the social construction of atrocities, genocide and the Genocide Convention, structural approaches to understanding genocide (modernity, democracy, and colonial rule), the perpetrators, victims and witnesses of atrocity, denial of state crimes, reporting and documenting atrocity, forensic investigations of mass graves, retributive and restorative approaches to justice (including truth commissions and war crimes tribunals), historic atrocities in settler states (Australia, Canada and the US), and the use of political apologies for atrocity.

Teaching: This course is delivered through a combination of lectures, seminars and online materials totalling a minimum of 20 hours in the WT, and 2 hours of revision classes in the ST.

Reading Week: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: 1 x formative essay of 1500 words.

Indicative reading:

- Arendt, Hannah (1994) *Eichmann in Jerusalem: A Report on the Banality of Evil* (New York: Penguin Books)
- Bauman, Zygmunt (1989) *Modernity and the Holocaust* (Cambridge: Polity)
- Browning, Christopher (1992) *Ordinary Men: Reserve Police Battalion 101* (New York: HarperCollins)
- Cohen, Stan (2001) *States of Denial* (Cambridge: Polity Press)
- Coulthard, Glen Sean (2014) *Red Skin White Masks* (University of Minnesota Press).
- Hacking, Ian (1999) *The Social Construction of What?* (Cambridge: Harvard University Press)
- Jones, Adam (2011) *Genocide: A Comprehensive Introduction*, 2nd edition (London: Routledge)
- Keenan, Thomas and Eyal Weizman (2012) *Mengele's Skull: The Advent of Forensic Aesthetics* (Frankfurt: Sternberg Press).
- Wilson, Richard (2001) *The Politics of Truth and Reconciliation in South Africa: Legitimizing the Post-Apartheid State* (Cambridge: Cambridge University Press).

Assessment: Class participation (10%) in the WT.

Take-home assessment (90%) in the ST.

Assessment is by two components:

1. Class participation (10%) in the WT. Class participation is assessed on the basis of contributions to class discussions that evidence reading and understanding, ability to present arguments derived from the readings and lecture material, and a demonstration of the ability to develop a position in relation to issues presented in the lecture and readings.
2. Take-home assessment (90%) in the ST. The take-home assessment takes the form of an exam (from which two questions must be answered) in the spring exam period, to be completed within a specified five-day time period. A copy will be uploaded to Moodle.

Attendance at all classes and submission of all set coursework is required.

S0310 Half Unit Not available in 2024/25

The Sociology of Elites

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Savage STC S210

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course is not available as a first year option.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: In the early 21st century, there is a new

fascination with the super-rich, the 1%, the 'elites'. This course therefore aims to expose students to the challenges and excitements of studying this small but very significant social class, using cutting edge research on recent trends as well as important older studies.

Teaching: This course is delivered through a combination of lectures, seminars and online materials totalling a minimum of 20 hours in the WT.

Reading Weeks: Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Formative assessment will be through a 2000 word essay to be handed in on the Monday of Week 7, directly after Reading Week. Students will also be asked to give presentations in seminars, and informal feedback will be given on these.

Indicative reading:

- Piketty, T., (2014), *Capital in the 21st Century*, Boston, Harvard UP.
- Khan, S., (2010), *Privilege*, Princeton, Princeton UP.
- Korsnes, O., Heilbron, J., Hjellbrekke, J., Bühlmann, F. and Savage, M. eds., 2018. *New directions in elite studies*. Londres: Routledge.
- Savage, M., and Williams, K., (eds) (2008), *Remembering Elites*, Oxford, Blackwells.
- Mears, A., 2020. *Very important people: Status and beauty in the global party circuit*. Princeton University Press.

Assessment: Essay (100%, 3000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Spring Term.

Attendance at all classes and submission of all set coursework is required.

S0311 Half Unit Law and Violence

This information is for the 2024/25 session.

Teacher responsible: Dr Ayça Çubukçu

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course is not available to first and second year students. This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: *Law and Violence* is an intensive introduction to key theoretical texts that can inform a nuanced understanding of the controversial yet crucial nexus between law and violence. What is the relationship between law and violence? Are they mutually exclusive forms of human action? Is it a paradox that law employs violence in claiming to prevent or circumscribe the latter? Is it a contradiction that violence is often the means to establish or change the law? We will consider these questions within historical contexts of the nation-state and the global legal order.

Teaching: This course is delivered through seminars totalling 25 hours in WT.

This course requires the practice of close reading. We will not read in large quantities. However, students are expected to engage with the assigned texts deeply, paying special attention to the presuppositions of the authors and the structures of their argumentation, identifying the weaknesses and the strengths of their theoretical constructions. By the end of the course, students are expected to make the assigned texts speak with and against each other. Students in this course will have a reading week in week 6.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the WT. Essay abstract (max 800 words) to be submitted in class in week 7. Students will get detailed feedback on their abstracts.

Indicative reading: Giorgio Agamben, *Homo Sacer: Sovereign Power and Bare Life*. Stanford Uni. Press. 1995.

Assessment: Essay (90%, 3000 words) in the ST.

Class participation (10%) in the WT.

Attendance at all classes and submission of all set coursework is required.

S0312 Half Unit Not available in 2024/25 Work, Inequality and Society

This information is for the 2024/25 session.

Teacher responsible: Dr Patrick McGovern STC.S110

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course is not available as a first year option.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: Sociological perspectives on cross-national differences in employment and social inequality.

Theoretical perspectives on inequality; gender in the labour market; occupational segregation; the 'glass ceiling'; immigrant employment; race, ethnicity and discrimination; social class at work; class reproduction in elite firms; the rise of wage inequality; and income inequality in the mass media.

Teaching: This course is delivered through a combination of lectures/seminars, online materials and classes totalling a minimum of 20 hours in WT.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: 1,500 word essay due in Week 8 of WT.

Indicative reading: W. Bottero, W. (2018) *A Sense of Inequality*; Friedman, S. and Laurison, D. (2020) *The Class Ceiling*; Tilly, C. & C. Tilly (1998) *Work Under Capitalism*; Grusky, D. (2013) *Social Divisions*; L. Platt, L. (2011) *Understanding Inequalities*; D. Tomaskovic-Devy, D. and D. Avent-Holt (2018) *Relational Inequalities*.

Further reading will be detailed in the course syllabus.

Assessment: Essay (90%, 3000 words) in the ST.

Class participation (10%) in the WT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the submission day. Assessed essay due Tuesday of Week 1 in ST.

Attendance at all classes and submission of all set coursework is required.

S0313 Half Unit

Material Culture and Everyday Life

This information is for the 2024/25 session.

Teacher responsible: Dr Leili Sreberny-Mohammadi

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course is not available as a first year option.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: The course focuses on how 'things' enter into and mediate everyday social relations and practices. Students will consider all aspects of the social life of things, from design and production through use, consumption and everyday practices. This will allow them to address a range of long-standing theoretical and political concerns within sociology such as the role of objects and materiality in social life; social organizations of objects and exchange, such as consumer culture; the life cycle of objects; and the socio-political status of 'everyday life' itself. At the same time, there will be a strong methodological emphasis: not just how do we study objects in everyday life, but how might such studies impact on social research more generally.

The course will rely heavily on case studies and cross-cultural differences will be raised throughout. Museums, as a site of collection and preservation of material culture will also be scrutinized.

Teaching: This course is delivered through a combination of lectures, seminars and online materials totalling a minimum of 20 hours in the WT.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to work in pairs to present a proposal for the inclusion of an object in the imagined "Museum of the Future". They will create a wall text and apply one theoretical lens to their object.

Indicative reading:

- Drazin, A. & Küchler, S. (eds.) (2015) *The social life of materials: Studies in materials and society*. Bloomsbury Academic, London.
- Latour, B. (2005) *Reassembling the Social: An Introduction to Actor-Network-Theory*. Oxford: Oxford University Press.

- Shove, E., M. Hand, J. Ingram and M. Watson (eds.) (2007) *The Design of Everyday Life*. Oxford: Berg.

Assessment: Group presentation (30%) in the WT.

Research report (70%) in the ST.

A group presentation based on the presentation for the Museum of the Future.

A 3,000 word research report on an object of the student's choosing in which they are asked to address a clear list of considerations such as design, material properties, social practices and uses, methodological questions and so on. Potential objects and practices for the final research report will be workshopped in class.

Attendance at all classes and submission of all set coursework is required.

permission to General Course students.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: Class, Culture and Meritocracy is an optional undergraduate module run by LSE Sociology. The course investigates the intersections between these three key concepts and is organised into three parts: class, class and culture, and class-culture-meritocracy. We will begin by introducing traditional and contemporary theories of social class and stratification. We then turn to the interrelation of class and culture (and gender and ethnicity) in Britain, the US, and other countries throughout the world. We will engage especially with the seminal work of French sociologist Pierre Bourdieu and his supposition that class boundaries are most clearly discernible from examining people's cultural taste, with dominant classes using their preferences for legitimate culture as a means of signalling their superior social position. We will also look specifically at elites, and how they are implicated in how some forms of culture are assigned higher value in society. We will also examine the role of culture in staging forms of class resistance, particularly through the lens of politicised subcultures. And finally, the module will engage with the question of how class and classed cultures are implicated in contemporary debates about meritocracy. Here we will look at how the cultural dimensions of a person's class background affects their ability to get ahead, and how this intersects with inequalities of gender and ethnicity. We will then look at how meritocracy is deployed to understand the burgeoning middle class in a number of Global South countries, particularly China, South African and India and how this is problematised by the lived experience of those experiencing this upward mobility. We will end by interrogating the ways in which 'social mobility' is increasingly used by politicians as a means of providing meritocratic legitimacy for the maintenance of inequality.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

The formative assessment for this course will be an essay plan for the summative essay that will allow students to get feedback on their ideas before submitting the summative assessment.

Assessment: Essay (100%, 3000 words) in the WT.

Attendance at all classes and submission of all set coursework is required.

S0314 Half Unit

Class, Culture and Meritocracy

This information is for the 2024/25 session.

Teacher responsible: Prof Sam Friedman

Availability: This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with

S0348 Half Unit**Family Diversity and Change****This information is for the 2024/25 session.****Teacher responsible:** Dr Ursula Henz**Availability:** This course is available on the BSc in Language, Culture and Society and BSc in Sociology. This course is not available as an outside option. This course is available with permission to General Course students.

This course has a limited number of places (it is capped). Places are allocated on a first come first served basis.

Course content: The course introduces students to the area of family sociology, focusing on contemporary families and intimate relationships in Britain and other Western societies. It provides theoretical and empirical perspectives on a range of topics, including single parent families and post-divorce families; non-heterosexual families; intimate partnerships; parenting; transnational families.**Teaching:** 20 contact hours in the AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: Students are required to complete one formative essay.**Indicative reading:**

- Treas, Judith, Scott, Jacqueline & Richards, Martin (eds.) (2014) *The Wiley Blackwell Companion to The Sociology of Families*, Chichester, West Sussex: Wiley Blackwell - covers many aspects of the course.

Other recommended readings include:

- Chambers, Deborah & Gracia, Pablo (2022): *A Sociology of Family Life*. 2nd Edition. Cambridge: Polity Press.
- Lareau, Annette (2011): *Unequal Childhoods. Class, Race and Family Life*. University of California Press: Berkeley, Los Angeles, London.
- Smart, Carol & Neale, Bren (1999): *Family Fragments?* Cambridge: Polity Press.
- Smart, Carol, Neale, Bren & Wade, Amanda (2001): *The Changing Experience of Childhood: Families and Divorce*. Cambridge: Polity Press.
- Allan, Graham; Crow, Graham & Sheila Hawker (2011) *Stepfamilies*. New York: Palgrave Macmillan.

Assessment: Coursework (10%) in the AT.

Online assessment (90%) in January.

The first assessment, a reading diary (10%)

The online assessment will be a take home exam to be taken in an 8-hour window in the January exam period.

Attendance at all classes and submission of all set coursework is required.

SP100**Understanding International Social and Public Policy****This information is for the 2024/25 session.****Teacher responsible:** Dr Zahid Mumtaz**Availability:** This course is compulsory on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is not available as an outside option nor to General Course students.**Course content:** The course introduces students to the study and practice of international social and public policy. It considers how societies organise to address social needs, with reference to academic and policy debates across the so-called global North and South.

In the first half of the course (Autumn Term), you will develop your understanding of how welfare systems have developed and of the institutions and actors involved in different contexts across the world, including the state, market, civil society and families.

In the second half (Winter Term), you will consider the challenge of inequality and how different approaches in social policy, involving those institutions and actors, can redress or reinforce inequalities.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in-person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in both AT & WT**Formative coursework:** Students are expected to participate actively in course learning activities and to complete two formative essays (one of which constitutes the coursework component of the assessment).**Indicative reading:** Artaraz, K. and Hill, M. (2016) *Global Social Policy: Themes, Issues and Actors*. Basingstoke: Palgrave Macmillan.Daly, M. (2011) *Welfare*. Cambridge: Polity.Garland, D. (2016) *The Welfare State: A Very Short Introduction*. Oxford: Oxford University Press.Kabeer, N., Cook, S. (2000) 'Revisioning social policy in the South: challenges and concepts', *IDS Bulletin*, 31: 4, 1-18.Lewis, D. (2017) 'Should we pay more attention to South-North learning?', *Human Service Organisations: Management, Leadership and Governance*, 41: 4, 327-331.Ikemura Amaral, A., Jones, G., Nogueira, M. (2020) 'Brazil's so-called 'invisibles' will need more than resilience to redress the unequal impacts of COVID-19 | LSE Latin America and Caribbean', LSE blogs <https://blogs.lse.ac.uk/latamcaribbean/2020/05/14/brazils-so-called-invisibles-will-need-more-than-resilience-to-redress-the-unequal-impacts-of-covid-19/>**Assessment:** Exam (100%, duration: 3 hours) in the spring exam period.

Students submit two formative essays as part of their coursework (one in AT, one in WT).

SP101**Foundations of Social Policy Research****This information is for the 2024/25 session.****Teacher responsible:** Dr Kitty Stewart**Availability:** This course is compulsory on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is not available as an outside option nor to General Course students.**Course content:** SP101 is concerned with a fundamental question for social and public policymaking. *How do we know* what policies are needed, how they are experienced and whether they are effective? We also consider a second question: *How is this knowledge used* - how (if at all) does it feed into the policy process and improve policies and outcomes?

The course aims to equip students to become informed consumers of research, able to read and evaluate research outputs that use a range of different approaches and methods to address policy questions. Students will be encouraged to think critically about the way that knowledge is constructed, about the nature of expertise, and about the influence of values and positionality on knowledge production. They will learn to assess the validity of claims made on the basis of research studies that use a range of different methods. The course provides the foundations for students to become active researchers themselves in later stages of the BSc ISPP degrees, preparing them for the second year research methods course and for their third year dissertation.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn

Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in-person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in both AT & WT.

Formative coursework: Students will write two essays, one in AT and one in WT, and will receive feedback designed to help them build towards their summative essay in ST.

Students will also make and receive feedback on a group presentation in AT.

Multiple choice quizzes and class activities will provide further opportunities for students to check their learning.

Indicative reading: Becker, S., Bryman, A. and Ferguson (2012) *Understanding Research for Social Policy and Social Work: Themes, Methods and Approaches*. 2nd Edition. London: Policy Press. Bryman, A. (2012) *Social Research Methods*, 4th edition. Oxford University Press.

Della Porta, D. and Keating, M. (2008) *Approaches and Methodologies in the Social Sciences*. Cambridge: CUP.

Gilbert, N. (2008) *Researching Social Life* 3rd ed. London: Sage.

Hill Collins, P. and Bilge, S. (2016) *Intersectionality (Key Concepts)*. London: Polity Press.

Howard, C. (2017) *Thinking Like a Political Scientist*. Chicago, IL: University of Chicago Press.

Parkhurst, J. (2017) *The Politics of Evidence: From evidence based policy to the good governance of evidence*. Abingdon, Oxon: Routledge.

Assessment: Essay (70%, 2000 words) in the ST.

Quiz (30%) in the WT.

Two forms of assessment will make up the overall grade for the course.

There will be two in-class quizzes on key terms and concepts during Winter Term (30%)

Students will submit a 2,000 essay in Spring Term (70%).

SP111

Social Economics and Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Maria Almudena Sevilla Sanz

Availability: This course is compulsory on the BSc in International Social and Public Policy. This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy with Politics, BSc in Politics, BSc in Politics and International Relations and BSc in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Places on this course are limited and priority is given to Social Policy students in the first instance. If places remain available once Social Policy students have been accommodated, they will be offered on a first come first served basis to students from outside the Department.

This course is not available to third year students.

Pre-requisites: No prior knowledge of economics is required.

Course content: This course provides an introduction to the economics of social and public policy. The course begins by introducing basic economic concepts and principles and discussing their application to different social policy areas, including childcare, education, health care, social care, housing and the environment. Key concepts include supply, demand and elasticities, externalities and market failure, asymmetric information, private and social insurance.

The course goes on to analyse the distribution of household income, poverty and inequality, labour market earnings, and unemployment. It covers concepts such as human capital and productivity, and labour market discrimination, and looks at a range of policies, including minimum wage legislation, taxation, and the social security system.

Throughout, the course emphasises the importance of

understanding political goals in assessing the effectiveness or justice of economic and social policies, and seeks to encourage students to draw on both theory and empirical evidence in addressing its core questions.

SP111 provides an introduction to the economics of social and public policy. We focus on real-world applications relevant to social and public policy. It is a full-year course. The course uses charts and graphical tools, but is taught without mathematics or equations, and is designed to be suitable both for students with no prior knowledge of economics and for those who have taken A level economics. The course is designed to be accessible and stimulating for students of all backgrounds.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in-person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in both AT & WT.

Formative coursework: Students will be expected to complete exercises as required for classes, and write three formative essays during the course of the year.

Indicative reading: J Le Grand, C Propper & R Robinson, *The Economics of Social Problems*, 4th Edition, Palgrave, 2008
G Mankiw and M Taylor, *Economics*, 6th Edition, Cengage, 2023
R Lipsey and A Crystal, *Economics*, 14th edition, OUP, 2020 (or earlier edition)

H Glennerster, *Understanding the Cost of Welfare*, 3rd edition. The Policy Press, 2017

A B Atkinson, *Inequality: What Can Be Done?* Harvard University Press, 2015.

Assessment: Online assessment (100%) in the ST.

SP112

Politics of Social Policy Making

This information is for the 2024/25 session.

Teacher responsible: Mr Liam Beiser-Mcgrath

Availability: This course is compulsory on the BSc in International Social and Public Policy. This course is available on the BSc in International Social and Public Policy and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. This course is not available to third year students.

Course content: Understanding the political dynamics behind policy decisions is crucial, as the most effective solutions are often sidelined in favor of politically expedient ones. Fostering the ability to identify and navigate these political realities is therefore essential for those aiming to drive meaningful change in an imperfect world.

The course introduces students to the way in which social and public policies are developed. It aims to provide tools to understand how policies are produced through political disagreement and negotiations and how policies reflect different needs and problems voiced by groups in societies. It focuses on the ways in which policy processes and decision making can be analysed. The course focuses on different models that are used in the analyses of policy processes in different international contexts. Furthermore, it links different analytical approaches to policy processes with political considerations of how political problems are framed and how policy goals are established. The course looks at these issues from the perspective of different actors and the ways in which different actors interact with each other within policy processes. The course brings together analytical frameworks for

policy processes with empirical problems (cases). The course enables students to understand that policy processes are both about understanding society and shaping it. Finally, it introduces students to the various policy actors, including international actors and how these actors work together within socio-political and economic constraints. It also highlights the importance of identifying and understanding the different value positions and the associated negotiations that underwrite policy processes.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in-person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in both AT & WT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Students will have a 400 word formative assignment due in Autumn Term, where students will outline how they would apply one of the theoretical approaches discussed in the course to a specific policy issue. This serves as practice for the subsequent summative assessments.

Indicative reading: Cairney, Paul (2019) *Understanding Public Policy: Theories and Issues* 2nd Edition. London: Bloomsbury
Bacchi, Carol (2009) *Analysing Policy: What's the problem represented to be?* Frenchs Forest: Pearson Education
Stone, Deborah (2012) *Policy Paradox: The Art of Political Decision Making*. NY: Norton.

Bueno de Mesquita, Ethan (2017) *Political Economy for Public Policy*. Princeton: Princeton University Press.
Ostrom, Elinor (2015) *Governing the Commons: the Evolution of Institutions for Collective Action*. London: CUP.

Assessment: Essay (30%, 1000 words) in the WT.

Project (70%, 2000 words) in the ST.

There are two summative assessments for the course:

Students will write a 1000-word policy commentary, applying one of the theoretical models covered in the class to an issue of their choice.

For the final assignment students will write 2000 word policy report where students identify and explain the key factors that helps us to understand a particular policy using theoretical frameworks discussed in the course.

SP200

Comparative and International Social Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Timo Fleckenstein

Availability: This course is compulsory on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is not available as an outside option nor to General Course students.

Pre-requisites: This course is only available to students who have completed Understanding International Social and Public Policy (SP100).

Course content: The course introduces the comparative method in social policy research as well as the main analytical approaches to understanding social policy developments in high income countries. By examining the interaction between social policy, employment and families, it explores how and why different countries pursue different paths and how this may be changing.

The course also examines social policy in middle- and low-income countries and explores the forces shaping both how policy problems are perceived and the impact of key international and supranational institutions on social policymaking in different areas of the world.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in-person

academic-code) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in-person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in both AT & WT.

Formative coursework: Students are expected to submit two pieces of formative written work throughout the academic year and are expected to read for and prepare contributions to class discussion each week.

Indicative reading: P Beramendi, S Häusermann, H Kitschelt & H Kriesi (eds) (2015) *The Politics of Advanced Capitalism*
D Béland, S Leibfried, KJ Morgan, H Obinger & C Pierson (eds) (2022) *The Oxford Handbook of the Welfare State*, 2nd edition
B Deacon (2007) *Global Social Policy and Governance*
I Gough & G Wood (eds) (2004) *Insecurity and Welfare Regimes in Asia, Africa and Latin America*
A Hemerijck (ed) (2017) *The Uses of Social Investment*
J Lewis (2009) *Work-Family Balance, Gender and Policy*
N Yeates & C Holden (eds) (2022) *Understanding Global Social Policy*, 3rd edition

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

SP201

Research Methods for Social Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Shuang Chen

Availability: This course is compulsory on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Foundations of Social Policy Research (SP101).

Course content: This course introduces students to tools used by scholars and practitioners in the study of social policy, focusing on their application to addressing research questions and policy issues in various disciplines and contexts. The course is aimed at helping students transform from a consumer to a producer of research. Through various hands-on activities, students will gain first-hand experience of a research process from start to finish, and, subsequently, build confidence and competence for conducting independent dissertation research in the third year. In the process, students will develop life-long problem-solving and analytical skills not only essential for working in the field of social policy but also highly valued by and transferable to other sectors.

This course is divided into two parts. SP201.2 in AT focuses on research design and qualitative methods. SP201.1 in WT focuses on quantitative methods, including statistical programming using STATA.

By the end of the course, you will be able to:

- 1 Formulate your own research question
- 2 Propose appropriate data and methods to answer the question
- 3 Recognise ethical issues in social research and address them in research design and conduct
- 4 Conduct qualitative research, including collecting data from in-depth interviews, analysing the data, and writing up the results
- 5 Analyse quantitative data using STATA and interpret the results

Teaching: The course combines two elements:

SA201.2 Research Methods for Social Policy

SA201.1 Data Analysis for Social Policy

All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in-person

classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course.

This course is taught in both AT & WT.

Formative coursework: Students will be expected to produce 1 project in the AT and 1 presentation and 1 problem sets in the WT. 1 A plan for qualitative research project. 160160

2 Poster presentation of qualitative research project, including preliminary findings.

3 A quantitative problem set. The problem set will follow a similar format as the summative quantitative take-home test.

Indicative reading: Weiss, Robert S. *Learning from strangers: The art and method of qualitative interview studies*. Simon and Schuster, 1995.

Imai, Kosuke, and Lori D. Bougher. *Quantitative Social Science: An Introduction in Stata*. Princeton University Press, 2021.

Assessment: Project (50%) and take-home assessment (50%).

The summative assessments for this course consist of two components, each worth 50% of the final mark.

1 A qualitative research project. For this assessment, you will design 160an independent qualitative research project, 160collect qualitative data, analyse the data, write up and discuss the findings. 160

2 A quantitative take-home test. The test will resemble a problem set and require students to analyse a given dataset. 160

SP210

Development and Social Change

This information is for the 2024/25 session.

Teacher responsible: Dr Robtel Neajai Bailey

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: SP210 introduces students to the interrelationship between social and public policies with a particular emphasis on the so-called 'Global South'. It focuses on the ways in which different countries organise their policy processes and institutions to achieve their objectives in relation to inequality and poverty. The course invites students to think about how 'development' might be considered a taken-for-granted process of 'amelioration' or a constantly negotiated process of 'transformation' in both the so-called 'Global South' and 'Global North'; how socio-economic needs are identified, focused, and addressed or ignored in different settings; who can and cannot participate in policy processes and why; and what are the historical, political and social determinants of these processes in different places.

The course is designed to link research/theory to policy and practice. In addition, it introduces students to various policy actors and the ways in which they work together within specific socio-political and economic constraints. The course rigorously links theoretical analysis with empirical enquiry and highlights the importance of identifying and understanding different value positions that underwrite policy thinking.

SP210 is taught from a Critical Development Studies (CDS) lens of analysis, primarily because CDS is concerned with analysing systemic changes needed to achieve economic, social and environmental justice (ie, non-mainstream, alternative development) in the same way that social policy interventions are intended to enhance well-being, particularly of the most marginalised in societies across the globe.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in-person classes/seminars. Further information will be

provided by the Course Convenor in the first lecture of the course. This course is taught in both AT & WT.

Formative coursework: Students will be expected to produce two pieces of formative coursework.

Indicative reading:

• Long, N. (2001) *Development Sociology: Actor Perspectives*. New York: Routledge.

• Midgely, J., Surender, R. and Alfes, L. (eds) *Handbook of Social Policy and Development*. Cheltenham and Northampton: Edward Elgar Publishing.

• Mkandawire, T. (ed) (2004) *Social Policy in a Development Context*. Geneva: UNRISD.

• Sen, A. (1999) *Development as Freedom*. Oxford: Oxford University Press.

• Veltmeyer, H. and Bowles, P. (eds) (2021) *The Essential Guide to Critical Development Studies* (2nd edition). Abingdon, Oxon: Routledge.

Assessment: Essay (40%, 2000 words) in the WT.

Online assessment (30%) in the ST.

Class participation (30%) in the AT and WT.

Please note that 'class participation' means 'class engagement'

SP230

Education Policy

This information is for the 2024/25 session.

Teacher responsible: Ms Fiona-Teodora Gogescu

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: This course provides an introduction to the main issues in educational policy. It draws on interdisciplinary research literature and has a comparative and international focus. The course aims to show how major concepts used in social policy can be applied to the study of education, for example, equality of opportunity, equity and the distribution of resources.

Issues to be addressed include: policy goals of education; historical development of education and the role of the state in provision and funding; the impact of social characteristics on educational outcomes (class, gender, ethnicity and 'race'); education of children with special educational needs and disabilities; financing education; private schooling; privatisation and the changing role of the state; early years education; school-based education; post-compulsory education including higher education; education systems in comparative perspective and education regimes, decentralisation and devolution. Not all of these issues are covered as separate weekly topics.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in-person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in both AT & WT.

Formative coursework: There will be three pieces of formative work for students to complete:

One formative essay in AT

One formative essay in WT

Indicative reading: Some introductory texts are recommended: Arthur, J., Peterson, A. (eds) (2011) *The Routledge Companion to Education*. London: Routledge.

Lauder, H., Brown, P., Dillabough, J., Halsey, A.H. (eds) (2006) *Education, Globalization and Social Change*. Oxford: Oxford University Press.

Specialist reading lists for each topic will be provided.

Assessment: Online assessment (100%) in the ST.

SP231

Poverty, Inequality, and Social Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Iva Tasseva and Prof Kitty Stewart

Availability: This course is available on the BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environment and Sustainable Development, BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. This course is capped.

Course content: This course has two main goals. The first one is to understand the different ways poverty and inequality are conceptualised and measured, and to assess the progress nationally and globally in reducing poverty and inequality. The second goal is to examine the role of social policy in mitigating poverty and inequality. We will examine key policy areas such as taxation, social security, and policies related to early childhood education, education, labour markets, migration, climate change, and global trade. We will evaluate the characteristics of 'good' social policy, analyse how existing policies in various countries measure up to these ideals, and explore potential reforms. We will also assess the impact of factors like gender, age, disability, and citizenship on poverty and inequality across different locations and times. Throughout the course, we will draw on examples and evidence from a wide range of country settings – high-, middle- and low-income countries.

By the end of this course, students will have developed essential skills that will benefit them during their studies and beyond. These include the ability to critically engage with theories and evidence, communicate complex arguments clearly, interpret tables and figures critically, and work effectively both independently and collaboratively.

This course is essential for anyone interested in measuring poverty and inequality, as well as designing and evaluating social policies to address some of the most pressing challenges facing societies today.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in-person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course.

Formative coursework: Students will be expected to complete one formative essay during the course of the year. Class activities will also provide valuable opportunities for students to test and advance their learning.

Indicative reading: A detailed list will be provided at the start of the course.

Assessment: Quiz (30%) in the WT.

Online assessment (70%) in the ST.

The quiz in WT is an in-person multiple choice test.

The online assessment in ST is a 'take-home' exam. Students will be asked to answer two essay questions, each 1,200 words.

SP232

Health and Social Care Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Tania Burchardt SAL 3.30

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: The course equips students with the concepts, tools and knowledge to understand the challenges of health and social care policy in the 21st century, in the differing contexts of the UK and other rich countries, and in low- and middle-income countries. In the wake of the coronavirus pandemic, this feels more important than ever.

In the first term, we consider the fundamental aims of health and social care policy, including for example health and well-being, health inequalities by ethnicity and social class, public health and health promotion, and health as a human right. We then examine policy approaches and healthcare regimes across different country contexts, including the strengths and weaknesses of different models of healthcare financing, public and private.

In the second term, we move on to think about how to bring about change - both change in people's behaviour through regulation, 'nudge' and incentives, and change in health and social care systems, including an examination of the role played by global pharmaceutical and healthcare companies, and the potential for reform. We investigate the role that evaluations of health and social care play in shaping policy change. Finally, we turn to specific groups and needs, including for example the challenges of mental health policy, child protection, and healthcare needs of sexual minorities.

Teaching: Courses in Social Policy follow the Teaching Model outlined on the following page: <https://www.lse.ac.uk/social-policy/Current-Students/teaching-in-the-department-of-social-policy> All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Michaelmas and/or Lent terms". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course.

This course is taught in both AT and WT.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 essay in the WT.

One essay following a class task or presentation. This is compulsory.

One essay and two essay plans using the same format as the summative assessment. This is encouraged, but optional.

Indicative reading: There is no course textbook. A list of selected texts and readings will be included in the reading lists for each week.

Assessment: Online assessment (100%) in the ST.

Students will be asked to write essays from a selection of questions addressing a range of topics covered in the course. This will be a take-home, open-book, online assessment.

SP314 Half Unit

Ethnicity, Race and Social Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Coretta Phillips

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. This course is only available to 3rd Year undergraduates.

Course content: The overarching theme of the course is to examine and explain the distribution of resources, opportunities and life chances of different social groups categorised by their ethnicity and race, while also considering how individual experience is mediated through other dimensions of identity such as social class, gender, and faith/religion. The course proceeds through conceptualising core notions of race, ethnicity, racism, discrimination, before examining questions around migration, citizenship, and belonging, integration, multiculturalism, and interculturalism. It then moves to examining inequalities in key social policy domains (settlement and housing, education, employment, and criminal justice) and assesses different policy approaches to ameliorate racialised inequalities, including positive action, affirmative action, diversity approaches, cultural competence/sensitivity/intelligence, and minority-only service provision. It uses an array of case studies in lectures and in classes/readings from all regions of the world with a mix of high, middle, and low-income contexts.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: While there is no set text for this course, those listed below are general textbooks and edited collections which are strongly recommended for background reading, although many have a primary British focus:

- Williams, F. (2021) *Social Policy: A Critical and Intersectional Analysis*. Oxford: Polity.
- Rattansi, A. (2020) *Racism: A Very Short Introduction*. Second Edition. Oxford: Oxford University Press.

- Bulmer, M. and Solomos, J. (ed.) (1999) *Racism*. Oxford: Oxford University Press.
- Back, L. and Solomos, J. (eds.) (2022) *Theories of Race and Racism: A Reader*. 3rd Edition. London: Routledge.

Assessment: Essay (100%, 2500 words) in the ST.

SP315 Half Unit

Urbanisation and Social Policy in the Global Souths

This information is for the 2024/25 session.

Teacher responsible: Dr Sunil Kumar

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. This course is only available to third year undergraduate students from the Department of Social Policy. This course is capped at 15 students.

Course content: The course critically explores the challenges and opportunities that urbanisation and urbanism (urban transformations) pose in the social, spatial, cultural, economic, institutional and political realms in the urban Global Souths.

A plurality of theoretical and conceptual perspectives underpinning each topic area, including policies and planning practices, are explored each week.

Some of the themes explored in the course are, urbanisation, urbanism and social change, theories of urbanisation and urban change, internal migration, gender and age - the rural-urban interface, urban poverty, livelihoods and capabilities, urban labour markets and challenges for social protection, urban housing and tenure, urban basic services, urban governance, and urban social movements and collective action. Cross-cutting themes such as gender and the role of civil society are integrated across the course. Prospective students must commit themselves to full participation in all aspects of the course, namely attend all lectures and classes. Students are required to read before the lecture, as well as read and discuss the essential readings for the classes. Emphasis is also placed on students connecting given topics and related readings to empirical realities and current events.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. Students are required to attend all lectures and seminars. This course is taught in WT.

Formative coursework: Students will submit a 750-1,000-word outline on their **Just Urban Essay-Project (JUep)** towards the latter half of the WT. Students will not receive a grade for the formative but will receive constructive feedback by the end of term. The pedagogical practice here to link the formative to the summative; the former being work that can be improved by feedback and office hour discussions.

Indicative reading: Note: This indicative reading list is arranged by the topics covered by the course and is hence not in alphabetical order.

Assessment: Essay-Project (100%, 3500 words) in the ST. A 3500-word (100%) essay-project entitled the "**Just Urban Essay-Project**" (**JUep**) to be submitted in the Summer Term together with a piece of art and a short 150-word narrative accompanying the artwork. Students will be free to choose the subject matter of their **JUep** including an urbanisation/urbanism issue in the Global South not covered by the course. Detailed guidelines on the content of the **JUep**, including the word-count distribution, will be provided.

SP331 Half Unit

Sexuality, Everyday Lives and Social Policy in Developing Countries

This information is for the 2024/25 session.

Teacher responsible: Dr Muzafferettin Seckinelgin

Availability: This course is available on the BSc in International

Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. This course is only available to third year undergraduate students.

Course content: This course aims to analyse and understand the way social policies deploy sexuality categories in regulating everyday life in developing countries, both in its public and private manifestations.

Sexuality is a central part of human experience. Institutions created to deal with human life/wellbeing have considered sexuality as one of the reference points from which to regulate social relations. Perceptions on sexuality are formed in the intersection of socio-political, historical processes and everyday practises in particular societies. Particular perceptions of sexuality in turn influence the way people negotiate access to resources to address their wellbeing.

In some central areas of social policy sexuality is used as one of the sorting mechanisms (in addition to gender, race among various other categories) to establish entitlements for resources (social, political and economic). In this regard social policy is both informed by perceptions on sexuality and in turn social policy acts as a mechanism of social reproduction of these perspectives impacting people's lives. And while globally high profile cases and rights abuses related to sexuality are important, a narrow global policy focus on these overlooks how more embedded and diverse social policy practices related to sexuality are impacting people's lives in many developing countries.

This course aims to explore sexuality and its importance for social policy for developing countries. It aims to consider social policy and particular interventions in their historical contexts, as a way of unpacking the construction of sexuality in the intersection of colonialism, gender, race, class and international policy frameworks in developing countries.

The course also aims to interrogate the relationship between particular social policy prescriptions developed in most industrialized welfare societies and the way some of these are transferred to developing countries. The major concern of the analysis is to bring out the perceptions of sexuality that underwrite these policies and how these interact with existing perceptions of sexualities and their performances (identities, desires and bodily practices) in multiple developing country contexts. These policy areas include, among others, discussions of rights, entitlements, citizenship, same-sex marriage, sexually transmitted disease, HIV/AIDS, family policies, migration/border controls, criminality and employment-related policies.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will be required to apply their understanding of both theoretical frameworks and issues related to sexualities and social policies in a formative essay.

Indicative reading:

- Tamale, S. (2011) *African Sexualities: A Reader*. Pambazuka Press.

Additional readings for each week are available on Moodle.

Assessment: Policy memo (100%) in the ST.

SP332 Half Unit

Social Security Policies

This information is for the 2024/25 session.

Teacher responsible: Dr Kitty Stewart

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. This course is only available to third year undergraduate students.

Course content: The course analyses the purpose, design and impact of social security policies, meaning policies that protect and support household income at times when income from the labour market does not suffice. The need for social security arises both from demographic factors that affect nearly everyone during their life course - childhood, parenthood, old age - and from risk factors that end up affecting only some - e.g. job loss, low pay and sickness or disability.

The course takes a comparative approach, examining differences in the design of social security policies across welfare regimes and drawing on examples from different countries. Students will develop an understanding of the challenges and trade-offs that arise in designing social security policies to meet multiple goals, will further their knowledge about the ways systems function in practice, and will develop the tools for assessing the structure and effectiveness of social security in any given country. The course will consider how successfully social security systems are adapting to meet the challenges of the twenty-first century, including an ageing population, migration, and the changing nature of employment brought about by rapid technological change. The course will also look at the role of social security in protecting household incomes in times of crisis, such as the Covid-19 pandemic.

Students will be encouraged to further their understanding of social security in their country of origin, or another country of their choice, and to draw on this knowledge in classes.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in WT.

Formative coursework: Students will write one essay during WT, and will receive feedback in preparation for the summative assessment.

Indicative reading:

- R Walker (2005) *Social Security and Welfare: Concepts and Comparisons*. Open University Press.
- J Hills (2015) *Good Times, Bad Times: The Welfare Myth of Them and Us*. The Policy Press.

- J Millar and R Sainsbury (2018) (eds) *Understanding Social Security*, Third Edition. The Policy Press.
- P Spicker (2011) *How Social Security Works: An introduction to benefits in Britain*. The Policy Press
- J Kvist et al (2012) *Changing Social Equality: The Nordic Welfare Model in the 21st Century*. The Policy Press.
- N Barr and P Diamond (2009) *Pension Reform: A Short Guide*. Oxford University Press.
- M Frolich et al (2015) *Social Insurance, Informality and Labor Markets: How to Protect Workers While Creating Good Jobs*. Oxford University Press.

An extended reading list will be provided, with specific readings for each week's topic.

Assessment: Essay (100%, 2500 words) in the WT.

The essay will require students to demonstrate their ability to apply the knowledge and understanding they have gained on the course to evaluate the design and impact of policies in different countries.

SP333 Half Unit

NGOs, Social Policy and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Timothy Hildebrandt

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. This course is only available to third year undergraduate students.

Course content: While the study of social and public policy has traditionally been concerned with actions taken by governments, the wider non-governmental sector is increasingly recognised as playing a key role. This course focuses on both international and local 'non-governmental organizations' (NGOs) that have emerged around the world to address a wide range of social, political and environmental concerns. It offers a critical perspective on NGOs in the context of development and social policy, covering both theoretical and policy issues. The focus is on two main inter-related themes: how NGOs serve as vehicles through which citizens organise, and how NGOs are instruments through which states, businesses and funding agencies pursue their interests. Most of the examples in the lectures and the readings will relate to the Global South, but many of the issues covered are also relevant in rich industrialised countries. Topics covered include definitions and history of NGOs; the changing policy contexts in which development NGOs operate; conceptual debates around 'civil society' and third sector; competing theoretical perspectives on NGOs; the domestic, international and global dimensions of non-governmental action; shifting relationships with other policy actors; service delivery and advocacy roles; international humanitarianism; challenges of NGO legitimacy and accountability; resource dilemmas; voluntarism and volunteering; and NGO organisational growth and change.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in WT.

Formative coursework: Students will write one essay (1500 words) during WT, and will receive written feedback in preparation for the summative assessment.

Indicative reading: Banks, Nicola, David Hulme, Michael Edwards (2015) 'NGOs, states, and donors revisited: still too close for comfort?' *World Development*, Volume 66, pp.707–718.
Keck, M. E. & Sikkink, K. (1998) *Activists Beyond Borders: Advocacy*

 Wallace, Tina, Fenella Porter and Mark Ralph-Bowman (eds. 2013) Aid, NGOs and the Realities of Women's Lives: A Perfect Storm. Practical Action Publishing.
Assessment: Essay (100%, 3000 words) in the ST.

SP335 Half Unit

Migration: Current Research, Critical Approaches

This information is for the 2024/25 session.

Teacher responsible: Dr Isabel Shutes

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. This course is only available to third year undergraduate students.

Course content: This interdisciplinary course addresses contemporary global migration issues with reference to both developing and developed country contexts and to different patterns and forms of migration. The course examines the relationship between migration and social and public policies, including the implications for how migrants and migration are conceptualised, for inequalities in the movement of people, for welfare systems, and for the impacts of migration in countries of origin and destination. It draws on current approaches to researching migration, and considers the implications of those approaches.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and in-person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

- Goldin, I., Cameron, G.160 & Balarajan, M. (2012) Exceptional People: How Migration Shaped Our World and Will Define Our Future, Princeton University Press. CHAPTER 1
- Shachar, A. (2009) The Birthright Lottery: Citizenship and Global Inequality, Cambridge MA: Harvard University Press. INTRODUCTION.
- Migali, S. and Scipioni, M. (2019) "Who's About to Leave? A Global Survey of Aspirations and Intentions to Migrate." International Migration, 57: 181-200.

& Refugee Studies, 13:2, 103-115.

- Czaika, M. and De Haas, H. (2013) "The Effectiveness of Migration Policies", Population and Development Review, 39: 3, 487-508.

The reading list includes required and supplementary readings that demonstrate current debates and approaches. Readings will be complemented by podcasts, videos and interactive materials relating to the readings. A film showing will also provide an early point of reference and discussion.

Assessment: Essay (100%, 2000 words) in the WT.

The course is assessed by one summative assignment (100% weighting). This is a written essay that should address one question from a set provided.

SP336 Half Unit

Behavioural Public Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Adam Oliver

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. This course is only available to third year undergraduate students.

Course content: The application of behavioural economics and behavioural science to public policy issues has been, and continues to be, a major theme in the policy discourse internationally. This course offers students a thorough grounding in the theory and findings that define behavioural economics, from the major violations of standard economic theory to prospect theory and the theories of human motivation. The course goes on to consider the conceptual policy frameworks that have been informed by behavioural economics, with examples – so called nudge, shove and budge policies – illustrated so as to highlight how these frameworks are applied in practice. Students will also be exposed to the different behavioural-informed schools of thought that have prescribed divergent paths for public sector governance.

The course should interest anyone who is concerned with issues pertaining to social and public policy across any sector in any country. The literature consulted in this area is necessarily multidisciplinary, principally encompassing economics, psychology, political science, policy and ethics.

Teaching: Lectures will cover numerous topics in behavioural public policy. Classes will then include a range of activities on each topic, including short answer quizzes, the students' own ideas on how to develop behavioural public policies, discussion on close reading of some key texts, and small group discussions of key questions on each topic.

All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course.

The course will be delivered in WT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading: The course text is: Oliver, A. 2017. The Origins of Behavioural Public Policy. Cambridge: Cambridge University Press.

The above book consists of ten chapters. One chapter each week is essential reading. Additional readings will be given on the reading list, and via advice from the class teacher.

Assessment: Essay (100%, 2500 words) in the ST.

SP372 Half Unit**Punishment and Penal Policy****This information is for the 2024/25 session.****Teacher responsible:** Dr Leonidas Cheliotis

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. This course is only available to third year undergraduate students.

Course content: This third-year course is a half-unit option, and explores punishment and penal policy from a range of comparative perspectives. Focusing on Anglophone jurisdictions and the rest of the world in equal measure, the course considers in depth a wide variety of historical and international comparative studies of punishment and penal policy, both from the field of criminology and beyond. In so doing, the course critically examines theoretical frameworks and empirical research on such issues as:

- the forms state punishment has assumed over time and in different national and regional contexts;
- the array and relative significance of the reasons why punishment and penal policy may develop, qualitatively as well as quantitatively, in particular ways at given historical junctures and in different jurisdictions;
- the relationship between political systems and punishment, with particular reference to processes of democratisation;
- the links between penal policy and different forms of economic organisation, from preindustrial capitalism to welfare capitalism and neoliberalism; and
- the role of punishment in society as explained through psychosocial theories and research

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and in-person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be delivered in WT

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Alexander, M. (2010) *The New Jim Crow: Mass Incarceration in the Age of Colorblindness*. New York and London: The New Press.

Brown, M. (2009) *The Culture of Punishment: Prison, Society, and Spectacle*. New York and London: New York University Press.

Dumm, T. L. (1987) *Democracy and Punishment: Disciplinary Origins of the United States*. Madison, WI: The University of Wisconsin Press.

Garland, D. (1985) *Punishment and Welfare: A History of Penal Strategies*. Aldershot, UK: Gower.

Gottschalk, M. (2014) *Caught: The Prison State and the Lockdown of American Politics*. Princeton, NJ: Princeton University Press.

Karstedt, S. (ed.) (2009) *Legal Institutions and Collective Memories*. Oxford: Hart.

Lacey, N. (2008) *The Prisoners' Dilemma: Political Economy and Punishment in Contemporary Democracies*. Cambridge: Cambridge University Press.

McBride, K. (2007) *Punishment and Political Order*. Ann Arbor, MI: The University of Michigan Press.

Reiner, R. (2007) *Law and Order: An Honest Citizen's Guide to Crime and Control*. Cambridge: Polity.

Salvatore, R. D., Aguirre, C. and G. M. Joseph (eds) (2001) *Crime and Punishment in Latin America: Law and Society since Colonial Times*. Durham, NC: Duke University Press.

Assessment: Essay (100%, 3000 words) in the ST.

Student will be expected to produce an essay in the Spring Term based on one of the topics covered by the teaching across the Term, chosen from a pre-defined list of topics.

SP374 Half Unit Not available in 2024/25**Riots, Disorder and Urban Violence****This information is for the 2024/25 session.****Teacher responsible:** Tim Newburn (OLD 2.40a)

Availability: This course is available on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students. This course is only available to third year undergraduate students

Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction to the subject in: Newburn, T. (2017) *Criminology*, London: Routledge, 3rd Edition. An easier, quicker overview can be found in: Newburn, T. (2019) *Criminology: A very short introduction*, Oxford: OUP

Course content: This course focuses on urban or collective violence, or what more colloquially tend to be referred to as 'riots'. From Hong Kong and Santiago to the Gilets Jaunes in Paris and the uprisings in America after the death of George Floyd and during the Presidential election, this is a subject of great contemporary relevance.

The course will consider the various approaches that have been taken to this subject - via history, psychology and sociology - and, focusing on particular examples, the course will examine some of the core issues in the field including: the causes and consequences of riots; psychological versus sociological explanations; the role of race/ethnicity; the impact of traditional and new social media on the nature and organisation of rioting; the role and changing nature of the policing of urban disorder; and how riots might be understood both historically and comparatively.

Teaching: Courses in Social Policy follow the Teaching Model outlined on the following page: <https://www.lse.ac.uk/social-policy/Current-Students/teaching-in-the-department-of-social-policy> All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Michaelmas and/or Lent terms". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course.

The course will be delivered in LT

Formative coursework: Students will be required to write and submit one piece of formative coursework for assessment and feedback.

This will be an essay outline - in effect the outline of their summative essay, including a full introductory paragraph.

Indicative reading:

- Katz, J. (2016) Culture within and culture about crime: The case of the 'Rodney King riots', *Crime, Media, Culture*
- Moran, M. and Waddington, D. (2015) Recent riots in the UK and France: Causes and commonalities, *Contention*, 2, 2, 57-73
- Newburn, T. (2015) The 2011 English riots in recent historical perspective, *British Journal of Criminology*, 55, 1, 375-392
- Newburn, T. (2021) The causes and consequences of urban riot and unrest, *Annual Review of Criminology*, 4, 53-71
- Reicher, S. D. (1984) The St Pauls' riot: An explanation of the limits of crowd action in terms of a social identity model, *European Journal of Social Psychology*, 14, 1-21
- Waddington, D. (1998) Waddington Versus Waddington: Public Order Theory on Trial, *Theoretical Criminology*, 2: 373-394

Additional reading:

- Castells, M. (2015) *The Egyptian Revolution*, in Goodwin, J. and Jasper, J.M. (eds) *The Social Movements Reader*, Oxford: Blackwell
- King, M. and Waddington, D. (2006) Flashpoints revisited: a critical application to the policing of anti-globalization protest, *Policing and Society*, 15, 3, 255-282
- Marx, G. (1972) *Issueless riots*, in Short, J. and Wolfgang, M. (eds)

Collective Violence, Chicago: Aldine

- Newburn, T., Cooper, K., Deacon, R. and Diski, R. (2015) 'Shopping for Free? Looting, consumerism and the 2011 riots, British Journal of Criminology, 55 (5): 987-1004
- Proctor, R., Crump, J., Karstedt, S., Voss, A. and Cantijoch, M. (2013) Reading the riots: what were the police doing on Twitter?, Policing and Society, 23, 4, 413-36
- Stott, C. and Drury, C. (2017) Contemporary understanding of riots: Classical crowd psychology, ideology and the social identity approach, Public Understanding of Science, 21, 1, 2-14

Assessment: Coursework (100%, 3000 words) in the WT.

The coursework (100%) will comprise a single summative essay. Students will have considerable input in deciding the precise focus of their individual summative work.

SP399

Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Fabio Battaglia

Availability: This course is compulsory on the BSc in International Social and Public Policy, BSc in International Social and Public Policy and Economics and BSc in International Social and Public Policy with Politics. This course is not available as an outside option nor to General Course students.

Course content: The course aims to equip students with the skills and knowledge needed to produce a dissertation which demonstrates their ability to conduct independent research and develop their own arguments in an academic, impartial way. Students will be required to submit a dissertation of 8,000 words on a topic to be approved by the candidate's Academic Mentor. The dissertation is designed to allow a detailed and thorough exploration of a social policy topic that is of interest to the student and within the field of the degree programme. It may involve original fieldwork, or the critical analysis and appraisal of existing literature.

Teaching: Students will be allocated an Academic Mentor who will supervise their dissertation. In addition to individual supervision meetings, there will be compulsory lectures in both the Autumn and Winter Term to help students plan and structure their work on the dissertation, as well as additional optional advice/troubleshooting sessions. In the Winter Term, there will also be compulsory presentation sessions: all students will be expected to make a brief presentation on their topic and will receive feedback from attending faculty and peers.

All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Further information will be provided by the Course Convenor in the first lecture of the course.

This course is taught in both AT and WT.

Formative coursework: Students are required to agree their dissertation title with their Academic Mentor and submit it to the Department at a date which will be set by the Department.

Indicative reading: Students will be expected to draw extensively from the reading they have undertaken throughout their programme of study.

Suggested reading on conducting research projects in Social Policy:

- Alcock, P. et al, 2016. *The Student's Companion to Social Policy*. Chichester: John Wiley & Sons Ltd. (5th edition).
- Brinkmann, S. and Kvale, S., 2018. *Doing Interviews*. London: SAGE Publications Ltd. (2nd edition).
- Bryman, A., 2016. *Social Research Methods*. Oxford: Oxford University Press (5th edition).
- Robson, C. and McCartan, K., 2016. *Real World Research*. Hoboken: Wiley-Blackwell (4th edition).
- Seale, C., 2017. *Researching Society and Culture*. Thousand Oaks: SAGE Publications Ltd. (4th edition).

Thomas, G., 2017. *How To Do Your Research Project*.

London: SAGE Publications Ltd. (3rd edition).

Yin, R. K., 2003. *Case Study Research*. Design and Methods.

London: SAGE Publications Ltd. (3rd edition).

Assessment: Dissertation (100%, 8000 words) in the ST.

Submission is due in ST. Precise details on date of submission, format and presentation will be issued by the Department.

ST101 Half Unit

Programming for Data Science

This information is for the 2024/25 session.

Teacher responsible: Dr Christine Yuen

Availability: This course is compulsory on the BSc in Data Science, BSc in Mathematics with Data Science and BSc in Politics and Data Science. This course is available on the BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Actuarial Science (with a Placement Year), BSc in Finance and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place.

Pre-requisites: Although not a formal requirement, it is preferable that students have some familiarity with the basic concepts of probability and statistics, to the level of ST102/ST107 first 2 chapters (Data visualisation and descriptive statistics and probability theory).

Course content: The primary focus of the course is to cover principles of computer programming with a focus on data science applications.

The topic covered will include variables, basic data types, data structures and sequences, control flow structures, modularisation, functions, variable and function scoping, testing and debugging, errors and exception handling, and data input-output operations using file systems and operating system standard input-output; principles of object-oriented programming including objects, classes, methods, encapsulation, inheritance, and polymorphism; principles of functional programming languages such as use of immutable data, flow control using functional calls and recursions; practical aspects of algorithmic concepts such as searching. The course will primarily use Python programming language, but may also discuss and provide references to how the fundamental programming concepts are implemented in other programming languages, in particular, R.

Teaching: 20 hours of lectures and 20 hours of seminars in the AT. This course does not include reading weeks.

Students are required to install Python on their own laptops and use their own laptops in the classes and lectures.

Formative coursework: Students will be expected to produce 5 problem sets in the AT.

The problem sets will consist of computer programming exercises in Python programming language.

Indicative reading:

- J. V. Guttag, Introduction to Computation and Programming using Python, Second Edition, The MIT Press, 2017
- A. B. Downey, Think Python: How to Think like a Computer Scientist, 2nd Edition, O'Reilly Media, 2015
- P. Gries, J. Campbell, and J. Montojo, Practical programming: an introduction to computer science using Python 3.6, Pragmatic Bookshelf, 2017

Additional reading

- W. McKinney, Python for Data Analysis, 2nd Edition, O'Reilly, 2017
- J. Zelle, Python Programming: An Introduction to Computer Science, 3rd edition, Franklin, Beedle & Associates, 2016
- M. Lutz, Learning Python, 5th Edition, O'Reilly Media, 2013
- M. Dawson, Python Programming for the Absolute Beginner, 3rd Edition, Course Technology, 2010

Assessment: Exam (70%, duration: 2 hours, reading time: 15

minutes) in the January exam period.
 Continuous assessment (30%) in the AT.
 The exam will be an invigilated on-campus 'e-exam'.

ST101A Half Unit Not available in 2024/25

Programming for Data Science

This information is for the 2024/25 session.

Teacher responsible: Dr Christine Yuen

Availability: This course is compulsory on the BSc in Data Science and BSc in Mathematics with Data Science. This course is available on the BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Finance, BSc in Mathematics, Statistics and Business and BSc in Politics and Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped) and demand is typically very high. Students who have this course as a compulsory course are guaranteed a place.

Pre-requisites: Although not a formal requirement, it is preferable that students have some familiarity with the basic concepts of probability and statistics, to the level of ST102/ST107 first 2 chapters (Data visualisation and descriptive statistics and probability theory).

Course content: The primary focus of the course is to cover principles of computer programming with a focus on data science applications.

The topic covered will include variables, basic data types, data structures and sequences, control flow structures, modularisation, functions, variable and function scoping, testing and debugging, errors and exception handling, and data input-output operations using file systems and operating system standard input-output; principles of object-oriented programming including objects, classes, methods, encapsulation, inheritance, and polymorphism; principles of functional programming languages such as use of immutable data, flow control using functional calls and recursions; practical aspects of algorithmic concepts such as searching. The course will primarily use Python programming language, but may also discuss and provide references to how the fundamental programming concepts are implemented in other programming languages, in particular, R.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 35 hours in Autumn Term.

Students are required to install Python on their own laptops and use their own laptops in the classes and lectures.

Formative coursework: Students will be expected to produce 7 problem sets in the AT.

The problem sets will consist of computer programming exercises in Python programming language.

Indicative reading: Essential Reading:

- J. V. Guttag, Introduction to Computation and Programming using Python, Second Edition, The MIT Press, 2017
- A. B. Downey, Think Python: How to Think like a Computer Scientist, 2nd Edition, O'Reilly Media, 2015

Additional Reading:

- W. McKinney, Python for Data Analysis, 2nd Edition, O'Reilly, 2017
- J. Zelle, Python Programming: An Introduction to Computer Science, 3rd edition, Franklin, Beedle & Associates, 2016
- M. Lutz, Learning Python, 5th Edition, O'Reilly Media, 2013
- M. Dawson, Python Programming for the Absolute Beginner, 3rd Edition, Course Technology, 2010

Assessment: Exam (70%, duration: 2 hours, reading time: 10 minutes) in the spring exam period.
 Coursework (30%) in the AT.

Students are required to hand in solutions to 3 problem sets using Python, each accounting for 10% of the final assessment.

ST101W Half Unit Not available in 2024/25

Programming for Data Science

This information is for the 2024/25 session.

Teacher responsible: Dr Christine Yuen

Availability: This course is available on the BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Finance, BSc in Mathematics, Statistics and Business and BSc in Politics and Data Science. Assessment: Exam (70%, duration: 2 hours, reading time: 10 minutes) in the spring exam period.

Coursework (30%) in the WT.

Students are required to hand in solutions to 3 problem sets using Python, each accounting for 10% of the final assessment.

ST102

Elementary Statistical Theory

This information is for the 2024/25 session.

Teacher responsible: Dr James Abdey COL.8.07

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Data Science, BSc in Econometrics and

Mathematical Economics, BSc in Finance, BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business and BSc in Politics and Data Science. This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Philosophy, Politics and Economics (with a Year Abroad). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST107 Quantitative Methods (Statistics), ST109 Elementary Statistical Theory I or ST110 Elementary Statistical Theory II.

Pre-requisites: A-level Mathematics.

No previous knowledge of statistics is assumed.

Course content: The course provides a precise and accurate treatment of introductory probability and distribution theory, statistical ideas, methods and techniques. Topics covered are data visualisation and descriptive statistics, probability theory, random variables, common distributions of random variables, multivariate random variables, sampling distributions of statistics, point estimation, interval estimation, hypothesis testing, analysis of variance (ANOVA) and linear regression.

Teaching: 22 hours of lectures, 15 hours of classes and 10 hours of workshops in the AT. 20 hours of lectures, 15 hours of classes and 10 hours of workshops in the WT. 2 hours of lectures in the ST. This course will be delivered through a combination of lectures, workshops and classes, totalling a minimum of 90 hours across Autumn Term and Winter Term. This course does not include reading weeks.

Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week for feedback.

Indicative reading: All course materials are made available via Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is:

Larsen R.J. and M.L. Marx (2017) *Introduction to Mathematical Statistics and Its Applications* (sixth edition), Pearson (earlier editions are also fine).

Assessment: Exam (50%, duration: 2 hours, reading time: 10 minutes) in the January exam period.

Exam (50%, duration: 2 hours, reading time: 10 minutes) in the spring exam period.

ST107 Half Unit

Quantitative Methods (Statistics)

This information is for the 2024/25 session.

Teacher responsible: Dr James Abdey COL.8.07

Availability: This course is compulsory on the BSc in Economic History with Economics, BSc in Economics and Economic History, BSc in Environment and Sustainable Development with Economics, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in International Social and Public Policy and Economics and BSc in Management. This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Philosophy, Politics and Economics (with a Year Abroad), BSc in Politics and Economics and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST102 Elementary Statistical Theory (nor its respective half-units ST109 and ST110).

Pre-requisites: A-level Mathematics.

Course content: The elementary statistical tools necessary for further study in management and economics with an emphasis on the applicability of the methods to management and economic problems. Topics covered are data visualisation and descriptive statistics, probability theory, discrete probability distributions,

continuous probability distributions, sampling distributions of statistics, point estimation, interval estimation, hypothesis testing, contingency tables and the chi-squared test, correlation and linear regression.

Teaching: 20 hours of lectures, 15 hours of classes and 10 hours of workshops in the WT. 2 hours of lectures in the ST.

This course will be delivered through a combination of classes, lectures and workshops totalling a minimum of 45 hours across Winter Term. This course does not include a reading week in Week 6 of Winter Term.

Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week for feedback.

Indicative reading: All course materials are made available via Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is:

Newbold, P., W.L. Carlson and B.M. Thorne (2019) *Statistics for Business and Economics*. (9th edition), Pearson (earlier editions are also fine).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

ST109 Half Unit

Elementary Statistical Theory I

This information is for the 2024/25 session.

Teacher responsible: Dr James Abdey COL.8.07

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics and BSc in Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST102 Elementary Statistical Theory or ST107 Quantitative Methods (Statistics).

Pre-requisites: A-level Mathematics.

No previous knowledge of statistics is assumed.

Course content: The course provides a precise and accurate treatment of introductory probability and distribution theory. Topics covered are data visualisation and descriptive statistics, probability theory, random variables, common distributions of random variables and multivariate random variables.

Teaching: 22 hours of lectures, 15 hours of classes and 10 hours of workshops in the AT.

This course will be delivered through a combination of classes, lectures and workshops totalling a minimum of 45 hours in Autumn Term. This course does not include a reading week.

Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week for feedback.

Indicative reading: All course materials are made available via Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is:

Larsen R.J. and M.L. Marx (2017) *Introduction to Mathematical Statistics and Its Applications* (sixth edition), Pearson (earlier editions are also fine).

Assessment: Exam (100%, duration: 2 hours, reading time: 10 minutes) in the January exam period.

ST110 Half Unit

Elementary Statistical Theory II

This information is for the 2024/25 session.

Teacher responsible: Dr James Abdey COL.8.07

Availability: This course cannot be taken with ST102 Elementary Statistical Theory or ST107 Quantitative Methods (Statistics).

Pre-requisites: Students must have completed Elementary

Statistical Theory I (ST109).

A-level Mathematics.

Course content: The course provides a precise and accurate treatment of statistical ideas, methods and techniques. Topics covered are sampling distributions of statistics, point estimation, interval estimation, hypothesis testing, analysis of variance (ANOVA) and linear regression.

Teaching: 20 hours of lectures, 15 hours of classes and 10 hours of workshops in the WT. 2 hours of lectures in the ST.

This course will be delivered through a combination of classes, lectures and workshops totalling a minimum of 45 hours in Winter Term. This course does not include a reading week.

Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week for feedback.

Indicative reading: All course materials are made available via Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is:

Larsen R.J. and M.L. Marx (2017) *Introduction to Mathematical Statistics and Its Applications* (sixth edition), Pearson (earlier editions are also fine).

Assessment: Exam (100%, duration: 2 hours, reading time: 10 minutes) in the spring exam period.

ST111 Half Unit Business Analytics

This information is for the 2024/25 session.

Teacher responsible: Dr Pik Kun Liew COL.7.15

Availability: This course is available on the BSc in Actuarial Science, BSc in Actuarial Science (with a Placement Year) and BSc in Mathematics, Statistics and Business. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students should have taken, or be taking concurrently, Elementary Statistical Theory (ST102).

Course content: Business analytics is the process of using quantitative methods to learn from data to make informed business decisions. This half-unit course aims to provide students with an understanding of the context in which business analytics operates. Understanding the business environment and contemporary issues, such as the risks and impact of climate change, the fast-paced development of information technology and artificial intelligence, helps students to apply analytics concepts and incorporate these issues in decision-making effectively. Students will learn how business analytics assists organisations to make informed, confident decisions using statistical methods to create key metrics and to gain insights, reducing guesswork from decision-making. The course also aims to foster critical thinking regarding the complexities and intricacies inherent in data and statistical analysis. Students will learn about moral, data, and statistical literacy, along with the fundamentals of good statistical science. Students will be equipped with essential competencies to navigate ethical dilemmas, to obtain and handle data responsibly, and apply sound statistical principles in decision-making. It empowers them to be informed, ethical, responsible, and effective data practitioners.

The course takes an investigative and problem-driven approach and adopts the Problem, Plan, Data, Analysis and Conclusion (PPDAC) problem-solving cycle. Students will participate in project-based investigations, which serve as ideal platforms for student engagement, contextual problem-solving, and the integration of various learning components. These projects also provide a natural setting for developing statistical and critical thinking by guiding students through the entire process of conducting real statistical data inquiries—from initial conception and planning to data collection, exploration, and reporting. Additionally, collaborative group projects foster a dynamic learning environment, allowing students of all abilities to mutually enhance their knowledge and skills through interaction and shared experiences.

The course also aims to equip students with the ability to collect and utilise publicly available data, apply analytical tools to problem-solving, and make evidence-based decisions. It emphasises the practical application of analytical tools to real-world business challenges using relevant case studies. Students will develop proficiency in using tools such as Excel and R within the PPDAC cycle of investigation. They will work with data sets, identify patterns, and extract meaningful insights through statistical and scenario analysis. Furthermore, students will critically analyse and synthesise the context and background information presented in relevant cases. They will also learn effective communication by presenting their insights to diverse audiences, including investors, managers, government officials, and other stakeholders. This involves creating clear data visualisations, presentations, and reports.

Teaching: 15 hours of lectures and 20 hours of seminars in the WT.

The course will be delivered through:

- Ten 1.5-hour lectures in WT (weeks 1-10)
- Ten 2-hour classes in WT (weeks 2-11)

This course does not include a reading week.

Formative coursework: Students are expected to come to each class prepared where the assigned works have been read and attempted. There will also be several online quizzes to assess student's knowledge and progress during the term on a formative basis for feedback. Feedback on performance and progress will be provided during classes, on selected written homework assignments, and during academic support and feedback hours.

Indicative reading: Detailed course programme and reading lists will be made available via Moodle and Reading List - LSE before the first lecture. A range of textbooks, academic papers, professional reports, and news articles will be used in the course. Two key textbooks that will be used are:

- Abdey, J. (2024) *Business Analytics: Applied Modelling & Prediction*. London, UK: Sage.
- Spiegelhalter, D. (2021) *The Art of Statistics: How to Learn from Data*. New York, USA: Basic Books.

Assessment: Project (60%, 1250 words) in the period between WT and ST.

Group presentation (30%) in the WT Week 9.

Continuous assessment (10%) in the WT.

Further details of all aspects of assessment and coursework, as well as feedback, will be made available on Moodle nearer the scheduled start time of the course and will be updated as the course progresses with specific instructions, guidance, and feedback.

ST115 Half Unit Managing and Visualising Data

This information is for the 2024/25 session.

Teacher responsible: Dr Christine Yuen

Availability: This course is compulsory on the BSc in Data Science. This course is available on the BSc in Actuarial Science. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Pre-requisites: Students who have no previous experience in Python are required to take an online pre-sessional Python course from the Digital Skills Lab.

Students should have taken, or be taking concurrently, a first course in statistics such as Elementary Statistical Theory (ST102), Elementary Statistical Theory I (ST109) or Quantitative Methods (Statistics) (ST107)

Course content: The course focuses on the fundamental principles of effective manipulation and visualisation of data.

This will cover the key steps of a data analytics pipeline, starting with the formulation of a data science problem, going through collection, manipulation and visualisation of data, and, finally, creating actionable insights. The topics covered include methods for data cleaning and transformation, manipulation of data using tabular data structures, relational database models, structured query languages (e.g. SQL), processing of various human-readable data formats (e.g. JSON and XML), data visualisation methods for explanatory data analysis, using various statistical plots such as histograms and boxplots, data visualisation plots for time series data, multivariate data, graph data visualisation methods.

The course will cover basic concepts and principles and will enable students to gain hands-on experience in using Python programming for the manipulation and visualisation of data. This will include the use of standard modules and libraries such as NumPy, Pandas, Matplotlib and Seaborn, and programming environments such as Jupyter Notebook.

The course will use examples drawn from a wide range of applications such as those that arise in online services, social media, social networks, finance, and machine learning. The principles and methods learned will enable students to effectively derive insights from data and communicate results to end users.

Teaching: 20 hours of lectures and 15 hours of seminars in the WT.

This course will be delivered through a combination of classes and lectures totalling a minimum of 35 hours in Winter Term. This course does not include reading weeks.

Students are required to install Python and other required software on their own laptops and use their own laptops in the lectures and classes.

Formative coursework: Students will be expected to produce 7 exercises in the WT.

Weekly exercises will be given, using Python, various libraries and tools introduced in the course to apply various data manipulation and visualisation methods to data.

Essential Reading: 1 W. McKinney, Python for Data Analysis, 2nd Edition, O'Reilly 2017

2 A. C. Muller and S. Guido, Introduction to Machine Learning with Python, O'Reilly, 2016

3 Easley, David, and Jon Kleinberg. Networks, crowds, and markets: Reasoning about a highly connected world. Cambridge university press, 2010

4 R. Ramakrishnan and J. Gehrke, Database Management Systems, 3rd Edition, McGraw Hill, 2002

Additional Reading: 1 NumPy, <https://numpy.org/>

2 Python Data Analysis Library, <https://pandas.pydata.org/>

3 Matplotlib, <https://matplotlib.org>

4 Seaborn: statistical data visualization <https://seaborn.pydata.org>

5 NetworkX: Software for complex networks, <https://networkx.org>

Assessment: Coursework (30%) in the WT.

Project (70%) in the WT and ST.

Students are required to submit the solutions to 2 sets of exercises using mainly Python (accounting for 30% of the final assessment) during WT, and submit a group project at the beginning of ST. The project consists of applying data manipulation and visualisation methods to some dataset(s).

ST201 Half Unit

Statistical Models and Data Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Yunxiao Chen COL 5.16

Availability: This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Also available to students who have studied statistics and mathematics to the level of ST107 Quantitative Methods or equivalent.

This course cannot be taken with ST211 Applied Regression

or DS202 Data Science for Social Scientists.

This course is not controlled access. If you request a place and meet the criteria you are likely to be given a place.

Pre-requisites: Quantitative Methods (ST107) or equivalent.

"Previous programming experience is not required but students who have no previous experience in R must complete an online pre-session R course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=7745>)"

Course content: A second course in statistics with an emphasis on data analysis with applications in the social sciences. Students will gain hands on experience using R-- a programming language and software environment for data analysis and visualisation. The course contains five topics, including (1) principles of statistical analysis, including data preparation, statistical models, regression and classification, inference, prediction, and bias-variance tradeoff, (2) multiple linear regression, including its assumptions, inference, data transformations, diagnostics, model selection, (3) regression tree method, (4) logistic regression, including odds ratios, likelihood, classification, and ROC curve, and (5) Bayes rule for classification and linear discriminant analysis.

Teaching: This course will be delivered through a combination of classes and lectures, totalling a minimum of 36 hours across Winter Term and 2 hours of lecture in the Spring Term. Students will be given their assessed project in week 9 which is due in Week 1 of Spring Term.

Formative coursework: Exercise questions in computer workshops and a quantitative research project.

Indicative reading: James, G., Witten, D., Hastie, T., & Tibshirani, R. (2013). An introduction to statistical learning. New York, NY: Springer.

Fox, J. (2015). Applied regression analysis and generalized linear models. Thousand Oaks, CA: Sage Publications.

Assessment: Exam (80%, duration: 2 hours) in the spring exam period.

Coursework (20%) in the WT.

ST202

Probability, Distribution Theory and Inference

This information is for the 2024/25 session.

Teacher responsible: Dr Miltiadis Mavrakakis

Availability: This course is compulsory on the BSc in Actuarial Science and BSc in Financial Mathematics and Statistics.

This course is available on the BSc in Data Science, BSc in Econometrics and Mathematical Economics, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102) and Mathematical Methods (MA100). Students who have not taken these courses should contact Dr Mavrakakis.

Students must have completed one of the following two combinations of courses: (a) ST102 and MA100, or (b) MA107 and ST109 and EC1C1. Equivalent combinations may be accepted at the lecturer's discretion."

Course content: The course covers the probability, distribution theory and statistical inference needed for advanced courses in statistics and econometrics.

Michaelmas term: Probability. Conditional probability and independence. Random variables and their distributions. Moments and generating functions. Transformations. Sequences of random variables and convergence. Multivariate distributions. Joint and marginal distributions. Expectation and joint moments. Independence. Multivariate transformations. Sums of random variables. Conditional distributions. Conditional moments. Hierarchies and mixtures. Random sums.

Lent term: Random samples. Sample mean. Sampling from

the Normal distribution. Order statistics. Sample statistics. Sampling distributions. Parameter estimation. Interval estimation. Hypothesis testing. Maximum-likelihood estimation. Likelihood-ratio test. Sufficiency and minimal sufficiency. Rao-Blackwell theorem. Cramér-Rao lower bound. Most powerful tests. Neyman-Pearson lemma. Linear regression. Least-squares estimation. Generalised linear models. Bayesian inference.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 60 hours across Michaelmas Term and Lent Term. In addition to these, there will be (optional) weekly workshops to help with homework assignments. This course includes reading weeks in Week 6 of Michaelmas Term and Lent Term.

Formative coursework: Students will be expected to produce 4 pieces of coursework in the AT and WT. These are exam-style class tests.

Indicative reading: M C Mavrakakis & J Penzer, Probability and Statistical Inference: From Basic Principles to Advanced Models (primary reading)

G C Casella & R L Berger, Statistical Inference (very useful as a reference)

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Exam (50%, duration: 2 hours) in the spring exam period.

ST205 Half Unit

Sample Surveys and Experiments

This information is for the 2024/25 session.

Teacher responsible: Professor Irini Moustaki

Availability: This course is compulsory on the BSc in Politics and Data Science. This course is available on the BSc in Accounting and Finance, BSc in Data Science, BSc in Management, BSc in Mathematics, Statistics and Business, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students. This course cannot be taken with ST307 Aspects of Market Research.

Pre-requisites: Statistics to the level of ST107 Quantitative Methods or SP201 Research Methods for Social Policy.

Course content: Sampling methods for social surveys. Survey design and estimation. Nonresponse and measurement error. Design of experiments and observational studies.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours in Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Weekly exercises and group presentations. Students are expected to work on exercises weekly and submit them for marking and feedback. Feedback is provided on the weekly exercises by the beginning of the next class. Students will gain hands-on experience using R to solve problems.

Indicative reading:

- S. Lohr, Sampling: Design and Analysis (2021)
- V. Barnett, Sample Survey Principles and Methods (2009)
- F.J. Fowler Jr, Survey Research Methods (2008).
- R.L. Scheaffer et al, Elementary Survey Sampling (2005)

Assessment: Exam (80%, duration: 2 hours) in the January exam period.

Coursework (20%) in the AT.

Note: The coursework is a group project.

ST206 Half Unit

Probability and Distribution Theory

This information is for the 2024/25 session.

Teacher responsible: Dr Miltiadis Mavrakakis

Availability: This course is available on the BSc in Data Science, BSc in Mathematics with Data Science and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102) and Mathematical Methods (MA100). Students must have completed one of the following two combinations of courses: (a) ST102 and MA100, or (b) MA107 and ST109 and EC1C1. Equivalent combinations may be accepted at the lecturer's discretion.

Course content: The course covers the probability and distribution theory needed for advanced courses in statistics and econometrics.

Topics covered: Probability. Conditional probability and independence. Random variables and their distributions. Moments and generating functions. Transformations. Sequences of random variables and convergence. Multivariate distributions. Joint and marginal distributions. Expectation and joint moments. Independence. Multivariate transformations. Sums of random variables. Conditional distributions. Conditional moments. Hierarchies and mixtures. Random sums.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term. In addition to these, there will be (optional) weekly workshops to help with homework assignments. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce 2 pieces of coursework in the AT.

These are exam-style class tests.

Indicative reading: M C Mavrakakis & J Penzer, Probability and Statistical Inference: From Basic Principles to Advanced Models (primary reading)

G C Casella & R L Berger, Statistical Inference (very useful as a reference)

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

ST207 Half Unit

Databases

This information is for the 2024/25 session.

Teacher responsible: Dr Marcos Barreto

Availability: This course is compulsory on the BSc in Data Science and BSc in Politics and Data Science. This course is available on the BSc in Actuarial Science, BSc in Mathematics with Data Science and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course has a limited number of places (it is capped). Students who have this course as a compulsory course are guaranteed a place. Places for all other students are allocated on a first come first served basis.

Pre-requisites: A computer programming course using Python, e.g. a pre-session course **or** Programming for Data Science (ST101).

Course content: The goal of this course is to cover concepts of database management systems, including relational and non-relational databases.

The topics covered will include: Relational database design; Structured Query Language (SQL) for database implementation and manipulation; Integrity constraints, triggers and database views; Concurrency control and recovery mechanisms; Multimedia and spatiotemporal databases; NoSQL databases (key-value

stores, document, and graph databases; Vector databases and large language models (LLMs) applied to databases. The course will demonstrate how various theoretical principles are implemented in practice in a database management system, such as MySQL or SQLite, and also in NoSQL, multimedia, spatiotemporal and vector database software.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT. This course includes a reading week in Week 6 of Autumn Term. Students are required to use their own laptops and install Python and other tools (under guidance of the teaching staff) on their laptops.

Formative coursework: Students will be expected to produce 10 exercises in the AT.

A set of exercises will be given in each teaching week.

Indicative reading: Essential Reading:

- R. Elmasri and S. B. Navathe. Fundamentals of Database Systems, 7th edition (Global Edition). 160 Pearson, 2016.
- G. Powell. Database Modeling Step-by-Step, 160 CRC Press, 160 Taylor & Francis, 2019.
- A. Beaulieu. Learning SQL: generate, manipulate, and retrieve data, 3rd edition. O'Reilly, 2020.
- E. Foster and S. Godbole. Database Systems: a pragmatic approach, 3rd edition. CRC Press, 2023.
- E. Sciore. Database Design and Implementation. 2nd edition. Springer, 2020.
- S. Bradshaw, E. Brazil, K. Chodorow. MongoDB: the definitive guide, 3rd edition. O'Reilly, 2019.
- I. Robinson and J. Webber and E. Eifrem. Graph Databases. 2nd edition. O'Reilly, 2015.

Additional Reading:

- P. Zhang. Practical Guide to Oracle SQL, T-SQL and MySQL, CRC Press. Taylor & Francis, 2018.
- A. Meier and M. Kaufmann. SQL & NoSQL Databases: models, languages, consistency options and architectures for big data management. Springer Vieweg, 2019.
- S. Bagui and R. Earp. Database Design using Entity-Relationship Diagrams, 3rd edition. CRC Press, 2023.
- C. Garrard. Geoprocessing with Python. Manning Publications, 2016.
- B. McClain. Python for Geospatial Data Analysis. O'Reilly, 2022.
- B. Prabhakaran. Multimedia Database Management Systems. Springer. 2012.
- J. Pan, J. Wang, and G. Li. Survey of Vector Database Management Systems. 2023. <https://doi.org/10.48550/arXiv.2310.14021>

Assessment: Coursework (40%) in the AT.

Project (60%) in the period between AT and WT.

Students are required to hand in solutions to 2 individual sets of exercises, each accounting for 20% of the final assessment. The group project will require solving a practical task involving data modeling, database creation (including views and triggers when pertinent), data loading and utilisation (querying). The students will be encouraged to work with a mixture of relational and non-relational real and/or synthetic data and design a database application that approximates a real scenario.

ST211 Half Unit Applied Regression

This information is for the 2024/25 session.

Teacher responsible: Dr Sara Geneletti

Availability: This course is compulsory on the BSc in Data Science, BSc in Mathematics, Statistics and Business and BSc in Politics and Data Science. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students. Specifically the course is available to Accounting and Finance students who have taken ST102. This course cannot be taken with ST201 Statistical Models and Data Analysis.

Pre-requisites: Students who have no previous experience in R are required to complete an online pre-session R course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=7745>)

Students must have completed one of the following two combinations of courses: (a) ST102, or (b) ST109 and EC1C1. Equivalent combinations may be accepted at the lecturer's discretion.

Course content: Statistical data analysis in R covering the following topics: Simple and multiple linear regression, Model diagnostics, Detection of outliers, Multicollinearity, Introduction to GLMs.

Teaching: This course will be delivered through a combination of classes and lectures (both or either of which maybe held online) totalling a minimum of 30 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term in which the students work independently on a mini-project (no lectures).

Formative coursework: Regular Moodle quizzes.

Indicative reading: 1 Gelman and Hill, Data analysis Using Regression and Multilevel/Hierarchical models (CUP, 2007) First part.

2 Neter, J., Kutner, M., Nachtsheim, C. and Wasserman, W. Applied Linear Statistical Models, McGraw-Hill, Fourth Edition. (2004).

3 Abraham, B. Ledolter, J. Introduction to Regression Modelling, Thomson Brooks Cole. (2006).

4 S. Weisberg Applied Linear Regression, Wiley, 3rd edition. (2005) (intermediate).

5 Fox (2016) Applied Regression Analysis and Generalized Linear Models.

Assessment: Project (55%) and project (35%) in the ST Week 2. Coursework (10%) in the WT Week 6.

10%: A group work mini-project to be handed in at the end of reading week (LT week 8)

55%: A group work multiple linear regression project to be handed in by the second week of the ST

35%: An individual logistic regression project to be handed in at the same time as the group project in the second week of the ST.

ST213 Half Unit

Introduction to Pricing, Hedging and Optimization

This information is for the 2024/25 session.

Teacher responsible: Dr David Itkin

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA203 Real Analysis. Must be taken with ST202 Probability, Distribution Theory and Inference.

Course content: This course introduces the concepts of valuation, hedging and portfolio selection in a discrete-time environment. Towards the end, it introduces continuous-time markets in a heuristic fashion. It covers the following topics:

- The binomial model; pricing and replication.
- Trinomial model and incompleteness, arbitrage-free price intervals.
- General discrete-time models and the fundamental theorems.
- Portfolio optimization and hedging.
- Multi-period models and backwards induction methods.
- Passage to continuous time Black & Scholes model.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 9 problem sets in the WT.

Certain problem sets will be returned with feedback.

Indicative reading: Lecture notes will be provided.

Assessment: Exam (80%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.
Coursework (20%).

ST226 Half Unit

Actuarial Investigations: Financial

This information is for the 2024/25 session.

Teacher responsible: Mr Georgios Zourou

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Data Science and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. This course has a limited number of places. It is capped, the maximum number of students will be 130. Priority will be given to students on BSc Mathematics, Statistics and Business and BSc Data Science. Whilst there are places available to students from outside these programmes, they are very limited and are allocated on a first come first served basis.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102). Students must have completed one of the following two combinations of courses: (a) ST102 and MA100, or (b) MA107 and ST109 and EC1C1. Equivalent combinations may be accepted at the lecturer's discretion."

Course content:

- Introduction to actuarial modelling
- The application of compound interest techniques to financial transactions
- Generalised cash-models to describe financial transactions such as zero-coupon bonds, fixed interest securities, cash on deposit, equities, interest only loans, repayment loans, annuities certain and others
- Introduction to R programming for Actuarial Science
- Introduction to life insurance

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. This course will be delivered through a combination of lectures and seminars across the Autumn Term.

This course includes a reading week in Week 6.

Formative coursework: Students will be expected to work in groups and give written answers to a number of problem sets throughout the term.

Indicative reading: J. J. McCutcheon & W. J. Scott, An Introduction to the Mathematics of Finance, Heinemann; Institute and Faculty of Actuaries, Formulae and Tables for Actuarial Examinations; Core reading notes obtainable from the Institute and Faculty of Actuaries; D. Dickson, M. Hardy & H. Waters, Actuarial Mathematics for Life Contingent Risks, International Series on Actuarial Science, pp. I-Vi. Cambridge University Press. 2009

Assessment: Exam (90%, duration: 3 hours) in the January exam period.

Online assessment (10%) in the AT Week 11.

ST227 Half Unit

Survival Models

This information is for the 2024/25 session.

Teacher responsible: Mr Georgios Zourou

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Data Science and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

"Students must have completed one of the following two combinations of courses: (a) ST102 and MA100, or (b) MA107 and ST109 and EC1C1. Equivalent combinations may be accepted at the lecturer's discretion."

Course content: An introduction to stochastic processes with emphasis on life history analysis and actuarial applications. Principles of modelling; model selection, calibration, and testing; Stochastic processes and their classification into different types by time space, state space, and distributional properties; construction of stochastic processes from finite-dimensional distributions, processes with independent increments, Poisson processes and renewal processes and their applications in general insurance and risk theory, Markov processes, Markov chains and their applications in life insurance and general insurance, extensions to more general intensity-driven processes, counting processes, semi-Markov processes, stationary distributions. Determining transition probabilities and other conditional probabilities and expected values; Integral expressions, Kolmogorov differential equations, numerical solutions, simulation techniques. Survival models - the random life length approach and the Markov chain approach; survival function, conditional survival function, mortality intensity, some commonly used mortality laws. Statistical inference for life history data; Maximum likelihood estimation for parametric models, non-parametric methods (Kaplan-Meier and Nelson-Aalen), regression models for intensities including the semi-parametric Cox model and partial likelihood estimation; Various forms of censoring; The technique of occurrence-exposure rates and analytic graduation; Impact of the censoring scheme on the distribution of the estimators; Confidence regions and hypothesis testing.

Teaching: This course will be delivered through a combination of lectures and classes totalling a minimum of 30 hours across the Winter/Spring Terms, some of this teaching may be delivered as short online videos. This course includes a reading week in Week 6.

Formative coursework: Compulsory written answers to two sets of problems.

Indicative reading: S Ross, Stochastic Processes; R Norberg, Risk and Stochastics in Life Insurance; The Institute of Actuaries, CS2: Risk Modelling and Survival Analysis. For full details of the syllabus of CS2, see <https://actuaries.org.uk/qualify/curriculum/actuarial-statistics/>

Assessment: Exam (90%, duration: 3 hours) in the spring exam period.

Coursework (10%) in the period between WT and ST.

ST300 Half Unit

Regression and Generalised Linear Models

This information is for the 2024/25 session.

Teacher responsible: Dr Mona Azadkia

Availability: This course is available on the BSc in Actuarial Science, BSc in Data Science, BSc in Financial Mathematics and Statistics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not capped, any student that requests a place will be given one

Pre-requisites: Students must have completed: Probability, Distribution Theory and Inference (ST202) AND Mathematical Methods (MA100) or equivalent.

It is assumed students have taken at least a first course in linear algebra.

Previous programming experience is not required but students who have no previous experience in R must complete an online pre-sessional R course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=8714>)

Course content: A solid coverage of the most important parts of the theory and application of regression models, and generalised linear models. Multiple regression and regression

diagnostics. Generalised linear models; the exponential family, the linear predictor, link functions, analysis of deviance, parameter estimation, deviance residuals. Model choice, fitting and validation. The use of the statistics package RStudio will be an integral part of the course. The computer workshops revise the theory and show how it can be applied to real datasets.

Teaching: This course will be delivered through a combination of lectures and classes totalling a minimum of 30 hours in Autumn Term.

This course includes a reading week in Week 6.

Indicative reading:

- Dobson, A.J. (2008). *An Introduction to Generalized Linear Models*.
- Fox, J. (2015). *Applied Regression Analysis and Generalized Linear Models*
- Frees, E.W. (2010). *Regression Modeling with Actuarial and Financial Applications*

Assessment: Exam (70%, duration: 2 hours) in the January exam period.

Coursework (30%) in the AT.

ST301 Half Unit

Actuarial Mathematics (Life)

This information is for the 2024/25 session.

Teacher responsible: Prof Angelos Dassios COL.7.14

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Data Science and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed:

EITHER Probability, Distribution Theory and Inference (ST202) OR Probability and Distribution Theory (ST206)
AND both Actuarial Investigations: Financial (ST226) AS WELL AS Survival Models (ST227).

Course content: Single life mortality models, assurance and annuity contracts and their actuarial notation, computation of their present values and variances; relations among the present values of the various contracts.

The equivalence principle: computation of net premiums for the main assurance policies.

Prospective and retrospective reserves, Thiele's differential equation as the main tool for the computation of reserves.

Expenses: gross premium and gross reserves. Selection effect and how it affects mortality tables.

Multi-life assurance contracts: joint life and last survival life, computation of premiums and reserves for the main two-lives contracts.

Multi-states mortality models: basic notions of continuous-time Markov chains, Kolmogorov backward and forward equations, application to multiple decrements and disability models, computation of transition intensities.

Thiele differential equation for multi-states models, computation and analysis of reserves for main multi-state policies.

With-profit policies, unit-linked assurance policies, pensions.

Interplay between assurance and finance: embedded options, market consistent actuarial valuation.

Teaching: This course will be delivered through a combination of lectures, classes and Q&A help sessions in the Autumn Term:

- Ten 2-hour lectures in AT (weeks 1-10)
- Nine 1-hour classes in AT (weeks 2-10)
- Five 1-hour help sessions in AT (weeks 6-10)

This course does not include a reading week. There will be no teaching in week 11 to allow time for students to concentrate on the project.

Formative coursework: Compulsory written answers to one set of problems.

Indicative reading: R Norberg, *Basic Life Insurance Mathematics*; The Institute of Actuaries, *Core reading Subject CT5*

Dickson, Hardy, Waters, *'Actuarial Mathematics for Life Contingent Risks'*

Wutrich, Buhlmann, Furrer, *'Market Consistent Actuarial Valuation'*

Assessment: Exam (70%, duration: 2 hours) in the January exam period.

Project (30%) in the period between AT and WT.

Students will work on the project during the last few weeks of AT and submit after the end of term.

ST302 Half Unit

Stochastic Processes

This information is for the 2024/25 session.

Teacher responsible: Prof Angelos Dassios COL.7.14

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Data Science, BSc in Financial Mathematics and Statistics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed either Probability, Distribution Theory and Inference (ST202) or Probability and Distribution Theory (ST206).

Course content: A second course in stochastic processes and applications to insurance. Markov chains (discrete and continuous time), processes with jumps; Brownian motion and diffusions; Martingales; stochastic calculus; applications in insurance and finance. Content: Stochastic processes in discrete and continuous time; Markov chains: Markov property, Chapman-Kolmogorov equation, classification of states, stationary distribution, examples of infinite state space; filtrations and conditional expectation; discrete time martingales: martingale property, basic examples, exponential martingales, stopping theorem, applications to random walks; Poisson processes: counting processes, definition as counting process with independent and stationary increments, compensated Poisson process as martingale, distribution of number of events in a given time interval as well as inter-event times, compound Poisson process, application to ruin problem for the classical risk process via Gerber's martingale approach; Markov processes: Kolmogorov equations, solution of those in simple cases, stochastic semigroups, birth and death chains, health/sickness models, stationary distribution; Brownian motion: definition and basic properties, martingales related to Brownian motion, reflection principle, Ito-integral, Ito's formula with simple applications, linear stochastic differential equations for geometric Brownian motion and the Ornstein-Uhlenbeck process, first approach to change of measure techniques, application to Black-Scholes model. The items in the course content that also appear in the content of ST227 are covered here at greater depth. However, ST227 is not a pre-requisite for this course.

Teaching: This course will be delivered through a combination of classes, lectures, and Q&A sessions totalling a minimum of 29 hours across Autumn Term.

Formative coursework: Compulsory written answers to two sets of problems.

Indicative reading: Lecture notes will be provided. Relevant books include R Durrett, *Essentials of Stochastic Processes*; T Mikosch, *Elementary Stochastic Calculus with Finance in View*; Institute of Actuaries core reading notes.

Assessment: Exam (100%, duration: 3 hours) in the January exam period.

ST303 Half Unit

Stochastic Simulation

This information is for the 2024/25 session.

Teacher responsible: Dr Xiaolin Zhu

Availability: This course is available on the BSc in Actuarial Science, BSc in Data Science and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students. Course capped at 60.

Pre-requisites: Students must have completed: EITHER Probability, Distribution Theory and Inference (ST202) OR Probability and Distribution Theory (ST206) AND Stochastic Processes (ST302).

While the course ST306 is not a formal pre-requisite some examples from this course will be used. Students that have not taken ST306 might have to do a bit of extra reading to familiarise themselves with them.

Course content: An introduction to using R for stochastic simulation as well as methods of simulating random variables, complicated quantities involving several random variables and paths of stochastic processes. Applications will focus on examples from insurance and finance.

Teaching: This course will be delivered through a combination of lectures and classes totalling a minimum of 30 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Weekly exercises usually involving computing.

Indicative reading:

- Introducing Monte Carlo methods with R (main reference), by G. Robert and G. Casella.

Useful reading:

- Stochastic Simulation, Algorithms and Analysis by S. Asmussen.
- Monte Carlo Methods in Financial Engineering by P. Glasserman.

Assessment: Project (40%) in the WT.

Project (60%) in the ST.

ST304 Half Unit

Time Series and Forecasting

This information is for the 2024/25 session.

Teacher responsible: Dr Yining Chen COL 7.06

Availability: This course is available on the BSc in Actuarial Science, BSc in Data Science, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not capped, any student that requests a place and meet the criteria will be given one.

Pre-requisites: 2nd year statistics and probability. Students who have no previous experience in R are required to complete an online pre-sessional R course from the Digital Skills Lab before the start of the course.

Course content: The course introduces the student to the statistical analysis of time series data and simple time series models, and showcase what time series analysis can be useful for. Topics include: autocorrelation; stationarity, trend removal and seasonal adjustment; AR, MA, ARMA, ARIMA; estimation; forecasting; model diagnostics; unit root test; introduction to financial time series and the ARCH/GARCH models; and if time permits, basic spectral analysis. The use of R for time series analysis will also be covered.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Written answers to set problems will be

expected on a weekly basis.

Indicative reading: Peter J. Brockwell and Richard A. Davis, Introduction to Time Series and Forecasting
Robert H. Shumway and David S. Stoffer, Time Series Analysis and Its Applications: With R Examples

Christopher Chatfield, The Analysis of Time Series
Ruey S. Tsay, An Introduction to Analysis of Financial Data with R
Peter J. Brockwell and Richard A. Davis, Time Series: Theory and Methods

Christian Francq and Jean-Michel Zakoian, GARCH Models: Structure, Statistical Inference and Financial Applications

Assessment: Exam (90%, duration: 2 hours) in the spring exam period.

Coursework (10%).

ST306 Half Unit

Actuarial Mathematics (General)

This information is for the 2024/25 session.

Teacher responsible: Dr Xiaolin Zhu

Availability: This course is available on the BSc in Actuarial Science and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302).

Course content: This course is an introduction to actuarial work in non-life insurance. The course covers a general overview of the industry, history of general insurance and risk-sharing arrangements. Loss distributions suitable for modelling individual and aggregate losses; statistical inference. Moment generating functions of the distributions: gamma, exponential, Pareto, generalized Pareto, normal, lognormal, Weibull, and others. The collective model: risk models involving frequency and severity distributions. Moments and moment generating functions of Compound distributions. Stochastic risk models: Compound Poisson processes. Reinsurance treaties: proportional, excess of loss, stop-loss, deriving the distribution, moment generating functions and other properties of the losses to the insurer and reinsurer under all the models above. Ruin theory, Lundberg theorem and an integral approach for the ruin probability. Fundamental concepts of Bayesian statistics, prior distributions, posterior distributions, loss functions, Bayesian estimators. Credibility theory; Bayesian models. Experience rating models and applications. Claims reserving: run-off triangles. Programming applications using R

Teaching: This course will be delivered through a combination of lectures and classes totalling a minimum of 30 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: A set of exercises which are similar to problems appearing in the exam will be assigned.

Indicative reading: Notes are given out in the lectures.

Assessment: Exam (90%, duration: 3 hours) in the spring exam period.

Online assessment (10%) in the WT Week 11.

ST307 Half Unit

Aspects of Market Research

This information is for the 2024/25 session.

Teacher responsible: Dr James Abdey COL.8.07

Availability: This course is available on the BSc in Data Science, BSc in Mathematics, Statistics and Business, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST327 Market Research: An Integrated Approach or ST205 Sample Surveys and Experiments. This is a capped course.

Pre-requisites: Probability and statistics to the level of ST107.

Course content: The main ideas and applications of market research techniques. Topics covered are introduction to market research, defining the market research problem, research design, internal secondary data and the use of databases, qualitative research: focus group discussions, projective techniques, survey and quantitative observation techniques, measurement and scaling: fundamentals, comparative and non-comparative scaling, questionnaire design, sampling: design and procedures, final and initial sample size determination, cross-tabulation and hypothesis testing, analysis of variance and covariance, correlation and regression, and discriminant analysis.

Teaching: 20 hours of lectures and 10 hours of classes in the AT. 1 hour of classes in the ST.

This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term. This course does not include a reading week in Week 6 of Autumn Term.

Formative coursework: Students are given weekly exercises to work on for discussion in class.

Indicative reading: Abdey, J.S. (2023) *Business Analytics: Applied Modelling and Prediction* (1st edition), Sage Publications.

Malhotra, N.K. (2019) *Marketing Research: An Applied Orientation* (7th edition), Pearson (earlier editions are also fine).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

ST308 Half Unit

Bayesian Inference

This information is for the 2024/25 session.

Teacher responsible: Dr Konstantinos Kalogeropoulos COL.610

Availability: This course is available on the BSc in Actuarial Science, BSc in Data Science, BSc in Mathematics with Data Science, BSc in Mathematics with Economics and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed one of the following two combinations of courses: (a) ST102 and MA100, or (b) MA107 and ST109 and EC1C1. Equivalent combinations may be accepted at the lecturer's discretion. ST202 is also recommended.

Previous programming experience is not required but students who have no previous experience in R must complete an online pre-sessional R course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=7745>)

Course content: **Statistical decision theory:** risk, decision rules, loss and utility functions, Bayesian expected loss, Frequentist risk.

Bayesian Inference: Bayes theorem, prior, posterior and predictive distributions, conjugate models (Normal-Normal, Poisson-Gamma, Beta-Binomial), Bayesian point estimation, credible intervals and hypothesis testing, Bayes factors and model selection. Comparison with Frequentist approaches.

Implementation: Asymptotic approximations (Laplace approximation, Monte Carlo methods), Markov Chain Monte Carlo (MCMC) simulation (Gibbs sampler, Metropolis-Hastings algorithm). Computer tools (R).

Applications: Linear models in Regression and Classification (Bayesian Linear Regression, Generalized Linear Models, Logistic Regression), Hierarchical/ Multilevel Models, Bayesian Nonparametrics.

Teaching: This course will be delivered through a combination of classes, lectures, and Q&A sessions, totalling a minimum of 29 hours across the Winter Term.

Formative coursework: Optional problem sets and computer exercises.

Indicative reading: J.K. Kruschke, *Doing Bayesian Data Analysis*.

An tutorial with R, JAGS and Stan. 2nd edition.

J.O. Berger, *Statistical Decision Theory and Bayesian Analysis*.

D. Gamerman, H. F. Lopes, *Markov Chain Monte Carlo: Stochastic Simulation for Bayesian Inference*

A. Gelman, *Bayesian data analysis*.

Assessment: Exam (80%, duration: 2 hours) in the spring exam period.

Project (20%) in the ST.

ST309 Half Unit

Elementary Data Analytics

This information is for the 2024/25 session.

Teacher responsible: Prof Qiwei Yao Col.7.16

Availability: This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course is available as an outside option to the students who are interested in data analytics and who have statistical background at least equivalent to ST107. No prior knowledge in programming is required. However students who have no previous experience in R are required to take on an online pre-sessional R course from the Digital Skill Lab (<https://moodle.lse.ac.uk/course/view.php?id=7745>).

This course is capped at 70 for the 2023/24 session.

This course cannot be taken with ST310 Machine Learning.

Pre-requisites: Students must have completed a statistical course at least equivalent to Quantitative Methods (Statistics) (ST107).

Students who have no previous experience in R are required to take on an online pre-sessional R course from the Digital Skill Lab (<https://moodle.lse.ac.uk/course/view.php?id=7745>).

Course content: The primary focus of this course is to help students view various problems from business, economy/finance, and social domains from a data perspective and understand the principles of extracting useful information and knowledge from data. Students will also gain the hands-on experience using R – a programming language and software environment for data analysis and visualisation. Learning basic data analytic methods and techniques is combined with real-life examples.

The core contents of the course include data cleansing, data transformation, data visualisation, R-programming, classification, regression, clustering, over-fitting avoidance and model evaluation. The course also covers a subset of the following topics: illustration of R-access of databases and big data platforms, illustration of parallel computing in R, similarity matching, market-basket analysis, link prediction, text mining, network analysis, causal modelling.

This is not a course on algorithms and IT technologies required for handling massive data, which deserve separate courses. The focus is on the fundamental principles and concepts of data analytics or data science. It becomes ever-increasingly important in this information age to gain adequate understanding of data science even if one never intends to apply it oneself.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours in Autumn Term.

Students are encouraged to install R in their own laptops, and to use their own laptops in the workshops.

Formative coursework: Students will be expected to produce 6 exercises in the AT.

Students are expected to complete six sets of exercises involving substantial data analysis using R.

Indicative reading: Wickham, H. and Golemund, G. (2017). *R for Data Science*. O'Reilly. Available online at <http://r4ds.had.co.nz>
James, G., Witten, D., Hastie, T. and Tibshirani, R. (2013). *An Introduction to Statistical Learning with Applications in R*. Springer. Available online at <http://www-bcf.usc.edu/~gareth/ISL>
Provost, F. and Fawcett, T. (2013). *Data Science for Business*. O'Reilly.

Zuur, A., Ieno, E. and Meesters, E. (2009). A Beginner's Guide to R. Springer. Available online from LSE Library.

Hastie, T., Tibshirani, R and Friedman, R. (2009). The Elements of Statistical Learning: Data Mining, Inference, and Prediction. 2nd Edition. Springer. Available online at <https://web.stanford.edu/~hastie/Papers/ESLII.pdf>

Silge, J. and Robinson, D. (2017). Text Mining with R: a tidy approach. O'Reilly. Available online at <https://www.tidytextmining.com>

Wickham, H. (2016). ggplot2: Elegant Graphics for Data Analysis. Springer. Available online at <http://moderngraphics11.pbworks.com/f/ggplot2-Book09hWickham.pdf>

Assessment: Coursework (30%) in the AT.

Project (70%) in the WT.

The project will be a group project with maximum 3 members per group. The detailed instruction will be handed out in Week 5 of Autumn term, and students need to submit a written report by Week 5 of Winter term.

Students are required to hand in the solutions for 3 sets of exercises which account for the total 30% of the final grade.

ST310 Half Unit Machine Learning

This information is for the 2024/25 session.

Teacher responsible: Dr Joshua Loftus

Availability: This course is compulsory on the BSc in Data Science. This course is available on the BSc in Actuarial Science, BSc in Finance, BSc in Mathematics with Data Science, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business and BSc in Politics and Data Science. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course cannot be taken with ST309 Elementary Data Analytics.

Pre-requisites: Students must have completed either ST102, or ST109 and EC1C1, as well as a second-year course covering regression analysis.

Previous programming experience is not required but students who have no previous experience in R must complete an online pre-session R course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=7745>)

Course content: The primary focus of this course is on the core machine learning techniques in the context of high-dimensional or large datasets (i.e. big data). The first part of the course covers elementary and important statistical methods including nearest neighbours, linear regression, logistic regression, regularisation, cross-validation, and variable selection. The second part of the course deals with more advanced machine learning methods including regression and classification trees, random forests, bagging, boosting, and deep neural networks. The course will also introduce causal inference motivated by analogy between double machine learning and two-stage least squares. All the topics will be delivered using a combination of illustrative real data examples and simulations. Students will also gain hands-on experience using R or Python (programming languages and software environments for data analysis, computing and visualisation).

Teaching: 13 hours and 20 minutes of lectures and 16 hours and 40 minutes of seminars in the AT.

This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours in Autumn Term.

[This course includes a reading week in Week 6 of Autumn Term]. Students are required to install R/RStudio in their own laptops. Student not having a laptop of their own will be offered to use personal computers available in seminar rooms.

Formative coursework: Students will be expected to produce 3 problem sets in the AT.

The first two problem sets will be formative and allow students to

practice for the third, summative problem set.

Indicative reading:

- James, G., Witten, D., Hastie, T. and Tibshirani, R. An Introduction to Statistical Learning with Applications in R. Springer, 2021.

- Hardt, M. and Recht, B. Patterns, Predictions, and Actions: Foundations of Machine Learning. Princeton University Press, 2022.

- Chernozhukov, V., Hansen, C., Kallus, N., Spindler, M., and Syrgkanis, V. Applied Causal Inference Powered by ML and AI. Online, 2024.

- Wickham, H., Çetinkaya-Rundel M., and Grolemund, G. R for Data Science. O'Reilly, 2023.

Assessment: Coursework (20%) in the AT.

Project (50%) in the period between AT and WT.

Group project (30%) in the ST.

Students are required to submit a group project by applying machine learning methods covered in this course on some real data using R (which accounts for 30% of the final assessment), and an individual project that includes a prediction competition component (which accounts for 50% of the final assessment). In addition to some real data examples, the focus of this course is to introduce some theoretical and methodological concepts in machine learning. These components will be tested by coursework as problem sets (which account for 20% of the final assessment).

ST311 Half Unit Artificial Intelligence

This information is for the 2024/25 session.

Teacher responsible: Dr Philip Chan

Availability: This course is compulsory on the BSc in Data Science. This course is available on the BSc in Actuarial Science, BSc in Finance, BSc in Mathematics with Data Science, BSc in Mathematics, Statistics and Business and BSc in Politics and Data Science. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed either ST102, or ST109 and EC1C1. Equivalent combinations may be accepted at the lecturer's discretion.

A computer programming course using Python, e.g. ST101 Programming for Data Science.

Students who have no previous experience in Python are required to complete an online pre-session Python course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=7696>).

Students should be comfortable with basic matrix algebra.

Course content: The objective of this course is to introduce students to basic principles of artificial intelligence (AI) systems. By AI, we refer to machines (or computers) that mimic cognitive functions that humans associate with the human mind, such as learning and problem solving. The course will take a practical approach, explaining the main principles and methods used in the design of AI systems.

The course will provide an introduction to main principles of deep learning, covering topics of neural nets as universal approximators, design of neural network architectures, backpropagation and optimisation methods for training neural networks, and some special deep neural network architectures commonly used for solving AI tasks such as image classification, sequence modelling, natural language processing and generative models. Students will gain practical knowledge to learn and evaluate deep learning algorithms using PyTorch.

Teaching: The lectures cover fundamental methodological and theoretical principles while computer workshops provide students with an opportunity to gain hands-on-experience by solving exercises using PyTorch.

This course will be delivered through a combination of classes and lectures totalling a minimum of 35 hours across Winter Term.

Students are required to use a Python programming environment,

e.g. by installing Anaconda / Jupyter notebooks on their own laptops or using Google Colab, and to use their own laptops in the workshops.

Indicative reading: 1. A. Zhang, Z. Lipton, M. Li and A. Smola, Dive into Deep Learning, 2022, <http://d2l.ai>

2. I. Goodfellow, Y. Bengio and A. Courville, Deep Learning, MIT Press, 2017, <http://www.deeplearningbook.org>

3. R. Sutton and A. C. Barto, Reinforcement Learning: An Introduction, 2nd Edition, MIT Press, 2018

4. M. Nielsen, Neural Networks and Deep Learning, 2016, online book.

5. S. Russell and P. Norvig, Artificial Intelligence: A Modern Approach, 3rd Edition, Pearson, 2016

Assessment: Coursework (30%) in the WT.

Project (70%) in the ST.

Students are required to hand in the solutions to 2 sets of exercises (each accounting for 10% of the final grade), and complete an in-class quiz in Week 11.

There is one group project, which is due in the Spring Term.

ST312 Half Unit

Applied Statistics Project

This information is for the 2024/25 session.

Teacher responsible: Prof Jouni Kuha

Availability: This course is compulsory on the BSc in Data Science. This course is available on the BSc in Actuarial Science and BSc in Mathematics, Statistics and Business. This course is not available as an outside option nor to General Course students.

This course is not controlled access. If you request a place and meet the criteria you are likely to be given a place.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102).

This course is suitable for third-year students.

Course content: Students will produce a project involving a critical investigation and collation of statistical data on a topic of their own interest.

Teaching: This course will be delivered through a combination of workshops and seminars totalling a minimum of 9 hours across Autumn term, 2 hours of workshop in the Winter term and 2 hours of workshop in the Spring term. Students on this course will have a research week in week 6 of Autumn term where they can look up data sources for their assessed project.

Formative coursework: Oral presentations at the end of Autumn term and Week 6 of Winter term.

Indicative reading: Bryman (2008) 'Social Research Methods' Saunders (2009) 'Research Methods for Business Students' Johnson (2009) 'Writing a Quantitative Research Thesis' Verzani (2002) 'Using R for Introductory Statistics'

Assessment: Project (90%) and presentation (10%) in the ST.

ST313 Half Unit

Ethics for Data Science

This information is for the 2024/25 session.

Teacher responsible: Dr Joshua Loftus

Availability: This course is available on the BSc in Actuarial Science, BSc in Data Science, BSc in Mathematics and Economics, BSc in Mathematics with Data Science, BSc in Mathematics with Economics, BSc in Mathematics, Statistics and Business and BSc in Politics and Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102) or equivalent, Mathematical Methods (MA100) or equivalent, and at least one of MA212, EC220, EC221, ST206, ST202, or equivalent.

Familiarity with basic computer programming in R or Python.

Students who have no previous experience in R are strongly encouraged to take on an online pre-session R course from the Digital Skill Lab (<https://moodle.lse.ac.uk/course/view.php?id=7022>)

Course content: This course covers a selection of topics central to the ethical practice of data science. Students will learn key concepts and methods to analyze a variety of case studies, from the historical and philosophical background of data technologies and ethics to the frontiers of research in machine learning, artificial intelligence, and socio-technical systems. These concepts will include some basic philosophical and legal ideas related to data ethics, frameworks for ethical practice developed by professional societies, formal statistical definitions and quantitative methods for objectives such as fairness and privacy, and an emphasis on the use of causal reasoning to evaluate data-driven systems and policies. Topics may include:

- Replication crisis, unfair algorithms, basics of normative ethics and causality
 - Historical examples, professional ethical guidelines
 - Transparency, reproducibility, open science
 - Discrimination, statistical fairness, impossibility results
 - Causal reasoning for fairness, pathway analysis, intersectionality
 - Interventions, policy optimization, distributive justice
 - Data provenance, privacy, differential privacy
 - Strategic behavior, surveillance, democratic data
 - Automation and AI, responsibility, complicity
- Causal statistical models will be used as a formal framework throughout to understand and stress test these ideas.

Teaching: 10 hours of lectures and 20 hours of classes in the AT.

Formative coursework: Students will be expected to produce 3 problem sets in the AT.

The first two problem sets will be formative, and feedback from these will help students prepare for the third, summative problem set.

Indicative reading: Lecture notes will be provided. These will be supplemented with a variety of short readings, some of which will be taken from the following background references

- <https://www.bitbybitbook.com/en/1st-ed/ethics/>
- <https://fairmlbook.org/>
- <https://data-feminism.mitpress.mit.edu/>
- <https://aiethics.princeton.edu/case-studies/>
- <https://www.acm.org/code-of-ethics>
- <https://rss.org.uk/RSS/media/News-and-publications/Publications/Reports%20and%20guides/A-Guide-for-Ethical-Data-Science-Final-Oct-2019.pdf>
- <https://www.amstat.org/ASA/Your-Career/Ethical-Guidelines-for-Statistical-Practice.aspx>
- <https://hastie.su.domains/CASI/>
- <https://www.statlearning.com/>

Assessment: Group project (50%) in the ST.

Group presentation (20%) in the AT Week 11.

Problem sets (30%) in the AT.

The final problem set during the AT will be summative and count for 30% marks. Group work consists of a presentation during the AT describing a project proposal, and the project itself will then be due in the ST.

ST314 Half Unit

Multilevel and Longitudinal Models

This information is for the 2024/25 session.

Teacher responsible: Prof Fiona Steele COL.7.12

Availability: This course is available on the BSc in Data Science and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: A first course in statistics such as *Elementary Statistical Theory* (ST102), *Elementary Statistical Theory I* (ST109)

or *Quantitative Methods (Statistics)* (ST107) and familiarity with multiple regression to the level of *Applied Regression* (ST211) or *Statistical Models and Data Analysis* (ST201).

Students who have no previous experience in R are required to take an online pre-session R course from the Digital Skills Lab before the start of the course. Please log into moodle.lse.ac.uk and self-enrol in the 'R for Statistics Pre-session Course'.

Course content: This course considers statistical methods for the analysis of data with a multilevel (clustered) structure with applications in social research. Examples of multilevel structures include students nested within schools or universities, and individuals nested within households or geographical areas. Multilevel structures also arise in longitudinal or panel studies where repeated measurements over time are taken on subjects (e.g. individuals or countries). The course has an applied emphasis, and will consider practical issues such as the choice of an appropriate method of analysis for a given dataset and research question, descriptive analysis and modelling, model selection, and visualisation and interpretation of results. Students will gain hands-on experience of data analysis using R and datasets drawn from a range of social science disciplines.

The course will include the following topics:

- Introduction to multilevel data structures and research questions
- Simple model for a two-level structure; comparison of fixed effects and random effects approaches
- Random intercept models
- Handling level 2 endogeneity in random effects models
- Random slope models
- Higher-level explanatory variables: contextual, between-group and cross-level interaction effects
- Longitudinal data analysis
- Model selection
- Special topics, e.g. models for three-level structures and for non-hierarchical structures

Teaching: 20 hours of lectures and 10 hours of computer workshops in the WT.

Students are required to install R on their own laptops for use in the computer workshops.

Week 6 will be a reading week.

Formative coursework: Students will be expected to produce 4 problem sets in the WT.

Students will work on weekly, structured problems in the computer classes. Students will be expected to submit their answers to four problem sets as homework. Individual feedback will be given on homework and solutions will be provided at the end of each week for each problem set.

Indicative reading: T A B Snijders and R J Bosker, *Multilevel Analysis: An Introduction to Basic and Advanced Multilevel Modeling*, 2nd edition, Sage (2011).
S W Raudenbush and A S Bryk, *Hierarchical Linear Models: Applications and Data Analysis Methods*, 2nd edition, Sage (2002).
J Hox *Multilevel Analysis: Techniques and Applications*. Quantitative Methodology Series, 2nd edition. Taylor & Francis (2010).
D M Bates, *lme4: Mixed-Effects Modeling with R* <https://stat.ethz.ch/~maechler/MEMO-pages/IMMwR.pdf>

Assessment: Project (30%) in the WT Week 7. Project (70%) in the ST.

The course will be assessed 100% by coursework which will comprise two projects. The first project (30%) will be carried out in groups and will be due at the end of week 7 in WT. The second project (70%) will be carried out individually and will be due at the end of week 1 in ST.

ST326 Half Unit Financial Statistics

This information is for the 2024/25 session.

Teacher responsible: Prof Clifford Lam (COL 6.09)

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics. This course is available on the BSc in

Actuarial Science, BSc in Data Science, BSc in Mathematics with Data Science and BSc in Mathematics, Statistics and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Either ST202, or ST206 and ST211.

Previous programming experience is not required but students who have no previous experience in R must complete an online R pre-session course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=7745>)

Course content: The course covers key statistical methods and data analytic techniques most relevant to finance. Hands-on experience in analysing financial data in the "R" environment is an essential part of the course. Basic time series analysis will be introduced at the start. The course includes a selection of the following topics: obtaining financial data, low- and high-frequency financial time series, ARCH-type models for low-frequency volatilities and their simple alternatives, Markowitz portfolio theory and the Capital Asset Pricing Model, concepts and practices in machine learning as applied in financial forecasting, Value at Risk. Will cover classification techniques using random forests and simple trading strategies if time permits.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce 9 problem sets in the AT.

Indicative reading: Lecture notes will be provided
Lai, T.L. And Xing H. (2008) *Statistical Models and Methods for Financial Markets*. Springer.

Tsay, R. S. (2005) *Analysis of Financial Time Series*. Wiley.

Ruppert, D. (2004) *Statistics and Finance – an introduction*. Springer.

Fan, Yao (2003) *Nonlinear Time Series*.

Hastie, Tibshirani, Friedman (2009) *The Elements of Statistical Learning*.

Haerdle, Simar (2007) *Applied Multivariate Statistical Analysis*.

Assessment: Exam (80%, duration: 2 hours) in the spring exam period.

Coursework (20%) in the AT.

The course will be assessed by an examination (80%) and a coursework (20%) involving case studies which will be submitted in AT.

ST327

Market Research: An Integrated Approach

This information is for the 2024/25 session.

Teacher responsible: Dr James Abdey COL.8.07 and Mr Karsten Shaw

Availability: This course is available on the BSc in Data Science, BSc in Management and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Not to be taken with ST307.

Pre-requisites: Students must have completed one of the following: Elementary Statistical Theory (ST102), Quantitative Methods (Statistics) (ST107), Statistics for Management Sciences (ST203), Econometrics: Theory and Applications (MG205), Analytical Methods for Management (MG202), or equivalent. The combination of Elementary Statistical Theory I (ST109) and Econometrics I (EC1C1) is also acceptable.

Course content: The main ideas and applications of market research techniques. ST327.1 Topics covered are introduction to market research, defining the market research problem, research design, internal secondary data and the use of databases, qualitative research: focus group discussions, projective techniques, survey and quantitative observation techniques,

measurement and scaling: fundamentals, comparative and non-comparative scaling, questionnaire design, sampling: design and procedures, final and initial sample size determination, cross-tabulation and hypothesis testing, analysis of variance and covariance, correlation and regression, discriminant analysis, factor analysis, cluster analysis and conjoint analysis. ST327.2 Case Studies: Students use the information and techniques gained from ST327.1 to carry out a co-operative Market Research Case Study. Individual write up of the Case Study forms part of the assessment.

Teaching: 20 hours of lectures and 10 hours of classes in the AT. 6 hours of lectures in the WT. 1 hour of classes in the ST.

This course will be delivered through a combination of classes and lectures totalling a minimum of 36 hours across Autumn Term and Winter Term.

This course does not include a reading week in Week 6 of Autumn Term.

Formative coursework: Students are given weekly exercises to work on for discussion in class.

Indicative reading: Abdey, J.S. (2023) *Business Analytics: Applied Modelling and Prediction* (1st edition), Sage Publications.

Malhotra, N.K. (2019) *Marketing Research: An Applied Orientation* (7th edition), Pearson (earlier editions are also fine).

Assessment: Exam (60%, duration: 2 hours) in the spring exam period.

Coursework (25%) in the ST.

Presentation (15%) in the WT.

The assessed Case Study work is split into two parts; a group presentation and an individual piece of coursework.

ST330

Stochastic and Actuarial Methods in Finance

This information is for the 2024/25 session.

Teacher responsible: Dr Erik Baurdoux COL.6.04

Availability: This course is available on the BSc in Actuarial Science, BSc in Data Science and BSc in Mathematics, Statistics and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed: EITHER Probability, Distribution Theory and Inference (ST202) OR Probability and Distribution Theory (ST206) AND Stochastic Processes (ST302).

Course content: Theories of financial market behaviour. Applications of stochastic processes and actuarial models in finance. Utility theory. Stochastic dominance and portfolio selection. Measures of investment risk. Mean-variance portfolio theory. Single and multifactor models. The Capital Asset Pricing Model. The efficient market hypothesis. Introduction to financial markets. Model-free relationships. Stochastic models for security prices and interest rates and estimating their parameters. Option pricing: general framework in discrete and continuous time, the Black-Scholes analysis and numerical procedures (binomial models and Cox-Ross-Rubinstein models). The term structure of interest rates: the Vasicek, the Cox-Ingersoll-Ross and other models. Introduction to credit risk.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum of 60 hours across Autumn Term and Winter Term.

This course does not include a reading week in the Autumn Term but includes a reading week in Week 6 of Winter Term.

Students will work on and submit formative coursework towards the end of Autumn term and a second set of formative coursework towards the end of Winter term. Feedback and solutions will be provided.

Formative coursework: Two sets of hand-in exercises will also be given during the year.

Indicative reading: N H Bingham & R Kiesel, *Risk Neutral Valuation*; A Cerny, *Mathematical Techniques in Finance: Tools for Incomplete*

Markets; J Hull, *Options, Futures & Other Derivatives*; R Jarrow & S Turnbull, *Derivative Securities*; D Luenberger, *Investment Science*; Institute of Actuaries core reading notes, Subject CT8.

Assessment: Exam (90%, duration: 3 hours) in the spring exam period.

Coursework (10%) in the period between WT and ST.

ST360 Not available in 2024/25

Placement Year

This information is for the 2024/25 session.

Teacher responsible: Dr Pik Kun Liew COL.7.15

Availability: This course is compulsory on the BSc in Actuarial Science (with a Placement Year). This course is not available as an outside option nor to General Course students.

Pre-requisites: None

Course content: The BSc Actuarial Science with a Placement Year programme offers students the opportunity to complete a 9-month (minimum) to 12-month (maximum) full-time placement working in an organisation of their choice for them to acquire essential work-based skills with which to enrich their academic learning. In addition to the completion of the work placement, students are required to complete the assessment of this course to be eligible for graduation from the BSc in Actuarial Science with a Placement Year.

This is a non-credit bearing course. There are no classes for this course. Students instead undertake a work placement during which they will be employed by an external organisation. The work placement should be relevant or related to the field of actuary and/or statistics.

Students must hold a formal offer, in writing, of an appropriate work placement before the start of the Spring Term in Year 2 for approval to progress to Year 3 (i.e., placement year) of the BSc in Actuarial Science with a Placement Year. Students will be responsible for securing a placement role as well as its administration, with support and advice from the LSE Careers, a placement officer, and the Department. Students will organise and undertake their placement at a host organisation. The Placement Officer will support students with documentation checking and to ensure that the placement roles are suitable and acceptable by LSE.

During the placement, students will continue to be registered as LSE students and, therefore will have access to all the normal services such as the library, student support, and the LSE Students' Union. Students will also be supported with regular check-ins by the Placement Officer and the Department. Students will complete coursework at three points during the placement year: 1) mid-Autumn term, 2) during the Winter term, and 3) at the start of the Spring term. The three coursework build upon one another, with the final coursework being the culmination of the knowledge, skills, and professional development during the placement.

Assessment for this course will consist of students' reflections on the feedback received from the workplace manager and colleagues, in terms of what they have learned and achieved, how the theories and concepts learned during the first and second year of the BSc Actuarial Science with a Placement Year were applied in practice, and how their skills and goals have developed as a result of the placement experiences.

Teaching: There is no taught component on this course, although students will be offered preparatory sessions during their first and second year organised by the Department in conjunction with the LSE Careers and Placement Officer.

These will consist of a series of workshops focusing on CV preparation, making placement applications, interview technique, assessment centre preparation, appraisal and development, as well as a session on expectations in a professional environment and a briefing on the assessment of the placement.

In addition to placement support by the Placement Officer, students will also be offered an online de-brief session with the Department and the Placement Officer to provide guidance on the

preparation of the final coursework of the placement assessment.

Formative coursework: There is no formative coursework for this course. Students are expected to seek formative feedback from the workplace manager and colleagues on their performance of tasks assigned to them during the placement year and reflect and discuss the feedback with the workplace manager and colleagues. Students are encouraged to contact the Placement Officer and the Department for support and advice on a regular basis.

Indicative reading: A detailed reading list will be made available on Moodle for each part of the course nearer the time of its scheduled start.

Assessment: Reflective learning report (20%) in the AT Week 6. Presentation (50%) in the WT Week 8.

Reflective learning report (30%) in the ST Week 1.

The first and last coursework will be a reflective statement based on the feedback from the workplace manager and colleague.

Reflective Statement AT will include students' reflections on their placement experience up to Week 5 of the Autumn term. Reflective Statement ST will be students' reflections on the culmination of the knowledge, skills, and professional development during the placement. The word limit for each reflective statement is 500 words. Evidence of feedback from the workplace manager and colleague should be included as appendices in the submissions and will not count towards the word limit.

The second coursework is an individual oral presentation on campus. **Students should inform their employing organisation and workplace manager about this assessment at the start of their employment so that students will be allowed a day off to be back on campus for this assessment.**

All coursework will be marked on a Pass/Fail basis. Students enrolled on the BSc Actuarial Science with a Placement Year programme must satisfactorily complete the work placement and pass this course to be eligible for graduation from the BSc Actuarial Science with a Placement Year programme. If they fail this course, they will be reverted to progress to the three-year BSc Actuarial Science programme and will **not** be eligible to graduate from the BSc Actuarial Science with a Placement Year programme. More details of the assessment will be made available on Moodle nearer the scheduled start time of the course.

Diploma Programme Regulations

Key to Regulations

(H) means a half-unit course

(AT) means Autumn Term

(WT) means Winter Term

(ST) means Spring Term

Diploma in Accounting and Finance

Programme Code: TDAF

Department: Accounting

For students starting this programme of study in 2024/25

Students must take four units as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Year 1

Paper 1 FM210 Principles of Finance I (0.5) # **and** FM211 Principles of Finance II (0.5) #

Or

By special permission of the Course Leaders, students may substitute "FM210 and FM211" with one of the following:

FM310 Corporate Finance, Investments and Financial Markets I (0.5) # **and** FM311 Corporate Finance, Investments and Financial Markets II (0.5) # **or**

FM321 Risk Management and Modelling (0.5) # **and** FM322 Derivatives (0.5) #*

Or

one from:

FM473A Financial Markets (0.5) #*

FM473W Financial Markets (0.5) #*

and one from:

FM474A Managerial Finance (0.5) *

FM474W Managerial Finance (0.5) *

Paper 2 Courses to the value of 1.0 unit(s) from the following:

AC205 Intermediate Financial Accounting (0.5) # **and** AC206 Intermediate Management Accounting (0.5) #

Or

AC490 Management Accounting, Decisions and Control (0.5) **and** AC491 Financial Accounting, Reporting and Disclosure (0.5)

Papers 3 & 4 Courses to the value of 2.0 unit(s) from the following (if not already taken under Paper 2):

AC311 Results Accountability and Management Control for Strategy Implementation (0.5) #

AC312 Performance Measurement, Strategy, and Uncertainty (0.5) #

AC331 Contemporary Issues in Financial Accounting (0.5) #

AC332 Financial Statement Analysis and Valuation (0.5) #

AC341 Corporate Governance, Risk Management and Financial Audit (0.5)

AC342 Accounting, Corporate Responsibility and Sustainability (0.5)

AC470 Accounting in the Global Economy (0.5) #

EC2A3 Microeconomics II (0.5) #

EC2B3 Macroeconomics II (0.5) #

EC2C3 Econometrics I (0.5) #

EC2C4 Econometrics II (0.5) #1

EH240 Business and Economic Performance since 1945: Britain in International Context (1.0)

MA107 Quantitative Methods (Mathematics) (0.5) #

MG4G4 Topics in Management Research (0.5)

ST107 Quantitative Methods (Statistics) (0.5) #

Any other course with the approval of the Programme Director, by special permission only.

MSc in Accounting, Organisations and Institutions

Programme Code: TMACORIN

Department: Accounting

For students starting this programme of study in 2024/25 Academic-year programme. Students take courses to the value of four units. There is also a pre-sessional course held in the week before MT: AC425 MSc Accounting, Organisations and Institutions: Pre-sessional course.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements. Some optional subjects may not be available in any specific academic year.

Paper	Course number, title (unit value)
Pre-sessional Course	AC425 MSc Accounting, Organisations and Institutions: Pre-sessional course (0.0)
Prerequisite Course	Students who wish to take AC416 in Paper 3 or Paper 4 are required to take the following course which runs over a 9-day period before the start of MT:
	AC480 Quantitative Methods in Accounting and Finance (0.0)
Paper 1	AC424 Accounting, Organisations and Institutions (1.0)
Paper 2	AC411 Accounting, Strategy and Control (0.5) and AC412 Accountability, Organisations and Risk Management (0.5)
Paper 3	AC490 Management Accounting, Decisions and Control (0.5) and AC491 Financial Accounting, Reporting and Disclosure (0.5)
	Or
	Students with a substantive and verifiable background in accounting must do as Paper 3 either:
	AC415 Management Accounting for Decision Making (0.5) and AC416 Topics in Financial Reporting (0.5) #1 or
	AC416 Topics in Financial Reporting (0.5) # and AC417 Corporate Financial Disclosure and Investor Relations (0.5) 2
	Or
	Students with prior background in management accounting only must do as Paper 3:
	AC415 Management Accounting for Decision Making (0.5) and AC491 Financial Accounting, Reporting and Disclosure (0.5)
Paper 4	Courses to the value of 1.0 unit(s) from the following:
	AC415 Management Accounting for Decision Making (0.5)
	AC416 Topics in Financial Reporting (0.5) #3
	AC417 Corporate Financial Disclosure and Investor Relations (0.5)
	AC444 Valuation and Security Analysis (0.5) #
	AC494 Dissertation in Accounting, Organisations and Institutions (0.5)

DV413	Environmental Problems and Development Interventions (0.5) #
DV415	Global Environmental Governance (0.5) (not available 2024/25)
EH463	The Long-Run Analysis of Firms and Industries (0.5)
EH483	The Development and Integration of the World Economy in the 19th and 20th Centuries (1.0)
FM474A	Managerial Finance (0.5)
FM474W	Managerial Finance (0.5)
LL4BF	International Financial Regulation (0.5)
MG476	Corporate Social Responsibility and International Labour Standards (0.5) #
MY428	Qualitative Text and Discourse Analysis (0.5) #

Any other course with the approval of the Programme Director.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

1: Before taking AC416 you must take AC480

2: Before taking AC416 you must take AC480

3: Before taking AC416 you must take AC480

The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Accounting and Finance

Programme Code: TMAF

Department: Accounting

For students starting this programme of study in 2024/25 Academic-year programme. Students must take courses to the value of four units as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Prerequisite Course	Students who wish to take AC416 in Papers 2, 3 or 4 are required to take the following course which runs over a 9-day period before the start of AT:
	AC480 Quantitative Methods in Accounting and Finance (0.0)
Paper 1	Courses to the value of 1.0 unit(s) from the following:
	FM429 Asset Markets A (0.5) #

And

FM431A Corporate Finance A (0.5) # or
FM431W Corporate Finance A (0.5) # (not
available 2024/25)

Or another approved paper by special permission
only.

Paper 2

Courses to the value of 1.0 unit(s) from the
following:

- AC411 Accounting, Strategy and Control (0.5)
and AC415 Management Accounting for
Decision Making (0.5) or
AC415 Management Accounting for Decision
Making (0.5) and AC416 Topics in
Financial Reporting (0.5) #1 or
AC416 Topics in Financial Reporting (0.5) # and
AC417 Corporate Financial Disclosure
and Investor Relations (0.5) 2 or
AC411 Accounting, Strategy and Control (0.5)
and AC416 Topics in Financial Reporting
(0.5) #

Papers 3 & 4

Courses to the value of 2.0 unit(s) from the
following:

- AC411 Accounting, Strategy and Control (0.5)
AC412 Accountability, Organisations and Risk
Management (0.5)
AC415 Management Accounting for Decision
Making (0.5)
AC416 Topics in Financial Reporting (0.5) #3
AC417 Corporate Financial Disclosure and
Investor Relations (0.5)
AC444 Valuation and Security Analysis (0.5) #
AC470 Accounting in the Global Economy (0.5)

FM402 Financial Risk Analysis (0.5) #
FM413 Fixed Income Markets (0.5) #
FM421 Finance for Mergers, Buyouts and
Corporate Restructurings (0.5) #
FM441 Derivatives (0.5) #
FM442 Quantitative Methods for Finance and
Risk Analysis (0.5) #
FM445 Portfolio Management (0.5)
FM447 Global Financial Systems (0.5) #
FM471 Sustainable Finance and Impact
Investing (0.5) #

LL4BK Corporate Crime (0.5)
LL4BL Financial Crime (0.5)
MG4D5 Leadership in Organisations: Theory and
Practice (0.5)

Any other course by special permission only.

Students can also take a dissertation in accounting:

AC495 Dissertation in Economics of Accounting
(0.5)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.
Please view the course guide for more information.

1: Before taking AC416 you must take AC480

2: Before taking AC416 you must take AC480

3: Before taking AC416 you must take AC480

Notes

Students may elect to have their degree
specialisation indicated on their degree certificate.
Students who take both AC470 and FM472 as
Paper 3 may choose to have *MSc Accounting and
Finance: International Accounting and Finance* on
their certificate. Students who take two half units
of AC411 or AC415 or AC416 or AC417 as Paper 3
may choose to have *MSc Accounting and Finance:
Accounting and Financial Management* on their

certificate. Students taking finance courses to
the equivalent of two full units as Papers 3 and 4
may choose to have *MSc Accounting and Finance:
Finance* on their certificate.

The Bologna Process [lse.ac.uk/resources/
calendar/programmeRegulations/taughtMasters/
Bologna%20Process.htm](http://lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm) facilitates comparability
and compatibility between higher education
systems across the European Higher Education
Area. Some of the School's taught master's
programmes are nine or ten months in duration.
If you wish to proceed from these programmes
to higher study in EHEA countries other than the
UK, you should be aware that their recognition for
such purposes is not guaranteed, due to the way in
which ECTS credits are calculated.

Accreditation: MSc Accounting and Finance is an
Association of Chartered Certified Accountants
(ACCA) Accredited Programme from 1 January
2024 to 31 December 2028.

MSc in Anthropology and Development

Programme Code: TMANDV

Department: Anthropology

For students starting this programme of study in 2024/25
Full-year programme. Students must take two compulsory
courses, a dissertation and optional courses to the value of one
unit. Written papers will be taken in the summer term and the
dissertation must be submitted in September. Attendance at
seminars and at non-assessed tutorials is compulsory.

Please note that places are limited on some optional courses.

**Admission onto any particular course is not guaranteed and may
be subject to timetabling constraints and /or students meeting
specific prerequisite requirements.**

Paper	Course number, title (unit value)	
Paper 1	AN436	The Anthropology of Development (0.5)
	And either	
	AN456	Anthropology of Economy (1): Production and Exchange (0.5) or
Paper 2	AN457	Anthropology of Economy (2): Transformation and Globalisation (0.5)
	DV400	Development: History, Theory and Policy (1.0) #
	Or	
Paper 3	DV442	Key Issues in Development Studies (0.5) and 0.5 units from the following: <i>Paper 3 DV courses options list</i>
	Courses to the value of 1.0 unit(s) from the following:	
	AN402	The Anthropology of Religion (1.0)
	AN404	Anthropology: Theory and Ethnography (1.0)
	AN405	The Anthropology of Kinship, Sex and Gender (1.0)
	AN419	The Anthropology of Christianity (0.5) (not available 2024/25)
	AN420	The Anthropology of Southeast Asia (0.5) (not available 2024/25)
	AN424	The Anthropology of Melanesia (0.5)
	AN447	China in Comparative Perspective (1.0)
	AN451	Anthropology of Politics (0.5)
	AN456	Anthropology of Economy (1): Production and Exchange (0.5) A
	AN457	Anthropology of Economy (2): Transformation and Globalisation (0.5) B

	Calibration (0.5) #
	Any other paper with the approval of the Programme Director and the teacher responsible for the course, excluding MA415, MA416, MA417 and MA424.
	<i>Papers 2, 3 & 4 options list</i>
Paper 7	MA498 Dissertation in Mathematics (1.0)
	Papers 2, 3 & 4 options list
	MA402 Mathematical Game Theory (0.5) #
	MA408 Topics in Discrete Mathematics (0.5) #
	MA409 Continuous Time Optimisation (0.5) #
	MA411 Probability and Measure (0.5) #
	MA414 Stochastic Analysis (0.5) # (not available 2024/25)
	MA421 Topics in Algorithms (0.5) #
	MA427 Mathematical Optimisation (0.5) #
	MA428 Combinatorial Optimisation (0.5) #
	MA429 Algorithmic Techniques in Machine Learning (0.5) #
	MA431 Advanced Topics in Operations Research and Applicable Mathematics (0.5) # (not available 2024/25)
	MA433 Mathematics of Networks (0.5) #
	MA434 Algorithmic Game Theory (0.5) # (not available 2024/25)
	MA435 Machine Learning in Financial Mathematics (0.5) #
	Prerequisite Requirements and Mutually Exclusive Options
	# means there may be prerequisites for this course. Please view the course guide for more information.
	Footnotes
	A: This option will not be available to those who have already studied MA300 and MA301, or who have studied this subject as part of an undergraduate degree.
	B: This option will not be available to those who have already studied MA320.
	C: Students taking this course can apply for a place on FM457 Applied Computational Finance, a non-assessed computer course.

MSc in Applied Social Data Science

Programme Code: TMASDS

Department: Methodology

For students starting this programme of study in 2024/25 Students must take two compulsory half-unit MY courses, a dissertation and optional courses (MY and/or non-MY) to the value of two units. The total value of all non-MY courses should not exceed one unit.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	MY470 Computer Programming (0.5)
	Exceptionally, students who can demonstrate sufficient prior training in or professional experience with computer programming commensurate with that covered in MY470 can substitute a 0.5-unit course from Paper 3 for MY470. This would be subject to the approval of the MSc Programme Director.
	And courses to the value of 0.5 units from the following:
	MY472 Data for Data Scientists (0.5)
	ST445 Managing and Visualising Data (0.5) #
Paper 2	MY400 Fundamentals of Social Science Research Design (0.5)

And courses to the value of 0.5 units from the following:

MY452A	Applied Regression Analysis (0.5) #
MY452W	Applied Regression Analysis (0.5) #
MY474	Applied Machine Learning for Social Science (0.5) #
ST443	Machine Learning and Data Mining (0.5) #
Paper 3	Courses to the value of 0.5 units from the following:
MY405	Research Design for Policy and Programme Evaluation (0.5)
MY456	Survey Methodology (0.5) #
MY457	Causal Inference for Observational and Experimental Studies (0.5) #
MY459	Quantitative Text Analysis (0.5) #
MY461	Social Network Analysis (0.5)
ST446	Distributed Computing for Big Data (0.5) #
ST449	Artificial Intelligence (0.5) #
ST451	Bayesian Machine Learning (0.5) #
ST455	Reinforcement Learning (0.5) #
ST456	Deep Learning (0.5) #

Or

Courses to the value of 0.5 unit(s) from the following:

Methodology Options List

Paper 4 Choice of any other 0.5 unit LSE course (including MY) with approval of the Academic Mentor.

Paper 5 MY498 Capstone Project (1.0)

Methodology Options List

MY405	Research Design for Policy and Programme Evaluation (0.5)
MY421A	Qualitative Research Methods (0.5)
MY421W	Qualitative Research Methods (0.5)
MY426	Doing Ethnography (0.5) #
MY428	Qualitative Text and Discourse Analysis (0.5) #
MY451A	Introduction to Quantitative Analysis (0.5)
MY451W	Introduction to Quantitative Analysis (0.5)
MY452A	Applied Regression Analysis (0.5) #
MY452W	Applied Regression Analysis (0.5) #
MY455	Multivariate Analysis and Measurement (0.5) #
MY456	Survey Methodology (0.5) #
MY457	Causal Inference for Observational and Experimental Studies (0.5) #
MY459	Quantitative Text Analysis (0.5) #
MY461	Social Network Analysis (0.5)
MY472	Data for Data Scientists (0.5)
MY475	Applied Deep Learning for Social Science (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Behavioural Science

Programme Code: TMBS

Department: Psychological and Behavioural Science

For students starting this programme of study in 2024/25

Wellbeing Specialism: students who choose to concentrate their electives and dissertation on wellbeing may elect to have a specialism in "Wellbeing" attached to their degree certificate and transcript, i.e. "Behavioural Science (Wellbeing)". To obtain this specialism, students must take PB421 Happiness and PB441 Wellbeing for Policy, and their dissertation topic must be approved by their supervisor as being appropriate for this specialism. If no

such election is made, the degree certificate will state "Behavioural Science" without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	PB405 Foundations in Behavioural Science (1.0)
Paper 2	PB413 Experimental Design and Methods for Behavioural Science (0.5) and PB4A7 Quantitative Applications for Behavioural Science (0.5)
Paper 3	Courses to the value of 0.5 unit(s) from the following: PB421 Happiness (0.5) PB434 Behavioural Science in an Age of AI and New Technology (0.5) PB435 Behavioural Science for Planetary Wellbeing (0.5) (not available 2024/25) PB436 The Science of Time at Work (0.5) PB441 Wellbeing for Policy (0.5) PB452 Behavioural Science for Health and Pandemic Responses (0.5) # (not available 2024/25) PB453 Corporate Behaviour and Decision Making (0.5) (not available 2024/25)
Paper 4	Students select a further 0.5 units from paper 3, or from the list below: MY457 Causal Inference for Observational and Experimental Studies (0.5) # PB417 Consumer Psychology for Sustainability (0.5) PB418 Corporate Communications (0.5) PB419 Creativity and Innovation (0.5) # (withdrawn 2024/25) PB424 Organisational Life (0.5) (not available 2024/25) PB425 Organisations, Groups and Identity (0.5) # PB427 Organisational and Social Decision Making (0.5) PB428 Political Psychology: Inequality & Intergroup Relations (0.5) PB429 Science, Innovations and the Human Future (0.5) (not available 2024/25) PB430 Social Influence Modes and Modalities (0.5) # (not available 2024/25) PB431 Social Psychology of Economic Life: Advanced Topics (0.5) PB432 Social Representations: Social Knowledge and Contemporary Issues (0.5) PB433 Theory and Practice of Organisational Development (0.5) PB437 Conversation Analysis and the Science of Social Interaction (0.5) (not available 2024/25) PB438 Crossing Borders: The Moral Psychology of Intergroup Cooperation and Conflict (0.5) PB458 Dialogue: Conflict & Negotiation (0.5) A course from another department (subject to the approval of the Candidate's Programme Director) <i>Paper 3 option list</i> PB410 Dissertation (1.0)
Paper 5	Paper 3 option list PB421 Happiness (0.5) PB434 Behavioural Science in an Age of AI and New Technology (0.5) PB435 Behavioural Science for Planetary Wellbeing (0.5) (not available 2024/25) PB436 The Science of Time at Work (0.5)

PB441	Wellbeing for Policy (0.5)
PB452	Behavioural Science for Health and Pandemic Responses (0.5) # (not available 2024/25)
PB453	Corporate Behaviour and Decision Making (0.5) (not available 2024/25)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in China in Comparative Perspective

Programme Code: TMCHCP

Department: Anthropology

For students starting this programme of study in 2024/25

Full-year programme. Students must take one compulsory course, select optional courses to the value of two units, and write a dissertation, as shown below. Attendance at seminars and at non-assessed tutorials is compulsory.

Students intending to use this degree to convert to a discipline in which they hope to qualify to do a research degree, should choose their options in consultation with the Programme Director to ensure eligibility for the research programme in question.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	AN447 China in Comparative Perspective (1.0)
Papers 2 & 3 A	Courses to the value of 2.0 unit(s) from the following: AN402 The Anthropology of Religion (1.0) AN404 Anthropology: Theory and Ethnography (1.0) AN405 The Anthropology of Kinship, Sex and Gender (1.0) AN436 The Anthropology of Development (0.5) AN451 Anthropology of Politics (0.5) AN456 Anthropology of Economy (1): Production and Exchange (0.5) AN457 Anthropology of Economy (2): Transformation and Globalisation (0.5) AN479 Anthropology of Law (0.5) AN480 Public Anthropology (0.5) (not available 2024/25) AN481 Health and Welfare: Anthropological Perspectives (0.5) (not available 2024/25) AN483 Anthropology, Art, and Poetics (0.5) (not available 2024/25) AN484 Anthropological Approaches to Race, Racism, and Decolonisation (0.5) AN486 Research Methods in Anthropology (0.5) AN495 Digital Anthropology (0.5) Other Anthropology courses (to the value of 1.0 unit) may be taken, subject to the approval of the Programme Director. DV411 Population, Development and Environment: an Analytical Approach (0.5) (not available 2024/25) DV413 Environmental Problems and Development Interventions (0.5) # DV415 Global Environmental Governance (0.5) (not available 2024/25) DV432 China in Developmental Perspective (0.5) # (not available 2024/25) DV444 Global Health Challenges: Epidemics, Disease, and Public Health Response (0.5) #

Paper 4	EH446	Economic Development of East and Southeast Asia (1.0) # (not available 2024/25)
	EH482	The Origins of the World Economy: Europe and Asia, 1000-1800 (1.0)
	EU443	European Models of Capitalism (0.5)
	GV4H1	Chinese Political Thought (0.5) # (not available 2024/25)
	GY438	Urban Asia: Cities and Social Change (0.5) (not available 2024/25)
	GY480	Remaking China: Geographical aspects of Development and Disparity (0.5)
	HY461	East Asia in the Age of Imperialism, 1839-1945 (1.0) #
	HY489	China and the External World, 1644-1839 (0.5)
	HY4B7	Asian Borderlands (1.0)
	SP412	Non-Governmental Organisations, Social Policy and Development (0.5) #
	SP418	Global Social Policy and International Organizations (0.5)
	SP419	Social Movements, Activism, and Social Policy (0.5)
	Courses to the value of one full-unit from MSc International Relations (Papers 2 & 3), subject to availability and the approval of the relevant course convenor. The following courses would be particularly appropriate:	
	IR445	Global Politics of China (1.0) (not available 2024/25)
	IR464	The Politics of International Human Rights (0.5) (not available 2024/25)
	IR473	China and the Global South (0.5)
	AN498	Dissertation- MSc China in Comparative Perspective (1.0)
	Prerequisite Requirements and Mutually Exclusive Options	
	# means there may be prerequisites for this course. Please view the course guide for more information.	
	Footnotes	
	A: Some option courses, particularly those outside of Anthropology, may have limited spaces.	

MSc in City Design and Social Science

Programme Code: TMCIDSS		
Department: Sociology		
For students starting this programme of study in 2024/25		
Full-year programme. Students must take courses to the value of four full units.		
Please note that places are limited on some optional courses.		
Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.		
Paper	Course number, title (unit value)	
Paper 1	SO448 City Design: Research Studio (1.0)	
Papers 2 & 3	Courses to the value of 1.0 unit(s) from the following:	
	PP465	City-Making: the Politics of Urban Form (0.5)
	SO451	Cities by Design (0.5)
	SO477	Urban Social Theory (0.5)
	SO480	Urban Inequalities (0.5) (not available 2024/25)
Paper 4	Courses to the value of 1.0 unit(s) from the following:	
	GY409	Globalisation and territorial development: Theory, Evidence and Policy (0.5)
	GY431	Cities, People and Poverty in the South (0.5) # (not available 2024/25)

Paper 5	GY438	Urban Asia: Cities and Social Change (0.5) (not available 2024/25)
	GY439	Cities, Politics and Citizenship (0.5) (not available 2024/25)
	GY441	The Politics of Housing (0.5)
	GY448	Social and Political Aspects of Planning (0.5)
	GY455	Economic Appraisal and Valuation (0.5)
	GY477	Race and Capitalism in North America (0.5) (not available 2024/25)
	GY479	Urban Transformations (0.5)
	PP465	City-Making: the Politics of Urban Form (0.5)
	SO451	Cities by Design (0.5)
	SO473	Crime, Control and the City (0.5) (not available 2024/25)
	SO475	Material Culture and Design (0.5) (not available 2024/25)
	SO477	Urban Social Theory (0.5)
	SO480	Urban Inequalities (0.5) (not available 2024/25)
	SO492	Qualitative Social Research Methods (0.5)
	SO4C5	The Social Life of Infrastructure (0.5)
	Any other course in the Department of Sociology, or other departments (special permission only), by agreement with the course tutor.	
	SO449	Independent Project (1.0)
	Prerequisite Requirements and Mutually Exclusive Options	
	# means there may be prerequisites for this course. Please view the course guide for more information.	

MSc in Criminal Justice Policy

Programme Code: TMCJP		
Department: Social Policy		
For students starting this programme of study in 2024/25		
Full-year programme. Students must take one compulsory course, optional courses to the value of two full units and a dissertation.		
Please note that places are limited on some optional courses.		
Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.		
Paper	Course number, title (unit value)	
Paper 1	SP477	Crime, Justice & Social Policy (0.5) and SP478 Special Issues in Criminology & Criminal Justice (0.5)
Papers 2 & 3	Courses to the value of 2.0 unit(s) from the following:	
	SO473	Crime, Control and the City (0.5) (not available 2024/25)
	SP403	Academic & Professional Skills Development for Social Policy (0.0) #
	SP414	Ethnicity, Race and Social Policy (0.5)
	SP419	Social Movements, Activism, and Social Policy (0.5)
	SP471	Issues in Contemporary Policing (0.5) # (not available 2024/25)
	SP473	Policing, Security and Globalisation (0.5)
	SP475	Riots, Disorder and Urban Violence (0.5) # (not available 2024/25)
	SP476	Punishment and Penal Policy (0.5) #
Paper 4	SP498	Criminal Justice Policy - Long Essay (1.0)
Prerequisite Requirements and Mutually Exclusive Options		
# means there may be prerequisites for this course. Please view the course guide for more information. It is not always possible to offer students a		

place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (i.e. not prefixed with 'SP').

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Culture and Conflict in a Global Europe

Programme Code: TMCCGLEU

Department: European Institute

For students starting this programme of study in 2024/25
(Formerly MSc in Global Europe: Culture and Conflict)

Full-year programme. Students must take two semi-compulsory courses, optional courses to the value of two units and a dissertation as shown below. Additionally, all students must take EU410 Interdisciplinary Research Methods and Design in preparation for the dissertation. Students must also select EU450 Engaging with Europe: Professional Skills during course choice. Places on EU450 workshops are on a first come first served basis.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific requirements.

Paper	Course number, title (unit value)
Professional development course	EU450 Engaging with Europe: Professional Skills (0.0)
Paper 1	Courses to the value of 1.0 unit(s) from the following:
	EU447 Democracy, Ideology and the European State (0.5)
	EU457 Culture and Security in Global Politics (0.5)
	EU478 The Culture of European Politics (0.5)
	EU4A2 Globalisation, Conflict and Post-Conflict Reconstruction (0.5)
Paper 2	Courses to the value of 1.0 unit(s) from the following:
	Culture and Society
	EU432 The Philosophy of Europe (0.5)
	EU437 Europe Beyond Modernity (0.5)
	EU457 Culture and Security in Global Politics (0.5)
	EU458 Narrating Migration in a Global Europe (0.5)
	EU478 The Culture of European Politics (0.5)
	EU481 The Future: Political Responses to a Challenge (0.5)
	EU4A3 The Americas and Europe (0.5)
	Conflict studies
	EU475 Europe and the Politics of Secularism (0.5)
	EU476 Emotions and Memory in European Politics (0.5)
	EU485 Post-Conflict Justice and Reconciliation in Europe and Beyond (0.5)
	EU486 Muslims in Europe (0.5)
	EU4A2 Globalisation, Conflict and Post-Conflict Reconstruction (0.5)
	Politics and Policy

EU430	Europeanization: The Comparative Politics of Domestic Change (0.5) (not available 2024/25)
EU440	The Balkans in Europe: Transition, Democratisation, Integration (0.5)
EU447	Democracy, Ideology and the European State (0.5)
EU487	European Integration from a Global Governance Perspective (0.5) #
EU488	European Policy-Making and International Cooperation (0.5) #
EU489	Analytical Politics and Policymaking in Europe (0.5)
EU4A1	The Politics and Policies of 'Brexit': The UK's changing relationship with the European Union (0.5) (not available 2024/25)
EU4A5	People and Politics in Europe (0.5)
EU4A6	Reconciliation and Crisis: Politics in Southern Europe (0.5) (not available 2024/25)
EU4A7	Political Economy of the Green Transition in Europe (0.5)
EU4B1	Political Elites, Leadership, and Decision-Making (0.5)

International Migration

EU464	International Migration: EU Policies and Politics (0.5) #
EU484	Europe's Role in Global Migration Governance (0.5)
EU494	International Migration and Immigration Management (0.5)
EU4A8	Migration From Below: Theories and Lived Experiences of Borders (0.5)

Paper 3

Courses to the value of 1.0 unit(s) from the following:

Identity and Culture

GI421	Sexuality, Gender and Culture (0.5) #
GI422	Transnational Sexual Politics (1.0)
GV498	Multiculturalism (0.5)
IR465	The International Politics of Culture and Religion (1.0) # (not available 2024/25)
IR4B1	Islam in World Politics (0.5)
SO479	Human Rights and Postcolonial Theory (0.5)

Conflict in World Politics

GV4B8	Civil Wars: Concepts and Cases (0.5) (not available 2024/25)
GV4B9	The Second Europe (0.5)
GV4K7	Conflict and Cooperation: Key Debates (0.5)
IR452	Empire and Conflict in World Politics (0.5)

Methodology

MY423	Interview Methods for Social Science Research (0.5) #
MY425	Case Studies and Comparative Methods for Qualitative Research (0.5) #
MY428	Qualitative Text and Discourse Analysis (0.5) #

Any course(s) not taken previously from the Paper 2 options list below; or exceptionally: 0.5 units maximum of either an EU-coded course not listed above, or 0.5 units maximum of any course from outside the department, with the approval of the Programme Director and relevant course convenor. Students must refer to the European Institutes approval policy (available via Moodle) when applying for permission to take courses not listed within these programme regulations.

Paper 2 options list

EU410	Interdisciplinary Research Methods and
-------	--

Paper 4

Optional	Design (0.0) and EU499 Dissertation (1.0)
	Students on this programme are invited to participate in the LSE-Columbia double degree seminars as part of their studies:
EU4A9	European Politics, Conflict and Culture: LSE-Columbia European Seminar (0.0)
Paper 2 options list	
EU430	Europeanization: The Comparative Politics of Domestic Change (0.5) (not available 2024/25)
EU432	The Philosophy of Europe (0.5)
EU437	Europe Beyond Modernity (0.5)
EU440	The Balkans in Europe: Transition, Democratisation, Integration (0.5)
EU447	Democracy, Ideology and the European State (0.5)
EU457	Culture and Security in Global Politics (0.5)
EU458	Narrating Migration in a Global Europe (0.5)
EU464	International Migration: EU Policies and Politics (0.5) #
EU475	Europe and the Politics of Secularism (0.5)
EU476	Emotions and Memory in European Politics (0.5)
EU478	The Culture of European Politics (0.5)
EU481	The Future: Political Responses to a Challenge (0.5)
EU484	Europe's Role in Global Migration Governance (0.5)
EU485	Post-Conflict Justice and Reconciliation in Europe and Beyond (0.5)
EU486	Muslims in Europe (0.5)
EU487	European Integration from a Global Governance Perspective (0.5) #
EU488	European Policy-Making and International Cooperation (0.5) #
EU489	Analytical Politics and Policymaking in Europe (0.5)
EU494	International Migration and Immigration Management (0.5)
EU4A1	The Politics and Policies of 'Brexit': The UK's changing relationship with the European Union (0.5) (not available 2024/25)
EU4A2	Globalisation, Conflict and Post-Conflict Reconstruction (0.5)
EU4A3	The Americas and Europe (0.5)
EU4A5	People and Politics in Europe (0.5)
EU4A6	Reconciliation and Crisis: Politics in Southern Europe (0.5) (not available 2024/25)
EU4A7	Political Economy of the Green Transition in Europe (0.5)
EU4A8	Migration From Below: Theories and Lived Experiences of Borders (0.5)
EU4B1	Political Elites, Leadership, and Decision-Making (0.5)
Prerequisite Requirements and Mutually Exclusive Options	
# means there may be prerequisites for this course. Please view the course guide for more information.	

MSc in Culture and Society

Programme Code: TMCUSO

Department: Sociology

For students starting this programme of study in 2024/25
Full-year programme. Students take two compulsory courses, optional courses to the value of 1.5 full units plus the dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	SO434 Cultural Theory and Cultural Forms (1.0)
Paper 2	SO492 Qualitative Social Research Methods (0.5)
Paper 3	Courses to the value of 1.5 unit(s) from the following: EU4A3 The Americas and Europe (0.5) GI402 Gender, Knowledge and Research Practice (0.5) GI403 Gender and Media Representation (0.5) GI410 Screening the 21st Century: Cinema and Cultural Critique (0.5) # GI421 Sexuality, Gender and Culture (0.5) # GY439 Cities, Politics and Citizenship (0.5) (not available 2024/25) GY479 Urban Transformations (0.5) MC402 The Audience in Media and Communications (0.5) # MC408 Theories and Concepts in Media and Communications (0.5) # MC420 Identity, Transnationalism and the Media (0.5) # (not available 2024/25) MY428 Qualitative Text and Discourse Analysis (0.5) # PB432 Social Representations: Social Knowledge and Contemporary Issues (0.5) SO426 Classical Social Thought (0.5) SO427 Modern Social Thought (0.5) SO458 Gendering, Identities, Difference (0.5) SO471 Technology, Power and Culture (0.5) (not available 2024/25) SO475 Material Culture and Design (0.5) (not available 2024/25) SO477 Urban Social Theory (0.5) SO479 Human Rights and Postcolonial Theory (0.5) SO481 Class, Politics and Culture (0.5) SO490 Contemporary Social Thought (0.5) SO4B6 Nature and Technology: More than Human Sociology (0.5) (not available 2024/25) SO4B9 The Sociology of Consumption (0.5) SO4C5 The Social Life of Infrastructure (0.5) Or any other MSc level course offered in the School, subject to the consent of the candidate's teachers.
Paper 4	SO493 MSc in Culture and Society Dissertation (1.0)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Data Science

Programme Code: TMDS

Department: Statistics

For students starting this programme of study in 2024/25
Full-year programme. This programme is also available on a part-

time basis (2-year duration) to Home students only. Students must take three compulsory courses, options to the value of 1.5 unit(s) and a Capstone Project as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	ST445 Managing and Visualising Data (0.5) #
Paper 2	ST447 Data Analysis and Statistical Methods (0.5) #
Paper 3	ST443 Machine Learning and Data Mining (0.5) #
Paper 4	Courses to the value of 1.5 unit(s), including at least 0.5 unit(s) of ST courses from the following: MA407 Algorithms and Computation (0.5) # MY459 Quantitative Text Analysis (0.5) # MY461 Social Network Analysis (0.5) MY470 Computer Programming (0.5) ST405 Multivariate Methods (0.5) # ST411 Generalised Linear Modelling and Survival Analysis (0.5) # ST418 Advanced Time Series Analysis (0.5) # ST429 Statistical Methods for Risk Management (0.5) # ST436 Financial Statistics (0.5) # ST444 Computational Data Science (0.5) # ST446 Distributed Computing for Big Data (0.5) # ST449 Artificial Intelligence (0.5) # ST451 Bayesian Machine Learning (0.5) # ST454 Bayesian Data Analysis (0.5) # ST455 Reinforcement Learning (0.5) # ST456 Deep Learning (0.5) # ST457 Graph Data Analytics and Representation Learning (0.5) # ST458 Financial Statistics II (0.5) # ST459 Quantum Computation and Information (0.5) #
Paper 5	ST498 Capstone Project (1.0) # Prerequisite Requirements and Mutually Exclusive Options # means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Development Management

Programme Code: TMDVMN

Department: International Development

For students starting this programme of study in 2024/25

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown.

Students who choose to concentrate their electives and dissertation in a certain topic area may elect to have a specialism in "African Development", "Population Studies" or "Applied Development Economics" attached to their degree certificate and transcript. To obtain the specialism indication, students must meet the criteria below.

African Development: This specialism will not be available 2024/25.

Population Studies: Students must take two courses from DV444, DV456, and MY476 and their dissertation topic must be approved as being appropriate for this specialism.

Applied Development Economics: Students to take DV494 plus courses from DV490, DV491, DV492.

If no such election is made, the degree certificate will state "Development Management" without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting

specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	DV431 Development Management (1.0)
Paper 2	DV443 Development Management Consultancy Project (0.5)
Paper 3	Courses to the value of 1.5 unit(s) from the following: AC470 Accounting in the Global Economy (0.5) # DV407 Poverty (0.5) DV411 Population, Development and Environment: an Analytical Approach (0.5) (not available 2024/25) DV413 Environmental Problems and Development Interventions (0.5) # DV415 Global Environmental Governance (0.5) (not available 2024/25) DV418 African Development (0.5) DV420 Complex Emergencies (0.5) DV421 Critical Perspectives on Global Health and Development (0.5) DV423 Global Political Economy of Development (0.5) # DV424 International Institutions and Late Development (0.5) DV428 Managing Humanitarianism (0.5) DV432 China in Developmental Perspective (0.5) # (not available 2024/25) DV433 The Informal Economy and Development (0.5) (not available 2024/25) DV434 Human Security (0.5) (not available 2024/25) DV435 African Political Economy (0.5) (not available 2024/25) DV444 Global Health Challenges: Epidemics, Disease, and Public Health Response (0.5) # DV454 Gender, labour markets and social change in the Global South: theory, evidence, public action (0.5) (not available 2024/25) DV455 Advocacy, Campaigning and Grassroots Activism (0.5) DV456 Population, Health and Development: Evidence and Projections (0.5) # DV457 Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (0.5) DV458 Key issues in Global Health and Development (0.5) DV460 Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference (0.5) # (not available 2024/25) DV462 Forced Migration and Refugees (0.5) DV464 Democracy and Development (0.5) DV465 Labour, Social Services and Development (0.5) (not available 2024/25) DV472 Covid-19 pandemic: health, socio-economic and political implications for development (Special Topics in International Development) (0.5) (not available 2024/25) DV473 Health, conflict and crises (0.5) DV480 Transforming Society: Revolutions, Evolutions and Colonialism (0.5) # DV483 Information Communication Technologies and Socio-economic Development (0.5) DV490 Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (0.5) # DV491 Economic Development Policy II:

	Microeconomic Analysis (0.5) #
DV492	Economic Development Policy III: Government Policy Analysis (0.5) #
DV494	Foundations of Applied Econometrics for Economic Development Policy (0.5) #
GI407	Globalisation, Gender and Development (1.0) 1 (not available 2024/25)
GI409	Conceptual Foundations in Gender, Development and Globalization (0.5) 2
GI411	Gender, Post/coloniality and Development: Critical Perspectives and New Directions (0.5) #
GI418	Feminist Economics and Policy: An Introduction (0.5) #
GI420	Transnational Feminist Development Agendas (0.5) 3
GV483	Public Management Theory and Doctrine (0.5)
GV4C9	Globalization and Democratization in Southeast Asia (0.5) (not available 2024/25)
GV4K1	Participatory Governance (0.5)
GV4L3	Data Science Applications in Politics Research (0.5) # (not available 2024/25)
GV4L7	Political Participation and Representation in Latin America (0.5) (not available 2024/25)
GY403	Contemporary Debates in Human Geography (0.5)
GY409	Globalisation and territorial development: Theory, Evidence and Policy (0.5)
GY410	Economics of Local and Regional Development (0.5)
GY413	Regional Development and Policy (0.5) #
GY431	Cities, People and Poverty in the South (0.5) # (not available 2024/25)
GY432	Urban Ethnography (0.5)
GY447	The Economics of Regional and Urban Planning (0.5) #
GY459	Urban Theory and Policy in the Global South (0.5)
GY473	Economic Development and the Environment (0.5) #
GY474	Politics of Environment and Development (0.5)

GI409	Conceptual Foundations in Gender, Development and Globalization (0.5) 2		
GI418	Feminist Economics and Policy: An Introduction (0.5) #		Prerequisite Requirements and Mutually Exclusive Options
GI420	Transnational Feminist Development Agendas (0.5) 3		# means there may be prerequisites for this course. Please view the course guide for more information.
GV441	States and Markets (0.5) (not available 2024/25)		1: GI407 can not be taken with GI409, GI420
GV483	Public Management Theory and Doctrine (0.5)		2: GI409 can not be taken with GI407, GI420
GV4C9	Globalization and Democratization in Southeast Asia (0.5) (not available 2024/25)		3: GI420 can not be taken with GI409, GI407
GV4K1	Participatory Governance (0.5)		Footnotes
GV4K7	Conflict and Cooperation: Key Debates (0.5)		A: The International Relations (IR) Department permits non-IR students to take only one option from those prefixed "IR". Access is not guaranteed for any option.
GV4L3	Data Science Applications in Politics Research (0.5) # (not available 2024/25)		B: Entry to this course may be restricted.
GV4L7	Political Participation and Representation in Latin America (0.5) (not available 2024/25)		C: Entry to this course may be restricted.
GY403	Contemporary Debates in Human Geography (0.5)		D: Entry to this course may be restricted.
GY413	Regional Development and Policy (0.5) #		E: Course designed for those with a minimum of one year's practical working experience in developing countries; seminars draw extensively on students' own experience. Entry may be restricted. Interested students should attend lectures and consult the lecturers.
GY431	Cities, People and Poverty in the South		

MSc in Econometrics and Mathematical Economics

Programme Code: TMEM

Department: Economics

For students starting this programme of study in 2024/25 Academic-year programme. Students must take courses to the value of four full units as shown. Students are also required to attend the introductory course EC451 Introductory Course for MSc

EME.

Please note that places are limited on some optional courses.**Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.**

Paper	Course number, title (unit value)
Introductory course	EC451 Introductory Course for MSc EME (0.0)
Paper 1	EC484 Econometric Analysis (1.0) #
Paper 2	EC487 Advanced Microeconomics (1.0) #
Paper 3	EC417 Advanced Macroeconomics (1.0) #
Paper 4	MSc EME Option List - courses to the value of 1.0 unit from the following:
	EC421 International Economics (1.0) #
	EC423 Labour Economics (1.0) #
	EC424 Monetary Economics and Aggregate Fluctuations (1.0) #
	EC426 Public Economics (1.0) #
	EC427 The Economics of Industry (1.0) #
	EC428 Development and Growth (1.0) #
	EC453 Political Economy (1.0) #
	EC465 Economic Growth, Development, and Capitalism in Historical Perspective (1.0) #
	EC475 Quantitative Economics (1.0) #
	EC476 Contracts and Organisations (1.0) #
	EC485 Further Topics in Econometrics (1.0) #
	FM421 Finance for Mergers, Buyouts and Corporate Restructurings (0.5) #
	FM429 Asset Markets A (0.5) #
	FM431A Corporate Finance A (0.5) #
	FM431W Corporate Finance A (0.5) # (not available 2024/25)
	FM441 Derivatives (0.5) #
	FM442 Quantitative Methods for Finance and Risk Analysis (0.5) #
	FM445 Portfolio Management (0.5)
	GY426 Environmental and Resource Economics (1.0) #
	MY459 Quantitative Text Analysis (0.5) #
	MY461 Social Network Analysis (0.5)
	MY474 Applied Machine Learning for Social Science (0.5) #
	ST409 Stochastic Processes (0.5) #
	ST418 Advanced Time Series Analysis (0.5) #
	ST443 Machine Learning and Data Mining (0.5) #
	ST444 Computational Data Science (0.5) #
	ST446 Distributed Computing for Big Data (0.5) #
	ST449 Artificial Intelligence (0.5) #
	ST451 Bayesian Machine Learning (0.5) #
	ST463 Stochastic Simulation, Training, and Calibration (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information. The Bologna Process [lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm](https://www.lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm) facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

MSc in Economic History**Programme Code:** TMEH**Department:** Economic History

For students starting this programme of study in 2024/25

Full-year programme. Students must take compulsory courses to the value of 1.5 units, optional courses to the value of two units and a half-unit dissertation.

Please note that places are limited on some optional courses.**Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.**

Paper	Course number, title (unit value)
Paper 1	EH401 Historical Analysis of Economic Change (0.5)
Paper 2	EH482 The Origins of the World Economy: Europe and Asia, 1000-1800 (1.0) <i>or</i> EH483 The Development and Integration of the World Economy in the 19th and 20th Centuries (1.0)
Papers 3 & 4	EH498 Dissertation (0.5) and courses to the value of two full units from the following: <i>Papers 3 & 4 options list</i> Or With the approval of their Academic Mentor, students may request to take EH499 (Dissertation: MSc Economic History) and courses to the value of 1.5 units from the Papers 3 and 4 options list, instead of taking EH498: EH499 Research Dissertation (1.0) * and courses to the value of 1.5 units from the following: Papers 3 & 4 options list
	EC465 Economic Growth, Development, and Capitalism in Historical Perspective (1.0) #1
	EH402 Quantitative Analysis in Economic History I (0.5) 2
	EH404 India and the World Economy (0.5)
	EH409 Chinese Economic History: Culture, Institutions and Economic Growth (0.5) #
	EH413 African Economic Development in Historical Perspective (0.5) (not available 2024/25)
	EH421 Economic History of Colonialism (0.5)
	EH426A Quantitative Analysis in Economic History II (0.5) #
	EH426W Quantitative Analysis in Economic History II (0.5) # (not available 2024/25)
	EH427 Topics in Quantitative Analysis in Economic History (0.5) #3
	EH429 History of Economics: Ideas, Policy and Performativity (0.5)
	EH430 Monetary and Financial History (1.0) # (not available 2024/25)
	EH431 Women in Economic History (0.5)
	EH432 Economic History and Geography: Advanced Topics and Methods (0.5) # (not available 2024/25)
	EH436 Economic History of the Early Modern New World (The Americas) (0.5) (not available 2024/25)
	EH441 Macroeconomic History (0.5) # (not available 2024/25)
	EH442 Labour Markets in Historical Perspective (0.5)
	EH443 The History of Premodern Money (0.5)
	EH444 Population Dynamics and Economic Growth: A Historical Perspective (0.5) #
	EH446 Economic Development of East and

	Southeast Asia (1.0) # (not available 2024/25)
EH448	Craft, Human Capital and Innovation in Europe, 1400-1800 (0.5)
EH452	Latin American Development and Economic History (0.5) (not available 2024/25)
EH463	The Long-Run Analysis of Firms and Industries (0.5)
EH482	The Origins of the World Economy: Europe and Asia, 1000-1800 (1.0)
EH483	The Development and Integration of the World Economy in the 19th and 20th Centuries (1.0)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

1: Before taking EC465 you must take EC400

2: EH402 can not be taken with EH426, EH427

3: EH427 can not be taken with EH422

MSc in Economic History (Research)

Programme Code: TMEHRE

Department: Economic History

For students starting this programme of study in 2024/25

Full-year, five unit programme. Students must take two compulsory half-unit courses, optional courses to the value of two units and a dissertation (which counts as two units) as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	EH401 Historical Analysis of Economic Change (0.5)
	And one of the following:
	EH402 Quantitative Analysis in Economic History I (0.5)
	EH426A Quantitative Analysis in Economic History II (0.5) #
	EH426W Quantitative Analysis in Economic History II (0.5) # (not available 2024/25)
	EH427 Topics in Quantitative Analysis in Economic History (0.5) #
Paper 2	Courses to the value of 1.0 unit(s) from the following:
	EC465 Economic Growth, Development, and Capitalism in Historical Perspective (1.0) #
	EH430 Monetary and Financial History (1.0) # (not available 2024/25)
	EH446 Economic Development of East and Southeast Asia (1.0) # (not available 2024/25)
	EH482 The Origins of the World Economy: Europe and Asia, 1000-1800 (1.0)
	EH483 The Development and Integration of the World Economy in the 19th and 20th Centuries (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	EH404 India and the World Economy (0.5)
	EH409 Chinese Economic History: Culture, Institutions and Economic Growth (0.5) #
	EH413 African Economic Development in Historical Perspective (0.5) (not

available 2024/25)

EH421	Economic History of Colonialism (0.5)

	PP449	Comparative Political Economy and Development (0.5)
	PP450	Public Organisations: Theory and Practice (0.5) # (not available 2024/25)

Any other course in the ID Department, or a further course from paper 3 if not already taken:

Paper 3 options list

DV490	Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (0.5) #
DV491	Economic Development Policy II: Microeconomic Analysis (0.5) #
DV492	Economic Development Policy III: Government Policy Analysis (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Economics

Programme Code: TMEC

Department: Economics

For students starting this programme of study in 2024/25

Academic-year programme. Students must take three compulsory courses, one unit of optional courses and an extended essay linked to the optional course as shown. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Introductory course	EC400 Introductory Course in Mathematics and Statistics (0.0) #
Paper 1	EC413 Macroeconomics (1.0) #
Paper 2	EC411 Microeconomics (1.0) # or EC487 Advanced Microeconomics (1.0) #*
Paper 3	EC402 Econometrics (1.0) #
Paper 4	Courses to the value of 1.0 unit(s) from the following options:
	EC421 International Economics (1.0) #
	EC423 Labour Economics (1.0) #
	EC424 Monetary Economics and Aggregate Fluctuations (1.0) #
	EC426 Public Economics (1.0) #
	EC427 The Economics of Industry (1.0) #
	EC428 Development and Growth (1.0) #
	EC453 Political Economy (1.0) #
	EC465 Economic Growth, Development, and Capitalism in Historical Perspective (1.0) #
	EC475 Quantitative Economics (1.0) #
	EC476 Contracts and Organisations (1.0) #
	GY426 Environmental and Resource Economics (1.0) #
Or	
FM429	Asset Markets A (0.5) # and FM4T5 Portfolio Management - Dissertation (0.5)
Or	
FM429	Asset Markets A (0.5) # and FM4U1 Fixed Income Markets - Dissertation (0.5)
Or	
FM431A	Corporate Finance A (0.5) # and FM4T2 Finance for Mergers, Buyouts and Corporate Restructurings- Dissertation (0.5)
Any other course in Economics, that meets the essay requirement, approved by program director. Such approval will only be given in exceptional circumstances.	

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Economics (2 Year Programme)

Programme Code: TMECT

Department: Economics

For students starting this programme of study in 2024/25 Students without a strong background in economics are required to take the MSc programme over two years. In order to progress to the second year, which is governed by the 'Regulations for Taught Master's Degrees', students must attain or exceed the progression threshold for each of the four courses they have taken. The progression threshold is 55% of all courses taken. The Sub-Board of Examiners may, at its discretion, consider for progression candidates who fall marginally short of this requirement. However, students gaining the Diploma in a re-sit attempt are not eligible for progression onto the second year of the MSc, nor are students entitled to re-sit first year examinations already passed in order to achieve the progression standard.

In Year 1 students are also required to attend EC2A0 Introductory Course in Microeconomic Principles.

In Year 2, students must take three compulsory courses, one unit of optional courses and an extended essay linked to the optional course as shown. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Year 1 A

Introductory course	EC2A0	Introductory Course in Microeconomic Principles (0.0)
Paper 1	EC2A1	Microeconomics II (1.0) #
Paper 2	EC2B1	Macroeconomics II (1.0) #
Paper 3	MA100	Mathematical Methods (1.0) # or
	MA212	Further Mathematical Methods (1.0) #
Paper 4	EC2C1	Econometrics II (1.0) #

Year 2

Introductory course	EC400	Introductory Course in Mathematics and Statistics (0.0) #
---------------------	-------	---

Paper 5	EC413	Macroeconomics (1.0) #
Paper 6	EC411	Microeconomics (1.0) # or
	EC487	Advanced Microeconomics (1.0) #*
Paper 7	EC402	Econometrics (1.0) #
Paper 8	Courses to the value of 1.0 unit(s) from the following:	
	EC421	International Economics (1.0) #
	EC423	Labour Economics (1.0) #
	EC424	Monetary Economics and Aggregate Fluctuations (1.0) #
	EC426	Public Economics (1.0) #
	EC427	The Economics of Industry (1.0) #
	EC428	Development and Growth (1.0) #
	EC453	Political Economy (1.0) #
	EC465	Economic Growth, Development, and Capitalism in Historical Perspective (1.0) #
	EC475	Quantitative Economics (1.0) #
	EC476	Contracts and Organisations (1.0) #
	FM431A	Corporate Finance A (0.5) # and FM4T2 Finance for Mergers, Buyouts and Corporate Restructurings- Dissertation (0.5)
	GY426	Environmental and Resource Economics (1.0) #

Any other course in Economics approved by the candidate's teachers.

Or

FM429 Asset Markets A (0.5) #

And one of the following: B

FM4T5 Portfolio Management - Dissertation (0.5)

FM4U1 Fixed Income Markets - Dissertation (0.5)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

Footnotes

A: The Programme Director may, on an exceptional basis, permit a student to substitute another course or courses for up to two papers in Year 1.

B: For the purposes of degree classification the Finance half unit courses are combined and averaged to produce a final mark.

MSc in Economics (2 Year Programme)

Programme Code: TMECT

Department: Economics

For students starting this programme of study in 2023/24 Students without a strong background in economics are required to take the MSc programme over two years. In order to progress to the second year, which is governed by the 'Regulations for Taught Master's Degrees', students must attain or exceed the progression threshold for each of the four courses they have taken. The progression threshold is 60% for courses EC2A1, EC2B1, EC2C1, and MA100, while the progression threshold is 55% in courses MA212 and other advanced MAXXX options. The Sub-Board of Examiners may, at its discretion, consider for progression candidates who fall marginally short of this requirement. However, students gaining the Diploma in a re-sit attempt are not eligible for progression onto the MSc, nor are students entitled to re-sit first year examinations already passed in order to achieve the progression standard.

In Year 1 all courses are compulsory and students are also required to attend EC2A0 Introductory Course in Microeconomic Principles.

In Year 2, students must take three compulsory courses, one unit of optional courses and an extended essay linked to the optional course as shown. Students are also required to attend EC400

Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Year 1

Introductory course EC2A0 Introductory Course in Microeconomic Principles (0.0)

Paper 1 EC2A1 Microeconomics II (1.0) #

Paper 2 EC2B1 Macroeconomics II (1.0) #

Paper 3 MA100 Mathematical Methods (1.0) # or
MA212 Further Mathematical Methods (1.0) #

Paper 4 EC2C1 Econometrics II (1.0) #
Candidates may be allowed to substitute another course or courses for one of the papers listed above with the permission of the Programme Director.

Year 2

Introductory course EC400 Introductory Course in Mathematics and Statistics (0.0) #

Paper 5 EC413 Macroeconomics (1.0) #

Paper 6 EC411 Microeconomics (1.0) # or

EC487 Advanced Microeconomics (1.0) #*

Paper 7 EC402 Econometrics (1.0) #

Paper 8 Courses to the value of 1.0 unit(s) from the following:

EC421 International Economics (1.0) #

EC423 Labour Economics (1.0) #

EC424 Monetary Economics and Aggregate

Fluctuations (1.0) #

MSc in Finance and Economics

Programme Code: TMFIEC

Department: Finance

For students starting this programme of study in 2024/25

Academic-year (10 month) programme. Students must take three compulsory full-unit core courses and two optional half-unit courses. All students must submit a 6,000 word dissertation in one of the optional courses. Students are required to attend EC400 Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Introductory Course	EC400 Introductory Course in Mathematics and Statistics (0.0) #
Paper 1	EC411 Microeconomics (1.0) # or EC4B5 Macroeconomics for MSc F&E (0.5) # and EC4B6 Microeconomics for MSc F&E (0.5) #*A
	With the approval of the Programme Director, students who have already completed the equivalent of EC411 in their prior studies may be permitted to take the following course instead:
	EC413 Macroeconomics (1.0) #*
Paper 2	FM436 Financial Economics (1.0) #
Paper 3	FM437 Financial Econometrics (1.0) #
Paper 4	Two half-unit courses from the list below: Students must write the 6000-word dissertation in one of their two chosen courses.

FM404	Advanced Financial Economics (0.5) #
FM405	Fixed Income Securities and Credit Markets (0.5) #B
FM406	Topics in Portfolio Management (0.5) #
FM408	Financial Engineering (0.5) #
FM409	Risk Management in Financial Markets (0.5) #
FM412	Quantitative Security Analysis (0.5) #
FM421	Finance for Mergers, Buyouts and Corporate Restructurings (0.5) #1
FM471	Sustainable Finance and Impact Investing (0.5) #2
FM476	Entrepreneurial Finance (0.5) #3
FM477	International Finance A (0.5) #
FM4T2	Finance for Mergers, Buyouts and Corporate Restructurings- Dissertation (0.5) 4

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

1: FM421 can not be taken with FM4T2

2: FM471 can not be taken with FM476

3: FM476 can not be taken with FM471

4: FM4T2 can not be taken with FM421

Footnotes

A: Students may, with the approval of the Programme Director, Associate Programme Director and relevant Course Leaders, take half-units in Macroeconomics and Microeconomics, instead of the full unit EC411, Microeconomics. Students must meet the relevant pre-requisites for the Macroeconomics half unit.

B: Students must have completed either Asset Markets (FM423) and Corporate Finance (FM422), or Financial Economics (FM436)

The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

or work placement during the summer and to submit an essay of 2000 words following the placement (see FM411 for details). The essay will be assessed on a pass/fail basis and students must pass the essay to graduate from the programme.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

MSc in Financial Mathematics

Programme Code: TMFIMA

Department: Mathematics

For students starting this programme of study in 2024/25 Academic year programme (10 months). Students must take five compulsory half-unit courses and optional courses to the value of one-and-a-half units as shown.

There is also a two-week compulsory introductory course MA400 September Introductory Course relating to MA415 and MA417.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Introductory course	MA400	September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (0.0)
Paper 1	MA415	The Mathematics of the Black and Scholes Theory (0.5) #
Paper 2	MA416	The Foundations of Interest Rate and Credit Risk Theory (0.5) #
Paper 3	ST409	Stochastic Processes (0.5) #
Paper 4	FM413	Fixed Income Markets (0.5) #
Paper 5	MA417	Computational Methods in Finance (0.5) #
Paper 6	One of the following:	
	MA402	Mathematical Game Theory (0.5) #
	MA411	Probability and Measure (0.5) #
	MA414	Stochastic Analysis (0.5) # (not available 2024/25)
	MA420	Topics in Financial Mathematics (0.5) #
	MA435	Machine Learning in Financial Mathematics (0.5) #
	ST440	Recent Developments in Finance and Insurance (0.5) # (not available 2024/25)
Papers 7 & 8	Courses to the value of 1.0 unit(s) from the following:	
	FM402	Financial Risk Analysis (0.5) #

FM429	Asset Markets A (0.5) #
FM441	Derivatives (0.5) #
FM442	Quantitative Methods for Finance and Risk Analysis (0.5) #
FM445	Portfolio Management (0.5)
ST418	Advanced Time Series Analysis (0.5) #
ST426	Applied Stochastic Processes (0.5) (not available 2024/25)
ST429	Statistical Methods for Risk Management (0.5) #
ST448	Insurance Risk (0.5) # (not available 2024/25)
ST459	Quantum Computation and Information (0.5) #
ST463	Stochastic Simulation, Training, and Calibration (0.5) #

Further half unit(s) from the MA4** level courses or any other appropriate MSc course, subject to the approval of the Programme Director and Teacher Responsible for the course.

Paper 6 options list

Additional course

Students can also take the following non-assessed course taken in addition to the required five compulsory half-unit courses and optional courses to the value of one-and-a-half units detailed above:

MA422 Research Topics in Financial Mathematics (0.0)

Paper 6 options list

MA402	Mathematical Game Theory (0.5) #
MA411	Probability and Measure (0.5) #
MA414	Stochastic Analysis (0.5) # (not available 2024/25)
MA420	Topics in Financial Mathematics (0.5) #
MA435	Machine Learning in Financial Mathematics (0.5) #
ST440	Recent Developments in Finance and Insurance (0.5) # (not available 2024/25)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

MSc in Gender, Development and Globalisation

Programme Code: TMGEDVGL

Department: Gender Studies

For students starting this programme of study in 2024/25

Full-year programme. Students must take the following courses to the value of four full units.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Paper 1	GI424	Gender Theories: An Interdisciplinary Approach (0.5)
Paper 2	GI409	Conceptual Foundations in Gender,

	Development and Globalization (0.5)
And

MSc in Global Health Policy

Programme Code: TMGLHP

Department: Health Policy

For students starting this programme of study in 2024/25 (formerly MSc in Global Health)

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	HP401 Introduction to Health Policy and Politics (0.5)
Paper 2	HP404 Global Health Policy: Institutions, Actors and Politics (0.5)
Paper 3	HP421 Economic Analysis for Health Policy in Low- and Middle-Income Countries (0.5)
Paper 4	One of the following courses: HP407 Evidence Review and Synthesis for Decision Making (0.5) HP422 Health Care Economic Evaluation (0.5) HP428 Randomised evaluations of health programmes: from design to implementation (0.5) HP436 Evidence Appraisal for Health Policy Analysis (0.5)
Papers 5, 6 & 7	Courses to the value of 1.5 unit(s) from the following: DV421 Critical Perspectives on Global Health and Development (0.5) DV444 Global Health Challenges: Epidemics, Disease, and Public Health Response (0.5) # DV456 Population, Health and Development: Evidence and Projections (0.5) # DV457 Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (0.5) DV465 Labour, Social Services and Development (0.5) (not available 2024/25) HP400 Financing Health Care (0.5) HP402 Measuring Health System Performance (0.5) HP405 Social Determinants of Health (0.5) HP407 Evidence Review and Synthesis for Decision Making (0.5) HP412 Global Health Security (0.5) HP422 Health Care Economic Evaluation (0.5) HP424 Pharmaceutical Economics and Policy (0.5) HP425 Statistical Methods in Health Care Economic Evaluation (0.5) # HP428 Randomised evaluations of health

	programmes: from design to implementation (0.5)
HP429	Behavioural Incentive Design in Health and Health Care (0.5) (not available 2024/25)
HP432	Mental Health Policy (0.5) #
HP433	Health Care Regulation (0.5)
HP435	Global Access to Medicines (0.5)
HP436	Evidence Appraisal for Health Policy Analysis (0.5)
HP437	Health Equity, Climate Change and the Common Good (0.5) #
MY405	Research Design for Policy and Programme Evaluation (0.5)
MY421A	Qualitative Research Methods (0.5)
MY421W	Qualitative Research Methods (0.5)
SP418	Global Social Policy and International Organizations (0.5)

Or another LSE course subject to the approval of the course tutor.

Paper 8 HP431 Dissertation in Health Policy (0.5)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Health and International Development

Programme Code: TMHEINDE

Department: International Development

For students starting this programme of study in 2024/25

Full-year programme. Students must take courses to the value of three full units, non-credit-bearing course DV445 and a dissertation as shown.

Students who choose to concentrate their electives and dissertation in a certain topic area may elect to have a specialism in "African Development," "Population Studies," or "Applied Development Economics" attached to their degree certificate and transcript. To obtain the specialism indication, students must meet the criteria below.

African Development: Not available 2024/25

Population Studies: students must take two courses from DV444, DV456, and MY476 and their dissertation topic must be approved as being appropriate for this specialism.

Applied Development Economics: students must take DV494 plus two courses from DV490, DV491 and DV492.

If no such election is made, the degree certificate will state "Health and International Development" without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	DV442 Key Issues in Development Studies (0.5) and DV458 Key issues in Global Health and Development (0.5)
Paper 2	Courses to the value of 1.0 unit(s) from the following: DV421 Critical Perspectives on Global Health and Development (0.5) DV444 Global Health Challenges: Epidemics, Disease, and Public Health Response (0.5) # DV453 International Development Consultancy Project (0.5) DV456 Population, Health and Development: Evidence and Projections (0.5) # DV457 Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (0.5)

Paper 3	DV473	Health, conflict and crises (0.5)	PB422	Health Communication (0.5) (withdrawn 2024/25)	
	DV494	Foundations of Applied Econometrics for Economic Development Policy (0.5) #	PP449	Comparative Political Economy and Development (0.5)	
	Courses to the value of 1.0 unit(s) from the following:		Any other course approved by tutor by special permission only.		
	DV407	Poverty (0.5)	<i>Paper 2 options list</i>		
	DV411	Population, Development and Environment: an Analytical Approach (0.5) (not available 2024/25)	Paper 4	DV410	Research Design and Dissertation in International Development (1.0)
	DV413	Environmental Problems and Development Interventions (0.5) #		DV445	Cutting Edge Issues in Development Thinking & Practice (0.0)
	DV415	Global Environmental Governance (0.5) (not available 2024/25)	Paper 2 options list		
	DV418	African Development (0.5)		DV421	Critical Perspectives on Global Health and Development (0.5)
	DV420	Complex Emergencies (0.5)		DV444	Global Health Challenges: Epidemics, Disease, and Public Health Response (0.5) #
	DV423	Global Political Economy of Development (0.5) #		DV453	International Development Consultancy Project (0.5)
	DV424	International Institutions and Late Development (0.5)		DV456	Population, Health and Development: Evidence and Projections (0.5) #
	DV428	Managing Humanitarianism (0.5)		DV457	Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (0.5)
	DV433	The Informal Economy and Development (0.5) (not available 2024/25)		DV473	Health, conflict and crises (0.5)
	DV434	Human Security (0.5) (not available 2024/25)		DV494	Foundations of Applied Econometrics for Economic Development Policy (0.5) #
	DV435	African Political Economy (0.5) (not available 2024/25)	Prerequisite Requirements and Mutually Exclusive Options		
	DV454	Gender, labour markets and social change in the Global South: theory, evidence, public action (0.5) (not available 2024/25)	# means there may be prerequisites for this course. Please view the course guide for more information. It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of International Development (ie not prefixed with 'DV').		
	DV455	Advocacy, Campaigning and Grassroots Activism (0.5)	Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm . Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm .		
	DV460	Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference (0.5) # (not available 2024/25)			
	DV462	Forced Migration and Refugees (0.5)			
	DV464	Democracy and Development (0.5)			
	DV465	Labour, Social Services and Development (0.5) (not available 2024/25)			
	DV472	Covid-19 pandemic: health, socio-economic and political implications for development (Special Topics in International Development) (0.5) (not available 2024/25)			
	DV480	Transforming Society: Revolutions, Evolutions and Colonialism (0.5) #

MSc in Health Data Science

Programme Code: TMHDS

Department: Health Policy

For students starting this programme of study in 2024/25 9 month programme. Students take four compulsory half unit courses and options to the value of two unit(s).

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper **Course number, title (unit value)**

Year 1

Paper 1	ST445	Managing and Visualising Data (0.5) #
Paper 2	ST411	Generalised Linear Modelling and Survival Analysis (0.5) # or
	ST447	Data Analysis and Statistical Methods (0.5) #

Paper 3	HP426	Applied Health Econometrics (0.5)
Paper 4	HP434	Methods and Data for Health Systems Performance Assessment (0.5)

Paper 5 Courses to the value of 1.0 unit(s) from the

following:

ST405	Multivariate Methods (0.5) #
ST416	Multilevel Modelling (0.5) # (not available 2024/25)
ST442	Longitudinal Data Analysis (0.5) #
ST443	Machine Learning and Data Mining (0.5) #
ST446	Distributed Computing for Big Data (0.5) #
ST449	Artificial Intelligence (0.5) #
ST451	Bayesian Machine Learning (0.5) #
ST454	Bayesian Data Analysis (0.5) #
ST455	Reinforcement Learning (0.5) #
ST456	Deep Learning (0.5) #
ST457	Graph Data Analytics and Representation Learning (0.5) #

Paper 6 Courses to the value of 1.0 unit(s) from any available MSc course offered by the Department of Health Policy.

HP course list

HP400	Financing Health Care (0.5)
HP401	Introduction to Health Policy and Politics (0.5)
HP404	Global Health Policy: Institutions, Actors and Politics (0.5)
HP405	Social Determinants of Health (0.5)
HP407	Evidence Review and Synthesis for Decision Making (0.5)
HP412	Global Health Security (0.5)
HP420	Health Economics (0.5)
HP421	Economic Analysis for Health Policy in Low- and Middle-Income Countries (0.5)
HP422	Health Care Economic Evaluation (0.5)
HP423	Advanced Health Economics (0.5) #
HP424	Pharmaceutical Economics and Policy (0.5)
HP425	Statistical Methods in Health Care Economic Evaluation (0.5) #
HP428	Randomised evaluations of health programmes: from design to implementation (0.5)
HP432	Mental Health Policy (0.5) #
HP433	Health Care Regulation (0.5)
HP435	Global Access to Medicines (0.5)
HP436	Evidence Appraisal for Health Policy Analysis (0.5)
HP437	Health Equity, Climate Change and the Common Good (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in History of International Relations

Programme Code: TMHYIRS

Department: International History

For students starting this programme of study in 2024/25 Full-year programme. Students take courses to the value of three full units (only one of which can be an outside option i.e. a course not listed below) and a dissertation.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Papers 1, 2 & 3 Courses to the value of 3.0 unit(s) from the following:

EH452	Latin American Development and Economic History (0.5) (not available
-------	--

	2024/25)
EU475	Europe and the Politics of Secularism (0.5)
EU476	Emotions and Memory in European Politics (0.5)
EU4A3	The Americas and Europe (0.5)
HY400	Crisis Decision-Making in War and Peace 1914-2003 (1.0) #
HY411	European Integration in the Twentieth Century (1.0) # (not available 2024/25)
HY422	Presidents, Public Opinion, and Foreign Policy, from Roosevelt to Reagan, 1933-89 (1.0)
HY424	The Napoleonic Empire: The Making of Modern Europe (1.0)

HY483	Land and Conflict in Latin America since 1750 (1.0) (not available 2024/25)
HY486	The Anti-Slave-Trade Atlantic World, c. 1807-1870 (1.0)
HY487	Islam, State and Conflict in Southeast Asia (0.5) (not available 2024/25)
HY488	European Empires and Global Conflict, 1935-1948 (0.5) (not available 2024/25)
HY489	China and the External World, 1644-1839 (0.5)
HY491	Race, Gender and Reproduction in the Caribbean, 1860s-1930s (0.5) (not available 2024/25)
HY4B1	The Vietnam Wars, 1930-75: Regional and International Perspectives (1.0)
HY4B2	The Afterlives of Empires in the Neo-Colonial Caribbean (0.5) (not available 2024/25)
HY4B3A	Citizenship in 20th century political thought: intellectual history in case studies (0.5) 1
HY4B3W	Citizenship in 20th century political thought: intellectual history in case studies (0.5) 2 (not available 2024/25)
HY4B4	Maritime Asia in Transition, 1405-1839 (0.5)
HY4B7	Asian Borderlands (1.0)

Paper 4	HY4B9	China and the United States Since 1949 (1.0)
	HY4C1	Fighting and Enduring the Great War (1.0)
	Or a HY course from another MSc programme run by the Department of International History (subject to approval by the programme director). Or a related course from another department (outside option) (subject to approval by the programme director).	
	HY499	Dissertation (1.0)
Prerequisite Requirements and Mutually Exclusive Options		
# means there may be prerequisites for this course. Please view the course guide for more information.		
1: HY4B3A can not be taken with HY4B3W		
2: HY4B3W can not be taken with HY4B3A		

MSc in Human Geography and Urban Studies (Research)

Programme Code: TMHUGYRE

Department: Geography and Environment

For students starting this programme of study in 2024/25

Full-year programme. Students are required to be examined in elements from the three parts of the programme as specified below to the value of four units. Precise examination arrangements are listed under each course guide.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Paper 1	Part I - Research Core	
	GY403	Contemporary Debates in Human Geography (0.5)
Paper 2	Advanced Research Methods course to the value of 1.0 unit chosen from:	
	GY452	Urban Research Methods (0.5)
	MY400	Fundamentals of Social Science Research Design (0.5)
	MY405	Research Design for Policy and Programme Evaluation (0.5)
	MY421A	Qualitative Research Methods (0.5)
	MY421W	Qualitative Research Methods (0.5)
	MY426	Doing Ethnography (0.5) #
	MY428	Qualitative Text and Discourse Analysis (0.5) #
	MY452A	Applied Regression Analysis (0.5) #
	MY452W	Applied Regression Analysis (0.5) #
	MY455	Multivariate Analysis and Measurement (0.5) #
	MY456	Survey Methodology (0.5) #
	MY457	Causal Inference for Observational and Experimental Studies (0.5) #
	MY459	Quantitative Text Analysis (0.5) #
	MY461	Social Network Analysis (0.5)
	MY465	Intermediate Quantitative Analysis (0.5) #
	MY470	Computer Programming (0.5)
	MY472	Data for Data Scientists (0.5)
Paper 3	Part II - Substantive Specialism	
	Courses to the value of 1.5 unit(s) from the following:	
	GI409	Conceptual Foundations in Gender, Development and Globalization (0.5)
	GI420	Transnational Feminist Development Agendas (0.5)
	GY409	Globalisation and territorial development: Theory, Evidence and Policy (0.5)

GY431	Cities, People and Poverty in the South (0.5) # (not available 2024/25)
GY432	Urban Ethnography (0.5)
GY438	Urban Asia: Cities and Social Change (0.5) (not available 2024/25)
GY439	Cities, Politics and Citizenship (0.5) (not available 2024/25)
GY441	The Politics of Housing (0.5)
GY446	Planning for Sustainable Cities (0.5)
GY447	The Economics of Regional and Urban Planning (0.5) #
GY448	Social and Political Aspects of Planning (0.5)
GY449	Urban Futures (0.5) #
GY459	Urban Theory and Policy in the Global South (0.5)
GY470	Urban Africa (0.5) (not available 2024/25)
GY471	Urban environments and more-than-human cities (0.5) (not available 2024/25)
GY476	Applied Geographical Information Systems (0.5)
GY477	Race and Capitalism in North America (0.5) (not available 2024/25)
GY479	Urban Transformations (0.5)
GY480	Remaking China: Geographical aspects of Development and Disparity (0.5)

Or Another coherent combination of GY and non-GY courses to the value of 1.5 units as approved by the Programme Manager.

Paper 4

Part III

GY487	Dissertation - MSc in Human Geography and Urban Studies (Research) (1.0)
-------	--

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Human Resources and Organisations (Human Resource Management/CIPD)

Programme Code: TMHRORG2

Department: Management

For students starting this programme of study in 2024/25

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)

MSc in International Development and Humanitarian Emergencies

Programme Code: TMINDEHE

Department: International Development

For students starting this programme of study in 2024/25

Full-year programme. Students take courses to the value of three full units and a dissertation as shown.

Students who choose to concentrate their electives and dissertation in a certain topic area may elect to have a specialism in "African Development," or "Population Studies" attached to their degree certificate and transcript. To obtain the specialism indication, students must meet the criteria below.

African Development: This specialism is not available 2024/25.

Population Studies: students must take two courses from DV444, DV456, and MY476 and their dissertation topic must be approved as being appropriate for this specialism.

If no such election is made, the degree certificate will state "International Development and Humanitarian Emergencies" without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	DV442 Key Issues in Development Studies (0.5)
Paper 2	DV428 Managing Humanitarianism (0.5) and DV466 Humanitarian Consultancy Project (0.5)
	Alternatively, with the approval of the Programme Director, students may be permitted to take the following course instead of DV466:
	DV467 Famine, Data skills and Analysis (0.5)
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	DV420 Complex Emergencies (0.5)
	DV455 Advocacy, Campaigning and Grassroots Activism (0.5)
Paper 4	DV462 Forced Migration and Refugees (0.5)
	Courses to the value of 0.5 unit(s) from the following:
	AN436 The Anthropology of Development (0.5)
	DV407 Poverty (0.5)
	DV411 Population, Development and Environment: an Analytical Approach (0.5) (not available 2024/25)
	DV413 Environmental Problems and Development Interventions (0.5) #
	DV415 Global Environmental Governance (0.5) (not available 2024/25)
	DV418 African Development (0.5)

LLM (extended part-time)

Programme Code: TMLL2EPT

Department: Law School

For students starting this programme of study in 2024/25

The general regulations for MA and MSc Degrees and the Code of Practice for Taught Master's Programmes on the online Calendar apply to the LLM programme except in the event of inconsistency when these regulations for the LLM take priority.

In order to obtain the degree, students must complete courses

(see Courses list below) to the value of four full units, which will normally comprise eight half unit courses. One of these eight half units will be the compulsory half unit Legal Research Skills course, which will be assessed by a 10,000 word dissertation. This stand-alone dissertation will provide the element of extended writing for all LLM students. Students will be required to sign a statement on plagiarism when submitting this dissertation.

Students can complete the LLM course requirements in either one full-year programme, or as a part-time student in two years, or by extended part-time study within a maximum of six years. Courses should be chosen from the list below. Subject to availability and with the permission of the Programme Director of the LLM, one complementary course from other Master's courses at the School may be selected to replace one from the list below to the total equivalent of one half unit. Exceptionally, and subject to the same conditions courses to the total value of one full unit may be selected to replace two courses from the list below.

Part-time students must satisfy the same requirements as those applicable to full-time students. Part-time students must take courses to the value of two units in their first year and courses to the value of two units in their second year.

Extended part-time students must satisfy the same requirements as those applicable to full-time students. Students must take courses to the value of one unit in the first year and successfully complete this. Students who successfully complete four units within a period of six years will satisfy the requirements for the degree.

Assessment

Students will be examined in courses to the total value of four full units. Students are required to take a minimum of two full units which are assessed by exam, unless exceptional circumstances apply and an exemption from this regulation is approved by the Programme Director of the LLM.

An oral examination may be held if the examiners so determine. For courses assessed by exam (which will be the norm on the LLM apart from the Legal Research Skills course), the exam will normally be held in January, May or June. Questions may be set on recent legislation and current proposals for law reform within the scope of the syllabus. No materials may be brought into the exam room except in accordance with the regulations for the particular course.

Degree certificate

Students who successfully complete the LLM programme may elect to have one of the following titles attached to their degree certificate if, in the opinion of the Programme Director of the LLM, the title reflects the course of study followed by the student. This would mean you will need to be registered for either:

1. LLM courses to the value of at least 2 units (4 half unit courses) within the nominated specialism; or
2. LLM courses to the value of at least 1.5 units (3 half unit courses) within the nominated specialism plus an LL4F9 dissertation topic within the area of the specialism (as agreed by your dissertation supervisor).

The possible titles are listed below with the courses attached to those areas listed with them. If no such election is made, the LLM degree certificate will state 'LLM' without further specification.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information. This programme, its constituent courses and lectures qualify as Continuing Professional Development (CPD) and are accredited by the Law Society and Bar Council. Further information is available from the Department of Law.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

LLM (full-time)

Programme Code: TMLL2

Department: Law School

For students starting this programme of study in 2024/25 The general regulations for MA and MSc Degrees and the Code of Practice for Taught Master's Programmes on the online Calendar apply to the LLM programme except in the event of inconsistency when these regulations for the LLM take priority.

In order to obtain the degree, students must complete courses (see Courses list below) to the value of four full units, which will normally comprise eight half unit courses. One of these eight half units will be the compulsory half unit Legal Research and Writing Skills course (LL4F9), which will be assessed by a 10,000 word independent research dissertation. This stand-alone dissertation will provide the element of extended writing for all LLM students. Students will be required to sign a statement on LSE's Code of

Practice <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/CodeOfGoodPractice-UGDIPPG.pdf> when submitting when submitting this dissertation.

Students can complete the LLM course requirements in either one year full-time programme ('Full-time'), or as a part-time student in two years ('Part-time'), or by extended part-time study within a maximum of six years ('Extended Part-time'). Please note there are separate regulations for the Extended Part-time programme; students undertaking the LLM in this mode should consult the relevant regulations which can be viewed on the online Calendar. These regulations apply to the Full-time and Part-time LLM programmes only.

Courses should be chosen from the list below. Subject to availability, and to any applicable pre-requisites, students can choose to take up to two half units, or one full unit, from other Master's programmes in the School in place of courses offered by the Law School. The LLM Handbook should be consulted for important advice about course choices and taking courses outside the Law School. and with the permission of the Programme Director of the LLM, one complementary course from other Master's courses at the School may be selected to replace one from the list below to the total equivalent of one half unit. Exceptionally, and subject to the same conditions courses to the total value of one full unit may be selected to replace two courses from the list below.

Part-time students must satisfy the same requirements as those applicable to Full-time students. Part-time students must take courses to the value of two units in their first year and courses to the value of two units in their second year. The compulsory LL4F9 course must be completed in the final year of study.

Assessment

Students will be assessed in courses to the total value of four full units. Students are required to take a minimum of two full units which are assessed by exam. An oral examination may be held if the examiners so determine.

The majority of LLM courses are assessed by exam and these will normally run in the School exam period in May and June. A re-sit assessment period for LLM courses will run in January. The format of assessments will be advised by Course Convenors, and School Exam Procedures will apply.

Further guidance on the LLM programme including information on course selection, assessment and details of applicable School regulations and procedures can be found in the LLM Student Handbook, which is made available to students at the beginning of their programme and online.

Degree certificate

Students who successfully complete the LLM programme may elect to have one of the following specialism titles attached to their degree certificate, if they have followed a course of study reflecting that specialism. If no such election is made, the LLM degree certificate will state 'LLM' without further specification. The following criteria will normally be applied to determine if a student has followed a course of study reflecting a specialism:

1 LLM courses to the value of at least 2 units (4 half unit courses) within the nominated specialism, according to lists of courses and specialisms published for the year of their programme (or for the final year of their programme for Part-time students); or
2 LLM courses to the value of at least 1.5 units (3 half unit courses) within the nominated specialism, according to lists of courses and specialisms published for the year of their programme (or for the final year of their programme for Part-time students), plus an LL4F9 dissertation topic within the area of the specialism (subject to confirmation by the student's dissertation supervisor). The lists of courses by specialism are set out below.

Please note that places are limited on all LLM courses except the compulsory LL4F9 (Legal Research and Writing Skills) course. LLM courses are provided on a controlled access <https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses-basis> and therefore admission onto any particular course except LL4F9 is not guaranteed.

Paper **Course number, title (unit value)**

Paper 1

	2: MY452W can not be taken with MY452A	

Global MSc in Management

Programme Code: TMGLMG2

Department: Management

For students starting this programme of study in 2024/25

A two-year programme. Students take courses to the value of eight units spread evenly over the two years.

The second year includes a dissertation. Students complete the course MG488 GMiM Capstone Course - Management in Action (H) over both years, Part A (unassessed) in Year 1 and Part B (assessed) in Year 2.

All students are required to attend MG4A1 Introduction to Studying for GMiM.

Students may choose to concentrate their electives in a certain topic area and may elect to have one of the elective titles attached to their degree certificate and transcript if the title reflects the course of study followed by the student. The possible titles are listed as headings within the Elective Courses below with the courses attached to those areas listed beneath them. If no such election is made, the degree certificate will state 'Management' without further specification.

Students may apply for an exemption from the following core courses taking place in Year 1: MG431 Managerial Economics, MG4E2 Marketing Management and MG434 Organisational Behaviour. A maximum of two course exemptions may be permitted for each student.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Year 1	Introductory course	
	MG4A1	Introduction to Studying for GMiM (0.0)
Paper 1	MG458	Foundations of Management I: Organisations and Management Theory (0.5) and MG459 Foundations of Management 2 (0.5)
	MG431	Managerial Economics (0.5)
Paper 2	And either one from:	
	MY451A	Introduction to Quantitative Analysis (0.5)
	MY451W	Introduction to Quantitative Analysis (0.5)
	MY465	Intermediate Quantitative Analysis (0.5) #
	or upon satisfactorily demonstrating that they have sufficient statistical knowledge they may take one from the list below or any other suitable quantitative methods course subject to the approval of the programme director:	
	MY452A	Applied Regression Analysis (0.5) #
	MY452W	Applied Regression Analysis (0.5) #
	MY465	Intermediate Quantitative Analysis (0.5) #
	Or	
	Upon satisfactorily demonstrating that they have a degree in economics and have passed, as part of that degree, a course in managerial economics, microeconomics or industrial organisation, students may be exempted from MG431 and will be free to take an elective course, subject to the approval of the Programme Director:	
	Either one from:	
	MY451A	Introduction to Quantitative Analysis (0.5)
	MY451W	Introduction to Quantitative Analysis (0.5)
	MY465	Intermediate Quantitative Analysis (0.5) #
	or upon satisfactorily demonstrating that they have sufficient statistical knowledge they may	

<p>take one from the list below or any other suitable quantitative methods course subject to the approval of the programme director:</p> <p>MY452A Applied Regression Analysis (0.5) # MY452W Applied Regression Analysis (0.5) # MY465 Intermediate Quantitative Analysis (0.5) #</p> <p>and 0.5 units from the Elective Courses listed below:</p> <p>Elective Courses (click here to expand)</p> <p>MG434 Organisational Behaviour and Leadership (0.5) and MG4E2 Marketing Management (0.5)</p> <p>Or</p> <p>Upon satisfactorily demonstrating that they have a degree in marketing, or in management of business administration with a significant concentration in marketing, students may be exempted from MG4E2 and will be free to take an elective course, subject to the approval of the Programme Director. Students must select courses to the value of 1.0 unit(s), which may include MG434 Organisational Behaviour (0.5), and a further 0.5 units from the Elective Courses listed below:</p> <p>MG434 Organisational Behaviour and Leadership (0.5)</p> <p>Elective Courses (click here to expand)</p> <p>Or</p> <p>Upon satisfactorily demonstrating that they have a degree in management of business administration with significant knowledge of organisational behaviour, students may be exempted from MG434 and will be free to take an elective course, subject to the approval of the Programme Director. SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF MSC MANAGEMENT

The following rules set out what marks are required in order to be eligible to proceed into the second year. Students with the following mark profiles progress as follows:

Pass marks in all first year courses allows progression to year two.

A half unit Fail mark or a half unit Bad Fail mark, or a half unit deferral, with at least Pass marks in all other courses will allow progression to year two. One full unit (or two half units) of Fail marks (which could include no more than one half unit Bad Fail mark), or a full unit of deferral, with at least Pass marks in all other courses, including one half unit of Merit marks will allow progression to year two. Two Bad Fail marks (full or half units) will not allow progression to year two.

Three or more (full or half units) Fails, Bad Fail marks or deferrals will not allow progression to year two.

Students must resubmit all failed components of assessments in courses in which they receive a Bad Fail mark in order to be eligible for the award of a degree. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.

Global MSc in Management

Programme Code: TMGLMG2

Department: Management

For students starting this programme of study in 2023/24

A two-year programme. Students take courses to the value of eight units but those units are not necessarily spread over the two years. The second year includes a dissertation. Students complete the course MG488 GMiM Capstone Course - Management in Action (H) over both years, Part A (unassessed) in Year 1 and Part B (assessed) in Year 2.

All students are required to attend MG4A1 Introduction to Studying for GMiM.

Students may choose to concentrate their electives in a certain topic area and may elect to have one of the elective titles attached to their degree certificate and transcript if the title reflects the course of study followed by the student. The possible titles are listed as headings within the Elective Courses below with the courses attached to those areas listed beneath them. If no such election is made, the degree certificate will state 'Management' without further specification.

Students may apply for an exemption from the following core courses taking place in Year 1: MG431 Managerial Economics, MG4E2 Marketing Management and MG434 Organisational Behaviour. A maximum of two course exemptions may be permitted for each student.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Year 1

Introductory course	MG4A1	Introduction to Studying for GMiM (0.0)
Paper 1	MG458	Foundations of Management I: Organisations and Management Theory

Paper 2

(0.5) and MG459 Foundations of Management 2 (0.5)

MG431 Managerial Economics (0.5)

And either one from:

MY451A Introduction to Quantitative Analysis(0.5)

MY451W Introduction to Quantitative Analysis (0.5)

MY465 Intermediate Quantitative Analysis (0.5) #

or upon satisfactorily demonstrating that they have sufficient statistical knowledge they may take one from the list below or any other suitable quantitative methods course subject to the approval of the programme director:

MY452A Applied Regression Analysis (0.5) #

MY452W Applied Regression Analysis (0.5) #

MY465 Intermediate Quantitative Analysis (0.5) #

Or

Upon satisfactorily demonstrating that they have a degree in economics and have passed, as part of that degree, a course in managerial economics, microeconomics or industrial organisation, students may be exempted from MG431 and will be free to take an elective course, subject to the approval of the Programme Director:

Either one from:

MY451A Introduction to Quantitative Analysis (0.5)

MY451W Introduction to Quantitative Analysis (0.5)

MY465 Intermediate Quantitative Analysis (0.5) #

or upon satisfactorily demonstrating that they have sufficient statistical knowledge they may take one from the list below or any other suitable quantitative methods course subject to the approval of the programme director:

MY452A Applied Regression Analysis (0.5) #

MY452W Applied Regression Analysis (0.5) #

MY465 Intermediate Quantitative Analysis (0.5) #

and 0.5 units from the Elective Courses listed below:

Elective Courses (click here to expand)

Paper 3

MG434 Organisational Behaviour and Leadership (0.5) and MG4E2 Marketing Management (0.5)

Or

Upon satisfactorily demonstrating that they have a degree in marketing, or in management of business administration with a significant concentration in marketing, students may be exempted from MG4E2 and will be free to take an elective course, subject to the approval of the Programme Director.

Students must select courses to the value of 1.0 unit(s), which may include MG434 Organisational Behaviour (0.5), and a further 0.5 units from the Elective Courses listed below:

MG434 Organisational Behaviour and Leadership (0.5)

Elective Courses (click here to expand)

Or

Upon satisfactorily demonstrating that they have a degree in management of business administration with significant knowledge of organisational behaviour, students may be exempted from MG434 and will be free to take an elective course, subject to the approval of the Programme Director.

Students must select courses to the value of 1.0 unit(s), which may include MG4E2 Marketing Management (0.5), and a further 0.5 units from the

Programme Code: TMMNST

Department: Management

For students starting this programme of study in 2024/25 Full-year programme. Students must take the four compulsory half-unit courses, optional courses to the value of three half units, and a half-unit dissertation.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may

be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	Four 0.5 unit compulsory courses: MG4A3 Incentives and Governance in Organisations (0.5) # MG4A5 Behavioural Strategy (0.5) MG4A6 Strategic Competitive Analysis (0.5) # MG4B6 Design and Management of Organisations (0.5)
Paper 2	Courses to the value of 1.0 unit(s) from the following: AC444 Valuation and Security Analysis (0.5) # AC470 Accounting in the Global Economy (0.5) # AC490 Management Accounting, Decisions and Control (0.5) AC491 Financial Accounting, Reporting and Disclosure (0.5) FM473A Financial Markets (0.5) # FM473W Financial Markets (0.5) # FM474A Managerial Finance (0.5) FM474W Managerial Finance (0.5) MG402 Public Management: A Design-Oriented Approach (0.5) MG409 Auctions and Game Theory (0.5) # MG430 Firms & Markets in Emerging Economies (0.5) MG452 Behavioural Economics for Management (0.5) # MG473 Negotiation Analysis (0.5) MG4A8 Strategy for the Information Economy (0.5) # MG4B1 Corporate Strategy (0.5) # MG4B3 International Marketing: A Strategic Approach (0.5) MG4B8 Evolutionary Psychology and Management (0.5) MG4B9 The World Trading System (0.5) # (not available 2024/25) MG4G4 Topics in Management Research (0.5) MG4J3 Principles of Pricing (0.5) (not available 2024/25) MG4J6 Brand Strategy (0.5) MY470 Computer Programming (0.5) MY472 Data for Data Scientists (0.5) MY474 Applied Machine Learning for Social Science (0.5) # ST449 Artificial Intelligence (0.5) #
Paper 3	Courses to the value of 0.5 unit(s) from the following: <i>Paper 2 options list</i> Or With the approval of the programme director, a half-unit course not on this list.
Paper 4	MG497 Dissertation: MSc Management and Strategy (0.5) Paper 2 options list AC444 Valuation and Security Analysis (0.5) # AC470 Accounting in the Global Economy (0.5) # AC490 Management Accounting, Decisions and Control (0.5) AC491 Financial Accounting, Reporting and Disclosure (0.5) FM473A Financial Markets (0.5) # FM473W Financial Markets (0.5) # FM474A Managerial Finance (0.5) FM474W Managerial Finance (0.5) MG402 Public Management: A Design-Oriented Approach (0.5) MG409 Auctions and Game Theory (0.5) #

MG430	Firms & Markets in Emerging Economies (0.5)
MG452	Behavioural Economics for Management (0.5) #
MG473	Negotiation Analysis (0.5)
MG4A8	Strategy for the Information Economy (0.5) #
MG4B1	Corporate Strategy (0.5) #
MG4B3	International Marketing: A Strategic Approach (0.5)
MG4B8	Evolutionary Psychology and Management (0.5)
MG4B9	The World Trading System (0.5) # (not available 2024/25)
MG4G4	Topics in Management Research (0.5)
MG4J3	Principles of Pricing (0.5) (not available 2024/25)
MG4J6	Brand Strategy (0.5)
MY470	Computer Programming (0.5)
MY472	Data for Data Scientists (0.5)
MY474	Applied Machine Learning for Social Science (0.5) #
ST449	Artificial Intelligence (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Management of Information Systems and Digital Innovation

Programme Code: TMMISDI

Department: Management

For students starting this programme of study in 2024/25
Full-year programme which is available on a part-time basis.
Students must take four half unit compulsory courses, three half unit optional courses and a dissertation. Students are also required to attend an unassessed skills course: MG496 Study Skills and Research Methods.

Part-time students are required to take taught courses in the Michaelmas and Lent Terms of their two years and the work load will be split across both years (two units per year). The dissertation will be completed in the Summer Term of the second year.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Skills Course	MG496 Study Skills and Contemporary Topics in Information Systems and Digital Innovations (0.0)
Paper 1	MG487 Innovation and Information Systems: Concepts and Perspectives (0.5)
Paper 2	MG481 Innovating Organisational Information Technology (0.5) #
Paper 3	MG472 Management and Socioeconomics of Digital Innovation (0.5) #
Papers 4 & 5	Courses to the value of 1.0 unit(s) from the following: DV483 Information Communication Technologies and Socio-economic Development (0.5) MG460 Emergencies Management: Humanitarian Intervention and Digital Innovation (0.5) (not available 2024/25) MG479 Information Systems for the Public Sector: Digital Government and Service Innovation (0.5) (not available 2024/25) MG483 eHealth: Policy, Strategy and Systems (0.5) #

Paper 6	MG486	Social Computing, Data Analytics, and Information Services (0.5) (not available 2024/25)
	MG492	Data Governance: Privacy, Openness and Transparency (0.5)
	MG4C3	Information Technology and Service Innovation (0.5)
	MG4J8	Managing Artificial Intelligence (0.5)
	MG4J9	Responsible Digital Innovation: Ethics at Work (0.5) (not available 2024/25)
	Either another 0.5 unit course from Papers 4 & 5 above or from the following: A	
	AC490	Management Accounting, Decisions and Control (0.5)
	FM473W	Financial Markets (0.5) #
	FM474W	Managerial Finance (0.5)
	MG401	Operations Management for Management Consultancy (0.5) #
Paper 7	MG402	Public Management: A Design-Oriented Approach (0.5)
	MG418	Open Innovation (0.5)
	MG4B7	Leading Organisational Change (0.5)
	MG4F3	Digital Marketing (0.5) #
	MG4J3	Principles of Pricing (0.5) (not available 2024/25)
	PH425	Business and Organisational Ethics (0.5)
	ST449	Artificial Intelligence (0.5) #
	ST455	Reinforcement Learning (0.5) #
	ST456	Deep Learning (0.5) #
	A course from another programme with permission of the Programme Director by special permission only.	
	<i>Papers 4 & 5 options list</i>	
	MG4D7	Dissertation: MSc MISDI (0.5) and MY401 Research Design for Studies in Digital Innovation (0.5)
	Papers 4 & 5 options list	
	DV483	Information Communication Technologies and Socio-economic Development (0.5)
	MG460	Emergencies Management: Humanitarian Intervention and Digital Innovation (0.5) (not available 2024/25)
	MG479	Information Systems for the Public Sector: Digital Government and Service Innovation (0.5) (not available 2024/25)
	MG483	eHealth: Policy, Strategy and Systems (0.5) #
	MG486	Social Computing, Data Analytics, and Information Services (0.5) (not available 2024/25)
	MG492	Data Governance: Privacy, Openness and Transparency (0.5)
	MG4C3	Information Technology and Service Innovation (0.5)
	MG4J8	Managing Artificial Intelligence (0.5)
	MG4J9	Responsible Digital Innovation: Ethics at Work (0.5) (not available 2024/25)
	Prerequisite Requirements and Mutually Exclusive Options	
	# means there may be prerequisites for this course. Please view the course guide for more information.	
	Footnotes	
	A: Statistics Courses (ST445, ST449 and ST456) may require some mathematics, in particular use of vectors and some calculus and a basic knowledge of computer programming is expected.	

MSc in Marketing

Programme Code: TMMK

Department: Management

For students starting this programme of study in 2024/25 Full-year programme. Students must take four compulsory courses and options to the value of two units as shown below. Students must also complete the introductory course MG4E7 Business Fundamentals.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Introductory		
Course	MG4E7	Business Fundamentals (0.0)
Paper 1	MG4E8	Principles of Marketing (0.5) # and MG4E9 Marketing Analytics I: Consumer Analysis Fundamentals (0.5)
Paper 2	MG404	Consumer Insights: Behavioural Fundamentals (0.5) and MG4F1 Marketing Action Learning Project (0.5) #
Paper 3	Courses to the value of 1.0 unit(s) from the following:	
	MG403	Pricing Strategy (0.5)
	MG4F2	Marketing Analytics II: Analytics for Managing Innovations, Products and Brands (0.5)
	MG4F3	Digital Marketing (0.5) #
	MG4J6	Brand Strategy (0.5)
	MG4J7	Consumer Neuroscience (0.5)
Paper 4	Courses to the value of 1.0 unit(s) from the following, subject to timetable constraints:	
	MA429	Algorithmic Techniques in Machine Learning (0.5) #
	MC402	The Audience in Media and Communications (0.5) #
	MC403	Contemporary Issues in Media and Communications Policy (0.5) #
	MG403	Pricing Strategy (0.5)
	MG430	Firms & Markets in Emerging Economies (0.5)
	MG455	Decisions, Biases and Nudges (0.5) #
	MG456	Group & Team Decision-Making Processes (0.5) #
	MG4A3	Incentives and Governance in Organisations (0.5) #
	MG4C2	Organisational Behaviour (0.5)
	MG4D5	Leadership in Organisations: Theory and Practice (0.5)
	MG4F2	Marketing Analytics II: Analytics for Managing Innovations, Products and Brands (0.5)
	MG4F3	Digital Marketing (0.5) #
	MG4J6	Brand Strategy (0.5)
	MG4J7	Consumer Neuroscience (0.5)
	MY405	Research Design for Policy and Programme Evaluation (0.5)
	MY421A	Qualitative Research Methods (0.5)
	MY421W	Qualitative Research Methods (0.5)
	MY426	Doing Ethnography (0.5) #
	MY455	Multivariate Analysis and Measurement (0.5) #
	MY456	Survey Methodology (0.5) #
	PB419	Creativity and Innovation (0.5) # (withdrawn 2024/25)
	ST405	Multivariate Methods (0.5) #
	ST411	Generalised Linear Modelling and Survival Analysis (0.5) #
	ST418	Advanced Time Series Analysis (0.5) #
	Or any other MSc-level elective course which is offered in the School, subject to approval of the	

Course Leader and the Programme Director.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Media, Communication and Development

Programme Code: TMMECODE

Department: Media and Communications

For students starting this programme of study in 2024/25

Full year programme. Students must take courses to the value of three full units and a dissertation as shown below.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	MC408 Theories and Concepts in Media and Communications (0.5) #
	And one of the following 0.5 unit courses:
	MC4M1 Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (0.5) <i>or</i>
	MC4M7 Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis) (0.5) #A
Paper 2	MC421 Critical Approaches to Media, Communication and Development (0.5)
Paper 3	Courses to the value of 1.5 unit(s) from the following:
	DV424 International Institutions and Late Development (0.5)
	DV483 Information Communication Technologies and Socio-economic Development (0.5)
	GI425 Introduction to Gender, Peace and Security (0.5)
	MC407 International Media and The Global South (0.5) #
	MC409 Media, Technology and Everyday Life (0.5) #
	MC420 Identity, Transnationalism and the Media (0.5) # (not available 2024/25)
	MC423 Global Media Industries (0.5) #
	MC426 Film Theory and World Cinema (0.5) #
	MC428 Media Culture and Neoliberalism in the Global South (0.5) #
	MC429 Humanitarian Communication: Realities, Challenges and Critiques (0.5) #
	MC433 Technology and Justice (0.5) # (not available 2024/25)
	MC436 Mediating the Past (0.5) #
	MC438 Mediated Feminisms (0.5) #
	MC439 Media, Technology, and the Body (0.5) # (not available 2024/25)
	MC440 Children, Youth and Media (0.5) #
	MY423 Interview Methods for Social Science Research (0.5) #
	PB422 Health Communication (0.5) (withdrawn 2024/25)
	Any other MSc level course which is offered in the School, subject to the consent of the candidate's programme director.
Paper 4	MC499 Dissertation: Media and Communications (1.0) B
	Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Footnotes

A: MY452 is an advanced Applied Regression Analysis course offered by the Department of Methodology and must be taken by students who select MC4M7. Students wishing to select this option need to already have a grounding in quantitative methods and must seek approval from the Programme Director. Approval is also subject to timetabling constraints.

B: Passing this course is a requirement for passing the programme.

Subject to agreement with the Programme Director, students can take up to one full unit of courses outside the Department of Media and Communications Department (non MC-prefixed courses).

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Media and Communications

Programme Code: TMMEC

Department: Media and Communications

For students starting this programme of study in 2024/25

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown below.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	MC408 Theories and Concepts in Media and Communications (0.5) # <i>and</i> MC418 Communication: Cultures and Approaches (0.5) #
Paper 2	One of the following 0.5 unit courses:
	MC4M1 Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (0.5) <i>or</i>
	MC4M7 Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis) (0.5) #A

- 2: HY4B3W can not be taken with HY4B3A
- 3: HY4B3A can not be taken with HY4B3W
- 4: HY4B3W can not be taken with HY4B3A

MSc in Operations Research & Analytics**Programme Code:** TMORA**Department:** Mathematics

For students starting this programme of study in 2024/25 Full-year programme. As below, students must take three compulsory courses (Papers 1-3, 1.5 units in all), options to the value of 1.5 units (Papers 4-6), and a project or dissertation (Paper 7, 1 unit).

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements and course size capping.

Paper	Course number, title (unit value)
Paper 1	MA423 Fundamentals of Operations Research (0.5) #
Paper 2	MA424 Modelling in Operations Research (0.5) #

524 Taught Master's Programme Regulations

Paper 3	ST447	Data Analysis and Statistical Methods (0.5) #
Papers 4 & 5	Courses to the value of 1.0 unit(s) from the following:	
	MA402	Mathematical Game Theory (0.5) #
	MA407	Algorithms and Computation (0.5) #
	MA421	Topics in Algorithms (0.5) #
	MA427	Mathematical Optimisation (0.5) #
	MA428	Combinatorial Optimisation (0.5) #
	MA429	Algorithmic Techniques in Machine Learning (0.5) #
	MA434	Algorithmic Game Theory (0.5) # (not available 2024/25)
	Students may take at most one of MA407 and MA421 under Papers 4 & 5, but may take the other under Paper 6.	
Paper 6	Courses to the value of 0.5 unit(s) from the following:	
	Another course from those listed under Papers 4 & 5.	
	FM445	Portfolio Management (0.5)
	MA431	Advanced Topics in Operations Research and Applicable Mathematics (0.5) # (not available 2024/25)
	MA433	Mathematics of Networks (0.5) #
	MG422	Thinking Strategically (0.5) # (not available 2024/25)
	MG455	Decisions, Biases and Nudges (0.5) #
	ST418	Advanced Time Series Analysis (0.5) #
	ST449	Artificial Intelligence (0.5) #
	ST455	Reinforcement Learning (0.5) #
	ST456	Deep Learning (0.5) #
	ST457	Graph Data Analytics and Representation Learning (0.5) #
	ST459	Quantum Computation and Information (0.5) #
	ST463	Stochastic Simulation, Training, and Calibration (0.5) #
	<i>Papers 4 & 5 options list</i>	
	Or	
	Courses to the value of 0.5 unit(s) from the following:	
	Any other MSc-level course, with approval of the Programme Director and the teacher responsible for the course.	
Paper 7	MA425	Project in Operations Research & Analytics (1.0) # or
	MA426	Dissertation in Operations Research & Analytics (1.0)
	Papers 4 & 5 options list	
	MA402	Mathematical Game Theory (0.5) #
	MA407	Algorithms and Computation (0.5) #
	MA421	Topics in Algorithms (0.5) #
	MA427	Mathematical Optimisation (0.5) #
	MA428	Combinatorial Optimisation (0.5) #
	MA429	Algorithmic Techniques in Machine Learning (0.5) #
	MA434	Algorithmic Game Theory (0.5) # (not available 2024/25)
	Prerequisite Requirements and Mutually Exclusive Options	
	# means there may be prerequisites for this course. Please view the course guide for more information. Students may choose at most one of: MA402, MA434, MG422.	
	Upon supplying satisfactory evidence to the course convenor of relevant previous courses taken, a student may be exempted from a course specified in Paper 1, 2, or 3, at the discretion of the Programme Director. A student shall replace such a course with another module, subject to approval of the Programme Director. Exemption from more	

than one course is rare.

Please note that not all optional courses are available every year.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Organisational and Social Psychology

Programme Code: TMOSOPS

Department: Psychological and Behavioural Science

For students starting this programme of study in 2024/25 Full-year programme. Students must take two compulsory courses, optional courses to the value of one unit and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	PB402 Organisational Social Psychology (1.0)
Paper 2	Students may opt to take PB414 instead of PB411 where they can demonstrate prior experience of quantitative techniques up to and including the topics covered in MY465:
	PB411 Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0) or
	PB414 Advanced Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	GI403 Gender and Media Representation (0.5)
	PB417 Consumer Psychology for Sustainability (0.5)
	PB418 Corporate Communications (0.5)
	PB419 Creativity and Innovation (0.5) # (withdrawn 2024/25)
	PB421 Happiness (0.5)
	PB424 Organisational Life (0.5) (not available 2024/25)
	PB425 Organisations, Groups and Identity (0.5) #
	PB427 Organisational and Social Decision Making (0.5)
	PB428 Political Psychology: Inequality & Intergroup Relations (0.5)
	PB429 Science, Innovations and the Human Future (0.5) (not available 2024/25)
	PB430 Social Influence Modes and Modalities (0.5) # (not available 2024/25)
	PB431 Social Psychology of Economic Life: Advanced Topics (0.5)
	PB432 Social Representations: Social Knowledge and Contemporary Issues (0.5)
	PB433 Theory and Practice of Organisational Development (0.5)
	PB434 Behavioural Science in an Age of AI and New Technology (0.5)
	PB435 Behavioural Science for Planetary

	PB436	Wellbeing (0.5) (not available 2024/25)
	PB437	The Science of Time at Work (0.5)
	PB438	Conversation Analysis and the Science of Social Interaction (0.5) (not available 2024/25)
	PB438	Crossing Borders: The Moral Psychology of Intergroup Cooperation and Conflict (0.5)
	PB452	Behavioural Science for Health and Pandemic Responses (0.5) # (not available 2024/25)
	PB457	Organisational Culture (0.5)
	PB458	Dialogue: Conflict & Negotiation (0.5)
	Courses to the value of 0.5 unit(s) from another programme can be taken (subject to the approval of the candidate's Programme Director).	
Paper 4	PB410	Dissertation (1.0) A
	Prerequisite Requirements and Mutually Exclusive Options	
	# means there may be prerequisites for this course. Please view the course guide for more information.	
	Footnotes	
	A: Failures in this course cannot be condoned. A bad fail is defined as a mark less than 29%.	

MSc in Philosophy and Public Policy

Programme Code: TMPHPP

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2024/25 Full-year programme. Students must take two compulsory courses, one unit of optional courses, one compulsory seminar (non-assessed) and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Paper 1	PH415	Philosophy and Public Policy (1.0)
Paper 2	PH416	Philosophy, Morals and Politics (1.0)
	Or	
	PH458	Evidence and Policy (0.5)
	and another half-unit (0.5) from the courses listed under Paper 3:	
	<i>Paper 3 options list</i>	
Paper 3	Courses to the value of 1.0 unit(s) from the following:	
	PH400	Philosophy of Science (1.0)
	PH416	Philosophy, Morals and Politics (1.0)
	PH425	Business and Organisational Ethics (0.5)
	PH426	Philosophy of Society (0.5)
	PH430	Einstein for Everyone: From time travel to the edge of the universe (0.5) #
	PH431	Physics and Uncertainty: From Quantum Jumps to Stock Market Crashes (0.5) #
	PH433	Philosophy of Gender and Race (0.5)
	PH434	Philosophy of Economics: Methodology and Foundations of Economics (0.5) #
	PH435	Philosophy of Economics: Ethics and Economics (0.5) #
	PH439	Anarchy, Authority and Evidence: Topics in Philosophy of Law (0.5)
	PH440	The Ethics of Data and AI (0.5)
	PH441	Animal Minds and Animal Ethics (0.5)
	PH456	Rationality and Choice (1.0) #
	PH458	Evidence and Policy (0.5)
	Alternatively, students can choose courses to the value of 1.0 unit from the wide array of policy courses at LSE on a space-available basis.	
Paper 4	PH499	Dissertation (1.0)

Students must also take the following non-assessed seminar:

PH421 Dissertation Seminar - Philosophy and Public Policy (0.0)

Paper 3 options list

PH400	sPhilosophy of Science (1.0)
PH416	Philosophy, Morals and Politics (1.0)
PH425	Business and Organisational Ethics (0.5)
PH426	Philosophy of Society (0.5)
PH430	Einstein for Everyone: From time travel to the edge of the universe (0.5) #
PH431	Physics and Uncertainty: From Quantum Jumps to Stock Market Crashes (0.5) #
PH433	Philosophy of Gender and Race (0.5)
PH434	Philosophy of Economics: Methodology and Foundations of Economics (0.5) #
PH435	Philosophy of Economics: Ethics and Economics (0.5) #
PH439	Anarchy, Authority and Evidence: Topics in Philosophy of Law (0.5)
PH440	The Ethics of Data and AI (0.5)
PH441	Animal Minds and Animal Ethics (0.5)
PH456	Rationality and Choice (1.0) #
PH458	Evidence and Policy (0.5)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

MSc in Philosophy of Science

Programme Code: TMPHYS

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2024/25 Full-year programme. Students must take courses to the value of 3.0 units and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Paper 1	PH400	Philosophy of Science (1.0)
Papers 2 & 3	Courses to the value of 2.0 unit(s) from the following:	
	PH416	Philosophy, Morals and Politics (1.0)
	PH425	Business and Organisational Ethics (0.5)
	PH426	Philosophy of Society (0.5)
	PH430	Einstein for Everyone: From time travel to the edge of the universe (0.5) #
	PH431	Physics and Uncertainty: From Quantum Jumps to Stock Market Crashes (0.5) #
	PH433	Philosophy of Gender and Race (0.5)
	PH434	Philosophy of Economics: Methodology and Foundations of Economics (0.5) #
	PH435	Philosophy of Economics: Ethics and Economics (0.5) #
	PH436	Set Theory (0.5) #
	PH437	Advanced Logic (0.5) #
	PH439	Anarchy, Authority and Evidence: Topics in Philosophy of Law (0.5)
	PH440	The Ethics of Data and AI (0.5)
	PH441	Animal Minds and Animal Ethics (0.5)
	PH456	Rationality and Choice (1.0) #
	PH458	Evidence and Policy (0.5)
	Students may take up to 1.0 unit of non-PH courses not listed above, subject to approval.	
Paper 4	PH499	Dissertation (1.0)
	Students must also take the following non-assessed seminar:	
	PH445	Dissertation Seminar - Philosophy of

	Science (0.0) #
Papers 2 & 3 options list	
PH416	Philosophy, Morals and Politics (1.0)
PH425	Business and Organisational Ethics (0.5)
PH426	Philosophy of Society (0.5)
PH430	Einstein for Everyone: From time travel to the edge of the universe (0.5) #
PH431	Physics and Uncertainty: From Quantum Jumps to Stock Market Crashes (0.5) #
PH433	Philosophy of Gender and Race (0.5)
PH434	Philosophy of Economics: Methodology and Foundations of Economics (0.5) #
PH435	Philosophy of Economics: Ethics and Economics (0.5) #
PH436	Set Theory (0.5) #
PH437	Advanced Logic (0.5) #
PH439	Anarchy, Authority and Evidence: Topics in Philosophy of Law (0.5)
PH440	The Ethics of Data and AI (0.5)
PH441	Animal Minds and Animal Ethics (0.5)
PH456	Rationality and Choice (1.0) #
PH458	Evidence and Policy (0.5)
Prerequisite Requirements and Mutually Exclusive Options	
# means there may be prerequisites for this course. Please view the course guide for more information.	

MSc in Philosophy of Economics and the Social Sciences

Programme Code: TMPHESS	
Department: Philosophy, Logic and Scientific Method	
For students starting this programme of study in 2024/25	
Please note that places are limited on some optional courses.	
Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.	
Paper	Course number, title (unit value)
Year 1	
Paper 1	Courses to the value of at least 0.5 unit(s) from: Philosophy of Economics
	EH429 History of Economics: Ideas, Policy and Performativity (0.5)
	PH425 Business and Organisational Ethics (0.5)
	PH431 Physics and Uncertainty: From Quantum Jumps to Stock Market Crashes (0.5) #
	PH434 Philosophy of Economics: Methodology and Foundations of Economics (0.5) #
	PH435 Philosophy of Economics: Ethics and Economics (0.5) #
	PH456 Rationality and Choice (1.0) #
Paper 2	Courses to the value of at least 0.5 unit(s) from: Philosophy of the Social Sciences
	PH426 Philosophy of Society (0.5)
	PH433 Philosophy of Gender and Race (0.5)
	PH440 The Ethics of Data and AI (0.5)
Paper 3	Courses up to the value of 2.0 unit(s) from:
	PH400 Philosophy of Science (1.0)
	PH416 Philosophy, Morals and Politics (1.0)
	PH430 Einstein for Everyone: From time travel to the edge of the universe (0.5) #
	PH436 Set Theory (0.5) #
	PH437 Advanced Logic (0.5) #
	PH439 Anarchy, Authority and Evidence: Topics in Philosophy of Law (0.5)
	PH441 Animal Minds and Animal Ethics (0.5)
	PH458 Evidence and Policy (0.5)
Subject to approval, students may take up to one unit of non-PH courses not listed above. This would be instead of EH429 and not in addition to this	

	course.
Paper 4	PH499 Dissertation (1.0)
Students must also take the following non-assessed seminar:	
	PH422 Dissertation Seminar - Philosophy of Economics and the Social Sciences (0.0)
Prerequisite Requirements and Mutually Exclusive Options	
# means there may be prerequisites for this course. Please view the course guide for more information.	

MSc in Political Economy of Europe

Programme Code: TMPOECEU	
Department: European Institute	
For students starting this programme of study in 2024/25	
Full-year programme. Students must take two out of three semi-compulsory courses, optional courses to the value of two units (at least one unit of courses listed under Paper 2) and a dissertation as shown. Additionally, all students must take EU470 'How do we know? An introduction to research design and methods in political economy' in preparation for the dissertation. Students must also select EU450 Engaging with Europe: Professional Skills during course choice. Places on EU450 workshops are on a first come first served basis.	
Please note that places are limited on some optional courses.	
Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.	
Paper	Course number, title (unit value)
Professional development course	EU450 Engaging with Europe: Professional Skills (0.0)
Paper 1	Courses to the value of 1.0 unit(s) from the following:
	EU455 Concepts in Political Economy (0.5)
	EU491 Political Economy in Theory and History (0.5)
	EU492 Political Economy of Integration and Fragmentation in Europe (0.5)
Paper 2	Courses to the value of 1.0 unit from the following:
	Political Economy in Action:
	EU443 European Models of Capitalism (0.5)
	EU446 The Political Economy of European Monetary Integration (0.5) #
	EU453 The Political Economy of Welfare States and Migration in Europe (0.5)
	EU455 Concepts in Political Economy (0.5)
	EU469 The Political Economy of Finance in Europe (0.5) #
	EU477 Labour Markets and the Political Economy of Employment in Europe (0.5) #
	EU482 Europe in World Trade (0.5)
	EU491 Political Economy in Theory and History (0.5)
	EU492 Political Economy of Integration and Fragmentation in Europe (0.5)
	EU4A4 The Politics of Inequality and Redistribution (0.5)
	EU4A7 Political Economy of the Green Transition in Europe (0.5)
Paper 3	Courses to the value of 1.0 unit from the following:
	Politics and Policy:
	EU421 Policy-Making in the European Union (0.5) #
	EU430 Europeanization: The Comparative Politics of Domestic Change (0.5) (not available 2024/25)
	EU440 The Balkans in Europe: Transition,

	MC440 Children, Youth and Media (0.5) #
	Any other MSc-level course which is offered in the School, subject to the consent of the candidate's

Paper 4	programme convenor. MC499 Dissertation: Media and Communications (1.0) B
Prerequisite Requirements and Mutually Exclusive Options	
# means there may be prerequisites for this course. Please view the course guide for more information.	
Footnotes	
A: MY452 is an advanced Applied Regression Analysis course offered by the Department of Methodology and must be taken by students who select MC4M7. Students wishing to select this option need to already have a grounding in quantitative methods and must seek approval from the Programme Director. Approval is also subject to timetabling constraints.	
B: 10,000-12,000 words. Passing this course is a requirement for passing the programme. Students can take no more than one full unit of courses from outside the Department of Media and Communications (non-MC-prefixed courses).	
Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm . Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm .	

MSc in Psychology of Economic Life

Programme Code: TMPSECL

Department: Psychological and Behavioural Science

For students starting this programme of study in 2024/25 Full-year programme. Students are required to take two compulsory courses, optional courses to the value of one unit and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	PB403 Psychology of Economic Life (1.0)
Paper 2	Students may opt to take PB414 instead of PB411 where they can demonstrate prior experience on quantitative techniques up to and including the topics covered in MY465
	PB411 Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0) or
	PB414 Advanced Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	PB417 Consumer Psychology for Sustainability (0.5)
	PB418 Corporate Communications (0.5)
	PB419 Creativity and Innovation (0.5) # (withdrawn 2024/25)
	PB421 Happiness (0.5)
	PB424 Organisational Life (0.5) (not available 2024/25)
	PB425 Organisations, Groups and Identity (0.5) #

PB427	Organisational and Social Decision Making (0.5)
PB428	Political Psychology: Inequality & Intergroup Relations (0.5)
PB429	Science, Innovations and the Human Future (0.5) (not available 2024/25)

PB457	Organisational Culture (0.5)
PB458	Dialogue: Conflict & Negotiation (0.5)
A course from another programme (subject to the approval of the Candidate's Programme Director)	
PB410	Dissertation (1.0) A

Paper 4

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Footnotes

A: Failures in this course cannot be condoned. A bad fail is defined as a mark less than 29%.

Master of Public Administration

Programme Code: TMMPA

Department: School of Public Policy

For students starting this programme of study in 2024/25

The programme is taught over two academic years (21 months).

To be awarded the degree, students must complete courses to the value of 8.0 units in total over two years with 4.0 units in each year of study. Some courses have a unit value of 1.0 and some have a unit value of 0.5 indicated as (H).

No interim award is available: students completing courses with a total value of less than 8.0 units receive no award, regardless of performance in the courses that have been successfully completed.

Students who successfully complete courses to the value of 8.0 units may elect to have one of the titles below referenced on their degree certificate if the student has passed the courses attached to that specialism. The available specialisms are listed below with the courses attached to each specialism listed with them. If no such election is made, or if a student does not pass all of the courses listed under a specialism, the MPA degree certificate will state 'MPA' without further specification. Students may take courses from other specialisms as option courses.

Students can apply to spend their second year at one of the LSE MPA Partner Institutions. If offered a place and upon successful completion of year one, the student will transfer onto the Dual MPA Programme. Students who transfer to the Dual MPA will not be eligible to elect a specialism to be added to their degree certificate.

Paper	Course number, title (unit value)
Introductory course	<p>Before Year 1</p> <p>All students must attend the following MPA introductory course:</p> <p>PP408 MPA Introductory Course (0.0)</p>
Year 1	
Paper 1	<p>PP440 Micro and Macro Economics (for Public Policy) (1.0)</p> <p>Or</p> <p>Upon satisfactorily demonstrating prior knowledge of Micro and Macro Economics, students may be exempted from PP440 and will be free to take an additional unit of option course subject to the approval of the Programme Director.</p>
Paper 2	<p>PP455 Quantitative Approaches and Policy Analysis (1.0)</p> <p>Or</p> <p>PP456 Quantitative Approaches and Policy Analysis (0.5)</p> <p>and an additional 0.5 unit option course - for students who demonstrate sufficient prior knowledge of Econometrics to be exempt from the first half of PP455</p> <p>Or</p> <p>PP419 Advanced Empirical Methods for Policy Analysis (0.5) #</p> <p>and an additional 0.5 unit option course - for students who demonstrate sufficient prior knowledge of Econometrics to be exempt from PP455 in its entirety</p>

Papers 7 & 8	<p>Students take courses to the value of 2.5 units from the MPA Course List (see below):</p> <p><i>MPA Course List</i></p> <p>Prerequisite Requirements and Mutually Exclusive Options</p> <p># means there may be prerequisites for this course. Please view the course guide for more information.</p> <p>1: PP417W can not be taken with PP417A</p> <p>2: PP4B4 can not be taken with PP4V8</p> <p>3: PP4V8 can not be taken with PP4B4</p> <p>Footnotes</p> <p>A: Designed for Year 2 students; only available in Year 1 with permission from the Programme Director.</p> <p>B: Designed for Year 2 students; only available in Year 1 with permission from the Programme Director.</p> <p>C: Not available in Year 1.</p> <p>D: Not available in Year 1.</p> <p>E: Designed for Year 2 students; only available in Year 1 with permission from the Programme Director.</p> <p>F: Not available in Year 1.</p> <p>G: Not available in Year 1.</p> <p>H: Not available in Year 1.</p> <p>I: Not available in Year 1.</p> <p>SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF THE MPA AND DUAL MPA DEGREE</p> <ul style="list-style-type: none"> Students who attain at least a Pass grade in each of the first year courses will be eligible to proceed

into the second year of the MPA or Dual MPA programme.

- A student on the MPA programme who has attained a Fail grade in courses to the value of 1.0 unit and at least a Pass grade in the remaining courses to the value of 3.0 units will be eligible to proceed into the second year.
- A student holding an offer on the Dual MPA for their second year, who has attained a Fail grade in courses to the value of 1.0 unit, may only progress if a mark of at least 60% has been achieved in courses of an equivalent value or an aggregate mark of at least 330 has been achieved in the non-failed courses.
- A student who receives a Bad Fail in any course or who otherwise fails to meet the above criteria for progression will not be able to progress to the second year of the MPA or Dual MPA programme and will be entitled to repeat the failed courses as follows:

A student shall normally be entitled to repeat any failed courses only (on one occasion) and at the next normal opportunity, in accordance with the General Academic Regulations. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.

- A student who has completed year one and is unable to complete year two of the MPA or Dual MPA programme will not receive an interim award.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

Master of Public Administration

Programme Code: TMMPA

Year 2		
Paper 5	PP4B5	Capstone Project: MPA - Data Science for Public Policy (1.0)
Paper 6	PP415	Technology, Data Science and Policy (0.5) #
Paper 7	1.0 or 1.5 unit(s) from Public Policy:	
	PP406	Philosophy for Public Policy (0.5)
	PP410	Public Economics for Public Policy (0.5) #
	PP411W	Political Economy Applications for Public Policy (0.5) #
	PP413	Growth Diagnostics in Development: Theory and Practice (0.5) #
	PP414	Policy-Making: Process, Challenges and Outcomes (0.5)
	PP417A	The Practice of Effective Climate Policy (0.5)
	PP417W	The Practice of Effective Climate Policy (0.5)
	PP418	Globalisation and Economic Policy (0.5) #
	PP419	Advanced Empirical Methods for Policy Analysis (0.5) #
	PP423	Anticipatory Policymaking (0.5)
	PP424	Happiness and Public Policy (0.5)
	PP426	Public Policy for Blockchains and Digital Assets (0.5) #
	PP431	Reimagining Capitalism (0.5)
	PP432	International Organisations, Policymaking and Diplomacy in a contested world (0.5)
	PP433	Topics in Model Based Quantitative Analysis for Public Policy (0.5) #
	PP434	Automated Data Visualisation for Policymaking (0.5)
	PP435	Trade Policy and Development (0.5) #
	PP448	International Political Economy and Development (0.5)
	PP449	Comparative Political Economy and Development (0.5)
	PP452	Applying Behavioural Economics for Social Impact: Design, Delivery, Evaluation and Policy (0.5) #
	PP454	Development Economics (1.0) #
	PP465	City-Making: the Politics of Urban Form (0.5)
	PP4E5	Innovations in the governance of public services delivery (0.5)
	PP4G3	Designing and Managing Change in the Public Sector (0.5)
	PP4J2	New Institutions of Public Policy: Strategic Philanthropy, Impact Investment and Social Enterprise (0.5)
Paper 8	1.0 or 1.5 unit(s) from Data Sciences: A	
	GY460	Techniques of Spatial Economic Analysis (0.5) #
	HP434	Methods and Data for Health Systems

	Performance Assessment (0.5)
MA402	Mathematical Game Theory (0.5) #
MA407	Algorithms and Computation (0.5) #*
MA423	Fundamentals of Operations Research (0.5) #*
MY459	Quantitative Text Analysis (0.5) #B
MY461	Social Network Analysis (0.5)
MY474	Applied Machine Learning for Social Science (0.5) #
MY475	Applied Deep Learning for Social Science (0.5) #
ST416	Multilevel Modelling (0.5) #* (not available 2024/25)
ST442	Longitudinal Data Analysis (0.5) #*
ST443	Machine Learning and Data Mining (0.5) #*
ST446	Distributed Computing for Big Data (0.5) #*
ST449	Artificial Intelligence (0.5) #*
ST454	Bayesian Data Analysis (0.5) #*
ST455	Reinforcement Learning (0.5) #*
ST456	Deep Learning (0.5) #*
MY472	Data for Data Scientists (0.5) 2 or
ST445	Managing and Visualising Data (0.5) #3*

In addition, students may choose courses from elsewhere in LSE not listed in these regulations with approval of the Programme Director and subject to acceptance by the course convenor. Availability of a place on a course outside the School of Public Policy and not listed in these regulations is not guaranteed and is subject to space, regulations, and timetable constraints

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

1: PP456 can not be taken with PP455

2: MY472 can not be taken with ST445

3: ST445 can not be taken with MY472

Footnotes

A: MY459, MY461 and ST454 require knowledge of R

B: MY459: if instructor accepts a year of Econometrics and Data Science for Public Policy as pre-requisites.

SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF THE MPA in Data Science for Public Policy

• Students who attain at least a Pass grade in each of the first-year courses will be eligible to proceed into the second-year of the MPA in Data Science for Public Policy.

• A student on the MPA in Data Science for Public Policy programme who has attained a Fail grade in courses to the value of 1.0 unit and at least a Pass grade in the remaining courses to the value of 3.0 units will be eligible to proceed into the second year.

• A student who receives a Bad Fail in any course or who otherwise fails to meet the above criteria for progression will not be able to progress to the second year of the MPA in Data Science for Public Policy programme and will be entitled to repeat the failed courses as follows:

A student shall normally be entitled to repeat any failed courses only (on one occasion) and at the next normal opportunity, in accordance with paragraph 33 of the General Academic Regulations. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a

repeated attempt at assessment shall bear their normal value.

A student who has completed year one and is unable to complete year two of the MPA in Data Science for Public Policy programme will not receive an interim award.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Public Policy and Administration

Programme Code: TMPPA

Department: Government

For students starting this programme of study in 2024/25

Full-year programme. Students must take courses to the value of 2.5 units and a skills course and dissertation as shown. Part-time students may take courses up to the value of two full course units in their first year. Candidates may, subject to the approval of their supervisor, substitute for up to two of the written papers listed under Paper 3 below, any paper which is offered in the MSc, LLM or MA which involves at least 20 weeks of an integrated teaching programme and which counts as one quarter (or one full unit) of the complete MSc programme in which it is offered.

By choosing particular combinations of core courses, students can choose to have the title of a specialised stream added to the title of their degree:

MSc Public Policy and Administration (Comparative); or

MSc Public Policy and Administration (Public Management).

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)																		
Paper 1	GV4E9 Approaches and Issues in Public Policy and Administration (1.0)																		
Paper 2	Courses to the value of 0.5 unit(s) from the following: <table> <tr><td>GV477</td><td>Comparative Public Policy Change (0.5) #</td></tr> <tr><td>GV483</td><td>Public Management Theory and Doctrine (0.5)</td></tr> <tr><td>GV4F4</td><td>Policy Advice in Theory and Practice (0.5)</td></tr> </table>	GV477	Comparative Public Policy Change (0.5) #	GV483	Public Management Theory and Doctrine (0.5)	GV4F4	Policy Advice in Theory and Practice (0.5)												
GV477	Comparative Public Policy Change (0.5) #																		
GV483	Public Management Theory and Doctrine (0.5)																		
GV4F4	Policy Advice in Theory and Practice (0.5)																		
Paper 3	Courses to the value of 1.0 unit(s) from the following: <p>Public Management: A</p> <table> <tr><td>AC412</td><td>Accountability, Organisations and Risk Management (0.5)</td></tr> <tr><td>DV413</td><td>Environmental Problems and Development Interventions (0.5) #</td></tr> <tr><td>DV415</td><td>Global Environmental Governance (0.5) (not available 2024/25)</td></tr> <tr><td>GV483</td><td>Public Management Theory and Doctrine (0.5)</td></tr> <tr><td>GV4A2</td><td>Citizens' Political Behaviour: Elections, Public Opinion and Identities (0.5) #</td></tr> <tr><td>GV4C8</td><td>Game Theory for Political Science (0.5)</td></tr> <tr><td>GV4K1</td><td>Participatory Governance (0.5)</td></tr> <tr><td>GV4L2</td><td>The Politics and Policy of Climate Change and Sustainability (0.5) #</td></tr> <tr><td>LL4AT</td><td>Regulation: Strategies and Enforcement</td></tr> </table>	AC412	Accountability, Organisations and Risk Management (0.5)	DV413	Environmental Problems and Development Interventions (0.5) #	DV415	Global Environmental Governance (0.5) (not available 2024/25)	GV483	Public Management Theory and Doctrine (0.5)	GV4A2	Citizens' Political Behaviour: Elections, Public Opinion and Identities (0.5) #	GV4C8	Game Theory for Political Science (0.5)	GV4K1	Participatory Governance (0.5)	GV4L2	The Politics and Policy of Climate Change and Sustainability (0.5) #	LL4AT	Regulation: Strategies and Enforcement

GV4L7	Political Participation and Representation in Latin America (0.5) (not available 2024/25)
GY413	Regional Development and Policy (0.5) #
SP434	Behavioural Public Policy (0.5)
SP441	Politics of Social Policy (0.5)
SP473	Policing, Security and Globalisation (0.5)

Another course with the permission of the programme convenor.

One from:

GV4G1	Applied Quantitative Methods for Public Policy and Political Science (0.5) # (not available 2024/25)
MY451A	Introduction to Quantitative Analysis (0.5)
MY451W	Introduction to Quantitative Analysis (0.5)
MY452A	Applied Regression Analysis (0.5) #
MY452W	Applied Regression Analysis (0.5) #
GV499	Dissertation (1.0)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Footnotes

A: *Public Management stream*

To qualify for this stream, the following courses must be taken:

GV4E9	Approaches and Issues in Public Policy and Administration
GV483	Public Management Theory and Doctrine (H)

Courses to the value on 1.0 unit from the Public Management stream under Paper 3.

B: *Comparative Public Policy and Administration stream* To qualify for this stream, the following courses must be taken: GV4E9 Approaches and Issues in Public Policy and Administration

GV477	Comparative Public Policy Change (H) or
GV4F4	The Politics of Policy Advice (H)

Courses to the value on 1.0 unit from the Comparative Public Policy and Administration stream under Paper 3.

MSc in Quantitative Methods for Risk Management

Programme Code: TMQMRM

Department: Statistics

For students starting this programme of study in 2024/25

Students take three compulsory half unit courses and 2.5 units of optional courses.

Students are required to take a two-week compulsory introductory course MA400 September Introductory Course (Financial Mathematics) in September.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Introductory Course	MA400	September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (0.0)
Paper 1	ST409	Stochastic Processes (0.5) #
Paper 2	ST429	Statistical Methods for Risk Management (0.5) #
Paper 3	MA417	Computational Methods in Finance (0.5) #
Papers 4 & 5	Courses to the value of 1.5 unit(s) from the following:	
	MA411	Probability and Measure (0.5) #
	MA415	The Mathematics of the Black and Scholes Theory (0.5) #
	MA416	The Foundations of Interest Rate and Credit Risk Theory (0.5) #
	MA420	Topics in Financial Mathematics (0.5) #
	MA435	Machine Learning in Financial Mathematics (0.5) #
	ST418	Advanced Time Series Analysis (0.5) #
	ST426	Applied Stochastic Processes (0.5) (not available 2024/25)
	ST436	Financial Statistics (0.5) #
	ST439	Stochastics for Derivatives Modelling (0.5) # (not available 2024/25)
	ST440	Recent Developments in Finance and Insurance (0.5) # (not available 2024/25)
	ST443	Machine Learning and Data Mining (0.5) #
	ST446	Distributed Computing for Big Data (0.5) #
	ST448	Insurance Risk (0.5) # (not available 2024/25)
	ST449	Artificial Intelligence (0.5) #
	ST451	Bayesian Machine Learning (0.5) #
	ST455	Reinforcement Learning (0.5) #
	ST456	Deep Learning (0.5) #
	ST457	Graph Data Analytics and Representation Learning (0.5) #
	ST458	Financial Statistics II (0.5) #
	ST463	Stochastic Simulation, Training, and Calibration (0.5) #
Paper 6	Courses to the value of 1.0 unit(s) from the following:	
	FM441	Derivatives (0.5) #
	FM442	Quantitative Methods for Finance and Risk Analysis (0.5) #
	MA409	Continuous Time Optimisation (0.5) #
	ST452	Probability and Mathematical Statistics I (0.5)

Additional
course

- ST453 Probability and Mathematical Statistics II (0.5) #
- ST459 Quantum Computation and Information (0.5) #
- Further half-unit(s) from the Paper 5 options list, or from other appropriate MSc courses subject to the approval of the Programme Director and the teacher responsible for the course.
Papers 4 & 5 options list

Students can also take the following non-assessed course taken in addition to the required five compulsory half unit courses and three half units of optional courses detailed above:

- MA422 Research Topics in Financial Mathematics (0.0)

Papers 4 & 5 options list

- MA411 Probability and Measure (0.5) #
- MA415 The Mathematics of the Black and Scholes Theory (0.5) #
- MA416 The Foundations of Interest Rate and Credit Risk Theory (0.5) #
- MA420 Topics in Financial Mathematics (0.5) #
- MA435 Machine Learning in Financial Mathematics (0.5) #
- ST426 Applied Stochastic Processes (0.5) (not available 2024/25)
- ST436 Financial Statistics (0.5) #
- ST439 Stochastics for Derivatives Modelling (0.5) # (not available 2024/25)
- ST440 Recent Developments in Finance and Insurance (0.5) # (not available 2024/25)
- ST443 Machine Learning and Data Mining (0.5) #
- ST446 Distributed Computing for Big Data (0.5) #
- ST448 Insurance Risk (0.5) # (not available 2024/25)
- ST449 Artificial Intelligence (0.5) #
- ST451 Bayesian Machine Learning (0.5) #
- ST455 Reinforcement Learning (0.5) #
- ST456 Deep Learning (0.5) #
- ST457 Graph Data Analytics and Representation Learning (0.5) #
- ST458 Financial Statistics II (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information. The Bologna Process lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Real Estate Economics and Finance

Programme Code: TMREEF

Department: Geography and Environment

For students starting this programme of study in 2024/25 Full-year programme. Students must take three compulsory courses, in addition to either FM429 or FM473W / FM473A, one optional half-unit course and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Year 1		
Paper 1	GY458	Real Property Market Practice (0.5) #
Paper 2	GY457	Applied Urban and Real Estate Economics (1.0) #
Paper 3	GY462	Real Estate Finance (0.5)
Papers 4 & 5	Courses to the value of 1.0 unit(s) from the following: FM429 Asset Markets A (0.5) # FM473A Financial Markets (0.5) # FM473W Financial Markets (0.5) # GY472 Real Estate Investment (0.5) # And a relevant half-unit course where offered, subject to the approval of the Programme Director via LSEforYou.	
Paper 6	GY485	Dissertation - MSc Geographic Data Science and MSc Real Estate Economics and Finance (1.0)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information. This programme is externally accredited by the IPF and RICS. Further information is available on the Geography and Environment Department lse.ac.uk/geographyAndEnvironment/Home.aspx website.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Regional And Urban Planning Studies

Programme Code: TMRUP

Department: Geography and Environment

For students starting this programme of study in 2024/25 Full-year programme. Students must take courses to the value of three full units and a dissertation. Additionally all students are required to take the non-assessed compulsory course GY450 Planning Practice and Research.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Paper 1	GY447	The Economics of Regional and Urban Planning (0.5) #
Paper 2	GY448	Social and Political Aspects of Planning (0.5)
Paper 3	GY454	Urban Policy and Planning (0.5) #
Paper 4	Courses to the value of 1.5 unit(s) from the following:	

GI409	Conceptual Foundations in Gender, Development and Globalization (0.5)
GI420	Transnational Feminist Development Agendas (0.5)
GY400	The Economics of Urbanisation (0.5) #
GY403	Contemporary Debates in Human Geography (0.5)
GY410	Economics of Local and Regional Development (0.5)
GY413	Regional Development and Policy (0.5) #
GY415	Local Capacity and Economic Development Policy (0.5)
GY431	Cities, People and Poverty in the South (0.5) # (not available 2024/25)
GY432	Urban Ethnography (0.5)
GY438	Urban Asia: Cities and Social Change (0.5) (not available 2024/25)
GY439	Cities, Politics and Citizenship (0.5) (not available 2024/25)
GY441	The Politics of Housing (0.5)
GY446	Planning for Sustainable Cities (0.5)
GY449	Urban Futures (0.5) #
GY455	Economic Appraisal and Valuation (0.5)
GY460	Techniques of Spatial Economic Analysis (0.5) #
GY465	Concepts in Environmental Regulation (0.5)
GY470	Urban Africa (0.5) (not available 2024/25)
GY476	Applied Geographical Information Systems (0.5)
GY477	Race and Capitalism in North America (0.5) (not available 2024/25)
GY479	Urban Transformations (0.5)
GY480	Remaking China: Geographical aspects of Development and Disparity (0.5)
PP465	City-Making: the Politics of Urban Form (0.5)
SO473	Crime, Control and the City (0.5) (not available 2024/25)
SO480	Urban Inequalities (0.5) (not available 2024/25)

A half-unit course from another programme at the discretion of the Programme Director by special permission only.

Paper 5
Paper 6

GY450 Planning Practice and Research (0.0)
GY484 Dissertation - MSc Regional and Urban Planning Studies (1.0)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information. This programme is externally accredited by the RICS. Further information is available on the Geography and Environment Department lse.ac.uk/collections/geographyAndEnvironment/ website (see Quick Links to Regional and Urban Planning Studies).

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Regulation

Programme Code: TMREG

Department: Government

For students starting this programme of study in 2024/25 Full-year programme. Students must take courses to the value of three full units and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	GV488 Law and Politics of Regulation (1.0)
Papers 2 & 3	Courses to the value of two full units from the following: A
Environmental Regulation	
DV413	Environmental Problems and Development Interventions (0.5) #
DV415	Global Environmental Governance (0.5) (not available 2024/25)
GV4L2	The Politics and Policy of Climate Change and Sustainability (0.5) #
GY465	Concepts in Environmental Regulation (0.5)
GY475	Issues in Environmental Governance (0.5)
IR467	Political Economy of Climate Change (0.5) *
LL4BV	Transnational Environmental Law (0.5)
Financial and Commercial Regulation	
AC470	Accounting in the Global Economy (0.5) #
AC490	Management Accounting, Decisions and Control (0.5)
FM473A	Financial Markets (0.5) #
FM473W	Financial Markets (0.5) #
FM474A	Managerial Finance (0.5)
FM474W	Managerial Finance (0.5)

LL4CB	Modern Legal History: Private Law and the Economy 1750-1950 (0.5) (withdrawn 2024/25)
LL4CS	Law and Economics of Network Industries (0.5) (not available 2024/25)
SP434	Behavioural Public Policy (0.5)
A course from another programme by special permission only.	
Paper 4	GV499 Dissertation (1.0)
Prerequisite Requirements and Mutually Exclusive Options	
* means available with permission	
# means there may be prerequisites for this course. Please view the course guide for more information.	
Footnotes	
A: Students who take courses to the value of two full units from one of the categories shown in bold above, or courses to the value of one full unit and a dissertation which in the opinion of the School falls within the same category, may choose to have the title of their subject category included on the degree certificate. No more than one category may appear on the degree certificate.	

MSc in Social and Cultural Psychology

Programme Code: TMSCPS

Department: Psychological and Behavioural Science

For students starting this programme of study in 2024/25

Full-year programme. Students are required to take two compulsory courses, optional courses to the value of one unit and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	PB401 Contemporary Social and Cultural Psychology (1.0)
Paper 2	Students may opt to take PB414 instead of PB411 where they can demonstrate prior experience on quantitative techniques up to and including the topics covered in MY465
	PB411 Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0) or
	PB414 Advanced Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	PB417 Consumer Psychology for Sustainability (0.5)
	PB418 Corporate Communications (0.5)
	PB419 Creativity and Innovation (0.5) # (withdrawn 2024/25)
	PB421 Happiness (0.5)
	PB424 Organisational Life (0.5) (not available 2024/25)
	PB425 Organisations, Groups and Identity (0.5) #
	PB427 Organisational and Social Decision Making (0.5)
	PB428 Political Psychology: Inequality & Intergroup Relations (0.5)
	PB429 Science, Innovations and the Human

	Future (0.5) (not available 2024/25)
PB430	Social Influence Modes and Modalities (0.5) # (not available 2024/25)
PB431	Social Psychology of Economic Life: Advanced Topics (0.5)
PB432	Social Representations: Social Knowledge and Contemporary Issues (0.5)
PB433	Theory and Practice of Organisational Development (0.5)
PB434	Behavioural Science in an Age of AI and New Technology (0.5)
PB435	Behavioural Science for Planetary Wellbeing (0.5) (not available 2024/25)
PB436	The Science of Time at Work (0.5)
PB437	Conversation Analysis and the Science of Social Interaction (0.5) (not available 2024/25)

PB457	Organisational Culture (0.5)
PB458	Dialogue: Conflict & Negotiation (0.5)
A course from another programme (subject to the approval of the Candidate's Programme Director).	
Paper 4	PB410 Dissertation (1.0) A
Prerequisite Requirements and Mutually Exclusive Options	
# means there may be prerequisites for this course. Please view the course guide for more information.	
Footnotes	
A: Failures in this course cannot be condoned. A bad fail is defined as a mark less than 29%.	

MSc in Social and Public Communication

Programme Code: TMSOPUCO

Department: Psychological and Behavioural Science

For students starting this programme of study in 2024/25

Full year programme. Students are required to take two compulsory courses, optional courses to the value of one unit and a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	PB404 The Social Psychology of Communication (1.0)
Paper 2	Students may opt to take PB414 instead of PB411 where they can demonstrate prior experience on quantitative techniques up to and including the topics covered in MY465
	PB411 Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0) or
	PB414 Advanced Methods for Social Psychology Research: Qualitative and Quantitative Methods (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	PB417 Consumer Psychology for Sustainability (0.5)
	PB418 Corporate Communications (0.5)
	PB421 Happiness (0.5)
	PB424 Organisational Life (0.5) (not available 2024/25)

Paper 4	PB425	Organisations, Groups and Identity (0.5) #
	PB427	Organisational and Social Decision Making (0.5) (not available 2024/25)
	PB428	Political Psychology: Inequality & Intergroup Relations (0.5)
	PB429	Science, Innovations and the Human Future (0.5) (not available 2024/25)
	PB430	Social Influence Modes and Modalities (0.5) # (not available 2024/25)
	PB431	Social Psychology of Economic Life: Advanced Topics (0.5)
	PB432	Social Representations: Social Knowledge and Contemporary Issues (0.5)
	PB433	Theory and Practice of Organisational Development (0.5)
	PB434	Behavioural Science in an Age of AI and New Technology (0.5)
	PB435	Behavioural Science for Planetary Wellbeing (0.5) (not available 2024/25)
	PB436	The Science of Time at Work (0.5) (not available 2024/25)
	PB437	Conversation Analysis and the Science of Social Interaction (0.5) (not available 2024/25)
	PB452	Behavioural Science for Health and Pandemic Responses (0.5) # (not available 2024/25)
	PB457	Organisational Culture (0.5)
	PB458	Dialogue: Conflict & Negotiation (0.5)
	Courses to the value of 0.5 unit(s) from another programme (subject to the approval of the candidate's Programme Director).	
	PB410	Dissertation (1.0) A
	Prerequisite Requirements and Mutually Exclusive Options	
	# means there may be prerequisites for this course. Please view the course guide for more information.	
	Footnotes	

A: Failures in this course cannot be condoned. A bad fail is defined as a mark less than 29%. Students who complete PB404 and PB418 can be granted exemption from up to two CIPR Diploma units. Further information is available from the Department of Psychological and Behavioural Science website <https://www.lse.ac.uk/PBS>.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Social Anthropology

Programme Code: TMAN

Department: Anthropology

For students starting this programme of study in 2024/25 Full-year programme. Students must take courses to the value of three full units and a dissertation as shown. Attendance at seminars and at non-assessed tutorials is compulsory.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting

specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	AN404 Anthropology: Theory and Ethnography (1.0)
Paper 2	Courses to the value of 1.0 unit(s) from the following: AN402 The Anthropology of Religion (1.0) AN405 The Anthropology of Kinship, Sex and Gender (1.0) AN451 Anthropology of Politics (0.5) AN456 Anthropology of Economy (1): Production and Exchange (0.5) AN457 Anthropology of Economy (2): Transformation and Globalisation (0.5) AN479 Anthropology of Law (0.5) AN485 Mind and Society (0.5) AN495 Digital Anthropology (0.5)
Paper 3	Courses to the value of 1.0 unit(s) from a paper under paper 2 above not already taken or from the following: AN419 The Anthropology of Christianity (0.5) (not available 2024/25) AN420 The Anthropology of Southeast Asia (0.5) (not available 2024/25) AN424 The Anthropology of Melanesia (0.5) AN436 The Anthropology of Development (0.5) AN447 China in Comparative Perspective (1.0) AN458 Children and Youth in Contemporary Ethnography (0.5) (not available 2024/25) AN467 The Anthropology of South Asia (0.5) # AN469 The Anthropology of Amazonia (0.5) AN475 The Anthropology of Revolution (0.5) (not available 2024/25) AN476 Anthropology and the Anthropocene (0.5) AN477 Topics in the Anthropology of sub-Saharan Africa (0.5) # (not available 2024/25) AN480 Public Anthropology (0.5) (not available 2024/25) AN481 Health and Welfare: Anthropological Perspectives (0.5) (not available 2024/25) AN483 Anthropology, Art, and Poetics (0.5) (not available 2024/25) AN484 Anthropological Approaches to Race, Racism, and Decolonisation (0.5) AN486 Research Methods in Anthropology (0.5) AN492 Anthropological Entanglements in the Middle East (0.5) (not available 2024/25) AN493 Language, Signs, World, Action! Introduction to Linguistic Anthropology (0.5) (not available 2024/25)
Paper 4	<i>Paper 2 options list</i> AN499 Dissertation (1.0) Paper 2 options list AN402 The Anthropology of Religion (1.0) AN405 The Anthropology of Kinship, Sex and Gender (1.0) AN451 Anthropology of Politics (0.5) AN456 Anthropology of Economy (1): Production and Exchange (0.5) AN457 Anthropology of Economy (2): Transformation and Globalisation (0.5) AN479 Anthropology of Law (0.5) AN485 Mind and Society (0.5) AN495 Digital Anthropology (0.5) Prerequisite Requirements and Mutually Exclusive Options # means there may be prerequisites for this course.

Please view the course guide for more information.

MSc in Social Anthropology (Religion in the Contemporary World)

Programme Code: TMSARCW

Department: Anthropology

For students starting this programme of study in 2024/25

Full-year programme. Students must take courses to the value of four full units. Attendance at seminars and at non-assessed tutorials is compulsory.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	AN402 The Anthropology of Religion (1.0)
Paper 2	Courses to the value of 1.0 unit(s) from the following:
	AN419 The Anthropology of Christianity (0.5) (not available 2024/25)
	AN420 The Anthropology of Southeast Asia (0.5) (not available 2024/25)
	AN424 The Anthropology of Melanesia (0.5)
	AN467 The Anthropology of South Asia (0.5) #
	EU437 Europe Beyond Modernity (0.5)
	EU475 Europe and the Politics of Secularism (0.5)
	GV4C9 Globalization and Democratization in Southeast Asia (0.5) (not available 2024/25)
	IR465 The International Politics of Culture and Religion (1.0) # (not available 2024/25)
	IR4B1 Islam in World Politics (0.5)
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	AN404 Anthropology: Theory and Ethnography (1.0)
	AN405 The Anthropology of Kinship, Sex and Gender (1.0)
	AN451 Anthropology of Politics (0.5)
	AN456 Anthropology of Economy (1): Production and Exchange (0.5)
	AN457 Anthropology of Economy (2): Transformation and Globalisation (0.5)
	AN479 Anthropology of Law (0.5)
	AN480 Public Anthropology (0.5) (not available 2024/25)
	AN481 Health and Welfare: Anthropological Perspectives (0.5) (not available 2024/25)
	AN483 Anthropology, Art, and Poetics (0.5) (not available 2024/25)
	AN484 Anthropological Approaches to Race, Racism, and Decolonisation (0.5)
	AN485 Mind and Society (0.5)
	AN492 Anthropological Entanglements in the Middle East (0.5) (not available 2024/25)
	AN493 Language, Signs, World, Action! Introduction to Linguistic Anthropology (0.5) (not available 2024/25)
	AN495 Digital Anthropology (0.5)
	EU478 The Culture of European Politics (0.5)
	HY435 Ideology, State, Jihad: Political Islam from Ibn Taymiyya to ISIS (1.0)
	PB416 Cognition and Culture (0.5) (withdrawn 2024/25)
	An additional unit from Paper 2 not previously taken or a course from another MSc subject to the

approval of programme director.

Paper 2 options list

AN497 Dissertation: Religion in the Contemporary World (1.0)

Paper 2 options list

AN419 The Anthropology of Christianity (0.5) (not available 2024/25)

AN420 The Anthropology of Southeast Asia (0.5) (not available 2024/25)

AN424 The Anthropology of Melanesia (0.5)

AN467 The Anthropology of South Asia (0.5) #

EU437 Europe Beyond Modernity (0.5)

EU475 Europe and the Politics of Secularism (0.5)

GV4C9 Globalization and Democratization in Southeast Asia (0.5) (not available 2024/25)

IR465 The International Politics of Culture and Religion (1.0) # (not available 2024/25)

IR4B1 Islam in World Politics (0.5)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.

Please view the course guide for more information.

MSc in Social Innovation and Entrepreneurship

Programme Code: TMMGSIE

Department: Management

For students starting this programme of study in 2024/25

Full-year programme. Students must take four compulsory courses, options to the value of 1.0 unit and a dissertation as shown below.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	MG4F8 Managerial Economics and Quantitative Measurement for Social Entrepreneurs (0.5) and MG4F9 Organisational Behaviour and Marketing for Social Entrepreneurs (0.5)
Paper 2	MG4G1 Understanding Social Problems for Innovation and Entrepreneurship (0.5) and MG4G2 Social Innovation Design (0.5)
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	DV413 Environmental Problems and Development Interventions (0.5) #
	FM471 Sustainable Finance and Impact Investing (0.5) #
	FM476 Entrepreneurial Finance (0.5) #
	MG404 Consumer Insights: Behavioural Fundamentals (0.5)
	MG418 Open Innovation (0.5)
	MG421 International Business Strategy and Emerging Markets (0.5) #
	MG455 Decisions, Biases and Nudges (0.5) #
	MG460 Emergencies Management: Humanitarian Intervention and Digital Innovation (0.5) (not available 2024/25)
	MG473 Negotiation Analysis (0.5)
	MG476 Corporate Social Responsibility and International Labour Standards (0.5) #
	MG482 Innovation and Technology Management (0.5)
	MG4B3 International Marketing: A Strategic Approach (0.5)

	MG4C3	Information Technology and Service Innovation (0.5)
	MG4D4	Cross Cultural Management (0.5) # (not available 2024/25)
	MG4D5	Leadership in Organisations: Theory and Practice (0.5)
	MG4J9	Responsible Digital Innovation: Ethics at Work (0.5) (not available 2024/25)
	PP4E5	Innovations in the governance of public services delivery (0.5)
	PP4G3	Designing and Managing Change in the Public Sector (0.5)
	Or any graduate course not listed above, subject to permission from the Programme Director and the relevant Course Leader.	
Paper 4	MG4J5	Dissertation: Social Innovation and Entrepreneurship (1.0)
	Prerequisite Requirements and Mutually Exclusive Options	
	# means there may be prerequisites for this course. Please view the course guide for more information.	

MSc in Social Research Methods

Programme Code: TMSORM

Department: Methodology

For students starting this programme of study in 2024/25 Full-year programme.

Part 1: Social Research Methods. Students must take courses to the value of two full units and a dissertation as shown.

Part 2: Optional courses. For all students other than those on the 'Gender' or 'Population' streams of the MSc Social Research Methods, courses to the value of one full unit can be taken from the courses listed under the heading 'Part 2 - Optional Courses' below. Please click the 'Optional courses' link to expand the list. Students on the 'Gender' or 'Population' streams of the MSc must select courses from the options listed under their respective headings at the foot of the 'Part 2 - Optional Courses' section below. Please click the 'Optional courses' link to expand the list.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
	Part 1 - Social Research Methods
Paper 1	Research design
	MY400 Fundamentals of Social Science Research Design (0.5)
Paper 2	Quantitative research methods
	MY451A Introduction to Quantitative Analysis (0.5) 1
	MY451W Introduction to Quantitative Analysis (0.5) 2
	Or
	MY452A Applied Regression Analysis (0.5) #3
	MY452W Applied Regression Analysis (0.5) #4
	Exceptionally, students who can demonstrate sufficient prior training in quantitative research methods commensurate with those covered in MY451/MY452 can substitute a more advanced MY45* course from the following list for MY451/MY452. This would be subject to the approval of the MSc Programme Director.
	MY455 Multivariate Analysis and Measurement (0.5) #*
	MY457 Causal Inference for Observational and Experimental Studies (0.5) #*
	MY459 Quantitative Text Analysis (0.5) #*
Paper 3	Qualitative research methods
	MY421A Qualitative Research Methods (0.5) 5 or

	MY421W Qualitative Research Methods (0.5) 6 or
	Exceptionally students who can demonstrate sufficient prior training in qualitative research methods commensurate with those covered in MY421 can substitute a more advanced MY42* course from the following list for MY421. This would be subject to the approval of the MSc Programme Director.
	MY425 Case Studies and Comparative Methods for Qualitative Research (0.5) #*
	MY426 Doing Ethnography (0.5) #*
	MY428 Qualitative Text and Discourse Analysis (0.5) #*
Paper 4	Optional social research methods course
	For this paper students can choose any one of the MY4** courses which are listed under the Optional courses list below, or a half-unit course in statistics (ST4**, subject to the approval of the MSc Programme Director).
	<i>Optional courses (click here to expand)</i>
Paper 5	MY499 Dissertation (1.0) A
	Part 2 - Optional Courses
Paper 6	Optional courses B
	For all students other than those on the 'Gender' or 'Population' streams of the MSc in Social Research Methods, courses to the value of one full unit can be taken from the courses listed in the 'Optional Courses' section below. Please click the 'Optional courses' link to expand the list. Students on the 'Gender' or 'Population' streams of the MSc must select courses from the options listed under their respective headings at the foot of the 'Optional Courses' section below. Please click the 'Optional courses' link to expand the list.
	<i>Optional courses (click here to expand)</i>
	Optional courses (click here to expand)
	Non-stream
	DV434 Human Security (0.5) (not available 2024/25)
	MY405 Research Design for Policy and Programme Evaluation (0.5)
	MY423 Interview Methods for Social Science Research (0.5) #
	MY425 Case Studies and Comparative Methods for Qualitative Research (0.5) #
	MY426 Doing Ethnography (0.5) #
	MY428 Qualitative Text and Discourse Analysis (0.5) #
	MY455 Multivariate Analysis and Measurement (0.5) #
	MY456 Survey Methodology (0.5) #
	MY457 Causal Inference for Observational and Experimental Studies (0.5) #
	MY459 Quantitative Text Analysis (0.5) #
	MY461 Social Network Analysis (0.5)
	MY470 Computer Programming (0.5)
	MY472 Data for Data Scientists (0.5)
	MY474 Applied Machine Learning for Social Science (0.5) #
	MY475 Applied Deep Learning for Social Science (0.5) #
	SO407 Politics and Society (1.0)
	ST416 Multilevel Modelling (0.5) # (not available 2024/25)
	ST425 Statistical Inference: Principles, Methods and Computation (1.0) #
	ST442 Longitudinal Data Analysis (0.5) #
	Or any other Graduate level courses from across the LSE (subject the approval of your Academic Mentor and the MSc Social Research Methods Programme Director).
	Or

Gender stream

This stream applies only to students who are taking MSc Social Research Methods as part of a 1+3 PhD programme, in conjunction with the MPhil/PhD Gender. Other students can select these courses as standard unlisted optional courses under Paper 6 (where this is allowed by the Department of Gender Studies, and subject to the approval of your Academic Mentor and the MSc Social Research Methods Programme Director).

One half-unit from the following:

- | | |
|-------|---|
| GI402 | Gender, Knowledge and Research Practice (0.5) |
| GI424 | Gender Theories: An Interdisciplinary Approach (0.5) |
| GI429 | Archival Interventions: Feminist, Queer and Decolonial Approaches (0.5) # |

And one optional half unit graduate level course (typically from the Department of Gender Studies) as agreed with your Academic Mentor.

Or

Population stream

This stream applies only to students who are taking MSc Social Research Methods as part of a 1+3 PhD programme, in conjunction with the MPhil/PhD Demography (Social/Formal). Other students can select these courses as standard unlisted optional courses under Paper 6 (where this is allowed by the host department of the course, and subject to the approval of your Academic Mentor and the MSc Social Research Methods Programme Director).

One compulsory half-unit:

- | | |
|-------|--|
| DV456 | Population, Health and Development: Evidence and Projections (0.5) # |
|-------|--|

And courses to the value of 0.5 units from the following:

- | | |
|-------|---|
| DV411 | Population, Development and Environment: an Analytical Approach (0.5) (not available 2024/25) |
| DV444 | Global Health Challenges: Epidemics, Disease, and Public Health Response (0.5) # |
| DV457 | Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (0.5) |
| GI415 | Gender and Welfare Regimes: Developments and Change (0.5) |
| GI417 | Feminist Population Politics (0.5) (not available 2024/25) |
| MY476 | Population Analysis: Methods and Models (0.5) # |

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

- 1: MY451A can not be taken with MY451W
- 2: MY451W can not be taken with MY451A
- 3: MY452A can not be taken with MY452W
- 4: MY452W can not be taken with MY452A
- 5: MY421A can not be taken with MY421W
- 6: MY421W can not be taken with MY421A

Footnotes

A: The Dissertation is due in August.

B: Students may only register for one MY47* course as part of the MSc Social Research Methods degree.

MSc in Sociology

Programme Code: TMSO

Department: Sociology

For students starting this programme of study in 2024/25

Full-year programme. Students must take courses to the value of three units and write a dissertation as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)	
Paper 1	SO491	Quantitative Social Research Methods (0.5) or
	SO492	Qualitative Social Research Methods (0.5)
Papers 2 & 3	Courses to the value of 2.5 unit(s) from the following:	
	SO407	Politics and Society (1.0)
	SO426	Classical Social Thought (0.5)
	SO427	Modern Social Thought (0.5)
	SO451	Cities by Design (0.5)
	SO454	Families and Inequalities (0.5) (not available 2024/25)
	SO457	Political Reconciliation (0.5)
	SO458	Gendering, Identities, Difference (0.5)
	SO468	International Migration and Migrant Integration (0.5)
	SO470	The Sociology of Markets (0.5) (not available 2024/25)
	SO471	Technology, Power and Culture (0.5) (not available 2024/25)
	SO473	Crime, Control and the City (0.5) (not available 2024/25)
	SO475	Material Culture and Design (0.5) (not available 2024/25)
	SO477	Urban Social Theory (0.5)
	SO481	Class, Politics and Culture (0.5)
	SO489	Family and International Migration (0.5) (not available 2024/25)
	SO490	Contemporary Social Thought (0.5)
	SO491	Quantitative Social Research Methods (0.5)
	SO492	Qualitative Social Research Methods (0.5)
	SO4B6	Nature and Technology: More than Human Sociology (0.5) (not available 2024/25)
	SO4B9	The Sociology of Consumption (0.5)
	SO4C1	Fascism, Authoritarianism, Populism (0.5)
	SO4C4	Global Mobilities: International Migration (0.5)
	SO4C5	The Social Life of Infrastructure (0.5)
	SO4D1	Economic Sociology (1.0)
	SO4D2	Modern Personhoods and Identitarian Thought (0.5)
Any of the MSc courses offered in any department or institute at LSE if they are relevant to the programme of study, and subject to the approval of both Programme Director and course teacher. Options taken outside the department should not normally exceed the value of 0.5.		
Paper 4	SO499	MSc in Sociology Dissertation (1.0)

MSc in Statistics

Programme Code: TMST

Department: Statistics

For students starting this programme of study in 2024/25 Academic-year programme. Students must take courses to the value of four full units.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	ST425 Statistical Inference: Principles, Methods and Computation (1.0) #
Papers 2 & 3	Courses to the value of 2.0 unit(s) from the following:
	ST405 Multivariate Methods (0.5) #
	ST409 Stochastic Processes (0.5) #
	ST411 Generalised Linear Modelling and Survival Analysis (0.5) #
	ST416 Multilevel Modelling (0.5) # (not available 2024/25)
	ST418 Advanced Time Series Analysis (0.5) #
	ST433 Computational Methods in Finance and Insurance (0.5) # (withdrawn 2024/25)
	ST442 Longitudinal Data Analysis (0.5) #
	ST443 Machine Learning and Data Mining (0.5) #*
	ST444 Computational Data Science (0.5) #*
	ST445 Managing and Visualising Data (0.5) #*
	ST446 Distributed Computing for Big Data (0.5) #*
	ST449 Artificial Intelligence (0.5) #*
	ST451 Bayesian Machine Learning (0.5) #*
	ST454 Bayesian Data Analysis (0.5) #
	ST455 Reinforcement Learning (0.5) #*
	ST456 Deep Learning (0.5) #*
	ST457 Graph Data Analytics and Representation Learning (0.5) #
	ST463 Stochastic Simulation, Training, and Calibration (0.5) #
	MY459 Quantitative Text Analysis (0.5) #
	MY461 Social Network Analysis (0.5) #
Paper 4	Courses to the value of 1.0 unit from the following:
	ST405 Multivariate Methods (0.5) #
	ST409 Stochastic Processes (0.5) #
	ST411 Generalised Linear Modelling and Survival Analysis (0.5) #
	ST416 Multilevel Modelling (0.5) # (not available 2024/25)
	ST418 Advanced Time Series Analysis (0.5) #
	ST426 Applied Stochastic Processes (0.5) (not available 2024/25)
	ST433 Computational Methods in Finance and Insurance (0.5) # (withdrawn 2024/25)
	ST442 Longitudinal Data Analysis (0.5) #
	ST443 Machine Learning and Data Mining (0.5) #*
	ST444 Computational Data Science (0.5) #*
	ST445 Managing and Visualising Data (0.5) #*
	ST446 Distributed Computing for Big Data (0.5) #*
	ST449 Artificial Intelligence (0.5) #*
	ST451 Bayesian Machine Learning (0.5) #*
	ST454 Bayesian Data Analysis (0.5) #
	ST455 Reinforcement Learning (0.5) #*
	ST456 Deep Learning (0.5) #*
	ST457 Graph Data Analytics and Representation Learning (0.5) #
	ST459 Quantum Computation and Information (0.5) #
	ST463 Stochastic Simulation, Training, and

Calibration (0.5) #

MA407 Algorithms and Computation (0.5) #

MA427 Mathematical Optimisation (0.5) #

MY456 Survey Methodology (0.5) #

MY457 Causal Inference for Observational and Experimental Studies (0.5) #

MY459 Quantitative Text Analysis (0.5) #

MY461 Social Network Analysis (0.5)

MY476 Population Analysis: Methods and Models (0.5) #

Other courses may be taken with permission, except for: ST429, ST436, ST440, MA415, MA416, MA420 and any courses indexed FM.

Students can take up to a maximum of 1.0 unit from the following courses: ST443, ST444, ST445, ST446, ST449, ST455, ST456.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

The total value of all non-ST courses should not exceed one unit.

The Bologna Process [lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm](https://www.lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm) facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's programmes are nine or ten months in duration. If you wish to proceed from these programmes to higher study in EHEA countries other than the UK, you should be aware that their recognition for such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

MSc in Statistics (Financial Statistics)

Programme Code: TMSTFS

Department: Statistics

For students starting this programme of study in 2024/25 Academic-year programme. Students take three compulsory courses (two units) and options to the value of two units.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	ST425 Statistical Inference: Principles, Methods and Computation (1.0) #
Paper 2	ST436 Financial Statistics (0.5) # and ST458 Financial Statistics II (0.5) #
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	MA417 Computational Methods in Finance (0.5) #
	ST405 Multivariate Methods (0.5) #
	ST411 Generalised Linear Modelling and Survival Analysis (0.5) #
	ST416 Multilevel Modelling (0.5) # (not available 2024/25)
	ST418 Advanced Time Series Analysis (0.5) #
	ST429 Statistical Methods for Risk Management (0.5) #
	ST439 Stochastics for Derivatives Modelling (0.5) # (not available 2024/25)
	ST440 Recent Developments in Finance and Insurance (0.5) # (not available 2024/25)
	ST442 Longitudinal Data Analysis (0.5) #
	ST443 Machine Learning and Data Mining (0.5)

Paper 4	#
	ST444 Computational Data Science (0.5) #
	ST445 Managing and Visualising Data (0.5) #
	ST446 Distributed Computing for Big Data (0.5) #
	ST448 Insurance Risk (0.5) # (not available 2024/25)
	ST449 Artificial Intelligence (0.5) #
	ST451 Bayesian Machine Learning (0.5) #
	ST454 Bayesian Data Analysis (0.5) #
	ST455 Reinforcement Learning (0.5) #
	ST456 Deep Learning (0.5) #
	ST457 Graph Data Analytics and Representation Learning (0.5) #
	ST463 Stochastic Simulation, Training, and Calibration (0.5) #
	MY459 Quantitative Text Analysis (0.5) #
	MY461 Social Network Analysis (0.5)
	Courses to the value of 1.0 unit from the following:
	ST405 Multivariate Methods (0.5) #
	ST409 Stochastic Processes (0.5) #
	ST411 Generalised Linear Modelling and Survival Analysis (0.5) #
	ST416 Multilevel Modelling (0.5) # (not available 2024/25)
	ST418 Advanced Time Series Analysis (0.5) #
	ST426 Applied Stochastic Processes (0.5) (not available 2024/25)
	ST429 Statistical Methods for Risk Management (0.5) #
	ST439 Stochastics for Derivatives Modelling (0.5) # (not available 2024/25)
	ST440 Recent Developments in Finance and Insurance (0.5) # (not available 2024/25)
	ST442 Longitudinal Data Analysis (0.5) #
	ST443 Machine Learning and Data Mining (0.5) #
	ST444 Computational Data Science (0.5) #
	ST445 Managing and Visualising Data (0.5) #
	ST446 Distributed Computing for Big Data (0.5) #
	ST448 Insurance Risk (0.5) # (not available 2024/25)
	ST449 Artificial Intelligence (0.5) #
	ST451 Bayesian Machine Learning (0.5) #
	ST454 Bayesian Data Analysis (0.5) #
	ST455 Reinforcement Learning (0.5) #
	ST456 Deep Learning (0.5) #
	ST457 Graph Data Analytics and Representation Learning (0.5) #
	ST459 Quantum Computation and Information (0.5) #
	ST463 Stochastic Simulation, Training, and Calibration (0.5) #
	FM402 Financial Risk Analysis (0.5) #
	FM413 Fixed Income Markets (0.5) #
	FM429 Asset Markets A (0.5) #
	FM441 Derivatives (0.5) #
	FM442 Quantitative Methods for Finance and Risk Analysis (0.5) #
	MA407 Algorithms and Computation (0.5) #
	MA415 The Mathematics of the Black and Scholes Theory (0.5) #
	MA416 The Foundations of Interest Rate and Credit Risk Theory (0.5) #
	MA417 Computational Methods in Finance (0.5) #
	MA427 Mathematical Optimisation (0.5) #
	MA435 Machine Learning in Financial Mathematics (0.5) #
	MY456 Survey Methodology (0.5) #
	MY457 Causal Inference for Observational and

Experimental Studies (0.5) #
MY459 Quantitative Text Analysis (0.5) #
MY461 Social Network Analysis (0.5)

Or other non-ST course(s), with permission.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information. The total value of all non-ST courses should not exceed one unit.

Other courses may be taken with permission, except for: ST429, ST436, ST440, MA415, MA416, MA420 and any courses indexed FM.

Students can take up to a maximum of 1.0 unit from the following courses: ST443, ST444, ST445, ST446, ST449, ST455, ST456.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information. The total value of all non-ST courses should not exceed one unit.

This programme is externally accredited by the RSS. Further information is available on the Department of Statistics website. lse.ac.uk/collections/statistics

MSc in Statistics (Research)

Programme Code: TMSTRE

Department: Statistics

For students starting this programme of study in 2024/25 Full-year programme. Students must take courses to the value of three full units and a dissertation.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	ST425 Statistical Inference: Principles, Methods and Computation (1.0) #
Paper 2	ST499 Dissertation (1.0)
Papers 3 & 4	Courses to the value of 2.0 unit(s) from the following:
	ST405 Multivariate Methods (0.5) #
	ST409 Stochastic Processes (0.5) #
	ST411 Generalised Linear Modelling and Survival Analysis (0.5) #

MSc in Statistics (Social Statistics)

Programme Code: TMSTSS

Department: Statistics

For students starting this programme of study in 2024/25 Academic-year programme. Students must take two compulsory courses and options to the value of 2.5 units as shown below.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	ST425 Statistical Inference: Principles, Methods and Computation (1.0) #
Paper 2	ST411 Generalised Linear Modelling and Survival Analysis (0.5) #

And

Courses to the value of 0.5 unit(s) from the following:

ST405 Multivariate Methods (0.5) #
ST416 Multilevel Modelling (0.5) # (not available 2024/25)

Paper 3

ST442 Longitudinal Data Analysis (0.5) #

Courses to the value of 1.0 unit(s) from the following:

ST405 Multivariate Methods (0.5) #
ST416 Multilevel Modelling (0.5) # (not available 2024/25)

ST442 Longitudinal Data Analysis (0.5) #

ST443 Machine Learning and Data Mining (0.5) #

ST444 Computational Data Science (0.5) #

ST445 Managing and Visualising Data (0.5) #

ST446 Distributed Computing for Big Data (0.5) #

ST449 Artificial Intelligence (0.5) #

ST451 Bayesian Machine Learning (0.5) #

ST454 Bayesian Data Analysis (0.5) #

ST455 Reinforcement Learning (0.5) #

ST456 Deep Learning (0.5) #

ST457 Graph Data Analytics and Representation Learning (0.5) #

MY459 Quantitative Text Analysis (0.5) #

MY461 Social Network Analysis (0.5)

Paper 4

Courses to the value of 1.0 unit(s) from the following:

ST405 Multivariate Methods (0.5) #
ST416 Multilevel Modelling (0.5) # (not available 2024/25)

ST442 Longitudinal Data Analysis (0.5) #

ST454 Bayesian Data Analysis (0.5) #

GY460 Techniques of Spatial Economic Analysis (0.5) #

MA427 Mathematical Optimisation (0.5) #

MY456 Survey Methodology (0.5) #

MY457 Causal Inference for Observational and Experimental Studies (0.5) #

MY459 Quantitative Text Analysis (0.5) #

MY461 Social Network Analysis (0.5)

MY476 Population Analysis: Methods and Models (0.5) #

Other courses may be taken with permission, except for: ST429, ST433, ST436, ST439, ST440, MA415, MA416, MA420 and any courses indexed FM.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information. The total value of all non-ST courses should not exceed one unit.

The Bologna Process [ise.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm](https://www.ise.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm) facilitates comparability and compatibility between higher education systems across the European Higher Education Area. Other courses may be taken with permission, except for: ST429, ST433, ST436, ST439, ST440, MA415, MA416, MA420 and any courses indexed FM.

Paper 5 ST499 Dissertation (1.0)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information. The total value of all non-ST courses should not exceed one unit.

MSc in Strategic Communications and Society

Programme Code: TMSTCOSO

Department: Media and Communications

For students starting this programme of study in 2024/25

Full-year programme. Students must take three compulsory courses, courses to the value of 1.5 units and a dissertation as shown below.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	MC408 Theories and Concepts in Media and Communications (0.5) # And one of the following 0.5 unit courses: MC4M1 Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (0.5) or MC4M7 Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis) (0.5) #A
Paper 2	MC431 Critical Approaches to Strategic Communications (0.5)
Paper 3	Courses to the value of 1.5 unit(s) from the following: MC402 The Audience in Media and Communications (0.5) # MC425 Interpersonal Mediated Communication (0.5) # MC429 Humanitarian Communication: Realities, Challenges and Critiques (0.5) # MC432 Strategic Communication in Practice: Professional Perspectives (0.5) # MC434 Digital Platforms and Media Infrastructures (0.5) # MC436 Mediating the Past (0.5) # MC437 Media, Data and Social Order (0.5) # MC440 Children, Youth and Media (0.5) # MG479 Information Systems for the Public Sector: Digital Government and Service Innovation (0.5) (not available 2024/25) MG4B3 International Marketing: A Strategic Approach (0.5) MG4F2 Marketing Analytics II: Analytics for Managing Innovations, Products and Brands (0.5) MG4F3 Digital Marketing (0.5) # PB418 Corporate Communications (0.5) PB427 Organisational and Social Decision Making (0.5) Any other course which is offered in the School at master's level, subject to the consent of the candidate's programme director.
Paper 4	MC499 Dissertation: Media and Communications (1.0)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Footnotes

A: MY452 is an advanced Applied Regression Analysis course offered by the Department of Methodology and must be taken by students who select MC4M7. Students wishing to select this option need to already have a grounding in quantitative methods and must seek approval from the Programme Director. Approval is also subject to timetabling constraints.

Note: Students can take no more than one full unit of courses from outside the Department of Media and Communications (non MC-prefixed courses).

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future

academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Theory and History of International Relations

Programme Code: TMTHHYIR2

Department: International History

For students starting this programme of study in 2024/25
Full-year programme. Students must take courses to the value of four units, including a dissertation as shown.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	Courses to the value of 1.0 unit(s) from the following: HY400 Crisis Decision-Making in War and Peace 1914-2003 (1.0) # HY422 Presidents, Public Opinion, and Foreign Policy, from Roosevelt to Reagan, 1933-89 (1.0) HY429 Anglo-American Relations from World War to Cold War and Beyond, 1939-2003 (1.0) HY435 Ideology, State, Jihad: Political Islam from Ibn Taymiyya to ISIS (1.0) HY436 Race, Violence and Colonial Rule in Africa (1.0)
Paper 2	Courses to the value of 1.0 unit(s) from the following: IR411 Foreign Policy Analysis III (1.0) # IR412 International Institutions (1.0) IR416 The EU in the World (1.0) # IR419 International Relations of the Middle East (1.0) # IR462 Theory of International Society (0.5) # IR464 The Politics of International Human Rights (0.5) (not available 2024/25) IR466 Genocide (0.5) IR471 Critical International Law (0.5) IR479 Eastern Europe: Domestic Regimes and Foreign Policies (0.5) # IR480 The Politics of Inequality and Development (0.5) IR488 International Politics of Southeast Asia (0.5) IR490 The Strategy of Conflict in International Relations (0.5) IR494 Conflict and Peacebuilding (0.5) #
Paper 3	Courses to the value of 1.0 unit(s) from the following: EH452 Latin American Development and Economic History (0.5) (not available 2024/25) EU475 Europe and the Politics of Secularism (0.5) EU476 Emotions and Memory in European Politics (0.5) HY411 European Integration in the Twentieth Century (1.0) # (not available 2024/25) HY432 From Cold Warriors to Peacemakers: the End of the Cold War Era, 1979-1999 (1.0) HY440 The Iranian Revolution (1.0) HY444 Latin America in the Cold War (1.0) HY446 Geo-Interventions and the Genealogy of the Anthropocene: The Transformation

	of Nature, Space, and Territory, 19th-21st centuries (1.0)
HY459	The Ottoman Empire and its Legacy, 1299-1950 (1.0) (not available 2024/25)
HY461	East Asia in the Age of Imperialism, 1839-1945 (1.0) #
HY463	The Roots, Origins and Dynamics of the Cold War, 1917-1962 (1.0)
HY465	The International History of the Balkans since 1939: State Projects, Wars, and Social Conflict (1.0) #
HY469	Maps, History and Power: The Spaces and Cultures of the Past (1.0)
HY471	European Empires and Global Conflict, 1935-1948 (1.0)
HY478	Genesis of the Modern World: Europe, China & India, 1550-1840 (1.0)
HY483	Land and Conflict in Latin America since 1750 (1.0) (not available 2024/25)
HY486	The Anti-Slave-Trade Atlantic World, c. 1807-1870 (1.0)
HY487	Islam, State and Conflict in Southeast Asia (0.5) (not available 2024/25)
HY488	European Empires and Global Conflict, 1935-1948 (0.5) (not available 2024/25)
HY489	China and the External World, 1644-1839 (0.5)
HY491	Race, Gender and Reproduction in the Caribbean, 1860s-1930s (0.5) (not available 2024/25)
HY4B1	The Vietnam Wars, 1930-75: Regional and International Perspectives (1.0)
HY4B2	The Afterlives of Empires in the Neo-Colonial Caribbean (0.5) (not available 2024/25)
HY4B3A	Citizenship in 20th century political thought: intellectual history in case studies (0.5) 1
HY4B3W	Citizenship in 20th century political thought: intellectual history in case studies (0.5) 2 (not available 2024/25)
HY4B4	Maritime Asia in Transition, 1405-1839 (0.5)
HY4B7	Asian Borderlands (1.0)
HY4B9	China and the United States Since 1949 (1.0)
HY4C1	Fighting and Enduring the Great War (1.0)
<i>Paper 1 options list</i>	
<i>Paper 2 options list</i>	
Paper 4	HY498 Dissertation: LSE-PKU Double Degree MSc in International Affairs; MSc Theory and History of International Relations (1.0)
Paper 1 options list	
HY400	Crisis Decision-Making in War and Peace 1914-2003 (1.0) #*
HY422	Presidents, Public Opinion, and Foreign Policy, from Roosevelt to Reagan, 1933-89 (1.0) *
HY429	Anglo-American Relations from World War to Cold War and Beyond, 1939-2003 (1.0) *
HY435	Ideology, State, Jihad: Political Islam from Ibn Taymiyya to ISIS (1.0) *
HY436	Race, Violence and Colonial Rule in Africa (1.0) *
Paper 2 options list	
IR411	Foreign Policy Analysis III (1.0) #
IR412	International Institutions (1.0)
IR415	The Strategy of Conflict in International Relations (1.0) # (not available 2024/25)

IR416	The EU in the World (1.0) #
IR419	International Relations of the Middle East (1.0) #
IR462	Theory of International Society (0.5) #
IR464	The Politics of International Human Rights (0.5) (not available 2024/25)
IR466	Genocide (0.5)
IR471	Critical International Law (0.5)
IR479	Eastern Europe: Domestic Regimes and Foreign Policies (0.5) #
IR480	The Politics of Inequality and Development (0.5)
IR488	International Politics of Southeast Asia (0.5)
IR490	The Strategy of Conflict in International Relations (0.5)
IR494	Conflict and Peacebuilding (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission
means there may be prerequisites for this course. Please view the course guide for more information.
1: HY4B3A can not be taken with HY4B3W
2: HY4B3W can not be taken with HY4B3A

MSc in Urbanisation and Development

Programme Code: TMURDV

Department: Geography and Environment

For students starting this programme of study in 2024/25

Full-year programme. Students must take courses to the value of four full units.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and /or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	GY452 Urban Research Methods (0.5) <i>and</i> GY459 Urban Theory and Policy in the Global South (0.5)
Paper 2	Courses to the value of between 0.5 unit(s) (minimum) and 1.0 unit(s) (maximum) from the following: <div> <div>DV400 Development: History, Theory and Policy (1.0) #</div> <div>DV407 Poverty (0.5) A</div> <div>DV411 Population, Development and Environment: an Analytical Approach (0.5) (not available 2024/25)</div> <div>DV418 African Development (0.5)</div> <div>DV420 Complex Emergencies (0.5)</div> <div>DV421 Critical Perspectives on Global Health and Development (0.5) B</div> <div>DV433 The Informal Economy and Development (0.5) (not available 2024/25)</div> <div>DV442 Key Issues in Development Studies (0.5)</div> <div>DV456 Population, Health and Development: Evidence and Projections (0.5) #</div> <div>DV458 Key issues in Global Health and Development (0.5)</div> <div>DV464 Democracy and Development (0.5)</div> <div>DV465 Labour, Social Services and Development (0.5) (not available 2024/25)</div> </div> <p>In exceptional cases it may be possible to make alternative choices for Paper 2 with the approval of the Programme Director.</p>
Paper 3	Courses up to the value of 1.0 unit (or 1.5 units if only choosing a half unit from Paper 2) from the following: <div> <div>GY400 The Economics of Urbanisation (0.5) #</div> </div>

GY431	Cities, People and Poverty in the South (0.5) # (not available 2024/25)
GY432	Urban Ethnography (0.5)
GY438	Urban Asia: Cities and Social Change (0.5) (not available 2024/25)
GY439	Cities, Politics and Citizenship (0.5) (not available 2024/25)
GY441	The Politics of Housing (0.5)
GY446	Planning for Sustainable Cities (0.5)
GY449	Urban Futures (0.5) #
GY455	Economic Appraisal and Valuation (0.5)
GY470	Urban Africa (0.5) (not available 2024/25)
GY471	Urban environments and more-than-human cities (0.5) (not available 2024/25)
GY474	Politics of Environment and Development (0.5)
GY476	Applied Geographical Information Systems (0.5)
GY477	Race and Capitalism in North America (0.5) (not available 2024/25)
GY479	Urban Transformations (0.5)
GY480	Remaking China: Geographical aspects of Development and Disparity (0.5)
SO480	Urban Inequalities (0.5) (not available 2024/25)

Other urban and/or development courses available in the School as approved by the programme director.

Paper 4

GY488 Dissertation - MSc Urbanisation and Development (1.0) C

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Footnotes

A: Capped course with priority for International Development students so admission not guaranteed.

B: Capped course with priority for International Development students so admission not guaranteed.

C: On an approved topic.

Executive Taught Master's Programme Regulations

Key to Regulations

(H) means a half-unit course

(AT) means Autumn Term

(WT) means Winter Term

(ST) means Spring Term

Executive MSc in Behavioural Science

Programme Code: TMBSEX

Department: Psychological and Behavioural Science

For students starting this programme of study in 2024/25

16 month, part-time modular programme consisting of three full units of taught courses and one full unit dissertation. Students take four compulsory half unit courses to the value of two units, and two optional half unit courses to the value of one unit. Alternative exit points are available to students who are not able to complete the degree. An LSE Diploma is available on the completion of six taught courses and an LSE Certificate on the completion of four taught courses - please see the footnote at the bottom of this regulation for more information.

Paper **Course number, title (unit value)**

Year 1

September 2024

Paper 1 PB450E Behavioural Science and Policy (0.5)

Paper 2 MG406E Behavioural Decision Science (0.5)

January 2025

Paper 3 PB471E Research Methods for Behavioural Science (0.5)

Paper 4 One of the following courses:

PB436E The Science of Time at Work (0.5)

PB453E Corporate Behaviour and Decision Making (0.5)

PB454E Policy Appraisal and Ethics (0.5)

April 2025

Paper 5 PB413E Frontiers in Behavioural Science Methods (0.5)

Paper 6 One of the following courses:

PB434E Behavioural Science in an Age of AI and New Technology (0.5) **or**

PB452E Behavioural Science for Health and Regulation (0.5)

Year 2

Paper 7 PB451E Dissertation in Behavioural Science (1.0)

Exit options: The following alternative exit points are available to students who are not eligible for the award of a Degree as outlined below:

A) As a result of academic failure after fully completing the programme as set out in the programme regulations above; or

B) As a result of being unable to complete the programme as a result of unforeseen circumstances. Students must notify the Department that they are unable to continue as Absent marks could result in the student being ineligible for an exit award.

In either case, students will be eligible for one of the exit awards listed below provided they meet the designated criteria as follows:

Diploma: This Diploma is classified according to the Scheme for the Award of a Diploma <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeDiploma.pdf>, as a 3 unit programme subject to the following provisions.

Students eligible for the award of a Diploma will have registered on the Executive MSc Behavioural Science programme and have successfully completed courses to the value of 3.0 full units (three teaching sessions).

Results from each of the three units (or equivalent where half unit courses have been taken) count towards the Diploma classification. Students must achieve a mark of 50 or higher in each of the three courses (or equivalent where half unit courses have been taken) to achieve an overall Pass in the Diploma.

Certificate: Students wishing to earn a Certificate will have registered on the Executive MSc Behavioural Science programme and have successfully completed courses to the value of 2.0 full units (two teaching sessions).

The certificate is classified on a Pass/Fail basis only. A Pass mark of 50 needs to be achieved in each of the two units (or equivalent where half unit courses have been taken) for students to be eligible for the award of the Certificate. Higher marks in one course cannot compensate a Fail mark in another course.

Resits for the award of the degree: A student shall normally be entitled to re-sit any failed courses on one occasion only.

The results for the taught courses and dissertation will be ratified by the Sub-Board of Examiners and Graduate School Board of Examiners in February/ March the year following dissertation submission. Once grades have been ratified by the Sub-Board of Examiners and it is determined that an award cannot be made due to a fail in a taught course, the faculty member responsible for the failed course will set the new assessment and deadline for re-submission to take place as soon as possible. Results for resits and subsequent classification will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set and does not have permission to defer <https://info.lse.ac.uk/current-students/services/assessment-and-results/exceptional-circumstances/deferral> the attempt, they will be deemed to have failed the course. Provided that students submit by the deadline and pass, they will graduate with their cohort subject to the normal classification rules.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm](https://info.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm). Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm](https://info.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm).

Executive MSc in Cities

Programme Code: TMCIEX

Department: School of Public Policy

For students starting this programme of study in 2024/25 18 month programme. Students must take four compulsory half-unit courses, one optional full-unit course and an Urban Consultancy Project.

Paper	Course number, title (unit value)
Year 1	
Paper 1	PP4A1E Cities in an Urban Age: Challenges and Opportunities (0.5) and PP4A2E Cities and Society: Design and Social Cohesion (0.5)
Paper 2	PP4A3E Cities and the Environment: Urban Environmental Transitions (0.5)
	And
	PP4A4E Cities and the Economy: Urban Economic Development and Finance (0.5)
Paper 3	Either
	PP4A5E Urban Infrastructure and Strategic Planning (1.0) or
	PP4A6E Urban Development and Master Planning (1.0)
Year 2	
Paper 4	PP4A7E Urban Consultancy Project (1.0)

Exit options

Diploma: Students may be eligible for the award of a Diploma if, as a result of exceptional and unforeseen circumstances, they must leave the programme early or once they have completed the programme if they are not eligible for the award of the degree after either completing all their first attempts or all second attempts at all courses.

Students in this position must achieve passing grades (50 and above) in courses to the value of at least 3.0 units to be eligible for the award of Diploma. The Diploma is classified according to the Scheme for the Award of a Diploma. The Diploma is a final exit award with no option to be subsequently awarded the degree of Executive MSc in Cities.

Certificate: Students may be eligible for the award of a Certificate if, as a result of exceptional and unforeseen circumstances, they must leave the programme early or once they have completed the programme if they are not eligible for the award of the degree after either completing all their first attempts or all second attempts at all courses.

Students in this position must have achieved passing

grades (50 and above) in courses to the value of at least 2.0 units to be eligible for the award of Certificate. The Certificate is classified on a Pass/Fail basis only. Higher marks in one course cannot compensate a Fail mark in another course. The award of a Certificate or Diploma is subject to the application of the General Academic Regulations and the Certificate/Diploma regulations and classification schemes. The Certificate is a final exit award with no option to be subsequently awarded the degree of Executive MSc in Cities.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MSc in Finance (part-time)

Programme Code: TMFI

Department: Finance

For students starting this programme of study in 2024/25 Academic year programme lasting 21 months part-time (evenings). Students must take two full unit compulsory courses in the first year and four of the half-unit options available in the second year. They must submit a structured project in one of the optional half-unit courses and take an examination in the other three half-unit courses.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Year 1

Paper 1	FM422E	Corporate Finance (1.0) #
Paper 2	FM423E	Asset Markets (1.0) #

Year 2

Papers 3 & 4 Courses to the value of 2.0 units from the list below:

Courses assessed by Exam or Coursework

Dedicated list of options:

FM405E	Fixed Income Securities and Credit Markets (0.5) #
FM406E	Topics in Portfolio Management (0.5) #
FM407E	Mergers, Buyouts and Corporate Restructurings (0.5) #
FM410E	Private Equity (0.5)
FM417E	Venture Capital and Entrepreneurial Finance (0.5) #1
FM471E	Sustainable Finance and Impact Investing (0.5) #A

Other options: B

FM408	Financial Engineering (0.5) #
FM409	Risk Management in Financial Markets (0.5) #
FM412	Quantitative Security Analysis (0.5) #
FM476	Entrepreneurial Finance (0.5) #2C
FM477	International Finance A (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

1: FM417E can not be taken with FM476

2: FM476 can not be taken with FM417E

Footnotes

A: Structured Projects cannot be written on FM471E.

B: FM408, FM409, FM412, FM476 and FM477 are taught during the daytime only. To take this course,

students must be able to attend teaching during the day.

C: Structured Projects cannot be written on FM476.

Supplementary criteria for progression from the first to the second year of the MSc Finance (part-time)

To be eligible to proceed into the second year, candidates must attain at least a Pass grade in the two compulsory courses: FM422E and FM423E. If a candidate fails (but does not 'Bad Fail') one compulsory course, the Board may exceptionally allow progression to the second year. Exceptional progression will be at the sole discretion of the Board. If a candidate fails both of these compulsory courses they will not be allowed to progress to year two. If a candidate has a 'Bad Fail' in one or both courses they will not be allowed to progress to year two. A student shall normally be entitled to re-sit any failed courses only (on one occasion) and at the next normal opportunity according to the General Academic Regulations for Postgraduate Students <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/GeneralAcademicRegulations-all-PG-students.pdf>. The School may consider an application for repeat tuition in any failed courses from a student. Results obtained at re-sit shall bear their normal value.

MSc in Finance (part-time)

Programme Code: TMFI

Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences

Programme Code: TMHECSEX3

Department: Health Policy

For students starting this programme of study in 2024/25

(Previously titled 'Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Science')

24 month modular programme. Students take five compulsory half unit courses and options to the value of 1.5 units.

Paper Course number, title (unit value)

Year 1

Paper 1 HP4C1E Economic Analysis for Health Policy (0.5)

Paper 2 HP4C2E Quality and Outcomes in Clinical Sciences (0.5)

Paper 3 HP4C3E Economic Evaluation in Health Care (0.5)

Paper 4 HP4D7E Fundamentals of Management and Leadership in Health Care (0.5)

Year 2

Paper 5 HP4C5E Using Health Economics to Analyse and Inform Policy and Practice (0.5)

Paper 6 Courses to the value of 1.5 unit(s) from the following:

HP4A1E Financing Health Care (0.5)

HP4A2E Health Administration and Management (0.5)

HP4B2E Health Care Quality Management (0.5)

HP4B5E Statistical Methods in Health Care Economic Evaluation (0.5) (not available 2024/25)

HP4C4E Systematic Review and Meta-analysis (0.5)

HP4D2E Principles of Health Technology Assessment (0.5)

HP4D5E Methods for Evaluating Health Programs and Policies (0.5)

HP4D6E Behavioural Insights for Health Incentive

Design (0.5)
 HP4G1E Statistical Methods in Health Care
 Economic Evaluation (0.5)

Classification: For students starting *in or after* the 2018/19 academic year:

Students will take a total of four units of courses. All four units will count towards the calculation of the overall award according to the conditions set out in the Classification Scheme listed above.

Progression: Students wishing to defer sitting one or more examinations must seek permission according to the General Academic Regulations for Postgraduate Students <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/GeneralAcademicRegulations-all-PG-students.pdf>. Students must normally pass a minimum of three out of the four compulsory half units in Year One to be able to proceed to Year Two. The Sub-Board Chair/Programme Director has the discretion to consider progression where a student only passes two out of the four compulsory half unit courses. Students are permitted to re-sit failed exams in line with the School's General Academic Regulations for Postgraduate Students <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/GeneralAcademicRegulations-all-PG-students.pdf>.

Diploma: This Diploma is classified according to the Scheme for the Award of a Diploma <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeDiploma.pdf>. Students may be eligible for the award of a Diploma if, as a result of exceptional and unforeseen circumstances, they must leave the MSc programme after completing the four compulsory half units in Year One and two half units in Year Two. All courses count towards the degree classification. A Pass mark of 50 must be achieved in all courses for students to achieve an overall Pass in the Diploma. Students wishing to defer sitting one or more examinations must seek permission according to the Regulations for Diplomas <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForDiplomas.pdf>. Students are permitted to re-sit failed exams in line with the School's Regulations for Diplomas <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForDiplomas.pdf>.

Certificate: Students may be eligible for the award of a Certificate if, as a result of exceptional and unforeseen circumstances, they must leave the MSc programme after completing the four compulsory half units in Year One. The Certificate is classified on a Pass/Fail basis only. A Pass mark of 50 needs to be achieved in all courses for students to be eligible for the award of the Certificate. Higher marks in one course cannot compensate a Fail mark in another course. Students wishing to defer sitting one or more examinations must seek permission according to the Regulations for Certificates <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForCertificates.pdf>. Students are permitted to re-sit failed exams in line with the School's Regulations for Certificates <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForCertificates.pdf>.

[registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForCertificates.pdf](https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForCertificates.pdf).

Executive MSc in Health Economics, Policy and Management

Programme Code: TMHEPMEX

Department: Health Policy

For students starting this programme of study in 2024/25

Students take four compulsory half unit courses, options to the value of two units, and a dissertation.

Paper	Course number, title (unit value)
Year 1	
Paper 1	HP4A1E Financing Health Care (0.5)

Paper 3	HP4D1E Introduction to Management in Health Care (0.5)
Paper 4	HP4A3E Resource Allocation and Cost-effectiveness Analysis (0.5)
Year 2	
Paper 5	HP4B9E Dissertation in Health Economics, Policy and Management (0.5)
Paper 6	Courses to the value of 2.0 unit(s) from the following:
	HP4A2E Health Administration and Management (0.5)
	HP4B1E Pharmaceutical Economics and Policy (0.5)
	HP4B2E Health Care Quality Management (0.5)
	HP4B3E Measuring Health System Performance (0.5)
	HP4B4E Principles of Evidence-Based Medicine and Clinical Trials (0.5) (not available 2024/25)
	HP4B5E Statistical Methods in Health Care Economic Evaluation (0.5) (not available 2024/25)
	HP4B7E Advanced Health Economics (0.5)
	HP4C4E Systematic Review and Meta-analysis (0.5)
	HP4D2E Principles of Health Technology Assessment (0.5)
	HP4D5E Methods for Evaluating Health Programs and Policies (0.5)
	HP4D6E Behavioural Insights for Health Incentive Design (0.5)

Classification: Eight marks count towards classification: the four compulsory courses in Year One, the dissertation, and the best three marks from the optional courses in Year Two. The lowest mark of the optional courses (listed at Paper 6 in the programme Regulations) will automatically be excluded from the marks that will count towards the degree classification. Any failed or Bad Failed courses that count towards classification will be treated in accordance with paragraph 3.1 of the Classification Scheme above. A degree cannot be awarded where a candidate receives a Bad Fail mark in any course.

Progression: Students wishing to defer sitting one or more examinations must seek permission according to the General Academic Regulations for Postgraduate Students <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/GeneralAcademicRegulations-all-PG-students.pdf>. Students must normally pass a minimum of three out of the four compulsory half units in Year One to be able to proceed to Year Two. The Sub-Board Chair/Programme Director has the discretion to consider progression where a student only passes two out of the four compulsory half unit courses. Students are permitted to re-sit failed exams in line with the School's General

Academic Regulations for Postgraduate Students <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/GeneralAcademicRegulations-all-PG-students.pdf>.

Diploma: Students who cannot complete the MSc in Health Economics, Policy and Management due to unforeseen circumstances may be eligible for a Diploma. This Diploma is classified according to the Scheme for the Award of a Diploma <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeDiploma.pdf>. Students may be eligible for the award of a Diploma if they leave the programme after completing the four compulsory half units in Year One and two half units in Year Two. All courses count towards the Diploma classification. A Pass mark of 50 must be achieved in all courses for students to achieve an overall Pass in the Diploma. Students wishing to defer attempting one or more assessments must seek permission according to the General Academic Regulations. Students are permitted to repeat failed assessments in line with the School's General Academic Regulations and Regulations for Diplomas <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForDiplomas.pdf>.

Certificate: Students who cannot complete the MSc in Health Economics, Policy and Management due to unforeseen circumstances, and who are not eligible for a Diploma, may be eligible for a Certificate. Students may be eligible for the award of a Diploma if they leave the programme after completing the four compulsory half units in Year One. The certificate is classified on a Pass/Fail basis only. A Pass mark of 50 needs to be achieved in all courses for students to be eligible for the award of the certificate. Higher marks in one course cannot compensate a Fail mark in another course. Students wishing to defer attempting one or more assessments must seek permission according to the General Academic Regulations. Students are permitted to repeat failed exams in line with the School's General Academic Regulations and Regulations for Certificates <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForCertificates.pdf>.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm](https://info.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm). Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm](https://info.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm).

Executive MSc in Health Economics, Policy and Management

Programme Code: TMHEPMEX

Department: Health Policy

For students starting this programme of study in 2023/24

Students take four compulsory half unit courses, options to the value of two units, and a dissertation.

Paper **Course number, title (unit value)**

Year 1

Paper 1	HP4A1E	Financing Health Care (0.5)
Paper 2	HP4A4E	Health Economics (0.5)
Paper 3	HP4D1E	Introduction to Management in Health Care (0.5)
Paper 4	HP4A3E	Resource Allocation and Cost-effectiveness Analysis (0.5)
Year 2		
Paper 5	HP4B9E	Dissertation in Health Economics, Policy and Management (0.5)
Paper 6	Courses to the value of 2.0 unit(s) from the following:	
	HP4A2E	Health Administration and Management (0.5)
	HP4B1E	Pharmaceutical Economics and Policy (0.5)
	HP4B2E	Health Care Quality Management (0.5)

Executive MSc in Healthcare Decision-Making, in collaboration with NICE

Programme Code: TMHDMNEX

Department: Health Policy

For students starting this programme of study in 2024/25

(previously titled 'Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE')

This is a two-year part-time modular programme in collaboration with the National Institute for Health and Care Excellence (NICE).

Students must take all eight half unit courses from the following:

Modules are staged in a progressive manner, that is, from introductory courses to general and then more specific and technical modules.

Paper	Course number, title (unit value)
Paper 1	HP4G2E Principles of Health Technology Assessment (0.5)
Paper 2	HP4F1E Impact Evaluation in Healthcare (0.5)
Paper 3	HP4F5E Health Care Regulation (0.5)
Paper 4	HP4G3E Economic Modelling for Health Care Decision Making (0.5)
Paper 5	HP4E5E Economics of the Pharmaceutical Sector (0.5)
Paper 6	HP4G4E Systematic Review and Meta-analysis (0.5)
Paper 7	HP4F6E Critical Appraisals of Clinical Trials and Real-World Evidence in Decision Making

Paper 8	HP4G1E Statistical Methods in Health Care Economic Evaluation (0.5)
---------	---

Notes: Students must normally pass a minimum of three out of the four compulsory half units in Year One to be able to proceed to Year Two. The Sub-Board Chair/Programme Director has the discretion to consider progression where a student only passes two out of the four compulsory half unit courses. Students are permitted to re-sit failed exams in line with the School's General Academic Regulations for Postgraduate Students <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/GeneralAcademicRegulations-all-PG-students.pdf>.

The MSc is a 24-month executive modular part-time degree programme. It features four intensive two-week on-campus teaching sessions, delivering eight 0.5 unit compulsory core courses. Assessment for each taught course will take place after the relevant teaching session, and consist of a combination of essays, take-home assessments, research projects and protocols.

All marks count towards degree classification. It may be a requirement to achieve Pass marks in some courses in order to be eligible for the award of the degree. Please consult with the Department until further details have been published.

Alternative exit options will be provided for students who cannot complete the MSc due to unforeseen circumstances.

An LSE Diploma is available following successful completion of 3.0 full units across six taught courses. Results from each 0.5 unit modules count toward the Diploma classification. Students must satisfy the conditions set out in the Scheme for the Award of a Diploma <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeDiploma.pdf> in order to be eligible for the award of a Diploma.

Students eligible for an LSE Certificate will have been registered on the programme and then cease studies following the completion of 2.0 full units across four taught courses over three teaching sessions. Students must achieve a mark of 50 or higher in each of these four courses in order to be eligible for the award of an LSE Certificate. LSE Certificate is classified on a Pass / Fail basis only.

MSc in International Strategy and Diplomacy

Programme Code: TMISDIP

Department: International Relations

For students starting this programme of study in 2024/25

Full-year programme. Students take 2.5 units of compulsory courses and a 1.5 unit dissertation.

Paper	Course number, title (unit value)
Paper 1	IR442E Diplomacy and Challenges (1.0)
Paper 2	IR443E Strategy in a Changing World (1.0)
Paper 3	IR444E Strategy in Action (0.5)
Paper 4	IR496E Dissertation: MSc International Strategy and Diplomacy (1.5 units) (1.5)

Executive Master of Laws (ELLM)

Programme Code: TMLL2EX

Department: Law School

For students starting this programme of study in 2024/25

1. The general regulations for MA and MSc Degrees and the Code of Practice for Taught Masters Programmes in the online Calendar apply to the Executive LLM programme except in the event of inconsistency when these regulations for the Executive LLM take priority.

2. In order to obtain the Degree, students must complete eight Executive LLM courses (see list below). Students must complete the requirements as a part-time student over a period of four years, or with the approval of the Programme Director within a period of six years. The minimum period within which the Degree can be completed is three years.

3. Alternative exit points are available to students who are not able to complete the Degree. An LSE Diploma in Legal Studies is available on completion of six courses and a Certificate of Legal Studies on the completion of four courses. There is no minimum period for completion of the alternative exit points of Certificate of Legal Studies or Diploma in Legal Studies. Please see the footnote at the bottom of this regulation for more information.

4. Courses should be chosen from the list below and are subject to availability as not every course will be offered each year. Subject to the availability of teaching staff, it is intended that every course be offered at least once within the four year degree period. No other courses at LSE or elsewhere may be taken as part of the Executive LLM programme.

Intensive Teaching

5. The Executive LLM courses will be taught in short intensive week-long sessions, which will typically be taught in the first half of April, September and December. Each course will provide between 24 and 26 hours of contact teaching time. Teaching will normally run from Monday to Friday. However, in the exceptional event where a course cannot be taught on the set weekday/s (e.g. due to last minute teacher illness), teaching may be extended to the Saturday and Sunday morning of that week. Accordingly, students are expected to book trains or flights for the day before teaching commences and should, where possible, book return trains or flights on the Sunday afternoon or evening following the completion of the course.

6. Where there is student demand we may elect also to offer some courses in two intensive weekends. The two weekends will not be more than four weekends apart. Where courses are offered in the intensive weekend format the same course will also be offered in week-long intensive format at least once every four years.

Payment of Fees

7. All Executive LLM offer holders will be required to pay a Registration Fee within 14 days of receiving their offer of admission. The registration fee is non-refundable. Only on receipt of the registration fee, may students register onto the programme. Registered students are then required to pay a per course tuition fee in advance of their chosen course date, to secure their place. Students will only be permitted to attend a module if payment is received in time. Fee payment deadlines can be found here: <https://info.lse.ac.uk/staff/divisions/Finance-Division/Fees-Income-and-Credit-Control/Instalment-options-Executive-Programmes>

8. The registration fee is non-refundable. If you withdraw from the course before starting a session or are unable to attend a session for which you have registered, all module fees will be credited to a module in a later session. You must inform the Programme Manager if you are unable to attend a module you are registered for. In exceptional circumstances, at the Director's discretion, the funds paid for that session will be refunded. Changes in fee levels may occur over the course of the programme. The student will remain liable for any difference between the fees chargeable at the later session and the fee credit from the module which the student withdrew from. Module fees are non-refundable, and will not be credited to another session, if you have attended classes but withdraw before the assessment.

9. It is our intent to offer each advertised module at least once

during the four year degree period. This may not always be possible due, for example, to teacher illness or resignation. It is possible that a module may need to be cancelled at short notice, such as where the teacher is unavailable or participant numbers are very low. If this happens, students will be given the option of taking another module during the same session or, alternatively, the fees paid towards that module will be held in credit for your next chosen module/session or refunded if preferred. Students will be informed of the withdrawal of a module no later than two weeks prior to the commencement of the module.

Assessment

10. All Executive LLM courses are assessed by either take-home examination or 8,000 word extended essay.

11. To comply with the Department's writing requirement at master's level, all students are required to write one extended essay of 8,000 words as the assessment for one of their courses to obtain the Degree, the Diploma or the Certificate. Students are not permitted to take more than three courses assessed by extended essay to obtain the Degree or the Diploma or more than one course assessed by extended essay to obtain a Certificate.

12. Extended essays must not exceed the set word limit and must be submitted by a set deadline. Students must provide evidence of original work or a capacity for critical analysis. Students will be required, at the time of submission of their work, to sign a statement on plagiarism. An oral examination may be held if the examiners so determine.

13. The take-home examinations will be set two months after the completion of the intensive teaching. The date of the examination will be provided at the date courses are available for selection. They will be uploaded and submitted electronically.

14. All students are required to write an extended essay of 8,000 words as the assessment for one of their courses to obtain the Degree, the Diploma or the Certificate. Students are not permitted to take more than three courses assessed by extended essay to obtain the Degree or the Diploma or more than one course assessed by extended essay to obtain a Certificate. The extended essay topic will be set by the course teacher. The student may propose essay topics and ideas to the teacher.

15. All students will be required to be online during the examination period in case there is any need to contact them.

16. Students will be able to re-sit a course examination once. A re-sit examination will be set as soon as possible after the student is notified of the failure. At the Programme Director's sole discretion in lieu of a re-sit or deferred examination the student may be required to submit an 8,000 word essay. This can only occur when the student has not already completed the maximum of three 8,000 word essays.

17. Any student who fails an exam twice in the same course will not be able to proceed to complete the Executive LLM programme. Students will not be able to proceed to take further courses if at the first sit and the re-sit examination are both bad fails or if the failure is not a bad fail but the student has failed another course following the re-sit. If such a student has already successfully completed 4 courses or 6 courses prior to such a failure, the student will be awarded a Certificate of Legal Studies or Diploma of Legal Studies.

Registration

18. The maximum period of registration on the programme is six years. Therefore completion of all the degree requirements (or Diploma, Certificate) must be within a six year period.

Course Completion Rate

19. Students will be expected to take one to two courses per year. Any student who fails to take a course for a two year period will be asked to provide reasons for the failure to complete courses. Any student who following such a request either fails to provide a response to the Programme Director or fails to complete a course in the year following the giving of these reasons, may be deregistered from the programme.

Degree Certificate

20. Students who successfully complete the Executive LLM examination requirements may elect to have one of the following titles attached to their degree certificate if, in the opinion of the

Programme Director of the LLM, the title reflects the course of study followed by the student. This would mean taking a minimum of 4 courses within a specialist area. The possible titles are listed below with the courses attached to those areas listed with them. If no such election is made, the LLM degree certificate will state 'LLM' without further specification.

LL446E	Art Law (0.5)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Exit Options

Diploma: This diploma is classified according to the Scheme for the Award of a Diploma, as a 3 unit programme subject to the following provisions. Students wishing to earn a diploma will have registered as Executive LLM students and then cease their studies after completing six courses (3 full units). All courses count towards the diploma classification. A Pass mark of 50 must be achieved in all courses for students to achieve an overall Pass in the diploma. Assessments for each of the courses will take place at the beginning of the next teaching session. Students wishing to defer attempting one or more assessments must seek permission according to the General Academic Regulations no later than eight weeks prior to the assessment date except in the case of exceptional circumstances, as set out in the General Academic Regulations. Students are permitted to repeat failed assessments in line with the School's General Academic Regulations and

Regulations for Diplomas.

Certificate: Students wishing to earn a certificate will have registered as Executive LLM students and then cease their studies after completing four courses (2 full units). The certificate is classified on a Pass/Fail basis only. A Pass mark of 50 needs to be achieved in all courses for students to be eligible for the award of the certificate. Higher marks in one course cannot compensate a Fail mark in another course. Students wishing to defer attempting one or more assessments must seek permission according to the General Academic Regulations no later than eight weeks prior to the assessment date except in the case of exceptional circumstances, as set out in the General Academic Regulations. Students are permitted to repeat failed assessments in line with the School's General Academic Regulations and Regulations for Certificates.

Executive Global MSc in Management

Programme Code: TMGLMG

Department: Management

For students starting this programme of study in 2024/25
A 17 month programme. Students take eight compulsory half unit courses (four units in total) and one non-assessed courses in Foundations of Management 2: Financial Control and Governance (modular) (MG457E).

Paper	Course number, title (unit value)	
Year 1		
Paper 1	MG440E	Managerial Economics (modular) (0.5)
Paper 2	MG441E	Foundations of Management (modular) (0.5)
Paper 3	MG443E	Organisational Behaviour and Leadership (modular) (0.5)
Paper 4	FM475E	Financial Management (modular) (0.5)
Paper 5	MG445E	Marketing Strategy (modular) (0.5)
Additional course	MG457E	Foundations of Management 2: Financial Control and Governance (modular) (0.0)
Year 2		
Paper 6	MG446E	Strategy, Organisation and Innovation (modular) (0.5)
Paper 7	MG447E	International Business Strategy and Emerging Markets (modular) (0.5)
Paper 8	MG498E	Dissertation/Capstone Project (modular) (0.5)

Executive Global Masters in Management - Progression Rules

Candidates who attain at least a Pass grade in MG440E, MG441E and MG443E will be eligible to proceed into the second year. FM475E and MG445E are not required for progression.

A student who does not meet this criterion must resit all failed/deferred papers in accordance with the resit process detailed below. If, following the resit attempt, a student:

- has attained at least a Pass grade in each of the first year papers, he/she will be eligible to proceed into the second year.
- has attained at least a Pass grade in at least one of the first year papers, he/she will be eligible to proceed into the second year:
- at the discretion of the Chair of the Sub-Board of Examiners; and
- subject to ratification by the Graduate School Board of Examiners (GSBE).
- Has failed all of the first year papers, he/she will not be eligible to proceed into the second year, as he/she will no longer be able to successfully complete the programme according to the School's Scheme for

the Award of a Taught Master's Degree (four units). The marks of any student who fails up to two papers over the course of the programme will be subject to the penalty rules stipulated at paragraph 3.2 of the School's Scheme for the Award of a Taught Master's Degree (four units).

Executive Global Masters in Management - Resit Process

A student shall normally be entitled to re-sit any failed courses only (on one occasion).

For first year courses required for progression, where the individual assessment takes the form of an assignment or take home exam, once grades have been ratified, the faculty member responsible for the failed first year course will set the new paper and deadline for re-submission to take place as soon as possible and before the beginning of the second year. Results for resits and any subsequent progression will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course.

The results of first year courses FM475E and MG445E will be formally ratified by the Sub-Board of Examiners and Graduate School Board of Examiners in November. If it is determined that as a result of a fail in one or both of these courses an award cannot be made the faculty member responsible for the failed course will set the new paper and deadline for re-submission to take place as soon as possible. A candidate resitting these courses cannot graduate until the July Sub-Board and Graduate School Board of Examiners has met to ratify their results.

For second year courses, once grades have been ratified by the Sub-Board of Examiners and it is determined that an award cannot be made, the faculty member responsible for the failed second year course will set the new paper and deadline for re-submission to take place as soon as possible. Results for resits and subsequent classification will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course. Resits for second year courses will result in delayed Graduation.

Executive Global MSc in Management

Programme Code: TMGLMG

Department: Management

For students starting this programme of study in 2023/24
A 17 month programme. Students take eight compulsory half unit courses (four units in total) and one non-assessed courses in Foundations of Management 2: Financial Control and Governance (modular) (MG457E).

Paper	Course number, title (unit value)	
Year 1		
Paper 1	MG440E	Managerial Economics (modular) (0.5)
Paper 2	MG441E	Foundations of Management (modular) (0.5)
Paper 3	MG443E	Organisational Behaviour and Leadership (modular) (0.5)
Paper 4	FM475E	Financial Management (modular) (0.5)
Paper 5	MG445E	Marketing Strategy (modular) (0.5)
Additional course	MG457E	Foundations of Management 2: Financial Control and Governance (modular) (0.0)
Year 2		
Paper 6	MG446E	Strategy, Organisation and Innovation

Paper 7	MG447E	(modular) (0.5) International Business Strategy and Emerging Markets (modular) (0.5)
Paper 8	MG498E	Dissertation/Capstone Project (modular) (0.5)

Executive Global Masters in Management - Progression Rules

Candidates who attain at least a Pass grade in MG440E, MG441E and MG443E will be eligible to proceed into the second year. FM475E and MG445E are not required for progression.

A student who does not meet this criterion must resit all failed/deferred papers in accordance with the resit process detailed below. If, following the resit attempt, a student:

- has attained at least a Pass grade in each of the first year papers, he/she will be eligible to proceed into the second year.
- has attained at least a Pass grade in at least one of the first year papers, he/she will be eligible to proceed into the second year:
- at the discretion of the Chair of the Sub-Board of Examiners; and
- subject to ratification by the Graduate School Board of Examiners (GSBE).
- Has failed all of the first year papers, he/she will not be eligible to proceed into the second year, as he/she will no longer be able to successfully complete the programme according to the School's Scheme for the Award of a Taught Master's Degree (four units). The marks of any student who fails up to two papers over the course of the programme will be subject to the penalty rules stipulated at paragraph 3.2 of the School's Scheme for the Award of a Taught Master's Degree (four units).

Executive Global Masters in Management - Resit Process

A student shall normally be entitled to re-sit any failed courses only (on one occasion).

For first year courses required for progression, where the individual assessment takes the form of an assignment or take home exam, once grades have been ratified, the faculty member responsible for the failed first year course will set the new paper and deadline for re-submission to take place as soon as possible and before the beginning of the second year. Results for resits and any subsequent progression will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course.

The results of first year courses FM475E and MG445E will be formally ratified by the Sub-Board of Examiners and Graduate School Board of Examiners in November. If it is determined that as a result of a fail in one or both of these courses an award cannot be made the faculty member responsible for the failed course will set the new paper and deadline for re-submission to take place as soon as possible. A candidate resitting these courses cannot graduate until the July Sub-Board and Graduate School Board of Examiners has met to ratify their results.

For second year courses, once grades have been ratified by the Sub-Board of Examiners and it is determined that an award cannot be made, the faculty member responsible for the failed second year course will set the new paper and deadline for re-submission to take place as soon as possible. Results for resits and subsequent classification will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board

of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course. Resits for second year courses will result in delayed Graduation.

Executive Master of Public Administration

Programme Code: TMMPAEX

Department: School of Public Policy

For students starting this programme of study in 2024/25

The EMPA is a 21 month programme. Students must take courses to the value of eight half units as set out below.

Paper Course number, title (unit value)

Year 1

Pre-sessionals
course

PP430E Introduction to Statistics for Public Policy (0.0)

Paper 1 PP4G8E Introduction to Public Policy (EMPA) (0.5)

Paper 2 PP478E Political Science and Public Policy (0.5) #

Paper 3 PP455E Empirical Methods for Public Policy (0.5) #

Paper 4 PP440E Economic Policy Analysis (0.5) #

Paper 5 PP4G9E Public Policy in Practice Workshop I (EMPA) (0.5)

Year 2

Papers 6 & 7 Courses to the value of 1.0 unit(s) from the following:

PP410E Public Economics for Public Policy (0.5) #

PP421E Global Market Economics (0.5) #

PP454E Development Economics (0.5) #

PP488E Regulatory Analysis (0.5) #

PP4J5E Fiscal Governance and Budgeting (0.5) #

PP4V8E Policy Paper (0.5) #

Paper 8 PP409E Public Policy in Practice Workshop II (EMPA) (0.5)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.

Please view the course guide for more information.

Students who achieve passing grades (50 and above) in at least 6 half units are eligible for the award of Diploma. Students can opt for this award either once they have completed six courses (i.e. all courses in Year One plus two further half units) or once they have completed the programme if they are not eligible for the award of the degree. The Diploma is classified according to the Scheme for the Award of a Diploma. Students who have achieved passing grades (50 and above) in at least 4 half units are eligible for the award of Certificate. The student is classified on a Pass/Fail basis only. Higher marks in one course cannot compensate a Fail mark in another course. The award of a Certificate or Diploma is subject to the application of the General Academic Regulations and the Certificate/Diploma regulations and classification schemes. The Certificate and Diploma are final exit awards with no option to subsequently be awarded the degree of Executive Master of Public Administration or Executive Master of Public Policy. Candidates who attain at least a Pass grade in each of the Year 1 courses PP478E, PP455E and PP440E will be eligible to progress to Year 2. The Year 1 courses PP4G8E and PP4G9E will not count towards progression but the grade will count towards the final degree classification.

Students wishing to defer the submission of one or more assessment components must seek permission according to the School's General Academic Regulations for Postgraduate Students <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/GeneralAcademicRegulations-all-PG-students>.

pdf prior to the assessment due date, except in the case of unforeseen and exceptional circumstances. Students deferring one or more assessment components in Year 1 may exceptionally progress to Year 2 and submit any deferred assessment at the next normal opportunity, if they complete and pass two of the three half units PP478E, PP455E and PP440E in Year 1.

Students failing one but not more than one of PP478E, PP455E and PP440E in Year 1 will normally be able to progress to Year 2, although this fail will count toward their degree classification according to the Scheme for the Award of a Taught Master's Degree. Students failing more than one of PP478E, PP455E and PP440E in Year 1 have to re-sit relevant assessment components and pass the required number of half units before they can progress to Year 2. Students failing up to one unit of courses but that still satisfy the progression rules may not need to resit those failed courses if they satisfy the compensation rules according to the Scheme for the Award of a Taught Master's Degree <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeTaughtMasters-FourUnits.pdf> at the end of the second year. Students that have more than one unit of fail at the end of the programme or those with one unit of fail that do not meet the progression rules must resit in order to be eligible for the award of the degree.

Students that fail courses and as a result fail to meet the progression rules must resit and satisfy the progression rules before they can proceed to Year 2. Students that receive a Bad Fail in any course will not be permitted to progress and must satisfy the progression rules after achieving a resit mark to proceed to Year 2.

Students are permitted to re-sit failed assessments in failed courses on one occasion only and in line with the School's General Academic Regulations for Postgraduate Students <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/GeneralAcademicRegulations-all-PG-students.pdf>.

The Sub-Board may recommend to the Graduate School Board of Examiners (GSBE) that a student can progress to year two of the programme even if they have not met the normal application of the progression rules. This can only be done on an exceptional basis where:

- (a) the Sub-Board has determined that a student has demonstrated that their progression has been affected by circumstances beyond their control through the exceptional circumstances procedure and;
- (b) the GSBE approves the Sub-Board's recommendation.

Executive MSc in Social Business and Entrepreneurship

Programme Code: TMMGSBEEEX

Department: Management

For students starting this programme of study in 2024/25 12 month programme. Students must take six compulsory half-unit courses and a full unit Altruistic Entrepreneur Project.

Paper **Course number, title (unit value)**

Paper 1	MG4H3E Social Impact and Its Evaluation (0.5) and MG4H6E The Hybrid Economy (0.5)
Paper 2	MG4H1E Foundations of Social Business I (0.5) and MG4H2E Foundations of Social Business II (0.5)
Paper 3	MG4H7E The Purpose-Driven Corporation (0.5) and MG4H8E Social Entrepreneurship in Context (0.5)
Paper 4	MG4H4E The Altruistic Entrepreneur Project (1.0)

Resit process: Once all grades have been ratified by the Sub-Board of Examiners and it is determined that an award cannot be made, the faculty member responsible for the failed course will set the new paper and deadline for re-submission to take place as soon as possible. Results for resits and subsequent classification will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course. Resits will result in delayed Graduation from December to July.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

Collaborative Programmes

CEMS Exchange

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Programme Code: TOMNCEMS2

Department: Management

For students starting this programme of study in 2024/25

CEMS Exchange (Autumn Term)

A one term (Autumn Term only) exchange programme for visiting CEMS MIM students. The CEMS MIM exchange programme is attached to the Global MSc in Management programme. Students from 33 partner exchange schools160 www.cems.org/academic-members/our-members/list/spend one term at LSE. Students should choose 4 half-unit courses from the list below to the total value of 2.0 units.

One half unit must be the compulsory MG464 CEMS Global Business Strategy course (0.5 units).

Autumn Term students are in addition required to attend the compulsory Block Seminar, as per the CEMS MIM curriculum requirements.

Student will not be required to complete summative assessments or examinations outside of their term of study. Students will be assessed during their term of study at the LSE.

Students are not permitted to take one (1.0) unit elective courses.

Paper 1 MG464 CEMS Global Business Strategy (0.5)

Papers 2, 3 & 4

Optional Courses

Courses to the value of 1.5 units selected from the option list below:

AC411	Accounting, Strategy and Control (0.5)

Global MSc in Management (CEMS MiM)

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Programme Code: TMGLMGCEMS

Department: Management

For students starting this programme of study in 2024/25
A two-year programme. Students are also awarded the CEMS Master's in International Management (MIM) degree, subject to successful completion of the CEMS MIM requirements.
Students take courses to the value of eight units which are spread over the two years. The programme includes: two units at a partner CEMS Institution (MG410 Term Abroad); CEMS compulsory MG463 CEMS Global Leadership (H); and the course MG488 GMiM Capstone Course - Management in Action (H) taught over both years, Part A (unassessed) in Year 1 and Part B (assessed) in Year 2. All students are required to attend MG4A1 Introduction to Studying for GMiM.

Students may apply for an exemption from the following core courses taking place in Year 1: MG431 Managerial Economics, MG4E2 Marketing Management and MG434 Organisational Behaviour. A maximum of two course exemptions may be permitted for each student.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Introductory

course	MG4A1	Introduction to Studying for GMiM (0.0)
Paper 1	MG458	Foundations of Management I: Organisations and Management Theory (0.5) and MG459 Foundations of Management 2 (0.5)

Paper 2	MG431	Managerial Economics (0.5)
---------	-------	----------------------------

And either one from:

MY451A	Introduction to Quantitative Analysis (0.5)
--------	---

MY451W Introduction to Quantitative Analysis (0.5)
MY465 Intermediate Quantitative Analysis (0.5) #
or upon satisfactorily demonstrating that they have sufficient statistical knowledge they may take one from the list below or any other suitable quantitative methods course subject to the approval of the programme director:

MY452A	Applied Regression Analysis (0.5) #
MY452W	Applied Regression Analysis (0.5) #
MY465	Intermediate Quantitative Analysis (0.5) #

Or

Upon satisfactorily demonstrating that they have a degree in economics and have passed, as part of that degree, a course in managerial economics, microeconomics or industrial organisation, students may be exempted from MG431 and will be free to take an elective course, subject to the approval of the Programme Director. Students must select one from:
MY451A Introduction to Quantitative Analysis (0.5)
MY451W Introduction to Quantitative Analysis (0.5)
MY465 Intermediate Quantitative Analysis (0.5) #
or upon satisfactorily demonstrating that they have sufficient statistical knowledge they may take one from the list below or any other suitable quantitative methods course subject to the approval of the programme director:

MY452A	Applied Regression Analysis (0.5) # or
MY452W	Applied Regression Analysis (0.5) # or
MY465	Intermediate Quantitative Analysis (0.5) #

and 0.5 units from the Elective Courses listed below:

Elective Courses	MG434	Organisational Behaviour and Leadership (0.5) and MG4E2 Marketing Management (0.5)
------------------	-------	---

Or

Upon satisfactorily demonstrating that they have a degree in marketing, or in management or business administration with a significant concentration in marketing, may be exempted from MG4E2 and will be free to take an elective course, subject to the approval of the Programme Director.

Students must select courses to the value of 1.0 unit(s), which may include MG434 Organisational Behaviour (0.5), and a further 0.5 units from the Elective Courses listed below:

MG434	Organisational Behaviour and Leadership (0.5)
-------	---

and 0.5 units from the Elective Courses listed below:
Elective Courses

Or

Upon satisfactorily demonstrating that they have a degree in management of business administration with significant knowledge of organisational behaviour, students may be exempted from MG434 and will be free to take an elective course, subject to the approval of the Programme Director.

Students must select courses to the value of 1.0 unit(s), which may include MG4E2 Marketing Management (0.5), and a further 0.5 units from the Elective Courses listed below:

MG4E2	Marketing Management (0.5)
-------	----------------------------

Elective Courses

Paper 4	Electives to the value of 1.0 full units
	<i>Elective Courses</i>

Compulsory course

As part of Paper 4, students also take the compulsory unassessed part of MG488:	MG488A	GMiM Capstone Course - Management in Action (0.0)

Public Sector (0.5)
ST429 Statistical Methods for Risk Management
(0.5) #

Or another MSc-level elective course which is offered
in the School, subject to approval of the course leader
and the Programme Director.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

1: Before taking AC416 you must take AC480

2: GI407 can not be taken with GI409, GI420

means there may be prerequisites for this course.

Please view the course guide for more information.

SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF MSC MANAGEMENT

The following rules set out what marks are required in order to be eligible to proceed into the second year. Students with the following mark profiles progress as follows:

Pass marks in all first year courses allows progression to year two.

A half unit Fail mark or a half unit Bad Fail mark, or a half unit deferral, with at least Pass marks in all other courses will allow progression to year two.

One full unit (or two half units) of Fail marks (which could include no more than one half unit Bad Fail mark), or a full unit of deferral, with at least Pass marks in all other courses, including one half unit of Merit marks will allow progression to year two.

Two Bad Fail marks (full or half units) will not allow progression to year two.

Three or more (full or half units) Fails, Bad Fail marks or deferrals will not allow progression to year two.

Students must resubmit all failed components of assessments in courses in which they receive a Bad Fail mark in order to be eligible for the award of a degree. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.

Exchange Term Abroad

Students successful in securing a place on the CEMS exchange will spend Autumn Term in Year 2 abroad at one of our CEMS partner schools. Students must meet all progression requirements for year 1 Global Master's in Management. The Department of Management reserves the right to withdraw an exchange offer in the event of academic misconduct or non-compliance with School guidelines.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

Global MSc in Management (CEMS MiM)

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Programme Code: TMGLMGCEMS

Department: Management

For students starting this programme of study in 2023/24

A two-year programme. Students are also awarded the CEMS Master's in International Management (MIM) degree, subject to successful completion of the CEMS MIM requirements.

Students take courses to the value of eight units which are spread over the two years. The programme includes: two units at a partner CEMS Institution (MG410 Term Abroad); CEMS compulsory MG463 CEMS Global Leadership (H); and the course MG488 GMiM Capstone Course - Management in Action (H) taught over both

years, Part A (unassessed) in Year 1 and Part B (assessed) in Year 2.

All students are required to attend MG4A1 Introduction to Studying for GMiM.

Students may apply for an exemption from the following core courses taking place in Year 1: MG431 Managerial Economics, MG4E2 Marketing Management and MG434 Organisational Behaviour. A maximum of two course exemptions may be permitted for each student.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Introductory

course MG4A1 Introduction to Studying for GMiM (0.0)

Paper 1 MG458 Foundations of Management I: Organisations and Management Theory (0.5) **and** MG459 Foundations of Management 2 (0.5)

Paper 2 MG431 Managerial Economics (0.5)

And either one from:

MY451A Introduction to Quantitative Analysis (0.5)

MY451W Introduction to Quantitative Analysis (0.5)

MY465 Intermediate Quantitative Analysis (0.5) #

or upon satisfactorily demonstrating that they have sufficient statistical knowledge they may take one from the list below or any other suitable quantitative methods course subject to the approval of the programme director:

MY452A Applied Regression Analysis (0.5) #

MY452W Applied Regression Analysis (0.5) #

MY465 Intermediate Quantitative Analysis (0.5) #

Or

Upon satisfactorily demonstrating that they have a degree in economics and have passed, as part of that degree, a course in managerial economics, microeconomics or industrial organisation, students may be exempted from MG431 and will be free to take an elective course, subject to the approval of the Programme Director. Students must select one from: MY451A Introduction to Quantitative Analysis (0.5) MY451W Introduction to Quantitative Analysis (0.5) MY465 Intermediate Quantitative Analysis (0.5) # **or upon satisfactorily demonstrating that they have sufficient statistical knowledge they may take one from the list below or any other suitable quantitative methods course subject to the approval of the programme director:**

MY452A Applied Regression Analysis (0.5) # **or**

SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF MSc MANAGEMENT

The following rules set out what marks are required in order to be eligible to proceed into the second year. Students with the following mark profiles progress as follows:

Pass marks in all first year courses allows progression to year two.

A half unit Fail mark or a half unit Bad Fail mark, or a half unit deferral, with at least Pass marks in all other courses will allow progression to year two.

One full unit (or two half units) of Fail marks (which could include no more than one half unit Bad Fail mark), or a full unit of deferral, with at least Pass marks in all other courses, including one half unit of Merit marks will allow progression to year two.

Two Bad Fail marks (full or half units) will not allow progression to year two.

Three or more (full or half units) Fails, Bad Fail marks or deferrals will not allow progression to year two.

Students must resubmit all failed components of assessments in courses in which they receive a Bad Fail mark in order to be eligible for the award of a degree. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value. Exchange Term Abroad

Students successful in securing a place on the CEMS exchange will spend Autumn Term in Year 2 abroad at one of our CEMS partner schools. Students must meet all progression requirements for year 1 Global Master's in Management. The Department of Management reserves the right to withdraw an exchange offer in the event of academic misconduct or non-compliance with School guidelines.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

Global MSc in Management (MBA Exchange)

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Programme Code: TMGLMG MBA

Department: Management

For students starting this programme of study in 2024/25

A two-year programme. Students take courses to the value of eight units spread evenly over the two years.

Students complete the course MG488 GMiM Capstone Course - Management in Action (H) over both years, Part A (unassessed) in Year 1 and Part B (assessed) in Year 2. Students also complete two units at a partner institution (MG410 Term Abroad).

All students are required to attend MG4A1 Introduction to Studying for GMiM.

Students may apply for an exemption from the following core courses taking place in Year 1: MG431 Managerial Economics, MG4E2 Marketing Management and MG434 Organisational Behaviour. A maximum of two course exemptions may be permitted for each student.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Introductory

course	MG4A1	Introduction to Studying for GMiM (0.0)
--------	-------	---

Paper 1	MG458	Foundations of Management I: Organisations and Management Theory (0.5) and MG459 Foundations of Management 2 (0.5)
---------	-------	---

Paper 2	MG431	Managerial Economics (0.5)
---------	-------	----------------------------

And one from:

MY451A	Introduction to Quantitative Analysis (0.5)
--------	---

MY451W	Introduction to Quantitative Analysis (0.5)
--------	---

MY452A	Applied Regression Analysis (0.5) #
--------	-------------------------------------

MY452W	Applied Regression Analysis (0.5) #
--------	-------------------------------------

MY465	Intermediate Quantitative Analysis (0.5) #
-------	--

Or

Upon satisfactorily demonstrating that they have a degree in economics and have passed, as part of that degree, a course in managerial economics, microeconomics or industrial organisation, students may be exempted from MG431 and will be free to take an elective course, subject to the approval of the Programme Director. - EU4A7 Political Economy of the Green Transition in Europe (0.5)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Progression:

1 Students who attain at least a Pass grade in each of their four LSE units will be eligible to proceed into the second year of the programme.

1.2 A student who has attained a (good) Fail grade in courses to the value of 0.5 units and at least a Pass grade in the remaining courses will be eligible to proceed into the second year.

1.3 A student who has attained a (good) Fail grade in courses to the value of 1.0 unit and at least a Pass grade in the remaining courses may only progress if a mark of at least 60% has been achieved in courses of an equivalent value or an aggregate mark of at least 330 has been achieved in the non-failed courses.

1.4 A student who receives a Bad Fail in any course or who otherwise fails to meet the above criteria for progression will not be able to progress to the second year of the programme and will be entitled to repeat the failed courses at LSE as follows: A student shall normally be entitled to repeat any failed courses only (on one occasion) and at the next normal

opportunity, in accordance with the General Academic Regulations. Results obtained following a repeated attempt at an LSE assessment shall bear their normal value but the resit attempt will be capped at the grade of Pass.

1.5 A student who has completed year one and is unable to complete year two of the programme in Fudan will not receive an interim award. A student who has successfully completed year one, but who can produce evidence of very exceptional circumstances requiring that they withdraw from year 2 of the degree may seek permission from both LSE and Fudan University to transfer onto the MSc Political Economy of Europe degree at LSE.

LSE-Fudan Double Degree in the Global Political Economy of China and Europe

Year 1 at LSE

The first year is spent at LSE, studying the MSc in Political Economy of Europe.

Year 2 at Fudan

Students will join the Master of Management Science in Public Policy at Fudan University.

MSc in Political Economy of Europe (LSE and Fudan)

Programme Code: TMEUPE

Department: European Institute

For students starting this programme of study in 2023/24

Full-year programme. Students must take one unit of semi-compulsory courses, optional courses to the value of two units and a policy incubator project as shown. Additionally, all students must take EU470 **'How do we know? An introduction to research design and methods in political economy'** in preparation for the policy incubator. Students must also select EU450 Engaging with Europe: Professional Skills during course choice. Places on EU450 workshops are on a first come first served basis.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Professional development

course EU450 Engaging with Europe: Professional Skills (0.0)

Paper 1 Courses to the value of 1.0 unit(s) from the following:

- EU455 Concepts in Political Economy (0.5)
- EU491 Political Economy in Theory and History (0.5)
- EU492 Political Economy of Integration and Fragmentation in Europe (0.5)

Students without some background in European politics and policy-making or economics are strongly encouraged to take one or both of the following to support their studies:

- EU409 Basic Economic Concepts for European Political Economy (0.0) (withdrawn 2024/25)
- EU4V9 Concepts in Political Science and Public Policy (0.0) (withdrawn 2024/25)

Paper 2 Courses to the value of 1.0 unit(s) from the following:

Political Economy in Action:

- EU421 Policy-Making in the European Union (0.5) #
- EU443 European Models of Capitalism (0.5)
- EU446 The Political Economy of European Monetary Integration (0.5) #
- EU449 Emerging Markets, Political Transition and Economic Development in Central and Eastern Europe (0.5) # (withdrawn)

means there may be prerequisites for this course. Please view the course guide for more information.

LSE-LSHTM MSc in Health Policy, Planning and Financing

Programme Code: TIHPPF

Department: Health Policy

For students starting this programme of study in 2024/25

Full-year programme taught jointly with the London School of Hygiene and Tropical Medicine (LSHTM). Students must take courses to the value of five units as shown below, and undertake a 10,000 word dissertation (value of one unit). It is mandatory that students take equal number of half-unit value courses (4:4 split) between the two institutions. It is required that exactly two first-term courses are taken at the London School of Hygiene and Tropical Medicine. The dissertation will be completed during the summer.

Course guides for all LSE courses can be accessed via the hyperlinks below. For information about LSHTM courses, the LSHTM module specifications can be viewed here <https://www.lshtm.ac.uk/study/courses/short-courses/modules-london#modules>.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper 1	HP400 Financing Health Care (0.5)
Paper 2	(LSHTM) 1107 Health Services (0.5) or (LSHTM) 1117 Health Policy Process and Power (0.5) A
Paper 3	Obligation for all students to take one additional course to the value of 0.5 units at LSE from the following:
	HP401 Introduction to Health Policy and Politics (0.5) A
	HP420 Health Economics (0.5) B

Paper 4	<p>HP424 Pharmaceutical Economics and Policy (0.5)</p> <p>Obligation for all students to take one additional course to the value of 0.5 units at LSHTM from the following:</p> <p>(LSHTM) 1107 Health Services (0.5)</p> <p>(LSHTM) 1117 Health Policy, Process and Power (0.5)</p> <p>A</p> <p>(LSHTM) 1123 Issues in Public Health (0.5)</p> <p>(LSHTM) 2001 Basic Epidemiology (0.5) #</p> <p>(LSHTM) 1103 Introduction to Health Economics (0.5)</p> <p>B</p>

LSE-Sciences Po Double Degree in the Political Economy of Development

Students take the first year at Sciences Po and the second year at LSE. At LSE students will follow the programme regulations for the MSc in Development Management.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

MSc in Development Management (LSE and Sciences Po)

Programme Code: TMDMSP

Department: International Development

For students starting this programme of study in 2024/25

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown.

Students who choose to concentrate their electives and dissertation in a certain topic area may elect to have a specialism in "African Development", "Population Studies" or "Applied Development Economics" attached to their degree certificate and transcript. To obtain the specialism indication, students must meet the criteria below.

African Development: This specialism is not available 2024/25.

Population Studies: students must take two courses from DV444, DV456, and MY476 and their dissertation topic must be approved as being appropriate for this specialism.

Applied Development Economics: students must take DV494 plus two courses from DV490, DV491, DV492.

If no such election is made, the degree certificate will state "Development Management" without further specification.

Paper 1	DV431	Development Management (1.0)
Paper 2	DV443	Development Management Consultancy Project (0.5)
Paper 3	Courses to the value of 1.5 unit(s) from the following:	
	AC470	Accounting in the Global Economy (0.5) #

2: MY452W can not be taken with MY452A	

Footnotes

A: GY450 is non-assessed but compulsory.

B: DV407 is a capped course with priority for International Development students so admission is not guaranteed.

C: DV421 is a capped course with priority for International Development students so admission is not guaranteed.

LSE-Sciences Po Double Degree in Urban Policy

Students take the first year at Sciences Po and the second year at LSE. At LSE students will follow the programme regulations for **either** the MSc in Local Economic Development; **or** MSc in Regional and Urban Planning Studies; **or** MSc in Urbanisation and Development as follows:

Programme Code: TMURPO

Department: Geography and Environment

For students starting this programme of study in 2023/24

MSc in Local Economic Development

Full-year programme. Students must take courses to the value of three full units as shown and a dissertation (1 unit). A total of 4 units.

Papers 1 & 2 Courses to the value of 2.0 unit(s) from the following:

- GY404 Inclusive Growth (0.5) #
- GY409 Globalisation and territorial development: Theory, Evidence and Policy (0.5)
- GY410 Economics of Local and Regional Development (0.5)
- GY413 Regional Development and Policy (0.5) #
- GY415 Local Capacity and Economic Development Policy (0.5)

Paper 3 Courses to the value of 1.0 unit(s) from the following: Any course not already taken under Papers 1 & 2, from the Papers 1 & 2 options list below

- EU477 Labour Markets and the Political Economy of Employment in Europe (0.5) #
- GY400 The Economics of Urbanisation (0.5) #
- GY420 Environmental Regulation: Implementing Policy (1.0) (withdrawn 2024/25)
- GY428 Applied Quantitative Methods (0.5) #
- GY431 Cities, People and Poverty in the South (0.5) # (not available 2024/25)
- GY438 Urban Asia: Cities and Social Change (0.5) (not available 2024/25)
- GY447 The Economics of Regional and Urban Planning (0.5) #
- GY455 Economic Appraisal and Valuation (0.5)
- GY460 Techniques of Spatial Economic Analysis (0.5) #
- GY465 Concepts in Environmental Regulation (0.5)
- GY470 Urban Africa (0.5) (not available 2024/25)
- GY475 Issues in Environmental Governance (0.5)
- GY476 Applied Geographical Information Systems (0.5)
- GY480 Remaking China: Geographical aspects of Development and Disparity (0.5)
- MY452A Applied Regression Analysis (0.5) #1
- MY452W Applied Regression Analysis (0.5) #2

A relevant course from another programme as approved by the Programme Director.

Papers 1 & 2 options list

Paper 4 GY486 Dissertation - MSc Local Economic Development (1.0)

MSc in Regional and Urban Planning Studies

Full-year programme. Students must take courses to the value of three full units and a dissertation. Additionally all students are required to take GY450 Planning Practice and Research.

This programme is externally accredited by the RICS.

Further information is available on the Geography and Environment Department lse.ac.uk/collections/geographyAndEnvironment/ website (see Quick Links to Regional and Urban Planning Studies).

Double Master of Public Administration (LSE-Columbia)

Programme Code: TMPPC

Department: School of Public Policy

For students starting this programme of study in 2024/25

The programme is taught over two academic years (21 months).

Year 1 at LSE

The first year is spent at the London School of Economics.

Year 2 at Columbia University

Students will join the Master of Public Administration at the School of International and Public Affairs at Columbia University.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting

specific prerequisite requirements.

Before Year 1

Introductory course

All students must attend the following MPA introductory course:

PP408 MPA Introductory Course (0.0)

Year 1

Paper 1

PP440 Micro and Macro Economics (for Public Policy) (1.0)

Or

Upon satisfactorily demonstrating prior knowledge of Micro and Macro Economics, students may be exempted from PP440 and will be free to take an additional unit of option course subject to the approval of the Programme Director.

Paper 2

PP455 Quantitative Approaches and Policy Analysis (1.0)

Or

PP456 Quantitative Approaches and Policy Analysis (0.5)

and an additional 0.5 unit option course - for students who demonstrate sufficient prior knowledge of Econometrics to be exempt from the first half of PP455

Or

PP419 Advanced Empirical Methods for Policy Analysis (0.5) #

and an additional 0.5 unit option course - for students who demonstrate sufficient prior knowledge of Econometrics to be exempt from PP455 in its entirety

Paper 3

PP478 Political Science for Public Policy (1.0)

Paper 4

Courses to the value of 1.0 unit(s) from the following:
FM471 Sustainable Finance and Impact Investing (0.5) #

PP406 Philosophy for Public Policy (0.5)

PP410 Public Economics for Public Policy (0.5) #A

PP413 Growth Diagnostics in Development: Theory and Practice (0.5) #

PP414 Policy-Making: Process, Challenges and Outcomes (0.5)

PP415 Technology, Data Science and Policy (0.5) #

PP417A The Practice of Effective Climate Policy (0.5)

PP417W The Practice of Effective Climate Policy (0.5)

PP418 Globalisation and Economic Policy (0.5) #B

PP419 Advanced Empirical Methods for Policy Analysis (0.5) #C

PP423 Anticipatory Policymaking (0.5)

PP424 Happiness and Public Policy (0.5)

PP426 Public Policy for Blockchains and Digital Assets (0.5) #

PP431 Reimagining Capitalism (0.5)

PP432 International Organisations, Policymaking and Diplomacy in a contested world (0.5)

PP433 Topics in Model Based Quantitative Analysis for Public Policy (0.5) #

PP434 Automated Data Visualisation for Policymaking (0.5)

PP435 Trade Policy and Development (0.5) #

PP448 International Political Economy and Development (0.5)

PP449 Comparative Political Economy and Development (0.5)

PP454 Development Economics (1.0) #D

PP465 City-Making: the Politics of Urban Form (0.5)

PP4E5 Innovations in the governance of public services delivery (0.5)

PP4G3 Designing and Managing Change in the Public Sector (0.5)

In addition, students may choose courses from elsewhere in LSE with approval of the Programme Director and subject to acceptance by the course convenor. Availability of a place on a course outside the School of Public Policy is not guaranteed and is subject to space, regulations, and timetable constraints.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Footnotes

A: Designed for Year 2 students; only available in Year 1 with permission from the Programme Director.

B: Designed for Year 2 students; only available in Year 1 with permission from the Programme Director.

C: Designed for Year 2 students; only available in Year 1 with permission from the Programme Director.

D: Designed for Year 2 students; only available in Year 1 with permission from the Programme Director.

Supplementary criteria for progression from the first to the second year of the Double Master of Public Administration (LSE-University of Columbia)

1.1 Students who attain at least a Pass grade in each of the first year courses will be eligible to proceed into the second year of the degree at the University of Columbia.

1.2 A student who has attained a Fail grade in courses to the value of 0.5 units and at least a Pass grade in the remaining courses to the value of 3.5 units will be eligible to proceed into the second year.

1.3 A student who has attained a Fail grade in courses to the value of 1.0 unit, may only progress if a mark of at least 60% has been achieved in courses of an equivalent value or an aggregate mark of at least 330 has been achieved in the non-failed courses.

1.4 A student who receives a Bad Fail in any course or who otherwise fails to meet the above criteria for progression will not be able to progress to the second year of the degree at the University of Columbia and will be entitled to repeat the failed courses as follows:

- A student shall normally be entitled to repeat any failed courses only (on one occasion) and at the next normal opportunity, in accordance with paragraph 30 of the General Academic Regulations. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.

- A student who has completed year one at LSE and is unable to complete year two of the degree at the University of Columbia will not receive an interim award.

Double Master of Public Administration (LSE-Sciences Po)

Programme Code: TMPPSP

Department: School of Public Policy

For students starting this programme of study in 2024/25

The programme is taught over two academic years (21 months).

Year 1 at Sciences Po

The first year is spent at the School of Public Affairs at Sciences Po.

Year 2 at the LSE

Students will join the London School of Economics

To be awarded the LSE part of the degree, students must complete courses to the value of 4.0 units. Some courses have a unit value of 1.0 and some have a unit value of 0.5.

No interim award is available: students completing courses with

a total value of less than 4.0 units receive no award, regardless of performance in the courses that have been successfully completed.

Students who successfully complete courses to the value of 4.0 units may elect to have one of the specialism titles below referenced on their degree certificate if the student has passed the courses attached to that specialism. If no such election is made, or if a student does not pass all of the courses listed under a specialism, the LSE degree certificate will not state a specialism. Students may take courses from other specialisms as option courses.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper 1	PP4B3	MPA Capstone Project (1.0)
Paper 2	PP425	Strategic Policymaking: Economic Analysis, Narrative Development, Political Feasibility, and Implementation (0.5) # (not available 2024/25)

Paper 3 & 4 Courses to the value of between 2.5 unit(s) from the following options list:

MPA Dual Degree (LSE and Hertie)

This programme is 21 months.

Programme Code: TMDMPA4

Department: School of Public Policy

For students starting this programme of study in 2024/25

1.

Route 1

Year 1 at LSE

Before Year 1

All students attend the following MPA introductory course:

PP408 MPA Introductory Course (0.0)

During Year 1

All students must complete the three Compulsory Courses in Papers 1, 2 & 3 below:

Paper 1 PP440 Micro and Macro Economics (for Public Policy) (1.0)

Or

Upon satisfactorily demonstrating prior knowledge of Micro and Macro Economics, students may be exempted from PP440 and will be free to take an additional unit of option course subject to the approval of the Programme Director.

Paper 2 PP455 Quantitative Approaches and Policy Analysis (1.0)

Or

PP456 Quantitative Approaches and Policy Analysis (0.5) 1

and an additional 0.5 unit option course - for students who demonstrate sufficient prior knowledge of Econometrics to be exempt from the first half of PP455

Or

PP419 Advanced Empirical Methods for Policy Analysis (0.5) #

and an additional 0.5 unit option course - for students who demonstrate sufficient prior knowledge of Econometrics to be exempt from PP455 in its entirety

Paper 3 PP478 Political Science for Public Policy (1.0)

Paper 4 Courses to the value of 1.0 unit from the MPA Course List below:

MPA Dual Degree Course List

Note: The course(s) chosen by the student must have a total credit value of 1.0 unit (therefore, either one course with a credit value of 1.0, or two courses which both have a credit value of 0.5).

Year 2 at the Hertie School of Governance

On successful completion of the first year of that programme at LSE, students who have accepted an offer of a dual degree place will transfer to the MPA Dual Degree. Students will follow the MPP programme at Hertie.

2.

Route 2

Year 1 at the Hertie School of Governance

Students will follow the MPP programme at Hertie.

Year 2 at LSE

Students must take courses to the value of four units as set out below:

Paper 1 PP4B3 MPA Capstone Project (1.0)

Paper 2 PP4B4 Dissertation (1.0)

Paper 3 PP425 Strategic Policymaking: Economic Analysis, Narrative Development, Political Feasibility, and Implementation (0.5) # (not available

2024/25)

Papers 4 & 5 Courses to the value of 1.5 unit(s) from the following:

MPA Dual Degree Course List

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.
Please view the course guide for more information.

1: PP456 can not be taken with PP455

2: PP414 can not be taken with PP414W

3: PP414W can not be taken with PP414

4: PP417A can not be taken with PP417W

5: PP417W can not be taken with PP417A

6: PP4B4 can not be taken with PP4V8

MSc in Global Media and Communications (with Fudan, USC or UCT)

Full-time programme taken over two calendar years. Students must take courses at LSE as shown below and follow either the programme at Fudan or USC or UCT in Year 2.

Progression rules: Progression to Year 2 of the programme will be subject to the satisfactory achievement of the academic requirements of Year 1 at LSE. This means that a student who has failed and/or deferred more than 1 unit cannot proceed to the second year. In such instances the student must sit or resit the required assessment/s and satisfy this progression rule in order to proceed to Year 2.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

MSc in Global Media and Communications (LSE and Fudan)

Programme Code: TMGLMEC02

Department: Media and Communications

For students starting this programme of study in 2024/25

Year 1 at LSE

Students take a total of three LSE units and a dissertation as shown.

Paper 1	MC408	Theories and Concepts in Media and Communications (0.5) #
And one of the following 0.5 unit courses:		
	MC4M1	Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (0.5) or
	MC4M7	Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis) (0.5) #A
Paper 2	MC411	Media and Globalisation (0.5) #
Paper 3	Courses to the value of 1.5 unit(s) from the following:	
	GI422	Transnational Sexual Politics (1.0)
	MC407	International Media and The Global South (0.5) #
	MC416	Representation in the Age of Globalisation (0.5) #
	MC420	Identity, Transnationalism and the Media (0.5) # (not available 2024/25)
	MC423	Global Media Industries (0.5) #

 599 Special Topics (various special one-time course

offerings

(Fa) means Fall semester

(Sp) means Spring semester

(Sm) means Summer semester

In addition to coursework offered at the Annenberg School of Communication, subject to the consent of the candidate's USC adviser and program director, students may take up to a maximum of 4 units of at the 400-level at Annenberg and graduate-level coursework from other schools or departments at the University of Southern California towards their remaining 20 unit requirement.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Footnotes

A: MY452 is an advanced Applied Regression Analysis course offered by the Department of Methodology and must be taken by students who select MC4M7. Students wishing to select this option need to already have a grounding in quantitative methods and must seek approval from the Programme Director. Approval is also subject to timetabling constraints.

B: The dissertation must be between 10,000 and 12,000 words). Passing MC499 is a requirement for passing the programme.

MSc in Global Media and Communications (LSE and UCT)

Programme Code: TMGLMEC03

Department: Media and Communications

For students starting this programme of study in 2024/25

(This programme is not available in 2024/25)

Year 1 at LSE

Students take a total of three LSE units and a dissertation as shown.

Paper 1	MC408	Theories and Concepts in Media and Communications (0.5) #
	And	one of the following 0.5 unit courses:
	MC4M1	Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (0.5) or
	MC4M7	Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis) (0.5) #A
Paper 2	MC411	Media and Globalisation (0.5) #
Paper 3	Courses to the value of 1.5 unit(s) from the following:	
	GI422	Transnational Sexual Politics (1.0)
	MC407	International Media and The Global South (0.5) #
	MC416	Representation in the Age of Globalisation (0.5) #
	MC420	Identity, Transnationalism and the Media (0.5) # (not available 2024/25)
	MC423	Global Media Industries (0.5) #
	MC426	Film Theory and World Cinema (0.5) #
	MC428	Media Culture and Neoliberalism in the Global South (0.5) #
	MC429	Humanitarian Communication: Realities, Challenges and Critiques (0.5) #
	MC433	Technology and Justice (0.5) # (not available 2024/25)
	MC436	Mediating the Past (0.5) #
	MC437	Media, Data and Social Order (0.5) #
	MC438	Mediated Feminisms (0.5) #
	MC439	Media, Technology, and the Body (0.5) # (not available 2024/25)
	MC440	Children, Youth and Media (0.5) #
	Any other MSc-level course which is offered in the	

School, subject to the consent of the candidate's programme director. NOTE: Students can take no more than one full unit of courses from outside the department of Media and Communications (non MC-prefixed courses).

Paper 4 MC499 Dissertation: Media and Communications (1.0) B

Year 2 at UCT

Paper 5 Students are required to complete a minor dissertation research project or creative production, two compulsory taught courses and two elective taught courses of which no more than one can be at HEQF Level 8 (4000 level).

Compulsory courses

FAM4011F/S Media Internship (HEQF Credits 24, HEQF Level 8)

FAM5013F Advanced Media Methodology (HEQF Credits 24, HEQF Level 9)

FAM5006W Master's Media Research Project

Or FAM5012W Master's Media Creative Production (HEQF Credits 96, HEQF Level 9)

Elective courses

Students select one F elective and one S elective course from the list below. Not all electives may be offered every year and only one elective may be on HEQF Level 8 (4000 level). One of the two elective courses may be taken in another cognate UCT department such as the Centre for African Studies, Historical Studies, Political Studies, or Anthropology:

AM4007F Narrative Literary Journalism

FAM4010F Media Markets and Media Strategy

FAM4013F Political Communication

FAM4017F Advanced Television Analysis

FAM4032F Understanding Public Argumentation

FAM4033F Screenwriting

FAM5039F Approaches to African Cinema

FAM4004S Avant-Garde Film

FAM4014S Political Journalism

FAM4015S Environmental Documentary

FAM4016S Wildlife Documentary

FAM4031S South African Public Rhetoric

FAM4034S Forms and Theories of Adaptation

FAM5011S Media and the Public Domain

FAM5016S Creative Non-Fiction

FAM5036S Rhetoric of SA Social Memory

FAM5038S Mobile Media and Communications

FAM5040S Conceptualising SA Cinema

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.

Please view the course guide for more information.

PP4J2	New Institutions of Public Policy: Strategic Philanthropy, Impact Investment and Social Enterprise (0.5) G
PP4J4	Designing and Implementing Evidence-Informed Policies and Programmes (0.5) (not available 2024/25)
PP4J5	Fiscal Governance and Budgeting (0.5) (not available 2024/25)
PP4X6	Welfare Analysis and Measurement (1.0) (not available 2024/25)
	In addition, students may choose up to 1.0 unit (per year of study) of courses from elsewhere in LSE with approval of the Programme Director and subject to acceptance by the course convenor. Availability of a place on a course outside the School of Public Policy is not guaranteed and is subject to space, regulations, and timetable constraints.

MSc in Global Media and Communications (with Fudan, USC or UCT)

Full-time programme taken over two calendar years. Students must take courses at LSE as shown below and follow either the programme at Fudan or USC or UCT in Year 2.

Progression rules: Progression to Year 2 of the programme

will be subject to the satisfactory achievement of the academic requirements of Year 1 at LSE. This means that a student who has failed and/or deferred more than 1 unit cannot proceed to the second year. In such instances the student must sit or resit the required assessment/s and satisfy this progression rule in order to proceed to Year 2.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

MSc in Global Media and Communications (LSE and Fudan)

Programme Code: TMGLMEC02

Department: Media and Communications

For students starting this programme of study in 2023/24

Year 1 at LSE

Students take a total of three LSE units and a dissertation as shown.

Paper 1	MC408	Theories and Concepts in Media and Communications (0.5) #
	And one of the following 0.5 unit courses:	
	MC4M1	Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (0.5) or
	MC4M7	Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis) (0.5) #A
Paper 2	MC411	Media and Globalisation (0.5) #
Paper 3	Courses to the value of 1.5 unit(s) from the following:	
	GI422	Transnational Sexual Politics (1.0)
	MC407	International Media and The Global South (0.5) #

 528 Web Designs for Organizations (4, Fa/Sp)
 530 Social Dynamics of Communication Technologies (4, Sp/Sm)
 531 Communication and the International Economy (4, Fa)
 532 Development of American Media Industry (4, Fa)
 533 Emerging Communication Technologies (4, Fa/Sp)
 534 The Culture of New Technologies (4, Fa/Sp)
 535 Virtual Groups and Organizations (4, Fa/Sp)
 540 Uses of Communication Research (4, Fa/Sp)
 541 Integrated Communication Strategies (4, Sp)
 542 Business Strategies of Communication and Entertainment Firms (4, Sp)
 543 Managing Communication in the Entertainment Industry (4, Fa)
 544 The Arts and New Media (4, Fa)
 545 Communication and Global Competition (4, Sp)
 546 Seminar in Diffusion Theory and Research (4, 2 years, Sp)
 547 Distribution of Recordings: Media, Retail and Online Channels (4, Sp)
 548 Issues in Children's Media (4, Sp)
 553 Political Economy of Global Telecommunications and Information (4, Sp)
 557 Communication Policy in the Global Marketplace (4, Fa)
 558 The International Entertainment Marketplace (4, Fa)
 559 Globalization, Communication and Society (4, Fa)
 560 Communications Policy (4, Fa/Sm)
 562x Cognitive Approaches to Communication (4, 2

years, Fa)
 565 Communication Law and Broadcasting (4, Fa/Sp)
 566 Communication Law and New Technologies (4, Sp)
 567 Internet Policy, Practice and Regulation (4, Fa/Sp)
 570 Economics of the Communication Industries (4, Fa)
 571 Communications Technologies (4, Fa/Sp)
 572 Telephone, Data, and Video Telecommunication Systems (4, Sp)
 573 Evaluating Communication Needs (4, Sp)
 574 Tele-Media: A Strategic and Critical Analysis (4, FaSp)
 575 Advocacy and Social Change in Entertainment and the Media (4, Fa)
 576 Communication Strategies for Conflict Management (4, Sm)
 580 Media and Politics (4, Fa/Sp)
 581 Media in Social Services: Design and Evaluation of Campaigns (4, Fa)
 582 International Communication: National Development (4, Sm)
 583 Global Entertainment Education Programs (4, Sp)
 584 Seminar: Interpreting Popular Culture (4, Fa)
 585x Organizational Communication (4, 2 years, Sp)
 587 Audience Analysis (4, Fa)
 605 Advanced Macro Theories of Communication I (4, 2 years, Sp)
 610 Studies in Rhetorical Theory (4, max 8, Fa/Sp/Sm)
 618 Mass Media Effects (4, Fa)
 620 Studies in Communication Theory (2-4, max 8, Fa/Sp)
 625 Theory Construction in Communication (4, Sm)
 629 Global Culture (4, Fa)
 630 Communication Technology and Social Change (4, Sp)
 631x Minds and Media (4, Sp)
 635 Economics of Information (4, Sp)
 636 Interpretive and Cultural Approaches in Organizational Communication (4, 2 years, Fa)
 637 Current Readings in Organizational Communication (4, 2 years, Sp)
 638 Global, International and Intercultural Communication in Organizations (4, 2 years, Fa)
 640 Communication and Organizational Change (4, Fa)
 645 Communication Networks (4, 2 years, Sp)
 646 Negotiating Boundaries in Environmental Research (2)
 647x Seminar on the Network Society (4, Fa)
 599 Special Topics (various special one-time course offerings)

(Fa) means Fall semester

(Sp) means Spring semester

(Sm) means Summer semester

In addition to coursework offered at the Annenberg School of Communication, subject to the consent of the candidate's USC adviser and program director, students may take up to a maximum of 4 units of at the 400-level at Annenberg and graduate-level coursework from other schools or departments at the University of Southern California towards their remaining 20 unit requirement.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

A: MY452 is an advanced Applied Regression Analysis course offered by the Department of Methodology and must be taken by students who select MC4M7. Students wishing to select this option need to already

have a grounding in quantitative methods and must seek approval from the Programme Director. Approval is also subject to timetabling constraints.

B: The dissertation must be between 10,000 and 12,000 words). Passing MC499 is a requirement for passing the programme.

MSc in Global Media and Communications (LSE and UCT)

Programme Code: TMGLMECO3

Department: Media and Communications

For students starting this programme of study in 2023/24

Year 1 at LSE

Students take a total of three LSE units and a dissertation as shown.

Paper 1	MC408	Theories and Concepts in Media and Communications (0.5) #
	And	one of the following 0.5 unit courses:
	MC4M1	Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (0.5) or
	MC4M7	Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis) (0.5) #A
Paper 2	MC411	Media and Globalisation (0.5) #
Paper 3	Courses to the value of 1.5 unit(s) from the following:	
	GI422	Transnational Sexual Politics (1.0)
	MC407	International Media and The Global South (0.5) #
	MC416	Representation in the Age of Globalisation (0.5) #
	MC420	Identity, Transnationalism and the Media (0.5) # (not available 2024/25)
	MC423	Global Media Industries (0.5) #
	MC426	Film Theory and World Cinema (0.5) #
	MC428	Media Culture and Neoliberalism in the Global South (0.5) #
	MC429	Humanitarian Communication: Realities, Challenges and Critiques (0.5) #
	MC433	Technology and Justice (0.5) # (not available 2024/25)
	MC436	Mediating the Past (0.5) #
	MC437	Media, Data and Social Order (0.5) #
	MC438	Mediated Feminisms (0.5) #
	MC439	Media, Technology, and the Body (0.5) # (not available 2024/25)
	MC440	Children, Youth and Media (0.5) #
	Any other MSc-level course which is offered in the School, subject to the consent of the candidate's programme director. NOTE: Students can take no more than one full unit of courses from outside the department of Media and Communications (non MC-prefixed courses).	
Paper 4	MC499	Dissertation: Media and Communications (1.0) B

Year 2 at UCT

Paper 5 Students are required to complete a minor dissertation research project or creative production, two compulsory taught courses and two elective taught courses of which no more than one can be at HEQF Level 8 (4000 level).

Compulsory courses

FAM4011F/S Media Internship (HEQF Credits 24, HEQF Level 8)

FAM5013F Advanced Media Methodology (HEQF Credits 24, HEQF Level 9)

FAM5006W Master's Media Research Project

Or FAM5012W Master's Media Creative Production (HEQF Credits 96, HEQF Level 9)

Elective courses

Students select one F elective and one S elective course from the list below. Not all electives may be offered every year and only one elective may be on HEQF Level 8 (4000 level). One of the two elective courses may be taken in another cognate UCT department such as the Centre for African Studies, Historical Studies, Political Studies, or Anthropology:

AM4007F Narrative Literary Journalism

FAM4010F Media Markets and Media Strategy

FAM4013F Political Communication

FAM4017F Advanced Television Analysis

FAM4032F Understanding Public Argumentation

FAM4033F Screenwriting

FAM5039F Approaches to African Cinema

FAM4004S Avant-Garde Film

FAM4014S Political Journalism

FAM4015S Environmental Documentary

FAM4016S Wildlife Documentary

FAM4031S South African Public Rhetoric

FAM4034S Forms and Theories of Adaptation

FAM5011S Media and the Public Domain

FAM5016S Creative Non-Fiction

FAM5036S Rhetoric of SA Social Memory

FAM5038S Mobile Media and Communications

FAM5040S Conceptualising SA Cinema

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Taught Master's Course Guides

AC411 Half Unit

Accounting, Strategy and Control

This information is for the 2024/25 session.

Teacher responsible: Dr Julia Morley MAR 3.22

Availability: This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track) and MSc in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other students may be admitted only with the agreement, in writing, of the MSc Programme Director, if they have sufficient relevant background knowledge.

AC411 can accommodate up to 150 students. If demand exceeds capacity, priority will be given to students on the MSc Accounting, Organisations and Institutions and the MSc in Accounting and Finance.

Course content: This course provides an advanced overview of current theoretical and practical developments in organisational control, which is an essential function of management to ensure that the organisation's objectives and strategies are implemented effectively. Good management control increases the probability of organisational success.

Specifically, the course discusses what it means to have an organisation be in control, what alternatives managers have for ensuring good control, and how managers should choose from among various control system alternatives. Then the course turns to each of the elements of financial control systems, which provide the dominant form of control in the vast majority of decentralised organisations. These elements include financial target setting, performance measurement and evaluation and the assignment of various forms of organiThis course provides an advanced overview of current theoretical and practical developments in the essential management function of organisational control. Good management control ensures the effective implementation of organisational objectives and strategies, thereby increasing the probability of organisational success.

Students will learn what it means for an organisation to be in control, what alternatives managers have for ensuring good control, and how managers should choose from among various control system alternatives. The students will be introduced to the core components of financial control systems, which provide the dominant form of control in most decentralised organisations. These include financial target setting, performance measurement and evaluation and the assignment of various forms of organisational rewards, such as bonuses and promotions. The course will cover the following topics:

- Strategy and the design of management control systems, including plans and budgets
- Management control alternatives, including results controls, and organisational architecture
- Decision rights and results accountability in decentralised organisations
- Incentive compensation systems, including short-term and long-term incentive plans
- Performance measurement and evaluation, including objective and subjective performance evaluations

Teaching: Teaching is delivered in two weekly 90-minute sessions over 10 weeks in the Autumn Term.

The first 90-minute session each week introduces students to key theoretical concepts and techniques used in their application in practice, as well as the required and further readings. The second session then offers a further discussion and expansion of the issues through a case study analysis to explore the various management control issues in a broad range of settings. The case method of instruction requires thorough advance preparation by the students. Thus, students are expected to have done the recommended readings and to have read and thought about the

case before the second session.

Formative coursework: Students are expected to prepare for each session in advance, as detailed above.

Indicative reading: A detailed reading list is laid out for each session on the syllabus.

Reference textbook: Merchant & Van der Stede, Management Control Systems: Performance Measurement, Evaluation and Incentives, 5e (Prentice Hall, 2023).

Assessment: Exam (75%, duration: 2 hours) in the January exam period.

Group project (25%) in January.

AC412 Half Unit

Accountability, Organisations and Risk Management

This information is for the 2024/25 session.

Teacher responsible: Dr Tommaso Palermo, MAR 3.23 and Dr Alexa Scherf, MAR 3.32.

Availability: This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting and Finance, MSc in Economy and Society, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other students may be admitted only with the agreement, in writing, of the MSc (Accounting) Programme Director.

Course content: The overall purpose of the course is to provide students with a critical appreciation of the management of risk as an organisational and social process. This course is recommended for students who wish to develop the critical-thinking skills to make strategic decisions about risks, uncertainty and corporate governance, especially those targeting roles in consulting, business management or regulatory agencies. It is equally applicable to develop the skills needed for further academic studies in different areas of the social sciences such as accounting, management, sociology, public administration.

The course is necessarily cross-disciplinary, drawing on scholarship within accounting, organisational sociology and regulation studies. The course combines an illustration of key theories and academic research as well as practical examples and cases for analysis. The course content is updated yearly to reflect topics of contemporary relevance. Recent examples are risk culture in the financial sector, safety culture in aviation, cybersecurity risks and responses to pandemic crisis.

The course is divided in two parts. The first explores the intersections of risk and corporate governance, by focusing on the risks that arise at the top management and board of directors level, including risks of misconduct, gatekeeper failure, performance-insensitive executive pay and non-diverse board composition. The second part also deals with senior management and organisational leaders, but this time by looking at their responsibilities for maintaining systems and processes that help to anticipate and/or respond to key organisational risks. The emphasis of these two parts of the course taken together is on the role of senior managers and directors both as potential sources of risk to various stakeholders and as significant consumers of risk information.

Teaching: 30 hours of seminars in the WT.

This course has a reading week in Week 6 of WT.

Formative coursework: Two pieces of written work will be assessed during the term. The grades for this work will not count towards the overall course assessment.

Indicative reading: No single book covers the entire course.

Indicative readings include:

- Bebchuk & Fried, Pay Without Performance (Harvard, 2004);

- Coffee, Gatekeepers: The Professions and Corporate Governance (Oxford, 2006);
- Power, Organized Uncertainty: Designing a World of Risk Management (Oxford, 2007);
- Power, Riskwork: Essays on the Organizational Life of Risk Management, (Oxford, 2016);
- Vaughan, The Challenger Launch Decision, (Chicago, 1997);
- Robison, Flying Blind: The 737 MAX Tragedy and the Fall of Boeing, (Penguin books, 2021);
- Weick & Sutcliffe, Managing the Unexpected: Assuring High Performance in an Age of Complexity (Jossey-Bass, 2007).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

AC415 Half Unit Management Accounting for Decision Making

This information is for the 2024/25 session.

Teacher responsible: Dr Furkan Cetin MAR 3.42

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Accounting and Finance and MSc in Accounting, Organisations and Institutions. This course is available with permission as an outside option to students on other programmes where regulations permit. This course cannot be taken concurrently with **AC490**

Management Accounting, Decisions and Control.

Other students may be admitted only with the agreement, in writing, of the MSc (Accounting) Programme Director if they have sufficient relevant background knowledge. Enrolment on this course is constrained by section size and the number of sessions available. Students are admitted on the course on a first-come-first-served basis. If the course is over-subscribed, students on the waiting list will continue to be admitted on a first-come-first-served basis as places become available, but MSc students on the Accounting programmes will only then be given priority although cannot be guaranteed a place if no places become available. Therefore, to avoid frustration and possibly being unable to take the course, students wishing to reduce the risk of non-admittance on the course should prioritise their courses and register early for their preferred, "must have" courses. Late registration or changes to earlier course choices may be unsuccessful.

Course content: This course is focused on management accounting, which is a key function in organisations that involves developing and using financial and non-financial information to support decision making, not only in a technical sense, but bearing in mind that the way in which management accounting systems are designed and implemented often determines whether employees will be motivated to act in ways that are congruent with the objectives of the organisation.

The discipline of management accounting is often partitioned into (1) cost and management accounting systems and (2) management control systems, where the latter is the key focus of another course, AC411. AC415 can, but is not required to, be taken with AC411. Students can take AC411 or AC415, or both. Returning to AC415, while financial accounting requires that product cost information be accumulated in particular ways for external reporting, the focus in AC415 is on cost and other accounting and non-accounting information systems that aid managerial decision making. This includes the study of management accounting systems in widespread use today as well as an analysis of the problems associated with these systems in today's business environment (such as their tendency to provide distorted product cost information), as well as approaches to mitigate these problems (eg, activity-based costing; use of non-financial information).

With the above brief overview in mind, this course analyses key concepts which form the discipline of management accounting:

- Product costing and pricing

- Activity-based costing/management (ABC/ABM)
- Profitability and variance analysis
- Transfer pricing including tax considerations for international transactions
- Performance measurement and incentive compensation systems

Teaching: 30 hours of seminars in the WT.

Teaching is delivered in two weekly 90-minute sessions over 10 weeks across Winter Term.

Each session is almost exclusively taught by way of the case method of instruction. Case studies permit the exploration of management accounting issues in a broad range of settings. The case method of instruction, however, requires good advance preparation by the students, and every person should be ready to contribute to the case discussion when called upon. Students should expect to be "cold called" and not count on being able to hide behind classmates who volunteer to participate.

There is a reading week in week 6 in accordance with the academic calendar.

Formative coursework: The course makes extensive use of case studies. Students are expected to contribute to the case discussions by having read the case study and related materials in advance of the session and by participating in the discussion and offering their own analysis, views and/or perspectives on the issue at hand during the session.

Indicative reading: A detailed reading list is laid out for each session on the syllabus.

Bhimani, A., C.T. Horngren, S.M. Datar, and M.V. Rajan ("BHDR"), 2023, Management and Cost Accounting, (Pearson, 8th Edition); Merchant, K.A., and W.A. Van der Stede, 2023, Management Control Systems: Performance Measurement, Evaluation, and Incentives (Pearson, 5th Edition).

Assessment: Exam (75%, duration: 2 hours) in the spring exam period.

Case assignment (25%) in the WT.

AC416 Half Unit Topics in Financial Reporting

This information is for the 2024/25 session.

Teacher responsible: Dr Maria Manuel Correia MAR 3.38

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Accounting and Finance and MSc in Accounting, Organisations and Institutions. This course is available with permission as an outside option to students on other programmes where regulations permit. Other students may be admitted if they have knowledge of financial accounting acquired at undergraduate level, and only with the agreement, in writing, of the MSc Programme Director.

The course has a limited number of places and demand is typically high. Students are admitted on the course on a first-come-first-served basis. If the course is over-subscribed, students on the waiting list will continue to be admitted on a first-come-first-served basis as places become available, but MSc students on the Accounting programmes will only then be given priority although cannot be guaranteed a place if no places become available. Therefore, to avoid frustration and possibly being unable to take the course, students wishing to reduce the risk of non-admittance on the course should prioritise their courses and register early for their preferred, "must have" courses. Late registration or changes to earlier course choices may be unsuccessful.

Pre-requisites: Prior knowledge of financial accounting is assumed. AC480 (Qualitative Methods in Accounting and Finance) is a pre-requisite for students with no/little prior knowledge of financial accounting.

Course content: Corporate financial statements are a key source of information about the economic activities of a firm. This course is intended to enhance the student's ability to relate economic events to financial statements and disclosures. It also seeks to aid in developing a coordinated set of concepts and principles

to serve as a framework for analysing a wide variety of financial reporting issues. The goal is to enable students to understand the mapping between underlying economic events and the information in financial statements, and how this mapping affects inferences about the economic activities and position of the firm. The course also explores the regulatory environment and political climate, and how these link with the introduction of new standards and their underlying theories. Students are encouraged to relate economic events to diverse practices in financial statements, and to think critically of ongoing controversies and debates.

The emphasis of this course is on understanding and critical thinking, rather than bookkeeping. The course draws heavily on academic literature on the suggested topics.

The course objectives are achieved through teaching a variety of financial reporting issues and topics including the following: standard setting with respect to the conceptual frameworks; accounting for leases and pensions; accounting for value creation with special emphasis on cash flows statements and revenue recognition; capital markets efficiency; corporate disclosure; and corporate governance. Most topics are covered from an International Financial Reporting Standards and/or United States Generally Accepted Accounting Principles perspective. Detailed choice of subjects will be determined by those lecturing on the course and may vary to some extent from year to year. Knowledge of basic accounting is assumed.

Teaching: 30 hours of seminars in the AT.

Teaching is delivered in two one and a half hour sessions each week. Sessions contain a variety of technical content, practical exercises, and case analyses.

Formative coursework: Students are expected to prepare for each session in advance, having done the assigned readings and having prepared the assigned cases.

Indicative reading: Detailed reading lists are handed out at the start of the course. Relevant books covering specific parts of the course are:

- Financial Reporting and Analysis, by Revsine, Collins, Johnson, and Mittelstaedt, and Soffer (McGraw Hill, 8th ed.);
- Financial Accounting: An Introduction to Concepts, Methods and Uses, by Stickney, Weil, Schipper and Francis (Thomson Learning, South-Western, 14th ed.).

Assessment: Exam (75%, duration: 2 hours) in the January exam period.

Continuous assessment (5%) and group project (20%) in the AT. Continuous assessment consists of a set of quizzes to be submitted online. The group project will require students to search the press for issues of relevance to the topic they have been assigned and produce a five-page report which they will present.

AC417 Half Unit Corporate Financial Disclosure and Investor Relations

This information is for the 2024/25 session.

Teacher responsible: Dr Pascal Frantz MAR 3.30

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Accounting and Finance and MSc in Accounting, Organisations and Institutions. This course is available with permission as an outside option to students on other programmes where regulations permit. Other students may be admitted if they have knowledge of financial accounting and finance acquired at undergraduate level, and only with the agreement, in writing, of the MSc Programme Director.

The course is capped to two sections of around 60 students; ie, 120 total. In previous years we have been able to provide places for all students that apply but that may not continue to be the case. Enrolment on this course is constrained by section size and the number of sessions available. Students are admitted on the course on a first-come-first-served basis. If the course is over-subscribed,

students on the waiting list will continue to be admitted on a first-come-first-served basis as places become available, but MSc students on the Accounting programmes will only then be given priority although cannot be guaranteed a place if no places become available. Therefore, to avoid frustration and possibly being unable to take the course, students wishing to reduce the risk of non-admittance on the course should prioritise their courses and register early for their preferred, "must have" courses. Late registration or changes to earlier course choices may be unsuccessful.

Course content: Investors view firms through the lens of financial accounting and reporting. This course aims to examine this lens by covering topics on the interaction of financial accounting and reporting with capital markets with a focus on corporate disclosure and communication strategies. The course views corporate financial reporting as an information system and reviews the theories and empirical regularities on the demand for and supply of accounting information in capital markets while also assessing the stock market impact of communication strategies.

Some of the topics covered in the course include: The market for information – the role of sell-side analysts, investor relations and the buy-side; Voluntary disclosure theory and practices; Determinants of accounting choices; The signalling role of accounting information; Capital market consequences of accounting and disclosure choices; Investor relations; Capital markets and the earnings game; Corporate governance and financial reporting; On the role of proxy advisory firms; Corporate governance and shareholder activism; Investor relations during a corporate crisis; Investor relations during equity offerings and mergers and acquisitions.

The course is based on economic-based theories, empirical applications, and case studies, so that students gain an understanding of a firm's corporate information environment and communication strategies. It has a quantitative flavour as it relies in large parts on game theory. Prior knowledge of game theory is however not a prerequisite as the course introduces the relevant concepts. Also, the course does not rely on a strong mathematical background.

Detailed choice of subjects to be covered will be determined by those lecturing on the course and may vary to some extent from year to year. Knowledge of basic accounting and finance is assumed.

Teaching: 30 hours of seminars in the AT.

There will be two 90 minute sessions each week. Each session is conducted in groups of about 60 students, often involving case study analyses, application exercises and group presentations and discussions. This mode of teaching requires good advance preparation by the students; hence, every student should be ready to contribute to the discussion when called upon. Active participation is expected and encouraged.

Formative coursework: Formative assessment will be in the form of class exercises and case-studies on topics covered during the course. Students will be expected to hand in a single group assignment in the AT.

Indicative reading: The course relies mostly on HBR readings, lecture notes, journal articles, and chapters from relevant books supplied in online study packs.

Assessment: Exam (70%, duration: 2 hours) in the January exam period.

Group assignment (30%) in the AT.

The group work will comprise two assignments, the last one including a presentation.

AC424 Accounting, Organisations and Institutions

This information is for the 2024/25 session.

Teacher responsible: Dr Andrea Mennicken MAR 3.24

Availability: This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is not available as an

outside option.

This course is not available to other students except in special circumstances and with the written permission of the Course Director.

There are no specific accounting pre-requisites. This course does not require a background in accounting and both the programme and this course are open to accounting specialists and non-specialists alike.

Course content: The objective of the course is to provide students with an advanced, social science- based and critical understanding of the changing role and position of accounting practices in organisations, both public and private, and in societies more generally. Students will be exposed to advanced scholarship and case materials which show how accounting practices are more than a collection of routine self-evident techniques but are shaped by their institutional contexts, have behavioural consequences and can represent different values. We will focus on how the fundamental assumptions of internal and external accounting practices are institutional in nature and are shaped by social and political aspirations in different jurisdictions. The role of accountants and other agents involved in the production and consumption of accounting numbers will also be addressed. The course will equip students to understand the inter-relations between technical, organisational and institutional issues. While some technical accounting knowledge may be helpful, it is not essential and each lecture will provide the necessary technical foundations.

Indicative topics include:

Foundations: Reporting, Calculation and Transparency; Quantification and Measurement; Accounting and the Notion of "Entity"; Audit and Assurance: The Audit Society; Organisational Boundaries, Structure and Control; Accountability, Incentives and Performance; Accounting for Sustainability; Organisational Failure; Accounting Standardisation and Harmonisation; the Political Economy of Financial Reporting and Standard Setting; the Rise of Concerns with Sustainability Reporting and Standard-setting; Accounting and Development; the Roles of Accounting in Global Financial Governance; Political, Institutional and Economic Influences in Changing National and International Financial Reporting Frameworks; Consequences of International Accounting Harmonization for Financial Statement Users, Business Entities and Wider Local and Global Stakeholders.

Teaching: Teaching will be delivered in the form of two weekly 90-minute sessions over 11 weeks across both Autumn and Winter Terms. Each session contains a variety of technical content, practical exercises, and case analyses.

This course has a reading and feedback week in Week 6 of both AT and WT so there is 30 hours of teaching per term.

Formative coursework: Students are expected to come to each session prepared having done the assigned readings and having prepared the assigned cases and discussion questions.

Indicative reading:

- Chapman, Cooper & Miller (eds.), *Accounting, Organizations and Institutions* (Oxford, 2009);
- Hopwood & Miller (eds.), *Accounting as Social and Institutional Practice* (Cambridge, 1994);
- Power, *The Audit Society* (Oxford, 1999);
- Botzem, *The Politics of Accounting Regulation* (Edward Elgar, 2012);
- Mennicken & Salais (eds.), *The New Politics of Numbers* (Palgrave Macmillan, 2022);
- Ramanna, *Political Standards: Corporate Interest, Ideology and Leadership in the Shaping of Accounting Rules for the Market Economy* (University of Chicago Press, 2015);
- Nobes & Parker, *Comparative International Accounting* (Pearson, 2020);
- Weetman & Tsalavoutas (eds.), *The Routledge Companion to Accounting in Emerging Economies* (Routledge, 2020).

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Group assignment (15%) in the AT.

Assignment (15%) in the WT.

The assignment is an individual assignment.

AC425

MSc Accounting, Organisations and Institutions: Pre-sessional course

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Power MAR 3.43

Availability: This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is not available as an outside option.

The course is only available to MSc Accounting, Organisations and Institutions students. The purpose of this pre-sessional is to acquaint students, both with and without any prior, or little, background in accounting, to the critical approach to be adopted on the core course AC424. Any student with a proven accounting background who intends to take AC416 Topics in Financial Reporting is also required to take AC480 Quantitative Methods in Accounting and Finance.

Course content: Introduction to Accounting, Organizations and Institutions

Teaching: The sessions are held in September before the start of AT.

Formative coursework: Study materials for the pre-sessional will be made available by means of selected handouts.

Assessment: There is no assessment.

AC444 Half Unit

Valuation and Security Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Xi Li MAR 3.40

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Finance and Risk and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other students may be admitted to the course if they have a strong knowledge of financial accounting and finance acquired at undergraduate or equivalent level, and only with the agreement, in writing, of the teacher responsible for this course.

Enrolment on this course is constrained by section size and the number of sessions available. Students are admitted on the course on a first-come-first-served basis. If the course is over-subscribed, students on the waiting list will continue to be admitted on a first-come-first-served basis as places become available, although MSc students on Accounting programmes will be given priority. Therefore, to avoid frustration and possibly being unable to take the course, students wishing to reduce the risk of non-admittance on the course should prioritise their courses and register early for their preferred, "must have" courses. Late registrations or late changes to this course choice may be unsuccessful.

In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Pre-requisites: Students will be assumed to have a solid understanding of corporate finance as well as financial accounting principles, techniques and methods. Completion of AC416 in Michaelmas term is recommended for this course.

Course content: The aim of this course is to introduce students to security analysis and valuation from both academic and practical perspectives. The course materials include many real-world cases, where students are placed in the role of investors to conduct financial statement analysis and make investment decisions. At the end of the course, students are furthermore provided with an

opportunity to apply their skills by analysing and valuing, in small groups, from the point of view of a "sell-side analyst", a firm's equity of their choice. The course should appeal to students interested in equity research, investment banking, and fund management. The course is presented in two parts. The first part, financial analysis, focuses on past and present performance evaluation, which is used by financial analysts to generate expectations about future performance (prospective analysis). The second part, security valuation, focuses on the determination of intrinsic security prices, which, in efficient markets, reflect prospective performance. This second part provides students with a valuation 'toolkit' which they can draw on when valuing equities in a variety of contexts such as banking, asset management, research, accountancy or consulting.

Teaching: 30 hours of seminars in the WT.

Student group project presentations in week 11 of Winter Term.

Teaching is delivered in two 90-minute sessions per week.

Depending on the state of the ongoing pandemic, some or all of the teaching on this course may be delivered using virtual means as an alternative to face-to-face teaching due to social-distancing or other pandemic-related restrictions that may need to be observed. Each session involves both lecturing and case study analyses and discussions. In the case study sessions, students break into small groups to work and collaborate as a team. This mode of teaching requires good advance preparation by the students; hence, every student should be ready to contribute to the discussion when called upon. Active participation is expected and encouraged.

Indicative reading: For the business analysis section, there is no required textbook for this course. However, we recommend the following book for reading and additional exercises: Business Analysis & Valuation (Palepu, Healy and Peek), 4th IFRS edition, CENGAGE Learning, 2016.

Assessment: Exam (55%, duration: 2 hours) in the spring exam period.

Group project (40%) and quiz (5%) in the WT.

AC470 Half Unit Accounting in the Global Economy

This information is for the 2024/25 session.

Teacher responsible: Dr Andrea Mennicken MAR 3.24 and Prof Michael Power MAR 3.43

Availability: This course is available on the CEMS Exchange, Diploma in Accounting and Finance, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Accounting and Finance, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Economy and Society, MSc in Management and Strategy and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is not available to students on the MSc in Accounting, Organisations and Institutions programme.

The course is capped to one section of 55 students. Students on the waiting list will be admitted on a first-come first-served basis.

Pre-requisites: There are no specific pre-requisites and the course does not require a background in accounting.

Course content: This course examines the fast changing practices and institutions of accounting in the global economy, with a particular emphasis on the roles of accounting in global financial governance. International accounting and auditing standards have been advocated as a way of enhancing global financial stability, so as to stimulate the flow of cross-national investment, expand the scope for market-oriented development, and integrate local enterprises into global financial markets. This course critically examines dynamics of accounting regulation, including international standard-setting and consequences for financial

statement users, business entities and wider local and global stakeholders. In this context, we will also explore issues related to global sustainability reporting and standardisation.

Topics include:

Political, institutional and economic influences in changing national and international financial reporting frameworks. The political economy of accounting standard-setting. The work of the International Accounting Standards Board (IASB), the International Sustainability Standards Board (ISSB), the European Union, national accounting bodies, and their political and economic environments. The rise of concerns with sustainability reporting and standard-setting.

The effects of national financial reporting requirements and International Financial Reporting Standards (IFRS) on business entities and economic development, particularly developing and emerging economies (including the BRIC countries: Brazil, Russia, India, China). The enforcement of financial reporting requirements through auditors, securities regulators, the World Bank and others. Specific technical challenges (for example, transfer pricing, fair value accounting, impairment testing, derivatives and other financial instruments, sustainability reporting and standardisation). The course explores issues from different theoretical perspectives through comparative empirical analysis.

Teaching: Teaching is delivered in two weekly 90-minute sessions over 10 weeks across Winter Term. Each session draws on a variety of academic readings, practical exercises, and case analyses.

This course has no regular teaching in Week 6 of WT.

It is further intended to run a small number of additional sessions with invited speakers who are centrally involved at a senior level in the setting, enforcement and convergence of international accounting regulations. Further details will be provided at the start of the session.

Formative coursework: Students are expected to come to each session prepared having done the assigned readings and having prepared the assigned class discussion questions.

Indicative reading: Detailed reading lists will be given out at the start of the session, and are largely based on academic journal articles. Other readings include academic cases, policy briefings, regulatory documents and green and white papers.

Relevant books:

- Camfferman & Zeff, Aiming for Global Accounting Standards, 2001-2011 (Oxford University Press, 2018);
- Botzem, The Politics of Accounting Regulation (Edward Elgar, 2012);
- Ramanna, Political Standards: Corporate Interest, Ideology and Leadership in the Shaping of Accounting Rules for the Market Economy (University of Chicago Press, 2015);
- Djelic & Quack, Transnational Communities: Shaping Global Economic Governance (Cambridge University Press, 2010);
- Nobes & Parker, Comparative International Accounting (Pearson, 2020);
- Weetman, Tsalavoutas & Gordon, International Corporate Reporting (Routledge 2020);
- Weetman & Tsalavoutas (eds.), The Routledge Companion to Accounting in Emerging Economies (Routledge, 2020);
- Walter, Governing Finance: East Asia's Adoption of International Standards (Cornell University Press, 2008).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

AC480 Quantitative Methods in Accounting and Finance

This information is for the 2024/25 session.

Teacher responsible: Prof Ane Miren Tamayo and Dr Pascal Frantz

Availability: This course is available to students on the MSc in Accounting and Finance and students on the MSc in Accounting, Organisations and Institutions with prior knowledge of accounting

and finance wishing to take AC416 Topics in Financial Reporting. This course is not available as an outside option.

Course content: The objective of the course is to provide students with the necessary background required for core accounting and finance courses. The course is organised in two sections: Section 1 - "Accounting: Disclosure Principles and Practice" provides an overview of fundamental accounting concepts, practices and the main financial statements. This section emphasises users' perspective rather than preparers' perspective on financial reporting (eg, for valuation purposes). Section 2 - "Finance: Quantitative Methods" provides the basic quantitative tools needed for technical MSc courses. This section consists of an introduction to Basic Calculus, Probability and Statistics.

Teaching: Teaching takes place before the start of AT.

Indicative reading: A detailed reading list will be provided at the beginning of the course.

Assessment: This course is not assessed. However, students will be given a number of application exercises to complete on their own or in groups.

AC490 Half Unit Management Accounting, Decisions and Control

This information is for the 2024/25 session.

Teacher responsible: Prof Alnoor Bhimani MAR 3.21

Availability: This course is available on the CEMS Exchange, Diploma in Accounting and Finance, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting, Organisations and Institutions, MSc in Economics and Management, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

This introductory course may also be taken by MSc students who have not previously studied accounting subjects. Students in the MSc Accounting and Finance programme are not permitted to enrol in this course or in AC491. This course cannot be taken concurrently with **AC415 Management Accounting for Decision Making**.

The course is capped at 50 students.

Course content: Enterprises must today tackle markets that are affected by global economic and business forces and advances in digital technologies. They face intense competition from ever-changing corporate strategies of their competitors and new business models. At the same time, the interface between business decisions and management accounting has become more complex but significantly impacts corporate performance. This course provides students with an introduction to how accounting information and cost management techniques influence managerial decisions and performance evaluation. It discusses links between management accounting and corporate strategy, marketing and international control issues. Especial attention is placed on how management accounting is affected by technological advances such as robotics, AI, web-based systems, and digitalisation. The course includes both qualitative and quantitative material and is not purely calculations based. Extensive use is made of cases as a mode of instruction. The course will cover:

- established managerial accounting concepts such as cost-volume-profit relationships, overhead cost allocations, activity based costing, the balanced scorecard, target cost management and quality costing;
- relationships between accounting information and flexible organisational technologies such as just-in-time operations, enterprise resource planning, computer integrated system, 3-D manufacturing, robotics and AI systems;

- cost management and marketing, corporate strategy, e-business and internet-based enterprise issues;
- organisational arrangements such as functional and multidivisional firms and virtual enterprises;
- comparative international management accounting systems;
- accounting controls associated with responsibility centres, financial performance measurement, variance analysis, and incentives;
- strategic accounting tools and practices.

The course will provide participants with:

- an understanding of how strategic, market and technological innovations impact management accounting;
- an appreciation of how modern management accounting tools operate in competitive business environments;
- a knowledge of how behavioural, organisational and cultural factors affect management accounting practices.

Teaching: 30 hours of seminars with office hours in the WT.

Teaching is delivered in two 90 minutes sessions each week.

Sessions contain a variety of technical content, practical exercises, and case analyses.

There will be a reading week in week 6 of WT.

Formative coursework: Students are expected to analyse case studies. Two pieces of case-based written work will be collected during the course as advised by the instructor. Students should expect to actively contribute to case discussions which are key to understanding the applied and practical part of the course.

Indicative reading: A detailed reading list will be given out at the start of the course. The following books will be used:

- Bhimani A., Horngren C., Datar S. and Rajan M. Management and Cost Accounting (Pearson, 2023);
- Bhimani, A., Accounting Disrupted: How digitalization is changing finance (Wiley, 2021)
- Bhimani A., Financial Management for Technology Start-ups (Kogan Page, 2022).

Assessment: Exam (80%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Case study (20%) in the WT.

(This comprises two sets of case study analyses, each worth 10%.)

AC491 Half Unit Financial Accounting, Reporting and Disclosure

This information is for the 2024/25 session.

Teacher responsible: Professor Ane Tamayo, MAR 3.36

Availability: This course is available on the CEMS Exchange, Diploma in Accounting and Finance, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Accounting, Organisations and Institutions, MSc in Management and Strategy and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is aimed at MSc students who have not previously studied accounting subjects to a significant extent.

Students on the MSc Accounting and Finance programme are not permitted to enrol on this course.

This course cannot be taken in conjunction with **AC416 Topics in Financial Reporting**.

This course has a limited number of places (it is controlled access) and is capped at 130 students. In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: This course provides students with an introduction to financial accounting, and highlights aspects of reporting that are important to users of financial information. The course covers the preparation of the main financial statements and discusses accounting issues related to intangible assets, equity,

debt, and intercorporate investments, among others. Students are also introduced to the basics of financial statement analysis and to research on the use of accounting information in financial markets.

Teaching: 30 hours of seminars in the AT, with an optional review session/surgery in week 11 of the AT.

Teaching is delivered in two one and a half hour sessions each week. Sessions contain a variety of technical content, practical exercises, and case analyses.

Formative coursework: Students are expected to complete weekly formative assessments.

Indicative reading: A detailed reading list will be made available at the start of the course. Some illustrative texts:

Harrison, Horngren, Thomas, Tietz and Suwardy, Financial Accounting (IFRS), 11th ed., Pearson Higher Education/Prentice Hall.

Weetman, Financial Accounting: an Introduction, 8th ed., Pearson Higher Education.

Stickney, Weil, Schipper and Francis, Financial Accounting: An Introduction to Concepts, Methods and Uses, 14th ed., Cengage, South-Western.

Assessment: Exam (80%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Problem sets (20%) in the AT.

AC493 Half Unit

Financial and Management Accounting for Managerial Decision Making

This information is for the 2024/25 session.

Teacher responsible: Prof Alnoor Bhimani MAR 3.21 and Dr Julia Morley MAR 3.22

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This course covers introductions to both management accounting and financial accounting. The first half of AC493 introduces management accounting. Management accounting helps executives in managing and controlling enterprise activities and in making decisions that drive performance and increase competitiveness. We cover management accounting approaches that support operational, strategic and performance focused decision making. We will discuss accounting concepts and tools associated with cost management and decision-making taking account of technological, digitalisation, marketing and entrepreneurial issues. The management accounting part of the course will cover:

- Managerial accounting concepts such as incremental costing, break-even analysis, overhead cost allocations, activity-based accounting, and cost issues in complex enterprises;
- Operational, marketing and corporate strategy issues across industrial, e-business and internet-based business models;
- Accounting practices in different enterprise contexts including functional and multidivisional firms, strategic business units and web-based enterprises.
- The course will provide students with an understanding of:
- How management accounting and cost control practices align with marketing, technological and digitalisation pursuits and strategies.
- How modern cost management techniques can increase enterprise competitiveness.
- How organisations can apply management accounting concepts to achieve a balance between traditional financial objectives and innovative practices.

The second part of this course provides students with an introduction to financial accounting, and highlights aspects of financial reporting that are important to users of financial information. It covers the preparation of key financial statements and the frameworks of accounting regulation and aims to familiarise students with the current debates in practice. After the second half of the course, students should be able to:

- Distinguish between cash accounting and accrual accounting
- Explain traditional accounting concepts and conventions.
- Produce simple balance sheets, income statements and cash flow statements
- Perform elementary financial statement analysis using ratios.
- Understand contemporary issues in accounting.

Teaching: This course is delivered over 11 weeks in WT with two sessions of 90 minutes per week. Sessions make use of in-seminar exercises, case study analyses and real-world applications to bring the materials to life and to apply conceptual knowledge to problems faced in practice. The use of case studies permit the exploration of accounting issues in broader management perspectives (e.g., large and small firms, manufacturing and service firms, multinational firms, startups). The case method of instruction, however, requires good advance preparation by students, and every student should be ready to contribute to the case discussion when called upon. Students should expect to be 'cold called' and not count on being able to hide behind classmates who volunteer to participate.

Formative coursework: Students are expected to be prepared for the cases and/or other tasks for each session as indicated on the syllabus. Two of these will be collected and graded as shown below under Assessment.

Indicative reading: Reference Textbooks:

Management accounting:

- Bhimani, A., C.T. Horngren, S.M. Datar, and M.V. Rajan. 2023. Management and Cost Accounting (Pearson, 8th edition)
- Bhimani, A. Accounting Disrupted: How digitalization is changing finance (Wiley/AICPA, 2021)
- A. Bhimani, Financial Management for Technology Start-ups (Kogan Page, 2022)

Financial Accounting:

- Atrill, P. and E. J. McLeane. 2022, Financial accounting for decision makers (Pearson). Available as an e-book via the LSE library.

Assessment: Exam (80%, duration: 2 hours) in the spring exam period.

Coursework (10%) and coursework (10%) in the WT.

AC494 Half Unit

Dissertation in Accounting, Organisations and Institutions

This information is for the 2024/25 session.

Teacher responsible: Dr Andrea Mennicken (MAR 3.24)

Availability: This course is available on the MSc in Accounting, Organisations and Institutions. This course is not available as an outside option.

The course is intended for students interested in pursuing an academic career, conducting policy research or with some other relevant research motive. Registration is by permission only. Students wishing to select this option must prepare a dissertation proposal in AT (approx. 500 words). This should be submitted to the programme manager by November 22nd. The course convener will then review the submissions, and for those with sufficient potential, will allocate a suitable supervisor. Approval for this option will only be forthcoming for those with submissions that reach the required standard and for which a suitable supervisor is available. Enrolment on this course is capped at 15 students.

Course content: The objective of this half-unit course is to enable Masters students to develop a research paper on institutional, social and political aspects accounting which could serve as the foundation for future doctoral studies or other research careers. The focus of the dissertation - theoretical, empirical and methodological - will be determined by students in conjunction with an allocated supervisor. Supervisors have expertise in a broad range of research areas including, for example, accounting and auditing as social practice, social studies of valuation and quantification, risk regulation and the creation of markets.

It is intended that the dissertation could be used in any application

for an advanced research degree.

Teaching: Students are expected to work largely independently on their own. There will be an introductory orientation at the beginning of Winter Term on how to write and research for a dissertation, including the use of library resources. Thereafter students receive two to three one-to-one supervisory sessions prior to final submission to help with the definition, orientation and execution of the research topic. In addition, a workshop will be organised for all students where they discuss and receive collective feedback on their dissertation outlines.

Formative coursework: Students will be required to produce written work in preparation for the meetings with their supervisors and for the joint workshop where the dissertation outlines are discussed.

Indicative reading: The following books provide an overview of key research themes in studies of accounting, organisations and institutions:

- Chapman, Cooper & Miller (eds), *Accounting, Organizations and Institutions* (Oxford, 2009);
- Hopwood & Miller (eds), *Accounting as Social and Institutional Practice* (Cambridge, 1994);
- Mennicken & Salais (eds), *The New Politics of Numbers* (Palgrave Macmillan, 2022);
- Power, *The Audit Society* (Oxford, 1999).

Students will be encouraged to develop their own reading lists, which will be specific to the area and focus of the dissertation.

Assessment: Dissertation (100%, 8000 words) in the ST. An electronic copy of the dissertation (6000-8000 words) must be emailed to the MSc Accounting, Organisations and Institutions Programme Manager by 30 May. An additional electronic copy must be uploaded to Moodle on the same day.

AC495 Half Unit

Dissertation in Economics of Accounting

This information is for the 2024/25 session.

Teacher responsible: Prof Ane Miren Tamayo MAR 3.36

Availability: This course is available on the MSc in Accounting and Finance. This course is not available as an outside option. Students wishing to select this option must first prepare a dissertation proposal in MT (approx. 500 words). This should be submitted to the programme manager by 22 November. The course convener will then review the submissions, and for those with sufficient potential, will allocate a suitable supervisor. Approval for this option will only be forthcoming for those with submissions that reach the required standard and for which a suitable supervisor is available.

Course content: The dissertation usually consists of an empirical investigation of a selected problem.

The dissertation must identify relevant issues, sustain reasoned argument, and draw supportable conclusions. It must be arranged in an organized manner and include a full bibliography.

Teaching: ca. 6 hours; this involves, amongst other things, a research essay workshop, a group discussion of research essay outlines and one-to-one supervisory meetings. Students are expected to work largely independently on their own. There will be an introductory orientation at the beginning of Winter Term on how to write and research for a long essay, including the use of library resources. Thereafter students receive at least two one-to-one supervisory sessions prior to final submission to help with the definition, orientation and execution of the research topic. In addition, a workshop will be organised for all students where they discuss and receive collective feedback on their dissertation outlines.

Formative coursework: Students will receive feedback on their dissertation outlines and draft work that they submit to their supervisors. Students will have two meetings with their supervisors where they receive feedback on submitted written work. Students will be required to produce written work in preparation

for the meetings with their supervisors and for the joint workshop where the dissertation outlines are discussed.

Indicative reading: Relevant readings will depend on the specific area of research. This will likely be self-managed by the student with guidance from their supervisor.

Assessment: Dissertation (100%, 8000 words) in the ST. Two typewritten copies of the research essay (6000-8000 words) must be submitted to the MSc Programme Manager by 30 May. An additional electronic copy must be uploaded to Moodle no later than 4.00pm on the same day.

AN402

The Anthropology of Religion

This information is for the 2024/25 session.

Teacher responsible: Dr Fenella Cannell

Dr Yazan Doughan

Availability: This course is compulsory on the MSc in Social Anthropology (Religion in the Contemporary World). This course is available on the MA in Modern History, MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in China in Comparative Perspective and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course covers current approaches to and reconsiderations of classic topics in the anthropology of religion, such as: myth, ritual, belief and doubt, supernatural experience, ethical self-cultivation, asceticism, sacrifice, authority and charisma. In the Michaelmas term, students will be introduced to debates concerning the ways in which 'religion' is said to influence or shape personal experience and collective public life in both western and non-western contexts. Students will explore some of the key concepts that inform contemporary understandings of religion as a force in the world, the history of these concepts, how they enter into various political and ethical projects, and the extent to which they predefine 'religion' as an object of anthropological study. Specific areas of focus may include: the relationship between 'religion' and 'secularism'; conceptions of 'religious freedom'; conversion; inter-religious conflict; the ethnography of religious minorities; the anthropology of religious movements; and the comparative anthropology of 'religions'. In the Lent term, students will be asked to rethink the category of 'religion' and its role in anthropological analysis. The guiding underlying approach will be to ask; what is the study of 'religion' for the social sciences, and what are the potentials and limitations of different answers to that question. We will also be asking where (if anywhere) religion is located as category, practice and experience for a range of interlocutors, and in different kinds of analytic writing. Topics facilitating this project may include some of the following: shamanism, spirit mediumship, death rituals and ritual theory, magic and witchcraft, 'spirituality' and new religious movements, religion and kinship, ghosts, spirits and ancestors, cosmology, faith-healing, life-cycle rituals, human-nonhuman relations, and religion in diaspora and social change, religion and 'ethics', problems of suffering and critical approaches to religion, violence and inequality, encounters with the divine and sacred, religion, capitalism and the fetish, religion, gender and the body, religion and development, implicit religion. Examples will be drawn both western and non-western contexts, and from both 'salvation religions' such as Hinduism, Judaism and Christianity, and other including so-called 'animist' contexts.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. 10 hours of lectures and 15 hours of seminars in the WT. 1 hour of lectures in the ST.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 in AT and WT.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 essay in the WT.

Detailed reading lists provided at the start of each term.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

AN404

Anthropology: Theory and Ethnography

This information is for the 2024/25 session.

Teacher responsible: Prof Mathijs Pelkmans and Prof Michael Scott

Availability: This course is compulsory on the MSc in Social Anthropology. This course is available on the MA in Modern History, MSc in Anthropology and Development, MSc in China in Comparative Perspective and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to examine the development of theory and ethnography in anthropology in the contexts of colonialism, anti-imperialism, postcolonialism, and decolonialization.

The first term focuses primarily on the period before the 1980s, with particular attention to the British, American, and French schools of anthropology and their interrelations. Work by intellectuals from oppressed minorities, the Global South, and indigenous communities elsewhere will be recognized alongside and in comparison with work often regarded as foundational. Through analytical examination of fieldwork practices, theoretical problems, core concepts, and the politics of exclusion and inclusion, this half of the course will explore how knowledge is produced (and forgotten) in anthropology and how those processes continue to inform disciplinary practice and debates today. Topics covered may include: expeditionary versus individual fieldwork practices; ethnography as a genre; ethnographic

particularism and the problem of comparison; origins and the idea of the 'primitive'; colonialism and colonial situations; race, culture, and relativism; the promise and perils of popular and public anthropology; gender in anthropology and the gender of the anthropologist; classic sites of theorization such as kinship, totemism, and animism.

The second term focuses on recent and ongoing debates in anthropology. How is anthropological knowledge produced and what are the politics of ethnographic writing? How should we think of cultural differences: as surface or substance? To what extent is an anthropology beyond the human necessary and possible? How do emotive energies affect human agency, the production of meaning and the circulation of knowledge? We will address these and other questions by exploring a range of theoretical frameworks, including interpretive anthropology, postmodernism, actor network theory, affect theory, and the anthropology of temporality and the future.

The precise emphasis and distribution of topics may vary from year to year.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. 10 hours of lectures and 15 hours of seminars in the WT. 2 hours of workshops in the ST.

The contact hours listed above are the minimum expected. The course has a reading week in Week 6 of AT and WT.

Formative coursework: Formative coursework consists of participation in weekly seminars, and the opportunity to discuss one formative essay in each of the AT and WT with the course convener or the student's academic mentor, as per normal departmental arrangements.

Indicative reading: Abu-Lughod, L. (1993) *Writing Women's Worlds: Bedouin Stories*.

Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

AN405

The Anthropology of Kinship, Sex and Gender

This information is for the 2024/25 session.

Teacher responsible: In the Autumn Term this course will be co-taught by Professor Sylvia Yanagisako and another teacher who is TBC.

In the Winter Term this course will be taught by Dr Mareike Winchell.

Availability: This course is available on the MA in Modern History, MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Gender, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides an examination of the cultural frameworks and social aspects of kinship systems, gender roles, personhood and human sexuality, analysed through ethnographic examples from a diverse range of settings. It aims to equip students with the analytical tools to engage in theoretical debates concerning core concepts such as 'kinship', 'marriage', 'gender', 'sex', 'the person', and the relationship between 'nature' and 'culture', as well as exploring how the experiences of kinship, sex and gender vary according to the regimes of politics, law and materiality in which they are embedded. The course charts the history of anthropological debates on kinship, relatedness, sex and gender, and familiarises students with a range of contemporary approaches to these themes, placing ethnographic materials into a critical dialogue with recent developments in feminist theory, queer theory, the anthropology of colonialism, cognitive science, and psychoanalysis.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. 10 hours of lectures and 15 hours of seminars in the WT.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 in AT and WT.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 essay in the WT.

Indicative reading: Carsten, J. *After Kinship* (2003); Chodorow, N. *The Power of Feelings: Personal Meaning in Psychoanalysis, Gender and Culture* (1999); Donnan, H. and Magowan, F. *The Anthropology of Sex* (2010); Levi-Strauss, C. *The Elementary Structures of Kinship* (1969); Moore, H. L. *A Passion for Difference: Essays in Anthropology and Gender* (1994); Schneider, D. *A Critique of the Study of Kinship* (1984); Stone, L. *Kinship and Gender: An Introduction* (2006).

Assessment: Essay (50%, 4000 words) in the WT.

Essay (50%, 4000 words) in the ST.

AN419 Half Unit Not available in 2024/25

The Anthropology of Christianity

This information is for the 2024/25 session.

Teacher responsible: Dr Fenella Cannell OLD 5.07

Availability: This course is available on the MSc in Anthropology and Development, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The ethnography of local Christianities in the light of differing cultural and social situations including colonial conditions. The relationship between Christianity and the discipline of anthropology. The course examines a number of anthropological and historical studies of local forms of Christianity, from a range including local forms of Catholicism, Mormonism, contemporary and historical Protestantisms including American Protestant forms and 'heretical' and other unorthodox Christianities. The course asks why anthropologists shied away from analysing Christianity long after studies of other world religions, such as Islam, Hinduism and Buddhism, had become widely established. It looks at the

relationship between Christianity and the history of anthropological thought, and locates the place of Christianity in the writings of Mauss, Durkheim, Foucault and others, in order to defamiliarise the religion which Europeans and Americans especially often take for granted. Issues examined may include the nature and experience of belief, conversion and the appropriation of Christian doctrines by local populations, the problems of writing about religion, Christianity and the state, the nature of religious confession, Christian texts, and Scriptural reading practices, Christian objects and materialities, Christianity and women's religious and social experience (from Medieval women mystics to women priests), inquisitions and heretical beliefs, priests and alternative forms of mediation with divine power, miraculous saints, incorrupt bodies and 'non-eaters' and changing ideas about death, Heaven and Hell. Where possible, the course will include a student fieldwork weekend and forms of reflection and reporting on that experience. Please check with the course teacher in any given year whether this is planned as part of the year's programme.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

This year, some or all of this teaching will be delivered through a combination of virtual lectures, classes and online interactive activities. The contact hours listed above are the minimum expected. There will be a reading week in Week 6 of the WT.

Formative coursework: Students are expected to prepare discussion material for presentation in the seminars. Students will be expected to produce 1 essay in the WT.

Indicative reading:

- M Bloch, *From Blessing to Violence: History and Ideology in the Circumcision Ritual of the Merina of Madagascar*;
- F Cannell, *Catholicism, Spirit Mediums and the Ideal of Beauty in a Bicolano Community, Philippines* (PhD thesis, University of London);
- W Christian, *Person and God in a Spanish Valley* (reprint 1988);
- J Comaroff, *Body of Power, Spirit of Resistance*;
- J de Pina Cabral, *Sons of Adam, Daughters of Eve: the Peasant World View in the Alto Minho*;
- R Iletto, *Pasyon and Revolution: Popular Movements in the Philippines, 1840-1910*;
- J Nash, *We Eat the Mines and the Mines Eat us: Dependency and Exploitation in Bolivian Tin Mines*;
- M Taussig, *The Devil and Commodity Fetishism in South America*.

Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

AN420 Half Unit Not available in 2024/25

The Anthropology of Southeast Asia

This information is for the 2024/25 session.

Teacher responsible: Dr Christopher Chaplin

Availability: This course is available on the MSc in Anthropology and Development, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The region of Southeast Asia has made a major contribution to the anthropological and ethnographic study of religion, gender, identity, violence, environmentalism, and state sovereignty. This course aims to introduce students to ethnographic materials and theoretical topics pertaining to society and culture within the region. In providing a strong grounding in regionally based empirical studies, the course will offer students the tools to critically evaluate anthropological contributions to understanding Southeast Asia, and to consider what role the region and Southeast Asians play in broader theoretical debates within the discipline.

Course Topics

The course will examine how anthropology contributes to and responds to interpretative challenges relating to:

1. Imagining Southeast Asia
2. Power, Potency and Puppetry
3. Anarchy, Egalitarianism and Entangled Freedoms
4. Violence, Memory, and Absence
5. Piety and Ritual: Manifestations of Global Religion
6. Gender Pluralism
7. Development: Spectres of Modernity
8. Democratic Imaginaries and Authoritarian Turns
9. Southeast Asia's Periphery: Belonging, Statelessness and Liminality
10. Southeast Asia and the World

Intended Learning Aims/Outcomes

The course is intended to familiarise students to the diversity of cultures and social systems in Southeast Asia. By the end of the course, students will be expected to be familiar with key topics and theoretical debates in the anthropological study of the region, including ideas of power, freedom, violence and memory, gender & sexuality, religion & ritual, ecology, capitalism, democracy and belonging. Additionally, the course aims to enable students to discuss and appraise the major debates stemming from anthropological research in Southeast Asia, and be equipped to consider the extent to which such research might be applied and relevant to other regions of the world.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. Film screenings will also take place throughout the term. There will be a reading week in Week 6 of the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: Useful histories of Southeast Asia / Southeast Asian anthropology

- M.C. Ricklefs, B. Lockhart, A. Lau, P. Reyes, and M.A. Thwin, A New History of Southeast Asia (2010);
- V.T. King and W.D. Wilder, The Modern Anthropology of South-East Asia: An Introduction (2003).
- E. Thompson and V. Sinha, Anthropology in Southeast Asia: National Traditions and Transnational Practices (2019). Ethnographies
- Barker, J., E. Harms, and J. Lindquist, eds. 2014. Figures of Southeast Asian Modernity. Honolulu: University of Hawai'i Press.
- Hinton, A. L. 2005. Why Did They Kill? Cambodia in the Shadow of Genocide. Berkeley: University of California Press.
- Keeler, W. 1987. Javanese Shadow Plays, Javanese Selves. Princeton: Princeton University Press.
- Langford, J. M. 2013. Consoling Ghosts: Stories of Medicine and Mourning from Southeast Asians in Exile. Minneapolis: University of Minnesota Press.
- Long, N. J. 2013. Being Malay in Indonesia: Histories, Hopes and Citizenship in the Riau Archipelago. Copenhagen: NIAS Press.
- Peletz, M. G. 2009. Gender Pluralism: Southeast Asia since Early Modern Times. London & New York: Routledge.
- Schwenkel, C. 2009. The American War in Contemporary Vietnam: Transnational Remembrance and Representation. Bloomington: Indiana University Press.
- Scott, J. C. 2009. The Art of Not Being Governed: An Anarchist History of Upland Southeast Asia. New Haven & London: Yale University Press.
- Sloane, P. 1999. Islam, Modernity and Entrepreneurship among the Malays. Basingstoke: Macmillan.

Detailed reading lists are provided at the beginning of the course.

Assessment: Coursework (100%, 4000 words) in the WT.

Students will be asked to write a 4,000 word essay.

AN424 Half Unit

The Anthropology of Melanesia

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Scott

Availability: This course is available on the MSc in Anthropology and Development, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is

available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides an introduction to selected themes in the anthropology of the region in the Southwest Pacific Ocean known as Melanesia. It gives students a grounding in the contemporary anthropology of the region, primarily through a close reading of three book-length ethnographies.

The three ethnographies, which are all new since 2021, are Tom Bratrud's *Fire on the Island*, an analysis of the hopes and fears expressed in a Christian charismatic revival on the small island of Ahamb in the nation-state of Vanuatu; Melissa Demian's *In Memory of Times to Come*, an account of memory, time, and history among a people living on the southeastern coast of Papua New Guinea who feel nostalgia for the colonial past; and Matthew Lauer's *Sensing Disaster*, a study of how nearly everyone on Simbo in the western Solomon Islands managed to escape a destructive tsunami.

These ethnographies not only provide students with focused accounts of three very different national contexts in Melanesia, they also address histories, dynamics, and concerns familiar to people living throughout the region. Furthermore, because the three authors draw on different intellectual antecedents and disciplinary traditions, their work provides an entrée into the most influential theoretical debates animating Pacific anthropology today.

Topics to be traced throughout the course include landscape and place, personhood and sociality, religion and cosmology, the past and the present, colonialism and its consequences, development, globalization, the state, and the nature of ethnographic fieldwork. Engagement with these three books will be enhanced and supplemented by other readings, including works by Pacific Islanders.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Tom Bratrud, *Fire on the Island: Fear, Hope and a Christian Revival in Vanuatu* (2022); Melissa Demian, *In Memory of Times to Come: Ironies of History in Southeastern Papua New Guinea* (2021); Matthew Lauer, *Sensing Disaster: Local Knowledge and Vulnerability in Oceania* (2023). Detailed reading lists are provided at the beginning of the course.

Assessment: Essay (100%, 4000 words) in the ST.

The assessed essay must be between 3,500 – 4,000 words in length.

AN436 Half Unit

The Anthropology of Development

This information is for the 2024/25 session.

Teacher responsible: Dr Agathe Faure

Availability: This course is compulsory on the MSc in Anthropology and Development. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Development and Humanitarian Emergencies, MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Social Anthropology and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course explores how anthropologists have evaluated, criticised and contributed to development. Focussing on both 'Big D' development (schemes of improvement or projects) and 'little d' development (change which occurs as the result of economic growth or modernisation) the course shows how anthropological insights have been used to change practices

from within as well as critique development from the outside. From anthropological work which seeks pragmatic engagement to that which deconstructs development as an oppressive and power laden discourse, the course aims to give students a broad background to the field. Topics covered include the role of the state; local politics and power relations; gender and empowerment; development as discourse and 'aidnography'; neo liberalism and global capital; corporate social responsibility; markets and micro credit; and the relationship between 'tradition' and modernity. Throughout, the course will draw upon a broad range of ethnographic examples.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of AT.

Formative coursework: Students are expected to prepare discussion material to participate in the seminars based on the core ethnographies of the course. Formative work will include a mock exam question.

Indicative reading: Gardner and Lewis 2015, *Anthropology and Development: Twenty First Century Challenges*; Ferguson, J. 1990 *The Anti-Politics Machine: Development, Depoliticisation and Bureaucratic Power in Lesotho*; Cambridge University Press; Li, T. 2014 *Land's End: Capitalist Relations on an Indigenous Frontier*; Karim, L., 2011 *Micro-Finance and its Discontents: Women and Debt in Bangladesh*; Elyachar, J. 2005; *Markets of Dispossession: NGOs, the Market and the State in Cairo*; Scherz, C. 2014. *Having People, Having Heart: Charity, Sustainable Development, and Problems of Dependence in Central Uganda*; Scott, J. 1998, *Seeing Like a State: How Certain Schemes to Improve the Human Condition have Failed*.

Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

AN442

Supervised Reading Course and Fieldwork Preparation

This information is for the 2024/25 session.

Teacher responsible: Members of staff of the Anthropology Department (students' supervisors).

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: The programme of supervised reading aims to give students a detailed knowledge of the regional ethnographic literature relevant to their proposed research project, as well as providing them with a firm grounding in the theoretical literature relevant to their research objectives. The programme also aims to aid students in the practical organization of their field research (eg organizing language training, obtaining research permits and academic affiliations) through their supervisors' personal guidance. The programme of supervised reading will be specific to each student. It will be agreed with his/her supervisors at the beginning of the academic year and it will be closely reviewed during the course of the academic year.

Teaching: Students should expect to meet with at least one of their supervisors at 2-3 weekly intervals during term time, and to submit essays relevant to the preparation of their Research Proposal (AN443).

Formative coursework: Students will be required to write essays for their supervisors throughout the academic year.

Assessment: Research proposal (100%) in the ST. Students' progress will be monitored by their supervisors through verbal discussion of the submitted written work. The work they undertake for this course is expected to feed directly into the preparation of the Research Proposal (AN443) and will be formally examined through it.

AN443

Research Proposal

This information is for the 2024/25 session.

Teacher responsible: Members of staff of the Anthropology Department

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: All students must prepare a formal Research Proposal of 8,000-10,000 words (excluding references) for submission to the Department on or before the deadline in June. The proposal is written under the guidance of their supervisors (as set out in AN442), and will normally draw on material studied as part of AN471 Qualitative and Quantitative Methods for Anthropologists and AN472 Evidence and Arguments in Anthropology and Other Social Sciences. It will be expected to demonstrate knowledge of the regional ethnography, and theoretical and methodological literatures, relevant to the proposed research.

Assessment: Research proposal (100%).

AN447

China in Comparative Perspective

This information is for the 2024/25 session.

Teacher responsible: Dr Johannes Steinmuller and Dr Gareth Breen

Availability: This course is compulsory on the MSc in China in Comparative Perspective. This course is available on the MA in Asian and International History (LSE and NUS), MSc in Anthropology and Development, MSc in International and Asian History, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places are limited and priority is given to MSc China in Comparative Perspective students.

Course content: The main object of the course is to help students develop ways of putting the politics, economy and social life of China into a framework in which they can compare and juxtapose it with other major examples. Main topics include China's imperial bureaucracy, Chinese religion, the great divergence debate, as well as current issues such as urban life, the family, the rule of law, and contentious politics. Students will bring whatever theoretical approaches they have already learned and are continuing to learn in the disciplines they bring to the course. They will be expected to demonstrate and explain how they are using them as well as to listen to other approaches and disciplinary perspectives.

Teaching: 15 hours of lectures and 10 hours of seminars in the AT. 15 hours of lectures and 10 hours of seminars in the WT. 1 hour and 30 minutes of lectures and 1 hour of seminars in the ST. The contact hours listed above are the minimum expected. This course has reading week in Week 6 of both AT and WT.

Formative coursework: Formative coursework consists of participation in weekly seminars, and the opportunity to discuss one formative essay in each of the AT and WT with the course convener or the student's academic mentor.

Indicative reading:

- Fei Xiaotong 1992 [1948]. *From the Soil, the Foundations of Chinese Society: A Translation of Fei Xiaotong's Xiangtu Zhongguo*, with an Introduction and Epilogue, transl. Gary Hamilton and Wang Zheng, Berkeley: University of California Press.
- Harrison, Henrietta 2001. *China (Inventing the Nation)*. London: Arnold.
- Stockman, Norman 2001. *Understanding Chinese Society*. Cambridge: Polity.
- Spence, Jonathan D. 1991. *The search for modern China*. New York: Norton.
- Weber, Max 1951. *The Religion of China: Confucianism and*

Taoism, transl. Hans H. Gerth, New York: The Free Press.

- Yan Yunxiang 2003. *Private Life under Socialism. Love, Intimacy, and Family Change in a Chinese Village 1949-1999*. Stanford, CA: Stanford University Press.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

AN451 Half Unit Anthropology of Politics

This information is for the 2024/25 session.

Teacher responsible: Prof Mukulika Banerjee

Availability: This course is available on the MA in Modern History, MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in Development Studies, MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Regulation, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on politics and power in their cross-cultural application. Using Marxist, Weberian, and Foucauldian approaches it explores how power travels through different socio-cultural contexts, paying attention to issues such as leadership, ordered anarchy, brokerage, sovereignty, surveillance, spectacle, conspiracy, and violence. A recurring theme throughout the course concerns the state. How should the state be studied anthropologically? Processes of state formation and disintegration, nationalism in its various guises, and state-society relations will be reviewed in order to understand how European, post-colonial, and post-socialist societies are governed.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: Anderson, B, 1991 [1983], *Imagined communities: reflections on the origin and spread of nationalism*; Appadurai, A, 2006, *Fear of small numbers: an essay on the geography of anger*; Blok, A, 1988, *The Mafia of a Sicilian Village 1860-1960: a study of violent peasant entrepreneurs*; Bryant, R, & Reeves, M, 2021, *The Everyday Lives of Sovereignty*; Clastres, P, 1987, *Society against the state: essays in political anthropology*; Evans-Pritchard, EE, *The Nuer*; Leach, Edmund, 1954, *The Political Systems of Highland Burma*; Kwon, H, & B. Chung, 2012, *North Korea: beyond charismatic politics*; Mbembe, A, 2001, *On the Postcolony*; Navaro, Y, 2021, *The make-believe space: affective geography in a postwar polity*. Tuckett, A, 2018, *Rules, Paper, Status: Migrants and Precarious Bureaucracy in Contemporary Italy*; Vincent, J, 2002, *The Anthropology of Politics*; Wolf, E. 1999. *Envisioning Power: Ideologies of Dominance and Crisis*.

Assessment: Essay (100%, 4000 words) in the WT.

AN456 Half Unit Anthropology of Economy (1): Production and Exchange

This information is for the 2024/25 session.

Teacher responsible: Dr Wesam Hassan

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Development Studies, MSc in Inequalities and Social Science, MSc in Regulation, MSc

in Social Anthropology, MSc in Social Anthropology (Religion in the Contemporary World) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: What is the economy? We will explore how the history of capitalism has been inextricably tied to producing an idea of the economy as a distinctive domain of life and how anthropologists have persistently challenged this understanding, showing how economic life is inextricably tied to religion, politics and kinship, for instance. We will show the radical possibilities of social relations that anthropologists have offered by studying communities that appear to be 'the original affluent society', seemingly not affected by capitalist societies, or incorporated on their own terms. At the same time, we will examine the impact of capitalism and the inequalities it has brought on diverse people around the world, looking at the role of colonialism and empire, industrialisation and neoliberalisation, which includes regimes of production, accumulation and dispossession. Central to our examination will be understanding processes and experiences of exploitation, oppression and domination. We will unveil the invisible work of the many that is never valued but gets hidden in precarity, by migration regimes and within households. We will highlight the ways in which gender, race, ethnicity, caste and class need to be central to any analysis of the economy. At all times, we will look for people's creative responses to the situations they find themselves in, whether it is through acquiescence, reincorporation, religious conversion, weapons of the weak or outright rejection and revolt.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. 1 hour of lectures in the ST.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: A few ethnographies to whet your appetite:

Bronislaw Malinowski (1964) *Argonauts of the Western Pacific*; Marshall Sahlins (1974) *Stone Age Economics*; Marcel Mauss (1990 [1925]) *The Gift: the form and reason for exchange in archaic societies*; Sidney Mintz (1985) *Sweetness and Power: The Place of Sugar in Modern History*; June Nash (1979) *We Eat the Mines and the Mines Eat Us: dependency and exploitation in Bolivia's tin mines*; Michael Taussig (1980) *The Devil and Commodity Fetishism in South America*; Jonathan Parry (2020) *Classes of Labour in a Central Indian Steel Town*; Maria Mies (1982) *The Lace Makers of Narsapur: Indian Housewives produce for the World Market*; Carol Stack (1974) *All Our Kin*; Claude Meillassoux (1981) *Maidens, Meat and Money: capitalism and the domestic community*; Jan Breman (1974) *Patronage and Exploitation: changing agrarian relations in South Gujarat India*; Alpa Shah, Jens Lerche, Richard Axelby, Brendan Donegan, Dale Benbabaali, Jayaseelan Raj and Vikramaditya Thakur (2018) *Ground Down by Growth: Tribe, Caste, Class and Inequality in 21st Century India*; Tania Murray Li (2014) *Land's End: Capitalist Relations on the Indigenous Frontier*.

A few general overview texts: James G. Carrier and Don Kalb (eds) (2015) *Anthropologies of Class: Power, Practice, and Inequality*; Richard Wilk and Lisa Cliggett (1996) *Economies and Cultures: Foundations of Economic Anthropology*; James Carrier (ed) (2005) *A Handbook of Economic Anthropology*

Other general introductory texts: Stephen Gudeman (2001) *The Anthropology of Economy*; Chris Hann and Keith Hart (2011) *Economic Anthropology*; Susana Narotzky (1997) *New Directions in Economic Anthropology*; Jonathan Parry and Maurice Bloch (Eds) (1989) *Money and the Morality of Exchange*; Stuart Plattner (ed) (1989) *Economic Anthropology*; James Carrier (2019) *A Research Agenda for Economic Anthropology*

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

AN457 Half Unit

Anthropology of Economy (2): Transformation and Globalisation

This information is for the 2024/25 session.

Teacher responsible: Prof Deborah James

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Development Studies, MSc in Inequalities and Social Science, MSc in Regulation, MSc in Social Anthropology, MSc in Social Anthropology (Religion in the Contemporary World) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course explores the limits and potentials of contemporary ('late-stage') global capitalism. We all know that we live in a global economy, but how has this come into being? What are its political, social and cultural consequences? Why does the global economy produce inequality for many and abundance for some? What might its futures be? We will answer these questions in relation to classic themes of production, social reproduction, redistribution, circulation and consumption. By taking an anthropological approach we will move away from an economic or deterministic theory of capitalism. Instead we will explore the significance of mutuality, kinship and community, affect, ethics and culture for an understanding of capitalism. Our theoretical approaches will be expanded to explore the emerging anthropology of some of the following: infrastructures, the commodification of intimacy and care, 'affective' economies and hope, digital interactions, financialisation and debt, and anthropological views on welfare. We will examine global capitalism from the perspective of global elites, the middle classes and the precarious poor. The course will demonstrate that globalisation does not have a single logic nor is it a towering force. Instead, our focus on ethnography takes us inside the local processes behind accumulation. At the end of the course we will have a better understanding of recent global changes, as well as a set of theoretical tools that can help us to rethink approaches to capitalism in general.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT. 1 hour of lectures in the ST.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Altenried, Moritz. 2022. *The Digital Factory: The Human Labor of Automation*. Chicago: Chicago University Press. Bear, Laura. 2015. *Navigating Austerity: Currents of Debt Along a South Asian River*. Stanford University Press. Yanagisako, S. and L. Rofel. 2019. *Fabricating Transnational Capitalism: a collaborative ethnography of Italian-Chinese Global Fashion*. Duke University Press.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

AN458 Half Unit Not available in 2024/25

Children and Youth in Contemporary Ethnography

This information is for the 2024/25 session.

Teacher responsible: Prof Catherine Allerton OLD 6.13

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course explores the paradoxes and contexts of social science work on children and youth through an intensive focus on contemporary ethnographies exploring children's social worlds. This ethnographic work is multi-disciplinary (emerging from anthropology, geography, sociology, media studies), and builds both on earlier ethnographies of childhood from the mid-twentieth-century onwards, and on growing theoretical interest in cross-cultural understandings of 'the child' and their competencies. In the first half of the course, we investigate 5 central paradoxes that emerge through a consideration of children and childhood. These are: 1) Universal/ Constructed; 2) Being/ Becoming; 3) Structure/ Agency; 4) Protection/ Participation; and 5) Representation/ Reality. These paradoxes allow us to consider important questions such as: What does it mean to see childhood as a 'construction'? How has ethnographic work questioned universal frameworks for child development? How should we understand children's agency? How successfully can 'child rights' be achieved in different cultural contexts? Why should children's perspectives be taken more seriously in the social sciences? In the second half of the course, we turn to 5 key contexts for ethnographic analyses of children's lives. These are: the street, school, work, play and war. How have the lives of 'street children' been approached and understood? What do critical ethnographies of schooling tell us about its role in reproducing inequalities? What, if anything, is the difference between beneficial child work and harmful 'child labour'? How can we recognise and theorise children's play? And how have ethnographic accounts documented both trauma and resilience in the context of 'child soldiering'?

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

This course has a reading week in Week 6 of LT. 4 hours of film screenings in LT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: R.A. LeVine and R.S. New (eds) 2008.

Anthropology and child development: a cross-cultural reader; N. Scheper-Hughes and C. Sargent (eds) 1998. *Small wars: the cultural politics of childhood*; K.F. Olwig and E. Gullov (eds) 2003. *Children's places: cross-cultural perspectives*. D. Durham & J. Cole (eds) 2006. *Generations and globalization: youth, age and family in the new world economy*; M. Liebel. 2004. *A will of their own: cross cultural perspectives on working children*; V. Amit-Talai and H. Wulff (eds) 1995. *Youth cultures: a cross-cultural perspective*; A. James. 1993. *Childhood identities: self and social relationships in the experience of the child*. A. de Waal and N. Argenti (eds) 2002. *Young Africa: Realising the rights of children and youth*; J. Boyden and J. de Berry (eds) 2004. *Children and youth on the frontline: ethnography, armed conflict and displacement*; Levinson, B. D. Foley & D. Holland. (eds) 1996. *The cultural production of the educated person: critical ethnographies of schooling and local practice*; H. Montgomery. 2009. *An introduction to childhood: anthropological perspectives on children's lives*;

Assessment: Coursework (100%, 4000 words) in the ST.

AN467 Half Unit The Anthropology of South Asia

This information is for the 2024/25 session.

Teacher responsible: Prof Mukulika Banerjee

Availability: This course is available on the MSc in Anthropology and Development, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: You need to be enrolled in a degree that requires analytical and qualitative research skills. You may be asked to submit written work to determine your ability for this course.

Course content: This course will aim to address issues of citizenship, inequality and social justice, religious faith and practices, migration and labour and consumption patterns in rural and urban South Asia. The course will cover both classic and current literature and weekly sessions will be organised thematically. South Asia is an ideal setting to examine many paradoxes that exist elsewhere - alongside some of the highest rates of economic growth there is growing inequality, there is a growing middle class but high rates of precarious poverty, the countries remain largely rural yet they will hold the largest urban population in the world in less than ten years and so on. In order to understand these paradoxes, it is essential that issues of macro economic policy, social inequality, infrastructural development, political mobilisation and popular culture, mobilisation along religious lines in each country and the rise of the 'threatened majorities' that behave like minority populations - be examined in greater detail. Using a rich body of anthropological research on South Asia, this course will examine several of these issues and more in this course. The literature on India is the largest available but every attempt will be made to cover the anthropological literature on Pakistan, Nepal, Sri Lanka and Bangladesh alongside. All these issues and more will be addressed in this course through the rich corpus of anthropological literature on the subject alongside examples from India's vibrant media and popular culture.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

The course has a reading week in Week 6 of the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Please read at least TWO of the following background readings before the start of the course and certainly by the end of the second week of the course:

Sunil Khilnani, *The Idea of India*; Ramachandra Guha, *India After Gandhi*; Corbridge, S. and Harris, J., *Reinventing India: Liberalization, Hindu Politics and Popular Democracy*; Rana Dasgupta, *Capital: The Eruption of Delhi*; Ammara Maqsood, *The New Pakistani Middle class*; Delwar Hussain, *Boundaries Undermined: The ruins of progress on Bangladesh-India Border*; Fiction: Vikram Seth, *A Suitable Boy*; Rohinton Mistry, *A Fine Balance*; Bapsi Sidhwa, *Ice Candy Man*; Neel Mukherjee, *The Lives of Others*; Daniyal Mueenuddin, *In Other Rooms, Other Wonders*; Arundhati Roy, *The God of Small Things*; Saadat Hasan Manto, *Toba Tek Singh: Stories*

Assessment: Take-home assessment (100%) in the period between WT and ST.

grounding in the ethnographic literature of the region while seeking to engage with current theoretical debates, highlighting their potential importance to the discipline of anthropology. Topics to be covered include history, indigenous social movements; sexuality and gender; trade and inter-ethnic relations; politics and power; illness, well-being and death. Students will be encouraged to reflect on the broader relationship between ethnography and theory, to challenge common stereotypes of Amazonia and its inhabitants, and to explore ways in which the region has inscribed itself on the imagination of anthropologists and laypersons alike.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. This course has a reading week in Week 6 of AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

- Overing, Joanna. & Alan Passes (eds). 2000. *The Anthropology of Love and Anger: The Aesthetics of Conviviality in Native Amazonia*.
- Penfield, Amy. 2024. *Predatory Economies: The Sanema and the Socialist State in Contemporary Amazonia*.
- Walker, Harry. 2012. *Under a Watchful Eye: Self, Power and Intimacy in Amazonia*.
- Campbell, Jeremy. 2015. *Conjuring Property: Speculation and Environmental Futures in the Brazilian Amazon*.
- Costa, Luiz. 2017. *The Owners of Kinship: Asymmetrical Relations in Indigenous Amazonia*.
- Seeger, Anthony. 2004. *Why Suyá Sing: A Musical Anthropology of an Amazonian People*.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

The exam will be an on-campus invigilated e-exam.

AN471 Qualitative and Quantitative Methods for Anthropologists

This information is for the 2024/25 session.

Teacher responsible: Dr Mareike Winchell and Prof Mathijs Pelkmans

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: The twofold aim of this course is to provide students with insights into the process by which anthropological knowledge is produced, and to train them in the collection and analysis of qualitative and quantitative data. In doing so it offers students a methodological framework for conceptualising and designing their own PhD research projects. The course discusses the nature of ethnographic data and evidence, its implications for research, and ways of incorporating empirical data in ethnographic texts.

Teaching: 10 hours of lectures and 30 hours of seminars in the AT. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 2 presentations in the AT.

Students will carry out fieldwork exercises and read selected texts. They will present their findings as part of two scheduled presentations, on which they will receive in-seminar verbal feedback.

Indicative reading: A. Robben and A. Sluka (eds.) 2007. *Ethnographic Fieldwork: An anthropological reader*; P. Atkinson. 2015. *For Ethnography*; R. H. Bernard. *Research Methods in Cultural Anthropology: Qualitative and Quantitative Approaches*. Fifth Edition. A. Cerwonka and L. Malkki. 2007. *Improvising Theory: Process and Temporality in Ethnographic Fieldwork*. K. Narayan. 2012. *Alive in the Writing: Crafting Ethnography in the Company of Chekhov*.

Assessment: Essay (50%, 3000 words) and essay (50%, 3000 words) in the AT.

AN469 Half Unit The Anthropology of Amazonia

This information is for the 2024/25 session.

Teacher responsible: Dr Harry Walker

Availability: This course is available on the MSc in Anthropology and Development and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will introduce students to selected themes in the anthropology of Amazonia. It will provide a

Students will write two 3,000-word essays (each worth 50%), which can draw from issues covered in either the Tuesday or the Friday class, or both. The first essay is to be submitted on the first day after reading week, and the deadline for the second essay is the last day of AT.

AN472

Evidence and Arguments in Anthropology and Other Social Sciences

This information is for the 2024/25 session.

Teacher responsible: This course will be co-taught by Faculty in the Department of Anthropology.

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: This seminar course considers research practices across a range of social and natural sciences, arts and humanities in order to explore methodological issues that are relevant to anthropology and ethnography. In particular, it focuses on the relationship between evidence and the kinds of inferences and conclusions which are drawn by researchers in different fields. Each week students will be involved in two seminars, one on Tuesday and one on Friday. In Tuesday seminars, we will consider case-studies taken from different disciplines in relation to the research practices of ethnographers. The disciplines covered may include: cognitive science & developmental psychology; psychoanalysis; moral and political philosophy; photographic and visual art theory; history and archival research; demography; human and behavioural ecology; development studies; linguistic anthropology; philosophy of science and STS; literary criticism; creative writing; and architecture. In the Friday seminars, students will present their own draft research proposals to others in written and oral form, focusing on (1) the questions they hope to explore in their dissertations; (2) the kinds of evidence they will need in order to adequately explore these questions; (3) the methods they will adopt in order to collect this evidence.

Teaching: 40 hours of seminars in the WT.

The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 case study in the WT.

This will allow students to practice and receive feedback on the direct application of different disciplinary perspectives to a body of data, in preparation for their summative assessment and for their future research.

Assessment: Essay (50%, 3000 words) and essay (50%, 3000 words).

AN475 Half Unit Not available in 2024/25

The Anthropology of Revolution

This information is for the 2024/25 session.

Teacher responsible: Prof Alpa Shah OLD 6.17A

Availability: This course is available on the MA in Modern History, MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit.

Optional for MSc students in Anthropology. Also available to students on other degree programmes as an outside option.

Course content: This course will focus on the study of revolution from an anthropological perspective. It will concentrate on three different types of revolutionary struggle, in three different continents, through three different types of ethnographies: the Zapatista indigenous movement in Mexico, the Zimbabwean anti-colonial struggle, and the Maoist movement in South Asia. In each case, students will be encouraged to critically consider

the varying degrees of involvement of the anthropologist in the movements concerned, the theoretical premises of the anthropologists and how these affect the politics and ethics of writing. In this process, students will deepen their understandings of the theoretical debates around production and reproduction, social transformation, religion and secularism, activism and anthropology, and violence and ethics in radical social change. The course will demonstrate that although anthropologists were once criticised for 'missing the revolution' on their doorstep, in fact their long term engagement with communities who come to be affected by revolutionary struggles has much to offer to the theoretical and practical work of radical social transformation.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT. This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: This course will be based on the close reading of the following three ethnographic monographs:

Earle, Duncan, & Simonelli, Jeanne. (2005). *Uprising of Hope: Sharing the Zapatista Journey to Alternative Development*. Walnut Creek: Altamira Press.

Lan, David. (1985). *Guns and Rain: guerrillas and spirit mediums in Zimbabwe*. Berkeley: University of California Press.

Shah, Alpa (2018) *Nightmarch: Among India's Revolutionary Guerrillas*. London: Hurst Publishers

Assessment: Take-home assessment (100%) in the WT.

The take home exam will be held the week following the end of the LT.

AN476 Half Unit

Anthropology and the Anthropocene

This information is for the 2024/25 session.

Teacher responsible: Dr Gisa Wieszkalnys

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: In August 2016, scientists participating in the Anthropocene Working Group put forward an official recommendation to rename our present time interval 'the Anthropocene'. It postulates that humans now exert recognisable influences on the earth's bio- and geophysical systems sufficient to warrant the naming of a distinct geological epoch encompassing the earth's present, recent past, and indefinite future. The Anthropocene thus echoes contemporary anxieties about climate change, the deterioration of global ecologies, and other environmental crises on unprecedented scales, as well as humans' capacity to devise adequate solutions to the problems they face. The scholarly and popular debate on the Anthropocene has exploded in recent years, with anthropologists contributing both theoretical and important ethnographic insight into how people apprehend and deal with the repercussions of anthropogenic environmental change. It now seems that the continued successful existence of humanity on this planet will require us to live differently both with each other and with the earth: 'We will go onwards in a different mode of humanity or not at all' (Val Plumwood 2007).

In this course, we will approach the Anthropocene as a contested category, with evident political and ethical implications. We will begin by examining the dramatic changes in the relationship between humans and their natural environments brought about by industrialisation, specifically, the increased exploitation of natural resources as well as the production and use of fossil fuels on a large scale. We will attend to the practices and cosmologies of people who in their everyday lives – for example, by digging, polluting, and wasting – participate in the work of anthropogenic alterations, drawing on case studies from across the world. We will consider alternative labels, such as the Capitalocene,

Plantationocene, Plasticene, Eurocene, Misanthropocene, and Neologocene, each of which tells a different origin story for what Donna Haraway has called 'the trouble'. However, we then move to ask whether the Anthropocene might be less a marker of an epochal transformation than a signal of a profound anti-political shift in discussions about the future of the planet. We will inspect the scientific and non-scientific controversies the Anthropocene has provoked, and the particular forms of power, authority, reason, imagination, and subjectivity it has generated.

Students will be expected to engage with a variety of resources, including online publications, blogs, documentary and feature films, and other media, and an emergent interdisciplinary literature, spanning the social and natural sciences, which we will read in relation to a more long-standing engagement with the environment within the anthropological discipline. This will lead us to interrogate established binaries of human/nonhuman, subject/object, and nature/culture, and, significantly, to ask about the critical valence of anthropologists' enquiry into the 'anthropos' for an age so profoundly shaped by humans. What methods and modes of analysis are required to comprehend the diverse human/non-human interactions and seemingly incommensurable scales that the Anthropocene invokes? What types of collaboration, knowledge, and mutual care does an anthropocenic outlook make possible? How can we anchor the manifold theoretical proposals that have been put forward not just in ethnographic examples but also in own 'experiments for living'?

Teaching: 7 hours of lectures, 7 hours of seminars and 6 hours of workshops in the AT.

The course is comprised of three cycles of three weeks plus an additional, concluding week. Each cycle consists of two weeks taught in the traditional lecture/seminar format, and a third week with a two-hour workshop in a larger group. While the one-hour seminars will focus on core readings set by the lecturer, the two-hour workshop will, in addition, offer space for viewing other resources (films, online material), discussing students independently researched material, student presentations, etc.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the AT.

Indicative reading: N. Clark and B. Szerszynski (2020) *Planetary Social Thought: The Anthropocene challenge to the social sciences*
J. Cruikshank (2005) *Do Glaciers Listen? Local Knowledge, Colonial Encounters, and Social Imagination*

Assessment: Essay (100%, 4000 words) in the WT.

AN477 Half Unit Not available in 2024/25

Topics in the Anthropology of sub-Saharan Africa

This information is for the 2024/25 session.

Teacher responsible: Prof Deborah James

Availability: This course is available on the MSc in Anthropology and Development and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available with permission as an outside option to

students on other programmes where regulations permit.

Pre-requisites: It is preferred that students will normally have done preliminary courses in Anthropology or have a Social Science background, but there is some flexibility. Students should consult the course lecturer.

Course content: This course gives students a critical understanding of ethnographic and theoretical writing on sub-Saharan Africa. Grounded in some classic debates around tradition and modernity (kinship-based polities vs states; studies on occult knowledge vs rationally-oriented political economy approaches; 'objective' class vs forms of identification such as tribe or race), it explores questions about how the sub-continent's societies orient themselves, and respond to new precarities, in a postcolonial and neoliberal age. How are changing urban realities experienced and expressed in popular culture? How are the politics of land and belonging being reshaped? Do youth have a future of work in post-industrial Africa - and what new gender identities are they developing? Are there specifically African forms of knowledge? What is postcolonial about the 'postcolony'? Is Europe 'evolving towards Africa', as has been maintained? The course also thinks through the role of fiction, non-ethnographic writing and non-academic voices in shaping anthropology on the sub-continent.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. The contact hours listed above are the minimum expected. This course has a reading week in Week 6 of AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Students will be asked to write one formative review during termtime, to be discussed with and evaluated by the course lecturer. The formative review will allow for students' individuality and expression and allow them to bring their own interest in current debates into interplay with course materials.

Assessment: Take-home assessment (100%) in the period between AT and WT.

AN479 Half Unit

Anthropology of Law

This information is for the 2024/25 session.

Teacher responsible: Dr Harry Walker

Availability: This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available as an outside option to students on other programmes where regulations permit.

This course will be particularly useful for anthropology students who are interested in political/legal issues and political economy perspectives in anthropology. It will also be interesting to law students with an interest in socio-legal, critical, criminological and anthropological approaches to the study of law, and to students from other departments who wish to learn about these topics.

The course is an independent half unit which complements the

Anthropology of Politics half unit.

Course content: The aim of this course is to introduce students to major developments and debates in legal anthropology across time and space. The first part of the course reflects on the origins and early developments of the discipline, including the legacies of colonialism and its impact on the development of customary law; the concept of legal pluralism; and the relationship between law, violence, and the state. The second part of the course explores selected themes and debates in contemporary legal anthropology, including anthropological engagements with human rights; the concept of property; legal documents; and cultures of complaint. The final part of the course surveys emerging debates around indigenous sovereignties, environmental and interspecies justice, and the rights of nature.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT. 1 hour of lectures in the ST.

The course will be taught through a combination of weekly lectures and seminars.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Malinowski, B. 1924. *Crime and Custom in Savage Society*. New Jersey: Rowman & Allanheld.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

AN480 Half Unit Not available in 2024/25 Public Anthropology

This information is for the 2024/25 session.

Teacher responsible: Dr Andrea Pia

Availability: This course is available on the MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: What and how does anthropology contribute to public life? Do anthropologists have a responsibility to meaningfully contribute to communities beyond the academy that make the study of anthropology possible? This module explores the challenges, difficulties, and stakes of having ethnographic research encounter various publics, ranging from journalists, legal experts, and policymakers to activist groups, local populations, and other scholars. Students of this module engage critically with a variety of media (books, newspaper articles, documentaries, podcasts, social platforms and interactive digital tools) with a view of analysing the ways in which anthropological ideas are conveyed to broader audiences, reflecting on how to improve their representation and effectiveness, and proposing new ways of disseminating these ideas to different publics.

Teaching: 6 hours of lectures, 3 hours of seminars, 8 hours of classes and 12 hours of workshops in the WT.

The course is divided into ten weeks, consisting of a combination of lectures/movie workshops/classes. Each week students read excerpts from selected ethnographic texts across geographical areas that have spurred public interest for the sensitiveness of their subject matter or the questionability of their research ethics. Workshops introduce students to the public buzzes generated by these studies and ask them to reflect on the politics and situatedness of ethnographic research and on the relatability of its findings. In some of the seminars a 'local expert' will be present to serve as a resource in the discussion of the issues.

The focus of this module is on the relationship between anthropological theory, the power fields in which it is inserted and its diverse publics. The types of questions this module address are both of critical and applied nature: to what extent can ethnographic studies of the food production system, waste management and water and energy provisions make global social infrastructures fairer? To what extent structure/agency debates in anthropology (and cognate disciplines) may move public perceptions of criminality and marginality towards more sympathetic positions? How effective have ethnographic-based critiques of trickle-down economics and social mobility really been, and why? How can anthropological accounts of systemic inequality take root into public representations of otherness?

The course ends by examining recent anthropological proposals within academia for a more vocal and engaged anthropology. It asks student to critically reflect on whether the discipline's colonial past may still weigh on today's attempts at engaging new publics. What disciplinary benchmarks of successful engagement should anthropologists set up for their own scholarship?

Formative coursework: Students will be expected to produce 1 project and 1 presentation in the WT.

Formative assessment consists in a series of dedicated methodological seminars (two sessions in total) where students familiarise with non-traditional methods of communicating ethnographic insights. In preparation of seminars (on week 4 and 8) students submit a draft proposal of their research in progress and present related research materials in small groups.

Assessment: Research project (100%) in the ST.

The course is assessed via a research essay (100%).

For the research essay, students carry out independent research to produce a document of a maximum of 4000 words which relates anthropological scholarships to a public issue of their choice.

AN481 Half Unit Not available in 2024/25

Health and Welfare: Anthropological Perspectives

This information is for the 2024/25 session.

Teacher responsible: Dr Clara Devlieger OLD 6.08

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course will focus on the study of health and welfare from an anthropological perspective. The course departs from a focus on biomedicine, examining how anthropologists have analysed the individualising medical gaze and the consequences of biopolitics. We consider how understandings of illness, care and healing are socially defined in different socio-cultural contexts, paying attention to issues such as disease, old age, disability, and mental health. Such issues of health are increasingly shifting towards broader conceptions of 'well-being'. As we progress, therefore, we turn to examine how such ideas of health increasingly intersect with the policies and values of welfare, as the political management of well-being. Welfare is both a description of life, as well as a form of intervention that aims to improve those lives. We therefore consider how ethnographic approaches to redistributive work touch on issues concerned with what it means to fare well and how that might be secured in a world defined by inequalities. Ethnographic case studies here may include ethnographies of austerity, dependency and sharing.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT. This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the WT.

Assessment: Essay (100%, 4000 words) in the WT.

AN483 Half Unit Not available in 2024/25

Anthropology, Art, and Poetics

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Scott

Availability: This course is available on the MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: 'Art' and 'poetics' – practices of making and

creating – are prolific, diverse, fluid, and mutable. Nowadays, anything can become art, and art can be as many things as there are people who make and study it. The broad theme of this course will be the historical and ongoing nexus between art and anthropology. We will discover how anthropology has informed the theory and practice of art and vice versa.

Topics covered will include: art and the anthropology of modernity; the significance of qualifiers attached to the category art (e.g., 'primitive', 'fine', 'sacred', 'commercial', 'decorative', 'practical'); art and alternative modernities; Surrealism and anthropology; class, race, and gender in relation to art; the concept of ethnoaesthetics; economies of value; the ethnographic study of artists and art-making; the concept of art worlds; art and agency; the ethnography of art collecting and curation; the works of artist ethnographers and ethnographer artists; ways of decolonizing art; problems of cultural appropriation; intellectual property; and modes of relational and collaborative poetics.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will have the opportunity to write an (unmarked) formative essay (1,500 words) and will be invited to discuss the written feedback during office hours.

Assessment: Essay (100%, 4000 words) in the ST.

AN484 Half Unit

Anthropological Approaches to Race, Racism, and Decolonisation

This information is for the 2024/25 session.

Teacher responsible: Dr Anjana Bala

Availability: This course is available on the MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Empires, Colonialism and Globalisation, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is a call to action - in the tradition of the movements and literatures it examines - that will provide students with a foundational understanding of race and contemporary racism, as well as approaches and theories central to their potential transformation. The course will focus on the discipline's historical and present theoretical orientations to race, explore alternative modes and questions in the practice of anthropology raised by anthropologists and theorists of colour, and

provide an understanding of the policies - institutional, economic, social, and bureaucratic - that maintain both an academic and social racial status quo. Explicitly asking students to engage with the concept of antiracist and decolonial futures for anthropology, the course centres non-white/non-Western thought and thinkers, "activist" anthropology as a norm, and racial subjectivities as central to theory and practice.

The course will ask:

- What has been the role of the anthropologists of colour in forming the basis of what is commonly thought of as anthropological theory? What can we learn from their theories and methods?
- How can we understand contemporary racisms and how, positioned in the legacy of anthropology's contribution to its construction, can anthropology become an antiracist tool?
- Where can anthropology intervene on policy or re-orient theory to engage an antiracist epistemology in a transformative way? What is the scope of a so-called "activist" anthropology?
- What are the potential futures for anthropology as a discipline actively engaged in decolonising theory and methods?

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

PGT students will have the opportunity to write a 1,500 word formative essay, which will enable them to explore several themes that may be central their summative essay. The timing of the formative work will be determined based, in part, on the formative work students are asked to submit for their other courses. Feedback will be provided in writing, online, and during office hours.

the maintenance of white supremacy in Brazil, New Brunswick, N.J.: Rutgers University Press.

Assessment: Essay (100%, 4000 words) in the ST.

All PGT will be required to submit a 4,000 word policy proposal, which will be due in the subsequent term.

Students will be able to choose between:

- 1 a policy-focused essay utilizing ethnographic evidence for an anti-racist/decolonial intervention on a particular institution explored during the course,
- 2 a design for an anti-racist social movement or campaign, or;
- 3 a traditional theoretical essay taking race as the analytical lens for examination of an institution or policy addressed in the course.

AN485 Half Unit Mind and Society

This information is for the 2024/25 session.

Teacher responsible: Prof Laura Bear OLD.6.02

Availability: This course is available on the MSc in Anthropology and Development, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is not available as an outside option.

Course content: This course will introduce students to different ways in which anthropologists (and others) have sought to understand the human mind in its social and cultural context. It will survey a range of contemporary theoretical perspectives within psychological anthropology and cognate disciplines, including psychoanalytic and post-psychoanalytic social theory; phenomenological approaches in anthropology; and other anthropological engagements with the psy disciplines.

Students will learn to assess the value and limits of various perspectives on the human mind by placing them in dialogue with ethnographic studies of selected mental phenomena and mediating social practices. These ethnographies will be about the outer limits of mental experience such as the uncanny, hallucinations and dreams and how these relate to time. What does it mean to be human and to exist suspended between the past, present and future? And how do limit experiences alter our mental experiences of time and reality? How is our sense of mental reality generated and who gets to define what it is?

Specific topics addressed include:

- Human Consciousness in Time
- The Uncanny and 'Reality'
- Trauma and Temporality
- The Will and the Unconscious
- Scientific Experiments and other Hallucinations
- Neuroscience and Mystic Materialism
- Imagination and Dreaming
- The Gaze, Visions and Creativity

Teaching: 10 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

- Lepselter, S. 2016. *The Resonance of Unseen Things: poetics, power, captivity, and UFOs in the American uncanny*. University of Michigan Press

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

AN486 Half Unit Research Methods in Anthropology

This information is for the 2024/25 session.

Teacher responsible: Prof Mathijs Pelkmans Old.5.08

Availability: This course is available on the MSc in Anthropology and Development, MSc in China in Comparative Perspective and MSc in Social Anthropology. This course is not available as an outside option.

Course content: The aim of this course is to provide students with insight into the process by which anthropological knowledge is produced, and to train them in the collection, analysis, and presentation of qualitative data. The course is centred on the 'participant observation' approach, and uses this as a starting point for discussing various aspects of the research cycle, including project design, ethical research, observational techniques, fieldnote taking, ethnographic interviewing, sensory ethnography and narrative analysis. Throughout the course, students will test their grasp of methodological issues by carrying out fieldwork exercises, about which they will report in seminars, and which will form the basis for assessment alongside knowledge of the literature.

Teaching: 10 hours of lectures, 15 hours of seminars and 10 hours of help sessions in the WT.

The lectures will be offered asynchronously online, in the format of mini-lectures, interviews, debates, demonstrations, and task descriptions. Help sessions are optional, offering students to informally discuss aspects of their project.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading:

- Amit, Vered. 2003. Constructing the Field: Ethnographic Fieldwork in the Contemporary World;
- Atkinson, Paul. 2015. For Ethnography;
- Cerwonka, Allaine, and Liisa H. Malkki. 2008. Improvising theory: Process and Temporality in Ethnographic Fieldwork;
- DeWalt, Kathleen, and Billie DeWalt. 2010. Participant observation: A guide for fieldworkers;
- Faubion, J., and G. E. Marcus (eds.). 2009. Fieldwork Is Not What It Used To Be: Transition in Anthropology's Culture of Method;
- Ghodsee, Kirsten. 2016. From notes to narrative: Writing ethnographies that everyone can read;
- Konopinski, Natali (ed.) 2014. Doing Anthropological Research: A practical guide;
- Robben, Antonius and A. Sluka (eds.). 2007. Ethnographic Fieldwork: An anthropological reader;
- Spradley, James. 1980. Participant observation.

Assessment: Essay (50%, 2000 words) and essay (50%, 2000 words) in the ST.

Students will write two 2,000-word essays (each worth 50%).

The first essay draws on the course literature to address a broad

methodological question in anthropology, titles for which will be provided by the course convener.

The second essay will consist of a descriptive analysis of the phenomenon that the student focused on in carrying out their fieldwork exercises.

AN487 Half Unit Not available in 2024/25 Environmental Anthropology

This information is for the 2024/25 session.

Teacher responsible: Dr Mareike Winchell, Dr Gisa Weszkalnys and Dr Andrea Pia

Availability: This course is available on the MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: While the 'environment' may appear to be whatever is not human, ultimately all human societies shape and have been reshaped by specific environments. Departing from more conventional quantitative approaches to the environment, this course explores theoretical and empirical developments in understanding the relationship of people to the environment, including questions of inequality, race, nonhumans, and ontological difference. With case studies from Amazonia to the Arctic, the Andes to North America, East Asia and Europe, we will examine how different groups respond to the environments they help co-create through social organization and kinship, subsistence practices, conservation, technology, and religion. Topics to be addressed include: political ecology, environmental history, climate change, environmental and climate justice, Black and Indigenous rights, natural resource management, unequal development, cultural ecologies and the 'loss' of alternate ecological knowledges, population growth and resource consumption, imaginaries of sustainability and practiced collaborations to address climate change, minoritarian environmentalisms, and growing appeals to plural ontological systems including within Rights of Nature frameworks.

In recent years, a flurry of political activity and scholarship interrogates the ways that cosmo-politics (more-than-humans in political life), new ontologies (emergent ways of being or forms of existence), and broader collaborative zones of social and environmental worlding interrupt familiar concepts of humanity as exceptional. Along with supplying students with a grounding in social scientific debates about environments and the human, this course also historicizes these debates to link them to an older canon of ethnographic and ethnological research concerning pre-colonial religiosities, land management and settlement, property regimes, and exchange networks. By drawing together and building upon classic texts on human ecological adaptations, the co-production of people, culture and place, and recent ethnographies of human/environmental co-articulation, the course aims to historicize contemporary phenomena including eco-politics, conflicts over water, oil, natural gas, lithium, bauxite, cobalt, and copper, expanding soy and meat production frontiers, the growing influence of plantations, green jobs and agri-business, conservationism and sustainability initiatives, and political organizing for the most affected people and areas of climate breakdown and the personhood and rights of nonhumans. The course introduces students to key questions and analytic tools in the subfield of environmental anthropology, and also invites them to position these questions and tools in relation to real-world cases. By the end of the course, it is expected that students will have a grounding in classic debates in environmental anthropology and be able to apply social scientific concepts to emergent environmental and political case studies. As scholars, activists, and social movement actors rewrite relations between people and the environment, they allow us to re-assess who or what is an agent and where responsibility lies for the unequal burdens

of contemporary ecological crises. What is the relationship between culture and ecology? How can environments produce inequalities? Is there such a thing as wilderness? Where is the boundary between the human and the non-human? How is 'nature' understood in different communities? And how do different people and communities around the world live with the uneven burdens of resource loss, land dispossession, toxicity, climate change, and broader environmental violence?

Teaching: 7 hours of lectures, 10 hours and 30 minutes of seminars and 6 hours of workshops in the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Assessment: Essay (100%, 4000 words) in the WT.

AN488 Half Unit Not available in 2024/25 Gender, Sexuality and Kinship

This information is for the 2024/25 session.

Teacher responsible: Prof Catherine Allerton and Dr Nicholas Long

This course will first be available during the 2025/26 academic session.

Availability: This course is available on the MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course provides an examination of the cultural frameworks and social aspects of gender roles, personhood, human sexuality, and kinship systems, analysed through ethnographic examples from a diverse range of settings. It aims to equip students with the analytical tools to engage in theoretical debates concerning core concepts such as 'gender', 'sexuality', 'kinship', 'marriage', and the relationship between 'nature' and 'culture', as well as exploring how the experiences of gender, sexuality, and kinship vary according to the regimes of politics, law and materiality in which they are embedded.

The course charts the history of anthropological debates on sex and gender, sexuality, kinship, and relatedness, and familiarises students with a range of contemporary approaches to these themes, placing ethnographic materials into a critical dialogue with recent developments in theoretical fields such as

feminist theory, queer theory, the anthropology of colonialism, cognitive science, and psychoanalysis.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading:

- Carsten, J. *After Kinship* (2003);
- Chodorow, N. *The Power of Feelings: Personal Meaning in Psychoanalysis, Gender and Culture* (1999);

Assessment: Essay (100%, 4000 words) in the ST.

AN489 Half Unit Not available in 2024/25 Anthropology of the Body

This information is for the 2024/25 session.

Teacher responsible: Prof Catherine Allerton, Dr Clara Devlieger and Dr Nicholas Long

This course will first be available during the 2025/26 academic session.

Availability: This course is available on the MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course takes anthropological engagement with the body and embodiment as a point of departure to challenge the notion of the body as universal, natural or 'normal', instead revealing ways that bodies are social products of historical and cultural environments. Bodies cannot be separated from lived, multi-sensory experiences, and much anthropological debate surrounds the extent to which bodily experience precedes, exists alongside, or is determined by, shared cultural and discursive constructions. Therefore, the course investigates ways that we encounter and inhabit the world through our bodies, considering how the body is experienced, expressed, controlled, imagined, (com)modified and 'sited'. What can anthropological analyses of bodies reveal about subjectivity, personhood, masculinity and femininity? What do bodies tell us about encounters across species? How does sensory experience differ cross-culturally? When is a body not a body?

The course explores a wide range of potential theories and topics that may include: phenomenological approaches to the body; ideals of beauty and gendered body modification; skin and the senses; hair; pain and suffering; commodified bodies and body parts; moving, feeling and experiencing the body; affect theory; disciplining and controlling the body; the limits and the 'end' of the body; engagements with non-human bodies; decolonizing embodiment; body positivity.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Assessment: Essay (100%, 4000 words) in the WT.

AN490 Half Unit Not available in 2024/25 Anthropology and Religion

This information is for the 2024/25 session.

Teacher responsible: Dr Yazan Doughan, Dr Fenella Cannell and Prof Michael Scott

This course will first be available during the 2025/26 academic session.

Availability: This course is compulsory on the MSc in Social Anthropology (Religion in the Contemporary World). This course is available on the MSc in Anthropology and Development, MSc in China in Comparative Perspective and MSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course covers current approaches to and reconsiderations of classic topics in the anthropology of religion, such as: myth, ritual, belief and doubt, supernatural experience, ethical self-cultivation, asceticism, sacrifice, authority and charisma. Students will be introduced to debates concerning the ways in which 'religion' is said to influence or shape personal experience and collective public life in both western and non-western contexts.

Students will explore some of the key concepts that inform contemporary understandings of religion as a force in the world, the history of these concepts, how they enter into various political and ethical projects, and the extent to which they predefine 'religion' as an object of anthropological study.

Specific areas of focus may include:

- the relationship between 'religion' and 'secularism';
- conceptions of 'religious freedom';
- conversion;
- inter-religious conflict;
- the ethnography of religious minorities;
- the anthropology of religious movements; and
- the comparative anthropology of 'religions'.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

- Talal Asad 2009, *Genealogies of Religion: Discipline and Reasons of Power in Christianity and Islam*;

Assessment: Essay (100%, 4000 words) in the WT.

AN492 Half Unit Not available in 2024/25 Anthropological Entanglements in the Middle East

This information is for the 2024/25 session.

Teacher responsible: Dr Frederick Wojnarowski and Dr Yazan Doughan

Availability: This course is available on the MSc in Anthropology and Development, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides a wide-ranging, critical, and historically informed introduction to the ways anthropological knowledge has been produced, used and contested in the Middle East. It examines the conditions of possibility under which the idea of the Middle East as an ethnographic subject emerged, as situated within wider colonial contexts and European Orientalist thinking. It examines how anthropology came to turn its gaze upon people long-cast as Europe's original and exemplary cultural Other, and how, at times, scholars and writers from these societies have sought to return or reverse the occidental gaze. In doing so the course asks questions around the history, politics and poetics of representation that still resonate in popular discourses around the region today, and indeed in wider anthropology.

The course focuses ethnographically on the Arabic-speaking Mashriq; Egypt, Palestine, Syria, the Arabian Peninsular, Iraq, Jordan and Lebanon, as well as including, to a lesser extent, ethnographic work from Iran, Turkey and North Africa. A key theme running through the course is how representations of modernity have been created, debated and contested within various Middle Eastern societies over the last two centuries in the face of colonialism, war and mass forced migration, from late Ottoman reforms to the Arab Uprisings of the last decade; from 'Tanzimat to Tahrir'. We will look at the political cultures and subjectivities these histories have given rise to, and how these are resisted.

Considering a variety of voices and perspectives, the course will look at the relationship between ethnographies of the region and wider debates in the discipline. As well as scholarly works, we will engage with a number of works of fiction and film over the course. After some initial situating lectures, the course will involve a series of thematic and ethnography-driven lectures and classes, considering key themes and preoccupations in anthropological work in the region. These include; late Ottoman and colonial modernising projects; tribalism and segmentary theories as early anthropological obsessions and totalising models; changing approaches to questions of gender, from 'harem' studies, liberal feminism and its alternatives, to an increased interest in masculinities and sexuality; various approaches to Islam and to religious authority and piety; an examination of post-Orientalism critiques of anthropology and the discipline's own interrelated crisis of representation; anthropologists' resulting turn towards cities, nationalisms, diasporic communities and migration in the last three decades; an introduction to ethnographic approaches to media and popular cultures; a look at youth, protest and revolution in a historical context; and finally a consideration of anthropological engagements with ideas of ecological crisis and environmental justice in an area widely expected to be especially affected by anthropogenic climate change, but where technocratic attention often ignores its social and political economic implications and intersections.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Assessment: Essay (100%, 4000 words) in the WT.

AN493 Half Unit Not available in 2024/25 Language, Signs, World, Action! Introduction to Linguistic Anthropology

This information is for the 2024/25 session.

Teacher responsible: Dr Yazan Doughan

Availability: This course is available on the MSc in Anthropology and Development, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course introduces contemporary anthropological approaches to understanding socio-cultural life as what is precipitated through socially organized linguistic and broader semiotic processes. It considers how socio-cultural life is mediated by sign phenomena in all modalities of experience, and how sign systems are produced through socio-cultural processes. We will look at sign phenomena from two complimentary perspectives: how signs function semantically by looking at how signs (re)present their objects, and how they function pragmatically as appropriate and/or effective practice-in-context by drawing on and instantiating structural orders. The focus, however, will be on the pragmatics of language use, or how people act through language use. We will study the social life of language use by considering various artifacts, sites, institutionalizations, processes, and social networks. The aim throughout is to investigate the constitutive role of language and semiotic figuration in sociocultural power and in sociohistorical processes. In the first half of the course, students will be introduced to some key concepts in semiotic and linguistic anthropology and their place in the long tradition of thinking about language in anthropology and related disciplines, such as linguistics, semiotics, the philosophy of language, and sociology. These will include concepts such as sign, text and context, poetics, performativity, pragmatics and metapragmatics, linguistic differentiation, language ideologies, genres, addressivity, and publics. The second half of the course will be structured thematically whereby we consider how a focus on language use can illuminate various phenomena of interest to anthropological inquiry. These may include topics such as social interaction, nationalism and linguistic standardization, space and place, political communication, professional cultures, knowledge and expertise, selfhood, authority, and ethical life. By the end of the term students will be able to incorporate a semiotic and linguistic anthropological approach into their thinking and research.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT. The course has a reading week in week 6 of WT

Formative coursework: Students will be expected to produce 1

essay in the WT.

Students will be given different sets of ethnographic materials to analyse using the concepts they have learned.

Feedback will be provided online, and in group tutorials.

Indicative reading:

Assessment: Essay (100%, 4000 words) in the ST.

AN495 Half Unit Digital Anthropology

This information is for the 2024/25 session.

Teacher responsible: Dr Nicholas Long (OLD.3.37)

Availability: This course is available on the MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Social Anthropology and MSc in Social Anthropology (Religion in the Contemporary World). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course examines how people around the world are engaging with, and having their lives mediated by, digital technologies. Ethnographies of digital activities have revealed how the constraints and affordances of various platforms are potentiating distinct modes of relationality, communication and experience. At the same time, anthropological research complicates simplistic metanarratives of 'the digital' by revealing the use and experience of digital devices to be powerfully shaped by cultural, historical, infrastructural and political-economic context, amongst other factors. By attending to these various insights, the course will enable students to develop conceptual frameworks that they can use not only to understand diverse ethnographic case materials, but also to inform their responses to pressing political and ethical questions surrounding 'the digital', and to shape future engagements with digital technologies in their personal and professional lives.

Course content will address three main areas. Firstly, drawing on diverse ethnographic case studies, it will examine how humans interact with, within, and alongside digital devices and environments. Topics in this part of the course may include: human-robot relations; the culture and character of 'virtual worlds'; online gaming; augmented reality; and the character of relationships that straddle 'the offline' and 'the online'. Secondly, the course will explore the implications of various digital technologies and platforms for processes of cultural transmission and transformation. Topics in this part of the course may include: virality, 'trending', and internet celebrity; influencer cultures; emojis and GIFs; digital art and music production; digital marketing; disinformation and conspiracy; and digital activism. Finally, the

course will consider the specific contributions anthropological research can make to contemporary ethical and policy questions surrounding 'the digital'. These may include: the regulation of digital platforms and big tech companies; the promise and limits of e-governance; privacy and cybersecurity; the digitisation of healthcare, internet, smartphone and gaming 'addiction'; and possibilities for living alongside AI.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT. Lectures will introduce key themes, debates and theories.

Seminars will involve structured discussion of readings and case studies related to each week's lecture material.

This course has a reading week in Week 6.

Formative coursework: As part of their work for this course, students will produce a portfolio of position pieces, in which they articulate their views on a number of issues in digital anthropology. The lowest scoring position piece in students' portfolios will not count towards their final grade but will instead be considered a piece of formative work, with the feedback on it wholly developmental.

Indicative reading:

- Zhou Yongming. 2006. *Historicizing Online Politics: Telegraphy, the Internet, and Political Participation in China*. Stanford: Stanford University Press.

Assessment: Coursework (100%, 4500 words) in the ST. Students will be expected to produce a portfolio of three position pieces of up to 1500 words over the course of the WT and Easter vacation. These pieces may take various forms, including: argumentative interventions into the debates covered in the course, self-reflexive commentaries on students' own digital activities, understood in the light of the course materials; case study assignments analysing and commenting upon particular digital phenomena; and synoptic evaluations of digital anthropology as a field. The average mark of the two highest scoring position pieces will be used to determine students' final grade.

AN497

Dissertation: Religion in the Contemporary World

This information is for the 2024/25 session.

Teacher responsible: Dr Fenella Cannell

Availability: This course is compulsory on the MSc in Social Anthropology (Religion in the Contemporary World). This course is not available as an outside option.

Course content: The dissertation will address a topic in the social sciences of Religion in the Contemporary World. This will normally be a library-based dissertation, but may be supplemented by minor

original research elements in consultation with the academic adviser. The topic should make central use of concepts in the study of religion in the social sciences drawn from approved courses on the programme, particularly from the core course, and should demonstrate a good understanding of those concepts and their implications. The dissertation may draw on empirical topic areas suggested by the taught core and option courses of this programme, but must demonstrate an element of originality in analysis, content or both. The dissertation will normally contain an inter-disciplinary element which may be in the combination of material, the combination of critical, analytical or theoretical concepts, or both. Guidance on standards of presentation etc will be given in the MSc handbook, and will conform to the current standard laid down for the dissertations in MSc social anthropology.

Teaching: 1 hour of lectures in the AT. 3 hours of lectures in the WT. 3 hours of workshops in the ST.

There will be lecture on note taking and avoiding plagiarism in the AT. In addition to the two lectures in the WT and the dissertation workshop in the ST, students will discuss their projects and receive guidance during meetings with their mentors in AT, WT, and ST. The contact hours listed above are the minimum expected.

Formative coursework: Small group tutorials, individual mentoring, discussion of abstracts: please see Programme Proposal.

Presentations and class discussions in all programme courses will also contribute towards the formative preparation for the dissertation.

Assessment: Dissertation (100%, 10000 words) in August. The dissertation must not exceed 10,000 words including in-text citations, footnotes and appendices (but excluding bibliography) to be submitted to the Department in late August.

AN498

Dissertation- MSc China in Comparative Perspective

This information is for the 2024/25 session.

Teacher responsible: Dr Johannes Steinmüller

Availability: This course is compulsory on the MSc in China in Comparative Perspective. This course is not available as an outside option.

Course content: The dissertation must demonstrate an adequate knowledge of relevant social science literature and empirical material from China and elsewhere. It should elaborate a theoretical framework to compare Chinese and non-Chinese data. The topic should have been discussed with and approved by the academic adviser. Note that the dissertation must be based on published sources rather than primary research undertaken by the student.

Teaching: 1 hour of workshops in the AT. 1 hour of workshops in the WT.

There will be a lecture on note taking and avoiding plagiarism in the AT.

Students attend a one-hour dissertation workshop at the end of WT. After deciding on a topic during the WT, in consultation with their academic advisers (and other members of staff where appropriate), students submit a one-page abstract in the first week of the ST. Each student attends a one-on-one dissertation tutorial with his/her academic mentors in the ST. During these, abstracts will be evaluated and commented upon. Students continue to consult their academic mentors during the ST.

The contact hours listed above are the minimum expected.

Assessment: Dissertation (100%, 10000 words).

The dissertation must not exceed 10,000 words including in-text citations, footnotes and appendices (but excluding bibliography) to be submitted to the Department in late August.

AN499

Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Gisa Weszkalnys

Availability: This course is compulsory on the MSc in Anthropology and Development and MSc in Social Anthropology. This course is not available as an outside option.

Course content: The dissertation must demonstrate an adequate knowledge of relevant theoretical literature and the ethnography of one or more contexts. It should attempt to consolidate a theme introduced during the course, developing a sustained research focus on one specific issue in anthropology, using existing ethnographic literature as appropriate. This will normally be a library-based dissertation but may be supplemented by minor original research elements in consultation with the academic adviser. For the MSc Social Anthropology, the problem should be framed with reference to literature from within the discipline of anthropology (drawn from mainstream journals or ethnographic texts). For the MSc Anthropology and Development, the topic should span the fields of both Social Anthropology and Development Studies - it may cover, but need not be restricted to, the area of overlap, i.e. the anthropology of development as narrowly defined.

Teaching: 1 hour of lectures in the AT. 3 hours of lectures in the WT. 3 hours of workshops in the ST. There will be lecture on note taking and avoiding plagiarism in the AT. In addition to the two lectures in the WT and the dissertation workshop in the ST, students will discuss their projects and receive guidance during meetings with their mentors in AT, WT, and ST. The contact hours listed above are the minimum expected.

Assessment: Dissertation (100%, 10000 words) in August. The dissertation must not exceed 10,000 words including in-text citations, footnotes and appendices (but excluding bibliography) to be submitted to the Department in late August.

DV400

Development: History, Theory and Policy

This information is for the 2024/25 session.

Teacher responsible: Prof James Putzel CON.8.03

Availability: This course is compulsory on the MSc in Development Studies and MSc in Political Economy of Late Development. This course is available on the MSc in Anthropology and Development, MSc in Economic Policy for International Development, MSc in Empires, Colonialism and Globalisation, MSc in Environment and Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations and places permit.

Pre-requisites: None

Course content: The course integrates the concepts and perspectives of a range of disciplines to consider: major trends of development and change in modern history and interpretations of them in the social sciences and contemporary economic and social theory and their bearing on the policy and practice of development. During Autumn Term the course critically discusses concepts of 'development' and the historical evolution of paradigms of development thinking and policy. With reference to comparative historical experience, we explore the role of states and markets in development and/underdevelopment, colonial legacies and path dependencies, and developmental states in comparative perspective. We examine the impact of pro-market

reforms, globalisation and financialisation, as well the role of civil society and social movements, and challenges to the reigning development paradigm.

During Winter Term the course draws on recent research and theoretical debates to discuss current cutting edge policy issues and challenges in the developing world including: old and new forms of development aid, transformative social policy, agrarian change, digital technologies, industrial policy and trade, environmental crisis, state fragility and conflict, and challenges to development thinking and practice presented by feminist theory.

Teaching: This course is delivered through a combination of lectures and seminars in the AT & WT. Seminars will be 90 minutes duration and lectures will be 120 minutes duration. There will be a revision session in the final week of WT.

Students on this course will have a reading week in Week 6 of each term.

Formative coursework: One 2,000 word essay with written feedback submitted in Autumn Term and at least two seminar presentations on literature (one in Autumn and one in Winter Term).

Indicative reading: The following are recommended basic readings for the course:

HJ Chang, *Kicking Away the Ladder: Development Strategy in Historical Perspective* (Anthem, 2002).

HJ Chang, *Economics: The User's Guide* (Penguin, 2014)

J Ferguson, *The Anti-Politics Machine: 'Development', Depoliticisation and Bureaucratic Power in Lesotho* (Cambridge, 1990).

K Gardner and D Lewis, *Anthropology and Development: Challenges for the Twenty-First Century* (Pluto, 2015)

M Jerven, *Poor Numbers: How we are misled about African development statistics and what to do about it* (Cornell, 2013).

A Kohli, *State-Directed Development: Political Power and Industrialization in the Global Periphery* (Cambridge, 2004).

T. Mkandawire, *Social Policy in a Development Context* (Palgrave 2004).

D Rodrik, *One Economics, Many Recipes: Globalization, Institutions, and Economic Growth* (Princeton University Press, 2008)

A Sen, *Development as Freedom* (Anchor, 1999).

United Nations, "Transforming Our world: the 2030 Agenda for Sustainable Development" (SDGs) A/RES/70/1 (25 September 2015).

Assessment: Exam (80%, duration: 3 hours) in the spring exam period.

Essay (20%, 2000 words) in the WT.

DV407 Half Unit

Poverty

This information is for the 2024/25 session.

Teacher responsible: Dr Sohini Kar

Availability: This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV407 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: The course is an interdisciplinary analysis of poverty. With attention to both the macro-level political economy of poverty and the micro-level lived experiences of the poor,

we will examine how and why poverty persists in developing countries and analyse policy interventions and their outcomes. The course is interdisciplinary in focus, drawing on a range of methodological approaches to poverty, and does not require any prior mathematical or statistical qualification.

The course begins with an examination of the definition and measurement of poverty. We will then consider social mobility, followed by the spatial dimensions of poverty, including urban and rural poverty. We will then turn to issues of work and employment, social protection, and the politics of poverty, followed by weeks on environmental poverty, and private sector involvement, including the question of financial inclusion. The course will end with focus on successful cases of pro-poor development.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. Student on this course will have a reading week in Week 6.

Formative coursework: Students will give one class presentation and submit one formative essay of 1500 words.

Indicative reading: Javier Auyero, *Patients of the State: The Politics of Waiting in Argentina* (Duke University Press 2012); Abhijit Banerjee and Esther Duflo, *Poor Economics: A Radical Rethinking of the Way to Fight Global Poverty* (Public Affairs/Penguin 2011); Anirudh Krishna, *Broken Ladder: The Paradox and Potential of India's One Billion* (Cambridge University Press 2017); Tania Li *Land's End: Capitalist Relations on an Indigenous Frontier* (Duke University Press 2014); Rob Nixon, *Slow Violence and the Environmentalism of the Poor* (Harvard University Press Ananya Roy, 2011); *Poverty Capital: Microfinance and the Making of Development* (Routledge 2010)

Assessment: Essay (100%, 4000 words) in the WT.

DV410

Research Design and Dissertation in International Development

This information is for the 2024/25 session.

Teacher responsible: Dr Tasha Fairfield, Dr Sohini Kar and Dr Philipa Mladovsky

Availability: This course is compulsory on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.

Course content: This course covers the design, research, and writing of the 10,000 word dissertation in international development. Students will learn about the challenges of conducting independent research in international development, consider the methods used to generate evidence, and to critically assess the quality and validity of research analysis and findings in development research and policy.

Teaching: Students are provided with guidance and training on their dissertation over the course of three terms from their academic mentor, lecturers in DV410, and from individual and group sessions provided through LSE Life and the Methodology Institute throughout the academic year.

Formative coursework: Formative verbal feedback is provided on an ongoing basis from the academic mentor, and in the dissertation proposal form in WT. In ST, formative feedback in a more structured format is provided in the dissertation workshop.

Assessment: Dissertation (100%, 10000 words) in the ST.

DV411 Half Unit Not available in 2024/25

Population, Development and Environment: an Analytical Approach

This information is for the 2024/25 session.

Teacher responsible: Prof Tim Dyson, CON.8.04

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Social Research Methods, MSc in Urban Policy (LSE and Sciences Po), MSc in Urbanisation and Development and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: Using the demographic transition as its framework, the course examines different analytic approaches to the main interrelationships between population change and socio-economic development. It draws on a variety of theoretical and historical experiences to address and explore these interconnections. It aims to provide balance between theoretical understanding, knowledge of empirical evidence and basic causal processes, and implications for policy.

The course begins by providing an overview of the world's current demographic situation at both the global and the regional levels. It then addresses Malthusian and anti-Malthusian perspectives on the basic relationships linking population growth and economic growth. These contrasting perspectives are considered in the context of both historical and contemporary experience. The course then proceeds to assess demographic transition theories and their relationships to theories and processes of economic development, urbanisation and socio-structural change. Urban growth, migration, and urbanization receive special attention. The implications of population change for issues of employment, savings and investment are considered, as are issues relating to energy, food production and security, carbon emissions and climate change. Contemporary neo-Malthusian arguments, with their environmental components are also considered, as are issues relating to women's empowerment, democratization, and population aging. Further details will be provided at the start of the session.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the AT. 1 hour and 30 minutes of lectures in the WT. There will be a reading week in Week 6.

Formative coursework: Students will be given the opportunity to undertake a 'mock examination'. This will be graded and accompanied by written feedback within two weeks of its submission.

Indicative reading: A focussed reading list will be provided.

However, relevant readings include:

- Tim Dyson *Population and Development - The Demographic Transition*, Zed Books 2010;
- Tim Dyson 'A partial theory of world development: The neglected role of the demographic transition in shaping modern society' in *International Journal of Population Geography*, 7, 2001;
- Nancy Birdsall, A C Kelley and S Sinding (eds) *Population Matters: Demographic change, Economic Growth, and Poverty in the Developing World*, Oxford University Press 2001;
- M Livi-Bacci *A Concise History of World Population*, Blackwell Publishers, Oxford 2001;

- T Dyson, *Population and Food: Global Trends and Future Prospects*, Routledge, 1996;
- R H Cassen (Ed), *Population and Development: Old Debates, New Conclusions*, Overseas Development Council, Washington DC, 1994;
- World Bank, *Population Change and Economic Development*, Washington DC, 1985. and various contributions to
- G. McNicoll, J. Bongaarts and E. P. Churchill (eds.) *Population and Public Policy : Essays in Honor of Paul Demeny - Supplement to Population and Development Review 38* (2012) which is available open access.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

DV413 Half Unit Environmental Problems and Development Interventions

This information is for the 2024/25 session.

Teacher responsible: Prof Timothy Forsyth CON.8.05

Availability: This course is available on the MSc in Accounting, Organisations and Institutions, MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Environment and Development, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in International Relations (Research), MSc in Political Economy of Late Development, MSc in Political Science (Global Politics), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration, MSc in Regulation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Also available to students taking MSc International Relations or MSc International Political Economy as part of the LSE-Sciences Po Double Degree in Affaires Internationales programme.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option. There will be limited availability for those outside the ID department.

This course is capped at 50 students.

Pre-requisites: None

Course content: This course is for MSc students who wish to study social and political aspects of environmental change and its implications for international development. The aim is to summarise the key current debates about 'environment and development' from perspectives of social and political theory with special reference to institutional theory, livelihoods, and inclusive policy interventions.

The course is structured to analyse the challenges of making well-informed environmental interventions in the face of poverty and vulnerability, and then seeking practical solutions to these dilemmas. The course first considers the nature of environmental problems within a 'development' context, and what this means for environmental science and norms as applied in developing countries. Themes include assessing environmental science and expertise in concerning adaptation to population growth, resource scarcity, deforestation, desertification, vulnerability to 'natural' disasters, and risks associated with climate change, including questions of gender and environment. As the course progresses, it considers debates about policy interventions such as common property regime theory; theories of the state and environment (including resistance and social movements); community-based

natural resource management and Sustainable Livelihoods; adaptation to climate change; forests; and urban environmental policy (these latter themes involve debates on multi-level, multi-actor governance involving the connections of local development and global climate change policy). The main theoretical content of the course is institutional theory, drawing on both rational choice, but also cultural, historical, and political approaches to institutions.

Teaching: This course is delivered through a combination of lectures and seminars in the Autumn Term. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration. There will also be a revision session in the Winter Term.

Student on this course will have a reading week in Week 6.

Formative coursework: Students will have the opportunity to produce 1 essay in AT

Indicative reading: A detailed weekly reading list will be provided via Moodle. Students are not advised to buy a single textbook for this course but to read selectively and critically from various sources. The following books might be useful introductions.

Adams, W.M. 2019. *Green Development: environment and sustainability in a developing world*. 4th edition. London: Routledge.

Forsyth, T. 2003. *Critical Political Ecology: the politics of environmental science*, London, Routledge

Kohler, P. (2019) *Science Advice and Global Environmental Governance: Expert Institutions and the Implementation of International Environmental Treaties*, London and New York: Anthem Press.

Neumann, R. 2005. *Making Political Ecology*, London: Hodder Arnold.

Nightingale, A. (ed) 2019. *Environment and Sustainability in a Globalizing World*, London: Routledge.

Ostrom, E., Stern P.C., Diet, T., Dulsak, N. and Stonich, S. (eds.) 2002 *The Drama of the Commons: Understanding Common Pool Resource Management*. Washington, D.C.: National Academy Press.

L Schipper and I Burton (eds) (2008) *The Earthscan Reader on Adaptation to Climate Change*, London: Earthscan.

Assessment: Take-home assessment (100%) in January. (2 questions of 1800 words each)

DV415 Half Unit Not available in 2024/25 Global Environmental Governance

This information is for the 2024/25 session.

Teacher responsible: Prof Kathryn Hochstetler

Availability: This course is available on the MSc in Accounting, Organisations and Institutions, MSc in Anthropology and Development, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Environment and Development, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in International Relations (Research), MSc in Political Economy of Late Development, MSc in Political Science (Global Politics), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit. Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: This course is for any MSc student who wishes

to study the politics of global environmental policy from the perspective of environmental governance and international development. The aim is to summarise debates about 'global' environmental problems and to review the contributions of debates about 'governance' to political solutions. The main theoretical focus of the course is on understanding the evolution of environmental policy regimes at multiple scales and with multiple actors. The guiding empirical focus is on the roles of developing countries in global environmental governance and the effects of environmental policy regimes on their development strategies and outcomes. Some of this draws upon debates within International Relations, but this course also considers other theoretical literatures about environmental politics. Only part of global environmental governance takes place in formal spheres specifically devoted to environmental topics. Thus, while about half the course focuses on global efforts to solve environmental problems, especially in international negotiations, the other half examines economic institutions like trade and financial institutions and their intersections with environment and development concerns. Non-state actors including business actors and civil society actors are also considered. Finally, while the course has a global focus, the environmental politics within nation-states is increasingly important for global outcomes and is considered here. To make the course focused, it considers primarily climate change, biodiversity and forests, and human movement in response to environmental change.

Teaching: This course is delivered through a combination of lectures and seminars in the WT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration.

Student on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: A detailed reading list will be presented at the beginning of the term. There is no single textbook for this course, but we recommend the following as a basic background reading list:

Betsill, M. and Corell, E. (eds). 2007. *NGO Diplomacy: The Influence of Nongovernmental Organizations in International Environmental Negotiations*, MIT Press.

Biermann, F, Pattberg, P. and Zelli, F. (eds). 2010. *Global Climate Governance Beyond 2012: Architecture, Agency and Adaptation*, Cambridge University Press.

Ciplet, D., J.T. Roberts, and M.R. Khan. 2015. *Power in a Warming World: The New Global Politics of Climate Change and the Remaking of Environmental Inequality*. MIT Press.

Kopinski, D. and Q. Sun. 2014. *New Friends, Old Friends? The World Bank and Africa When the Chinese Are Coming*. *Global Governance: A Review of Multilateralism and International Organizations* 20(4): 601-623.

Najam, A. 2005. *Developing Countries and Global Environmental Governance: From Contestation to Participation to Engagement*. *International Environmental Agreements* 5: 303-321.

Newell, P. and J.T. Roberts (eds). 2016. *The Globalization and Environment Reader*. Wiley.

Neilson, T.D. 2014. *The Role of Discourses in Governing Forests to Combat Climate Change*. *International Environmental Agreements: Politics, Law and Economics* 14(3): 265-280.

Raustiala, K. and D. Victor. 2004. *The Regime Complex for Plant Genetic Resources*. *International Organization* 58(2): 277-309.

Warner, K. 2018. *Coordinated Approaches to Large-scale Movements of People: Contributions of the Paris Agreement and the Global Compacts for Migration and on Refugees*. *Populations and Environment* 39(4): 384-401.

Assessment: Take-home assessment (100%) in the ST. 2 questions of 2000 words each.

DV418 Half Unit African Development

This information is for the 2024/25 session.

Teacher responsible: Dr Laura Mann CON. 7.10

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Political Science (Global Politics), MSc in Urban Policy (LSE and Sciences Po), MSc in Urbanisation and Development and Master of Public Administration. This course is not available as an outside option. Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit).

Course content: Taking the work of the late Thandika Mkandawire as its inspiration, DV418: African Development applies a critical lens to questions of economic and social development in African countries. It focuses on the role that knowledge and technology play in development and takes a multi-disciplinary approach, combining theory from economics, economic sociology, and science and technology studies (STS) to the topic. Students are not required to have any background in economics to follow and enjoy the course.

The first two weeks explore why foreign scholarship and donor agendas have become so dominant in framing how development is understood in African countries, and how the more transformative visions of the independence era were dismantled by structural adjustment policies and the attack on African civil servants, middle class professionals, business owners and institutions of higher education and science. We encourage students to look beyond the donor-led vision of poverty reduction and think about development as ultimately being autonomy and self-determination. Students are then given a solid foundation into some of the core processes that strengthen this autonomy; 1) domestic resource mobilisation (or the strengthening of domestic sources of finance in place of aid), 2) structural transformation (or the shifting of the workforce out of commodity production into more knowledge-intensive activities) and 3) transformative social policy (or the linking of poverty reduction to broader nation-building and development goals). Students are asked to grapple with the challenges and contingencies of such policy-making: the difficulties of balancing competing demands across regions and class interests, the pressures of domestic political contestation in shaping long-term planning and the risks posed by the global economy in the form of price swings and long-term commodity cycles. The final weeks of the course confront new emerging trends such as the growing penetration of digital technology firms and connectivity into African markets as well as the emergence of new donors such as China, Korea and Brazil. In all cases, we ask students to scrutinise how these new developments reshape the task of structural change. As part of the course, students are encouraged to apply course insights to their own research interests, working in teams to produce podcasts on preferred topics. Past episodes have included examinations into the influence of important African intellectuals, discussions about the roles African research institutions have played in reshaping development agendas and analysis of how the political economy of measurement and quantification shapes African countries' access to finance and creditworthiness. Prospective students are invited to listen to these podcasts to get a feel for the course. In place of student presentations in seminars, students are instead invited to take part in seminar activities designed to apply theory in practical ways. The course also features the 'World's Most Exciting Gameshow about Savings, Taxes and Investment' a quiz show deigned to

make a really important but seemingly dry topic fun. Overall, the course aims to provide students with a really solid understanding about the challenges of African development in the world today but also a critical yet still optimistic vision for the future.

Teaching: This course is delivered through a combination of lectures and seminars in the WT. Seminars will be at or upwards of 90 minutes duration and lectures will be at or above 2 hours duration. There will also be a revision session in early ST. Student on this course will have a reading week in Week 6.

Formative coursework: Students will write a 1,500-word essay chosen from a list of questions drawn from the first half of the course, to be submitted by the Monday at 12:00 of the reading week.

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. The following readings provide an introduction to the course:

1. Mkandawire, T. (2004) "Disempowering New Democracies and the Persistence of Poverty" In *Globalisation, Poverty and Conflict* Dordrecht: Springer. Pages 117-153.
